This course meets the requirements set forth in NFPA 1033 Professional Qualifications for Fire Investigator. This course will give a comprehensive understanding of the principles of fire investigation, scene examination, documentation, evidence collection/preservation, interview techniques, and post-incident investigations. Student who meet all course requirements are eligible for International Fire Service Accreditation Congress (IFSAC) certification through New Mexico Firefighters' Training Academy (NMFTA). Restricted to Community Colleges campuses only.

FIRE 224. Strategy and Tactics
3 Credits (3)
Provides an in-depth analysis of the principles of fire control through utilization of personnel, equipment and extinguishing agents on the fire ground. Covers the development of systematic action plans for emergency situations. Includes recognizing and prioritizing emergency scene needs and developing related strategies, tactics and contingencies. Educates students on how resources should be deployed to implement those plans. Restricted to Community Colleges campuses only.

FIRE 225. Fire Protection Systems
3 Credits (3)
This course provides information relating to the features and design and operation of fire alarm systems, water-based fire suppression systems, special hazard fire suppression systems, water supply for fire protection and portable fire extinguishers. Restricted to: Community colleges only.

FIRE 230. Fire Service Instructor
3 Credits (3)
Provides the instructor candidate with methods and techniques of instruction including oral communications, preparing lesson plans, writing performance objectives, use of audio and other training aids, and the selection, evaluation and preparation of performance tests. Meets and exceeds NFPA 1041 Level I standards. Restricted to: Community Colleges only.

FIRE 232. Firefighter Internship
3 Credits (3)
Application of knowledge, skills and abilities in a fire service department, as a firefighter intern and integrated member of a fire affiliated agency. Restricted to majors.
Prerequisites: FIRE 101, FIRE 102, FIRE 115, FIRE 202 and EMT-B and consent of instructor.
FIRE 233. Practical Approach to Terrorism
3 Credits (3)
Gives responder an overall safety approach in recognizing and responding to incidents involving terrorism. Presents an overview in types of harm, explosive weapons, chemical weapons, biological weapons and radiological weapons. Restricted to: Community Colleges only.
Crosslisted with: LAWE 233

FIRE 252. Vehicle Extrication
2 Credits (1+2P)
This course will train the student to the Vehicle & Machinery Extrication level I as outlined in NFPA 1006, Standard for Technical Rescuer Professional Qualifications. Vehicle & Machinery Extrication certification issued through the New Mexico Firefighter’s Training Academy upon successful completion (IFSAC accredited). May be repeated up to 2 credits. Restricted to Community Colleges campuses only.

FREN-FRENCH

FREN 1110. French I
4 Credits (4)
Intended for students with no previous exposure to French, this course develops basic listening, speaking, reading, and writing skills aiming toward the ACTFL novice-high level. This is an introductory course designed to teach the student to communicate in French in everyday situations and to develop an understanding of French and Francophone cultures through the identification of cultural products and practices, of cultural perspectives, and the ability to function at a survival level in an authentic cultural content. This course will also develop the student’s sense of personal and social responsibility through the identification of social issues.
Learning Outcomes
1. Students can communicate and exchange information about familiar topics using phrases and simple sentences, sometimes supported by memorized language.
2. Students can usually handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.
8. Students can identify beliefs, behaviors and cultural artifacts of the French-speaking world.
9. In English, students will engage with social issues confronting the French-speaking world to continue to develop their sense of personal and social responsibility.

FREN 1120. French II
4 Credits (4)
A continuation of French 1, students will develop a broader foundation in skills gained during the first semester, including understanding, speaking, reading and writing French aiming toward the ACTFL intermediate-low level. This course is designed to increase student fluency in French as applied to everyday situations. Students will also learn to recognize and understand various French and Francophone products, practices, and perspectives, identifying common cultural patterns, describing basic cultural viewpoints, and further developing their sense of personal and social responsibility through the investigation of cultural issues.
Prerequisite(s): C or better in FREN 1110.
Learning Outcomes
1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write briefly about most familiar topics and present information using a series of simple sentences.
4. Students can understand the main idea in short, simple messages and presentations on familiar topics.
5. Students can understand the main idea of simple conversations that they overhear.
6. Students can understand the main idea of short and simple texts when the topic is familiar.
7. Students can describe and make comparisons between decisions about beliefs, behaviors and cultural artifacts of the French-speaking world.
8. Students will engage with social issues confronting the French-speaking world to continue to develop their sense of personal and social responsibility.
FREN 2110. French III
3 Credits (3)
In this third semester course, students will continue to develop a broader foundation in skills gained during the first year, including understanding, speaking, reading and writing French aiming toward the ACTFL intermediate-mid level. This course is designed to teach the student to communicate in a more sustained way in areas of personal interest and in everyday situations. Students will engage in and analyze various French and Francophone products, practices, and perspectives, as well as continue to develop their sense of personal and social responsibility through comparison and contrast of cultural perspectives.
Prerequisite(s): C or better in FREN 1120.

Learning Outcomes
1. Students can participate in conversations on familiar topics using sentences and series of sentences.
2. Students can engage in short social interactions in everyday situations by asking and answering a variety of questions. Students can usually say what they want to say about themselves and their everyday life.
3. Students can write on a wide variety of familiar topics using connected sentences.
4. Students can understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
5. Students can understand the main idea of conversations that they overhear.
6. Students can understand the main idea of texts related to everyday life and personal interests or studies.
7. Students can analyze beliefs, behaviors and cultural artifacts of the French-speaking world, and discuss the nature and value of French and Francophone products, practices, and perspectives.
8. Students will engage with social issues confronting the French-speaking world to continue to develop their sense of personal and social responsibility

FREN 2120. French IV
3 Credits (3)
In this fourth semester course, students will continue to broaden and refine skills gained during previous semesters, including understanding, speaking, reading and writing French aiming at the ACTFL intermediate-high level. This course is designed to teach the student to communicate in a more sustained way in situations that go beyond the everyday. Students will evaluate various French and Francophone products, practices, and create ways to demonstrate their sense of personal and social responsibility through participation in cultural interaction.
Prerequisite(s): C or better in FREN 2110.

Learning Outcomes
1. Students can participate with ease and confidence in conversations on familiar topics. They can usually describe people, places, and things. They can usually talk about events and experiences in various time frames.
2. Students can handle social interactions in everyday situations, sometimes even when there is an unexpected complication.
3. Students can write about topics related to school, work, and community in a generally organized way. They can write some simple paragraphs about events and experiences in various time frames.
4. Students can easily understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
5. Students can usually understand a few details of what I overhear in conversations, even when something unexpected is expressed. The student can sometimes follow what they hear about events and experiences in various time frames.
6. Students can understand the main idea of texts related to everyday life, personal interests, and studies, as well as sometimes follow stories and descriptions about events and experiences in various time frames.
7. Students can analyze beliefs, behaviors and cultural artifacts of the French-speaking world, and recognize and discuss the representations and controversies of French and Francophone products, practices, and perspectives.

FREN 306. Topics in French Culture and Civilization
3 Credits (3)
Selected topics focusing on French culture and civilization. This course is linked to FLIP (Faculty-Led International Programs) when applicable. May be repeated up to 6 credits. Corequisite(s): FREN 2120

FREN 315. French Grammar
3 Credits (3)
A thorough review of French grammar through the study of grammatical elements and the use of grammatical exercises. May be repeated up to 3 credits. Corequisite(s): FREN 2120

FREN 325. Intermediate Conversation
3 Credits (3)
French conversation through intensive oral practice with emphasis on vocabulary acquisition and pronunciation. May be repeated up to 3 credits. Corequisite(s): FREN 2120

FREN 330. Business French
3 Credits (3)
An introduction to standard language within the corporate world in French-speaking countries. Students practice reading, writing, listening, speaking and expanding their vocabulary in professional fields related to business. Corequisite(s): FREN 2120
FREN 352. French Phonetics
3 Credits (3)
Systematic description of modern French pronunciation. Corrective exercises for foreign learners. Formal study of spelling/ pronunciation relationships. May be repeated up to 3 credits. Corequisite(s): FREN 2120

FREN 360. French Cinema
3 Credits (3)
The evolution of contemporary French cinema. A critical understanding of film as an art form and as cultural expression.
Prerequisite: FREN 2120 or consent of instructor.

FREN 362. Contemporary French Culture
3 Credits (3)
Institutions, lifestyles and popular attitudes in modern France.
Prerequisite: FREN 2120 or consent of instructor.

FREN 365V. Perspectives in French Culture
3 Credits (3)
Examines components of French culture through literature, films and other sources. Taught in English. Does not satisfy Arts and Sciences second language requirement. Does not satisfy French major or minor requirements.

FREN 378. Studies in Francophone Cultures
3 Credits (3)
Studies of representative Francophone cultures through their history, literature, music and films.
Prerequisite: FREN 2120 or consent of instructor.

FREN 381. Survey of French Literature I
3 Credits (3)
Literary movements, authors and selected texts of the Middle Ages through the eighteenth century.
Prerequisite: FREN 2120 or consent of instructor.

FREN 382. Survey of French Literature II
3 Credits (3)
Literary movements, authors and selected texts of the nineteenth and twentieth centuries.
Prerequisite: FREN 2120 or consent of instructor.

FREN 385. French Civilization
3 Credits (3)
A detailed study of important events in French civilization from its origins to the twentieth century through the study and discussion of history, literature, fine arts and politics.
Prerequisite: FREN 2120 or consent of instructor.

FREN 386. Contemporary Women Writers in French
3 Credits (3)
Exploration of literary texts by contemporary women writers in France and the Francophone world; emphasizes the cultural contexts that have defined women's relationship to writing. Selections will vary from year to year.
Prerequisite: FREN 2120 or consent of instructor.

FREN 410. Paris: History and Cultures
3 Credits (3)
An in-depth look at history and culture of Paris from its origins to the present.
Prerequisite(s): FREN 212 or consent of instructor.

FREN 425. Advanced French Conversation
3 Credits (3)
Mastery of spoken French language through discussion of personal readings and group work to develop vocabulary, syntactical and conversational skills. The class is conducted entirely in French.
Prerequisite(s): FREN 325 or consent of instructor.

FREN 449. French for Specific Purposes
3 Credits (3)
Directed reading for students to satisfy language requirement for master’s or doctoral programs. May be repeated up to 6 credits.

FREN 451. Special Topics in French
1-3 Credits
Selected topics relating to the cultures or literatures of the countries where French is spoken will be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.
Prerequisite: consent of instructor.

FREN 453. Independent Studies in French
1-3 Credits
Individualized, self-paced projects for advanced students. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

FREN 472. The French Short Story
3 Credits (3)
Study and discussion of French short stories through the ages.
Prerequisite: FREN 2120 or consent of instructor.

FREN 478. Studies in Francophone Cultures Around the World
3 Credits (3)
Advanced studies of representative Francophone cultures through their history, literature, music and films.
Prerequisite: FREN 2120 or consent of instructor.

FREN 486. Advanced Contemporary Women Writers in French
3 Credits (3)
Advanced study of literary texts by contemporary women writers in France and the Francophone world; emphasizes the cultural contexts that have defined women's relationship to writing. Selections will vary from year to year.
Prerequisite: FREN 212 or consent of instructor.

FRMG-FAMILY RESOURCE MGT

FRMG 450. Special Topics
1-4 Credits
Special subjects and credits to be announced in the Schedule of Classes. May be taken for a maximum of 4 credits per semester and a total of 9 credits toward a degree.

FRMG 492. Special Problems
1-4 Credits (1-4)
Individual research study in a selected subject of Family and Consumer Sciences. Maximum of 4 credits per semester and a grand total of 8 credits towards a degree. Consent of instructor required.

FRMG 590. Special Topics
1-4 Credits
Special subjects and credits to be announced in the Schedule of Classes. May be taken for a maximum of 4 credits per semester and a total of 9 credits toward a degree.
FSTE-FOOD SCIENCE & TECHNOLOGY

FSTE 1120. ACES in the Hole Foods I
4 Credits (4)
Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. Restricted to Las Cruces campus only. Students enrolled in this class must possess a Food Handler Card.

Learning Outcomes
1. Apply basic scientific principles, procedures, techniques and standards in the production of food products.
2. Apply principles of sanitation and safety to the production of food products.
3. Assist in the development and evaluation of new and/or existing food products made for human consumption.
4. Prepare a resume and portfolio

FSTE 2110G. Food Science I
4 Credits (3+2P)
The scientific study of the principles involved in the preparation and evaluation of foods. May be repeated up to 4 credits.

Learning Outcomes
1. Explain basic scientific principles involved in the preparation of high quality food products.
2. Utilize scientific inquiry in the experimental investigation of factors influencing the chemical, physical and sensory properties of food products.
3. Apply basic scientific principles, procedures, techniques and standards in the preparation of all types of high quality food products.
4. Use basic methods of quantitative analysis to critically evaluate quality characteristics of food.
5. Use sensory science techniques and terminology to critically evaluate acceptability and quality characteristics of food.
6. Describe high quality characteristics of a variety of food products using appropriate terminology.
7. Apply principles of sanitation and safety to food preparation.

FSTE 2120. ACES in the Hole Foods II
4 Credits (8P)
Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. Student must also have a Food Handler Card.

Prerequisite(s): FSTE 1120.

Learning Outcomes
1. Apply basic scientific principles, procedures, techniques and standards in the production of food products.
2. Apply principles of sanitation and safety to the production of food products.
3. Assist in the development and evaluation of new and/or existing food products made for human consumption.
4. Prepare a resume and portfolio

FSTE 2130G. Survey of Food and Agricultural Issues
3 Credits (3)
Survey of food and agricultural issues, including: geography of food production and consumption, human-agricultural-natural resource relations; agriculture in the United States and abroad; modern agribusiness; food safety; food, agriculture, and natural resources policy; ethical questions; role and impact of technology. Crosslisted with AEEC 2130G.

Learning Outcomes
1. Understand of global agriculture including production techniques used in various geographical regions, consumption trends, and political and social constraints.
2. Synthesis information about agricultural issues and make informed arguments.
3. Articulately discuss modern issues in agriculture.
4. Write coherent arguments relative to personal beliefs regarding agricultural issues.

FSTE 2996. Special Topics
1-4 Credits
Specific topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Learning Outcomes
1. Varies

FSTE 320. Food Microbiology
4 Credits (3+2P)
Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. May be repeated up to 4 credits. Prerequisite(s): (BIOL 2610G and BIOL 2610L), or (BIOL 2110G and BIOL 2110L)

FSTE 325. Food Analysis
3 Credits (2+2P)
Basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. May be repeated up to 3 credits.

Prerequisite(s): CHEM 1215G or consent of instructor.

FSTE 328. Introduction to Food Engineering
3 Credits (2+2P)
Basic engineering principles including mass and energy balances, fluid flow, heat transfer and chemical kinetics and their application to food processing unit operations. Video and laboratory participation are used to enhance course content and relevance. May be repeated up to 3 credits.

Prerequisite(s): MATH 1430G or consent of instructor.

FSTE 331. Food Preservation
3 Credits (2+2P)
Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. May be repeated up to 3 credits.

Prerequisite(s): FSTE 2110G.

FSTE 375. ACES in the Hole Foods III
4 Credits (2+8P)
Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. May be repeated up to 8 credits. Restricted to: FSTE majors.

Prerequisite(s): FSTE 2120 and Have a Food Handler Card.
FSTE 421. Food Chemistry
3 Credits (3)
Comprehensive study of the chemical and physicochemical properties of food constituents. Chemical changes involved in the production, processing, and storage of food products and basic techniques used to evaluate chemical and physicochemical properties of foods.
Prerequisite(s): CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of instructor.

FSTE 423. Food Processing Technologies
4 Credits (3+2P)
Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting.
Prerequisite(s): FSTE 328.

FSTE 425. Sensory Evaluation of Foods
3 Credits (2+2P)
Principles and procedures involved in the sensory evaluation of foods. Physiological, psychological and environmental factors affecting the evaluation of sensory properties. Analysis and interpretation of sensory data.
Prerequisite(s): FSTE 2110G and A ST 311 or MATH 1350G.

FSTE 429. Product Development
3 Credits (1+4P)
Application of chemical, physical, nutritional and psychological principles and experimental methods to the development and evaluation of a food product for a specified food product development competition.
Prerequisite(s): FSTE 320 and FSTE 425.

FSTE 430. Designing and Brewing Great Beers of the World
3 Credits (1+4P)
The science and technology of brewing unit operations and the ingredients used in beer brewing. That knowledge is then applied to designing and brewing classic world beer styles. Styles investigated change every semester but typically include India Pale Ale, Pale Ale, Stout, Porter, Hefeweisen, Scottish Ale, and Black IPA. Comprehensive evaluation of the product relative to style guidelines completes the design-brew-evaluate cycle. Students must be at least 21 years of age on the first day of class. May be repeated up to 3 credits.

FSTE 450. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits towards a degree. Consent of instructor required.

FSTE 475. ACES in the Hole Foods IV
1-4 Credits (2-8P)
Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. May be repeated up to 8 credits. Restricted to: FSTE majors.
Prerequisite(s): FSTE 375 Have a Food Handler Card.

FSTE 480. Food Safety
3 Credits (3)
Provide students’ knowledge on good manufacturing practices and prequisite programs, conduct hazard analysis and determine preventive controls, define process, food allergen, sanitation and supply-chain preventive controls and discuss verification validation, recall and recordkeeping requirements with training and educational opportunities related to current best practices and guidance, and future regulatory requirements by establishing the Produce Safety Alliance. Students participate in a Mock Audit. Participants will receive an official FSPCA Preventive Controls Qualified Individual certificate issues by AFDO after attending this training program.
Prerequisite(s): FSTE 320 or BIOL 311, or consent of instructor.

FSTE 492. Special Problems
1-4 Credits
Individual research study in a selected subject of Family and Consumer Sciences. Maximum of 4 credits per semester and a grand total of 8 credits towards a degree. Consent of instructor required.

FSTE 500. Data Analysis for Food Scientists
3 Credits (3)
An introduction to data analysis of food scientists. Modern statistical techniques used to analyze typical data collected by food scientists and researchers will be covered. Consent of Instructor required.

FSTE 520. Graduate Study in Food Microbiology
3 Credits (2+3P)
Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. Additional work required at the graduate level.
Prerequisite(s): BIOL 2610G/2610L, or BIOL 2110G/2110L, or consent of instructor.

FSTE 521. Graduate Study in Food Chemistry
3 Credits (3)
Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods. Additional work required at the graduate level.
Prerequisite(s): CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of instructor.

FSTE 523. Food Processing Technologies
4 Credits (3+2P)
Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting. Additional work beyond that for FSTE 423 required at the graduate level.
Prerequisite(s): FSTE 528.

FSTE 524. Sensory Evaluation of Foods
3 Credits (2+3P)
Principles and procedures involved in the sensory evaluation of foods. Physiological, psychological and environmental factors affecting the evaluation of sensory properties. Analysis and interpretation of sensory data.
Prerequisite(s): FSTE 2110G and A ST 311 or MATH 1350G.
FSTE 525. Graduate Study in Food Analysis
3 Credits (2+3P)
Covers basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. Additional work required at the graduate level.
Prerequisite(s): CHEM 1215G or consent of instructor.

FSTE 531. Food Preservation
3 Credits (3)
Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. Same as FSTE 331 with additional work required at the graduate level.

FSTE 532. Designing and Brewing Great Beers of the World
3 Credits (2+2P)
The science and technology of brewing unit operations and the ingredients used in beer brewing. That knowledge is then applied to designing and brewing classic world beer styles. Styles investigated change every semester but typically include India Pale Ale, Pale Ale, Stout, Porter, Hefeweisen, Scottish Ale, and Black IPA. Comprehensive evaluation of the product relative to style guidelines completes the design-brew-evaluate cycle. Students must be at least 21 years of age on the first day of class.

FSTE 560. Rumen Microbiology (so)
3 Credits (3)
Same as ANSC 560.

FSTE 575. ACES in the Hole Foods
1-4 Credits (2-8P)
Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. May be repeated up to 8 credits.
Prerequisite(s): Students must possess a food handler card.

FSTE 598. Special Research Programs
1-4 Credits
Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits towards a degree. Consent of instructor required.

FSTE 600. Special Research Program
1-6 Credits (1-6)
Special research for doctoral students. May be repeated up to 6 credits. Consent of Instructor required.
Prerequisite(s): Consent of instructor.

FSTE 601. Cooperative Extension Service Field Experience
1-3 Credits (1-3)
This course will provide students with knowledge and experience in community outreach through the cooperative extension service. This course is required for students pursuing a Ph.D. in FSHN. Students will work collaboratively with extension faculty on applied projects. May be repeated up to 3 credits. Consent of Instructor required. Restricted to FSHN majors.

FSTE 605. Doctoral Seminar
1 Credit (1)
Current topics and research in Food Science and Human Nutrition. Course will include experts from the field as guest speakers. Students will have the opportunity to present their doctoral proposals and/or research findings.

FSTE 620. Advanced Studies in Food Microbiology
3 Credits (3)
Lectures, directed study, discussion and laboratory work in microflora of foods.
Prerequisite(s): FSTE 520 or consent of instructor.

FSTE 621. Advanced Studies in Food Chemistry
3 Credits (3)
Lectures, seminars and/or laboratory work dealing with chemical and physiochemical properties of food constituents. Chemical changes involved in the production and storage of food products.
Prerequisite(s): FSTE 521 or consent of instructor.

FSTE 625. Advanced Studies in Food Analysis
3 Credits (3)
Lectures, seminars, and/or laboratory work dealing with problem solving in food analysis. Consent of Instructor required.
Prerequisite(s): Consent of Instructor.

FSTE 626. Advanced Studies in Sensory Evaluation of Foods
3 Credits (3)
Lectures, direct study, and discussion of such topics as sensory evaluation of foods. Analysis and interpretation of sensory data.
Prerequisite(s): FSTE 525 or consent of instructor.

FSTE 652. Functional Foods for Health
3 Credits (3)
Integration of food science and human nutrition to analyze chemical properties and constituents that make a food product functional. Investigation of the physiological effects of functional foods and their relation to health. Overview of functional food development and production.

FSTE 698. Doctoral Research
1-6 Credits (1-6)
Research. May be repeated up to 6 credits. Consent of Instructor required.

FSTE 700. Doctoral Dissertation
1-12 Credits (1-12)
Dissertation. May be repeated up to 18 credits. Consent of Instructor required.
Prerequisite(s): Passed the qualifying exam and comprehensive exam.
FWCE-FISH,WILDLF,CONSERV ECOL

FWCE 1110G. Introduction to Natural Resources Management
4 Credits (3+2P)
This class covers historical and current issues affecting the management of renewable natural resources with an emphasis on water, soil, rangeland, forest, fish, and wildlife resources. An emphasis is placed on the scientific method and critical thinking. In the laboratory students collect and analyze field data on topics covered above and write up each unit as a laboratory report.

Learning Outcomes
1. Students should be able to recall, describe and explain the laws, treaties and acts that have led to our current management of natural resources in the United States.
2. Students should recognize or explain what ecological processes are, the importance of ecological processes in maintaining ecosystem function and how human activities change ecological processes and the ecosystems dependent on those processes.
3. In each of the six course and lab modules (water quality, soils, forestry, rangeland, wildlife and fisheries) students should be able to recall, describe and explain basic terminology, fundamental ecological principles and management techniques and challenges.
4. Students should be able to interpret data presented graphically and in tables from class exercises and lectures.
5. Students should be able to solve problems scientifically through field data collection, laboratory analyses and the use of quantitative methods (basic statistics, tables and graphs).
6. Students should be able to communicate results from laboratory exercises (6 lab modules) orally and in writing.
7. Students will learn to apply scientific thinking to real world problems through in class discussion and short essays
8. based on material from case studies presented in class and guest speakers.

FWCE 1120. Contemporary Issues in Wildlife and Natural Resources Management
3 Credits (3)
Ecological, socioeconomic, and political issues surrounding the management of our natural resources with an emphasis on fish and wildlife resources.

FWCE 2110. Principles of Fish and Wildlife Management
3 Credits (3)
Basic principles of fish and wildlife management including history, ecology, economics, and policy. Emphasis on wildlife and fisheries. Uses an ecosystem approach integrating living and nonliving resources.
Prerequisite(s): FWCE 1110G.

Learning Outcomes
1. The goal of this course is to provide a firm foundation in the principles of wildlife and fisheries management.
2. Material will include a background in biological principles geared towards animal populations,
3. characteristics and management of the habitats utilized by fish and wildlife, techniques used to study and manage animals and their habitats, and aspects of the human dimension involved in wildlife and fisheries issues.
4. This course serves as a core requirement for degrees offered in the Department of Fish, Wildlife and Conservation Ecology and as a required course for degrees in other departments such as Rangeland Resources.

FWCE 301. Wildlife Ecology
3 Credits (3)
General ecological theory with emphasis on concepts including biogeography, species interactions, population dynamics and disease ecology as they relate to the management and conservation of vertebrates. Prerequisite(s): BIOL 2610G

FWCE 330. Natural History of the Vertebrates
4 Credits (3+3P)
Evolution, ecology, and diversity of vertebrates. Topics include comparative anatomy and physiology, biogeography, community ecology, behavior, and conservation. Laboratory emphasizes identification of local taxa. Field trips may be required.
Prerequisite(s)/Corequisite(s): BIOL 322. Prerequisite(s): BIOL 2610G and BIOL 2610L.

FWCE 355. Wildlife Techniques and Analysis
4 Credits (3+2P)
FWCE 355 will provide a broad overview of basic skills and techniques that are commonly used by biologists in performing management, research, and reporting functions in natural resource fields with an emphasis on wildlife techniques, data processing and analysis.
Prerequisite(s): FWCE 301, A ST 311.

FWCE 357. Fisheries Management and Analysis
4 Credits (3+2P)
Lectures and laboratory exercises provide a broad overview of basic skills and techniques used for assessing and managing fish populations.
Prerequisite(s): FWCE 301 and A ST 311.

FWCE 391. Internship
1-3 Credits (1-3)
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/ U, Audit).
Prerequisite(s): Consent of instructor.

FWCE 393. Professional Experience and Communication
3 Credits (3)
Professional work experience under the supervision of employer and/or a faculty member. Written report and presentation is required.
Prerequisite(s)/Corequisite(s): FWCE 2110.

FWCE 402. Seminar in Natural Resource Management
1 Credit (1)
Review and discussion of current topics in natural resource management.
Prerequisite(s): Senior standing or above.

FWCE 409. Introduction to Population Ecology
3 Credits (3)
Prerequisite(s): MATH 1430G and FWCE 2110.

FWCE 430. Avian Field Ecology
4 Credits (3+3P)
Principles of avian ecology and management with an emphasis on taxonomy, physiology, behavior and field studies. Includes weekly field trips focusing on identification and behavior of Southwest birds.
Prerequisite(s)/Corequisite(s): FWCE 330.
FWCE 431. Mammalogy  
4 Credits (3+3P)  
Classification, identification, anatomy, physiology, life history, and ecology of mammals. Field trips required.  
Prerequisite(s): FWCE 2110 and FWCE 330.  

FWCE 432. Environmental Biology of Fishes  
4 Credits (3+3P)  
What makes a fish, a fish? Mechanisms of circulation, gas exchange, osmotic and ionic regulation, swimming, migration, reproduction, and chemoreception will be covered in this class. Taught with FWCE 532.  
Prerequisite(s): CHEM 1215G and senior standing.  

FWCE 434. Aquatic Contaminants and Toxicology  
4 Credits (3+3P)  
Basic principles and methodologies of aquatic toxicity testing; routes of exposure and modes of action; environmental legislation and ecological risk assessment. Taught with FWCE 534. Crosslisted with: ENVS 434.  
Prerequisite(s): CHEM 1215G and senior standing.  

FWCE 437. Wildlife Damage Management  
3 Credits (3)  
Introduction to basic need and appropriate methods for resolving human-wildlife conflicts and management of animal damage. Socioeconomic, ecological, and political factors. Field trips required. Taught with FWCE 537.  
Prerequisite(s): BIOL 2610G, FWCE 2110, FWCE 301, FWCE 409.  

FWCE 447. Wildlife Law and Policy  
3 Credits (3)  
Introduction to state and federal laws and policies for wildlife and the historical context for their development. Taught with FWCE 547.  
Prerequisite(s): Junior or Senior level standing.  

FWCE 448. Problems  
1-3 Credits (1-3)  
Individual investigations in fishery or wildlife science. Maximum 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.  
Prerequisite(s): 18 credits in WLSC.  

FWCE 450. Special Topics  
1-4 Credits (1-4)  
Specific subjects and credits as announced in the Schedule of Classes. Maximum of 4 credits per semester. May be repeated up to 9 credits. Consent of Instructor required.  

FWCE 457. Ecological Biometry  
3 Credits (3)  
Use of ecological data to test scientific hypotheses, stochastic and statistical models for environmental data, data visualization, likelihood-based and information-based model selection. Emphasis on open-source software tools.  
Prerequisite(s): MATH 1430G or MATH 1511G, A ST 311, FWCE 301.  

FWCE 459. Aquatic Ecology  
4 Credits (4)  
Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Taught with FWCE 559.  
Prerequisite(s): FWCE 301 or BIOL 301, CHEM 1225G, MATH 1430G.  

FWCE 464. Management of Aquatic and Terrestrial Ecosystems  
4 Credits (3+2P)  
Principles and methods for managing aquatic and terrestrial ecosystems and their fish and wildlife resources. Emphasis on quantitative techniques, data collection and analysis for management of systems at a landscape spatial scale.  
Prerequisite(s): (BIOL 301 or FWCE 301) FWCE 330, A ST 311.  

FWCE 467. Herpetology  
4 Credits (4)  
Systematics, taxonomy, ecology, behavior, and conservation of amphibians and reptiles. Field trips required. Taught with FWCE 567.  
Prerequisite(s): FWCE 330.  

FWCE 471. GIS for Natural Resource Scientists  
4 Credits (4)  
Practical GIS class for students with little or no GIS experience. Class focuses on learning to use industry-standard software and applications in natural resource management. Taught with FWCE 571.  

FWCE 472. Wildlife Museum Internship  
1-4 Credits (1-4)  
Substantial directed work experience in various functions of the wildlife natural history museum developed by the student in consultation with the faculty curator. Internships may involve aspects of collection development and management, public education programs, or other related museum activities. Internship must be approved by the faculty curator. May be repeated up to 9 credits. Consent of Instructor required.  
Prerequisite(s): BIOL 2610G and BIOL 2610L.  

FWCE 482. Ichthyology  
4 Credits (3+2P)  
Classification, morphology, identification, life history, and ecology of fishes.  
Prerequisite(s): FWCE 330 or consent of instructor.  

FWCE 509. Population Ecology (s)  
3 Credits (2+2P)  
Quantitative analysis of vital statistics and mechanisms promoting stability in wild populations. Theory and application of life tables and population models.  

FWCE 515. Graduate Seminar  
1 Credit (1)  
Current topics.  

FWCE 530. Large Mammal Ecology, Conservation and Management  
3 Credits (3)  
This course will cover aspects of large mammal ecology, management and conservation. Will include aspects of foraging ecology, resource and habitat selection, competition and resource partitioning, predation and population dynamics. Taught with FWCE 436.  

FWCE 532. Environmental Biology of Fishes  
4 Credits (3+3P)  
What makes a fish, a fish? Mechanisms of circulation, gas exchange, osmotic and ionic regulation, swimming, migration, reproduction, and chemoreception will be covered in this class. Taught with FWCE 432; however, students are responsible for all requirements in FWCE 432, plus additional assignments.  

FWCE 534. Aquatic Contaminants and Toxicology  
4 Credits (3+3P)  
Basic principles and methodologies of aquatic toxicity testing; routes of exposure and modes of action; environmental legislation and ecological risk assessment. Students are responsible for all requirements for FWCE 434 plus additional work.
FWCE 535. Special Topics  
1-4 Credits (1-4)  
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

FWCE 536. Advanced Avian Ecology  
3 Credits (3)  
Focuses on current topics and literature in avian ecology including systematics, mating systems, behavior, physiology, movement patterns and conservation. Includes required overnight field trips.  
Prerequisite(s): Graduate standing or consent of instructor.

FWCE 537. Wildlife Damage Management  
3 Credits (3)  
Introduction to basic need and appropriate methods for resolving human-wildlife conflicts and management of animal damage. Socioeconomic, ecological, and political factors. Field trips required. Taught with FWCE 437. Students are responsible for all requirements for FWCE 437 plus additional work. Prerequisite(s): BIOL 2610G, FWCE 2110, FWCE 301 and FWCE 409

FWCE 540. Wildlife Habitat Relationships  
3 Credits (3)  
The study of wildlife-habitat relationships primarily seeks to describe how the distribution and abundance of resources used for food, cover and security, and constraints on the use of these resources influence the distribution of animals. This course will cover aspects of animal behavior related to how animals select habitat, theoretical models of habitat selection, the influence of inter- and intra-specific interactions on habitat selection, habitat quality, study designs for wildlife-habitat studies, modeling habitat selection and data analyses. Taught with FWCE 440.

FWCE 547. Wildlife Law and Policy  
3 Credits (3)  
Introduction to state and federal laws and policies for wildlife and the historical context for their development. Taught with FWCE 447.

FWCE 548. Graduate Problems  
1-3 Credits (1-3)  
Individual studies in fishery and wildlife sciences. Maximum of 3 credits per semester. No more than 6 credits of this course and FWCE 598, combined, toward a degree. May be repeated up to 6 credits.

FWCE 558. Nonthesis Project  
1-6 Credits (1-6)  
Independent study to satisfy nonthesis project requirement. Maximum of 6 credits toward degree. Available only to nonthesis students. May be repeated up to 6 credits.

FWCE 559. Aquatic Ecology  
4 Credits (4)  
Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Taught with FWCE 459.  
Prerequisite(s): FWCE 301 or BIOL 301, CHEM 1225G, MATH 1430G.

FWCE 567. Herpetology  
4 Credits (4)  
Systematics, taxonomy, ecology, behavior and conservation of amphibians and reptiles. Field trips required. Taught with FWCE 467.

FWCE 571. GIS for Natural Resource Scientists  
4 Credits (4)  
Practical GIS class for students with little or no GIS experience. Class focuses on learning to use industry-standard software and applications in natural resource management. Taught with FWCE 471.

FWCE 582. Ichthyology  
4 Credits (4)  
Classification, morphology, identification, life history, and ecology of fishes. Taught with FWCE 482.

FWCE 598. Special Research Programs  
1-3 Credits (1-3)  
Individual investigations, either analytical or experimental. Maximum of 3 credits per semester. No more than 6 credits of this course and FWCE 548, combined, toward a degree. Not available to students in the nonthesis program. May be repeated up to 6 credits.

FWCE 599. Master's Thesis  
1-9 Credits (1-9)  

FYEX-FIRST YEAR EXPERIENCE

FYEX 1110. First-year Seminar  
1-3 Credits  
This course is designed to help students achieve greater success in college and in life. Students will learn many proven strategies for creating greater academic, professional, and personal success. Topics may include career exploration, time management, study and test-taking strategies to adapt to different learning environments, interpersonal relationships, wellness management, financial literacy, and campus and community resources.  
Learning Outcomes  
1. Recognize the ways in which s/he is responsible for her/his own experience in education.  
2. Identify, locate, and utilize available campus resources essential for academic success.  
3. Create long- and short-term goals associated with student success and career planning.  
4. Implement time management techniques to organize the semester's workload.  
5. Develop strategies to use individual strengths to succeed and reflect upon coursework and course progress in multiple classes to alter academic behaviors and create deeper meaning and learning.  
6. Apply the skills essential for analyzing and solving problems in her/his academic, professional, and personal life, which may include financial literacy and wellness management.  
7. Develop and apply essential skills such as reading, taking notes, studying, memorizing, taking tests, and self-management skills necessary for college success.  
8. Identify and revise self-defeating patterns of behavior, thought, and emotion as well as unconscious limiting beliefs.  
9. Develop supportive relationships with members of the campus community.  
10. Develop essential reading, writing, and critical thinking skills used in study and in research.  
11. Demonstrate understanding of how to use the computer for academic purposes, including learning management systems, email communications, research databases, degree audit, and other online resources.
FYEX 1112. The Freshman Year Experience
3 Credits (3)
An introduction to the university and its resources; emphasis on development of academic and personal skills that enable freshmen to become successful learners. Restricted to: Main campus only.
Prerequisite(s): Freshman Standing Only.
Learning Outcomes
1. Appreciate the goals, methods, and values of higher education
2. Expand intellectual development and self-direction
3. Establish a faculty mentor relationship
4. Enhance knowledge and practice of collaborative learning principles
5. Establish a familiarity with campus resources and student services
6. Develop public speaking, critical thinking, library research, and study strategies
7. Evaluate talents and interest in relation to selecting a major and career planning
8. Examine and clarify values
9. Acknowledge and enhance respect for diversity

FYEX 1116. Managing Your Money
1 Credit (1)
Principles and strategies for effective money management. Includes financial goal setting, both short and long term. Explores the relationship between career and income earning potential. Explores issues of credit and debt management and prevention of identity theft.
Learning Outcomes
1. Demonstrate understanding of the psychology of money and how it relates to personal financial decisions
2. Create realistic short- and long-term financial goals and a personal budget
3. Comprehend and manage college finances, including types of financial aid
4. Appreciate the importance of the Free Application for Federal Student Aid (FAFSA)
5. Describe the financial aspects of career development and how they apply to their own lives, including resume, taxes, salary, benefits
6. Apply principles of student loan management
7. Demonstrate use of credit reports in the prevention identity theft
8. Identify essential elements of smart spending and borrowing
9. Recognize debt and repayment costs
10. Explain the basics of saving and planning for the financial future
11. Create focused, developed, clear discussion posts and other written work for this class

FYEX 1117. Financial Literacy Money Matters
2 Credits (2)
This course will cover a variety of financial literacy topics ranging from budgeting to student loan repayment. This course is designed to assist students in becoming more financially literate. Restricted to Las Cruces campus only.
Learning Outcomes
1. Master effective strategies and other skills related to financial literacy
2. Establish a familiarity with campus resources designed to foster financial literacy and wellness
3. Exhibit intellectual development and self-direction in relation to financial literacy and wellness
4. Identify financial literacy skills which best support individual financial well-being
5. Demonstrate skills and knowledge that allows the student to make informed and effective decisions with all of their financial resources

FYEX 1131. Personal Learning Skills I
1-3 Credits
Individualized programs for self-improvement in skill areas necessary for academic success in the university environment. Each course to bear an appropriate subtitle. May be repeated up to 3 credits. Graded S/U.
Learning Outcomes
1. Synthesize the importance of critical thinking through self-reflection and self-exploration
2. Analyze and apply critical thinking skills using the eight intellectual standards
3. Describe the common barriers to critical thinking and construct problem solving strategies
4. Evaluate information and knowledge to determine misinformation and inaccuracies
5. Demonstrate information literacy by recognizing when information is needed and being able to efficiently locate, accurately evaluate, effectively use, and clearly communicate the information in various formats and mediums

FYEX 1132. Academic and Personal Effectiveness
2 Credits (2)
Learn academic self-analysis skills through the application of study and learning techniques to current course demands. Exposure to a variety of topics which enhance university and life-long learning.
Learning Outcomes
1. Students will demonstrate mastery of course objectives in time management, stress management, test taking, and other skills through completion of activities, quizzes, discussions, and more.
2. Students will be able to identify NMSU campus resources, including their services, location, and contact information.
3. Students will exhibit intellectual development and an improved self-direction through participation in the course.
4. Students will be able to identify and adopt those management skills which best support academic and career choices.
FYEX 1133. Academic Reading and Study Skills
1-4 Credits
Introduction to and practice with strategies for effective reading and studying at the college level. Provides laboratory.

Learning Outcomes
1. Use reading strategies to synthesize texts
2. Identify rhetorical elements of texts
3. Identify and apply different study methods
4. Recognize the role of student support services for student success
5. Identify and practice effective time management skills
6. Demonstrate proficient computer skills
7. Write an effective summary

FYEX 1134. Speed Reading
1 Credit (1)
Introduction to strategies and techniques for increasing reading rate and comprehension related to academic areas.

Learning Outcomes
1. Demonstrate an understanding of speed reading strategies and eye movement drills
2. Expand vocabulary and reading comprehension
3. Improve reading rates and develop reading techniques
4. Demonstrate an understanding of skimming techniques and scanning strategies

FYEX 1140. Career Exploration
1 Credit (1)
Survey of careers possible with community college associate degrees. Information on how to make a career choice.

Learning Outcomes
1. Desired career and lifestyle
2. Areas of interest
3. Skills and abilities
4. Personal values
5. DACC programs that match the student’s interests, abilities, and values
6. Three careers that match the student’s interests, abilities, values, and personality

FYEX 1160. Tutorial
1-3 Credits
Development of specific skills required for college courses, such as note-taking, listening, and test-taking. To be taken in conjunction with a regular designated college course.

Learning Outcomes
1. Demonstrate the ability to organize their time in order to improve study habits.
2. Apply pre-reading strategies to improve reading concentration and comprehension.
3. Demonstrate basic understanding of the systems of the body.
4. Identify techniques to improve personal concentration and comprehension skills.
5. Identify and demonstrate listening skills.
6. Identify effective study and note taking skills.
7. Identify and demonstrate effective test-taking skills.
8. Identify critical thinking skills used in nursing.
9. Demonstrate knowledge of key terms.

FYEX 1170. NMSU Gospel Choir
1 Credit (1)
Students will gain performance experience and exposure to urban contemporary gospel music. Open to all majors. May be taken for unlimited credit. Restricted to: Main campus only.

Learning Outcomes
1. Comprehended the foundation related to singing in a gospel choir setting
2. Demonstrate an understanding of the difference between the musical treble and bass clef
3. Expand vocabulary and reading comprehension of gospel music terminology.
4. Improve the speed and accuracy of music sheet and sight reading

FYEX 1995. Preparing for Cooperative Education & Internship
1 Credit (1)
The Cooperative Education Course provides students with a comprehensive overview of career-related topics designed to assist with securing Cooperative Education and Internship employment. Students learn about philosophies and approaches to resumes, cover letters, interviewing, job searching, networking, and professionalism. A primary focus of the course is on experiential learning where students have opportunities to practice and implement course concepts including interviewing, networking, job searching, and document creation. In addition to exploring topics related to Cooperative Education and Internship, the course is designed to provide students with tools and strategies for successfully navigating the transition from student to employee. Graded: S/U Grading (S/U, Audit). Restricted to Las Cruces campus only.

Learning Outcomes
1. Demonstrate skills related to securing experiential learning experiences
2. Demonstrate knowledge related to the philosophies and approaches to resumes, cover letters, interviewing, cooperative education and internship search, and networking
3. Comprehend the importance of experiential learning experiences in relation to career development
4. Evaluate experiential learning opportunities and demonstrate comprehension of the skills and strategies necessary to transition from student to career

FYEX 1996. Special Topics
1-4 Credits
Covers specific study skills and critical thinking topics. Specific sub-titles to be listed in the Schedule of Classes. May be repeated for a maximum of 8 credits.

Learning Outcomes
1. Varies
FYEX 2111. Critical Thinking Skills
3 Credits (3)
Introduction to critical thinking processes. Develops higher order thinking necessary to evaluate clearly, logically, and accurately one's academic and life experiences. Practical emphases on assertive thinking and perspectives. Prerequisite(s): CCDE 110N
Learning Outcomes
1. Students will raise vital questions and problems, formulating them clearly and precisely.
2. Students will gather and assess relevant information, using abstract ideas to interpret it effectively, come to well-reasoned conclusions and solutions, and them against relevant criteria and standards.
3. Students will think open-mindedly within alternative systems of thought, recognizing and assessing assumptions, implications, and practical consequences.
4. Students will communicate effectively in figuring out solutions to complex problems.

FYEX 2994. Prior Learning: Professional Portfolio
1-6 Credits
Creating a portfolio that outlines professional and educational experiences. Life skills and education learned through workplace training and non-traditional education experiences will be evaluated for consideration of awarding college credit. Students will draft a life history paper, prepare a professional resume, assemble supporting documentation and evidence in support of their petition to receive college credit for prior learning. Culminating activities will include an oral presentation of the portfolio contents. Graded S/U.
Prerequisite(s): CCDE 110N or equivalent.
Learning Outcomes
1. produce writing that is focused on a main point
2. produce writing that is organized
3. produce writing follows task-specific conventions of paragraphing, sentence boundaries, usage, agreement, punctuation and spelling
4. deliver effective speeches
5. organize and present information with a purpose
6. apply effective communication strategies in their personal and professional lives

G S-GRADUATE STUDIES

G S 500. Masters Non-Thesis Final Exam Credit
1 Credit (1)
Course for non-thesis masters students who have completed all program requirements except the final comprehensive exam. A maximum of 12 credits may be earned. Graded S/U.
Prerequisites: advisor signature required.

G S 596. Special Topics
12 Credits (12)
Special Topics course for masters and doctoral students. Max be repeated up to 12 credits. Graded S/U.
Learning Outcomes
1. Varies

G S 600. Doctoral Research
1-15 Credits
Course number is used for assigning credit for research performed prior to successful completion of the doctoral comprehensive examination.

G S 700. Doctoral Dissertation
15 Credits
Dissertation.

GENE-GENETICS

GENE 1110. Experimental Systems in Genetics
1 Credit (1)
Survey of molecular, biochemical, organismal, and computer science based approaches to investigate how genes determine important traits. Historical development and topics of current interest will be discussed.
Learning Outcomes
1. To give the students a historical perspective on the field of genetics.
2. To familiarize the students to introductory concepts and vocabulary to the field of genetics.
3. Introduce experimental systems within the field of genetics and to give perspective to current genetic research.
4. As this course is designed for beginning students as an overview of faculty and research labs on campus. The students majoring in genetics are encouraged to meet with faculty and to explore opportunities available to them on campus

GENE 305. Principles of Genetics
3 Credits (3)
 Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: AGRO 305, ANSC 305, BIOL 305 and HORT 305
Prerequisite(s): BIOL 2610G, BIOL 2110G and either CHEM 1215G or CHEM 1216.

GENE 305 L. Genetic Techniques
1 Credit (3P)
Experimental procedures used in genetic research including: sexual transmission genetics, eukaryotic DNA isolation, DNA marker development and genotyping, polymerase chain reaction, and cytogenetics.
Prerequisite(s)/Corequisite(s): GENE 315, or AGRO/ANSC/BIO/HORT 305.

GENE 315. Molecular Genetics
3 Credits (3)
Covers fundamental principles of DNA structure and replication, transcription, translation, gene regulation, recombinant DNA technology, and a survey of genomics and bioinformatics. Recommend CHEM 313.
Prerequisite(s): CHEM 1225G and BIOL 2110G.

GENE 320. Hereditary and Population Genetics
3 Credits (3)
Covers fundamental principles of reproduction, variation, and heredity in plants and animals including: Mendelian inheritance, mitosis, meiosis, genetic linkage, random mating, genetic drift, natural selection, inbreeding, migration, mutation, interrelationships between individuals, populations and communities and the environment.
Prerequisite(s): CHEM 1215G & BIOL 2110G.

GENE 391. Genetics Internship
1-6 Credits (1-6)
Professional work experience in genetics under the joint supervision of an employer and a faculty member. Documentation of proposed internship activities must be submitted prior to the start of the internship. A written report is required after the internship is completed. No more than 6 credits toward a degree. May be repeated up to 6 credits. Graded: S/U Grading (S/U, Audit).
GENE 440. Genetics Seminar
1 Credit (1)
Organization, preparation, and presentation of genetic studies in model microorganism, plant, or animal systems that have been used to solve problems in molecular, cellular, and developmental biology. Consent of instructor required.
Prerequisite(s): Seniors only; GENE 315 & GENE 320.

GENE 449. Special Problems
1-3 Credits (1-3)
Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 3 credits toward a degree. Consent of instructor required.

GENE 450. Special Topics
1-3 Credits (1-3)
Specific subjects to be announced in the schedule of classes. Maximum of 3 credits per semester and a total of 3 credits toward a degree. Consent of instructor required.

GENE 452. Applied Bioinformatics
3 Credits (3)
Survey and application of publicly available bioinformatic tools that treat genomic DNA, cDNA, and protein sequences, RNA abundance, as well as tools that allow inference based on phylogenetic relationships.
Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315 and GENE 320, and BCHE 341, or BCHE 395.

GENE 486. Genes and Genomes
3 Credits (3)
Extensive coverage of nuclear and organelle genome structure in plants and animals, genome restructuring including duplication, aneuploidy, chromosome translocations and inversions, comparative genomics, and molecular systematics.
Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315, and GENE 320.

GENE 488. Gene Regulation
3 Credits (3)
Extensive coverage of signal transduction processes and approaches used to monitor large scale changes in gene regulation and protein synthesis that occur during development and in response to environmental changes.
Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315.

GEOG-GEOGRAPHY

GEOG 1110G. Physical Geography
4 Credits (3+3P)
This course introduces the physical elements of world geography through the study of climate and weather, vegetation, soils, plate tectonics, and the various types of landforms as well as the environmental cycles and the distributions of these components and their significance to humans.
Learning Outcomes
1. Define, describe, illustrate, distinguish among or explain the use of maps, map scale, globes, map projections, and remote sensing.
2. Define, describe, illustrate, distinguish among or explain the various elements of the earth’s atmosphere, earth’s relation to the sun, incoming solar radiation, the ozone layer, the primary temperature controls, and the unequal heating of land and water.
3. Define, describe, illustrate, distinguish among or explain the weather makers (air temperature, air pressure, humidity, clouds, precipitation, visibility, and wind [including pressure gradient, the Coriolis force, and friction]).
4. Define, describe, illustrate, distinguish among or explain air masses, pressure systems, the various fronts and associated types of storms, weather symbols, monsoons, the various forms of precipitation, along with causes and effects of lightning.
5. Define, describe, illustrate or explain the hydrologic cycle, the characteristics and influences of the oceans and continents on the weather, the Southern Oscillation (i.e., El Nino), the effects of land/water distribution, and climates and their global distribution.
6. Define, describe, illustrate or explain the biosphere, including organisms (flora and fauna), food chains, ecosystems and relationships. Define, describe, illustrate or explain soils in terms of soil-forming processes, components, properties, and classification.
7. Define, describe, illustrate or explain the structure of the earth, the internal processes, weathering and mass wasting, fluvial processes, characteristics and processes of arid regions, processes of coastal and Karst topographical regions, the processes and characteristics of glaciation (mountainous and continental).
8. Define, describe, illustrate, distinguish among or explain specific impacts by humans on weather, climate, and on the ecosystem at large.
9. Perform tests and collect data to analyze and classify weather, climate and landforms characteristics, processes, and impacts both quantitatively and quantitatively. This includes reading and extracting basic information from maps, diagrams, remote sensing devices, graphs, and tables.
10. Apply critical thinking skills such as inductive, deductive, and mathematical reasoning to solve problems using the scientific method. This includes interpreting maps, graphs and photos.
11. Recognize and discuss the effect of human activity on climate, climate change, the greenhouse effect, and on landforms at large.
12. Synthesize information from external, current sources and personal observations and discuss their relationships to class material.
GEOG 1120G. World Regional Geography  
3 Credits (3)  
Overview of the physical geography, natural resources, cultural landscapes, and current problems of the world's major regions. Students will also examine current events at a variety of geographic scales.  
Learning Outcomes  
1. Identify, describe, illustrate, distinguish among or explain the basic concepts of geography, the major world regions, areal differences and similarities, the processes that shape geography natural and human, the use of maps, and the key topics of geographical interpretation (e.g., location, world importance, population, political status, resources, etc.).  
2. Identify, describe, illustrate, distinguish among or explain the regional groups of Europe, its historical background, its languages and religions, major features, the diversified economy, political structures, and impact on globalization.  
3. Identify, describe, illustrate, distinguish among or explain the regional groups of Russia and its satellite nations, its historical background, their languages and religions, major features, their diversified economies, political structures, current problems, and impact on globalization.  
4. Identify, describe, illustrate or explain the regional nations of Middle East, their historical background, their languages and religions, the major features, the diversified economies and political structures, the current problems.  
5. Identify, describe, illustrate, distinguish among or explain the regional groups of Asia, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.  
6. Identify, describe, illustrate, distinguish among or explain the regional groups of the Pacific World, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.  
7. Identify, describe, illustrate, distinguish among or explain the regional groups of Africa, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.  
8. Identify, describe, illustrate, distinguish among or explain the regional groups of Latin America, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.  
9. Identify, describe, illustrate, distinguish among or explain the regional groups of Anglo-America, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.  
10. Collect data to analyze or classify the region various historical developments and trends relating to globalization  
11. Apply critical thinking skills in predicting future developments and impacts in economics, cultural diversity, and political stability globally.  
12. Recognize and discuss current political “hot-spots,” their causes, and potential results with regards to globalization.  
13. Synthesize information the data into a comprehensive world-view.  

GEOG 1130G. Human Geography  
3 Credits (3)  
This course serves as an introduction to the study of human geography. Human geography examines the dynamic and often complex relationships that exist between people as members of particular cultural groups and the geographical "spaces" and "places" in which they exist over time and the world today.  
Learning Outcomes  
1. Locate on maps, globes, and other technologies various geo-political spaces and places around the world, including in the United States.  
2. Describe the primary concepts, theories, methods and terms prevalent in the field of human geography.  
3. Apply core geographic concepts to the spatial patterns demonstrated in real-world scenarios.  
4. Identify the relationships that influence human-environment interaction in a specific location at a specific time.  
5. Define and utilize key concepts to explain human social and cultural change over time and across geographical space.  
6. Explain the geographic context of a current event or conflict.  
7. Identify a current event that illustrates a core cultural geographic concept.  
8. Think critically, discuss, and write about the relationships of the natural world to human geography.  

GEOG 2130. Map Use and Analysis  
3 Credits (2+3P)  
Exploration of the cartographic medium. Development of critical map analysis and interpretation skills, and map literacy. Comprised of traditional lecture, labs, and map use projects.  
Learning Outcomes  
1. Accurately measure bearings and distances on maps.  
2. Read and interpret terrain and landform representation.  
3. Utilize a magnetic compass for basic land navigation and basic map making.  
4. Utilize a GPS instrument for basic land navigation.  
5. Recognize and describe basic physical and cultural spatial patterns portrayed on maps.  
6. Analyze and interpret the significance of spatial patterns portrayed on maps.  
7. Perform elementary spatial statistical analysis on geographic data.  
8. Appreciate and utilize the significance of place names and cultural patterns.  
9. Critically examine maps for evidence of information misuse or propagandist motives.  
10. Recognize and utilize appropriate map categories, symbols, projections, and coordinate systems to effectively and accurately portray, read, analyze, and interpret geographic data.  

GEOG 2996. Special Topics  
1-3 Credits  
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.  
Learning Outcomes  
1. Varies
GEOG 315V. World Agriculture and Food Problems
3 Credits (3)
Survey of food and agricultural issues in the U.S. and other countries. Covers: role of agriculture in economic development; trade in food and agricultural products; global food production, consumption, and marketing patterns; economics of technical change and food assistance; agriculture and the environment. Same as AEEC 315V.

GEOG 325V. New Mexico and the American West
3 Credits (3)
Examination of the cultural and historical patterns, economic activities, and physical characteristics of New Mexico and the American West. Special focus is given to human, environmental, and cultural landscapes, as well as current issues and challenges in New Mexico, the West, and the border region.

GEOG 326. U.S. National Parks
3 Credits (3)
Exploration of origins, landscapes, ecosystems, management issues, and conflicts in U.S. National Parks. The regional geography of the United States as seen through the creation and protection of biologically and culturally significant lands.

GEOG 328V. Geography of Latin America
3 Credits (3)
Explores Latin America from a geographical perspective, integrating environmental, cultural and socioeconomic factors in an in-depth study of the development of the region and contemporary issues and challenges facing the region. Special focus is given to examining applied problems facing Latin America at a range of scales.

GEOG 331V. Europe
3 Credits (3)
Focus on the cultural continent of Europe. An overview of climate, physical geography, and human geography of Europe, including a brief historical geography of the continent. Current environmental, social, and political issues of Europe will be discussed, with a particular focus on the fate of EU.

GEOG 351. Fundamentals of Biogeography
3 Credits (3)
Exploration of life in space and time. Floristic and physiognomic characteristics of the Earth's major ecosystems and their distributions; ecosystem dynamics, evolution, and physical environment. Includes an individual research project resulting in a poster presentation. Crosslisted with: GEOG 557.

GEOG 353. Geomorphology
3 Credits (2+3P)
Examination of the principle theories and concepts of landform creation; exploration of the roles of structure, processes, climate, and time in the formation of various types of landforms. Taught with GEOG 553. Crosslisted with: GEOL 353.

GEOG 357. Climatology
3 Credits (3)
Elements and controls of climate. Energy and hydrologic cycles, general circulation, climate classification, distribution of climate types, microscale effects, applications.

Learning Outcomes
1. Students will be able to describe the fundamental processes that create climate on Earth. Students will be able to describe the physical laws that comprise the climate system. Students will be able to describe the trends in Earth's climate system. Students will be able to summarize our current knowledge of climate change.

GEOG 361V. Economic Geography
3 Credits (3)
The geographic relationships of supply and demand resources, population, and transportation. Site analysis and decision-making in different economic systems and cultures and how these decisions affect the environment and the location of economic activities.

GEOG 363V. Cultural Geography
3 Credits (3)
The world's diverse cultural landscapes. Emphasis on the connections between social, political, religious, and agricultural patterns and the impact of societies on the natural environment.

GEOG 365V. Urban Geography
3 Credits (3)
The global historical development of urban areas, as well as the changing functions of today's cities. A comparison between the North American city system and cities in Europe, Asia, and South America, including the development of the city form, the internal spatial organization of commercial, residential, and industrial areas, and socio-economic and political factors.

GEOG 373. Introduction to Remote Sensing
4 Credits (3+3P)
Introduction to the theory, techniques, and applications of remote sensing. Topics include electromagnetic radiation; remote sensing systems; remote sensing of the biosphere, hydrosphere, atmosphere, lithosphere, and cultural landscapes. Course includes lectures and also labs focused on the basic analysis and interpretation of remote sensing products. Taught with GEOG 573.

GEOG 381. Cartography and Geographic Information Systems
4 Credits (3+3P)

GEOG 401. Internship/Co-op
1-3 Credits (1-3)
Provides an opportunity whereby students work with a local, regional, or federal agency, or private sector firm on applied geographic work, under the supervision of an agency or firm professional and a geography faculty member. Consent of instructor required.

GEOG 435. Environmental Planning
3 Credits (3)
Exploration of planning tools that advance the management of land and water resources, meeting current societal needs, while also minimizing damage to nature and society. Class activities include applied exercises that explore contemporary planning issues, including land conservation, natural hazards, biophysical analysis, water resource management, Federal land issues, and remediation of Superfund sites. Taught with GEOG 535.

GEOG 441. System Design for Geographic Information Science (GIS)
3 Credits (3)
A critical aspect of GIS is its ability to provide the necessary products within the organization within which it is implemented. This is an in-depth analysis of currently accepted system design methodologies intended to create a successful implementation of GIS inside organizations. Crosslisted with: GEOG 581.
GEOG 452. Landscape Ecology  
4 Credits (3+2P)  
Analysis of the structure, function and change of natural and anthropogenic landscapes. Patches, corridors, matrix and network, spatial organization, landscape dynamics, and role of disturbance in overall functioning of landscapes. Role of landscape heterogeneity in landscape management. Crosslisted with: GEOG 552.

GEOG 455. Southwest Environments  
3 Credits (3)  
The U.S. Southwest: physical and human geography, coupled human-environment interactions, causes and consequences of environmental issues, and implications for sustainable development. Taught with GEOG 555.

GEOG 467. Transportation Geography  
3 Credits (3)  
Nature and distribution of land, air and water transport facilities and their importance in regional development.  
Prerequisite(s): C- or better in GEOG 1130G.

GEOG 472. Soil Morphology and Classification  
4 Credits (2+2P)  
Same as SOIL 472. Crosslisted with: SOIL 472.

GEOG 473. Advanced Remote Sensing  
4 Credits (3+3P)  
Introduction to advanced topics in digital image processing, analysis, interpretation, and visualization. Topics include geometric and radiometric correction, image enhancement, image classification, change detection, and accuracy assessment. Lectures focus on the discussion of advanced remote sensing concepts, techniques, and applications; labs are applications-oriented. Taught with GEOG 573.  
Prerequisite(s): C- or better in GEOG 373.

GEOG 481. Fundamentals of Geographic Information Science (GIS)  
4 Credits (3+3P)  
Fundamentals of computer-based systems which organize, analyze, and present spatially referenced data. Crosslisted with: GEOG 578.

GEOG 482. Geodatabase Design  
3 Credits (2+3P)  
A practical introduction to designing geodatabases. The course takes you through the eleven steps of geodatabase design divided into four stages: thematic characterization; developing the database elements, relationships and properties; capture and collection; and finally, implementation and documentation. Taught with GEOG 572.  
Prerequisite(s): C- or better in GEOG 481.

GEOG 483. Field Explorations in Geography  
3 Credits (6P)  
A field-based class where students complete exercises in physical, human, and environmental geography in the Southwest. May be offered as a two-week intensive class where students are away from Las Cruces and camping; or may be offered with weekend field trips depending on the instructor. A lab fee for transportation and other expenses is required. Taught with GEOG 583.

GEOG 488. GIS and Water Resources  
3 Credits (3)  
Explores a range of GIS tools, routines, and data structures and then applies them to a range of research questions and management issues in the area of Water Resources. The class has both a lecture and laboratory component, and students will have opportunities to explore a range of GIS tools in formal lab exercises and a project in the student area of interest. Taught with GEOG 588.

GEOG 491. Special Topics  
1-3 Credits  
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

GEOG 493. Special Problem Research  
1-3 Credits  
For advanced and exceptional students. Research, and preparation of a paper in some phase of geography. A maximum of 6 credits may be earned. Consent of instructor required.

GEOG 495. Directed Readings  
1-3 Credits  
Individual study through selected readings. A maximum of 6 credits may be earned. Consent of instructor required.

GEOG 501. Research Design and History of Geographic Thought  
3 Credits (3)  
Understanding and application of the research process, including conceptualization and definition of a research problem, study designs, data sources, data collection, and report writing in development of geographic thought.

GEOG 535. Environmental Planning  
3 Credits (3)  
Exploration of planning tools that advance the management of land and water resources, meeting current societal needs, while also minimizing damage to nature and society. Class activities include applied exercises that explore contemporary planning issues, including land conservation, natural hazards, biophysical analysis, water resource management, Federal land issues, and remediation of Superfund sites. Taught with GEOG 435.

GEOG 552. Landscape Ecology  
4 Credits (3+2P)  
Analysis of the structure, function and change of natural and anthropogenic landscapes. Patches, corridors, matrix and network, spatial organization, landscape dynamics, and role of disturbance in overall functioning of landscapes. Role of landscape heterogeneity in landscape management. Taught with GEOG 452.

GEOG 553. Geomorphology  
3 Credits (2+3P)  
Examination of the principle theories and concepts of landform creation; exploration of the roles of structure, processes, climate, and time in the formation of various types of landforms. Taught with GEOG 353.

GEOG 555. Southwest Environments  
3 Credits (3)  
The U.S. Southwest: physical and human geography, coupled human-environment interactions, causes and consequences of environmental issues, and implications for sustainable development. Taught with GEOG 455.

GEOG 557. Fundamentals of Biogeography  
3 Credits (3)  
Exploration of life in space and time. Floristic and physiognomic characteristics of the Earth's major ecosystems and their distributions; ecosystem dynamics, evolution, and physical environment. Includes an individual research project resulting in a poster presentation. Additional work for graduate students. Crosslisted with: GEOG 351.

GEOG 571. Cartography and Geographic Information Systems  
4 Credits (3+3P)  
Graduate level design and construction of thematic maps. Introduction to cartographic principles in lecture. Emphasis on map-making using GIS software in the labs. Taught with GEOG 381.
GEOG 572. Geodatabase Design
3 Credits (2+3P)
Graduate level introduction to designing geodatabases. The course takes you through the eleven steps of geodatabase design divided into four stages: thematic characterization; developing the database elements, relationships and properties; capture and collection; and finally implementation and documentation. Taught with GEOG 482.

GEOG 573. Introduction to Remote Sensing
4 Credits (3+3P)
Graduate level introduction to the theory, techniques, and applications of remote sensing. Topics include electromagnetic radiation; remote sensing systems; remote sensing of the biosphere, hydrosphere, atmosphere, lithosphere, and cultural landscapes. Course includes lectures and also labs focused on the basic analysis and interpretation of remote sensing product. Taught with GEOG 373.

GEOG 578. Fundamentals of Geographic Information Science (GIS)
4 Credits (3+3P)
Graduate level fundamentals of computer-based systems which organize, analyze, and present spatially referenced data. Additional work for graduate students. Crosslisted with: GEOG 481.

GEOG 581. System Design for Geographic Information Science (GIS)
3 Credits (3)
A critical aspect of GIS is its ability to provide the necessary products within the organization within which it is implemented. This is an in-depth analysis of currently accepted planning methodologies designed to create a successful implementation of GIS inside organizations. Taught with GEOG 441.

GEOG 582. Advanced Remote Sensing
4 Credits (3+3P)
Graduate level introduction to advanced topics in digital image processing, analysis, interpretation, and visualization. Topics include geometric and radiometric correction, image enhancement, image classification, change detection, and accuracy assessment. Lectures focus on the discussion of advanced remote sensing concepts, techniques, and applications; labs are applications-oriented. May be repeated up to 4 credits.

GEOG 583. Field Explorations in Geography
3 Credits (6P)
A graduate level field-based class where students complete exercises in physical, cultural, and environmental geography in the Southwest. May be offered as a two-week intensive class where students are away from Las Cruces and camping; or may be offered with weekend field trips depending on the instructor. A lab fee for transportation and other expenses is required. May be repeated up to 3 credits.

GEOG 585. Advanced Spatial Analysis
3 Credits (3+2P)
Introduction to basic spatial and aspatial descriptive statistics, statistical analysis of point and area patterns, critical review of quantitative research in geography, and exploration of advanced spatial analysis routines including cluster analysis, hot/cold spot analysis, and spatially weighted regression.
Prerequisite(s): Knowledge of basic statistics recommended.

GEOG 588. GIS and Water Resources
3 Credits (3)
This is a graduate level class that explores a range of GIS tools, routines, and data structures and then applies them to a range of research questions and management issues in the area of Water Resources. The class has both a lecture and laboratory component, and students will have opportunities to explore a range of GIS tools in formal lab exercises and a project in the student’s area of interest. Taught with GEOG 488.

GEOG 595. Directed Readings
1-3 Credits
Advanced individual study through selected readings. May be repeated for a maximum of 6 credits.

GEOG 596. Residency
1-12 Credits (1-12)
A contractual learning experience in the public or private sector under the supervision of a field supervisor and two faculty members. May be repeated up to 12 credits. Consent of Instructor required. Restricted to: Geography majors.

GEOG 598. Selected Topics
1-3 Credits
Readings, discussions, lectures or laboratory studies of selected geographic themes. May be repeated for unlimited credit.

GEOG 599. Master’s Thesis
1-12 Credits (1-12)
Supervised individual study of a student’s thesis topic. May be repeated for an unlimited number of credits. Thesis/Dissertation Grading.

GEOG 601. Introduction to Geographic Theory & Application
3 Credits (3)
This course is intended to introduce Ph.D. and Masters level students to the history, theory, methods, and contemporary literature of Geography as a discipline. It also serves to prepare incoming students to engage in an integrative, theoretically informed and applied research project. Crosslisted with: GEOG 501.

Learning Outcomes
1. Students will be able to demonstrate a clear understanding of multiple themes and topics in Geography. Students will be able to demonstrate a clear understanding of multiple methods suitable for geographic research Students will be able to identify and summarize recent scholarship relevant to the student’s own research interests. Students will be able to communicate clearly and effectively in an oral format. Students will be able to communicate clearly and effectively in a written format. Students will be able to identify a committee chairperson who will guide her or his graduate work. Students will be able to design an integrative program of studies for the remainder of her or his graduate work.

GEOG 602. INTEGRATIVE RESEARCH DESIGN
3 Credits (3)
This seminar focuses on the basic elements of research design, guiding students through the development of a formal proposal for original academic research. This course should be taken after GEOG 601 as part of the required course sequence for PhD students in Geography.
Prerequisite(s): GEOG 601.
GEOG 700. Doctoral Dissertation
1-18 Credits (1-18)
This highly individualized independent study course is for students who have completed their comprehensive exams and are currently working on their doctoral dissertation. May be repeated up to 18 credits. Thesis/Dissertation Grading.

Learning Outcomes
1. Expand their knowledge in a specific area of interest in the discipline of geography.
2. Develop their skills in analyzing, synthesizing, and interpreting geographic data and information.
3. Develop their skills in technical and/or professional writing.
4. Develop their skills in the management and completion of a professional research project.

GEOL-GEOLOGY

GEOL 1110G. Physical Geology
4 Credits (3+3P)
Physical Geology is an introduction to our dynamic Earth introducing students to the materials that make up Earth (rocks and minerals) and the processes that create and modify the features of our planet. The course will help students learn how mountains are formed, how volcanoes erupt, where earthquakes occur, and how water, wind, and ice can shape landscapes. Students will also develop a basic understanding of the ways humans have altered the planet including our impact on natural resources and global climate change.

Learning Outcomes
1. Recall, describe or explain geologic vocabulary.
2. Identify or explain aspects of the geologic time scale and compare the uses and limitations of relative and absolute dating.
3. Recognize or explain the evidence used to support the theory of plate tectonics. Describe or identify how plate tectonics is related to the structure and features of the Earth.
4. Describe the formation of, and describe, compare, and classify minerals.
5. Identify or describe the three main rock types, how each forms in the context of the rock cycle and what each indicates about its environment of formation.
6. Recognize or explain the fundamentals of surface and groundwater hydrology and discuss the impact of human activities on water quality and quantity.
7. Describe or discuss the processes that are responsible for specific geologic hazards (e.g., earthquakes, volcanic eruptions, mass movement, flooding, etc.).
8. Recognize or describe the geologic processes involved in the formation and concentration of geologic resources.

GEOL 1150. Introduction to Rocks and Minerals
3 Credits (2+3P)
This course is an introduction to the characteristics and the formation of the three main types of rocks, the rock-forming minerals, and important ore minerals. An outline of Plate Tectonics will give students the basis to understand how many of these rocks and minerals form. In laboratory exercises, students will gain practice in describing and identifying hand-specimens of the main types of rocks and minerals.

Prerequisite(s)/Corequisite(s): GEOL 1110G.

Learning Outcomes
1. The student Identify the main rock-forming minerals from each mineral group as demonstrated by scoring a total of 70% or more on the relevant laboratory exercise component. Studying minerals, the student will: Identify the main minerals in hand specimens; Describe the environments in which these minerals form; Identify the rock types in which these minerals are found.
2. The student will understand the structure, composition, and genesis of rocks by identifying the principal igneous, sedimentary, and metamorphic rocks, as demonstrated by scoring a total of 70% or more on the relevant laboratory exercise components.
3. Studying rocks, the student will: Define the principal igneous processes and features, identify the most common igneous rocks and their constituting minerals in hand specimens, and discuss their origin and interpretation; Describe the principles of sedimentary processes and features, identify the most common sedimentary rocks in hand specimens, and discuss their origin and interpretation; Describe the principles of metamorphic processes and features, identify the most common metamorphic rocks and constituting minerals in hand specimens, and discuss their origin and interpretation.
GEOL 2130. Introduction to Meteorology
4 Credits (3+3P)
Introduction to Earth’s atmosphere and the dynamic world of weather as it happens. Working with current meteorological data delivered via the Internet and coordinated with learning investigations keyed to the current weather; and via study of select archives.

Learning Outcomes
1. Recall, describe, or explain the various elements of the Earth's atmosphere, Earth's relation to the sun, incoming solar radiation, the ozone layer, the primary temperature controls, and the unequal heating of land and water.
2. Recall, describe, or explain weather variables and parameters.
3. Recall, describe, or explain air masses, pressure systems, the various fronts and associated types of storms, weather symbols, monsoons, the various forms of precipitation, along with causes and effects of lightning.
4. Recall, describe, or explain the hydrologic cycle, the characteristics and influences of the oceans and continents on the weather, the Southern Oscillation (i.e., El Nino), and the effects of land/water distribution.
5. Recall, describe, or explain specific impacts by humans on weather, climate, and on the ecosystem at large.
6. Evaluate and interpret information from maps, diagrams, remote sensing devices, graphs, and tables.
7. Apply critical thinking skills such as inductive, deductive, and mathematical reasoning to solve problems using the scientific method.
8. Recognize and discuss the effect of human activity on climate, climate change and the greenhouse effect.
9. Synthesize information from external, current sources and personal observations and discuss their relationships to class material.

GEOL 2996. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. Community Colleges only. May be repeated for a maximum of 12 credits.

Learning Outcomes
1. Varies

GEOL 305V. Fossils and the Evolution of Life
3 Credits (3)
Examination of the fossil record within the context of geologic time. Special emphasis on critical evaluation of possible terrestrial and extra-terrestrial causes for the evolution of plants and animals and for periods of mass extinction.

GEOL 310. Mineralogy
3 Credits (2+3P)
Crystallography and the physical and chemical aspects of minerals. Prerequisite(s): GEOL 1110G and CHEM 1215G.

GEOL 312. Mineralogy and Optics
3 Credits (2+3P)
Principles of crystallography, optical mineralogy, and mineral chemistry as applied to the identification and characterization of rock-forming minerals. May be repeated up to 3 credits.

Prerequisite(s): GEOL 1110G and GEOL 1150.

Learning Outcomes
1. Students will understand how polarized light interacts with isotropic, uniaxial, and biaxial crystals. Students will be able to recognize optical phenomena resulting from the interaction of polarized light with minerals. Students will become proficient in the recognition of the major rock-forming minerals in thin section. Students will recognize crystal faces according to the Miller Indices. Students will be able to calculate the structural formula of any mineral.

GEOL 320. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

GEOL 335V. Earthquakes, Volcanoes, Hurricanes, and Floods: The Role of Natural Hazards in Civ Past and Present
3 Credits (3)
This class will provide an introduction to geologic hazards and natural disasters, their effects on society and the attempts at preparation and mitigation for these events. Hazards to be covered include earthquakes, volcanic eruptions, floods, landslides, hurricanes, tsunamis and others.

GEOL 353. Geomorphology
3 Credits (2+3P)
Same as GEOG 353. May be repeated up to 3 credits.

GEOL 360. General Geochemistry
3 Credits (3)
The chemistry of the earth and its parts, with emphasis on geochemical systems and cycles, distribution of the elements, and mineral equilibria. Crosslisted with: CHEM 360

Prerequisite(s): CHEM 1215G or CHEM 1120G.

GEOL 399. Igneous and Metamorphic Petrology
3 Credits (2+3P)
Mineralogical composition, classification, and genesis of igneous and metamorphic rocks.

Prerequisite(s): GEOL 312 for geology majors, GEOL 310 for majors other than geology.

GEOL 401. Geology Colloquium
1 Credit (1)
Presentations by visiting speakers and students. May be repeated up to 6 credits.

GEOL 420. Stratigraphy and Sedimentology
3 Credits (2+3P)
Identification and interpretation of sedimentary rocks with emphasis on classification, deposition, and stratal geometry.

Prerequisite: GEOL 310.

GEOL 424. Soil Chemistry
3 Credits (3)
Same as SOIL 424, CHEM 424.

GEOL 441. Tutorial Geology
2 Credits (1+3P)
Participation in teaching lower-division laboratories and conducting tutorial sessions. May be repeated for a total of 4 credits.

Prerequisite: junior or above standing and nomination by faculty.
GEOL 442. Zuhl Collection Internship
1-3 Credits (3-9P)
Applied experience with the NMSU Zuhl Collection, under supervision of the Zuhl Collection Director. Possible activities include developing displays, giving tours, developing outreach materials, etc. May be repeated up to 6 credits. Consent of instructor required.

GEOL 444. GIS for Geology
3 Credits (3)
Prerequisite(s): GEOL 470.

GEOL 449. The Geological Profession
1 Credit (1)
Outcomes assessment exit exams. For graduating seniors only. May be repeated up to 1 credits.
Prerequisite(s): Graduating seniors only.

GEOL 452. Geohydrology
4 Credits (3+2P)
Origin, occurrence, and movement of fluids in porous media assessment of aquifer characteristics. Development and conservation of ground water resources, design of well fields. May be repeated up to 4 credits. Crosslisted with: ENVS 452 and CE 452.

GEOL 455. Undergraduate Research
1-3 Credits
Geological research and field projects for the advanced student. May be repeated for a total of 6 credits. May be repeated up to 6 credits. Consent of instructor required.
Prerequisite(s): Consent of instructor.

GEOL 465. Isotope Geochemistry
3 Credits (3)
Geochemistry of stable and radiogenic isotopes and its application to a wide range of problems in the earth and planetary sciences.
Prerequisite(s): CHEM 1225G, GEOL 360, GEOL 399.

GEOL 470. Structural Geology
3 Credits (2+3P)
Deformation of rocks of the earth. Prerequisite: GEOL 310

GEOL 471. Volcanology
3 Credits (3)
Identification and interpretation of volcanic deposits (including air fall, ash flow tuffs, surges, lava flows), with focus on how the characteristics of these deposits can reveal eruption styles and eruption dynamics. Other topics covered include: magma migration and storage, volcanic hazards, volcano monitoring and volcanoes and climate. Crosslisted with: GEOL 571.
Prerequisite(s): GEOL 399.

GEOL 477. Special Problems
1-3 Credits
Selected advanced topics of current interest or importance. May be repeated for a total of 6 credits.
Prerequisite: consent of instructor.

GEOL 478. Petroleum Systems and Stratigraphy
3 Credits (2+3P)
Sedimentation, stratigraphy, depositional environments, and tectonics in relation to the occurrences and exploration of hydrocarbons. Course includes two off-campus field trips. May be repeated up to 3 credits.
Prerequisite(s): GEOL 420.

GEOL 479. Selected Topics
1-3 Credits
Selected topics in geology. May be repeated for unlimited credit.
Prerequisite: graduate standing and consent of instructor.

GEOL 480. Seminar
1-3 Credits
Supervised study of a subject not covered by regular courses. For organized group meetings treating selected advanced topics. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

GEOL 482. Zuhl Collection Internship
1-3 Credits (1-3)
Applied experience working with the Zuhl Collection of rocks, minerals, fossils, and petrified wood, supervised by the Director of the Zuhl Collection. Activities include tours, display development, research on aspects of the collection, and other work in the museum. May be repeated up to 6 credits. Consent of instructor required. Restricted to: GEOL majors.

GEOL 490. Field Geology
3 Credits (3P)
Mapping, instrumentation, and interpretation of geology in the field.
Prerequisites: either GEOL 420 and GEOL 470.

GEOL 491. Tectonic Evolution of North America
3 Credits (3)
Current ideas regarding the plate-tectonic evolution of North America from Archean through Holocene time, emphasizing the use of regional stratigraphy and structural geology to interpret mountain building, magmatism, and basin development.
Prerequisites: GEOL 1110G, GEOL 399, GEOL 420 and GEOL 470.

GEOL 495. Geology Field Camp
4 Credits (12P)
Three week intensive summer course. Geologic mapping in a site-based setting, emphasizing spatial relations, cross-section construction, and preparation of geologic reports. Prerequisite: GEOL 490

GEOL 499. Senior Thesis
1-3 Credits
Writing a formal paper describing original geologic research conducted under supervision of a faculty advisor. Restricted to majors.
Prerequisite: consent of instructor.

GEOL 501. Geology Colloquium
1 Credit (1)
Presentations by visiting speakers and graduate students.

GEOL 520. Selected Topics
1-3 Credits
Selected topics in geology. May be repeated for unlimited credit.
Prerequisite: graduate standing and consent of instructor.

GEOL 534. Tectonics of Sedimentary Basins
3 Credits (3)
Origin of sedimentary basins with emphasis on subsidence mechanisms, geometry of basin fill, depositional systems and tectonic setting. Course includes two off-campus field trips. Restricted to: GEOL majors.
Prerequisites: GEOL 420 or equivalent or consent of instructor.

GEOL 537. Topics in Volcanology
3 Credits (3)
A seminar-style class exploring volcanic processes. Course topics vary by semester and include: magmatism and volcanism at different tectonic settings (subduction zones, intraplate) and plumbing systems and eruptions of volcanoes (calderas, monogenetic volcanoes).
GEOL 544. GIS for Geology
3 Credits (3)
Prerequisite(s): GEOL 470 or equivalent.

GEOL 558. Neotectonics
3 Credits (3)
Recognition, measurement, and dating of deformation related to earthquakes in the Quaternary geologic record.

GEOL 562. Analytical Geochemistry
3 Credits (3)
Techniques used to determine the major element, trace element and isotopic composition of rocks and minerals and the determination of mineral structure.

GEOL 565. Isotope Geochemistry
3 Credits (3)
Trace element partitioning and isotope systematics applied to problems in petrology and ore genesis.

GEOL 571. Volcanology
3 Credits (3)
Identification and interpretation of volcanic deposits (including air fall, ash flow tuffs, surges, lava flows), with focus on how the characteristics of these deposits can reveal eruption styles and eruptions dynamics. Other topics covered include: magma migration and storage, volcanic hazards, volcano monitoring and volcanoes and climate. Crosslisted with: GEOL 471.

GEOL 578. Petroleum Systems and Stratigraphy
3 Credits (2+3P)
Sedimentation, stratigraphy, depositional environments and tectonics in relation to the occurrences and exploration of hydrocarbons. Course includes two off-campus field trips.

GEOL 582. Plate Tectonics
3 Credits (3)
Plate tectonics as a fundamental model for geological activity on a dynamic earth. Focuses on plate tectonic theory development and mechanisms, plus modern analogs of ancient processes.

GEOL 585. Geochronology
3 Credits (3)
The principles, analytical methods, and interpretation of the most common geochronologic methods.

GEOL 598. Special Research Programs
1-3 Credits
Investigations into contemporary geological problems. May be repeated for unlimited credit.
Prerequisite: graduate standing and consent of instructor.

GEOL 599. Master's Thesis
15 Credits
Thesis research.

**GERO-GERONTOLOGY**

GERO 415. Introduction to Gerontology
3 Credits (3)
Social, psychological, and physiological aspects of aging, with an interdisciplinary emphasis on health promotion. Demographic characteristics of the aging population. Taught with MPH 515.

**GERO 450. Health Promotion for the Older Adult**
3 Credits (3)
Common health concerns and lifestyle issues relevant to older adults. Facts about the content area, health behaviors, and practices to promote health and prevent disease; program development strategies applicable to a variety of settings. Same as MPH 557.

**GERO 451. Aging and Public Policy**
3 Credits (3)
Exploration of public policies relating to elders, historical development, current status and trends in public policy for this age group. Impact of political behavior of elders on policy making and implementing processes.

**GERO 493. Adulthood and Aging**
3 Credits (3)
Normal transitions in later life; those occurring from 40 years of age to the end of life are discussed. Changes in interpersonal relationships and adaptations commonly made by individuals and meeting those alterations are presented through research findings, case studies, and autobibliographies. Same as MPH 593.

**GERO 498. Independent Study**
1-3 Credits
Individual studies with prior approval of health science department head. May be repeated for maximum of 6 credits.
Prerequisite: senior standing and consent of instructor.

**GNDR-WOMEN'S STUDIES**

GNDR 2110G. Introduction to Women, Gender, and Sexuality Studies
3 Credits (3)
This course introduces students to key concepts, debates, and analytical tools informing Women's, Gender, and Sexuality Studies. As an interdisciplinary field of study, Women's, Gender, and Sexuality Studies employs academic perspectives from a range of disciplines and theoretical approaches. It also incorporates lived experience and social location into its object of analysis. Though content will vary according to the expertise and focus of the instructor, this course will develop tools through readings and assignments that critically analyze how gender and sexuality are shaped by different networks of power and social relations and demonstrate how the intersections of race, class, disability, national status, and other categories identity and difference are central to their understanding and deployment. In addition to feminist thought, areas of focus might include gender and sexuality in relation to social, cultural, political, creative, economic, or scientific discourses. This class is recommended for those with a general interest in the topic area as well as for those seeking a foundational course for further study.

**Learning Outcomes**
1. Understand foundational concepts, theories, and approaches to gender and sexuality in conjunction with contemporary social justice movements such as feminism.
2. Describe the range of social and political forces that shape and are shaped by gender, sexuality, race/ethnicity, and other intersecting categories of identity.
3. Demonstrate the ability to conduct intersectional analysis.
4. Develop and improve skills in reading, critical thinking, academic writing, and public speaking.
GNDR 2120G. Representing Women Across Cultures
3 Credits (3)
Historical and critical examination of women’s contributions to the humanities, with emphasis on the issues of representation that have contributed to exclusion and marginalization of women and their achievements.

**Learning Outcomes**
1. To think critically about contemporary discourses on gender, race, sexuality, and class.
2. To understand how forms of identity intersect with one another
3. To explore the ways power and privilege operate in contemporary society
4. To understand some of the ways social inequalities develop, function, and change
5. To further students’ interest in developing their own ideas and research in issues of women and gender, sexuality, race, class, and nation

GNDR 350. Special Topics
3 Credits (3)
The topic of course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 300-level from any specific department. May be repeated under different subtitle(s).

GNDR 352. Women’s & Mass Media
3 Credits (3)
Portrayal and participation of women in mass media from colonial to contemporary times. Same as JOUR 380. May be repeated up to 3 credits.

GNDR 359. Psychology of Gender
3 Credits (3)
Examines theories and research on the psychological functioning of women and men in North American society, including influential theories of gender in psychology and current controversies in the psychological literature. Topics include those unique to women and unique to men in development across the lifespan, work, physical and mental health, sexuality, victimization, gender stereotypes, gender comparisons in abilities and personality, and biological, social, and cultural influences on behavior. Crosslisted with: PSYC 359.

**Prerequisite(s):** PSYC 1110G.

GNDR 360. Masculinities Studies
3 Credits (3)
Explores how contemporary American culture constructs manhood and masculinity. Interrogates ideas and enactments of masculinity, especially as they intersect with race/ethnicity, class, and sexuality. The class asks how sexuality, gender construction, and sex roles inform our understanding of masculinity, as well as how masculinity relates to social power.

GNDR 380V. Women Writers
3 Credits (3)
Introduction to multicultural women’s traditions through intensive study of works by women writers. Same as ENGL 380V.

GNDR 381V. Women’s Health Issues
3 Credits (3)
A focus on the unique issues and problems that confront women today and how they affect the health of women. Same as PHLS 380V.

GNDR 401. Women & Immigration
3 Credits (3)
Explores historical and contemporary immigration processes in/to the U.S. that are shaped by gendered dynamics, societal structures, and the socio-economic conditions that impact immigrant women. Examines how immigrant women use their agency and resistance to overcome exploitative circumstances, and the restraints of immigration laws and policies that impact individual, communal and societal change.

GNDR 402. Transnational Feminisms
3 Credits (3)
Explores dimensions of gender, race, class, and sexuality in conjunction with nationalisms, anti-capitalist struggles, religious fundamentalism, militarism, globalization, eco-critique, and the politics of resistance and social movements.

GNDR 403. Gender & Horror
3 Credits (3)
Explores cultural anxieties and crises through the genre of horror as they relate to issues of gender, sexuality, feminism, and race. Traces ways horror films represent and reconfigure notions of sexuality and gender and ways they reinforce and/or challenge social norms.

GNDR 405. Alternative Genders and Sexualities
3 Credits (3)
Examination of queer, transgender, non-binary, and intersex gender identities and queer/non-heterosexual sexualities through literature, film, and critical theory.

GNDR 407. Gender and Graphic Narrative
3 Credits (3)
Examines graphic novels that disrupt stereotypical ideas about genre, gender, race, class sexuality, as well as common notions about comics. Considers texts that address underrepresented experiences.

GNDR 408. Feminist Food Studies
3 Credits (3)
Examines contemporary food writing as a way to study identity, social structures, and notions of acceptability. Explores how constructions of food shape bodies, desires, and notions of belonging.

**Learning Outcomes**
1. Apply critical thinking and critical writing competencies about race ethnicity, gender sexuality, and class, as well as food and culture.
2. Analyze representations of food and culinary practices in literature, film, and other cultural production as a reflection of larger social forces.
3. Develop a scholarly vocabulary for discussing themes of race and ethnicity, gender and sexuality, class, citizenship and belonging, dislocation and exile, labor and consumption.

GNDR 411. Gender and Migration
3 Credits (3)
Explores multiple experiences of forced migration and displacement. Examines violence, structural dislocation, neoliberalism, globalization, economic collapse and civil war. Discusses local, regional and global responses to creating meaningful change in communities most affected by migration.

GNDR 412. Gender and Film Studies
3 Credits (3)
Examines the shifting cultural and theoretical meanings of gender and sexuality across a variety of film genres while also analyzing the role of formal film elements in shaping representation and reception.
GNDR 433V. Sex, Gender & Culture
3 Credits (3)
This seminar course introduces students to the anthropological study of gender. We take an integrated approach to the subject, considering the ways that different kinds of anthropological research, including archaeology, biological anthropology, ethnography, etc., expand our understanding of the various ways gender is defined across space and time, how it is lived, and what it means to us and others. Students will review the historical context and development of this subject within the field, and will explore such topics as sex versus gender, embodiment and gendered performance, gender hierarchies, the politics of reproduction, and globalization. May be repeated up to 3 credits. Crosslisted with: ANTH 433V.

Learning Outcomes
1. Identify and evaluate different anthropological approaches to the study of gender.
2. Develop and employ analytical and critical thinking skills.
3. Demonstrate proficiency in oral and written communication.
4. Integrate and synthesize knowledge of gender-related topics in a research paper.

GNDR 450. Special Topics
3 Credits (3)
The topic of the course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 400-level from any specific department. May be repeated under different subtitle(s).

GNDR 451. Women’s Studies Practicum
3 Credits (3)
Supervised field work in community setting relating to women. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

GNDR 453. Women and Politics
3 Credits (3)
An examination of women’s participation in U.S. electoral politics as voters, candidates, and officeholders; political activism in issue-based movements and strategies for affecting public policy; leadership as administrators and managers in public service agencies. Also explores the influence of feminism in changing women’s roles socially, legally, and politically. Crosslisted with: POLS 353.

GNDR 454. Women Crossing Borders
3 Credits (3)
Experiences of women who cross class, race, cultural, national, or sexual borders including theories regarding women’s interactions across borders. Emphasis will vary with professor and discipline.

GNDR 455. Feminist Research Methodologies
3 Credits (3)
Study of feminist methodologies, covering transnational decolonizing Indigenous, Chicana feminist approaches to research, such as storytelling, narrative, testimonio, platica, research-based art, performed ethnography and participatory action research.

GNDR 461. Women’s Studies: Independent Study
3 Credits (3)
Individual study of selected topic and writing of research paper. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

GNDR 465. Sex, Gender and the Body
3 Credits (3)
Examines forces at work in defining and differentiating gender, race, sexuality. How ideas about what is ‘natural’ and ‘normal’ for men and women shifted over time. Considers different discourses shaping embodied experiences and categories of identity.

GNDR 471. Seminar in Feminist Theory
3 Credits (3)
Contemporary feminist inquiry and knowledge production concerning social structures and systems, lived realities, and the ways these impact each other.

Learning Outcomes
1. Demonstrate through discussion, research, and writing knowledge of shifts, differences, and debates in feminist theoretical discourse.
2. Analyze a range of contemporary feminist critical theory in discussions, essay assignments, and exams.
3. Formulate theories and forge connections between feminist discourses through written and other assignments.

GNDR 474. Gender in East Asian History
3 Credits (3)
Examines the position of women and the social roles of both sexes in traditional China and Japan, and traces the changes taking place in those societies in the course of modernization in the last century and a half. Scholarly literature and works of Chinese and Japanese literature in translation and cinema used. Same as HIST 474.

GNDR 482. Gender and Popular Culture
3 Credits (3)
Intensive study of the representations of gender in popular culture. Examines the historical, aesthetic, and cultural contexts of these representation and the various critical and theoretical lenses we use to understand them. Repeatable under different subtitles. May be repeated up to 6 credits.

GNDR 484. Women’s Literature
3 Credits (3)
Intensive study of literature by women, in particular historical, aesthetic, cultural, or intellectual contexts. Repeatable under different subtitles. May be repeated up to 12 credits. Crosslisted with: ENGL 481.

GNDR 501. Advanced Women & Immigration
3 Credits (3)
Advanced exploration of historical and contemporary immigration processes in/to the U.S. that are shaped by gendered dynamics, societal structures, and the socio-economic conditions that impact immigrant women. Examines how immigrant women use their agency and resistance to overcome exploitative circumstances, and the restraints of immigration laws and policies that impact individual, communal and societal change.

GNDR 502. Advanced Transnational Feminisms
3 Credits (3)
Advanced analysis of dimensions of gender, race, class, and sexuality in conjunction with nationalism, anti-capitalist struggles, religious fundamentalism, militarism, globalization, eco-critique, and the politics of resistance and social movements.

GNDR 505. Advanced Alternative Genders and Sexualities
3 Credits (3)
Intensive exploration of queer, transgender, non-binary, and intersex gender identities and queer/non-heterosexual sexualities through literature, film, and critical theory.
GNDR 507. Advanced Gender and Graphic Narrative
3 Credits (3)
Advanced examination of graphic novels that disrupt stereotypical ideas about genre, gender, race, class sexuality, as well as common notions about comics. Considers texts that address underrepresented experiences.

GNDR 508. Advanced Feminist Food Studies
3 Credits (3)
Advanced examination of contemporary food writing as a way to study identity, social structures, and notions of acceptability. Intensive exploration of how constructions of food shape bodies, desires, and notions of belonging.

Learning Outcomes
1. Apply critical thinking and critical writing competencies about race ethnicity, gender sexuality, and class, as well as food and culture.
2. Analyze representations of food and culinary practices in literature, film, and other cultural production as a reflection of larger social forces.
3. Develop a scholarly vocabulary for discussing themes of race and ethnicity, gender and sexuality, class, citizenship and belonging, dislocation and exile, labor and consumption.

GNDR 511. Advanced Gender and Migration
3 Credits (3)
Advanced exploration of multiple experiences of forced migration and displacement. Intensive examination of violence, structural dislocation, neoliberalism, globalization, economic collapse and civil war. Discusses local, regional and global responses to creating meaningful change in communities most affected by migration.

GNDR 512. Advanced Gender and Film Studies
3 Credits (3)
Advanced study of the shifting cultural and theoretical meanings of gender and sexuality across a variety of film genres while also analyzing the role of formal film elements in shaping representation and reception.

GNDR 533. Advanced Issues in Women, Gender, and Culture
3 Credits (3)
Survey of the history of anthropological ideas about gender and women, and a comparison of gender roles, relations, and ideologies across a range of cultures.

GNDR 550. Special Topics
3 Credits (3)
The topic of course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 500-level from any specific department. May be repeated under different subtitle(s).

GNDR 554. Advanced Issues in Women Crossing Borders
3 Credits (3)
Experiences of women who cross class, race, cultural, national, or sexual borders including theories regarding women's interactions across borders. Consent of Instructor required.

GNDR 555. Advanced Feminist Research Methodologies
3 Credits (3)
Advanced study of feminist methodologies, covering transnational decolonizing Indigenous, Chicanx feminist approaches to research, such as storytelling, narrative, testimonio, plática, research-based art, performed ethnography and participatory action research.

GNDR 556. Advanced Sex, Gender & the Body
3 Credits (3)
Advanced examination of forces at work in defining and differentiating gender, race, sexuality. How ideas about what is 'natural' and 'normal' for men and women shifted over time. Considers different discourses shaping embodied experiences and categories of identity.

GNDR 557. Advanced Seminar in Feminist Theory
3 Credits (3)
Intensive study of contemporary feminist inquiry and knowledge production concerning social structures and systems, lived realities, and the ways these impact each other.

Learning Outcomes
1. Students will be able to demonstrate through discussion, research, and writing knowledge of shifts, differences, and debates in feminist theoretical discourse.
2. Students will be able to analyze a range of contemporary feminist critical theory in discussions, essay assignments, and exams.
3. Students will be able to formulate theories and forge connections between feminist discourses through written and other assignments.

GNDR 582. Gender and Popular Culture
3 Credits (3)
Intensive study of the representations of gender in popular culture. Examines the historical, aesthetic, and cultural contexts of these representation and the various critical and theoretical lenses we use to understand them. Repeatable under different subtitles. May be repeated up to 6 credits. Crosslisted with: ENGL 582.

GNDR 584. Women's Literature
3 Credits (3)
Intensive study of literature by women, in particular historical, aesthetic, cultural, or intellectual contexts. Repeatable under different subtitles. May be repeated up to 6 credits. Crosslisted with: ENGL 581.

GPHY-GEOPHYSICS

GPHY 340V. Planet Earth
3 Credits (3)

GPHY 450. Selected Topics
1-3 Credits
Readings, discussions, lectures or laboratory studies of selected areas of geophysics. May be repeated for a maximum of 12 credits.
Prerequisite: consent of instructor.

GPHY 520. Selected Topics
1-3 Credits
Formal treatment of graduate topics not covered in regular courses. May be repeated for unlimited credit.
Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.
**GPHY 560. Applied Inverse Theory**  
3 Credits (3)  
Inversion of data with an emphasis on geophysical problems. Curve fitting, tomography, earthquake location, over determined and under determined problems, linear and nonlinear problems. Computing experience desirable. Consent of Instructor required.

**GPHY 598. Special Research Problems**  
1-3 Credits  
Individual investigations, either analytical or experimental. May be repeated for unlimited credit.

**GPHY 599. Master's Thesis**  
1-15 Credits (1-15)  
Thesis.

**GPHY 620. Advanced Topics in Geophysics**  
3 Credits (3)  
Advanced formal treatment of a topic or topics not covered in regular courses. May be repeated for unlimited credit.  
**Prerequisite:** consent of instructor.

**GPHY 700. Doctoral Dissertation**  
1-15 Credits (1-15)  
Dissertation.

**GREX-GRAD CROSS UNIV EXCH**

**GREX 600. Graduate Cross University Exchange**  
1-9 Credits

**GRMN-GERMAN**

**GRMN 1110. German I**  
4 Credits (4)  
Intended for students with no previous exposure to German, this course develops basic listening, speaking, reading, and writing skills aiming toward the ACTFL novice-mid level. This is an introductory course designed to teach the student to communicate in German in everyday situations and to develop an understanding of German cultures through the identification of cultural products and practices, of cultural perspectives, and the ability to function at a survival level in an authentic cultural content. This course will also develop the student's sense of personal and social responsibility through the identification of social issues.  
**Learning Outcomes**  
1. Students can communicate on very familiar topics using a variety of words and phrases that they have practiced and memorized.  
2. Students can write lists and memorized phrases on familiar topics.  
3. Students can recognize some familiar words and phrases when they hear them spoken.  
4. Students can recognize some letters or characters.  
5. Students can understand some learned or memorized words and phrases when they read.  
6. Students can identify beliefs, behaviors and cultural artifacts of the German-speaking world.  
7. In English, students will engage with social issues confronting the German-speaking world to develop their sense of personal and social responsibility.

**GRMN 1120. German II**  
4 Credits (4)  
A continuation of German 1, students will develop a broader foundation in skills gained during the first semester, including understanding, speaking, reading and writing German aiming toward the ACTFL novice-high level. This course is designed to increase student fluency in German as applied to everyday situations. Students will also learn to recognize and understand various German products, practices, and perspectives, identifying common cultural patterns, describing basic cultural viewpoints, and further developing their sense of personal and social responsibility through the investigation of cultural issues.  
**Prerequisite(s):** C or better in GRMN 1110.  
**Learning Outcomes**  
1. Students can communicate and exchange information about familiar topics using phrases and simple sentences, sometimes supported by memorized language.  
2. Students can usually handle short social interactions in everyday situations by asking and answering simple questions.  
3. Students can write short messages and notes on familiar topics related to everyday life.  
4. Students can often understand words, phrases, and simple sentences related to everyday life.  
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.  
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.  
7. Students can sometimes understand the main idea of what they have read.  
8. Students can describe and make comparisons between decisions about beliefs, behaviors and cultural artifacts of the German-speaking world.  
9. Students will engage with social issues confronting the German-speaking world to continue to develop their sense of personal and social responsibility.
GRMN 2110. German III
3 Credits (3)
In this third semester course, students will continue to develop a broader foundation in skills gained during the first two semesters, including understanding, speaking, reading and writing German aiming toward the ACTFL intermediate-low level. This course is designed to teach the student to communicate in a more sustained way in areas of personal interest and in everyday situations. Students will engage in and analyze various German products, practices, and perspectives, as well as continue to develop their sense of personal and social responsibility through comparison and contrast of cultural perspectives.
Prerequisite(s): C or better in GRMN 1120.

Learning Outcomes
1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write briefly about most familiar topics and present information using a series of simple sentences.
4. Students can understand the main idea in short, simple messages and presentations on familiar topics.
5. Students can understand the main idea of simple conversations that they overhear.
6. Students can understand the main idea of short and simple texts when the topic is familiar.
7. Students can analyze beliefs, behaviors and cultural artifacts of the German-speaking world, and discuss the nature and value of German products, practices, and perspectives.
8. Students will engage with social issues confronting the German-speaking world to continue to develop their sense of personal and social responsibility.

GRMN 2120. German IV
3 Credits (3)
In this fourth semester course, students will continue to broaden and refine skills gained during previous semesters, including understanding, speaking, reading and writing German aiming at the ACTFL intermediate-mid level. This course is designed to teach the student to communicate in a more sustained way in situations that go beyond the everyday. Students will evaluate various German products, practices, and create ways to demonstrate their sense of personal and social responsibility through participation in cultural interaction.
Prerequisite(s): C or better in GRMN 2110.

Learning Outcomes
1. Students can participate in conversations on familiar topics using sentences and series of sentences.
2. Students can engage in short social interactions in everyday situations by asking and answering a variety of questions. Students can usually say what they want to say about themselves and their everyday life.
3. Students can write on a wide variety of familiar topics using connected sentences.
4. Students can understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
5. Students can understand the main idea of conversations that they overhear.
6. Students can understand the main idea of texts related to everyday life and personal interests or studies.
7. Students can analyze beliefs, behaviors and cultural artifacts of the German-speaking world, and recognize and discuss the representations and controversies of German products, practices, and perspectives.
8. Students will engage with social issues confronting the German-speaking world to create ways to demonstrate their sense of personal and social responsibility.

GRMN 305. Topics in German Culture
3 Credits (3)
Group study of selected topics focusing on German culture and civilization. This course is linked to FLiP courses (Faculty-Led international Programs) when applicable. Topics identified by subtitle in the Schedule of Classes. GRMN 2120 or equivalent is recommended. May be repeated for up to 6 credits with different topics.

Learning Outcomes
1. (Language) Students will show more confidence in their German speaking, listening and writing abilities.
2. (Culture): Students will demonstrate knowledge of the culture of German institutions, of Berlin (through reflection and discussion sessions) after visits to historical, architectural and cultural sites as well as direct interaction with the locals.
3. (Culture): Students will demonstrate competence at navigating a culture different from their own.
4. (Culture): Students will demonstrate (through reflection and discussion sessions) a greater appreciation for the diversity of German identity.
GRMN 313. Intermediate Composition and Grammar
3 Credits (3)
A review of the rules of German grammar. Development of written German skills. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.

Learning Outcomes
1. Students will show their improvement in writing skills in German through the application of accurate grammar rules practiced in the course.
2. Students will show their improvement in vocabulary usage in German by using more varied and appropriate vocabulary in their writing.
3. Students will show their improvement in writing organization.

GRMN 325. German Conversation I
3 Credits (3)
Intensive oral communication practice. Not open to heritage/native speakers of German. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.

Learning Outcomes
1. Students will be able to demonstrate a quantifiable increase in your conversational skills by comparing your final score (post-test) to their score in the oral pre-test, taken on the first/second day of classes.
2. This means being able to communicate their thoughts, opinions, emotions, etc. as they intend them to be understood by others. AND to be able to understand what others are saying to them so they can respond accordingly better than they did at the beginning of the course, according to the ACTFL Oral Proficiency (OPI) standards.

GRMN 330. Business German
3 Credits (3)
An introduction to standard language within the corporate world in German-speaking countries. During the semester, students will practice reading, writing, listening, speaking and expanding their vocabulary in the fields related to business, technology (ex. Engineering) and health (ex. Nursing, Psychology, etc.).

GRMN 333V. German Culture through Cinema
3 Credits (3)
Events, values and issues in German culture as reflected in motion pictures made in Germany between 1913 and 1990. Familiarization with cinema as art form. Taught in English. Does not satisfy Arts and Sciences second language requirement.

GRMN 340. Introduction to Translation
3 Credits (3)
General aspects of Translation from German to English and English to German. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.

Learning Outcomes
1. Demonstrate understanding of the concept of translation by reading translation theory.
2. Demonstrate an enhanced knowledge of German as related to translation practices.
3. Demonstrate the ability to use specialized vocabulary and concepts in various professional areas.
4. Demonstrate knowledge of the translator's place as a professional.
5. Develop and enhance their linguistic competence and cultural awareness.

GRMN 341. German Folklore and Culture
3 Credits (3)
Customs, traditions, mythology, folk literature and art. Special focus on Grims' fairy tales. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.

Learning Outcomes
1. Demonstrate improvement in reading skills in German by one ACTFL level by augmenting vocabulary, grammatical accuracy, and reading comprehension skills.
2. Describe the 5 basic motifs in folktales (FT) and where they supposedly come from.
3. List and define the 9 types of FT (Teverson) according to their functions.
4. Discuss the impact of the enlightenment in the structure of FT, Evaluate the influence of the industrial revolution and the development of a bourgeois society in FT.
5. Critique the position of the present-day, pop-cult media in its recently created versions of FT.

GRMN 350. Introduction to German Literature
3 Credits (3)
Basic literary genres and major figures in German language literature from its beginnings to the 19th century. GRMN 2120 or equivalent is recommended. To be followed by GRMN 471 - Studies in German Literature. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes
1. Demonstrate an improvement on reading skills in German by one ACTFL level by augmenting active vocabulary, grammatical accuracy and reading comprehension skills.
2. Describe the authors, styles and basic discourses of 3 periods of German-language literature (old and middle high German from early the medieval literature, the protestant reformation; High German and literature academies: the fifteenth to seventeenth Centuries; and the Eighteenth Century.

GRMN 399. Intermediate Independent Study in German
1-3 Credits (1-3)
Tutorial in reading, writing and oral expression for intermediate-level students of German. Topics identified in the Schedule of Classes. GRMN 2120 or equivalent is recommended. May be repeated for up to 6 credits with different topics. May be repeated up to 6 credits. Consent of Instructor required.

Learning Outcomes
1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.

GRMN 410. Practicum in Conversational German
1-3 Credits
Intensive oral communication practice for students with a strong German language foundation. May be repeated up to 6 credits.

Prerequisite(s): GRMN 325 or consent of instructor.

Learning Outcomes
1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.

GRMN 413. Advanced Composition and Grammar
3 Credits (3)
Exercises in written German with emphasis on stylistic features.

Prerequisite: GRMN 313 or consent of instructor.
GRMN 425. Advanced German Conservation
3 Credits (3)
Advanced conversation through intensive oral practice.
Prerequisite(s): GRMN 325 or consent of instructor.

GRMN 451. Special Topics in German
1-3 Credits
Selected topics to be identified by subtitle in the Schedule of Classes. May be repeated for up to 6 credits with different topic. May be repeated up to 12 credits.
Learning Outcomes
1. Objectives for independent study courses will depend on the study/ research interests of the student; they will always vary.

GRMN 453. Independent Studies in German
1-3 Credits (1-3)
Individualized, self-paced research projects for advanced-level students of German. Topics identified by subtitle in the Schedule of Classes. May be repeated up to 12 credits.
Learning Outcomes
1. Objectives for independent study courses will depend on the study/ research interests of the student; they will always vary.

GRMN 455. German for Specific Purposes
1-3 Credits (1-3)
Directed reading for students to satisfy language requirements for master’s and doctoral programs. Topics identified by subtitle in the Schedule of Classes. May be repeated up to 12 credits.
Learning Outcomes
1. Objectives for independent study courses will depend on the study/ research interests of the student; they will always vary.

GRMN 471. Studies in German Literature
3 Credits (3)
Specific literary genres and major figures in German language literature from the 20th century and beyond. Topics identified by subtitle in the Schedule of Classes. May be repeated up to 6 credits. Consent of Instructor required.
Learning Outcomes
1. Demonstrate an improvement of readings skills in German by one ACTFL level by augmenting active vocabulary, grammatical accuracy and reading comprehension skills.
2. Describe the authors, styles and basic discourse of the 5 mentioned periods of German-language literature: 19th Century Realism and Naturalism; The 20th Century; Post-war; Post-Communist Era; The 21st Century. Critique the position of the present day pop cult, transnational, global discourses in rent works of literature.

HIST-HISTORY

HIST 1105G. Making History
3 Credits (3)
General introduction to history: how historians carry out research and develop interpretations about the past.
Learning Outcomes
1. Understand and articulate the differences and similarities between history and memory;
2. Analyze and critically interpret primary sources and understand how others might interpret and use the same material in different ways;
3. Recognize and appreciate the diversity of historical experiences and the uses of historical memory in various societies;
4. Understand how historical experiences that include political, geographical, social, cultural, religious and intellectual experiences have been expressed across historical periods;
5. Understand how historical experiences and memories have shaped contemporary societies;
6. Identify and understand the degree to which history has been used and misused in the past;
7. Demonstrate improvement in their ability to read critically, think logically, and express themselves clearly in writing.

HIST 1110G. United States History I
3 Credits (3)
The primary objective of this course is to serve as an introduction to the history of the United States from the pre-colonial period to the immediate aftermath of the Civil War. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of the United States within the context of world societies.
Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the United States from the pre-colonial period to the immediate aftermath of the Civil War. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply
6. Students will APPLY historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.” Bloom Taxonomy's Cognitive Process: Apply, Analyze
HIST 1120G. United States History II
3 Credits (3)
The primary objective of this course is to serve as an introduction to the history of the United States from reconstruction to the present. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of the United States within the context of world societies.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the United States from the reconstruction to the present. Bloom Taxonomy’s Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy’s Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy’s Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy’s Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy’s Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.” Bloom Taxonomy’s Cognitive Process: Apply, Analyze

HIST 1130G. World History I
3 Credits (3)
The primary objective of this course is to serve as an introduction to global history from the 16th century to the present. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of world societies.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for global history from ancient times to the 16th century. Bloom Taxonomy’s Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy’s Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy’s Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy’s Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy’s Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.” Bloom Taxonomy’s Cognitive Process: Apply, Analyze
HIST 1140G. World History II
3 Credits (3)
The primary objective of this course is to serve as an introduction to global history from ancient times to the 16th century. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of world societies.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of global history from the 16th century to the present. Bloom Taxonomy’s Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy’s Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraises different historical interpretations and evidence in order to construct past events. Bloom Taxonomy’s Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy’s Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy’s Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.” Bloom Taxonomy’s Cognitive Process: Apply, Analyze

HIST 1150G. Western Civilization I
3 Credits (3)
This course is a chronological treatment of the history of the western world from ancient times to the early modern era. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of western civilization within the context of world societies. Selective attention will be given to “non-western” civilizations which impact and influence the development of “western” civilization.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the western world from ancient times to the early modern era. Bloom Taxonomy’s Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy’s Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy’s Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy’s Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy’s Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.” Bloom Taxonomy’s Cognitive Process: Apply, Analyze
HIST 1160G. Western Civilization II
3 Credits (3)
This course is a chronological treatment of the history of the western world from the early modern era to the present. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of western civilization within the context of world societies. Selective attention will be given to "non-western" civilizations which impact and influence the development of "western" civilization.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the western world from the early modern era to the present. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze

HIST 1170. Survey of Early Latin America
3 Credits (3)
The primary objective of this course is to serve as a survey of the history of Latin America from pre-Columbian times through independence. This course will explore the contributions of Indigenous peoples, Africans, and Europeans to the creation of Latin America's diverse societies. The elements of this course are designed to inform students on the major events and trends that are essential to the understanding of the history of Latin America within the context of world societies.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of Latin America from independence to the present. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: analyze, remember, evaluate, create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: understand, evaluate, apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: remember, understand, evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: create, apply
6. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: apply, analyze
HIST 1180. Survey of Modern Latin America
3 Credits (3)
The primary objective of this course is to serve as a survey of the history of Latin America from independence to the present. This course will explore the contributions of Indigenous peoples, Africans, and Europeans to the creation of Latin America's diverse societies. The elements of this course are designed to inform students on the major events and trends that are essential to the understanding of the history of Latin America within the context of world societies.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of Latin America from independence to the present.
2. Bloom Taxonomy’s Cognitive Process: Remember and Understand
3. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context.
5. Students will summarize and appraise different historical interpretations and evidence in order to construct past events.
7. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance.
8. Bloom Taxonomy’s Cognitive Process: remember, understand, evaluate
9. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience.
10. Bloom Taxonomy’s Cognitive Process: create, apply
11. Students will apply historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.”

HIST 2110. Survey of New Mexico History
3 Credits (3)
The primary objective of this course is to serve as an introduction to the history of New Mexico from the pre-Columbian times to the present day. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of New Mexico within the context of the Americas.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of New Mexico from pre-Columbian times to the present day. Bloom Taxonomy’s Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy’s Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy’s Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating, credibility, perspective, and relevance. Bloom Taxonomy’s Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy’s Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.” Bloom Taxonomy’s Cognitive Process: Apply, Analyze

HIST 2245G. Islamic Civilizations to 1800
3 Credits (3)
History of Islamic civilizations to 1800.

Learning Outcomes
1. By the conclusion of the course, the student will be able to demonstrate a knowledge of the history of cultural encounters, exchanges, and conflicts between the Islamic world and the West from the seventh to the sixteenth century;
2. Be able to evaluate the major themes of cultural contact, conflict, and interchange between the Islamic world and the West;
3. Critically read and evaluate historical evidence with the goal of forming an argument about historical evidence
4. Communicate a historical argument logically, clearly, and effectively in writing.
HIST 2246G. Islamic Civilizations since 1800
3 Credits (3)
History of Islamic civilizations since 1800.
Learning Outcomes
1. By the conclusion of the course, the student will be able to demonstrate a knowledge of the history of cultural encounters, exchanges, and conflicts between the Islamic world and the West from the sixteenth century;
2. Be able to evaluate the major themes of cultural contact, conflict, and interchange between the Islamic world and the West;
3. Critically read and evaluate historical evidence with the goal of forming an argument about historical evidence
4. Communicate a historical argument logically, clearly, and effectively in writing.

HIST 2250G. East Asia to 1600
3 Credits (3)
History of China, Korea, Vietnam, and Japan from earliest times through the sixteenth century. Emphasis on cultural and political developments and their social and economic contexts, and the interaction between East Asian societies.
Learning Outcomes
1. Students will learn the analytic skills of interpreting historical changes and continuity.
2. They will assess and use historical documents, and learn how to evaluate varying historical interpretations.
3. Students will understand the chronological and geographic context of important historical events, and will understand the social, technological, economic, cultural and political components of the society under study in this course.
4. Students will understand how people shape their culture and its beliefs, and the way in which prevailing cultures and beliefs shape them.
5. They will understand the historical origins of present-day societies, to learn about their own historical roots.
6. They will learn about the development of structures of power, the production of and distribution of goods, and the relationship between science and technology and human values and behavior.

HIST 2251G. East Asia since 1600
3 Credits (3)
History of China, Korea, Vietnam, and Japan from the sixteenth through the twentieth centuries. Emphasis on internal development of each country, as well as the social and political impact of Western Imperialism, and the emergence of each country’s unique version of modern society.
Learning Outcomes
1. Students will learn the analytical skills of interpreting historical changes and continuity.
2. They will assess and use historical documents, and learn how to evaluate varying historical interpretations.
3. Students will understand the chronological and geographic context of important historical events, and will understand the social, technological, economic, cultural and political components of the society under study in this course.
4. Students will understand how people shape their culture and its beliefs, and the way in which prevailing cultures and beliefs shape them.
5. They will understand the historical origins of present-day societies, to learn about their own historical roots.
6. They will learn about the development of structures of power, the production of and distribution of goods, and the relationship between science and technology and human values and behavior.

HIST 2996. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. Community Colleges only. May be repeated for a maximum of 12 credits.
Learning Outcomes
1. Varies

HIST 300. Special Topics
1-9 Credits (1-9)
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits.

HIST 302V. Science in Modern Society
3 Credits (3)
The social impact of scientific activity and thought from Newton to the present. The growth of modern scientific institutions; the political and social context of modern science. ENGL 1110G recommended.
HIST 308V. The History of Food
3 Credits (3)
From the earliest uses of fire for cooking up through our modern age of fast food and organic gardening, human culinary traditions have long shaped and been shaped by the forces of history. This course offers a general overview of the history of food production and consumption in the West from prehistoric times through the 21st century, with a special focus on the various ways in which social and political history have impacted dining, taste, and cooking. Among a great variety of topics, we will focus on the origins of cooked food; ancient Hebrew dietary laws; the "spice revolution" and the great influence of Arabic cuisine on the kitchens of medieval Europe; emerging ideas about etiquette and table manners including the use of the fork; the advent of print and the first printed cookbooks; the Columbian Exchange and the arrival of foods from the New World; the rise of French cuisine; food and immigration; the global dominance of fast food; and sustainable food production and consumption in the modern era. We will pay a special emphasis throughout the course to the myriad ways in which food production and consumption in history have always been gendered, as well as influenced by ideas about social class.

