Physics

Undergraduate Program Information

A bachelor's degree in physics or engineering physics provides the basis for careers in industry, teaching, the military, government or for study toward advanced degrees in physics or engineering. It should also provide the skills that recipients of physics degrees have listed as among the most important in obtaining their current positions, including problem solving ability, computer skills, mathematical skills, and laboratory skills, as well as knowledge of physics.

Further information about the department may be found on the web at www.physics.nmsu.edu. All incoming (new or transfer) students must schedule an orientation meeting with the department head and/or the undergraduate program head before their first semester at NMSU. All students will be assigned a faculty advisor in the physics department to discuss course selection, career resources, internships and coops, and other topics.

Graduate Program Information

The Department of Physics offers programs in many areas of emphasis leading to the MS and Ph.D. degrees. Admission to these programs is competitive and selection of applicants is based on undergraduate and/or previous graduate grade-point averages, performance on the general and subject Graduate Record Examination, other evidence of prior academic and research accomplishments submitted by the applicant, and reference letters, as well as, in the case of applicants for the doctoral program, matching of the applicant's research interests, as described by the student's statement of purpose, to the Department's research activities.

All degree-seeking graduate students must satisfy the relevant Graduate School requirements, successfully complete a 3-credit, 500-level laboratory, and demonstrate or develop knowledge of computer programming. All Ph.D. students and non-thesis Master's students must pass a qualifying examination based on undergraduate physics courses at the 400 level. Additional course requirements are described below; courses taken S/U may not be used to satisfy any of the degree requirements, including the lab requirement for Master's and Ph.D. students.

The qualifying and comprehensive examination outcomes are decided by vote of the entire faculty, based on the recommendations of the corresponding examination committees. For the qualifying examination, the faculty may decide that

- a student pass at the doctoral level;
- pass at the master's level;
- be requested to retake the exam at the next available opportunity; or
- terminate graduate study.

For the written part of the comprehensive examination, the faculty may decide that

- a student be given an unconditional pass;
- be given a conditional pass, with the requirement that the student produce additional evidence of research accomplishments during the oral part of the exam before being granted admission to candidacy;
- repeat the written part the next time it is offered; or
- terminate graduate study.

In addition, the faculty may decide to discontinue financial support to a student based on the student's performance on the qualifying or comprehensive examination. Students will receive written notification of the exam's outcome from the Graduate Physics Program Head within 30 days of the exam. Appeals must be addressed to the Physics Department Head within 30 days of receiving written notification of the exam's outcome and will be decided by the physics faculty.

A student granted an unconditional or conditional pass on the written part of the comprehensive examination must take the oral part in the same semester that the written part was taken; the student's Ph.D. committee makes the final decision, following the oral part of the comprehensive examination, on admission of the student to the candidacy to the doctoral degree.

Students may choose areas of emphasis from a variety of experimental, theoretical and computational research programs in the department. The current major research areas of the department include condensed matter physics and materials science, geophysics, optics, particle and nuclear physics, and others. These research projects are supported by multimillion-dollar funding by various federal agencies and two national laboratories within the state of New Mexico: Los Alamos National Laboratory and Sandia National Laboratories. In addition to the in-house research, the department conducts collaborative research programs with

- The Brookhaven National Laboratory,
- The Center for Integrated NanoTechnologies,
- Los Alamos National Laboratory,
- Sandia National Laboratories,
- The Thomas Jefferson Laboratory,
• Fermilab,
• Air Force Research Laboratory and
• other national and international laboratories.

The MS in Physics with a concentration in Space Physics program provides students with a strong foundation in physics with an intensive focus on space physics. Graduate study in space physics at the master's level prepares graduates for continued and specialized study toward the doctorate program in space-related fields as well as for challenges they will confront in space industrial and government settings.

The department is housed in a newly-renovated building which contains research laboratories, classrooms, offices and a computational laboratory.

Degrees for the Department

Bachelor Degree(s)

Physics - Bachelor of Arts (p. 1049)

Physics - Bachelor of Science (p. 1053)

Engineering Physics - Bachelor of Science (https://catalogs.nmsu.edu/nmsu/engineering/engineering-physics/)

Master Degree(s)

Physics - Master of Science (p. 1057)

Physics (Space Physics) - Master of Science (p. 1058)

Doctoral Degree(s)

Physics - Doctor of Philosophy (p. 1058)

Dual Degree

Physics- Bachelor of Science/Master of Science (p. 1053) (scroll to bottom of the B.S. page for more information)

Minors for the Department

Undergraduate

Physics - Undergraduate Minor (p. 1057)

Graduate

Physics - Graduate Minor (p. 1059)

Professor, Stefan Zollner, Department Head

Professor, Stephen Pate, Undergraduate Program Head

Professor, Vassili Papavassiliou, Graduate Program Head

Professor, Heinz Nakotte, Engineering Physics Program Head

Professors Ma. Burkardt, Engelhardt, Kiefer, Nakotte, Papavassiliou, Pate, Vasiliev, Zollner; Associate Professors Hearn, Urquidi; Assistant Professors Paolone, Sievert, Waszek; College Professors Mi. Burkardt, DeAntonio; College Research Professors Bruce; Emeritus Faculty Burleson, Gibbs, Goedecke, Kanim, Kyle, Liefeld, Ni.

Graduate Faculty S. Zollner, Department Head, Ph.D. (Stuttgart)— experimental condensed matter and applied physics; V. Papavassiliou, Graduate Program Head, Ph.D. (Yale)— experimental nuclear and particle physics; C. W. Bruce, Ph.D. (New Mexico State)— applied optics; M. Burkardt, Ph.D. (Erlangen)— theoretical nuclear and particle physics; M. DeAntonio, Ph.D. (New Mexico State)— applied optics; M. Engelhardt, Ph.D. (Erlangen)— computational nuclear and particle physics; E. Fohtung, Ph.D. (Freiburg)— materials science, neutron and X-ray scattering; G. H. Goedecke, Ph.D. (Rensselaer)— theoretical physics, optics; T. M. Hearn, Ph.D. (Cal Tech)— seismic tomography, seismology; B. Kiefer, Ph.D. (Michigan)— computational condensed matter physics, mineral physics; H. Nakotte, Ph.D. (Amsterdam)— materials science, neutron scattering; J. Ni, Ph.D. (Cornell)— geophysics, seismology; M. Paolone, Ph.D. (South Carolina)— experimental nuclear and particle physics; S. F. Pate, Ph.D. (Pennsylvania)— experimental nuclear and particle physics; M. Schlegel, Ph.D. (Bochum)— theoretical nuclear and particle physics; M. Sievert, Ph.D. (Ohio State)— theoretical nuclear and particle physics; J. Urquidi, Ph.D. (Texas Tech)— materials science, neutron and X-ray scattering; I. Vasiliev, Ph.D. (Minnesota)— computational materials science; L. Waszek, Ph.D. (Cambridge)— geophysics, seismology; P. T. Webster, Ph.D. (Arizona State)— materials science.
Geophysics Courses

GPHY 340V. Planet Earth
3 Credits (3)

GPHY 450. Selected Topics
1-3 Credits
Readings, discussions, lectures or laboratory studies of selected areas of geophysics. May be repeated for a maximum of 12 credits.
Prerequisite: consent of instructor.

GPHY 520. Selected Topics
1-3 Credits
Formal treatment of graduate topics not covered in regular courses. May be repeated for unlimited credit.
Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

GPHY 560. Applied Inverse Theory
3 Credits (3)
Inversion of data with an emphasis on geophysical problems. Curve fitting, tomography, earthquake location, over determined and under determined problems, linear and nonlinear problems. Computing experience desirable. Consent of Instructor required.

GPHY 598. Special Research Problems
1-3 Credits
Individual investigations, either analytical or experimental. May be repeated for unlimited credit.

GPHY 599. Master's Thesis
1-15 Credits (1-15)
Thesis.

GPHY 620. Advanced Topics in Geophysics
3 Credits (3)
Advanced formal treatment of a topic or topics not covered in regular courses. May be repeated for unlimited credit.
Prerequisite: consent of instructor.