Learning Outcomes
1. Master a general master narrative about the history of food in the Western World, including a variety of European countries;
2. Analyze the relationship between food and culture in a variety of countries and traditions;
3. Critically read and learn to evaluate secondary historical literature, grasping the strengths and weaknesses of historical monographs; and
4. Communicate a historical argument logically and effectively in a 20-page original research paper.

HIST 311V. Colonial Latin America
3 Credits (3)
Social, political, and economic development from Columbus to the Wars of Independence. Research paper required.

HIST 312V. Modern Latin America
3 Credits (3)
Post-revolutionary developments in the nineteenth and twentieth centuries; the role of Latin America in world affairs and the Inter-American system. Research paper required.

HIST 313. Making the American West
3 Credits (3)
Development of the American West from 1803 to 1900 with emphasis on conquest, federal and corporate roles in western development, environmental change, and the Mythic West. Includes meetings outside regular class time to view feature-length films.

HIST 321V. History of Korea
3 Credits (3)
Social, political, and cultural history of Korea from earliest times through twentieth century. Emphasis on the interaction between Korean traditions and influences from China and the West. May be repeated up to 3 credits.

Learning Outcomes
1. Students will learn the analytical skills of interpreting historical changes and continuity.
2. They will assess and use historical documents, and learn how to evaluate varying historical interpretations.
3. Students will also understand the chronological and geographic context of important historical events, and will understand the social, technological, economic, cultural and political components of the society under study in this course.
4. Students will examine how people shape their culture and beliefs, and the way in which prevailing cultures and beliefs shape them.
5. They will understand the historical origins of present-day societies, to learn about their own historical roots.
6. They will learn about the development of structures of power, the production of and distribution of goods, and the relationships between science and technology and human values and behavior.

HIST 323. Cultural History of Later Imperial China
3 Credits (3)
Covers art and literature of China from the Tang Dynasty (618-907) through the eighteenth century. Developments in cultural theory and practice are traced in the context of the social and economic changes fostering an understanding of Chinese cultural history and its legacy in East Asia today.

HIST 329. History of Egypt
3 Credits (3)
History of Egypt from ancient times to the present.

HIST 330V. Introduction to Religious Studies
3 Credits (3)
Provides an overview of old and new methods and theories for the study of religion. Exposure to the ways groups of people in diverse cultural systems construct and change their religious traditions to serve practical and meaningful ends. Same as SOCI 330V and ANTH 330V.

HIST 331. Rebels, Guerrillas, and Terrorists in Modern Latin America
3 Credits (3)
Explores history of rebels in Latin America. Examines guerilla struggles attaining national dimension. Focus on modern events, including Peru's Shining Path, Colombia's FARC, and Mexico's Zapatistas. Same as POLS 468.
HIST 333. Renaissance Europe
3 Credits (3)
This course explores the cultural, social, and political developments of early modern Europe between 1350-1650. This period witnessed a dramatic transformation between the medieval and modern worlds: a transition marked by new historical and artistic visions, the invention of the printing press, the discovery of the New World, the permanent fracturing of Christianity during the Protestant Reformation, the scientific revolution, and the rise of capitalism as a world system. We will consider these and other transformations in this time period both as they were understood by elite society as well as the impact of these innovations upon the daily lives of everyday people and women in particular.

Learning Outcomes
1. Identify the key historical facts, values, and ideas that shaped the history of Europe between 1400–1650;
2. Analyze the causes and effects of the Renaissance, the Age of Encounters, the Reformation, and the Scientific Revolution;
3. Identify the major artistic, literary, and technological contributions of individuals during this time period;
4. Describe how cultural exchanges reveal the global context of events in early modern Europe;
5. Create well-supported historical arguments based on primary and secondary source evidence.

HIST 334. Art and Life in Renaissance Italy
3 Credits (3)
Examines how Italian Renaissance textual and visual culture offered Europe new ways of seeing and portraying itself, 1350-1550. Topics include: Florence, Venice, Rome, Leonardo, Michelangelo, Titian, humanism, the Medici, and republican and courtly culture. Same as ARTH 444.

HIST 338. World War I
3 Credits (3)
Cultural, social, and intellectual background and impact of World War I. Military and diplomatic events of the war. Consequences of the war.

HIST 339. World War II
3 Credits (3)
Social, cultural and political aspects of World War II, in addition to traditional military events. Emphasis on U.S. involvement.

HIST 343. Recent American Military History
3 Credits (3)
Emphasis on American wars since the Civil War, and on factors contributing to the development of modern military systems.

HIST 347. Civil War Era 1840-1877
3 Credits (3)
Mexican-American War, development of secession, American Civil War, Reconstruction.

HIST 354. Modern Mexico
3 Credits (3)
Examines interactions of peasants, women, indigenous peoples, and economically/politically dominant groups within the Mexican state from 1810 to the present. Assesses the contentious relationship between Mexico and the United States, focusing on the Mexican-U.S. border.

HIST 356. The Mexican Revolution
3 Credits (3)
Examines the history of modern Mexico through the lens of the Mexican Revolution, 1910-1920. Course covers military, political, social, cultural and economic developments that shaped Mexico during and after the Revolution.

HIST 361. Afro-American History I
3 Credits (3)
African background, slave trade, slavery; Civil War and Reconstruction; free blacks in a white society to about 1900.

HIST 362. Afro-American History II
3 Credits (3)
Black Americans in the United States in the twentieth century; segregation; black leaders, organizations, methods and goals; white reaction; the struggle for equality.

Learning Outcomes
1. Students will evaluate and employ primary and secondary sources in order to understand varying historical interpretations and craft their own interpretations of historical evidence in discussions and essays. Students will analyze and compare political, economic, social and intellectual institutions, structures and processes over the period of the Civil Rights Movement through readings, interaction with primary source documents, essays, and discussions. Students will strengthen their argumentative skills through online class discussions and written assignments. Students will demonstrate an understanding of academic honesty and the ability to cite, paraphrase, and quote sources. Students will demonstrate an ability to think about the interaction between present and past issues presented in the class.

HIST 366V. British Imperialism
3 Credits (3)
Survey of the activities of the British empire from the 16th century through the 20th century, with emphasis on Ireland, North America and India. Assesses the impact of imperial activities on British domestic politics, culture and social history, and the process and impact of decolonization.

HIST 368. Teaching History
3 Credits (3)
Philosophical and practical issues of teaching history are explored. Designed to help prospective teachers at all levels clarify their views about studying history. A variety of pedagogical strategies for teaching history are explored.

HIST 369. History of Latinos in the United States
3 Credits (3)
Development of Latino communities since 1500 in what is today the U.S. Emphasis on 1846 to present, and on Mexican Americans, Puerto Ricans, and Cuban Americans. Major themes: race, colonialism, immigration, nationalism, class, culture, gender, and politics.

HIST 371. Ancient Greece
3 Credits (3)
Social, cultural, and political history of Greece from the Minoan to Hellenistic periods.

HIST 372. The Roman World
3 Credits (3)
Republic and Empire; Rome as a world power; institutional, cultural, and intellectual contributions; decline and fall.

HIST 373. Islam and the West: Cultural Contacts, Conflicts and Exchanges
3 Credits (3)
Examines interactions, encounters and cross-fertilization between the Islamic world and the West from the seventh to the twenty-first centuries. Course includes origins of Islam, relationships between Islam, Judaism, and Christianity, and concludes with the post 9/11 present.
HIST 374V. The European City: History and Culture  
3 Credits (3)  
Course presents the rich, complex history and cultures of European cities from ancient to modern times, linking these cities to crucial issues in European history. Crosslisted with HNRS 374V, GEOG 374V, POLS 374V.

HIST 379V. The History of Italy from the Etruscans to the Mafia  
3 Credits (3)  
Italy is beloved by many, for its food, language, and art; however, we often understand it only superficially, and often fail to grasp the darker elements of its history. This class will consider the history of the Italian peninsula from the time of its earliest inhabitants, the Etruscans, up through the twenty-first century. We will consider topics such as the Roman world and its legacy, the rise of Christianity, the growth of medieval towns and their economies, Renaissance, the Risorgimento or the formation of the modern nation of Italy, Italian fascism, the wars of the twentieth century, Italian film, the history of Italian food including pizza and pasta, Italian communism, and the growth of organized crime and the mafia. Special attention will be paid throughout to the relationship between Northern and Southern Italy, as well as the special city of Venice and its relationship to the rest of the peninsula.

Learning Outcomes  
1. Master a general master narrative about the history of Italy from its earliest inhabitants through the twenty-first century  
2. Identify a variety of developments in the history of Italian culture, including art, literature, food, and film;  
3. Critically read and evaluate primary and secondary historical sources and  
4. Communicate a historical argument logically and effectively in a 15-page original research paper.

HIST 382V. Modern Russia  
3 Credits (3)  
Domestic policies and foreign relations from mid-nineteenth century to the present with emphasis on the Soviet period.

HIST 383. Germany  
3 Credits (3)  
Political, social, and cultural developments from the eighteenth century to the present, with emphasis on the Nazi era. Same as POLS 473.

HIST 386. New Mexico History  
3 Credits (3)  
Economic, political and social development of New Mexico from exploration to modern times.

HIST 387. Spain in the New World: Conquest, Conflict, and Cultural Exchange  
3 Credits (3)  
The history of Spain, with a focus on Spain’s interaction with the New World. May be repeated up to 3 credits.

Learning Outcomes  
1. The student will be able to demonstrate a knowledge of the history of Spanish contacts, conquests, and influences in the New World from the late fifteenth century until the early twenty-first century;  
2. Be able to evaluate the major themes of cultural contact, conflict, and interchange between Spain and the New World; Critically read and evaluate historical evidence in order to construct past events;  
3. Communicate a historical argument logically, clearly, and effectively in writing.

HIST 390V. The Holocaust  
3 Credits (3)  
The attack upon European Jews by Adolf Hitler and the National Socialist Party in Germany and occupied Europe from his accession to chancellor in 1933 until the end of the Third Reich in 1945.

HIST 395. From Rule Britannia to Cool Britannia: Twentieth-Century Britain  
3 Credits (3)  
Edwardian Era, World War I; Reconversion, the 1926 General Strike; the Great Depression and appeasement; Churchill and the war against Nazi Germany; nationalization and the Welfare State.

HIST 397. Introduction to Public History  
3 Credits (3)  
Surveys how historians do history in museums, archives, government agencies, and in communities. Hands-on experience provides students a better understanding of history and how historians work outside of the classroom. Seminar project required.

HIST 398. Historians and History  
3 Credits (3)  
General historiography and philosophy of history, historical methodology, research, and writing; bibliographical aids and their uses. May be repeated up to 3 credits. Restricted to: HIST majors.

HIST 400. Special Topics  
1-9 Credits (1-9)  
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits.

HIST 402. Special Topics in European History  
3 Credits (3)  
Special topics in European history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 403. Special Topics in Middle Eastern History  
3 Credits (3)  
Special topics in Middle Eastern history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 404. Special Topics in Asian History  
3 Credits (3)  
Special topics in Asian history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 406. Special Topics in United States History  
3 Credits (3)  
Special topics in United States history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 412. Travel Writing  
3 Credits (3)  
Explores how writers describe their travels with an emphasis on the history of a place. Semester paper required. Crosslisted with: HIST 512.

HIST 413. Native American History  
3 Credits (3)  
Seminar explores the history of Native Americans, including tribal conflicts, interactions with Europeans and Euro-Americans, land loss, degradation of natural resources, federal Indian policy, pan-Indian movements, cultural resistance and revitalization, and modern tribal economies.
HIST 423. The History of Food
3 Credits (3)
Considers the history of the production and consumption of food in the West from the Neolithic Age to the present with an emphasis on the historical relationships between food, gender, social class, social identity and nationalism. Crosslisted with: HIST 523.

HIST 425V. History of Magic and Witchcraft in Medieval and Renaissance Europe
3 Credits (3)
Examines history of popular and scientific beliefs about magic and witchcraft in medieval and early modern Europe. Includes origins of occult Western sciences; Arabic sources of medieval magic; the occult sciences in scholasticism; witchcraft and scholasticism; witchcraft and medieval theology, witch hunts of the 16th and 17th centuries; and the decline of belief in magic and witchcraft. Emphasis on boundaries that defined and separated magic, science, and religion in Western thought from late antiquity through the Scientific Revolution. Crosslisted with: HNRS 425V.

HIST 428. History of Terrorism in Modern Europe and the Middle East
3 Credits (3)
Analyzes causes, methods, and consequences of terrorism in Europe and the Middle East from the Reign of Terror in the French Revolution to Al-Qaeda, Hamas and Hezbollah in the contemporary Middle East and beyond.

HIST 431. History of Race and Ethnicity
3 Credits (3)
Seminar explores the historical social construction of race and ethnicity, and their relationship to other systems of social difference such as class and gender. Course will examine popular and academic theories of race and ethnicity as well as historical concrete effects of racial and ethnic differences in society.

HIST 432. United States Labor History to 1877
3 Credits (3)
Seminar discussions explore United States labor and working-class history to 1877, including such topics as pre-industrial and industrial labor, slavery, debt peonage, indentured servitude, and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 433. United States Labor History Since 1877
3 Credits (3)
Seminar discussions explore United States labor and working-class history since 1877, including such topics as industrial labor, debt peonage, and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 434. Urban History
3 Credits (3)
Seminar discusses cities as complex catalysts for cultural, political, and scientific development, both within cities themselves and more broadly for their nations and regions. Course deals with such topics as the relationship between social organization and physical space; city development, morphology and dynamics; and the cultural and intellectual history of cities.

HIST 435. History of War and Revolution
3 Credits (3)
Seminar covers historical dynamics of violent social, political, and economic transitions. May focus upon a particular war or upheaval, such as World War II or the French Revolution, or may examine more generic characteristics of conflict and radical change across many historical examples. Extensive readings in scholarly literature. Research projects relating to specific course contents.

HIST 438. Antiquity and Modernity
3 Credits (3)
Seminar explores links between earlier and more recent historical periods. Examples may include the Renaissance rediscovery of ancient Rome or the early modern Chinese reassessment of its classical Confucian heritage. Readings include ancient sources and the modern reception of such works, and the scholarly assessment of these processes. Individual research projects required in areas of student interests.

HIST 443. The Cold War in Latin America
3 Credits (3)
Seminar discusses Latin American political history during the Cold War. Course focuses on how Latin Americans (individuals, parties, military states) acted in an increasingly politicized arena defined by growing United States concerns over Cuban and Soviet influence in the area.

HIST 448. Nuclear Nation
3 Credits (3)
Explores post-World War II history and the impact atomic energy has had on the United States and the world.

HIST 449. Readings
1-3 Credits
Individual study of selected readings and problems. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

HIST 453. Cuba: Colony to Castro
3 Credits (3)
Economic, social, and political development of Cuba and other colonies and nations in the Caribbean with emphasis on recent events.

HIST 471. China through the Ming Dynasty
3 Credits (3)
History of China from origins to Ming dynasty, (1368-1644). Cultural and political development with emphasis on social and economic contexts and long term trends.

HIST 472. China in the Modern World
3 Credits (3)
History of China from seventeenth through twentieth centuries. Rise and fall of the Manchu Qing dynasty; internal dynamics of social and political change in nineteenth and twentieth centuries, impact of Western imperialism, and development of the Peoples Republic since 1949.

Learning Outcomes
1. Students will learn the basic narrative of modern Chinese history.
2. Students will learn to understand and evaluate historical arguments and interpretations. Students will learn to work with primary sources and to analyze and interpret their contents. Students will complete a research paper combining primary and secondary sources and making a sustained historical argument.
HIST 473. History of Japan
3 Credits (3)
History of Japan through twentieth century. Political and cultural developments and their social and economic contexts. Chinese influence on early Japan, rise of Samurai and Shogunate, impact of Western Imperialism, and emergence of modern Japan.

HIST 474. Gender in East Asian History
3 Credits (3)
Examines the position of women and the social roles of both sexes in traditional China and Japan, and traces the changes taking place in those societies in the course of modernization in the last century and a half. Scholarly literature and works of Chinese and Japanese literature in translation and cinema used. Same as GNDR 474.

HIST 475. History of the Global Political Economy
3 Credits (3)
Traces development of global systems of economic interaction and the rise of European military and political dominance in the 18th and 19th centuries. Emphasis on East and South Asian roles in early modern history, and on challenges to European dominance in the 20th and 21st centuries.

HIST 479. Oral History
3 Credits (3)
Oral history through readings, discussions, and interviews. Semester project required that includes an interview and transcript.

HIST 481. Time Traveling Through New Mexico's Past
3 Credits (3)
Teaches historians and educators how to make history come alive. Semester project includes role playing characters and activities from a past era with local schools and museums.

HIST 483. Historic Preservation
3 Credits (3)
Study of community development, the historic preservation movement, and the built environment. Field project.

HIST 486. Interpreting Historic Places for the Public
3 Credits (3)
Explores historic site interpretation, the scholarship and philosophy of historic interpretation, and the nature of heritage interpretation for historic places.

HIST 489. Projects in History
3 Credits (3)
Individual projects in history. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

HIST 500. Special Topics
1-9 Credits (1-9)
Specific subjects to be announced in the Schedule of Classes. Graduate research paper required. May be repeated for a maximum of 12 credits.

HIST 504. Civil War Era, 1840-1877
3 Credits (3)
Mexican-American War, development of secession, American Civil War, Reconstruction. Graduate research paper required.

HIST 511. Making the American West
3 Credits (3)
Development of the American West from 1803 to 1900, with emphasis on conquest, federal and corporate roles in western development, environmental change, and the mythic West. Includes extra class meetings to view feature-length films. Graduate research paper required.

HIST 512. Travel Writing
3 Credits (3)
Explores how writers describe their travels with an emphasis on the history of a place. Semester paper required. Crosslisted with: HIST 412.

HIST 516. History of Latinos in the United States
3 Credits (3)
Development of Latino communities since 1500 in what is today the United States. Emphasis on 1846 to present, and on Mexican Americans, Puerto Ricans, and Cuban Americans. Major themes: race, colonialism, immigration, nationalism, class, culture, gender, and politics. Graduate research paper required.

HIST 525. History of Magic and Witchcraft in Medieval and Renaissance Europe
3 Credits (3)
Examines history of popular and scientific beliefs about magic and witchcraft in medieval and early modern Europe. Includes origins of occult Western sciences; Arabic sources of medieval magic; the occult sciences in scholasticism; witchcraft and scholasticism; witchcraft and medieval theology, witch hunts of the 16th and 17th centuries; and the decline of belief in magic and witchcraft. Emphasis on boundaries that defined and separated magic, science, and religion in Western thought from late antiquity through the Scientific Revolution. May be repeated up to 3 credits.

HIST 527. Labor History
3 Credits (3)
Seminar discussions explore labor and working-class history, including such topics as pre-industrial labor, slavery, debt peonage, indentured servitude, and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 528. History of Terrorism in Modern Europe and the Middle East
3 Credits (3)
Advanced analyses of causes, methods, and consequences of terrorism in Europe and the Middle East from the Reign of Terror in the French Revolution to Al-Qaeda, Hamas, and Hezbollah in the contemporary Middle East and beyond.

HIST 535. War and Revolution
3 Credits (3)
Seminar covers historical dynamics of violent social, political and economic transitions. May focus upon a particular war or upheaval, such as World War II or the French Revolution, or may examine more generic characteristics of conflict and radical change across many historical examples. Extensive readings in scholarly literature. Research projects relating to specific course contents.

HIST 538. Special Topics in European History
3 Credits (3)
Advanced special topics in European history to be announced in the schedule of classes. May be repeated for a maximum of 12 credits.

HIST 540. Special Topics in Middle Eastern History
3 Credits (3)
Advanced special topics in Middle Eastern history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 543. Special Topics in Asian History
3 Credits (3)
Advanced special topics in Asian history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.
HIST 545. Special Topics in United States History  
3 Credits (3)  
Advanced special topics in United States history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.  

HIST 548. Nuclear Nation  
3 Credits (3)  
Explores post-World War II history and the impact that atomic energy has had on the United States and the world.  

HIST 549. Graduate Readings  
1-3 Credits  
Individual study of selected readings and problems. May be repeated for a maximum of 6 credits.  
Prerequisite: consent of instructor.  

HIST 553. Cuba: Colony to Castro  
3 Credits (3)  
Economic, social, and political development of Cuba and other colonies and nations in the Caribbean, with emphasis on recent events. Graduate research paper required.  

HIST 557. The Mexican Revolution  
3 Credits (3)  
Origins, causes, and scope of the Mexican Revolution, including leading personalities, with emphasis on the U.S.-Mexican border. Graduate research paper required.  

HIST 561. Islam and the West: Cultural Contacts, Conflicts and Exchanges  
3 Credits (3)  
Examines interactions, encounters and cross-fertilization between the Islamic world and the West from the seventh to the twenty-first centuries. Course includes origins of Islam, relationships between Islam, Judaism, and Christianity, and concludes with the post 9/11 present. May be repeated up to 3 credits.  

HIST 566. British Imperialism  
3 Credits (3)  
Survey of the activities of the British empire from the 16th century through the 20th century, with emphasis on Ireland, North America and India. Assesses the impact of imperial activities on British domestic politics, culture and social history, and the process and impact of decolonization.  

HIST 568. Urban History  
3 Credits (3)  
Seminar discusses cities as complex catalysts for cultural, political, and scientific development, both within cities themselves and more broadly for their nations and regions. Course deals with such topics as the relationship between social organization and physical space; city development, morphology and dynamics; and the cultural and intellectual history of cities.  

HIST 570. The Cold War in Latin America  
3 Credits (3)  
Seminar discusses Latin American political history during the Cold War. Course focuses on how Latin Americans (individuals, parties, militaries, states) acted in an increasingly politicized arena defined by growing United States concerns over Cuban and Soviet influence in the area.  

HIST 571. China through the Ming Dynasty  
3 Credits (3)  
History of China from origins to Ming Dynasty, 1368-1644. Cultural and political development with emphasis on social and economic contexts and long term trends. Research paper required.  

HIST 573. History of Japan  
3 Credits (3)  
Covers the history of Japan through the 20th century. Political and cultural developments and their social and economic contexts. Chinese influence on early Japan, rise of Samurai and Shogunate, impact of Western imperialism, and the emergence of modern Japan. Research paper required.  

HIST 574. Gender in East Asian History  
3 Credits (3+2P)  
Examines the position of women and the social roles of both sexes in traditional China and Japan, and traces the changes taking place in those societies in the course of modernization in the last century and a half. Scholarly literature and works of Chinese and Japanese literature (in translation) and cinema used. Same as GNDR 574.  

HIST 575. History of the Global Political Economy  
3 Credits (3)  
Traces development of global systems of economic interaction and the rise of European dominance in the 18th and 19th centuries. Emphasis on East and South Asian roles in early modern history, and on challenges to European dominance in the 20th and 21st centuries.  

HIST 576. The Holocaust  
3 Credits (3)  
Advanced study of the attack on European Jews by Adolf Hitler and the National Socialist Party in Germany and occupied Europe from his accession as chancellor in 1933 until the end of the Third Reich in 1945.  

HIST 578. Modern Russia  
3 Credits (3)  
Domestic policies and international relations from the mid-nineteenth century to the present with emphasis on the Soviet experience.  

HIST 579. Oral History  
3 Credits (3)  
Oral history through readings, discussion, and interviews. Course project required that includes an interview and transcription.  

HIST 580. Graduate Research Projects  
1-6 Credits (1-6)  
Intensive investigation of a selected area of history, including the completion of a research paper or a public history project. Consent of instructor required.  

HIST 581. Time Traveling Through New Mexico's Past  
3 Credits (3)  
Instructs historians and educators on how to make history come alive. Semester project includes role playing characters and activities from a past era with local schools and museums.  

HIST 582. History and Memory  
3 Credits (3)  
Seminar examines the interplay of memory and history. Explores how various nations and people construct the narratives of their past.  

HIST 583. Advanced Historic Preservation  
3 Credits (3)  
Covers the community development, the historic preservation movement, and the built environment. Field project and additional graduate work.  

HIST 585. Public History Internship  
3 Credits (3)  
Individual project in an area of public history, including a final written report. Research project required. May be repeated for a maximum of 9 credits.  
Prerequisite: consent of instructor.
HIST 586. Interpreting Historic Places for the Public
3 Credits (3)
Advanced study of historic site interpretation, the scholarship and philosophy of historic interpretation, and the nature of heritage interpretation for historic places.

HIST 587. United States Labor History to 1877
3 Credits (3)
Seminar discussions explore United States labor and working-class history to 1877, including such topics as pre-industrial and industrial labor, slavery, debt peonage, indentured servitude and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 590. Reading Seminar: Borders, Boundaries and Frontiers
3 Credits (3)
Explores questions and issues concerning different kinds of borders, boundaries and frontiers. Introduces relevant theoretical literature and considers specific places and times through case studies, including U.S.-Mexico border. Restricted to students in HIST program.

HIST 591. Reading Seminar: Modernity and its Discontents
3 Credits (3)
Examines the problem of modernization and the meaning of becoming and being modern, including positive and negative effects on individuals, cultures, environments and societies.

HIST 592. Reading Seminar: Nature and Society
3 Credits (3)
Considers how humans and nature have reshaped each other, how people have perceived nature, how different cultures have understood their relationships to nature, and how social groups and nations have struggled over natural resources. Takes a comparative, transnational approach.

HIST 593. Reading Seminar: History, Myth and Memory
3 Credits (3)
Course analyzes the complex and often contested process of writing national histories, creating national heroes, and forging collective memories. Students assess written texts, memorials, parades and celebrations.

HIST 594. Public History Seminar
3 Credits (3)
Introduction to the discipline of public history, including its methodology and literature. Fieldwork is required.

HIST 596. Research Seminar
3 Credits (3)
Research seminar teaches students the process of conducting original historical research with primary source documents. Students will then use these research skills to produce a polished chapter or article-length manuscript. Restricted to HIST majors.

HIST 597. Public History Article
1-9 Credits (1-9)
Researching and writing an article suitable for publication about a student's public history internship or other topic of interest within the field of public history.

HIST 598. Craft of History: Historical Theories, Methods, and Criticism (f)
3 Credits (3)
Introduction to historical theories, methodologies, criticism, and skills essential to graduate study in history. Required for all history graduate students; restricted to history majors.

HIST 599. Master's Thesis
1-15 Credits (1-15)
Thesis.

HIT 110. Electronic Health Records
3 Credits (3)
Current electronic health record principles, methods and procedures, and computerized medical record concepts and software applications will be introduced. Restricted to: Community Colleges only.

HIT 120. Health Information Introduction to Pharmacology
3 Credits (3)
Introduction to the principles of pharmacology, including drug terminology; drug origins, forms, and actions; routes of administration; as well as the use of generic name drugs, trade name drugs and categories of drugs to treat multiple and specific body systems. May be repeated up to 3 credits. Crosslisted with: NURS 120. Restricted to Community Colleges campuses only.

HIT 130. Health Information Technology Anatomy & Physiology
3 Credits (3)
An introductory course in the basics of human structure and function. Body systems are examined as to how they relate to proper code selection and as part of the functioning of the body as a whole. Restricted to Community Colleges campuses only.

HIT 140. Health Information Introduction to Pathophysiology
3 Credits (3)
Introduction to the nature of disease and its effect on body systems. Disease processes affecting the human body via an integrated approach to specific disease entities will be presented including a review of normal functions of the appropriate body systems. Diseases will be studied in relation to their etiology, pathology, physical signs and symptoms, diagnostic procedures, complications, treatment modalities and prognosis.

HIT 150. Introduction to Medical Terminology
3 Credits (3)
The study and understanding of medical terminology as it relates to diseases, their causes and effects, and the terminology used in various medical specialties. Emphasis will be placed on learning the basic elements of medical words, appropriate spelling and use of medical terms, and use of medical abbreviations. May be repeated up to 3 credits. Crosslisted with: NURS 150, AHS 120 and BOT 150. Restricted to Community Colleges campuses only.

HIT 158. Advanced Medical Terminology
3 Credits (3)
Builds upon the concepts covered in HIT 150 or AHS 120 providing greater understanding of how to properly use and apply medical terminology used in the various health fields. Medical terminology associated with the body system's anatomy and physiology, pathology, diagnostic and therapeutic procedures, pharmacology, and abbreviations will be emphasized. Restricted to Community Colleges campuses only. 

Prerequisite(s): HIT 150 or AHS 120.
HIT 221. Internship I
3 Credits (3)
Work experience that directly relates to a student’s major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. C- or better is required for this course. Consent of Instructor required. Restricted to: BOT,HIT majors. Restricted to Community Colleges campuses

HIT 228. Medical Insurance Billing
3 Credits (3)
Comprehensive overview of the insurance specialist’s roll and responsibilities. Concepts and applications that will assist the student in understanding the steps necessary for successfully completing the insurance claim filing and reimbursement processes for various insurance carriers, both private and government, will be emphasized. Restricted to Carlsbad campus only.
Prerequisite(s): HIT/NURS 150; BOT 208.

HIT 240. Health Information Quality Management
3 Credits (3)
Introduction to basic concepts of quality improvement and performance improvement as they apply to health record systems and the health care industry. Quality assessment and improvement standards and requirements of licensing, accrediting fiscal and other regulatory agencies will be presented.

HIT 248. Medical Coding I
3 Credits (2+2P)
Comprehensive overview of the fundamentals, coding conventions, and principles of selecting the most appropriate ICD-10-CM/PCS diagnostic and procedure codes. The most recent version of ICD-10-CM/PCS and an in depth study of current Official Coding Guidelines for coding and reporting will be emphasized. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.
Prerequisite(s): BOT 228.

HIT 255. Special Topics
3 Credits (3)
Specific topics to be announced in the Schedule of Classes. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

HIT 258. Medical Coding II
3 Credits (2+2P)
Continuation of Medical Coding I. Comprehensive overview of the coding and reporting guidelines, fundamentals, coding conventions, and principles of selecting the most appropriate CPT and HCPCS procedural codes for all medical specialties. The most recent version of CPT and a continued study of the ICD-10-CM/PCS coding conventions and principles will be emphasized. Designed as a medical coding capstone course. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.
Prerequisite(s): HIT 248.

HIT 268. Health Information Systems
3 Credits (3)
Overview of health data management, work planning, and organization principles; an introduction to health care information systems; and review of the fundamentals of information systems for managerial, clinical support, and information systems.

HLED-HEALTH EDUCATION

HLED 1154. Lifeguarding
2 Credits (2)
Skills training for a non-surf lifeguard. Course will include Standard First Aid and CPR certification. May be repeated up to 2 credits. Students must be able to swim 500 yards, dive to 9-foot depth and retrieve a 10-pound brick, surface dive to 5 feet then swim underwater 15 yards, tread water one minute.
Learning Outcomes
1. To help the student become aware of the common hazards associated with various types of aquatic facilities and to develop the knowledge and skills to eliminate or minimize such hazards.
2. To help the student develop the skills necessary to recognize a person in distress or in a drowning situation and to effectively rescue that person.
3. To help the student understand their responsibility to their employer, fellow employees and especially to the patrons of their facility.
4. To provide explanations, demonstrations, practice and review of the rescue skills essential for lifeguarding.
5. To instill in the students an understanding and appreciation for the responsibilities, swimming skills and additional duties of lifeguarding.
6. To develop more advance swimming skills to assist in a water rescue.

HMSV-HUMAN SERVICES

HMSV 2110. Case Management
3 Credits (3)
This course introduces students to the concept of case management, how it is used in human services, and skills necessary to function effectively as case managers. The emphasis is on the client assessment process, service planning and delivery, and client advocacy. Topics introduced include observation, data collection, documentation, and reporting of client behaviors, identification and referral to appropriate services, monitoring, planning, and evaluation. This course provides student with basic knowledge and beginning case management skills.
Prerequisite(s): PSYC 1110G and SOWK 2110G.
Learning Outcomes
1. Define the purpose of case management and explain the role of the case manager
2. Explain the process of case management and what it entails
3. Explain the ethical, professional and legal responsibilities of case managers
4. Describe several settings within which case management takes place
5. Apply principles of client record management, and protect client rights to privacy and confidentiality
6. Use data to determine the appropriate referral service to professional, agencies, community programs or other resource, and clearly and specifically explain the referral service’s role in treatment and contact information
7. Apply standards of clinical evaluation, including establishing rapport, data gathering and screening, analysis of substance abuse implications, treatment possibilities, initial actions, and documentation of findings and treatment recommendations
8. Incorporate individual and cultural relevance in concert with established situation-specific policies and procedures for crisis management.
HNRS-HONORS

HNRS 1110. Journeys of Discovery
1 Credit (1)
Weekly conversations among students and a faculty member; organized around a particular subject and a small selection of readings. The seminars illuminate the many paths of discovery explored by the New Mexico State University faculty.
Prerequisite(s): Honors eligible.
Learning Outcomes
1. Students will comprehend and condense information to contribute to class discussions.
2. Students will develop public speaking and presentation skills based on research conducted in and outside of class.
3. Students will expand upon collaborative skills as both group presentations and group written reports.

HNRS 1115. Honors First Year Seminar
3 Credits (3)
This course is designed to introduce new first semester students to the life of the mind, the life of the University, and the principles that guide the NMSU University Honors Program. Combining critical thinking and experiential exploration, students will develop a personalized plan for success, both in and out of the classroom, consistent with the values of the Conroy Honors College and the mission of the University.
Learning Outcomes
1. Demonstrate critical thought about the nature of knowledge, learning, and student development in the contemporary University. Explain how key concepts and principles serve as the foundation for the Honors College mission and values. Create a plan for their experiences at NMSU, in and out of the classroom, that will maximize their academic achievement and personal success beyond graduation.

HNRS 1135G. Introduction to Biological Anthropology
3 Credits (3)
This course provides a basic introduction to the broad field of biological anthropology. The research interests of biological anthropologists include the history and development of modern evolutionary biology, molecular and population genetics, modern primates, the primate and human fossil record, and modern human biological diversity. This is an Honors version of ANTH 1135G. It is taught with ANTH 1135G with differentiated assignments.
Corequisite: HNRS 1135L.
Learning Outcomes
1. Summarize the basic principles of evolution and recognize how they apply to the human species. Recognize the biological and behavioral continuity of humans with all life, and especially other modern primate species. Identify ways in which the human species is biologically and behaviorally unique. Summarize fossil evidence for human evolution. Distinguish the major Paleolithic industries and outline the behavioral and cognitive changes indicated by the fossil and archeological evidence. Critically evaluate popular accounts of human variation and human evolution. Interpret modern human primate species. Identify ways in which the human species
2. Behaviors and cognitive changes indicated by the fossil and archeological evidence. Critically evaluate popular accounts of human variation and human evolution. Interpret modern human primate species. Identify ways in which the human species
3. Students will comprehend and condense information to contribute to class discussions.
4. Students will develop public speaking and presentation skills based on research conducted in and outside of class.
5. Students will expand upon collaborative skills as both group presentations and group written reports.

HNRS 1135L. Introduction to Biological Anthropology Lab
1 Credit (1P)
This laboratory course expand on the topics covered in lecture course and uses scientific methods and principles to examine evidence for the process of evolution, the nature of heredity, human evolutionary history and family tree relationships, primate ecology and behavior, and modern human diversity. Hands-on experience with fossil and skeletal material will be an important part of the learning process. This is an Honors version of ANTH 1135L.
Corequisite: HNRS 1135G.
Learning Outcomes
1. Demonstrate an understanding of the scientific method. Employ principles of Mendelian genetics to determine genotype and phenotype probabilities, and calculate gene, genotype, and phenotype frequencies using the Hardy-Weinberg Equilibrium formula.
2. Demonstrate an understanding of cell structure and functions. Use common lab and anthropometric equipment such as a compound microscope and calipers. Discuss primate evolution, and compare and contrast members of the Primate order in terms of structure, behavior, and phylogeny. Classify hominid species based upon selected traits such as anatomical changes associated with bipedalism, changes in the size and structure of the brain, and the development of culture. Locate and describe the major bones of the human skeleton, and identify characteristics of human skeletons or skulls such as gender, age, and ancestry. Discuss current research in genome analysis of various hominid popul ati ons.
HNRS 2111. Successful Fellowship Writing
1 Credit (1)
Provides scholars with hands-on skills to complete proposals for scholarships and fellowships, such as the Truman, Rhodes, Marshall, Goldwater, Udall, and others. Other skills include how to write resumes, develop general research skills, and find grant and foundation sources. For freshmen and sophomores. 5 or higher
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.
Learning Outcomes
1. Review of Prestigious International and National scholarships
2. Best practices in preparing competitive proposals and applications
3. Effective strategies for writing compelling Executive summaries, Resumes, and Personal Statements

HNRS 2114G. Music in Time and Space
3 Credits (3)
Introduction to all forms of Music. Through our auditory senses and intellectual faculties music is an ideal means for intelligent and humanistic examination of peoples and cultures, and for the enhancement of life. Types of music covered include classical, jazz, rock and roll, and world music. Music videos, live in-class performances, evening concerts, and lectures will be used as a basis for discussions and research. May be repeated up to 3 credits. Restricted to Las Cruces campus only.
Learning Outcomes
1. Analyze and critically interpret significant primary texts and/or works of art (this includes fine art, literature, music, theatre, and film).
2. Compare art forms, modes of thought and expression, and processes across a range of historical periods and/or structures (such as political, geographic, social, cultural, religious, intellectual).
3. Recognize and articulate the diversity of human experience across a range of historical periods and/or cultural perspectives;
4. Draw on historical and/or cultural perspectives to evaluate all of the following: contemporary problems/issues, contemporary modes of expression, and contemporary thought

HNRS 2115G. Encounters with Art
3 Credits (3)
A multicultural examination of the principles and philosophies of the visual arts and the ideas expressed through them. 5 or higher
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.
Learning Outcomes
1. Articulate the relationship of art to the human experience
2. Apply the vocabulary of art to critical writings and discussions
3. Interpret art works within cultural, social, personal and historical contexts

HNRS 2116G. Earth, Time and Life
4 Credits (3+3P)
Covers how the earth's materials form, processes involved in changing the earth's configuration, and extent of people's dependence upon the earth's resources. Includes mineral and energy resources, development of landscapes, environmental problems, evolution of the earth and life forms. May be taken in place of GEOL 1110. 5 or higher
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.
Learning Outcomes
1. Gain a general understanding of geology and the geological processes that have been occurring throughout Earth's history.
2. Learn about some of the common minerals and rocks that are the building blocks to geology and the rock cycle.
3. Investigate the processes associated with each rock type (e.g., volcanoes, faults, depositional processes, etc.) and as well as potential geologic hazards (e.g., volcanic eruptions, earthquakes, flooding, etc.).
4. Recognize and identify common minerals and rocks and understand the basic processes and conditions responsible for their formation and occurrence.
5. Comprehensively understand how the internal and external parts of the Earth have functioned throughout geologic time

HNRS 2117G. The World of the Renaissance: Discovering the Modern
3 Credits (3)
An introduction to the literature and thought of Renaissance Europe. Humanism and the Reformation will be approached through the intensive study of major writers such as Petrarch, Machiavelli, Luther, Erasmus, Montaigne, and Shakespeare. Restricted to Las Cruces campus only. 5 or higher
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.
Learning Outcomes
1. Analyze and critically interpret significant primary texts and/or works of fine art, literature, philosophy, and theatre from the early modern period;
2. Locate art forms, modes of thought and expression, and processes from the early modern period in historical and/or cultural context and compare them to those of other time periods;
3. Demonstrate an understanding of how early modern historical and/or cultural perspectives and key
4. technological developments contributed to the development of contemporary thought and modes of expression;
5. Recognize and articulate the diversity of human experience across historical periods and/or cultural perspectives;
6. Demonstrate skill in working with relevant secondary resources and research tools to develop a class
HNRS 2120G. Foundations of Western Culture
3 Credits (3)
Critical reading of seminal texts relating to the foundations of culture and values in Western civilization, from ancient Greece to about 1700. Focus on the development of concepts of nature, human nature, and the state. 5 or higher  
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.  
Learning Outcomes  
1. Students will enhance abilities to quickly read, comprehend, and evaluate lengthy, complex texts to extract their fundamental arguments.  
2. Students will improve critical thinking by grappling with ethical issues about the rights of individuals versus societies.  
3. Students will use historical analysis to contextualize current social, political, geographic, and economic issues and how the foundations continue to affect contemporary society.  

HNRS 2130G. Shakespeare on Film
3 Credits (3)
How do Shakespeare's plays continue to speak to us through the medium of film? Written in a time of rapid social change, Shakespeare's plays invited audiences to think critically about the relationship between the self and others and to question conventions. Performances of Shakespeare have long been used to call out social injustice, from western anti-Semitism prior to World War II (The Merchant of Venice), to civil rights-era white supremacy in the US and apartheid in South African (Othello) and authoritarianism in the Arab Spring (Richard III). This course focuses on post-1980 Hollywood film versions of Shakespeare's plays and a few prior landmark adaptations around the world, examining how they use Shakespeare as a medium for debate and even a catalyst for social change.  
Learning Outcomes  
1. Demonstrate critical thinking by identifying issues and problems in the film adaptation of Shakespeare;  
2. Engage in intercultural reasoning and develop intercultural competence and historical consciousness in analyzing film adaptations from the US, Europe, and Asia;  
3. Engage with questions of personal and social responsibility as explored in Shakespeare's plays and modern film adaptations;  
4. Conduct effective research on a relevant topic, evaluating the validity and authority of secondary sources, synthesizing ideas, and drawing reasonable conclusions;  
5. Present independent research in collaboration with other student researchers and reflect on this teamwork experience.  

HNRS 2140G. Plato and the Discovery of Philosophy
3 Credits (3)
Examines arguments and theories found in the Platonic dialogues with a view to determining the nature and value of philosophy both from Plato's point of view and absolutely. 5 or higher  
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.  
Learning Outcomes  
1. Students will evaluate a number of Plato's dialogues to understand his doctrines and arguments.  
2. Students will use their understanding to further evaluate why his philosophies have remained influential in modern, Western society and beyond.  
3. Students will develop well-formulated, compelling arguments from philosophical texts.  

HNRS 2141G. Bamboo and Silk: The Fabric of Chinese Literature
3 Credits (3)
Introductory survey of traditional and modern Chinese prose and poetry in translation with emphasis on genre, theme, and social/historical context. 5 or higher  
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.  
Learning Outcomes  
1. Students will acquire extensive knowledge of one of the world's oldest and richest literary traditions.  
2. Not incidentally, students will also gain knowledge of China's history and philosophical traditions.  
3. As this class is based on reading, writing, and discussion, students will hone their interpretive and expressive skills.  

HNRS 2145G. Celtic Literature
3 Credits (3)
This course provides an overview of the most important early literary works of the so-called Celtic nations, principally Ireland and Wales, from a literary and historical approach. This literature stems from the period 600-1200 and ends with the development of the Romances under influence from the French.  
Learning Outcomes  
1. Students will learn the concept of the international folk tale;  
2. Students will learn about the history of the Celts;  
3. Students will learn about the concept of Celtic nations' formed during the 19th Century.  
4. Students will enhance critical thinking skills.  
5. Students will enhance written and oral communication.
HNRS 2160G. New Testament as Literature
3 Credits (3)
Literature of the New Testament examined from a literary perspective. Emphasis on translation history of the New Testament, generic features of gospel, epistle and apocalypse, precedent literary models, problems of authorship, classification of New Testament texts. 5 or higher
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.
Learning Outcomes
1. Students will hone critical thinking skills by analyzing arguments and controversies surrounding the roots of Christianity.
2. Students will discern and discuss the viability of both literary and historical sources with debated authorship, dating, and interdependency.
3. Students will practice interpersonal navigation and maintaining an academic environment of respect as they discuss a number of topics that can be considered controversial or subjective.

HNRS 2161G. Window of Humanity
3 Credits (3)
Anthropology is the most humanistic of the sciences, and the most scientific of the humanities. This course will use anthropological perspectives to examine the human experience from our earliest origins, through the experiences of contemporary societies. We will gain insights into the influence of both culture and biology on shaping our shared human universals, and on the many ways in which human groups are diverse. Restricted to Las Cruces campus only. 5 or higher
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.
Learning Outcomes
1. Explain the concepts that define Anthropology (along with its subfields) as a specific research discipline.
2. Possess a growing vocabulary for anthropology, cultural study, ethnographic research and writing that will empower them as they continue with their degrees and professional careers.
3. Recognize how Anthropological concepts, terms, and methods are valuable for present-day concerns and how these tools can be used to engage life and the world at large.

HNRS 2165. Humanities in the 21st Century
3 Credits (3)
An exploration of the humanities, of their intrinsic and extrinsic values, and of the skills and habits of mind they cultivate.
Learning Outcomes
1. Articulate what the humanities are and what role they have played in education throughout the ages
2. Articulate examples of the intrinsic value of the humanities
3. Articulate the skills and habits of thought in at least one chosen discipline in the humanities
4. Articulate common misconceptions about university majors and reframe the common misconceptions
5. Create at least three employment scenarios based on your skills and interests
6. Exercise divergent thinking with regards to future career paths

HNRS 2170G. The Human Mind
3 Credits (3)
The primary course objective is to develop an appreciation of the variety and complexity of problems that are solved by the human mind. The course explores how problems are solved by a combined computational analysis (computational theory of mind), and evolutionary (evolution by natural selection) perspective. The mind is what the brain does (i.e. information processing) and the brain is a computational device that is a product of evolution by natural selection. Note that this is not a neuroscience course, we will be focusing on the mind (what the brain does) rather than on the brain. Restricted to Las Cruces campus only.
Learning Outcomes
1. Enhance written and oral communication
2. Stimulate critical thinking and learn to weigh scientific evidence
3. Challenge students to make ethical decisions and promote personal and social responsibility

HNRS 2171G. The Worlds of Arthur
3 Credits (3)
Arthurian texts and traditions from medieval chronicles to contemporary literature. Emphasis on both the continuities of the Arthurian tradition and the diversity of genres, media, and cultures that have given expression to the legend. May be repeated up to 3 credits. Restricted to Las Cruces campus only.
Learning Outcomes
1. Students will examine how texts and narratives, even with fictional implications, still held psychological, social, cultural, and religious sway within developed societies throughout history.
2. Students will synthesize information from an array of both primary and secondary sources to measure the cultural significance King Arthur holds in contemporary societies.
3. Students will extrapolate how a society's values at any point in history will affect the transference of mythos, just as a myth transmits the values of that society.
HNRS 2172G. Archaeology: Search for the Past
3 Credits (3)
A critical evaluation of various approaches to understanding prehistory and history. The methods and theories of legitimate archaeology are contrasted with fantastic claims that invoke extraterrestrials, global catastrophes, transoceanic voyages, and extra-sensory perception. May be repeated up to 3 credits. Restricted to Las Cruces campus only. 5 or higher
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes
1. Identify, describe, and explain how human lifeways changed in diverse communities in different parts of the globe.
2. Select and use relevant archaeological evidence to articulate how people’s beliefs and values were influenced by politics, geography, economics, culture, biology, history, and social institutions in the past.
3. Analyze the significance of archaeological artifacts in context and explain their relevance to understanding relations among individuals, their society, and the environment.
4. Evaluate how practices in research, conservation, and tourism to archaeological sites promote ethical stewardship of non-renewable archaeological resources.
5. Design a study tour to archaeological sites that will address a key question or argument in prehistory and promote historic/archaeological preservation.

HNRS 2173G. Middle Ages
3 Credits (3)
Intensive, interdisciplinary introduction to the thought and culture of medieval Europe. Core texts will include works by St. Augustine, Marie de France, and Dante, as well as anonymous works such as Sir Gawain and the Green Knight, all supplemented by study of medieval art, architecture, philosophy, and social history. 5 or higher
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes
1. Students will hone critical reading skills as they read through a wealth of texts, by prioritizing attention to details and how it affects the overall narrative.
2. Students will recognize how the social, religious, and political environments of the medieval era shaped contemporary society in affected regions beyond Europe.
3. Students will employ comparative analysis skills as they examine how Islamic culture might have influenced poetry and music in medieval Europe.

HNRS 2174G. American Politics in a Changing World
3 Credits (3)
American politics and policies examined from a historical and global perspective. Philosophical underpinnings of American national government, the structure of government based on that philosophy, and the practical implications of both the philosophical and structural base. How American government influences and is influenced by the world community. 5 or higher
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes
1. Students will enhance their understanding of the operation of major American political institutions and processes.
2. Students will investigate how the uniquely American form of constitutional governance has sought to adapt to changing historical and cultural conditions.
3. Students will practice interpersonal navigation and maintaining an academic environment of respect as they discuss a number of topics that can be considered controversial or subjective.

HNRS 2175G. Introduction to Communications Honors
3 Credits (3)
Study and practice of interpersonal, small group, and presentational skills essential to effective social, business, and professional interaction. 5 or higher
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes
1. Analyze and evaluate oral and written communication in terms of situation, audience, purpose, aesthetics, and diverse points of view.
2. Express a primary purpose in a compelling statement and order supporting points logically and convincingly.
3. Use effective rhetorical strategies to persuade, inform and engage.
4. Employ writing and/or speaking processes such as planning, collaborating, organizing, composing, revising editing to create presentations using correct diction, syntax, grammar and mechanics.
5. Integrate research correctly and ethically from credible sources to support the primary purpose of a communication.
6. Engage in reasoned civil discourse while recognizing the distinctions among opinions, facts, and inferences.

HNRS 2176. Acting for Everyone
3 Credits (3)
To provide fundamental training in acting techniques, including stage voice and movement, improvisation, ensemble building, characterization, emotion exploration and basic performance analysis. The course will provide a correlation between theatre skills and everyday “life” skills and seek to encourage an appreciation for the art of theatre.

Learning Outcomes
1. Improve effectiveness of oral communication.
2. Enhance creativity and appreciation of theatre.
3. Build confidence and expressiveness.
HNRS 2178G. Theatre: Beginnings to Broadway  
3 Credits (3)  
Intercultural and historical overview of live theatre production and performance, including history, literature and professionals. Students attend and report on stage productions. 5 or higher  
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.  
Learning Outcomes  
1. Distinguish and differentiate the characteristics of theatre from other art forms.  
2. Describe the major components of a theatrical event.  
3. Describe the functions of various theatre personnel.  
4. Define specific terms relating to the study of theatre.  
5. List and describe the parts of a play.  
6. Define the different parts of plot.  
7. Critique plays  
8. Describe the characteristics of theatre in the different periods of history.  
9. Develop an appreciation for theatre as an art form and a reflection of society  

HNRS 2180G. Citizen and State Great Political Issues  
3 Credits (3)  
The fundamental questions of politics: why and how political societies are organized, what values they express, and how well they satisfy those normative goals and the differing conceptions of citizenship, representation, and freedom. 5 or higher  
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.  
Learning Outcomes  
1. Students will investigate the fluid state of American politics by discerning the decisions and policies of a selection of presidents.  
2. Students will investigate the complex operations behind a representative democracy.  
3. Students will examine how the sociopolitical environment surrounding a president influences his policies, and how a president's policies affect the broader society.  
4. Students will assess and measure how politics can be affected by active and engaged citizens  

HNRS 2185G. Democracies, Despots and Daily Life  
3 Credits (3)  
This course will offer students the chance to read firsthand accounts of ordinary citizens' lives under different political systems, from the earliest age to the present day. This reading- and writing-intensive course will help students develop skills related to critical thinking, logical argumentation, and written and oral communication.  
Learning Outcomes  
1. Analyze and critically interpret primary sources and understand how others might interpret and use the same material in different ways;  
2. Recognize and articulate the diversity of human experience across a range of historical periods and/or cultural perspectives.  
3. Understand how historical experiences and memories have shaped contemporary societies;  
4. Identify and understand the degree to which history has been used and misused in the past;  
5. Draw on historical and/or cultural perspectives to evaluate any or all of the following: contemporary problems/issues, contemporary modes of expression, and contemporary thought.  
6. Demonstrate improvement in their ability to read critically, think logically, and express themselves clearly in writing.  

HNRS 2190G. Claiming a Multiracial Past  
3 Credits (3)  
Survey of history of the United States in the nineteenth and twentieth centuries, with an emphasis on multicultural social and cultural history. Focus on understanding American history from the point of view of dispossessed, impoverished, and disenfranchised Americans who have fought to claim both their rights as Americans and American past. 5 or higher  
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.  
Learning Outcomes  
1. Students will contextualize the current state of American “being” by focusing on the multicultural-social and cultural history of the U.S. in the nineteenth and twentieth centuries.  
2. Students will hone public speaking and presentation skills through classroom discussions and activities.  
3. Students will practice interpersonal navigation and maintaining an academic environment of respect as they discuss a number of topics that can be considered controversial or subjective.  

HNRS 2996. Special Topics  
1-3 Credits (1-3)  
Special course offerings, with unique titles listed in Schedule of Classes. May be repeated up to 6 credits.  
Learning Outcomes  
1. Varies  

HNRS 304V. Dilemmas of War and Peace  
3 Credits (3)  
A multi-disciplinary introduction to war, peace, and world order studies. The origins of war and the foundations of peace are explored in the context of a rapidly changing world order.
HNRS 305V. Is Fake News Real: Journalism, Community, and Mass Communications
3 Credits (3)
Overview of how technology, money, politics, and human desire have changed journalism since 1963. Explores role of journalism in news dissemination, influencing opinion, and political behavior. Course includes guest lectures from regional journalists and media experts.

HNRS 306V. Science, Ethics and Society
3 Credits (3)
Investigation of the ethical issues related to scientific investigation and the ethical implications of scientific discoveries for society. Emphasis on discussion of case studies about specific ethical issues in science, and readings by both scientists and non-scientists.

HNRS 313. Research and Writing
3 Credits (3)
Workshop format designed to prepare students for research and writing associated with production of an honors thesis or a major research assignment. Does not count for general education or honors certification credit.

HNRS 314. Successful Fellowship Writing
1 Credit (1)
Provides scholars with hands-on skills to complete proposals for scholarships and fellowships, such as the Truman, Rhodes, Marshall, Goldwater, Udall, and others. Other skills include how to write resumes, develop general research skills, and find grant and foundation sources.

HNRS 317V. Cultural Lessons on Nazism
3 Credits (3)
Examination of the values and cultural manifestations of fascism in the period 1918-45 with multidisciplinary emphasis on European forms of fascism, particularly German Nazism. Course features a survey of literary, dramatic, poetic, cinematic, and artistic treatments of human behavior leading up to fascism, living under fascist rule, and coming to grips with the consequences of war and genocide.

HNRS 318V. The World of Cinema
3 Credits (3)
Appreciation of the art of motion pictures as world-wide medium specific to national cultures. Refinement of cinematic literacy and critical viewing skills. Historical and thematic overview emphasizes collaborative nature of medium in various genres from 1895 to present. Selected films from different periods and different countries. Substantial library research projects.

HNRS 321V. Agriculture in an Interconnected World
3 Credits (3)
Study of the impact of agriculture on cultural and social systems, with special emphasis on twentieth century urban development.

HNRS 324V. Science and the Arts: Theatre and Story
3 Credits (3)
This course examines present day relations between the sciences and the representation and communication of science, especially in connection with theatre, narrative fiction, and autobiography. Crosslisted with: THEA 329.

HNRS 326V. Art and Mythology
3 Credits (3)
Mythological figures, past and present, in the visual arts. Through iconographical studies (attributes and symbols), trace the development of visual traditions that evolved from the literary sources of classical Mediterranean mythology.

HNRS 328V. Rock History: 20th Century Popular Music
3 Credits (3)
Evolution of popular music in the 20th Century. Examines the history of popular music conventions, influences, and breakthroughs through the 20th Century. Topics include the originations of major music styles and their evolution as cultivated by key artists, scientific advancements, and sociopolitical change, contextualized within the contemporaneous history. Of particular concern are the influences of groundbreaking artists; the effect of evolving playback electronics, recording devices, and musical instruments; and the interplay between music and economic depression, war, civil rights, sexual revolution, and other sociopolitical events.

HNRS 335V. Legal Issues in Modern Society
3 Credits (3)
Case study approach to contemporary legal problems involving environment, consumer protection, international law, corporate responsibility.

HNRS 336V. Testimonios from the Borderlands
3 Credits (3)
This course is about the testimonios (testimonios) and autobiographical writings about and by Latinas in the United States. Life stories are told through many forms: “testimonios,” memoirs, autobiographies and autobiographical fiction, oral histories and short stories, poetry and poetic prose pieces, essays, and audio-stories. The course focuses on testimonios as method, epistemology, and pedagogy. Among the questions we will examine will be those concerning knowledge production, sexual politics, the mind-body-spirit connection, voice, representation, and truth. May be repeated up to 3 credits.

HNRS 340V. Indian Law and Policy
3 Credits (3)
Explores the principles, doctrines, and texts governing the legal relations between the United States and Indian tribes, the history of federal Indian law and policy, tribal property, treaty rights and sovereignty, congressional plenary power, the trust doctrine, jurisdiction in Indian country, and tribal government. Topic specifically examined in the course include tribal lawmaking powers, gaming and economic development in Indian country, protection of Indian religious rights and cultural property, water rights, fishing, hunting and other treaty-based rights.

HNRS 341V. The Old Testament as Literature
3 Credits (3)
Old Testament surveys a portion of the thirty-nine canonical books of the Old Testament from a literary approach, centered on the so-called historical-critical method that developed in the 19th C under such figures as Julius Wellhausen. Higher criticism of the texts, their sources, authorship, dating and interdependency has led to deepened insights as well as scholarly conflict. In addition, we will examine several apocryphal books that have continuing importance in our understanding of Old Testament. We will read the Old Testament along with an introduction and some supplementary materials.

HNRS 347V. World Dance
3 Credits (3)
Examines dance forms from a cross-cultural perspective, focusing on the role of dance in different cultures around the globe. Same as DANC 3510V with differential assignments for Honors students.

HNRS 348V. Comparative Mythology: Myth, Ritual, and the Life Cycle
3 Credits (3)
Exploration of the central myths of several religious traditions and investigation of how each, through ritual, has given meaning to key moments in the journey of the individual through life.
HNRS 349V. Islam and the West: Cultural Contacts, Conflicts, and Exchanges
3 Credits (3)
This course examines interactions, encounters and cross-fertilization between the Islamic world and the West from the 7th-21st century. It begins with the origins of Islam and its relationship to Judaism and Christianity and ends in the post 9/11 present, an era some characterize as dominated by a "clash of civilizations."

HNRS 353V. Justice without Prejudice
3 Credits (3)
Exploration of central questions about race, ethnicity, and justice. Students will learn to argue persuasively from different perspectives, both orally and in writing.

HNRS 362V. Native American Philosophy and Spirituality
3 Credits (3)
Survey of philosophical traditions of Indigenous peoples of the Western Hemisphere. This course examines various forms of spiritual expression which encompasses art, dance, music, political/social activism, and the relationship to land. This course looks at present-day spiritual issues and on-going practices in Native America.

HNRS 370V. Design: The Creative Act
3 Credits (3)
Explores the nature of design and what it means to design in various diverse media. Included are creative efforts in writing, art, music, and technology. Commonalities and differences are considered.

HNRS 371V. Paris: Beyond the Eiffel Tower
3 Credits (3+3P)
This interdisciplinary course focuses on the evolution of the city of Paris from its earliest beginnings in the fifth century to modern times. Through the use of historioal, political, sociological and artistic texts and films, we will explore the various narratives which emerge from the built environment of Paris as well as its mythic status as the "City of Light and Romance" and "Capital of Revolution., Modernity and Art."

HNRS 374V. The European City: History and Culture
3 Credits (3)
Historical overview of development, growth, and culture of European cities.

HNRS 378V. Technology and Policy
3 Credits (3)
Study of the processes through which society sets goals for science and technology, of the allocation of resources needed to achieve these goals, and of the obligations and conflicts that develop as the goals are realized. International comparisons of public policies.

HNRS 379V. Literature as Film
3 Credits (3)
Considers the various results of literary adaptations to the screen. Participants will read literary texts written or translated into English and watch films from various countries as illustrations of this process.

HNRS 381V. Economic Development of Latin America
3 Credits (3)
Economic analysis of problems related to development in Latin America, including the agrarian problem, debt and austerity programs, industrialization, inflation and unemployment, the drug trade, U.S.-Latin American relations, development strategies. Also individual counties' problems.
Prerequisite(s): 3.2 cumulative GPA.

HNRS 384V. Ethical Decisions in Organizations
3 Credits (3)
Examines ethical decisions in business, non-profit, and governmental organizations from a managerial perspective. Topics include ethical principles, recognition and application of principle-based ethics, stakeholders in ethical decisions, and analysis of the consistency between organizational decisions and ethical principles.

HNRS 387V. Comparative Perspectives on Women
3 Credits (3)
The history, antecedents, and consequences of sex and gender systems around the world from the perspective of sociology, anthropology, and psychology.

HNRS 388V. Leadership and Society
3 Credits (3)
Exploration of the multifaceted nature of leadership in modern society through readings and seminar discussion.

HNRS 390V. Worlds of Buddhism
3 Credits (3)
This course is an introduction to Buddhism and its contribution to the formation of (East) Asian cultures. It provides students with Buddhist and (East) Asian "case studies" - i.e., examples of the ways in which Buddhism has influenced, and has been influenced by, the region's various cultural and social milieus over time. The course is designed to offer opportunities to critically reflect on Buddhism as a transformative philosophical, cultural and individual system. May be repeated up to 3 credits.

HNRS 394V. Southwestern and Border Literature
3 Credits (3)
Introduction to the culturally diverse literature of the American Southwest and borderlands region. Class analyzes evolution of the Southwest concept and considers degree to which the existence of a borderlands culture is manifest in literature.
Prerequisite: honors eligibility.

HNRS 400. Honors Thesis
3 Credits (3)
Independent-study research and writing project to be carried out under the supervision of a faculty member.
Prerequisite: consent of instructor.

HNRS 410. Honors Internship
3-6 Credits
Assignments in departments to be supervised by faculty in the area. A cumulative 3.5 GPA is required. May be repeated up to 12 credits. Consent of Instructor required.

HNRS 411V. Great Theorems: The Art of Mathematics
3 Credits (3)
Same as MATH 411V.

HNRS 412. Medical College Admission Test Preparation
3 Credits (3)
This course prepares students to optimize their performance on the Medical College Admission Test that is required for admission to medical schools throughout North America. This course should be taken only after completing requisite courses in biology, chemistry and biochemistry, physics, health sciences, and appropriate social science electives.
Prerequisite(s): Completion of basic courses in STEM, health sciences and behavioral sciences.
HNRS 413. Medical Shadowing
1-3 Credits (1-3)
For students who are shadowing medical professionals this course will provide academic credit for completion of this experience. May be repeated up to 6 credits.
Prerequisite(s): Completion of 57 credits, of any subject.
HNRS 420. Independent Studies
1-3 Credits
Directed, individual studies and projects.
Prerequisites: consent of instructor and honors eligibility.
HNRS 421. Special Topics
1-3 Credits
Special course offerings, with specific titles listed in Schedule of Classes. May be repeated up to 6 credits.
HNRS 422. Directed Research
3 Credits (3)
Individual research projects supervised by faculty advisers. Consent of instructor required.
HNRS 425V. Magic and Witchcraft in Medieval and Renaissance
3 Credits (3)
Examines the history of popular and scientific beliefs about magic and witchcraft in medieval and early modern Europe. Topics include the origins of the occult sciences in the West, Arabic sources of medieval magic, the occult sciences in scholasticism, witchcraft and medieval theology, the witch hunts of the sixteenth and seventeenth centuries, and the decline of belief in magic and witchcraft in the seventeenth century. Of particular concern are the boundaries that defined and separated magic, science, and religion in western thought from late antiquity through the Scientific Revolution. Same as HIST 425 with differential assignments for HNRS 425V students. Crosslisted with: HIST 425.
HNRS 450V. The Sundt Honors Seminar
3 Credits (3)
The Sundt Honors Seminar is a unique, experience-based, interdisciplinary seminar developed and taught by the holder of the Sundt Honors Professorship for the year. The subject of the course will vary according to the discipline of the Sundt Professor. The course may include a travel experience related to the seminar topic, hosting of outside specialists, or other unique activity. Open to students by application. Students selected for the course are named Sundt Scholars.
Prerequisite(s): ENGL 1110G or equivalent.
HNRS 521. Special Topics
3 Credits (3)
Graduate level to be cross-listed with HNRS 421 Special Topics at the undergraduate level.

HORT-HORTICULTURE

HORT 1115G. Introductory Plant Science
4 Credits (3+2P)
Introduction to the physical, biological, and chemical principles underlying plant growth and development in managed ecosystems. In the laboratory portion of the class, students perform experiments demonstrating the principles covered in lecture. The course uses economic plants and agriculturally relevant ecosystems to demonstrate basic principles. Appropriate for nonscience majors. Same as AGRO 1110G.
Learning Outcomes
1. Describe the role plants play in everyday lives
2. Introduce career opportunities in plant and soil sciences, and related fields
3. Define plants through the concepts of plant structure and anatomy
4. Introduce the wide variety of plants cultivated throughout the world
5. Describe how plants work (growth, reproduction, physiology, and soil)
6. Describe how plants are manipulated to feed, clothe and entertain the world

HORT 2110. Ornamental Plants I
4 Credits (2+3P)
Covers identification, botanical characteristics, culture, and landscape uses of woody plants. Emphasis on deciduous trees, native shrubs, and evergreens.
Learning Outcomes
1. Given 35 ornamental plants selected from the course's plant list, 100% of students will be expected to correctly identify the genus, species, and common names of the plants with 70% accuracy.
2. Given plants selected from the course's plant list, 100% students will be expected to identify to landscape use of those plants with 85% accuracy.

HORT 2120. Ornamental Plants II
4 Credits (2+3P)
Identification, botanical characteristics, culture, and landscape uses of woody plants. Emphasis on flowering trees, cacti, and members of the pea and rose families.
Learning Outcomes
1. Given 35 ornamental plants selected from the course's plant list, 100% of students will be expected to correctly identify the genus, species, and common names of the plants with 70% accuracy.
2. Given plants selected from the course's plant list, 100% students will be expected to identify to landscape use of those plants with 85% accuracy.
HORT 2130. Floral Quality Evaluation and Design
2 Credits (1+2P)
Critical hands-on evaluation of the quality of cut and potted floral and tropical foliage crops, their specific merits and faults, and fundamentals of floral design.

Learning Outcomes
1. Identify common floriculture crops, or know resourcing to help identify the crop.
2. Evaluate quality (merit and fault) of common floriculture crops, based on industry standards and merit. Pi Alpha Xi and American Floral Endowment standards will be used for the purpose of this class.
3. Have a basic understanding of the floriculture industry, and identify career pathways within the industry.
4. Know, understand, creatively interpret, and execute basic principles of design in regards to floral design.
5. Use interpersonal communication, problem solving, basic math, and marketing during cash and carry “lab” time (flower sales) in developing job ready skills in floristry.
6. Layer principles of design, marketing, sales, and time management to create floral art in real-world scenarios.

HORT 2160. Plant Propagation
3 Credits (2+2P)
Practical methods of propagating horticultural plants by seed, cuttings, layering, grafting, division and tissue culture. Examination of relevant physiological processes involved with successful plant propagation techniques. Same as AGRO 2160.

Learning Outcomes
1. Practical methods of propagating plants by seed, cuttings, layering, grafting, division, and tissue culture through experiential, “hands-on” laboratories.
2. Relevant physiological principles involved in propagating horticultural plants through lecture discussions and readings.

HORT 2990. Floriculture Field Practicum
1 Credit (1)
Participation as team member in the National Intercollegiate Floral Quality Evaluation and Design Competition. Intensive week-long travel for competition, networking with industry, academia, and floriculture tours. May be repeated for a maximum of 3 credits.

Prerequisite(s): HORT 2130 or consent of instructor.

Learning Outcomes
1. Varies

HORT 2996. Special Topics
1-4 Credits
Specific subjects and credits as announced. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

Learning Outcomes
1. Varies

HORT 300. Special Topics
1-4 Credits
Specific subjects as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.
HORT 447. Seminar
1 Credit (1)
Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, ENVS 447 and SOIL 447.

HORT 449. Special Problems
1-3 Credits
Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

HORT 450. Special Topics
1-4 Credits
Specific subjects as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

HORT 462. Plant Breeding
3 Credits (3)
Principles and practices involved with the genetic improvement of plants. May be repeated up to 3 credits.
Prerequisite(s): ANSC/AGRO/Biol/Hort/Gen 305 or Gene 315 and Gene 320.

HORT 471. Plant Mineral Nutrition
3 Credits (3)
Basic and applied aspects of plant requirements for soil-derived minerals and the processes whereby minerals are acquired, absorbed, translocated, and utilized throughout the plant. Same as AGRO/EPWS 471.
Prerequisite: EPWS/Biol 314, or concurrent enrollment, or consent of instructor.

HORT 479. Advanced Turfgrass Science
3 Credits (3)
Extensive reviews of turfgrass sciences including ecology, physiology, entomology, pathology, weed science, and soil science.
Prerequisite: HORT 378 or consent of instructor.

HORT 485. Vegetable Crop Management
4 Credits (3+2P)
Physiological, environmental and cultural aspects of vegetable crop production. Corequisite(s): AGRO 365/Hort 365

HORT 488. Greenhouse Management
4 Credits (3+3P)
Principles and practices involved in greenhouse structures and construction, site considerations, heating and cooling systems, greenhouse crop production techniques, sustainability practices. May be repeated up to 4 credits.
Prerequisite(s): HORT/AGRO 365 or consent of instructor.

HORT 492. Diagnosing Plant Disorders
3 Credits (2+3P)
Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as EPWS 492 and AGRO 492.
Prerequisites: EPWS 303 and EPWS 310.

HORT 500. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

HORT 505. Research Orientation
4 Credits (3+2P)
Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: AGRO 505, SOIL 505 and ENVS 505.

HORT 506. Plant Genetics
3 Credits (3)
Advanced treatment of the principles of classical genetics and heredity with emphasis on the nature and action of the gene including molecular analysis. May be repeated up to 3 credits. Crosslisted with: AGRO 506.
Prerequisite(s): AGRO 305/Gene 305/Hort 305/Biol 305/Ansc 305 or consent of instructor.

HORT 515. Crop Physiology
3 Credits (3)
Whole plant physiological processes as related to growth, development, yield, quality and post harvest physiology of crop plants within the environment of the crop community. Crosslisted with: AGRO 515.

HORT 525. Scientific Writing How to be a Productive and Effective Writer
1-3 Credits (1-3)
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review Crosslisted with: AGRO 525, AGRO 625, EPWS 525, SOIL 625 and SOIL 525.

HORT 590. Graduate Seminar
1 Credit (1)
Current research discussions presented by masters level graduate students. Not more than one credit toward the degree. Same as AGRO/SOIL 590. Crosslisted with: AGRO 590 and SOIL 590.

HORT 595. Internship
1-6 Credits
Supervised professional on-the-job learning experience. Limited to Master of Horticulture or Plant & Environmental Science candidates. Not more than 6 credits toward the degree.

HORT 596. Masters Proposal
1 Credit (1)
Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, ENVS 596, Gene 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.
Prerequisite(s): Master level graduate students.

HORT 597. University Teaching Experience
1-3 Credits (1-3)
Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: AGRO 597 and SOIL 597.

HORT 598. Special Research Programs
1-6 Credits
Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits toward a degree.
Prerequisite: consent of instructor.

HORT 599. Master's Thesis
15 Credits
Thesis.
HORT 609. Breeding for Plant Disease Resistance  
3 Credits (3)  
A practically-oriented course of lectures and discussion on concepts and principles of breeding for disease and pest resistance. Labs familiarize students with preparation, quantification, and application of inoculum to hosts. Same as AGRO 609.

HORT 610. Advanced Crop Breeding  
4 Credits (3+3P)  
Applications of breeding principles to crop improvement. Emphasis on breeding methodologies using modern techniques, including biotechnology. Same as AGRO 610.  
Prerequisite: AGRO 462 or consent of instructor.

HORT 620. Instrumentation in Agronomy  
3 Credits (3)  
Use of instruments used in research in all areas of agronomy including gas chromatography, high performance liquid chromatography, neutron soil moisture probe, and other instruments. Same as AGRO/SOIL 620.

HORT 625. Scientific Writing - How to be a Productive and Effective Writer  
1-3 Credits (1-3)  
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Students in the 625 course will be required to perform additional research than those students in the 525 cross-listing Crosslisted with: AGRO 525, EPWS 525, HORT 525 and SOIL 525.

HORT 696. Doctors Proposal  
1 Credit (1)  
Current research proposal written by PhD level graduate students. Consent of Instructor required. Crosslisted with: AGRO 696, ENVS 696 and SOIL 696. Restricted to: Doctors PLEN majors.

HORT 697. University Teaching Experience  
1-3 Credits (1-3)  
Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: AGRO 697 and SOIL 697

HORT-HOSPITALITY AND TOURISM

HOST 155. Special Topics  
1-3 Credits (1-3)  
Specific subjects to be announced in the Schedule of Classes. Restricted to: Community Colleges only.

HOST 201. Introduction to Hospitality Industry  
3 Credits (3)  
Overview of hospitality industry; organization and operation of lodging, food and beverage, and travel and tourism segments; focus on career opportunities and future trends of hospitality industry. Restricted to: Community College campuses only.

HOST 202. Front Office Operations  
3 Credits (3)  
Hotel/motel front office procedures detailing flow of business, beginning with reservations and extending to the night audit process. Restricted to: Community College campuses only.

HOST 203. Hospitality Operations Cost Control  
3 Credits (3)  
Management of Food & Beverage facilities using cost control techniques. Functional training in menu analysis and development with all phases of product flow through a Food & Beverage organization explored. Restricted to: Community Colleges only.

HOST 204. Promotion of Hospitality Services  
3 Credits (3)  
Organization of hotel marketing functions; developing a marketing plan to sell the varied services of the hotel/motel property. Restricted to: Community College campuses only.

HOST 205. Housekeeping, Maintenance, and Security  
3 Credits (3)  
Function of housekeeping departments, including personnel, sanitation, maintenance, and materials. A survey of security procedures to include guest protection and internal security of hotel/motel assets. Restricted to: Community College campuses only.

HOST 206. Travel and Tourism Operations  
3 Credits (3)  
Transportation, wholesale and retail operations, attractions, the traveler, tourism development, and operational characteristics of tourism business. Restricted to: Community College campuses only.

HOST 207. Customer Service for the Hospitality Industry  
3 Credits (3)  
Concepts of service and the customer, integrating the need for service quality, and the continuing efforts to maximize returns for the operation. Classic service styles as well as more modern service techniques are covered. Students gain in-depth managerial knowledge, planning skills, and hands-on techniques for consistently delivering quality and service in a variety of operations. Restricted to: Community College campuses only.

HOST 208. Hospitality Supervision  
3 Credits (3)  
Strategies for directing, leading, managing change and resolving conflict. Prepares students to meet expectations of management, guests, employees, and governmental agencies. Restricted to: Community College campuses only.

HOST 209. Managerial Accounting for Hospitality  
3 Credits (3)  
Prepares students to make effective business decisions based on financial report information; forecasting, budgeting, cost analysis. Restricted to: Community College campuses only.

HOST 210. Catering and Banquet Operations  
3 Credits (3)  
Teaches the basics of catering and banquet operations, including computer coordination, planning, set up, service, and completion. Restricted to Community Colleges campuses only.

HOST 214. Purchasing and Kitchen Management  
3 Credits (3)  
Technical purchasing concepts, product selection, and specifications. Safety and sanitation as they relate to food service establishments. Prepares student for work with HACCP programs. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): HOST 203.
HOST 216. Event, Conference and Convention Operations
3 Credits (3)
The ability to successfully plan, organize, arrange, and execute special events is critical to the success of many hospitality organizations. This course gives the student a grounding in the skills necessary to achieve success in this area. A variety of events are discussed and the similarities and differences with conferences and conventions are explored. Students are taught to organize and plan events of varying type and durations. Sales, logistics, and organizing skills are emphasized. Restricted to: Community College campuses only.

HOST 219. Safety, Security and Sanitation in Hospitality Operations
3 Credits (3)
It is the responsibility of the manager to provide appropriate security, sanitation, and safety precautions in hospitality operations. Preparation for internal and external disasters is an important task for the Hospitality Manager. This course uses the National Restaurant Association ServSafe® training material. Restricted to: Community College campuses only.

HOST 221. Internship I
1-3 Credits (1-3)
Work experience that directly relates to a student’s major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEHS, HOST majors. Graded: S/U. Restricted to Community Colleges campuses only.

HOST 222. Cooperative Experience II
3 Credits (3)
Continuation of HOST 221. Restricted to majors. Graded: S/U. Restricted to: Community College campuses only. Restricted to HOST majors.

Prerequisite(s): HOST 221.

HOST 239. Introduction to Hotel Management
3 Credits (3)
This course covers basic management functions in hotels, resorts, Boutique Hotels, Bed & Breakfast establishments, and other lodging operations. All aspects of the operation are covered including guest management, operations, and sales and marketing. Restricted to: Branch campuses only.

HOST 255. Special Topics
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 9 credits. Restricted to Community Colleges campuses only.

HOST 298. Independent Study
1-3 Credits (1-3)
Individual studies directed by consenting faculty with prior approval of department chair. May be repeated for a maximum of 3 credits. Restricted to: Community College campuses only.

Prerequisite(s): Minimum 3.0 GPA and sophomore standing.

HRTM-HOTEL/RESTRNT/TOURISM MGT

HRTM 1120G. Introduction to Tourism
3 Credits (3)
Survey of travel and tourism development and operating characteristics.

Learning Outcomes
1. Define tourism and related terms. Identify and explain the role of the elements of the destination mix. Identify the potential socio-cultural, economic and environmental impacts of tourism.
2. Identify and describe the role of key governmental and nongovernmental organizations in tourism.
3. Describe basic tourism planning and development principles.
4. Discuss the unique challenges of tourism marketing and standard marketing methods.
5. Describe the components of the tourism distribution system.
6. Demonstrate a basic understanding of traveler behavior including motivations and barriers to travel. Identify major factors that influence traveler flows. Describe the role of major modes of transportation in the tourism system.
7. Identify and describe the three pillars of sustainable tourism development. Explain personal and social responsibility as it relates to sustainable tourism development. Demonstrate effective communication and critical thinking skills.

HRTM 1130. Introduction to Hospitality Management
3 Credits (3)
Overview of the major segments of the hospitality industry, with a focus on basic management principles.

Learning Outcomes
1. Understand the concept of management contracts and franchising.
2. Recognize and understand needed leadership qualities to achieve organizational objectives.
3. Understand the hospitality industry within the global environment.
4. Identify company and industry trends.
5. Understand the functions of all departments in a hospitality organization (restaurant, hotel, club, etc.).
6. Apply the concepts of convention management, meeting and event planning, and casino management.
7. Understand the concepts of quick and institutional/contract foodservice management.
8. Understand the principles of bar management and compare and contrast wines, beers and distilled spirits.
9. Manage the process of service delivery.
10. Identify and solve managerial problems
11. Manage a diverse workforce and develop positive employee relations to reduce turnover.
HRTM 2110. Safety, Sanitation and Health in the Hospitality Industry  
1 Credit (1)  
Addresses public health, HACCP, and food safety responsibilities in the hospitality industry. Sanitation certification test allows students to receive national ServSafe Food Protection Manager Certification. Restricted to Las Cruces campus only.  
Learning Outcomes  
1. Identify the hazards to safe food and the foods at risk in a foodservice operation.  
2. Identify and discuss the Hazard Analysis Critical Control Point (HACCP) system and be able to design a HACCP flowchart.  
3. Demonstrate knowledge of how to protect food during purchasing, receiving, storing, preparing, holding, and serving.  
4. Discuss the procedures for ensuring sanitary equipment, facilities, and food-handling practices.  
5. Explain how to set-up cleaning, safety, pest control, crisis management, and training programs.

HRTM 2120. Food Production and Service Fundamentals  
3 Credits (1+4P)  
Basic overview of food service systems including menu management, purchasing and production. The course includes basic principles of food fabrication and production. Topics include knife skills, culinary terminology, product identification, quality standards, nutritional cooking theory and application of food preparation techniques. The course includes laboratory aspects and demonstration of basic food production techniques, service styles, practices and procedures in food service operations including culinary math. This course provides students with an understanding of food service sanitation and culinary nutrition. Completion of a national certification examination is required. Students who have not completed HRTM 2110 before enrolling in the course must have proof of valid ServSafe Food Protection Manager certificate. Restricted to Las Cruces campus only. Prerequisite(s)/Corequisite(s): HRTM 2110  
Prerequisite(s): HRTM 1130 or FSTE 2110G.  
Learning Outcomes  
1. Demonstrate use of standard recipes and how to reduce and increase their yields.  
2. Demonstrate basic culinary knife cuts, basic fabrication and mise en place  
3. Demonstrate basic cookery techniques of dry, moist and a combination of heat  
4. Demonstrate the proper plating and garnishing of foods  
5. Describe proper personal behaviors required for the safe handling of food  
6. Identify and properly operate kitchen equipment.  
7. Pass the ServSafe Exam  
8. Describe the three forms of food contaminants and preventative measures.  
9. Demonstrate how to properly “set” a table for service  
10. Demonstrate how to provide dining room service with proper etiquette  
11. Demonstrate safe work habits, identify safety hazards, and employ preventative safety measures.  
12. Maintain positive relations with fellow students and faculty through teamwork.  
13. Exhibit appropriate work habits and attitudes; demonstrate a willingness to compromise.  
14. Demonstrate a positive attitude, conversation skills, personal hygiene and work attire.
HRTM 2130. Hotel Operations I
3 Credits (3)
Analysis of hotel operations to include: guest services, reservations, reception, guest/city ledger and the night audit. May be repeated up to 3 credits. Restricted to Las Cruces campus only.
Prerequisite(s): HRTM 1130.
Learning Outcomes
1. Outline the history, magnitude and culture of the hotel industry
2. Define and identify hotel ownership and operational structures
3. Outline the organization and structure of a hotel and resort.
4. Describe and calculate the components and processes of room reservation forecasting, pricing and revenue management.
5. Outline and explain the flow of the guest from pre-arrival through arrival, room occupancy and departure.
6. Demonstrate the procedures and processes for Guest Accounting, the City Ledger, Guest Credit and the Night Audit.
7. Discuss problem solving and guest service associated with the front office and other departments of the hotel and resort.
8. Forecast impacts of technology to the guest services and hotel operations
9. Describe the day to day activities and responsibilities of a Hotel Front Office Manager or a Hotel Assistant General Manager (AGM).

HRTM 2996. Special Topics
1-4 Credits
Specific subjects and credits to be assigned on a semester basis for both lecture and laboratory assignments. May be repeated for a maximum of 4 credits.
Prerequisite: consent of instructor.
Learning Outcomes
1. Varies

HRTM 301. Hotel, Restaurant, and Tourism Marketing
3 Credits (3)
The development of effective marketing programs for hospitality service organizations. Prerequisites: HRTM 1130

HRTM 302. Hospitality Management Accounting
3 Credits (3)
Specialized accounting for hotel revenue and expenses; accounting for inventory, property, and equipment; hospitality payroll accounting; hotel departmental financial statements; income statement, balance sheet, and statement of cash flows; the analysis of financial statements; interim and annual reports; budgeting expenses; forecasting sales; budgetary reporting and analysis; and financial decision making.
Prerequisite: ACCT 2110.

HRTM 304. Hospitality and Travel Law
3 Credits (3)
Specialized applications of the law to the hospitality and tourism industry. Prerequisite: HRTM 1130

HRTM 307. Professional Development
1 Credit (1)
Covers essential elements of career management including preparation for a successful internship. Restricted to majors. Graded S/U.

HRTM 311. Hospitality Leadership Management
3 Credits (3)
Examines modern leadership theory in the context of the hospitality industry. Connects contemporary leadership topics to their historical antecedents through focused reading, discussion and film.
Prerequisites: HRTM 1130 and HRTM 1120.

HRTM 363. Quantity Food Production and Service
4 Credits (1+6P)
Covers quantity food production and service including cooking concepts, sanitation and safety, teamwork, dining room service, and management responsibilities. Students will apply this knowledge developing product for sale in a student run restaurant. Proof of current ServSafe Food Protection Manager or NM Food Handler certification required. May be repeated up to 4 credits.
Prerequisite(s): HRTM 2120.

HRTM 408. Hospitality Internship
1 Credit (1)
Hospitality and tourism professional work experience for HRTM majors only. Restricted to majors.
Prerequisites: HRTM 307 and consent of instructor.

HRTM 409. HRTM Internship Seminar
1 Credit (1)
A case based approach to analyzing internship experiences. Students will write case studies about specific business issues they encountered during HRTM 408 (Internship) and analyze them. Restricted to majors.
Prerequisites: HRTM 408.

HRTM 410. Hospitality Cost Control
3 Credits (3)
Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers.) Provides tools needed to communicate effectively about global financial issues affecting the hospitality business. May be repeated up to 3 credits.
Prerequisite(s): HRTM 302, HRTM 363.

HRTM 412. Beverage Management
3 Credits (3)
Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation. May be repeated up to 3 credits.
Prerequisite(s): HRTM 363.

HRTM 413. Restaurant Operations Management
4 Credits (1+6P)
Provides a detailed understanding of the processes of restaurant operations management. Students are expected to increase kitchen and service technical skills, develop and cook from recipes, develop a personal leadership style, understand food and wine pairing, and supervise front and back of the house operations. Provides the opportunity to perform a detailed analysis of a food and beverage operation. Proof of valid ServSafe Food Protection Manager or NM Food Handler certification and current NM Alcohol Server certification required. May be repeated up to 4 credits.
Prerequisite(s): HRTM 363.

HRTM 414. Wine Appreciation
3 Credits (3)
An experiential examination of wine through lectures, guest speakers and focused tasting of wine and food. Topics include viticulture, wine making varietals, terroir, wine service, tasting and evaluation techniques, and food pairings. Student must be at least 21 years old. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): Consent of instructor.
HRTM 416. Hotel, Restaurant and Tourism Industry Purchasing, Selection, and Procurement
3 Credits (3)
Prerequisite(s): HRTM 2130, HRTM 408.
Purchasing methods for the hotel, restaurant and tourism industries based on standards of quality, grade, care, and storage for food and nonfood supplies. Purchasing, installation, operation, and care of large foodservice equipment.

Learning Outcomes
1. Differentiate purchasing functions in different types of hotel, restaurant and tourism operations and determine how internal and external forces impact purchasing decisions.
2. Outline and describe the duties and responsibilities of hotel, restaurant and tourism purchasing managers.
3. Develop product recommendations for hotel, restaurant and tourism food and equipment through the use of various product evaluation methods.
4. Identify examples of unethical purchasing practices throughout history, research present a code of purchasing ethics for a hotel, restaurant or tourism company.
5. Analyze hotel, restaurant and tourism industry supplier selection criteria and recommend a supplier based on those criteria.
6. Apply mathematical models to calculate recipe costs as well as order quantities and times. Determine how to reduce AP prices.
7. Outline and describe each step of the flow of inventory and determine which controls are needed for security of inventory.
8. Explain product grades and explain grading procedures and procurement criteria for meats, poultry, eggs, dairy, produce, marine products, groceries, and nonfood items.

HRTM 420. Club Management and Marketing
3 Credits (3)
Provides an understanding of the general operational and administrative procedures practiced in private clubs from a marketing perspective with a special emphasis on managing and marketing club food and beverage operations and service. It will provide the professional golf management and hospitality students with the unique sensitivities required in managing and operating in the increasingly lucrative club management market.

HRTM 430. Hospitality Facilities Management
3 Credits (3)
Exploration of the engineering and maintenance requirements specific to the hospitality industry. Emphasis on environmental issues, renovation and management of the physical plant. May be repeated up to 3 credits.

HRTM 431. Hotel Operations II
3 Credits (3)
The duties and administration of a hotel front office, including housekeeping. Additional focus on the procedures of reservations and night audit. Students also gain exposure to property management systems. May be repeated up to 3 credits.

HRTM 432. Hotel Revenue and Sales Management
3 Credits (3)
Examines methods used for profitably managing capacity, including dynamic pricing and allocation of the rooms inventory across market segments to maximize revenues. Focuses on the integration of revenue management principles with information technology, management, marketing and sales concerns at the property and market level. May be repeated up to 3 credits.
Prerequisite(s): HRTM 2130.

HRTM 434. Senior Capstone Experience
3 Credits (3)
Synthesizes all previous work. Students apply multi-disciplinary principles to the analysis of hospitality business cases and tourism problems.
Prerequisite: HRTM 408.

HRTM 435. Resort Management
3 Credits (3)
This course introduces students to the operation and management of full service resort properties, including the management of resort recreational amenities.
Prerequisite(s): HRTM 2130 or consent of instructor.

HRTM 436. Sustainability in the Hospitality Industry
3 Credits (3)
This course provides a summary and definition of the concept and roots of sustainability and climate change as well as their impact and effect on the hospitality industry while providing the rationale for sustainable development for the industry. A review of environmentally sound management strategies for all operational management areas ranging from eco-design, energy, waste and water management, food security, sourcing of agricultural products leads to a detailed strategy for planning and evaluating the sustainability of a hospitality operation in terms of corporate responsibility and social entrepreneurship. The content is focused on a global perspective of sustainability in the industry.

Learning Outcomes
1. Recognize, interpret and summarize the global challenges facing the hospitality industry caused by climate change driving the need for sustainability in the industry.
2. Explain implementation strategies for responsible environmentally sound hospitality management practices for hotel, food and beverage and tourism businesses.
3. Evaluate sustainable development practices and the importance of personal and corporate social development.
4. Analyze, evaluate and communicate the sustainability practices of a hospitality operation.

HRTM 443. Meetings, Conventions and Special Events
3 Credits (3)
Examination of the role of the meeting/event planner, including setting objectives, site selection, negotiations, design, budgeting, marketing, registration, on-site logistics, and evaluation. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): Consent of Instructor.
HRTM 444. Entertainment Business and Venue Management  
3 Credits (3)  
This course will review and examine the principles and practices associated with managing a public assembly venue and the nature of the venue and entertainment business. This is a comprehensive course designed to cover all aspects of incorporated event practices such as marketing, production, contracts, ticketing, and security.  
Learning Outcomes  
1. Analyze the origin and history of public assembly venues and the role they play within the community.  
2. Analyze different ownership and management structures and how governance relationships impact operational management.  
3. Analyze the business and financial operations of a public assembly venue.  
4. Describe the booking process, the entities involved, and the importance of relationships.  
5. Analyze and create marketing and sales strategies for both a public assembly venue and an event that is booked in the venue.  
6. Identify and analyze the ticket system options available to venue managers, as well as their importance in access management, financial accountability, and data collection.  
7. Analyze the role and importance of ancillary revenue sources, as well as the need for creativity and entrepreneurship.  
8. Describe the operational systems and processes required to maintain a venue and produce events.  
9. Analyze the event planning process and how it is used to produce an event experience for guests and clients.  
10. Analyze management’s role in developing and maintaining a safe and secure public assembly venue.

HRTM 450. Special Topics  
1-4 Credits  
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.  
Prerequisite: consent of instructor.

HRTM 492. Special Problems  
1-4 Credits  
Individual research in a selected subject area of hospitality management. Maximum of 4 credits per semester and a total of 6 credits toward a degree.  
Prerequisite: consent of instructor.

HRTM 501. The Hospitality Industry and Sustainable Competitive Strategy  
3 Credits (3)  
An examination of the hospitality industry, and its contemporary strategic management principles and practices. Key components, industry organization, and competitive environment of the hospitality industry are analyzed. Strategic decision making principles are examined to create sustainable competitive advantages for hospitality and service industry leaders and organizations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.  
Learning Outcomes  
1. Analyze key components, industry organization, and competitive environment of the hospitality industry.  
2. Examine strategic decision making principles to create sustainable competitive advantages for hospitality and service industry leaders and organizations.

HRTM 502. Advanced Hospitality Services Management  
3 Credits (3)  
This course explores and applies the design and management of service quality in global hospitality organizations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.  
Learning Outcomes  
1. Investigate the design and management of service quality in global hospitality organizations to create authentic and memorable hospitality experiences.  
2. Design and manage service delivery systems to create a culture of service excellence.  
3. Define and discuss the relationship between service and financial performance in hospitality organizations.

HRTM 503. Hospitality Organizational Leadership and Human Resources  
3 Credits (3)  
Application of key organizational, leadership and human resource theories to global hospitality organizations. Analysis of key hospitality industry leaders, companies and systems. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.  
Learning Outcomes  
1. Apply organizational, leadership and human resource theories to global hospitality organizations.  
2. Analyze key hospitality industry leaders, companies and systems.  
3. Coordinate teams to provide effective management and maintain successful employee and guest relations.

HRTM 504. Marketing Strategy for Global Hospitality  
3 Credits (3)  
Application, analysis and evaluation of marketing theories, strategies and tactics for developing sustainable competitive advantage in the global hospitality industry. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.  
Learning Outcomes  
1. Explore and analyze global hospitality markets, including the values and expectations of global hospitality consumers.  
2. Analyze and evaluate marketing theories, strategies and tactics for developing sustainable competitive advantage in the global hospitality industry.  
3. Design marketing strategies that will promote and sustain positive guest/customer relationships.  
4. Apply concepts of digital marketing to hospitality organizations.

HRTM 505. Hospitality Research Methods & Analysis  
3 Credits (3)  
Application of appropriate statistical procedures and research methodologies within the hospitality industry. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.  
Learning Outcomes  
1. Analyze hospitality operational data.  
2. Develop the framework for researching hospitality operations and organizations.  
3. Implement appropriate statistical procedures and research methodologies to hospitality operations.  
4. Examine problems in hospitality, formulate and clarify research topics to address these problems.
HRTM 506. Contemporary Global Issues in Hospitality  
3 Credits (3)  
Contemporary issues confronting the global hospitality industry. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.  
**Learning Outcomes**  
1. Discuss contemporary issues confronting the global hospitality industry.  
2. Project how contemporary global issues will impact hospitality organizations.  
3. Evaluate new developments in hotel and restaurant management.

HRTM 510. Hospitality Cost Control  
3 Credits (3)  
Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers). Provides tools needed to communicate effectively about global financial issues affecting the hospitality business. Same as HRTM 410 with additional work for graduate credit. Consent of Instructor required.

HRTM 511. Hospitality Financial Analysis  
3 Credits (3)  
Financial and accounting decision processes as applied to the hospitality industry. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.  
**Learning Outcomes**  
1. Use the Uniform Systems of Accounts for the Lodging and Restaurant industries, and accounting and financial reporting standards and procedures for the hospitality industry.  
2. Use hospitality financial and accounting tools such as REVPAR and Food Cost Percentage to analyze hospitality operations.  
3. Define and apply terminology and principles required to develop and analyze Hospitality Management financial statements.  
4. Analyze and interpret hospitality accounting and financial statements.  
5. Perform financial and accounting decision making as applied to the hospitality industry.

HRTM 512. Beverage Management  
3 Credits (3)  
Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation. Same as HRTM 412 with additional work for graduate credit. Consent of Instructor required.

HRTM 515. Applied Management Project  
3 Credits (3)  
Students will develop a project scope based on problems presented within the hospitality industry. Projects incorporate concepts and skills developed in previous coursework. Students will take this course in their last semester of the Master of Hospitality Degree. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.  
**Learning Outcomes**  
1. Develop a project scope based on problems presented within the hospitality industry.  
2. Use collaborative problem solving to execute the project.  
3. Define and identify a business research problem and explain its importance to study.  
4. Identify sources and strategies for locating related literature.  
5. Plan research regarding the business problem.  
6. Write the professional paper.  
7. Present the professional paper.

HRTM 516. Hotel, Restaurant and Tourism Industry Purchasing, Selection and Procurement  
3 Credits (3)  
Purchasing methods for the hotel, restaurant and tourism industries based on standards of quality, grade, care, and storage for food and nonfood supplies. Purchasing, installation, operation, and care of large foodservice equipment.  
**Learning Outcomes**  
1. Differentiate purchasing functions in different types of hotel, restaurant and tourism operations and determine how internal and external forces impact purchasing decisions.  
2. Outline and describe the duties and responsibilities of hotel, restaurant and tourism purchasing managers.  
3. Develop product recommendations for hotel, restaurant and tourism food and equipment through the use of various product evaluation methods.  
4. Identify examples of unethical purchasing practices throughout history, research present a code of purchasing ethics for a hotel, restaurant or tourism company.  
5. Analyze hotel, restaurant and tourism industry supplier selection criteria and recommend a supplier based on those criteria.  
6. Apply mathematical models to calculate recipe costs as well as order quantities and times. Determine how to reduce AP prices.  
7. Outline and describe each step of the flow of inventory and determine which controls are needed for security of inventory.  
8. Explain product grades and explain grading procedures and procurement criteria for meats, poultry, eggs, dairy, produce, marine products, groceries, and nonfood items.

HRTM 530. Facilities Management  
3 Credits (3)  
Exploration of the engineering and maintenance requirements specific to the hospitality industry. Emphasis on environmental issues, renovation and management of the physical plant. Same as HRTM 430 with additional work for graduate credit. Consent of Instructor required.
HRTM 531. Hotel Operations II
3 Credits (3)
The duties and administration of a hotel front office, including housekeeping. Additional focus on the procedures of reservations and night audit. Students also gain exposure to property management systems. Same as HRTM 431 with additional work for graduate credit. Consent of Instructor required.

HRTM 532. Hotel Revenue and Sales Management
3 Credits (3)
Examines methods used for profitably managing capacity, including dynamic pricing and allocation of the rooms inventory across market segments to maximize revenues. Focuses on the integration of revenue management principles with information technology, management, marketing and sales concerns at the property and market level. Same as HRTM 432 with additional work for graduate credit. Consent of Instructor required.

HRTM 535. Resort Management
3 Credits (3)
This course introduces students to the operation and management of full service resort properties, including the management of resort recreational amenities.
Prerequisite(s): Consent of instructor.

HRTM 536. Sustainability in the Hospitality Industry
3 Credits (3)
This course provides a summary and definition of the concept and roots of sustainability and climate change as well as their impact and effect on the hospitality industry while providing the rationale for sustainable development for the industry. A review of environmentally sound management strategies for all operational management areas ranging from eco-design, energy, waste and water management, food security, sourcing of agricultural products leads to a detailed strategy for planning and evaluating the sustainability of a hospitality operation in terms of corporate responsibility and social entrepreneurship. The content is focused on a global perspective of sustainability in the industry.
Learning Outcomes
1. Recognize, interpret and summarize the global challenges facing the hospitality industry caused by climate change driving the need for sustainability in the industry.
2. Explain implementation strategies for responsible environmentally sound hospitality management practices for hotel, food and beverage and tourism businesses.
3. Evaluate sustainable development practices and the importance of personal and corporate social development.
4. Analyze, evaluate and communicate the sustainability practices of a hospitality operation.

HRTM 543. Meetings, Conventions and Special Events
3 Credits (3)
Examination of the role of the meeting/event planner, including setting objectives, site selection, negotiations, design, budgeting, marketing, registration, on-site logistics, and evaluation. Same as HRTM 443 with additional work for graduate credit. Consent of Instructor required.

HRTM 546. Methods for Teaching Hospitality and Culinary Education
3 Credits (3)
Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.
Learning Outcomes
1. Compare and contrast curriculum theories.
2. Develop syllabi for hospitality courses using theories and models of course design.
3. Apply instructional techniques in hospitality education.
4. Design tests and other assessments for hospitality courses.
5. Write a teaching philosophy.

HRTM 550. The World of Hospitality Higher Education
3 Credits (3)
Survey of the history, organization, and administration of hospitality higher education programs. Explores differences between types of degree programs – associate, bachelor, graduate and sources of funding – public, private, proprietary. Investigates the role of the faculty member in non-instructional activities, such as working with administrative and support departments, accreditation, service, community outreach, fundraising, and industry relations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.
Learning Outcomes
1. Discuss the history of higher education and hospitality management programs.
2. Analyze how general higher education principles, laws, and finance apply to hospitality management programs.
3. Compare the characteristics, administration, and operations of programs based on type of degrees offered.
4. Compare the characteristics, administration, and operations of programs based on sources of funding.
5. Analyze the role of the faculty in hospitality education in collaborating with various educational departments and support services.
6. Analyze the role of the faculty in hospitality education in collaborating with external stakeholders.

HRTM 590. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree.
Prerequisite: consent of instructor.

HRTM 598. Special Research Programs
1-4 Credits
Individual investigations, either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.
Prerequisite: consent of instructor.

HRTM 599. Master's Thesis
1-6 Credits (1-6)
Thesis.
Prerequisite: consent of instructor.
HVAC-HEATING/AC/REFRIGERATION

HVAC 100. EPA Clean Air Act: Section 608
1 Credit (1)
Refrigerant certification preparation to include basics of refrigerant bearing equipment, ozone depletion and the new legislation, technician categories covered and the certification examination.

HVAC 101. Fundamentals of Refrigeration
4 Credits (3+2P)
Refrigeration cycle and the various mechanical components. Use of special tools, equipment, and safety precautions.

HVAC 102. Fundamentals of Electricity
4 Credits (3+2P)
Introduction to electricity theory, OHM’s Law, circuits, AC/DC, and practical applications.

HVAC 103. Electrical and Mechanical Controls I
4 Credits (3+2P)
Applications of basic electrical and mechanical controls. Reading and drawing diagrams of simple refrigerating equipment. Safe use of testing equipment.
Prerequisites: HVAC 101 and HVAC 102, or consent of instructor.

HVAC 110. Professional Development and Leadership
1 Credit (1)
As members and/or officers of various student professional organizations, students gain experience in leadership, team building, and community service. Students competing in Skills USA are required to register for the course. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: HVAC majors. Restricted to Community Colleges only.

HVAC 113. Job Shadowing
1 Credit (1)
Course will expose students to actual HVAC/R field work and provide them knowledge of the expectations of field work as they shadow an HVAC/R technician. Consent of instructor required. Restricted to: Community colleges only.

HVAC 205. Commercial Refrigeration Systems
4 Credits (3+2P)
Service and maintenance of commercial refrigeration equipment to include evacuation and charging procedures, electrical diagrams, and compressors and accessories.
Prerequisites: HVAC 103 or consent of instructor.

HVAC 207. Residential Air Conditioning Systems
4 Credits (3+2P)
Applications and types of equipment used in comfort cooling. Preventive maintenance, service, and repairs common to evaporative coolers and refrigerated air conditioning systems. Properties and psychrometrics.
Prerequisite: HVAC 103 or consent of instructor.

HVAC 209. Residential Heating Systems
4 Credits (3+2P)
Gas and electric systems used in comfort heating. Maintenance procedures, safety, troubleshooting, and servicing malfunctions in equipment.
Prerequisite: HVAC 103 or consent of instructor.

HVAC 210. Commercial Air Conditioning and Heating Systems
4 Credits (3+3P)
Covers troubleshooting mechanical and electrical problems associated with HVAC equipment in commercial buildings. Includes gas, electric, and heat pump systems. Restricted to Community Colleges campuses only.
Prerequisites: HVAC 103 or consent of instructor.

HVAC 211. Heat Pump Systems
4 Credits (3+2P)
Reverse cycle refrigeration systems utilized in comfort heating and cooling. Troubleshooting mechanical electrical problems associated with heat pumps. HVAC 103 or consent of instructor.

HVAC 213. Practicum
3 Credits (3)
Working in the field with journeymen service technicians. Develop and apply job skills. May be repeated up to 3 credits. Consent of Instructors required. Restricted to: HVAC majors. Restricted to Community Colleges campuses only.
Prerequisites: HVAC 113 and Consent of instructor.

HVAC 220. Introduction to Sheet Metal Fabrication
4 Credits (3+2P)
Introduction to sheet metal fabrication to include hands-on practical laboratory applications, cutting and forming procedures, identifying types and gauges. Design and layout techniques.
Prerequisite: OETS 118 or equivalent math or consent of instructor.

HVAC 225. New Mexico Mechanical Codes: HVAC
1-4 Credits
Principles and regulations developed for HVAC, sheet metal, and plumbing occupations to include terminology, ventilation air supply, exhaust systems, duct systems, combustion air, chimneys and vents, boilers/water heaters, refrigeration, panel and hydronic panel heating, fuel gas piping, storage systems, solar systems, and workmanship standards. May be repeated for a maximum of 12 credits.

HVAC 255. Special Topics
1-6 Credits
Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.
Prerequisite: Consent of instructor.

HVAC 290. Special Problems
1-4 Credits
Individual studies related to heating, air conditioning, and refrigeration.
Prerequisites: HVAC 101, HVAC 102, and consent of instructor.
I B-INTERNATIONAL BUSINESS

I B 317. International Marketing
3 Credits (3)
Focuses on decisions relating to entering markets, market segmentation, marketing strategies, and tactics in the international arena. Same as MKTG 317.

Learning Outcomes
1. Develop understanding about what is involved in making international marketing decisions, including product, price, promotion, and place decisions to create a marketing mix. Acquire an overview on the contemporary issues in global marketing and the unique challenges faced by marketing managers in the dynamic global environment. Develop insights into how differences in global economic, cultural, social, political, and legal environments can affect marketing decisions. Develop strategic thinking in the context of complex problems and challenges faced by the contemporary global executives and managers. Develop ability to integrate the important global societal dimensions of diversity, environmental concerns, ethics, and technological change into their thinking. Develop knowledge and skills to analyze cross-cultural variables and their impact on international marketing. Discover sources of information for researching and evaluating international markets. Communicate effectively about marketing issues in group discussions, oral presentations and written reports. Work effectively as a team member in analyzing marketing issues. 1 Develop leadership skills necessary to deal with the uncertainty and changes faced by today's global marketers.

I B 351. International Business
3 Credits (3)
The various aspects of international business, and identification and analysis of problems encountered by multinational companies.
Prerequisite: junior standing or consent of instructor.

I B 398. International Business and Economic Environments
3 Credits (3)
Description and analysis of various world regions, e.g., Pacific Rim, Eastern Europe, South Asia. Region will vary from semester to semester.

I B 449. Open Economy Macroeconomics
3 Credits (3)
This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: ECON 449.
Prerequisite(s): BFIN 341 OR ECON 311.

I B 450. International Economics
3 Credits (3)
Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: ECON 450G
Prerequisite(s): ECON 2110G or ECON 2110H and ECON 2120G or ECON 2120H.

I B 475. International Finance
3 Credits (3)
International aspects of financial transactions, decision-making, banking and financial markets. Crosslisted with: BFIN 475 and BFIN 575.
Prerequisite(s): BFIN 341.

I B 489. Senior Seminar in International Business
3 Credits (3)
Capstone class for I B majors. Integration of previous classwork via the examination of case studies and completion of a major project.
Prerequisite: I B core.

I E-INDUSTRIAL ENGINEERING

I E 151. Computational Methods in Industrial Engineering
3 Credits (3)
History, social implications, and application of computers and an introduction to computer programming, word processing, and database management systems. Satisfies General Education computer science requirement.
Prerequisite: MATH 1220G.

I E 200. Special Problems-Sophomore
1-3 Credits
Directed individual projects. May be repeated for a total of 3 credits.
Prerequisite: consent of faculty member.

I E 217. Manufacturing Processes
3 Credits (3)
Introduction to manufacturing and processing, including: casting, forming, and machining. Emphasis on creating products with the appropriate techniques. Crosslisted with: E T 217.
Prerequisite: E T 110 and MATH 1220G.

Learning Outcomes
1. Various

I E 217 L. Manufacturing Processes Laboratory
1 Credit (3P)
Laboratory associated with I E 217. May be repeated up to 1 credits.
Prerequisite(s): E T 110.
Corequisite(s): I E 217.

I E 300. Special Problems-Junior
1-3 Credits
Directed individual projects. May be repeated for a total of 3 credits.
Prerequisite: consent of faculty member.

I E 311. Engineering Data Analysis
3 Credits (3)
Methodology and techniques associated with identifying and analyzing industrial data.
Prerequisite: C- or better in MATH 1521G or MATH 1521H or ENGR 190.

Learning Outcomes
1. Ability to correctly interpret statistical reports Ability to correctly identify and solve problems involving continuous and discrete probability and random variables. Ability to correctly analyze random samples using methods that include: point estimates, confidence intervals, tests of hypothesis, analysis of variance (ANOVA), and linear regression.

I E 316. Methods Engineering
3 Credits (2+3P)
Methods analysis and design. Work measurement techniques. Job evaluation and wage incentive methods. May be repeated up to 3 credits.
Prerequisite(s): I E 217, I E 311, E T 110.
I E 351. Applied Problem Solving in Industrial Engineering
3 Credits (3)
Application of computational techniques to engineering problems including the use of commercial programs in statistics and applied mathematics. Restricted to majors.
Corequisite(s): I E 311.

I E 365. Quality Control
3 Credits (3)
Statistical analysis of quality in manufacturing. Acceptance sampling and control charts.
Prerequisite: I E 311 or equivalent.

I E 375. Manufacturing Processes II
3 Credits (3)
Review of basic manufacturing processes. Advanced topics in casting, forming, machining and joining; major process parameters; economics of processes.
Prerequisite: I E 217 or E T 217.

I E 381. Technology Ventures
3 Credits (3)
This course looks at how new technology ventures are formed at the individual entrepreneur and corporate levels. It covers the development of science and engineering based ventures from ideas through creating customer value. This is the first course in the Entrepreneurship Minor. The roles of science and engineering specialists in the creation of customer value are defined in preparation for development of technology-based enterprises.

I E 382. Business for the Practicing Engineer
3 Credits (3)
Business tools and skills, including technology commercialization, patent applications, preparing a technology-oriented business plan, reading and constructing financial documents, modeling and understanding markets, e-commerce, QFD, concurrent engineering, engineer’s role in the global economy, and engineer’s impact on product design and cost.
Prerequisite: engineering major, junior level or above.

I E 400. Undergraduate Research
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of faculty member.

I E 411. Occupational Safety
3 Credits (3)
Practical methods to improve safety in the workplace. Topics include OSHA and other regulations, hazard recognition, assessment and control, industry standards, risk assessment and safety management. Material is applicable to a variety of workplace settings. This course is intended for College of Engineering students who have completed their lower-division requirements in mathematics, engineering, technology, and basic science. Same as I E 561 with differential assignments. Prerequisite: Junior standing

I E 413. Engineering Operations Research I
3 Credits (3)
Deterministic operations research modeling including linear and integer programming.
Prerequisite: MATH 1521G or MATH 1521H or ENGR 190.
Corequisite: MATH 480.

Learning Outcomes
1. Ability to model optimization problems that can be solved by linear optimization. Ability to solve linear optimization problems Ability to interpret solutions of linear optimization problems in the context of the larger problem.

I E 423. Engineering Operations Research II
3 Credits (3)
Probabilistic operations research modeling, including queuing systems and their optimization; Markov chains. May be repeated up to 3 credits.
Prerequisite(s): I E 311.
Corequisite(s): MATH 392.

I E 424. Manufacturing Systems
3 Credits (3)
Organization and functions of manufacturing planning and control systems including forecasting, MRP, capacity planning, JIT systems, scheduling, and inventory control.
Prerequisite: I E 311.

I E 451. Engineering Economy
3 Credits (3)
Discounted cash flows, economics of project, contract and specifications as related to engineering design.

I E 460. Evaluation of Engineering Data
3 Credits (3)
Analysis of engineering systems possessing variability, employing regression, analysis of variance, distribution theory, and experimental design methods.
Prerequisite: I E 311 or equivalent.

I E 466. Reliability
3 Credits (3)
Application of statistical theory to engineering reliability estimation, reliability improvement, and the analysis of reliability test data.
Prerequisite: I E 311 or equivalent.

I E 467. Discrete-Event Simulation Modeling
3 Credits (3)
Basic modeling concepts, organizations of simulations, input data analysis, random variate generation, simulation design and analysis, model validation, output analysis, and management of simulations. Differentiated graduate assignments. May be repeated up to 3 credits.
Prerequisite(s): I E 311 or equivalent.

I E 478. Facilities Planning and Design
3 Credits (3)
Plant location methods, total process analysis, process integration, materials handling analysis, and traditional and computerized plant layout methodologies.
Prerequisite(s): I E 316.
Prerequisite(s)/Corequisite(s): I E 424.

I E 480. Senior Design
3 Credits (2+3P)
Multi-disciplinary team design project for external clients. Involves semester long activities including major design report and presentation. Prerequisites: senior standing, I E 467.
I E 490. Selected Topics
1-3 Credits
May be repeated for a maximum of 9 credits.
Prerequisite: consent of the head of the department.

I E 505. Directed Readings
1-3 Credits
May be repeated for a maximum total of 6 credits.
Prerequisite: consent of the head of the department.

I E 515. Stochastic Processes Modeling
3 Credits (3)
Introduction to the use of stochastic processes in the modeling of physical and natural systems. Use of generating functions, conditional probability and expectation, Poisson processes, random walk models, Markov chains, branching processes, Markov processes, and queuing processes in an applied setting.
Prerequisites: I E 311 or equivalent; and MATH 392 or equivalent.

I E 522. Queuing Systems
3 Credits (3)
Elements and classification of queuing systems, single server models, multi-server models, cost analysis and applications.

Learning Outcomes
1. Ability to model, analyze, and apply solutions to problems involving queuing systems
2. Ability to read and understand literature in the queueing system analysis field.

I E 523. Advanced Engineering Economy
3 Credits (3)
Theoretical basis for engineering economy methods, problems of cost estimation, replacement, nonmonetary factors, and feasibility studies. Same as I E 424 with differentiated assignments.

I E 524. Advanced Production and Inventory Control
3 Credits (3)
Organization and functions of manufacturing planning and control systems including forecasting, MRP capacity planning, JIT systems, scheduling and inventory control. Same as I E 424 with differentiated assignments.

I E 525. Systems Synthesis and Design
3 Credits (3)
Examination of the production management complex in terms of its components and the synthesis of these components into an effective operating unit. Development of input-output models representing the basis structure of all production activities.

I E 530. Environmental Management Seminar
1 Credit (1)
Survey of practical and new developments in hazardous and radioactive waste management provided through a series of guest lectures and reports of ongoing research. Same as C E 530, E E 530, CHME 530.

I E 533. Linear Programming
3 Credits (3)
Linear programming problem formulation, simplex algorithm, theory of linear programming, duality, revised simplex algorithm, and sensitivity analysis.

I E 534. Nonlinear Programming
3 Credits (3)
Theoretical and computational methods to solve optimization problems in engineering, statistics, economics, and operations research. Topics include convexity, optimality conditions, Newton's method, Lagrange multipliers, search algorithms for unconstrained and constrained problems, as well as barrier and penalty methods.

Learning Outcomes
1. Ability to model situations which may be solved by nonlinear optimization and to interpret the results in the context of the larger problem
2. Ability to employ several computer tools to correctly solve nonlinear optimization problems
3. Ability to read and understand literature in the field of nonlinear optimization
4. Ability to select appropriate methods and algorithms from a core representative set of methods and tools to solve nonlinear optimization problems

I E 535. Discrete Optimization
3 Credits (3)
Combinatorial Optimization problems using both integer programming and graph theoretic approaches. Emphasis on modeling and computational algorithms.

I E 537. Large Scale Systems Engineering
3 Credits (3)
Systems engineering approaches to large-scale complex technological and societal problems. Concepts of interaction and structural graphs, matrices, delta, and Gantt charts. The hall matrix approach, structural concepts, reachability matrices, and cross impact-analysis, modeling and decision making.

I E 545. Characterizing Time-Dependent Engineering Data
3 Credits (3)
Theory and techniques employed in the characterization of stochastic processes commonly found in engineering applications. Distribution models include exponential, gamma, Weibull, and extreme value. Design and analysis of experiments involving complete and censored data and elevated stress. Analytical techniques include parametric, nonparametric, and graphical approaches with emphasis on modern computer tools. Exact and approximate maximum-likelihood techniques are stressed.

Learning Outcomes
1. Ability to characterize a process, based on data that is time-dependent or sequential in nature.

I E 561. Advanced Safety Engineering
3 Credits (3)
Regulation as well as qualitative, and quantitative methods to achieve and maintain safety in the workplace. Includes liability, worker's compensation, OSHA, hazard control, safety assessment, cost justification, and system analysis.
Prerequisite: graduate status in engineering.

I E 563. Topics in Engineering Administration
3 Credits (3)
Study of qualitative and quantitative aspects. Consideration given to philosophical, psychological, political and social implications of engineering administrative decisions.

I E 567. Design and Implementation of Discrete-Event Simulation
3 Credits (3)
Basic modeling concepts, organizations of simulations, input data analysis, random variate generation, simulation design and analysis, model validation, output analysis, and management of simulations. Taught with I E 467 with differentiated assignments for graduate students.
I E 571. Advanced Quality Control
3 Credits (3)
Advanced topics in quality control and design of experiments for improvement of quality.
Prerequisite: I E 311 or equivalent.

I E 575. Advanced Manufacturing Processes
3 Credits (3)
Covers major process parameters in casting, forming, machining, and joining. Process economics and selection of processes design and interactions.
Prerequisite: graduate standing.

I E 579. Selected Topics
1-3 Credits
May be repeated for a maximum of 9 credits.
Prerequisite: consent of the head of the department.

I E 590. Special Research Programs
1-3 Credits
Individual analytical or experimental investigations. May be repeated for a maximum total of 6 credits.
Prerequisite: consent of instructor.

I E 599. Master's Thesis
1-15 Credits
Thesis.

I E 610. Topics in Operations Research
3 Credits (3)
Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 620. Topics in Computer Modeling
3 Credits (3)
Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 630. Topics in Engineering Management
3 Credits (3)
Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 690. Selected Topics
1-15 Credits
May be repeated.
Prerequisite: consent of department head.

I E 700. Doctoral Dissertation
15 Credits
Dissertation.

ICT-INFO & COMMUNICATION TECH

ICT 320. Introduction to Internet Protocols
3 Credits (3)
Present a overview of Internet Protocols Applications.

ICT 339. Introduction to Digital Forensics and Incident Response
3 Credits (3)
Introduction to the skills required to perform digital forensics and incident response on Windows operating systems. Topics include: live response, evidence acquisition, Windows operating system artifacts, documentation and reporting.
Prerequisite(s): ICT 360.

ICT 350V. Introduction to Personal Computer Security and Privacy
3 Credits (3)
Introduction to Information Security and Privacy – Have you ever wondered what happens to all of your browsing history or data you fill out on websites go? Who has this data? What do they do with this data? How do you stop sharing your private information? This class will answer those questions and provide steps to make your online presence more secure.

Learning Outcomes
1. Classify security issues Classify Privacy protections Evaluate threats and countermeasures based on personal security breaches. Formulate a real-time privacy response Assess international privacy protections through a multicultural focus.

ICT 352. Software Programming for Information and Communication Technology
3 Credits (3)
Computer programming techniques for information and communication technology topics.

ICT 355. Linux System Administration
3 Credits (3)
Operating systems applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup, and Maintenance of Linux Servers.
Learning Outcomes
1. Create a virtual environment on a host system using VirtualBox. Develop single and multiple Linux Operating Systems within The VirtualBox Virtual Environment. Select applications on production Linux Operating systems. Support the operation of the Linux Operating system using System Administration Techniques.

ICT 360. Operating Systems for ICT
3 Credits (3)
Fundamentals of operating systems with Windows and Linux including installation and configuration using the GUI as well as the command line, text editors, file systems, scripting and operating system management.

ICT 362. Software Technology II
3 Credits (3)
Topics include problem analysis, object-oriented programming (OOP), structured logic, and development concepts.
Prerequisite/Corequisite: ICT 352 or E T 262 or OECS 195 or C S 152 or C S 172.

Learning Outcomes
1. Set up and use a rich programming environment for programming with Python. Analyze existing code. Employ effective use of basic programming and basic troubleshooting. Employ effective use of Object-Oriented Programming (OOP) and troubleshooting. Apply testing and documentation best practices.

ICT 364. Windows Enterprise Administration
3 Credits (3)
Installation, configuration, and maintenance of Windows Enterprise services which includes Active Directory, distributed file systems, SQL Server, Web Server, Authentication Procedures, and enterprise elasticity. Topics covered include: Server Maintenance and Troubleshooting Methodologies.
Prerequisite(s)/Corequisite(s): ICT 339. Prerequisite(s): ICT 352.
ICT 377. Computer Networking I
3 Credits (3)
Computer network design and applications for LAN, TCP/IP networks, routing and switching technologies, VLANs, and the OSI layers from physical to transport.  
Prerequisite(s)/Corequisite(s): MATH 1220G or above.

ICT 380. Web Design and Multimedia
3 Credits (3)
Introduction to front-end web development including webpage design, structure, layout, positioning, responsiveness, and foundational layers of how the web works. Video, audio, and other digital presentation tools are covered.

Learning Outcomes

ICT 435. Senior Project
3 Credits (3)
Capstone course. Practical application of student’s cumulative knowledge to an assigned design project. Design principles, teamwork, and project management skills are stressed. Demonstration of written and oral communication skills via project documentation and presentation of results. Must be graduating senior. Consent of instructor required. Restricted to: ICT majors.
Prerequisite(s): ICT 364, ICT 377, and ICT 462.

ICT 450. Ethical Hacking
3 Credits (3)
Ethical Hacking and Penetration testing techniques.
Prerequisite(s): ICT 339.

ICT 457. Introduction to Information Security Technology
3 Credits (3)
This course provides an overview of security challenges and strategies of countermeasure in the information systems environment. Topics include definition of terms, concepts, elements, and goals incorporating industry standards and practices with a focus on availability, vulnerability, integrity and confidentiality aspects of information systems.

ICT 458. Web Development and Database Applications
3 Credits (3)
Design, planning, and building of interactive and dynamic web applications. Topics include relational databases, object oriented programming, and web security.
Prerequisite(s)/Corequisite(s): ICT 362.

ICT 460. Multimedia Tools and Support
3 Credits (3)
Introduction to video, audio and other digital presentation methods. Addresses the latest multimedia technology advances and how they apply to the information and communication technology fields. Sample tools like ffmpeg, and Audacity are covered.
Prerequisite(s): ICT 360.

ICT 462. Linux System Administration
3 Credits (3)
Operating system applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup and Maintenance of Linux Servers.

Learning Outcomes
1. Create a virtual environment on a host system using VirtualBox. Develop single and multiple Linux Operating Systems within The VirtualBox Virtual Environment. Select applications on production Linux Operating systems. Support the operation of the Linux Operating system using System Administration Techniques.

ICT 463. Advanced Linux and Python Scripting
3 Credits (3)
Advanced Linux Includes installation and maintenance of Unix/Linux/Windows versions of Python. Use of Python to solve numerous engineering problems using Python scripting as infrastructure.
Prerequisite(s): ICT 362 and ICT 462.

ICT 477. Computer Networking II
3 Credits (3)
Advanced concepts in computer network design and applications including managing the campus network infrastructure (LANs and virtual LANs), network services (DNS and DHCP), network security as well as network monitoring.
Prerequisite: ICT 377 or E T 377.

Learning Outcomes
1. VLSM, Summarization, and the TCP/IP model. Understanding of IPv6 basics Configuration of routing protocols using IPv6 Configuration of advanced router configurations Configuration of route redistribution, DHCP, DNS, NAT and PAT Configure network security and Access Control Lists (ACLs) Perform basic analysis of network data traffic Create, test and troubleshoot software simulations (Cisco Packet Tracer)
INMT 165. Equipment Processes  
4 Credits (4)  
This course introduces power transmission equipment and machinery components, including belt/chain driven equipment, speed reducers, variable speed drives, couplings, clutches, and conveying equipment. Students will learn the operation, maintenance, and troubleshooting for these types of equipment. The course also includes Overhead Crane Certification and Safety. Restricted to Carlsbad campus only.

INMT 205. Programmable Logic Controllers and Applications  
4 Credits (4)  
Students learn about programmable logic controllers; architecture, programming, interfacing, and applications. Hands-on experience on modern commercial PLC units is the main component. Restricted to Carlsbad campus only.  
Prerequisite(s): BCIS 1110.

INMT 223. Electrical Repairs  
4 Credits (4)  
This course outlines for students the types of problems that occur in electrical machinery and systems. The course covers trouble-shooting and diagnosis, preventative maintenance, and how to make necessary repairs. Restricted to Carlsbad campus only.

INMT 235. Mechanical Drives I  
4 Credits (4)  
This course teaches the fundamentals of mechanical transmission systems used in industrial, agricultural, and mobile applications. Students will learn industrial relevant skills including how to: operate, install and analyze performance, and design basic transmission systems using chains, feed-belts, spur gears, bearings, and couplings. Vibration analysis will be used to determine when to perform maintenance of power transmission components. The course also covers power transmission safety, and introduction to belt and chain drives (applications, installations, and tensioning), and introduction to gear drives, coupling, and bearing, basic troubleshooting, blueprint and print reading, learning the basics of electrical drives and PDM and PM. Restricted to Carlsbad campus only.

INMT 237. Hydraulics I  
2 Credits (2)  
This course teaches fundamentals of hydraulic systems used in industry mobile application. Students learn the basic theory of application of hydraulic and electricity as it applies to hydraulics. Covered in the course are basic systems, principles of flow, pressure, viscosity, filtration, and colling. Also covered are basic components such as motor, pumps, cylinders, piping and control and relief valves. Troubleshooting strategies are discussed, along with blueprint and print reading, and PDM and PM. Industry, relevant skills including how to operate, install, analyze performance, and design basic hydraulic systems, reviewing intermediate hydraulic components and system applications. Restricted to Carlsbad campus only.

INMT 261. Pump Operations I  
4 Credits (4)  
This course teaches how to select, operate, install, maintain and repair the many types of pumps used by industry. Students learn the theory and practical application of all types of processed pumps and pipe systems. It covers types, components, and systems operation. It also covers troubleshooting for flow loss and cavitation. Students learn how to select, operate, install, maintain and repair the many types of pumps used by industry. Other topics covered include: Net Positive Suction Head, pump flow/head measurement, pressure head conversion, pressure flow characteristics, cavitation, series/parallel pump operation, mechanical seal/stuffing box maintenance, multi stage operation and construction, positive displacement pumps, turbine, diaphragm, peristaltic, piston, gear, and magnetic pump systems. Restricted to Carlsbad campus only.

INMT 262. Piping Systems  
2 Credits (2)  
This course teaches students how to install, maintain and troubleshoot fluid systems such as how to select, size, identify, install a variety of types of piping, fittings, and valves. Measurement techniques from basic to precision measurement, gauging, including the fundamentals of dimensioning and tolerancing will be taught. Restricted to Carlsbad campus only.

INMT 263. Mechanical Drives II  
4 Credits (4)  
This course teaches the bearings and gears used in heavy duty mechanical transmission systems. This course will emphasize linear access drives, clutches, and brakes. In addition, this course teaches how to set up, operate and apply laser shaft alignment to a variety of industrial applications. This course is a study of the basic concepts and procedures for the maintenance and operations of pumps, turbines, seals, bearings, and compressors. The course will provide the student with the knowledge and skills necessary to perform proper maintenance, repair, replacement and selection of pumps, turbines, seals, bearings and compressors. Also covered are advanced gearbox, coupling and bearings, precision alignment (shaft, flange, and sheave), as well as basic vibration analysis and thermography as troubleshooting and RCA aids. Restricted to Carlsbad campus only.

INMT 264. Rigging  
2 Credits (2)  
This course teaches how to safely move loads of different shapes and sizes using a variety of different methods. Students will lift loads and demonstrate how to move it. Students will use hoists, slings, ropes and fittings to learn how to safely lift a wide variety of loads. Included are weight estimation, lifting rules, load ratings (sling, wire, ropes and hoists). Restricted to Carlsbad campus only.

INMT 265. Hydraulics II  
2 Credits (2)  
This course teaches advanced hydraulics systems. The student will learn operation of advanced hydraulic systems applications, equipment installation, performance analysis of motors and pumps, accumulators, control, relief and check valve, equipment maintenance, and system design. The course covers accumulators, sequence valves, pilot circuits and unloader valves. Students learn more troubleshooting, hydraulic drives and other applications. Restricted to Carlsbad campus only.
INMT 267. Pump Operations II
2 Credits (2)
This course teaches the student the disassembly, inspection and reassembly of centrifugal and positive displacement pumps. This course allows the student to identify and replace worn or broken components of pumps, and learn predictive and preventive maintenance principles. Lockout of the pump will be performed in addition to measurements and alignment. Restricted to Carlsbad campus only.

INTR-INTERDISCIPLINARY STUDIES

INTR 300. Foundations of Interdisciplinary Studies
3 Credits (3)
Introduction to Bachelor of Individualized Studies (BIS) and Bachelor of Applied Studies (BAS) degree programs. Explores roles of interdisciplinary studies in contemporary world and how emerging and perennial problems and issues can be comprehended utilizing multiple theoretical and analytic methods. Students design or update their course of study for earning the BIS or BAS degree. Consent of Instructor required. Restricted to Las Cruces campus only.

INTR 301. Interdisciplinary Research: Theory & Practice
3 Credits (3)
Focuses on knowledge gained through interdisciplinary research. Students develop comprehensive understanding of steps of systematic inquiry into interdisciplinary research questions. Includes active learning through design and implementation of an interdisciplinary research project. For BIS and BAS majors only. Consent of Instructor required.

JAPN-JAPANESE

JAPN 1110. Japanese I
4 Credits (4)
This course focuses on the basics of the Japanese language with a balanced approach to the development of four skills: listening, speaking, reading and writing. The course is designed to teach students to communicate with Japanese socially and to utilize culturally appropriate manners to engage in Japanese daily life. Along with further developing conversational skills, the student will also continue to learn about and utilize various Japanese scripts.

Learning Outcomes
1. Become introduced to the sound system of the Japanese language.
2. Gain a basic understanding of Japanese scripts.
3. Learn and utilize vocabulary needed for basic conversation.
4. Converse and write on topics related to immediate personal needs, greetings, introductions, personal data, daily routines and school.
5. Comprehend both artificial and authentic written and aural texts of short length on familiar topics.
6. Comprehend and use essential grammar concepts.
7. Identify patterns of cultural behavior or customs in Japan, including gestures, greetings, and body language.
8. Gain the ability to converse using Japanese idiomatic expressions.

JAPN 1120. Japanese II
4 Credits (4)
This course focuses on building upon the basics of the Japanese language with a balanced approach to the development of four skills: listening, speaking, reading and writing. The course is designed to teach students to communicate with Japanese socially and to utilize culturally appropriate manners to engage in Japanese daily life. Along with further developing conversational skills, the student will also continue to learn about and utilize various Japanese scripts.

Prerequisite: grade of C or better in JPNS 1110 or consent of instructor.

Learning Outcomes
1. Understand and utilize in more depth the sound system of the Japanese language.
2. Gain a greater understanding of Japanese scripts.
3. Utilize expanded vocabulary in conversation.
4. Converse and write on topics related to personal, social, geographical, and political life.
5. Comprehend both artificial and authentic written and aural texts of longer, but still brief length, such as personal letters, messages, journals, and narrative accounts.
6. Comprehend and use essential and more complex grammatical concepts.
7. Continue to develop a sense of culturally appropriate conduct.
8. Build upon the ability to converse using Japanese idiomatic expressions.

JAPN 2110. Japanese III
3 Credits (3)
This course is designed for students who have completed 12 credit hours or the equivalent of Japanese study. This course continues to expand vocabulary, grammar and 209 Kanji to deal with daily activities. Its objective is to teach students to communicate in a meaningful way using all four language skills: speaking, listening comprehension, reading and writing. Students will be able to manage not-complicated daily situation. Students will attain ACTFL intermediate-low level in four skills.

Prerequisite: grade of C or better in JPNS 1120 or consent of instructor.

Learning Outcomes
1. Participate in conversations on familiar topics, such as applying part-time job, gift giving/receiving.
2. Planning a trip, lost and found, using sentences and short series of sentences.
3. Handle short social interactions in everyday situations by asking and answering a variety of questions.
4. Usually say what they want to say about themselves and their everyday life.
5. Write on a variety of familiar topics in Japanese characters using connected sentences.
6. Understand the main idea in messages and presentations in Japanese on a variety of topics related to everyday life and personal interests and studies.
7. Sometimes understand the main idea of conversations that they overhear.
8. Understand the main idea of texts in Japanese characters related to everyday life and personal interests or studies.
9. Describe and make comparisons between cultures about beliefs, behaviors and cultural artifacts in Japan.
JAPN 2120. Japanese IV
3 Credits (3)
This course is designed for students who have completed 15 credit hours or the equivalent of Japanese study. This course continues to expand vocabulary, grammar and 271 Kanji to deal with not-complicated daily situation with ease. Also students acquire a competence for Japanese pragmatic usage. This course follows ACTFL language guidelines, integrating the five C's: communication, cultures, connections, comparisons and communities, to offer the student a well-rounded classroom experience. Students will attain ACTFL intermediate-mid level in four skills.
Prerequisite: grade of C or better in JPNS 2110 or consent of instructor.
Learning Outcomes
1. Participate with ease and confidence in conversations on familiar topics, such as relationships, par-time job, shopping with a variety of request, meeting socially superiors.
2. Usually describe people, places, and things, and talk about events and experiences in various time frames.
3. Handle social interactions in everyday situations, sometimes even when there is an unexpected complication.
4. Write about topics related to school, work, and community in a generally organized way in Japanese characters.
5. Write some simple paragraphs in Japanese characters about events and experiences in various time frames.
6. Easily understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
7. Usually understand a few details of what they overhear in conversations, even when something unexpected is expressed.
8. Sometimes follow what they hear about events and experiences in various time frames.
9. Understand the main idea of texts in Japanese characters with topics related to everyday life, personal interests, and studies, as well as sometimes follow stories and descriptions about events and experiences in various time frames.
10. Describe and make comparisons between cultures about beliefs, behaviors and cultural artifact in Japan.
11. Start using languages in a culturally appropriate way based on the understanding of cultural similarities and differences, including the use of “honorific” and “humble” expression.

JOUR-JOURNALISM

JOUR 102. Grammar for Journalists
2 Credits (2)
Instruction of basic grammar, spelling and punctuation. Required for all journalism students with an ACT English score below 25, SAT Verbal below 570, or students who have not taken ACT/SAT tests. Restricted to Las Cruces campus only.

JOUR 105G. Media and Society
3 Credits (3)
Functions and organization of the mass media system in the United States; power of the mass media to affect knowledge, opinions, and social values; and the impact of new technologies.

JOUR 110. Introduction to Media Writing
3 Credits (2+2P)
Preparation of copy for broadcasting, print, advertising, and public relations. Introduction to Web applications. May be repeated up to 3 credits.
Prerequisite(s): JOUR 102 or ACT score of 25 and above or SAT score of 570 and above.

JOUR 201. Introduction to Multimedia
3 Credits (3)
Provide students with the basic skills to produce multimedia packages using text, photos, audio and video, as well as social media for professional purposes. Intensive hands-on class using editing software such as Adobe Premiere, Adobe Audition and Photoshop. May be repeated up to 3 credits.

JOUR 210. Newswriting & Reporting
3 Credits (2+2P)
Intensive laboratory practice in writing and field reporting news for print and Internet. May be repeated up to 3 credits. Restricted to Las Cruces campus only.
Prerequisite(s): JOUR 102 or ACT score of 25 and above or SAT score of 570 and above and JOUR 110.

JOUR 300. Introduction to Advertising
3 Credits (3)
Role of IMC (integrated marketing communications) in marketing of goods, services, and organizations. Creative process, strategic planning media, message design, consumer behavior, and social issues of IMC.

JOUR 302. Video Production and Editing
3 Credits (3)
Classroom instruction on basic studio and single camera video productions, with focus on practical aspects of news production. Lab experience in camera basics, studio functions and digital video editing includes practical experience through crew assignments on the live student-produced newscast, News22. which airs on KRWG-TV, a PBS affiliate station. May be repeated up to 3 credits.

JOUR 306. Feature Writing
3 Credits (3)
The preparation of feature stories for newspapers and magazines. How to develop a variety of stories, research topics, interview sources, polish writing and market work. May be repeated up to 6 credits.
Prerequisite(s): JOUR 210 or consent of instructor.

JOUR 310. News Reporting & Publishing
3 Credits (3)
Field reporting and news writing for print and Web applications. Instruction in community coverage, reporter responsibility, ethics and news values. May be repeated up to 3 credits.
Prerequisite(s): JOUR 210.

JOUR 312. Advertising/Copywriting
3 Credits (3)
Creative process, strategic thinking, and principles of advertising in execution of copy, storyboards, and layouts for clients.
Prerequisite(s): JOUR 110 or consent.

JOUR 314. Broadcast Reporting
3 Credits (3)
Writing, editing, producing, announcing and reporting of TV and radio news. May be repeated up to 3 credits.
Prerequisite(s): JOUR 210 or Consent of Instructor.
JOUR 315. News 22
1-3 Credits (1-3)
Write, report, produce, anchor, shoot and edit video for live student television newscast airing on KRWG, public television for Southern New Mexico sports, weather, and news.
Prerequisite(s): JOUR 314 or JOUR 330 or instructor consent.

JOUR 317. News Editing
3 Credits (3)
Extensive, directed practice in various aspects of computer editing for printed publication. Headline writing, copy editing, design, and layout.
Prerequisite(s): JOUR 210.

JOUR 319. Intro Photography
3 Credits (3)
Introduction to photography emphasizing composition, basic camera technique, language of photography and storytelling. Photojournalism emphasis. Basic camera and processing techniques and skills. May be repeated up to 3 credits.

JOUR 320. Photojournalism
3 Credits (3)
Communication photography for magazine, news, advertising/public relations and other communication needs. Digital Photography, lighting techniques, photo-editing software, and web site skills. Students provide camera and flash. May be repeated up to 3 credits.
Prerequisite(s): JOUR 319 or Consent of instructor.

JOUR 321. Media Graphic Design
3 Credits (3)
Concepts and design skills useful for all aspects of journalism - print media and newsletters, basics of Photoshop and introduction to Web design. May be repeated up to 3 credits.

JOUR 330. TV News Shooting & Editing
3 Credits (2+4P)
Overview of technical and aesthetic skills and journalism basics needed for shooting and editing on-location news productions. Single camera videography and nonlinear/digital editing. May be repeated up to 3 credits.
Prerequisite(s): JOUR 302 or permission of instructor.

JOUR 350. Media History
3 Credits (3)
Historical overview of mass media with emphasis on roots of journalism, technological developments, and American role in international media. May be repeated up to 3 credits.

JOUR 374. Introduction to Public Relations
3 Credits (3)
Introduction to public relations as a communication process that builds relationships between organizations and their publics. Explores basic techniques, strategies, and tactics used in businesses, nonprofits, and in government.
Prerequisite(s): JOUR 110.

JOUR 377V. Mass Media Ethics
3 Credits (3)
Philosophical and moral examination of problems relating to mass media. Use of case study method to analyze media situations; development of framework for media professionalism.

JOUR 380. Women and the Media
3 Credits (3)
Portrayal and participation of women in mass media from colonial to contemporary times. Same as GNDR 450. May be repeated up to 3 credits.

JOUR 384. Branding and Storytelling in IMC
1-3 Credits (1-3)
Introduction to the concept of using PR as a tool for creating branding. Through the concept of storytelling on traditional and social media, this class addresses the importance of branding by PR under IMC context. In addition to this, it also includes how to use a variety of effective, strategic media materials produced by public relations practitioners, under the concept of branding.
Prerequisite(s): JOUR 210 and JOUR 374.

Learning Outcomes
1. Students will learn the actual role of PR under the concept of branding in IMC.
2. They will be able to apply this concept to the actual brands and will be able to create PR messages under branding.

JOUR 407. Media Internship
1-3 Credits (1-3)
Supervised work with a media organization. 1-3 credits. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: JOUR majors.
Prerequisite(s): Consent of internship coordinator.

JOUR 408. Media Practicum
1-3 Credits
Advanced supervised work with a media organization. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): Consent of internship coordinator.

JOUR 412. Documentary Photojournalism
3 Credits (3)
Production of documentary photography for web, print, books and exhibition emphasizing storytelling techniques. Multimedia and Web site techniques. Field Trips to produce material for the Small Village New Mexico project (SVNM). Produce Term projectbook. May be repeated up to 3 credits.
Prerequisite(s): JOUR 319.

JOUR 414. RTV Scriptwriting/Performance
3 Credits (3)
Writing and delivery of news scripts for radio and television. Focus on anchoring announcing, voice technique and performance. May be repeated up to 3 credits.
Prerequisite(s): JOUR 314 or consent of instructor.

JOUR 425. Media Planning and Buying
3 Credits (3)
Covers the principles of media planning for an IMC campaign and procedures for purchasing ad time or space. 
Prerequisite(s): JOUR 300 or consent of instructor.

JOUR 427. Multimedia Publishing
3 Credits (3)
Advanced multimedia reporting and editing for online news publication. Preparation of professional news portfolios and resumes. Capstone for News/Editorial sequence. May be repeated up to 3 credits. Consent of instructor required.
Prerequisite(s): JOUR 310.
JOUR 476. Public Relations Campaigns
3 Credits (3)
Utilizing the principles and techniques of public relations to research and
develop a comprehensive plan for a long-term national, regional, or local
campaign. May be repeated up to 3 credits. Restricted to: Restricted to
Journalism majors.
Prerequisite(s): JOUR 210, JOUR 374.

JOUR 490. IMC Campaign
3 Credits (3)
Capstone course utilizing all previous instruction to create and develop
plans for a long-term national or local IMC (Integrated Marketing
Communications) campaign. May be repeated up to 3 credits. Consent of
Instructor required.
Prerequisite(s): JOUR 300 and 312 or consent of instructor.
Learning Outcomes
1. Students will learn how to create IMC campaign for client or for
brands, and will be able to apply this for the real world when they
apply for job.

JOUR 489. Media Research
3 Credits (3)
Examination of the role of empirical research in solving mass
communication problems. Survey techniques, field studies, content
analysis, data analysis. May be repeated up to 3 credits.

JOUR 490. IMC Campaign
3 Credits (3)
Capstone course utilizing all previous instruction to create and develop
plans for a long-term national or local IMC (Integrated Marketing
Communications) campaign. May be repeated up to 3 credits. Consent of
Instructor required.
Prerequisite(s): JOUR 300 and 312 or consent of instructor.
Learning Outcomes
1. Students will learn how to create IMC campaign for client or for
brands, and will be able to apply this for the real world when they
apply for job.

JOUR 493. Media Law
3 Credits (3)
Examination of legal issues relating to mass media in the United States.
Invasion of privacy, libel, sedition, copyright, and advertising regulation.
Same as COMM 493, POLS 493. May be repeated up to 3 credits.

JOUR 494. Special Topics
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes.

JOUR 495. Media Theory
3 Credits (3)
Theoretical approaches to media communications. Examination of media
effects, audiences, and media socialization May be repeated up to 3
credits.

JOUR 499. Independent Study in Media
1-3 Credits
Individual study directed by consenting instructor with prior approval of
department head. May be repeated up to 6 credits. Consent of Instructor
required.
Prerequisite(s): 2.5 GPA and consent of instructor.

JPNS-JAPANESE

JPNS 320. Oral Practicum in Japanese
1-3 Credits
Service training for facilitators leading informal conversation groups in
Japanese. May be repeated for a maximum of 4 credits.
Prerequisites: fluency in Japanese and consent of instructor.

1-3 Credits (1-3)
Individualized, self-paced projects for advanced students.

L SC-LIBRARY SCIENCE

L SC 100. Introduction to Libraries
3 Credits (3)
Overview of libraries, including history and development, responsibilities
of library personnel, types of libraries and services, and technology and
trends. Restricted to Dona Ana campus only.
L SC 110. Reference and Information Resources I
3 Credits (3)
Overview of reference services. Introduction to, and evaluation of, basic types of information resources (both print and electronic) and their application in libraries.

L SC 111. Introduction to Information Literacy in an Electronic Environment
3 Credits (3)
Introduction to the basics of the research process; the organization, location and evaluation of information using print, non-print and electronic resources. Restricted to: Community Colleges only.

L SC 120. Cataloging Basics I: Descriptive Cataloging
3 Credits (3)
Introduction to descriptive cataloging. Restricted to: Dona Ana campus only.

L SC 130. Introduction to Technical Services in Libraries
3 Credits (3)
Introduction to technical services in libraries, including acquisitions, bindery, cataloging, gifts, and serials. Restricted to Dona Ana campus only.

L SC 140. Multimedia Materials and Presentations in Libraries
3 Credits (3)
Overview of media formats and equipment. Introduction to desktop publishing, presentations, and web-page creation applications in libraries. Restricted to: Community Colleges only.

L SC 160. Introduction to Public Services in Libraries
3 Credits (3)
Introduction to public services in libraries, including circulation, inter-library loan, reference, media services, special collections, and government documents. Restricted to Dona Ana campus only.

L SC 175. Civic Involvement in Library Science
1-3 Credits
Involvement in an organized community service project or group with a library or information technology component. Promotes awareness of volunteer and community service opportunities. May be repeated for a maximum of 6 credits. Graded: S/U. Restricted to: Dona Ana campus only.

L SC 200. Collection Management and Development in Libraries
3 Credits (3)
Principles of identifying, selecting, acquiring, managing, and evaluating resources for libraries. Restricted to Dona Ana campus only.

L SC 203. School Library Media Specialist
3 Credits (3)
Principles and practice of managing the school library media center, with an emphasis on its specific educational mission. Topics may include collection development, classes and lesson plans, public relations, administrative procedures, and use of technology. Restricted to Dona Ana campus only.

L SC 210. Technology Planning in Libraries
3 Credits (3)
Overview of computer applications in libraries. Topics may include automated systems and electronic resources, introduction to evaluation of technology, and writing a technology plan. Restricted to Dona Ana campus only.

L SC 221. Experiential Learning I
1-3 Credits
Student is employed (paid or non-paid) in an approved work site and evaluated by their supervisor. Each credit requires a specified number of hours of on-the-job work experience. Consent of Instructor required. Graded: S/U Grading (S/U, Audit). Restricted to Dona Ana campus only.

Prerequisite(s): Consent of instructor.

L SC 230. Issues and Ethics in Libraries
3 Credits (3)
Discussions of current and continuing challenges to effective library service. Topics may include copyright, censorship, intellectual freedom, Internet filtering, problem patrons, security, or other current issues. Restricted to Dona Ana campus only.

L SC 240. Internet Resources and Research Strategies
3 Credits (3)
Introduction to retrieving and evaluating information found on the Internet and in selected Internet-accessible databases. Restricted to: Dona Ana campus only.

L SC 255. Special Topics
1-3 Credits
Special topics to be announced in Schedule of Classes. May be repeated for a maximum of 12 credits. Restricted to: Dona Ana campus only.

L SC 270. Library Science Capstone
3 Credits (3)
A culmination of all technical courses that are required to receive an Associate of Applied Science from the program centering around the completion of a library related project. Discussions on the role of paraprofessionals in libraries. Restricted to: Dona Ana campus only.

L SC 296. Multicultural Books for Children and Youth
3 Credits (3)
This course explores a wide range of multicultural children's literature including: African American, Native American, Latino, Asian, Jewish, and Middle Eastern. Topics covered include: nonfiction of the cultures, historical fiction of the cultures, and contemporary literature of the cultures. Restricted to: Community Colleges only.

L SC 298. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with prior approval of department chair. May be repeated for a maximum of 12 credits. Restricted to: Dona Ana campus only.

LANG-LANGUAGE

LANG 111. Beginning Language I
4 Credits (4)
Developing language skills through study abroad for languages not offered at NMSU main campus. Specific languages to be identified with course subtitles. Main campus only.

Prerequisite: Language placement exam or consent of the instructor.

LANG 451. Special Topics
1-3 Credits
Selected topics relating to cultures or literatures of a specific country. Credit can be applied only towards fulfilling second language requirement. Credit is not accepted towards any graduate level major or minor. May be repeated for a maximum of 12 credits. Consent of instructor required.
LANG 453. Independent Studies
1-3 Credits
Individualized, self-paced projects for advanced students. May be repeated under different subtitles for a maximum of 6 credits.
Prerequisite: consent of instructor.

LANG 490. Introduction to Yucatec Maya Language and Culture I
3 Credits (3)
This course provides the student with an introduction to Yucatec Maya language and culture of Yucatan.
Learning Outcomes
1. students will be able to identify who and where Yucatec Maya is spoken, describe the sound system and basic syntax of the language, participate in basic introductory conversations and make connections between the language and culture of Yucatan.

LAWE-LAW ENFORCEMENT

LAWE 180. Public Safety First Line Supervisor
3-6 Credits (3-6)
This course is designed to enhance public safety personnel's human resource management and reduce organizational liability. Consent of Instructor required. Restricted to Community Colleges campuses
Learning Outcomes
1. Describe and explain police administration.
2. Explain and discuss the various leadership and management theories.
3. Define and discuss the various types of leadership skills and management styles.
4. Express and discuss the role of the police administrator and police administration.
5. Explain the leadership required of police administrators for an effective Law Enforcement administration.
6. Describe and interpret the "quality approach to managing community relations”
7. Explain and discuss the necessities of introducing organizational change.
8. Explain and discuss the planning, programming and budgetary process including: variables that affect the decision-making process.
9. Analyze and discuss the role of effective communications in a police organization including negotiations and conflict resolution.
10. 1 Explain and analyze the role of human resources in the organization including: their role in the recruitment and selection process; training; performance evaluations; promotions; and assessment centers.
11. K) Discuss the role of police unions and explain their significance in labor relations.

LAWE 203. Introduction to Police Supervision
3 Credits (3)
An introductory overview of police supervision and concerns as it applies to law enforcement. (Note: Course does not meet upper division requirements toward completion of Bachelor of Science in Criminal Justice.) Restricted to: Community Colleges only.

LAWE 204. Introduction to Homeland Security
3 Credits (3)
A historical perspective of international and domestic terrorist threats and the need to develop cohesive response policies and practices in the interest of National Security. [Course does not meet requirements towards completion of Bachelor of Science in Criminal Justice.] Restricted to: Community Colleges only.
Prerequisite(s): CJUS 1110G.

LAWE 205. Practical Field Investigations
4 Credits (3+3P)
Incorporates the current methods and techniques for the management of the crime scene, includes documentation, collection and preservation of evidence and case presentations. [Course does not meet requirements towards completion of Bachelor of Science in Criminal Justice.] Restricted to Community Colleges campuses only.
Prerequisite(s): CJUS 1110G and CJUS 2140.

LAWE 206. Traffic Enforcement and Crash Investigations
3 Credits (3)
History and development of traffic laws and regulations, including basic elements of traffic violations, detection, apprehension, impaired drivers and guidelines and procedures for effective crash investigations and reporting. Restricted to: Community Colleges only.

LAWE 207. Legal Aspects of Law Enforcement
3 Credits (3)
An evaluation of police authority including responsibilities, civil liability, liability implications, legal obligations, legal restraints, laws of arrest, and search and seizure. Restricted to: Community Colleges only.

LAWE 221. Law Enforcement Internship
3 Credits (3)
Application of knowledge, skills and abilities, in an agency as an intern and integrated member of a law enforcement affiliated agency.
Prerequisite: consent of instructor.

LAWE 233. Practical Approach to Terrorism
3 Credits (3)
Gives responders an overall safety approach in recognizing and responding to incidents involving terrorism. Presents and overview in types of harm, explosive weapons, chemical weapons, biological weapons and radiological weapons. [Course does not meet requirements towards completion of Bachelor of Science in Criminal Justice.] Restricted to: Dona Ana campus only. Crosslisted with: FIRE 233

LAWE 201. Introduction to Juvenile Delinquency
3 Credits (3)
An introductory overview of the juvenile justice system of due process, custody, detention and release. Note: course does not meet upper division requirements towards completion of Bachelor of Science in Criminal Justice. Restricted to: Community Colleges Only.

LAWE 202. Police Patrol Procedures
3 Credits (3)
A critical review of police procedures and the influences on police behavior; policy development, including the police role; discretion; police community interaction and arrest, search and seizure. Restricted to: Community Colleges only.
LAWE 255. Special Topics
1-3 Credits (1-3)
Introductory special topics of lower division level work that provides a variety of timely subjects and content material. Specific subjects to be announced in the Schedule of Classes. A passing grade of C- or better is required. May be repeated up to 6 credits. Consent of Instructor required. Restricted to Community Colleges campuses

Learning Outcomes
1. Obtaining foundational skills in the administration of justice by differentiating the role of police and corrections in contemporary America.
3. Ability to identify, analyze, and synthesize knowledge from discipline-specific courses in criminalistics, legal aspects, homeland security, terrorism, and patrol operations to effectively conduct a practical field investigation and traffic crash investigation.
4. Ability to develop a criminal justice ethical perspective consistent with 21st century America to, effectively and ethically, perform a criminal justice role in law enforcement or corrections.
5. Basic crime scene management, crime scene note-taking techniques, collection of evidence, and case presentations.
6. An application of knowledge, skills, and abilities, as an intern or integrated member of a criminal justice affiliated agency.

LAWE 298. Independent Study
3 Credits (3)
Individual studies directed by the consenting faculty with prior approval of the department chair. A passing grade of C- or better is required. May be repeated up to 6 credits. Consent of Instructor required. Restricted to Community Colleges campuses
Prerequisite(s): Sophomore standing with a 3.0 or better GPA.

Learning Outcomes
1. Obtaining foundational skills in the administration of justice by differentiating the role of police and corrections in contemporary America.
3. Ability to identify, analyze, and synthesize knowledge from discipline-specific courses in criminalistics, legal aspects, homeland security, terrorism, and patrol operations to effectively conduct a practical field investigation and traffic crash investigation.
4. Ability to develop a criminal justice ethical perspective consistent with 21st century America to, effectively and ethically, perform a criminal justice role in law enforcement or corrections.
5. Basic crime scene management, crime scene note-taking techniques, collection of evidence, and case presentations.
6. An application of knowledge, skills, and abilities, as an intern or integrated member of a criminal justice affiliated agency.
7. Effective communication, orally and in writing, using appropriate references and technologies.
8. Analytical and critical thinking skills when solving complex issues in criminology and the criminal justice system.
9. Competence using and applying appropriate criminological theories on crime causation.
10. Competence in understanding and describing how gender, race, ethnicity, age, social class, and sexuality contribute to differing experiences in the criminal justice system.
11. Competence in understanding how the inter-dependence of the major components of the criminal justice system (i.e., police, courts, correctional agencies) affect victims, offenders, justice professionals, and society.
12. Competence in understanding and applying the fundamental elements of both criminal and constitutional law.
13. Competence in the legal foundation of criminal justice and the importance of due process.

LIBR-LIBRARY SCIENCE

LIBR 1110. Introduction to Research
1 Credit (1)
The goal of this course is to provide students with techniques and tools to become better researchers. This course introduces students to the research process, and the organization, location, and evaluation of information.

Learning Outcomes
1. Develop a research plan based on an information need.
2. Find information efficiently and effectively using a variety of search tools.
3. Evaluate the reliability of an information resource.
4. Practice ethical behavior in using information.
LING 2110G. Introduction to the Study of Language and Linguistics
3 Credits (3)
This course presents an introduction to the study of language through the basic aspects of linguistic analysis: the sound system (phonetics and phonology), the structure of words and sentences (morphology and syntax), and the ways in which language is used to convey meaning (semantics and pragmatics). In addition, the course will investigate how language is acquired and stored in the brain, and how differences in speech styles and dialects reflect different social and cultural backgrounds of individual speakers.

Learning Outcomes
1. Understand the basic concepts and terminology associated with phonetics, phonology, morphology, syntax, semantics, and pragmatics.
2. Comprehend how language evolves over history and over an individual's lifespan.
3. Describe some common, but mistaken, beliefs about language and to distinguish between descriptive and prescriptive approaches to language.
4. Describe the social, psychological, geographic and historical influences that lead to language dominance or language endangerment.
5. Be aware of the relations among various languages in the world, between dialects and slang, and between human and non-human languages.
6. Apply methods of linguistic analysis as introduced in the course.
7. Critically engage with the works of linguistic researchers.
8. Stimulate curiosity about language and what it reveals about the human mind.

LING 301. Introduction to Psycholinguistics
3 Credits (3)
Psychological aspects of language, including linguistic theories of grammar, psychological factors influencing language performance, primary language acquisition and the relationship of language to thought processes. Same as PSYC 301.

LING 302V. Language and Society
3 Credits (3)
Study of how social identity including such factors as ethnicity, age, sex, education, power and socio-economic class is expressed in language systems and how misunderstandings arise between groups. Research skills are emphasized.

LING 303. Exploring Language Systems
3 Credits (3)
Forms of linguistic semantic, syntactic and phonological organization.
Prerequisite(s): LING 2110G.

LING 405. Topics in Linguistics
3 Credits (3)
Selected linguistics topics subtitled in the Schedule of Classes. May be repeated for a maximum of 6 credits under different subtitles.
Prerequisite: consent of instructor.

LING 425. Language and the Mind: Introduction to Psycholinguistics
3 Credits (3)
This course is an introduction to psycholinguistics; the study of how humans learn, represent, comprehend and produce language. Throughout this course, we address a variety of questions on the psychology of language most of which are still being answered. These include: What does it mean to know a language? What are the cognitive processes involved in language use? How do we produce and recognize speech? How can we improve texts and make them easier to read? How can we control speech in special situations to avoid errors?
Prerequisite(s): LING 2110G or consent of instructor.

LING 451. Independent Studies in Linguistics
1-3 Credits
Individual or group study of selected topics to be identified by subtitle. May be repeated for a maximum of 6 credits.
Prerequisites: LING 2110G and prior arrangement with faculty supervisor.

LING 455. Research in Linguistics
3 Credits (3)
This course will provide a capstone experience for students who have progressed through the program in linguistics and provide the foundation for further study at the post-graduate level in a linguistics-related field. Students will apply their foundation of knowledge and skills in linguistics through the realization of an individualized, inquiry-based project. Consent of instructor may enroll student only in case of elective credit shortfall with concurrent enrollment.
Prerequisite(s): LING 2110G, LING 301, LING 302V, LING 303, plus 9 credit hours of related electives.

LING 500. Introduction to Linguistics
3 Credits (3)
Survey of the main branches of linguistics: phonology, morphology, syntax, semantics, language acquisition, sociolinguistics, historical linguistics and some of the theoretical issues in the field.
LING 502. Graduate Study in Sociolinguistics
3 Credits (3)
Study of how social identity including factors such as ethnicity, age, gender education and socio-economic class is expressed in language systems.
Prerequisites: LING 2110G or LING 500 recommended.

LING 503. Exploring Language Systems- Grad
3 Credits (3)
Students will be responsible for all requirements of LING 303 and will undertake independent, directed research.
Prerequisite(s): LING 2110G or LING 500.

LING 505. Selected Topics
3 Credits (3)
Studies, varying from year to year, in linguistics.

M E-MECHANICAL ENGINEERING

M E 159. Graphical Communication and Design
2 Credits (1+3P)
Sketching and orthographic projection. Covers detail and assembly working drawings, dimensioning, tolerance specification, and design projects.
Prerequisite(s)/Corequisite(s): MATH 1250G.

M E 210. Electronics and System Engineering
3 Credits (2+3P)
Introduction to microcontrollers, measurement systems, motion actuators, sensors, electric circuits, and electronic devices and interfacing. Students required to work individually and in teams to design and test simple electromechanical systems. Restricted to Las Cruces campus only.
Prerequisite: MATH 1521G or MATH 1521H or ENGR 190.

Learning Outcomes
1. Ability to apply knowledge if mathematics, science, and engineering;
2. Ability to design and conduct experiments, as well as to analyze and interpret data;
3. Ability to design a system, component or process to meet desired needs within realistic constraints;
4. Ability to identify, formulate, and solve engineering problems;
5. Ability to use the techniques, skills and modern tools necessary for engineering practice.

M E 222. Introduction to Product Development
3 Credits (2+3P)
Introduction to modern methods used in the realization of products. Traditional manufacturing processes, such as metal stamping, turning, milling, and casting are reviewed. Modern methods of rapid prototyping and model making are discussed in context of computer-aided design. Techniques for joining metals, plastics, and composites are discussed. Role of quality control is introduced. May be repeated up to 3 credits. Restricted to: exclude majors.
Prerequisite(s): M E 159 or E T 110.

M E 228. Engineering Analysis I
3 Credits (3)
Introduction to engineering analysis with emphasis on engineering applications. Topics include ordinary differential equations, linear algebra, and vector calculus with focus on analytical methods. Restricted to Las Cruces campus only.
Prerequisite(s): MATH 2530G.

M E 234. Mechanics-Dynamics
3 Credits (3)
Kinematics and dynamic behavior of solid bodies utilizing vector methods.
Prerequisite(s)/Corequisite(s): MATH 2530G. Prerequisite(s): C E 233.

M E 236. Engineering Mechanics I
3 Credits (3)
Force systems, resultants, equilibrium, distributed forces, area moments, friction, and kinematics of particles. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): PHYS 1310G. Prerequisite(s): MATH 1521G or MATH 1521H.

M E 237. Engineering Mechanics II
3 Credits (3)
Kinetics of particles, kinematics and kinetics rigid bodies, systems of particles, energy and momentum principles, and kinetics of rigid bodies in three dimensions. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 2530G. Prerequisite(s): M E 236.

M E 240. Thermodynamics
3 Credits (3)
First and second laws of thermodynamics, irreversibility and availability, applications to pure substances and ideal gases.
Prerequisite: PHYS 1310G.

M E 261. Mechanical Engineering Problem Solving
3 Credits (2+3P)
Introduction to programming syntax, logic, and structure. Numerical techniques for root finding, solution of linear and nonlinear systems of equations, integration, differentiation, and solution of ordinary differential equations will be covered. Multi function computer algorithms will be developed to solve engineering problems.
Prerequisite: MATH 1521G or MATH 1521H or ENGR 190.

Learning Outcomes
1. Ability to apply knowledge of mathematics, science, and engineering;
2. Ability to design and formulate, and solve engineering problems;
3. Ability to use the techniques, skills and modern tools necessary for engineering practice.

M E 326. Mechanical Design
3 Credits (3)
Design methodology and practice for mechanical engineers.
Prerequisite: (M E 237 or ENGR 234) and C E 301.

Learning Outcomes
1. Ability to design a system, component or process to meet desired needs within realistic constraints;
2. Ability to function on multidisciplinary teams;
3. Understanding of professional and ethical responsibility;
4. Knowledge of contemporary issues.

M E 328. Engineering Analysis II
3 Credits (3)
Advanced engineering analysis with emphasis on engineering applications. Topics include systems of ordinary differential equations, Fourier analysis, partial differential equations, and functions of complex variable with focus on analytical methods. May be repeated up to 3 credits.
Prerequisite(s): M E 228.
M E 331. Intermediate Strength of Materials
3 Credits (3)
Covers stress and strain, theories of failure, curved flexural members, flat plates, pressure vessels, buckling, and composites. May be repeated up to 3 credits.
Prerequisite(s): C E 301 and M E 328.

M E 332. Vibrations
3 Credits (3)
Vibration of single and n-degree of freedom systems considering free, forced, and damped motion. Lagrange's equations. Dynamic stability. Controls. Matrix iteration. May be repeated up to 3 credits.
Prerequisite(s): M E 328, M E 237, and M E 261.

M E 333. Intermediate Dynamics
3 Credits (3)
Three dimensional kinematics and kinetics, orbital motion, Lagrange's equations, dynamic stability, and controls. May be repeated up to 3 credits.
Prerequisite(s): M E 328 and M E 237.

M E 338. Fluid Mechanics
3 Credits (3)
Properties of fluids. Fluid statics and fluid dynamics. Applications of the conservation equations continuity, energy, and momentum to fluid systems. Restricted to: M E majors.
Prerequisite: (M E 237 or ENGR 234) and (M E 228 or PHYS 395).

Learning Outcomes
1. Ability to apply knowledge of mathematics, science, and engineering;
2. Ability to design and conduct experiments, as well as to analyze and interpret data;
3. Ability to design a system, component or process to meet desired needs within realistic constraints;
4. Ability to identify, formulate, and solve engineering problems.

M E 340. Applied Thermodynamics
3 Credits (3)
Thermodynamic cycles, Maxwell relations, Gibbs and Helmholtz functions, mixtures, psychrometrics, chemical reactions, chemical equilibrium.
Prerequisite: M E 240.

M E 341. Heat Transfer
3 Credits (3)
Fundamentals of conduction, convection, and radiation. Design of heat transfer systems.
Prerequisite: M E 240, (M E 338 or A E 339), and (M E 228 or PHYS 395.

Learning Outcomes
1. Students have the ability to apply knowledge of mathematics, science, and engineering;
2. Students have the ability to identify, formulate, and solve engineering problems.

M E 345. Experimental Methods I
3 Credits (2+3P)
Emphasis on experimental techniques, basic instrumentation, data acquisition and analysis, and written presentation of results. Includes experiments in dynamics and deformable body mechanics.
Prerequisite: (M E 228 or PHYS 395), (M E 210 or PHYS 2140), and (M E 237 or ENGR 234).
Prerequisite/Corequisite: C E 301.

Learning Outcomes
1. Ability to design and conduct experiments, as well as to analyze and interpret data;
2. Ability to communicate effectively;
3. Ability to use the techniques, skills and modern tools necessary for engineering practice.

M E 349. MAE Career Seminar
1 Credit (1)
Seminar course covering topics relevant to mechanical and aerospace engineering juniors (job placement, interviewing techniques, resume preparation, etc.). Restricted to: M E and A E majors.
Prerequisite(s): Junior Standing.

M E 400. Undergraduate Research
1-3 Credits
Performed with the direction of a department faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of faculty member.

M E 401. Heating/Air-Conditioning System
3 Credits (3)
HVAC system design including heating and cooling load calculations, psychrometrics, piping, duct layout, and system control. May be repeated up to 3 credits.
Prerequisite(s): M E 340 and M E 341.

M E 405. Special Topics
3 Credits (3)
Topics of modern interest to be offered by the departmental staff. May be repeated up to 12 credits.
Prerequisite(s): Senior standing.

M E 425. Design of Machine Elements
3 Credits (3)
Design of machine elements through the application of mechanics. Fatigue and theories of failure. Design projects assigned.
Prerequisite(s): M E 326.

M E 426. Design Project Laboratory I
3 Credits (6P)
Students address a design problem in which innovation and attention to detail are emphasized. Solution of the problem entails applications of mechanics and/or the thermal sciences.
Prerequisite/Corequisite(s): M E 425.

M E 427. Design Project Laboratory II
3 Credits (6P)
Continuation of M E 426.
Prerequisite: M E 426.

M E 445. Experimental Methods II
3 Credits (2+3P)
Emphasis on experimental techniques, instrumentation and data acquisition in fluid mechanics, heat transfer, and thermodynamics. Laboratory results will be presented in written and verbal formats.
Prerequisite(s): (M E 338 or A E 339), M E 340, M E 341, and M E 345.
M E 449. Mechanical Engineering Senior Seminar
1 Credit (1)
Senior seminar course covering topics relevant to graduating mechanical engineering seniors (job placement, interviewing techniques, resume preparation).
Prerequisite: senior standing.

M E 452. Control System Design
3 Credits (3)
Introduction to the control of dynamical systems, with a focus on mechanical and aerospace systems, including basic systems theory, controllability / observability, feedback and stabilization, PID controls, root-locus plot, and Bode diagram.
Prerequisite: M E 261, M E 328 and (M E 237 or ENGR 234).

Learning Outcomes
1. Construct a block diagram to find a transfer function for a dynamical system; Analyze control systems by utilizing various linear control theories such as root-locus design method, bode / Nyquist plots, and lead / lag compensation techniques; Design and simulate automatic control systems for mechanical and aerospace engineering applications.

M E 456. Experimental Modal Analysis
3 Credits (3)
Emphasis on hands-on techniques for structural vibration tests for practical applications. Interpretation of experimental results by means of advanced signal processing tools, basic system identification methodology, and reduced-order modeling procedures. May be repeated up to 3 credits.
Prerequisite(s): M E 332, M E 228, and M E 261, or consent of instructor.

M E 458. Properties and Mechanical Behavior of Materials
3 Credits (3)
Prerequisite: CHME 361.

Learning Outcomes
1. Students will learn how to correlate mechanical behavior of materials with their microstructure, processing history and composition. As practicing engineers, they will be able to recognize impact of operating conditions, predict life span, and design materials to improve reliability and efficiency. They will be able to select appropriate materials for a given application from class of materials such as metals, polymers, ceramics and composites.

M E 460. Applied Finite Elements
3 Credits (3)
Introduction to the practical aspects of structural finite element modeling. Course focuses on providing a working knowledge of how to effectively incorporate finite element techniques into the design process. May be repeated up to 3 credits. Crosslisted with: M E 425.
Prerequisite(s): M E 425.

M E 481. Alternative and Renewable Energy
3 Credits (3)
Current and future energy needs of the United States and the world will be considered primarily from the standpoint of renewable energy sources such as solar, wind, ocean, and biomass. Technical, economic, and environmental aspects of each technology will be addressed.
Prerequisite(s): M E 341, and (M E 338 or A E 339).

M E 486. Introduction to Robotics
3 Credits (3)
This course provides students with an introduction to the theories and methods for analysis, design, and control of robotic manipulators. This course is devoted to understanding the spatial descriptions and transformations, kinematics, and dynamics of these mechanisms and how to practically implement these concepts into actual robotic manipulators.
Prerequisite: M E 328 and (ENGR 234 or M E 237).

Learning Outcomes
1. Model and analyze the kinematics and dynamics of robotic manipulators; Program and control these robotic platforms; Apply the theoretical methods into industrial robots; Implement the knowledge and experiences in real-world engineering projects.

M E 487. Mechatronics
3 Credits (2+3P)
Introduction to the analysis and design of computer-controlled electromechanical systems, including data acquisition and conversion, force and motion sensors, actuators, mechanisms, feedback control, and robotic devices. Students required to work in teams to construct and test simple robotic systems. May be repeated up to 3 credits.
Prerequisite(s): M E 210 and M E 345.

M E 502. Elasticity I
3 Credits (3)
Introduction to stress tensor, strain tensor, constitutive law, energy theorems, plane stress and plane strain. Also covers torsion of shafts and propagation of stress waves in elastic solids.

M E 503. Thermodynamics
3 Credits (3)
A comprehensive study of the first and second laws of thermodynamics, nonequilibrium processes, equations of state, and statistical thermodynamics.

M E 504. Continuum Mechanics
3 Credits (3)
Basic introduction to the Mechanics of Continuous Media. Its aim is to prepare the student for more advanced courses in Solid and Fluid Mechanics. The topics to be covered include: introduction to Cartesian tensors, tensor algebra and calculus; Lagrangian and Eulerian kinematics; Cauchy and Piola-Kirchhoff stresses; general principles of conservation; constitutive theory for ideal fluids, Newtonian and non-Newtonian fluids, finite and linear elasticity.

M E 505. Fundamentals of the Theory of Plasticity
3 Credits (3)
Basic concepts in continuum mechanics, equations of the plastic state, equations of elastic-plastic equilibrium, criteria for yielding, initial and subsequent yield surfaces, two-dimensional and axi-symmetric plasticity problems, dynamic problems.
Prerequisite(s): M E 502.

M E 509. Individualized Study
3 Credits (3)
Individualized study covering specialized topics in mechanical and aerospace engineering. Consent of instructor required.

M E 510. Special Topics
1-6 Credits
Topics in mechanical engineering. May be repeated for a maximum of 6 credits.
Prerequisite: consent of the department head.
M E 511. Dynamics
3 Credits (3)
An advanced study of the dynamical behavior of systems of particles and rigid bodies, with emphasis on the theoretical background of dynamics.

M E 512. Vibrations
3 Credits (3)
Free and forced vibrations for discrete and continuous systems with single or multiple degrees of freedom. Introduction to nonlinear and random vibration and solution techniques for such systems.

M E 517. Nonlinear Dynamics and Chaos
3 Credits (3)
Singular points, periodic solutions, stability, and local bifurcations for ODEs and maps; phase space methods, invariant manifolds, and Poincare maps; nonsmooth, periodic, time-delay, and Hamiltonian systems; perturbation, averaging, and harmonic balance methods; center manifold reduction and normal forms; strange attractors, Liapunov exponents, attractor dimension; dissipative and Hamiltonian chaos.

M E 518. Finite Element Analysis
3 Credits (3)
Introduction to finite element method. Topics include mathematical modeling, variational formulation, shape functions, truss, beam, solid, and shell elements. Includes static, dynamic, and nonlinear analysis. May be repeated up to 3 credits. Crosslisted with: M E 460.

M E 527. Linear Systems Theory
3 Credits (3)
Introduction to control of linear multi-input-multi-output (MIMO) systems. Topics include representation of system dynamics using the state-space model, linearization, internal and input-to-output stability, controllability, observability, optimal control, linear quadratic regulator, and observer.
Prerequisite: (M E 452 or A E 452) equivalent, or consent of instructor.
Learning Outcomes
1. Students are able to design linear multi-input-multi-output (MIMO) control systems.

M E 529. Nonlinear and Optimal Control
3 Credits (3)
Introduction to nonlinear systems and optimal control theory and its mathematical foundations. Includes equilibrium finding, phase plane analysis, Lyapunov stability theorems, feedback linearization, Pontryagin’s maximum principle, necessary conditions and sufficient conditions for optimality, and optimal control problems in mechanical and aerospace engineering.
Prerequisite: (M E 452 or A E 452) or equivalent or consent of instructor.
Learning Outcomes
1. Analyze the stability and performance properties of nonlinear systems and design nonlinear feedback control systems; Use optimal control theory and numerical optimization methods to solve engineering problems; Design and simulate nonlinear and optimal control systems for mechanical and aerospace engineering applications.

M E 530. Intermediate Fluid Mechanics
3 Credits (3)
Application of exact and empirical solutions to fundamental flow problems, including viscous and inviscid behavior. These applications establish a theoretical basis for the origin and physical role of common terms in the governing equations.

M E 533. Computational and Theoretical Fluid Mechanics
3 Credits (3)
Application of fluid mechanics theory and computational approaches to advanced flow problems, including viscous/inviscid and laminar/turbulent behavior. Complex flow problems addressed through development of a theoretical formulation, followed by application of computational fluid dynamic (CFD) tools, and finally presentation and validation of solution data.
Prerequisite: M E 530 or consent of instructor.

M E 534. Advance Computational Fluid Dynamics
3 Credits (3)
Advanced techniques for large-scale numerical simulations of fluid flows: spectral numerical methods, including Fourier and other expansions, Galerkin and collocation projections, computational methods to solve incompressible and compressible Navier-Stokes equations, high-resolution methods for hyperbolic equations with discontinuous solutions, and issues related to implementation on supercomputers.
Prerequisite(s): M E 533.

M E 536. Hydrodynamic Stability and Turbulence
3 Credits (3)
Introduction to fundamentals of hydrodynamic stability, classical linear stability analysis of parallel shear flows and rotating flows, nonlinear stability, basic concepts in turbulence theory.
Prerequisite(s): M E 533.

M E 540. Intermediate Heat Transfer
3 Credits (3)
Fundamentals of conduction, convection, and radiation heat transfer. Emphasis on the application of combined heat transfer to the solution of problems not accessible at the undergraduate level.

M E 558. Properties and Mechanical Behavior of Materials
3 Credits (3)
Prerequisite: CHME 361.

M E 570. Engineering Analysis I
3 Credits (3)
Introduction to engineering analysis with emphasis on engineering applications. Topics include linear algebra, linear ordinary differential equations, and linear partial differential equations with focus on analytical methods.

M E 580. Engineering Analysis II
3 Credits (3)
Engineering analysis with emphasis on engineering applications. Topics include analytical and numerical methods in linear and nonlinear ordinary and partial differential equations.
Prerequisite: M E 570 or consent of instructor.

M E 586. Introduction to Robotics
3 Credits (3)
This course provides students with an introduction to the theories and methods for analysis, design, and control of robotic manipulators. This course is devoted to understanding the spatial descriptions and transformations, kinematics, and dynamics of these mechanisms and how to practically implement these concepts into actual robotic manipulators.
Prerequisite: M E 328 and (ENGR 234 or M E 237).
M E 587. Mechatronics
3 Credits (2+3P)
Introduction to the analysis and design of computer-controlled electromechanical systems, including data acquisition and conversion, force and motion sensors, actuators, mechanisms, feedback control, and robotic devices. Students required to work in teams to construct and test simple robotic systems. Crosslisted with: M E 487.

M E 598. Special Research Programs
1-3 Credits
Individual investigations, either analytical or experimental. May be repeated for a maximum of 6 credits.

M E 599. Master's Thesis
15 Credits
Thesis.

M E 600. Doctoral Research
1-15 Credits
This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

M E 698. Special Research Programs
1-3 Credits
May be repeated for a maximum of 6 credits.

M E 700. Doctoral Dissertation
15 Credits
Dissertation.

M SC-MILITARY SCIENCE

M SC 110. Introduction to Military Science
2 Credits (2+1P)
Introduction to the Army, the Profession of Arms, and critical thinking. Students will examine the Army Profession and what it means to be a professional in the U.S. Army. The overall focus is on developing basic knowledge and comprehension of the Army Leadership Requirements Model while gaining a complete understanding of the Reserve Officers' Training Corps (ROTC) program, its purpose in the Army, and its advantages for the student. Cadets also learn how resiliency and fitness supports their development as an Army leader. Includes a weekly lab facilitated by MSL III Cadets and supervised by cadre and three physical fitness sessions per week. Restricted to Las Cruces campus only.

M SC 110 L. Introduction to Military Science Lab
1 Credit (1P)
Planning, coordination, execution and evaluation of training and activities in a collaborative training environment with both basic and advanced course students from within the ROTC program. Students develop and refine leadership skills in positions of responsibility. Restricted to Las Cruces campus only.
Prerequisite(s): MSC 110.

M SC 111. Introduction to Leadership
2 Credits (2+1P)
Introduction to the personal challenges and competencies that are critical for effective leadership. Students learn how the personal development of life skills such as critical thinking, time management, goal setting, and communication contribute to effective leadership. Students learn the basics of the communications process and the importance for leaders to develop the essential skills to effectively communicate in the Army. Students will begin learning the basics of squad level tactics that will be reinforced during a weekly lab facilitated by MSL III Cadets and supervised by cadre. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

M SC 111 L. Introduction to Leadership Lab
1 Credit (1P)
Planning, coordination, execution and evaluation of training and activities in a collaborative training environment with both basic and advanced course students from within the ROTC program. Students develop and refine leadership skills in positions of responsibility. Restricted to Las Cruces campus only.
Prerequisite(s): MSC 111.

M SC 210. Self/Team Development
3 Credits (3+1P)
A focus on leadership and decision making. The course adds depth to the student's understanding of the Adaptability Army Learning Area. Outcomes are demonstrated through Critical and Creative Thinking and the ability to apply Troop Leading Procedures (TLP) to apply Innovative Solutions to Problems. The Army Profession is also stressed through leadership forums and a leadership self-assessment. Students are then required to apply their knowledge outside the classroom in a hands-on performance-oriented environment during a weekly lab facilitated by MSL III Cadets and supervised by cadre and three physical fitness sessions per week. Restricted to Las Cruces campus only.

M SC 210 L. Self/Team Development Lab
1 Credit (1P)
Planning, coordination, execution and evaluation of training and activities in a collaborative training environment with both basic and advanced course students from within the ROTC program. Students develop and refine leadership skills in positions of responsibility. Restricted to Las Cruces campus only.
Prerequisite(s): MSC 210.

M SC 211. Leadership in Action and Team Building
3 Credits (3+1P)
A focus on Army doctrine and team development. The course begins the journey to understand and demonstrate competencies as they relate to Army doctrine, Army Values, Teamwork, and Warrior Ethos and their relationship to the Law of Land Warfare and philosophy of military service are also stressed. The ability to lead and follow is also covered through Team Building exercises at squad level. Students are then required to apply their knowledge outside the classroom in a hands-on performance-oriented environment during a weekly lab facilitated by MSL III Cadets and supervised by cadre and three physical fitness sessions per week. Restricted to Las Cruces campus only.

M SC 211 L. Leadership in Action and Team Building Lab
1 Credit (1P)
Planning, coordination, execution and evaluation of training and activities in a collaborative training environment with both basic and advanced course students from within the ROTC program. Students develop and refine leadership skills in positions of responsibility. Restricted to Las Cruces campus only.
Prerequisite(s): MSC 211.

M SC 225. Directed Studies
1-3 Credits
Individual directed studies under supervision of the Professor of Military Science. May be repeated up to 12 credits. Restricted to Las Cruces campus only.
Prerequisite(s): GPA 2.5 or better.
M SC 310. Leading Small Organizations I
3 Credits (3)
Part of the Senior ROTC Advanced Course, this course provides a Focus on training management and the warfighting functions. It is an academically challenging course where Cadets study, practice, and apply the fundamentals of training management and how the Army operates through the Warfighting functions. At the conclusion of this course, Cadets will be capable of planning, preparing, and executing training for a squad conducting small unit tactics. Includes one lab meeting per week using peer facilitation overseen by MSL IVs, supervised by ROTC Cadre and three physical fitness sessions per week. Students must meet Basic Course of Military Science requirements to enroll in this course.
Corequisite(s): M SC 310 L.

M SC 310 L. Leading Small Organizations I Lab
1 Credit (1P)
Planning, coordination, execution and evaluation of training and activities with basic course students and ROTC program. Students develop and refine leadership skills in positions of responsibility. Open only to students taking M SC 310.
Corequisite(s): M SC 310.

M SC 320. Leading Small Organizations II
3 Credits (3)
Part of the Senior ROTC Advanced Course, this course provides a focus on applied leadership in small unit operations. It is an academically challenging course where Cadets study, practice, and apply the fundamentals of direct level leadership and small unit tactics at the platoon level. At the conclusion of this course, Cadets will be capable of planning, coordinating, navigating, motivating and leading a platoon in the execution of a mission includes one lab meeting per week using peer facilitation overseen by MSL IVs, supervised by ROTC Cadre and three physical fitness sessions per week. Successful completion of this course is a requirement to Cadet Summer Training Advanced Camp during the summer, at Fort Knox, KY. Prerequisite(s): M SC 310.
Corequisite(s): M SC 320 L.

M SC 320 L. Leading Small Organizations II Lab
1 Credit (1P)
Practice and refinement of leadership skills. Different roles assigned for students at different levels in the program. Planning, coordination, execution and evaluation of training and activities with basic course students and ROTC program. Open to students taking M SC 320.
Corequisite(s): M SC 320.

M SC 325. Advanced Directed Studies
1-3 Credits
Directed individual study of advanced subjects under the guidance of the Professor of Military Science. May be repeated up to 12 credits.
Prerequisite(s): GPA 2.5 or better.

M SC 350. Cadet Summer Training Advanced Course
3 Credits (3)
Advanced Camp. Advanced Camp is a 31-day training event which takes place at Fort Knox, KY. It is designed to assess a Cadet’s ability to demonstrate proficiency in basic officer leadership tasks. Cadets are evaluated on their ability to lead at the Squad and Platoon levels, both in garrison and tactical environments. Cadets are mentally and physically tested during a 12-day consequence driven field training exercise that replicates a combat training center rotation. Successful completion of the Advanced Camp is a requirement for commissioning. Consent of Instructor required.
Prerequisite(s): M SC 310, M SC 310 L, M SC 320, and M SC 320 L.

M SC 401. Leadership Challenges and Goal Setting
3 Credits (3)
Part of the Senior ROTC Advanced Course, this course provides a focus on development of the Army Officer. It is an academically challenging course were Cadets develop knowledge, skills, and abilities to plan, resource, and assess training at the small unit level. Cadets also learn about Army programs that support counseling, subordinates and evaluating performance, values and ethics, career planning, and legal responsibilities. At the conclusion of this course, Cadets will be familiar with how to plan, prepare, execute, and continuously assess the conduct of training at the company or field grade officer level. Includes a lab per week overseeing MSL III lesson facilitation and supervised by ROTC Cadre and three physical fitness sessions per week. May be repeated up to 3 credits. Prerequisite(s): M SC 320
Corequisite(s): M SC 401 L.

M SC 401 L. Leadership Challenges and Goal Setting Lab
1 Credit (1P)
Different roles assigned for students at different levels in the program. Practice and refinement of leadership skills. Planning, coordination, execution and evaluation of training and activities with basic course students and ROTC program. Open only to students taking M SC 401. May be repeated up to 1 credits.
Corequisite(s): M SC 401.

M SC 402. Transition to Lieutenant
3 Credits (3)
The final course within the Senior ROTC Advanced Course, this course is an academically challenging course were Cadets further develop knowledge, skills, and abilities required of junior officers pertaining to the Army in Unified Land Operations and Company Grade Officer roles and responsibilities. This course includes reading assignments, homework assignments, small group assignments, briefings, case studies, practical exercises, a mid-term exam, and an Oral Practicum as the final exam. The Oral Practicum explores the Cadet’s knowledge of how they will be prepared for the 20 Army Warfighting Challenges (AWFC) covered throughout the ROTC Advanced Course. Successful completion of this course will assist in preparing Cadets for their BOLC B course following graduation and commissioning. It is a mandatory requirement for commissioning. Includes a lab per week overseeing MSL III lesson facilitation and supervised by ROTC Cadre and three physical fitness sessions per week. May be repeated up to 3 credits. Prerequisite(s): M SC 401
Corequisite(s): M SC 402 L.

M SC 402 L. Transition to Lieutenant Lab
1 Credit (1P)
Different roles assigned for students at different levels in the program. Practice and refinement of leadership skills. Planning, coordination, execution, and evaluation of training and activities with basic course students and ROTC program. Open only to students taking M SC 402. May be repeated up to 1 credits.
Corequisite(s): M SC 402.

M SC 425. Practicum
1-4 Credits
Independent projects conducted under the direction of the Professor of Military Science, and concerned with analysis of selected leadership or management problems. Course not eligible for S/U grade. May be repeated up to 16 credits.
MAT SC 465. Military Decision Making - Graduate Level
3 Credits (3)
This course and its associated lab meeting will expose students to the military decision making process. Students will learn about the roles of military staff members and work as part of a staff to develop a training and associated guidance for a notional Army unit. Students will also spend time relating concepts from the MDMP to relevant civilian scenarios within both business and government decision making. May be repeated up to 3 credits. Consent of Instructor required. Consent of Professor of Military Science (PMS) is required and the PMS will interview all prospective students prior to enrolling into this course. Corequisite(s): M SC 465 L.

M SC 465 L. Military Decision Making - Graduate Level Lab
1 Credit (1)
Students will work as part of a planning team in the application of the Military Decision Making Process to planning, coordination, and publish a comprehensive training plan and guidance which outlines all training and activities of the NMSU Army ROTC program for the semester following the semester of the course (i.e. the fall course develops the spring plan). Students develop and refine leadership skills in positions of responsibility. Open only to students taking M SC 465. May be repeated up to 1 credits. Consent of Instructor required. Consent of Professor of Military Science (PMS) is required and the PMS will interview all prospective students prior to enrolling into this course. Corequisite(s): M SC 465.

MAT-AUTOMATION & MANUFACTURING

MAT 102. Print Reading for Industry
3 Credits (2+2P)
Reading, interpretation, and revisions of industrial technical drawings common to manufacturing, Aerospace, machine parts, electrical, hydraulic, and Pneumatic drawings. Interpretation of engineering drawings and related shop calculations. Introduction Crosslisted with: AERT 113. Restricted to: Community Colleges only.

MAT 105. Introduction to Manufacturing
3 Credits (2+2P)
Introduction to manufacturing evolution from basic assembly process to modern automated processes. Covers history, employability, soft skills, quality measurements, teamwork concept, production requirements, and considerations in plan layout and design. Minimum math proficiency of CCDM 114 required or math placement into MATH 1215 or higher. Restricted to: Community Colleges only. Crosslisted with: AERT 113.

MAT 106. Applied Manufacturing Practices
3 Credits (2+2P)
Course will illustrate how various products are manufactured along with associated process. Mechanical behavior such as bending, cold worked, strained, work hardened, and heat transfer will be emphasized as well. In lab, students will learn how to make selected products starting from prints to complete projects including quality control. Crosslisted with: AERT 114. Restricted to: Community Colleges only.

MAT 110. Machine Operation and Safety
3 Credits (2+2P)
Introduction to the operation and safety aspects of various types of machinery and equipment, including both mechanical and electrical machines, Rigid Tubing, and Flexible Lines. Maintenance and safety operation of industrial equipment will also be covered. Restricted to: Community Colleges only. Crosslisted with: AERT 115

MAT 130. Applied Industrial Electricity I
4 Credits (3+2P)
Electrical safety, AC and DC circuits, use and care of common measuring instrumentation, schematic and wiring diagrams, electromagnetism, National Electric Code branch circuits. Restricted to: Community Colleges only.
Prerequisite(s): MATH 1215 or ELT 120 or OETS 118.

MAT 135. Applied Industrial Electricity II
4 Credits (3+2P)
Relationship between motor power, speed, and torque, basic application of relay circuits, motor control circuits, inductance and capacitance factors, transformers, solid state devices circuits and applications. Restricted to: Community Colleges only.
Prerequisite(s): MAT 130.

MAT 145. Electromechanical Systems for Non-Majors
4 Credits (3+3P)
Electromechanical system interfacing. Principles and applications of preventive and corrective maintenance procedures on automated industrial production machines using system technical and maintenance manuals to develop troubleshooting procedures using systems block and schematic diagrams.
Prerequisite: consent of instructor.

MAT 221. Cooperative Experience I
1-6 Credits
Supervised cooperative work program. Student is employed in an approved occupation and rated by employer and instructor. Student meets in a weekly class. Graded S/U. Prerequisite: consent of instructor.

MAT 234. Industrial Electricity Maintenance
3 Credits (3+2P)
Introduction into electrical systems, theory and uses for the different types of motors used in the industry and related industrial safety practices. DC, AC stepper and servo motors, motor speed and torque, motor performance, and efficiency, motor control fundamentals using variable frequency drives, vector controls, servo and stepper drives. Restricted to: Community Colleges only.

MAT 265. Special Topics
1-6 Credits
Course subtitled in the Schedule of Classes. May be repeated for a maximum of 12 credits. Prerequisite: consent of instructor.

MATH-MATHEMATICS

A student may not receive credit for a lower-division mathematics course if it serves as a prerequisite to a lower-division math course that the student had previously passed with a grade of C- or better.

Students without adequate placement to enroll in MATH 1134, MATH 1215 or MATH 1130G can gain admission to the course by earning a C- or better in CCDM 114 N at an NMSU Community College campus, or in A S 103.

Students wishing to enroll in MATH 1220G, MATH 1430G, MATH 1511G, MATH 1521G, or MATH 1350G must satisfy one of the following:

1. have passed the stated prerequisite course or an equivalent transfer course with a C- or better
2. have placed into the course with an adequate ACT Math score or through the Mathematics Placement Examination (MPE), the results of which will be made available to the student's advisor. The MPE is
MATH 1130G. Survey of Mathematics
3 Credits (3)
This course will develop students’ ability to work with and interpret numerical data, to apply logical and symbolic analysis to a variety of problems, and/or to model phenomena with mathematical or logical reasoning. Topics include financial mathematics used in everyday life situations, statistics, and optional topics from a wide array of authentic contexts. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in CCDM 113 N or CCDM 114 N or A S 103 or higher.

Learning Outcomes
1. Construct and analyze graphs and/or data sets: Gather and organize information; Understand the purpose and use of various graphical representations such as tables, line graphs, tilings, networks, bar graphs, etc.; Interpret results through graphs, lists, tables, sequences, etc.; Draw conclusions from data or various graphical representations.
2. Use and solve various kinds of equations: Understand the purpose of and use appropriate formulas within a mathematical application; Solve equations within a mathematical application; Check answers to problems and determine the reasonableness of results.
3. Understand and write mathematical explanations using appropriate definitions and symbols: Translate mathematical information into symbolic form; Define mathematical concepts in the student’s own words; Use basic mathematical skills to solve problems.
4. Demonstrate problem solving skills within the context of mathematical applications; Show an understanding of a mathematical application both orally and in writing; Choose an effective strategy to solve a problem; Gather and organize relevant information for a given application.

MATH 1134. Fundamentals of Elementary Mathematics I
3 Credits (3)
Numbers and the four operations of arithmetic. Understanding and comparing multiple representations of numbers and operations, in particular how these representations build from whole numbers to integers to fractions and decimals. Applying properties of numbers and operations in contextual situations. Reasoning, communicating, and problem solving with numbers and operations. Applications to ratio, and connections with algebra. Taught primarily through student activities and investigations. Restricted to: EDUC, EPAR, ED, ECED majors. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215 or higher.

Learning Outcomes
1. As future elementary teachers you will be teaching mathematics to children.
2. In order to teach a subject well you need not only to know the material that you will teach, but you need to know more than what you will teach, and know it well in order to be able to answer questions, understand student reasoning, give alternate explanations when your students do not understand something, and be able to adjust to changes in the mathematical curriculum.
3. Furthermore, even if you hope to teach a given grade, you should be prepared to teach a variety of grades since what a person ends up teaching is often not what they planned to do.
4. We will explore ideas of arithmetic in a way to help you improve your mathematical ability, gain confidence in your ability, introduce to you different ideas and models, and to see a variety of mathematical activities that are appropriate for people of all ages.
5. Everything we study will be done with the aim of developing your ability to relate to the mathematics of elementary school and to help children develop mathematical understanding.

MATH 1215. Intermediate Algebra
3 Credits (3)
A study of linear and quadratic functions, and an introduction to polynomial, absolute value, rational, radical, exponential, and logarithmic functions. A development of strategies for solving single-variable equations and contextual problems. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in CCDM 113 N or CCDM 114 N or A S 103 or higher.

Learning Outcomes
1. Students will build on their knowledge of linear and quadratic functions and will begin to build an understanding of absolute value, polynomial, rational, power, radical, exponential and logarithmic functions in the following contexts: Demonstrate appropriate use of basic function language and notation; Convert between equivalent forms of algebraic expressions; Solve single-variable equations of the types listed above; Interpret and communicate algebraic solutions graphically and numerically; Demonstrate contextual problem-solving skills that include setting up and solving problems, and interpreting solutions in context; Apply appropriate problem solving methods from among algebraic, graphical, and numerical.
MATH 1217. General Supplemental Instruction I
1 Credit (2P)

Learning Outcomes
1. Intermediate Algebra Workshop provides time for students to work on problems from Intermediate Algebra under the guidance of their Intermediate Algebra instructor

MATH 1220G. College Algebra
3 Credits (3)
The study of equations, functions and graphs, reviewing linear and quadratic functions, and concentrating on polynomial, rational, exponential and logarithmic functions. Emphasizes algebraic problem solving skills and graphical representation of functions. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1220G or higher

Learning Outcomes
1. Use function notation; perform function arithmetic, including composition; find inverse functions.
2. Identify functions and their transformations given in algebraic, graphical, numerical, and verbal representations, and explain the connections between these representations.
3. Graph and interpret key feature of functions, e.g., intercepts, leading term, end behavior, asymptotes.
4. Solve equations algebraically to answer questions about graphs, and use graphs to estimate solutions to equations.
5. Solve contextual problems by identifying the appropriate type of function given the context and creating a formula based on the information given.
6. Communicate mathematical information using proper notation and verbal explanations.

MATH 1221. General Supplemental Instruction II
1 Credit (1+2P)

Corequisite(s): MATH 1220G.

Learning Outcomes
1. College Algebra Workshop provides time for students to work on problems from College Algebra under the guidance of their College Algebra instructor

MATH 1250G. Trigonometry & Pre-Calculus
4 Credits (3+2P)
Trigonometry & Pre-Calculus includes the study of functions in general with emphasis on the elementary functions: algebraic, exponential, logarithmic, trigonometric and inverse trigonometric functions. Topics include rates of change, limits, systems of equations, conic sections, sequences and series, trigonometric equations and identities, complex number, vectors, and applications. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1220G or higher

Learning Outcomes
1. Trigonometry) Students will be able to define and evaluate the trigonometric functions as functions of angle in both degree and radian measure using the definitions in terms of x, y, and r; as the ratio of sides of a right triangle; using the unit circle; using reference angles, commonly used (0°, 30°, 45°, 60°, 90°) angles and using a calculator.
2. (Trigonometry) Students will be able to solve right triangles. They will be able to draw a sketch in an applied problem when necessary.
3. (Trigonometry) Students will be able to solve non-right triangles using the law of sines and the law of cosines.
4. (Trigonometry) Students will be able to prove trigonometric identities and apply addition and subtraction, double-angle, half-angle and power reduction formulas.
5. (Trigonometry) Students will be able to graph the six trigonometric functions, their transformations and their inverses.
6. (Trigonometry) Students will be able to use algebraic methods, including the use of identities and inverses, to solve trigonometric equations and demonstrate connections to graphical and numerical representations of the solutions.
7. (Trigonometry) Students will be able to add and subtract vectors in two dimensions. They will be able to use the dot product to project one vector onto another and to determine the angle between two vectors. They will be able to solve a variety of word problems using vectors.
8. (Trigonometry) Students will be able to work with polar coordinates; this includes graphing in polar coordinates and transforming an equation with polar coordinates into one with rectangular coordinates, and vice versa.
9. (Trigonometry) Students will be to work with the trigonometric form of complex numbers, including using De Moivre's formula.
10. 1 (Pre-Calculus) Functions: Reinforce recognizing a function from its graph and from its algebraic expression; Reinforce identification of a one-to-one function graphically and from its algebraic expression; Reinforce identification of inverse functions graphically and algebraically; Reinforce combining functions arithmetically and compositionally; Be able to calculate the average rate of change of a function using the difference quotient and depict it graphically; Be able to find a limiting value of a function and be able to identify and use the notation that describes this.
11. (Pre-Calculus) Graphing: Reinforce using key characteristics of functions to graph them; Be able to graph conic sections from their key characteristics such as foci, eccentricity and asymptotes; Be able to identify all functions mentioned from their graphs, describing their key aspects.
12. (Pre-Calculus) Solving: Exponential/Logarithmic equations using the rules of exponents and logarithms; Systems of linear equations by elimination; Non-linear systems algebraically and graphically.
13. (Pre-Calculus) Applications: Modeling with functions with an emphasis on exponential and logarithmic functions, growth and decay.
14. (Pre-Calculus) Sequences and series: Understand the concept and notation of a sequence; Understand the concept and notation of a...
MATH 1350G. Introduction to Statistics
3 Credits (3)
This course discusses the fundamentals of descriptive and inferential statistics. Students will gain introductions to topics such as descriptive statistics, probability and basic probability models used in statistics, sampling and statistical inference, and techniques for the visual presentation of numerical data. These concepts will be illustrated by examples from a variety of fields. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215 or higher

Learning Outcomes
1. Explain the general concepts of statistics: Explain and evaluate statistics used in the real world (from a news article, research project, etc.); Use statistical vocabulary appropriately; Distinguish between descriptive and inferential statistics; Distinguish between qualitative and quantitative data; Distinguish between populations and samples, and parameters and statistics; Give examples of independent and dependent variables.
2. Presentation and description of data: Present data graphically using histograms, frequency curves and other statistical graphs; Interpret graphs of data, including histograms and shapes of distributions.
3. Summarize data using measures of central tendency and variation: Calculate and interpret the mean, median, and mode to describe data; Calculate and interpret range, variance, and standard deviation to describe data.
4. Present the concepts of probability: Interpret basic probabilities; Calculate probabilities using compound probability rules and the binomial distribution; Calculate probabilities using the standard normal distribution and relate them to areas under the curve; Determine if the binomial distribution can be approximated with the normal distribution; Describe the relationship between the sampling distribution and the population distribution; Use the central limit theorem to approximate the probability distribution and calculate probabilities.
5. Compute point and interval estimates: Determine the confidence interval for a parameter; Interpret the confidence level and margin of error; Determine whether a statistical technique is appropriate under stated conditions.
6. Perform hypothesis tests: Determine whether a statistical test is appropriate under stated conditions; Identify null and alternative hypothesis; Perform and interpret statistical tests (e.g. z-test, t-test, one-tailed and two-tailed, one-sample, two-sample) and determine whether data is statistically significant; State the conclusion of a hypothesis test; Interpret a p-value as compared to a significance level; Explain why a test can lead us to reject a null hypothesis, not accept one; Distinguish between Type I and Type II errors.
7. Analyze data using regression and correlation: Explain the difference between correlation and causation; Construct and interpret scatter plots; Calculate and interpret the linear correlation coefficient; Determine and use the equation of a least-squares regression line between two variables to make predictions; Interpret the meaning of the coefficient of determination.
8. Optional topics: Inter-quartile range, box-plots, stem-and-leaf plots; Combinations and permutations; The Poisson distribution; Statistical power; Chi-square; Analysis of variance

MATH 1430G. Applications of Calculus I
3 Credits (2+2P)
An algebraic and graphical study of derivatives and integrals, with an emphasis on applications to business, social science, economics and the sciences. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1220G or higher

Learning Outcomes
1. Find limits algebraically and graphically, and use limits to analyze continuity.
2. Find the derivative of a function by applying appropriate techniques (limit of the difference quotient, general derivative rules, product rule, quotient rule, chain rule, and higher order derivatives).
3. Perform implicit differentiation. Use implicit differentiation to solve related rate application problems.
4. Use the derivative to describe the rate of change and slope of a curve in general and at particular points. Compare and contrast average rates of change to instantaneous rates of change.
5. Find the maxima, minima, points of inflections, and determine concavity of a function by applying the first and second derivatives. Use these results to sketch graphs of functions and to solve optimization problems in context.
6. Find the antiderivative and indefinite integral functions to include integration by substitution. Apply the Fundamental Theorem of Calculus in computing definite integrals of functions.
7. Approximate the area under the curve using Riemann sums.
8. Use the integral to determine the area under a curve and to find the accumulated value of a function in context.
9. Solve contextual problems by identifying the appropriate type of function given the context, creating a formula based on the information given, applying knowledge of algebra and calculus, and interpreting the results in context.
10. Communicate mathematical information using proper notation and verbal explanations.
MATH 1435. Applications of Calculus I
3 Credits (3)
Intuitive differential calculus with applications to engineering.
Prerequisite(s): C- or better in MATH 1250G.
Learning Outcomes
1. Find limits algebraically and graphically, and use limits to analyze continuity.
2. Find the derivative of a function by applying appropriate techniques (limit of the difference quotient, general derivative rules, product rule, quotient rule, chain rule, and higher order derivatives).
3. Learn derivative rules for polynomial, exponential, logarithmic, trigonometric and inverse trigonometric functions.
4. Perform implicit differentiation. Use implicit differentiation to solve related rate application problems.
5. Find the maxima, minima, points of inflections, and determine concavity of a function by applying the first and second derivatives. Use these results to sketch graphs of functions and to solve optimization problems in context.
6. Find partial derivatives and find maxima, minima in three dimensions.
7. Find the linear approximation of a function.
8. Find Maclaurin and Taylor series.
10. Communicate mathematical information using proper notation and verbal explanations.

MATH 1440. Applications of Calculus II
3 Credits (3)
Topics in this second course of Applications of Calculus include functions of several variables, techniques of integration, an introduction to basic differential equations, and other applications.
Prerequisites: C or better in MATH 1435 or in MATH 1521G, or in MATH 1521H.
Learning Outcomes
1. Recognize the interplay between Riemann sums and definite integrals
2. Use the Fundamental Theorem of Calculus to compute definite and indefinite integrals
3. Demonstrate an understand of the relationship between the derivative and the definite integral
4. Evaluate integrals numerically using standard rules (midpoint, trapezoid, Simpson's)
5. Evaluate integrals analytically using standard methods (substitution, integration by parts, trigonometric substitution and identities, inverse functions and partial fractions
6. Use integration to solve problems in geometry, physics, science, engineering and other fields
7. Use appropriate methods such as L'Hopital's Rule to evaluate improper integrals
8. Approximate functions using Taylor polynomials
9. Apply standard tests to determine convergence or divergence of sequences and series
10. Find a power series representation for a function and determine where it converges
11. Identify and evaluate first order differential equations
MATH 1521H. Calculus and Analytic Geometry II Honors
4 Credits (3+1P)
A more advanced treatment of the material of MATH 1521G with additional topics. Consent of Instructor required. Restricted to Las Cruces campus only. Consent of Department.

Learning Outcomes
1. Recognize the interplay between Riemann sums and definite integrals
2. Use the Fundamental Theorem of Calculus to compute definite and indefinite integrals
3. Demonstrate an understand of the relationship between the derivative and the definite integral
4. Evaluate integrals numerically using standard rules (midpoint, trapezoid, Simpson's)
5. Evaluate integrals analytically using standard methods (substitution, integration by parts, trigonometric substitution and identities, inverse functions and partial fractions
6. Use integration to solve problems in geometry, physics, science, engineering and other fields
7. Use appropriate methods such as L'Hopital's Rule to evaluate improper integrals
8. Approximate functions using Taylor polynomials
9. Apply standard tests to determine convergence or divergence of sequences and series
10. Find a power series representation for a function and determine where it converges
11. Identify and evaluate first order differential equations

MATH 1531. Introduction to Higher Mathematics
3 Credits (3)
Logic; sets, relations, and functions; introduction to mathematical proofs.
Prerequisite(s): C or better in MATH 1521G or MATH 1521H.

Learning Outcomes
1. The primary objective of this course is to serve as a bridge between the calculus courses you have taken, where the focus is on computations and solving problems, to more abstract mathematics courses.
2. In particular, we will discuss logical reasoning, definitions, proofs, and certain basic building blocks such as sets, functions, and relations.
3. By the end of the course, you should be able to understand and construct well-written proofs of basic mathematical arguments involving simple properties of the real numbers, integers, sets, functions, and relations using universal and existential quantifiers, absolute values and inequalities, modular arithmetic, and proof by induction.

MATH 1996. Topics in Mathematics
1-3 Credits
Topics to be announced in the Schedule of Classes. Maximum of 3 credits per semester. Total credit not to exceed 6 credits. Community Colleges only.
Prerequisite: consent of instructor.

Learning Outcomes
1. Varies

MATH 2134G. Fundamentals of Elementary Math II
3 Credits (3)
Geometry and measurement. Multiple approaches to solving problems and understanding concepts in geometry. Analyzing and constructing two- and three-dimensional shapes. Measurable attributes, including angle, length, area, and volume. Understanding and applying units and unit conversions. Transformations, congruence, and symmetry. Scale factor and similarity. Coordinate geometry and connections with algebra. Reasoning and communicating about geometric concepts. Taught primarily through student activities and investigations.
Prerequisite(s): C or better in MATH 1134.

Learning Outcomes
1. The primary objectives are mathematical: to understand some of the basic
2. concepts of geometry, and measurement with an appropriate level of rigor; to appreciate the historical, cultural and educational contributions and potential applications in real life situations; and to gain problem solving skills using these concepts.
3. The secondary goal is to appreciate the importance of this material in the elementary school curriculum.

MATH 2234. Fundamentals of Elementary Mathematics III
3 Credits (3)
Probability, statistics, ratios, and proportional relationships. Experimental and theoretical probability. Collecting, analyzing, and displaying data, including measurement data. Multiple approaches to solving problems involving proportional relationships, with connections to number and operation, geometry and measurement, and algebra. Understanding data in professional contexts of teaching. Taught primarily through student activities and investigations.
Prerequisite(s): C or better in MATH 2134G.

Learning Outcomes
1. In order to teach a subject well you need not only to know the material that you will teach, but you need to know more than what you will teach, and know it well, in order to be able to answer questions, give alternate explanations when your students do not understand something, and be able to adjust to changes in the mathematical curriculum.
2. Furthermore, even if you hope to teach a certain grade, you should be prepared to teach anything between kindergarten and 8th grade.
3. You also need to be aware of where a student is coming from in order to make adjustments in their curriculum.
4. A strong elementary school teacher must understand where his/her students are headed in order to most effectively direct them there.
5. This is especially true in mathematics, where students continue to build on the concepts they learn each year.
MATH 2350G. Statistical Methods
3 Credits (3)
Exploratory data analysis. Introduction to probability, random variables and probability distributions. Concepts of Central Limit Theorem and Sampling Distributions such as sample mean and sample proportion. Estimation and hypothesis testing single population parameter for means and proportions and difference of two population parameters for means and proportions. Analysis categorical data for goodness of fit. Fitting simple linear regression model and inference for regression parameters. Analysis of variance for several population means. Techniques in data analysis using statistical packages. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215 or higher.

Learning Outcomes
1. Summarize Data through graphs and Descriptive statistics: Define qualitative and quantitative data; Provide examples of a population, a sample, independent and dependent variables, parameters and statistics; Construct and interpret histograms, stem plots, bar charts, and boxplot; Summarize distributions with numerical measures such as mean, median, standard deviation, percentiles, interquartile range.
2. Present the concepts of probability: Explain related to probability axioms (e.g. mutually exclusive events and independent events); Apply applications of probability rules; Apply Conditional probability and Bayes Rule.
3. Distinguish between discrete and continuous random variables: Calculate probabilities using Binomial and Poisson distributions; Calculate probabilities using the standard normal distribution by finding the area underneath the curve.
4. Explain the Central Limit Theorem: Introduce the concept of a sampling distribution; Discuss the distribution of the sample mean and sample proportion under repeated sampling; Generate and interpret a sampling distribution using repeated sampling; Determine if the Binomial and Poisson distribution can be approximated with the normal distribution.
5. Estimate a population parameter: Determine confidence interval for population mean, proportion, difference of means, and difference of proportions; Interpret the confidence interval and margin of error; Explain the dependence of margin of error on sample size and confidence level.
6. Perform hypothesis tests for population parameters (population mean, proportion, difference of means, and difference of proportions); Describe the logic and framework of the inference of hypothesis testing; Make a decision using a p-value and draw an appropriate conclusion; Distinguish between Type I and Type II errors; Explain power of the test.
7. Perform Hypothesis Tests for Categorical data: Determine and analyze Chi-square test for Independence; Determine and analyze Chi-square test for Goodness of fit.
8. Analyze data using regression and correlation: Construct scatterplots and analyze the scatter plots; Calculate the linear correlation coefficient and determine whether a linear relationship exists between two variables; Fit the least-squares regression line between two variables; Predict the response variable from the regression line; Apply statistical inference to regression parameters.
9. Perform analysis of variance: State hypotheses for the test of several population means; Construct the AVOVA Table; Explain the significance of multiple comparisons.
10. Demonstrate the appropriate use of technology (e.g., Excel, an appropriate graphing calculator or other software (Minitab, SAS)

MATH 2415. Introduction to Linear Algebra
3 Credits (3)
Systems of equations, matrices, vector spaces and linear transformations. Applications to computer science. Prerequisite(s): Grade of C- or better in MATH 1521G or MATH 1521H.

Learning Outcomes
1. Use row reduction and echelon forms of a matrix to solve linear systems of equations.
2. Use matrix operations, inverse matrices, and matrix factorizations to solve matrix equations.
3. Study the properties of vector spaces and subspaces (e.g., the null and column spaces of a matrix); linear transformations, isomorphisms and kernels; linear independence, bases, and dimension.
4. Apply appropriate matrix manipulations to perform a change of basis.
5. Understand determinants and their properties.
6. Find eigenvalues and eigenvectors and use them to diagonalize matrices.
7. Understand inner product spaces and apply them to real-world problems.

MATH 2530G. Calculus III
3 Credits (3)
The purpose of this course, which is a continuation of Calculus II, is to study the methods of calculus in more detail. The course will cover the material in the textbook from Chapters 10-14. Vectors in the plane and 3-space, vector calculus in two-dimensions, partial differentiation, multiple integration, topics in vector calculus, and complex numbers and functions.

Prerequisite(s): Grade of C- or better in MATH 1521G or MATH 1521H.

Learning Outcomes
1. Perform the algebra operations on vectors in the plane.
2. Describe lines, planes, and surfaces in 3-space.
3. Compute the tangent and normal vectors to space curves.
4. Compute tangential and normal components of acceleration.
5. Sketch functions of several variables.
6. Compute the tangent plane to a surface.
7. Describe and use the chain rule.
8. Compute extreme values of functions of several variables.
9. Compute multiple integrals.
10. Compute surface area, mass, and moments.
11. Compute line integrals and test for independence of path.
12. State and use Green's, Stokes' and Divergence Theorem.

MATH 2992. Directed Study
1-3 Credits
May be repeated for a maximum of 6 credits. Graded S/U.

Prerequisite: consent of the instructor.

Learning Outcomes
1. Varies

MATH 300. Readings
1-3 Credits
A selection of readings and reports in the mathematical sciences, the breadth and depth of which is deemed to fit the needs of the student. Graded S/U.

Prerequisite: consent of instructor.
MATH 313. Fundamentals of Algebra and Geometry I  
3 Credits (3+1P)  
Covers algebra combined with geometry based on measurements of distance (metric geometry). Secondary mathematics education majors may take course as a math elective. MATH 313 does not substitute for other required math courses. Does not fulfill requirements for major in mathematics.  
Prerequisites: MATH 1134 and MATH 2134G.

MATH 331. Introduction to Modern Algebra  
3 Credits (3)  
Elements of abstract algebra, including groups, rings and fields.  
Prerequisite: C or better in MATH 1531 and MATH 2415.

MATH 332. Introduction to Analysis  
3 Credits (3)  
Development of the real numbers, a rigorous treatment of sequences, limits, continuity, differentiation, and integration.  
Prerequisite: C or better in MATH 1521G or MATH 1521H and MATH 1531.

MATH 377. Introduction to Numerical Methods  
3 Credits (3)  
Basic numerical methods for interpolation, approximation, locating zeros of functions, integration, and solution of linear equations. Computer-oriented methods will be emphasized.  
Prerequisites: grade of C or better in MATH 1521G or MATH 1521H and some programming experience.

MATH 391. Vector Analysis  
3 Credits (3)  
Calculus of vector valued functions, Green's and Stokes' theorems and applications.  
Prerequisite: grade of C or better in MATH 2530G.

MATH 392. Introduction to Ordinary Differential Equations  
3 Credits (3)  
Introduction to differential equations and dynamical systems with emphasis on modeling and applications. Basic analytic, qualitative and numerical methods. Equilibria and bifurcations. Linear systems with matrix methods, real and complex solutions.  
Prerequisite: C or better in MATH 1521G or MATH 1521H or B or better in MATH 1440.

MATH 400. Undergraduate Research  
1-3 Credits  
May be repeated for a maximum of 6 credits. Graded S/U.  
Prerequisite: consent of faculty member.

MATH 401. Special Topics  
1-3 Credits (1-3)  
Specific subjects to be announced in the Schedule of Classes. May be used to fulfill a course requirement for the mathematics major. Consent of instructor required.

MATH 411V. Great Theorems: The Art of Mathematics  
3 Credits (3)  
Adopts the view of mathematics as art, using original sources displaying the creation of mathematical masterpieces from antiquity to the modern era. Original sources are supplemented by cultural, biographical, and mathematical history placing mathematics in a broad human context.  
Prerequisites: Grades of B or better in MATH 1521G or MATH 1521H and any upper division MATH course, with overall GPA of 3.2 or better, or consent of instructor.

MATH 450. Introduction to Topology  
3 Credits (3)  
Topological spaces: general spaces and specific examples such as metric spaces, Hausdorff spaces and/or normed vector spaces; separation axioms; continuity, compactness, connectedness; related theorems. Crosslisted with: MATH 520.  
Prerequisite(s): MATH 332.

MATH 451. Introduction to Differential Geometry  
3 Credits (3)  
Applies calculus to curves and surfaces in three dimensional Euclidean space.  
Prerequisite(s): C- or better in each of MATH 2415 and MATH 391, or consent of instructor.

MATH 452. Foundations of Geometry  
3 Credits (3)  
Topics in projective, axiomatic Euclidean or non-Euclidean geometries. Restricted to: Main campus only.  
Prerequisite(s): C or better in MATH 331 or MATH 332.

MATH 454. Logic and Set Theory  
3 Credits (3)  
Prerequisite(s): C- or better in MATH 331 or MATH 332, or consent of instructor.

MATH 455. Elementary Number Theory  
3 Credits (3)  
Covers primes, congruences and related topics.  
Prerequisite: grade of C or better in MATH 331 or consent of instructor.

MATH 456. Abstract Algebra I: Groups and Rings  
3 Credits (3)  
Group theory, including cyclic groups, homomorphisms, cosets, quotient groups and Lagrange's theorem. Introduction to rings: ring homomorphisms, ideals, quotient rings, polynomial rings, and principal ideal domains. Crosslisted with: MATH 526.  
Prerequisite(s): MATH 331 or consent of instructor.

MATH 459. Survey of Geometry  
3 Credits (3)  
Basic concepts of Euclidean geometry, ruler and compass constructions. May include topics in non-Euclidean geometry. For non-math majors. Restricted to: Main campus only.  
Prerequisite(s): C or better in MATH 331 or MATH 332.

MATH 471. Complex Variables  
3 Credits (3)  
A first course in complex function theory, with emphasis on applications.  
Prerequisite(s): C- or better in MATH 391 or C- or better in both MATH 392 and MATH 2530G.

MATH 472. Fourier Series and Boundary Value Problems  
3 Credits (3)  
Fourier series and methods of solution of the boundary value problems of applied mathematics.  
Prerequisite(s): C- or better in MATH 392.
MATH 473. Calculus of Variations and Optimal Control
3 Credits (3)
Euler’s equations, conditions for extrema, direct methods, dynamic programming, and the Pontryagin maximal principle.
Prerequisite(s): C- or better in MATH 392.

MATH 480. Matrix Theory and Applied Linear Algebra
3 Credits (3)
An application driven course, whose topics include rectangular systems, matrix algebra, vector spaces and linear transformations, inner products, and eigenvalues and eigenvectors. Applications may include LU factorization, least squares, data compression, QR factorization, singular value decomposition, and search engines.
Prerequisite(s): C or better in any 300-level course with a MATH prefix.

MATH 481. Advanced Linear Algebra
3 Credits (3)
Rigorous treatment of vector spaces and linear transformations including canonical forms, spectral theory, inner product spaces and related topics.
Prerequisite: grade of C or better in MATH 331.

MATH 491. Introduction to Real Analysis I
3 Credits (3)
Rigorous discussion of the topics introduced in calculus. Sequences, series, limits, continuity, differentiation.
Prerequisite: grade of C or better in MATH 332 or consent of instructor.

MATH 492. Introduction to Real Analysis II
3 Credits (3)
Continuation of MATH 491. Integration, metric spaces and selected topics.
Prerequisite(s): C- or better in MATH 491 or consent of instructor.

MATH 498. Directed Reading
1-6 Credits
May be repeated for a maximum of 6 credits. Graded S/U.

MATH 499. Complex Analysis
3 Credits (3)
Rigorous treatment of complex differentiation and integration, properties of analytic functions, series and Cauchy’s integral representations.
Crosslisted with: MATH 529.
Prerequisite(s): MATH 332.

MATH 501. Introduction to Differential Geometry
3 Credits (3)
Same as MATH 451 with additional work for graduate students.

MATH 502. Foundations of Geometry
3 Credits (3)
Same as MATH 452 with additional assignments for graduate students.

MATH 505. Elementary Number Theory
3 Credits (3)
Same as MATH 455 with additional assignments for graduate students.

MATH 511. Fundamentals of Elementary Mathematics I
3 Credits (3+1P)
Topics from real numbers, geometry, measurement, and algorithms, incorporating calculator technology. Intended for K-8 teachers. As part of course students mentor MATH 1134 undergraduates. Does not fulfill degree requirements for M.S. in mathematics.

MATH 512. Fundamentals of Elementary Mathematics II
3 Credits (3+1P)
Real numbers, geometry, and statistics, incorporating calculator technology. Intended for K-8 teachers. Students serve as mentors to MATH 2134G undergraduates. Does not fulfill degree requirements for M.S. in mathematics.

MATH 513. Fundamentals of Algebra and Geometry I
3 Credits (3+1P)
Algebra and metric geometry, incorporating appropriate calculator technology. Intended for K-8 teachers. Students serve as mentors to MATH 313 undergraduates. Does not fulfill degree requirements for M.S. in mathematics.

MATH 517. Complex Variables
3 Credits (3)
Same as MATH 471 with additional work for graduate students.

MATH 518. Fourier Series and Boundary Value Problems
3 Credits (3)
Same as MATH 472 with additional work for graduate students.

MATH 519. Calculus of Variations and Optimal Control
3 Credits (3)
Same as MATH 473 with additional work for graduate students.

MATH 520. Introduction to Topology
3 Credits (3)
Same as MATH 450 with additional work for graduate students.
Crosslisted with: MATH 450.

MATH 524. Logic and Set Theory
3 Credits (3)
Same as MATH 454 with additional assignments for graduate students.
Crosslisted with: MATH 454.
Prerequisite(s): consent of instructor.

MATH 525. Advanced Linear Algebra
3 Credits (3)
Same as MATH 481 with additional work for graduate students. May be repeated up to 3 credits.

MATH 526. Abstract Algebra I: Groups and Rings
3 Credits (3)
Same as MATH 456 with additional work for graduate students.
Crosslisted with: MATH 456.
Prerequisite(s): MATH 525 or consent of instructor.

MATH 527. Introduction to Real Analysis I
3 Credits (3)
Same as MATH 491 with additional work for graduate students.

MATH 528. Introduction to Real Analysis II
3 Credits (3)
Same as MATH 492 with additional work for graduate students.

MATH 529. Complex Analysis
3 Credits (3)
Same as MATH 499 with additional work for graduate students.
Crosslisted with: MATH 499.
Prerequisite(s): MATH 528.

MATH 530. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be for unlimited credit with approval of the department.
MATH 531. Ordinary Differential Equations
3 Credits (3)
Linear algebra and linear ordinary differential equations, existence and uniqueness of solution, smooth dependence on initial conditions, flows, introduction to smooth dynamical systems. May be repeated up to 3 credits.
Prerequisite(s): MATH 527, or consent of instructor.

MATH 532. Nonlinear Dynamics
3 Credits (3)
Introduction to nonlinear dynamics and deterministic chaos. Core topics include stability and bifurcations; chaos in one dimensional maps; universality and re-normalization group. Further topics include symbolic dynamics, fractals, sensitive dependence on initial data, self-organization and complexity and cellular automata. Knowledge of differential equations and linear algebra is desired.

MATH 540. Directed Reading
1-6 Credits
May be repeated for a maximum of 6 credits. Consent of instructor required. Graded: S/U.

MATH 541. Topology I
3 Credits (3)
Connectedness and compactness of topological spaces, introduction to the quotient topology, elementary homotopy theory, the fundamental group, the Seifert-van Kampen theorem.
Prerequisite(s): MATH 525 and MATH 528, or consent of instructor.

MATH 542. Topology II
3 Credits (3)
Covering spaces and their classification, singular homology, degree theory, Brouwer’s fixed point theorem, CW-complexes and cellular homology, and other applications.
Prerequisite(s): MATH 541 or consent of instructor.

MATH 551. Mathematical Structures in Logic
3 Credits (3)
Prerequisite(s): MATH 524.

MATH 552. Universal Algebra and Model Theory
3 Credits (3)
Prerequisite(s): MATH 524.

MATH 562. History and Theories of Mathematics Education
3 Credits (3)
A study of the history of the mathematics taught in American schools, including an examination of authentic original textbooks and the changes in their content and the approach to the subject over time, together with writings of people who have influenced the development and changes of mathematics education. Theories of learning mathematics, and current issues in mathematics education.
Prerequisite(s): Restricted to graduate students.

MATH 563. Algebra with Connections
3 Credits (3)
Connections between Algebra and other K-12 curriculum strands, especially Geometry and Probability / Data Analysis. Apply algebraic modeling and reasoning to a variety of mathematical problem solving situations. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.
Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 564. From Number to Algebra
3 Credits (3)
The progression from Number to Algebra in the K-12 curriculum as a concrete-to-abstract progression. Key concepts considered across the grade levels include the different uses of variables, equivalence in different contexts, patterns, and ratios. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.
Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 566. Data Analysis with Applications
3 Credits (3)
Statistical concepts and terminology in professional uses of data by teachers, such as standardized test score reports and educational research; visual displays of data; measures of variation and central tendency; consideration of how K-12 topics in Data Analysis are developed from one grade level to the next. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.
Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 567. From Measurement to Geometry
3 Credits (3)
The progression from Measurement to Geometry in the K-12 curriculum as a concrete-to-abstract progression. Important concepts such as angle, length, and area progress from concrete, measurable situations to more abstract problems which require reasoning and proof. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.
Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 568. Using Number Throughout the Curriculum
3 Credits (3)
Understand number concepts more deeply by seeing many examples of those concepts applied in other content strands. Develop mathematical knowledge and understanding to build a repertoire of ways for students to practice and review basic number skills and concepts as part of later, more advanced courses. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.
Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 569. Geometry with Connections
3 Credits (3)
Connections between Geometry and other K-12 curriculum strands, especially Algebra and Probability / Data Analysis. Address key attributes of geometric concepts by considering their connections within and across grade levels. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.
Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 570. Partial Differential Equations I
3 Credits (3)
The basic equations of mathematical physics. Laplace, Heat and Wave Equations. The method of characteristics, introduction to conservation laws, special solutions.
Prerequisite(s): MATH 518 and MATH 528 or consent of instructor.
MATH 572. Partial Differential Equations II
3 Credits (3)
Sobolev spaces theory: basic definitions and properties, embedding theorems, weak solutions of boundary value problems and variational methods for partial differential equations.
Prerequisite(s): MATH 593 or consent of instructor.

MATH 581. Abstract Algebra II: Fields, Rings and Modules
3 Credits (3)
Topics covered include field extensions; algebraic closure; polynomials rings; irreducibility criteria; Noetherian rings; algebraic sets; Nullstellensatz; modules; applications to linear algebra.
Prerequisite(s): MATH 526 or consent of instructor.

MATH 582. Module Theory and Homological Algebra
3 Credits (3)
Introductory concepts of homological algebra, including projective, injective and flat modules; projective and injective resolutions; exactness of functors; homology of chain complexes; derived functors.
Prerequisite(s): MATH 581 or consent of instructor.

MATH 583. Introduction to Commutative Algebra and Algebraic Geometry
3 Credits (3)
Introduction to the basic notions and techniques of modern algebraic geometry, including the necessary commutative algebra foundation. Topics likely to include algebraic and projective varieties, Nullstellensatz, morphisms, rational and regular functions, local properties. Other topics may include Noether normalization, dimension theory, singularities, sheaves, schemes, Grobner bases.
Prerequisite(s): MATH 581 or consent of instructor.

MATH 593. Measure and Integration
3 Credits (3)
Measure spaces, measurable functions, extension and decomposition theorems for measures, integration on measure spaces, absolute continuity, iterated integrals.
Prerequisite: MATH 528 or consent of instructor.

MATH 594. Real Analysis
3 Credits (3)
Differentiation, Lp spaces, Banach spaces, measure and topology, other selected topics.
Prerequisite: MATH 593.

MATH 595. Introduction to Functional Analysis
3 Credits (3)
Banach spaces. The three basic principles: uniform boundedness principle, closed graph/open mapping theorems, Hahn-Banach theorem.
Prerequisite(s): MATH 594, or consent of instructor.

MATH 599. Master's Thesis
1-15 Credits
Thesis.

MATH 600. Doctoral Research
1-15 Credits
Research.

MATH 698. Selected Topics
1-15 Credits
Selected topics.

MATH 700. Doctoral Dissertation
1-15 Credits
Dissertation.

MGMT-MANAGEMENT

MGMT 2110. Principles of Management
3 Credits (3)
An introduction to the basic theory of management including the functions of planning, organizing, staffing, leading, and controlling; while considering management’s ethical and social responsibilities.

Learning Outcomes
1. Explain the major functions of management including planning, organizing, communications, controlling, motivating, leading, and staffing.
2. Recognize major developments in the history of management thought.
3. Describe the basic managerial processes including decision-making and other key skills necessary for managers to perform their roles.
4. Identify an organization’s stakeholders and the importance of social and ethical responsibility of managers.
5. Explain the formulation and implementation of strategic planning, including the relationship between goals, plans, vision statements, and mission statements.
6. Describe the strategies managers use to help organizations adapt to changing internal and external environments.
7. Explain organizational change, forces for change, sources of resistance to change, and the techniques managers can use to implement and facilitate change.

MGMT 309. Human Behavior in Organizations
3 Credits (3)
Interpersonal and organizational behavior; motivation, communication, leadership, group behavior, diversity management, legal and ethical issues, and politics in organizations. Credit may not be earned for both MGMT 309 and MGMT 315V.

MGMT 310V. Entrepreneurial Mindset
3 Credits (3)
This course provides the opportunity to learn to think like an entrepreneur in the broader context of social entrepreneurship, intrapreneurship, creative problem solving, opportunity recognition, and innovation.

MGMT 322. Human Resources Management
3 Credits (3)
Survey course in human resources management. Includes recruitment, selection, equal employment opportunity, performance appraisal, training, compensation, safety, and union-management relations.

MGMT 333. Training and Development
3 Credits (3)
Training and development of human resources, including training needs assessment, training approaches and techniques, and evaluation of training effectiveness.

MGMT 335V. Business and Government
3 Credits (3)
Crosslisted with: ECON 335G

MGMT 344. Production and Operations Management
3 Credits (3)
Management of physical and human resources; management information systems in operations; applications in various organizations.
Prerequisite: MATH 1350G or A ST 311; and BCIS 338 or BCIS 350.
MGMT 347. Management Functions and Processes
3 Credits (3)
Planning, organizing, directing, and controlling operating units in an organization. Applications to a variety of types of organizations.

MGMT 351. Supply Chain Management
3 Credits (3)
Acquisition and control and delivery of materials, parts, equipment, and services for end use in the organization. Applications to service and manufacturing industries, nonprofit, and governmental institutions.

MGMT 361. Small Business Management
3 Credits (3)
Principles and practice of managing a small enterprise with emphasis on growth and performance.

MGMT 375V. Global Environmental Assessment and Management
3 Credits (3)
Examines the principles of environmental assessment and management. Topics include global environmental concerns, industrial environmental management, life cycle assessment, system analysis, process improvement, and sustainable development, among others.

MGMT 388V. Leadership and Ethics
3 Credits (3)
Exploration of the multifaceted nature of leadership and principal-based ethics in modern society through readings and seminar discussion. May be repeated up to 3 credits.

MGMT 391. Management Internship and Cooperative Education I
1-3 Credits
Application of management skills to the work environment. Open only to students majoring or minoring in management. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not by the work experience. May be repeated for a maximum of 3 credits. Restricted to majors and minors.

Prerequisites: MGMT 309 and consent of instructor.

MGMT 448. Small Business Consulting
3 Credits (3)
Study analysis and presentation of recommendations for solving significant problems confronting small businesses.

Prerequisite(s): Senior standing or consent of instructor.

MGMT 449. Strategic Management
3 Credits (3)
Integrative approach to envisioning the future and shaping strategies for business success.

Prerequisite(s): BCIS 338 or BCIS 350; BLAW 316; BFIN 341; MGMT 309; MKTG 303; and one of the following: MGMT 344 or MGMT 470 or BCIS 485.

MGMT 451. Selection, Placement, and Performance Evaluation
3 Credits (3)
Staffing processes for organizations and the evaluation of employee performance. Use of selection methods and measurement of work behavior.

MGMT 453. Leadership and Motivation
3 Credits (3)
Theories of leadership and motivation. Motivational programs for complex organizations. Relationships between organizational power, authority, and management styles. Crosslisted with: IE 453

MGMT 454. Work Teams in Organizations
3 Credits (3)
Theories of small groups and their application to the work situation. Why and how groups form, grow, communicate, and maintain themselves.

Prerequisites: senior or above standing.

MGMT 458. Comparative International Management
3 Credits (3)
Cultural influences on management are examined in a global business environment with a particular emphasis on human behavior in multinational organizations and the management of human resources. Same as IB 458.

MGMT 460. Compensation Management
3 Credits (3)
An overview of wage and salary administration, including job evaluation, wage and salary surveys, program administration, legal aspects of pay systems, and benefits administration.

Prerequisite(s): MGMT 332 or consent of instructor.

MGMT 461. Seminar in Entrepreneurship
3 Credits (3)
For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Crosslisted with: MKTG 461.

Prerequisite(s): Senior standing or consent of instructor.

MGMT 465. Contemporary Issues in Human Resources Management
3 Credits (3)
Integrative course in human resources management, emphasizing the application of advanced concepts to complex personnel cases.

Prerequisite: MGMT 332.

MGMT 470. Project Management in Organizations
3 Credits (3)
Roles, responsibilities, and techniques of project managers in managing projects effectively. Preparation for professional certification.

MGMT 490. Selected Topics
1-18 Credits (1-18)
Seminars in selected current topics in the various areas of management and administration. Prerequisites vary according to the seminar being offered.

MGMT 491. Management Internship and Cooperative Education II
1-3 Credits
Covers the application of management skills to the work environment. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not by the work experience. May be repeated for a maximum of 3 credits. Restricted to majors and minors.

Prerequisite: MGMT 309 and consent of instructor.

MGMT 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.

Prerequisites: junior or above standing and consent of instructor.

MGMT 502. Operations Management
3 Credits (3)
Systems and specialized models applied to the management of production facilities and service operations, including physical and human resources.

Prerequisite(s): Graduate students only.
MGMT 503. Organizational Behavior and Management Processes
3 Credits (3)
Covers the theory and practice related to the successful management of human resources in organizations operating within a dynamic global environment. Course goals include developing alternative frameworks for analyzing issues related to human behavior, management science, and organizational structure and theory.
Prerequisite: graduate students only.

MGMT 512. Quantitative Analysis for Business Decisions
3 Credits (3)
Identification, collection, and analysis of an organization's data both internal and external, and use of the resultant information in managerial decision making.
Prerequisite: graduate students only.

MGMT 527. Negotiation and Business Dispute Resolution
3 Credits (3)
Same as BLAW 527.

MGMT 548. Small Business Consulting
3 Credits (3)
Study, analysis, and presentation of recommendations for solving significant problems confronting small businesses. Same as MGMT 448 with differentiated assignments for graduate students.
Prerequisite(s): Graduate standing.