GPHY 700. Doctoral Dissertation
1-15 Credits (1-15)
Dissertation.

Physics Courses

PHYS 1111. Introductory Computational Physics
3 Credits (2+2P)
Introduction to computational techniques for the solution of physics-related problems.
Prerequisite(s): a C- or better in MATH 1220G or MATH 1250G or MATH 1511G.

PHYS 1112. Introductory Physics for the Health Sciences
3 Credits (3)
Algebra-level introduction to topics required for the Health Sciences including basic mechanics (including sound, mechanical waves and fluids), heat and thermodynamics, electricity and magnetism, optics and electromagnetic waves, atomic and nuclear physics and applications to medical imaging. Restricted to Community Colleges campuses only.
Prerequisite(s): MATH 1215 or Equivalent.

Learning Outcomes
1. The objective of the course is to familiarize the student with the concepts and methods used in the underlying physics associated with various Health Science disciplines.
2. The course will demonstrate how the basic principles of mechanics, thermodynamics, electricity, magnetism, electromagnetic waves and optics can be applied to solve particular problems in Health Sciences applications. Introduces the student to selected topics in modern physics including quantum physics, atomic and nuclear physics.
PHYS 1115G. Survey of Physics with Lab
4 Credits (3+3P)
Overview of the concepts and basic phenomena of physics. This course provides a largely descriptive and qualitative treatment with a minimum use of elementary mathematics to solve problems. No previous knowledge of physics is assumed. Includes laboratory.

Learning Outcomes
1. Apply concepts of classical mechanics (such as velocity, acceleration, force, inertia, momentum, torque, work, energy) to simple static and dynamic systems.
2. Apply concepts of thermodynamics (such as heat, temperature, internal energy, entropy) to simple processes.
3. Apply concepts of electricity and magnetism (such as fields, potential, charge conservation, static and dynamic induction) to simple circuits, motors, and other simple contrivances.
4. Apply simple geometric and wave optics in simple situations.
5. Test ideas using modern laboratory equipment.
7. Use computers to analyze and report laboratory results.
8. Draw appropriate conclusions from quantitative scientific observations.
9. Accurately and clearly communicate the results of scientific experiments.

PHYS 1125G. Physics of Music
4 Credits (3+2P)
Introduction for non-science majors to basic concepts, laws, and skills in physics, in the context of a study of sound, acoustics, and music.

Learning Outcomes
1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply basic classical mechanics to static and dynamic fluids, including Archimedes'principle and Bernoulli's principle.
3. Apply the general properties of waves to simple models of musical instruments.
4. Demonstrate knowledge of basic operating principles of wind, string, and percussion instruments.
5. Demonstrate knowledge of how objectively measurable properties of sound waves correspond to the perceptions of pitch, loudness, and timbre.
6. Demonstrate understanding of the description of vibrations and waves in terms of Fourier's Theorem and normal modes.
7. Demonstrate understanding of vocalization in terms of physical principles such as resonance and fluid dynamics.
8. Demonstrate understanding of how the ear works.

PHYS 1230G. Algebra-Based Physics I
3 Credits (3)
An algebra-based treatment of Newtonian mechanics. Topics include kinematics and dynamics in one and two dimensions, conservation of energy and momentum, rotational motion, equilibrium, and fluids.

Learning Outcomes
1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of particles in one and two dimensions.
3. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of a rigid body in two dimensions.
4. Apply Newton's theory of gravitation to circular orbits and demonstrate understanding of how Kepler's laws of planetary motion provide the empirical foundation for Newton’s theory.
5. Apply the mathematics of vectors to the principles of Newtonian mechanics.
6. Apply principles of Newtonian mechanics to the case of static and dynamic incompressible fluids, including Archimedes’ and Bernoulli’s principles.

PHYS 1230L. Algebra-Based Physics I Lab
1 Credit (1)
A series of laboratory experiments associated with the material presented in PHYS 1230G.
Prerequisite(s)/Corequisite(s): PHYS 1230G.

Learning Outcomes
1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.
PHYS 1240G. Algebra-Based Physics II
3 Credits (3)
The second half of a two semester algebra-based introduction to Physics. This course covers electricity, magnetism and optics.
**Prerequisite(s):** a C- or better in PHYS 1230G or PHYS 2230G.

**Learning Outcomes**
1. Be able to state Coulomb's Law and Gauss's laws and apply them.
2. Apply the concepts of electric charge, electric field and electric potential to solve problems.
3. Analyze simple DC and AC circuits.
4. Apply the Lorentz force to solve problems.
5. Apply Faraday's law of induction (and Lenz's law) to solve problems.
6. Apply ray optics to practical lens systems such as microscopes and corrective lenses.
7. Apply the wave nature of light to the phenomena of reflection, refraction, and diffraction.

PHYS 1240L. Algebra-Based Physics II Lab
1 Credit (1)
A series of laboratory experiments associated with the material presented in PHYS 1240
**Prerequisite(s)/Corequisite(s):** PHYS 1240G.

**Learning Outcomes**
1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.

PHYS 1310G. Calculus-Based Physics I
3 Credits (3)
A calculus level treatment of classical mechanics and waves, which is concerned with the physical motion concepts, forces, energy concepts, momentum, rotational motion, angular momentum, gravity, and static equilibrium. May be repeated up to 3 credits.
**Prerequisite(s):** a C- or better in MATH 1511G or higher.

**Learning Outcomes**
1. Describe the relationships among position, velocity, and acceleration as functions of time.
2. Use the equations of kinematics to describe motion under constant acceleration.
3. Analyze linear motion using Newton's laws, force, and linear momentum.
4. Analyze rotational motion using torque and angular momentum.
5. Analyze motion using work and energy.

PHYS 1310L. Calculus-Based Physics I Lab
1 Credit (3P)
A series of laboratory experiments associated with the material presented in Calculus-based Physics I. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-based Physics I.
**Prerequisite(s)/Corequisite(s):** PHYS 1310G.

**Learning Outcomes**
1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Experience the relationship between theory and experiment.

PHYS 1311. Problems in Calculus-Based Physics I
0.5-1 Credits (.5-1)
This is a supplemental course for Calculus-based Physics I. May be repeated up to 1 credits.
**Corequisite(s):** PHYS 1310G.
PHYS 1320G. Calculus-Based Physics II
3 Credits (3)
A calculus level treatment of classical electricity and magnetism. It is strongly recommended that this course be taken at the same time as Calculus-based Physics II laboratory. May be repeated up to 3 credits.
Prerequisite(s): A C- or better in PHYS 2110 or PHYS 1310G and MATH 1521G or higher.
Learning Outcomes
1. Apply the concepts of electric charge, electric field and electric potential to solve problems.
2. Sketch the electric field in the vicinity of point, line, sheet, and spherical distributions of static electric charge.
3. Sketch the magnetic field in the vicinity of line, ring, sheet, and solenoid distributions of steady current.
4. Describe the relationship between electric field and electric potential.
5. Calculate the Lorentz force on a moving charge for simple geometries of the fields and use it to analyze the motion of charged particles.
6. Apply the integral forms of Maxwell’s equations.
7. Calculate the energy of electromagnetic fields.
8. Analyze DC circuits.

PHYS 1320L. Calculus-Based Physics II Lab
1 Credit (3P)
A series of Laboratory experiments associated with the material presented in Calculus-Based Physics II. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-Based Physics II.
Prerequisite(s)/Corequisite(s): PHYS 1320G. Prerequisite(s): A C- or better in PHYS 2110L or PHYS 1310L.
Learning Outcomes
1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Experience the relationship between theory and experiment.

PHYS 1321. Problems in Calculus-Based Physics II
0.5-1 Credits (.5-1)
This is a supplemental course for Calculus-based Physics II.
Corequisite(s): PHYS 1320G.

PHYS 2110. Mechanics
3 Credits (3)
Newtonian mechanics.
Prerequisite(s)/Corequisite(s): MATH 1511G or higher.

PHYS 2110L. Experimental Mechanics
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2110. Science majors.
Prerequisite(s)/Corequisite(s): PHYS 2110.