MGMT 590. Strategic Management
3 Credits (3)
Covers the integration of functional, human, technological, and environmental aspects of business within the framework of management policy and strategy formulation. Formulate, implement, evaluate and control the various functions of the organization from a systems perspective. Understand the external environment and its impact on the organization. Restricted to majors.
Prerequisite: M.B.A. student in his or her final semester.

MGMT 591. Seminar in Entrepreneurship
3 Credits (3)
For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Same as MGT 461 with differentiated assignments for graduate students. Crosslisted with: MKTG 591.
Prerequisite(s): Graduate standing.

MGMT 598. Special Research Programs
1-3 Credits
Individual investigations either analytical or experimental. A maximum of 6 credits may be earned.
Prerequisite: consent of instructor.

MGMT 600. Doctoral Research
1-15 Credits
This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination. Restricted to management majors.

MGMT 601. Research in Management
1 Credit (1)
Ph.D. course provides opportunities for significant interaction between Management faculty and Management Ph.D. students. The course also provides opportunities for development of professional scholarly standards, ethics, and critiques, as well as insight into current research areas and topics supported by the Management Department and other relevant disciplinary areas. May be repeated for a maximum of 6 credits. Restricted to Ph.D. students. Graded S/U.

MGMT 640. Instructional Development for Teaching Business
3 Credits (3)
Pedagogical issues and techniques in collegiate business education. Includes course and curriculum development, outcomes assessment, class management, and teaching techniques. Practical issues faced in college instruction. Restricted to doctoral students.

MGMT 645. Seminar in Human Resources Management
3 Credits (3)
Seminar will address current issues in human resources management. Focus on research related to the selection, development, and effective use of human resources. Restricted to doctoral students.

MGMT 650. Seminar in Organizational Behavior
3 Credits (3)
Seminar will include specific organizational behavior topics; motivation, leadership, group and inter-group relations, and attitude theory. Focus on current research and theory. Restricted to doctoral students.

MGMT 655. Seminar in Organizational Systems and Theory
3 Credits (3)
Analysis of organizations from a macro perspective. Topics include organizational theory, organizational design, organizational environment, and sociotechnical systems. Restricted to doctoral students.

MGMT 660. Research Design and Methodology
3 Credits (3)
Topics will include philosophy of science, theory building, and research methods applicable to the study of organizational behavior. Restricted to doctoral students.

MGMT 661. Qualitative Research Methods
3 Credits (3)
In-depth coverage of selected topics in research methodology, including theory and logic of scientific investigation, grounded theory, action research, and ethnomethodology. Restricted to doctoral students.

MGMT 670. Seminar in Operations Management
3 Credits (3)
Seminar examines the major problem areas, research findings, and research methodologies of operations management. Focus on the critical evaluation of current theory and methodology.
Prerequisite(s): Restricted to Doctoral students.

MGMT 675. Seminar in Strategic Management
3 Credits (3)
Survey of current and classical readings in strategy. Introduces the doctoral level student to strategic issues, strategic topics for research, and publication venues. Restricted to doctoral students.

MGMT 685. Story Consulting to Organizations
3 Credits (3)
Consulting project. Students will conduct story assessment and (propose or enact) intervention with a local consenting organization. Restricted to doctoral students.

MGMT 690. Special Topics
3 Credits (3)
Seminars in selected current topics in the various areas of management. May be repeated for unlimited credit. Restricted to doctoral students.
Prerequisite(s): Vary according to seminar being offered.

MGMT 698. Special Topics
1-3 Credits
Prerequisite: consent of instructor.
MGMT 700. Doctoral Dissertation
15 Credits
Prerequisite: advancement to candidacy.

**MKTG-MARKETING**

**MKTG 1210. Advertising**
3 Credits (3)
A survey of currently available advertising media. A psychological approach to consumer persuasion; applied techniques in media selection, layout mechanics, production methods, and campaign structures.
Prerequisite: MKTG 2110.

Learning Outcomes
1. Define advertising and the relevant application of psychology in delivering the message. Explain the importance of various advertising media in the marketing mix. Identify and explain the social, ethical and legal issues advertisers must consider. Describe the significance of the marketing function in business. Explain the importance of advertising and other marketing communication tools. Demonstrate application of the planning process as it applies to marketing and advertising. Describe the factors that are weighted when considering the use of radio and television in the creative advertising mix.
Describe the relationship between market segment, consumer behavior and selection of advertising campaign types. List the alternative means of reaching a target market and the technical challenges of each.

**MKTG 1220. Small Business Marketing**
3 Credits (3)
An overview of public relations principles, practices and purposes as applied to small business. Topics include basics of news release writing, media awareness, development and maintenance of a positive public image, branding, ethical marketing, and the relationships of public relations with advertising and marketing. Methods and practices used in small business are explored.
Prerequisite: MKTG 2110.

Learning Outcomes
1. Explain the importance of creating and sustaining a positive public awareness and image. Identify public relations practices as they relate to the management and marketing processes. Define branding and discuss its importance for small business. Describe the value of business event management and promotion for small business. Discuss how media relations, public relations, advertising and marketing efforts are interrelated and the importance of each.

**MKTG 180. Level 1, PGA’s PGM Education Program (Part 1)**
3 Credits (3)
Level 1 Part 1 of the PGA PGM Education Program. Introduction to the Policies and Procedures of the PGA Golf Mgt. Program and the PGA of America. Students will complete the PGA Qualifying Level, Facility Management 1A (Tournament Ops A, Rules of Golf B, and Career Enhancement B), and the corresponding Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

**MKTG 181. Level 1, PGA’s PGM Education Program (Part 2)**
3 Credits (3)
Level 1 Part 2 of the PGA PGM Education Program. This class will focus on Teaching and Coaching 1, the corresponding PGA Work Experience Activities, and PGA Teaching Seminars. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

Learning Outcomes
1. Know how students learn and process golf knowledge and skills, and identify the implications for teaching. Know how to define and distinguish between learning and performance. Understand how juniors learn golf knowledge and skills, and identify implications for teaching. Conduct a physical evaluation of a junior golfer and create developmentally appropriate exercise and training programs. Establish student/teacher relationships that promote greater student learning and enjoyment. Develop a communication style that fits the student and increases instructional effectiveness. Analyze student’s instructional needs and set clear, purposeful learning and practice goals. Know the format for an effective golf lesson. Deliver effective explanations and demonstrations during a golf lesson. Engage in self-assessment of teaching skills and competencies. Recognize the appropriate clubhead path and clubface position information to improve a golfer’s performance. Conduct appropriate assessments to determine the short game skill level of the golfer. Gain understanding of the short game elements to help lower scores and improve the player. Define club performance terms and specifications, including lie angle and clubface angle or position, and describe their effect on ball flight and player performance. Define what information is required to properly assess a player’s golf equipment. Define club performance terms and specifications, including lie angle and clubface angle or position, and describe their effect on ball flight and player performance. Observe a player’s swinging motion, ball flight, and equipment to evaluate the effectiveness of their equipment.
MKTG 2220. Digital Marketing  
3 Credits (3)  
This course focuses on planning to create and market a website. Internal marketing topics such as registering with search engines, increasing traffic, segmenting and targeting markets, establishing an online presence, developing a marketing plan and reshaping business for the Web market are covered.  
Prerequisite: MKTG 2110.  
**Learning Outcomes**  
1. Describe how search engines work. (Use knowledge to make recommendations to a website on how it can improve its organic search rankings - perform search engine optimization). Describe the various methods of online display advertising. Determine the appropriate key performance indicators (KPIs) for any type of website. Describe and implement best practices in marketing to a database of current and potential customers via email. Utilize knowledge of social media tactics to design an effective social media campaign. Implement online reputation management tactics to improve the online reputation of a brand. Develop and present a digital marketing plan for a small, local business.

MKTG 280. Level 1, PGA's PGM Education Program (Part 3)  
3 Credits (3)  
Level 1 Part 3 of the PGA PGM Education Program. This class will focus on Facility Management 1B (Business Planning A, Customer Relations A, Golf Car A, Merchandising A, Turfgrass A), Level 1 Checkpoint Exams, and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

MKTG 281. Level 2, PGA's PGM Education Program (Part 1)  
3 Credits (3)  
Level 2 Part 1 of the PGA PGM Education Program. This class will focus on Teaching and Coaching 2, Teaching and Coaching Seminars, and the corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

**Learning Outcomes**  
1. Explain how students learn golf knowledge and skills, and identify the implications for teaching Explain how students process information when learning golf skills Identify and explain the principles of effective practice Explain how juniors learn golf knowledge and skills, and identify the implications for teaching Structure an effective golf lesson Analyze student's instructional needs and set clear, purposeful learning and practice goals Deliver effective explanations and demonstrations during a golf lesson Engage in self-assessment of teaching skills and competencies Recognize and apply the appropriate clubhead path and clubface position information to improve a golfer's performance Conduct appropriate assessments to determine the skill level of the golfer Demonstrate basic knowledge of anatomy and physiology, and conduct a physical observation to identify movement capabilities and limitations that may affect a golfer's performance Define club performance terms and specifications, and describe their effect on ball flight and player performance.

MKTG 303. Principles of Marketing  
3 Credits (3)  
Process, functions, and principles in the current marketing system.  
**Learning Outcomes**  
1. Understand primary and changing perspectives on marketing and strategic management. Understand the fundamental principles and theories of marketing. Develop the capacity to obtain and process relevant information and analytical skills. Evaluate the impact of interactive media on marketing management. Apply relevant marketing concepts and analytical tools, identify viable alternatives, make informed choices, and recommend marketing implementation plans. Develop skills in organizing more effective strategic marketing and in implementing the market planning process. Develop, evaluate, and implement marketing management strategies in complex environments through recent, popular case study analyses. Formulate marketing management strategies on critical issues, problems, and business opportunities. Broaden perspectives of ethics and social responsibility, keep abreast of global developments, and adapt to changing environments.

MKTG 305. Marketing and Food Agricultural Products  
3 Credits (3)  
This course provides a review of marketing principles and techniques used throughout the food and fiber supply chain. The course introduces a broad variety of marketing topics including marketing strategy, consumer behavior, market segmentation, market research, competitive analysis, and the marketing mix. The course serves as a foundation for advanced courses in agricultural marketing. May be repeated up to 3 credits. Crosslisted with: AEED 305.  
Prerequisite(s): ECON 1110G or ECON 2120G.  
**Learning Outcomes**  
1. Articulate how agricultural commodities move through the food and fiber supply chain. Understand the importance of strategic marketing and how organizations within the food and fiber supply chain identify consumers and their preferences Understand key marketing concepts used by agribusiness marketers, including SWOT analysis, the marketing mix, advertising and public relations Know the basic outline and components of a marketing plan.

MKTG 310. Marketing Research  
3 Credits (3)  
Design, collection analysis, and presentation of research data.  
Prerequisite(s): MATH 1350G and MKTG 303 or consent of instructor.  
**Learning Outcomes**  
1. Translate a marketing problem into a feasible research question. Recognize marketing research as a process that involves a sequence of activities, each compatible with the preceding activities. Compare and contrast alternative research designs. Identify the sources of marketing information and the various means for gathering such information. Recognize the biases and limitations of marketing data and basic data analysis. Interpret univariate and basic bivariate data analysis techniques (i.e., should be able to decide when a technique is appropriate and recognize the managerial implications of analytical results). Design and execute a basic survey research project. Assess ethical issues associated with various research approaches.
MKTG 311V. Consumer Behavior  
3 Credits (3)  
The different aspects of consumer behavior and the variables affecting consumer decisions. Analysis of current concepts and models.  
**Learning Outcomes**  
1. Know the consumer behavior concepts by integrating and adapting theories developed in disciplines such as psychology, sociology, anthropology, and economics. Use specific tools to tackle and analyze customer issues. Develop the ability to apply consumer behavior concepts from the perspective of marketing managers and public policy makers. Increase the awareness of and enhance the ability to make ethical decisions in consumer-related issues.

MKTG 311VH. Consumer Behavior Honors  
3 Credits (3)  
The different aspects of consumer behavior and the variables affecting consumer decisions. Analysis of current concepts and models. Same as MKTG 311V with differentiated assignments for honors students.  
**Prerequisite(s):** 3.5 GPA or Higher.

MKTG 312. Personal Selling  
3 Credits (3)  
Implementation of the promotion process through interpersonal communications between salesperson and prospects. Serving customers by sales representatives.  
**Learning Outcomes**  
1. Demonstrate how personal selling can strategically enhance interpersonal communication skills, career management, personal productivity. Identify key issues and trends such as opportunities or threats, for evolving emerging sales approaches platforms.

MKTG 313. Retail Management  
3 Credits (3)  
Investigates retail business operations and focuses on the strategic profit model, store location, layout, display, merchandising, operations, and personnel.  
**Learning Outcomes**  
1. Analyze the role of retailing in society and basic retailing principles, ideas, and concepts as they relate to an understanding of our market-driven system Compare and contrast segmentation and target market selection relative to a specific population product/service for different markets and retailing opportunities. Apply the concepts of the marketing mix to the formulation and evaluation of retailing strategies relative to particular target markets, environments (economic, technological and competitive), and desired positions in market places (both local and global). Areas to be addressed include communication strategy, branding, packaging, pricing, product/service design, methods of delivery and the product life cycle. Relate the concepts of marketing and retailing research, consumer behavior and strategy and their interrelationships. Compare and contrast analysis techniques and judgment that are useful to managers in acting with integrity to make decisions and taking action.

MKTG 314. Advertising Strategy  
3 Credits (3)  
Utilization of advertising as a business administration function; communication with consumers as a means of attaining marketing goals.  
**Learning Outcomes**  
1. Analyze advertising from a consumer perspective. Compare advertising strategy theories and concepts. Evaluate advertising critically and creatively.

MKTG 317. International Marketing  
3 Credits (3)  
Focuses on decisions relating to entering markets, market segmentation, marketing strategies, and tactics in the international arena. Same as I B 317.  
**Learning Outcomes**  
1. Develop understanding about what is involved in making international marketing decisions, including product, price, promotion, and place decisions to create a marketing mix. Acquire an overview on the contemporary issues in global marketing and the unique challenges faced by marketing managers in the dynamic global environment. Develop insights into how differences in global economic, cultural, social, political, and legal environments can affect marketing decisions. Develop strategic thinking in the context of complex problems and challenges faced by the contemporary global executives and managers. Develop ability to integrate the important global societal dimensions of diversity, environmental concerns, ethics, and technological change into their thinking. Develop knowledge and skills to analyze cross-cultural variables and their impact on international marketing. Discover sources of information for researching and evaluating international markets. Communicate effectively about marketing issues in group discussions, oral presentations and written reports. Work effectively as a team member in analyzing marketing issues. 1 Develop leadership skills necessary to deal with the uncertainty and changes faced by today’s global marketers.

MKTG 324. Product/Service Development  
3 Credits (3)  
Covers product innovation, development, commercialization and resource recovery, price determination and administration strategies, and complementing planning processes.  
**Learning Outcomes**  
1. Understand the product/service development process. Identify market opportunities for new products. Use structured methods to evaluate and test product concepts. Apply tools learned in class to develop new products/services. Plan the launch of a product and evaluate its impact on the market. Efficiently work with and communicate ideas to team members.

MKTG 354. Sports Marketing  
3 Credits (3)  
The application of marketing concepts to the sports industry. Topics include fans/customers, products, and promotions across a range of sports.  
**Learning Outcomes**  
1. Discuss the domain of sports marketing. Apply basic marketing tools (e.g., research, segmentation) to sports marketing contexts. Recognize, evaluate, and accommodate the perspectives of participants and spectators as sports consumers. Identify appropriate marketing mix options for sports products. Appraise recent sports marketing trends. Plan a career in sports marketing.
MKTG 357. Internet and Social Media Marketing  
3 Credits (3)  
Focuses on the consumer psychology and marketing strategies at work in advertising and selling brands via the Internet and social media networks.  
**Learning Outcomes**  
1. Apply the concepts of the marketing mix to the formulation/evaluation of marketing strategies relative to Social Media policies that combine business objectives with appropriate use of Social Media channels and content. Compare and contrast the history of Social Media and recognize the various platforms of Social Media. Select/defend segmentation and target market selection relative to a specific population product/service that engages target audiences with a marketing message. Analyze business objectives and connect to appropriate Social Media tactics. Evaluate Social Media marketing content to shape the way we connect to and build relationships with users, consumers and businesses. Relate the concepts of marketing research to establish metrics for measuring Social Media marketing success.

MKTG 380. Level 2, PGA's PGM Education Program (Part 2)  
3 Credits (3)  
Level 2 Part 2 of the PGA PGM Education Program. This class will focus on Facility Management 2 and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management majors.  
**Learning Outcomes**  
1. Define the business at the facility level in terms of vision, core values, facility characteristics and mission. Utilize the four Interaction Strategies in a variety of routine and challenging customer situations. Identify core business areas that support a customer-focused environment. Know the characteristics of a merchandising operation that align with a facility’s business plan. Understand how to define, assess, and develop tournament business at a facility.

MKTG 381. Level 3, PGA's PGM Education Program (Part 1)  
3 Credits (3)  
Level 3 Part 1 of the PGA's PGM Education Program. This class will focus on Teaching and Coaching 3, Teaching and Coaching Seminars, and the corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management  
**Learning Outcomes**  
1. Explain how various types of feedback function to influence learning  
   Define the major variables that influence learning and explain how they operate with implications for practice, learning, and teaching. Provide effective instructional feedback after students’ practice and performance. Explain how the form, precision, timing, frequency, and regulation of augmented feedback influence learning with implications for teaching and practice conditions. Explain how the key practice factors influence learning with implication for designing practice conditions. Establish relationships that promote greater student learning and enjoyment. Plan long-term developmental programs for beginning and intermediate players. Communicate effectively with students. Develop a communication style that increases instructional effectiveness.  
1. Effectively determine and assign the appropriate drill or drill with an aid to improve the swing shape of the golfer.  
1. Use relevant technology to promote student learning.  
1. Demonstrate basic knowledge of current swing methodologies of noted instructors.  
1. Physical development of junior golfers.  
1. Assess the physical capabilities of adult golfer, describe implications for performance, and provide potential physical adjustments.  
1. Describe how to use bench skills, tools, and technologies for measuring and altering club performance.  
1. Perform analyses and make appropriate alterations to change ball flight, players performance, and teacher effectiveness.

MKTG 400. Marketing Internship/Field Experience  
3 Credits (3)  
Internship of field experience in application of marketing principles. The student must accept an internship before being allowed to enroll in the course. Consent of instructor required. Restricted to MKTG majors.  

MKTG 405. Negotiations in Marketing  
3 Credits (3)  
Negotiations in Marketing is designed to introduce and explore the major concepts and theories surrounding bargaining and negotiation strategies in marketing. Additionally, the course gives practical hands-on experience in negotiating, through a range of applied negotiations exercises and activities.  
**Prerequisite(s):** MKTG 303.
MKTG 449. Promotion Management
3 Credits (3)
Covers concepts and problems in the use of advertising, internet marketing, social media marketing, personal selling, publicity, and other forms of promotion; planning, coordination, control, and evaluation of effectiveness.

Learning Outcomes
1. Analyze the role of advertising and promotion in society and basic marketing principles, ideas, and concepts as they relate to an understanding of our market-driven system Compare and contrast segmentation and target market selection relative to a specific population product/service for different markets and promotional opportunities Apply the concepts of the marketing mix to the formulation and evaluation of promotional strategies relative to particular target markets, environments (economic, technological and competitive), and desired positions in market places (both local and global) Areas to be addressed include communication strategy, branding, pricing, product/service design, and e-commerce. Relate the concepts of marketing and advertising research, consumer behavior and strategy and their interrelationships. Compare and contrast analysis techniques and judgment that are useful to managers in acting with integrity to make decisions and taking action in the promotional environment

MKTG 451. Food and Agribusiness Market Assessment
3 Credits (3)
This course is an application course in which self-managed teams develop and present marketing plans for agribusiness firms. Emphasis on integrating the marketing mix, particularly promotional elements. May be repeated up to 3 credits. Crosslisted with: AEEC 451.
Prerequisite(s): AEEC 305 or MKTG 305 or consent of instructor.

Learning Outcomes
1. Identify, organize, and conduct market research specific to the project. Develop an understanding of primary and secondary research collection and analysis. Exhibit enhanced relationship management, communication skills, and team building. Develop written communication with final deliverable for implementation into the business world

MKTG 453. Sales Management
3 Credits (3)
The nature of the sales management function in industry. Focuses on intra and interdepartmental sales management activities.

Prerequisite: MKTG 312.

Learning Outcomes
1. Examined the linkage between personal selling, as a basket of activities, and the management of those marketing personnel who do selling (i.e., salespeople). Examined the role of the sales force in the achievement of a firm's marketing objectives. Undertaken numerous case-based analyses of typical sales management issues, including the hiring, firing, training, motivation, compensation, deployment, and evaluation of the firm's sales personnel. Developed decision-making skills and analytic capabilities in the development and management of both sales programs and salespeople.

MKTG 461. Seminar in Entrepreneurship
3 Credits (3)
For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Crosslisted with: MGMT 461.
Prerequisite(s): Senior standing or consent of instructor.

MKTG 462. Advanced Sales
3 Credits (3)
Advanced instruction and skill development in interpersonal communication skills to broaden understanding of the professional sales role (especially in team selling situation), career management, personal productivity, negotiation, and coordination with other functional areas.

Prerequisite: MKTG 312.

Learning Outcomes
1. Students will learn "how" to sell (i.e., the behaviors and planning associated with selling today). Analyze the concept of what/how is perhaps equally important but not nearly as obvious, how and why buyers "buy". The course focus will be particularly on so-called "business-to-business" (B2B) sales jobs, as that is where many of the most interesting – and lucrative – sales positions reside.

MKTG 470. Level 3, PGA's PGM Education Program (Part 2)
3 Credits (3)
Level 3 Part 2 of the PGA's PGM Education Program. This class will focus on Facility Management 3, the Business Simulation Seminars, and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management Majors.

Learning Outcomes
1. Assess the current state of the business by conducting a SWOT Analysis. Describe the golf industry job market and the knowledge and skills required to succeed. Identify areas where food services and golf operations should coordinate efforts. Describe golf car needs in order to acquire a fleet that supports the facility's mission, customers, and physical characteristics. Describe the organizational structure, key departments, reporting relationships, and job descriptions of a facility. Utilize industry-proven pricing strategies to meet business objectives. Describe the Performance System for supervising and delegating. Describe practices that improve the golf course and protect the environment.

MKTG 481. PGA Golf Management Final Experience
1 Credit (1)
The following are requirements for successful completion of this senior level PGA Golf Management capstone course: 16 months of internship, completion of the Qualifying Level, Level 1, Level 2, and Level 3 of the PGA’s PGM Education Program and successful completion of the PGA’s Playing Ability Test. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management majors.

Learning Outcomes
1. Describe the golf industry job market and the knowledge and skills required to succeed. Access PGA employment resources and participate in professional growth and development.

MKTG 489. Strategy and Policy
3 Credits (3)
Techniques and analysis of marketing strategy and policy planning and formulation. Senior standing or consent of instructor.

Prerequisite(s): MKTG 310.

Learning Outcomes
1. Relate marketing strategy to the environmental constraints and opportunities with which managers must deal. Compare marketing strategy theories and concepts Evaluate appropriate strategic marketing decisions in various situations.
MKTG 490. Selected Topics
1-18 Credits (1-18)
Covers materials and subjects not offered in regular Marketing courses. Students can take 18 credit hours of MKTG 490 if each class is a different subtitle. A maximum of 18 credit hours can be earned through MKTG 490.

MKTG 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.
Prerequisites: junior or above standing and consent of instructor.

MKTG 503. Marketing Management
3 Credits (3)
Analysis of marketing problems and the integration of organizational resources as well as behavioral and quantitative techniques into the development and implementation of solutions.

Learning Outcomes
1. Identify the fundamental principles and theories of marketing. Outline primary and changing perspectives on marketing and strategic management. Apply relevant marketing concepts and analytical tools. Develop capacity to obtain and process relevant information with enhanced analytical skills. Identify viable alternative to make informed choices and recommend marketing implementation plans. Evaluate the impact of interactive media on marketing management. Develop skills in organizing more effective strategic marketing and implementing the market planning process. Practice implementing marketing management strategies in complex environments through case study analyses. Formulate marketing management strategies on critical issues, problems, and business opportunities. Synthesize perspectives of ethics and social responsibility in adapting to changing environments.

MKTG 591. Seminar in Entrepreneurship
3 Credits (3)
For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Same as MKTG 461 with differentiated assignments for graduate students. Crosslisted with: MGMT 591.
Prerequisite(s): Graduate standing.

MKTG 601. Marketing Management
3 Credits (3)
Covers the conceptual foundations of contemporary marketing management research, concepts, and literature. Fundamental to the understanding of contemporary marketing and the breadth of the field of marketing study.

Learning Outcomes
1. Identify the contemporary principles and theories of marketing strategy research. Outline primary guidelines and trendy directions of marketing strategic research. Improve theoretical foundation for research development in marketing strategy. Develop capacity of analytical and quantitative skills required for empirics. Apply relevant marketing theories, concepts and analytical methodology in research development. Formulate research ideas pertinent to marketing strategies on critical issues, problems, and phenomena. Practice complex research design, theoretical development and empirical operationalization. Synthesize perspectives of ethics and social responsibility in scholarly research.

MKTG 610. Marketing and the Scientific Method
3 Credits (3)
Issues related to the evolution of research philosophies and methodologies. Critical to the development of appreciation for the value of research and experimentation.

MKTG 620. Research- Theory Interface
3 Credits (3)
Theoretical and methodological issues involved in translating a theory into a research study. Prepares Ph.D. students to undertake dissertation research. Consent of instructor required.

MKTG 625. Consumer Behavior
3 Credits (3)
Extensive reading of seminal and contemporary articles on consumer behavior and developing original research to explore cross-disciplinary issues relevant to the study of marketing.

MKTG 640. Measurement and Structural Equation Modeling
3 Credits (3)
Explores theories of measurement that underlie all quantitative analysis, including the use of structural equation models. Contrasts classical test theory with item response theory and generalizability theory. Covers PRELIS and LISREL, and critiquing structural equation models by other researchers. May be repeated up to 3 credits.
Prerequisite(s): A ST 505.

MKTG 670. Marketing Theory
3 Credits (3)
The evolution, development, construction, and evaluation of the major theoretical perspectives of marketing. Fundamental to the understanding of contemporary marketing and preparation for investigations into the nature and role of theory in marketing.

MKTG 690. Special Topics in Marketing
3 Credits (3)
A seminar on special topics in marketing. The topic of the course will vary according to the needs of the students in the program and the instructor. Ph.D. students may repeat this course up to three times for a maximum total of 9 credits.

MKTG 698. Selected Topics
1-9 Credits (1-9)
Materials and subjects not offered in regular marketing courses. May be repeated for a maximum of 18 credits under different subtitles.

MKTG 700. Doctoral Dissertation
15 Credits
Prerequisite: advancement to candidacy.

MOLB-MOLECULAR BIOLOGY

MOLB 448. Special Research Problems
1-3 Credits
Individual investigation, theoretical or experimental, under the supervision of a molecular biology faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

MOLB 520. Molecular Cell Biology
3 Credits (3)
Same as BIOL 520.

MOLB 542. Biochemistry I
3 Credits (3)
Same as BCHE 542. B or better required.
MOLB 545. Molecular and Biochemical Genetics
3 Credits (3)
Same as BCHE 545 and BIOL 545.

MOLB 546. Biochemistry II
3 Credits (3)
Same as BCHE 546.

MOLB 550. Topics in Molecular Biology
1-3 Credits
Selected topics of current interest in field of molecular biology for master’s level students.

MOLB 590. Discussions in Molecular Biology
1 Credit (1)
Oral presentations of ongoing research and/or research proposal for the masters thesis. Must be repeated twice for masters and three times for doctoral students. Graded by 2 options: S/U or Letter Grade

MOLB 597. Laboratory Rotations/Research Discussions
1-3 Credits
All entering students are required to take at least one credit, during their first semester, in which they will circulate through at least three different labs working on assigned problems and discussing research programs. May be repeated for a maximum of 4 credits. Graded S/U.

MOLB 598. Special Research Programs
1-3 Credits
Individual investigation, experimental or theoretical, under the supervision of a molecular biology faculty member. Course may be repeated up to a total of 6 credits with committee approval.

MOLB 599. Master’s Thesis
1-15 Credits (1-15)
Experimental and scholarly research leading to the preparation of a master’s thesis.

MOLB 600. Molecular Biology Research
1-15 Credits
Laboratory research efforts prior to successful completion of doctoral comprehensive exam.

MOLB 650. Advanced Topics in Molecular Biology
1-3 Credits
Discussions and lectures on topics of current interest in molecular biology for doctoral students.

MOLB 698. Advanced Research Projects
1-9 Credits
Individualized special research assignments for doctoral-level students. Up to 9 credits, with approval of committee. Graded S/U.

MOLB 700. Doctoral Dissertation Research
1-15 Credits
Research for doctoral students after completing comprehensive exams.

**MPH-MASTER OF PUBLIC HEALTH**

MPH 510. Community and Psychosocial Aspects of Public Health
3 Credits (3)
Social, behavioral, and educational aspects of disease prevention and health promotion programs. Restricted to MPH majors.

MPH 515. Introduction to Gerontology
3 Credits (3)
Social, psychological, and physiological aspects of aging with an interdisciplinary emphasis on health promotion. Demographic characteristics of the aging population.

MPH 520. Biostatistical Applications in Public Health
3 Credits (3)
Quantitative methods for public health students including tabular, graphical, and numerical descriptive methods, random sampling, principles of statistical inference, confidence intervals, statistical tests of hypothesis through analysis of variance and regression. Restricted to MPH majors.

MPH 530. Epidemiological Approaches to Disease Control and Prevention
3 Credits (3)
Basic epidemiological principles applicable to infectious and noninfectious disease. Descriptive techniques and analytic designs, and application of statistical and epidemiological investigation methods included. Restricted to MPH majors.

MPH 540. Health Services System: Administration and Organization
3 Credits (3)
This course focuses on using a systems approach to identify and analyze factors and interrelationships that influence the operation of health services organizations. Specific attention is to administrative structures and operations, finance and quality among public health departments, hospitals, multi-institutional systems, integrated health systems and strategic alliances. May be repeated up to 3 credits. Restricted to: MPH majors.

MPH 541. Principles of Health Program Management
3 Credits (3)
This course prepares the student to assume a supervisory role in the management of health and human services programs. The course will cover essential management functions such as leadership, organizational assessment, planning, decision-making, organizational structure, budgeting, marketing, and human resource management. May be repeated up to 3 credits. Restricted to: MPH majors.

MPH 545. Health Services Organization and Delivery
3 Credits (3)
This course includes the framework of the United States healthcare system; organization and administration of health services; alternate ways of organizing and financing health systems; the roles of the government and free market on health care services; and the barriers to health services delivery. May be repeated up to 3 credits. Restricted to: MPH majors.

MPH 546. Public Health Finance and Budget Management
3 Credits (3)
Introduces health care accounting and finance to non-financial students. Students are exposed to the financial structure of health care organizations and the environment within which they operate. Instruction also introduces the use of accounting and financial information in investor-owned and not-for-profit organizations in the health care industry. Topics include understanding the creation and interpretation of financial statements, financial accounting and reporting requirements, financial analysis, budgeting, and resource allocation. May be repeated up to 3 credits. Restricted to: MPH majors.

MPH 547. Public Health Law and Ethics
3 Credits (3)
This course examines major legal and ethical concepts and their impact on public health policy and practice. The course examines governmental authority, at various jurisdictional levels, to improve public health. This course will focus on public health law in the United States. May be repeated up to 3 credits. Restricted to: MPH majors.
MPH 550. Environmental Public Health Issues
3 Credits (3)
Environmental health issues from a public health perspective. Restricted to MPH majors.

MPH 557. Health Promotion for the Older Adult
3 Credits (3)
Common health concerns and lifestyle issues relevant to older adults. Facts about the content area, health behaviors, and practices to promote health and prevent disease; program development strategies applicable to a variety of settings.

MPH 558. Public Health Policy Analysis
3 Credits (3)
Covers issues related to U.S.-health policy and allocation of resources. Examination of local, state, and federal public health and health care funding. Assessment of impact of health policy on health education, medical practice, and the workplace. May be repeated up to 3 credits. Restricted to: MPH majors.

MPH 559. Infectious and Noninfectious Disease Prevention
3 Credits (3)

MPH 560. American Indian Health
3 Credits (3)
Critical health issues facing American Indians in the contemporary world. May be repeated up to 3 credits. Crosslisted with: PHLS 460.

MPH 561. Health Disparities: Determinants and Interventions
3 Credits (3)
Investigates: descriptions of health disparities and measurement issues; physical environmental factors, behavioral and emotional variables; impact of aging of the populations, increased racial and ethnic diversity, and technological developments; intervention strategies and evaluation results. May be repeated up to 3 credits. Crosslisted with: PHLS 461.

MPH 564. Cross-Cultural Aspects of Health
3 Credits (3)
An examination of health practices from a variety of cultural perspectives; communication, observation, research, and assimilation. Issues to be addressed will be examined from a number of viewpoints, such as individual, family, community, and professional roles. May be repeated up to 3 credits. Crosslisted with: PHLS 464V.

MPH 565. International Health Problems
3 Credits (3)
Comparison of domestic health programs and problems with those in other parts of the world; emphasis on political parameters and delivery processes. Additional attention is focused on the health issues of the U.S.-Mexico border. May be repeated up to 3 credits. Crosslisted with: PHLS 465.

MPH 566. International Health Practicum
1-3 Credits
Intensive examination of health practices and beliefs from a cultural perspective. Focus on health structure, index of diseases, morbidity, mortality and epidemiological approaches to planning. Required travel (personal travel, lodging, and related expenses are extra). May be repeated up to 3 credits. Crosslisted with: PHLS 466.

MPH 567. Rural Health Issues
3 Credits (3)
Comprehensive overview of rural health services with southwestern United States and New Mexico focus. Crosslisted with: PHLS 467.

MPH 568. Coping with Loss and Grief: A Cross-Cultural Perspective
3 Credits (3)
A cross-cultural perspective to death, loss and grief. Hospice philosophy of caring for the dying will be included. May be repeated up to 3 credits. Crosslisted with: PHLS 468.

MPH 569. U.S.-Mexico Border Health Issues
3 Credits (3)
Interdisciplinary analysis of the impact of living conditions and health issues of communities along the U.S.-Mexico border and of the strategies and initiatives to address these issues. Problem-based learning, case analysis, lecture, guest speakers, computer based instruction, and field trips. May be repeated up to 3 credits. Crosslisted with: PHLS 469.

MPH 570. Foundations of Public Health Education
3 Credits (3)
Social, behavioral, and educational aspects of disease prevention and health promotion. Includes history and theoretical basis of health education.

MPH 571. Health Informatics
3 Credits (3)
The application of technology to engage communities and individuals in behavioral and environmental change processes. The course will focus on the use of technology to describe the magnitude of health problems and their sources; analyze risk factors; identify community strengths from which strategies may be defined and tools created to intervene, prevent problems, and promote health and well-being; and continuously evaluate, refine, and implement what works. May be repeated up to 3 credits. Crosslisted with: PHLS 471.

MPH 572. Techniques of Health Communication/Education
3 Credits (3)
Application of a wide range of communication and education theories/methods, including program planning and evaluation, in public health programming. Restricted to: MPH majors.

Prerequisite(s): MPH 510.

MPH 573. Community Organization in Public Health
3 Credits (3)
Strategies for identifying and involving community leaders, community needs assessment, small area analysis and planning, and community-level development strategies. Restricted to: MPH majors.

Prerequisite(s): MPH 510.

MPH 574. Health Program Planning
3 Credits (3)
Covers process of successful public health education program planning and grant writing. Restricted to: MPH majors.

Prerequisite(s): MPH 510.

MPH 578. Evaluative Approaches in Public Health
3 Credits (3)
Survey and analyses of health testing and evaluation procedures, uses and limitations of knowledge and attitude tests, behavioral inventories, check lists, questionnaires, interviews, and other techniques. Restricted to: MPH majors.

Prerequisite(s): MPH 520.

MPH 579. Research and Resources in Community Health
3 Credits (3)
Exploration of available public health research studies, data, results and implications. Restricted to MPH majors.

Prerequisite(s): MPH 520.
MSW 500. Social Problems and Social Welfare Policy
3 Credits (3)
An overview of social and economic problems in the United States and the historical and current social welfare policies aimed at alleviating these problems. Emphasis on developing an awareness and ability to change policies that impact vulnerable populations. May be repeated up to 3 credits.

MSW 503. Policy Analysis and Change
3 Credits (3)
This course will emphasize policy practice focusing on policy analysis and creating and implementing policy change. Restricted to MSW majors.
Prerequisite(s): MSW 500.

MSW 509. Sociocultural Concepts and Populations of the Southwest
3 Credits (3)
Theoretical and sociohistorical perspectives on racism, sexism, ageism, heterosexism, classism, ableism, and other forms of discrimination and oppression. Cultural diversity, strengths, and Southwest and border issues are emphasized.

MSW 510. Human Behavior and the Social Environment I
3 Credits (3)
The major theories of human behavior and the life span from conception to adolescence. Focuses both on the areas of concern and risk for client systems and on the opportunities and strengths in the social environment. Required. May be repeated up to 3 credits. Restricted to: MSW majors.
Corequisite(s): MSW 509.

MSW 514. Human Behavior & the Social Environment II
3 Credits (3)
The major theories of human behavior from young adulthood to old age. This course will focus on both areas of concern and risk for client systems and on the opportunities and strengths in the social environment. Restricted to: MSW majors.
Prerequisite(s): MSW 510.

MSW 520. Social Work Practice I
3 Credits (3)
This is the first course of a two-course sequence. An introduction to the generalist crosscultural, social work practice perspective with individuals and families, focusing on social work as a profession, social work knowledge base, professional development, relationship building and assessment with individuals and families within a framework of social work values and ethics. May be repeated up to 3 credits.
Corequisite(s): MSW 551.
Prerequisite(s)/Corequisite(s): MSW 510. Restricted to: MSW majors.

MSW 521. Social Work Practice II
3 Credits (3)
This is the second course of a two-course sequence. A continuation of the generalist crosscultural, social work practice perspective with individuals and families, focusing on goal setting, contracting, implementation, and outcome assessment. The course also applies the generalist practice perspective and methods to larger systems: groups, organizations, and communities and includes relationship building, assessment, goal setting, contracting, implementation and outcome assessment within a framework of social work values and ethics. May be repeated up to 3 credits. Restricted to: MSW majors.
Prerequisite(s): MSW 520.

MSW 524. Practice III: Advanced Practice with Individuals
3 Credits (3)
This class builds on Foundation Year Practice courses (MSW 520, 521) by integrating theory and practice, and advancing skills in selecting, applying and evaluating practice interventions in a culturally sensitive manner with individuals. May be repeated up to 3 credits. Restricted to: MSW majors.
Prerequisite(s): MSW 521.
Corequisite(s): MSW 556; MSW 568; MSW 554.

MSW 525. Practice IV: Advanced Generalist Practice with Groups
3 Credits (3)
This course will address the knowledge, values and skills needed to work effectively with diverse populations in group settings. The course will build on Foundation Year courses (MSW 520 and 521) by integrating theory and practice, and advancing skills in selecting, applying and evaluating practice interventions in a culturally sensitive manner with social work groups. May be repeated up to 3 credits. Restricted to: MSW majors.
Prerequisite(s): MSW 521.
Corequisite(s): MSW 556; MSW 568; MSW 554.
MSW 526. Practice V: Advanced Practice with Families
3 Credits (3)
This class builds on Foundation Year Practice courses (MSW 520 and 521) by integrating theory and practice, and advancing skills in selecting, applying, and evaluating practice interventions in a culturally sensitive manner with families. May be repeated up to 3 credits. Restricted to: MSW majors.
Prerequisite(s): MSW 524, MSW 525.
Corequisite(s): MSW 555; MSW 557; MSW 569.

MSW 527. Practice VI: Advanced Practice with Organizations and Communities
3 Credits (3)
This class builds on Foundation Year Practice courses (MSW 520, 521) by integrating theory and practice, and advancing skills in selecting, applying, and evaluating practice interventions in a culturally sensitive manner with organizations and communities. May be repeated up to 3 credits. Restricted to: MSW majors.
Prerequisite(s): MSW 524, MSW 525.
Corequisite(s): MSW 557; MSW 569; MSW 555.

MSW 547. Social Work Mental Health Practice
3 Credits (3)
This course is designed to add to the practice sequence for Masters Level students in Social Work. It addresses social work assessment of major mental health issues across the life span with an emphasis on resiliency and coping skills. Culturally responsive practices are applied to the major issues of mental health. Basic psychopharmacology, neurobiology and the ways in which Social Workers interact with clients to aid education and effective treatment of medical interventions will be a prominent part of this course. Evidence-based practices useful for work in various disorders will be incorporated. May be repeated up to 3 credits. Restricted to: MSW majors.
Prerequisite(s): MSW 520.

MSW 549. Generalist Field Practicum A
3 Credits (3P)
Supervised professional practice in a community social service agency, providing experiential instruction and learning; seminar required. Evaluation criteria for this course will include upholding social work practice standards for interpersonal and ethical conduct. Total of 225 hours in the field each semester is required, 3 credits each semester. May be repeated up to 3 credits. Restricted to: MSW majors. Graded: S/U Grading (S/U, Audit).
Corequisite(s): MSW 520, MSW 566.

MSW 550. Generalist Field Practicum B
3 Credits (3P)
Supervised professional practice in a community social service agency, providing experiential instruction and learning; seminar required. Evaluation criteria for this course will include upholding social work practice standards for interpersonal and ethical conduct. Total of 225 hours in the field each semester is required. Letter grade, 3 credits each semester. May be repeated up to 3 credits. Restricted to: MSW majors. Graded: S/U Grading (S/U, Audit).
Corequisite(s): MSW 549.

MSW 551. Generalist Field Practicum I
3 Credits (3)
Corequisite(s): MSW 520.

MSW 552. Generalist Field Practicum II
3 Credits (3)
Supervised professional practice in a community social service agency. 225 clock hours required. Seminar required. Restricted to: MSW majors.
Prerequisite(s): MSW 551.
Corequisite(s): MSW 521.

MSW 554. Advanced Generalist Field Experience I
3 Credits (3)
Supervised professional practice in a community social service agency providing experiential learning in advanced generalist practice. 250 clock hours required. Seminar required. Crosslisted with: MSW 568. Restricted to: MSW majors.
Prerequisite(s): MSW 552.
Corequisite(s): MSW 524, MSW 525.

MSW 555. Advanced Generalist Field Experience II
3 Credits (3)
Supervised professional practice in a community social service agency providing experiential learning in advanced generalist practice. 250 clock hours required. Seminar required. Crosslisted with: MSW 569. Restricted to: MSW majors.
Prerequisite(s): MSW 554.
Corequisite(s): MSW 526, MSW 527.

MSW 556. Advanced Generalist Field Practicum A
3 Credits (3P)
Supervised professional practice in a community social service agency, providing experiential instruction and learning in advanced generalist practice: seminar required. Total of 250 hours in the field each semester is required. Letter grade, 3 credits each semester. May be repeated up to 3 credits. Restricted to: MSW majors.
Prerequisite(s): MSW 550.
Corequisite(s): MSW 524, MSW 525, MSW 568.

MSW 557. Advanced Generalist Field Practicum B
3 Credits (3P)
Supervised professional practice in a community social service agency, providing experiential instruction and learning in advanced generalist practice: seminar required. Total of 250 hours in the field each semester is required. Letter grade, 3 credits each semester. May be repeated up to 3 credits. Restricted to: MSW majors.
Prerequisite(s): MSW 556.
Corequisite(s): MSW 526, MSW 527, MSW 569.

MSW 559. Social Work Practice & Research for Advanced Standing
4 Credits (4)
This course is required for all advanced standing students and targets provision of the conceptual orientation for the concentration year of the MSW program. The goal of this course is to enhance social work practice theory, knowledge and application skills as well as knowledge in preparation for concentration year courses in advanced generalist social work practice. The key themes and concepts presented, explored and analyzed in this course include: the fit between Social Work code of ethics and personal values and belief systems; analysis of theory, ethics, and conceptual frameworks for concentration year advanced evidenced based Social Work practice courses in diverse settings. Restricted to: MSW Advanced Standing majors.
MSW 560. Social Work Research I
3 Credits (3)
Introduction to analytical skills used in social work research: problem formulation, research designs, measurement, instrumentation, data collection and analysis, use of human participants in research, and application of research knowledge and professional ethics to social work practice. May be repeated up to 3 credits. Restricted to: MSW majors.
Corequisite(s): MSW 500.

MSW 562. Social Work Research II
3 Credits (3)
Focused on advanced generalist practice research in multicultural settings. Advanced skills to evaluate practice with individuals, families, groups, organizations, and communities in multicultural settings. Needs assessment as well as program and practice evaluation are emphasized. Restricted to: MSW majors.
Prerequisite(s): MSW 560.

MSW 566. Generalist Field Seminar I
3 Credits (3)
The field seminar assists the student in fortifying a relationship between classroom knowledge and the field experience. In addition, it assists the student in the integration of social work practice processes in service planning and delivery. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MSW 551 or MSW 549, MSW 509, MSW 510, MSW 520. Restricted to: MSW majors. Graded: S/U Grading (S/U, Audit).

MSW 567. Generalist Field Seminar II
3 Credits (3)
The field seminar assists the student in fortifying a relationship between classroom knowledge and the field experience. In addition, it assists the student in the integration of social work practice processes in service planning and delivery. May be repeated up to 3 credits. Restricted to: MSW majors.
Prerequisite(s): MSW 566.
Corequisite(s): MSW 521, MSW 550.

MSW 568. Advanced Generalist Field Seminar I
3 Credits (3)
The field seminar assists the student in fortifying a relationship between classroom knowledge and the field experience. In addition, it assists the student in the integration of social work practice processes in service planning and delivery. May be repeated up to 3 credits. Crosslisted with: MSW 554. Restricted to: MSW majors.
Prerequisite(s): MSW 567.
Corequisite(s): MSW 556, MSW 524, MSW 525.

MSW 569. Advanced Generalist Field Seminar II
3 Credits (3)
The field seminar assists the student in fortifying a relationship between classroom knowledge and the field experience. In addition, it assists the student in the integration of social work practice processes in service planning and delivery. May be repeated up to 3 credits. Restricted to: MSW majors.
Prerequisite(s): MSW 568.
Corequisite(s): MSW 526, MSW 527, MSW 557.

MSW 590. Family and Child Welfare Policy
3 Credits (3)
This course will enhance students’ ability to offer child welfare services that respect cultural differences, reflect current policy knowledge concerning child maltreatment, build on the advocacy and protective capacities of individuals, families and communities and encourage permanency for children and preservation of families. Required basic knowledge of child welfare and assessment skills. Outside majors require instructor permission. May be repeated up to 3 credits.

MSW 595. Independent Study
1-3 Credits
Individual study to augment depth of knowledge in area related to course of study. May be repeated for maximum of 6 credits.
Prerequisite: consent of instructor.

MSW 597. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. Open to graduate students in related disciplines and to community professionals in related disciplines and to community professionals in related fields. May be repeated for unlimited credit under different subtitles.
Prerequisite: consent of instructor.

MSW 599. Graduate Thesis
6 Credits
Required for thesis option. May be repeated for a maximum of 6 credits. Restricted to MSW students.
Prerequisite: consent of instructor.

MUSC-MUSIC

MUSC 1110G. Music Appreciation: Jazz
3 Credits (3)
This course explores the ideas of music in society and its cultural relevance and is designed to increase the students’ appreciation of music as well as to enhance their listening skills. Students are introduced to various periods, styles, and composers of music and become acquainted with knowledge and appreciation of Jazz from various cultures and times.

Learning Outcomes
1. Develop a vocabulary of musical terms, and be able to describe music using those terms
2. Demonstrate knowledge of composers, their music and their relationship to historical periods
3. Recognize how music played and plays a political, social, and cultural function
4. Identify well-known pieces and the historical and social context in which they were composed
5. Demonstrate basic understanding of music notation and musical communication
MUSC 1130G. Music Appreciation: Western Music
3 Credits (3)
This course explores the ideas of music in society and its cultural relevance and is designed to increase the students' appreciation of music as well as to enhance their listening skills. Students are introduced to various periods, styles, and composers of music and become acquainted with knowledge and appreciation of Western music from various cultures and times.

Learning Outcomes
1. Develop a vocabulary of musical terms, and be able to describe music using those terms
2. Demonstrate knowledge of composers, their music and their relationship to historical periods
3. Recognize how music played and plays a political, social, and cultural function
4. Identify well-known pieces and the historical and social context in which they were composed
5. Demonstrate basic understanding of music notation and musical communication

MUSC 1210. Fundamentals of Music for Non-majors
3 Credits (3)
A beginning course in the fundamentals of music, this course includes notation, scales, key signatures and intervals. Aural comprehension is introduced through singing intervals, scales and triads and dictating simple rhythmic and melodic patterns and students explore the basic components of music. Traditional Grading with RR.

Learning Outcomes
1. Demonstrate and apply standard notation of pitch, rhythm, scales, intervals, key signatures, triads, and simple melodic and harmonic composition
2. Develop and improve basic aural skills
3. Read musical notation
4. Improve and expand understanding of fundamental musical techniques and concepts

MUSC 1310. Recital Attendance
0.5 Credits (.5+1P)
This course is for music students to attend and participate in a good number of convocation, concert, and recital performances, creating a wider appreciation for the performing arts. May be repeated up to 4 credits. Restricted to: Music and Music Education majors. S/U Grading with RR. Restricted to Las Cruces campus only.

Learning Outcomes
1. Encourage student observation of serious music
2. Provide opportunities for public performances
3. To create a greater sense of community within the student body

MUSC 1310G. Music Appreciation: Western Music
3 Credits (3)
This course explores the ideas of music in society and its cultural relevance and is designed to increase the students' appreciation of music as well as to enhance their listening skills. Students are introduced to various periods, styles, and composers of music and become acquainted with knowledge and appreciation of Western music from various cultures and times.

Learning Outcomes
1. Develop a vocabulary of musical terms, and be able to describe music using those terms
2. Demonstrate knowledge of composers, their music and their relationship to historical periods
3. Recognize how music played and plays a political, social, and cultural function
4. Identify well-known pieces and the historical and social context in which they were composed
5. Demonstrate basic understanding of music notation and musical communication

MUSC 1410. Introduction to Music Education
2 Credits (2)
This course is an overview of teaching in the music classroom through readings and observations. Students will be introduced to the skills needed to become a reflective educator, develop observation techniques, and demonstrate knowledge of the current state of the profession. Restricted to Las Cruces campus only.

Learning Outcomes
1. Make observations and analyze the current state of musical education in public schools
2. Describe characteristics of good teaching in music
3. Articulate a personal philosophy of music education
4. Reflect on personal strengths and weaknesses as a teacher of music

MUSC 1440. Class Voice I
1 Credit (1)
Group instruction in voice and vocal pedagogy for instrumental Music Education majors, offering basic principles of healthy vocal production with particular attention to diction, development of vocal range, and the ability to impart that knowledge to elementary, junior and/or high school age students. Restricted to: Music Education majors. Traditional Grading with RR. Restricted to Las Cruces campus only.

Learning Outcomes
1. Provide the basic understanding of healthy vocal production. Including, but is not limited to, the following topics: Expanding vocal range; Learning how to practice and learn songs effectively and efficiently; Provide basic understanding of vocal pedagogy; Introduction to diction
2. Make observations and analyze the current state of musical education in public schools
3. Aims to equip students with the ability to impart that knowledge to elementary, junior and/or high school age students.

MUSC 1450. Ear Training I
1 Credit (1)
To develop the ability to accurately hear, identify, sing and notate musical elements including rhythm, melody, intervals and harmony. Traditional Grading with RR. Restricted to Las Cruces campus only.

Prerequisite(s): Passing the Theory Placement exam or making a C or better in MUSC 1210.

Learning Outcomes
1. Counting rhythms at sight using the Eastman Counting System
2. Singing melodies at sight using solfege syllables
3. Writing out rhythmic patterns
4. Writing out melodic patterns
5. Identifying and singing intervals
6. Identifying and singing chord / triad qualities

MUSC 1451. Ear Training II
1 Credit (1)
To develop the ability to accurately hear, identify, sing and notate musical elements including rhythm, melody, intervals and harmony. Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C- or better in MUSC 1450.

Learning Outcomes
1. Counting rhythms at sight using the Eastman Counting System
2. Singing melodies at sight using solfege syllables
3. Writing out rhythmic patterns
4. Writing out melodic patterns
5. Identifying and singing intervals
6. Identifying and singing chord / triad qualities
MUSC 1460. Music Theory I
3 Credits (3)
Introduction to vocabulary and syntax of 4-voice 18th c. chorale music through study and harmonic analysis.
Prerequisite(s): Passing the Theory Placement exam or making a C or better in MUSC 1210.
Learning Outcomes
1. To learn the vocabulary and syntax of 4-voice 18th c. chorale music through study and harmonic analysis

MUSC 1461. Music Theory II
3 Credits (3)
Expansion of vocabulary and syntax of 4-voice 18th c. chorale music through study, harmonic analysis, and part writing.
Prerequisite(s): Grade of C or better in MUSC 1460.
Learning Outcomes
1. To expand and apply the vocabulary and syntax of 4-voice, 18th c. chorale music through study, harmonic analysis, and part writing.

MUSC 1470. Functional Piano I
2 Credits (2)
Scales, chords, memorization. Harmonization of simple melodies with the ability to play simple melodies and rhythms. May be taken for unlimited credit. Restricted to music majors. No S/U option.
Learning Outcomes
1. 5 finger hand position in all keys
2. I-IV-I-V-I cadences in all keys
3. One octave scales with hands together in C, G, D and F (major and minor)
4. Root position cross-over triads, solid and broken (major and minor)
5. Simple sight reading, harmonizing and transposition
6. Prepared pieces from the textbook
7. Simple improvisation
8. Play 2 simple vocal exercises
9. Identify intervals, key signatures and chords
10. Correct posture and hand position
11. Musical issues such as phrasing, slurs and dynamics
12. Good practice habits and techniques

MUSC 1471. Functional Piano II
2 Credits (2)
Scales, chords, memorization. Harmonization of simple melodies with the ability to play simple melodies and rhythms. May be taken for unlimited credit. Restricted to music majors. No S/U option.
Prerequisite: MUSC 1470 or consent of instructor.
Learning Outcomes
1. Two octave scales with hands separate in C, G, D, A, E, B and F (major and minor)
2. I-IV-I-V-I cadences in above mentioned keys in root position and 1st inversion
3. Simple sight reading, harmonization and transposition
4. Prepared pieces from the book
5. Simple improvisation
6. Identify intervals, key signatures and chords
7. Correct posture and hand position
8. Musical issues such as phrasing, slurs and dynamics
9. Good practice habits and techniques

MUSC 1472. Functional Piano III
2 Credits (2)
For music majors preparing for the Piano Proficiency Examination. May be taken for unlimited credit. Restricted to music majors. No S/U option.
Prerequisite: MUSC 1471 or consent of instructor.
Learning Outcomes
1. Keys learned in previous semesters, adding F# and C# (D flat)
2. Secondary dominant chords added to cadence patterns
3. Two-octave, 1st position arpeggios, major and minor
4. Intro to chord charts, harmonization
5. More difficult sight-reading and transpositions
6. More difficult prepared pieces
7. Accompany a piece for any instrument on the Mid-Term Recital (required)

1-2 Credits
Private or group instruction for non-music majors, secondary instruments, and music majors preparing for 200-level applied music. May be taken for unlimited credit.
Learning Outcomes
1. Varies

MUSC 2110. Chamber Ensemble
1 Credit (1)
This course is an exploration of chamber ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of chamber ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 16 credits. Restricted to Las Cruces campus only.
Prerequisite(s): by audition only.
Learning Outcomes
1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage

MUSC 2120. Major Ensemble
1 Credit (1)
This course is an exploration of major ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of major ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 10 credits. Restricted to Las Cruces campus only.
Prerequisite(s): by audition only.
Learning Outcomes
1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage
MUSC 2130. Jazz Ensemble
1 Credit (1)
This course is an exploration of jazz ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of jazz ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 10 credits. Restricted to Las Cruces campus only. **Prerequisite(s):** By audition only.

**Learning Outcomes**
1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage
6. Develop and improve improvisation skills

MUSC 2132. Percussion Ensemble
1 Credit (1)
Study and performance of contemporary percussion ensemble literature. May be repeated up to 5 credits. Restricted to Las Cruces campus only. **Prerequisite(s):** by audition only.

**Learning Outcomes**
1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage

MUSC 2151. An Introduction to World Music, Jazz and Music Research
3 Credits (3)
Introduces world music and jazz within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works. A major component will be the development of effective research and scholarly writing skills for the music major or minor. May be repeated up to 3 credits. Restricted to: Music majors and minors. Restricted to Las Cruces campus only. **Prerequisite(s):** A grade of C- or better in MUSC 1450, 1460, and 2151.

**Learning Outcomes**
1. The purpose of the course is to survey the beginning history of music from the earliest ancient times through the Baroque period, ca. 175
MUSC 2310. Sound and Music Technology
1 Credit (1)
This course serves as an overview of current technologies and principles for the recording and production of sound, and the use of computer-based technologies for the production of music. Restricted to: MUSC, M ED majors. Traditional Grading with RR. Restricted to Las Cruces campus only.
Prerequisite(s): Grade of C or better in MUSC 1461.
Learning Outcomes
1. Demonstrate fundamental knowledge of techniques and practices of music recording and production
2. Demonstrate ability to properly use computer-based technologies to produce and record music
3. Demonstrate ability to create music recordings
4. Work with a variety of recording, production, and sound reinforcement tools
5. Apply basic and mixed editing techniques
6. Use audio editing and file management techniques
7. Demonstrate knowledge of music technology vocabulary
8. Explain and understand the development of various music technologies

MUSC 2451. Ear Training III
1 Credit (1)
Continuation of MUSC 1451, advanced sight singing, dictation. Restricted to Las Cruces campus only.
Prerequisite(s): Grade of C- or better in MUSC 1451.
Learning Outcomes
1. Count rhythms at sight using the Eastman Counting System
2. Sing melodies at sight and prepared using Solfege syllables
3. Write out rhythmic patterns
4. Write out melodic patterns
5. Identify and singing intervals
6. Identify and sing chord / triad qualities
7. Write out harmonic dictation

MUSC 2452. Ear Training IV
1 Credit (1)
Continuation of MUSC 2451, advanced sight singing, dictation. Restricted to Las Cruces campus only.
Prerequisite(s): Grade of C or better in MUSC 2451 and MUSC 2460.
Learning Outcomes
1. Count rhythms at sight using the Eastman Counting System
2. Sing melodies at sight using Solfege syllables
3. Write out rhythmic patterns in both simple and compound meters
4. Write out melodic patterns in both major and minor tonalities
5. Identify, label and sing intervals
6. Identify and label and sing chords and extended harmonic qualities, i.e. V7 and inversions
7. Write out harmonic progressions in both two and four part forms including secondary dominants and modulations.
8. Accurately detect melodic and rhythmic errors in dictation examples.

MUSC 2450. Music Theory III
3 Credits (3)
Analysis of Baroque and Classical Music. Vocabulary and syntax of 18th and 19th c. Western art music through study, chordal/formal analysis, and composition. Restricted to Las Cruces campus only.
Prerequisite(s): Grade of C or better in MUSC 1461.
Learning Outcomes
1. To learn and apply the vocabulary and syntax of 18th and 19th c. Western art music through study, chordal/formal analysis, and composition.
2. Topics covered include: Two-Voice Eighteenth Century Counterpoint; Fugue; Borrowed Chords; Neapolitan 6th Chords; Augmented 6th Chords; Sonata Form; Rondo Form.

MUSC 2461. Music Theory IV
3 Credits (3)
Analysis of Romantic, Post-Romantic, Impressionist, and Twelve-Tone Music. Vocabulary and syntax of late 19th and early 20th c. Western art music through study, micro/macro analysis, and composition. Restricted to Las Cruces campus only.
Prerequisite(s): Grade of C or better in MUSC 2460.
Learning Outcomes
1. To learn and apply the vocabulary and syntax of late 19th and early 20th c. music through study, micro/macra analysis, and composition.

MUSC 2470. Functional Piano IV
2 Credits (2)
For music majors preparing for Piano Proficiency Examination. May be taken for unlimited credit. Restricted to music majors. No S/U option.
Prerequisite: MUSC 1472 or consent of instructor.
Learning Outcomes
1. Keys learned in previous semesters, adding A flat, E flat, and B flat
2. Secondary dominant chords added to cadence patterns, all inversions
3. Arpeggios, all inversions
4. More difficult sight--reading and transpositions
5. More difficult prepared pieces
6. Four part pieces (hymns)
7. Accompany a piece for any instrument on the Mid-Term Recital (required) Score reading and transposition

MUSC 2510. Applied Music I
1-4 Credits
Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR. Restricted to Las Cruces campus only.
Prerequisite(s): Audition.
Learning Outcomes
1. Varies

MUSC 2993. Opera Workshop
1 Credit (1)
Study, translation, analysis, rehearsal and performance of opera. May be repeated up to 10 credits. Restricted to Las Cruces campus only.
Prerequisite(s): by audition only.
Learning Outcomes
1. Varies
MUSC 2996. Special Topics I
1-3 Credits
Emphasis on special areas of music; designed for highly motivated students. May be taken for unlimited credit.

Learning Outcomes
1. Varies

MUSC 301. Marching Band Techniques
2 Credits (2)
This course will help students develop the techniques needed to administer and teach all aspects of a contemporary high school marching band. This includes drill conception and design, instruction, organization, and administration. Stylistic varieties of marching fundamentals, show conception, fundamentals of charting and teaching drill, computer-aided drill design, traditional show design, contemporary show design, rehearsal techniques, and organizational concepts. Restricted to: Music, Music Education majors. Traditional Grading with RR.

MUSC 302. Music History and Literature: Classic through Romantic
3 Credits (3)
Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from the beginnings of the Classic era through the end of the Romantic era. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: Music Majors and Minors majors.
Prerequisite(s): A grade of C- or better in MUSC 2240.

MUSC 303. Music History and Literature: 20th Century Through the Present
3 Credits (3)
Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from the beginning of the 20th Century through the Present. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: MUS minors and majors.
Prerequisite(s): A grade of C- or better in MUSC 302.

MUSC 315. Brass Techniques I
1 Credit (1)
Methods and techniques of teaching high brass instruments, for music education majors. Main campus only.

MUSC 316. Brass Techniques II
1 Credit (1)
Methods and techniques of teaching low brass instruments, for music education majors. Main campus only.

MUSC 317. Woodwind Techniques I
1 Credit (1)
Methods and techniques of teaching high woodwind instruments, for music education majors. Main campus only.

MUSC 318. Woodwind Techniques II
1 Credit (1)
Methods and techniques of teaching saxophone and double reed instruments, for music education majors. Main campus only.

MUSC 319. String Techniques I
1 Credit (1)
Methods and techniques of teaching low string instruments, for music education majors. Main campus only.

MUSC 320. String Technique II
1 Credit (1)
Methods and techniques of teaching high string instruments, for music education majors. Main campus only.

MUSC 321. Instrumental Techniques for Vocal Music Education Majors
2 Credits (2)
Methods of teaching brass, woodwind, percussion, stringed and fretted instruments for vocal music education majors. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 322. Guitar Methods
1 Credit (1)
Methods and techniques of teaching guitar, for Music Education majors. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 323. Percussion Technique I
1 Credit (1)
Methods and techniques of teaching fundamental percussion instruments (snare drum, timpani, keyboards and essential accessories). May be repeated up to 1 credits. Restricted to: MUS,M ED majors.

MUSC 324. Percussion Technique II
1 Credit (1)
Methods and techniques of teaching marching percussion, drum set, and a continuation of techniques discussed in MUS 323. May be repeated up to 1 credits. Restricted to: MUS,M ED majors. Traditional Grading with RR.

MUSC 325. Beginning Conducting
1 Credit (1)
A study of the fundamentals of conducting and rehearsal strategies with an emphasis on beginning technique applicable to all ensembles. Reading of musical scores with application via laboratory ensemble experience is included. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 326. Instrumental Conducting
3 Credits (3)
Will continue from MUSC 325 in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques as it relates to the instrumental ensemble. The class will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. May be repeated up to 3 credits. Restricted to: MUS,M ED majors. Traditional Grading with RR.

MUSC 327. Choral Conducting
3 Credits (3)
Continuation of conducting study with emphasis on choral rehearsal techniques, ensemble management, and literature. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 330. Applied Music II
1-4 Credits
Continuation from MUS 230. Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 2992. Special Topics II
1-3 Credits
Emphasis on special areas of music; designed for highly motivated students. May be taken for unlimited credit.
MUSC 339. Survey of Music Business
3 Credits (3)
Survey of career options and exploration of current events/trends within the Music Industry. Non-Music Business majors may be admitted with instructor’s approval.

MUSC 340. Junior Recital
1 Credit (1)
Public solo performance under the supervision of the appropriate applied instructor. 30 minutes of musical performance is required. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.
Corequisite(s): MUSC 330.

MUSC 341. BA Capstone
1-2 Credits (1-2)
The objective of the Capstone course for the BA degree in Music is to demonstrate the accumulation, understanding and knowledge of the student’s course of study. This will take the form of an analytical paper, recital, research paper, composition or other equally encompassing project approved by the Instructor of Record. This may involve coursework from the student’s minor area of study and be a multidisciplinary collaborative effort. Restricted to: Music majors.
Prerequisite(s): A B- or better in MUSC 2460 and MUSC 302.

MUSC 346. Elementary Music Methods
2 Credits (2)
Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in an elementary school. Emphasis on methodology of Kodaly and Orff, teaching in a multicultural setting, and developing reflective practitioners. This course requires field experience in the public schools. Restricted to: Music Education majors.
Prerequisite(s): A grade of C or better in MUSC 1410 and passing the TEP exam.

MUSC 349. Secondary Music Methods
2 Credits (2)
Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in the middle school and high school. Emphasis on teaching in a multicultural setting and developing reflective practitioners. Restricted to: Music Education majors.
Prerequisite(s): A grade of C or better in MUSC 346.

MUSC 350. Chamber Music
1 Credit (1)
Small performing ensembles that may include strings, woodwinds, brass, pianos, percussion, and voices. May be repeated up to 16 credits.
Prerequisite(s): by audition only.

MUSC 351. Opera Workshop
1 Credit (1)
Study, translation analysis, rehearsal and performance of opera. May be repeated up to 10 credits.
Prerequisite(s): by audition only.

MUSC 360. Special Topics II
1-3 Credits
Emphasis on special areas of music; designed for highly motivated students. May be taken for unlimited credit.

MUSC 361. Concert Choir II
1 Credit (1)
Composed of both music and nonmusic majors. Emphasis on vocal techniques, sight-singing, and basics of choral musicianship. Students must assume leadership role. May be repeated up to 88 credits.
Prerequisite(s): by audition only.

MUSC 362. Philharmonic Orchestra II
1 Credit (1)
The University Philharmonic Orchestra is open to all students and performs a wide variety of standard orchestral literature. The orchestra performs each semester and the objectives include refining technique, stylistic characteristics, intonation, balance, bowings, color, rhythmic integrity and dynamics. May be repeated up to 10 credits.
Prerequisite(s): by audition only.

MUSC 363. Jazz Ensembles II
1 Credit (1)
Performance ensemble that explore repertoire written for big band, including (but not limited to) dance band, swing, and contemporary compositions. May be repeated up to 10 credits.
Prerequisite(s): by audition only.

MUSC 365. Composition I
2 Credits (2)
Significant forms for various media. Emphasis on structural aspects of original composition. Restricted to: M ED,MUS majors.
Prerequisite(s): A grade of B or better in MUSC 1460.

MUSC 368. University Singers II
1 Credit (1)
Select concert and touring choir of undergraduate and graduate students performing a cappella and accompanied choral literature. May be repeated up to 10 credits. Consent of Instructor required.
Prerequisite(s): by audition only.

MUSC 369. Survey of Music Business
3 Credits (3)
Survey of career options and exploration of current events/trends within the Music Industry. Non-Music Business majors may be admitted with instructor’s approval.

MUSC 370. Wind Symphony II
1 Credit (1)
This elite ensemble of 50 highly qualified graduate and undergraduate students performs a varied repertoire of the highest quality literature for winds. Members will also perform concerts of chamber winds literature each semester. This ensemble is dedicated to professional level performance while fostering the musical growth of its members. Conducted by the Director of Bands, this group serves as the flagship for the entire university bands program. May be repeated up to 10 credits.
Prerequisite(s): by audition only.

MUSC 372. Marching Band II
1 Credit (1)
Composed of both majors and nonmajors. Opportunity to perform all varieties of music in a contemporary style marching unit. May be repeated up to 5 credits. Consent of Instructor required. Traditional Grading with RR.

MUSC 374. Percussion Ensembles II
1 Credit (1)
Study and performance of contemporary percussion ensemble literature. Students must assume a leadership role. May be repeated up to 5 credits.
Prerequisite(s): by audition only.

MUSC 380. Symphonic Band II
1 Credit (1)
This is a select large ensemble, chosen by audition. It provides a challenging musical environment for skilled performers by programming repertoire that ranges from works for chamber winds, to standards of the wind band literature, to cutting edge literature. Conducted by the Associate Director of Bands, this ensemble is comprised of music majors and non-music majors alike and provides the less experienced student an opportunity to hone and refine performance skills. May be repeated up to 10 credits.
Prerequisite(s): by audition only.
MUSC 381. Campus Band II
1 Credit (1)
This is a non-auditioned ensemble designed to meet the needs of students from all majors across campus. Music majors are encouraged to enroll while performing on a secondary instrument. Marching band members are also encouraged to take the course to build skills and leadership. This ensemble provides an educational experience and serves as an outlet for students who wish to remain musically active in a less intense setting. May be repeated up to 10 credits.

MUSC 386. Applied Music Pedagogy and Literature I
2 Credits (2)
Methods, materials, problems, literature, and techniques in teaching individual lessons. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 390. Survey of Wind Literature
2 Credits (2)
An examination of beginning to advanced literature for wind bands with an emphasis on the needs of middle and high school ensembles. It will include a means to determine the quality of a piece as well as the standardized level of difficulty (grading). Restricted to: Music and Music Education majors.
Prerequisite(s): A grade of C- or better in MUSC 2452 and MUSC 2461.

MUSC 391. Survey of Orchestral Literature
2 Credits (2)
An examination of beginning to advanced literature for both string orchestra and symphony orchestra with an emphasis on the needs of middle and high school ensembles. A means to determine the quality of a piece as well as the standardized level of difficulty (grading) will be included. Restricted to: Music and Music Education majors.
Prerequisite(s): A grade of C- or better in MUSC 2452 and MUSC 2461.

MUSC 392. Survey of Choral Literature
2 Credits (2)
An examination of beginning to advanced literature for choir with an emphasis on the needs of middle and high school ensembles. A means to determine the quality of a piece as well as the standardized level of difficulty (grading) will be included. Restricted to: Music and Music Education majors.
Prerequisite(s): A grade of C- or better in MUSC 2452 and MUSC 2461.

MUSC 413. Form and Analysis
3 Credits (3)
Forms in tonal music and basic analytic techniques including music from diverse cultures and media.
Prerequisite(s): A grade of C- or better in MUSC 2452 and MUSC 2461.

MUSC 415. Orchestration
3 Credits (3)
Scoring for full orchestra and various instrumental combinations with consideration of instrument timbres, strengths, weaknesses and ranges. Restricted to: Music and Music Education majors.
Prerequisite(s): A grade of C or better in MUSC 2452 and MUSC 2461.

MUSC 417. Studio Accompanying
2 Credits (2)
Practical application of collaborative piano skills in a studio setting for Piano Performance majors. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 421. Music of the Baroque Era
3 Credits (3)
An overview of the music of the Baroque era with an emphasis on history and literature.
Prerequisite(s): MUSC 303.

MUSC 422. Music of the Classic Era
3 Credits (3)
An overview of the music of the Classic era with an emphasis on history and literature.
Prerequisite(s): MUSC 303.

MUSC 424. Music of the Twentieth Century
3 Credits (3)
An overview of the music of the Twentieth Century with an emphasis on history and literature. Consent of Instructor required.
Prerequisite(s): MUSC 303.

MUSC 429. Opera: History and Literature
3 Credits (3)
An overview of the operatic art form from the Florentine Camerata and Baroque opera through current 21st-century works, with an emphasis on historical context, composers, and significant works. Restricted to: Music, Music Education majors.
Prerequisite(s): MUSC 303 or consent of instructor.
Learning Outcomes
1. The student will be able to effectively identify and discuss operatic developments and traditions in historical context as well as demonstrate a knowledge of operatic composers and significant operatic works.

MUSC 430. Applied Music III
1-4 Credits
Continuation from MUS 330. Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.
Prerequisite(s): A grade of C- or better in MUSC 330 plus a juried audition.

MUSC 440. Senior Recital
1-2 Credits (1-2)
Public solo performance under the supervision of the appropriate applied instructor. 60 minutes of musical performance is required for enrollment of 2 hours credit. 30 minutes of musical performance is required for enrollment of 1 hour credit. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.
Corequisite(s): MUSC 430.

MUSC 441. Supervised Studio Teaching
2 Credits (2)
Teaching of private lessons under supervision. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 450. Research Methods
3 Credits (3)
Introduction to methodology of music research. Emphasis on important scholarly resources and academic writing. Restricted to majors. Main campus only. No S/U option.
Prerequisite: consent of instructor.
MUSC 455. Music Business Internship
3 Credits (3)
Capstone course for the Music Business degree. Working with the music business coordinator, students must have been accepted as an intern in a music business setting before enrolling. Credit given for the internship based on criteria developed for each placement. Restricted to: majors. S/U only.
Prerequisites: MUSC 330 and piano proficiency.

MUSC 470. Special Topics III
1-3 Credits
Designed for highly motivated students. Independent study and individual guidance. May be taken for unlimited credit.

MUSC 471. Graduate Theory Review
3 Credits (3)
Comprehensive and accelerated study of modes, diatonic harmony, and classical form of the common practice period. Restricted to: Music majors. Traditional Grading with RR.

MUSC 475. Intermediate Conducting
3 Credits (3)
Serves as a bridge from undergraduate conducting study to the graduate level. Advanced undergraduate students may enroll to learn how the graduate program in conducting functions. The course also serves as the introductory experience for newly admitted graduate conducting majors. After successful completion of this course, students will be able to: Study musical scores from a conducting perspective; Demonstrate effective predetermined gestures and movements; Lead an ensemble; Research and give presentations related to composers and their music; Demonstrate advanced knowledge of conducting practices.
Prerequisite(s): A grade of C- or better in MUSC 326 or MUSC 327.

MUSC 477. Graduate Music History Review
3 Credits (3)
Comprehensive and accelerated study of music history from antiquity to the present Restricted to: Music majors. Traditional Grading with RR.

MUSC 486. Applied Music Pedagogy and Literature II
2 Credits (2)
Methods, materials, problems, literature, and techniques in teaching individual lessons. Consent of Instructor required. Restricted to: Music majors. Traditional Grading with RR.

MUSC 498. Independent Study
1-3 Credits
For students with a strong musical background wishing to explore content beyond the traditional curriculum. Restricted to majors. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

MUSC 511. Survey of Traditional Harmony
3 Credits (3)
Tonal harmony in common practice and theory of the late 17th, 18th, and early 19th centuries. Restricted to: Music majors. Traditional Grading with RR.
Prerequisite(s): A grade of B or better in MUSC 471.

MUSC 513. Twentieth Century Art Music
3 Credits (3)
Analytical techniques, structural design and compositional materials from Debussy to the Minimalist school in historical context. Restricted to: Music majors.
Prerequisite(s): A grade of B or better in MUSC 471.

MUSC 518. Seminar in Music Theory
3 Credits (3)
Varying topics in Music Theory, providing a more specific and in-depth study of the particular topic. May be repeated up to 6 credits. Restricted to: Music majors. Traditional Grading with RR.
Prerequisite(s): A grade of B or better in MUSC 471.

MUSC 519. Seminar in Music History
3 Credits (3)
Varying topics in Music History, providing a more specific and in-depth study of the particular topic. May be repeated up to 6 credits. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 477.

MUSC 521. Music of the Baroque Era: History and Literature
3 Credits (3)
An overview of the music of the Baroque Era with an emphasis on history and literature.

MUSC 522. Music of the Classical Era: History and Literature
3 Credits (3)
An overview of the music of the Classical era with an emphasis on history and literature. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 477.

MUSC 523. Music of the Romantic Era: History and Literature
3 Credits (3)
An overview of Romantic era music, with an emphasis on history and literature. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 477.

MUSC 527. History and Analysis of the Symphony
3 Credits (3)
Historical background and development of the symphony from its inception (ca. 1740s) to mid-twentieth century. Analysis of major works by significant composers with emphasis on Sonata form. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 471 and MUSC 477.

MUSC 529. Opera History and Literature
3 Credits (3)
An overview of the operatic art form from the Florentine Camerata and Baroque opera through current 21st-century works, with an emphasis on historical context, composers, and significant works. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 477.

Learning Outcomes
1. The student will be able to effectively identify and discuss operatic developments and traditions in historical context as well as demonstrate a knowledge of operatic composers and significant operatic works.

MUSC 530. Seminar in Music Education
3 Credits (3)
Varying topics in Music Education, providing a more specific and in-depth study of the particular topic. Restricted to: MUS majors.
MUSC 531. Music Education in the Diverse Classroom
3 Credits (3)
This course is designed to provide an introduction to diverse and at-risk student groups in educational settings in the music classroom. It will help the course participants explore strategies and gain skills to enhance the musical growth of marginalized groups of students. There is an emphasis on identification, behavioral patterns, building interpersonal relationships, and will include a critical review of selected current research studies in music education. Armed with this knowledge, course participants will be better prepared to understand at-risk students and how best to implement strategies in the classroom. May be repeated up to 3 credits. Restricted to: MUS majors.

Learning Outcomes
1. Students will access and utilize the basic research journals and other sources of research reports and summaries, including those identified using computer technology in the field of music education. Students will describe the structure of most qualitative research studies and their aid in identifying student traits. Students will understand and use most of the language, terms and vocabulary found in qualitative research reports in discussing and identifying behavioral patterns of at-risk students. Students will appraise qualitative research in a systematic way; analyze and review what the research produced in order to isolate the strategies available to incorporate in classroom teaching scenarios. Students will independently retrieve, critique and summarize research related to at-risk students in music education.

MUSC 535. Current Issues in Music Education
3 Credits (3)
This course examines the rich and challenging complexities of music teaching and learning from a variety of perspectives. Educational theory to pedagogical inquiry of current educational practice will be examined, calling students to critically reflect on such professional activities as lesson planning, curriculum design, repertoire choice, program assessment, advocacy in the arts, and student evaluation. Restricted to: MUS (Music Ed track only) majors.

MUSC 540. Graduate Recital/Analytical Paper
4 Credits (4)
This course is for students completing a Master of Music with a Performance emphasis. A public recital will be given and an accompanying research paper will be submitted. Restricted to: MUS majors.

MUSC 574. Advanced Choral Conducting I
3 Credits (3)
This course will continue the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors. Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 575. Advanced Choral Conducting II
3 Credits (3)
This is the final course in preparation for the student’s graduate conducting concert. It will continue the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors. Prerequisite(s): A grade of B or better in MUSC 574.

MUSC 576. Advanced Instrumental Conducting I
3 Credits (3)
The role of the conductor is to lead, react to, alter, and reinforce the performance of the ensemble. This course will continue in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors. Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 577. Advanced Instrumental Conducting II
3 Credits (3)
The role of the conductor is to lead, react to, alter, and reinforce the performance of the ensemble. This course will continue in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors. Prerequisite(s): A grade of B or better in MUSC 576.

MUSC 578. Advanced Choral Literature
2-3 Credits (2-3)
An examination of significant choral works from 1200 to the present, including composers, genres, and historical context. May be repeated up to 3 credits. Restricted to: MUS majors. Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 579. Advanced Instrumental Literature
2-3 Credits (2-3)
An examination of significant instrumental works from the Baroque period to the present, including composers, genres, and historical context. May be repeated up to 3 credits. Restricted to: MUS majors. Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 580. Ensemble Performance
1 Credit (1)
Performance in university ensembles. May be repeated up to 99 credits. Prerequisite(s): by audition only.

MUSC 582. Applied Music
2-4 Credits
For music majors, individual instruction, including improvisation skills and techniques. Students may enroll for 2 or 4 credits. May be repeated for a maximum of 16 credits. Prerequisites: audition and consent of instructor.

MUSC 586. Applied Music Pedagogy and Literature III
2 Credits (2)
Methods, materials, problems, literature, and techniques in teaching individual lessons. Restricted to: MUS majors. Prerequisite(s): A grade of B or better in MUSC 486.

MUSC 598. Special Research Programs
1-4 Credits
May be taken for unlimited credit.

MUSC 599. Master’s Thesis
15 Credits
Thesis.
NA - NURSING ASSISTANT

NA 101. Nursing Assistant Theory and Lab
6 Credits (5+2P)
Nurse aide skills with emphasis on a bio-psychosocial-cultural approach to client care. Practice of these skills is provided in the laboratory as well as at a clinical site. Successful completion of the course prepares and qualifies the student to take the NACES certification examination. Requires a C or better to pass. Restricted to Community Colleges campuses only.

Learning Outcomes
1. Apply theoretical knowledge associated with nursing assisting in providing basic healthcare services. Perform essential clinical skills within the nursing assistant scope of practice in long-term, acute care, and ambulatory care settings. Recognize factors that affect procedures and results, and take appropriate actions within predetermined limits when indicated, including resident/patient compromise or complications. Demonstrate professional conduct and interpersonal communication skills. Recognize responsibilities of healthcare professionals, and with the public. Recognize the responsibilities for other health care personnel and interact with them with respect for their healthcare roles and resident/patient care. Apply basic scientific principles and evidenced-based practice in learning new techniques and procedures. Relate vital signs, point-of-care testing, and physical psychological findings to common disease processes. Evaluate occupational exposures, environmental safety hazards, high risk situations, and emergency responses related to health care professions. Demonstrate soft skills related to assisting with patient assessment, mobility, safety, nutrition, and care of the environment. Demonstrate professionalism when interacting with patient populations across the lifespan, including patient education and emergent situations. Explain legal and ethical considerations, including HIPAA and scope of practice related to healthcare settings.

NA 102. Sterile Processing Technician
4 Credits (3+3P)
This course will prepare the student to work as a Sterile Processing Technician, performing critical functions that support both the hospital and Operating Room. The student will learn about infection control, instrument reprocessing, decontamination, disinfection, and sterilization. All critical aspects of sterile processing will be covered to include applicable standards and regulations. This field is constantly evolving and those desiring to work in this profession must ensure that they stay abreast of the science behind the discipline. Restricted to Community Colleges campuses

Prerequisite(s): CCDE 110 N General Composition Placement exam scores, or specific course work.

Learning Outcomes
1. Summarized the legal responsibilities, ethical standards, and safety practices related to Sterile Processing Control and eliminate the spread of microorganisms Articulate standards and regulations as well as recommendations by professional organizations Properly clean, decontaminate, disinfect, and sterilize basic surgical instrumentation Prepare and assemble surgical trays and kits to include packaging and quality assurance indicators Utilize various sterilization modalities

NA 104. Nursing Assistant Fundamentals
3 Credits (3)
This course prepares students for employment as a Nursing Assistant in a Long Term Care Facility. Theory and basic nursing care skills will be taught with an emphasis being placed on the psychosocial-cultural approach to client care. Students will learn communication skills, basic anatomy and physiology, growth and development, infection control, body mechanics, basic nutrition, client/resident elimination needs, the client/resident unit, vital signs, range of motion exercises, bed making, rehabilitation and restorative care, client admission and discharge, common health problems, dealing with death and dying, and basic medical terminology. NA 104 and NA 104L (laboratory) must be successfully completed with a C- or better in order to continue to NA 105 Nursing Assistant Clinical. NA 105 must also be successfully completed with a C- or better to be eligible to take the state certification competency examination. Attendance is required to meet the federal requirements for training hours and content prior to direct contact with a patient/resident and the state competency examination. Students must test out of all CCDE and CCDR courses and eligible to take ENGL 1110G to enroll in this course. Restricted to Community Colleges campuses only.

Prerequisite(s/Corequisite(s): NA 104 L.

NA 104 L. Nursing Assistant Fundamentals Lab
1 Credit (3P)
This course prepares students for employment as a Nursing Assistant in a Long Term Care Facility. Students will learn and demonstrate personal care skills including bathing, grooming, dressing, toileting, assisting with eating and hydration, skin care, transfers and positioning. Students will also learn and demonstrate the use of assistive devices, and how to maintain resident safety, dignity and privacy. NA 104 & NA 104L must be successfully completed with a C- or greater in order to continue to NA 105 Clinical. NA 105 must be successfully completed with a C- or greater to be eligible to take the state certification competency examination.

Prerequisite(s/Corequisite(s): NA 104. Prerequisite(s): English COMPASS score of 35 or greater or CCDE 110N, and reading COMPASS score of 55 or greater or CCDR 105N. Restricted to Community Colleges campuses only.

NA 105. Nursing Assistant Clinicals
4 Credits (3+3P)
Extension of basic fundamentals of personal care, including theory, skills and clinical experience leading to the certified Nursing Assistant Examination at the conclusion of the semester. Continuation of NA 104. Requires a C or better to pass. Restricted to: Community Colleges only.

Prerequisite(s): C or better in NA 104 or consent of instructor.

NA 109. Phlebotomist Basic
4 Credits (2+4P)
This course provides the latest information, techniques, skills, and equipment for blood and specimen collection based on the standards of the Clinical and Laboratory Standards Institute, Needlestick Prevention Act, Joint Commission 2008 National Patient Safety Goals, OSHA and CDC. An advanced skills lab is included in the course to provide a "hands-on" practice experience and a 30 hour practicum in a supervised work environment collecting blood and specimens on actual patients for laboratory tests. Attendance is mandatory. Prepares students for employment as a phlebotomist in health care settings. Requires a "C" or better to pass. Upon successful completion of the course, student has the opportunity to test for National Healthcareer Certification. Consent of Instructor required.

Prerequisite(s/Corequisite(s): BIOL 1130 or BIOL 2225. Restricted to Community Colleges campuses only.
NA 110. Electrocardiogram Technician Basic
4 Credits (3+2P)
Prepares students for employment as an Electrocardiogram Technician. Includes basic theory of the cardiovascular system, cardiac rhythm interpretation, 12 lead ECG lead placement, and ECG equipment troubleshooting. The course includes an advanced skills laboratory for "hands-on" practice and 16 hours of supervised clinical in the work environment assisting with ECG testing. Attendance is mandatory. Course requires a grade of "C" or better to pass. Upon successful completion of course, student has the opportunity to test for National Healthcareer Certification. Restricted to Community Colleges campuses only.
Learning Outcomes
1. Perform ECG's, including patient preparation, electrode placement, recording ECG's, mounting upload of ECG to patient's chart. Calculate a patient's heart rate and identify the heart rhythm from an ECG tracing. Identify artifacts; waveform elements of the cardiac cycle, including variances related to ischemia, injury or infarction; as well as, major classifications of arrhythmias. Prepare and monitor patient's for Holter monitoring and telemetry. Prepare, conduct and monitor patients during stress testing. Recognize factors that affect procedures and results, and take appropriate actions within predetermined limits when indicated, including patient compromise or complications. Demonstrate professional conduct and interpersonal communication skills with patients, other health care professionals, and with the public. Recognize the responsibilities of other health care personnel with them with respect for their jobs and patient care. Apply basic scientific principles in learning new techniques and procedures. 1 Relate electrocardiogram findings to common disease processes.

NA 111. Alzheimer/Dementia Care Focus
3 Credits (3)
Students will learn respectful care of Alzheimer/Dementia persons while ensuring their dignity, maximizing safe independence focusing on strengths and abilities.
Prerequisite(s)/Corequisite(s): NA 104 or NA 101. Restricted to: Community Colleges only.

NA 113. Sterile Processing Practicum
5 Credits (1+4P)
This course will allow students to get hands on training in the Sterile Processing Department. They will perform critical functions learned in the Sterile Processing Technician course. They will apply principles of medical asepsis and infection control and by the end of the practicum be able to independently function in all work areas of the Sterile Processing Department. This field is constantly evolving and those desiring to work in this profession must ensure that they stay abreast of the science behind the discipline. Restricted to Community Colleges campuses
Prerequisite(s)/Corequisite(s): NA 102. Prerequisite(s): CCDE 110 N.
Learning Outcomes
1. Utilize equipment safely in the Sterile Processing Department
   - Apply concepts of infection control and medical asepsis
   - Effectively demonstrate professional ethical concepts
   - Demonstrate proper cleaning, decontamination, disinfection, and sterilization practices
   - Properly prepare and assemble surgical trays and kits to include packaging and quality assurance indicators
   - Validate sterilization loads to ensure patient safety

NA 115. Phlebotomist Technician
6 Credits (3+6P)
Basic theory and skills of phlebotomy following OSHA and Center for Disease Control guidelines. Prepares students for the requirements of testing for the ASCP certification exam and employment in a healthcare organization as a phlebotomist in licensed settings. Laboratory hours include infection control skills & practice, patient assessment & teaching, and practice in venipuncture. Clinical time includes clinical laboratory processes and operations, patient assessment, venipuncture, and exposure to clinical policies and procedures. Upon successful completion students are workforce ready. Requires C or better to pass. Restricted to Community Colleges campuses only.
Learning Outcomes
1. Collect and process biological specimens for analysis. Recognize factors that affect procedures and results, and take appropriate actions within predetermined limits when corrections are indicated. Monitor quality control within predetermined limits. Perform preventative and corrective maintenance of equipment and instruments or refer to appropriate source for repairs. Demonstrate professional conduct and interpersonal communication skills with patients, laboratory personnel, other health care professionals, and with the public. Recognize the responsibilities of other laboratory and health care personnel and interact with them with respect for their jobs and patient care. Apply basic scientific principles in learning new techniques and procedures.

NA 204. Patient Care Technician
4 Credits (3+3P)
This course will prepare Certified Nursing Assistants (CNAs) to work in the acute care setting through an expansion of their existing basic skill set. Students will acquire expanded acute care skills, critical thinking skills, and knowledge in caring for patients of all ages. Currently CNA certified. Restricted to Community Colleges campuses only.
Prerequisite(s): (NA 104, NA 105, NA 109, NA 110, AHS 120, and (BIOL 1130 or (BIOL 2210 & BIOL 2225)).
Corequisite(s): NA 205.

NA 205. Patient Care Technicians Practicum
4 Credits (1+9P)
This course will prepare Certified Nursing Assistants (CNAs) to work in the acute care setting through an expansion of their existing basic skill set. Students will acquire expanded acute care skills, critical thinking skills, and knowledge in caring for patients of all ages. Students will go to acute care settings to practice newly acquired skills. Must have a "C" or better to pass. Restricted to Community Colleges campuses only.
Prerequisite(s): (NA 104, NA 105, NA 109, NA 110, AHS 120, & (BIOL 1130 or (BIOL 2210 & BIOL 2225)) Currently CNA Certified.
Corequisite(s): NA 204.
NA 209. Phlebotomy Laboratory Technician
4 Credits (2+4P)
A continuation of NA 109, Phlebotomy Basic. This course furthers the experience, knowledge and skills of the phlebotomist by providing advanced specimen collection techniques, skills to assist with lab management, patient data processing, quality control measures, and customer service. Completion of thirty clinical hours and fifty successful venipunctures are required. Attendance in mandatory. Requires a final grade of “C” or better to pass. Consent of Instructor required. Restricted to Community Colleges campuses
Prerequisite(s)/Corequisite(s): ENGL 1110G or ENGL 1110H or ENGL 1110M. Prerequisite(s): (BIOL 1130 or BIOL 2310 & BIOL 2225), and AHS 120, and NA 109.
Learning Outcomes
1. Students will learn and demonstrate advanced specimen collection techniques. Students will learn and demonstrate advanced laboratory processing skills. Students will effectively employ skills required for patient information processing. Students will employ concepts of medical asepsis and infection control. Students will apply knowledge and skills required for quality control measures in the laboratory setting. Students will demonstrate professional and appropriate communication, in addition to soft skills. Students will learn and practice blood collection techniques in preparation for the PBTASCP national certification exam.

NA 210. Administrative Procedures for Medical Assistants
4 Credits (4)
This course will provides students with the administrative procedures needed for a medical assistant. Skills will include creating an welcoming environment, cultural considerations, office safety, opening and closing procedures, computer operation and management, written and telephonic communications, financial procedures, patient scheduling, medical record management, and medical insurance, billing, and coding. Restricted to Community Colleges campuses
Prerequisite(s)/Corequisite(s): NA 212. Prerequisite(s): MATH 1215, and ENGL 1110G, and AHS 120, and BIOL 1130 or BIOL 2225.
Learning Outcomes
1. Create and maintain a medical facility environment
2. Demonstrate professional business communications in writing, via telephone, and email.
3. Demonstrate patient scheduling, screening calls, and check-in.
4. Create a patient chart and demonstrate medical record management.
5. Demonstrate the use and management of an electronic health record.
6. Identify insurance and billing terminology.
7. Identify the different characteristics of third party medical payer sources.
8. Collect information for billing, and precertification for services.
9. Identify common procedure codes for diseases and procedures
10. Complete billing and coding forms.
11. Demonstrate office financial practices, managing patient accounts, and tracking, collecting payments, documentation, and performing banking procedures.
12. Performing inventory, and purchasing of supplies.
13. Identify billing and collection procedures.
15. Apply laboratory regulations for safety and quality in the medical laboratory
16. Identify legal considerations in the management of a medical office.

NA 212. Medical Assistant Capstone Course
6 Credits (6)
This course provides the student with entry-level theory and limited "hands-on" training in basic and routine clinical office tasks. The course will equip the Medical Assistant (MA) student with the competencies required to perform in a medical office under the direct supervision of a physician. The graduate will be able to assist the physician with physical exams, ECGs, phlebotomy, and minor surgical procedures. CNA Certification within the last 5 years.
Prerequisite(s): NA 105, NA 110, NA 109, AHS 120, BIOL 1130, BOT 208, HIT 228, HIT 248.
NA 214. Medical Assistant Practicum
6 Credits (1+6P)
This course is the practicum for NA 212 Medical Assistant Fundamentals Capstone Course. Students will prepare for a career as a medical assistant in medical offices and clinics. During practicum students will observe and participate in 180 hours in a supervised work environment using knowledge and skills learned in NA 212. This course includes weekly post-practicum conferences with the instructor. The student will be evaluated by both the employer and the instructor. Requires a "C" or better to pass. Upon successful completion the student may be eligible to test for National Certification. Students who have been CNA Certified within the last 5 years can use this to enroll into this course. Consent of Instructor required.
Prerequisite(s)/Corequisite(s): NA 212. Prerequisite(s): NA 105, NA 110, NA 109, AHS 120, BIOL 1130, BOT 208, HIT 228, HIT 248. Restricted to Las Cruces campus only.

NAV-NAVAJO
NAV 101. Introduction to Navajo Studies
3 Credits (3)
Covers geography, demography, institutions of modern Navajo society with historical overview. Restricted to: Community Colleges only.
NAV 111. Elementary Navajo I
4 Credits (4)
Navajo for beginners with emphasis on speaking skills.
Prerequisite: not open to Navajo-speaking students except by consent of instructor.
NGEC-NATURAL GAS ENGINE COMP

NGEC 133. Natural Gas Engine Repair Technology
5 Credits (5)
This course will cover the engine fundamentals, cylinder head and valve trains, engine block, engine servicing, lubrication and cooling systems. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes
1. A basic knowledge about engine operation.
2. Practice shop safety, ability to identify potential hazards, tool identification, proper rigging and crane operation.
3. Ability to identify specific components of a natural gas engine and their function.
4. Locate and identify various components on and off an engine.
5. Safely start large stationary industrial natural gas engines.
6. List the steps of preventive maintenance on natural gas engines.
7. Completely disassemble a natural gas engine, clean and organize parts, and measure critical clearances using appropriate precision measuring tools.
8. Replace or repair any defects that are found on assigned engine, compile a list of parts needed to make repairs, assemble engine correctly, and start and run the engine.

NGEC 175. Natural Gas Compression Technology I
4 Credits (4)
This course delivers an introduction to the theory, application, rotary, and centrifugal natural gas compressor including operating principles, maintenance, and repair of the reciprocating, identification of the component parts and their functions, methods of balancing, and lubrication systems, and design characteristics. This course will also include calculations of gas flow, compressor sizing, rod loads, compressor analysis charts and horsepower ratings. In addition, this course will cover safety, precision measurement, use of the manuals, use of tools, and proper adjustments will be included with overhaul exercises. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes
1. Identify and analyze the re-usability of basic compressor parts.
2. Accurately diagnose failure of key core components of basic compressors.
3. Identify basic preventive maintenance tasks on natural gas compressors.
4. Identify the key concept of troubleshooting of natural gas compressors by applying failure analysis techniques to arrive at the root cause of the failure.
5. Demonstrate safety procedures in the workshop and follow appropriate steps to work with the compressor.

NGEC 185. Natural Gas Compression Technology II
4 Credits (4)
This course delivers the principles of operation for natural gas engines and compressors. It includes process of startup and shutdown of natural gas compressor skid. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Prerequisite(s): Grade of C or better in NGEC 175.

Learning Outcomes
1. Demonstrate a hub alignment.
2. Describe start up procedures.
3. Describe shutdown procedures.
4. Demonstrate proper bolt torquing with appropriate tools.
5. Demonstrate proper valve removal.
6. Demonstrate proper safety procedures including lockout and tag-out.

NGEC 245. Natural Gas Engine Management and Control Technology
5 Credits (5)
This course delivers operational and application studies of Engine Management System Fundamentals, Sensors, Engine Inspection, and Engine Management Fault Investigation. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes
1. Identify specific components of a natural gas engine and their function.
2. Explain the four major systems of a natural gas engine.
3. Identify specific components of a natural gas engine and their function.
4. List the steps of preventive maintenance on natural gas engines.

NGEC 246. Fuel and Emissions Technology
5 Credits (5)
This course delivers operational and application studies of fuel components and emissions control system. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes
1. Identify specific components of a natural gas engine and their function.
2. List the steps of preventive maintenance on natural gas engines.
3. Know the fuel components and operation
4. Locate and identify various components on and off an engine.
5. Safely start stationary industrial natural gas engines.

NGEC 295. Special Topics
2 Credits (2)
Topics are to be announced in the Schedule of Classes. The topic and project are to be discussed and implemented between faculty member and student. Student gives presentation to class at the end of the term of study. All-Natural Gas Compression Technology classes in the NGEC Program must be completed or in progress before enrolling in this course. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes
1. The student should provide an overall meaning during the individual time in the NGEC Program for this final project.
NMNC-NEW MEXICO NURSING EDUCATION CONSORTIUM

NMNC 3110. Introduction to Nursing Concepts
3 Credits (3)
This course introduces the nursing student to the concepts of nursing practice and conceptual learning. Same as NMNC course no.: NMNC 1110. Restricted to: BSN,BSNBSN, NMNC majors. Restricted to Las Cruces campus only.
Learning Outcomes
1. Integrate knowledge from nursing pre- and co-requisites into a conceptual learning model.
2. Apply conceptual learning to select nursing concepts.
3. Define personal values, beliefs, and attitudes about health and wellness.
4. Describe importance of identifying patient safety issues.
5. Describe roles and values of nursing and members of the health care team.
6. Describe standards and regulations that apply to nursing practice.

NMNC 3120. Evidence-Based Practice
3 Credits (3)
The focus of this course is the principles of evidence-based nursing practice. It includes the identification of clinical practice problems, the evaluation of available evidence, and the integration of evidence with clinical expertise and patient preferences in application to practice. Restricted to: NURS majors. Students must be admitted to the nursing program to enroll in this course.
Corequisite(s): NMNC 3110, NMNC 3135.
Learning Outcomes
1. Examine integrating evidence-based practice with diverse patients’ values.
2. Identify clinical practice problems and issues.
3. Explain the research process.
4. Describe how evidence is generated through the research process.
5. Appraise evidence and standards of care that support best clinical outcomes and patient safety.
6. Utilize informatics to access evidence-based practice guidelines.

NMNC 3135. Principles of Nursing Practice
4 Credits (4)
This course introduces the nursing student to the application of concepts through clinical skills in seminar, laboratory, and/or clinical settings. Principles of communication, assessments, safety, and interventions including accurate calculation, measurement, and administration of medications will be included. Same as NMNC course no.: NMNC 1135. Students must be admitted to the nursing program to enroll in this course. May be repeated up to 4 credits. Restricted to: BSN majors only.
Corequisite(s): NMNC 3110, NMNC 3120.
Learning Outcomes
1. Describe the different types and characteristics of communication in professional nursing practice.
2. Utilize the concepts presented in Level One nursing courses in the application to the care of the patient.
3. Demonstrate the principles of safety during the implementation of nursing skills.
4. Demonstrate the learned skills in patient based scenarios.
5. Utilize the nursing process to provide safe and effective care.

NMNC 3120. Health and Illness Concepts I
3 Credits (3)
This course will focus on health and illness concepts across the lifespan. Concepts covered are related to homeostasis/regulation, sexuality/reproductive, protection/movement, and emotional processes. Same as NMNC course no.: NMNC 1210 Restricted to: NURS majors.
Prerequisite(s): NMNC 3110, NMNC 3120 & NMNC 3135.
Corequisite(s): NMNC 3220, NMNC 3230, NMNC 3235.
Learning Outcomes
1. Describe the scope, risk factors, physiologic processes, attributes, and clinical management of selected concepts and exemplars across the lifespan.
2. Discuss evidence-based practices and health care standards of care related to the concepts/exemplars of the course.
3. Explain the collaboration necessary related to the concepts/exemplars of the course.
4. Utilize informatics and resources related to the concepts/exemplars of the course.
5. Integrate considerations of normal physiology and healthy adaptations into nursing practice of patients across the lifespan.

NMNC 3220. Health Care Participant
3 Credits (3)
This course introduces the nursing student to the attributes of the health care participant as an individual, a family, or a community. Same as NMNC course no.: NMNC 1220. Restricted to: NURS majors.
Prerequisite(s): NMNC 3110, NMNC 3120 & NMNC 3135.
Corequisite(s): NMNC 3220, NMNC 3230, NMNC 3235.
Learning Outcomes
1. Identify values, beliefs and attitudes toward health and illness of the health care recipient.
2. Articulate the role of nursing in relation to the health of vulnerable populations and elimination of health disparities.
3. Describe the protective and predictive factors which influence the health of families, groups, communities, and populations.
4. Describe the use of evidence-based practices to guide health teaching, health counseling, screening, outreach, disease and outbreak investigation, referral, and follow-up throughout the lifespan.
5. Describe the use of information and communication technologies in preventive care.
6. Examine the health care and emergency preparedness needs of the local community and in the state of New Mexico.
7. Identify clinical prevention and population-focused interventions with attention to effectiveness, efficiency, cost-effectiveness, and equity.
NMNC 3230. Nursing Pharmacology
3 Credits (3)
This course introduces the nursing student to pharmacologic nursing practice from a conceptual approach. Same as NMNC course no.: NMNC 1230. Restricted to: BSN,BSNP,BSNR,NURS majors.
Prerequisite(s): NMNC 3110, NMNC 3120 & NMNC 3135.
Corequisite(s): NMNC 3210, NMNC 3220, and NMNC 3235.
Learning Outcomes
1. Identify the nurse’s professional role related to pharmacotherapeutics in diverse populations across the lifespan.
2. Identify safety issues and minimize risk potential associated with pharmacotherapeutics and complementary and alternative medicine.
3. Utilize evidence-based information integrating pharmacologic and pathophysiologic concepts to guide medication therapeutics.
4. Describe health care system protocols related to pharmacotherapeutics.
5. Identify methods of communication with the health care team related to pharmacotherapeutics.
6. Utilize informatics systems related pharmacotherapeutics.
7. Describe common classes of drugs that are used in health care, including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics.

NMNC 3235. Assessment and Health Promotion
4 Credits (4)
This course introduces the nursing student to the assessment of and the health promotion for the health care participant as an individual, a family, or a community. This course uses seminar, laboratory and/or clinical settings. Same as NMNC course no.: NMNC 1235. Restricted to: NURS majors.
Prerequisite(s): NMNC 3110, NMNC 3120 & NMNC 3135.
Corequisite(s): NMNC 3210, NMNC 3220, NMNC 3230.
Learning Outcomes
1. Assess physical health including a focus on the health/illness beliefs, values, attitudes, developmental level, functional ability, culture, and spirituality of the participant.
2. Assess family health including a focus on family health history, environmental exposures, and family genetic history to identify current and future health problems.
3. Collaborate with a community to assess their health needs.
4. Utilize community assessment data and evidence-based practice as basis for identifying community health needs.
5. Document health assessments in electronic health record or written formats.
6. Share community assessment data with other health care professionals to identify needed interventions.
7. Explain the role of the nurse in relation to advocacy for the health care recipient.
8. Analyze education materials for health literacy concerns.
9. Explain the role of the nurse in relation to advocacy for the health care recipient.

NMNC 4310. Health & Illness Concepts II
3 Credits (3)
This course covers health and illness concepts across the lifespan with the focus on chronic conditions. Concepts covered are related to oxygenation and hemostasis, homeostasis and regulation, protection and movement, and cognition and behavior processes. Same as NMNC course no.: NMNC 2310. Restricted to: NURS majors.
Prerequisite(s): NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, & NMNC 3235.
Corequisite(s): NMNC 4320 & NMNC 4335.
Learning Outcomes
1. Relate the scope, risk factors, physiologic processes, attributes, and clinical management of selected concepts and exemplars across the lifespan.
2. Investigate evidenced-based practice, standards of nursing care, and factors to improve safety related to selected concepts and exemplars.
3. Examine how members of the health care team collaborate in the delivery of care related to selected concepts and exemplars.
4. Discuss available technology for the delivery of nursing care related to selected concepts and exemplars.
5. Apply selected health and illness concepts to the nursing care of patients across the lifespan.

NMNC 4320. Professional Nursing Concepts I
3 Credits (3)
This course covers foundational concepts for professional development, including selected professional attributes and care competencies. Same as NMNC course no.: NMNC 2320. Restricted to: BSN,BSNP,BSNR,NURS majors. Corequisite(s): NMNC 4310 & NMNC 4335.
Prerequisite(s): NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, & NMNC 3235.
Learning Outcomes
1. Examine the ethical values, virtues, principles, and policies that guide the moral delivery of health care.
2. Relate the nurse’s interpretation of patient needs, concerns, and health problems with nursing decisions.
3. Discuss the factors which motivate individuals, groups, and organization to deliver quality nursing care.
4. Determine how interactions of health care team members provide quality patient care.
NMNC 4335. Care of Patients with Chronic Conditions  
4 Credits (8P)  
The focus of this course is to provide safe, evidence-based nursing care for patients with chronic conditions, across the lifespan in a variety of settings. This course builds upon curricular concepts. This course is a combination of lab and clinical. Same as NMNC course no.: NMNC 2335. Restricted to: BSN, BSNP, BSNR, NURS majors.  
Prerequisite(s): NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, & NMNC 3235.  
Corequisite(s): NMNC 4310 & NMNC 4320.  
Learning Outcomes  
1. Demonstrate ethical practice in the delivery of nursing care to patients with chronic conditions.  
2. Apply understanding of the principles of safe nursing care for patients with chronic conditions.  
3. Demonstrate knowledge of appropriate evidence-based protocols when providing nursing care to patients with chronic conditions.  
4. Apply understanding of appropriate health care policy, finance, and regulatory environments in the care of patients with chronic conditions.  
5. Communicate effectively with patients with chronic conditions and healthcare team members.  
6. Demonstrate an understanding of the technology used in the care of patients with chronic conditions.  
7. Utilize the nursing process to deliver nursing care to patients with chronic conditions.  

NMNC 4410. Health & Illness Concepts III  
4 Credits (4)  
This course will cover health and illness concepts, with the focus on acute conditions across the lifespan. Concepts covered are related to homeostasis/regulation, oxygenation/hemostasis, protection/movement, and emotional processes. Same as NMNC course no.: NMNC 2410. Restricted to: BSN, BSNP, BSNR, NURS majors.  
Prerequisite(s): NURS 360, NURS 361, & NMNC 3120.  
Corequisite(s): NMNC 4435 & NMNC 4445.  
Learning Outcomes  
1. Anticipate health care participant's risk for potentially harmful situations related to the concepts/exemplars of the course.  
2. Integrate evidence-based practices and health care standards of care related to the concepts/exemplars of the course.  
3. Differentiate the multiple roles of the health care team related to the concepts/exemplars of the course.  
4. Integrate use of appropriate technology related to the concepts/exemplars of the course.  
5. Interrelate risk factors, concepts, physiologic processes, patient attributes, and clinical management of the exemplars covered in this course.  

NMNC 4435. Clinical Intensive I  
4 Credits (4)  
This is the first of two Level Four clinical courses in which the student will apply the curricular concepts in the management of care participants with acute conditions across the lifespan. Same as NMNC course no.: NMNC 2435. Restricted to: BSN, BSNP, BSNR, NURS majors.  
Prerequisite(s): NMNC 4310, NMNC 4320 & NMNC 4335.  
Corequisite(s): NMNC 4435 & NMNC 4445.  
Learning Outcomes  
1. Integrate nursing practice concepts into their professional nursing practice.  
2. Integrate diverse patient values into plan of care for patients with acute illness.  
3. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice.  
4. Integrate an evidence-based approach in the delivery and evaluation of nursing care to acutely ill patients across the lifespan.  
5. Evaluate the use of policies and procedures within the acute care setting.  
6. Effectively collaborate with the health care team in the delivery of patient care.  
7. Integrate use of appropriate technology for the delivery of nursing care to acutely ill patients.  

NMNC 4445. Clinical Intensive II  
4 Credits (4)  
This is the second of two Level Four clinical courses in which the student will apply the curricular concepts in the management of care participants with acute conditions across the lifespan. Same as NMNC course no.: NMNC 404. Restricted to: BSN, BSNP, BSNR, NURS majors.  
Prerequisite(s): NMNC 4310, NMNC 4320 & NMNC 4335.  
Corequisite(s): NMNC 4410 & NMNC 4435.  
Learning Outcomes  
1. Integrate nursing practice concepts into their professional nursing practice.  
2. Integrate diverse patient values into plan of care for patients with acute illness.  
3. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice.  
4. Integrate an evidence-based approach in the delivery and evaluation of nursing care to acutely ill patients across the lifespan.  
5. Evaluate the use of policies and procedures within the acute care setting.  
6. Effectively collaborate with the health care team in the delivery of patient care.  
7. Integrate use of appropriate technology for the delivery of nursing care to acutely ill patients.
NMNC 4510. Concept Synthesis  
3 Credits (3)  
This course focuses on the synthesis of curricular concepts in the care of complex patients. Restricted to: BSN, BSNP, BSNR, NURS majors.  
**Prerequisite(s):** NMNC 4410, NMNC 4435 & NMNC 4445.  
**Corequisite(s):** NMNC 4520, NMNC 4535, & NMNC 4545.  
**Learning Outcomes**  
1. Synthesize curricular concepts into patient-centered nursing practice that is appropriate for diverse individuals, families, and communities.  
2. Synthesize the evidence base into nursing care of patients across the lifespan.  
3. Evaluate leadership principles that integrate the application of health care policies and standards.  
4. Evaluate effectiveness of interprofessional collaboration in the delivery of health care for quality patient outcomes.  
5. Evaluate technologies for the management of information and in the delivery of patient care.  

NMNC 4520. Professional Nursing Concepts II  
3 Credits (3)  
This course covers policy concepts for professional nursing. Restricted to: BSN, BSNP, BSNR, NURS majors.  
**Prerequisite(s):** NMNC 4410, NMNC 4435, & NMNC 4445.  
**Learning Outcomes**  
1. Integrate principles of quality improvement and safety into nursing practice within health care organizations and systems.  
2. Demonstrate leadership behaviors through the application of policies that apply to health care delivery.  
5. Compare and contrast health care policies and evidence-based practice.  

NMNC 4535. Clinical Intensive III  
4 Credits (4)  
The focus of this clinical course is application of the curricular concepts in the management of care participants with complex conditions across the lifespan. Same as NMNEC course no.: NMNECS03. Restricted to: BSN, BSNP, BSNR, NURS majors.  
**Prerequisite(s):** NMNC 4410, NMNC 4435, & NMNC 4445.  
**Corequisite(s):** NMNC 4510, NMNC 4520, & NMNC 4545.  
**Learning Outcomes**  
1. Integrate diverse patient values into plan of care for patients with complex illness.  
2. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice.  
3. Integrate an evidence-based approach in the delivery and evaluation of nursing care to patients with complex illness across the lifespan.  
4. Evaluate the use of policies and procedures within the complex care setting.  
5. Effectively collaborate with the health care team in the delivery of patient care.  
6. Integrate use of appropriate technology for the delivery of nursing care to patients with complex illness.  

NMNC 4545. BSN Capstone  
4 Credits (4)  
The synthesis, integration, and application of concepts to professional nursing practice will be applied in the final clinical course to ensure readiness to enter practice. Restricted to: BSN, BSNP, BSNR, NURS majors.  
**Prerequisite(s):** Successful completion of all previous nursing courses.  
**Corequisite(s):** NMNC 4510, NMNC 4520, & NMNC 4535.  
**Learning Outcomes**  
1. Synthesize and integrate nursing practice concepts into their professional nursing practice.  
2. Engage in professional nursing practice that is patient-centered and appropriate for diverse individuals, families, and communities.  
3. Integrate principles of quality improvement and safety into nursing practice within health care organizations and systems.  
4. Deliver nursing care that is evidence-based.  
5. Demonstrate leadership behaviors through the application of policies that apply to health care delivery.  
7. Utilize technologies for the management of information and in the delivery of patient care.  

**NURS-NURSING**  

NURS 110. Pre-Nursing Freshman Seminar  
1 Credit (1)  
This Freshman seminar provides an introduction to the university and its resources, an orientation to the pre-nursing curriculum, and overview of concepts for professional nursing practice. Emphasis is placed on exploring the nurse’s role as an integral member of the healthcare team across multiple contexts and settings, and developing a professional identity. Consent of Instructor required.  

NURS 120. Introduction to Pharmacology  
3 Credits (3)  
General principles of pharmacology including methods of administration, effect on the body, interactions with other drugs, and classification of drugs. Focus on the health care provider’s role in safe pharmacologic intervention. May be repeated up to 3 credits. Crosslisted with: HIT 120. Restricted to Community Colleges campuses only.  

NURS 130. Foundations of Pharmacology  
3 Credits (3)  
This course provides the nursing student with an introduction to the foundations of pharmacology including: science of drug action, principles of medication administration, accurate calculation of drug doses, medication therapy across the lifespan, application of medications to treat health alterations, normal and adverse responses by the client to medication therapy, medication safety, medication regulation, national patient safety goals, and appropriate nursing interventions to achieve the desired goals of medication therapy. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: Community Colleges only.  
**Corequisite(s):** NURS 147 & NURS 149. Restricted to: NUR majors.
NURS 134. Foundation of Nursing Skills and Assessment
3 Credits (1+6P)
This course provides nursing students with introductory nursing knowledge related to performance of nursing skills and assessment including: techniques of fundamental nursing care, basic and intermediate nursing skills, and foundational physical assessment techniques associated with care across the lifespan. Open to students who have been accepted into the nursing program. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 130, NURS 147 lab, & NURS 149.

NURS 136. Foundations of Nursing Practice
6 Credits (4+6P)
This course will introduce the nursing student to foundational theoretical concepts of professional nursing practice, the nursing process, and foundational nursing skills. It includes developmental concepts related to clients across the lifespan. Clinical experiences in the simulation lab, long-term care, the community, and rehabilitation settings will provide the student with the opportunity to apply learned skills to provide total care to meet needs of one adult client and to develop care planning skills related to actual problems. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 134, NURS 136.

NURS 137. Care of Geriatric Patient
3 Credits (3)
This course will introduce the nursing student to foundational concepts of age-appropriate/specific care of the older adult who represents the largest population of individuals placing demands on the healthcare system. It includes basic and complex concepts and issues related to care of the older client across the care continuum, provision of cost-effective care in a resource sparse environment. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the nursing program to enroll in this course. Restricted to: NURS majors. Restricted to Community Colleges campuses only.
Corequisite(s): NURS 134 & NURS 136.

NURS 140. Pathophysiology for Allied Health Professionals
3 Credits (3)
Introduction to the nature of disease and its effect on body systems. Deals with the disease processes affecting the human body via an integrated approach to specific disease entities. Includes a review of normal functions of the appropriate body systems. Diseases are studied in relationship to their etiology, pathology, physical signs and symptoms, diagnostic procedures, complication, treatment modalities, and prognosis. Restricted to Allied Health and Health Information Technology majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 130, NURS 147, & NURS 149L.