PHYS 2111. Supplemental Instruction to PHYS 2110
0.5-1 Credits (.5-1)
This Optional workshop as a supplement to PHYS 2110. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.
Corequisite(s): PHYS 2110.
Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2110, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.
PHYS 2120. Heat, Light, and Sound
3 Credits (3)
Calculus-level treatment of thermodynamics, geometrical and physical optics, and sound. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.

PHYS 2120L. Heat, Light, and Sound Laboratory
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2120. Science majors.
Prerequisite(s)/Corequisite(s): PHYS 2120. Prerequisite(s): a C- or better in PHYS 2110L or PHYS 1310L.

PHYS 2121. Supplemental Instruction to PHYS 2120
0.5-1 Credits (.5-1)
This optional workshop supplements PHYS 2120 "Heat, Light, and Sound". Students actively apply concepts and methods introduced in PHYS 2120 to problem solving and quantitative analysis. May be repeated up to 1 credits.
Corequisite(s): PHYS 2120.

Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2121, apply quantitative analysis to solve problems involving wave propagation and interference, geometric optics, heat transfer and thermodynamics.
4. self-checkreasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline

PHYS 2140. Electricity and Magnetism
3 Credits (3)
Charges and matter, the electric field, Gauss law, the electric potential, the magnetic field, Ampere's law, Faraday's law, electric circuits, alternating currents, Maxwell's equations, and electromagnetic waves. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 1521G. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.

PHYS 2140L. Electricity & Magnetism Laboratory
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2140.
Prerequisite(s)/Corequisite(s): PHYS 2140. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G.

PHYS 2141. Supplemental Instruction to PHYS 2140
0.5-1 Credits (.5-1)
Optional workshop as a supplement to PHYS 2140. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.
Corequisite(s): PHYS 2140.
PHYS 2230G. General Physics for Life Science I
3 Credits (3)
This algebra-based introduction to general physics covers mechanics, waves, sound, and heat. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT. May be repeated up to 3 credits.
Prerequisite(s): A C or better in MATH 1215 or higher.
Learning Outcomes
1. Modeling: analyze real-world phenomena by deciding what information is relevant and constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain phenomena or function; use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text; critique assumptions and determine how to test the validity of a model and use the comparison of experimental data and prediction to refine the model.
2. Conceptual understanding: describe the motion of any object in terms of displacement, velocity, and acceleration; analyze external forces acting on an object and determine if a system is in equilibrium or relate the net force to changes in motion; predict or analyze motion using conservation laws for energy and momentum; analyze forces and torques for a rigid object in static equilibrium; for a static fluid determine pressure and the buoyant force; apply idealized models of fluid flow to the circulatory system; describe the properties of pressure waves known as sound, apply the model of standing waves to musical instruments and discuss how sound is used to sense the environment; predict qualitative changes in the internal energy of a thermodynamic system when energy has been transferred due to work or heat and justify those predictions using conservation of energy (First law of thermodynamics). Identify which heat transfer processes occur in a described situation.
3. Quantitative reasoning: use a physics problem-solving strategy (Identify relevant concepts; Introduce and study simplified models; Use symmetry arguments; Establish the relation between known and unknown quantities; Calculate a quantitative result using appropriate mathematical methods; Self-check reasonableness of assumptions and solutions); use scientific notation accurately and convert units if necessary.
4. Communicating scientific information: interpret or generate graphs or other visual representations and be able to switch between various representations including text, mathematical description, or diagrams.

PHYS 2230L. Laboratory to General Physics for Life Science I
1 Credit (1)
Laboratory experiments in topics associated with material presented in PHYS 2230G.
Prerequisite(s)/Corequisite(s): PHYS 2230G. Restricted to Las Cruces campus only.

PHYS 2231. Supplemental Instruction to General Physics for Life Sciences I
1 Credit (1)
This optional workshop supplements Physics for Life Sciences I. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.
Corequisite(s): PHYS 2230G.
Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2230, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.
PHYS 2240G. General Physics for Life Science II  
3 Credits (3)  
This algebra-based course covers electricity, magnetism, light, atomic physics, and radioactivity. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT. May be repeated up to 3 credits.  
Prerequisite(s): a C- or better in PHYS 1230G or PHYS 2230G, and MATH 1220G or higher.  
Learning Outcomes  
1. Modeling: analyze real world phenomena by constructing simplified idealized models (an abstract description) that allow making predictions or explaining a phenomena or function; use multiple representations to build and communicate the model, including sketches, mathematical expressions, diagrams or graphs; decide what information is relevant and critique assumptions and models of others; determine how to test the validity of a model and use comparison of experimental data and prediction to refine the model.  
2. Conceptual understanding: electric or magnetic fields can be used to describe interactions of objects that contain charges with their surroundings; changes that occur as a result of interactions are constrained by conservation laws (such as conservation of energy, conservation of charge or conservation of nucleon number); many macroscopic properties of materials can be described using microscopic models or related to their geometry; electromagnetic radiation can be modeled as a wave or as fundamental particles (photons); the direction of propagation of a wave may change when it encounters a boundary surface between two media of different properties (reflection or refraction); the spontaneous radioactive decay of nuclei is described by probability.  
3. Quantitative reasoning: apply quantitative analysis and appropriate mathematical reasoning to describe or explain phenomena; use scientific notation accurately and convert units if necessary.  
4. Communicating scientific information: interpreter generate graphs or other visual representations (e.g. field lines, equipotential lines) and be able to switch between various representations including text, mathematical description, or diagrams.  

PHYS 2240L. Laboratory to General Physics for Life Science II  
1 Credit (1)  
Laboratory experiments in topics associated with material presented in PHYS 2240.  
Prerequisite(s)/Corequisite(s): PHYS 2240G. Restricted to Las Cruces campus only.  

PHYS 2241. Supplemental Instruction to General Physics for Life Sciences II  
1 Credit (1)  
This optional workshop is a supplement to Physics for Life Science II. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.  
Corequisite(s): PHYS 2240G.  
Learning Outcomes  
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.  
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.  
3. in the contexts of concepts and physical laws discussed in PHYS 2240, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.  
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.  
5. develop learning strategies and use metacognition to promote thinking in the discipline.  

PHYS 2996. Special Topics  
1-3 Credits  
Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.  
Learning Outcomes  
1. Varies  

PHYS 2997. Independent Study  
1-3 Credits  
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.  
Prerequisite: consent of instructor.  
Learning Outcomes  
1. Varies  

PHYS 303V. Energy and Society in the New Millennium  
3 Credits (3)  
Traditional and alternative sources of energy. Contemporary areas of concern such as the state of depletion of fossil fuels; nuclear energy, solar energy, and other energy sources; environmental effects; nuclear weapons; and health effects of radiation. Discussion of physical principles and impact on society. Focus on scientific questions involved in making decisions in these areas. No physics background required.
PHYS 304. Forensic Physics
4 Credits (3+3P)
Theories, laboratory, and field techniques in the area of forensic physics.

PHYS 305V. The Search for Water in the Solar System
3 Credits (3)
Examines the formation, abundance and ubiquity of water in our Solar System stemming from comets, Martian and Lunar poles, Earth's interior and into the outer reaches of the Solar System. Topics will include nuclear synthesis, Solar System formation, remote sensing, as well as past, present and future NASA missions for water.

PHYS 315. Modern Physics
3 Credits (3)
An introduction to relativity and quantum mechanics, with applications to atoms molecules, solids, nuclei, and elementary particles. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in MATH 2530G and PHYS 2140 or PHYS 1320G.

PHYS 315 L. Experimental Modern Physics
3 Credits (1+6P)
Elementary laboratory in modern physics which supports the subject matter in PHYS 315. Required for physics majors. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): PHYS 315. Prerequisite(s): a C- or better in PHYS 2140L or 1320L.

PHYS 316. Supplemental Instructions to PHYS 315
1 Credit (1)
This optional workshop supplements PHYS 315 "Modern Physics". Students actively apply concepts and methods introduced in PHYS 315 to problem solving and quantitative analysis.

Corequisite(s): PHYS 315.

PHYS 325. Intermediate Experimental Physics
3 Credits (1+6P)
An exploration of a variety of experimental techniques in physics with an emphasis on the proper determination of statistical and systematic uncertainties. Students will work in teams and prepare professional written and oral reports of their work. This course cannot be used to replace M E 345 for students majoring in engineering.

Prerequisite(s)/Corequisite(s): PHYS 315. Prerequisite(s): a C- or better in PHYS 2140L or PHYS 1320L.

Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 350. Special Topics
1-3 Credits
Lectures, demonstrations, and discussions on such topics as lasers and holography, energy sources, clouds, and biophysics. May be repeated for a maximum of 12 credits under different subtitles.

PHYS 380. Individual Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 395. Intermediate Mathematical Methods of Physics
3 Credits (3)
Introduction to the mathematics used in intermediate-level physics courses. Topics include vector calculus, curvilinear coordinates, matrices, linear algebra, function spaces, partial differential equations, and special functions. This course cannot be used to replace M E 228 or M E 328 for students majoring in engineering. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): a C- or better in MATH 2530G.

Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
PHYS 400. Undergraduate Research
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHYS 420. Capstone Project I
3 Credits (3P)
Application of engineering physics principles to a significant design project. Includes teamwork, written and oral communication and realistic technical, economic and public safety requirements.

PHYS 421. Capstone Project II
3 Credits (3P)
Continuation of PHYS 420.

PHYS 450. Selected Topics
1-3 Credits
Readings, lectures or laboratory studies in selected areas of physics. May be repeated for a maximum of 12 credits.

PHYS 451. Intermediate Mechanics I
3 Credits (3)
Newtonian mechanics, including an introduction to the Lagrangian formulation. Topics include central force motion, rigid body motion, noninertial reference frames, oscillating systems, and classical scattering.
Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 2530G.

Learning Outcomes
1. Set up equations of motion for classical mechanical systems and solve them. Identify conserved quantities and understand the circumstances under which they arise (symmetries); in particular, know how to use conservation of energy, momentum, angular momentum to solve problems. Fluently use three-dimensional calculus as a language to do the above; be able to use spherical and cylindrical coordinates. Understand the paradigmatic examples of the harmonic oscillator, central force (in particular, gravitational) motion and rigid body motion, which serve as starting points for investigating more complicated realistic problems.

PHYS 454. Intermediate Modern Physics I
3 Credits (3)
Introduction to quantum mechanics, focusing on the role of angular momentum and symmetries, with application to many atomic and subatomic systems. Specific topics include intrinsic spin, matrix representation of wave functions and observables, time evolution, and motion in one dimension. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 392 and PHYS 395. Prerequisite(s): a C- or better in PHYS 315.

PHYS 455. Intermediate Modern Physics II
3 Credits (3)
Continuation of subject matter of PHYS 454. Specific topics include rotation and translation in three dimensions, solution of central potential problems, perturbation theory, physics of identical particles, scattering theory, and the interaction between photons and atoms. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in PHYS 454, MATH 392, and PHYS 395.

PHYS 461. Intermediate Electricity and Magnetism I
3 Credits (3)
The first part of a two-course sequence in classical electrodynamics. Covered topics include static electric and magnetic fields, Laplace's and Poisson's equations, electromagnetic work and energy, Lorentz force, Gauss's, Biot-Savart, and Ampere's laws, Maxwell's equations, as well as electric and magnetic fields in matter. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 392 and PHYS 395. Prerequisite(s): a C- or better in PHYS 2140 or PHYS 1320G or equivalent and a C- or better in MATH 2530G.

PHYS 462. Intermediate Electricity and Magnetism II
3 Credits (3)
Continuation of subject matter of PHYS 461. Covered topics include Maxwell's equations and their applications, electromagnetic waves, reflection, refraction, dispersion, radiating systems, interference and diffraction, as well as Lorentz transformations and relativistic electrodynamics. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in PHYS 461, MATH 392, and PHYS 395.

PHYS 468. Intermediate X-ray Diffraction
3 Credits (3)
Introduction to x-ray diffraction and reflectivity spectra. Topics include X-ray sources and detectors, atomic spectra, characteristic x-rays, thermionic emission, synchrotron radiation, instrument components, and beam conditioners. Prerequisite(s): a C- or better in PHYS 315 and PHYS 325

Learning Outcomes
1. Knowledge of structural properties of materials Experimental x-ray characterization techniques Presentation and writing skills in the discipline Ethics, teamwork, and career opportunities
PHYS 471. Modern Experimental Optics
3 Credits (1+6P)
Cumulative experience course in optics related to the material presented in PHYS 473 and PHYS 489.
Prerequisite: a C- or better in PHYS 315 and ( PHYS 315 L or PHYS 325 ).

Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 475. Advanced Physics Laboratory
3 Credits (3P)
Cumulative experience course involving experiments in atomic, molecular, nuclear, and condensed-matter physics.
Prerequisite: a C- or better in PHYS 315 and ( PHYS 315 L or PHYS 325 ).

Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 476. Computational Physics
3 Credits (3)
Scientific visualization, numerical differentiation and interpolation, numerical integration, root finding, linear algebra, eigensystems, ODE’s, Boundary value problems, PDE’s, Monte-Carlo calculations, data description and analysis, Fast Fourier Transforms, and applications to advanced physics problems. Recommended is the knowledge of a programming language.
Prerequisite(s): a C- or better in PHYS 1111 or equivalent and MATH 392.

Learning Outcomes
1. learn how to use computers for solving problems in the physical sciences,
2. obtain skills to implement numerical simulation and modeling strategies,
3. learn how to monitor and analyze data graphically, during and after computation,
4. obtain workflow organization skills needed for the solution of complicated systems.

PHYS 478. Fundamentals of Photonics
4 Credits (3+3P)
Prerequisite: C- or better in PHYS 1320G or PHYS 2120.

Learning Outcomes
1. Understand the fundamentals of the different theories of light including ray, wave, electromagnetic (vector) and photon optics, and how these theories are represented mathematically and on a computer. Develop the ability to perform calculations for the different theories (e.g., ray tracing, wave interference, polarization calculus, photon detection) to determine the propagation characteristics and describe the manipulation of light. Gain insight and experience with materials and devices for manipulating and detecting light (e.g., glass, mirrors, lenses, fiber optics, polarization elements, liquid crystals, semiconductors, and photodiodes). Apply the theoretical, mathematical, and practical understanding of optics to describe real-world applications of light technology with supporting analysis and calculations.

PHYS 480. Thermodynamics
3 Credits (3)
Thermodynamics and statistical mechanics. Basic concepts of temperature, heat, entropy, equilibrium, reversible and irreversible processes. Applications to solids, liquids, and gases. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in PHYS 2120, PHYS 315, and MATH 2530G.
PHYS 485. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHYS 488. Introduction to Condensed Matter Physics
3 Credits (3)
Crystal structure, X-ray diffraction, energy band theory, phonons, cohesive energy, conductivities, specific heats, p-n junctions, defects, surfaces, and magnetic, optical, and low-temperature properties.
Prerequisite: a C- or better in PHYS 315.

Learning Outcomes
1. Learn the fundamental concepts of solid-state physics: classification of solids, crystal structure, band structure of solids, lattice vibrations, optical and magnetic properties of solids. Develop an ability to formulate and solve complex problems in solid state physics by applying the fundamental principles of physics and mathematics. Develop and ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 489. Introduction to Modern Materials
3 Credits (3)
Structure and mechanical, thermal, electric, and magnetic properties of materials. Modern experimental techniques for the study of material properties.
Prerequisite: a C- or better in PHYS 315.

Learning Outcomes
1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 493. Experimental Nuclear Physics
3 Credits (1+6P)
Cumulative experience course in nuclear physics such as measurement of radioactivity, absorption of radiation, nuclear spectrometry.
Prerequisite: a C- or better in PHYS 315 and ( PHYS 315L or PHYS 325 ).

Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communications: an ability to communicate effectively with a range of audiences. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 495. Mathematical Methods of Physics I
3 Credits (3)
Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.
Prerequisite(s): a C- or better in MATH 392 and PHYS 395.