NURS 146. Common Health Deviations
6 Credits (4+6P)
Common health deviations and the manner by which they alter various body functions are explored. The role of the licensed practical nurse in assisting clients with common health deviations is presented. Ethical and legal implications and the role of the practical nurse are also considered. The licensed practical nursing student will utilize the application of knowledge to client care situation both in the subacute and acute care settings. The nursing process is presented as guide for coordinating client care. Grade of C or better. May be repeated up to 6 credits. Restricted to: NURSING majors. Restricted to Carlsbad campus only.
Prerequisite(s): NURS 153, NURS 156, NURS 154, NURS 157, and NURS 210 or consent of program director.

NURS 147. Adult Health I
6 Credits (4+6P)
This course focuses on application of the nursing process and theoretical concepts of care for adults with commonly occurring health problems. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to continue development of: prioritization skills, proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, care planning skills related to patient actual, psychosocial, and potential problems in the delivery of total nursing care to meet needs of one adult client. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to Community Colleges campuses only.
Corequisite(s): NURS 130, NURS 147 lab, & NURS 149.

NURS 149. Mental Health Nursing
3 Credits (2+3P)
This course will allow the nursing student to develop skills necessary to provide nursing care for clients with mental health problems in various health care settings including: common mental health disorders, psychosocial dysfunction, psychosocial safety/substance abuse issues, violence, suicide, restraints, developmental age related pathophysiology, psychopharmacology, cultural/religious considerations, grief/loss, promotion of mental health, and therapeutic communication. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to develop ability to develop: proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, care planning skills related to patient actual, psychosocial, and potential problems in the delivery of total nursing care to meet needs of one client across the life span with acute/chronic mental health needs. Students must be concurrently enrolled in both the lecture and lab sections of this course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program in order to enroll in the course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 130, NURS 147, & NURS 149L.

NURS 150. Medical Terminology
3 Credits (3)
Understanding of the basic elements of medical words. Use of medical abbreviations. Same as OEH 120 and BOT 150. May be repeated up to 3 credits. Crosslisted with: BOT 150, AHS 120 and HIT 150.
NURS 153. Medication and Dosage Calculation
1 Credit (1)
Techniques of dosage calculation for medication and fluid administration. RR applicable. Students must meet NMSU basic skills requirement in mathematics to enroll in this course.
*Corequisite(s):* NURS 156 and NURS 154.

NURS 154. Physical Assessment
2 Credits (2)
Beginning techniques of physical assessment by systems will be presented using the nursing process as a guide for providing safe client centered care throughout the life span. Grade of C or better is required. May be repeated up to 2 credits. Restricted to: NURSING majors.
Restricted to Carlsbad campus only.
*Prerequisite(s):* BIOL 1130 or BIOL 2210.
*Corequisite(s):* NURS 153, NURS 156.

NURS 155. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes.

NURS 156. Basic Nursing Theory and Practice
6 Credits (4+6P)
Introduction to the nursing profession and the beginning skills of nursing practice as it relates to normalcy. The nursing process is presented as a means of guiding the student in providing safe client centered care. Ethical and legal aspects of nursing practice are also included. Basic clinical nursing skills will be presented and practiced in the nursing lab. The student will perform these skills with clients in an actual health care setting. May be repeated up to 6 credits. Consent of Program Director requires. Restricted to: NURSING majors. Restricted to Carlsbad campus only.
*Corequisite(s):* NURS 153, NURS 154.

NURS 157. Maternal/Child Health Deviations
8 Credits (6+6P)
This course introduces the student to the concepts and principles of nursing care of the family from conception to adolescence. Utilizing the assessment, analyzing, planning, and implementation phases of the nursing process (the Care map), the student focuses on the supportive-educative nursing system to assist members of the family in meeting self-care requisites and how they are affected by the health deviations common to each developmental level beginning with conception and ending with adolescence. Knowledge gained in theoretical instruction is then applied to the patient care situation. After an introduction to the necessary clinical skills in the campus laboratory setting, students will participate in clinical experiences with the focus on the family from conception to adolescence. The assessment, analysis, planning, and implementation phases of the nursing process are emphasized as a tool to assist patients in meeting universal and developmental self-care requisites. Utilizing the nursing process, the student provides safe, client-centered care to diverse clients and families. Theoretical instruction is applied to client care situations. Students collaborate with clients, families, and the interdisciplinary team in meeting health care needs. Experiences may occur in the physician’s office, local health department, day care centers, schools, or the hospital. Grade of C or better required. Restricted to: NURSING majors. Restricted to Carlsbad campus only.
*Prerequisite:*
NURS 156, NURS 153, and NURS 154.
*Corequisite:*
NURS 210.

**Learning Outcomes**
1. Determine how values of clients, families and medical personnel impact the involvement of clients in their health care related to maternal/child and pediatric clients. Implement individualized client care utilizing an evidenced based approach related to maternal/child and pediatric clients. Choose health protection, health promotion, and disease prevention strategies in the care of maternal/child and pediatric clients. Apply the scope, risk factors, physiologic processes, and clinical management strategies to maternal/child and pediatric clients. Choose resources for continuity of client care related to maternal/child and pediatric clients. Give examples of significant information to report to other disciplines. Apply the principles of delegation in the provision of client care with maternal/child and pediatric clients. Utilize evidenced based information to implement a plan of care and employ nursing interventions for maternal/child and pediatric clients. Use the principles of ethical practice in the delivery of nursing care for maternal/child and pediatric clients. 1 Apply policies, procedures and standards of care related to maternal/child and pediatrics in the provision of client care. 1 Apply nursing interventions to reduce risk of harm to self and others related to maternal/child and pediatric clients. 1 Choose available technology for delivery of nursing care related to maternal/child and pediatric clients.

NURS 201. Special Topics
1-4 Credits
Specific topics to be announced in the Schedule of Classes. May be repeated for a maximum of 10 credits. Restricted to: Community Colleges only.
*Prerequisite:*
admission to the nursing program.

NURS 209. Independent Study
1-4 Credits
Individual studies to meet identified student needs. May be repeated for a maximum of 10 credits. Restricted to: Community Colleges only.
*Prerequisite:*
admission to the nursing program.
NURS 210. Pharmacological Requisites of the Childbearing Family
1 Credit (1)
Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care will be discussed focusing on medications commonly utilized with the childbearing family. Medication classes to be discussed include labor and delivery, analgesic, vitamins, respiratory, gynecological, endocrine, and anti-microbial/anti-infective drugs. Grade of C or better required.
Prerequisite(s): NURS 153, NURS 154 and NURS 156.
Corequisite(s): NURS 157.
Learning Outcomes
1. Effective communication skills in reading, writing, listening, and speaking. Basic critical thinking skills including problem identification, evidence acquisition, evidence evaluation, and reasoning/conclusion. An understanding of personal and social responsibility. An ability to apply the fundamental concepts of quantitative reasoning in mathematics and science. Appropriate information and digital literacy, and skills for personal and professional use.

NURS 211. Pharmacological Requisites of Simple Health Deviations
1 Credit (1)
Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care are addressed focusing on medications related to the psychiatric, gastrointestinal, musculoskeletal, gynecological, hematomical, and anti-neoplastic client. Grade of C or better required. Restricted to: Carlsbad campus only.
Prerequisite(s): BIOL 2210 and BIOL 2225 and NURS 153, NURS 154, NURS 156, NURS 157 and NURS 210.
Corequisite(s): NURS 246 and NURS 258.

NURS 212. Pharmacological Requisites of Complex Health Deviations
1 Credit (1)
Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care is examined focusing on medications related to complex health deviations. Drug classes to be discussed include cardiovascular, renal, endocrine, and neurological. Grade of C or better required.
Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 246, NURS 258, NURS 210 and NURS 211.
Corequisite(s): NURS 256 and NURS 260.
Learning Outcomes
1. Apply principles of teaching/learning in educating clients on the use, adverse effects and interactions of pharmacotherapeutic agents used to treat complex health deviations. Collaborate with members of the health care team in the delivery of pharmacotherapeutics to clients with complex health deviations. Give examples of commonly prescribed drugs used to treat clients with complex health deviations and related pharmacokinetics and pharmacodynamics. Discuss the relationship between the use of pharmacotherapeutics and the treatment of disease in clients with complex health deviations. Identify safety issues and minimize risk potential associated with pharmacotherapeutics.

NURS 224. Maternal Child Nursing
5 Credits (4+3P)
This course provides the intermediate nursing student with an in-depth review of care of the childbearing woman, family structures and roles, and nursing care of the child from birth through adolescence. Emphasis includes the care of pre-partum, intra-partum and postpartum clients, the neonate and health deviations in pediatric clients. Clinical experiences in the simulation lab, the community, and acute care settings will provide the student with the opportunity to apply learned skills to provide total care to meet needs of up to two adult, neonatal, or pediatric clients and to apply care planning skills related to actual, psychosocial and potential problems. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 235, & NURS 236.

NURS 226. Adult Health II
6 Credits (4+6P)
This course focuses on application of nursing process and theoretical concepts of care for adults with complex health alterations. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to apply prioritization skills, maintain proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, and care planning skills related to patient actual, psychosocial, and potential problems in the delivery of nursing care to meet needs of three adult clients. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 224 & NURS 235.

NURS 235. Nursing Leadership and Management
1 Credit (1)
This course introduces the intermediate nursing student to professional practice principles of nursing leadership and management including: health policy and politics, fiscal management & budgeting, conflict management, decision making, interdisciplinary practice, working with teams, roles in disaster planning and management, application of standards of care to risk management, organization of care delivery, health care systems, processes, and practice environments. May be repeated up to 1 credits. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to Community Colleges campuses only.
Corequisite(s): NURS 224, NURS 226.
NURS 236. Nursing Preceptorship - Adult Health III
6 Credits (2+12P)
This course is the final course involving care of the patient with acute or chronic illness. It focuses on care of patients with complex or multi-system problems allowing the graduating nursing student to discuss and apply all the skills learned in previous nursing courses. After successfully passing the HESI exam, students have clinical practice with preceptor in various health care settings. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to: organize care of a group of clients, maintain proficiency in performance of nursing skills, collaborate with clients, families, peers and health care team members, and support care planning skills related to patient actual, psychosocial, and potential problems in the delivery of nursing care to meet needs of the preceptors group of clients. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program and have successfully completed all level 1, 2 and 3 nursing courses may enroll in this course. Clinical may include inpatient or outpatient care, days, evenings, nights, or weekend experiences. Students are required to work the preceptors assigned schedule. NCLEX Review must be done concurrently. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 201.

NURS 246. Health Deviations I
7 Credits (4+9P)
Introduction to medical/surgical clients, whose health care needs are routine and predictable. Focus is on simple health deviations, including concepts relative to health promotion and maintenance. The nursing process is utilized to provide evidenced based, safe client centered care. Students are expected to apply clinical judgment, communicate and collaborate with clients and the interdisciplinary team in providing care for a group of two to three clients. Grade of C or better required. May be repeated up to 7 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.
Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157 and NURS 210.
Corequisite(s): NURS 211, NURS 258.

NURS 255. Health Deviations II
8 Credits (6+12P)
Concepts and principles applied to clients with complex health deviations. Building upon knowledge gained in NURS 246, focus will be on acutely ill clients. The nursing process continues to serve as a guide to provide safe, client centered care. The student collaborates with the interdisciplinary team in all aspects of client care. Student experiences the role of the staff nurse under the guidance and direction of the nursing instructor. Grade of C or better required. May be repeated up to 8 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.
Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 210, NURS 211, NURS 246, and NURS 258.
Corequisite(s): NURS 212, NURS 260.

Learning Outcomes
1. Apply each step of the nursing process as a method of organizing the nursing care for patients with complex health deviations. Discuss the patient’s health care needs that occur as a result of complex health deviations. Explain methods the nurse can employ in allowing the patient to assume the right and responsibility for his own care. Incorporate the concepts and principles derived from the biological, developmental, social, nutritional and computer sciences and nursing knowledge that relate to the nursing care of patients with complex health deviations. Explain the roles and functions of the members of the health care team including ancillary personnel as they relate to the care of patients with complex health deviations. Explain the rationale for the performance of the following technical skills: a. EKG monitoring; b. Rhythm strip interpretation; c. Hemodynamic monitoring and interpretation; d. Tracheal suctioning

NURS 258. Psychosocial Requisites: A Deficit Approach
3 Credits (2+3P)
Nursing theory and practice as it relates to the care of the client experiencing psychosocial health deviations. The role of the nurse is discussed along with the ethical and legal aspects of care for the client with psychosocial disorders. Building upon the communication skills of listening and responding, the student develops the therapeutic skills of interpersonal relationships. Grade of C or better is required. May be repeated up to 3 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.
Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 210, and NURS 246.
Corequisite(s): NURS 211, NURS 246.
NURS 260. Management of Patients with Health Deviations
3 Credits (3)
A capstone course to the nursing program in which principles in management and delegation to less prepared personnel is explored. A review of leadership roles, legal issues, quality initiatives, informatics and scope of practice is included. Preparation for the NCLEX is an integral portion of the course. Grade of C or better is required. May be repeated up to 2 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.
Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 210, NURS 211, NURS 246, and NURS 258.
Corequisite(s): NURS 212, NURS 256.

Learning Outcomes
1. Discuss nursing practice concepts relevant to the practice of professional nursing. Evaluate principles of quality improvement and safety into nursing practice within healthcare organizations and systems. Apply leadership concepts through the application of policies that apply to healthcare delivery. Promote a culture of safety through anticipating and eliminating potentially harmful situations. Collaborate in systems analysis when clinical errors or near misses occur to reduce harm, minimize blame, and encourage transparency. Integrate evidence in determining best clinical practice. Demonstrate basic knowledge of healthcare policy, finance, and regulatory environments, including local, state, national, and global healthcare trends. Use an ethical framework to evaluate the impact of policies of healthcare, especially for vulnerable populations.

NURS 315. Introduction to Professional Nursing for the R. N.
3 Credits (3)
Transition course for the R.N. providing an overview of theories and concepts that are the bases for professional nursing practice.

NURS 322. Nursing Health Assessment
3 Credits (3)
Theoretical basis for the biopsychosocial assessment of individual patients across the life span for the RN. Restricted to Majors.

NURS 324. Nursing Care of the Older Adult
3 Credits (3)
Survey course addressing nursing care provisions for the elderly population in a variety of acute, community and home settings.

NURS 325. Human Pathophysiology for Nursing
3 Credits (3)
Concepts of alteration and adaptation in structure and function of the human body across the life span.

NURS 328. Human Pathophysiology Foundation for Nursing
4 Credits (4)
Human pathophysiology concepts of adaptation and alteration in function and structure across the life span and their implications for nursing practice. May be repeated up to 4 credits. Restricted to: BSNR,BSN,BSNP or consent of instructor majors.
Prerequisite(s): Grade of C or better in both (BIOL 353 & BIOL 2221/BIOL 354), or (BIOL 2210 & BIOL 2225), or (SPMD 2210 & SPMD 371).
Corequisite(s): NMNC 3110, NMNC 3135, NURS 362.

NURS 353. Nursing Informatics
3 Credits (3)
This course addresses nursing informatics principles and practices. Key concepts include relationship with evidence-based nursing practice, use of decision support systems, clinical information systems, telehealth, and standardized nursing language. May be repeated up to 3 credits. Restricted to: BSNC majors.

NURS 360. Introduction to Nursing Concepts
3 Credits (3)
This course introduces the nursing student to the concepts of nursing practice and conceptual learning. Same as NMNE 310. Students must be admitted to the Nursing Program to enroll in this course. Restricted to: NURS majors.
Corequisite(s): NMNC 3120.

NURS 376. Research and Evidence-Based Practice for the Practicing RN
3 Credits (3)
Course provides introduction to evidenced-based practice and research principles for the practicing RN. Evidence-based practice principles and processes are covered. Foundations of research (quantitative and qualitative) research designs and research evaluation are included. Emphasis is placed on ethical and practical issues in critiquing and using research/evidence-based findings. Restricted to BSNC majors.
Prerequisite(s): A ST 311, or admission to RN-BSN Option with consent of instructor.

NURS 397. Special Topics
1-9 Credits (1-9)
Specific subjects to be announced in the Schedule of Classes. May be repeated for at total of 21 credits.

NURS 420. Community Health Nursing
3 Credits (3)
Concepts basic to the nursing care of families, groups, and communities with an emphasis on health promotion, disease prevention, and health maintenance.

NURS 425. Health Literacy for a Global Society
3 Credits (3)
This is a course which addresses the importance of health literacy in an emerging global society, covering the primary aspects of global health literacy. The course explores and analyzes the challenges of health literacy in various areas of our world today, with an emphasis on the development of an action plan to improve health literacy in a select world area. The course is designed to assist students in locating, interpreting, and evaluating sources and content of health information, and in developing effective strategies and tools to assess, communicate, and educate about health literacy. Approximately one-third of the course is dedicated to exploring and evaluating emerging technologies and health literacy. Active student participation is expected and group work within class or online is commonly utilized.

Learning Outcomes
1. Apply the principles of health literacy to selected health care cases, using global, regional, and local perspectives. Apply international and national standards and recommendations for health literacy to selected health care cases, using global, regional, and local perspectives. Analyze the impact of health literacy on quality of life at the local, regional and global level. Use emerging technologies to evaluate and promote health literacy at the local, regional, and global level. Analyze the impact of cultural issues on the health literacy of selected health care cases and world areas. Analyze the use of an interdisciplinary approach to health literacy on selected health care cases and world areas. Analyze the impact of ethical issues on the health literacy of selected health care cases and world areas. Assessment: Discussion board and Final project grading rubrics.

NURS 426. Community Health Nursing for the R.N.: Clinical
3 Credits (3)
Nursing process applied to the care of families, groups, and communities.
NURS 460. Strategies for Student Success
3 Credits (3)
This course is designed to assist and support students as they identify learning needs and develop a plan for successfully mastering nursing knowledge. Course activities and assignments will be designed to address student’s self-identified learning goals to enhance their opportunity for success. Restricted to NURS, BSN, BSNP, BSNR majors.

NURS 475. Issues and Trends in Professional Nursing
3 Credits (3)
Explores the challenges associated with issues and trends in health care and the legal and ethical implications of professional nursing practice.

NURS 476. Nursing Organization & Management for the R.N.: Clinical
3 Credits (6P)
Nursing process applied to organization, management, and delivery of health care. An integrating experience for the R.N. student designed to facilitate the transition to professional practice. Students work with mentors in a clinical setting to develop professional nursing roles related to leadership and management.

NURS 477. Nursing Organization and Management for the RN
3 Credits (3)
Course covers nursing organization, leadership, and management principles, theories, and research for the practicing RN. Restricted to BSNC majors.

NURS 490. Independent Study
1-3 Credits
Individual studies with prior approval of department head.

NURS 505. Theoretical Foundations of Advanced Nursing
3 Credits (3)
This course is a graduate-level introduction to nursing theory. This course assists students in understanding the nature of theory development in nursing, evidence-based practice and related disciplines. Students examine the definitions and meanings of the basic concepts of theory along with theory development and will explore an analysis of selected theories/models and their application to nursing practice, research, education, and administration. Students must be enrolled in the graduate program in nursing or have the permission of advisor and faculty of course to enroll in course. Restricted to: NURS majors.

NURS 506. Health Policy for Advanced Nursing Practice
3 Credits (3)
Course provides a conceptual approach to understanding health policy including the social, legal, political and ethical factors that influence policy development. Strategies for influencing policy direction and change are examined. Restricted to: NURS, NUSC, NURP majors.

NURS 507. Evidence-Based Practice for Healthcare Leaders
3 Credits (3)
This course is designed to prepare nurse administrators and other healthcare leaders with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. May be repeated up to 3 credits. Restricted to: Online MSN in Nursing Administration majors.

Learning Outcomes
1. Utilize information sources, such as bibliographic databases and electronic resources and experts, to locate existing knowledge relevant to healthcare and nursing practice.
2. Critically appraise selected research designs, methods of data collection (quantitative and qualitative), and data analytic methods in relation to selected clinical practice and healthcare systems problems.
3. Discuss the relevance of theory and conceptual frameworks to healthcare research and practice.
4. Evaluate the use of evidence-based practice models to investigate clinical practice and healthcare systems problems.
5. Discuss the ethical, cultural, and professional concerns with human subjects in nursing research and considerations for evidence-based practice.

NURS 509. Quality Improvement for Healthcare Leaders
3 Credits (3)
This course is designed to prepare nurse administrators and other healthcare leaders with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. Restricted to: exclude Online MSN in Nursing Administration majors.

Learning Outcomes
1. Explain the value of improvement science in healthcare and its impact on healthcare quality.
2. Articulate the role of administrators in leading and facilitating change in healthcare systems through quality improvement processes.
3. Compare and contrast conceptual models and frameworks that guide quality improvement work in healthcare systems.
4. Articulate the principles for selecting a systems-level problem for continuous quality improvement action.
5. Demonstrate the use of quality improvement methods, tools and clinical data to address a systems-level problem in the clinical setting.
6. Understand the role of health policy and national standards in guiding quality improvement initiatives.

NURS 511. Advanced Pathophysiology for Clinical Nursing
3 Credits (3)
In-depth study of the physiological and pathological bases of altered health states of patients across the life span. Case studies facilitate application of complex concepts to clinical nursing practice. Restricted to: NURS, NUSC, NURP majors.

NURS 512. Advanced Clinical Pharmacology
3 Credits (3)
Principles of clinical pharmacology for advanced clinical practice. Focus on pharmacology as it relates to human physiology and pathophysiology across the lifespan. Restricted to: NURS, NUSC, NURP majors.
NURS 514. Psychopharmacology for Advanced Practice
3 Credits (3)
Principles of clinical psychopharmacology with emphasis on clinical application of major drug classifications including decision making, prescribing, drug monitoring and patient education.

NURS 515. Advanced Health Assessment
3 Credits (2+1P)
Assessment theory and skills for advanced clinical practice. Emphasis on assessment of patients across the life span. May be repeated up to 3 credits. Restricted to: NURS, NUSC, NURP majors.

NURS 530. Promoting Health Behavior
3 Credits (3)
Emphasis is on the role of the advanced practice nurse in facilitating health behavior change. The impact of health status on health behavior, ethical issues relate to health promotion, and the processes for promoting healthy behaviors are explored. Theoretical models of behavior change and primary, secondary, and tertiary prevention concepts serve as a basis for developing nursing interventions that promote behavior change.

NURS 549. Management of Human and Fiscal Resources in Nursing
4 Credits (1P)
This graduate level course examines and applies contemporary concepts of human and fiscal resource management for the nurse administrator. Focus is placed on achieving quality outcomes through effective management of human assets and organizational resources in health care settings. The course includes a clinical component. May be repeated up to 4 credits. Restricted to: MSN majors.

NURS 563. Human Resource Management in Nursing
3 Credits (3)
Contemporary approaches to the development and management of nursing resources that complement organizational vision, strategies and management goals. Management of a diverse, quality workforce that results in an improved organizational performance. Performance evaluation, motivation, professional development and legal and regulatory aspects will be explored.

NURS 564. Nursing Fiscal Management
3 Credits (3)
Concepts of financial management emphasizing principles of health care budgeting and finance in managing health care resources. A focus is to achieve quality outcomes through financial resource management. May be repeated up to 3 credits. Restricted to: NURS majors.

NURS 565. Advanced Leadership in Healthcare
3-5 Credits (3+1-2P)
Analysis of leadership theories as they pertain to the nurse executive and the advanced practice nurse in complex health care organizations. Emphasis will be placed on organizational change and conflict management in working with interdisciplinary health care teams. Clinical component included for DNP students only. May be repeated up to 5 credits. Restricted to: NURS, NUSC, NURP majors.
Prerequisite(s): NURS 562.

NURS 566. Seminar in Nursing Administration - Roles
3 Credits (3)
Role preparation for the nurse administrator as manager, leader, collaborator and change agent. Synthesis of concepts from management and nursing as a basis for role effectiveness in nursing administration.
Corequisite(s): NURS 595.

NURS 567. Nursing Informatics
3 Credits (3)
This course is provides the foundational knowledge necessary to integrate systems and information technologies. Topics include informatics, knowledge management, healthcare information systems/telehealth including the electronic health record. Focuses on using available technology to enhance safety and monitor the health status and outcomes of populations. Restricted to: NURS, NUSC, NURP majors.
Prerequisite(s): Consent of Instructor.

NURS 572. Pharmacology of Addictions
4 Credits (4)
Concepts and principles of the pharmacology of psychoactive substances and the addiction process; including the pharmacological approach to treatment. Restricted to: NURS majors.

NURS 590. Independent Study
1-10 Credits
Individual studies and directed research with prior approval of department head. May be repeated on a different topic. May be repeated for a maximum of 20 credits.
Prerequisite: consent of instructor.

NURS 595. Advanced Field Work in Nursing
1-3 Credits (1P)
A practicum in Nursing Administration. Application of concepts from management and nursing to the clinical, educational, or community setting. May be repeated up to 12 credits. Restricted to: MSN, DNP, PHD majors. Graded: S/U Grading (S/U, Audit).
Prerequisite(s): NURS 569.
Corequisite(s): NURS 566.

NURS 597. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a different subject area. May be repeated for a maximum of 8 credits.
Prerequisite: consent of instructor.

NURS 603. Introduction to Population Health
1 Credit (1)
This required course for the Doctor of Nursing Practice program prepares the student to implement specialty population-based disease prevention and health promotion activities to achieve national and international goals of improving worldwide health status. The course focuses on a spectrum of issues affecting health, which include emerging infectious diseases, emergency preparedness, disparities in health and healthcare services, and the impact of behavior and lifestyle choices on health.

Learning Outcomes
1. Analyze data to identify potential and emerging health hazards in individuals and communities. Evaluate care delivery models to address disease prevention and population health. Identify gaps in the care of individuals, aggregates, or populations. Identify gaps in the care of individuals, aggregates, or populations.
NURS 606. Quantitative Methods in Nursing Research
3 Credits (3)
Focus on approaches to developing nursing knowledge by means of quantitative research methods as applied to clinical problems, theoretical modeling of human responses to health and illness, and health policy issues. Emphasizes detailed analysis and critique of non-experimental and experimental designs, issues pertaining to sampling and statistical power, the reliability and validity of measurers, and uses and abuses of descriptive and inferential statistics in nursing research literature. Students are expected to develop sufficient discernment to read, critique, evaluate, and discuss the quality, significance, and limitations of published quantitative nursing research.
Prerequisite: NURS 621.

NURS 607. Qualitative Methods in Nursing Research
3 Credits (3)
Major methodological traditions of qualitative research and their applications to knowledge development and clinical research in nursing are the emphasis. Overview of at least one computer-assisted qualitative data analysis software application. Students will engage in detailed critique and discussion of significant nursing investigation representing various qualitative approaches and traditions.

NURS 610. Nursing Education: Pedagogy and Roles
3 Credits (3)
Teaching-learning process in the clinical and classroom settings. Focuses on educational patterns and pathways in nursing and the roles of faculty in academia. Educational reform is analyzed in relationship to diversity in students, faculty, practice settings and technology-driven learning environments. Instructional designs, teaching strategies, and outcome evaluations are examined for their pedagogic use. The development of critical thinking outcomes, mentorships and partnerships to meet the needs of students are addressed. The course examines issues and challenges that impact the educational process such as student and faculty recruitment, the changing healthcare environment, differentiation of practice, advanced practice, reduced resources and links with theory and research.

NURS 612. Healthcare Policy and Ethics
3 Credits (3)
This course examines complex challenges faced in the US healthcare system for nurses in advanced practice roles within an ethical framework. Ethical, social, and political issues that affect the provision of health care, communities, and society are critically analyzed with an emphasis on interprofessional roles in health care. Concepts that support advocating for social justice, reducing healthcare disparities. improving quality, promoting ethical aspects of care, and cost containment are overarching themes in the course discussions and assignments. Students use self-reflection, case studies and presentations to apply ethical principles, develop healthcare policy recommendations to improve care access, and reduce disparities in professional practice and population health.

Learning Outcomes
1. Analyze the historical evolution of health care systems and their influence on the development of institutional, local, state, federal and international health policy. Critique socioeconomic, legal, ethical, and political issues relevant to policymaking and provision of equitable, safe, and quality health care at the local, state, and national levels. Assess health policies, infrastructure, financing, and complex systems in the US in contrast to other nations. Critically analyze bioethical issues in clinical practice settings as they impact policy, disparities, advocacy, ethics, improved patient outcomes and reduced costs. Synthesize the principle of human rights and ethics in conduct of health care research and policy design. Interpret the value and importance of advanced practice nursing role(s) to policy makers, health care professionals, and consumers.

NURS 622. Clinical Data Management and Analysis
2 Credits (2)
This required course provides students with the knowledge base to understand, collect, manage, and measure clinical data. Students will explore data collection and management processes, levels of measurement, basic statistics, and measurement for improvement in order to effectively use clinical data. Data entry exercises employed through analytical tools and statistical software packages will allow the students practice and apply the basic data management and analysis skills needed for the evaluation of clinical data and evidence-based practice.

Learning Outcomes
1. Apply principles of sound data collection and management. Create a database to collect and aggregate data. Apply levels of measurement. Perform basic statistics including descriptive, parametric, and non-parametric statistics. Perform basic analysis of aggregate population level data. Use common tools (excel) and statistical software packages (SPSS) for data collection, entry, management, and analysis.

NURS 623. Mixed Methods
3 Credits (3)
Presents a brief overview of research paradigms with emphasis on formulating research questions, aims and methods for a mixed method/model approach. Students may use proposals developed in earlier qualitative and quantitative research classes to devise mixed method proposal integrating readings on these methods and own research interests. Prerequisite: NURS 606 and NURS 607
NURS 624. Measurement in Culturally Diverse Border Populations  
3 Credits (3)
The focus of this course is the development of essential competencies required to locate, select, evaluate, and use instruments to operationalize nursing variables. Ethical considerations in nursing research and research issues in diverse populations will be discussed. Specific attention is given to the process of moving from concept to construct, measurement theory, validity/reliability issues, and measurement issues in diverse populations including literacy, social desirability bias, sensitive data, translations, and cultural equivalency. Restricted to PhD in Nursing majors.
Prerequisite(s): Admission to PhD in Nursing program; NURS 606; NURS 623; or consent of Instructor.

NURS 630. Issues in Studying Health of Culturally Diverse and Border Populations  
3 Credits (3)
Analysis and evaluation of the unique health care needs of culturally diverse and rural populations across the lifespan from ethnic, economic, gender, and sexual orientation perspectives. Interdisciplinary strategies to affect positive health outcomes are discussed, analyzed, and evaluated. Restricted to: NURS, NUSC, NURP majors.

NURS 631. Population Based Approaches to Health Promotion  
3 Credits (3)
Population based approaches to health promotion focuses on preparing nursing students to identify, critically analyze and health promotion initiatives in culturally diverse and border populations using the Southwestern U.S. and U.S./Mexico border as the case exemplar. It examines historical, socio-economic, legal and professional issues associated with health promotion and policy initiatives. It considers prospects for social change, political movements and alternative approaches to develop and hasten adaption of health promotion initiatives in partnership with communities, advocacy groups and health care agencies.

NURS 642. Strategic and Financial Planning for Population Health Programs  
3 Credits (3)
This course explores the role of nurses in advanced nursing practice within a rapidly changing healthcare system. Theories of leadership, quality, risk outcomes, and financial structures for healthcare organizations are discussed providing a framework for change within advanced nursing practice specialties. Accounting, finance, and marketing principles are presented enabling students to complete a financial plan for an evidence based practice change.
Prerequisite: NURS 622.

Learning Outcomes
1. Use the principles of population focused program planning, development, implementation, and evaluation to develop an evidence-based population focused strategy to address a health priority issue. Analyze the potential influence of cultural, ethical, and public health policy issues when working with diverse populations. Analyze aspects of organizational culture and planned change that may influence success of planned interventions. Evaluate feasibility issues related to implementing planned interventions such as cost, time, and available resources. Integrate principles of program evaluation to determine impact and sustainability of evidence-based interventions. Analyze the impact of financial models on costs, quality and health outcomes.

NURS 648. Interdisciplinary Leadership and Role Development for Practice Excellence  
3 Credits (3)
This required course prepares students for organizational and systems leadership and knowledge and skills critical to role development in independent and inter and intra-disciplinary practice. Content includes communication, conflict resolution, collaboration and negotiation, leadership, and team functioning to maximize success in the establishment of safe, effective patient-centered care in complex environments.

Learning Outcomes
1. Evaluate interdisciplinary care delivery models from a systems perspective using evidence-based findings. Incorporate principles of specialty practice management, quality improvement, and interdisciplinary teamwork in order to meet the health needs of the specialty population served. Analyze effective strategies for the management of ethical dilemmas, incorporation of sensitivity to diverse cultures, and elimination of health disparities. Differentiate among the multiple roles in advanced nursing practice. Evaluate leadership styles in a team environment in the analysis of complex practice and organizational issues. Incorporate consultative and leadership skills with inter and intra-disciplinary teams to facilitate change.

NURS 649. Innovations and Health Care Organizations  
3 Credits (3)
Examines complexity and innovation within health care systems, health care delivery, and population health. Areas of focus are systems, organizations, health disparities, and ethical decision making. Emphasis is on improvement in services and outcomes. Taught with NURS 562. Restricted to: NURS, NUSC, NURP majors.

NURS 650. Behavioral Approaches and Determinants of Nursing and Health  
3 Credits (3)
Focuses on how behavioral/mental health concepts are applied in determining health outcomes for individuals, families, and communities. Students will apply and synthesize theoretical constructs within practice and research focusing on behavioral/mental health concepts. Health outcomes are viewed in a traditionally holistic manner in that health outcomes are discussed as an integral part of the human experience of healing and health.
NURS 651. Quality Improvement in Healthcare for Nurse Practitioners
3 Credits (3)
This course prepares nurse practitioners and other advanced practice nurses to be leaders of interprofessional teams engaged in the process of continuous quality improvement in healthcare settings. Healthcare quality improvement principles and practice will focus on improving patient care and outcomes, lowering costs, reducing health disparities, and increasing access to healthcare. May be repeated up to 3 credits. Restricted to: Family Nurse Practitioner; Psych/Mental Health Nursing; Nursing Practice; Family Nurse Practitioner Certificate; and Psych/Mental Health Nursing Certificate majors.

Learning Outcomes
1. Explain the value of improvement science in healthcare and its impact on healthcare quality.
2. Articulate the role of the doctorally-prepared Advance Practice Registered Nurse in leading and facilitating change in healthcare systems through quality improvement processes.
3. Compare and contrast conceptual models and frameworks that guide quality improvement work in healthcare systems.
4. Articulate the principles for selecting a systems-level problem for continuous quality improvement action.
5. Demonstrate the use of quality improvement methods, tools and clinical data to address a systems-level problem in the clinical setting.
6. Analyze the role of health policy and national standards in guiding quality improvement initiatives.

NURS 652. Applied Evidence-Based Practice and Quality Improvement
3 Credits (3)
This course is designed to prepare DNP student to demonstrate systems thinking, and accountability in design, delivery, and evaluating evidence-based care to improve clinical outcomes through the development of the DNP prospectus. May be repeated up to 3 credits. Restricted to: DNP majors.

Prerequisite(s): NURS 651.

NURS 653. Evidence-Based Practice for Nurse Practitioners
3 Credits (3)
This course is designed to prepare nurse practitioners and other advanced practice nurses with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. Restricted to: Family Nurse Practitioner; Psych/Mental Health Nursing; Nursing Practice; Family Nurse Practitioner Certificate; and Psych/Mental Health Nursing Certificate majors.

Prerequisite(s): NURS 651.

Learning Outcomes
1. Utilize information sources, such as bibliographic databases and electronic resources and experts, to locate existing knowledge relevant to healthcare and nursing practice.
2. Critically appraise selected research designs, methods of data collection (quantitative and qualitative), and data analytic methods in relation to selected clinical practice and healthcare systems problems.
3. Discuss the relevance of theory and conceptual frameworks to health care research and practice.
4. Evaluate the use of evidence-based practice models to investigate clinical practice and healthcare systems problems.
5. Discuss the ethical, cultural, and professional concerns with human subjects in nursing research and considerations for evidence-based practice.

NURS 657. Population Health and the Environment
3 Credits (3)
This course will examine and evaluate prevention strategies, healthcare quality measures, diversity principles, and patient safety considerations related to population health. There is a focus on how environmental health can be integrated into nursing education, practice, research, and policy/advocacy efforts. Students will explore community, environmental, cultural, and socioeconomic dimensions of care as evidenced by completion of a community assessment.

Prerequisite: NURS 603.

Learning Outcomes
1. Analyze theoretical frameworks/conceptual models for relevance to population health. Analyze the impact of a population health focus on the health of individuals, families and communities. Differentiate the impact of biologic factors, the natural environment, built environment and altered environment on health. Describe the impact of discrimination, sexism, and racism on equity and inclusion in healthcare and on health. Analyze the relationship between human health, animal health and ecosystem health. Apply the principles of patient and community engagement for population health improvement Discriminate between population growth, health and development as factors in global health. Examine institutional, local/state/federal, and global policies that address the relationship between population health and the environment.
NURS 660. PMHNP Across the Lifespan I
6 Credits (3+1-3P)
This is the first in a series of three didactic/clinical courses for the psychiatric mental health nurse practitioner (PMHNP) student. This course introduces the PMHNP student to the scope and standards of practice; legal and ethical issues; comprehensive psychiatric assessment and evaluation; developmental theories; and the theory and practice of psychotherapy. Emphasis is placed on individuals across the lifespan from diverse populations. The clinical component of this course involves working with a preceptor on psychiatric assessment and evaluation, as well as therapy in an outpatient setting. May be repeated up to 6 credits. Restricted to: NURP,NURS majors.
Prerequisite(s): NURS 511, NURS 512, NURS 515.
Learning Outcomes
1. Demonstrate advanced self-awareness to the core professional values and ethical/legal standards in the implementation of the Nurse Practitioner role and identifies and maintains professional boundaries to preserve the integrity of the therapeutic process.
2. Integrate history and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments of individuals with common psychiatric disorders.
3. Focuses on interdisciplinary communication, care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders.
4. Apply theoretical concepts and psychotherapeutic modalities to develop appropriate therapeutic alliances with mental health individuals during developmental transitions and lifestyle adjustments across the lifespan, including focus on vulnerable populations at risk for mental health problems, based on current evidence and clinical practice guidelines.
5. Provides patient-centered care recognizing cultural diversity, spiritual preferences, values, and beliefs to create a climate of patient-centered care to include confidentiality, privacy, comfort, emotional support, mutual trust, and respect.
6. Applies supportive, psychodynamic principles, cognitive-behavioral and other evidence-based psychotherapy/-ies to both brief and long-term individual practice.
7. Demonstrates progressive self-directed learning of course concepts by applying knowledge of theoretical concepts and related theories to individuals with mental illness by independently conducting individual psychotherapy, under supervision of a preceptor.

NURS 662. PMHNP Across the Lifespan II
5-7 Credits (3+2-4P)
This is the second in a series of three didactic/clinical courses for the psychiatric mental health nurse practitioner (PMHNP) student. This course provides further theoretical foundations, knowledge and evidence-based practice experiences in differential diagnosis for mental health conditions; family and group therapy; and integrated management of mental health conditions. Emphasis is placed on working with families from diverse populations. The clinical component of this course involves working with a preceptor to develop and implement comprehensive treatment plans that include psychotherapy and psychopharmacology in inpatient and/or outpatient settings. May be repeated up to 7 credits. Restricted to: NURP,NURS majors.
Prerequisite(s): NURS 660.
Learning Outcomes
1. Demonstrate self-awareness of core professional values and ethical/legal standards in the implementation of the nurse practitioner role, identifying and maintaining professional boundaries to preserve the integrity of the therapeutic process.
2. Integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders.
3. Demonstrate interdisciplinary communication and care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders.
4. Apply theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and families during developmental transitions and lifestyle adjustments across the lifespan based on current evidence and clinical practice guidelines.
5. Recognize cultural diversity, spiritual preferences, values, and beliefs to create a climate of patient-centered care demonstrating confidentiality, privacy, comfort, emotional support, mutual trust, and respect.
6. Demonstrate increasing independence in the application of supportive, psychodynamic principles, cognitive-behavioral and other evidence-based psychotherapy/-ies to both brief and long-term individual encounters, family therapy and group therapy.
7. Demonstrate knowledge of psychotherapeutic theories and concepts by independently conducting psychotherapy with individuals with mental illness or at risk for mental health problems, under the supervision of a preceptor.
8. Apply theoretical concepts, evidence-based psychotherapeutic modalities, and knowledge of psychopharmacology to develop, implement and document comprehensive treatment plans.
NURS 664. PMHNP Across the Lifespan III
5 Credits (1+3-4P)
Demonstrate self-awareness of core professional values and ethical/legal standards in the implementation of the nurse practitioner role, identifying and maintaining professional boundaries to preserve the integrity of the therapeutic process. Integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders. Demonstrate interdisciplinary communication and care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders. Apply theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and families during developmental transitions and lifestyle adjustments across the lifespan based on current evidence and clinical practice guidelines. Recognize cultural diversity, spiritual preferences, values, and beliefs to create a climate of patient-centered care demonstrating confidentiality, privacy, comfort, emotional support, mutual trust, and respect. Demonstrate increasing independence in the application of supportive, psychodynamic principles, cognitive-behavioral and other evidence-based psychotherapy/-ies to both brief and long-term individual encounters, family therapy and group therapy. Demonstrate knowledge of psychotherapeutic theories and concepts by independently conducting psychotherapy with individuals with mental illness or at risk for mental health problems, under the supervision of a preceptor. Apply theoretical concepts, evidence-based psychotherapeutic modalities, and knowledge of psychopharmacology to develop, implement and document comprehensive treatment plans.

Learning Outcomes
1. Demonstrate self-awareness of core professional values and ethical/legal standards in the implementation of the nurse practitioner role, identifying and maintaining professional boundaries to preserve the integrity of the therapeutic process.
2. Independently integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders.
3. Demonstrate interdisciplinary communication and care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders.
4. Apply theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and/or families during developmental transitions and lifestyle adjustments across the lifespan based on current evidence and clinical practice guidelines.
5. Recognize cultural diversity, spiritual preferences, values, and beliefs to create a climate of patient-centered care demonstrating confidentiality, privacy, comfort, emotional support, mutual trust, and respect.
6. Demonstrate independence in the application of supportive, psychodynamic principles, cognitive-behavioral and other evidence-based psychotherapy/-ies to both brief and long-term individual encounters and/or group therapy.
7. Demonstrate knowledge of psychotherapeutic theories and concepts by independently conducting psychotherapy with individuals with mental illness or at risk for mental health problems, under the supervision of a preceptor.
8. Demonstrate theoretical concepts, evidence-based psychotherapeutic modalities, and knowledge of psychopharmacology to independently develop, implement and document comprehensive treatment plans.

NURS 665. Advanced Concepts in the Treatment of Substance Use Disorders
1 Credit (1)
This course examines scope of practice, epidemiology, cultural issues, and common co-occurring psychiatric, medical and legal problems related to substance use disorders, including opioid use disorder. Students will review theories and research as the basis for psychometric screening and evidence-based interventions, including medication-assisted treatment for substance use disorders. Emphasis is placed on individuals across the lifespan from diverse populations. Consent of Instructor required.

Learning Outcomes
1. Demonstrate the significance of professionalism and self-awareness by maintaining professional, ethical and legal standards, preserving the integrity of the therapeutic process, demonstrating commitment to the health and well-being of individuals and society ethical practice, and upholding high personal standards of behavior. Recognize addictive disorders as developmental biopsychosocial disorders using a model of interconnection encompassing neurobiology, genetic, medical and mental health co-morbidities, familial, social, environmental, cultural, spiritual influences as contributors of substance use disorders. Apply an evidence-based approach to detecting substance use disorders by recognizing medical, psychological, social, and functional indicators of subclinical addiction disorders through use of validated standardized substance use disorder screening instruments, and accurately interpret screening results indicative of hazardous and harmful substance use. Integrate positive substance use screening results with therapeutic and counseling strategies appropriate to the patient’s readiness to change, by assessing the patient’s background, ethnicity, and belief system to accommodate and respect the values and attitudes of various cultures. Recognize the indications, contraindications, duration and utilization of evidence-based medication-assisted treatment and pharmacotherapy for substance use disorders including medications for acute withdrawal and relapse prevention. Diagnose substance use disorders and existing co-occurring mental health and/or medical disorders, and match appropriate level or care, secure consultation and referrals for specialty treatment of addiction and other medical and psychiatric conditions.
NURS 671. FNP Across the Lifespan I
6 Credits (3+1-3P)
This is the first in a series of three didactic/clinical courses for the family nurse practitioner (FNP) student. This course introduces the FNP student to the scope and standards of practice; legal and ethical issues; differential diagnosis; as well as the identification and management of specific symptoms and conditions. Emphasis is placed on individuals across the lifespan from diverse populations. The clinical component of this course involves working with a preceptor to advance skills in patient history taking, performing physical assessments, and interpreting laboratory and other test results. Development of a plan of care with health promotion components is also expected. May be repeated up to 6 credits. Restricted to: NURP, NURS majors.
Prerequisite(s): NURS 511, NURS 512, NURS 515.
Learning Outcomes
1. Demonstrate understanding of cultural, social and spiritual differences, their impact on health care, and utilize this knowledge in the management of patients from all cultures and apply this understanding in establishing a therapeutic, respectful interactions and relationship with the patient and families.
2. Apply theoretical concepts of patient-centered care with emphasis on health promotion, disease prevention, guidance/counseling, disease management, and palliative care during developmental transitions and life-style adjustments.
3. Incorporate primary/secondary prevention guidance into comprehensive treatment plans for patients across the lifespan. Integrate history, physical examination laboratory and other test data with knowledge of pathophysiology of acute and chronic diseases/conditions to develop a comprehensive exploration (or assessment) of a chief complaint.
4. Identify pharmacological interventions in the treatment and management of illness for diverse populations.
5. Translate knowledge of acute and chronic illness to the development, implementation and documentation of appropriate comprehensive treatment plans, including referrals to other specialties and services.
6. Integrate evidence-based clinical guidelines into the diagnosis and management of illness in patients across the lifespan.
7. Create a climate of patient-centered care to include confidentiality, privacy, comfort, emotional support, education, mutual trust and respect.
8. Use self-reflection to evaluate progress in professional development as an integral member of the interprofessional team. Integrate ethical principles in decision-making and demonstrate core professional values in the implementation of the nurse practitioner role.

NURS 672. FNP Across the Lifespan II
5-7 Credits (3+2-4P)
This is the second in a series of three didactic/clinical courses for the family nurse practitioner (FNP) student. This course provides further theoretical foundations, knowledge and evidence-based practice experiences in the differential diagnosis and management of acute and chronic diseases. Emphasis is placed on individuals across the lifespan from diverse populations. Building on knowledge and skills from the previous course, students will be expected to manage patients with an increasing complexity of health issues and multiple co-morbidities. The clinical component of this course involves working with a preceptor to refine skills in assessment and differential diagnosis and well as the development and implementation of comprehensive treatment plans, that include referrals to other specialties and services. May be repeated up to 7 credits. Restricted to: NURP, NURS majors.
Prerequisite(s): NURS 671.
Learning Outcomes
1. Demonstrate understanding of cultural, social and spiritual differences, their impact on health care, and utilize this knowledge in the management of patients from all cultures and apply this understanding in establishing a therapeutic, respectful interactions and relationship with the patient and families.
2. Apply theoretical concepts of patient-centered care with emphasis on health promotion, disease prevention, guidance/counseling, disease management, and palliative care during developmental transitions and life-style adjustments.
3. Identify pharmacological interventions in the treatment and management of illness for diverse populations.
4. Translate knowledge of acute and chronic illness to the development, implementation and documentation of appropriate comprehensive treatment plans, including referrals to other specialties and services.
5. Integrate evidence-based clinical guidelines into the diagnosis and management of illness in patients across the lifespan.
6. Create a climate of patient-centered care to include confidentiality, privacy, comfort, emotional support, education, mutual trust and respect.
7. Use self-reflection to evaluate progress in professional development as an integral member of the interprofessional team.
8. Integrate ethical principles in decision-making and demonstrate core professional values in the implementation of the nurse practitioner role.
9. Evaluate the relationships between access, cost, quality, and safety and their influence on health care.
NURS 673. FNP Across the Lifespan III
5 Credits (1+3-4P)
This is the final didactic/clinical course for the family nurse practitioner (FNP) student. In this course, the student works with a preceptor to develop mastery of skills required to assess, diagnose and manage acute and chronic conditions in primary care settings. Advancement of knowledge and skills attained through previous practicum experiences and this final course produces a capable, qualified provider, who will transition into a safe, novice, primary care nurse practitioner. The didactic component of this course includes preparation for the FNP board certification examination. May be repeated up to 5 credits. Restricted to: NURPNURS majors.
Prerequisite(s): NURS 672.
Learning Outcomes
1. Demonstrate understanding of cultural, social and spiritual differences, their impact on health care, and utilize this knowledge in the management of patients from all cultures and apply this understanding in establishing a therapeutic, respectful interactions and relationship with the patient and families.
2. Apply theoretical concepts of patient-centered care with emphasis on health promotion, disease prevention, guidance/counseling, disease management, and palliative care during developmental transitions and life-style adjustments.
3. Incorporate primary/secondary prevention guidance into comprehensive treatment plans for patients across the lifespan.
4. Integrate history, physical examination laboratory and other test data with knowledge of pathophysiology of acute and chronic diseases/conditions to develop appropriate differential diagnoses.
5. Identify pharmacological interventions in the treatment and management of illness for diverse populations.
6. Translate knowledge of acute and chronic illness to the development, implementation and documentation of appropriate comprehensive treatment plans, including referrals to other specialties and services.
7. Integrate evidence-based clinical guidelines into the diagnosis and management of illness in patients across the lifespan.
8. Create a climate of patient-centered care to include confidentiality, privacy, comfort, emotional support, education, mutual trust and respect.
9. Use self-reflection to evaluate progress in professional development as an integral member of the interprofessional team.
10. Integrate ethical principles in decision-making and demonstrate core professional values in the implementation of the nurse practitioner role.
11. Evaluate the relationships between access, cost, quality, and safety and their influence on health care.

NURS 676. Women's Health
3 Credits (3)
The course will examine patient and family perspectives as well as health care system variables and societal issues that affect the organization and delivery of women's health care. Students will engage in critical analysis of the evidence base concerning psychosocial and spiritual concerns and barriers to and opportunities for improving women's health care across the diverse settings in which health care is delivered. Focus on evidence-based approaches to the primary care management of women. May be repeated up to 3 credits.

NURS 678. Health Needs of Special Populations
2-4 Credits (2+1-2P)
This course provides an overview of infant, child, adult and older adult health needs and interventions that promote and support optimal health. The conceptual and theoretical foundation for advanced practice with individuals and families across the lifespan is emphasized, including pharma-co-therapeutic and integrated bio-psychosocial interventions for diverse populations across the continuum of care. Advanced practice nurses in the certificate program will have varying hours of credit. May be repeated up to 4 credits.
Prerequisite(s): NURS 660 or NURS 671 or permission of instructor.

NURS 679. Introduction to the DNP Project
1 Credit (1)
This required course is designed to assist the student in exploring a clinical problem and selecting an area of interest within a practice specialization, and in demonstrating professional competencies related to an area of interest to begin foundational development of the DNP scholarly project. The student will document previously acquired abilities and competencies while developing an understanding of the DNP project process. Students will work towards selection of a setting (hospital, long-term, primary care or community health agency) where concepts, theories, and principles of leadership, administration, and management can be applied.
Learning Outcomes
1. Examine the role of the DNP in the development and implementation of evidence based change of practice projects. Identify a DNP Project practice site and clinical advisor. Develop a portfolio demonstrating expertise in the specialty area of interest and understanding of a clinical problem.

NURS 685. Epidemiology for Advanced Nursing Practice
2 Credits
Emphasis is on the practical application of the principles of epidemiology in the measurement and evaluation of population health. Epidemiological literature will be critiqued and synthesized to evaluate population-based public health nursing problems. Issues related to disease surveillance, causation, genetic patterns, screening and social trends in population health will be examined. Use of existing data bases and technology programs are covered. Restricted to: NURP, NURS, NUSC majors.

NURS 686. DNP Project I
1 Credit (1)
This is the first in a three-course series that culminates in the implementation, evaluation and dissemination of scholarly work that demonstrates the student's synthesis of the Essentials of Doctoral Education for Advanced Practice Nursing (i.e., the DNP Essentials). The project must use evidence to improve clinical practice, healthcare delivery and/or patient outcomes. Upon completion of this course, students will identify a problem in healthcare, explore the existing evidence and develop a preliminary proposal for a project that demonstrates synthesis of DNP coursework and lays the groundwork for future scholarship.
Prerequisites: NURS 651 and NURS 653.
Learning Outcomes
1. Systematically review the existing evidence pertaining to selected clinical problem, generating a written review of the existing evidence. Identify a theoretical framework or model that will guide the development of a solution or intervention and/or the execution of the DNP project. Identify a theoretical framework or model that will guide the development of a solution or intervention and/or the execution of the DNP project. Defend the DNP project proposal in front of the student's project committee and submit to IRB
NURS 687. DNP Project II
1 Credit (1)
This is the second in a three-course series that culminates in the implementation, evaluation and dissemination of scholarly work that demonstrates the student's synthesis of the Essentials of Doctoral Education for Advanced Practice Nursing (i.e., the DNP Essentials). The project must use evidence to improve clinical practice, healthcare delivery and/or patient outcomes. Upon completion of this course, students will have designed and defended a plan for implementation and evaluation of the proposed project, submitted an IRB application, and initiated the project upon obtaining IRB approval.
Prerequisite(s): NURS 686.
Learning Outcomes
1. Execute the approved DNP project implementation and evaluation plan. Develop a plan for local, regional and/or national dissemination of the DNP project outcomes as scholarly work. Identify the DNP Essentials that are represented in the project and describe how the project addressed the requirement.

NURS 688. DNP Project III
1 Credit (1)
This is the third in a three-course series that culminates in the implementation, evaluation and dissemination of scholarly work that demonstrates the student's synthesis of the Essentials of Doctoral Education for Advanced Practice Nursing (i.e., the DNP Essentials). The project must use evidence to improve clinical practice, healthcare delivery and/or patient outcomes. Upon completion of this semester, students will demonstrate the ability to execute the proposed project plan. If additional time is needed to complete the proposed DNP project, the student must register for NURS 699 in subsequent semesters until the project outcomes are successfully defended in front of the project committee.
Prerequisite(s): NURS 687.
Learning Outcomes
1. Defend the DNP project outcomes in front of the student's project committee and a public audience. Generate a comprehensive written paper (i.e., professional manuscript, white paper, or technical report) that outlines the DNP project problem statement, objectives, review of evidence, implementation, and outcomes.

NURS 689. DNP Project Practicum
1-3 Credits (1-3P)
This leadership practicum courses provide for the development of a population health leader as demonstrated through the DNP project. The student will conduct an assessment of a population, community and/or organization where evidence-based leadership activities may be employed. Once a problem or issue is identified in the practice setting, the student will develop an evidence-based project designed to positively impact population-specific and/or patient care outcomes. After approval of the DNP project proposal, the student will implement an evidence-based project designed to positively impact population health and/or patient/client care outcomes. The culmination of the DNP project is evaluation and dissemination of the evidence-based changes. May be repeated up to 9 credits.
Learning Outcomes
1. Demonstrate competence in the role of population health leader who delivers advanced practice nursing, including educators, clinicians, administrators, and translators of research. Execute the DNP Project that meets the needs of diverse populations. Collaborate with DNP committee and the organization to establish an intra- and inter-professional continuous quality improvement process for achievement of the desired outcomes. Exhibit consistent professional behavior, performance, accountability, and responsibility within a population health leadership role.

NURS 690. Doctoral Nursing Seminar
1-3 Credits (1-3)
Seminar to build nursing scholarship skills, consisting of a series of 1 credit seminars that are taken as part of the doctoral degree plan. May be repeated up to 7 credits. Restricted to: NUSC majors.

NURS 691. Independent Study
1-6 Credits (1-6)
Individual studies and directed research with prior approval of department head. May be repeated for a maximum of 12 credits.
Prerequisite: consent of instructor.

NURS 697. Professional Roles for Advanced Practice Clinical Nursing
3 Credits (3)
This course will focus on providing an in depth understanding of the legal, historical, political, social, and ethical aspects of advanced practice nursing. Traditional and emerging roles for advanced practice nursing are examined. Restricted to DNP majors.
Prerequisite(s): Admission to DNP program, NURS 664 OR NURS 672.

NURS 698. Advanced Practice Nursing Immersion
1-4 Credits (1-4)
Practicum experience for advanced practice students. Focus will be on a practice issue chosen by the student for further development as an evidence-based doctoral project. Clinical practice hours as needed to meet DNP requirements. Up to 24 credits may be completed by student. May be repeated up to 4 credits. Restricted to: NURP majors. Graded: S/U Grading (S/U, Audit).
Prerequisite(s): NURS 511, NURS 512, NURS 515 or enrollment in post-masters track.
NURS 699. Clinical Scholarly Project
1-4 Credits (1-4)
Building on the practice expertise of the DNP student, this series of credits is to provide the student with the opportunity to design an innovative clinical practice improvement project/program addressing an actual health care concern. Through mentored activities, the DNP student will identify, develop, implement, evaluate, and disseminate an independent analytic. Graded: S/U. NURS 652. Restricted to: NURP majors. Graded: S/U Grading (S/U, Audit).
Prerequisite(s): Admission to DNP program.

NURS 700. Doctoral Dissertation
1-9 Credits (1-9)
Dissertation may be repeated to maximum of 30 credits. Minimum requirements are 21 credit hours. Comprehensive exam is included within these 21 credits.

NURS 999. Practical Nursing Requirements Completed
99 Credits
A phantom course created to indicate a student has met Practical Nursing requirements. Used to indicate this in academic history to replace an administrative message not converted from SOLAR to VISTAS.

01/97

NUTR-NUTRITION

NUTR 2110. Human Nutrition
3 Credits (3)
This course provides an overview of nutrients, including requirements, digestion, absorption, transport, function in the body and food sources. Dietary guidelines intended to promote long-term health are stressed.

Learning Outcomes
1. Evaluate sources of nutrition information for reliability
2. Identify elements of a nutritious diet
3. Describe the digestion, transport, and absorption of nutrients
4. Describe the importance of nutrition in weight control and health
5. Identify nutritional needs as they relate to the life cycle and performance
6. Describe behavior modification techniques that promote good health
7. Evaluate popular nutrition trends for scientific accuracy and effectiveness
8. Develop skills in the planning and assessing of healthy meal plans
9. Describe the role of food choices in the development of chronic disease
10. Describe the role of food in the promotion of a healthy lifestyle

NUTR 2120. Seminar I - Becoming a Nutrition Professional
1 Credit (1)
This course will introduce students to the field experience, careers, and professions in nutrition. This course is required for students pursuing a Didactic Program in Dietetics verification statement. May be repeated up to 1 credits. Consent of Instructor required. Restricted to: HNDS majors.

Learning Outcomes
1. Describe career options within the fields of Nutrition Dietetics.
2. Outline the HNDS field experience process.
3. Explain the educational pathways in HNDS.
4. List requirements for admission into the HNDS Dietetics pathway.
5. Begin an HNDS student portfolio.
6. Discuss the importance of personal responsibility accountability

NUTR 3110. Nutrition Throughout the Lifecycle
3 Credits (3)
Relationship of the stages of the human life cycle to changes in nutrient need. Consent of Instructor required.
Prerequisite(s): NUTR 2110.

Learning Outcomes
1. Understand the value of collaborative work in nutrition care of individuals. Compare and contrast the physiological, behavioral, and psychosocial factors associated with each life stage that affect nutritional status. For each life cycle stage, create a nutritionally adequate menu that meets key nutrient needs. Culturally appropriate evidence-based interventions to address common nutrition-related conditions experienced in each lifecycle stage. Utilize the Nutrition Care Process to complete a nutrition assessment.

NUTR 3120. Food for Health
4 Credits (4)
This course is designed to provide students the opportunity to learn about the intersection of nutrition and health in terms of food and diet. Students will be introduced to basic concepts within nutrition education, nutrition communication, nutrition and health and food culture. May be repeated up to 4 credits.
Prerequisite(s)/Corequisite(s): NUTR 3110. Prerequisite(s): NUTR 2110, FSTE 2110G, HRTM 2120.

Learning Outcomes
2. Modify traditional recipes to improve nutritional value and/or meet standards of a therapeutic diet.
3. Explain cultural and religious considerations when planning menus for diverse groups.
4. Critically evaluate and modify recipes to meet the needs of various ethnic, religious, and special populations.
5. Develop and conduct a hands-on nutrition education for a target group to teach healthy eating skills.

NUTR 3710. Food Systems & Policy in Dietetics
3 Credits (3)
This course introduces students to food and nutrition policy issues, institutions, and stakeholders and their impacts on public health, sustainability, and the practice of dietetics in the US. The course will examine policy development and the roles of federal agencies, private firms, non-governmental organizations, and the media in food and nutrition policy. It will also examine international perspectives on food and nutrition policies and programs used to support global nutrition, health promotion, and wellness.
Prerequisite(s): Junior standing, NUTR 3110, NUTR 3120.

Learning Outcomes
1. Discuss the economic, political, social, and cultural factors that influence US food and nutrition policies and impact national food systems and population health.
2. Identify the psychological, social, cultural, and environmental factors that influence food choices, eating behaviors, and nutrition-related practices.
3. Describe the processes and major players involved in US food and nutrition policy development, implementation, monitoring/evaluation, and regulation.
4. Recognize the influence of food and nutrition policy on the practice of dietetics.
NUTR 3750. Applied Nutrition Research  
3 Credits (3)  
This course will introduce students to various types of nutrition research and equip them to locate and critique nutrition and dietetics research articles. Research analysis skills will then be applied to a review of the current literature on a nutrition topic and applied to dietetics practice. May be repeated up to 3 credits.  
Prerequisite(s): MATH 1350G (or A ST 311); NUTR 2110, NUTR 3110, and NUTR 3210.  
Learning Outcomes  
1. Recall the various research methods, study designs, and statistical analyses used in nutrition research.  
2. Compare and contrast research methods and analyses in nutrition research.  
3. Analyze nutrition research for appropriateness of the methods and analyses.  
4. Evaluate nutrition research to form sound, ethical conclusions and practice recommendations.  

NUTR 3996. Special Topics  
1-4 Credits (1-4)  
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.  
Prerequisite(s): Junior or Senior standing, consent of instructor.  
Learning Outcomes  
1. Develop foundational knowledge in a specialized area of dietetics practice.  

NUTR 4110. Advanced Nutrition  
3 Credits (3)  
Application of biochemistry and physiology to nutrition. May be repeated up to 3 credits. Prerequisite(s): BIOL 2221, (OR A ST 311); NUTR 3110  
Learning Outcomes  
1. Describe the processes of digestion and absorption within the human body. Compare and contrast the structure and function of key nutrients. Describe the metabolism of key nutrients under various conditions. Apply concepts of energy and nutrient metabolism to common medical conditions and other relevant situations such as exercising or fasting.  

NUTR 4210. Community Nutrition  
3 Credits (3)  
Overview of the practice of community nutrition. Includes program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Same as NUTR 5210.  
Prerequisite: NUTR 3110, NUTR 3710.  
Learning Outcomes  
1. Summarize the components of current national and local community nutrition programs. Explain how national or state level policy influences a community nutrition issue. Write a needs assessment for a community nutrition issue using reliable sources of community nutrition information and data and relevant research. Develop goals and objectives of a nutrition program that address a community nutrition issue. Develop a culturally appropriate nutrition education lesson plan that addresses a specific nutrition program objective.  

NUTR 4220. Food Service Organization and Management  
3 Credits (3)  
Personnel, financial and general management in institutional and commercial food service operations.  
Prerequisite: HRTM 2120.  
Learning Outcomes  
1. Evaluate food products and menu plans through the application of food service management theories and principles. Describe the process of and ethical considerations surrounding purchasing, receiving, storing and controlling inventory of a given food item. Evaluate food system, food safety practices, and scenarios. Evaluate a nutrition and foodservice budget and interpret financial data.  

NUTR 4230. Medical Nutrition Therapy I  
3 Credits (3)  
Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics.  
Prerequisite: NUTR 4110, BCHE 341.  
Corequisite: NUTR 4230; NUTR 4233.  
Learning Outcomes  
1. Examine the role of medical nutritional therapy in disease processes. Apply nutritional assessment techniques utilizing the Nutrition Care Process. Compose nutrition care plans and utilize various styles of medical charting. Describe the interdisciplinary nature of working with a health care team in the delivery of medical nutritional therapy.  

NUTR 4230L. Medical Nutrition Therapy I Lab  
1 Credit (1P)  
Supplements NUTR 4230. Students will perform nutrition assessments, nutrition focused physical exams, apply medical nutrition therapy-based interventions and practice patient discharge education for specific disease states. Elements of pathology and biochemistry of nutrition-related conditions are integrated into course topics. Restricted to: HNDS majors.  
Corequisite(s): HNDS 4230.  
Learning Outcomes  

NUTR 4233. Nutrition Counseling and Education  
3 Credits (3)  
This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education.  
Prerequisite: NUTR 3110; FCSC 348.  
Learning Outcomes  
1. Evaluate nutrition counseling strategies tools in promoting behavior change and self-management. Apply behavior change theories and models to nutrition counseling sessions. Develop nutrition care plans for nutrition counseling clients. Analyze professionalism and ethics within nutrition counseling and education. Develop and present a nutrition education lesson based on current nutrition research.
NUTR 4235. Entering the Field of Dietetics
1 Credit (1)
Students will develop professional materials that will be used in their future careers including a personal statement, resume, and interview dialogues. Students will become familiar with career options in the field of dietetics and learn to navigate the processes of becoming a registered dietitian or dietetic technician, registered. Restricted to: HNDS majors. Students must be a Senior to enroll.
Prerequisite/Corequisite: NUTR 4210.
Learning Outcomes
1. Students will develop professional materials that will be used in their future careers including a personal statement, resume, and interview dialogues. Students will become familiar with career options in the field of dietetics and learn to navigate the processes of becoming a registered dietitian or dietetic technician, registered

NUTR 4240. Medical Nutrition Therapy II
3 Credits (3)
Continuation of NUTR 4230.
Prerequisite: NUTR 4230.
Corequisite: NUTR 4240L.
Learning Outcomes

NUTR 4240L. Medical Nutrition Therapy II Laboratory
1 Credit (1P)
Supplements NUTR 4240. Students will apply medical nutrition therapy to specific disease states with special emphasis on writing nutrition support orders and learning to utilize nutrition support equipment. Students will learn and apply advanced nutritional therapies and patient management strategies. Restricted to: HNDS majors.
Corequisite(s): HNDS 4240.
Learning Outcomes
1. Calculate nutrition support recommendations and document orders in the patient’s medical chart.
2. Demonstrate safe use of nutritional support equipment.
3. Master use of the Nutrition Care Process in case-based and simulated patient scenarios to conduct nutrition assessments and implement evidence-based interventions.
4. Critically evaluate lab values and client anthropometric data.
5. Select therapeutic diets for the treatment of medical conditions and their symptoms.

NUTR 4550. Billing and Coding for Dietetics
1 Credit (1)
This course provides students with an overview of billing and coding practices for medical nutrition therapy that ensure proper reimbursement for services. Students will learn nutrition related billing codes, apply nutrition care process terminology to documentation, and discover how policy affects current and future coverage of nutrition services.
Prerequisite(s)/Corequisite(s): NUTR 4240. Students must be in Senior standing to enroll in this course, NUTR 4230.
Learning Outcomes
1. Explain the use of Medical Nutrition Therapy CPT codes.
2. Properly document nutrition services in the medical record for full reimbursement of services.
3. Describe different Health Care Delivery Systems and how they impact nutrition services.
4. Explain Medicare, Medicaid, and private payer coverage for Medical Nutrition Therapy.

NUTR 4560. Field Experience- Clinical Dietetics
1-8 Credits (1-8)
Experience in various areas of clinical nutrition facilities with emphasis on nutrition care of patients. Practical experience with supervision by resident faculty as well as supervisor at work site. Performance at work site graded in accordance with university standards. One credit is earned for 40 hours of work. A total of 40 hours is required. May be repeated up to 8 credits. Consent of Instructor required.
Prerequisite(s): Senior standing, NUTR 4230, NUTR 4230L, consent of instructor.
Learning Outcomes
1. Apply dietetics knowledge to practice in various clinical settings.
2. Develop a field experience portfolio highlighting the development of clinical nutrition knowledge and skills.
3. Compare and contrast the responsibilities of Registered Dietitians in various clinical practice settings.

NUTR 4565. Field Experience Community Nutrition
1-8 Credits (1-8)
Experience working with nutritional problems of individual families of all socioeconomic and age levels and with agencies concerned with community nutrition. Practical experience with supervision by resident faculty as well as supervisor at work site. Performance at work site graded in accordance with university standards. May be repeated up to 8 credits. Consent of Instructor required.
Prerequisite(s): Senior standing, NUTR 4210, consent of instructor.
Learning Outcomes
1. Apply dietetics knowledge to practice in various community settings.
2. Develop a field experience portfolio highlighting the development of community nutrition knowledge and skills.
3. Compare and contrast the responsibilities of Registered Dietitians in various community practice organizations.

NUTR 4991. Special Problems
1-4 Credits (1-4)
Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 8 credits. May be repeated up to 8 credits. Consent of Instructor required.
Prerequisite(s): Junior or Senior standing.
Learning Outcomes
1. Develop specialized knowledge and competencies in a selected nutrition and dietetics subject area.
NUTR 5110. Graduate Studies in Advanced Nutrition
3 Credits (3)
Covers biochemistry and physiology applied to nutrition. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4110. Crosslisted with: NUTR 4110.
Prerequisite(s)/Corequisite(s): NUTR 3110. Student must be classified as a Graduate student to enroll in this course, BIOL 2221, BCHE 341, and NUTR 2110, or consent of instructor.
Learning Outcomes
1. Describe the processes of digestion and absorption within the human body.
2. Compare and contrast the structure and function of key nutrients.
3. Describe the metabolism of key nutrients under various conditions.
4. Apply concepts of energy and nutrient metabolism to common medical conditions and other relevant situations such as exercise or fasting.

NUTR 5150. Orientation to Dietetic Internship
3 Credits (3)
Dietetic interns prepare for supervised practice rotations. Topics include professionalism, Code of Ethics, and dietetic internship portfolios. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. Assembly of dietetic intern portfolio that will be kept throughout dietetic internship.
2. Readiness to begin supervised practice rotations.
3. Understanding of steps and processes to successfully complete requirements of dietetic internship and Masters of Science in Family Consumer Sciences.
4. Upon completion of the course, students will be able to understand the importance of evidence-based information, research ethics, the Code of Ethics of the Profession of Dietetics, and the basic structure of an IRB proposal.

NUTR 5210. Graduate Study in Community Nutrition
3 Credits (3)
Overview on the practice of community nutrition to include program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4110. May be repeated up to 3 credits. Crosslisted with: NUTR 4210.
Prerequisite(s): Graduate student, NUTR 3110, NUTR 3710, NUTR 3750, or consent of the instructor.
Learning Outcomes
1. Summarize the components of current national and local community nutrition programs.
2. Explain how national or state-level policy influences a community nutrition issue.
3. Write a needs assessment for a community nutrition issue using reliable sources of community nutrition information and data, and relevant research.
4. Develop goals and objectives of a nutrition program that address a community nutrition issue.
5. Develop a culturally appropriate nutrition education lesson plan that addresses a specific nutrition program objective.

NUTR 5220. Graduate Studies in Food Service Organization and Management
3 Credits (3)
Personnel, financial and general management in institutional and commercial food service operations. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4220. May be repeated up to 3 credits.
Prerequisite(s): Graduate Students; HRTM 2120, NUTR 3120, or consent of instructor.
Learning Outcomes
1. Evaluate food products and menu plans through the application of food service management theories and principles.
2. Describe the process of and ethical considerations surrounding purchasing, receiving, storing, and controlling inventory of a given food item.
3. Evaluate food system, food safety practices, and management practices of a specific food service establishment.
4. Apply management theories and principles to quality assurance and human resource case scenarios.
5. Evaluate a nutrition and food service budget and interpret financial data.
NUTR 5230. Graduate Studies in Medical Nutrition I
3 Credits (3)
Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics. Additional assignments beyond NUTR 4230 required. May be repeated up to 3 credits. Crosslisted with: NUTR 4230.
Prerequisite(s): Graduate student, NUTR 3110, NUTR 4110, BIOL 2225 or BIOL 2221, or consent of instructor.
Learning Outcomes
1. Examine the role of medical nutritional therapy in disease processes.
2. Apply nutritional assessment techniques utilizing the Nutrition Care Process.
3. Compose nutrition care plans and utilize various styles of medical charting.
4. Describe the interdisciplinary nature of working with a health care team in the delivery of medical nutritional therapy.

NUTR 5233. Graduate Studies in Nutrition Counseling & Education
3 Credits (3)
This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education. Additional assignments beyond NUTR 4233 required. May be repeated up to 3 credits. Crosslisted with: HNDS 4233.
Prerequisite(s)/Corequisite(s): NUTR 5230. Students must be classified as a Graduate student to enroll in this course, NUTR 2110, NUTR 3110, FCSC 348.
Learning Outcomes
1. Evaluate nutrition counseling strategies and tools in promoting behavior change and self-management.
2. Apply behavior change theories and models to nutrition counseling sessions.
3. Develop nutrition care plans for nutrition counseling clients.
4. Analyze professionalism and ethics within nutrition counseling and education.
5. Develop and present a nutrition education lesson based on current nutrition research.

NUTR 5240. Graduate Studies in Medical Nutrition Therapy II
3 Credits (3)
Continuation of HNDS 546. May be repeated up to 3 credits. Crosslisted with: NUTR 4240.
Prerequisite(s): Graduate student, NUTR 5230 and NUTR 4230L or consent of instructor.
Learning Outcomes
1. Select appropriate medical nutrition therapy interventions for various disease processes.
2. Master nutrition assessment of patients/clients utilizing the Nutrition Care Process model.
3. Interpret medical terminology in patient chart notes and medical history records.
4. Evaluate laws regulations concerning dietetics.

NUTR 5610. Dietetic Intern Seminar
1 Credit (1)
Portfolio development for dietetic interns during supervised practice rotations. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN 2: Apply evidence-based guidelines, systematic reviews and scientific literature.
2. CRDN 3: Justify programs, products, services and care using appropriate evidence or data.
3. CRDN 4: Evaluate emerging research for application in nutrition and dietetics practice.
4. CRDN 6: Incorporate critical-thinking skills in overall practice.
5. CRDN 1: Practice in compliance with current federal regulations and state statutes and rules, as applicable and in accordance with accreditation standards and the Scope of Nutrition and Dietetics Practice and Code of Ethics for the Profession of Nutrition and Dietetics.
6. CRDN 2: Demonstrate professional writing skills in preparing professional communications.
NUTR 5620. Dietetic Internship: Supervised Practice in Community Nutrition
1-8 Credits (2-6P)
Provides dietetic interns with a minimum of 500 clock hours of supervised practice in community nutrition to include an emphasis in Cooperative Extension Service. Dietetic interns work under the guidance of faculty and community nutrition professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
2. CRDN 2 Apply evidence-based guidelines, systematic reviews and scientific literature.
3. CRDN 4 Evaluate emerging research for application in nutrition and dietetics practice.
4. CRDN 5 Conduct projects using appropriate research methods, ethical procedures and data analysis.
5. CRDN 14 Demonstrate advocacy on local, state or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
6. CRDN 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
7. CRDN 5 Develop nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience.
8. CES Consult with organizations regarding food access for target populations.
9. CES Ensure cultural relevancy and appropriateness of nutrition education.

NUTR 5630. Community Nutrition for Dietetic Interns
3 Credits (3)
Advanced topics in community nutrition to include conducting community nutrition needs assessments, program planning and grant writing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
2. CRDN 2 Apply evidence-based guidelines, systematic reviews and scientific literature.
3. CRDN 4 Evaluate emerging research for application in nutrition and dietetics practice.
4. CRDN 5 Conduct projects using appropriate research methods, ethical procedures and data analysis.
5. CRDN 14 Demonstrate advocacy on local, state or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
6. CRDN 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
7. CRDN 5 Develop nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience.
8. CES Consult with organizations regarding food access for target populations.
9. CES Ensure cultural relevancy and appropriateness of nutrition education.

NUTR 5640. DI SUP PRACT FS MGT
1-5 Credits (2-10P)
Provides dietetic interns with a minimum of 300 clock hours of supervised practice in foodservice management. Dietetic interns work under the guidance of faculty and foodservice management professionals. Students must complete a total of 4 credit hours of NUTR 5640. May be repeated up to 5 credits. Consent of Instructor required. Restricted to HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
NUTR 5650. Foodservice Management for Dietetic Interns
3 Credits (3)
Advanced topics in foodservice systems management to include business planning and marketing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes
1. CRDN 2: Demonstrate professional writing skills in preparing professional communications.
2. CRDN 15: Practice and/or role play mentoring and precepting others.
3. CRDN 4: Design, implement and evaluate presentations to target audiences.
4. CRDN 3: Demonstrate active participation, teamwork and contributions in group setting.
5. CRDN 7: Apply leadership skills to achieve desired outcomes.
6. CRDN 8: Demonstrate negotiation skills.
7. CRDN 4: Apply current informatics technology to develop, store, retrieve and disseminate information and data.
9. CRDN 7: Conduct feasibility studies for products, programs, or services with consideration of costs and benefits.
10. CRDN 8: Develop a plan to provide or develop a product, program, or service that includes a budget, staffing needs, equipment and supplies.

NUTR 5660. Dietetic Internship: Supervised Practice in Clinical Dietetics
1-8 Credits (2-16P)
Provides dietetic interns with a minimum of 500 clock hours of supervised practice in clinical dietetics. Dietetic interns work under the guidance of faculty and dietetics professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes
1. CRDN 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
2. CRDN 4 Function as a member of interprofessional teams.
3. CRDN 11 Show cultural competence/sensitivity in interactions with clients, colleagues and staff.
4. CRDN 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
5. CRDN 2 Conduct nutrition focused physical exams.
6. CRDN 3 Demonstrate effective communication skills for clinical and customer services in a variety of formats.

NUTR 5670. Nutrition Care Process for Dietetic Interns
3 Credits (3)
Advanced topics in nutrition care process and model to include medical nutrition therapy and evidence-based research and outcomes assessment in clinical dietetics. Consent of Instructor required.
Prerequisite(s): Acceptance into Dietetic Internship. Restricted to: HNDS majors.

Learning Outcomes
1. CRDN 2: Apply evidence-based guidelines, systematic reviews and scientific literature.
2. CRDN 3: Justify programs, products, services and care using appropriate evidence or data.
3. CRDN 4: Evaluate emerging research for application in nutrition and diet.
4. CRDN 4 Evaluate emerging research for application in dietetics practice.
5. CRDN 2 Demonstrate professional writing skills in preparing professional communication. Perform the nutrition care process and use standardized nutrition language for individuals, groups, and populations of differing ages and health status, in a variety of settings.
6. CRDN 2 Conduct nutrition focused physical exams.

NUTR 5680. Review Course for National RD Exam
3 Credits (3)
Completion of dietetic internship portfolio and preparation for the national registration examination for dietitians. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: exclude HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes
1. Demonstrate readiness to take the National Registration Examination for Dietitians.
2. Completion of all requirements of the NMSU Dietetic Internship.
3. Completion of all requirements to receive a Master of Science in Family Consumer Sciences from New Mexico State University.

NUTR 5991. Special Research Programs
1-4 Credits (1-4)
Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree. May be repeated up to 6 credits.
Prerequisite(s): Graduate Student.

Learning Outcomes
1. Develop analytical or experimental research skills in the areas of human nutrition and dietetics.

NUTR 5996. Special Topics
1-4 Credits (1-4)
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.
Prerequisite(s): Graduate student.

Learning Outcomes
1. Evaluate issues surrounding advanced nutrition and dietetics topics.
OATS-OFFICE ADMINISTRATION TECHNOLOGY SYSTEMS

OATS 101. Keyboarding Basics
3 Credits (2+2P)
Covers the skills necessary to touch type on the computer keyboard using correct techniques. This includes the development of speed, accuracy, and formatting of basic business documents. May be repeated up to 3 credits. Restricted to Community Colleges campuses

Learning Outcomes
1. Demonstrate the correct operation of the alphabetic, numeric, symbol keys, space bar, shift keys, and return (enter) keys.
2. Have a thorough knowledge of correct hand position and posture for accurate keyboarding.
3. Keyboard words, sentences, and paragraphs smoothly, quickly, and accurately using the touch typing method.
4. Have the ability to keyboard with speed and accuracy.
5. Perform keyboarding and basic formatting functions to create professional business documents.

OATS 102. Keyboarding: Document Formatting
3 Credits (2+2P)
Designed to improve keyboarding speed and accuracy; introduce formats of letters, tables and reports. A speed and accuracy competency requirement must be met.
Prerequisite: OATS 101 or consent of instructor.

OATS 105. Business English
3 Credits (3)
Training and application of the fundamentals of basic grammar, capitalization, punctuation, basic writing, sentence structure, and editing skills. May be repeated up to 3 credits. Restricted to Community Colleges campuses

Learning Outcomes
1. Identify and apply the rules for each of the parts of speech.
2. Construct four basic sentence patterns.
3. Apply punctuation, capitalization and numbers style to writing proficiently.
4. Utilize proofreader’s marks in the editing of business correspondence.
5. Make use of appropriate reference materials to locate answers to language questions.

OATS 106. Business Mathematics
3 Credits (2+2P)
Mathematical applications for business. May be repeated up to 3 credits. Restricted to Community Colleges campuses
Prerequisite(s): CCDM 103 N or adequate score on math placement exam.

Learning Outcomes
1. Apply fundamental concepts to personal and business math operations.
2. Maintain a checkbook.
3. Solve percent and percentage applications.
4. Calculate discounts, markups, and markdowns.
5. Calculate wages, salaries, deductions, and net pay.
6. Compare various borrowing options and identify the most cost effective option.
7. Interpret consumer loans and credit card accounts.
8. Compare various home ownership options.
9. Calculate taxes and identify insurance options.

OATS 110. Records Management
3 Credits (3)
Principles, methods and procedures for the selection, operation and control of manual and automated records systems.

OATS 120. Accounting Procedures I
3 Credits (2+2P)
Business accounting principles and procedures. Use of special journals, cash control, and merchandising concepts. Reports for sole proprietorships.

OATS 121. Accounting Procedures II
3 Credits (2+2P)
Continuation of OATS 120, emphasizing accounting principles and procedures for notes and interest, depreciation, partnerships and corporations, cash flow and financial statement analysis. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.
Prerequisite(s): OATS 120 or ACCT 2110.

OATS 140. Payroll Accounting
3 Credits (2+2P)
Payroll procedures including payroll tax forms and deposits. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.
Prerequisite(s): ACCT 2110 or OATS 120.

OATS 150. Medical Terminology
3 Credits (3)
Understanding of the basic elements of medical words. Use of medical abbreviations. Same as NURS 150 and OEHO 120. May be repeated up to 3 credits. Crosslisted with: NURS 150, AHS 120 and HIT 150. Restricted to Community Colleges campuses only.

OATS 169. Spanish Grammar for Business Administration
3 Credits (3)
Introductory course in Spanish grammar and practical business terms required for the proper application of fundamental oral and written business communication skills for Spanish speakers in the field of business administration. Restricted to Community Colleges campuses only.
Prerequisite(s): Spanish-speaking ability and computer keyboarding ability.
OATS 170. Office Communications in Spanish I  
3 Credits (3)  
Develop oral and written communications skills of native or near-native speakers of Spanish. The student will learn basic letter writing skills, customer service techniques, and telephone etiquette in Spanish. Spanish speaking ability is required to enroll in this course. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Community Colleges campuses

Prerequisite(s): OATS 170, Spanish speaking ability.

OATS 171. Office Communications in Spanish II  
3 Credits (3)  
Develop oral and written communications skills of native or near-native speakers of Spanish. Emphasis placed on learning the office assistant's role within the office environment. Compose complex business correspondence and learn to make international travel arrangements. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Community Colleges campuses

Prerequisite(s): OATS 170 or OATS 215.

OATS 191. Taking Minutes & Proofreading  
3 Credits (3)  
Preparation and practice producing minutes suited for different meeting types and purposes. Provides strategies to prepare for meetings, to record proceedings, and to transcribe minutes while incorporating proofreading skills practice. Topics include legal requirements, meeting types, minute formats, and duties/expectations of the minute taker and the meeting chair. Graded: S/U. May be repeated up to 3 credits. Restricted to Community Colleges campuses

OATS 202. Keyboarding Document Production  
3 Credits (2+2P)  
Further development of keyboarding speed and accuracy. Production of complex letters, memos, tables, reports and business forms. A speed and accuracy competency requirement must be met. Restricted to Community Colleges campuses

Prerequisite: OATS 201 or keyboarding proficiency.

OATS 203. Office Equipment and Procedures I  
3 Credits (2+2P)  
Office organization, telephone techniques, equipment and supplies, handling meetings, human relations, mail procedures, and travel. May be repeated up to 3 credits. Restricted to Community Colleges campuses

OATS 205. Accounting Software I  
3 Credits (2+2P)  
Introduction to accounting software. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): Working knowledge of computers and accounting or consent of instructor.

OATS 206. Accounting Software II  
3 Credits (2+2P)  
Accounting software and office applications. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): OATS 121 or OATS 215.

OATS 207. Machine Transcription  
3 Credits (2+2P)  
Creating office documents using transcribing equipment and word processing software. Emphasis on proofreading, editing and grammar. May be repeated up to 3 credits. Restricted to Community Colleges campuses

Prerequisite(s): BOT 105.

OATS 208. Medical Office Procedures  
3 Credits (2+2P)  
Current computerized and traditional administrative medical office procedures will be introduced. Practical knowledge on managing required record keeping in a medical office environment will be emphasized. May be repeated up to 3 credits. Restricted to Community Colleges campuses

Prerequisite(s): HIT 150 or AHS 120, and computer keyboarding ability or consent of instructor.

OATS 209. Business and Technical Communications  
3 Credits (3)  
Effective written communication skills and techniques for career success in the work place. Composition of letters, memos, short reports, forms, and proposals, and technical descriptions and directions

Prerequisites: ENGL 1110G and computer keyboarding ability or consent of instructor.

OATS 211. Information Processing I  
3 Credits (2+2P)  
Defining and applying fundamental information processing concepts and techniques using the current version of leading software. May be repeated up to 6 credits. Restricted to Community Colleges campuses

OATS 213. Word Processing I  
3 Credits (2+2P)  
Operation and function of a word processor. Specific equipment to be announced in the Schedule of Classes.

Prerequisite: OATS 101 or keyboarding proficiency.

OATS 214. Word Processing II  
3 Credits (2+2P)  
Advanced operation and functions of a word processor. Specific equipment to be announced in the Schedule of Classes.

Prerequisite: OATS 213 or consent of instructor.

OATS 215. Spreadsheet Applications  
1-3 Credits  
Use of spreadsheets to include graphics and business applications. Same as OECS 215. May be repeated under different subtitles listed in the Schedule of Classes.

OATS 217. Powerpoint Presentation  
3 Credits (3)  
Comprehensive, hands-on approach to learning and applying basic and advanced features of PowerPoint. These include text enhancements, objects, fills, colors, animation, charts, sound, video, and hyperlinks. Students demonstrate appropriate audience and communication tools to deliver presentations.

Prerequisites: OATS 211 or ability to demonstrate keyboarding and Windows proficiency.

OATS 218. Information Processing II  
3 Credits (2+2P)  
Advanced information processing techniques using current version of leading software. May be repeated for a maximum of 6 credits.

Prerequisite: OATS 211 or consent of instructor.

OATS 220. Internship in Business Office Technology  
2 Credits (2)  
Experience in a supervised office position. Student must work at least eight hours per week. May be repeated for a maximum of 4 credits.

Prerequisites: sophomore standing and consent of instructor.
OATS 221. Internship I
1-3 Credits
Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. C- or better in the course is required. Consent of Instructor required. Restricted to Community Colleges campuses

OATS 222. Internship II
1-3 Credits
Continuation of OATS 221. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: OATS & HIT majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only. Prerequisite(s): OATS 221 and consent of instructor.

OATS 223. Medical Transcription I
3 Credits (2+2P)
Concepts in medical transcription are introduced on how to produce a variety of reports required in a medical office or facility utilizing accurate medical terminology, spelling, grammar, and document formatting. May be repeated up to 3 credits. Restricted to Community Colleges campuses only. Prerequisite(s): HIT 150 or AHS 120 and HIT 158 and OATS 209.

OATS 228. Medical Insurance Billing
3 Credits (2+2P)
Comprehensive overview of the insurance concepts and applications required for successfully and accurately completing and submitting insurance claims and reimbursement processes for various insurance carriers, both private and government, will be emphasized. May be repeated up to 3 credits. Restricted to Community Colleges campuses only. Prerequisite(s): HIT 150 or AHS 120.

OATS 233. Advanced Medical Transcription
3 Credits (2+2P)
Builds upon the concepts introduced in Medical Transcription I providing greater understanding of how to produce advanced reports dictated by physicians with increasing speed and accuracy. Emphasis will be on proofreading and editing of operative reports, patient history and physicals, office notes, labor and delivery reports, consultation reports, discharge summaries, and other medical reports. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Community Colleges campuses only. Prerequisite(s): OATS 223 and HIT 130.

OATS 239. Personal Development
3 Credits (3)
Development of a marketable, employable office systems person, to include interview, voice, manners, and apparel.

OATS 240. Introduction to Individual Taxation
3 Credits (3)
Overview of Individual Federal Taxation; awareness of tax problems pitfalls and planning opportunities; focus on individual personal financial concerns and tax planning. One semester of accounting principles/procedures is recommended.

OATS 241. Auditing and Business Issues
3 Credits (3)
Introduction to basic auditing concepts, the purpose for the auditing process, and requirements of persons assisting with the audit process. The course will also deal with issues of business law including contracts, sales, torts, strict liability, and business ethics. May be repeated up to 3 credits. Restricted to Community Colleges campuses only. Prerequisite(s): OATS 120 or ACCT 2110.

OATS 244. Tax Preparation
3 Credits (3)
Introduces basic federal and state tax codes for preparing individual income tax returns. Emphasis on use of tax software. Prerequisite: keyboarding proficiency.

OATS 250. Electronic Office Systems
3 Credits (2+2P)
Management of the electronic office. Office use of computers, printers, fax machines, copiers, and scanner concepts will be covered. Prerequisite: OATS 211.

OATS 255. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes.

OATS 260. Bookkeeping Simulation Capstone
3 Credits (2+2P)
Refines the professional and technical skills students have learned while completing the Bookkeeping Assistant Option curriculum by demonstrating how coursework ties together. Designed as a bookkeeping assistant capstone course. Prerequisite(s): OATS 121 or ACCT 2110, OATS 140, OATS 205, and OATS 244, or consent of instructor.

OATS 270. Office Administration Technology Capstone
3 Credits (2+2P)
Refines professional skills learned in the BOT program and ties all BOT coursework together. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Community Colleges campuses. Prerequisite(s): OATS 102 or OATS 129; and OATS 120; and OATS 209 or ENGL 2210; and OATS 211 or OECS 211.

Learning Outcomes
1. Construct professional, error-free business documents that demonstrate appropriate formats and ideas in clear, concise, and correct written and spoken language.
2. Utilize effective administration skills to enhance the productive operation of the workplace.
3. Demonstrate professional behaviors and workplace ethics for the professional office environment.
4. Demonstrate proficiency in the use of productivity software in business applications

OEBM-BIOMEDICAL TECHNOLOGY

OEBM 140. Applied Human Biology for Biomedical Technology
3 Credits (3)
Essential human biology, anatomy, physiology and medical terminology for biomedical equipment technicians. Focus on the vocabulary necessary for effective communication in the hospital environment as part of the health care team. Restricted to: Community Colleges only.
OECS 141. Medical Electronics and Safety in Healthcare  
3 Credits (3)  
Introduction to the biomedical equipment technology field. Operation of common biomedical equipment to include pressure and temperature systems, infusion devices, patient monitors, and other physiologic and patient systems. Hospital safety and health regulations explained. Restricted to Community Colleges campuses only.  
Prerequisite(s): OEBM 140.

OECS 200. Biomedical Internship  
1-4 Credits (3-12P)  
Practice working in industry as a biomedical electronics technologist. Students work on a variety of medical equipment and job tasks. An employer evaluation, student report, and a minimum of 100 work hours are required. May be repeated up to 8 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.  
Prerequisite(s): OEBM 140 and OEBM 141.

OEBS 211. CBET Exam Preparation  
1 Credit (1)  
An overview of the Certified Biomedical Equipment Technician exam. Topics include anatomy and physiology, electronics principles, safety issues, equipment operation, and equipment troubleshooting.  
Prerequisite(s)/Corequisite(s): OEBM 241 AND OEBM 240. Restricted to Community Colleges campuses only.

OEBS 240. Medical Imaging Systems  
3 Credits (3)  
The fundamentals of diagnostic radiography equipment will be explored. Principles of an x-ray system will be explained including the x-ray generation, image formation and film processing. Focus will be on both safety and quality. Restricted to Community Colleges campuses only.  
Prerequisite(s): OEBM 140.

OEBS 241. Advanced Medical Electronics  
3 Credits (3+1P)  
Advanced study in biomedical equipment to include cardiovascular, pulmonary, telemetry and other critical life support systems. Restricted to Community Colleges campuses only.  
Prerequisite(s): OEBM 141.

OEBS-COMPUTER TECHNOLOGY

OECS 101. Computer Basics  
1 Credit (1)  
Hands-on instruction to introduce computer use and commonly used software. Graded S/U.

OECS 105. Introduction to Information Technology  
3 Credits (3)  
Examination of information systems and their impact on commerce, education, and personal activities. Utilization of productivity tools for communication, data analysis, information management and decision-making. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

OECS 110. Introduction to Power Point  
1-3 Credits (1-3)  
An introduction to Power Point software to develop business presentations. Includes concepts of basic presentation methods and graphic design principles. Students will create and deliver presentations using text, charts, digitized images, and sound. Restricted to Community Colleges campuses only.

OECS 125. Operating Systems  
1-3 Credits  
Installation, configuration and optimization of current operating systems. Restricted to: Community Colleges only.

OECS 128. Operating Systems Linux/Unix  
3 Credits (3)  
Installation, configuration, and use of Linux/Unix operating system software and utilities including hardware management, file management, use of command line, and scripting. Restricted to: Community Colleges only.

OECS 140. Introduction to Game Production Industry  
1-3 Credits (1-3)  
Students explore the business behind game production, understanding how game companies are organized and funded, positions within the game industry, and what skills game producers need. Restricted to Community Colleges campuses only.

OECS 141. Introduction to Interactive Game Programming  
1-3 Credits (1-3)  
This introductory programming class reviews the basics of programming, including the object-oriented approach. Students will de-construct existing games, develop their own code, and gain an appreciation for coding strategies. May be repeated for a maximum of 6 credits. Restricted to Community Colleges campuses only.

OECS 145. Mobile Application Development  
1-3 Credits (1-3)  
Introduction to elements of mobile application coding including concepts, design strategies, tools needed to create, test and deploy applications for mobile devices. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

OECS 155. Special Topics - Introductory Computer Technology  
0.5-4 Credits (.5-4)  
Topics to be announced in the Schedule of Classes. May be repeated up to 8 credits.

OECS 185. PC Maintenance and Repair I  
1-3 Credits  
Introduction to most common types of PC configurations, installations, and failures. This course will explore troubleshooting skills for maintaining and repairing common hardware and software related problems. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

OECS 192. C++ Programming I  
3 Credits (3)  
Development of skills in programming using the C++ programming language. Restricted to: Community Colleges only.

OECS 195. Java Programming I  
1-3 Credits  
Developing of skills in programming using the Java programming language. Restricted to: Community Colleges only.

OECS 200. Accounting on Microcomputers  
3 Credits (3)  
Fundamental accounting principles using popular microcomputer software to include G/L, A/R, A/P; purchase order, billing, inventory, and forecasting modules.  
Prerequisite: ACCT 2110 or OATS 121.
OECS 204. Linux Operating System
1-3 Credits
Install and configure the Linux operating system on X86 systems. Covers issues involved in maintaining operating system, networking, creating and managing users, and installing and updating software. General procedures for working with operating system includes maintaining disk space, preserving system security, and other related topics. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite: OECS 128.

OECS 207. Windows
0.5-3 Credits
Covers local installation, configuration of core local services, managing users, and the general local management and maintenance of Windows workstations. May be repeated up to 6 credits.

Prerequisite(s)/Corequisite(s): OECS 185. Restricted to Community Colleges campuses only.

OECS 208. Internet Applications
1-3 Credits
Survey of the Internet to include e-mail, file transfer, current search techniques, the World Wide Web and basic Web page development. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

OECS 209. Computer Graphic Arts
1-3 Credits
Basic graphics composition using computer programs to include editing and manipulating graphic images, clip-art, and printing of pictures. May be repeated for a maximum of 6 credits under different subtitles listed in the Schedule of Classes.

Prerequisite: OECS 105, BCIS 1110, or OECS 101.

OECS 211. Word Processing Applications
1-3 Credits
Basic word processing to include composing, editing, formatting, and printing of documents. May be repeated under different subtitles listed in the Schedule of Classes for a maximum of 6 credits.

Prerequisites: BCIS 1110 or OECS 105.

OECS 215. Spreadsheet Applications
1-3 Credits
Use of spreadsheets to include graphics and business applications. May be repeated for a maximum of 6 credits.

Prerequisites: BCIS 1110 or OECS 105.

OECS 220. Database Application and Design
1-3 Credits
Creating, sorting, and searching of single and multifile databases to include report generation and programming database commands. May be repeated for a maximum of 6 credits under different subtitles listed in the Schedule of Classes. Restricted to: Community Colleges only.

Prerequisite(s): BCIS 1110 OR E T 120 OR E T 122 OR OECS 105.

OECS 221. Internship I
1-3 Credits
Work experience that directly relates to a student’s major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OECS majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

Prerequisite(s): Consent of instructor.

OECS 222. Internship II
1-3 Credits
Continuation of OECS 221. Each credit requires specified number of hours of on-the-job work experience. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OECS majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

Prerequisite(s): OECS 221 and consent of instructor.

OECS 223. Web Design for Business
3 Credits (3)
Design and create a website using HTML, CSS, web development tools and industry-recognized software while applying best practices in site management and business web presence.

Learning Outcomes
1. Students will identify and apply best practices for web design in a business setting. Students will create a basic web page utilizing WC3 principles. Students will explain the importance and impact of web presence in today’s business environment. Students will determine and utilize web page features and techniques for a specific business. Students will create a web design management plan for business. Students will discuss web page tools for performance and web traffic analytics. Students will identify web design components for a mobile society.

OECS 227. Computer Applications for Technicians
3 Credits (3)
Computer applications for service technicians in various disciplines. Hardware and software applications explored. Includes operating systems, high level programming, and networking hardware and software.

OECS 230. Data Communications and Networks I
1-3 Credits
Definition of data communication; survey of hardware applications and teleprocessor software; examination and design of networks. May be repeated for a maximum of 6 credits.

Prerequisite: OECS 185.

OECS 231. Data Communications and Networks II
1-3 Credits
Installation and application of popular microcomputer network software. May be repeated for a maximum of 6 credits.

Prerequisite: OECS 230.

OECS 234. Linux Server
3-4 Credits (3-4)
This course addresses the implementation and support needs of IT professionals that are planning to deploy and support Linux Server(s). It provides in-depth, hands-on training for planning, implementation, management and support of Linux networking services. May be repeated up to 8 credits.

Prerequisite(s)/Corequisite(s): OECS 204. Restricted to: OECS majors. Restricted to Community Colleges campuses only.
OECS 235. Structured Query Language (SQL)  
1-3 Credits  
Installation, configuration, administration, and troubleshooting of SQL client/server database management system. May be repeated up to 3 credits.  
Prerequisite(s)/Corequisite(s): OECS 220. Restricted to Community Colleges campuses only.

OECS 237. Windows Server  
3-4 Credits (3-4)  
This course addresses the implementation and support needs of IT professionals that are planning to deploy and support Microsoft Windows Server Active Directory Domain Services in medium to large businesses. It provides in-depth, hands-on training for Information Technology (IT) professionals responsible for the planning, implementation, management, and support of Windows Active Directory services. May be repeated up to 4 credits.  
Prerequisite(s)/Corequisite(s): OECS 207. Restricted to Community Colleges campuses only.

OECS 245. Game Programming I  
3 Credits (3)  
Development of programming skills for games and animation using current programming languages and tools. May be repeated for a maximum of 6 credits.  
Prerequisite: consent of instructor.

OECS 246. Game Programming II  
3 Credits (3)  
Continuation of OECS 245. May be repeated for a maximum of 6 credits.  
Prerequisite: OECS 245.

OECS 250. Systems Analysis and Design I  
3 Credits (3)  
Analysis, configuration, design and testing of organizations’ work flow as it relates to hardware, software, data, procedures and personnel. Systems Life Cycle approach matching end users' needs to feasible financial, technical and operational solutions. Restricted to Community Colleges campuses only.  
Prerequisite(s): OECS 220.

OECS 253. Applied Data Analysis and Management  
3 Credits (3)  
Applied use of advanced spreadsheet tools for data analysis and database tools for data and information management. Connect emerging topics in business to tools used in analyzing data and making raw data useful for business decision making.  
Prerequisite: BCIS 1110.  
Learning Outcomes  
1. Manage, integrate, and analyze data with data tools. Generate and summarize data. Use tools for business projections, comparisons, trends, and informed decisions. Create advanced queries and enhance table design. Use form tools and create custom forms. Use automation tools for efficiency. Secure and maintain data. Plan, research, create, and revise spreadsheets and databases for a specific business application. Discuss emerging topics in business related to data analysis and management.

OECS 255. Special Topics  
1-4 Credits  
Topics to be announced in the Schedule of Classes.

OECS 261. Introduction to Networks  
3-4 Credits (3-4)  
Introduction to networking principles including the practical and conceptual skills for understanding basic networking, planning and designing networks, implementing IP addressing schemes, examining the OSI and TCP/IP layers, and performing basic configurations for routers and switches. Aligns to the first course of the Cisco Networking Academy CCNA curriculum. Restricted to Community Colleges campuses only.

OECS 262. Essentials of Routing and Switching  
3-4 Credits (3-4)  
Examination of the architecture, components, and operations of routers and switches in a small network. Student will learn how to configure, verify and troubleshoot: routers and switches, static routing, default routing, VLANs, and ACLs. Aligns to the second course of the Cisco Networking Academy CCNA curriculum. May be repeated up to 4 credits.  
Prerequisite(s)/Corequisite(s): OECS 261. Restricted to Community Colleges campuses only.

OECS 263. Network Fundamentals  
3-4 Credits (3-4)  
Fundamentals of networking architecture, components, and operations including practical and conceptual skills using routers and switches. Student will learn how to configure, verify and troubleshoot static routing, default routing, VLANs, and ACLs. This course aligns to the third course of the Cisco Networking Academy CCNA curriculum. May be repeated up to 4 credits.  
Prerequisite(s)/Corequisite(s): OECS 262. Restricted to Community Colleges campuses only.

OECS 264. Network Routing Protocols  
3-4 Credits (3-4)  
Fundamentals of routing protocols for troubleshooting advanced network operations. Covers common networking issues such as RIP, OSPF, and EIGRP for IPv4 and IPv6 networks. This course aligns to the fourth course of the Cisco Networking Academy CCNA curriculum. May be repeated up to 4 credits.  
Prerequisite(s)/Corequisite(s): OECS 263. Restricted to Community Colleges campuses only.

OECS 269. Network Security  
3-4 Credits (3-4)  
Fundamentals of design and implementation of network security solutions that will reduce the risk of system vulnerability. May be repeated up to 8 credits. Restricted to Community Colleges campuses only.  
Prerequisite(s): OECS 204 or OECS 207 or OECS 261 or consent of instructor.

OECS 275. PC Maintenance and Repair II  
1-3 Credits  
Continuation of OECS 185. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.  
Prerequisite(s): OECS 185.

OECS 280. Desktop Publishing I  
3 Credits (3)  
Design and production of publication materials to fill the needs of business communities, using a microcomputer. May be repeated for a maximum of 6 credits. Same as OATS 280.  
Prerequisites: either BCIS 1110, OECS 105.
OECS 290. Computer Technology Capstone
1-3 Credits
Refines skills learned in the OECS program. Culminates in a review and practice of advanced software applications. May be repeated up to 3 credits. Restricted to: OECS & OECT majors. Restricted to Community Colleges campuses only.
Prerequisite(s): (OECS 125, OECS 128, OECS 207, OR OECS 203) AND (OECS 185 OR ET 283).

OECS 299. Independent Study
1-3 Credits
Specific subjects to be determined based on need. Restricted to: Community Colleges only.

OEEM- PARAMEDIC

OEEM 101. CPR for the Health Care Professional
1 Credit (1)
Students learn identification and response to airway and circulation emergencies, including use of a SAED and accessing the EMS system. This course is taught using the American Heart Association guidelines for course completion. Required: grade of C or better.

OEEM 103. Heartsaver First Aid/CPR
1 Credit (1)
Students learn how to identify and respond to airway, circulation and basic first aid emergencies, to include using a SAED and accessing the EMS system. This course is intended for students who are not Allied Health Majors and utilizes the American Heart Association guidelines for course completion. Restricted to: Community Colleges only.

OEEM 115. First Responder Prehospital Professional
3 Credits (2+3P)
Provides training in prehospital medical and traumatic emergencies. Consent of instructor required. Requires a C or better to pass. Restricted to majors.
Corequisite(s): OEEM 101.

OEEM 120. Emergency Medical Technician Basic
6 Credits (6)
EMT-Basic skills to include care of soft tissue and muscular/skeletal injuries, circulatory, nervous, general medical and respiratory emergencies. Requires a “C” or better to pass. May be repeated up to 6 credits. Consent of Instructor required.
Corequisite(s): OEEM 101,OEEM 120L,OEEM 121.
Prerequisite(s)/Corequisite(s): OEEM 153. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

OEEM 120 L. Emergency Medical Technician Basic Lab
2 Credits (6P)
EMT-Basic skills development with emphasis on assessment, skills competency and team-work in patient care in the prehospital setting. May be repeated up to 2 credits.
Corequisite(s): OEEM 101, OEEM 120, OEEM 121.
Prerequisite(s)/Corequisite(s): OEEM 153. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

OEEM 121. Emergency Medical Technician Basic Field/Clinical
1 Credit (3P)
Covers the patient care experience provided through assigned shifts in the hospital and/or ambulance setting. Requires a “C” or better to pass. May be repeated up to 1 credits. Consent of Instructor required.
Prerequisite(s)/Corequisite(s): OEEM 101, OEEM 120, OEEM 120L,OEEM 153. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

OEEM 150. Emergency Medical Technician Intermediate
2 Credits (6P)
Expanded patient care experience provided through assigned shifts in the hospital and/or ambulance setting. May be repeated up to 2 credits. Consent of Instructor required. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.
Prerequisite(s): Current EMT-basic license, pretest and consent of instructor.

OEEM 150 L. Emergency Medical Technician Intermediate Lab
2 Credits (6P)
Intermediate skills development with an emphasis on assessment, skills competency, and team work in patient care in the prehospital setting. Requires a C or better to pass.
Prerequisite(s)/Corequisite(s): OEEM 150,OEEM 151. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

OEEM 151. Emergency Medical Technician Intermediate Field/Clinical
2 Credits (6P)
Patient care experience provided through assigned shifts in the hospital and/or ambulance setting.
Prerequisite(s)/Corequisite(s): OEEM 150, OEEM 150 L. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

OEEM 153. Introduction to Anatomy and Physiology for the EMS Provider
3 Credits (3)
To properly assess and manage a patient, a prehospital provider must have a solid foundation in human anatomy and physiology. This course provides a systematic approach to building this foundation. Grade of “C” or better is required to pass the course. Consent of Instructor required. Restricted to Community Colleges campuses only.

OEEM 155. Special Topics
1-6 Credits
Specific topics to be listed in Schedule of Classes. May be repeated for a maximum of 10 credits.

OEEM 177. Emergency Medical Services Instructor
4 Credits (4)
Theory of student learning, methodology, instructional components, evaluation, and course coordination for the EMS profession. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.
Prerequisite(s): Minimum of an EMT-Basic License required.

OEEM 201. Human Pathophysiology
3 Credits (2+3P)
Overview of anatomy and physiology. Emphasis on human body pathophysiology including a medical illness component. Requires a “C” or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.
Prerequisite(s): OEEM 120, OEEM 120 L.
OEEM 202. EMT-Paramedic Respiratory Emergencies  
3 Credits (2+3P)  
Review anatomy, physiology and pathophysiology of the respiratory system. Assessment and management of respiratory emergencies and acute respiratory failure in the prehospital setting. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.  
Prerequisite(s): OEEM 212.

OEEM 203. EMT-Paramedic Trauma Emergencies  
3 Credits (2+3P)  
Study of the effects of trauma on the human body. Assessment and management of trauma patients and scenes, including vehicular extrication. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.  
Prerequisite(s): OEEM 216.

OEEM 206. Introduction to Advanced Prehospital Care  
3 Credits (2+3P)  
Overview of prehospital care including roles and responsibilities of EMT-P, EMS systems, medical, legal, ethical issues, stress management, medical terminology, medical report writing and communication. Includes ride-along with ambulance and dispatch observation. Requires a C or better to pass. Restricted to majors. Consent of instructor required. Restricted to: Community Colleges only. Restricted to OEEM majors.  
Prerequisite(s): OEEM 120.

OEEM 207. Introduction to Pharmacology  
3 Credits (2+3P)  
Drug actions, factors modifying drugs and dosages: characteristics of drug effects, and drug history and dosages. Prehospital protocol, transport, and common patient prescription medications. Restricted to majors. Requires a C or better to pass. Restricted to: Community Colleges only. Restricted to OEEM majors.  
Prerequisite(s): OEEM 120.

OEEM 210. Cardiac Rhythm Interpretation  
3 Credits (2+3P)  
Cardiac conduction system: electrophysiology, electrocardiogram, monitor, atrial, sinus, ventricular and junctional dysrhythmias, multiple lead EKG and 12 lead EKG interpretation. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEEM, OEMS majors. Restricted to Community Colleges campuses only.  
Prerequisite(s): OEEM 201, OEEM 206, OEEM 207.

OEEM 212. EMT-Paramedic Cardiovascular Emergencies  
3 Credits (2+3P)  
Review anatomy, physiology, and pathophysiology of cardiovascular system. Assessment and management of cardiovascular emergencies in the prehospital setting. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.  
Prerequisite(s): OEEM 210.

OEEM 213. EMT-Paramedic: Medical Emergencies I  
3 Credits (2+3P)  
Study of the disease process; assessment and management of neurological, endocrine, gastrointestinal, renal emergencies and infectious disease. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.  
Prerequisite(s): OEEM 212.

OEEM 214. EMT--Paramedic: Medical Environmental Emergencies II  
3 Credits (2+3P)  
Study of disease process, assessment, and management of poisoning, drug and alcohol abuse, environmental, behavioral and geriatric emergencies. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.  
Prerequisite(s): OEEM 213.

OEEM 215. EMT-Paramedic: Reproductive and Childhood Emergencies  
3 Credits (2+3P)  
Covers anatomy, physiology, disease processes, assessment and management of male and female reproductive system emergencies, childhood emergencies and growth and development. Restricted to majors. Requires a C or better to pass. Restricted to Community Colleges only.  
Prerequisite(s): OEEM 214 and consent of instructor.

OEEM 216. Pediatric Advance Life Support for the Healthcare Professional  
1 Credit (1)  
Identify and respond to life threatening pediatric emergencies. Taught using the American Heart Association guidelines for course completion. Graded S/U.  
Prerequisite: OEEM 101.

OEEM 217. Advance Cardiac Life Support for the Healthcare Provider  
1 Credit (1)  
Identify and respond to life threatening cardiac emergencies. Taught using the American Heart Association guidelines for course completion. Graded S/U.  
Prerequisite: OEEM 101.

OEEM 230. EMT-Paramedic Clinical Experience I  
3 Credits (9P)  
Assigned clinical experiences in patient assessment and specific management techniques. Successful completion includes minimum required hours and completion of course objectives. Restricted to majors. Requires a C or better to pass.  
Prerequisite: consent of instructor.

OEEM 231. EMT-Paramedic Clinical Experience II  
3 Credits (9P)  
Assigned clinical experiences in patient assessment and specific management techniques. Successful completion includes minimum required hours and completion of course objectives. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required.  
Prerequisite(s)/Corequisite(s): OEEM 230. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.

OEEM 240. EMT-Paramedic Field Experience I  
3 Credits (9P)  
Advanced prehospital skills and knowledge. Successful completion of at least the minimum required hours and course objectives. Restricted to majors. Requires a C or better to pass.  
Prerequisite: consent of instructor.

OEEM 241. EMT-Paramedic Field Experience II  
3 Credits (9P)  
Continued focus on advanced prehospital skills and knowledge, with increasing responsibility for patient care. Successful completion includes meeting at least the minimum required hours and course objectives.  
Prerequisite(s)/Corequisite(s): OEEM 240. Requires a C- or better to pass.
OEEM 242. EMT-Paramedic Field Internship
3 Credits (9P)
Emphasis on total patient care responsibility and team leadership skills. Successful completion includes meeting the minimum hours required and course objectives. Pre/ Consent of Instructor required. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.
Prerequisite(s): OEEM 231, OEEM 241.
OEEM 243. EMT-Paramedic Preparation for Practice
2 Credits (2)
Comprehensive final program testing to prepare for licensing examination. Requires a "C" or better to pass. May be repeated up to 2 credits. Consent of Instructor required. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.
Prerequisite(s): OEEM 242.
OEEM 253. Critical Care Emergency Medical Transport Program
6 Credits (5+6P)
This course will provide further education to Paramedics, Registered Nurses and Registered Respiratory Therapists who wish to function as part of a critical care transport team. Consent of instructor required. Restricted to: Community Colleges only.
Prerequisite(s): Licensed Paramedic, Registered Nurse or Registered Respiratory Therapist with one or more years experience.

OEET- ELECTRICAL TRADES

OEET 110. Basic Electricity and Electronics
4 Credits (3+3P)
An introduction to electricity theory and practice, including electron theory, Ohm's law, construction of electrical circuits, direct and alternating currents, magnetism, transformers, and practical applications. Same as HVAC 102, ELT 105, OEPB 102.
OEET 120. Basic Motor Controls
5 Credits (2+6P)
Developing schematics and wiring simple manual and electromechanical control devices.
Prerequisite: OEET 110 or consent of instructor.
OEET 151. Electrical Apprenticeship I
6 Credits (6)
Apprenticeship responsibilities and benefits as well as first aid and CPR will be covered. Hand tools, electrical theory, and the regulations imposed by national codes and OSHA. Students will apply theory taught in their jobs.
Prerequisite: consent of instructor.
OEET 152. Electrical Apprenticeship II
6 Credits (6)
Ohm's law circuit sizing and service panel sizing will be covered in detail. Other topics include low voltage systems, heating and air conditioning circuits, alarm systems and smoke detectors.
Prerequisites: OEET 151 and consent of instructor.
OEET 153. Electrical Apprenticeship III
6 Credits (6)
Various electrical measuring devices will be covered in detail. Inductance, transformers, capacitance, and simple motors will be studied.
Prerequisites: OEET 152 and consent of instructor.
OEET 154. Electrical Apprenticeship IV
6 Credits (6)
Theory and application of three-phase transformers and autotransformers. Electrical distribution using switchboards, panelboards, and circuit breakers.
Prerequisites: OEET 153 and consent of instructor.
OEET 205. National Electric Code
3 Credits (3)
Interpretation and application of the National Electric Code.
Prerequisite: OEET 110.
OEET 251. Electrical Apprenticeship V
6 Credits (6)
Commercial/industrial applications for electricians. Blueprint interpretation, commercial construction types and processes, wiring methods, wiring materials, and motor controls.
Prerequisites: OEET 154 and consent of instructor.
OEET 252. Electrical Apprenticeship VI
6 Credits (6)
In-depth commercial applications to include commercial/industrial service calculations, mobile home parks, multi-family dwellings, and commercial fire/security systems.
Prerequisites: OEET 251 and consent of instructor.
OEET 253. Electrical Apprenticeship VII
6 Credits (6)
Control devices in commercial/industrial applications; emphasis on logic in-line diagrams, time delay starters, reversing starters, and manual/magnetic solenoids.
Prerequisites: OEET 252 and consent of instructor.
OEET 254. Electrical Apprenticeship VIII
6 Credits (6)
Miscellaneous topics for the journeyperson electrician to include power distribution/transmission, solid state controls and relays, photoelectric and proximity controls and programmable controllers.
Prerequisites: OEET 253 and consent of instructor.
OEET 295. Special Topics
1-6 Credits
Topics to be announced in the Schedule of Classes.