Learning Outcomes
1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra. Evaluate integrals of analytic functions using the calculus of residues. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.

PHYS 500. Special Topics Seminar
1-2 Credits
Treatment of topics not covered by regular courses. Graded S/U. May be repeated.

PHYS 511. Mathematical Methods of Physics I
3 Credits (3)
Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.

Learning Outcomes
1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra. Evaluate integrals of analytic functions using the calculus of residues. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.
PHYS 520. Selected Topics  
1-3 Credits  
Formal treatment of graduate-level topics not covered in regular courses. May be repeated for a maximum of 9 credits.  
**Prerequisites:** graduate standing, consent of instructor, and selection of a specific topic prior to registration.

PHYS 521. Individual Study  
1-3 Credits  
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.  
**Prerequisites:** graduate standing, consent of instructor, and selection of a specific topic prior to registration.

PHYS 551. Classical Mechanics  
3 Credits (3)  
Lagrangian and Hamiltonian formulation of dynamics. Advanced treatments of most topics listed under PHYS 451, plus canonical transformations and Hamilton-Jacobi theory. PHYS 451 strongly recommended.

PHYS 554. Quantum Mechanics I  
3 Credits (3)  

PHYS 555. Quantum Mechanics II  
3 Credits (3)  
Continuation of topics in PHYS 554.  
**Prerequisites:** PHYS 554 or consent of instructor.

PHYS 556. Electromagnetic Theory I  
3 Credits (3)  
Detailed advanced treatments of most topics listed under PHYS 461, PHYS 462, plus multipole radiation, collisions of charged particles and bremsstrahlung, scattering, and radiation reaction. PHYS 461 and PHYS 462 strongly recommended.

PHYS 557. Electromagnetic Theory II  
3 Credits (3)  
Continuation of topics in PHYS 556.  
**Prerequisites:** PHYS 556 or consent of instructor.

PHYS 568. Elements of X-ray Diffraction  
3 Credits (3)  
Same as PHYS 468, but additional work required. Crosslisted with: CHME 588.

PHYS 571. Advanced Experimental Optics  
3 Credits (3)  
Taught with PHYS 471 with additional work required at the graduate level. Consent of Instructor required.  
**Prerequisite(s):** PHYS 473 or PHYS 562.

PHYS 575. Advanced Physics Laboratory  
3 Credits (3P)  
Selected experiments in atomic, molecular, nuclear and condensed-matter physics.

PHYS 576. Advanced Computational Physics I  
3 Credits (3)  
Advanced treatment of topics listed under PHYS 476 plus additional work. Applications of numerical methods to advanced physics problems. Recommended is the knowledge of a programming language.  
**Learning Outcomes**  
1. learn to numerically solve problems that require higher mathematical and theoretical analysis,  
2. experience how graduate research will be advanced and accelerated by the use of scientific computing skills.

PHYS 584. Statistical Mechanics  
3 Credits (3)  
PHYS 588. Condensed Matter Physics
3 Credits (3)
Same as PHYS 488, but additional work required.
Learning Outcomes
1. Learn the fundamental concepts of solid-state physics: classification of solids, crystal structure, band structure of solids, lattice vibrations, optical and magnetic properties of solids. Develop an ability to formulate and solve complex problems in solid state physics by applying the fundamental principles of physics and mathematics. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 589. Modern Materials
3 Credits (3)
Same as PHYS 489 with differentiated assignments for graduate students. PHYS 554 recommended.
Learning Outcomes
1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 591. Advanced High-Energy Physics I
3 Credits (3)
Taught with PHYS 491 with additional work required at the graduate level.
Prerequisite(s): PHYS 555 or consent of instructor.

PHYS 593. Advanced Experimental Nuclear Physics
3 Credits (1+6P)
Advanced experimental investigation of topics such as measurement of radioactivity, absorption of radiation, and nuclear spectrometry.

PHYS 597. Space Plasma Physics
3 Credits (3)
Same as PHYS 497 but with added requirements.

PHYS 599. Master’s Thesis
1-15 Credits (1-15)
Thesis.

PHYS 600. Research
1-15 Credits
Doctoral research. May be repeated.

PHYS 620. Advanced Topics in Physics
1-3 Credits
Advanced formal treatment of topics not covered in regular courses. May be repeated for a maximum of 9 credits.
Prerequisite: consent of instructor.

PHYS 650. General Relativity I
3 Credits (3)
Basic foundations and principles of general relativity, derivation of the Einstein field equations and their consequences, the linearized theory, the Bel-Petrov classification of the curvature tensor, derivation of the Schwarzschild solution and the four basic tests of general relativity.
Prerequisite(s): PHYS 511 or PHYS 561 or consent of instructor.

PHYS 680. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: graduate standing or consent of instructor.

PHYS 688. Advanced Condensed Matter Physics
3 Credits (3)
Continuation of the advanced condensed matter physics presented in PHYS 588. Topics include electronic structure methods, optical, magnetic, and transport properties of solids, semiconductors, crystalline defects, nanostructures, and noncrystalline solids. PHYS 588 strongly recommended.
Learning Outcomes
1. Learn the fundamental concepts of advanced condensed state physics: band theory of solids, electronic structure methods, optical and magnetic properties of solids, bulk semiconductors, and properties of nano-structured materials. Develop an ability to formulate and solve complex problems in advanced condensed matter physics. Develop an ability to study independently and acquire new knowledge using appropriate learning strategies.
PHYS 689. Advanced Modern Materials  
3 Credits (3)  
Advanced topics in the physics of modern materials, such as crystalline, amorphous, polymeric, nanocrystalline, layered, and composite materials and their surfaces and interfaces. PHYS 555, PHYS 588, and PHYS 589 recommended.  
Learning Outcomes  
1. Learn the fundamental concepts of the physics of modern materials, such as crystalline, amorphous, polymeric, nanostructured, layered, and composite materials. Develop an ability to formulate and solve complex problems in the area of advanced physics of modern materials. Develop an ability to study independently and acquire new knowledge using appropriate learning strategies.

PHYS 691. Quantum Field Theory I  
3 Credits (3)  
Path integrals, gauge invariance, relativistic quantum mechanics, canonical quantization, relativistic quantum field theory, introduction to QED.  
Prerequisites: PHYS 555 and PHYS 562, or consent of instructor.

PHYS 692. Quantum Field Theory II  
3 Credits (3)  
QED, running coupling constant, QCD, electroweak theory, asymptotic freedom, deep inelastic scattering, basic QCD phenomenology, path integrals in quantum field theory, lattice QCD.  
Prerequisite: PHYS 691 or consent of instructor.

PHYS 700. Doctoral Dissertation  
1-15 Credits (1-15)  
Dissertation.

Phone: (575) 646-3831

Physics - Bachelor of Arts

The curriculum for the Bachelor of Arts degree is designed for students who would like to have a firm foundation in physics combined with study in another area and greater flexibility in choosing elective courses. The program requires a minor in a second field of study chosen by the student in consultation with an advisor. A second major may be used to satisfy the program requirement for a minor.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Total Credits  120

1 See the General Education (p. 123) section of the catalog for a full list of courses.
2 MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.
3 See alternatives for meeting General Education requirements.
4 See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
5 May not be taken S/U and must earn a grade of C- or better.
6 Elective credit may vary based on General Education course selection, second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their Physics Advisor.

Second Language Requirement

For the Bachelor of Science in the Physics with a concentration in Computational Physics there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

Option 1:

Prefix  Title  Credits
Complete one of the following sequences:

CHIN 1110  Mandarin Chinese I  8
& CHIN 1120  and Mandarin Chinese II
FREN 1110  French I  8
& FREN 1120  and French II
GRMN 1110  German I  8
& GRMN 1120  and German II
JAPN 1110  Japanese I  8
& JAPN 1120  and Japanese II
SPAN 1110  Spanish I  8
& SPAN 1120  and Spanish II
For Heritage Speakers:
SPAN 1220  Spanish for Heritage Learners II  3
or SPAN 2210
PORT 1110  Portuguese I  3
or PORT 1120

</table>

Option 4:

Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

Option 5:

Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

Option 6:

By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

Option 7:

By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

Option 8:

In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

Suggested Minors for the Bachelor of Arts Physics Major

Basic Science Minor—A minor in a related scientific field broadens the overall knowledge of the student majoring in physics. Some departments which offer such minors are astronomy, chemistry, computer science, geology and mathematics.

Prehealth Minor—Students wishing to attend a medical or dental post-graduate school are strongly encouraged to obtain a minor in a life science field such as biochemistry, biology, human biology or microbiology.

Prelaw Minor—Students wishing to attend a post-graduate law school should obtain a minor in a law-related field, such as government, accounting, finance, international business or a Supplementary Major in Law and Society (24 credits).

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

1. These courses may have prerequisites and/or co-requisites, and it is the students' responsibility for checking and fulfilling all those requirements.
2. See the General Education (p. 123) section of the catalog for a full list of courses.
3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.

Physics - Bachelor of Science

A Bachelor of Science degree in physics at NMSU prepares a student well for graduate study in physics, geophysics, or engineering or for a variety of careers in research and teaching. Students who plan to seek employment at the B.S. level are advised to take the concentration area curricula as part of their electives in addition to the general and departmental requirements. The program of study should be chosen by the student in consultation with an advisor.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework. The Bachelor of Science degree in physics is accredited by the Applied and Natural Science Accreditation Commission (ANSAC) of ABET, Inc.

Total Credits

120

1 See the General Education (p. 123) section of the catalog for a full list of courses.
2 MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.
3 See alternatives for meeting General Education requirements.
4 See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
5 May not be taken S/U and must earn a grade of C- or better.
6 Approved physics and technical electives are decided by Physics Advisors.

Students who plan to pursue graduate study in physics or geophysics are strongly advised to take one or more senior-level courses in optics, nuclear physics, space physics, condensed matter physics, geophysics, or computational physics. Students who plan to seek employment at the B.S. level are advised to select one of the following emphasis areas: Applied Physics, Computational Physics, Geophysics, Materials Science, or Optics. The program of study should be chosen by the student in consultation with a Physics Advisor. Some recommended courses are listed below.

**Applied Physics:** 12 credits of upper division E E, M E, or C S courses;

**Computational Physics:** C S 157, C S 171G, MATH 1531, and PHYS 476;

**Geophysics:** GEOL 1110G, GPHY 340V, GPHY 450, and an upper-division GPHY/GEOL course;

**Materials Science:** 12 credits of upper-division courses selected from CHME 361, PHYS 450, PHYS 471, PHYS 475, PHYS 488, and PHYS 489;

**Optics:** PHYS 478.

**Second Language Requirement**

For the Bachelor of Science in the Physics with a concentration in Computational Physics there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

**Option 1:**

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>

</tr>
</thead>
<tbody>
<tr>
<td>CHIN</td>
<td>Mandarin Chinese I</td>
<td>8</td>
</tr>
</tbody>
</table>
& CHIN 1120 | Mandarin Chinese II           |         |
| FREN   | French I                      | 8       |
& FREN 1120 | French II                     |         |
| GRMN   | German I                      | 8       |
& GRMN 1120 | German II                     |         |
| JAPN   | Japanese I                    | 8       |
& JAPN 1120 | Japanese II                   |         |
| SPAN   | Spanish I                     | 8       |
& SPAN 1120 | Spanish II                    |         |

For Heritage Speakers:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN</td>
<td>Spanish for Heritage Learners II</td>
<td>3</td>
</tr>
</tbody>
</table>
& SPAN 1220 | Spanish for Heritage Learners III |         |
**Option 2:**
Complete the following sequence for American Sign Language (with a C- or better):

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SIGN</td>
<td>American Sign Language I</td>
<td>3</td>
</tr>
<tr>
<td>SIGN</td>
<td>American Sign Language II</td>
<td>3</td>
</tr>
</tbody>
</table>

**Option 3:**
Challenge the 1120 level for the following courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIN</td>
<td>Mandarin Chinese II</td>
<td>4</td>
</tr>
<tr>
<td>or FREN</td>
<td>French II</td>
<td></td>
</tr>
<tr>
<td>or GRMN</td>
<td>German II</td>
<td></td>
</tr>
<tr>
<td>or JAPN</td>
<td>Japanese II</td>
<td></td>
</tr>
<tr>
<td>or SPAN</td>
<td>Spanish II</td>
<td></td>
</tr>
</tbody>
</table>

**OR**
Challenge the 1110/1120/1220/2210 level for the following courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PORT</td>
<td>Portuguese I</td>
<td>3</td>
</tr>
<tr>
<td>or PORT</td>
<td>Portuguese II</td>
<td></td>
</tr>
<tr>
<td>or SPAN</td>
<td>Spanish for Heritage Learners II</td>
<td></td>
</tr>
<tr>
<td>or SPAN</td>
<td>Spanish for Heritage Learners III</td>
<td></td>
</tr>
</tbody>
</table>

**Option 4:**
Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

**Option 5:**
Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

**Option 6:**
By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

**Option 7:**
By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

**Option 8:**
In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

**Dual Degree (BS/MS) Program**
This program option is designed to provide a means for PHYS undergraduates to obtain both a BS and an MS degree with 138 credits (normally: BS=120 credits, MS=30 credits). Students electing this option will follow the regular undergraduate BS in physics curriculum, except that they take the advanced laboratory course at the 5XX level to meet their BS requirements. They also apply nine other credits of their undergraduate courses numbered 450 and higher towards their MS degree, requiring only an additional 18 credits for the MS. These 18 credits can be obtained in two semesters (and perhaps one summer term to write and defend an MS thesis). Students interested in this dual degree must be admitted to the MS in Physics graduate program and must fulfill all degree requirements for the MS in Physics.

**A Suggested Plan of Study for Students**
This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Physics - Master of Science**

The Master's degree requires that students either pass the qualifying examination at the Master's level or identify a research advisor during the first semester of study, form a Graduate Committee, and write a thesis. For the master's degree, students must also successfully complete or transfer at least 30 course credits and pass a final oral examination or the doctoral comprehensive examination. Of these 30 credits, at least 21 must be in physics/geophysics, at most 3 may be for individual study or other informal courses, at most 6 may be for a thesis, and at most 9 may be numbered between 450 and 499. Students must successfully complete
Physics (Space Physics) - Master of Science

Requirements

For the master's degree with a concentration in Space Physics, students must successfully complete the following physics core and specialized courses:

<table>
<thead>
<tr>

Total Credits 30

Physics - Doctor of Philosophy

For the Ph.D. degree, students must also pass the doctoral comprehensive examination, carry out original research, complete a dissertation, and pass a final oral examination. They must also pass or transfer at least 36 credits in formal courses numbered above 500 in physics/geophysics, including 24 credits of core graduate courses, and complete at least 6 credits of formal courses numbered above 600. The total number of credits, including formal and informal course credits and a minimum of 18 dissertation credits, must be at least 72. Financial support is available to graduate students in physics through teaching and research assistantships and fellowships. Inquiries about these opportunities should be directed to the graduate program director.

Physics - Graduate Minor

Eligibility

This minor is available to graduate students not majoring in Physics or Geophysics.

Requirements

A student must satisfy the following requirements to earn a graduate minor in Physics:

- Successfully complete 12 credit hours of courses in Physics or Geophysics numbered above 500. Of these, not more than 3 credit hours can be for research, independent study, or other informal courses.
- Pass one of the four sections of the Physics Department’s Qualifying Exam at the Ph.D. level.
- A member of the Physics faculty must be a member of the student’s graduate committee.

Psychology

Undergraduate Program Information

Students may take a major in psychology either as an area of emphasis in a liberal arts program or in preparation for further graduate education leading to professional careers in psychology. A major in psychology may be appropriate for the liberal arts student who wishes to pursue a career involving extensive social interaction and requiring solutions to people-related problems. Such careers include law, business, parenting, government, education, and management. Professional careers in psychology generally require some post-baccalaureate education. These careers include provision of clinical and counseling services, conducting research, applying research findings in industrial or government settings, and doing teaching and research in colleges and universities. All students, but especially those planning to apply to graduate school, are encouraged to take PSYC 310 Experimental Methods, no later than the Spring semester of their junior year.