OEGR-DIGITAL GRAPHIC TECH

OEGR 221. Cooperative Experience I
1-3 Credits
Student employed in approved work site; supervised and rated by employer and instructor. Each credit requires specified number of hours on-the-job work experience. Restricted to majors. Graded S/U.
Prerequisite: consent of instructor.

OEGS-GEOGRAPHIC INFO SYS

OEGS 181. Introduction to Principles of Geographic Information Systems
4 Credits (3+3P)
This course will introduce students to fundamental software capabilities of geographic information systems (GIS), along with the underlying conceptual framework. Topics include origins, development, and methods of cartography, components of a GIS, the nature and characteristics of spatial data, methods of data capture and sources of data, review of typical GIS operations and applications. Producing useful, aesthetically pleasing maps will be an integral part of the course. ArcGIS software will be used for this course. May be repeated up to 4 credits.
OEGS 187. GIS Data Acquisition and Management
4 Credits (3+3P)
An introduction to defining data needs and evaluating whether a given dataset matches those needs. Students will explore some common geographic data formats used in ArcGIS and learn about sources of data and maps that can be incorporated into a GIS project. The student will learn the advanced functionality and versatility of using geodatabases. The student will demonstrate how to design and build a geodatabase, migrate existing data to a geodatabase and edit data stored in a geodatabase. Methods for georeferencing scanned maps, aerial photos and computer aided drafting files will be explored and discussed. May be repeated up to 4 credits.
Prerequisite(s): OEGS 181.

OEGS 291. Special Topics in Geographic Information Systems
1-3 Credits (1-3)
Topics to be announced in the Schedule of Classes. May be repeated up to 12 credits. Restricted to Community Colleges campuses only.

OETS-TECHNICAL STUDIES

OETS 100. Industrial/Construction Safety
2 Credits (2)
Covers safety issues such as PPE, BBP, ladder safety, RTK, HazCom, MSDS and information about safety organizations such as OSHA, NIOSH, NFPA, National Safety Council. Community Colleges only. Restricted to Dona Ana and Carlsbad campuses.

OETS 102. Career Readiness Certification Preparation
1 Credit (1)
This course is designed to prepare students to successfully obtain Career Readiness Certifications in all areas and at the appropriate levels for their program of study. Graded: S/U Grading (S/U, Audit). May be repeated up to 3 credits. S/U Grading (S/U, Audit).

OETS 103. Technical Career Skills
4 Credits (4)
This course will be project-based and will encompass writing, presentation, math, reading, and critical thinking skills applied in a technical environment. Restricted to: Community Colleges only.

OETS 104. Basic Mathematics for Technicians
4 Credits (4)
Fundamental mathematical concepts and computations including measurement, ratio and proportions, and pre-algebra as it relates to technical programs.
Prerequisite: appropriate placement test score.

OETS 117. Writing for Technicians
3 Credits (3)
Instruction in the skills for developing clear, written descriptions of processes and procedures used by technicians in various fields. Emphasis on correct grammar, logical organization, and receiving audience. Focuses on clarity, structure, and concise writing methods. Does not substitute for ENGL 111G. Restricted to: Community Colleges only.

OETS 118. Mathematics for Technicians
3 Credits (2+2P)
Analysis and problem solving of technical problems using measuring instruments and techniques of arithmetic, algebra, geometry, and trigonometry. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.
Prerequisite(s): Grade of “C-” or better in OETS 104 or CCDM 103 N, or appropriate placement test score.

OETS 120. Business Fundamentals
3 Credits (3)
Instruction in the skills for basic business concepts used by technicians in various fields. Emphasis placed on basic business concepts; business ownership including marketing, management, accounting, and customer services; interpersonal communication; and basic computer concepts including word processing, spreadsheets, and presentation software. Restricted to Community Colleges campuses only.

OETS 255. Special Topics Technical Studies
1-6 Credits
Topics to be announced in the Schedule of Classes. Restricted to: Community Colleges only.
Prerequisite(s): Consent of instructor.

PHED-PHYSICAL EDUCATION

PHED 1110. Dance:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1230. Individual Sport:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1290. Team Sport:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1310. Swim I:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1410. Yoga:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies
PHED 1430. Pilates:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1510. Training:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1620. Fitness:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1630. Career Fitness:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation.
Learning Outcomes
1. Varies

PHED 1670. Aerobics:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1710. Martial Arts:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1830. Running:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation.
Learning Outcomes
1. Varies

PHED 1910. Outdoor Experience
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 2996. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. Each offering will carry appropriate subtitle. May be repeated for a maximum of 6 credits.
Learning Outcomes
1. Varies

PHIL-PHILOSOPHY

PHIL 1115G. Introduction to Philosophy
3 Credits (3)
In this course, students will be introduced to some of the key questions of philosophy through the study of classical and contemporary thinkers. Some of the questions students might consider are: Do we have free will? What is knowledge? What is the mind? What are our moral obligations to others? Students will engage with and learn to critically assess various philosophical approaches to such questions.
Learning Outcomes
1. Comprehend and differentiate between various philosophical approaches to questions within fields such as metaphysics, epistemology, ethics, and aesthetics.
2. Critically evaluate various philosophical arguments and positions.

PHIL 1120G. Logic, Reasoning, & Critical Thinking
3 Credits (3)
The purpose of this course is to teach students how to analyze, critique, and construct arguments. The course includes an introductory survey of important logical concepts and tools needed for argument analysis. These concepts and tools will be used to examine select philosophical and scholarly texts.
Learning Outcomes
1. Comprehend components of arguments.
2. Acquire a general understanding of the essential logical concepts needed for argument analysis, such as validity, soundness, deduction, and induction.
3. Critically assess arguments with an aim toward identifying what constitutes effective and reasonable argument strategies.
4. Learn to identify common logical fallacies.
5. Apply knowledge of argumentation principles to philosophical and scholarly texts

PHIL 1140G. Quest for God
3 Credits (3)
An effort to understand the religious life; a consideration of some of the traditional approaches to God and what it means to be religious.
Learning Outcomes
1. Identify and describe theories regarding religion
2. Develop and enhance your critical thinking skills, particularly in the evaluation of arguments about the truth or applicability of particular religious or secular viewpoints.
3. Analyze the teachings of world religions by describing their similarities and differences.
4. Explain the beliefs, practices, and ethical standards of the major world religions as well as emerging religious movements.
5. While traditional expressions of each faith are emphasized, students will learn how each religion evolved historically and spiritually as well as the contemporary ideas and practices of each religion.
PHIL 1145G. Philosophy, Law, and Ethics
3 Credits (3)
An introduction to practical problems in moral, social, political, and legal philosophy. Topics to be discussed may include ecology, animal rights, pornography, hate speech on campus, same-sex marriage, justice, abortion, terrorism, treatment of illegal immigrants, and New Mexican Aboriginal Peoples’ land claims.

**Learning Outcomes**
1. The aim of this course is to familiarize students with some of the ethical and philosophical issues that arise in connection with laws/legality in general and criminal and constitutional law in the U.S. in particular.
2. It examines issues in moral philosophy, political philosophy, and philosophy of law.
3. A question to which we repeatedly return is whether the law does and/or ought to have some necessary relation to the demands of justice and morality. Among the topics we’ll cover are: What is a law? Natural law vs. positive law and legal positivism vs. natural law theory; Utilitarian, divine command, Kantian, and natural law theories of moral rightness/wrongness; The distinction between the normative and the non-normative; Is there a moral duty to obey the law? Plato’s Crito and R.P. Wolff’s “philosophical anarchism.”; J.S. Mill and classical liberalism; Mill’s "harm principle" ("the state should restrict the liberty of competent adults via the criminal law only to prevent them from wrongfully harming others persons"); Legal paternalism. Should the state make it harder for citizens to smoke tobacco and/or marijuana, for their own good?; Should voluntary euthanasia be legal? Is there a constitutional “right to die”? How should judges determine the meaning of vaguely worded constitutional requirements (e.g. “free exercise of religion,” no “unreasonable search and seizure,” no “cruel and unusual punishment,” etc.)? Originalist vs. nonoriginalist approaches; The First Amendment, free speech, and freedom of religion; The death penalty and “cruel and unusual punishment”; The insanity defense in criminal law; Does the 14th Amendment’s requirement of "equal protection" under the law compel states to recognize same sex marriage?; The Fourth Amendment and its prohibition of "unreasonable search and seizure."

PHIL 1155G. Philosophy of Music
3 Credits (3)
This is an introductory course in the philosophy of music. This course will survey three questions: What is music? Why is music important? How can we distinguish good music from bad music? We will draw examples from a wide variety of musical genres, from classical music, jazz and blues to punk and rap. Students will be encouraged to apply philosophical theorizing to think about their preferred musical form.

PHIL 2110G. Introduction to Ethics
3 Credits (3)
This course introduces students to the philosophical study of morality and will explore questions concerning our human obligations to others and related issues. Students may be asked to relate various approaches to ethics to present-day ethical debates and their own lives.

**Learning Outcomes**
1. Differential between various ethical theories, which may include virtue ethics, deontology, and consequentialism.
2. Critically evaluate various ethical theories and positions.

PHIL 2230G. Philosophical Thought
3 Credits (3)
In this course, students will grapple with some of the key questions of philosophy through the study of classical and contemporary thinkers. Students will become familiar with the perennial problems in subfields of philosophy such as metaphysics, epistemology, ethics, and aesthetics. They will learn to approach these problems both critically and sympathetically.

**Learning Outcomes**
1. Comprehend and differentiate between various philosophical approaches to questions within fields such as metaphysics, epistemology, ethics, and aesthetics.
2. Critically evaluate various philosophical arguments and positions.
3. Identify the differences that characterize the major subfields of philosophy.

PHIL 305. Philosophy and Literature
3 Credits (3)
Examination of philosophical ideas as presented in selected literary works and literary criticism.

PHIL 306. Philosophy Through Film
3 Credits (3)
An exploration of a range of philosophical issues through the use of film. Topics include personal identity and memory, faith and the problem of evil, free will and moral responsibility, and the meaning of life. Films may include The Prestige, Memento, The Third Man, A Clockwork Orange, Fight Club, and Synecdoche, New York.

PHIL 312. Formal Logic
3 Credits (3)
Introduction to symbolic logic and its application in the analysis of arguments in scientific and ordinary discourse.

PHIL 315. Philosophy of Language
3 Credits (3)
A critical examination of philosophical inquiries into the syntactic, semantic, and pragmatic dimensions of language.

PHIL 316. Philosophy of Mathematics
3 Credits (3)
Survey of traditional philosophical problems and views concerning the nature of mathematics including such questions as: What is the nature of mathematical knowledge? What is mathematical truth? What is a number? What is proof? What is the relationship between logic and mathematics?

PHIL 320. Social and Political Philosophy
3 Credits (3)
This course critically examines such fundamental concepts as liberty, equality and human rights.

PHIL 321. Biomedical Ethics
3 Credits (3)
Examines ethical dimensions of such issues as abortion, euthanasia, and physician-assisted suicide; informed consent as a condition of treating patients and experimenting on subjects; genetic engineering; and alternative reproductive methods, including surrogate motherhood. Also considers what implications moral theories have for these issues.

PHIL 322. Environmental Ethics
3 Credits (3)
Explores the ethical and topical issues raised by mining and grazing, air and water pollution, factory farming, global warming, and treatment of animals. It also studies some recent ecological movements such as ecofeminism, social ecology, and deep ecology.
PHIL 323V. Engineering Ethics
3 Credits (3)
The moral legal responsibilities of engineers to clients, employers, the public, and the environment. Topics include criteria for judging when risk is acceptable, the duty to safeguard public health and welfare, conflicts of interest, and whistle-blowing.
Prerequisite: Junior standing or higher.

PHIL 328. Applied Ethics
3 Credits (3)
Examines the implications of utilitarianism, Kantian ethics, natural law theory, and other moral theories for controversial moral issues such as the death penalty, euthanasia, abortion, genetic engineering, gay marriage, affirmative action, and pornography.

PHIL 331. Philosophy of Religion
3 Credits (3)
The nature, fundamental concepts, and problems of religion. Emphasis on the significance of religion for creative and practical value.

PHIL 332. Ethics and Global Poverty
3 Credits (3)
Philosophical scrutiny of and moral reflection on various aspects of global poverty and foreign aid. For example: Is poverty fundamentally a lack of income, or can it be understood as a failure to meet basic needs, or as a lack of valuable freedom? Do human rights exist? What, if any, are the moral obligations of rich countries to poor countries? Can foreign aid be immoral? How should the answers to these questions influence public policy? Restricted to: Main campus only.

PHIL 341. Ancient Philosophy
3 Credits (3)
Introduction to the philosophies of the pre-Socratics, Socrates, Plato, Aristotle, with brief discussion of the Epicureans and Stoics.

PHIL 344. Modern Philosophy
3 Credits (3)
Foundations of contemporary thought: introduction to the philosophies of Descartes, Bacon, Spinoza, Leibniz, Locke, Berkeley, Hume, Kant, and Hegel.

PHIL 346. Philosophy of Mind
3 Credits (3)
Examination of some of the most influential accounts of the mind, focusing on such issues as the relation between the mind and the body, mental causation and consciousness.

PHIL 350. Epistemology
3 Credits (3)
Introduction to epistemology. The philosophical critique of alleged ways of knowing. An examination of the nature of truth.

PHIL 351. Philosophy of Science
3 Credits (3)
Philosophical examination of the methodology of science. The logical, metaphysical, epistemological, and ethical critique of science and its impact on human affairs.

PHIL 356. Special Topics
3 Credits (3)
Specific subjects announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

PHIL 363. Independent Studies
1-3 Credits
For students with some background in philosophy. Independent work in a specific area. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHIL 373. Ethical Theory
3 Credits (3)
The critical examination of the justification of ethical theories with particular attention to the language of moral discourse.

PHIL 376. Philosophy of Law
3 Credits (3)
Ethical, logical, and epistemological implications of law, together with an analysis of the rhetoric of legal practice.

PHIL 380. Metaphysics
3 Credits (3)
Introduction to metaphysics: a treatment of such issues as the meaning of existence, the mind-body problem, the problem of universals, and free will versus determinism.

PHIL 385. Human Nature and the Good Life
3 Credits (3)
An examination of some of the most historically and philosophically influential conceptions of human nature and corresponding accounts of the good life.

PHIL 397. Existentialism
3 Credits (3)
The origins of existentialist thought in philosophy and literature, including the thought of Nietzsche, Kierkegaard, Dostoyevsky, Camus, and Sartre. The course covers topics in ethics and political philosophy, metaphysics, philosophical psychology, philosophy of religion, and other sub-disciplines of philosophy.

PHIL 448. Writing Philosophy
3 Credits (3)
A workshop on writing philosophy papers. Includes how to read and understand philosophical writing, organize a paper effectively, present a clear and forceful argument, and avoid common mistakes.
Prerequisite(s): completed 18 hours of philosophy credit.

PHIL 463. Independent Studies
1-3 Credits
For students with a strong background in philosophy. Independent work in a specific area. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHIL 505. Advanced Studies in Philosophy and Literature
3 Credits (3)
Examination of philosophical issues (e.g. personal identity, free will, moral dilemmas, the meaning of life) as presented in selected literary works and literary criticism. Consent of Instructor required.

PHIL 532. Advance Studies in Ethics and Global Poverty
3 Credits (3)
Advanced philosophical scrutiny of and moral reflection on various aspects of global poverty and foreign aid. For example: Is poverty fundamentally a lack of income, or can it be understood as a failure to meet basic needs, or as a lack of valuable freedom? Do human rights exist? What, if any, are the moral obligations of rich countries to poor countries? Can foreign aid be immoral? How should the answers to these questions influence public policy? Restricted to: Main campus only.
PHLS-PUBLIC HEALTH SCIENCES

PHLS 1110G. Personal Health & Wellness
3 Credits (3)
A holistic and multi-disciplinary approach towards promoting positive lifestyles. Special emphasis is placed on major problems that have greatest significance to personal and community health. Topics to include nutrition, stress management, fitness, aging, sexuality, drug education, and others.

Learning Outcomes
1. Students will identify, describe and explain human health behaviors and how they are influenced by social structures, institutions, and processes within the contexts of complex and diverse communities. Students should: Develop an understanding of self and the world by examining content and processes used by social and behavioral sciences to discover, describe, explain, and predict human behaviors and social systems.
2. Students will articulate how beliefs, assumptions, and values are influenced by factors such as politics, geography, economics, culture, biology, history, and social institutions. Students should: Enhance knowledge of social and cultural institutions and the values of their society and other societies and cultures in the world.
3. Students will describe ongoing reciprocal interactions among self, society, and the environment. Students should: Understand the interdependent nature of the individual, family/social group, and society in shaping human behavior and determining quality of life.
4. Students will apply the knowledge base of the social and behavioral sciences to identify, describe, explain, and critically evaluate relevant issues, ethical dilemmas, and arguments. Students should: Articulate their role in a global context and develop an awareness and appreciation for diverse value systems in order to understand how to be good citizens who can critically examine and work toward quality of life within a framework of understanding and justice.

PHLS 2110. Foundations of Health Education
3 Credits (3)
Role and responsibility of the health educator with emphasis on small group dynamics, oral and written communication skills, building community coalitions and introduction to grant writing. Taught with PHLS 375. Cannot receive credit for both PHLS 2110 and PHLS 375. May be repeated up to 3 credits.
Prerequisite(s): PHLS 1110G, or consent of instructor.

Learning Outcomes
1. Define health, three levels of prevention, health education and health promotion, and describe the major determinants of health.
2. Describe the 7 major areas of responsibility, major competencies and sub-competencies of a professional health educator and the CHES's possible roles in various community health settings.
3. Describe and examine the historical context and development of the profession of health education.
4. Identify and critique major processes and practices of health education programming.
5. Describe the steps involved in conducting needs assessments, program and intervention planning, implementation, and program evaluation.
6. Identify, examine and describe elected health behavior change theories and models and explore possible applications in health education practice.
7. Describe and discuss the process of community mobilization and building of a community coalition.
8. Identify health issues and describe effective methods/strategies in health education advocacy.
9. Describe and discuss the future trends and issues in the professional preparation and practice of professional health educators.
10. Demonstrate effective and appropriate oral and written communication skills for health education professionals.

PHLS 2120. Essentials of Public Health
3 Credits (3)
The course will focus on principles and major areas if public health, including ecological and total personal concept of health care system, epidemiological approaches to disease prevention and control. Consent of Instructor required.

Learning Outcomes
1. Understand the sources of public health data, and how to interpret that information.
2. Access existing health related data.
3. Analyze health related data.
4. Identify populations for health education programs.
5. Incorporate data analysis and principles of community organization.
6. Interpret results from evaluation and research.
7. Infer implications from findings for future health–related activities.
8. Have a basic understanding of health topics faced by various populations.

PHLS 301V. Human Sexuality
3 Credits (3)
Examination of human sexuality from a variety of perspectives: cultural, sociological, physiological and psychological. Issues examined from viewpoints such as gender, individual, family, and professional roles.
PHLS 305V. Global Environmental Health Issues
3 Credits (3)
Introduction to global environmental health challenges in the 21st century with an emphasis on environmental problems as they affect public health and personal well-being.

PHLS 375. Foundations of Community Health Education
3 Credits (3)
Role and responsibility of the health educator, with emphasis on small-group dynamics, oral and written communication skills, building community coalitions, and an introduction to grant writing. Equivalent to PHLS 2110. May be repeated up to 3 credits.

PHLS 380V. Women's Health Issues
3 Credits (3)
A focus on the unique issues and problems that confront women today and how they affect the health of women. Same as GNDR 381V.

PHLS 395. Foundations of Public Health
3 Credits (3)
The course will focus on principles and major areas of public health, including ecological concepts of healthcare systems and epidemiological approaches to disease promotion and control. Equivalent to PHLS 2120. May be repeated up to 3 credits. Restricted to: Public Health majors.

PHLS 450. Epidemiology
3 Credits (3)
Epidemiologic approaches to disease prevention and control. Factors influencing health status. May be repeated up to 3 credits. Restricted to: PHL majors.
Prerequisite(s): PHLS 395 or PHLS 2120.

PHLS 451. Biometrics and Health Research
3 Credits (3)
Critical analysis of community health research and related methodologies. May be repeated up to 3 credits. Restricted to: Public Health majors.
Prerequisite(s): (MATH 1350G) or MATH 2350G or A ST 311.

PHLS 452. Environmental Health
3 Credits (3)
Introduction to environmental health designed to address public health issues. May be repeated up to 3 credits. Restricted to: PH,PHL majors.
Prerequisite(s): PHLS 395 or PHLS 2120.

PHLS 457. Administration of Health Programs
3 Credits (3)
Covers administrative responsibilities, organizational theory, strategic planning, and systems theory as applied to the administration of a variety of health programs. May be repeated up to 3 credits. Restricted to: C HL,PHL majors.
Prerequisite(s): PHLS 395, PHLS 2120, or consent of instructor.

PHLS 459. Infectious and Noninfectious Disease Prevention
3 Credits (3)
History, etiology, and prevention of diseases affecting humans. May be repeated up to 3 credits. Consent of Instructor required. Crosslisted with: MPH 559. Restricted to: Public Health majors.
Prerequisite(s): PHLS 395 or PHLS 2120, PHLS 450 and Consent of Instructor.

PHLS 460. American Indian Health
3 Credits (3)
Critical health issues facing American Indians in the contemporary world. Course included in the undergraduate American Indian Program minor. May be repeated up to 3 credits. Crosslisted with: MPH 560. Restricted to: Public Health minors or Public Health majors.

PHLS 461. Health Disparities: Determinants and Interventions
3 Credits (3)
Investigates: descriptions of health disparities and measurement issues; physical environmental factors, behavioral and emotional variables; impact of aging of the populations, increased racial and ethnic diversity, and technological developments; intervention strategies and evaluation results. May be repeated up to 3 credits. Crosslisted with: MPH 561.

PHLS 464V. Cross-Cultural Aspects of Health
3 Credits (3)
An examination of health practices from a variety of cultural perspectives: communication, observation, research, and assimilation. Issues to be addressed will be examined from a number of viewpoints, such as individual, family, community, and professional roles.

PHLS 465. International Health Problems
3 Credits (3)
Comparison of domestic health programs and problems with those in other parts of the world; emphasis on political parameters and delivery processes. Additional attention is focused on the health issues of the U.S.-Mexico border. May be repeated up to 3 credits. Crosslisted with: MPH 565.
Prerequisite(s): PHLS 395 or PHLS 2120 or consent of instructor.

PHLS 467. Rural Health Issues
3 Credits (3)
Comprehensive overview of rural health services with Southwestern United States and New Mexico focus. May be repeated up to 3 credits. Crosslisted with: MPH 567.

PHLS 468. Coping with Loss and Grief: A Cross-Cultural Perspective
3 Credits (3)
A cross-cultural perspective to death, loss and grief. Hospice philosophy of caring for the dying will be included.

PHLS 469. U.S.-Mexico Border Health Issues
3 Credits (3)
Interdisciplinary analysis of the impact of living conditions and health issues of communities along the U.S.-Mexico border and of the strategies and initiatives to address these issues. Problem-based learning, case analysis, lecture, guest speakers, computer based instruction, and field trips. May be repeated up to 3 credits. Crosslisted with: MPH 569.

PHLS 471. Health Informatics
3 Credits (3)
The application of technology to engage communities and individuals in behavioral and environmental change processes. The course will focus on the use of technology to describe the magnitude of health problems and their sources; analyze risk factors; identify community strengths from which strategies may be defined and tools created to intervene, prevent problems, and promote health and well-being; and continuously evaluate, refine, and implement what works. May be repeated up to 3 credits. Crosslisted with: MPH 571. Restricted to: Restricted to Public Health majors.
Prerequisite(s): PHLS 395 or PHLS 2120 or consent of instructor.

PHLS 473. Health Program Planning
3 Credits (3)
Planning and development of community health education interventions for behavior change at the individual, family, social network levels of practice. Emphasis on applying program-planning models and designs into a grant-writing project. May be repeated up to 3 credits. Restricted to: Public Health majors.
Prerequisite(s): PHLS 375 or PHLS 2120 and PHLS 476.
PHLS 475. Methods of Community Health Education
3 Credits (3)
Responsibilities of health educators, analysis of social forces affecting health needs, application of wide range of health education methods and instructional media, and program implementation skills. May be repeated up to 3 credits. Crosslisted with: MPH 575. Restricted to: Public Health majors.
Prerequisite(s): PHLS 395 or PHLS 2120.

PHLS 476. Theoretically-Based Interventions
3 Credits (3)
Identifying and developing interventions to problematic health-related behaviors. May be repeated up to 3 credits. Restricted to: Public Health majors.
Prerequisite(s): PHLS 395 or PHLS 2120.

PHLS 477. Health Program Evaluation and Research
3 Credits (3)
Covers the application of research and evaluation models for decision-making program and policy development of community health education interventions. Focus on the individual, family, and social network levels of practice. May be repeated up to 3 credits.
Prerequisite(s): PHLS 473.

PHLS 481. Public Health Preparedness and Response
3 Credits (3)
This course is designed to teach students about the role of public health in emergency preparedness and response. It focuses on the nature of public emergencies as well as the role various sectors have in responding to them. One purpose of this online course is to introduce students to the basics of disaster preparedness and responding to disasters, and to build a base for further development in responder training. The course provides training and resources for a basic understanding of the Incident Command System (ICS) and National Incident Management System (NIMS). May be repeated up to 3 credits. Crosslisted with: MPH 581.

PHLS 486. Special Topics
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

PHLS 490. Independent Study
1-6 Credits
Individual studies with prior approval of department head. May be repeated up to 12 credits. Consent of Instructor required.

PHLS 496. Community Health Education Field Experience
1-6 Credits
Senior-standing community health education majors will integrate and apply various concepts related to actual community health education practice. Experience aims to prepare students to integrate the competencies and responsibilities of community health education. Approximately 55 hours at field agency required per credit hour. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: Public Health majors.
Prerequisite(s): PHLS 475 or concurrent enrollment.

PHLS 497. Public Health Seminar in Community Health Education
1 Credit (1)
Critical analysis of issues in CHE and health care. Readings focus on social, economic, cultural, and political issues as they affect the profession and practice. Emphasis on future, local, national, and international health trends. May be repeated up to 1 credits. Restricted to: Public Health majors.
Prerequisite(s): PHLS 450, PHLS 473, and PHLS 476 or consent of instructor.

PHLS 499. Problems in Health Education
3 Credits (3)
Provides opportunity for synthesis of program planning, implementation, and evaluation methodologies in the preparation and delivery of health education topics. Some field trips will be required. May be repeated up to 3 credits. Restricted to: C HL, PHL majors.
Prerequisite(s): Either PHLS 395, PHLS 2120, PHLS 478, PHLS 476, or consent of instructor.

PHYS-PHYSICS

PHYS 1111. Introductory Computational Physics
3 Credits (2+2P)
Introduction to computational techniques for the solution of physics-related problems.
Prerequisite(s): a C- or better in MATH 1220G or MATH 1250G or MATH 1511G.

PHYS 1112. Introductory Physics for the Health Sciences
3 Credits (3)
Algebra-level introduction to topics required for the Health Sciences including basic mechanics (including sound, mechanical waves and fluids), heat and thermodynamics, electricity and magnetism, optics and electromagnetic waves, atomic and nuclear physics and applications to medical imaging. Restricted to Community Colleges campuses only.
Prerequisite(s): MATH 1215 or Equivalent.

Learning Outcomes
1. The objective of the course is to familiarize the student with the concepts and methods used in the underlying physics associated with various Health Science disciplines.
2. The course will demonstrate how the basic principles of mechanics, thermodynamics, electricity, magnetism, electromagnetic waves and optics can be applied to solve particular problems in Health Sciences applications. Introduces the student to selected topics in modern physics including quantum physics, atomic and nuclear physics.

PHYS 1115G. Survey of Physics with Lab
4 Credits (3+3P)
Overview of the concepts and basic phenomena of physics. This course provides a largely descriptive and qualitative treatment with a minimum use of elementary mathematics to solve problems. No previous knowledge of physics is assumed. Includes laboratory.

Learning Outcomes
1. Apply concepts of classical mechanics (such as velocity, acceleration, force, inertia, momentum, torque, work, energy) to simple static and dynamic systems.
2. Apply concepts of thermodynamics (such as heat, temperature, internal energy, entropy) to simple processes.
3. Apply concepts of electricity and magnetism (such as fields, potential, charge conservation, static and dynamic induction) to simple circuits, motors, and other simple contrivances.
4. Apply simple geometric and wave optics in simple situations.
5. Test ideas using modern laboratory equipment.
7. Use computers to analyze and report laboratory results.
8. Draw appropriate conclusions from quantitative scientific observations.
9. Accurately and clearly communicate the results of scientific experiments.
PHYS 1125G. Physics of Music
4 Credits (3+2P)
Introduction for non-science majors to basic concepts, laws, and skills in physics, in the context of a study of sound, acoustics, and music.

Learning Outcomes
1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply basic classical mechanics to static and dynamic fluids, including Archimedes' principle and Bernoulli's principle.
3. Apply the general properties of waves to simple models of musical instruments.
4. Demonstrate knowledge of basic operating principles of wind, string, and percussion instruments.
5. Demonstrate knowledge of how objectively measurable properties of sound waves correspond to the perceptions of pitch, loudness, and timbre.
6. Demonstrate understanding of the description of vibrations and waves in terms of Fourier's Theorem and normal modes.
7. Demonstrate understanding of vocalization in terms of physical principles such as resonance and fluid dynamics.
8. Demonstrate understanding of how the ear works.

PHYS 1230G. Algebra-Based Physics I
3 Credits (3)
An algebra-based treatment of Newtonian mechanics. Topics include kinematics and dynamics in one and two dimensions, conservation of energy and momentum, rotational motion, equilibrium, and fluids.

Learning Outcomes
1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of particles in one and two dimensions.
3. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of a rigid body in two dimensions.
4. Apply Newton's theory of gravitation to circular orbits and demonstrate understanding of how Kepler's laws of planetary motion provide the empirical foundation for Newton's theory.
5. Apply the mathematics of vectors to the principles of Newtonian mechanics.
6. Apply principles of Newtonian mechanics to the case of static and dynamic incompressible fluids, including Archimedes' and Bernoulli's principles.

PHYS 1230L. Algebra-Based Physics I Lab
1 Credit (1)
A series of laboratory experiments associated with the material presented in PHYS 1230G.

Prerequisite(s)/Corequisite(s): PHYS 1230G.

Learning Outcomes
1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.

PHYS 1240G. Algebra-Based Physics II
3 Credits (3)
The second half of a two semester algebra-based introduction to Physics. This course covers electricity, magnetism and optics.

Prerequisite(s): a C- or better in PHYS 1230G or PHYS 2230G.

Learning Outcomes
1. Be able to state Coulomb's Law and Gauss's laws and apply them.
2. Apply the concepts of electric charge, electric field and electric potential to solve problems.
3. Analyze simple DC and AC circuits.
4. Apply the Lorentz force to solve problems.
5. Apply Faraday's law of induction (and Lenz's law) to solve problems.
6. Apply ray optics to practical lens systems such as microscopes and corrective lenses.
7. Apply the wave nature of light to the phenomena of reflection, refraction, and diffraction.

PHYS 1240L. Algebra-Based Physics II Lab
1 Credit (1)
A series of laboratory experiments associated with the material presented in PHYS 1240.

Prerequisite(s)/Corequisite(s): PHYS 1240G.

Learning Outcomes
1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.
PHYS 1310G. Calculus-Based Physics I
3 Credits (3)
A calculus level treatment of classical mechanics and waves, which is concerned with the physical motion concepts, forces, energy concepts, momentum, rotational motion, angular momentum, gravity, and static equilibrium. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in MATH 1511G or higher.
Learning Outcomes
1. Describe the relationships among position, velocity, and acceleration as functions of time.
2. Use the equations of kinematics to describe motion under constant acceleration.
3. Analyze linear motion using Newton’s laws, force, and linear momentum.
4. Analyze rotational motion using torque and angular momentum.
5. Analyze motion using work and energy.

PHYS 1310L. Calculus-Based Physics I Lab
1 Credit (3P)
A series of laboratory experiments associated with the material presented in Calculus-based Physics I. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-based Physics I.
Prerequisite(s)/Corequisite(s): PHYS 1310G.
Learning Outcomes
1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Experience the relationship between theory and experiment.

PHYS 1311. Problems in Calculus-Based Physics I
0.5-1 Credits (.5-1)
This is a supplemental course for Calculus-based Physics I. May be repeated up to 1 credits.
Corequisite(s): PHYS 1310G.

PHYS 1320G. Calculus-Based Physics II
3 Credits (3)
A calculus level treatment of classical electricity and magnetism. It is strongly recommended that this course is taken at the same time as Calculus-based Physics II laboratory. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G and MATH 1521G or higher.
Learning Outcomes
1. Apply the concepts of electric charge, electric field and electric potential to solve problems.
2. Sketch the electric field in the vicinity of point, line, sheet, and spherical distributions of static electric charge.
3. Sketch the magnetic field in the vicinity of line, ring, sheet, and solenoid distributions of steady current.
4. Describe the relationship between electric field and electric potential.
5. Calculate the Lorentz force on a moving charge for simple geometries of the fields and use it to analyze the motion of charged particles.
6. Apply the integral forms of Maxwell’s equations.
7. Calculate the energy of electromagnetic fields.
8. Analyze DC circuits.

PHYS 1320L. Calculus-Based Physics II Lab
1 Credit (3P)
A series of Laboratory experiments associated with the material presented in Calculus-Based Physics II. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-Based Physics II.
Prerequisite(s)/Corequisite(s): PHYS 1320G. Prerequisite(s): A C- or better in PHYS 2110L or PHYS 1310L.
Learning Outcomes
1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Experience the relationship between theory and experiment

PHYS 1321. Problems in Calculus-Based Physics II
0.5-1 Credits (.5-1)
This is a supplemental course for Calculus-based Physics II.
Corequisite(s): PHYS 1320G.

PHYS 2110. Mechanics
3 Credits (3)
Newtonian mechanics.
Prerequisite(s)/Corequisite(s): MATH 1511G or higher.

PHYS 2110L. Experimental Mechanics
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2110. Science majors.
Prerequisite(s)/Corequisite(s): PHYS 2110.
PHYS 2111. Supplemental Instruction to PHYS 2110
0.5-1 Credits (.5-1)
This Optional workshop as a supplement to PHYS 2110. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.
Corequisite(s): PHYS 2110.

Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2110, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2120. Heat, Light, and Sound
3 Credits (3)
Calculus-level treatment of thermodynamics, geometrical and physical optics, and sound. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.

PHYS 2120L. Heat, Light, and Sound Laboratory
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2120. Science majors.
Prerequisite(s)/Corequisite(s): PHYS 2120. Prerequisite(s): a C- or better in PHYS 2110L or PHYS 1310L.

PHYS 2121. Supplemental Instruction to PHYS 2120
0.5-1 Credits (.5-1)
This optional workshop supplements PHYS 2120 "Heat, Light, and Sound". Students actively apply concepts and methods introduced in PHYS 2120 to problem solving and quantitative analysis. May be repeated up to 1 credits.
Corequisite(s): PHYS 2120.

Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2121, apply quantitative analysis to solve problems involving wave propagation and interference, geometric optics, heat transfer and thermodynamics.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2140. Electricity and Magnetism
3 Credits (3)
Charges and matter, the electric field, Gauss law, the electric potential, the magnetic field, Ampere's law, Faraday's law, electric circuits, alternating currents, Maxwell's equations, and electromagnetic waves. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 1521G. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.

PHYS 2140L. Electricity & Magnetism Laboratory
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2140.
Prerequisite(s)/Corequisite(s): PHYS 2140. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G.

PHYS 2141. Supplemental Instruction to PHYS 2140
0.5-1 Credits (.5-1)
Optional workshop as a supplement to PHYS 2140. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.
Corequisite(s): PHYS 2140.
PHYS 2230G. General Physics for Life Science I
3 Credits (3)
This algebra-based introduction to general physics covers mechanics, waves, sound, and heat. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT. May be repeated up to 3 credits.
Prerequisite(s): A C or better in MATH 1215 or higher.
Learning Outcomes
1. Modeling: analyze real-world phenomena by deciding what information is relevant and constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain phenomena or function; use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text; critique assumptions and determine how to test the validity of a model and use the comparison of experimental data and prediction to refine the model.
2. Conceptual understanding: describe the motion of any object in terms of displacement, velocity, and acceleration; analyze external forces acting on an object and determine if a system is in equilibrium or relate the net force to changes in motion; predict or analyze motion using conservation laws for energy and momentum; analyze forces and torques for a rigid object in static equilibrium; for a static fluid determine pressure and the buoyant force; apply idealized models of fluid flow to the circulatory system; describe the properties of pressure waves known as sound, apply the model of standing waves to musical instruments and discuss how sound is used to sense the environment; predict qualitative changes in the internal energy of a thermodynamic system when energy has been transferred due to work or heat and justify those predictions using conservation of energy (First law of thermodynamics). Identify which heat transfer processes occur in a described situation.
3. Quantitative reasoning: use a physics problem-solving strategy (Identify relevant concepts; Introduce and study simplified models; Use symmetry arguments; Establish the relation between known and unknown quantities; Calculate a quantitative result using appropriate mathematical methods; Self-check reasonableness of assumptions and solutions); use scientific notation accurately and convert units if necessary.
4. Communicating scientific information: interpret or generate graphs or other visual representations and be able to switch between various representations including text, mathematical description, or diagrams.

PHYS 2231. Supplemental Instruction to General Physics for Life Sciences I
1 Credit (1)
This optional workshop supplements Physics for Life Sciences I. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credit.
Corequisite(s): PHYS 2230G.
Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2230, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2240G. General Physics for Life Science II
3 Credits (3)
This algebra-based course covers electricity, magnetism, light, atomic physics, and radioactivity. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in PHYS 1230G or PHYS 2230G, and MATH 1220G or higher.
Learning Outcomes
1. Modeling: analyze real world phenomena by constructing simplified idealized models (an abstract description) that allow making predictions or explaining a phenomena or function; use multiple representations to build and communicate the model, including sketches, mathematical expressions, diagrams or graphs; decide what information is relevant and critique assumptions and models of others; determine how to test the validity of a model and use comparison of experimental data and prediction to refine the model.
2. Conceptual understanding: electric or magnetic fields can be used to describe interactions of objects that contain charges with their surroundings; changes that occur as a result of interactions are constrained by conservation laws (such as conservation of energy, conservation of charge or conservation of nucleon number); many macroscopic properties of materials can be described using microscopic models or related to their geometry; electromagnetic radiation can be modeled as a wave or as fundamental particles (photons); the direction of propagation of a wave may change when it encounters a boundary surface between two media of different properties (refraction or refraction); the spontaneous radioactive decay of nuclei is described by probability.
3. Quantitative reasoning: apply quantitative analysis and appropriate mathematical reasoning to describe or explain phenomena; use scientific notation accurately and convert units if necessary.
4. Communicating scientific information: interpret or generate graphs or other visual representations (e.g. field lines, equipotential lines) and be able to switch between various representations including text, mathematical description, or diagrams.
PHYS 2240L. Laboratory to General Physics for Life Science II
1 Credit (1)
Laboratory experiments in topics associated with material presented in PHYS 2240.
Prerequisite(s)/Corequisite(s): PHYS 2240G. Restricted to Las Cruces campus only.

PHYS 2241. Supplemental Instruction to General Physics for Life Sciences II
1 Credit (1)
This optional workshop is a supplement to Physics for Life Science II. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.
Corequisite(s): PHYS 2240G.

Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2240, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2996. Special Topics
1-3 Credits
Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Learning Outcomes
1. Varies

PHYS 2997. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

Learning Outcomes
1. Varies

PHYS 303V. Energy and Society in the New Millennium
3 Credits (3)
Traditional and alternative sources of energy. Contemporary areas of concern such as the state of depletion of fossil fuels; nuclear energy, solar energy, and other energy sources; environmental effects; nuclear weapons; and health effects of radiation. Discussion of physical principles and impact on society. Focus on scientific questions involved in making decisions in these areas. No physics background required.

PHYS 304. Forensic Physics
4 Credits (3+3P)
Theories, laboratory, and field techniques in the area of forensic physics.

PHYS 305V. The Search for Water in the Solar System
3 Credits (3)
Examines the formation, abundance and ubiquity of water in our Solar System stemming from comets, Martian and Lunar poles, Earth’s interior and into the outer reaches of the Solar System. Topics will include nuclear synthesis, Solar System formation, remote sensing, as well as past, present and future NASA missions for water.

PHYS 315. Modern Physics
3 Credits (3)
An introduction to relativity and quantum mechanics, with applications to atoms molecules, solids, nuclei, and elementary particles. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in MATH 2530G and PHYS 2140 or PHYS 1320G.

PHYS 315 L. Experimental Modern Physics
3 Credits (1+6P)
Elementary laboratory in modern physics which supports the subject matter in PHYS 315. Required for physics majors. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): PHYS 315. Prerequisite(s): a C- or better in PHYS 2140L or 1320L.

PHYS 316. Supplemental Instructions to PHYS 315
1 Credit (1)
This optional workshop supplements PHYS 315 "Modern Physics". Students actively apply concepts and methods introduced in PHYS 315 to problem solving and quantitative analysis.
Corequisite(s): PHYS 315.

PHYS 325. Intermediate Experimental Physics
3 Credits (1+6P)
An exploration of a variety of experimental techniques in physics with an emphasis on the proper determination of statistical and systematic uncertainties. Students will work in teams and prepare professional written and oral reports of their work. This course cannot be used to replace M E 345 for students majoring in engineering.
Prerequisite(s)/Corequisite(s): PHYS 315. Prerequisite(s): a C- or better in PHYS 2140L or 1320L.

PHYS 325. Intermediate Experimental Physics
3 Credits (1+6P)
An exploration of a variety of experimental techniques in physics with an emphasis on the proper determination of statistical and systematic uncertainties. Students will work in teams and prepare professional written and oral reports of their work. This course cannot be used to replace M E 345 for students majoring in engineering.
Prerequisite(s)/Corequisite(s): PHYS 315. Prerequisite(s): a C- or better in PHYS 2140L or 1320L.

Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
PHYS 350. Special Topics
1-3 Credits
Lectures, demonstrations, and discussions on such topics as lasers and holography, energy sources, clouds, and biophysics. May be repeated for a maximum of 12 credits under different subtitles.

PHYS 380. Individual Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHYS 395. Intermediate Mathematical Methods of Physics
3 Credits (3)
Introduction to the mathematics used in intermediate-level physics courses. Topics include vector calculus, curvilinear coordinates, matrices, linear algebra, function spaces, partial differential equations, and special functions. This course cannot be used to replace M E 228 or M E 328 for students majoring in engineering. May be repeated to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): a C- or better in MATH 2530G.

Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 400. Undergraduate Research
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHYS 420. Capstone Project I
3 Credits (3P)
Application of engineering physics principles to a significant design project. Includes teamwork, written and oral communication and realistic technical, economic and public safety requirements.

PHYS 421. Capstone Project II
3 Credits (3P)
Continuation of PHYS 420.

PHYS 450. Selected Topics
1-3 Credits
Readings, lectures or laboratory studies in selected areas of physics. May be repeated for a maximum of 12 credits.

PHYS 451. Intermediate Mechanics I
3 Credits (3)
Newtonian mechanics, including an introduction to the Lagrangian formulation. Topics include central force motion, rigid body motion, noninertial reference frames, oscillating systems, and classical scattering.
Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 2530G.

Learning Outcomes
1. Set up equations of motion for classical mechanical systems and solve them. Identify conserved quantities and understand the circumstances under which they arise (symmetries); in particular, know how to use conservation of energy, momentum, angular momentum to solve problems. Fluently use three-dimensional calculus as a language to do the above; be able to use spherical and cylindrical coordinates. Understand the paradigmatic examples of the harmonic oscillator, central force (in particular, gravitational) motion and rigid body motion, which serve as starting points for investigating more complicated realistic problems.

PHYS 454. Intermediate Modern Physics I
3 Credits (3)
Introduction to quantum mechanics, focusing on the role of angular momentum and symmetries, with application to many atomic and subatomic systems. Specific topics include intrinsic spin, matrix representation of wave functions and observables, time evolution, and motion in one dimension. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 392 and PHYS 395. Prerequisite(s): a C- or better in PHYS 315.

PHYS 455. Intermediate Modern Physics II
3 Credits (3)
Continuation of subject matter of PHYS 454. Specific topics include rotation and translation in three dimensions, solution of central potential problems, perturbation theory, physics of identical particles, scattering theory, and the interaction between photons and atoms. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in PHYS 454, MATH 392, and PHYS 395.

PHYS 461. Intermediate Electricity and Magnetism I
3 Credits (3)
The first part of a two-course sequence in classical electrodynamics. Covered topics include static electric and magnetic fields, Laplace’s and Poisson’s equations, electromagnetic work and energy, Lorentz force, Gauss’s, Biot-Savart, and Ampere’s laws, Maxwell’s equations, as well as electric and magnetic fields in matter. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 392 and PHYS 395. Prerequisite(s): a C- or better in PHYS 2140 or PHYS 1320G or equivalent and a C- or better in MATH 2530G.

PHYS 462. Intermediate Electricity and Magnetism II
3 Credits (3)
Continuation of subject matter of PHYS 461. Covered topics include Maxwell’s equations and their applications, electromagnetic waves, reflection, refraction, dispersion, radiating systems, interference and diffraction, as well as Lorentz transformations and relativistic electrodynamics. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in PHYS 461, MATH 392, and PHYS 395.
PHYS 468. Intermediate X-ray Diffraction
3 Credits (3)
Introduction to x-ray diffraction and reflectivity spectra. Topics include x-ray sources and detectors, atomic spectra, characteristic x-rays, thermionic emission, synchrotron radiation, instrument components, and beam conditioners. Prerequisite(s): a C- or better in PHYS 315 and PHYS 325.

Learning Outcomes
1. Knowledge of structural properties of materials Experimental x-ray characterization techniques Presentation and writing skills in the discipline Ethics, teamwork, and career opportunities

PHYS 471. Modern Experimental Optics
3 Credits (1+6P)
Cumulative experience course in optics related to the material presented in PHYS 473 and PHYS 489.
Prerequisite: a C- or better in PHYS 315 and ( PHYS 315 L or PHYS 325 ).

Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 475. Advanced Physics Laboratory
3 Credits (3P)
Cumulative experience course involving experiments in atomic, molecular, nuclear, and condensed-matter physics.
Prerequisite: a C- or better in PHYS 315 and ( PHYS 315 L or PHYS 325 ).

Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 476. Computational Physics
3 Credits (3)
Scientific visualization, numerical differentiation and interpolation, numerical integration, root finding, linear algebra, eigensystems, ODE’s, Boundary value problems, PDE’s, Monte-Carlo calculations, data description and analysis, Fast Fourier Transforms, and applications to advanced physics problems. Recommended is the knowledge of a programming language.
Prerequisite(s): a C- or better in PHYS 1111 or equivalent and MATH 392.

Learning Outcomes
1. learn how to use computers for solving problems in the physical sciences,
2. obtain skills to implement numerical simulation and modeling strategies,
3. learn how to monitor and analyze data graphically, during and after computation,
4. obtain workflow organization skills needed for the solution of complicated systems.

PHYS 478. Fundamentals of Photonics
4 Credits (3+3P)
Prerequisite: C- or better in PHYS 1320G or PHYS 2120.

Learning Outcomes
1. Understand the fundamentals of the different theories of light including ray, wave, electromagnetic (vector) and photon optics, and how these theories are represented mathematically and on a computer. Develop the ability to perform calculations for the different theories (e.g., ray tracing, wave interference, polarization calculus, photon detection) to determine the propagation characteristics and describe the manipulation of light. Gain insight and experience with materials and devices for manipulating and detecting light (e.g., glass, mirrors, lenses, fiber optics, polarization elements, liquid crystals, semiconductors, and photodiodes). Apply the theoretical, mathematical, and practical understanding of optics to describe real-world applications of light technology with supporting analysis and calculations.

PHYS 480. Thermodynamics
3 Credits (3)
Thermodynamics and statistical mechanics. Basic concepts of temperature, heat, entropy, equilibrium, reversible and irreversible processes. Applications to solids, liquids, and gases. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in PHYS 2120, PHYS 315, and MATH 2530G.

PHYS 485. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.
PHYS 488. Introduction to Condensed Matter Physics
3 Credits (3)
Crystal structure, X-ray diffraction, energy band theory, phonons, cohesive energy, conductivities, specific heats, p-n junctions, defects, surfaces, and magnetic, optical, and low-temperature properties.
Prerequisite: a C- or better in PHYS 315.
Learning Outcomes
1. Learn the fundamental concepts of solid-state physics: classification of solids, crystal structure, band structure of solids, lattice vibrations, optical and magnetic properties of solids. Develop an ability to formulate and solve complex problems in solid state physics by applying the fundamental principles of physics and mathematics. Develop and ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 489. Introduction to Modern Materials
3 Credits (3)
Structure and mechanical, thermal, electric, and magnetic properties of materials. Modern experimental techniques for the study of material properties.
Prerequisite: a C- or better in PHYS 315.
Learning Outcomes
1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 493. Experimental Nuclear Physics
3 Credits (1+6P)
Cumulative experience course in nuclear physics such as measurement of radioactivity, absorption of radiation, nuclear spectrometry.
Prerequisite: a C- or better in PHYS 315 and ( PHYS 315L or PHYS 325 ).
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communications: an ability to communicate effectively with a range of audiences. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 495. Mathematical Methods of Physics I
3 Credits (3)
Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.
Prerequisite(s): a C- or better in MATH 392 and PHYS 395.
Learning Outcomes
1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra. Evaluate integrals of analytic functions using the calculus of residues. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.

PHYS 500. Special Topics Seminar
1-2 Credits
Treatment of topics not covered by regular courses. Graded S/U. May be repeated.

PHYS 511. Mathematical Methods of Physics I
3 Credits (3)
Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.
Learning Outcomes
1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra. Evaluate integrals of analytic functions using the calculus of residues. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.

PHYS 520. Selected Topics
1-3 Credits
Formal treatment of graduate-level topics not covered in regular courses. May be repeated for a maximum of 9 credits.
Prerequisites: graduate topics not covered in regular courses. May be repeated for a maximum of 9 credits.

PHYS 521. Individual Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisites: graduate topics not covered in regular courses. May be repeated for a maximum of 9 credits.

PHYS 551. Classical Mechanics
3 Credits (3)
Lagrangian and Hamiltonian formulation of dynamics. Advanced treatments of most topics listed under PHYS 451, plus canonical transformations and Hamilton-Jacobi theory. PHYS 451 strongly recommended.
PHYS 554. Quantum Mechanics I
3 Credits (3)

PHYS 555. Quantum Mechanics II
3 Credits (3)
Continuation of topics in PHYS 554.
Prerequisites: PHYS 554 or consent of instructor.

PHYS 556. Electromagnetic Theory I
3 Credits (3)
Detailed advanced treatments of most topics listed under PHYS 461, PHYS 462, plus multipole radiation, collisions of charged particles and bremsstrahlung, scattering, and radiation reaction. PHYS 461 and PHYS 462 strongly recommended.

PHYS 557. Advanced Experimental Optics
3 Credits (3)
Taught with PHYS 471 with additional work required at the graduate level. Consent of Instructor required.
Prerequisite(s): PHYS 473 or PHYS 562.

PHYS 558. Advanced Physics Laboratory
3 Credits (3P)
Selected experiments in atomic, molecular, nuclear and condensed-matter physics.

PHYS 559. Advanced Computational Physics I
3 Credits (3)
Advanced treatment of topics listed under PHYS 476 plus additional work. Applications of numerical methods to advanced physics problems. Recommended is the knowledge of a programming language.

Learning Outcomes
1. learn to numerically solve problems that require higher mathematical and theoretical analysis,
2. experience how graduate research will be advanced and accelerated by the use of scientific computing skills.

PHYS 584. Statistical Mechanics
3 Credits (3)

PHYS 588. Condensed Matter Physics
3 Credits (3)
Same as PHYS 488, but additional work required.

Learning Outcomes
1. Learn the fundamental concepts of solid-state physics: classification of solids, crystal structure, band structure of solids, lattice vibrations, optical and magnetic properties of solids. Develop an ability to formulate and solve complex problems in solid state physics by applying the fundamental principles of physics and mathematics. Develop and ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 589. Modern Materials
3 Credits (3)
Same as PHYS 489 with differentiated assignments for graduate students. PHYS 554 recommended.

Learning Outcomes
1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 591. Advanced High-Energy Physics I
3 Credits (3)
Taught with PHYS 491 with additional work required at the graduate level. Consent of Instructor required.
Prerequisite(s): PHYS 555 or consent of instructor.

PHYS 593. Advanced Experimental Nuclear Physics
3 Credits (1+6P)
Advanced experimental investigation of topics such as measurement of radioactivity, absorption of radiation, and nuclear spectrometry.

PHYS 597. Space Plasma Physics
3 Credits (3)
Same as PHYS 497 but with added requirements.

PHYS 599. Master's Thesis
1-15 Credits (1-15)
Thesis.

PHYS 600. Research
1-15 Credits
Doctoral research. May be repeated.

PHYS 620. Advanced Topics in Physics
1-3 Credits
Advanced formal treatment of topics not covered in regular courses. May be repeated for a maximum of 9 credits.
Prerequisite: consent of instructor.

PHYS 650. General Relativity I
3 Credits (3)
Basic foundations and principles of general relativity, derivation of the Einstein field equations and their consequences, the linearized theory, the Bel-Petrov classification of the curvature tensor, derivation of the Schwarzschild solution and the four basic tests of general relativity.
Prerequisite(s): PHYS 511 or PHYS 561 or consent of instructor.

PHYS 680. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: graduate standing or consent of instructor.
PL S 160. Legal System for the Paralegal
3 Credits (3)
Introduction to the court system, administrative agencies, functions of law offices, and professional conduct and legal ethics. Restricted to: Community Colleges only.
Prerequisite(s): ACT standard score in English of 16 or higher or a Compass score 76 or higher; for those scoring 13-15 in English on ACT or 35-75 on Compass, successful complete of CCDE 105N or CCDE 110N; for those scoring 12 or below on the ACT standard score in English or 34 or below on the Compass, successful completion of CCDE 105N & CCDE 110N.

PL S 161. Legal Terminology
3 Credits (3)
Survey of the language of the law that will serve either as an introductory course or as a review course to prepare students for the certification test.

PL S 162. The Virtual Law Office
3 Credits (3)
The Virtual Law Office class is a 'hands-on', project oriented course designed to provide the student with the basic law office skills needed to function successfully in a law office setting. The student will gain a practical, working knowledge of the procedures necessary to work in a law office. The skills learned in the class will directly translate to real life situations. Restricted to: Community Colleges only.
Prerequisite(s): PL S 160.

PL S 180. Constitutional Law for the Paralegal
3 Credits (3)
Case standing of the law of the Constitution and Bill of Rights with regard to day-to-day applications in the law practice. Documents dealing with constitutional problems in both civil and criminal areas of law will be drafted and discussed.
Prerequisite: PL S 160.

PL S 190. Criminal Law for the Paralegal
3 Credits (3)
Introduction to federal and state criminal law; criminal proceedings, prosecution and defense, sentencing and appeal.
Prerequisite: PL S 160.

PL S 200. Legal Ethics for the Paralegal
3 Credits (3)
Introduction to ethical dilemmas faced in the workforce and the rules of ethics developed by the American Bar Association, various national paralegal organizations, and the Supreme Court of New Mexico. Restricted to: Community Colleges only.
Prerequisite(s): PL S 160.

PL S 203. Immigration Law
3 Credits (3)
Survey of the basics of immigration law including the rights and obligations of citizenship and the naturalization process.
Prerequisite: PL S 160.

PL S 221. Internship I
2-4 Credits
Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships can be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. Restricted to Community Colleges campuses only.
Prerequisite(s): PL S 274.

PL S 222. Internship II
1-3 Credits
Continuation of PL S 221. Each credit requires specified number of hours of on-the-job work experience. Restricted to Community Colleges campuses only.
Prerequisite(s): PL S 221.
PL S 231. The Law of Commerce for the Paralegal  
3 Credits (3)  
Law of contracts, negotiable instruments, bank transfers, secured transactions, debtor-creditor relations, agency, and business types and their formation. Students will study the relevant statutes as well as draft documents associated with these types of legal practice. Restricted to: Community Colleges only.  
Prerequisite(s): PL S 160.

PL S 272. Bankruptcy Law for the Paralegal  
3 Credits (3)  
Individual and corporate bankruptcy; the basic principles and processes of bankruptcy law as a system of debtor relief and debt collection.  
Prerequisite: PL S 160.

PL S 274. Legal Research and Writing for the Paralegal I  
3 Credits (3)  
Legal memoranda, briefs, and pleadings will be prepared and written based on the student's original research. Research materials and techniques will be identified and studied; introduction of computer usage in legal research.  
Prerequisite: PL S 160 and ENGL 1110G.

PL S 275. Tort and Insurance for the Paralegal  
3 Credits (3)  
Primary legal principles of tort and insurance law and means of establishing insurance plans, types of torts and insurance, as well as use of specific forms and procedures relating to these areas.  
Prerequisite: PL S 160.

PL S 276. Wills, Trusts, and Probate for the Paralegal  
3 Credits (3)  
Cases and statutes dealing with wills, trusts, and probate. Emphasis on preparation and drafting of documents and the application of the law and documents to the client's problems.  
Prerequisite: PL S 160.

PL S 277. Family Law for the Paralegal  
3 Credits (3)  
Methods of conducting client interviews and drafting of pleadings and research relative to families. Laws relating to marriage, divorce, custody, support, adoption, name change, guardianship, and paternity.  
Prerequisite: PL S 160.

PL S 278. Litigation for the Paralegal  
3 Credits (3)  
The law of procedure and evidence will be considered through rules and cases. Case situations will be used to identify and solve problems.  
Prerequisite: PL S 160.

PL S 279. Legal Research and Writing for the Paralegal II  
3 Credits (3)  
Continuation of PL S 274. Advanced training in legal research problems with a focus on analysis, writing, and preparation of sophisticated legal memoranda and documents.  
Prerequisite: PL S 274.

PL S 280. Interviewing and Investigation for the Paralegal  
3 Credits (3)  
Techniques of legal interviewing and investigation with emphasis on development of human relations and communication skills.  
Prerequisite: PL S 160.

PL S 298. Independent Study  
1-3 Credits (1-3)  
Individual studies directed by consenting faculty with prior approval by department head. Restricted to Community Colleges campuses only.  
Prerequisite(s): PL S 160.

POLS-POLITICAL SCIENCE

POLS 1110G. Introduction to Political Science  
3 Credits (3)  
This course covers fundamental concepts in political science, such as political theories, ideologies, and government systems.  
Learning Outcomes  
1. Construct reasoned civic discourse to advocate a stance or examine alternate positions.  
2. Identify fundamental concepts and theories in political science.  
3. Analyze data and information in order to gain a deeper understanding of the material.  
4. Articulate how the public influence and are influenced by politics.  
5. Identify and compare government systems from democracy to authoritarian, as well as models of analysis of contemporary international relations.

POLS 1111. Introductory Government Seminar  
1 Credit (1)  
Introduction to the government major. Designed to assist students in planning college experience and preparing for professional or advanced educational opportunities upon graduation. Graded: S/U. Restricted to: Main campus only.  
Learning Outcomes  
1. This course is designed for the “beginning” government major.  
2. Its goal is to improve your educational experience at the university and within the Department of Government. In this class we hope to develop some basic skills necessary for successful completion of a degree in Government.  
3. These include the skills of critical reading, critical writing, oral presentation and research methods.  
4. Additionally, we will use this seminar to introduce you to Government faculty, to plan your government degree and to acquaint you with the services and opportunities the department and the university has to offer.  
5. Finally, we hope to begin the discussion of where you will go next, when you complete your degree in Government.
POLS 1120G. American National Government
3 Credits (3)
This course explains the role of American national government, its formation and principles of the Constitution; relation of state to the national government; political parties and their relationship to interest groups. This course also explains the structure of the legislative, executive, and judicial branches.

**Learning Outcomes**
1. Explain the historical and political foundations of the government of the United States;
2. Explain the precursors to, and the development and adoption of the United States Constitution;
3. Explain the United States federal system, the basics of federalism, and the changing relationship of state and federal power;
4. Describe the power, structure and operation of the main institutions of government, namely the legislative, executive, judicial, and the federal bureaucracy;
5. Explain the development and role of political parties and interest groups;
6. Identify the constitutional basis of civil rights and civil liberties and their changing interpretation; and
7. Describe the role of demographics, public opinion and the media in American politics.

POLS 1130G. Issues in American Politics
3 Credits (3)
This course is designed to introduce the students to the contemporary study of American political issues. The course analysis of government policies, examining various approaches to the economy, democracy and the structure and the function of American political institutions.

**Learning Outcomes**
1. Explain the basic themes and concepts of political science and their application to contemporary issues.
2. Explain the major forces, interests, and institutions of American democratic politics.
3. Describe and define how beliefs, assumptions, and values are influences by factors such as politics, geography, economics, culture, biology, history, and social institutions.

POLS 2120G. International Relations
3 Credits (3)
This course covers the analysis of significant factors in world politics, including nationalism, national interest, political economy, ideology, international conflict and collaboration, balance of power, deterrence, international law, and international organization.

**Learning Outcomes**
1. Explain the interrelationships between countries and people in the world,
2. Demonstrate an awareness of current events in the world.
3. Describe several theories of International Relations
4. Explain and identify theories of power and decision making among states in the world.
5. Describe and evaluate issues that relate to International Politics, and how individuals are affected by them.
6. Describe the role of Intergovernmental Organizations in International Politics.
7. Identify the role war plays in International Politics.
8. Explain how economics is intertwined with International Politics.
9. Demonstrate an understanding of role of international terrorism and its impacts on global diplomacy.
10. 1 Articulate how beliefs, assumptions, and values are influenced by factors such as politics, geography, economics, culture, history, government, and social institutions.

POLS 2996. Special Topics
3 Credits (3)
Specific topics to be announced in Schedule of Classes. Community Colleges only. May be repeated for a maximum of 12 credits.

**Learning Outcomes**
1. Varies

POLS 300. Political Research Skills
3 Credits (3)
Introduction to methods of political analysis and fundamentals of research design, including basic methods for the collection and analysis of political data.

POLS 308. Prepping for Law School Admissions Test
1 Credit (1)
This workshop helps students prepare to take the Law School Admissions Test and apply for law school. Graded: S/U.

POLS 313. Model United Nations
3 Credits (3)
Issues related to the United Nations and international law/organizations through simulations, discussions and research projects. 
**Prerequisites**: GPA of 2.5 or better and consent of instructor.

POLS 314. Advanced Model UN
3 Credits (3)
Advanced topics, research and preparation for Model United Nations activities. Consent of instructor required. Restricted to: Main campus only. 
**Prerequisite(s)**: POLS 313, minimum GPA 2.5.

POLS 315. Politics and Film
3 Credits (3)
Exploration of political themes, images, and representation in film and other media. May be repeated for a maximum of 6 credits under different subtitles.
POLS 320. Domestic Policy
3 Credits (3)
The course examines how U.S. public policy is made, including the players, politics, issues and power critical to the policy process. An interactive class that bridges theory and political action. Restricted to: Main campus only.

POLS 321. Topics in Public Policy
3 Credits (3)
Course examines issues in public policy. May be repeated under different subtitles.

POLS 324. Environmental Policy
3 Credits (3)
This introductory course explores environmental policy issues. Students study perspectives of policy-makers, political activists and policy analysts, and apply policy models to solve pressing environmental problems. Focus may be on U.S. or global concerns.

POLS 330. Introduction to Public Administration
3 Credits (3)
What is public administration? Course examines public service, focusing on federal and state government. Issues include management and leadership, personnel, bureaucratic politics, organizational theory, personnel, budgeting and administrative law. Restricted to: Main campus only.

POLS 331. Special Topics in Public Administration
3 Credits (3)
Special topics in public administration. May be repeated for a maximum of 6 credits under different subtitles.

POLS 335. Management of Nonprofit Organizations
3 Credits (3)
This course provides an overview of a range of nonprofit management concerns and practices. Students will be challenged to assess their own theories of nonprofit accountability and excellence, while confronting critical issues facing the sector. Activities are designed to expand the management skills of students by offering analytical tools and knowledge, and providing opportunities to test the application of these skills.

POLS 343. Congress and the Legislative Process
3 Credits (3)
This class reviews the history, structure, membership, operation, power and culture of the American Congress. Restricted to: Main campus only.

POLS 344. The American Presidency
3 Credits (3)
A comprehensive overview of the U.S. presidency, including powers, electoral politics, decision-making styles, domestic and foreign policy, and relations with Congress, courts, media and interest groups.

POLS 345. The Supreme Court
3 Credits (3)
This class studies the history and operation of the Supreme Court, as well as landmark cases that have shaped American government and the Court.

POLS 348. Political Parties and Interest Groups
3 Credits (3)
Organization, principles, and functions of political parties and interest groups in the U.S.

POLS 350. Special Topics in American Government
3 Credits (3)
Special topics in American government. May be repeated for a maximum of 6 credits under different subtitles.

POLS 353. Women, Politics and Administration
3 Credits (3)
An examination of women's participation in U.S. electoral politics as voters, candidates, and officeholders; political activism in issue-based movements and strategies for affecting public policy; leadership as administrators and managers in public service agencies. Also explores the influence of feminism in changing women's roles socially, legally, and politically. Crosslisted with: GNDR 453

POLS 354. American Indian Politics
3 Credits (3)
Introduction to American Indian tribal governments, politics, policy, and administration; historical and contemporary leadership of Indian Nations; and the history and current status of American Indian-U.S. relations. Students learn about Native peoples' cultural responses, forms of resistance, and adaptations to colonization. Restricted to: Main campus only.

POLS 360. International Relations
3 Credits (3)
Introduction to world politics; fundamental international issues and problems.

POLS 361. Special Topics in International Relations
3 Credits (3)
Course examines contemporary issues in international relations. May be repeated under different subtitles.

POLS 362. International Political Economy
3 Credits (3)
Political factors in international economic relations; theories of political economy.

POLS 366. American Foreign Policy
3 Credits (3)
Formulation, content and rationale of current foreign policies of the U.S.

POLS 367. Terrorism
3 Credits (3)
An introductory course using an interdisciplinary framework to explore definitions, historical roots, contemporary manifestations and future trends in political terrorism.

POLS 370. Comparative Politics
3 Credits (3)
Introduction to functional approaches to comparing similarities and differences among political systems.

POLS 371. Latin American Politics
3 Credits (3)
Basic structure of politics in major Latin American countries; role of groups, including church, labor, and parties.

POLS 372. Special Topics in Comparative Politics
3 Credits (3)
Course examines contemporary issues in comparative politics. May be repeated under different subtitles. Restricted to: Main campus only.

POLS 373. Resistance Movements in World Politics
3 Credits (3)
Research on violent and non-violent resistance movements around the world. Focus on their origins, demands, ideologies, strategies and impacts in the post-Cold War context of economic globalization, US military power and new geopolitical dynamics.
POLS 378. U.S.-Mexico Border Politics  
3 Credits (3)  
Comparative perspectives applied to the problems of the U.S.-Mexican border.

POLS 379. Mexican Politics  
3 Credits (3)  
Introduction to the politics and government of contemporary Mexico.

POLS 380V. Contemporary World Political Ideologies  
3 Credits (3)  
Introduction to the prevailing political ideologies in the modern world and the ways in which modern nations operating under one or more of these ideologies attempt to answer fundamental questions about the allocation and distribution of rights, liberties, and other things of value. In addition, the course work and discussions attempt to address recent political, social, and economic events in various areas of the world.

POLS 382. Classical Political Thought  
3 Credits (3)  
Analysis of main currents in political thought from ancient Greece and Rome to the high Middle Ages.

POLS 383. Modern Political Thought  
3 Credits (3)  
Historical and theoretical examination of political ideas and ideologies from Machiavelli to Nietzsche. Topics include liberalism, conservatism, romanticism, communism, and Nihilism.

POLS 385. American Political Thought  
3 Credits (3)  
Introduction to major American thinkers and historical currents from colonial time to the present.

POLS 386. Political Economy  
3 Credits (3)  
Analysis of political ideas concerning the role of the state in management of national economies, in both European and American contexts.

POLS 387. Religion and Politics  
3 Credits (3)  
Survey of major points of interaction between politics and religion in the U.S., using theoretical, historical, and institutional analysis.

POLS 390. Special Topics in Public Law  
3 Credits (3)  
Course examines various issues in public law. May be repeated under different subtitles.

POLS 391. Constitutional Law  
3 Credits (3)  
The class explores the reasoning and political context of the Supreme Court cases that define the distribution and limits of governmental powers and duties under the U.S. Constitution, including separation of powers and federalism. Restricted to: Main campus only.

POLS 392. Civil Liberties  
3 Credits (3)  
The course examines the reasoning and political context of major Supreme Court cases defining constitutional rights of free speech, religious liberty, free press and criminal procedural rights.

POLS 394. Judicial Process  
3 Credits (3)  
Class examines the structure, function and purpose of the American judicial system. Restricted to: Main campus only.

POLS 395. Law and Society  
3 Credits (3)  
Class critically explores the development, role and impact of law on our society, covering different theories of law, conceptions of justice and the values they reflect. These models are then applied to current legal issues. Not a class in legal reasoning, but one where students evaluate their beliefs about the legal system. Restricted to: Main campus only.

POLS 396. International Law  
3 Credits (3)  
Nature, growth, and scope of law of nations, rights and obligations of states in peace and war, current issues.

POLS 399. New Mexico Law  
3 Credits (3)  
New Mexico legal system, court structure and procedures; legal terms and concepts; constitutional, criminal, mass media, historical and social issues relating to New Mexico. Same as CJUS 399, HIST 399, JOUR 399, and SOCI 399.

POLS 405. Directed Readings  
1-3 Credits  
Individualized readings. Course subtitled. May be repeated for a maximum of 6 credits. Graded S/U. Consent of instructor required.

POLS 406. Independent Study  
1-3 Credits  
Individualized research. Course subtitled. May be repeated for a maximum of 6 credits. Consent of instructor required.

POLS 407. Workshop  
1-6 Credits  
Focus on skills related to careers in government and political science. Specific topics announced in the Schedule of Classes; may be repeated for a total of 6 credits. Only 3 credits apply toward government major or minor requirements. Graded S/U.

POLS 410. Internship  
1-12 Credits  
Hands-on experience working with public agencies, political campaigns, elected officials & non-profits. May be repeated for a maximum of 12 credits; only 3 credits apply toward government major or minor requirements. Consent of instructor required. Graded: S/U.  
Prerequisite(s): Completion of 12 government credits, 2.5 GPA, junior and above standing.

POLS 411. Service Learning Experience  
3 Credits (3)  
Experiential learning through a community service project. May be subtitled to reflect service activity. May be repeated for a total of 6 credits; only 3 credits apply toward government major or minor requirements. Consent of instructor required.  
Prerequisites: completion of 12 government credits, junior or above standing, and consent of instructor.

POLS 412. Practicum in Student Government  
3 Credits (3)  
Research of issues in student government. Consent of instructor required. Graded: S/U.  
Prerequisite(s): Student government participation, completion of 12 POLS credits, junior or senior standing.
POLS 415. Senior Seminar
2 Credits (2)
Review and integration of political skills acquired in the Government Department. Students will prepare a professional portfolio for entry into the workforce, advanced study, and civic participation. Graded: S/U
Prerequisite: consent of instructor.

POLS 468. Rebels, Guerrillas, and Terrorists in Modern Latin America
3 Credits (3)
Explores history of rebels in Latin America. Examines guerilla struggles attaining national dimension. Focus on modern events, including Peru's Shining Path, Columbia's FARC, and Mexico's Zapatistas. Same as HIST 331.

POLS 469. Globalization
3 Credits (3)
Analysis of the globalization process. Covers theories of globalization, the global economy, political globalization, global culture, transnational social movements, transnational migration and world labor market, global cities, and local-global linkages. Same as SOCI 489.

POLS 493. Mass Communications Law
3 Credits (3)
Examination of legal issues relating to mass media in the United States. Invasion of privacy, libel, sedition, copyright, and advertising regulation. Same as JOUR 493 and COMM 493.

POLS 502. Research Methods in Government
3 Credits (3)
Contemporary methods of political analysis, including mathematical and statistical techniques and computer applications. MPA students must complete this class with a B- or better. MA students must complete either POLS 502 or POLS 503 with a B- or better.

POLS 503. Qualitative Research Methods
3 Credits (3)
An overview of qualitative research methods such as fieldwork, ethnography, content analysis, case studies, focus groups and grounded theory. Introduces students to epistemology (the study of knowledge) and to basic components of research design. Explores activist scholarship, ethical dilemmas in research, and software tools for computer assisted analysis. Especially useful for students preparing theses, dissertation, or other research projects. MA students must complete either POLS 503 or POLS 502 with a B- or better.

POLS 505. Directed Readings
1-3 Credits
Selected topics in government. May be repeated for a total of 6 credits. Graded S/U.
Prerequisite: consent of instructor.

POLS 510. Internship
1-6 Credits
Assignment with a public agency and research report. Only 3 credits apply toward degree requirements. Graded S/U.
Prerequisite: approval of graduate advisor.

POLS 517. Selected Topics in Government
3 Credits (3)
Selected issues which may cross sub-fields of the discipline. May be repeated for a total of 6 credits.

POLS 519. Proseminar in Public Administration
3 Credits (3)
Review of classic and contemporary theory and practice in public administration. Application of written and oral skills to the presentation and defense of essays on various aspects of public administration. To be completed with a B- or better.
Prerequisite(s): 30 credits of M.P.A.

POLS 522. Public Sector Economics I
3 Credits (3)
Introduction to the economic rationale for government intervention in the economy and the effects of that intervention on economic agents and the economy in general. Emphasis on the expenditure side of government policies. Same as AEAC 522.

POLS 527. Issues in Public Management
3 Credits (3)
Selected issues in public management. May be repeated under different subtitles for a total of 6 credits.

POLS 530. Seminar in Public Policy
3 Credits (3)
Survey of the political, administrative, and technical aspects of policy making in government. MA students taking POLS 530 as part of their core requirements must complete the class with a B- or better.

POLS 536. Public Policy and Indigenous Communities
3 Credits (3)
Indigenous communities are found throughout North, Central and South America. This course addresses the history, development and governance of these communities. Different sections of the course may choose to focus on different indigenous communities. All courses will consider the principles of governance internal to indigenous communities as well as the governing relationships between indigenous communities and modern states.

POLS 537. Issues in Public Policy
3 Credits (3)
Selected issues in public policy. May be repeated under a different subtitle for a total of 6 credits.

POLS 540. Seminar in Public Administration
3 Credits (3)
Survey course on the theory and practice of program, personnel, and financial management in government and the private, nonprofit sector. MA students taking POLS 540 as part of their core requirements must complete the class with a B- or better.

POLS 541. Public Budgeting
3 Credits (3)
Budgetary processes; budget classification, analysis, and evaluation. MPA students must complete this class with a B- or better.

POLS 542. Public Sector Human Resources Management
3 Credits (3)
Exploration of public personnel systems and practices, including job analysis, compensation, performance evaluation, recruitment, and labor-management relations. MPA students must complete this class with a B- or better.

POLS 543. Skills Workshop
1-6 Credits
Focus on management of task skills in selected areas of public administration. Specific topics will appear in the Schedule of Classes; may be repeated for a total of 6 credits.
POLS 544. Public Policy Analysis
3 Credits (3)
Environment of policy analysis; various descriptive and quantitative designs for analyzing and evaluating public policy. Problems of policy analysis. MPA students must complete this class with a B- or better.
Prerequisite(s): POLS 502 or consent of instructor.

POLS 547. Government Organizations
3 Credits (3)
Historical overview and present applications of organization theory in public management. MPA students must complete this class with a B- or better.

POLS 548. Public Sector Leadership
3 Credits (3)
Theories and styles of leadership.

POLS 549. Ethics in Government
3 Credits (3)
Examination of standards, perspectives, and issues for ethical decision-making in public agencies. MPA students must complete this class with a B- or better.

POLS 550. Seminar in American Politics
3 Credits (3)
Overview of American political institutions. Includes study of American constitutional theory; legislative, executive, and judicial functions and processes; political parties and interest groups; and public policy formulation. MA students taking POLS 550 as part of their core requirements must complete the class with a B- or better.

POLS 560. Seminar in International Relations Theory
3 Credits (3)
A critical overview of leading approaches and controversies in international relations theory. The purpose of the course is to introduce students to contending theoretical perspectives and conceptual frameworks that help make sense of contemporary world politics. MA students taking POLS 560 as part of their core requirements must complete the class with a B- or better.

POLS 561. Nations and Soft Power
3 Credits (3)
Course employs historical, theoretical and practical "best/worst practices" lenses to deal with key questions, such as how do the US and other states present themselves to the world? What are "soft power" and "national reputation management"? How does one build or damage a country's image and "brand"? What are "public diplomacy" and "cultural diplomacy", and how do they factor into the foreign relations of the US and other states?

POLS 563. Issues in International Relations
3 Credits (3)
Selected issues in international relations. May be repeated under a different subtitle for a total of 6 credits.

POLS 564. Advanced National Security Policy
3 Credits (3)
Major topical, theoretical, and regional issues in national security policy.

POLS 569. Advanced Issues in Globalization
3 Credits (3)
Analysis of the globalization process. Covers theories of globalization; global economy; political globalization; global culture; transnational social movements; transnational migration and world labor market; global cities; local-global linkages. Same as SOCI 589.

POLS 570. Seminar in Comparative Politics
3 Credits (3)
Examination of methods used for comparing various types of political entities. Investigation of criteria needed to examine a concept across cultures or national boundaries. MA students taking POLS 570 as part of their core requirements must complete the class with a B- or better.

POLS 574. Contemporary Comparative Studies
3 Credits (3)
Major topical, theoretical, and regional issues in international politics. May be repeated once.

POLS 578. Seminar in the U.S.-Mexican Border
3 Credits (3)
An analysis of the political environment along the United States-Mexico border and a survey of the literature available for a number of contemporary issues.

POLS 579. Seminar in Mexican Politics
3 Credits (3)
Advanced research on politics and government of Mexico.

POLS 580. Seminar in Political Theory
3 Credits (3)
Examination of major issues in political theory, including democracy, sovereignty, classical and modern traditions of thought. May be repeated with different subject matter. MA students taking POLS 580 as part of their core requirements must complete the class with a B- or better.

POLS 587. Seminar in Religion and Politics
3 Credits (3)
Historical, theoretical and comparative analyses of the interaction between politics and religion.

POLS 590. Seminar Public Law and Legal Systems
3 Credits (3)
Focus on U.S. Constitutional Law and other national legal systems. MA students taking POLS 590 as part of their core requirements must complete the class with a B- or better.

POLS 593. Issues in Public Law
3 Credits (3)
Selected issues in public law. May be repeated under a different subtitle for a total of 6 credits.

POLS 596. International Law
3 Credits (3)
Nature, growth and scope of law of nations; rights and obligations of states in peace and war; current issues.

POLS 598. Special Research Programs
1-3 Credits
Individual investigations either theoretical, analytical or experimental. Three credits may be taken per semester for a total of 6 credits for thesis students, and 9 credits for non-thesis students. Consent of instructor required.

POLS 599. Master's Thesis
1-15 Credits
Thesis.
PORT-PORTUGUESE

PORT 1110. Portuguese I
3 Credits (3)
Designed for students with no previous exposure to Portuguese, this course develops basic listening, speaking, reading, and writing skills. This is an introductory course aimed at teaching the student to communicate in Portuguese in everyday situations.

Learning Outcomes
1. Students can communicate and exchange information about familiar topics using phrases and simple sentences, sometimes supported by memorized language.
2. Students can handle most short social interactions in everyday situations by asking and answering simple questions.
3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.
8. Students can make connections between beliefs, behaviors and cultural artifacts of the Portuguese-speaking world, and make informed cross-cultural comparisons.

PORT 1120. Portuguese II
3 Credits (3)
A continuation of Portuguese I, students will develop a broader foundation in skills gained during the first semester, including understanding, speaking, reading and writing Portuguese. Students will also gain more in-depth knowledge of Portuguese-speaking cultures.

Prerequisite: C or better in PORT 1110 or consent of instructor.

Learning Outcomes
1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write about familiar topics and present information using a series of simple sentences.
4. Students can understand the main idea in short, simple messages and presentations on familiar topics.
5. Students can understand the main idea of simple conversations that they overhear.
6. Students can understand the main idea of short and simple texts when the topic is familiar.
7. Students can begin to narrate and describe simple events in the past.
8. Students can make broader connections between beliefs, behaviors and cultural artifacts of the Portuguese-speaking world, and make informed cross-cultural comparisons.

PORT 453. Independent Luso-Brazilian Studies
1-3 Credits (1-3)
Individualized, self-paced projects for advanced students in Luso-Brazilian studies. May be repeated up to 12 credits. Consent of Instructor required.

PORT 513. Graduate Portuguese for Romance Language Students I
3 Credits (3)
Portuguese for beginners at the graduate level. May be completed on campus or via Study Abroad. Credit can be applied towards fulfilling the second language requirement. Credit is not accepted towards any graduate level major or minor.

PORT 514. Graduate Portuguese for Romance Language Students II
3 Credits (3)
Portuguese for beginners at the graduate level. May be completed on campus or via Study Abroad. Credit can be applied towards fulfilling the second language requirement. Credit is not accepted towards any graduate level major or minor.

Prerequisite(s): Language placement exam or C or better in PORT 513, or consent of instructor.

PSYC-PSYCHOLOGY

PSYC 1110G. Introduction to Psychology
3 Credits (3)
This course will introduce students to the concepts, theories, significant findings, methodologies, and terminology that apply to the field of psychology.

Learning Outcomes
1. Explain how the scientific method and psychological research methodologies are used to study the mind and behavior.
2. Recall key terms, concepts, and theories in the areas of neuroscience, learning, memory, cognition, intelligence, motivation and emotion, development, personality, health, disorders and therapies, and social psychology.
3. Explain how information provided in this course can be applied to life in the real world.
4. Identify the major theoretical schools of thought that exist in psychology as they relate to the self, the culture, and the society.
PSYC 2221. Applied Psychology
3 Credits (3)
Explanation of the psychological principles of everyday living. Emphasizes motivation, learning of intelligent behavior, and applications of psychology to social issues. Community Colleges only.

Learning Outcomes
1. The objective of this course is to orient students to the personality characteristics, interpersonal competencies, ethical decision-making skills, and other professional traits associated with pursuing a career in a helping profession.
2. Identify the requirements for becoming a helping professional, characteristics of a skilled helper, and cultural factors that impact helping professionals.
3. Explain your personal strengths and weaknesses as a potential helper.
4. Demonstrate appropriate helping strategies based upon the special characteristics of clients.
5. Compare the capabilities that individual, family, group, community, and online interventions offer you as a future helper.
6. Identify the ethical and legal issues that impact helping professionals.
7. Analyze the potential impact of your future ethical and professional standards as a helping professional.
8. Explain how your role as a helping professional is impacted by your professional affiliation and ethical principles.
9. Analyze how worsening personal problems and increasing stress can impact the kinds and quality of our responses to life and the people around us.

PSYC 2230. Psychology of Adjustment
3 Credits (3)
This course focuses on the individual's adjustment to society, and the application of psychological principles to the understanding of adjustment.

Learning Outcomes
1. Explain the internal and external factors associated with the psychology of adjustment.
2. Evaluate contributions from psychology to adjustment concepts and processes.
3. Describe the different explanations of how individuals adjust to their environments.
4. Describe how self-identities develop and how they affect relations with others.
5. Identify resources available for assistance with adjustment-related concerns.

PSYC 2311. A Study of Substance Abuse through Learning
3 Credits (3)
Physiological and psychological impact of drug use on human behavior. Emphasizes practical applications of intervention and prevention in the community. Community Colleges only.

Learning Outcomes
1. Through readings and discussions, students will be able to describe the role that gender, ethnicity, and age have in alcohol and drug use.
2. Through readings and discussions, students will be able to learn past and current perspectives of addiction.
3. Through readings, discussions, and student presentations, students will be able to distinguish between different types of abuse-able drugs and be able to classify them.
4. Through readings, discussions, lectures, and guest speaker's students will be able to describe the role of addiction and criminal behavior.
5. Through readings and discussions, students will be able to discuss the Models and Theories of Drug Dependence and Addiction.
6. Through readings, discussions, and evaluation of case studies students will be able to discuss the definitions of Substance Abuse, Dependence Addiction.
7. Through readings and discussions, students will be able to acquaint themselves with the effects of Addictive Behavior on Family Systems.
8. Through readings discussions, students will be able to Discuss Disorders Co-Occurring with Substance Abuse.
9. Through readings and community service learning outing, students will be able to discuss how important the concepts of Prevention, Intervention and Treatment in drug addiction.
10. 1 Through readings and community service learning outing students will be able to discuss Alcohol/Drug Recovery Treatment Relapse Prevention.
11. 1 Through completion of Service Learning and field assignment students will be able to discuss the role of AA/NA in Recovery Treatment.
12. 1 Through attendance of a Drug Court Hearing students will be knowledgeable of the role of Drug Courts in prevention and treatment of drug addiction.

PSYC 301. Introduction to Psycholinguistics
3 Credits (3)
Psychological aspects of language, including linguistic theories of grammar, psychological factors influencing language performance, primary language acquisition and the relationship of language to thought processes. Same as LING 301.
Prerequisites: PSYC 1110G and one of: MATH 1350G, MATH 2350G, or A ST 311; and PSYC 310 or consent of instructor.

PSYC 302. Abnormal Psychology
3 Credits (3)
Introduces the types, causes, and treatment of mental disorders. Descriptions and explanations of the neuroses, affective disorders and the psychoses. Case histories are also analyzed.
Prerequisites: PSYC 1110G, MATH 1215 and ENGL 1110G.

PSYC 310. Experimental Methods
4 Credits (2+4P)
The basic skills of literature search, experimental design, research methodology, and research reporting are emphasized; includes laboratory.
Prerequisite(s): PSYC 1110G, and either MATH 1350G, MATH 2350G, or A ST 311.
PSYC 311. Advanced Research Seminar
4 Credits (2+4P)
Psychological research in conjunction with designing, conducting, writing, and presenting an independent research project. May also include various computer applications. Will discuss issues regarding application to graduate programs. Course should be taken no later than the first semester of senior year.
Prerequisite: PSYC 310.

PSYC 315. Emotion
3 Credits (3)
An overview of the past century of research on human emotion from William James to Antonio Damasio. Explores a cognitive science perspective on emotion that includes questions about developmental, physiological, and evolutionary aspects of emotion and an exploration of the proximate and ultimate functions of emotion. Topics range from understanding the feeling component of emotion to understanding the role of facial displays of emotion.
Prerequisite(s): PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311G, and PSYC 310 or consent of instructor.

PSYC 317. Social Psychology
3 Credits (3)
Ways in which people are influenced by the behavior of others are analyzed. Includes aggression, altruism, conformity, attraction, sexual behavior, prejudice, and nonverbal behavior.
Prerequisites: PSYC 1110G, MATH 1215, and ENGL 1110G.

PSYC 320. Learning
4 Credits (3+2P)
Covers: habituation, Pavlovian conditioning, Thorndikian learning, stimulus generalization, transfer of training, and the learning and forgetting of related and unrelated material.
Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310.

PSYC 321. Psychology of Personality
3 Credits (3)
Introduces personality theories and supporting research. Psychoanalytic, physiological, and behavioral theories as they apply to personality are examined. Focuses on normal personality functioning.
Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310.

PSYC 322. Psychological and Behavioral Genetics
3 Credits (3)
Examines the role of genetic factors in the development of psychological disorders. Focuses on the relationship between genetics and behavior.
Prerequisite(s): PSYC 1110G.

PSYC 324. Sex, Gender, and Society
3 Credits (3)
Covers topics related to sex and gender, including sex differences in behavior, gender identity, sexual orientation, and social norms.
Prerequisite: PSYC 1110G.

PSYC 325. Health Psychology
3 Credits (3)
Life stress, surgical stress, coronary-prone behavior, biofeedback, pain control, psychosocial approaches to geriatrics and cancer, behavioral treatments for addictions, obesity, and interpersonal issues in health care.
Prerequisite: PSYC 1110G.

PSYC 330. Psychology and the Law
3 Credits (3)
Discretionary practices in the judicial system including pretrial procedures, jury selection, jury decision making, eyewitness testimony, insanity, expert witnesses, and probation judgments.
Prerequisite: PSYC 1110G.

PSYC 340. Cognitive Psychology
3 Credits (3)
Review of research and theory in the study of human cognitive processes. Topics include information processing, pattern recognition, memory, attention, language, problem solving, decision making, and reasoning. May be repeated up to 3 credits.
Prerequisite(s): PSYC 1110G, MATH 1215, and ENGL 1110G.

PSYC 350. Developmental Psychology: Conception through Childhood
3 Credits (3)
Covers a wide range of topics concerning human psychological development from conception through childhood with special emphasis on current research and theory. May be repeated up to 3 credits.
Prerequisite(s): PSYC 1110G, MATH 1215, and ENGL 1110G.

PSYC 351. Developmental Psychology: Adolescence through Old Age
3 Credits (3)
Covers a wide range of topics concerning human psychological development from adolescence through old age with special emphasis on current research and theory.
Prerequisite: PSYC 1110G.

PSYC 359. Psychology of Gender
3 Credits (3)
Examines theories and research on the psychological functioning of women and men in North American society, including influential theories of gender in psychology and current controversies in the psychological literature. Topics include those unique to women and unique to men in development across the lifespan, work, physical and mental health, sexuality, victimization, gender stereotypes, gender comparisons in abilities and personality, and biological, social, and cultural influences on behavior. May be repeated up to 3 credits. Crosslisted with: GNDR 359.
Prerequisite(s): PSYC 1110G.

PSYC 370. Special Topics
1-3 Credits
May be taken under different subtitles announced in the Schedule of Classes for unlimited credit. May be repeated for a maximum of 12 credits.
Prerequisite: PSYC 1110G.

PSYC 375. Psychology and the Brain
3 Credits (3)
An exploration of how the brain produces thinking, emotion, and behavior. May be repeated up to 3 credits.
Prerequisite(s): PSYC 1110G, MATH 1215 and ENGL 1110G.

PSYC 376. Evolutionary Psychology
3 Credits (3)
This course introduces the student to the science of Evolutionary Psychology. In this class we will explore how evolutionary psychologists think about a variety of topics ranging from our capacity for (and appreciation of) art, emotions, and beauty to an exploration of the “design” of our minds in regards to mating, status striving, social behavior and cultural production.
Prerequisite(s): PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311G, and PSYC 310 or consent of instructor.

PSYC 380. Perception
4 Credits (4+4P)
Primary emphasis on vision. Topics include measurement of sensations, development of visual-motor coordination, reading, speech perception, picture perception, illusions, 3-dimensional space, and causes and consequences of visual abnormalities.
Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310.
PSYC 383. Memory
3 Credits (3)
Examines facets of human memory from the information processing viewpoint, including encoding, storage, and retrieval and memory-aiding techniques.
Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310 or consent of instructor.

PSYC 400. Research
1-3 Credits
Individual research projects supervised by a department faculty member. May be repeated for a maximum of 6 credits.
Prerequisites: PSYC 310 and consent of instructor.

PSYC 401. Directed Readings
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisites: PSYC 1110G and consent of instructor.

PSYC 402. Field Experience
1-3 Credits
Working with preschool, juvenile delinquent, handicapped, aged, convict, or mentally ill. Approximately five hours scheduled work per week per credit. May be repeated to 6 credits.
Prerequisites: 6 psychology credits and consent of instructor.

PSYC 430. Human-Computer Psychology
3 Credits (3)
Theories, methodologies, and data from psychology applicable to interface design, with an emphasis on construction and application of conceptual psychological models.
Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310 or consent of instructor.

PSYC 442. Thinking
3 Credits (3)
Research and theory pertaining to human thinking and problem solving. Effective problem-solving methods and common obstacles to problem solving are analyzed.
Prerequisites: PSYC 1110G and PSYC 310.

PSYC 450. Senior Thesis
3 Credits (3)
A laboratory or field research project conducted under faculty supervision. Requires written research proposal, conduct of research, data analysis, and final written report. May be repeated for a maximum of 6 credits.
Prerequisites: PSYC 310, 6 additional psychology credits, consent of supervising faculty member, and junior or above standing.

PSYC 470. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

PSYC 507. Quantitative Methods in Psychology I
3 Credits (3)
Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on distributions, probability and basic inferential statistics in Psychological research. Includes basics of Analysis of Variance (ANOVA) and Multiple Regression in Psychological research. May be repeated up to 3 credits.
Learning Outcomes
1. Students will be able to recognize appropriate usage of, and be able to implement, basic statistical techniques: Central tendency, variability, z-scores, t-tests, ANOVA, correlation, two predictor regression.

PSYC 508. Quantitative Methods in Psychology II
3 Credits (3)
Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on advanced ANOVA and Multiple Regression in Psychological research. May be repeated up to 3 credits.
Prerequisite(s): PSYC 507 or equivalent.
Learning Outcomes
1. Students will become familiar with situations and applications of advanced ANOVA techniques and Multiple Regression and Correlation.

PSYC 509. Quantitative Methods in Psychology III
3 Credits (3)
Advanced quantitative methods as applied to research in Psychology: Topics may include: Multivariate techniques, advanced Bayesian analyses, Random walk modelling etc. May be repeated up to 3 credits.
Prerequisite(s): PSYC 507 or equivalent.

PSYC 510. Computer Methodology
3 Credits (3)
Use of computers in psychological research with emphasis on developing experimental control programs.

PSYC 520. Learning
3 Credits (3)
Classical areas of learning, including instrumental and classical conditioning paradigms, habituation, reinforcement variables, stimulus generalization and transfer, and memory.

PSYC 522. Sensation and Perception
3 Credits (3)
Stimulus and decision variables in judging auditory and visual events. Topics include: detection of signals; signal intensity versus perceived strength; size, shape, and movement perception; reading and listening.

PSYC 523. Methods in Cognitive Psychology
3 Credits (3)
Experimental and correlational methodologies appropriate for investigating cognitive psychological theories and problems.
Prerequisite(s): PSYC 524 or consent of instructor.

PSYC 524. Cognitive Psychology
3 Credits (3)
Examines theoretical and empirical work on human cognition. Topics include: information processing theories, pattern recognition, memory, attention, language, problem solving, decision making, and reasoning.

PSYC 527. Social Psychology
3 Credits (3)
Current and traditional theories, research findings, and research methodologies of social psychology.
PSYC 529. Methods in Social Psychology
3 Credits (3)
Experimental, quasi-experimental, and correlational methodologies appropriate for investigating social psychological theories and problems. Prerequisite(s): Graduate student in psychology or consent of instructor.

PSYC 540. History and Systems of Psychology
3 Credits (3)
History of scientific method emphasizing outstanding methodological problems of contemporary science, especially psychology. Covers recent history of psychology and development of schools of psychology.

PSYC 547. Engineering Psychology
3 Credits (3)
Covers concepts, methods, and findings of human performance. Treats the human as a subsystem that receives, stores and processes information, makes decisions, and acts within a human-machine environment system.

PSYC 550. Teaching of Psychology
3 Credits (3)
This class serves both new and experienced teachers. It will help new teachers design and conduct a successful course and help experienced teachers improve their teaching.

PSYC 570. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes.

PSYC 590. Research Seminar in Psychology
1 Credit (1)
Presentations on research by students, faculty, and guest speakers. May be repeated for credit.

PSYC 598. Special Research Programs
1-3 Credits
Individual investigations either analytical or experimental. May be repeated for credit.

PSYC 599. Master’s Thesis
1-15 Credits
Thesis.

PSYC 600. Doctoral Research
1-15 Credits
This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

PSYC 698. Special Research Programs
1-3 Credits
Individual investigations either analytical or experimental. May be repeated for credit.

PSYC 700. Doctoral Dissertation
1-15 Credits
Dissertation.

RADT-RADIOLOGIC TECHNOLOGY

RADT 100. Introduction to Radiologic Technology and Patient Care
2 Credits (2)
Overview of the profession, including ethics, terminology, and basic radiation protection. Addresses basic and specialized procedures and topics related to the care of the patient. Restricted to: Community Colleges only. Restricted to Majors.

RADT 101. Radiographic Positioning I
4 Credits (2+6P)
Covers radiographic procedure and positioning concepts, techniques, terminology, and mechanics related to the thorax, abdomen, extremities, spine and pelvis. Includes positioning lab and clinical observation.

RADT 102. Radiographic Positioning II
4 Credits (2+6P)
Continuation of RADT 101. Includes skull, gastrointestinal, urinary, reproductive, biliary systems, and more advanced skeletal positions. Includes positioning lab and clinical observation. Restricted to: Community Colleges only. Restricted to Majors. Prerequisite: RADT 101.

RADT 103. Introduction to Radiographic Imaging
3 Credits (2+2P)
Provides the student with an in-depth knowledge of radiographic exposure technique and the factors affecting radiographic image quality. Includes lab experiments. Restricted to majors.

Learning Outcomes

1. Students will demonstrate the ability to safely produce quality diagnostic radiographic images. Students will demonstrate effective communication skills. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.

RADT 104. Special Radiologic Modalities
2 Credits (2)
Discussion of various special procedures used in medical imaging such as, angiography, ultrasound, computerized tomography, magnetic resonance imaging, digital imaging, nuclear medicine, radiation therapy, etc. Includes guest lectures and field trips. Prerequisite: RADT 103.

RADT 105. Radiographic Physics and Equipment
3 Credits (3)
Fundamentals of radiographic physics and imaging theory. Includes the atom, electromagnetism, x-ray production and interactions, x-ray circuitry, digital fluoroscopic units, digital x-ray equipment and quality assurance/control; with brief overview of mammography, computed tomography (CT), and MRI imaging. Restricted to: Community Colleges only. Restricted to Majors. Prerequisite/Corequisite: RADT 103.

Learning Outcomes

1. Students will have knowledge of and be able to operate radiographic equipment to produce quality diagnostic radiographic images. Students will demonstrate radiation safety application through ALARA Principles

RADT 110. Radiographic Pathology
1 Credit (1)
Overview of pathology demonstrated by radiographic procedures. Restricted to majors. Prerequisite: RADT 154.

RADT 154. Radiographic Anatomy and Physiology
3 Credits (3)
Basic A&P for radiographic application. Includes a systems approach to body structures and organs as they relate to anatomical projections, radiographic identification, and various imaging modalities. Restricted to: RADT majors. Restricted to: Community Colleges only. Prerequisite(s): AHS 153 or AHS 140 or BIOL 2210 or BIOL 1130, or consent of instructor.
RADT 156. Independent Study
1-6 Credits (1-6)
Individual studies/research on topics related to the radiological sciences. May be repeated for a maximum of 6 credits. Restricted to Community Colleges only.

RADT 190. CT Equipment and Methodology
3 Credits (3)
Skill development in the operation of computed tomographic equipment, focusing on routine protocols, image quality, and quality assurance and radiation protection. May be repeated up to 3 credits. Restricted to: CTOM or RADT majors. Restricted to Community Colleges campuses only.

RADT 200. Radiation Biology and Protection
2 Credits (2)
Biological effects of ionizing radiation on cells and tissues. Includes radiation measurements, policies and protection measures for self, patients, and others. Restricted to majors. Restricted to: Community Colleges only.
Prerequisite(s): RADT 103.

RADT 201. Clinical Education I
7 Credits (32P)
Supervised practice in a radiology department under direct supervision of a registered technician. Includes film critiques.
Prerequisite: RADT 105.
Learning Outcomes
1. Students will demonstrate the ability to safely produce diagnostic radiographic images. Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions. Students will demonstrate effective communication skills. Students will accurately document/record data in accordance with clinical site policies and procedures.
2. Students will demonstrate the ability to use independent judgement. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed. Students will conduct themselves in a professional manner to function effectively as a member of the healthcare team. Students will identify various opportunities for professional growth within medical imaging sciences.

RADT 202. Clinical Education II
11 Credits (33P)
Continuation of RADT 201. Student will work under indirect supervision of registered personnel.
Prerequisite(s): RADT 201.
Learning Outcomes
1. Students will demonstrate the ability to safely produce diagnostic radiographic images. Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions. Students will demonstrate effective communication skills. Students will accurately document/record data in accordance with clinical site policies and procedures. Students will demonstrate the ability to use independent judgement. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed. Students will conduct themselves in a professional manner to function effectively as a member of the healthcare team. Students will identify various opportunities for professional growth within medical imaging sciences.

RADT 203. Clinical Education III
11 Credits (33P)
Continuation of RADT 202 to include special rotations in advanced imaging modalities.
Prerequisite(s): RADT 202.
Learning Outcomes
1. Students will demonstrate the ability to safely produce diagnostic radiographic images. Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions. Students will demonstrate effective communication skills. Students will accurately document/record data in accordance with clinical site policies and procedures. Students will demonstrate the ability to use independent judgement. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed. Students will conduct themselves in a professional manner to function effectively as a member of the healthcare team. Students will identify various opportunities for professional growth within medical imaging sciences.

RADT 205. Radiographic Image Critique
1 Credit (1)
Review of radiographs produced in clinical settings to evaluate anatomy and technical issues. Restricted to majors.
Prerequisite: RADT 201.

RADT 206. Applied Radiographic Procedures
2 Credits (1+3P)
Advanced course which integrates the principles and techniques of radiologic technology. Restricted to majors.
Prerequisite: RADT 202.

RADT 207. Cross Sectional Anatomy for Medical Imaging
3 Credits (3)
Anatomic relationships that are present under various sectional orientations as depicted by computed tomography or magnetic resonance imaging. May be repeated up to 3 credits. Restricted to: CTOM or RADT majors. Restricted to Community Colleges campuses only.

RADT 208. Clinical I (Computed Tomography)
3 Credits (9P)
A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinic professional. May be repeated up to 3 credits. Restricted to: CTOM or RADT majors. Restricted to Community Colleges campuses only.

RADT 209. Clinical II (Computed Tomography)
3 Credits (9P)
A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinic professional. (Capstone Course). May be repeated up to 3 credits. Restricted to: CTOM or RADT majors. Restricted to Community Colleges campuses only.
RDG-READING

RDG 350. Teaching and Learning Reading and Writing
3 Credits (3)
The foundation of this course is on understanding the reading process including the relationship between reading, writing, listening, and speaking; individual needs and abilities in reading instruction; and how to organize classrooms and select materials to support literacy development. Concepts of phonemic awareness, phonic instruction, vocabulary development, fluency and comprehension are integrated with the developmentally appropriate use of authentic assessment techniques, language/literacy immersion, and multicultural children's literature. May be repeated up to 3 credits.
Prerequisite(s): ECED 2115.
Corequisite(s): ECED 329, ECED 440, ECED 455.

RDG 360. Elementary School Literacy I
3 Credits (2+2P)
Reading development, curriculum, and instruction in the elementary grades. Required of all elementary education majors as a May be repeated up to 3 credits. Crosslisted with: RDG 350. Restricted to: TEP-EED majors.

RDG 361. Elementary School Literacy II
3 Credits (2+2P)
Reading development in curriculum and instruction with assessment and evaluation in the elementary grades (K-8). May be repeated up to 3 credits. Restricted to: TEP-EED majors.
Prerequisite(s): RDG 360.

RDG 371. Instruction for Special Reading Needs
3 Credits (3)
Emphasizes appropriate techniques for teaching reading to learners with special needs. May be repeated up to 3 credits. Restricted to: TEP-EED, ECED, SED, and SPED majors.

RDG 395. Special Topics
1-3 Credits
Each course will be identified by a qualifying subtitle. A maximum of 3 credits in any one semester and a grand total of 6 credits.

RDG 414. Content Area Literacy
3 Credits (2+2P)
Surveys integrated reading/writing/discursive practices in middle/secondary content areas. Same as RDG 514. May be repeated up to 3 credits. Restricted to: TEP-SED majors.

RDG 510. Adult and Family Literacy
3 Credits (3)
Principles, practices, and instructional materials for adult and family literacy. Same as EDUC 506.

RDG 511. Literacy Assessment and Evaluation
3 Credits (3)
Theoretical and practical aspects of using formal and informal assessment and evaluation procedures in literacy curriculum and instruction. Same as EDUC 511.

RDG 518. Digital Literacies
3 Credits (3)
Digital Literacies study focuses on the multiple relationships between how we express ourselves to one another and the multiple technological systems and networks that provide context, meaning, and shape to those expressions in both social and academic spaces. This course is designed to examine new literacies theory as it applies to teaching applications and current research on digital literacies within K-12 education. As 21st Century practitioner scholars, we are concerned with both the social aspects of literacy practices, understanding that school-based operations are inseparable from the sociocultural contexts in which they are enacted. Must be an NMSU graduate student to participate in this course.
Prerequisite(s): RDG 511 with a B- or better.
Learning Outcomes
1. Critically assess K-12 implementation of digital literacies across content area curriculum and instruction.
2. Examine seminal and current research on digital literacies’ theory, pedagogy, and practice.
3. Determine the level of cultural relevance in schools and pedagogies for 21st Century students.
4. Interpret how social categories relevant to digital literacy contribute to construction of identity.
5. Develop a critical digital pedagogy that addresses the literacy practices of all learners.

RDG 522. Language and Literacy Acquisition
3 Credits (3)
Framework and strategies of language and literacy acquisition with attention to bilingual learners and the interrelationship among reading, writing, and oral language. Same as BIL 522, RDG 422.

RDG 525. Theory and Pedagogy of Literature for Children and Adolescents
3 Credits (3)
This course provides an in-depth exploration of pedagogy and theory related to literature for adolescents May be repeated up to 3 credits.
Prerequisite(s): Graduate Standing.

RDG 530. Sociopsycholinguistics of Reading
3 Credits (3)
Examines current research on reading process, learning to read, and teaching children to read and evaluates current programs and materials.

RDG 536. Special Studies in Literacy
1-6 Credits
Each study will be designated by a qualifying subtitle. Same as RDG 636.
RDG 550. Advanced Teaching and Learning of Literacy  
3 Credits (3)  
This advanced graduate early literacy course reviews the reading process including the relationship between reading, writing, listening, and speaking; individual needs and abilities in reading instruction; and how to organize classrooms and select materials to support literacy development. Concepts of phonemic awareness, phonic instruction, vocabulary development, fluency and comprehension are integrated with the developmentally appropriate use of authentic assessment techniques, language/literacy immersion, and multicultural children's literature.  

Learning Outcomes  
1. This course will focus on the following New Mexico early childhood teacher education competencies and New Mexico State University's conceptual framework for teacher preparation.  
2. Articulate an understanding of developmental theories and processes and their implications for appropriate methods of teaching reading in the K-third grade classroom.  
3. Demonstrate knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework.  
4. Provide and use anti-bias literacy materials and experiences, including primary language materials.  
5. Plan appropriate whole group, small group, and individual activities that include appropriate accommodations for working with children with special needs.  
6. Understand and articulate the concept of emergent literacy and the processes toward becoming an authentic reader and writer.  
7. Understand the role of family in literacy development.  
8. Respect and promote the use of the child's home language for learning.  
9. Demonstrate knowledge of, and use effectively, a wide range of literacy assessment strategies and instruments to determine a child's strengths and areas of need.  
10. Engage in reflection on current theoretical perspectives on the reading process and the role of print literacy in schools and our society. Our focus will be on rigorous inquiry about literacy education in U.S. schools and methods of literacy instruction. We will be examining how invisible cultural, historical, political, and social contexts have influenced and continue to influence teachers and schools. In your observations of reading and literacy education in your field experience it is critical that you become aware of these subtle but pervasive influences. To achieve this, we will focus our inquiry this semester on the following questions:  
11. What is literacy in early childhood education?  
12. Is that different from literacy outside of school?  
13. How do young children use and pursue literacy?  
14. How do I promote literacy for all the children with whom I work?  

RDG 551. Literacy Development in Early Childhood  
3 Credits (3)  
Advanced theory, research, and practice relating to early childhood reading. Same as RDG 351.  

RDG 555. Introduction to Instructional Leadership for Literacy Educators  
3 Credits (3)  
Three credit course will introduce students to the roles and responsibilities of literacy specialists in the K-12 school setting.  
Prerequisite(s): Graduate standing, RDG 511 & RDG 530.  

RDG 560. Elementary School Literacy I  
3 Credits (2+2P)  
Reading development, curriculum, and instruction in the elementary grades. Same as RDG 360 with differentiated assignments for graduate students.  
Corequisite(s): RDG 560.  
RDG 561. Elementary School Literacy II  
3 Credits (2+2P)  
Reading development in curriculum and instruction with assessment and evaluation in the elementary grades (K-8). Same as RDG 361 with differentiated assignments for graduate students.  
Prerequisite(s): RDG 560.  
Corequisite(s): RDG 553, EDUC 554, and EDUC 555.  

RDG 585. Practicum in Literacy Education  
1-6 Credits  
Supervised laboratory experience with children with reading difficulties. The student implements a program of specific procedures to aid the disabled reader.  
Prerequisite: RDG 511.  

RDG 590. Theory and Pedagogy of Writing  
3 Credits (3)  
This course is designed to examine critical writing theory and pedagogy for K-12 teaching and learning, including inclusive and multicultural approaches, with an emphasis in constructive, collaborative practices, and the integration of digital tools across several genres of writing. Through sequential, thematic units, coursework will emphasize: 1) the study of formative theories along with the development of instructional practices to promote achievement and equity in writing education; 2) the application of these skills through pedagogy and curriculum building, and 3) the construction of broad understandings of craft within the context of the current policies and standards which impact education both regionally and nationally.  

RDG 598. Selected Topics in Literacy  
1-6 Credits  
Offered under different subtitles in the Schedule of Classes. Same as RDG 698 with differentiated subjects for doctoral students.  

RDG 600. Doctoral Research in Literacy  
1-15 Credits  
Research on topic of interest.  

RDG 605. Independent Study Topics in Reading  
1-6 Credits  
A problem and seminar course for those pursuing an advanced degree. Each course will have an appropriate subtitle.  

RDG 608. Critical Issues in Literacy Education  
3 Credits (3)  
Critical issues from historical to current perspectives.  

RDG 617. Multiple Critical Literacies  
3 Credits (3)  
An exploration of the multiple literacies that operate on the individual, classroom, community, cultural and societal levels. Same as BLED 617.  

RDG 630. Ethnography of Reading and Writing  
3 Credits (3)  
Covers the dynamics of data interpretation and critical analysis in the study of literacy.
RESP 110. Respiratory Therapy I
3 Credits (3)
Introduction to basic respiratory care techniques. Includes history, professional organizations, medical gas administration, oxygen therapy, cardiopulmonary AP, patient assessments, and medical terminology. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 110 L. Respiratory Therapy I Lab
2 Credits (2)
Laboratory practice of basic respiratory care procedures. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 115. Respiratory Therapy Pharmacology
3 Credits (3)
Concepts of physics as they apply to the physiology of the lungs. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 115 L. Respiratory Therapy Pharmacology Lab
2 Credits (2)
Continuation of lab practices and procedures learned in RESP 115. Respiratory Care I, using equipment and simulations. Requires a C or better to remain in program. Students must be admitted to the program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

RESP 120. Respiratory Therapy II
4 Credits (4)
Advanced respiratory care techniques. Emphasis on airway management, aerosol treatment, chest physiotherapy, pharmacology, posture pressure breathing, and pulmonary rehabilitation. Requires a C or better to remain in program. May be repeated up to 4 credits. Students must be admitted into program to enroll in this course. Restricted to Community Colleges campuses only.

Prerequisite(s): RESP 110.
Corequisite(s): RESP 120 L.

RESP 120 L. Respiratory Therapy II Lab
2 Credits (6P)
Continuation of lab practices and procedures learned in RESP 120. Respiratory Care II, using equipment and simulations. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Corequisite(s): RESP 120. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 110, RESP 110L and RESP 112.
Corequisite(s): RESP 120 and RESP 120L.

RESP 124. Respiratory Therapy II Clinical
3 Credits (9P)
Supervised practice and application in a hospital setting. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 110, RESP 110L and RESP 112.
Corequisite(s): RESP 120 and RESP 120L.

RESP 155. Respiratory Therapy Special Topics
1-4 Credits
Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 10 credits. Consent of instructor required. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): Admission to program.

RESP 210. Respiratory Therapy III
2 Credits (2)
Introduction to adult, mechanical, neonatal ventilator theory and concepts of critical care medicine. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 115, RESP 120, RESP 120L, and RESP 124.
Corequisite(s): RESP 210L.

RESP 210 L. Respiratory Therapy III Lab
2 Credits (2)
Advanced practice procedures using mechanical ventilation devices. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 115, RESP 120, RESP 120 L, and RESP 124.
Corequisite(s): RESP 210.

RESP 224. Respiratory Therapy IV Clinical
3 Credits (9P)
Continuation of RESP 124. Emphasis on mechanical ventilators. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): Admission to program, and RESP 115, RESP 120, RESP 120 L, and RESP 124.
RESP 230. Respiratory Therapy V
3 Credits (3)
Continuation of RESP 215. Emphasis on special modalities. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 230 L. Respiratory Therapy V Lab
2 Credits (2)
Advanced practice and procedures of respiratory care. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 233. Respiratory Therapy Cardiopulmonary
2 Credits (2)
Concepts of physics as they apply to the physiology of the lung. Emphasis on laws pertaining to gas flow, humidity, and the mechanics of the breathing process. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 234. Respiratory Therapy V Clinical
3 Credits (3)
Continuation of RESP 214. Emphasis on special modalities. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 240. Respiratory Therapy VI
3 Credits (3)
Advanced theory of hemodynamics, neonate, pediatric, and new specialties that apply to respiratory care. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.
Prerequisite(s): RESP 230, RESP 230L, RESP 233 and RESP 234.
Corequisite(s): RESP 240L.

RESP 240 L. Respiratory Therapy VI Lab
2 Credits (6P)
Advanced laboratory practice and procedures. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.
Prerequisite(s): RESP 230, RESP 230L, RESP 233 and RESP 234.
Corequisite(s): RESP 240.

RESP 242. Pediatric Advanced Life Support (PALS)
1 Credit (1)
Etiology, diagnosis, clinical manifestations, and management of cardiopulmonary disorders related to respiratory care. Restricted to majors.
Corequisite(s): RESP 230.

RESP 243. Respiratory Therapy Neonatal Resuscitation
1 Credit (1)
Advanced practice of the neonatal resuscitation and certification. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.
Prerequisite(s): RESP 230, RESP 230L, RESP 233, and RESP 234.
Corequisite(s): RESP 240 and RESP 244.

RESP 244. Respiratory Therapy VI Clinical
3 Credits (9P)
Clinical experience on special modalities. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.
Prerequisite(s): RESP 230, RESP 230L, RESP 233 and RESP 234.
Corequisite(s): RESP 240.

RESP 255. Respiratory Therapy Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 4 credits. Consent of instructor required. Restricted to: Community Colleges only. Restricted to RESP majors.
Prerequisite(s): Admission to program.

RGSC-RANGE SCIENCE

RGSC 1110. The Range Science Profession
1 Credit (1)
Introduction to scientific disciplines and career opportunities in rangeland science and management.
Learning Outcomes
1. To introduce students to the Range Science program and to a variety of CAREER OPPORTUNITIES in Range Science.
2. To develop an individualized course curriculum that prepares the student to achieve their career goals.
3. To examine opportunities to gain practical work experience through internships and cooperative employment.

RGSC 2110. Introduction to Rangeland Management
3 Credits (3)
This course covers the principles of managing and understanding pasture and rangelands. Plant physiology and ecology, plant communities and rangeland sustainability and how they relate to livestock production and wildlife management will be discussed. Restricted to: Main campus only.
Learning Outcomes
1. Understand rangeland management operations.
2. Identify rangeland plants.
3. Gain a perspective of watershed management.
4. Discuss the management of rangeland resources.
5. Understand the process of rangeland evaluation through a broad understanding of monitoring and production of these rangelands.
6. Gain a perspective of the correlation of rangelands and the economic principles guiding resource management.
7. Understand the process of rangeland condition.
8. Understand the concepts of stocking rates and usage of rangelands.
9. Gain a broad perspective of different classes of land ownership; Tribal, federal, private and state.
10. Recognize vegetative communities, ecological sites, plant physiology and application to rangeland management considerations.

RGSC 2996. Special Topics
1-4 Credits
Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.
Learning Outcomes
1. Varies
RGSC 302V. Forestry and Society
3 Credits (3)
Global study of the development and use of forest resources for production of wood, fuel, fiber, and food products. Climatic, edaphic, cultural, and economic influences on forests of the world evaluated. Same as HORT 302V.

RGSC 316. Rangeland Plants
3 Credits (2+3P)
Identification, classification, cultural uses, and economic importance of native and introduced rangeland plants.

RGSC 317. Rangeland Communities
3 Credits (3)
Rangeland associations and communities, their plant species composition, and ecological factors affecting management of communities.

RGSC 318. Watershed Management
3 Credits (2+2P)
Management of rangeland and forest watersheds with emphasis on hydrologic cycle and land use effects on runoff and water quality.

RGSC 325. Rangeland Restoration Ecology
3 Credits (3)
Principles and practices of vegetation management and ecological restoration. Course emphasizes problems associated with rangeland degradation, and implementation of rangeland restoration and improvements.
Prerequisite(s): Sophomore standing or consent of instructor.