Requirements for the Bachelor of Arts in Psychology are listed here (p. 1066). Satisfying these requirements should provide an adequate exposure to psychology for the liberal arts student and a basic foundation for students seeking a career in psychology. Students wishing to prepare for a professional career in psychology are especially encouraged to work closely with an advisor, as early as possible.

Graduate Program Information

Admission

The Department of Psychology offers graduate work leading to the Master of Arts and Doctor of Philosophy degrees. To maximize consideration for admittance, candidates should submit applications by January 15. Note that the Psychology Department does not offer training in counseling or clinical psychology.

Students will be admitted to graduate study on the basis of their potential for achievement in research, scholarship and teaching. The most promising applicants will be accepted. The number of students that the department can successfully accommodate is limited, therefore it will not always be possible to admit all qualified applicants. The admissions committee will consider any material that a candidate for admission wishes to present.

Students with bachelor degrees should apply for admittance to the master’s program even if their eventual goal is a Ph.D. Students with a master's degree in psychology-related disciplines or from other institutions may apply directly to the Ph.D. program.

A completed Graduate School admission application (https://gradschool.nmsu.edu/apply/) (online only) should include all of the following:

1. Complete transcripts of all college work (minimum 3.0 GPA).
2. Three letters of recommendation from professors, employers or others qualified to evaluate your potential for graduate work.
3. A letter explaining your research interests and experience, career goals, and an indication of the faculty member(s) whose work is of particular interest to you.
4. A curriculum vitae or résumé.
5. A writing sample (e.g., a paper you wrote for a course, a senior thesis, or a master’s thesis) uploaded through online application system. Ideally, the sample should demonstrate your ability to write clearly about psychological research.

As per NMSU Graduate School policy, admission to the doctoral program is conditional upon passing a qualifying exam. In Psychology this generally involves giving a presentation about a completed, empirical Masters thesis project to an examining committee. Also, if there are perceived gaps in preparedness, once at NMSU, candidates may be asked to complete certain coursework/research projects to address deficiencies.

A number of potential minors are available to interested students, including a minor in statistics (p. 1156). Additional information about a minor may be found in the listing of the home department in this catalog.

Degrees for the Department

Bachelor Degree(s)

Psychology - Bachelor of Arts

Master Degree(s)

Experimental Psychology - Master of Arts (p. 1071)

Doctoral Degree(s)

Experimental Psychology - Doctor of Philosophy (p. 1071)

Minors for the Department

Undergraduate

Psychology - Undergraduate Minor (p. 1071)

Graduate

Psychology - (p. 1072) Graduate Minor (p. 1072)

Associate Professor, Dominic A. Simon, Department Head

Professors: Trafimow; Madson, Marks
Associate Professors: Guynn, Hout, Ketelaar, Kroger, MacDonald;
Assistant Professors: Fraune, Papesh;
Emeritus Faculty: Cowie, Johnston, McDonald, Paap, Schvaneveldt, Stephan, Thompson.

D.A. Simon, Department Head, Ph.D. (California- Los Angeles)—cognition, learning and performance;  M. Fraune (Indiana)- Human/Robot Interaction; M. J. Guynn, Ph.D. (New Mexico)—human memory; M.C. Hout, Ph.D. (Arizona State University) - visual cognition; T. Ketelaar, Ph.D. (Michigan)—social psychology, emotion; J. K. Kroger, Ph.D. (California-Los Angeles)—biopsychology, cognitive neuropsychology; J. MacDonald (Purdue)—engineering psychology, auditory perception; L.J. Madson, Ph.D. (Iowa State)—scholarship of teaching & learning, gender, sexuality; M.J. Marks, Ph.D. (Illinois, Urbana-Champaign)—social psychology, sexual behaviors, relationships; D.Trafimow, Ph.D. (Illinois, Urbana-Champaign)—social cognition.

Psychology Courses

PSYC 1110G. Introduction to Psychology
3 Credits (3)
This course will introduce students to the concepts, theories, significant findings, methodologies, and terminology that apply to the field of psychology.

Learning Outcomes
1. Explain how the scientific method and psychological research methodologies are used to study the mind and behavior.
2. Recall key terms, concepts, and theories in the areas of neuroscience, learning, memory, cognition, intelligence, motivation and emotion, development, personality, health, disorders and therapies, and social psychology.
3. Explain how information provided in this course can be applied to life in the real world.
4. Identify the major theoretical schools of thought that exist in psychology as they relate to the self, the culture, and the society.
PSYC 2221. Applied Psychology
3 Credits (3)
Explanation of the psychological principles of everyday living. Emphasizes motivation, learning of intelligent behavior, and applications of psychology to social issues. Community Colleges only.

Learning Outcomes
1. The objective of this course is to orient students to the personality characteristics, interpersonal competencies, ethical decision-making skills, and other professional traits associated with pursuing a career in a helping profession.
2. Identify the requirements for becoming a helping professional, characteristics of a skilled helper, and cultural factors that impact helping professionals.
3. Explain your personal strengths and weaknesses as a potential helper.
4. Demonstrate appropriate helping strategies based upon the special characteristics of clients.
5. Compare the capabilities that individual, family, group, community, and online interventions offer you as a future helper.
6. Identify the ethical and legal issues that impact helping professionals.
7. Analyze the potential impact of your future ethical and professional standards as a helping professional.
8. Explain how your role as a helping professional is impacted by your professional affiliation and ethical principles.
9. Analyze how worsening personal problems and increasing stress can impact the kinds and quality of our responses to life and the people around us.

PSYC 2230. Psychology of Adjustment
3 Credits (3)
This course focuses on the individual’s adjustment to society, and the application of psychological principles to the understanding of adjustment.

Learning Outcomes
1. Explain the internal and external factors associated with the psychology of adjustment.
2. Evaluate contributions from psychology to adjustment concepts and processes.
3. Describe the different explanations of how individuals adjust to their environments.
4. Describe how self-identities develop and how they affect relations with others.
5. Identify resources available for assistance with adjustment-related concerns.

PSYC 2311. A Study of Substance Abuse through Learning
3 Credits (3)
Physiological and psychological impact of drug use on human behavior. Emphasizes practical applications of intervention and prevention in the community. Community Colleges only.

Learning Outcomes
1. Through readings and discussions, students will be able to describe the role that gender, ethnicity, and age have in alcohol and drug use.
2. Through readings and discussions, students will be able to learn past and current perspectives of addiction.
3. Through readings, discussions and student presentations, students will be able to distinguish between different types of abuse-able drugs and be able to classify them.
4. Through readings, discussions, lectures and guest speaker’s students will be able to describe the role of addiction and criminal behavior.
5. Through readings and discussions, students will be able to discuss the Models and Theories of Drug Dependence and Addiction.
6. Through readings, discussions and evaluation of case studies students will be able to discuss the definitions of Substance Abuse, Dependence Addiction.
7. Through readings and discussions, students will be able to acquaint themselves with the effects of Addictive Behavior on Family Systems.
8. Through readings discussions, students will be able to Discuss Disorders Co-Occurring with Substance Abuse.
9. Through readings and community service learning outing, students will be able to discuss how important the concepts of Prevention, Intervention and Treatment in drug addiction.
10. Through readings and community service learning outing students will be able to discuss Alcohol/Drug Recovery Treatment Relapse Prevention.
11. Through completion of Service Learning and field assignment students will be able to discuss the role of AA/NA in Recovery Treatment.
12. Through attendance of a Drug Court Hearing students will be knowledgeable of the role of Drug Courts in prevention and treatment of drug addiction.

PSYC 301. Introduction to Psycholinguistics
3 Credits (3)
Psychological aspects of language, including linguistic theories of grammar, psychological factors influencing language performance, primary language acquisition and the relationship of language to thought processes. Same as LING 301.