RGSC 350. Special Topics
1-4 Credits
Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

RGSC 357. Grass Taxonomy and Identification
3 Credits (1+4P)
Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Students must be Junior standing to enroll in this course.

RGSC 390. Internship
1-3 Credits
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Graded S/U.
Prerequisite: consent of instructor.

RGSC 402 Seminar
1 Credit (1)
A seminar course designed to inform students of the career opportunities, develop their interviewing and other interpersonal skills may also include reading, discussions, written reports, and seminar presentations of current relevant literature.
Prerequisite(s): Senior standing.

RGSC 402 H. Range Science Seminar
1 Credit (1)
Taught with RGSC 402 with additional work.
Prerequisite(s): Meets Honors eligibility and/or Crimson Scholar status and senior standing.

RGSC 406. Rangeland Team Competition
1 Credit (1)
Description and characteristics of range plants. May be repeated for a maximum of 4 credits.
RGSC 509. Approaches to Rangeland Research  
3 Credits (3)  
Experimental design and statistical analysis of experimental results.  
Prerequisite(s): A ST 505 or consent of instructor.

RGSC 513. Advanced Rangeland Ecology  
3 Credits (3)  
Overview of the current state of knowledge in selected areas of rangeland ecology, with emphasis on currently developing ideas and issues relevant to rangeland management.  
Prerequisite(s): RGSC 440 or equivalent.

RGSC 515. Graduate Seminar  
1 Credit (1)  
Current topics. Graded S/U.

RGSC 516. Arid Land Management  
3 Credits (3)  
Survey of seminal and current literature dealing with management of arid and semiarid lands including soil-plant-animal interactions, plant community ecology, arid land assessment methods, and arid land hydrology.

RGSC 518. Watershed Methods and Management  
3 Credits (3)  
Management of rangeland and forest watersheds with emphasis on the hydrologic cycle and land use effects on runoff and water quality. Hydrologic monitoring methods problem sets required for graduate credit.

RGSC 520. Arid Land Plant Herbivore Interactions  
3 Credits (3)  
Survey of seminal and current literature dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.

RGSC 525. Advanced Rangeland Restoration Ecology  
3 Credits (3)  
Theory and application of restoration ecology and the principles and practices of ecological restoration. Course emphasizes problems associated with rangeland degradation and highlights current restoration management actions. May be repeated up to 3 credits.

RGSC 550. Special Topics  
1-4 Credits  
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

RGSC 551. Earth Data Retrieval  
3 Credits (3)  
This course covers topics related to identifying sources, preprocessing, utilizing earth data that can be used to monitor some hydrological and water related variables, vegetation growth and related biophysical properties. The course focuses on developing students' skills on how to handle and analyze high-level large amounts of research data in different formats (i.e., hdf). The course highlights the use of remote sensing and land surface models-based (NLDAS) earth observation datasets (e.g., NDVI, LST, Ta, and ET). The course uses some open-source tools including Python, API as well as MATLAB. Crosslisted with: WSAM 551.

RGSC 557. Advanced Grass Taxonomy and Identification  
3 Credits (1+4P)  
Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Additional writing and grass identification assignments are required for graduate credit.

RGSC 575. Climate Studies, Water and Society  
3 Credits (3)  
The course provides a brief description of the Earth's climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water availability) vulnerability of human systems (e.g., agriculture) to climate change, and mitigation and adaptation strategies. Crosslisted with: WSAM 575.

RGSC 585. Land Cover Analysis for Natural Resources  
3 Credits (3)  
This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g., hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis. Crosslisted with: WSAM 585.

RGSC 589. Landscape Hydrology Modeling  
3 Credits (3)  
The course "Landscape Hydrology Modeling" offers topics related to the physical hydrological processes that occur at different spatial and temporal scales in terms of understanding, quantitative evaluation, modeling, and visualization. It addresses precipitation, runoff, infiltration, and evaporation, as well as understanding impact of land use change on these processes. The course highlights and provide training on the use of hydrological modeling tools including WMS software, HydroVIS and ArcGIS software to help students understand, model, manipulate, and visualize hydrological data processes. The course offers hands-on learning experience on the use of these tools. Consent of Instructor required. Crosslisted with: WSAM 589.

RGSC 590. System Dynamics  
3 Credits (3)  
The course takes a system dynamics approach to the study of economics and natural resources management. We will examine some of the example theories such as Solow-Swan model and endogenous growth theories as well as the tragedy of the commons, using system dynamics tools to uncover the feedback and explicitly examine its impact on the dynamic behavior of the system. Through these examples, we will learn how to develop, validate, and use system dynamics models for policy design and analysis. Crosslisted with: WSAM 590.

Learning Outcomes  
1. Identify common generic structures and behavioral modes in socioeconomic and ecological systems, 
2. Define important feedback theories that explain the behavioral modes in socioeconomic and ecological systems, and 
3. Implement the system dynamics method to translate the feedback theories into dynamic simulation models.
RXPP 601. Introduction to Psychopharmacology for Psychologists I
3 Credits (3)
This course is an introduction to physiology and an overview of gross and microanatomy, with a focus on gross, micro, and chemical anatomy of the nervous system. By the end of the course, psychologists will have an up-to-date understanding of human psychology, anatomy, and neuroanatomy. Doctorate of Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors.

RXPP 602. Introduction to Psychopharmacology for Psychologists II
3 Credits (3)
Principles of organic chemistry and human biochemistry necessary for the understanding of psychopharmacology are discussed and related to the major transmitter systems and dynamics of transmission. By the end of the course, students will have an up-to-date understanding of biochemistry on which to base further didactic study in psychopharmacology. Doctorate of Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors.

RXPP 603. Clinical Psychopharmacology I
3 Credits (3)
This course begins with an introduction to the scope of pharmacology; pharmacoepidemiology, ethical, and legal issues (informed consent, State and Federal regulation of drugs and prescribing, sources of drug information and computer aids) and continues with the principles of pharmacokinetics and pharmacodynamics as they relate to the use of psychotropic medications. It concludes with an introduction to the treatment of anxiety disorders from a biopsychosocial model of care with special emphasis on psychopharmacology for anxiety disorders. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors.

RXPP 604. Clinical Psychopharmacology II
3 Credits (3)
This course is a thorough investigation of the diagnosis and treatment of affective disorders from a biopsychosocial model of care. Particular emphasis is given to psychopharmaceutical treatment of depressive disorders and bipolar disorders. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors.

RXPP 605. Clinical Psychopharmacology III
3 Credits (3)
This course is an intensive study of the treatment of psychosis from a biopsychosocial model of care. Special consideration is given to: first, second, and third generation antipsychotic drugs and their pharmacology and clinical uses; neurological and metabolic disorders associated with antipsychotic use; and appropriate use of antipsychotics in children and the elderly. Special attention is then given to child and adolescent psychopharmacology, including drugs used in pregnancy and lactation, teratogenicity, embryotoxicity, developmental disorders, conduct disorders, ADHD, and special considerations in use of approved drugs in children. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to the Clinical Psychopharmacology program.

Learning Outcomes
1. Delineate the biochemical mechanisms underlying the pharmacological efficacy of the three generations of antipsychotic drugs. Differentiate the effects and side effects of first, second and third generation of antipsychotic drugs. Describe the effects of various antipsychotic drugs on the positive and negative symptoms of schizophrenia; including the neurological projections within the Central Nervous System. Describe the biochemical and physiological basis of adverse reactions with antipsychotic treatments. Select antipsychotics using evidence based criteria and manage the medical issues that arise from their use. Identify the various signs of side effects to antipsychotic drugs and use the appropriate techniques for assessing their severity including the administration of appropriate rating scales assessing those side effects (e.g. AIMS, BMI) Examine the cost-benefit ratio of psychotropics use for adult, child, adolescent and elderly patients with psychotic disorders. Become familiar with current treatment algorithms for the management of psychotic disorders and their limitations. Learn which anti-psychotics that have FDA approval, as well as those that are used off-label in the treatment of children, adolescents and the elderly.
RXPP 606. Pathophysiology for Psychologists I
3 Credits (3)
This course is an introduction to human clinical physical assessment, history taking, charting, and laboratory testing and neuroimaging. An important emphasis is in functional neuroanatomy and diagnosis and assessment of neurological disorders; role of different components of human nervous system in health and disease; stroke, seizures, and movement disorders (chorea, athetosis, dystonias, dyskinesias, Parkinsonism, akathesia, iatrogenic neurological disorders). Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors.

RXPP 607. Pathophysiology for Psychologists II
1-6 Credits (1-6)
Physical assessment and pathophysiology of the cardiovascular system is studied in depth: structure and function of the heart and major blood vessels; innervation of the heart and vessels; electrocardiogram; components of blood; lymphatics; and physical assessment of cardiac function. The physical assessment and pathophysiology of eyes, ears, nose, and the immune system are studied in depth; anatomy and physiology of special senses; assessment of cranial nerves and sensory function; immune function and psychoimmunology. The physical examination and pathophysiology of the chest and pulmonary system and its relationship to the cardiac system is also studied. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: CLPY majors.

RXPP 608. Pathophysiology for Psychologists III
3 Credits (3)
This course continues with an in-depth study of the chest and pulmonary system: pulmonary function and assessment; respiratory exchange and respiratory involvement in acid: base regulation, disorders of respiratory function. The physical assessment of pathophysiology of the gastrointestinal system is discussed in depth: digestion, absorption and excretion of drugs and nutrients from the GI system; disorders of GI function; hepatic function; innervation of GI tract; endocrine and exocrine functions of GI system; physical assessment of GI function. The functions and pathophysiology of the male and female reproductive system, endocrine system, and renal system are discussed as they relate to psychopharmacology. Doctorate of Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors.

RXPP 609. Psychopharmacological Treatment in Special Populations I
3 Credits (3)
The psychopharmacology of several special populations are discussed in detail in this course. Geriatric psychopharmacology includes: geriatric physiology; cardiac, renal, hepatic changes with aging; pharmacokinetics/dynamics in the elderly; cognition enhancers in Alzheimer’s and other dementias. Special treatment of personality disorders, eating disorders, the importance of racial, ethnic, and gender differences and culturally sensitive practice is presented with applications. Pain management psychopharmacology is over-viewed, including: pharmacology of opioid and non-opioid analgesics; pain syndromes; acute and chronic pain; headache; pharmacological and non-pharmacological approaches to pain management; pharmacology and actions of abused substances: acute effects, withdrawal, biochemistry of tolerance and dependence, brain central reward pathways. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Use a GFR calculator to assess the renal function of an elderly patient. Select the most appropriate antidepressant medication for an elderly patient considering the patient’s current level of renal function. Analyze a patient’s medication list and calculate the Beers score for the patients’ medication list. Use knowledge gained from analysis of the patient’s Beers score to select an appropriate medication for the following conditions: insomnia; psychosis; depression anxiety. List three psychotropic medications that do not require a dose adjustment based on the patient’s GFR. Analyze an elderly patient’s current medication list using the STOPP/START guidelines. Select the most appropriate medication for a patient experiencing delirium consistent with the STOPP/START guidelines. Calculate an elderly patient’s vulnerability score using the VES – thirteen. List three psychotropic medications that are hepatotoxic and should not be used in patients with cirrhosis. List the 10 most common medical illnesses in the elderly. Calculate the Child-Turcotte-Pugh Score of hepatic function for a patient. Review the current availability of empirically validated Decision Support Tools (DST’s) for the treatment of Late Life Depression (LLD) and decide whether the use of DST is supported by the evidence. Defend a risk/benefit analysis for the use of the following medication classes in the elderly. SGA’s; AZD Rx’s; hypnotics; mood stabilizers. Explain the relationship between outcome and sponsorship in studies of the comparative efficacy of psychotropic medications and psychotherapy in older adults. List expected dosage adjustments for benzodiazepines, SSRI’s, anticonvulsants, and hypnotics in older adults. Select the appropriate medication for each of 5 patients in cases presented during the class.
RXPP 610. Psychopharmacological Treatment in Special Populations II
3 Credits (3)
The pathophysiology and treatment of substance use disorders from a biopsychosocial model is presented. Issues of medical comorbidity are studied: psychopharmacological treatment in the medically compromised patient, including case studies and review of comprehensive treatment models; mental disorders due to a general medical condition and/or adverse drug reactions; and referral practices to specialists. Diagnostic rating scales and psychiatric instruments of use to the prescribing psychologist are presented. The course ends with an integration of psychotherapy and pharmacotherapy, including ethical issues such as the right to refuse treatment, treatment compliance/adherence, risk management, and the role of the medical psychologist in the modern, integrated healthcare system. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors.

RXPP 611. Supervised Experience in Psychopharmacology I
1-3 Credits (1-3)
In this applied course, students employ their knowledge of psychopharmacology in treatment setting. Students will participate in the treatment of 50 patients for a minimum of 200 hours under the supervision of a physician. Number of credits taken to be determined in consultation with RXPP Training Director. Maximum of 3 credit hours required by degree program. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors. Graded: S/U Grading (S/U, Audit).

Learning Outcomes
1. Students will complete eighty hours of practicum in a health care setting while supervised by a licensed physician. Students will demonstrate expertise in providing basic vitals, physical assessment, and laboratory interpretation skills they have been taught in class. Students will demonstrate expertise in performing diagnostics (e.g. imagining studies), differential diagnoses, clinical medicine, and instrumentation.

RXPP 612. Supervised Experience in Psychopharmacology II
1-3 Credits (1-3)
Continuation and completion of supervised experience in RXPP 611. Students will participate in the treatment of 50 additional patients for a minimum of 200 hours under the supervision of a physician. The RXPP 611/612 sequence must be completed no sooner than three months and no later than three years from initiation. Number of credit hours taken to be determined in consultation with RXPP Training Director. Maximum of 3 credit hours required by degree program. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors. Graded: S/U Grading (S/U, Audit).

Learning Outcomes
1. Students will be monitoring the psycho-biosocial treatment of 100 patients, for a minimum of 400 hours. Students will demonstrate expertise in combining psychotropic medication along with psychotherapy. Students will demonstrate knowledge and expertise is practicing enhanced patient education; and making psychotropic medication recommendations, management, and/or consulting with, as needed, allied health professionals.

RXPP 698. Selected Topics
1-6 Credits (1-6)
Offered under various subtitles which indicate the subject matter covered. A maximum of 6 credits in any one semester and a total of 18 credits overall. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 18 credits. Consent of Instructor required. Restricted to: CLPY majors.

SIGN-SIGN LANGUAGE
SIGN 1110. American Sign Language I
3 Credits (3)
American Sign Language I is an introductory level language course in the language of the American Deaf Culture. Content includes ASL vocabulary and conversational skills; linguistic features of ASL; and skills in narrative/storytelling. In-class activities, comprehension and expressive examinations, narrative and storytelling assignments in addition to semester projects are venues for students to demonstrate their learning. In addition, Deaf Culture and Deaf Community issues are addressed.

Learning Outcomes
1. Engage in basic conversations using ASL, such as introducing oneself, exchanging personnel information, and talking about one's surroundings.
2. Demonstrate the use of grammatical structures, including spatial referencing, use of classifiers, role shifting, ASL syntax, and non-manual signals (NMS).
3. Demonstrate clear sign production using an understanding of sign parameters: handshapes, movement, location, palm orientation, and NMS in targeted lexicon.
4. Demonstrate the use of basic ASL vocabulary and expressions necessary for conversations about real-life situations.
5. Evaluate and provide feedback concerning peers' and one's own uses of ASL.
6. Develop culturally-appropriate behaviors and conversation strategies within a variety of contexts for interacting with people who are Deaf.
7. Demonstrate effective use of comprehension and expressive ASL skills through narrative and/or storytelling activities.
8. Describe issues of the American Deaf community and Culture.
SIGN 1120. American Sign Language II
3 Credits (3)
American Sign Language II is a continuation course that builds on concepts and skills developed in American Sign Language I. Students gain further exposure to ASL structure and grammar, and Deaf Culture and the Deaf community. Emphasis is on increasing students’ ability to comprehend other signers and express themselves with more elaboration when conversing or presenting in ASL.
Prerequisite: SIGN 1110 or consent of instructor.
Learning Outcomes
1. Further develop basic conversational skills in ASL, taking on more complicated topics.
2. Apply knowledge of ASL grammar, including classifiers, spatial referencing and agreement, role shifting, and non-manual markers.
3. Develop ASL vocabulary, fingerspelling, number, narrative and storytelling skills.
4. Evaluate and provide feedback concerning peers’ and one’s own uses of ASL.
5. Demonstrate effective use of comprehension and expressive ASL skills through conversation, discussion, narrative and/or storytelling activities.
6. Demonstrate knowledge and appreciation of the American Deaf community and ASL
7. Through first-hand experience in the American Deaf community and ASL, relate and reflect on
8. perspectives of the community.

SIGN 2110. American Sign Language III
3 Credits (3)
This is an intermediate level course in American Sign Language (ASL). Expected areas of intermediate skill and knowledge development include: language comprehension and production, conversational use, narratives, ASL language features and further knowledge of and interaction with Deaf culture and the Deaf community.
Prerequisite: SIGN 1120.
Learning Outcomes
1. Demonstrate intermediate ASL vocabulary, conversation and narrative/storytelling skills.
2. Demonstrate fundamental ASL features including visual/spatial orientation, constructed dialogue and action, spatial referencing, classifiers, non-manual behaviors and syntax/word order.
3. Demonstrate appropriate use of cultural behaviors and conversational strategies.
4. Translate written and spoken English to ASL and vice versa.
5. Self-evaluate and provide feedback to peers concerning ASL usage.
6. Examine the culture of the American Deaf community through engaging in community activities and its language.

SIGN 574. American Sign Language III
3 Credits (3)
Continuation of ASL II. Focus on more complex grammatical features. Students will comprehend and generate medium length stories, narratives, and discussions including culturally significant topics.
Prerequisite: SPHS 375 or consent of instructor. 
SOCI-SOCIOLOGY

SOCI 1110G. Introduction to Sociology
3 Credits (3)
This course will introduce students to the basic concepts and theories of sociology, as well as to the methods utilized in sociological research. The course will address how sociological concepts and theories can be utilized to analyze and interpret our social world, and how profoundly our society and the groups to which students belong influence them. Students will be given the opportunity to challenge their “taken-for-granted” or “common sense” understandings about society, social institutions, and social issues. Special attention will also be paid to the intimate connections between their personal lives and the larger structural features of social life. In addition, the implications of social inequalities, such as race/ethnicity, gender, and social class will be central to the course’s examination of social life in the United States.

**Learning Outcomes**
1. Define sociological perspectives and the contributions that sociological knowledge can bring to the social sciences.
2. Understand the sociological imagination and explain the relationships between social structures, social forces and individuals.
3. Demonstrate the ability to apply the perspectives of symbolic interactionist theory, conflict theory, and structural-functionalism theory to qualitative and/or quantitative data.
4. Understand and explain intersectionality and the connections between race, class, gender, disability, sexual identity and other forms of structural inequality.

SOCI 2230. Sociology of Sexuality
3 Credits (3)
This course explores all aspects of human sexuality from a sociological perspective. Topics include, but are not limited to, sex work, intimate relationships, sexual response, political movements, power, and the social construction of sexuality. The course also considers how various social statuses such as ethnicity, gender, and social class intersect with sexuality.

**Learning Outcomes**
1. Identify the central research questions, theories, and methodologies used in the study of human sexuality.
2. Identify and describe biological, cultural, social, and psychological sexual behaviors and responses across the lifespan.
3. Identify and describe trends and changes that influence sexual attitudes and values in the U.S. and globally.
4. Describe how sexuality is influenced by contextual factors, such as race/ethnicity, gender, socioeconomic status, disability, and nationality.

SOCI 2240. Sociology of Intimate Relationships and Family
3 Credits (3)
This course provides an overview of contemporary intimate relationships and families from sociological perspectives. We will examine intimate relationships and families as social constructions whose meanings have changed over time and from place to place. This course will aid students in developing a greater understanding of intimate relationships and families as institutions in contemporary U.S. society. Intersections of race, class, gender, sexual orientation, nationality, and other factors within these institutions will be addressed. Community Colleges only.

**Learning Outcomes**
1. Explain the sociological approaches to researching intimate relationships and families.
2. Describe important sociological research findings concerning intimate relationships and families.
3. Explain how intimate and familial relationships are affected by multiple intersecting inequalities and ongoing events in other social institutions.

SOCI 2261. Issues in Death and Dying
3 Credits (3)
Major personal and social issues related to the process of dying in our culture. Community Colleges only.

**Learning Outcomes**
1. Be able to understand the diversity of the death experience and the various options available in coping with death and bereavement as shown by the student’s participation in class discussions and field trips.
2. Better understand death and dying as social phenomena as shown by the student’s reaction papers.
3. Have taken an in-depth look at her or his own death with a researched paper. Comprehension will be shown by the student’s grade on the paper.

SOCI 2310G. Contemporary Social Problems
3 Credits (3)
This course studies the nature, scope, and effects of social problems and their solutions. The course will concentrate on sociological perspectives, theories, and key concepts when investigating problems, such as inequality, poverty, racism, alienation, family life, sexuality, gender, urbanization, work, aging, crime, war and terrorism, environmental degradation, and mass media. This course is designed to build students' sociological understanding of how sociological approaches attempt to clarify various issues confronting contemporary life, as well as how sociologists view solutions to these problems.

**Learning Outcomes**
1. Identify and explain major social problems in the United States, and how social problems become constructed as problems.
2. Describe and analyze policy related solutions associated with social problems from various perspectives.
3. Critically examine social problems through the use of sociological theories, methods, and empirical techniques.
4. Identify connections, both national and global, between social problems and social inequalities (e.g., social class, race/ethnicity, and gender/sexuality).
SOCI 330V. Introduction to Religious Studies
3 Credits (3)
Provides an overview of old and new methods and theories for the study of religion. Exposure to the ways groups of people in diverse cultural systems construct and change their religious traditions to serve practical and meaningful ends. Same as ANTH 330V and HIST 330V.

SOCI 336V. Sociology of Pop Culture
3 Credits (3)
This course will provide students with a sociological look at creation, distribution, and effects of popular culture that have shaped, preserved, and conveyed distorted images of social class, race, gender and history to unwary consumers.

SOCI 350. Sociological Foundations
3 Credits (3)
Focus is on becoming a sociologist including career opportunities, thinking critically about society, and conducting sociological inquiry. Emphasis is on identifying and using resources available to sociologists, communication skills for sociologists and acquisition of basic analytic techniques. Restricted to BA Sociology majors.
Prerequisite(s): SOCI 1110G or consent of instructor.

SOCI 351. Sociological Theory
3 Credits (3)
Analysis of the main historical themes underlying contemporary sociological theory. May be repeated up to 3 credits.
Prerequisite(s): SOCI 1110G.

SOCI 352. Social Research: Methods
3 Credits (3)
An introduction to research design and data collection strategies commonly employed in the social sciences. Topics include experiments, survey research and various other quantitative and qualitative methods. May be repeated up to 3 credits.
Prerequisite(s): SOCI 1110G.

SOCI 353. Sociological Research: Analysis
3 Credits (3)
Elementary data analysis class emphasizing descriptive and inferential statistical techniques commonly employed in the social sciences. Topics range from one variable analysis through regression and correlation analysis of two variables. May be repeated up to 3 credits.
Prerequisite(s): SOCI 1110G.

Learning Outcomes
1. Critically evaluate understand social statistics from various common sources such as TV, newspapers, research reports, and scholarly articles. --Assessed via discussion, assignments and exams.

SOCI 357. Gender and Society
3 Credits (3)
Overview of issues related to gender, including how gender is constructed and reproduced in our society. Gender is examined from social psychological and institutional perspectives.

SOCI 359. Sociology of the Family
3 Credits (3)
Family patterns, dynamics, and processes in North American and other contemporary families. Emphasis on diversity.

SOCI 360V. Introduction to Population Studies
3 Credits (3)
Determinants and consequences of changes in fertility, mortality and migration patterns. Introduction to techniques of demographic analysis. Focus on U.S. and world population issues and their relation to social, cultural, and economic systems.

SOCI 361V. Social Issues in the Rural Americas
3 Credits (3)
Discussion of the major social issues facing the rural United States and borderland areas. Topics include the social history, governmental policies, water rights, land issues and labor. May be repeated up to 3 credits.

3 Credits (3)
Identification and analysis of the causes and consequences of social issues in urban environments including poverty, crime, terrorism, urban social policy, suburban flight, disinvestment, and deindustrialization. Special emphasis on global forces affecting urban environments around the world.

SOCI 365. Environmental Sociology
3 Credits (3)
Societal responses to environmental problems including social adjustments to natural and technological hazards, socio-cultural aspects of technological risk and impact assessment, and emergence of environmental social movements.

SOCI 371. Race and Ethnic Relations
3 Credits (3)
Dynamics of racial prejudice and patterns of racial and ethnic interaction in the United States.

SOCI 374V. Comparative Family Systems
3 Credits (3)
A comparative analysis of family forms and characteristics in various societies. An examination of the diversity of family practices among ethnic and class groups in the United States.

SOCI 375. Social Inequality
3 Credits (3)
Analysis of the social distinctions arising from sex, age, occupation, and ethnicity. Emphasis on indicators of social class and patterns of social mobility.

SOCI 376V. Social Change
3 Credits (3)
Explanations of autonomous and directed social change as occurring at the individual, organizational, societal, and international levels. Case studies from around the world.

SOCI 390. Sociology of Childhood
3 Credits (3)
This course examines theories, methods, and empirical research in several areas of the sociology of childhood. Major themes are: (1) how social structure constrains children's lives, (2) how children negotiate, share, and create culture, and (3) how children's experiences vary within and across societies.

SOCI 391. Crime and Society
3 Credits (3)
Analysis of crime at the interpersonal, organizational, and social structure levels in society. Exploration of contemporary images of crime in mass media. Examination of connections between race, class, gender, and crime in U.S. society.

SOCI 392. Juvenile Delinquency
3 Credits (3)
Nature, extent, and causes of juvenile delinquency; juvenile justice; modern methods of treatment; programs of prevention.
SOCI 393. Youth and Society
3 Credits (3)
Comparative historical analysis of social, economic and cultural forces affecting young people. Emphasis on organizational and institutional effects on the well being of children and young adults.

SOCI 394V. Sports and Society: A Global Perspective
3 Credits (3)
A critical examination of sports in a global context, emphasizing the social and cultural factors that shape the world of sports and the consequences of sports for societies. Course examines issues of social inequality, violence, media and corporate influence, religion and sports, and the student-athlete experience.

SOCI 401. Introduction to Sociological Practice
3 Credits (3)
The application of sociological theory and research method. May be taught as service learning course. May be repeated up to 3 credits. Restricted to: SOC majors.
Prerequisite(s): SOCI 1110G, senior standing or consent of instructor.

SOCI 409. Community Development
3 Credits (3)
This is a holistic view of community development with an emphasis upon how economic development efforts can become more inclusive and sustainable. Topics include examining what 'community' means, community development versus economic development, and alternative economic activities.
Prerequisite(s): SOCI 1110G.

SOCI 430. Collective Behavior and Social Movements
3 Credits (3)
An overview and exploration of the key concepts of collective behavior and social movements as they apply to both historical and contemporary trends and movements. We examine also social movement tactics and their effectiveness in shaping policy and social norms. May be repeated up to 3 credits.

SOCI 444. Social Networks
3 Credits (3)
Introduction to social network analysis in sociology. First half of the course focuses on understanding the structure of social networks. Second half of the course involves examining real-world social networks ranging from romantic relationships to political parties.
Learning Outcomes
1. Finish the course with the ability to interpret, question, and discuss network science theories and methods. Understand which type of network method is appropriate for different kinds of research questions. Finish the course with basic programming and network analysis skills in the R statistical computing environment.

SOCI 445. Textual Analysis of Digital and Social Media
3 Credits (3)
Introduction to some of the methods that social scientists use to analyze digital and social media. Focus is on developing the fundamentals for designing and conducting text analysis projects.
Learning Outcomes
1. Finish the course with the ability to interpret, question, and discuss text analysis methods accurately. Understand which type of text analysis method is appropriate for different kinds of research questions. Finish the course with basic programming and data analysis skills in the R statistical computing environment.

SOCI 446. Visualizing Social Life
3 Credits (3)
Introduction to how to communicate sociological findings using graphics. Emphasis is on finding meaningful trends in real-world social science data and creating graphics that best communicate those associations or trends.
Learning Outcomes
1. Finish the course with the ability to create, interrogate, and interpret data visualization. Understand which type of graphic is appropriate for different kinds of social science data. Finish the course with basic programming and data visualization skills in the R statistical computing environment, especially with the ggplot2 package.

SOCI 448. Special Topics
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

SOCI 449. Directed Readings
1-3 Credits
Individual readings or research for either majors or nonmajors. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

SOCI 458V. Comparative Global Family Systems
3 Credits (3)
The study of families around the world. The comparison will include how capitalism and power differentials have affected the course of family history, gender relations, and family life today.

SOCI 460. Sociology of Religion
3 Credits (3)
Examination of religion in its social context to understand the intricate relations of religion, culture and U.S. society. Recommended preparatory courses: SOCI 1110G, SOCI 2220, SOCI 376, ANTH 1140G.

SOCI 464. Human Society and the Environment
3 Credits (3)
This course explores the relationship between human societies and the natural environment, with an emphasis on both sustainable human and environmental relationships.
Prerequisite(s): SOCI 1110G.

SOCI 465V. Environmental Sociology
3 Credits (3)
Advanced examination of societal responses to environmental problems including social adjustments to natural and technological hazards, sociocultural aspects of technological risk and impact assessment, and emergence of environmental social movements.

SOCI 470. Sociology of Latinos/as in the United States
3 Credits (3)
In-depth examination and comparative analysis of political and economic issues affecting Latino/a culture and behavior. Includes the Chicano/a and larger Latino/a movements, the border, immigration, language policies, education, religion, labor, and Latina women’s issues. Recommended preparatory courses: SOCI 1110G, SOCI 371, or HIST 367.

SOCI 473. International Migration
3 Credits (3)
This course examines international migration as a social process, focusing on the American experience. Students will examine historical and comparative literature on migration that puts contemporary questions about policy and immigrant assimilation into a broader sociological perspective.
Prerequisite(s): SOCI 1110G.
SOCI 477. Sociology of Education
3 Credits (3)
Socio-political and economic factors that shape the structure and operation of educational institutions in modern complex societies. Socio-historical development of the school as a microcosm of society, with examples from American and other school systems.

SOCI 480. Diversity in Alternative Families
3 Credits (3)
Cross-cultural examination of diversity among and within families; analysis of family diversity includes consideration of the theoretical frameworks, ideological commitments, personal experiences, and methodological approaches to examine family life.

SOCI 481. Social Deviance
3 Credits (3)
Theoretical approaches to the study of social deviance with emphasis on critical theories. Exploration of forms of deviance in society. Examination of social construction of deviance within mass media and systems of social control.

SOCI 482. Advanced Individual and Society
3 Credits (3)
Examines reciprocal relationship between individual and society. Topics include socialization, social influence and persuasion, group structure and performance, altruism, aggression, interpersonal attraction, group cohesion and conformity, and inter-group conflict.

SOCI 486. Power and Politics in America
3 Credits (3)
This course provides an introduction to the study of Political Sociology with a focus on the United States. Political Sociology studies the social bases of politics and political systems and facilitates the understanding of the processes and consequences of power distributions in the United States.
Prerequisite(s): SOCI 1110G.

SOCI 489. Globalization
3 Credits (3)
Analysis of the globalization process. Covers theories of globalization, the global economy, political globalization, global culture, transnational social movements, transnational migration and world labor market, global cities, and local-global linkages. Same as POLS 469.

SOCI 491. Criminological Theory
3 Credits (3)
Schools of thought, contrasting approaches, and contemporary efforts in theory construction relevant to adult and juvenile offenders.

SOCI 496. Internship
1-6 Credits
Supervised participation in an appropriate community setting. Taught with SOCI 596. May be repeated up to 9 credits. Consent of Instructor required. Graded: S/U Grading (S/U, Audit).

SOCI 501. Perspectives on Sociology
3 Credits (3)
Overview of Sociology and development of students' sociological imaginations. Understanding the place of sociology in career development and the application of Sociology and sociological concepts to the real world. May be repeated up to 3 credits. Restricted to: SOC majors.

Learning Outcomes
1. Refine students' sociological imaginations.
2. Engage in critical self-reflection by practicing sociological mindfulness on a regular basis.
3. Have the opportunity to apply sociological concepts to the real world.
4. Explore how students can utilize sociology in achieving their career goals.
5. Refine students' critical writing and thinking skills through class discussions.

SOCI 509. Advanced Seminar in Community Development
3 Credits (3)
This is in an advanced seminar addressing a holistic view of community development with an emphasis upon how economic development efforts can become more inclusive and sustainable.
Prerequisite(s): Graduate student standing.

SOCI 530. Advanced Collective Behavior and Social Movements
3 Credits (3)
An advanced exploration of the key concepts of collective behavior and social movements as they apply to both historical and contemporary trends and movements. We examine also social movement tactics and their effectiveness in shaping policy and social norms. May be repeated up to 3 credits.

SOCI 544. Advanced Seminar in Social Networks
3 Credits (3)
Advanced introduction to social network methods. First half of the course focuses on understanding the structure of social networks. Second half of the course involves examining real-world social networks ranging from romantic relationships to political parties. Includes hands-on experience with the R statistical computing environment.

Learning Outcomes
1. Finish the course with the ability to interpret, question, and discuss network science theories and methods. Understand which type of network method is appropriate for different kinds of research questions. Finish the course with basic programming and network analysis skills in the R statistical computing environment.

SOCI 545. Advanced Seminar in Text Analysis for the Social Sciences
3 Credits (3)
Advanced exploration into some of the methods that social scientists use to analyze digital and social media. Focus is on developing the fundamentals for designing and conducting text analysis projects. Includes hands-on experience with the R statistical computing environment.

Learning Outcomes
1. Finish the course with the ability to interpret, question, and discuss text analysis methods accurately. Understand which type of text analysis method is appropriate for different kinds of research questions. Finish the course with basic programming and data analysis skills in the R statistical computing environment.
SOCI 546. Advanced Seminar in Data Visualization
3 Credits (3)
Advanced exploration into how to communicate sociological findings using graphics. Emphasis is on finding meaningful trends in real-world social science data and creating graphics that best communicate those associations or trends. Includes hands-on experience with the R statistical computing environment, especially the ggplot2 package.

Learning Outcomes
1. Finish the course with the ability to create, interogate, and interpret data visualization. Understand which type of graphic is appropriate for different kinds of social science data. Finish the course with basic programming and data visualization skills in the R statistical computing environment, especially with the ggplot2 package.

SOCI 548. Graduate Special Topics
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes.

SOCI 549. Special Research Problems
1-3 Credits
Individual analytic or experimental investigations. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

SOCI 551. Issues in Advanced Quantitative Analysis
3 Credits (3)
Advanced methods of sociological analysis are examined in detail. Restricted to: SOC majors.

SOCI 552. Seminar in Classical Social Theory
3 Credits (3)
Analysis of classical social thought within the discipline. Restricted to: SOC majors.

SOCI 553. Seminar in Sociological Research
3 Credits (3)
Exploration of research methods, issues, and practical application. May be repeated up to 3 credits. Restricted to: Soc majors.

SOCI 555. Graduate Seminar in Sex and Gender
3 Credits (3)
Comprehensive examination of current gender identity and gender stratification issues.

SOCI 556. Advanced Sociology of Religion
3 Credits (3)
Examination of religion in its social context to understand the intricate relations of religion, culture and U.S. society.

SOCI 557. Seminar in Qualitative Research Methods
3 Credits (3)
This course provides an in-depth examination of qualitative research methods, including the logic, time, and purpose of using such methods.
Prerequisite(s): Graduate standing.

SOCI 558. Seminar in Human Society and the Environment
3 Credits (3)
This is an advanced seminar exploring the relationship between human societies and the natural environment, with an emphasis on both sustainable human and environmental relationships.
Prerequisite(s): Graduate Student Status.

SOCI 559. Graduate Seminar in Sex and Gender
3 Credits (3)
Analysis of classical social thought within the discipline. Restricted to: SOC majors.

SOCI 560. Advanced Sociology of Religion
3 Credits (3)
Examination of religion in its social context to understand the intricate relations of religion, culture and U.S. society.

SOCI 561. Seminar in Qualitative Research Methods
3 Credits (3)
This course provides an in-depth examination of qualitative research methods, including the logic, time, and purpose of using such methods.
Prerequisite(s): Graduate standing.

SOCI 564. Seminar in Human Society and the Environment
3 Credits (3)
This is an advanced seminar exploring the relationship between human societies and the natural environment, with an emphasis on both sustainable human and environmental relationships.
Prerequisite(s): Graduate Student Status.

SOCI 565. Advanced Environmental Sociology
3 Credits (3)
Advanced examination of societal responses to environmental problems including social adjustments to natural and technological hazards, sociocultural aspects of technological risk and impact assessment, and emergence of environmental social movements.

SOCI 569. Advanced Issues in Sexualities
3 Credits (3)
Various issues in sexualities are addressed through a wide range of theoretical and empirical sociological literatures that involve quantitative and qualitative data. Advanced examination of the ways in which sexuality is constituted in local, cultural and institutional environments.

SOCI 570. Advanced Sociology of Latinos/as in the United States
3 Credits (3)
In-depth examination and comparative analysis of political and economic issues affecting Latino/a culture and behavior. Topics include the Chicano/a and larger Latina/o movements, the border, immigration, language policies, education, religion, labor and Latina women's issues.

SOCI 571. Advanced Race and Ethnic Relations
3 Credits (3)
In-depth analysis of the dynamics of prejudice/discrimination and patterns of intergroup interaction in the U.S.

SOCI 572. Advanced Sociology of Medical Ethics
3 Credits (3)
Major issues in the roles and relationships of health care providers and consumers, problems in communication, malpractice, patients rights, and ethics. Taught with SOCI 472 with additional work required at the graduate level.

SOCI 574. Sociology of Organizations
3 Credits (3)
Sociological models of formal organizations relevant to business, education, government, healthcare, military, and religion. Focus on internal organizational structure and dynamics plus the reciprocal relationship between organizations and their operating environment.

SOCI 575. Graduate Social Stratification
3 Credits (3)
Advanced examination of theories of stratification and current methods of stratification research. Focus on differences by ethnicity, race, class and gender.

SOCI 577. Advanced Sociology of Education
3 Credits (3)
Socio-political and economic factors that shape the structure and operation of educational institutions in modern complex societies. Socio-historical development of the school as a microcosm of society, with examples from American and other school systems.

SOCI 579. Advanced Sociological Perspectives on the U.S.-Mexico Border
3 Credits (3)
Theoretical perspectives and current research on U.S.-Mexico border region, including migration, identity, health, gender, and environment.

SOCI 581. Issues in Social Deviance
3 Credits (3)
Selected forms of deviant behavior, social issues, and social problems.
SOCI 582. Individual and Society  
3 Credits (3)  
Examines reciprocal relationship between individual and society. Topics include socialization, social influence and persuasion, group structure and performance, altruism, aggression, interpersonal attraction, group cohesion and conformity, and intergroup conflict.

SOCI 583. Symbolic Interaction  
3 Credits (3)  
This seminar will provide you a backdrop on Symbolic Interactionism, focusing on the direct and indirect antecedents of the theory, as well as current research and theoretical development up to the present. May be repeated up to 3 credits.

SOCI 586. Advanced Seminar in Power and Politics in the United States  
3 Credits (3)  
This is an advanced seminar addressing the study of Political Sociology with a focus on the United States. Political Sociology studies the social bases of politics and political systems. It facilitates an understanding of the processes and consequences of power distributions in the United States.  
Prerequisite(s): Graduate student standing.

SOCI 587. Advanced International Migration  
3 Credits (3)  
This course examines international migration as a social process, focusing on the American experience. Students will examine historical and comparative literature on immigration that puts contemporary questions about policy and immigrant assimilation into a broader sociological perspective.  
Prerequisite(s): Graduate student standing.

SOCI 589. Advanced Issues in Globalization  
3 Credits (3)  
Analysis of the globalization process. Covers theories of globalization; global economy; political globalization; global culture; transnational social movements; transnational migration and world labor market; global cities; local-global linkages. Same as POLS 569.

SOCI 596. Internship  
1-6 Credits  
Supervised participation in appropriate occupational setting. May be repeated for a maximum of 12 credits. Taught with SOCI 496 with additional work required at the graduate level.

SOCI 599. Master’s Thesis  
1-6 Credits  
Thesis. Consent of instructor required. Restricted to: Main campus only. Restricted to SOC majors.

SOIL 2110. Introduction to Soil Science  
3 Credits (3)  
An overview of fundamental concepts in soil science and soils as a natural resource. Students will be introduced to the physical, chemical, and biological properties as it relates to soil management in environmental science, conservation, and agronomy. Prerequisite: (CHEM 1120G or MATH 1215 or higher) or CHEM 1215G

Learning Outcomes  
1. Understand and use the technical terminology associated with the use and management of soils.  
2. Understand the classification of soils and the processes leading to their formation.  
3. Identify key physical, chemical, and biological properties of soils.  
4. Explain the impact of land use and management decisions as it relates to soil degradation and environmental problems.

SOIL 2110L. Introduction to Soil Science Laboratory  
1 Credit (1)  
Morphological, chemical, physical and biological properties of soil in the laboratory and field.  
Corequisite(s): SOIL 2110.

Learning Outcomes  
1. Learn techniques for sampling and characterizing soils in the region.  
2. Understand how soils are formed and the processes that occur within the soil profile.  
3. Gain fundamental knowledge on soil physical, chemical, and biological properties and how each can influence the overall function of a particular soil.  
4. Develop critical thinking and analytical skills within laboratory and field settings.  
5. Encourage collaboration, inclusiveness and critical thinking.

SOIL 2996. Special Topics  
1-4 Credits  
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

Learning Outcomes  
1. Varies

SOIL 300. Special Topics  
1-4 Credits  
Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

SOIL 312. Soil Management and Fertility  
3 Credits (3)  
Management, conservation, and fertility of soils; physical conditions affecting growth, nutrition, and plant production.  
Prerequisite(s): SOIL 2110.  
Corequisite(s): SOIL 312L.

SOIL 312 L. Soil Management and Fertility Lab  
1 Credit (1)  
Hands-on experience. Includes field trips, videos, calculations, visiting lecturers and other lab activities as possible.  
Prerequisite(s): SOIL 2110.  
Corequisite(s): SOIL 312.
SOIL 370. Environmental Soil Science
3 Credits (3)
Continuation of SOIL 2110 that emphasizes soil properties and processes that directly relate to environmental pollution problems. Same as ENVS 370.
Prerequisite: SOIL 2110.

SOIL 391. Internship
1-6 Credits (1-6)
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/U, Audit).

SOIL 424. Soil Chemistry
3 Credits (3)
Basic elements of soil chemistry including clay mineralogy, cation and anion exchange and the chemistry of problem (acid, saline and flooded) soils. Credit not given for both SOIL 424 and SOIL 479.
Prerequisite(s): SOIL 2110L or CHEM 1215G and CHEM 1225G.

SOIL 447. Seminar
1 Credit (1)
Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, HORT 447 and ENVS 447.

SOIL 449. Special Problems
1-3 Credits
Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

SOIL 450. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. Consent of Instructor required.

SOIL 456. Irrigation and Drainage
3 Credits (3)
Principles and practices required for irrigation to exist as a permanent economy. Equipment and methods for measurement and control of water.

SOIL 472. Soil Morphology and Classification
4 Credits (2+2P)
Terminology used to describe soils. Soil classification systems of the world with emphasis on systems used in the United States. Theory of classification and taxonomy as applied to soils. May be repeated up to 4 credits. Crosslisted with: GEOG 472.
Prerequisite(s): SOIL 2110.

SOIL 476. Soil Microbiology
3 Credits (3)
Nature and physiology of soil microorganisms, how they affect plant growth and recycle nutrients. Land farming, bioremediation and other environmental problems as influenced by soil microorganisms. SOIL 2110 and BIOL 311 recommended. Same as BIOL 476.

SOIL 476 L. Soil Microbiology Laboratory
1 Credit (3P)
Enumeration of soil microorganisms, their activities, and transformations they mediate. Same as BIOL 476L.
Prerequisites: SOIL 476 or concurrent enrollment.

SOIL 477. Environmental Soil Physics
3 Credits (3)
A description of the physical characteristics of porous media including soil. Examination of processes describing the transport of water, chemicals, heat and gases through porous media with application to environmental quality, waste management, and crop production.

SOIL 477 L. Environmental Soil Physics Laboratory
1 Credit (1)
Concurrent enrollment with SOIL 477 recommended. Hands on experience with techniques for characterizing soil physical properties such as particle size distribution, bulk density, water retention, hydraulic conductivity and solute transport. Demonstrations of field and laboratory techniques for measuring moisture content, soil water potential, gas/air flow and thermal conductivity.
Prerequisite(s): SOIL 2110.

SOIL 479. Environmental Soil Chemistry
3 Credits (3)
Basic elements of soil chemistry including discussion of clay mineralogy, cation and anion exchange and the chemistry of problem (acid, saline and flooded) soils. Credit not given for both SOIL 424 and SOIL 479.
Prerequisite(s): SOIL 2110L or CHEM 1215G and CHEM 1225G.

SOIL 500. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

SOIL 505. Research Orientation
4 Credits (3+2P)
Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: HORT 505, AGRO 505 and ENVS 505.

SOIL 525. Scientific Writing- How to be a Productive and Effective Writer
1-3 Credits (1-3)
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: AGRO 525, AGRO 625, HORT 525, HORT 625, SOIL 625 and EPWS 525.

SOIL 590. Graduate Seminar
1 Credit (1)
Current research discussions presented by master level graduate students. Not more than one credit toward the degree. Same as AGRO/HORT 590. Crosslisted with: AGRO 590 and HORT 590.

SOIL 596. Masters Proposal
1 Credit (1)
Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, ENVS 596, GENE 596 and HORT 596. Students must be a Master level graduate student to enroll in this course. Restricted to: Masters HORT; Masters PLEN majors.

SOIL 597. University Teaching Experience
1-3 Credits (1-3)
Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: AGRO 597 and HORT 597
SOIL 598. Special Research Programs
1-6 Credits
Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

SOIL 600. Doctoral Research
1-15 Credits
Research.

SOIL 625. Scientific Writing- How to be a Productive and Effective Writer
1-3 Credits (1-3)
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Students in the 625 course will be required to perform additional research than those students in the 525 cross-listing. Crosslisted with: AGRO 525, HORT 525 and EPWS 525.

SOIL 650. Advanced Topics
1-3 Credits
Colloquium on contemporary topics associated with agriculture, environmental science and engineering. Multidisciplinary topics will be chosen to encourage participation of students from diverse disciplines. May be repeated for a maximum of 9 credits.
Prerequisite: consent of instructor.

SOIL 652. Advanced Soil Physics
3 Credits (3)
Advanced treatment of soil physics, modeling, includes working on an existing/new research project, modeling existing or new data, step by step guide on the use of some 1-D and 2-D models. Specific areas of specialization will be field scale variability of soil properties, water flow, solute transport, and plant water relations.
Prerequisite(s): SOIL 477 and computer literacy, or consent of instructor.

SOIL 655. Moisture Heat Contaminant Transport Modeling
3 Credits (3)
Provides clear coverage of the basic principles of heat, moisture and contaminant transport through porous media, and a step-by-step guidance and hands on application on the use of some spreadsheet based and physically based one and two-dimensional transport models. A similar course does not exist in the college for students that can encourage them to pursue modeling as a means of solving vadose zone and groundwater contamination and remediation problems. Consent of instructor required.

SOIL 694. Doctoral Seminar
1 Credit (1)
Current research discussions presented by doctoral level graduate students. Not more than 2 credits toward the degree. Same as AGRO 694.
Prerequisite: doctoral level graduate students.

SOIL 696. Doctoral Proposal
1 Credit (1)
Current research proposal written by doctoral level graduate students. Not more than 1 credit toward the degree. Same as AGRO 696.
Prerequisite: doctoral level graduate students.

SOIL 697. University Teaching Experience
1-3 Credits (1-3)
Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: AGRO 697 and HORT 697

SOIL 698. Topics in Agronomy
1-6 Credits
Topics of current interest, designated by title and credit. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

SOWK-SOCIAL WORK

SOWK 2110G. Introduction to Human Services & Social Work
3 Credits (3)
This course is for students who are interested in social welfare issues and/or are considering entering a social service profession. The course presents an overview of social problems, issues and trends, and the network of social agencies developed to address these concerns. The course examines the influence of personal and professional values and ethics on the helping relationship. The concept of social welfare will be discussed from a social work perspective (with an emphasis on social justice), and students will gain a basic understanding of social work in U.S. society, social work career opportunities, and contemporary issues facing social workers. Approaches relevant to work with individuals, families, groups and communities are presented, with special emphasis on Hispanic and Indigenous populations of New Mexico and the Southwest.

Learning Outcomes
1. Explain the interactions of social institutions, cultural factors, dimensions of identity, and environment with the human development and behavior of individuals.
2. Demonstrate knowledge of the social work profession's focus on addressing contemporary social issues in the United States.
3. Describe the mission and services provided by social service agencies at the regional, national, and global levels.
4. Demonstrate a basic understanding of the social work profession, its history, career opportunities, and contemporary issues facing social workers in the United States today.
5. Recognize how students' knowledge, skills, and attitudes impact their competence as helping professionals.
SOWK 2111. Women's Issues in Social Work
3 Credits (3)
Examines gender-specific social problems and their identification and resolution through the use of social agencies and community resources. Community Colleges only.

Learning Outcomes
1. Understand the commonalities among all women, identifying commonalities and differences among oppressed and dominant groups, recognize multiple oppressions, and respect diversity while conducting social work practice through readings, class discussions, and/or written assignments.
2. Identify the various needs of women as individuals, family members and community members through readings, class discussions, and/or written assignments.
3. Demonstrate skills in working effectively with diverse issues involving women with an emphasis on building strengths, interdependence, self-direction, shared power, and cooperation through experiential exercises, written assignments, companion book, and instructor presentations.
4. Demonstrate skills in addressing issues that affect women such as parental issues, relationship problems, physical abuse, sexual abuse, crime, substance abuse, eating disorders, housing concerns, psychological issues and physical abilities written reports.
5. Understand the importance of and demonstrating skills in caring and empathetic connection in the change process through written assignments, experiential activities in the companion book.
6. Understanding the Importance of the Professionals Self-Care through experiential activities and journaling in the companion book.

SOWK 300. Social Work Practice Skills
3 Credits (3)
Introduction to generalist social work practice. Interpersonal skills, values, and ethics required in the helping relationship. Taught in a small-group format. May be repeated up to 3 credits. Restricted to: S WK majors. Restricted to Las Cruces campus only.

SOWK 301. Orientation to Field
1 Credit (1)
This course will provide an orientation to requirements for a social work field practicum and to establish the transfer of learning between classroom instruction and future practicum skill application. Restricted to: S WK majors.
Corequisite(s): SOWK 300.

SOWK 309. Sociocultural Concepts
3 Credits (3)
Theoretical and sociohistorical perspectives on racism, sexism, ageism, heterosexism, classism, ableism, and other forms of discrimination and oppression. Cultural diversity, strengths, and Southwest and border issues are examined.

SOWK 311. Human Behavior and the Social Environment I
3 Credits (3)
Major theories of human behavior and the life span from conception to adolescence. May be repeated up to 3 credits. Restricted to: S WK majors.

SOWK 312. Human Behavior and the Social Environment II
3 Credits (3)
Continuation of S WK 311. Major theories of human behavior and the life span from young adulthood through old age. Restricted to: S WK majors. Prerequisite(s): SOWK 311.

SOWK 313. Social Work Practice with Individuals
3 Credits (3)
Generalist social work practice theory and skills in engagement, information gathering, assessments, planning, interventions, evaluation, and termination with individual client systems. Restricted to: S WK majors.
Prerequisite(s): SOWK 300.

SOWK 315. Social Work Practice with Families
3 Credits (3)
Generalist social work practice theory and skills in engagement, information gathering, assessments, planning, interventions, evaluation, and termination with multicultural family systems. May be repeated up to 3 credits.
Prerequisite(s): SOWK 300.

SOWK 316. Social Work Research
3 Credits (3)
This undergraduate course is designed to prepare students to be effective consumers of research and to evaluate their own practice. Students will learn to read, critically evaluate and use the research of others to select interventions that are based on evidence of effectiveness. Students will demonstrate the knowledge, values and skills to be critical consumers of research for effective and ethical practice as well as possess the basic skills necessary to evaluate their own social work professional practice. May be repeated up to 3 credits. Restricted to: Restricted to Social Work majors.
Prerequisite(s): STAT 1350G or STAT 2350G.

SOWK 331V. Introduction to Social Policy: History
3 Credits (3)
Historical overview of the economic, political, and cultural impact on social welfare policy, institutions, and professions with international content.

SOWK 401. Field Experience I
3 Credits (3)
Supervised professional practice in a community social service agency, providing experiential learning and instruction. 240 clock hours required. Restricted to: S WK majors. Graded: S/U Grading (S/U, Audit).
Corequisite(s): SOWK 412.

SOWK 403. Social Work Practicum II
3 Credits (3)
This course is a continuation of a supervised professional practice in a community social service agency, providing experiential learning and instruction. 240 clock hours required. Restricted to: S WK majors. Graded: S/U Grading (S/U, Audit).
Corequisite(s): SOWK 419.

SOWK 405. Service Learning
3 Credits (3)
This course introduces students to field work as an essential component of social work education. Students are required to provide a minimum of 40 hours of service to a human services agency. This course will focus on the connection between coursework, field work, the NASW Code of Ethics, and skills needed to work with people.
Prerequisite(s): SOWK 301, SOWK 313.

SOWK 412. Practicum Seminar I
3 Credits (3)
The practicum seminar course will provide students the opportunities to integrate coursework and field practice experience learning to develop social work competencies. Restricted to: S WK majors. Graded: S/U Grading (S/U, Audit).
Corequisite(s): SOWK 401.
SOWK 415. Generalist Social Work Practice with Organizations and Communities
3 Credits (3)
This course focuses on generalist social work values, knowledge and skills regarding practice with larger systems. Course content will include theories of community and organizational assessment and intervention. Strategies for advocacy and change, leadership for community and organizational change. May be repeated up to 3 credits.
Prerequisite(s): SOWK 300, SOWK 313, SOWK 315.

SOWK 416. Generalist Social Work Practice with Groups
3 Credits (3)
Generalist social work practice skills with group client systems focusing on the planned change process and the empowerment of oppressed populations. May be repeated up to 3 credits. Restricted to: SWK majors.

3 Credits (3)
Policy practice related to the formation of current social welfare policies that promote social and economic justice. Emphasis is on the development and influences of social policy, policy analysis, and the policy change process. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: SWK majors.

SOWK 418. Professionalism in the Field of Social Work
3 Credits (3)
Students will use the field experience as the backdrop for assessing their own progress toward entry level generalist social work practice; to integrate coursework and field experience to develop their professional foundation. May be repeated up to 3 credits. Restricted to: SWK majors.
Corequisite(s): SOWK 419.

SOWK 419. Practicum Seminar II
3 Credits (3)
The practicum seminar course will provide students the opportunities to integrate coursework and field practice experience learning to demonstrate social work competencies. May be repeated up to 3 credits. Restricted to: SWK majors. Graded: S/U Grading (S/U, Audit).
Corequisite(s): SOWK 403.

SOWK 443. Family and Child Welfare Practice
3 Credits (3)
Current issues and interventions in child protection, foster care, family preservation and support, family reunification, adoption and permanency planning. Cannot receive credit for SOWK 443 and MSW 543. May be repeated up to 3 credits. Crosslisted with: MSW 543.

SOWK 490. Family and Child Welfare Policy
3 Credits (3)
This course is designed to provide students with an understanding of the history and evolution of child welfare policies, initiatives and factors that influence advocacy and practices within the child welfare system. Child welfare policies and services specific to the state of New Mexico are infused throughout the course. Cannot receive credit for both SOWK 490 and MSW 590 May be repeated up to 3 credits. Crosslisted with: MSW 590.

SOWK 497. Special Topics
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes. May be used as a mandatory practice elective. Restricted to: SWK majors.
Prerequisite(s): Junior or above standing, majors or consent of instructor.

SPAN-SPANISH

SPAN 1110. Spanish I
4 Credits (4)
Designed for students with little exposure to Spanish, this course develops basic listening, speaking, reading, and writing skills and basic intercultural competence in interpretive, interpersonal and presentational modes of communication at the Novice Level of proficiency based on ACTFL guidelines. During this course, students perform better and stronger in the Novice Mid level while some abilities emerge in the Novice High range. This is an introductory course aimed at helping the student to communicate in Spanish in everyday familiar situations via recognition and production of practiced or memorized words, phrases, and simple sentences.

Prerequisite(s): language placement and/or assessment by departmental examination.

Learning Outcomes
1. Students can communicate on very familiar topics using a variety of words and phrases that they have practiced and memorized.
2. Students can present information about myself and some other very familiar topics using a variety of words, phrases, and memorized expressions.
3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.
SPAN 1120. Spanish II
4 Credits (4)
Designed for students with some degree of exposure to Spanish in high school and/or at home, this course continues to develop basic listening, speaking, reading, and writing skills and basic intercultural competence in interpretive, interpersonal and presentational modes of communication based at the Novice High Level of proficiency based on ACTFL guidelines, although a few abilities may emerge in the Intermediate Low Level. Students in this course communicate in Spanish in familiar topics using a variety of words, phrases, simple sentences and questions that have been highly practiced and memorized.
Prerequisite: language placement and/or assessment by departmental examination or a C- or better in SPAN 1110.
Learning Outcomes
1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can present basic information on familiar topics using language they have practiced using phrases and simple sentences.
4. Students can write briefly about most familiar topics and present information using a series of simple sentences.
5. Students can understand the main idea in short, simple messages and presentations on familiar topics.
6. Students can understand the main idea of simple conversations that they overhear.
7. Students can understand the main idea of short and simple texts when the topic is familiar.

SPAN 1210. Elementary Spanish for Heritage Learners I
3 Credits (3)
This is a beginning-level Spanish course designed for students who have a cultural connection to the Spanish language. Some students have had very little exposure to the language and enter the class to develop beginning-level skills. Other students may have grown up hearing the heritage language in the community and may understand some Spanish and speak at a basic level as a result. The objective is to draw upon the connection to the heritage language as a source of motivation and engagement for our learning communities. At the same time, we build upon the language base that students may already have as a result of their heritage learner experience in order to develop new proficiencies in Spanish and reactivate the Spanish that students have learned previously. By the end of this course, students will be able to describe their home, campus surroundings and common activities including cultural traditions. At the same time, students gain cultural competency and develop a critical understanding of their linguistic and cultural background. Students who have previously earned a C or better in SPAN 1110 or SPAN 1120 may not receive credit for this course.
Learning Outcomes
1. Interpersonal Communication: Students can engage in exchanges in culturally appropriate ways using understandable pronunciation on familiar topics using contextualized words, phrases, common idiomatic expressions, and simple sentences.
2. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target language that describes a past/present/future (fictional) event to the reader.
3. Interpretive listening: Students can understand familiar questions and statements from simple sentences in conversations.
4. Interpretive reading: Students can identify the topic and some isolated facts from simplesentences in informational and fictional texts.
5. Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with subsequent courses.
SPAN 1220. Spanish for Heritage Learners II
3 Credits (3)
Spanish as a Heritage Language II is a second semester class designed for students who have developed some basic Spanish proficiency from previous classes and/or from community experiences. This course provides students with the opportunity to develop their proficiency in the four language skills (speaking, listening, reading, and writing). Class activities are designed to strengthen oral communication skills (speaking and listening) through a variety of group activities. By the end of the course students will be able to understand and produce narrations of past events in oral and written Spanish. In order to foster a desire to revitalize and maintain the Spanish language in the US context we attempt to raise students’ critical awareness of what it means to be part of a specific speech community.

Learning Outcomes
1. Interpersonal Communication: Students can engage in basic but authentic conversations through providing and obtaining information, expressing likes and dislikes, describing their daily lives, and narrating simple events in the past.
2. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target language, and that describes a past (fictional) event to the reader.
3. Interpretive listening: can identify the main idea in short conversations.
4. Interpretive reading: Students can identify the topic and related information from simple sentences in short informational and fictional texts.
5. Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with previous and subsequent courses.

SPAN 2110. Spanish III
3 Credits (3)
This course is based on the integration of learning outcomes across Interpersonal, Interpretive, and Presentational Modes of Communication at the Intermediate Low Level of proficiency based on ACTFL guidelines. Students accomplish real-world communicative tasks in culturally appropriate ways as they gain familiarity with the target culture(s). This is an intermediate course aimed at helping the student to communicate in Spanish on familiar topics about self, others and everyday life at the same time that they recognize and handle short social interactions in interactions in everyday situations by asking and answering a variety of questions.

Prerequisite: language placement and assessment by departmental examination or C or better in SPAN 1120.

Learning Outcomes
1. Students can participate in conversations on familiar topics using sentences and series of sentences.
2. Students can handle short social interactions in everyday situations by asking and answering a variety of questions.
3. Students can usually say what they want to say about themselves and their everyday life.
4. Students can make presentations on a wide variety of familiar topics using connected sentences.
5. Students can write on a wide variety of familiar topics using connected sentences.
6. Students can understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
7. Students can understand the main idea in conversations that they overhear.
8. Students can understand the main idea of texts related to everyday life and personal interests or studies.
SPAN 2120. Spanish IV
3 Credits (3)
This course is based on the integration of learning outcomes across Interpersonal, Interpretive, and Presentational Modes of Communication at the Intermediate Low Level of proficiency based on ACTFL guidelines. Students accomplish real-world communicative tasks in culturally appropriate ways as they gain familiarity with the target culture(s). This is an intermediate course aimed at helping the student to communicate in Spanish on familiar topics about self, others and everyday life at the same time that they recognize and handle short social interactions in interactions in everyday situations by asking and answering a variety of questions.
Prerequisite: language placement and assessment by departmental examination or C or better in SPAN 2110.
Learning Outcomes
1. Students can participate with ease and confidence in conversations on familiar topics.
2. Students can usually talk about events and experiences in various time frames.
3. Students can usually describe people, places, and things.
4. Students can handle social interactions in everyday situations, sometimes even when there is an unexpected complication.
5. Students can make presentations in a generally organized way on school, work, and community topics, and on topics they have researched.
6. Students can make presentations on some events and experiences in various time frames.
7. Students can write on topics related to school, work, and community in a generally organized way.
8. Students can write some simple paragraphs about events and experiences in various time frames.
9. Students can easily understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
10. Students can usually understand a few details of what they overhear in conversations, even when something unexpected is expressed.
11. Students can sometimes follow what they hear about events and experiences in various time frames.
12. Students can easily understand the main idea of texts related to everyday life, personal interests, and studies.
13. Students can sometimes follow stories and descriptions about events and experiences in various time frames.

SPAN 2210. Spanish for Heritage Learners III
3 Credits (3)
Intermediate Spanish for Heritage Speakers I is a third semester course designed for students who have been raised in a Spanish-speaking environment and speak, or understand, some Spanish as a result of hearing it in the home, and in the community by family, friends, and neighbors. Students in this course will continue to develop their ability to narrate events in the past and will be able to describe hypothetical situations. Students will also develop their ability to express wishes, desires, and necessities. This course will help the student build confidence in their Spanish abilities and expand the language use in the areas of writing, reading, oral production and listening comprehension. In order to foster a desire to revitalize and maintain the Spanish language we attempt to raise students’ critical awareness of wider issues facing Spanish speakers in the US context.
Learning Outcomes
1. Interpersonal Communication: Students can exchange information on a wide variety of familiar topics in which the students use appropriate vocabulary to describe their daily lives and narrate events in the past with some degree of ease and confidence.
2. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target language, and that effectively conveys a series of past (fictional) events to the reader that may include recent and distant past.
3. Interpretive listening: Students can identify the main idea and key information in short straightforward conversations.
4. Interpretive reading: Students can understand the main idea and key information in short straightforward informational and fictional texts.
5. Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with previous and subsequent courses.

SPAN 305. Topics in Hispanic Civilization
3 Credits (3)
Group study of selected topics focusing on Hispanic culture and civilization. Topics announced in the Schedule of Classes. May be repeated for a maximum of 6 credits.
Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.

SPAN 306. Special Topics
3 Credits (3)
Group study of Spanish for specialized purposes (e.g. court interpreting, professional language for bilingual teachers, technical writing for the business community). Course subtitled in the Schedule of Classes. May be repeated for a maximum of 12 credits.
Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.
SPAN 316. Grammar for Non-Native Speakers of Spanish  
3 Credits (3)  
For students who did not grow up speaking Spanish. A review of the rules of Spanish grammar. Students cannot receive credit for both SPAN 316 and SPAN 318.  
Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.  
Learning Outcomes  
1. Students will be better equipped academically to continue into upper-division Spanish courses. Students will be better equipped to communicate in Spanish by becoming more adept at using a variety of grammatical structures. Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity. Students will gain critical thinking skills as they develop their bilingual abilities. Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 317. Composition for Non-Native Speakers of Spanish  
3 Credits (3)  
For students who did not grow up speaking Spanish. Development of professional and academic writing skills in Spanish. Students cannot receive credit for both SPAN 317 and SPAN 319.  
Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.  
Learning Outcomes  
1. Students will be better equipped academically to continue into upper-division Spanish courses. Students will be better equipped to communicate in written Spanish by employing a more clear and structured writing style. Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity. Students will gain critical thinking skills as they develop their bilingual abilities. Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 318. Grammar for Heritage/Native Speakers of Spanish  
3 Credits (3)  
For students who speak or have been exposed to Spanish at home or in the community. A review of grammatical concepts and analysis of both spoken and written Spanish. Students cannot receive credit for both SPAN 316 and SPAN 318.  
Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.  
Learning Outcomes  
1. Students will be better equipped academically to continue into upper-division Spanish courses. Students will be better equipped to communicate in written Spanish by using a variety of grammatical structures. Students will sharpen their Spanish communication skills, which will assist them in securing employment as bilingual speakers. Students will develop a stronger appreciation for the Spanish communication skills and cultural awareness which will assist them in contributing to their communities in meaningful ways. Students will gain critical thinking skills as they sharpen their bilingual abilities.

SPAN 319. Composition for Heritage/Native Speakers of Spanish  
3 Credits (3)  
For students who speak or have been exposed to Spanish at home or in the community. Development of writing strategies, styles and techniques in the Spanish language. Students cannot receive credit for both SPAN 317 and SPAN 319.  
Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.  
Learning Outcomes  
1. Students will be better equipped academically to continue into upper-division Spanish courses. Students will be better equipped to communicate in written Spanish by employing a more clear and structured writing style. Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity. Students will gain critical thinking skills as they develop their bilingual abilities. Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 325. Advanced Conversation  
3 Credits (3)  
Intensive oral practice. Not open to heritage/native speakers of Spanish.  
Prerequisite(s): SPAN 2120 or consent of instructor.

SPAN 327. Spanish in the Community  
3 Credits (3)  
Emphasis on use of Spanish outside the classroom in the local communities. Activities include but are not limited to oral histories, language mentoring in schools, assisting with cultural activities and language research.  
Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.  
Learning Outcomes  
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn how to apply bilingual and bicultural skills to serve the community.

SPAN 330. Variations in Spanish  
3 Credits (3)  
The study of social variation within the Spanish language, examining both social and linguistic factors that affect language change.  
Prerequisite: SPAN 316 or SPAN 318 or consent of instructor.  
Learning Outcomes  
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts related to linguistic variations. Students will learn about variations in the Spanish language and how to apply these ideas to a greater linguistics body of knowledge.
**SPAN 340. Introduction to Spanish Linguistics**
3 Credits (3)
General aspects of Spanish linguistics: traditional, descriptive, historical and dialectal.
**Prerequisite:** SPAN 316 or SPAN 318 or consent of instructor.
**Learning Outcomes**
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts related to Spanish linguistics. Students will learn about a wide range of linguistics topics and how to apply these ideas to a greater linguistics body of knowledge.

**SPAN 350. Introduction to Chicano Studies**
3 Credits (3)
Covers Mexican-American life including language, history, education, politics and literature.
**Learning Outcomes**
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Chicano Studies. Students will learn about various Chicano cultural and historical themes and how they affect the Chicano community today.

**SPAN 352. Spanish in Social Contexts**
3 Credits (3)
The study of Spanish in the contexts of the societies in which it is spoken.
**Prerequisite:** SPAN 316 or SPAN 318 or consent of instructor.
**Learning Outcomes**
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts related to linguistics and social contexts. Students will learn about a Spanish in social contexts and how to apply these ideas to a greater linguistics body of knowledge.

**SPAN 353. Spanglish**
3 Credits (3)
Covers lexical borrowing, code choice, language loss and maintenance, and bilingual cognition.
**Prerequisite:** SPAN 316 or SPAN 318 or consent of instructor.
**Learning Outcomes**
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts related to Spanglish. Students will learn about the formation and social context of Spanglish and how to apply these ideas to a greater linguistics body of knowledge.

**SPAN 355V. Culture and Civilization of Mexico**
3 Credits (3)
Familiarization with culture, civilization and regions of Mexico. History, geography, art, literature, folklore, customs, economics and politics of each region. Impact of Mexican culture and civilization on the Southwest United States. Taught in English. Does not satisfy Arts and Sciences second language requirement.

**SPAN 361. US-Mexico Border Culture & Literature**
3 Credits (3)
Study of major authors and/or cultural trends in the U.S.-Mexico border. Selected subject to be identified by subtitle in the Schedule of Classes. May be repeated up to 6 credits.
**Learning Outcomes**
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of border literature and culture. Students will learn about the value of US-Mexico border culture and literature and how they help form unique border communities.

**SPAN 364V. Culture and Civilization of Mexico**
3 Credits (3)
Familiarization with culture, civilization and regions of Mexico. History, geography, art, literature, folklore, customs, economics and politics of each region. Impact of Mexican culture and civilization on the Southwest United States. Taught in English. Does not satisfy Arts and Sciences second language requirement.

**SPAN 365V. Culture and Civilization of Spanish America**
3 Credits (3)
Familiarization with culture, civilization and regions of Spanish America. Study of history, geography, art, literature, folklore, customs, economics and politics of each region. Impact of Spanish American culture and civilization on the Southwest United States. Taught in English. Does not satisfy College of Arts and Sciences second language requirement.
SPAN 380. Introduction to Hispanic Literature
3 Credits (3)
Works in Spanish, all genres and periods. How to read literature in all forms.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Hispanic literature. Students will read foundational Hispanic texts of various genres and periods and learn how they create and inform Hispanic histories, identities, and nations.

SPAN 385. Introduction to Chicano/US-Mexican Literature
3 Credits (3)
Introduction to the study of major works by Chicano/US-Mexican authors.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Chicano literature. Students will read foundational Chicano texts of various genres and learn how they create and sustain a national Chicano consciousness.

SPAN 388. Contemporary Hispanic Literature
3 Credits (3)
Study of Peninsular and Spanish-American literature from the 20th century to the present.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Hispanic literature. Students will read foundational Hispanic texts of various genres from the 20th and 21st centuries and learn how they create and inform Hispanic histories, identities, and nations.

SPAN 389. Independent Studies in Literature, Language, or Culture
1-3 Credits
Individualized, self-paced projects for advanced students. Students must present formal proposal of study.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms, concepts, and strategies related to translation and interpretation. Students will learn how to translate written texts and/or interpret live communication between the Spanish and English languages. However, other languages may be included at instructor’s discretion.

SPAN 393. Introduction to Translation and Interpretation
3 Credits (3)
General aspects of translation and interpretation from English to Spanish and Spanish to English. Selected subject to be identified by subtitle in the Schedule of Classes.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms, concepts, and strategies related to translation and interpretation. Students will learn how to translate written texts and/or interpret live communication between the Spanish and English languages. However, other languages may be included at instructor’s discretion.

SPAN 411. Creative Writing
3 Credits (3)
Creative writing in Spanish.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of creative writing and the publication process. Students will read and learn about the process and types of creative writing and publication, how to create original texts, and how to edit and publish creating works.
SPAN 412. Spanish-American Poetry
3 Credits (3)
Study of major works by Spanish-American poets.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of the poetry genre. Students will read foundational Hispanic poetry from different periods and learn how poets and poetry create and inform Hispanic histories, identities, and nations.

SPAN 415. Spanish-American Women Writers
3 Credits (3)
All genres of Spanish-American literature written by women.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of female/feminist literature. Students will read foundational Hispanic literary production by women writers from different periods and various genres and learn how these writers create and reimagine personal and communal identities, histories, and knowledge.

SPAN 416. Nineteenth Century Spanish-American Literature
3 Credits (3)
Study of major works by Spanish-American authors of the 19th century.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Spanish-American literature. Students will read foundational Hispanic texts of various genres from the 19th century and learn how they create and inform Hispanic histories, identities, and nations.

SPAN 418. Spanish-American Short Story
3 Credits (3)
Study of major short stories by Spanish-American authors.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of the short story genre. Students will read foundational Hispanic short stories from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 419. Spanish American Drama
3 Credits (3)
Study of major works by Spanish-American dramatists.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of the drama genre. Students will read foundational Hispanic short stories from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 420. The Art of Storytelling
3 Credits (3)
The study of the genesis of storytelling and its structure, learning how and why to apply oral storytelling in our personal and professional lives, and practicing the art of storytelling in front of an audience.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of oral storytelling and the significance of this skill in creating personal and national narratives. Students will learn how to write and present original oral stories, myths, and other forms of oral storytelling for a public audience.
Learning Outcomes
Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of post-modernism, especially in relation to Hispanic literary production. Students will read a variety of post-modern Hispanic texts from various genres and learn how they help develop regional and national identities.

SPAN 21. New Mexico Culture and Literature
3 Credits (3)
The study of the development and flourishing of New Mexican culture and literature.
Prerequisite: SPAN 380 or consent of instructor.

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn about key cultural, literary, and historical elements of New Mexico. Students will learn how to apply knowledge about New Mexico to serve their communities.

SPAN 22. Cultural Production of Hispanic Revolutions and Wars
3 Credits (3)
The study of Hispanic literature, art, and film dealing with revolutionary movements and wars.
Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of revolutions and wars as they relate to literary production and other modes of cultural expression. Students will learn about various revolutions and wars throughout Spain and Latin America and how they have helped form our regional and national identities, especially through a cultural production lens.

SPAN 24. Post-Modern Hispanic Literature
3 Credits (3)
The study of Post-Modern experimental literary genres, from Post-boom to the present.
Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of post-modernism, especially in relation to Hispanic literary production. Students will read a variety of post-modern Hispanic texts from various genres and learn how they help develop regional and national identities.

SPAN 380 or consent of instructor.

SPAN 26. Spanish-American Novel
3 Credits (3)
Study of major works by Spanish-American novelists.
Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of the novel genre. Students will read foundational Hispanic novels from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 27. Chicano Literature
3 Credits (3)
Study of Chicano/US-Mexican authors.
Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop advanced comprehension of the terms and concepts of Chicano literature. Students will read foundational Chicano texts of various genres, but with a focus on narratives, and learn how they create and sustain a national Chicano consciousness.

SPAN 39. Topics in Applied Spanish Linguistics
3 Credits (3)
Group study of selected topics to be identified by subtitle in the Schedule of Classes. May be repeated once under different subtitle for a maximum of 6 credits.
Prerequisite: SPAN 340.

SPAN 42. Formacion de Identidades Nacionales Hispanicas
3 Credits (3)
Study of seminal texts on the formation of Hispanic national identities and counternarratives against homogenous notions of nationhood.
Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of the novel genre. Students will read foundational Hispanic novels from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 442. Formation of Hispanic National Identities
3 Credits (3)
Study of Chicano texts of various genres, but with a focus on narratives, and learn how they create and sustain a national Chicano consciousness.
SPAN 444. Body Studies
3 Credits (3)
Interdisciplinary study of the body in Hispanic societies and others and its associated political meaning.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how the Hispanic body became a cultural and political object and how it is changing by the means of new media. Analyze how the understanding of the Hispanic body has changed throughout history and how local politics affect it. Learn how the body has served as the locus of culture and the principle of social interaction and politics.

SPAN 446. Speculative Fiction
3 Credits (3)
Study of Hispanic speculative fiction and its related utopian/dystopian societies.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how social anxieties produced a Hispanic literary corpus to deal with the past, the present, and the future. Analyze and compare how genre fiction challenges or supports hegemonic national discourses. Learn how speculative fiction serves as an expression of social desires.

SPAN 447. Hispanic Film
3 Credits (3)
Study of major films from Spain and Spanish-America. Restricted to: Main campus only.

SPAN 448. U.S.-Hispanic Film
3 Credits (3)
Study of major films about and/or by Hispanics of the U.S. Restricted to: Main campus only.

SPAN 449. Special Problems
1-3 Credits
Directed reading for graduate students in their specific fields to satisfy language requirement for master's or doctoral programs. May be repeated for a maximum of 6 credits.

SPAN 451. Hispanic Cultures
3 Credits (3)
Issues in Hispanic cultures of the U.S., Spanish-America and Spain. Also focuses on U.S.-Mexico border culture. Selected topics to be identified by subtitle in the Schedule of Classes.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn about various modes of Hispanic cultural production and how they create regional and national Hispanic identities.

SPAN 457. Strategies for Teaching Spanish for Heritage/Native Speakers
3 Credits (3)
Overview of the main theories, reasearch, pedagogical approaches, assessment and practice concerning the teaching of Spanish to heritage learners and native speakers. Taught with SPAN 597.
Prerequisite: SPAN 317 or SPAN 319 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop advanced comprehension of the terms and concepts related to the study and application of Spanish for Heritage/Native Speakers of Spanish. Students will learn how to become more effective teachers of Spanish for Heritage/Native Speakers of Spanish.

SPAN 461. Introduction to Spanish Phonetics
3 Credits (3)
An introduction to Spanish phonetics including basic dialectal variation and comparison with English.
Prerequisite: SPAN 340.

SPAN 474. Pragmatics
3 Credits (3)
The study of theory and pragmatic notions such as implicatures, presuppositions, deixis, speech acts, and politeness.
Prerequisite(s): SPAN 340.

SPAN 476. Semantics
3 Credits (3)
The investigation of language from a semantic-pragmatic perspective and the use of formal logic to communicate meaning.
Prerequisite(s): SPAN 340.

SPAN 478. Spanish and Language Contact
3 Credits (3)
The study of several areas of language in contact with Spanish, including cases in Europe, Africa and the Americas.
Prerequisite(s): SPAN 340.

SPAN 483. Literature and Law
3 Credits (3)
The advanced study of Latin American and Latino literature and its historical and cultural connections to the development of laws and the influence of both on modern society.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of legal themes as found in literature. Students will read foundational Hispanic texts of various genres and learn how they create a narrative that embodies or implies legal issues that affect the Hispanic community.
**SPAN 485. Literature and Mental Health**
3 Credits (3)
The advanced study of Latin American and Latino literature and how storytelling, through various literary genres, can inform our understanding of mental health issues and propose possible solutions to improve our quality of mental health.

**Prerequisite:** SPAN 380 or consent of instructor.

**Learning Outcomes**
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of mental health themes as found in literature. Students will read foundational Hispanic texts of various genres and learn how they create a narrative that embodies or implies mental health issues that affect the Hispanic community.

**SPAN 490. Special Topics**
3 Credits (3)
Selected topic to be identified by subtitle in the Schedule of Classes.

**Prerequisite:** SPAN 316 or SPAN 318 or consent of instructor.

**Learning Outcomes**
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn about various topics of Hispanic literature or linguistics that can be applied to advanced research projects.

**SPAN 491. History of the Spanish Language**
3 Credits (3)
The development of Spanish from its origins.

**Prerequisite(s):** SPAN 340.

**SPAN 492. Structure of Spanish**
3 Credits (3)
Topics in Spanish linguistics including phonology, morphology, syntax and semantics.

**Prerequisite:** SPAN 316 or SPAN 318 or SPAN 340.

**Learning Outcomes**
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn about the formation of the structure of Spanish and how to apply these ideas to a greater linguistics body of knowledge.

**SPAN 493. Espanol de los Estados Unidos**
3 Credits (3)
Linguistic issues and studies of U.S. Spanish-speaking communities.
Taught with SPAN 593. May be repeated up to 3 credits.

**Prerequisite(s):** SPAN 340.

**SPAN 490. Special Topics**
3 Credits (3)
Selected topic to be identified by subtitle in the Schedule of Classes.

**Prerequisite:** SPAN 316 or SPAN 318 or consent of instructor.

**Learning Outcomes**
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of mental health themes as found in literature. Students will read foundational Hispanic texts of various genres and learn how they create a narrative that embodies or implies mental health issues that affect the Hispanic community.

**SPAN 490. Special Topics**
3 Credits (3)
Selected topic to be identified by subtitle in the Schedule of Classes.

**Prerequisite:** SPAN 316 or SPAN 318 or consent of instructor.

**Learning Outcomes**
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn about various topics of Hispanic literature or linguistics that can be applied to advanced research projects.

**SPAN 491. History of the Spanish Language**
3 Credits (3)
The development of Spanish from its origins.

**Prerequisite(s):** SPAN 340.

**SPAN 492. Structure of Spanish**
3 Credits (3)
Topics in Spanish linguistics including phonology, morphology, syntax and semantics.

**Prerequisite:** SPAN 316 or SPAN 318 or SPAN 340.

**Learning Outcomes**
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn about the formation of the structure of Spanish and how to apply these ideas to a greater linguistics body of knowledge.

**SPAN 493. Espanol de los Estados Unidos**
3 Credits (3)
Linguistic issues and studies of U.S. Spanish-speaking communities.
Taught with SPAN 593. May be repeated up to 3 credits.

**Prerequisite(s):** SPAN 340.

**SPAN 500. Methods of Research and Literary Criticism**
3 Credits (3)
Advanced methods of research and literary criticism.

**SPAN 507. Technology Enhanced Language Learning**
3 Credits (3)
Strategies for enhancing language learning with emerging technologies. Course is taught in Spanish.

**SPAN 508. Teaching Literature with Technology**
3 Credits (3)
Strategies and techniques for enhancing the teaching of all literature genres using emerging technologies. Course is taught in Spanish. Co/

**SPAN 509. Teaching Culture with Technology**
3 Credits (3)
Strategies and techniques for enhancing the teaching of culture using emerging technologies. Course is taught in Spanish. Co/

**SPAN 510. Assessing the National Standards**
3 Credits (3)
Analysis of the National Standards for Foreign Language Learning (the 5 Cs) in the 21st Century. Course will also cover the Integrated Performance Assessment as applied to the national standards. Other assessments will be reviewed to evaluate effectiveness in all levels of Spanish language classrooms.

**SPAN 512. Contemporary Spanish-American Poetry**
3 Credits (3)
Readings and interpretation of Spanish-American poetry from the 20th century to the present.

**SPAN 520. Adv. The Art of Storytelling**
3 Credits (3)
The study of the genesis of storytelling and its structure, learning how and why to apply oral storytelling in our personal and professional lives, and practicing the art of storytelling in front of an audience.

**Learning Outcomes**
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts of storytelling and the significance of this skill in creating personal and national narratives. Students will learn how to write and present original oral stories, myths, and other forms of oral storytelling for a public audience.

**SPAN 521. Advanced Culture and Literature of New Mexico**
3 Credits (3)
The advanced study of the development and flourishing of New Mexican culture and literature.
SPAN 522. Adv. Cultural Production of Hispanic Revolutions and Wars
3 Credits (3)
The study of Hispanic literature, art, and film dealing with revolutionary movements and wars.

Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of revolutions and wars as they relate to literary production and other modes of cultural expression. Students will learn about various revolutions and wars throughout Spain and Latin America and how they have helped form regional and national identities, especially through a cultural production lens.

SPAN 528. Advanced U.S. Latino Culture and Literature
3 Credits (3)
The advanced study of major works by Latino writers in the U.S.

SPAN 540. Introduccion a la Linguistica
3 Credits (3)
Introduces students to the foundational topics of linguistic study with particular reference given to the Spanish language: properties of language and communication, morphology, syntax, phonetics, phonology, language variation and change.
Prerequisite(s): Eligibility to take graduate level courses.

3 Credits (3)
Study of seminal texts on the formation of Hispanic national identities and counter-narratives against homogenous notions of nationhood.

Learning Outcomes
1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how Hispanic identities were formed through various narrative practices and how that informs media representations of Hispanic people and culture. Analyze how Hispanic identities were formed and with what motivations. Assess national narratives and counter-narratives to understand their political-social worlds better.

SPAN 544. Adv. Body Studies
3 Credits (3)
Interdisciplinary study of the body in Hispanic societies and others and its associated political meaning.

Learning Outcomes
1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how the inclusive body became a cultural and political object and how it is changing by the means of new media. Analyze how the understanding of the Hispanic body has changed throughout history and how local politics affect it. Learn how the body has served as the locus of culture and the principle of social interaction and politics.

SPAN 545. Advanced Dialectos del Espanol
3 Credits (3)
Advanced research of Spanish dialects including their formal characteristics, historical formation and regional variation.

SPAN 546. Adv. Speculative Fiction
3 Credits (3)
Study of Hispanic speculative fiction and its related utopian/dystopian societies.

Learning Outcomes
1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how social anxieties produced a Hispanic literary corpus to deal with the past, the present, and the future. Analyze and compare how genre fiction challenges or supports hegemonic national discourses. Learn how speculative fiction serves as an expression of social desires.

SPAN 547. Advanced Hispanic Film
3 Credits (3)
Advanced study of major films from Spain and Spanish-America. Restricted to: Main campus only.

SPAN 548. Advanced U.S.-Hispanic Film
3 Credits (3)
Advanced study of major films about and/or by Hispanics of the U.S. Restricted to: Main campus only.

SPAN 550. Advanced Chicana and Chicano Studies
3 Credits (3)
Multidisciplinary examination of issues that have historically affected/influenced the Chicana/o community regionally, in the borderlands, and beyond borders.

Learning Outcomes
1. Students will become better equipped to teach this material at the high school or community college levels.
2. Students will become better equipped to attend a PhD program in a related field.
3. Students will gain access to a more diverse curriculum which broaden their educational and cultural perspectives.
4. Students will be able to develop their scholarship on a more creative level.
5. Students will strengthen their academic writing, which will help in their graduate studies and/or post-graduate careers.

SPAN 551. Advanced Hispanic Cultures
3 Credits (3)
Advanced study on Hispanic cultures of the U.S., Spanish-America and/or Spain. Selected topic to be identified by subtitle. Taught with SPAN 451. May be repeated up to 6 credits.

SPAN 552. Advanced Literature of the Mexican Revolution
3 Credits (3)
Study of Mexican authors dealing with the Mexican Revolution. Restricted to: Main campus only.

SPAN 558. Bilinguismo
3 Credits (3)
Examines the topics of bilingualism from a psycholinguistic perspective including the development of the bilingual brain, lexical acquisition, retrieval and storage, and experimental techniques in measuring language competence.
Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 561. Advanced Spanish Phonetics
3 Credits (3)
Advanced study of Spanish phonetics, including basic dialectal variation and comparisons with English.
SPAN 562. Advanced Spanish Phonology
3 Credits (3)
An advanced formal examination of the sound system of Spanish including formal characterizations, dialectal variation and laboratory data. May be repeated up to 3 credits.
Prerequisite(s): SPAN 561 or consent of instructor.

SPAN 563. Advanced Study in Mexican Literature
3 Credits (3)
Mexican literature from the Pre-Columbian period to the present.

SPAN 564. Advanced Post-Modern Hispanic Literature
3 Credits (3)
The advanced study of Post-Modern experimental literary genres, from Post-boom to the present.

SPAN 566. Contemporary Spanish-American Novel
3 Credits (3)
The Spanish-American novel from the 20th century to the present.

SPAN 567. Advanced Study in Chicano Literature
3 Credits (3)
Study of all genres of Chicano literature.

SPAN 570. Advanced Study in Technical Translation
3 Credits (3)
Translation of a variety of non-literary texts from English to Spanish and from Spanish to English. Course is taught in Spanish.

SPAN 573. Advanced Study in Creative Writing
3 Credits (3)
Advanced creative writing in Spanish.

SPAN 574. Advanced Pragmatics
3 Credits (3)
The study of theory and pragmatic notions such as implicatures, presuppositions, deixis, speech acts, and politeness.
Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 576. Advanced Semantics
3 Credits (3)
The investigation of language from a semantic-pragmatic perspective and the use of formal logic to communicate meaning.
Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 578. Adv Spanish and Language Contact
3 Credits (3)
The study of several areas of language in contact with Spanish, including cases in Europe, Africa, and the Americas.
Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 580. Research Methodology in Spanish Linguistics
3 Credits (3)
Study and practical application of techniques in linguistic research.

SPAN 583. Advanced Study in Spanish-American Women Writers
3 Credits (3)
All genres of Spanish-American literature written by women. Research paper required.

SPAN 584. Spanish Morphosyntax
3 Credits (3)
Examination of the morphological and syntactic structure of the Spanish language as well as their interaction. Practical applications are also explored.

SPAN 586. Contemporary Spanish-American Essay
3 Credits (3)
Main currents in the Spanish-American thought from the 20th century to the present.

SPAN 587. Contemporary Spanish-American Short Story
3 Credits (3)
The Spanish-American short story from the 20th century to the present.

SPAN 588. Contemporary Spanish-American Drama
3 Credits (3)
The Spanish-American drama from the 20th century to the present.

SPAN 589. Spanish Sociolinguistics
3 Credits (3)
Relationship between language and society in the Spanish-speaking world.

SPAN 590. Advanced Special Topics
3 Credits (3)
Specific subject to be announced in the Schedule of Classes. May be repeated up to 6 credits.

SPAN 591. Advanced Study in History of the Spanish Language
3 Credits (3)
The development of Spanish from its origins.

SPAN 592. Advanced Structure of Spanish
3 Credits (3)
Advanced study of Spanish linguistics topics such as phonology, morphology, syntax and semantics.

SPAN 594. Theory and Methodology of Spanish Pedagogy
3 Credits (3)
Advanced studies in current theories and methodologies of Spanish language pedagogy. Taught as a practicum.

SPAN 595. Advanced Topics in Applied Spanish Linguistics
3 Credits (3)
Selected topics to be identified by subtitle in the Schedule of Classes. May be repeated for a total of 9 credits under a different subtitle.

SPAN 596. Contemporary Spanish-American Short Story
3 Credits (3)
The Spanish-American short story from the 20th century to the present.

SPAN 597. Advanced Strategies for Teaching Spanish for Heritage/Native Speakers
3 Credits (3)
Advanced overview of the main theories, research, pedagogical approaches, assessment and practice concerning the teaching of Spanish to heritage learners and native speakers.

SPAN 598. Independent Reading, Research, and/or Creative Writing
1-3 Credits
Individual study of selected readings and problems; or individual research, either analytical or experimental, or creative writing. May be repeated for unlimited credits.

SPAN 599. Master’s Thesis
15 Credits
Thesis.

SPED-SPECIAL EDUCATION

SPED 2130. Society
3 Credits (3)
Development of culturally responsive learning strategies, skills and utilization of support services, to enhance academic achievement. Restricted to: Main campus only.

SPED 2996. Topics
3 Credits (3)
Offered under various subtitles that indicate the subject matter to be covered. May be repeated 3 times for a maximum of 9 credits.

Learning Outcomes
1. Varies
SPED 350. Introduction to Special Education in a Diverse Society
3 Credits (3)
Characteristics, identification, and educational needs of exceptional learners. Attention is given to the various types of programs serving exceptional learners. Designed for all professional personnel who work with exceptional learners.

SPED 355. Introduction to Bilingual/Multicultural Special Education
3 Credits (3)
Introduction to issues related to the provision of services to culturally and linguistically diverse students with exceptionalities. May be repeated up to 3 credits. Crosslisted with: BLED 355.

SPED 360. Elementary Curriculum, Methods, and Materials for Special Education in a Diverse Society
3 Credits (3)
Curriculum theory and development for special education programs. Various teaching methods utilized with elementary exceptional learners and techniques involved in identifying, adapting, and developing materials will be addressed.

SPED 406. High Incidence Disabilities in a Diverse Society
3 Credits (3)
Examines those areas of disability that most frequently occur in the special education population, including mental retardation, learning disabilities, communication disorders, and behavioral and emotional disorders.

SPED 407. Low Incidence Disabilities in a Diverse Society
3 Credits (3)
Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations.

SPED 409. Reading for Elementary Exceptional Learners in a Diverse Society, K-6
3 Credits (3)
Emphasizes reading diagnosis and materials for students with special developmental and learning problems. Taught with SPED 509.

SPED 411. Reading for Elementary Exceptional Learners in a Diverse Society, 7-12
3 Credits (3)
Extends information covered in SPED 509, which covers grades K-6. Strategies and materials are addressed.

SPED 450. Working with Young Children with Special Needs, Ages 3-8
3 Credits (3)
Addresses competencies for working with young children with exceptionalities, ages three-eight, and their families. Public school, private school, Head Start and other models are included. Taught with SPED 550. Restricted to: TEP-ECED majors. May be repeated up to 3 credits.

Prerequisite: SPED 350.
Corequisite: SPED 451.

Learning Outcomes
1. Demonstrate knowledge of the significance of individual differences in development and learning.
2. Demonstrate knowledge of how certain differences may be associated with rate of development and developmental patterns associated with developmental delays or specific disabilities. Demonstrate knowledge of the similarities between children who are developing typically and those with diverse disabilities.

SPED 451. Assessment of Young Children, Birth-Eight
3 Credits (3)
Covers instruments and procedures for assessing young children and their families in order to determine atypical development. Screening, diagnosis, program planning, placement and evaluation issues are covered.

Prerequisite: SPED 350.
Corequisite: SPED 450.

Learning Outcomes
1. Understand the technical aspects of early childhood assessments
2. Conduct and utilize assessments
3. Collaborate with other professionals

SPED 459. Classroom Management for Diverse Learners
3 Credits (3)
Behavior-change strategies for exceptional learners.

SPED 460. Working with Young Children with Special Needs, Ages 3-8
3 Credits (3)
Addresses competencies for working with young children with exceptionalities, ages three-eight, and their families. Public schools, private schools, Head Start, and other models are included. Intended for Zero to Four degree-seeking majors and ECED minors.

Prerequisite: SPED 350.
Corequisite: SPED 461.

Learning Outcomes
1. Demonstrate knowledge of the significance of individual differences in development and learning
2. Demonstrate knowledge of how certain differences may be associated with rate of development and developmental patterns associated with developmental delays or specific disabilities.

SPED 461. Assessment of Young Children, Birth-Eight
3 Credits (3)
Covers instruments and procedures for assessing young children and their families in order to determine atypical development. Screening, diagnosis, program planning, placement and evaluation issues are covered. Intended for Zero to Four degree seeking majors and ECED minors. May be repeated up to 3 credits.

Prerequisite: SPED 350.
Corequisite: SPED 460.

Learning Outcomes
1. Understands the technical aspects of early childhood assessments
2. Conduct and utilize assessments
3. Collaborate with other professionals

SPED 463. Introduction to Assessment of Diverse Exceptional Learners
3 Credits (3)
Theory and use of norm and criterion-referenced instruments and learning theories in the classroom; planning of prescriptive instructional programs.

SPED 480. Secondary Curriculum, Methods, and Materials for Special Education in a Diverse Society
3 Credits (3)
Curriculum theory and development for elementary special education programs. Various teaching methods utilized with secondary exceptional learners and techniques for identifying, adapting, and developing materials will be addressed. Taught with SPED 580.
SPED 481. Practicum in Education, Equity and Cultural Diversity
3 Credits (3)
This is a supervised experience in providing special education services to local preK-12 students. In the context of the public school classroom, teacher candidates are guided to apply content knowledge from the seminar meetings and from prior coursework. Restricted to: SPED majors.
Prerequisite(s): SPED 350 and SPED 360 or consent of instructor.

SPED 482. Student Teaching SPED
12 Credits (12)
Supervised teaching in a special education classroom and participation in a required seminar. Restricted to: SPED majors.
Prerequisite(s): SPED 481 and admission to student teaching.

SPED 483. Early Childhood SPED Student Teaching
9 Credits (9P)
Synthesis of knowledge and skills appropriate to teaching in PreK - 3rd grade educational settings. Restricted to: TEP-ECED majors. Grading (S/U, Audit). Students must be Admitted into student teaching.
Learning Outcomes
1. Varies

SPED 485. Introduction to Autism
3 Credits (3)
This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and family issues. Taught with SPED 585 and SPED 685.

SPED 486. Behavior and Autism
3 Credits (3)
This course will cover the first of the triad of impairments. Students will gain an understanding of the behaviors of children with autism. Students will examine several behavior management philosophies and research based interventions and how they can be applied in the educational setting. Attention will also be given to play skills. The family perspective and participation in the proactive behavior management process will be incorporated throughout the course. Taught with SPED 586 and SPED 686 with differentiated assignments.
Prerequisite(s)/Corequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 487. Social Skills and Autism
3 Credits (3)
This course will cover the second of the triad of impairments. As a blend of research based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for children functioning at a variety of levels along the autism spectrum. Taught with SPED 587 and SPED 687 with differentiated assignments.
Prerequisite(s)/Corequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 488. Communication and Autism
3 Credits (3)
This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 588 and SPED 688 with differentiated assignments.
Prerequisite(s): SPED485 or SPED585 or SPED685.

SPED 489. Topics
3 Credits (3)
Offered under various subtitles which indicate the subject matter to be covered. May be repeated 3 times for a maximum of 9 credits.

SPED 495. Directed Study courses in Special Education
1-3 Credits
Each course shall be identified by a qualifying subtitle. A maximum of 3 credits per semester and a grand total of 9 credits.

SPED 500. Introduction to Special Education in a Diverse Society
3 Credits (3)
This course introduces the field of special education to regular educators.

SPED 501. Topics in Special Education
1-3 Credits
Offered under various subtitles which indicate the subject matter to be covered. Maximum of 6 credits, 3 credits per semester.

SPED 502. Problems
1-3 Credits
Offered under various subtitles which indicate the subject matter to be covered. Maximum of 6 credits, 3 credits per semester.

SPED 504. Introduction to Assessment of Diverse Exceptional Learners
3 Credits (3)
Required for students seeking licensure at graduate level. Theory and use of norm-and criterion-referenced instruments and learning theories in the classroom; planning of prescriptive instructional programs with differentiated assignments for graduate students. Crosslisted with: SPED 463. Restricted to: SPED majors.

SPED 506. High Incidence Disabilities in a Diverse Society
3 Credits (3)
Examines those areas of disability that most frequently occur in the special education population, including mental retardation, learning disabilities, communication disorders, and behavioral and emotional disorders.

SPED 507. Low Incidence Disabilities in a Diverse Society
3 Credits (3)
Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations. Taught with SPED 607 with differentiated assignments.

SPED 509. Reading for Elementary Exceptional Learners in a Diverse Society, K-6
3 Credits (3)
Emphasizes reading diagnosis and materials for students with special developmental and learning problems. Taught with SPED 409.

SPED 510. Current Issues in Special Education for Teaching in Culturally Responsive Society
3 Credits (3)
Theoretical and empirical bases for special education practices. Skill development in critical thinking, reading, and writing in relation to contemporary problems. Taught with SPED 610.

SPED 511. Reading for Secondary Exceptional Learners in a Diverse Society, 7-12
3 Credits (3)

SPED 513. Current Research in Special Education
3 Credits (3)
Current investigations and research techniques.
SPED 522. Practicum in Reading Disabilities
3 Credits (3)
Supervised experience in assessing a student with reading disability, developing and intervention plan, and implementing and monitoring the interventions across time.

SPED 523. Advanced Curriculum for Diverse Exceptional Learners
3 Credits (3)
Strategies for developing curricula appropriate to handicapped and gifted learners.

SPED 532. Foundations of Visual Impairment
3 Credits (3)
This course provides an overview of the history and theory of teaching students with visual impairments, including those with additional disabilities. The impact of educational, legislative, and societal trends on the psychosocial adjustment, quality of life, and post-school outcomes of individuals with visual impairments is explored. Taught with SPED 452 and SPED 632 with differentiated assignment.

SPED 533. Functional Implications of Low Vision
3 Credits (3)
This course examines the structure and function of the visual system in relation to associated diseases and syndromes with an emphasis on measuring functional vision and determining appropriate educational adaptations. Taught with SPED 453 and SPED 633.

SPED 534. Strategies for Teaching Students with Visual and Multisensory Impairments
3 Credits (3)
This course defines the roles and responsibilities of the teacher of students with visual impairments as part of the transdisciplinary team that serves students with visual impairments and additional disabilities. Emphasis is on assessment, curricula (both academic and functional), communication, behavior management, assistive technologies, inclusion, transition, and independent living. Taught with SPED 454 and SPED 634.
Prerequisite(s): SPED 533.

SPED 536. Braille I: Literacy for Students with Visual Impairments
3 Credits (3)
This course facilitates an in depth study of the Uncontracted and Contracted Literary Braille codes as well as methods of teaching pre-braille, braille reading, and braille writing skills to tactual learners. Taught with SPED 455 and SPED 636.

SPED 537. Independent Readings in Special Education
1-3 Credits
Each course shall be identified by a qualifying subtitle. Maximum of 6 credits, 3 credits per semester.

SPED 538. Braille II: Numeracy for Students with Visual Impairments
3 Credits (3)
This course facilitates an in depth study of the Nemeth Braille Code for Mathematics and Science Notation as well as instructional strategies for using the abacus and developing numeracy. Specialized braile codes for computers, music, and foreign languages will be introduced. Taught with SPED 457 and SPED 638 with differentiated assignments.
Prerequisite(s): SPED 455 or SPED 536 or SPED 636 consent of instructor.

SPED 539. Strategies for Teaching Students with Visual Impairments
3 Credits (3)
This course covers individualized educational programming in both the core and expanded core curriculums for children and youth with visual impairments with an emphasis on assessment, curricular adaptations, IFSP/IEP/ITP planning, and evidence-based practices. Taught with 460 and SPED 639. Restricted to: SPED majors.
Prerequisite(s): SPED 533, SPED 536, SPED 538.

SPED 545. Technology and Exceptionality in a Diverse Society
3 Credits (3)
This class will address the unique educational needs of learners with exceptionalities, and will provide information and practice in addressing those needs through the use of technology-based interventions. Taught with SPED 645.

SPED 548. Field Experience in Education, Equity & Cultural Diversity
3 Credits (3)
This is a supervised experience in providing special education services to local preK-12 students. In the context of the public school classroom, teacher candidates are guided to apply content knowledge from the seminar meetings and from prior coursework. This experience is designed for both the practicing general education classroom teacher pursuing special education licensure and for graduate teacher candidates pursuing initial special education licensure. Restricted to: SPED majors.
Prerequisite(s): SPED 350 and SPED 360, or SPED 500 and SPED 523, or consent of instructor.

SPED 550. Working with Young Children with Special Needs, Ages 3-8
3 Credits (3)
Addresses competencies for working with young children with exceptionalities, ages three eight, and their families. Public school, private school, Head Start and other models are included. Same as SPED 450 with differentiated assignments for graduate students. May be repeated up to 3 credits.

SPED 551. Assessment of Young Children, Birth Eight
3 Credits (3)
Covers instruments and procedures for assessing young children and their families in order to determine atypical development. Screening, diagnosis, program planning, placement and evaluation issues are covered. Same as SPED 451.
Prerequisite: SPED 550 or consent of instructor.

SPED 552. Introduction to Orientation and Mobility
3 Credits (3)
This course provides an overview of the history and theory of formalized orientation and mobility instruction as it relates to the ability to live independently. The impact of visual impairment and concomitant impairments on the development of spatial concepts and motor skills in relation to independent locomotion is emphasized. Topics covered include mobility aids; navigation, familiarization, and protective techniques; structured pre-cane assessment and instruction; the development and use of tactual maps; and the relationship of orientation and mobility to other areas of the expanded core curriculum. Consent of Instructor required. Restricted to: SPED,EDUC majors.

SPED 553. Beginning Orientation and Mobility
3 Credits (3)
This course provides an overview of the profession of orientation and mobility and how sensory, motor, and psychosocial function affects movement and spatial orientation. Consent of Instructor required. Restricted to: SPED majors.
Prerequisite(s): SPED 552.
SPED 554. Intermediate Orientation and Mobility  
3 Credits (3)  
This course focuses on strategies and methods for conducting assessments and appropriately sequencing skill acquisition for learners across the lifespan who may or may not have additional disabilities. Adaptive technology and other aids that assist with travel in a variety of environmental conditions using different mobility systems will also be covered. Consent of Instructor required. Restricted to: SPED majors.  
Prerequisite(s): SPED 553.

SPED 555. Advanced Orientation and Mobility  
3 Credits (3)  
This course focuses on the development and monitoring of cane skills needed for safe and efficient travel in indoor, residential, and business districts, including the use of public transportation systems. Development, administration, and supervision of orientation and mobility services is also covered. Consent of Instructor required. Restricted to: SPED majors.  
Prerequisite(s): SPED 554.

SPED 559. Classroom Management for Diverse Learners  
3 Credits (3)  
Behavior-change strategies for exceptional learners. Taught with SPED 459 with differentiated assignments for graduate students.

SPED 580. Curriculum, Methods, and Materials for Secondary Special Education  
3 Credits (3)  
Curriculum theory and development for elementary special education programs. Various teaching methods utilized with secondary exceptional learners and techniques for identifying, adapting, and developing materials will be addressed. Taught with SPED 480.

SPED 582. Student Teaching SPED  
12 Credits (12)  
Culminating course required for graduate level students seeking initial licensure. Restricted to: SPED majors.  
Prerequisite(s): Bachelor's degree, SPED 548, and admission to student teaching.

SPED 583. Early Childhood SPED Student Teaching  
9 Credits (9)  
A student teaching experience designed for students studying early childhood special education. Restricted to TEP-ECED majors. Students must be admitted to student teaching to enroll.

Learning Outcomes
1. Our mission is to serve the people of New Mexico through education, research, extension education, and public service with specific emphasis on innovative practices, overcoming barriers to learning, international activities, technology, and literacy for the diverse populations of New Mexico, surrounding states and border communities.

SPED 585. Introduction to Autism  
3 Credits (3)  
This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and family issues. Taught with SPED 485 and SPED 685. Differentiated Assignments.

SPED 586. Behavior and Autism  
3 Credits (3)  
This course will cover the first of the triad of impairments. Students will gain an understanding of the behaviors of children with autism. Students will examine several behavior management philosophies and research based interventions and how they can be applied in the educational setting. Attention will also be given to play skills. The family perspective and participation in the proactive behavior management process will be incorporated throughout the course. Taught with SPED 486 and SPED 686 with differentiated assignments.  
Prerequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 587. Social Skills and Autism  
3 Credits (3)  
This course will cover the second of the triad of impairments. As a blend of researched based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for children functioning at a variety of levels along the autism spectrum. Taught with SPED 487 and SPED 687 with differentiated assignments.  
Prerequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 588. Communication and Autism  
3 Credits (3)  
This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 488 and SPED 688 with differentiated assignments.  
Prerequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 590. Masters Degree Seminar  
3 Credits (3)  
Capstone review of current issues in special education. Each student will participate in a practice comprehensive oral exam.

SPED 598. Special Research Problems  
1-3 Credits  
Individual investigation either analytical or experimental. May be repeated for a maximum of 6 credits, 3 credits per semester.

SPED 599. Master's Thesis  
15 Credits  
Thesis.

SPED 600. Doctoral Research  
1-15 Credits  
Research.

SPED 605. Independent Study Topics in Special Education  
1-6 Credits  
A problem and seminar course for those pursuing an advanced graduate degree. Each course to bear an appropriate subtitle.

SPED 606. High Incidence Disabilities in a Diverse Society  
3 Credits (3)  
Examines those areas of disability that most frequently occur in the special education population, including mental retardation, learning disabilities, communication disorders, and behavioral and emotional disorders. Taught with SPED 506. Restricted to SPED and C D majors.  
Prerequisite: Master's Degree.
SPED 607. Low Incidence Disabilities  
3 Credits (3)  
Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations. Taught with SPED 507 with differentiated assignments.

SPED 610. Current Issues in Special Education for Teaching in a Culturally Responsive Society  
3 Credits (3)  
Required for students seeking the Ed.D./Ph.D. Taught with SPED 510.

SPED 613. Current Research in Special Education  
3 Credits (3)  
Required for students seeking the Ed.D./Ph.D. Restricted to majors. Same as SPED 513.  
Prerequisite: M.A. degree.

SPED 619. School Intervention and Organization in a Diverse Society  
3 Credits (3)  
Introduces public school organization and laws and the psychosociological perspective of education. Curriculum and theory, teaching methods and materials will be presented and operationalized through a psycho-educational point of view. May be repeated up to 3 credits. Crosslisted with: SPED 519. Restricted to: SPSY majors.

SPED 640. Internship in Special Education  
1-6 Credits  
Each course bears a qualifying subtitle. Maximum of 6 credits per semester.

SPED 645. Technology and Exceptionality in a Diverse Society  
3 Credits (3)  
This class will address the unique educational needs of learners with exceptionalities, and will provide information and practice in addressing those needs through the use of technology-based interventions. Taught with SPED 545.

SPED 685. Introduction to Autism  
3 Credits (3)  
This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and family issues. Differentiated Assignments. Taught with SPED 585 and SPED 485.

SPED 687. Social Skills and Autism  
3 Credits (3)  
This course will cover the second of the triad of impairments. As a blend of researched based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for children functioning at a variety of levels along the autism spectrum. Taught with SPED 487 and SPED 587 with differentiated assignments.  
Prerequisite(s)/Corequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 688. Communication and Autism  
3 Credits (3)  
This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 488 and SPED 588 and differentiated assignments.  
Prerequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 690. Doctoral Seminar  
1-4 Credits (1-4)  
The seminar will engage doctoral students in scholarly dialogue and production. It will assist in preparing them for future careers in leadership roles. Same as CD 690.

SPED 698. Selected Topics in Special Education  
1-6 Credits  
Offered under various subtitles which indicate the subject matter to be covered. Maximum of 6 credits, 3 credits per semester.

SPED 700. Dissertation  
9 Credits  
Credit may be earned by students who have successfully completed their doctoral comprehensive exams and presented their dissertation proposals to their committees. At least 18 credits are required during the course of dissertation study. May be repeated for a maximum of 24 credits. Restricted to majors.

SPHS-SPEECH & HEARING SCIENCE

SPHS 2110. Introduction to Communication Disorders  
3 Credits (3)  
This introductory course provides an overview of common speech, language, and hearing disorders in children and adults including etiologies, characteristics, prevention, identification, assessment and intervention. The course provides an overview of the field of speech-language pathology and audiology.  
Learning Outcomes  
1. Describe normal human communication anatomy and processes as they relate to speech and language production.  
2. Describe the nature of speech, language, and hearing disorders and differences.  
3. Describe the principles of prevention, assessment and intervention of communication disorders.  
4. List requirements for licensure, certification, and other relevant professional credentials.  
5. Exhibit basic knowledge of contemporary professional issues in speech-language pathology.  
6. List possible psychosocial implications of various communication disorders.  
7. Identify cultural, educational, legal, and ethical issues related to communication disorders.  
8. Describe the scope of practice of speech-language pathologists and audiologists.
**SPHS 301. Language Acquisition**  
**3 Credits (3)**  
This course introduces students to the study of the development of language, speech, and communication. Includes language sampling. May be repeated up to 3 credits. Crosslisted with: SPHS 509. Restricted to: C DS,C D majors.  
**Prerequisite(s):** B or better in SPHS 2110; Cumulative GPA of 3.2 or higher.

**SPHS 322. Anatomy and Physiology of Speech Mechanisms**  
**3 Credits (3)**  
Structure and function of systems underlying human speech sound production and processing, including respiratory, phonatory, and articulatory components. May be repeated up to 3 credits. Crosslisted with: SPHS 502. Restricted to: C DS,C D majors.  
**Prerequisite(s):** B or better in SPHS 2110, SPHS 323, SPHS 422, SPHS 324, and SPHS 301; and minimum 3.2 GPA.

**SPHS 323. Phonetics**  
**3 Credits (3)**  
The science of phonetics, including work with the International Phonetic Alphabet. Taught with SPHS 501. May be repeated up to 3 credits. Restricted to: C DS,C D majors.  
**Prerequisite(s):** B or better in SPHS 2110; Cumulative GPA of 3.2 or better.

**SPHS 324. Introduction to Speech Science**  
**3 Credits (3)**  
Basic concepts and theories in acoustics, speech production and speech perception. Includes laboratory experience with instrumental measurement and analysis of speech systems. May be repeated up to 3 credits. Crosslisted with: SPHS 503. Restricted to: C DS,C D majors.  
**Prerequisite(s):** B or better in SPHS 2110, SPHS 323, SPHS 422; and minimum 3.2 GPA.

**SPHS 326. Clinical Methods and Procedures**  
**3 Credits (3)**  
Guidelines and procedures associated with the clinical and supervisory processes. Provide opportunities to complete the supervised clinical observation requirement for participation in clinical practicum. May be repeated up to 3 credits. Crosslisted with: SPHS 506. Restricted to: C DS,C D majors.  
**Prerequisite(s):** B or better in SPHS 2110, SPHS 323, SPHS 422, SPHS 324, SPHS 301; and minimum 3.2 GPA.

**SPHS 421. Speech and Language Disorders**  
**3 Credits (3)**  
Bases, symptoms, etiologies, and clinical management of issues related to disorders of articulation, phonology, voice and resonance, and fluency. May be repeated up to 3 credits. Crosslisted with: SPHS 504. Restricted to: C DS,C D majors.  
**Prerequisite(s):** B or better in SPHS 2110, SPHS 323, SPHS 422, SPHS 324, and SPHS 301; and minimum 3.2 GPA.

**SPHS 422. Audiology**  
**3 Credits (3)**  
Anatomy and physiology of the auditory system, bases of auditory disorders, and basic audiometric procedures. May be repeated up to 3 credits. Crosslisted with: SPHS 507. Restricted to: C DS,C D majors.  
**Prerequisite(s):** B or better in SPHS 2110, and a minimum of 3.2 GPA.

**SPHS 423. Neural Bases of Communication Disorders**  
**3 Credits (3)**  
Study of the neuroanatomy and neurophysiology of communication and communication disorders. Includes review of the central nervous system and peripheral nervous system relationship to speech motor control, language, and hearing. May be repeated up to 3 credits. Crosslisted with: SPHS 510. Restricted to: C DS,C D majors.  
**Prerequisite(s):** B or better in SPHS 2110, SPHS 301, SPHS 323, SPHS 422, SPHS 324, SPHS 421, SPHS 322, SPHS 326 and minimum 3.0 GPA.

**SPHS 424. Aural Rehabilitation**  
**3 Credits (3)**  
Overview of hearing aids and amplification devices including cochlear implants. Review of the bases and psychosocial aspects of hearing loss. Clinical management of hearing loss consistent with ASHA's scope of practice for SLPs. May be repeated up to 3 credits. Crosslisted with: SPHS 508. Restricted to: C DS,C D majors.  
**Prerequisite(s):** B or better in SPHS 2110, SPHS 323, SPHS 422, SPHS 324, SPHS 301, SPHS 421, SPHS 322, SPHS 326; and minimum 3.2 GPA.

**SPHS 501. Phonetics**  
**3 Credits (3)**  
The science of phonetics, including work with the International Phonetic Alphabet. Restricted to majors. Same as SPHS 390 with differentiated assignments for graduate students.  
**Prerequisites:** a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

**SPHS 502. Anatomy and Physiology of Speech Mechanisms**  
**3 Credits (3)**  
Structure and function of systems underlying human speech sound production and processing including nervous, respiratory, and articulatory components. Restricted to majors. Same as SPHS 370 with differentiated assignments for graduate students.  
**Prerequisites:** a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

**SPHS 503. Speech Science**  
**3 Credits (2+3P)**  
Basic concepts and theories in acoustics, speech production, and speech perception. Laboratory experience with instrumental measurement and analysis of speech systems. Restricted to majors. Same as SPHS 380 with differentiated assignments for graduate students.  
**Prerequisites:** a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

**SPHS 504. Speech and Language Disorders**  
**3 Credits (3)**  
**Prerequisite(s):** B or better GPA.

**SPHS 505. Research Methods**  
**3 Credits (3)**  
Introduction to basic qualitative, quantitative, and single subject research methodology in speech-language pathology and audiology. Restricted to majors.  
**Prerequisites:** a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.
SPHS 506. Clinical Methods and Procedures
3 Credits (3)
Guidelines and procedures associated with the clinical and supervisory processes. Provide opportunities to complete the supervised clinical observation requirement for participation in clinical practicum. Differentiated assignments for graduate students. Taught with SPHS 326. Restricted to: C DS,C D majors.
Prerequisite(s): B or better GPA.

SPHS 507. Audiology
3 Credits (3)
Anatomy and physiology of the auditory system, bases of auditory disorders, and basic audiometric procedures. Differentiated assignments for graduate students. Taught with SPHS 422. Restricted to: C D, C DS majors.
Prerequisite(s): Minimum of 3.0 GPA.

SPHS 508. Aural Rehabilitation
3 Credits (3)
Prerequisite(s): Minimum of 3.0 GPA.

SPHS 509. Language Acquisition
3 Credits (3)
Normal development of communication across the age span. Includes language sampling and analysis. A minimum grade of B- in all graduate courses and a minimum overall GPA of 3.0 required. Taught with SPHS 360 with differentiated assignments for graduate students. Restricted to CD majors andLING majors majors.

SPHS 510. Neural Bases of Communication Disorders
3 Credits (3)
Study of the neuroanatomy and neurophysiology of communication and communication disorders. Includes review of the central nervous system and peripheral nervous system relationship to speech motor control, language, and hearing. Crosslisted with: SPHS 423. Restricted to: CD, CDS majors.

SPHS 520. Professional Issues and Multicultural Practices in Communication Disorders
3 Credits (3)
This course includes a range of topics pertinent to students entering professional practice as speech-language pathologists including current legal, cultural, ethical, and clinical service provision issues. Restricted to: C DS,C D majors.
Prerequisite(s): Minimum of 3.0 GPA.

SPHS 521. Assessment of Communication Disorders
3 Credits (3)
Diagnostic theories and management of communication disorders using standardized and descriptive methodology. Includes the practice of interviewing, testing, and oral and written reporting. Restricted to: C DS,C D majors.
Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 525. Pediatric Language and Disorders
3 Credits (3)
Normal communication development of neonates, infants, toddlers, and preschoolers; etiologies, and treatment of cognitive, linguistic and social elements of communication problems in family systems. May be repeated up to 3 credits. Restricted to: C DS,C D majors.
Prerequisite(s): Minimum grade of B and an overall GPA of 3.0 or higher.

SPHS 530. School Age Language and Disorders
3 Credits (3)
Normal communication-learning development of elementary, secondary, and postsecondary students; etiologies, diagnosis, and treatment of interpersonal communication and language-based academic disorders. May be repeated up to 3 credits. Restricted to: C DS,C D majors.
Prerequisite(s): A minimum grade of B in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 535. Aphasia & Cognitive Linguistic Disorders
3 Credits (3)
Etiologies, diagnosis, assessment, and treatment of adult aphasia and cognitive-linguistic disorders. Restricted to: C DS,C D majors.
Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 541. Advanced Spanish Morpho-Syntax for Education Professionals
3 Credits (3)
This class has been designed for Heritage Speakers of Spanish who work in educational settings. It will cover the essential linguistic theory and fundamental structures of the Spanish language. This includes, but is not limited to, verb morphology, morphosyntactic and syntactic structures. The main goal of this course is to determine what usages fall within the norms of an individual's speech community, or if there are elements that fall outside those norms.
Prerequisite(s): Students have to be fluent in Spanish as course will be conducted in Spanish.

SPHS 542. Articulation and Phonological Disorders
3 Credits (3)
Advanced study of the symptoms, etiologies, assessment, and clinical management of articulation and phonological disorders including cleft palate and disorders of resonance Restricted to: C DS,C D majors.
Prerequisite(s): A minimum grade of B- in all graduate courses and a minimum overall GPA of 3.0 is required.

SPHS 545. Introduction to Augmentative and Alternative Communication Dis
3 Credits (3)
Assessment and intervention for children and adults with developmental disabilities; Alternative communication strategies and systems for individuals with severe speech and/or language impairments. May be repeated up to 3 credits. Restricted to: C DS,C D majors.
Prerequisite(s): Graduate standing; overall GPA of 3.0.

SPHS 547. Cognitive-Linguistic Communication Disorders
3 Credits (3)
Topics include attention, memory, executive function, and underlying neuropathologies, with emphasis on assessment, diagnosis, prognosis, treatment and recovery processes in cognitive communication disorders related to traumatic brain injury, dementia, and right hemisphere brain damage. May be repeated up to 3 credits. Restricted to: C DS,C D majors.
Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0.
SPHS 548. Best Practices in Bilingual/Multicultural Assessment for Practitioners
3 Credits (3)
The purpose of this course is to provide future speech-language pathologists, educational diagnosticians and special educators with a foundation for evaluating the linguistic, cognitive and academic skills of students from any cultural linguistic background. The course covers a review of the literature on best practices for working with interpreters during assessments. Practitioners will be expected to gather qualitative information about cultural/linguistic and educational histories of school-age children and integrate those results with the results of standardized tests.

SPHS 583. Dysphagia
3 Credits (3)
Study of the anatomy and physiology of swallowing and upper aerodigestive systems. Review of the bases and etiologies of child and adult swallowing disorders, including diagnosis, assessment, and treatment. Restricted to: C DS,C D majors.
Prerequisite(s): A course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 584. Fluency Disorders
3 Credits (3)
Speech fluency development and the disorders of stuttering, cluttering, and neurogenic dysfluency. Restricted to: C DS,C D majors.
Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 585. Motor Speech Disorders
3 Credits (3)
Advanced studies of dysfunction of the nervous system that affect speech. Includes evaluation, diagnosis, and treatment of speech apraxias and dysarthrias. Restricted to: C DS,C D majors.
Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 586. Voice Disorders/Head and Neck Anomalies
3 Credits (3)
Advanced studies of anatomy and physiology of the vocal tract with emphasis on diagnosis, assessment, and treatment of voice disorders, laryngectomy, cleft palate, and other oral-facial anomalies. Restricted to: C DS,C D majors.
Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 589. Practicum in Speech-Language Pathology
1-4 Credits (1-4)
Supervised clinical practice in a variety of speech, language, and hearing disorders. Practicum includes diagnostic, treatment, and management work through direct patient/client contact. Attendance at weekly clinical staff meetings is required. May be repeated up to 15 credits. Restricted to: C DS,C D majors.
Prerequisite(s): Good standing in the graduate school; a course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 590. Clinical Education
1 Credit (1)
This course is specifically designed to target the knowledge base necessary to initiate clinical practicum in the CD Program. The learning objectives are based upon the Council of Academic Accreditation in Audiology and Speech-language Pathology (CAA) standards and knowledge areas. These learning outcomes are developed to assist students in clinical practicum and are specific to the services provided to clients of the NMSU Edgar R. Garrett Speech and Hearing Center. Restricted to: C DS,C D majors.
Corequisite(s): SPHS 589.
Learning Outcomes
1. Demonstrate an understanding of successful strategies to work with families and clients from various clinical settings/cultural backgrounds. Demonstrate an understanding of ethical and confidential service delivery. Identify characteristics of properly written clinical reports. Demonstrate skill in oral and written or other forms of communication sufficient for entry into professional practice. Demonstrate knowledge of entry level and advanced certifications, licensure, and other relevant professional credentials.

SPHS 591. Special Topics
1-9 Credits
Individual and/or group study of special topics identified by subtitle. May be repeated up to 9 credits. Restricted to: C DS majors.
Prerequisite(s): Prior arrangement with faculty; a course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 599. Master's Thesis
15 Credits
Thesis.

SPHS 640. Externship in Communication Disorders
3-9 Credits (3-9)
This course is designed to provide opportunities for the developing clinician to provide treatment to and evaluations for clients in a full term externship experience under the supervision of a licensed SLP. May be repeated up to 9 credits. Consent of Instructor required. Restricted to: C DS,C D majors.
**SPMD-SPORTS MEDICINE**

**SPMD 1110. Introduction to Athletic Training**  
3 Credits (3)  
Introduction to the principles of athletic training. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Las Cruces campus only.  
**Learning Outcomes**  
1. Understand the historical development of athletic training and sports medicine.  
2. Understand the knowledge and experiences needed to become a Certified Athletic Trainer.  
3. Understand the specific responsibilities and duties of an athletic trainer.  
4. Understand the diverse jobs settings within the profession of athletic training.  
5. Understand the relationship between the athletic trainer and the sports medicine team.  
6. Understand some of the general and specific injuries and medical conditions that occur in athletics; their causes, signs and symptoms, treatments, rehabilitation, and prevention.  
7. Understand some of the contemporary issues and problems facing the athletic training profession.

**SPMD 1120. Medical Terminology**  
3 Credits (3)  
Study of the structure of medical language with emphasis on sports medicine-related terminology. To include analysis and interpretation of medical documentation. Restricted to: Las Cruces campus only.  
**Learning Outcomes**  
1. Master the fundamentals of word analysis, including the separation of terms into word roots or combining forms, common prefixes, and suffixes.  
2. Differentiate types of medical terms and the relationships among terms.  
3. Develop a proficiency in the use of physiological and anatomical terms as reflected in medical documents.  
4. Master the terms, words, phrases, and symbols that describe the human body in its various states of health and disease, including essential anatomical terms.

**SPMD 1190. Clinical Practicum I**  
2 Credits (2)  
Introduction to the clinical aspects of the athletic training education program. Must maintain at least 3.0 GPA. May be repeated up to 4 credits. Consent of Instructor required. Restricted to: Athletic Training majors. Restricted to Las Cruces campus only.  
**Learning Outcomes**  
1. The Athletic Training Program application procedures.  
2. The ability to perform selected taping and wrapping techniques.  
3. Knowledge of HIPAA guidelines, pre-participation physical examinations, environmental illnesses, the history of Athletic Training and its governing bodies, Evidence Based Practice and its implications in the field of athletic training, evaluation procedures for the injured athlete, NMSU AT program and its affiliated clinical sites.  
4. Proper documentation for the athletic training environment including SOAP notes.

**SPMD 1195. Clinical Practicum II**  
3 Credits (3)  
Athletic training related content and psycho-motor skills are introduced, enhanced, and assessed in the classroom and clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses while providing increased depth of understanding and clinical practice. Must maintain a 3.0 GPA. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: Athletic Training majors.  
**Learning Outcomes**  
1. Demonstrate knowledge and skill in emergency situation prevention, recognition, and management.  
2. Demonstrate proficiency in basic skills of musculoskeletal injury recognition and management.  
3. Demonstrate competency in basic pre-participation exam skills, including but not limited to taking vital signs.  
4. Demonstrate competency in wound care and first aid.
SPMD 1310. Introduction to Kinesiology
3 Credits (3)
An introduction to the field of Kinesiology which will explore areas such as exercise physiology, sport and exercise psychology, motor behavior, biomechanics, strength and conditioning, exercise prescription, as well as professional and graduate programs, and allied health and applied careers opportunities.

Learning Outcomes

1. Improve students' knowledge of foundations of physical education.
   (Research) (Standard 4 j, k, l, m, o, p)
2. Improve students' abilities to analyze current physical activity issues based on historical, philosophical, sociological, and psychological perspectives. (Research) (Standard 4 j, l, m, e, g)
3. Improve students' knowledge of and ability to critically analyze how gender, race, social class, sexual orientation, and ability issues affect physical education and performance programs. (Research, Diversity) (Standard 4 j, k, l, m, o; Standard 2 a, d, g, j, f, k)
4. Improve students' knowledge of forces influencing the development of physical education programs. In particular, attitudes, values, and beliefs about gender, race, social class, sexual orientation, and ability, etc. (Diversity, Practitioners, Reflection, Pedagogy) (Standard 1 a, b, h, l; Standard 4 j, k, l, m, o; Standard 2 a, d, g, j, f, k)
5. Improve students' knowledge of strategies for becoming an advocate in the school and/or community to promote a variety of physical activity opportunities. (Practitioners) (Standard 2 m, n; Standard 3 n, o, p, q, r; Standard 10 d, j, p)
6. Improve students' knowledge of current educational issues and trends. In particular, socio-cultural issues that affect educational, fitness, and sports settings. (Diversity, Research) (Standard 4 j, k, l, m, o, p Standard 9 a, c, e, f, m, n)
7. Improve students' knowledge of how students' learning is influenced by individual experiences, talents, and prior learning, including language and family/community values and conditions. (Diversity, Research) (Standard 1 b, h, l; Standard 2 d, g, j, k, m, n, o; Standard 3 l)
8. Improve students' knowledge of the impact of international changes on the content of physical education, fitness, and sports programs. (Research) (Standard 4 j, k, l, m, o, p)
9. Improve students' ability to critically analyze how gender, race, sexuality and social class issues affect how we view the body, and how these views can affect students' health and participation in physical education, fitness, and sports programs. (Diversity, Reflection) (Standard 2 d, g, j, f, k, m, o)
10. Improve students' ability to become critically aware of how their feelings, beliefs, and values in relation to gender, race, social class, sexual orientation, and ability issues will affect their abilities to work as professionals in the fields of physical education, sport, or fitness. (Diversity, Reflection) (Standard 2d, g, j, f, k, m, o Standard 9 e, d, g, l, m)
11. Improve students' knowledge of and ability to critically analyze cultural stereotypes of diverse populations of people. (Diversity) (Standard 2 d, g, j, f, k, m, o)
12. Improve students' knowledge of how cultural stereotypes influence the development of physical education, fitness and sport programs. (Research, Diversity) (Standard 2 d, g, j, f, k, m, o; Standard 4 j, k, m, o, p, q Standard 8 p)
13. Improve students' knowledge of how individuals influence groups in a democratic society.

SPMD 1350. Social Foundations of Physical Activity
3 Credits (3)
Historical and cultural foundations and vocational, scientific, and educational data on careers in health education, physical education, and recreation.

Learning Outcomes

1. Improve students' ability to become critically aware of how their feelings, beliefs, and values in relation to gender, race, social class, sexual orientation, and ability issues will affect their abilities to work as professionals in the fields of physical education, sport, or fitness. (Diversity, Reflection) (Standard 2d, g, j, f, k, m, o Standard 9 e, d, g, l, m)
11. Improve students' knowledge of and ability to critically analyze cultural stereotypes of diverse populations of people. (Diversity) (Standard 2 d, g, j, f, k, m, o)
12. Improve students' knowledge of how cultural stereotypes influence the development of physical education, fitness and sport programs. (Research, Diversity) (Standard 2 d, g, j, f, k, m, o; Standard 4 j, k, m, o, p, q Standard 8 p)
13. Improve students' knowledge of how individuals influence groups in a democratic society.
SPMD 2210L. Anatomy and Physiology Laboratory
1 Credit (1P)
Students will engage in activities designed to enhance appreciation of the anatomical structures related to the content areas for SPMD 2210. Restricted to Las Cruces campus only.
Learning Outcomes
1. The student will learn and identify bones, connective tissue, joints and muscular structures of the human body.
2. The student will study joints and associated structures of the body.
3. The student will learn about skeletal muscle, origins, insertions, and actions.
4. The student will learn about the fundamentals of the nervous system and associated structures.
5. The student will learn about smooth and cardiac muscle and their association actions.
6. The student will learn the structures associated with the cardiovascular system (heart and blood vessels).
7. The student will learn the location of all visceral organs.
8. Evaluation of knowledge is determined through practical identification of anatomical structures via written opened ended exams.

SPMD 2250. Fitness for Health and Sport
3 Credits (3)
A study of the fitness needs for health enhancement and sport participation.
Learning Outcomes
1. Recognize the importance of incorporating positive fitness/wellness habits within one's lifestyle in terms of enhancing longevity, disease prevention, and overall quality of life. Examine various physiological benefits and adaptations to such factors as muscular strength, muscular endurance, cardiovascular fitness, flexibility, and body composition when certain stimuli are applied to each. Assessment of these characteristics will be witnessed primarily in practical experiences within the course's laboratory settings. Identify current trends and/or health patterns within society in regards to scientific findings, declination in health habits, and increases in health ailments. Compare various nutritional concepts, specifically proper dietary habits and their impact on weight management aspects. Describe the role physical activity and sport specific training play on competitive athletic performance.

SPMD 2310. Career Preparation
1 Credit (1)
From concept to implementation: Career exploration, setting up degree plans, finding graduate programs, developing professional resumes, writing letters of application, seeking letters of recommendation, and interview preparation. Graded: S/U Grading (S/U, Audit).
Learning Outcomes
1. Career opportunities within human movement and allied health fields
2. Chose both a primary and secondary career of their interest
3. Search for appropriate graduate schools to match their career choices
4. Create a plan by aligning their undergraduate curriculum with their career choices
5. Explore additional education (dual majors, minors, and certifications specific to their chosen field)
6. Study and create a professional resume
7. Create a curriculum vita as a historical reference for future job prospects
8. Write a professional letter of application for jobs and school applications
9. Learn how to seek "outstanding" letters of recommendation
10. Use appropriate interview protocol
11. Practice interviews (one on one, panel and group)

SPMD 2310L. Orthopedic Examination, Evaluation and Diagnosis of Lower Extremity Injuries
4 Credits (3+1P)
Examines normal human anatomy, mechanisms of athletic injury, and deviation from normal anatomy following athletic injury to the lower extremity. Must maintain at least 3.0 GPA. Consent of Instructor required.
Learning Outcomes
1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the lower extremity Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries. Determine and apply therapeutic interventions designed to maximize the patient's participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries.
**SPMD 3050. Therapeutic Modalities**

4 Credits (4)
The physiological effects, indications, contraindication, dosage, and maintenance of therapeutic modalities related to the treatment of athletic or activity-related injuries. May be repeated up to 4 credits. Consent of Instructor required. Must maintain 2.75 GPA.

**Prerequisite(s):** Consent of Instructor, SPMD 2210.

**Learning Outcomes**
1. Demonstrate proper assessment techniques to identify appropriate therapeutic modalities for the treatment of injury and illnesses. Design treatment plans based upon sound clinical assessment and appropriate selection of modalities that address the physiological and psychological needs of the patient. Demonstrate competence with the application of a wide variety of modalities including patient preparation, modality application and modification based upon clinical findings using principles of evidence based practice. Perform appropriate documentation of treatments to include patient history, evaluation, treatment goals, expectations and treatment outcomes. Demonstrate competence with the collection and analysis of baseline and post-treatment data to evaluate and interpret treatment outcomes based upon principles of evidence-based practice.

**SPMD 3090. Clinical Practicum III**

3 Credits (3)
Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

**Learning Outcomes**
1. Practice sessions are conducted to assist the student in achieving clinical proficiency skills.
2. Depending on the difficulty level, selected clinical proficiencies will be evaluated in this clinical.
3. For those proficiencies indicated, students will need to show proficiency either in this clinical or in a later clinical class.

**SPMD 3093. Clinical Practicum IV**

3 Credits (3)
Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

**Learning Outcomes**
1. Identify and locate muscles, tendons, ligaments and bony structures. Demonstrate basic evaluation skills, including but not limited to: taking a history, observation, differential diagnoses, palpation, ROM, neurological/circulation, MMT, special tests, clinical impression, plan. Demonstrate taping, bracing skills, appropriate emergency care skills, select and properly fit athletic equipment, appropriate removal of athletic equipment in the event of an emergency, the ability to develop and answer a clinically relevant question.

**SPMD 3110. Racquet Sports**

2 Credits (2)
Knowledge and skills related to the racquet sports of tennis, badminton, and pickleball with emphasis on developmental strategies and skill performance that influences pedagogical content knowledge. Administrative issues will be addressed.

**SPMD 3120. Theory and Technique of Lifelong Outdoor Leisure Activities**

2 Credits (2)
Knowledge and skills related to lifelong outdoor leisure activities, including the examination of environmental science and awareness, kinesiology, and fundamental motor skills.

**SPMD 3130. Theory and Technique of Sports and Games**

2 Credits (2)
Knowledge and skills related to team sports and games, with emphasis on developmental strategies and skill performance that influence pedagogical content knowledge. Administrative issues will also be addressed.

**SPMD 3140. Designing Student Centered Afterschool Physical Activity Clubs**

3 Credits (3)
Knowledge, skills and field based practical application for creating student centered and student designed after school physical activity clubs.

**SPMD 3150. Theory and Technique of Dance and Rhythms**

2 Credits (2)
Knowledge and skills related to dance and rhythms, with emphasis on the analysis of dance elements and its role in physical education.

**SPMD 3160. Elementary School Physical Education**

3 Credits (2+2P)
Methods for teaching physical education at the elementary level. Primary focus on creating a learning environment for the acquisition and enhancement of developmentally appropriate locomotor, manipulative, and nonmanipulative skills. Field experience included. Consent of Instructor required.

**Prerequisite(s):** GPA of 2.5.

**Learning Outcomes**
1. All course objectives are linked to the InTASC Teaching Standards
2. Improve your knowledge of K-5 physical education content, disciplinary concepts, and tools of inquiry related to the development of a physically educated person (Standard 4 j, k, l, n, o; Standard 5 i, Standard 6 j; Standard 7 g, k, l; Standard 8 i; Standard 9 o).
3. Improve your knowledge of and ability to plan instruction based on curriculum goals/objectives and students’ experiences. (Standard 1 a, b, d, e, h, j; Standard 2 a, b, c, d, f, g, h, j, k, l, m; Standard 4 b, c, d, e; Standard 5 b, d, h, r; Standard 7 a, b, c, d, e, g, h, j, k, l, n, q)
4. Improve your ability to design and teach developmentally appropriate K-5 physical education curriculum for diverse learners. (Standard 1 a, b, d, e, h, j; Standard 2 a, b, c, d, f, g, h, j, k, l, m; Standard 4 b, c, d, e; Standard 5 b, d, h, r; Standard 7 a, b, c, d, e, g, h, j, k, l, n, q)
5. Improve your knowledge of, and ability to, teach a variety of manipulative, nonmanipulative and locomotor skills and concepts. (Standard 7 a, b, c, d, e, g, h, j, k, l, n, q; Standard 8 l)
6. Improve your ability to teach using a variety of strategies such as cooperative learning, problem-based learning, direct instruction, etc. that facilitate learning (Standard 8 a, b, d, e, f, h, l, j, k, l, m, n, s)
SPMD 3210. Anatomy and Physiology II
3 Credits (3)
Detailed study of the structure and function of the human endocrine, immune, digestive, reproductive, integumentary, central nervous and renal systems. Designed specifically for students interested in allied health professions.
Prerequisite: SPMD 2210 or consent of instructor.
Learning Outcomes
1. Students will demonstrate knowledge through testing, practical skills and demonstration an understanding in visceral anatomy and physiological functioning.

SPMD 3210L. Anatomy and Physiology II Lab
1 Credit (1)
The students will develop skills in palpating various bony landmarks as well as origins and insertions of major soft tissues. In addition, problem based learning scenarios will be used to complement the SPMD 3210 lecture material and thereby further students understanding of certain physiologic systems including neural, digestive, reproductive, endocrine, and integumentary.
Prerequisite: SPMD 2210; SPMD 2210L; or approved transfer equivalent.
Learning Outcomes
1. To demonstrate through practical application and demonstration a comprehensive understanding of visceral operations and diseases.

SPMD 3250. Introduction to Exercise Science: Exercise Physiology and Biomechanics
3 Credits (3)
This course serves to provide a broad introduction to both the physiology of exercise and the mechanics of human movement. The conceptual framework of the course will allow for the development of a broad knowledge base regarding these concepts and the latter portions of the course will focus on real world application of the concepts.
Learning Outcomes
1. Students will learn a basic introduction to both exercise physiology and biomechanics and be able to demonstrate their knowledge of the introductory topics by providing real world examples.

SPMD 3310. Lifetime Activities
2 Credits (2)
Knowledge and skills related to the lifetime activities of swimming, weight training, and other fitness promoting activities with emphasis on learning progressions.
Prerequisite(s): GPA 2.5.
Learning Outcomes
1. All course objectives are linked to the InTASC Teaching Standards
2. Improve your ability to design and teach developmentally appropriate fitness lesson plans for diverse learners (e.g. aerobics, yoga, strength training). (Standard 7 a, b, c, i, j Standard 8 a, b, d)
3. Improve your ability to modify instructions, lesson plans and tasks based on students’ strengths and needs. (Standard 1 b, Standard 3 e, Standard 7 b, c, i, j, I, Standard 8 a, b, d)
4. Improve your knowledge of, and ability to teach a variety fitness content (Standard 7 a, g, h, k, l, n)
5. Improve your ability to plan effective lesson plans to insure equity and sensitivity to students with diverse characteristics. This includes structuring a safe, educational environment that facilitates learning for all students. (Standard 3, e, Standard 7 a, i)
6. Improve your ability to use self-assessment and peer-assessment to reflect on your teaching and plan for adaptations/adjustments (Standard 8 b, d, Standard 9 g).
7. Improve your ability to evaluate and modify instructional resources and curriculum to better meet the needs of their students. (Standard 4 f, Standard 7 g, Standard 8 a)

SPMD 3350. Inferential Statistics in Sport and Exercise Science
3 Credits (3)
Statistical concepts and methods basic to experiential research to include normal distribution, z-tests, t-tests, analysis of variance and regression analysis. An understanding of sport and exercise science theory is required for students enrolling in this course
Learning Outcomes
1. Upon successful completion of this course the student will be able to competently assess exercise data using a variety of techniques that include measures of central tendency, variability, distributional assessments, correlation, regression, and mean testing (t-test and ANOVA).

SPMD 3410. Exercise Physiology
3 Credits (3)
Basic physiological principles as they apply to exercise and fitness programs. Laboratory experiences included. Requires 2.75 GPA.
Prerequisite: SPMD 2210 or SPMD 2250; GPA 2.75.
Learning Outcomes
1. To gain knowledge of the structure and function of the body systems (muscle, cardiorespiratory, etc.). To gain knowledge related to the body system in reference to acute bout of exercise (responses), as well as following chronic exposure to exercise (adaptions). To understand laboratory procedures used to study the body system. To be able to integrate knowledge related to the function of each system and apply this information to humans undergoing exercise training.
SPMD 3450. Biomechanics
3 Credits (3)
The application of anatomical, mechanical and electrical concepts to better understand the fundamental nature of human movement. 
Prerequisite: SPMD 2210 and GPA of 2.75.

Learning Outcomes
1. Learn the basic anatomical, kinematic, and kinetic concepts Learn how the human body generates mobility Learn the kinematic concepts, laws, and principle that govern the human body motion
2. Learn the kinetic concepts laws, and principle that govern the human body motion Learn the forces acting on the body in a fluid and how the human body motion is affected Learn how to utilize the principles and concepts to solve problems

SPMD 3450L. Biomechanics Laboratory
1 Credit (1)
This course serves to provide an introduction to human movement and its analysis. The conceptual framework of the course will allow for the application of anatomical, mechanical, and electrical concepts in order to better understand the fundamental nature of movement. 
Prerequisite(s): SPMD 2210; GPA 2.75.

Learning Outcomes
1. Use physical laws of motion to quantitatively analyze human performance.
2. Use physical descriptors of movement to qualitatively analyze human performance.
3. Apply principles of kinetics kinematics to solve problems of human motion.
4. Gain exposure to the various data collection and analysis tools in biomechanics.
5. Apply critical thinking skills to problem solving and writing assignments.
6. Use teamwork to complete an experimental motion analysis projects.

SPMD 3550. Psychology of Sport
3 Credits (3)
Development of coaching techniques to enhance sport performance based on understanding and use of psychological principles. 
Prerequisite: GPA 2.75.

Learning Outcomes
1. Identify psychological characteristics associated with peak performance Describe and explain factors practitioners should consider when diagnosing, designing, and implementing a mental training intervention. Recognize and define the psychological constructs of—for example but not limited to—concentration, confidence, motivation, stress/anxiety, and arousal Understand how personality attributes and the environment affect human performance and injury rehabilitation

SPMD 3610. Health and Exercise Psychology
3 Credits (3)
The course examines the reciprocal relationship among physical activity, exercise behavior, and psychological determinants associated with adopting and maintaining an exercise program. Topics include theories of behavioral change, exercise psychology interventions, the benefits/pitfalls of exercise, and psychological factors influencing patient rehabilitation. 
Prerequisite(s): GPA 2.75.

SPMD 3650. Motor Development
3 Credits (3)
Covers development of motor skills from infancy through maturity. Focus on the principles of motor development, early motor behavior, stage theory, and assessment. Field experiences will augment lecture and readings. 
Prerequisite(s): GPA 2.5.

SPMD 3710. Motor Learning
3 Credits (3)
an examination of the theoretical foundations and related literature that underline the learning, performing, and retention of motor skills with implications for effective teaching and coaching. 
Prerequisite(s): GPA 2.5.

Learning Outcomes
1. Assess functional differences between motor skill types
2. Compare motor control theories and how they control human movement.
3. Critically evaluate current research in motor learning
4. Assess practice schedules and provide recommendations on how practice might be improved in both therapy and sport settings.
5. Compare the pros and cons for retention and transfer testing.
6. Examine the influence of attention on skill performance and debate the role of attention on motor skill preparation

SPMD 4010. Orthopedic Examination, Evaluation and Diagnosis of Upper Extremity Injuries
4 Credits (3+1P)
Examines normal human anatomy, mechanisms of athletic injury, and deviation from normal anatomy following athletic injury to the upper extremity. Must maintain a 3.0 GPA. Consent of Instructor required.

Learning Outcomes
1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the upper extremity Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries. Determine a therapeutic intervention designed to maximize the patient’s participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patients’ overall health and quality of life.

SPMD 4015. Therapeutic Exercise
3 Credits (3)
The physiological effects, indications, contraindications, dosage, and maintenance of therapeutic modalities related to the treatment of athletic or activity-related injuries. Must maintain a 3.0 GPA. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes
1. Apply appropriate clinical reasoning to the selection of therapeutic exercises based upon evidence-based practice guidelines, relevant physical findings, indications, contradictions and precautions. Demonstrate appropriate application of therapeutic exercises and techniques including selection, application, patient instruction, and documentation. Design an individualized therapeutic exercise program incorporating appropriate modifications for tissue repair timelines, physiological and psychological factors, and any additional clinical findings. Demonstrate effective assessment skills to determine safe levels of physical activity for patients.
SPMD 4020. Orthopedic Examination, Evaluation and Diagnosis of Core, Spine and Head Injuries
3 Credits (3)
Advanced clinical assessment techniques and applications. Must maintain at least a 3.0 GPA. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Students will incorporate advanced clinical reasoning skills and apply clinical prediction rules as appropriate. Interpret and apply physical examination findings for appropriate treatment or referral. Apply clinical knowledge for diagnosing injuries and illness of the core, spine, head, and face. Implement prevention guidelines associated with sudden death and catastrophic injury in athletics.

SPMD 4025. Pharmacology in Athletic Training
2 Credits (2)
An introduction to general medical conditions and pharmacological applications in the athletic training setting. Emphasis on the laws governing the development and distribution, indications, contraindications, precautions, and interactions of prescription and over-the-counter medications. Must maintain a 3.0 GPA. May be repeated up to 2 credits. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Describe the principles of pharmacology as they relate to the field of sports medicine. Demonstrate the uses and abuses of drugs in sports. Formulate a philosophical and ethical base of thinking in reference to the field of athletic training as it relates to pharmacology. Describe federal, state and local laws, regulations and procedures for proper storage, disposal, transportation, dispensing and documentation for prescription and nonprescription medications.

SPMD 4030. Organization and Administration in Athletic Training
3 Credits (3)
An introduction to management, leadership, financial strategies, professional development and legal issues related to the athletic training setting. Must maintain 3.0 GPA. May be repeated up to 3 credits. Restricted to: Athletic Training majors.

Learning Outcomes
1. Demonstrate mastery of health care management concepts. Demonstrate comprehension of legal and ethical issue in Athletic Training and healthcare management. Construct policies and procedures relevant to running an athletic training clinic or organization. Demonstrate basic concepts of management including distribution of financial resources, inventory and athletic training facility design/evaluation. Summarize appropriate human resources policies relevant to athletic training staffing.

SPMD 4090. Clinical Practicum V
3 Credits (3)
Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Utilize critical thinking skills and apply relevant clinical evidence in the evaluation, treatment and rehabilitation of athletic injuries of the upper extremity. Perform a comprehensive evaluation of the upper extremity to include the shoulder, elbow, forearm, wrist and hand; and then design a specific plan of treatment, and rehabilitation program for injuries and conditions of the upper extremity. Demonstrate an understanding of the referral process as warranted in situations dealing with athletic injuries. Demonstrate an understanding of professional communication as it relates to rehabilitation, plan of care documentation and the referral process. Demonstrate an understanding of the time commitment needed to perform as an ATC by completing the clinical hours required for this course.

SPMD 4093. Clinical Practicum VI
3 Credits (3)
Athletic training psycho-motor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Students must complete a general medical rotation with this course. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Recognition of general medical conditions including emergent physical and psychological conditions for intervention, referral or return to play criteria as appropriate. Demonstrate proper clinical examination techniques for the assessment of general medical conditions including signs and symptoms of catastrophic and emergent conditions. Develop and implement prevention strategies for at-risk individuals and large groups. Demonstrate professional communication skills as related to athletic training including both written and verbal communication. Define and utilize evidence-based practice in the clinical decision making process.

SPMD 4095. Clinical Practicum VII
3 Credits (3)
Athletic training psycho-motor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Students may complete a general medical rotation as part of this course. Must maintain 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Be prepared to sit for the Board of Certification (BOC) examination. Confidently understand the BOC exam format, and method of delivery. Meet the requirements to maintain certification, including evidence based practice requirements and continuing education units and their reporting cycles. Demonstrate competence in the following educational content areas for the practice of Athletic Training: evidence-based practice, prevention and health promotion, clinical examination and diagnosis, acute care of injury and illness, therapeutic interventions, psychosocial strategies and referral, healthcare administration, professional development and responsibility.
SPMD 4098. Advanced Athletic Training I
1-3 Credits (1-3)
Advanced clinical experiences and education in athletic training. Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainer’s Association Education Council. May be repeated up to 9 credits. Consent of Instructor required. Restricted to: Athletic Training majors.
Learning Outcomes
1. Describe an advanced clinical setting. Demonstrate advanced clinical reasoning skills. Demonstrate advanced clinical competence in one or more of the domains as described by the National Athletic Trainers Association Education Council.

SPMD 4110. Adapted Physical Education
3 Credits (3)
Selection and scope of corrective activities in posture and body mechanics, and the adaptation of movement activities for the exceptional student.

SPMD 4130. Methods of Teaching Secondary Physical Education
6 Credits (6)
Theoretical and practical applications of curriculum, pedagogy and assessment for teaching secondary physical education. Provides the students opportunities to develop curriculum, teach, and assess student learning through a supervised practicum in both middle and high school physical education settings. Consent of Instructor required.
Prerequisite(s): SPMD 3160.

SPMD 4210. Advanced Exercise Physiology
3 Credits (3)
Detailed study of the integrated response of neuromuscular, cardiovascular, and respiratory systems to acute and chronic exercise, nutrition, and environmental conditions with a strong emphasis on bioenergetics.
Prerequisite(s): SPMD 3410 and GPA of 2.75 or consent of instructor.
Learning Outcomes
1. Fundamental concepts about nutrition and its application to human performance
2. Advanced understanding of nutrition and its association with human bioenergetics
3. Human bioenergetics and its responsibility for performance enhancement and outcomes
4. Energy transfer and expenditure under various physical and environmental conditions
5. Pulmonary and cardiovascular responses to exercise
6. Cardiovascular and cellular adaptations to altitude

SPMD 4250. Principles of Strength and Conditioning
3 Credits (3)
Application of research, theory, and methods of high-intensity, resistive overload training. Performance-specific topics include management, nutrition. Requires SPMD 2250 or SPMD 3410; GPA of 2.75.
Prerequisite: SPMD 2250 or SPMD 3410: GPA 2.75.
Learning Outcomes
1. Examine both applied and theoretical practices implemented towards various strength and conditioning concepts based on National Strength and Conditioning Association (NSCA) guidelines. Discuss various acute and chronic adaptations to the above said applied and theoretical practices to include, but not limited to, musculoskeletal adaptation, muscular power output, speed and agility characteristics, plyometric training, body composition characteristics, and cardiovascular characteristics, among many others. Recognize strength and conditioning adaptations regarding special populations, such as youth, female, and elderly populations.

SPMD 4250L. Principles of Strength and Conditioning Laboratory
1 Credit (2P)
An applied examination of the theory, principles, rules and regulations associated with various strength and conditioning exercises to include but not limited to Olympic lifting, powerlifting, bodybuilding, plyometrics, speed, agility and speed-endurance development. Lab required for Kinesiology majors. GPA of 2.75.
Prerequisite: SPMD 2250 or SPMD 3410; GPA 2.75.

Learning Outcomes
1. Examine applied practices towards various human performance concepts based on National Strength and Conditioning Association (NSCA) guidelines. Assess various physiological adaptations to the above applied practices, including muscular hypertrophy, muscular power output, speed and agility drills, plyometric training, body composition assessment, and non-traditional training modes, among numerous others. Demonstrate proficiency towards proper administration of performance assessments and exercises to participants of various skill levels as well as possess the capability of instruction and demonstration of said assessments and exercises

SPMD 4350. Exercise Testing and Prescription
3 Credits (3)
This combined lecture and lab class introduces students to the scientific basis for and principles of exercise testing and prescription. The focus is on basic approaches to exercise testing and prescription for healthy adults, while application to some special populations with chronic disease will be discussed.
Prerequisite: SPMD 3410 or consent of instructor; GPA 2.75.
Learning Outcomes
1. Examine the appropriate administration of exercise tests for the assessment of health-related and performance-related fitness. Apply principles pertaining to appropriate exercise prescription for the general population of healthy adults. Analyze the psychological determinants of appropriate exercise programming. Demonstrate the ability of proper diagnosis and interpretation towards a standard 12-lead ECG reading, including heart rates, heart rhythms, and common arrhythmias. Assist every course participant in the preparation processes to sit for any of ACSM’s credential-based exams.
SPMD 4410. Exercise for Special Populations
3 Credits (3)
Fundamentals of kinesiology adapted for adults with various diseases and disabilities. Focus will be on the application of exercise assessment and prescription for selected conditions.
Prerequisite: SPMD 3410 or consent of instructor; GPA of 2.75.

Learning Outcomes
1. Demonstrate understanding of the techniques utilized in cervical stabilization
2. Construct the components of an effective Emergency Action Plan
3. Assess the scene and patient during an emergency situation.
4. Demonstrate proper universal precautions and wound care.
5. Demonstrate effective Cardiopulmonary Resuscitation, AED use.
7. Demonstrate effective splinting techniques.
8. Demonstrate understanding of the techniques utilized in cervical stabilization
9. Identify components of acute care for general medical and orthopedic emergencies

SPMD 4450. Pathophysiology and Human Function(s)
3 Credits (3)
Students will discuss basic concepts of pathophysiology such as inflammation & repair, infectious diseases, neoplasms, and diseases of specific physiological systems. In addition, students will discuss a variety of case studies, and in so doing will be able to relate pathophysiologic conditions to symptoms, activity restrictions and disability.
Prerequisite(s): SPMD 2210; SPMD 2210L; SPMD 3410; GPA 2.75.

SPMD 4510. Neurophysiology and Human Function
3 Credits (3)
Students will discuss neurological control of human movement. Topics will include central and peripheral nervous system functions, with particular emphasis given to somatosensory afferent and motor efferent control. In addition, students will develop an understanding of the techniques employed to assess neurologic function in various patient populations.
Prerequisite(s): SPMD 2210; SPMD 2210L; SPMD 3410; and GPA of 2.75.

SPMD 4550. Exploring Extreme Human Performance
3 Credits (3)
A reading, writing and documentary based course studying human's quest and the related sacrifices associated with participating in extreme performance activities such as the Olympics, wakeboarding, snowboarding, military special forces, ultra-run events, marathons, etc. Consent of Instructor required.
Prerequisite(s): Consent of instructor and GPA 2.75.

SPMD 4610. Senior Seminar
3 Credits (3)
Capstone course for Kinesiology. Consent of Instructor required and a minimum GPA of 2.75. Students must be in Senior Standing to enroll.
Prerequisite: GPA 2.75.

Learning Outcomes
1. The Student Learning Outcomes are dependent on instructor and specific direction of course with individual group of students. Similar to an independent instruction.

SPMD 4805. Emergency Response
2 Credits (2)
Comprehensive approach to the identification of risk factors, preparation of emergency action plans, and recognition and care of emergency medical conditions including those that may lead to sudden death. This is a hybrid course combining online instructional components and clinical skills experience including clinical safety (blood-borne pathogens, ECC, first-aid, etc), and on-field emergency management. Consent of Instructor required.

Learning Outcomes
1. Identify the individuals involved in the Emergency Response Team
2. Construct the components of an effective Emergency Action Plan.
3. Assess the scene and patient during an emergency situation.
4. Demonstrate proper universal precautions and wound care.
5. Demonstrate effective Cardiopulmonary Resuscitation, AED use.
7. Demonstrate effective splinting techniques.
8. Demonstrate understanding of the techniques utilized in cervical stabilization
9. Identify components of acute care for general medical and orthopedic emergencies

SPMD 4997. Problems
1-3 Credits (1-3)
Independent study in either Kinesiology and/or Athletic Training May be repeated up to 9 credits. Consent of Instructor required.

SPMD 4998. Internship
6 Credits (6P)
A part-time internship in an approved wellness, fitness, athletic, recreation, research lab or other program as agreed upon by the internship supervisor. The student will gain experience in all phases of management and operation. This is a 6-hour internship which can be repeated for an additional 6-credit hours at the same or a different location allowing the student to gain one or multiple field experiences. Field instructor supervision will oversee the students performance. This internship may require relocation to a site outside of the Las Cruces area.

Learning Outcomes
1. Students will apply their academic program didactic knowledge, skills and abilities at a professional site gaining hands-on learning experiences under the supervision of a practicing professional Students will learn in a working environment such that the internship becomes the capstone of their undergraduate education allowing them practical experience in a career field of their choice.

SPMD 5005. Foundations of Athletic Training
3 Credits (3)
This course provides an introduction to clinical decision making and covers standard techniques and procedures for the evaluation and diagnosis of musculoskeletal injuries and common illnesses, injury prevention concepts, documentation and management. Consent of Instructor required.

Learning Outcomes
1. Demonstration of clinical decision making skills Articulation of standard techniques and procedures for evaluation and diagnosis Produce standardized documentation of clinical findings.
SPMD 5010. Graduate Athletic Training Seminar I
1-3 Credits (1-3)
Advanced seminar topics in athletic training. Students will explore
generalized topics within the field of athletic training under the direct
supervision of a Commission on Accreditation of Athletic Training
Education (CAATE) accredited Athletic Training Program. Students
may engage in teaching and research opportunities in unique areas.
Students may explore athletic training topics within the classroom or
independently through designated resources. May be repeated up to 3
credits. Consent of Instructor required.
Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas
identified for the semester. Demonstrate increased skill in teaching or
academic preparation techniques as identified for the semester.

SPMD 5015. Graduate Athletic Training Seminar II
1-3 Credits (1-3)
Advanced seminar topics in athletic training. Students will explore
more specialized topics within the field of athletic training under the
direct supervision of a Commission on Accreditation of Athletic Training
Education (CAATE) accredited Athletic Training Program. Students
should be prepared to further explore topics previously covered in
SPMD 5310 (Graduate Athletic Training Seminar I). Students may engage
in teaching and research opportunities in unique areas. Students may
explore athletic training topics within the classroom or independently
through designated resources. May be repeated up to 3 credits. Consent of
Instructor required.
Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas
identified for the semester. Demonstrate increased skill in teaching or
academic preparation techniques as identified for the semester.

SPMD 5020. Graduate Athletic Training Research I
1-3 Credits (1-3)
Advanced research topics in athletic training. Students will explore
research and evidence-based practices within the field of athletic training.
Students will work under the direct supervision of a Commission on
Accreditation of Athletic Training Education (CAATE) accredited Athletic
Training Program faculty member. Students should be prepared to
further explore research topics within a specific discipline with the intent
of disseminating and sharing information with the athletic training
community. Topics previously covered in SPMD 5310 (Graduate Athletic
Training Seminar I). Students may engage in teaching and research
opportunities in unique areas. May be repeated up to 3 credits. Consent of
Instructor required.
Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas
identified for the semester. Demonstrate increased skill in assessing
and conducting research for the athletic training community.

SPMD 5025. Graduate Athletic Training I
1-3 Credits (1-3)
Advanced clinical experiences and education in athletic training.
Students will examine topics in athletic training in conjunction with
faculty members within the Commission on Accreditation of Athletic
Training Education (CAATE) Athletic Training Program at New Mexico
State University. Assessment of Athletic Training Program clinical
proficiencies as described by the National Athletic Trainers’ Association
Education Council. May be repeated up to 3 credits. Consent of Instructor
required.
Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas
identified for the semester. Demonstrate increased skill in teaching or
academic preparation techniques as identified for the semester.

SPMD 5030. Graduate Athletic Training II
3 Credits (3)
Advanced clinical experiences and education in athletic training.
Assessment of Athletic Training Program clinical proficiencies as
described by the National Athletic Trainers’ Association Education
Council. May be repeated up to 3 credits. Consent of Instructor required.
Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas
identified for the semester. Demonstrate increased skill in teaching or
academic preparation techniques as identified for the semester.

SPMD 5050. Clinical Education I
3 Credits (3)
Integration of clinical competencies with classroom instruction and a
supervised field-based experience in athletic training to link theory into
practice. Consent of Instructor required.
Learning Outcomes
1. Demonstrate basic evaluation, taping, bracing and emergency care
skills. Select and properly fit protective equipment for a variety of
injury and sport scenarios. Demonstrate proper equipment removal
for emergency care of the injured athlete. Perform a pre-participation
examination including physical evaluation, documentation and
referral if needed.

SPMD 5120. Lower Extremity Injury Evaluation + Lab
4 Credits (4)
This course provides a comprehensive approach to the pathomechanics,
clinical examination, diagnosis, role of clinical outcome measures and
appropriate medical referral and treatment of orthopedic injuries and
other conditions to the lower extremity. Consent of Instructor required.
Learning Outcomes
1. Demonstrate knowledge and ability to apply current best practices
in acute care, diagnosis and treatment of injuries involving the
lower extremity. Demonstrate strong clinical examination skills
in order to accurately diagnose and effectively treat the patient.
Demonstrate the knowledge and skills necessary to evaluate and
provide immediate management of acute injuries. Determine and
apply therapeutic interventions designed to maximize the patient’s
participation and health-related quality of life. Develop and implement
strategies and programs to prevent the incidence and/or severity of
injuries.
SPMD 5150. Clinical Education II
3 Credits (3)
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite(s): SPMD 5050.
Learning Outcomes
1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor.

SPMD 5180. Therapeutic Interventions I
4 Credits (3+1P)
Stud of physical rehabilitation theory and techniques used as therapeutic intervention for orthopedic injuries and conditions.
Learning Outcomes
1. Demonstrate appropriate application techniques for therapeutic modalities to include thermal, electrical, ultrasound and mechanical therapeutic modalities. Demonstrate proper clinical assessment techniques to establish treatment and rehabilitation plans for a variety of orthopedic injuries and conditions including proper documentation procedures. Demonstrate knowledge of the physiological and pathological processes of trauma, wound healing and tissue repair and their role/implications within the therapeutic intervention process.

SPMD 5205. Evidence Based Practice
2 Credits (2)
This course investigates the concepts of evidence based practice as it relates to musculoskeletal assessment, diagnosis and therapeutic interventions with a primary focus on clinician- and patient-oriented outcome measures and appropriate referral decisions. Students will explore primary literature focused on clinical questions related to a comprehensive approach to injury evaluation.
Learning Outcomes
1. Define evidence-based practice as it relates to athletic training clinical practice. Explain the role of evidence in the clinical decision-making process. Describe and differentiate the types of quantitative and qualitative research, research components, and levels of research evidence. Describe a systematic approach (eg, five step approach) to create and answer a clinical question through review and application of existing research. Develop a relevant clinical question using a pre-defined question format (eg, PICO= Patients, Intervention, Comparison, Outcomes; PIO = Patients, Intervention, Outcomes).

SPMD 5220. Upper Extremity Injury Evaluation + Lab
4 Credits (3+1P)
This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the upper extremity. Consent of Instructor required.
Learning Outcomes
1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the upper extremity. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries. Determine a therapeutic intervention designed to maximize the patient’s participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patient’s overall health and quality of life.

SPMD 5250. Clinical Education III
3 Credits (3)
Integration of clinical competencies during an immersive, supervised, field based experience in athletic training to link theory into practice.
Prerequisite(s): SPMD 5150.
Learning Outcomes
1. Students will be proficient in the day to day operations of an athletic training room. This immersive experience will prepare students for future employment as a full-time athletic trainers. Students will demonstrate skills in all aspects of athletic training including patient-centered care, clinical examination, diagnosis and intervention, prevention, health promotion and wellness and healthcare administration.

SPMD 5280. Therapeutic Interventions II
4 Credits (3+1P)
A detailed study of the physiological effects, indications, contraindication, dosage, and maintenance of modern therapeutic devices related to the treatment and rehabilitation of orthopedic injuries and conditions.
Prerequisite(s): SPMD 5180.
Learning Outcomes
1. Demonstrate proper clinical assessment techniques to establish treatment and rehabilitation plans for a variety of orthopedic injuries and conditions including proper documentation procedures. Demonstrate knowledge of the physiological and pathological processes of trauma, wound healing and tissue repair and their role/implications within the therapeutic intervention process. Design treatment plans based upon sound clinical assessment and appropriate selection of modalities that address the physiological and psychological needs of the patient. Demonstrate competence with the collection and analysis of baseline and post-treatment data to evaluate and interpret treatment outcomes based upon principles of evidence-based practice. Demonstrate competence with the application of a wide variety of modalities including patient preparation, modality application and modification based upon clinical findings using principles of evidence based practice.
SPMD 5310. Inferential Statistics in Sports and Exercise Science
3 Credits (3)
This course serves to provide an introduction to statistical analyses. The conceptual framework of the course will allow for the application of a variety of statistical concepts in order to better understand the nature of data associated with scientific literature publications. Consent of Instructor

Learning Outcomes
1. Upon successful completion of this course the student will be able to competently assess exercise data using a variety of techniques that include measures of central tendency, variability, distributional assessments, correlation, regression, and mean testing (t-test and ANOVA).

SPMD 5350. Principles of Strength and Conditioning
3 Credits (3)
Application of research, theory, and methods of high-intensity, resistance training. Performance-specific topics include management, nutrition, exercise prescription, periodization, lifting techniques, testing, and evaluation. Course will emphasize standards set forth by the National Strength and Conditioning Association preparing students interested in sitting for the NSCA certification examinations. Consent of Instructor

Learning Outcomes
1. Understanding of general physiology and its responses to acute and chronic exercise Understanding of cardiovascular effects of exercise, training and sport Understanding of strength training affects on special populations such as youth, women and the elderly Understanding of musculoskeletal changes from exercise, training and sport Practicality and application of power and strength training Comprehension of training programs and how they pertain to different training aspects Demonstrate principles of plyometrics and training

Understanding and demonstrate principles of periodization

SPMD 5410. Biomechanics
3 Credits (3)
The application biomechanical analysis of human movement as it relates to human performance through the use of anatomical, mechanical and electrical concepts. Consent of Instructor

Learning Outcomes
1. The student will be able to competently assess physical anatomy, analyze linear and angular forces, examine gait, understand the relationships between kinetics and kinematics, understand how muscle and bone architecture impact human movement, and be familiar with the utilization of various data collection methods used in evaluating and improving human movement.

SPMD 5450. Exercise for Special Populations
3 Credits (3)
Fundamentals of kinesiology adapted for adults with various diseases and disabilities. Focus will be on the application of exercise assessment and prescription for selected conditions. Consent of Instructor

Learning Outcomes
1. To develop an understanding of the pathophysiology of various cardiovascular, pulmonary, metabolic, skeletal muscle, orthopedic, and mental diseases. To provide a medical perspective in the treatment and management of individuals with these conditions in which exercise therapy may be beneficial. To provide a sound understanding of exercise testing and prescription for a variety of chronic disease states. To be able to assess, interpret, and evaluate case studies of diseased individuals and to develop comprehensive rehabilitation programs based on this information. To develop the ability to articulate / present information of various diseases / conditions in a professional manner both formally and in a one on one setting.

SPMD 5510. Psychology of Sport
3 Credits (3)
Development of coaching techniques to enhance sport performance based on understanding and use of psychological principles. Consent of Instructor

Learning Outcomes
1. Identify psychological characteristics associated with peak performance Describe and explain factors practitioners should consider when diagnosing, designing, and implementing a mental training intervention. Recognize and define the psychological constructs of –for example but not limited to–concentration, confidence, motivation, stress/anxiety, and arousal. Understand how personality attributes and the environment affect human performance and injury rehabilitation.

SPMD 5550. Skill Acquisition and Performance
3 Credits (3)
Behavioral and physiological examination factors that influence the acquisition and performance of motor skills. Consent of Instructor

Learning Outcomes
1. Describe and explain the principles and processes underlying skilled performance Know the factors to consider when diagnosing, designing, and assessing learning experiences Understand the elements of an effective instructional plan for skill acquisition
SPMD 5575. Advanced Motor Development
3 Credits (3)
Advanced coverage of motor development topics including: Theoretical perspectives of motor development; the sequential, age-related, continuous process of physical growth and maturation; changes in movement behavior from infancy to older adulthood; external influences on development of motor skills; research approaches in motor development. Consent of Instructor

Learning Outcomes
1. Describe the historical progression of motor development within the broader field of kinesiology. Explain the various theories and foundational concepts of motor development. Understand and apply the processes (social, cognitive, perceptual) involved in motor skill development throughout the lifespan (infancy, childhood, adolescence, adulthood). Identify procedures and methodologies used to assess various aspects of motor development. Interpret the supporting literature and research related to the fundamental principles of motor development. Apply and transfer the knowledge gained to develop a research proposal to enhance understanding of a motor development topic of interest.

SPMD 6005. Athletic Training Research I
2 Credits (2)
Instruction and development of research skills through the study of published reports and readings in athletic training and related fields. Consent of Instructor required.

Learning Outcomes
1. Describe a systematic approach (e.g., five step approach) to create and answer a clinical question through review and application of existing research. Develop skill in utilizing multiple scales for critical appraisal of literature and research studies. Develop a relevant clinical question utilizing a predefined question format and conduct a literature review on the subject. Describe multiple forms of research, research and literature resources and the differences between narrative reviews, systematic reviews and meta analyses. Describe and apply concepts of diagnostic accuracy and clinical prediction rules as they pertain to patient centered care and evidence based practice.

SPMD 6010. Organization and Administration in Athletic Training
2 Credits (2)
Organization and administration of athletic training services including management, leadership, financial, human resources, facility, information technology and risk management.

Learning Outcomes
1. Students will employ values consistent with the NATA code of ethics for all health care administration actions. Demonstrate knowledge of legal, ethical and risk management concepts in athletic training and health care administration. Demonstrate mastery of a variety of health care management concepts. Demonstrate comprehension of fiscal management strategies, resource management and facility design as it relates to athletic training.

SPMD 6020. Evaluation of the Head, Neck, Spine and Torso
3 Credits (3)
This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the head, neck and spine.

Prerequisite(s): SPMD 5220.

Learning Outcomes
1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the head, neck, spine and torso. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries and illnesses. Determine a therapeutic intervention designed to maximize the patient's participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patients' overall health and quality of life.

SPMD 6050. Clinical Education IV
3 Credits (3)
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.

Prerequisite(s): SPMD 5150.

Learning Outcomes
1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor.

SPMD 6110. Professional Preparation
3 Credits (3)
Knowledge and skills for successful pursuit of athletic training credentials, employment and continuing professional competency; emphasis on current topics and issues contributing to the professional preparation of athletic training. Student must be enrolled in their final semester of the MSAT program to enroll in this course.

Learning Outcomes
1. Students will create a profile with the Board of Certification (BOC) in preparation for their BOC Examination. Students will analyze their individual strengths and weaknesses through practice examinations in order to prepare for a successful challenge of the BOC Examination. Students will demonstrate knowledge of basic human resources policies and procedures and the hiring process for athletic trainers. Students will self-assess professional competence and create professional development plans according to personal and professional goals and requirements.
SPMD 6150. Clinical Education V  
3 Credits (3)  
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.  
Prerequisite(s): SPMD 6050.  
Learning Outcomes  
1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor. Students will demonstrate professional behaviors congruent with the ethical standards of the profession of athletic training. Students will develop, implement, and revise policies that pertain to prevention, preparedness, and response to medical emergencies and other critical incidents.

SPMD 6280. General Medical Conditions & Therapeutic Medications  
3 Credits (3)  
Pathophysiology, assessment, and appropriate intervention and referral for general medical conditions and disabilities; common diagnostic tests and imaging assessment tools; commonly used therapeutic medications.  
Prerequisite(s): SPMD 5280.  
Learning Outcomes  
1. Recognition of general medical conditions including emergent physical and psychological conditions for intervention, referral or return to play criteria as appropriate. Demonstrate proper clinical examination techniques for the assessment of general medical conditions including signs and symptoms of catastrophic and emergent conditions. Demonstrate knowledge of common therapeutic medications and the general medical conditions they treat within the fields of athletic training and sports medicine. Demonstrate knowledge of the principles of pharmacology, including pharmacokinetics and pharmacodynamics, as they relate to the fields of athletic training and sports medicine. Demonstrate knowledge of federal, state and local laws, regulations and procedures for proper storage, disposal, transportation, dispensing and documentation dealing with prescription and non-prescription medications.

SPMD 6310. The Social Construction of the Body  
3 Credits (3)  
This course will explore how people’s health and physical activity experiences and choices are often shaped by cultural narratives and expectations of the male and female body. Designed for graduate students in allied health and physical activity professions

SPMD 6350. Advanced Exercise Physiology  
3 Credits (3)  
Detailed study of the integrated response of neuromuscular, cardiovascular and respiratory systems to acute and chronic exercise, nutrition and environmental conditions with a strong emphasis on laboratory experience. Consent of Instructor  
Learning Outcomes  
1. Fundamental concepts about nutrition and it application to human performance Advanced understanding of nutrition and its association with human bioenergetics Human bioenergetics and its responsibility for performance enhancement and outcomes Energy transfer and expenditure under various physical and environmental conditions Pulmonary and cardiovascular responses to exercise Cardiovascular and cellular adaptations to altitude

SPMD 6410. Cardiovascular Physiology  
3 Credits (3)  
This graduate level course provides an in-depth study of cardiovascular structure and function. The course assumes that students have a strong background in human physiology. Topics include, but are not limited to: cellular structure of the heart and vascular system; cardiac function, including electrophysiology of the heart; vascular function; neurohumoral control of the heart and circulation, organ blood flow, exchange function of the microcirculation; the impact of common cardiovascular diseases on cardiovascular structure and function, and cardiovascular adaptations to chronic exercise. Consent of Instructor  
Learning Outcomes  
1. The student will demonstrate a comprehensive knowledge cardiovascular structure and function The student will be able to relate common cardiovascular pathophysiology to cardiovascular functional impairments and physical functional limitations. The student will be able to discuss chronic exercise training adaptations on the cardiovascular system and their value as a treatment strategy for cardiovascular diseases.

SPMD 6450. Skeletal Muscle: Structure and Function  
3 Credits (3)  
Basic muscle morphology and physiology with molecular and cellular adaptations in skeletal muscle as consequences to varying exercise regimens. Consent of Instructor  
Learning Outcomes  
1. To gain knowledge of the structure and function of skeletal muscle To gain knowledge related to the skeletal muscle in reference to cellular and molecular responses and adaptations to exercise To understand laboratory procedures used to study muscle metabolism To develop ability to scientifically critique published papers and present them in a professional manner
SPMD 6510. Designing Resistance Training Program
3 Credits (3)
Detailed study of the physiological concepts associated with designing resistance-training programs for children, women, seniors, athletic performance and rehabilitation. Consent of Instructor

Learning Outcomes
1. Fundamental components associated with resistance training and exercise prescription Compare and contrast isometric, dynamic, variable, isokinetic, eccentric, concentric resistance training Design programs guided by a needs analysis Demonstrate appropriate techniques and implement systems for training Study physiological adaptations of resistance training for women, children, seniors, athletics and rehabilitation Understand anatomical and physiological changes associated with detraining Integrate components and concepts of resistance training for program design (periodization) Explore alternative training programs

SPMD 6710. Project
1-12 Credits (1-12)
Selected projects for doctoral students. May be repeated up to 12 credits. Consent of Instructor required.

SPMD 6750. Kinesiology Research
1-3 Credits (1-3)
Research to be conducted under the direction of a Kinesiology faculty member May be repeated up to 15 credits. Consent of Instructor required.

SPMD 6996. Special Topics
1-3 Credits (1-3)
Offered under various subtitles that indicate the subject matter. May be repeated for a maximum of 3 credits per semester and a total of 9 credits overall. May be repeated up to 9 credits. Consent of Instructor required.

SPMD 6999. Capstone Project I
3 Credits (3)
Students will prepare an individualized capstone project
Prerequisite(s): SPMD 5205.

SPMD 7000. Doctoral Dissertation
1-18 Credits (1-18)
Doctoral Dissertation hours to be conducted under the direction of a Kinesiology Faculty. May be repeated up to 18 credits. Thesis/Dissertation Grading.

STAT STATISTICS

STAT 371. Statistics for Engineers and Scientists I
3 Credits (3)
Modern probability and statistics with applications to the engineering sciences.
Prerequisite(s): C- or better in MATH 1521G or MATH 1521H.

STAT 400. Undergraduate Research
1-3 Credits
Arrangements must be made with supervising professor before registration. May be repeated for a maximum of 6 credits.

STAT 470. Probability: Theory and Applications
3 Credits (3)
Basic probability distributions including binomial, normal; random variables, expectation; laws of large numbers; central limit theorem.
Prerequisite(s): C- or better in MATH 2530G and C- or better in at least one-300 level Math course.

STAT 480. Statistics: Theory and Applications
3 Credits (3)
Point and interval estimation; sufficiency; hypothesis testing; regression; analysis of variance; chi-square tests.
Prerequisite(s): C- or better in STAT 470.

STAT 515. Probability: Theory and Applications
3 Credits (3)
Same as STAT 470 with additional work for graduate students.

STAT 525. Statistics: Theory and Applications
3 Credits (3)
Same as STAT 480 with additional work for graduate students.

STAT 535. Elementary Stochastic Processes
3 Credits (3)
Markov chains, Poisson processes, Brownian motion, branching processes, and queuing processes, with applications to the physical, biological, and social sciences.
Prerequisite: STAT 515 or consent of instructor.

STAT 540. Directed Reading
1-6 Credits
May be repeated for a maximum of 6 credits. Graded S/U.
Prerequisite: consent of instructor and graduate committee.

STAT 562. Foundations of Probability
3 Credits (3)
Probability spaces, expectation and conditional expectation, limit theorems and laws of large numbers.
Prerequisite: MATH 593.

STAT 563. Advanced Topics in Stochastic Processes
3 Credits (3)
Markov processes, martingales, Brownian motion, the Ito calculus, stochastic differential equations.
Prerequisite(s): STAT 562.

STAT 571. Continuous Multivariate Analysis
3 Credits (3)
Theory and applications of the multivariate normal distribution. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): STAT 525, or consent of instructor.

STAT 572. Linear Models
3 Credits (3)
Core topics include distribution of quadratic forms, theory of regression, analysis of variance and covariance in linear models. Advanced topics chosen from random and mixed linear models, generalized linear, growth curve, and nonlinear models, quartile and copula regression. May be repeated up to 6 credits.
Prerequisite(s): STAT 571.

STAT 581. Advanced Theory of Statistics I
3 Credits (3)
Testing hypotheses, probability and sufficiency, uniformly most powerful tests, unbiasedness, invariance, and minimax principle.
Prerequisite: STAT 525 or consent of instructor.

STAT 582. Advanced Theory of Statistics II
3 Credits (3)
Estimation of parameters; unbiased estimators; equivariance; Bayes properties; large sample theory and optimality.
Prerequisite: STAT 581 or consent of instructor.

STAT 598. Special Research Problems
1-3 Credits
Individual investigations or consulting programs. Maximum of 3 credits.
SUR 143. Civil/Survey Drafting I  
3 Credits (2+2P)  
Introduction to drafting in the field of Civil Engineering. Drawings, projects, and terminologies related to topographic mapping, contour drawings, plan, and profiles as street/highway layout.  
Prerequisite: DRFT 109.  
Learning Outcomes  
1. Students will develop a basic knowledge of AutoCad Civil 3D software as they relate to the civil drafting process. Students will become familiar with a basic understanding of computers, drafting and trigonometry is required. Use of long-term projects will be utilized to simulate real-world work environments to aid the understanding and applying vocabulary on surveying drafting plans. An ability to apply current knowledge and adapt to emerging applications of mathematics, science, engineering and technology.

SUR 222. Introduction to Geomatics  
3 Credits (2+3P)  
Theory and practice of geomatics as applied to plane surveying in the areas of linear measurements, angle measurements, area determination, differential and trigonometric leveling, and topographic mapping. Crosslisted with: DRFT 222.  
Prerequisite: MATH 1250G or MATH 1430G.  
Learning Outcomes  
1. Various

SUR 285. Precise Digital Mapping  
3 Credits (3)  
Photogrammetric Mapping Principles, digital sensor including optical cameras, terrestrial, surveying control, IMU & GPS integration, stereo photography, analytical triangulation, orthorectification, precision and accuracy of measurement systems, sUAS (Small Unmanned Aerial Vehicles) applications to geospatial data collection and practical applications project flight/pre planning, sensor platform, FAA regulations and restrictions, introduction to laser scanning systems. Restricted to Las Cruces campus only.

SUR 292. Legal Principles and Boundary Law I  
3 Credits (3)  
Fundamentals of real property law; principles of land description; survey evidence and procedure in boundary determination, order of importance of conflicting elements; and liability, ethical and professional principles in boundary surveying; contemporary issues in boundary determination.  
Learning Outcomes  
1. Understand how the USPLSS was developed and used. Be able to locate and identify USPLSS survey monuments. Be able to apply single and double proportion methods. Be able to subdivide USPLSS sections. Be able to read, write and interpret USPLSS legal descriptions.

SUR 312. Public Land Survey System Boundaries  
3 Credits (3)  
Fundamentals of the U.S. Public Land Survey System; rules for the survey of the public lands, field surveys; the rectangular system, corners, monuments, evidence; dependent and independent resurveys, corner restoration; plats and field notes, patents.  
Learning Outcomes  
1. Demonstrate an understanding of surveying boundary laws. Describe procedures for locating real property boundaries. Read, interpret and write legal descriptions of real property. Perform legal research of case and statutory law. Communicate research findings through written and oral presentation.

SUR 328. Construction Surveying & Automation Technologies  
3 Credits (2+3P)  
Prerequisite: (SUR 222 or DRFT 222) and (MATH 1511G or MATH 1430G or MATH 1435).

Learning Outcomes  
1. Various

SUR 330. Computer Applications of Surveying  
3 Credits (2+3P)  
Advanced application of concepts and tools used in the manipulation of geospatial data in a computer environment. Topics include the use of surveying-specific software applications for problem solving, analysis and generation of spatial data products. Advanced programming skills in a high level language are presented and applied.  
Prerequisite: DRFT 109 AND SUR 222, and (MATH 1511G or MATH 1430G or MATH 1435) and (ET 262 or ENGR 140).

Learning Outcomes  
1. Various

SUR 351. Spatial Data Adjustment I  
3 Credits (3)  
Theory of random error in observations/measurements. Use of statistics in spatial data analysis, statistical testing, advanced data structures. Emphasis on computer based problem solving and programming to solve spatial data problems.  
Prerequisite: (SUR 222 or DRFT 222) and (MATH 1511G or MATH 1435 or MATH 1430G) and (AST 311G or MATH 1350G).

Learning Outcomes  
1. Various
SUR 361. Geodesy/Geodetic Control Surveying
3 Credits (3)
Horizontal and vertical control network design and consideration. Understand ellipsoid, geoid, horizontal and vertical datum, coordinates, precise leveling, astronomic, establishment of state plane zones, understanding reporting. Transform data between geodetic Latitude/Longitude, state plane, ground data, perform geodetic computations, ability to design GPS networks utilizing CORS stations, network adjustments. Perform a control survey, process data, adjust network, and prepare control report with Meta-data.
Prerequisite: (SUR 222 or DRFT 222) and (MATH 1511G or MATH 1435 or MATH 1430G).
Learning Outcomes
1. Various

SUR 370. Control Surveying
3 Credits (2+3P)
Prerequisite: SUR 222 and (MATH 1511G or MATH 1430G or MATH 1435).
Learning Outcomes
1. Various

SUR 401. Ethics and Professionalism in Surveying and Mapping
3 Credits (3)
Ethics as applied to the surveying profession. Includes case studies and problems.
Prerequisite: ...
Learning Outcomes
1. An ability to communicate effectively with a range of audiences. An ability to understand ethical and professional responsibilities and the impact of technical and/or scientific solutions in global, economic, environmental, and societal contexts.

SUR 412. Advanced Topics in Boundary Surveying
3 Credits (2+3P)
Advanced land boundary topics including water boundaries, mineral claims, Spanish and Mexican land grants, state and national boundaries.
Prerequisite: SUR 312.

SUR 450. Senior Project
3 Credits (3)
Research project prepared by student. Includes class presentation. Students will learn how to research after the end of their formal education. Students must be in Senior Standing to enroll.
Learning Outcomes
1. An ability to identify, formulate, and solve broadly defined technical or scientific problems by applying knowledge of mathematics and science and/or technical topics to areas relevant to the discipline. An ability to formulate or design a system, process, procedure or program to meet desired needs. An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions. An ability to communicate effectively with a range of audiences.

SUR 451. Spatial Data Adjustment II
3 Credits (3)
Rigorous analysis of the theory of observations as applied to spatial data, application of least squares adjustments, ability to perform statistical analysis to determine accuracy of final product, constrained/free geospatial data integration, error ellipses, and pre-analysis of spatial data acquisition procedures.
Prerequisite: SUR 351.
Learning Outcomes
1. Understand the theory of least squares as applied to survey measurements Understand the relevance of weighting survey observations Be able to adjust vertical, horizontal and 3D networks by least squares Be able to transform coordinates between similar coordinate systems Be able to analyze survey errors and detect survey blunders

SUR 452. Spatial Data Integration and Analysis
3 Credits (3)
Surveying practice under the direction of a licensed, professional land surveyor requiring an approved number of hours. Planned work between the student and the surveyor should be designed to be part of a project that integrates spatial data. An individualized syllabus should be developed collaboratively with the industrial partner and approved by the geomatics faculty. The final deliverable must be certified by the licensed professional land surveyor. A written report by the student is required. Credit is given to past work experience in cases where students can demonstrate that requirements for the practicum are met and should be approved by geomatics faculty.
Learning Outcomes
1. An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions. An ability to communicate effectively with a range of audiences. An ability to understand ethical and professional responsibilities and the impact of technical and/or scientific solutions in global, economic, environmental, and societal contexts. An ability to function effectively on teams that establish goals, plan tasks, meet deadlines, and analyze risk and uncertainty.

SUR 461. GNSS Positioning
3 Credits (2+3P)
Logistics of GNSS data collection, the GPS signal, codes and biases, error sources, differences between relative and autonomous GNSS positioning, code phase carrier, DGPS static and RTK surveys. Geodetic and GPS standards and specifications GNSS data processing, network adjustments, and evaluation of spatial data accuracy practical applications of GNSS may be repeated up to 3 credits.
Prerequisite(s): SUR 361.

SUR 464. Legal Principles and Boundary Law II
3 Credits (3)
ALTA Surveys and Standards, boundary evidence, order of evidence, Subdivision and Platting Law, Mexican and Spanish land grants, water boundaries, sequential and simultaneous conveyances. Consent of Instructor required.
Prerequisite(s): SUR 312.
SUR 485. Emerging Techniques in Geospatial Technologies
3 Credits (3)
Hydrographic, Altimetry, Space borne Imaging Systems, Mobile Mapping Systems, Mining and Agriculture Surveying Principles, Ranging technologies and applications such as LiDAR, SAR, and Bathymetry. Principles of terrestrial & airborne laser scanning, point cloud data management & extraction, scan registration and processing, and advanced ranging data acquisition systems. Consent of Instructor required.
Prerequisite(s): Senior standing.

SURG-SURGICAL TECHNOLOGY

SURG 120. Surgical Technology Clinical I
2-4 Credits (6P)
This is a health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. This course is designed to prepare the student to enter the surgical environment. This course provides an introduction to the operating room, observation of surgical procedures, direct participation in the preoperative (pre-op, intra-op, post-op) preparation of individual cases and professional roles and responsibilities of individual members of the surgical team. Direct supervision is provided by the clinical professional. May be repeated up to 4 credits. Students must be admitted into Surgical Technology Program to enroll in this course.
Prerequisite(s): BIOL 2310, BIOL 2210, BIOL 2225, NURS 150.
Corequisite(s): SURG 140, SURG 145.

SURG 140. Introduction to Surgical Technology
4 Credits (4)
This is an orientation to surgical technology theory, surgical pharmacology and anesthesia, technology sciences and patient care concepts and is designed to prepare the student to enter the surgical environment with entry-level knowledge necessary to understand patient responses to disease, illness, hospitalization, surgical procedures, commonly used pharmacological and anesthetic agents, and legal, moral, and ethical issues that could be encountered in the surgical environment. Restricted to Community Colleges campuses only.
Prerequisite(s): Admission to Surgical Technology Program; BIOL 2310, BIOL 2225, & NURS 150.

SURG 145. Fundamentals of Perioperative Concepts & Techniques
4-5 Credits (3+3P)
This is an in-depth coverage of perioperative concepts such as aseptic/sterile principles and practice, infectious processes, wound healing and creation and maintenance of the sterile field. This course is designed to prepare the student to enter the surgical environment with entry-level knowledge of aseptic technique principles and practices, the creation and maintenance of the sterile field including equipment, supplies and instrumentation, and basic case preparation and procedures. An introduction to diseases and disease processes that may be displayed by the surgical patient and the patient’s bodily responses to disease are also included. May be repeated up to 5 credits.
Prerequisite(s): Admission to Surgical Technology Program, BIOL 2310, BIOL 2225, & NURS 150.

SURG 150. Surgical Procedures I
4-5 Credits (3-5+3P)
This course is an introduction to surgical procedures and its related pathologies. Emphasis on surgical procedures related to general, obstetrics/gynecology, genitourinary, otolaryngology and orthopedic surgical specialties incorporating instruments, equipment. It is designed to prepare the student to function actively in the surgical environment with entry-level knowledge of surgical procedures. This course expands the basic foundation principles and combines the study of common surgical procedures to include anatomy, physiology and pathophysiology. Specific patient care concepts, medications, instrumentation, equipment, supplies and complication related to selected surgical procedures will be discussed. Admission to Surgical Technology Program necessary to enroll in the course.
Prerequisite(s): SURG 140, SURG 145, and SURG 120.

SURG 155. Pharmacology for the Surgical Technology
2 Credits (2)
This is an orientation to surgical pharmacology and anesthesia and is designed to prepare the student to enter the surgical environment with knowledge necessary to categorize the classification of drugs, calculate drug dosages and identify the therapeutic use, routes of administration, indications, contraindications and adverse effects of pharmacologic agents used in the perioperative setting. This course is the foundation for the acquisition of program specific competencies as identified by the AST Core Curriculum. Restricted to Carlsbad campus only.

SURG 160. Surgical Procedures II
6 Credits (6)
This an introduction to surgical procedures and related pathologies. Emphasis on surgical procedures related to thoracic, peripheral vascular, plastic/reconstructive, ophthalmology, cardiac and neurological surgical specialties incorporating instruments. The course is designed to prepare the student to continue to function actively in the surgical environment with entry-level knowledge of more complex surgical procedures. This course expands the basic foundation principles and combines the study of complex surgical procedures to include anatomy, physiology, and pathophysiology. Specific patient care concepts, medications, instrumentation, equipment, supplies, and complications related to specific surgical procedures will be discussed. Realities of clinical practice and concepts of death and dying will also be discussed. Admission to Surgical Technology Program necessary to enroll in the course.
Prerequisite(s): SURG 150, SURG 260.

SURG 230. Professional Readiness
2 Credits (2)
This course transitions the student into professional readiness for employment, professional readiness for attaining certification and professional readiness for maintaining certification status. Admission to Surgical Technology Program necessary to enroll in the course.
Prerequisite(s): SURG 140, SURG 145, SURG 120, SURG 150, SURG 260.
Corequisite(s): SURG 160,SURG 265.
**TCEN-ENVIRONMENTAL/ENERGY TECH**

**TCEN 101. Energy for the Next Generation**

3 Credits (2+2P)

This course will survey a broad range of sources of energy, types of energy, energy storage, and the forms of energy. Students will be exposed to theory in the classroom, laboratory exercises, and field trips to provide them with a solid foundation for all subsequent energy related environmental courses. Crosslisted with: OETS 101.

**Prerequisite(s)/Corequisite(s):** OETS 118 or MATH 1215. Restricted to Community Colleges only.

**TCEN 105. Building Analyst I**

3 Credits (2+2P)

This course is designed to provide the foundational knowledge and expertise necessary for the energy auditor and home performance contractor. Crosslisted with: OETS 105. Restricted to Community Colleges only.

**TCEN 106. Building Analyst II**

3 Credits (2+2P)

Designed to prepare the student for the BPI Building Analyst Certification. This course will walk the student through the hands-on process of conducting visual building inspections, diagnostic testing, identifying improvement opportunities, documenting a home's performance and preparing a scope of work. Crosslisted with: OETS106.

**Prerequisite(s)/Corequisite(s):** TCEN 105 or OETS 105. Restricted to Community Colleges only.

**TCEN 110. Photovoltaic Application**

4 Credits (3+2P)

This course will provide an introduction to Photovoltaic (PV) installation. The course will provide instruction on site selection, prep, installation, and maintenance for photovoltaic applications. Students that complete the course and have the opportunity to take the entry level exam with the North American Board of Certified Energy Practitioners (NABCEP) en route to becoming Certified Installers. Crosslisted with: OETS110.

**Prerequisite(s)/Corequisite(s):** TCEN 101 or OETS 101. Restricted to Community Colleges only.

**TCEN 111. Basic Electrical Principles I, DC Circuits**

4 Credits (3+2P)

Course begins with the basics of electricity and DC circuits. Includes categorization of material properties within conductors, semiconductors, and insulators. Gradual progression tackles more complex topics like DC circuit analysis of series and parallel circuits, including Kirchhoff's laws, Thevenin's & Norton's theorems, and superposition. Finally DC combination circuits, magnetism and electromagnetism, generators and motors are covered. Emphasis on safety throughout. May be repeated up to 4 credits.

**Prerequisite(s)/Corequisite(s):** OETS 104 or MATH 1215. Restricted to Community Colleges campuses only.

**TCEN 112. PV Power Generation Design Fundamentals**

3 Credits (2+2P)

A study of photo voltaic design basics, photo voltaic (PV) Cells, modules, and system components; electrical circuits; grid-tied/grid-interactive PV system design and sizing for use on homes; solar electric products and applications; and understanding energy conversion from sunlight to electricity, and working with solar conversion equipment. May be repeated up to 3 credits.

**Prerequisite(s)/Corequisite(s):** TCEN 111 and (OETS 104 or MATH 1215). Restricted to Community Colleges campuses only.

**TCEN 113. OSHA 10 Hour Construction Hazard Identifications**

1 Credit

Intended for entry-level participants to provide instruction on a variety of construction safety and health standards. Topics include Introduction to OSHA, Electrical, Ladder, Excavation, Scaffold, and Forklift Hazards, Fall Protection, Materials Handling, Personnel Protective Equipment and Confined Space Entry Hazards. Meets OSHA 10-Hour Requirements.

**TCEN 115. Wind Power Generation Design Fundamentals**

3 Credits (2+2P)

Course covers wind turbine module descriptions and functions and wind system installation, operation, and troubleshooting. Additional topics include wind energy harvesting and the conversion process from the generator system to electricity. May be repeated up to 3 credits.

**Prerequisite(s)/Corequisite(s):** TCEN 111 and (OETS 104 or MATH 1215). Restricted to Community Colleges campuses only.

**TCEN 121. Basic Electrical Principles II, AC Circuits**

4 Credits (3+2P)

Course begins with an overview of the primary components of AC circuits, such as resistors, inductors, rectifiers, transformers and capacitors, and then gradually introduces new, more complicated topics like applying AC principles in power generation and generators, motors, parallel and combination circuits, troubleshooting and evaluation of circuit conditions. May be repeated up to 4 credits.

**Prerequisite(s)/Corequisite(s):** TCEN 111 and (OETS 104 or MATH 1215). Restricted to Community Colleges campuses only.
TCEN 156. Building Envelope
3 Credits (2+2P)
Designed to prepare the student for the BPI Building Envelope Certification. This course will provide the principles behind building performance testing and the purpose of completing a comprehensive energy audit. Through lecture and subsequent field training, the student will learn how to use building diagnostics to develop a prescriptive plan for enhancing comfort, health & safety, building durability, and energy savings. The student will learn how to outline the follow-up process required after completion of the retrofit. Crosslisted with: OETS156. Restricted to: Community Colleges only.
Prerequisite(s): TCEN 106 or OETS 106.

TCEN 205. NEC for Alternative Energy
4 Credits (2+4P)
This hands-on course will cover the National Electrical Code specifics concerning photovoltaic installation. Also code compliant wiring of basic electrical systems will be covered. Existing installations will be visited and studied. Restricted to: Community Colleges only.
Prerequisite(s): TCEN 101 and ELT 105.

TCEN 220. Cooperative Experience
1-3 Credits (1-3)
Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor. May be repeated up to 6 credits. Consent of Instructor required.
Prerequisite(s)/Corequisite(s): MAT 235. Prerequisite(s): TCEN 180. Restricted to: TCEN majors. Graded: S/U Grading (S/U, Audit). Restricted to: Community Colleges only.

TCEN 221. Roofing Materials and Methods
3 Credits (2+2P)
Covers application techniques and estimation of asphalt and wood roofing products and accessories including gutters and flashing. Presents roof penetration, roof loading issues, and energy system installation requirements for mounting photo voltaic or solar thermal systems.
Prerequisite(s): TCEN 112.

TCEN 222. Photo Voltaic Grid Tie Installation
4 Credits (3+2P)
This is a more advanced course culminating in a PV system-to-grid connection. This course includes site-specific data, design, wire type and sizing specific to project, installation of all solar modules and balance of system (BOS) components, and grounding and bonding of system components, all in accordance with the latest NEC. Upon project design approval a system will be commissioned for the grid. Decommissioning will commence after measurements and troubleshooting as directed by the instructor. May be repeated up to 4 credits.
Prerequisite(s)/Corequisite(s): TCEN 121 and TCEN 223. Prerequisite(s): TCEN 111 and TCEN 112. Restricted to Community Colleges campuses only.

TCEN 223. National Electric Code Principles in Relation to Photo Voltaic
2 Credits (2+1P)
Focuses on all sections of the National Electrical Code and local code requirements applicable to photo voltaic electrical installation. A partial list of areas covered is chapters one through four and section 690, "Solar Photovoltaic Systems" of the National Electrical Code.
Prerequisite: TCEN 112.
Prerequisite/Corequisite: TCEN 222.

Learning Outcomes
1. Identify the requirements for safe and practical solar PV installations. Accurately reference, read, and interpret NEC code as it relates to PV installations (Code 690). Present a compelling case of when the PV electricity market will reach "grid- parity."

TCEN 224. Field Experience
1-3 Credits (1-3)
Student will collaborate with instructor in proposing, defining, implementing, and analyzing outcomes of a project in the Environmental and Energy fields of study. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: TCEN majors. Restricted to: Community Colleges only.

TCEN 241. Solar Thermal SHW Principles/Installation and Maintenance
3 Credits (2+2P)
Course presents the theory, installation, operation, and maintenance of solar hot water (SHW) systems. Topics include the types of systems to choose, the costs associated with SHW installation and operation, system sizing requirements, batteries and battery chemistry. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.
Prerequisite(s): OETS 104 or MATH 1215.

TCEN 246. Building Weatherization & Auditor Fundamentals
3 Credits (3)
Course provides information on how to locate air leaks and identify heat losses or gains through specific testing. Students will learn how to inspect and evaluate building envelopes, mechanical systems, and ventilation systems to determine the safety and energy consumption for each system. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.
Prerequisite(s): TCEN 113 and OETS 104.
Corequisite(s): TCEN 221.

TCEN 251. Advanced Photo Voltaic On/Off Grid Installation
3 Credits (2+2P)
Photo Voltaic advanced topics to include panel racking and installation, battery storage, charge controllers, mechanical integration of arrays on buildings, and key elements involved in choosing a mounting system. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): TCEN 222. Restricted to Community Colleges campuses only.
Learning Outcomes

spectatorship, history, theory, and criticism. will examine various components that comprise theatre, such as acting, This course provides an introduction to the study of theatre. Students
THEA 1110G. Introduction to Theatre
3 Credits (3)
This course provides an introduction to the study of theatre. Students will examine various components that comprise theatre, such as acting, direct ing, playing, drameurty, scenic and costume design, stagecraft, spectatorship, history, theory, and criticism.
Learning Outcomes
1. Define and discuss basic theatre terms and concepts.
2. Discuss the fundamental elements of theatre, and the ways in which theatre differs from other art forms.
3. Analyze and critique the elements of a live theatrical production.
4. Identify and describe the roles of various theatre artists including actors, directors, playwrights, dramaturges, and designers.
THEA 1210G. Acting for Non-Majors
3 Credits (3)
This class gives non-majors experience in the depth and craft of the actor's art. Students will learn various terms, techniques, and practices of acting and will demonstrate their understanding in class. Through exercises and improvisations, partnered scenes, and group work, students will be better able to appreciate the work of others as they learn techniques of performing. May be repeated up to 3 credits.
Learning Outcomes
1. Develop fundamental physical, vocal, analytical, and imaginative skills for acting for the stage.
2. Apply fundamental techniques of voice and movement for the stage.
3. Apply principles of play text analysis to understand story, character, and meaning.
4. Gain a better understanding of an actor's approach to goals, tactics, and obstacles.
5. Engage in character creation and development while preparing and performing monologues and scenes.
6. Learn a common vocabulary to help discuss the process of acting.
7. Employ collaborative methods of work with a partner and in groups.
8. Observe and evaluate acting skills of other actors.
9. Increase verbal and physical communication skills which are applicable in any field.
10. Develop personal and social responsibility via group work, research and self-reflection.
11. Increase confidence and self-esteem via continuous presentations with supportive feedback.
THEA 1221. Stage Movement
3 Credits (3)
Physical techniques for the actor to develop kinesthetic awareness and skills in characterization, archetypes, and stage combat. Restricted to: THTR majors.
Learning Outcomes
1. To provide fundamental training in a variety of movement techniques which can be applied to both theatrical performance and physical communication in everyday life.
2. Observation and critical skills will be advanced through class participation and outside assignments.
3. Class exercises are aimed at guiding participants to uncover their own creative expression, while working with efficient, healthy body alignment.
THEA 1223. The Art of Theatre
3 Credits (3)
This course introduces the variety and scope of theatre professions, the value and goals of the theatre major and an analysis of the art form from script to stage. Restricted to: Required for THTR majors.

**Learning Outcomes**
1. An overview of the history of theatre in the Western world
2. A general understanding of the artistic roles and functions within the theatre industry (including within NMSU Theatre as a model)
3. A strong preparation for independent in-depth script analysis and theatre critique

THEA 1310. Introduction to Costuming
3 Credits (3)
This course introduces students to basic skills generally used in creating costumes for theatre. During the semester students will be introduced to the costume shop, equipment, supplies, and processes. They will learn the process of sewing a garment and running a stage production.

**Prerequisite(s)/Corequisite(s):** THEA 1310L. Restricted to: THTR majors.

**Learning Outcomes**
1. Demonstrate basic hand and machine sewing skills.
2. Use basic costume craft tools and techniques.
3. Analyze fabric selection for the stage.
4. Draft and use patterns.
5. Take body measurements for patterning and construct a costume from those measurements.
6. Combine interpersonal communication skills with costume construction skills.
7. Analyze a script for costume design purposes.
8. Build a garment.

THEA 1310L. Costume Craft Lab
1 Credit (1)
Class members will assist in construction for productions in a studio environment.

**Prerequisite(s)/Corequisite(s):** THEA 1310.

**Learning Outcomes**
1. This laboratory class compliments THEA 1310: Costume Crafts.
2. It gives the student an opportunity to put into practice the skills learned in THEA 1310 as well as be introduced to and participate in the day-to-day operations of the Costume Shop.

THEA 1415. Running Crew I
2 Credits (1+2P)
Students learn about backstage and front of house production positions and work on a technical aspect of a product in a rehearsal and performance environment.

**Learning Outcomes**
1. Students will learn one, or more, of the basic technical elements of theatrical crew work.

THEA 2221. Intermediate Acting: Scene Study and Monologues
3 Credits (3)
Monologues and scene work, using character and script analysis.

**Prerequisite(s):**
THEA 1221 or THEA 1210 with C- or above.

**Learning Outcomes**
1. Students will gain further insight into the craft of acting and the techniques and skills required to present a successful stage performance.
2. Via the presentation of varied scenes and monologues, students will be exposed to a variety of theatrical literature.
3. Via research, students will gain knowledge of successful actors, acting techniques, and career advice.

THEA 2222. Intermediate Acting for Non-Majors
3 Credits (3)
A continuation of THEA 1210 with an emphasis on monologues, scenes and characterization. Prerequisite(s): THEA 1210

**Learning Outcomes**
1. Apply fundamental techniques of voice and movement for the stage.
2. Analyze a dramatic text and interpret a character and develop the skills necessary to score a script for character development.
3. Perform specific choices to create and perform goal-driven characters.
4. Demonstrate various physical and mental relaxation techniques.
5. Identify internal and external techniques to increase actor’s emotional range.
6. Demonstrate sensory exercises and apply this technique to scene work.
7. Articulate and implement key terminology of modern acting techniques.
8. Develop and articulate a basic personal artistic process.
9. Demonstrate the ability to work cooperatively on a creative/ interpretative project.
10. Begin to develop professionalism and development of a critical eye through practice giving and receiving peer feedback, adherence to deadlines, memorization, flexibility and coachability.

THEA 2310. Stagecraft
3 Credits (3)
Student will explore basic skills for scenic designers and techniques of set construction for the stage, including building scenery, rigging, painting and properties.

**Prerequisite(s)/Corequisite(s):** THEA 2310L.

**Learning Outcomes**
1. Demonstrate a range of technical skills, which will qualify them to assist in the basic technical 2. Production of a play.
3. Demonstrate and apply how to safely and competently use hand tools, power tools, electrical, and electronic stage equipment.
4. Analyze the technical aspects of a play in performance.
5. Read and construct scenery from ground plans, elevations, and drawings.
6. Analyze a script from the perspective of a designer, artistic, and/ or technical director.
THEA 2310L. Stagecraft Laboratory
1 Credit (1)
Class members will assist with construction for productions in a studio environment.
Prerequisite(s)/Corequisite(s): THEA 2310.
Learning Outcomes
1. History of scenic design and the development of present day stage design.
2. How to create and interpret basic scenic ground plans, elevations, and detail drawings.
3. To construct basic scenic structures to include flats and platforms.
4. Various techniques of scenic painting and decorating.
5. The installations of theatre lighting instruments and sound equipment.

THEA 2340. Introduction to Design
3 Credits (3)
Introduction into our visual world via the language of designers, focusing on collaboration, creative thinking and presentation skills. The varied design professions in theatre and the performing arts will be explored. Restricted to: Required of all THTR Majors.
Learning Outcomes
1. Apply design vocabulary and descriptions when speaking about design.
2. Identify design tools and make choices about where to use them.
3. Apply the foundation information in understanding how design tools work.
4. Apply correct terminology in assessing design and script analysis.
5. Read and understand some of the design documents commonly used in the industry.

THEA 2415. Running Crew II
1 Credit (1)
Students learn about backstage and front of house production positions and work on a technical aspect of a product in a rehearsal and performance environment.
Learning Outcomes
1. To provide students with “hands on” experience participating in being a member of a running crew on a theatrical production.
2. Students will learn one, or more, of the basic technical elements of theatrical crew work.

THEA 2421. Vocal Production for the Actor
3 Credits (3)
Exploration and development of the actor’s vocal instrument, including relaxation, projection, diction and articulation. May be repeated up to 3 credits. Restricted to: THTR majors.

THEA 2993. Theatre Workshop I
0.5 Credits (.5)
Required for all freshman and sophomore theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.
Learning Outcomes
1. This lab course is designed to create community via group meetings with your peers while providing a platform for our guest artists to present information regarding our profession.
2. As time allows, group discussions and sharing will further the sense of community and collaboration with your peers.
3. This forum also provides an opportunity to discuss and provide feedback for each production in the ASTC season.

THEA 2996. Theatre Topics
1-3 Credits (1-3)
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.
Learning Outcomes
1. Varies

THEA 300. Theatre Workshop II
0.5 Credits (.5)
Required for all junior and senior theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

THEA 303. Theatre History I
3 Credits (3)
History of theatre and drama from ancient Greece to the English Renaissance.

THEA 304. Theatre History II
3 Credits (3)
History of theatre and drama from the Restoration to the 20th century. May be repeated up to 3 credits.

THEA 305. Advanced Vocal Production
3 Credits (.3)
Advanced exploration and development of the actor’s vocal instrument. May be repeated up to 3 credits. Prerequisite(s): THEA 2421.

THEA 306. Script Analysis
3 Credits (3)
This class is designed to give you tools and specific processes to help you read and break down a text, so that you can make it come alive for audiences in the varied genres of theatre, film and animation.
Learning Outcomes
1. Determine the dramatic structure of a script Write an analysis of a script for production Verbally communicate an analysis of a script for production Analyze a script from a specific perspective such as actor, director, designer, animator, etc.

THEA 307V. Society in Style: Fashion, History and Culture
3 Credits (3)
History of clothing for theatrical purposes, origins and evolution of period clothing in relation to social, political, and aesthetic factors of different periods.
THEA 308. Creative Writing: Playwriting
3 Credits (3)
Technique of one-act playwriting, and analysis of dramatic structure.
Crosslisted with: ENGL 308
Prerequisite(s): ENGL 1110G.

THEA 310. Styles in Acting
3 Credits (3)
Analysis of differing styles of acting through scene work representing
various time periods and genres. May be repeated up to 3 credits.
Consent of Instructor required.
Prerequisite(s): THEA 1221 or THEA 1210 with a C- or better.

THEA 311. Acting for Film and Television
3 Credits (3)
Specific techniques of acting for the camera are explored via hands-on
experiential learning and an introduction to the business of the TV/Film
industry.
Prerequisite(s): THEA 1221 or THEA 1210.

THEA 312. Acting Shakespeare
3 Credits (3)
Acting Shakespeare’s tragedies and comedies, including text work,
scansion, movement, scene work, and monologues. May be repeated up
to 3 credits. Consent of Instructor required.
Prerequisite(s): THEA 1221 or THEA 1210 with a C- or better.

THEA 313. Improvisation
3 Credits (3)
Long and/or short form improvisation techniques in addition to a variety
of exercises exploring terminology, character work and the elements of
comedy.
Prerequisite(s): THEA 1210 or THEA 1221.

THEA 317. Musical Theatre
3 Credits (3)
Acting class focused on developing and refining skills necessary for
performing in musicals. May be repeated up to 9 credits.
Prerequisite(s): THEA 1221 or THEA 1210 with a C- or better.

THEA 318. Modern European Drama
3 Credits (3)
Masterworks of European drama from the 19th century to the present.
Crosslisted with: ENGL 318V.

THEA 322. Dramatic Character
3 Credits (3)
How characters have been created for the stage from the beginning of
theatrical performances in ancient Greece to the present day. Exploring
characterization related to dramatic structure, style, and genre, and how
dramatic characters differ from those in literary fiction. May be repeated
up to 3 credits. Crosslisted with: ENGL 322.

THEA 323. American Drama
3 Credits (3)
Masterworks of American drama from the 20th century to the present.
Crosslisted with: ENGL 323.

THEA 324. Singing for Musical Theatre
3 Credits (3)
Students will gain an understanding of stronger vocal health, aural skills,
and rehearsal practice strategies as they work on musical theatre singing
techniques and performances including solos, duets and small groups,
and a final public showcase.

Learning Outcomes
1. The ability to practice strong vocal habits in order to independently
maintain vocal health. Identify and utilize proper vocal warm-up
techniques. Display an improved level of music reading and aural
awareness. Analyze and break down a piece of theatrical music into
components for focused learning. Perform pieces of music theatre
both individually and in a group with increased ease.

THEA 329. Studies in Drama
3 Credits (3)
Subtitles vary. Study of a group of related works of drama, theory, or
theatre practice. Crosslisted with: ENGL 329 and FDMA 329.

THEA 330. Special Topics: Variable
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes.

Learning Outcomes
1. To gain knowledge and/or skill in a specialty area of theatre

THEA 334. Introduction to Stage Makeup
3 Credits (3)
Basic principles of stage makeup: straight, character, and specialty.
Includes study of various products, methods of application, and the
effects of lighting on makeup.

THEA 337. Independent Study
1-3 Credits
Students propose and design their own course not covered through
regular course offerings under the guidance of faculty. May be repeated
up to 6 credits. Consent of Instructor required.

THEA 341. Scene Painting
3 Credits (3)
Use of historical painting techniques in a project-driven classroom.
Projects include 2-D and 3-D work, color mixing and theory, painting
scenery, and the use of paint for effects.
Prerequisite(s): THEA 2310.

THEA 343. Costume Patterning
3 Credits (3)
Basic techniques in the production of flat patterns for modern and period
silhouettes including some draping techniques. Consent of Instructor
required.

THEA 345. Costume Practicum
1 Credit (1)
A practical course intended to provide students additional experience and
greater responsibility within the workings of the Costume Shop. May be
repeated up to 1 credits.
Prerequisite(s): THEA 1310.

THEA 346. Scenic Practicum
1 Credit (1)
A practical course intended to provide students additional experience and
greater responsibility within the workings of the Scene Shop. May be
Prerequisite(s): THEA 2310.
THEA 347. Lighting Practicum
1 Credit (1)
A practical course intended to provide students hands-on experience executing theatrical lighting.

THEA 348. Running Crew III
1 Credit (1)
Students will work on a technical aspect of a production in a rehearsal and performance environment.
Prerequisite(s): THEA 1415.

THEA 349. Running Crew IV
1 Credit
Students will work on a technical aspect of a production in a rehearsal and performance environment.
Prerequisite(s): THEA 1415.

THEA 352. Costume Design
3 Credits (3)
Basic principles of costume design, including script analysis, principles of design, drawing and painting.

THEA 353. Scene Design
3 Credits (3)
Design for the performing arts. Basic design skills and projects to exercise those skills, history of design in the theatre and the designer's role in the production process. Final project includes a finished scene design.
Prerequisite: THEA 2310 or consent of instructor.

THEA 354. Sound Design
3 Credits (3)
Hands-on training in theatrical sound design and implementation.

THEA 355. Lighting Design
3 Credits (3)
Basic aspects of theatre lighting, including electricity, color theory, history, and types of lighting instruments.

THEA 356. Theatre Production
1-3 Credits
Participation in the production of theatrical performances by stage managing, acting, designing, dramaturgy, or directing. May be repeated for a maximum of 6 credits. Graded S/U.

THEA 357. Computer Scenographics
3 Credits (3)
Project-oriented course teaching basic computer modeling skills. Projects focus on the creation of communication tools designers use in the theatrical process. Students will develop portfolios of completed projects. Consent of instructor required.
Prerequisite(s): THEA 352, THEA 353, or THEA 355.

THEA 360. Creative Drama
3 Credits (2+2P)
Methods of developing original dramatizations. Emphasis on curriculum problems and teaching techniques in elementary and secondary schools.

THEA 366. Summer Theatre
1-3 Credits
Experience in professional or academic summer theatre. May be repeated for a maximum of 3 credits. Graded: S/U. Restricted to THTR majors.
Prerequisite(s): Consent of department head.

THEA 384. Stage Management
3 Credits (3)
Study of stage management techniques and their application to play production. A working knowledge of union rules, and the procedure to facilitate these through proper communication skills.

THEA 395. Directing I
3 Credits (3)
Study and application of basic stage directing techniques.
Prerequisite(s): THEA 1210 or THEA 1221.

THEA 408. Shakespeare I
3 Credits (3)
Study in Shakespeare's early poems and plays. Repeatable for up to six credits under different subtitles.

Learning Outcomes
1. Analyze Shakespeare's poetry using the methods of close reading
   Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays; Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance

THEA 409. Shakespeare II
3 Credits (3)
Study in Shakespeare's later plays. ENGL 408 is not a prerequisite. Repeatable for up to six credits under different subtitles. Crosslisted with ENGL 409.

Learning Outcomes
1. Analyze Shakespeare's poetry using the methods of close reading;
   Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays; Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance.

THEA 410. Advanced Acting: Contemporary Methods
3 Credits (3)
Acting techniques will be explored focusing on current trends in the profession, from Stanislavski, to Hagen to Meisner. May be repeated up to 3 credits. Consent of instructor required. Restricted to: THTR majors.
Prerequisite(s): THEA 1210 or THEA 1221.

THEA 414. Collaborative Theatre-Making
3 Credits (3)
This course introduces students to the techniques, skills and practice of the collaborative creation of new theatrical material.
Prerequisite(s): THEA 1221.

THEA 417. Musical Theatre II
3 Credits (3)
A continuation of THEA 317, allowing for more advanced musical theatre techniques.
Prerequisite(s): THEA 317.

THEA 430. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

THEA 435. Directed Reading
1-3 Credits
Directed individualized studies. May be repeated for a maximum of 3 credits.
THEA 439. Senior Seminar  
3 Credits (3)  
Course preparing students for professions in and related to the theatre. Restricted to: THTR majors.

THEA 440. Senior Seminar Practicum  
1 Credit (1)  
Capstone course preparing students to apply knowledge of theatre arts toward advanced training or career objectives in the discipline. Consent of instructor required.  
**Prerequisite(s)/Corequisite(s):** THEA 439. Restricted to THTR majors.

THEA 450. The Michael Chekhov Acting Intensive  
3 Credits (3)  
An intensive overview of the performance techniques attributed to Michael Chekhov, applied to theatrical scenes and presentations. May be repeated up to 6 credits. Consent of Instructor required.

THEA 535. Directed Study  
1-3 Credits (1-3)  
For the highly motivated student. Independent projects and individual guidance. Graduate standing and consent of instructor required. May be repeated up to 6 credits.

TOX-TOXICOLOGY  

TOX 361. Basic Toxicology  
3 Credits (3)  
Introduction to the principles of toxicology, discussion of toxic agents, environmental problems, testing procedures, and regulations. Prior course work in biology and chemistry recommended. Crosslisted with: ENVS 361 and TOX 461.  
**Prerequisite(s):** CHEM 1120G or CHEM 1225 or CHEM 1226G and BIOL 2610G or BIOL 2110G.

TOX 461. Toxicology I  
3 Credits (3)  
Introduction to principles of toxicology. Crosslisted with: TOX 361.  
**Prerequisite(s):** CHEM 1226 or CHEM 1225G and (BIOL 2610G or BIOL 2110G).

TOX 598. Special Research Programs  
1-3 Credits (1-3)  
Individual investigations, either analytical or experimental. Graded S/U.

UNIV-UNIVERSITY STUDIES  

UNIV 300. Preparing for the Graduate Record Examination  
1 Credit (1)  
Preparation for taking the Graduate Record Examination including review, test taking strategies and practice for the verbal, quantitative and analytical sections. Graded S/U.

UNIV 350. Peer Education  
3 Credits (3)  
Overview of college student development theory and its application to college student learning and peer education. Supervised experience as a peer educator with training in structured group facilitation.  
**Prerequisite:** consent of instructor.

UNIV 361. NMSU Gospel Choir  
1 Credit (1)  
Students will gain performance experience and exposure to urban contemporary gospel music. Open to all majors. May be taken for unlimited credit.

UNIV 395. Independent Study  
1-3 Credits  
Individualized projects related to the field of learning assistance. May be repeated for a maximum of 3 credits.

UNIV 495. Independent Study  
1-3 Credits (1-3)  
Individualized projects related to the field of learning assistance. Taught with UNIV 395.

WATR-WATER UTILITIES  

WATR 120. Introduction to Water Systems  
3 Credits (3)  
Introduction to and theory of groundwater sources, production, treatment, and distribution.

WATR 130. Wastewater Collection and Basic Treatment Systems  
3 Credits (3)  
Introduction to wastewater characteristics, collection, and basic treatment operations.

WATR 140. Applied Water and Wastewater Math I  
3 Credits (3)  
Introduction to basic water and wastewater mathematics, flows through distribution networks and collection systems, and fundamentals of flow measurement.  
**Prerequisite:** CCDM 114 N or equivalent.

WATR 160. Systems Maintenance  
4 Credits (2+4P)  
Basic tools, equipment, maintenance schedules, chlorinator troubleshooting, and chlorine safety. Hands-on training with valves, pumps, meters and chlorination equipment.

WATR 175. Programmable Logic Controllers  
2 Credits (2)  
This course will introduce students to electrical safety, theory, and the function, operations, programming and troubleshooting of the PLC controlling common electrical components utilized in control circuits associated with the water and wastewater industry. Restricted to: Community Colleges only.

WATR 180. Water Chemistry  
3 Credits (3)  
Basic chemistry with applications to water and wastewater analysis.  
**Prerequisite:** CCDM 114 N or consent of instructor.

WATR 182. Water Chemistry Analysis  
1 Credit (3P)  
Beginning water and wastewater laboratory analysis including gravimetric, volumetric, and quality control techniques.  
**Prerequisite:** CCDM 114 N or equivalent or consent of instructor.

WATR 190. Water and Wastewater Microbiology  
3 Credits (3)  
Overview of microorganisms associated with water and wastewater. Growth and reproduction, energy production, and methods of counting.  
**Prerequisite:** WATR 130, WATR 180, or consent of instructor.

WATR 192. Water and Wastewater Microbiological Analysis  
1 Credit (3P)  
Introduction to water and wastewater treatment operational tests such as BODs, solids testing, activated sludge control tests, use of microscope, and bacteriological techniques.  
**Prerequisites:** WATR 130 and WATR 182, or consent of instructor.
WATR 200. Internship
3-5 Credits
On-the-job training/work experience with municipalities or industries, working in water or wastewater treatment plants, high purity water plants, industrial waste plants, distribution systems, or wastewater collection systems. May be repeated up to 5 credits. Consent of Instructor required. Restricted to: Water Technology majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

WATR 220. Water Treatment Systems
3 Credits (3)
Theory of water systems operation including surface water treatment, fluoridation, sodium zeolite softening, corrosion control, iron removal, various filtration methods, and overview of SDWA.
Prerequisites: WATR 180 and WATR 182 or consent of instructor.

WATR 222. Water Systems Operation
1 Credit (3P)
Operations of various water treatment systems including surface water treatment, sodium zeolite softeners, and various filtration methods.
Prerequisite: WATR 220 or consent of instructor.

WATR 230. Advanced Wastewater Treatment
4 Credits (4)
Calculations and operations involved in wastewater and water reclamation plants.
Prerequisites: WATR 140, WATR 190, and WATR 192, or consent of instructor.

WATR 232. Wastewater Systems Operations
1 Credit (3P)
Operation of pretreatment, primary, and biological treatment units.
Prerequisite: WATR 230 or consent of instructor.

WATR 240. Advanced Water and Wastewater Math II
3 Credits (2+2P)
Prerequisites: WATR 140.

WATR 250. Municipal Systems Management
4 Credits (4)
Management of water utility systems including laws, finance, records, and safety.
Prerequisites: WATR 120, WATR 130.

WATR 270. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

WATR 275. Certification Review
3 Credits (3)
Review of water and wastewater plant operations and laws in preparation for state certification exams. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.
Prerequisite(s): WATR 120, WATR 130, WATR 140, WATR 160.

WATR 285. High Purity Water Treatment Systems
3 Credits (3)
Principles of high purity water production including microfiltration, ultrafiltration, reverse osmosis, and deionization.
Prerequisite: WATR 220.

WATR 287. Advanced Water Chemistry Analysis
3 Credits (6P)
Sampling techniques, analysis, and evaluation of potable water contaminants using gravimetric, volumetric, spectrophotometric, and other instrumentation methods. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): WATR 285. Restricted to Community Colleges campuses only.

WATR 290. Advanced Wastewater Microbiology and Chemistry
3 Credits (3)
Covers NPDES permits and DMR calculations and reporting; 503 sludge regs, including pathogen and vector attraction reduction and pollutants; wetlands, composting, and wastewater treatment ponds microbiology; activated sludge bulking and foaming microbiology and treatment; and use of selector to remove nutrients and prevent the growth of filamentous bacteria.
Prerequisite: WATR 190, WATR 192.

WATR 292. Advanced Wastewater Analysis
3 Credits (6P)
Covers sampling techniques, analysis, and evaluation of wastewater contaminants using gravimetric, volumetric, spectrophotometric, and other instrumentation methods.
Prerequisite: WATR 190 and WATR 192.

WELD-WELDING TECHNOLOGY

WELD 100. Structural Welding I
6 Credits (3+6P)
Development of basic skills in SMAW, OFC, and OFW in accordance with the AWS entry-level welder program.

WELD 102. Welding Fundamentals
3 Credits (2+2P)
Survey of welding and cutting processes for nonmajors. Classroom instruction and laboratory work with OFC/OFW, SMAW, GMAW, FCAW, and plasma arc cutting.

WELD 105. Introduction to Welding
3 Credits (3)
Welding practices, procedures, and terminology. Welding safety, equipment types, electrode types in usage, joint design and testing procedures.

WELD 110. Blueprint Reading (Welding)
3 Credits (3)
Interpretation of prints related to welding. Emphasis on AWS standard symbols for welding, brazing, and nondestructive examination.

WELD 115. Structural Welding II
6 Credits (3+6P)
Continuation of WELD 100. Emphasis on AWS entry and advanced level welder skills with SMAW, including all-position welding with mild and stainless steel electrodes. Plasma arc and air-carbon arc cutting, metallurgy, heat treatment, and weld defects.
Prerequisite: WELD 100.

WELD 120. Basic Metallurgy
3 Credits (3)
Properties of ferrous and nonferrous materials. Service conditions and heat treatment of metals related to welding trade.
Prerequisites: WELD 100 or consent of instructor.
WELD 125. Introduction to Pipe Welding
3 Credits (2+2P)
Pipe fit-up and welding techniques for pipe fitting and pipe weld joint using SMAW, GMAW, GTAW, and FCAW, 2G welding of pipe. Restricted to: Community Colleges only.
Prerequisite(s): WELD 100, WELD 130, and WELD 140, or consent of instructor.

WELD 126. Industrial Pipe Welding
3 Credits (3)
Enhancement of WELD 125. Development of more advanced pipe welding skills.
Prerequisite(s): WELD 110, WELD 130 and WELD 140.
Corequisite(s): WELD 125.

WELD 130. Introduction to GMAW MIG
3 Credits (2+2P)
Development of basic skills with gas metal arc welding (MIG) in accordance with AWS entry-level welder objectives. Wire electrodes, shielding/purge gases, and modes of metal transfer.

WELD 140. Introduction to GTAW TIG
3 Credits (2+2P)
Development for basic skills with gas tungsten arc welding (TIG) in accordance with AWS entry/advanced welder objectives. Welding mild steel, tungsten electrode preparation, filler wire selection, and equipment set-up.

WELD 150. Pipe Welding II
3 Credits (2+2P)
Continuation of WELD 125; with fillet and groove welded joints in a horizontal fixed and 45-degree fixed positions (5-F, 5-G, 6-F, 6-G).
Prerequisite: WELD 125.

WELD 151. Industrial Pipe Welding II
3 Credits (3)
Prerequisite(s): WELD 125 and WELD 126.
Corequisite(s): WELD 150.

WELD 160. Introduction to SAW and FCAW
3 Credits (2+2P)
Submerged arc and flux-cored arc welding. Demonstrations and practice with machine travel submerged arc welding (SAW), flux-cored arc welding (FCAW-G, FCAW-S) on mild steel plate and pipe. Restricted to: Community Colleges only.

WELD 170. Welded Fabrication
3 Credits (1+4P)
Development of fabrication skills including basic layout, measuring, and utilization of various welding processes including out-of-position welding. Use of common shop tools.
Prerequisites: WELD 100, WELD 110, WELD 130, and OETS 104 or OETS 118.

WELD 180. GTAW II
3 Credits (2+2P)
Continuation of WELD 140. Development of more advanced GTAW skills. Emphasis on pipe welding with mild steel, stainless steel, and aluminum.
Prerequisite: WELD 140 or consent of instructor.

WELD 190. Welded Art
3 Credits (1+4P)
Students explore the possibilities of welded art in the form of sculpture, jewelry, furniture and as a framework to support other art media. Offered as an elective for students who wish to create art using welding. May be repeated up to 12 credits. Restricted to Community Colleges campuses only.
Prerequisite(s): WELD 102.

WELD 211. Welder Qualification
6 Credits (3+6P)
Laboratory and classroom instruction on AWS and ASME Welder Performance Qualification Tests. All position plate and pipe techniques and tests for SMAW, GMAW, GTAW, FCAW, and SAW. Nondestructive and destructive examination methods. Basics of welding codes. Restricted to majors.
Prerequisites: OETS 104 or OETS 118; and WELD 100, WELD 110, WELD 120, WELD 130, WELD 140, WELD 160 and WELD 180 or consent of instructor.

WELD 221. Cooperative Experience I
1-6 Credits
Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor. Student will meet in a weekly class. Graded S/U. Restricted to majors.
Prerequisites: WELD 100 or WELD 101 and consent of instructor.

WELD 255. Special Problems in Welding Technology
1-6 Credits
Individual studies in areas of welding technology. May be repeated for a maximum of 12 credits.
Prerequisite: consent of instructor.

WELD 295. Special Topics
1-4 Credits
Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

WSAM 470. Environmental Impacts of Land Use and Contaminant Remediation
3 Credits (3)
The course will cover the integrated assessment of soil erosion, contaminant transport in soil and water, and contaminant remediation from site scale to watershed scales. Understanding of the controlling factors for each type land use impact will be gained through the use of risk assessment, case studies, and computer modeling. Case studies will illustrate the processes under various environmental applications. This course will also cover the application of solute transport principles and methods for the remediation of contaminated soil and groundwater. It will also discuss the contaminated site characterization, monitoring, and remediation design. Discussions of innovative methodologies will be supported with case studies. May be repeated up to 3 credits. Crosslisted with: ENVS 470.

WSAM 550. Special Topics
1-4 Credits (1-4)
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 9 credits.

Learning Outcomes
1. Readings, discussions, and/or field and laboratory investigation of selected problems.
WSAM 551. Earth Data Retrieval
3 Credits (3)
This course covers topics related to identifying sources, preprocessing, utilizing earth data that can be used to monitor some hydrological and water related variables, vegetation growth and related biophysical properties. The course focuses on developing students' skills on how to handle and analyze high-level large amounts of research data in different formats (e.g., .hdf). The course highlights the use of remote sensing and land surface models-based (NLDAS) earth observation datasets (e.g., NDVI, LST, Ta, and ET). The course uses some open-source tools including Python, API as well as MATLAB. Crosslisted with: RGSC 551.

WSAM 575. Climate Studies, Water and Society
3 Credits (3)
The course provides a brief description of the Earth's climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water availability) vulnerability of human systems (e.g., agriculture) to climate change, and mitigation and adaptation strategies. Crosslisted with: RGSC 575.

WSAM 585. Land Cover Analysis for Natural Resources
3 Credits (3)
This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g., .hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis. Crosslisted with: RGSC 585.

WSAM 589. Landscape Hydrology Modeling
3 Credits (3)
Understand the landscape scale of hydrologic cycle and related hydrological processes. Quantitatively evaluate hydrological system components. Retrieve, visualize and model some of the physical processes using some of the available tools. Consent of Instructor required.

WSAM 590. System Dynamics
3 Credits (3)
This course takes a system dynamics approach to the study of economics and natural resources management. We will examine some of the example theories such as Solow-Swan model and endogenous growth theories as well as the tragedy of the commons, using system dynamics tools to uncover the feedback and explicitly examine its impact on the dynamic behavior of the system. Through these examples, we will learn how to develop, validate, and use system dynamics models for policy design and analysis. Crosslisted with: RGSC 590.

Learning Outcomes
1. Identify common generic structures and behavioral modes in socioeconomic and ecological systems,
2. Define important feedback theories that explain the behavioral modes in socioeconomic and ecological systems, and
3. Implement the system dynamics method to translate the feedback theories into dynamic simulation models.

WSAM 599. Masters Thesis
1-15 Credits (1-15)

WSAM 600. Doctoral Research
1-15 Credits (1-15)
Assigned credit for research performed. May be repeated up to 15 credits. Consent of Instructor required.

Learning Outcomes
1. Identify appropriate research methodologies.
2. Reflect on their own research, identifying lessons learned, strengths, and ways to improve.
3. Communicate confidently and constructively with faculty advisors.

WSAM 605. Arid Land Water Resources
3 Credits (2+2P)
The course will cover various issues of relevance to water resources and water supply management within the Southwest US and other semi-arid and arid regions. Discussions may include development and sustainability, climate change and drought, socioeconomic and cultural, and transboundary issues. May be repeated up to 3 credits. Crosslisted with: ENVS 605.

WSAM 610. Water and Sustainable Economic Development
3 Credits (3)
For graduate students in the Water Science and Management or other research degree programs, use the water economics literature as a model for student research leading to an M.S. thesis or Ph.D. dissertation.

WSAM 700. Doctoral Dissertation
1-15 Credits (1-15)