Prerequisites: PSYC 1110G and one of: MATH 1350G, MATH 2350G, or A ST 311; and PSYC 310 or consent of instructor.
PSYC 302. Abnormal Psychology
3 Credits (3)
Introduces the types, causes, and treatment of mental disorders. Descriptions and explanations of the neuroses, affective disorders and the psychoses. Case histories are also analyzed.
Prerequisites: PSYC 1110G, MATH 1215 and ENGL 1110G.

PSYC 310. Experimental Methods
4 Credits (2+4P)
The basic skills of literature search, experimental design, research methodology, and research reporting are emphasized; includes laboratory.
Prerequisite(s): PSYC 1110G, and either MATH 1350G, MATH 2350G, or A ST 311.

PSYC 311. Advanced Research Seminar
4 Credits (2+4P)
Psychological research in conjunction with designing, conducting, writing, and presenting an independent research project. May also include various computer applications. Will discuss issues regarding application to graduate programs. Course should be taken no later than the first semester of senior year.
Prerequisite: PSYC 310.

PSYC 315. Emotion
3 Credits (3)
An overview of the past century of research on human emotion from William James to Antonio Damasio. Explores a cognitive science perspective on emotion that includes questions about developmental, physiological, and evolutionary aspects of emotion and an exploration of the proximate and ultimate functions of emotion. Topics range from understanding the feeling component of emotion to understanding the role of facial displays of emotion.
Prerequisite(s): PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311G, and PSYC 310 or consent of instructor.

PSYC 317. Social Psychology
3 Credits (3)
Ways in which people are influenced by the behavior of others are analyzed. Includes aggression, altruism, conformity, attraction, sexual behavior, prejudice, and nonverbal behavior.
Prerequisites: PSYC 1110G, MATH 1215, and ENGL 1110G.

PSYC 320. Learning
4 Credits (3+2P)
Covers: habituation, Pavlovian conditioning, Thorndikian learning, stimulus generalization, transfer of training, and the learning and forgetting of related and unrelated material.
Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310.

PSYC 321. Psychology of Personality
3 Credits (3)
Introduces personality theories and supporting research. Psychoanalytic, physiological, and behavioral theories as they apply to personality are examined. Focuses on normal personality functioning.
Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310.

PSYC 324. Sexual Behavior
3 Credits (3)
Examines viewpoints of the evolution, control and function of human sexual behavior. Includes human sexuality, reproduction, male-female conflicts and the social implications of sex. Prerequisites: PSYC 1110G, MATH 1215, and ENGL 1110G

PSYC 325. Health Psychology
3 Credits (3)
Life stress, surgical stress, coronary-prone behavior, biofeedback, pain control, psychosocial approaches to geriatrics and cancer, behavioral treatments for addictions, obesity, and interpersonal issues in health care.
Prerequisite: PSYC 1110G.

PSYC 330. Psychology and the Law
3 Credits (3)
Discretionary practices in the judicial system including pretrial procedures, jury selection, jury decision making, eyewitness testimony, insanity, expert witnesses, and probation judgments.
Prerequisite: PSYC 1110G.

PSYC 340. Cognitive Psychology
3 Credits (3)
Review of research and theory in the study of human cognitive processes. Topics include information processing, pattern recognition, memory, attention, language, problem solving, decision making, and reasoning. May be repeated up to 3 credits.
Prerequisite(s): PSYC 1110G, MATH 1215, and ENGL 1110G.
PSYC 350. Developmental Psychology: Conception through Childhood
3 Credits (3)
Covers a wide range of topics concerning human psychological development from conception through childhood with special emphasis on current research and theory. May be repeated up to 3 credits.
Prerequisite(s): PSYC 1110G, MATH 1215, and ENGL 1110G.

PSYC 351. Developmental Psychology: Adolescence through Old Age
3 Credits (3)
Covers a wide range of topics concerning human psychological development from adolescence through old age with special emphasis on current research and theory.
Prerequisite: PSYC 1110G.

PSYC 359. Psychology of Gender
3 Credits (3)
Examines theories and research on the psychological functioning of women and men in North American society, including influential theories of gender in psychology and current controversies in the psychological literature. Topics include those unique to women and unique to men in development across the lifespan, work, physical and mental health, sexuality, victimization, gender stereotypes, gender comparisons in abilities and personality, and biological, social, and cultural influences on behavior. May be repeated up to 3 credits. Crosslisted with: GNDR 359.
Prerequisite(s): PSYC 1110G.

PSYC 370. Special Topics
1-3 Credits
May be taken under different subtitles announced in the Schedule of Classes for unlimited credit. May be repeated for a maximum of 12 credits.
Prerequisite: PSYC 1110G.

PSYC 375. Psychology and the Brain
3 Credits (3)
An exploration of how the brain produces thinking, emotion, and behavior. May be repeated up to 3 credits.
Prerequisite(s): PSYC 1110G, MATH 1215 and ENGL 1110G.

PSYC 376. Evolutionary Psychology
3 Credits (3)
This course introduces the student to the science of Evolutionary Psychology. In this class we will explore how evolutionary psychologists think about a variety of topics ranging from our capacity for (and appreciation of) art, emotions, and beauty to an exploration of the “design” of our minds in regards to mating, status striving, social behavior and cultural production.
Prerequisite(s): PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311G, and PSYC 310 or consent of instructor.

PSYC 380. Perception
4 Credits (4+4P)
Primary emphasis on vision. Topics include measurement of sensations, development of visual-motor coordination, reading, speech perception, picture perception, illusions, 3-dimensional space, and causes and consequences of visual abnormalities.
Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310.

PSYC 383. Memory
3 Credits (3)
Examines facets of human memory from the information processing viewpoint, including encoding, storage, and retrieval and memory-aiding techniques.
Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310 or consent of instructor.

PSYC 400. Research
1-3 Credits
Individual research projects supervised by a department faculty member. May be repeated for a maximum of 6 credits.
Prerequisites: PSYC 310 and consent of instructor.

PSYC 401. Directed Readings
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisites: PSYC 1110G and consent of instructor.

PSYC 402. Field Experience
1-3 Credits
Working with preschool, juvenile delinquent, handicapped, aged, convict, or mentally ill. Approximately five hours scheduled work per week per credit. May be repeated to 6 credits.
Prerequisites: 6 psychology credits and consent of instructor.
PSYC 430. Human-Computer Psychology
3 Credits (3)
Theories, methodologies, and data from psychology applicable to interface design, with an emphasis on construction and application of conceptual psychological models.
Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310 or consent of instructor.

PSYC 442. Thinking
3 Credits (3)
Research and theory pertaining to human thinking and problem solving. Effective problem-solving methods and common obstacles to problem solving are analyzed.
Prerequisites: PSYC 1110G and PSYC 310.

PSYC 450. Senior Thesis
3 Credits (3)
A laboratory or field research project conducted under faculty supervision. Requires written research proposal, conduct of research, data analysis, and final written report. May be repeated for a maximum of 6 credits.
Prerequisites: PSYC 310, 6 additional psychology credits, consent of supervising faculty member, and junior or above standing.

PSYC 470. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

PSYC 507. Quantitative Methods in Psychology I
3 Credits (3)
Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on distributions, probability and basic inferential statistics in Psychological research. Includes basics of Analysis of Variance (ANOVA) and Multiple Regression in Psychological research. May be repeated up to 3 credits.
Learning Outcomes
1. Students will be able to recognize appropriate usage of, and be able to implement, basic statistical techniques: Central tendency, variability, z-scores, t-tests, ANOVA, correlation, two predictor regression.

PSYC 508. Quantitative Methods in Psychology II
3 Credits (3)
Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on advanced ANOVA and Multiple Regression in Psychological research. May be repeated up to 3 credits.
Prerequisite(s): PSYC 507 or equivalent.
Learning Outcomes
1. Students will become familiar with situations and applications of advanced ANOVA techniques and Multiple Regression and Correlation.

PSYC 509. Quantitative Methods in Psychology III
3 Credits (3)
Advanced quantitative methods as applied to research in Psychology: Topics may include: Multivariate techniques, advanced Bayesian analyses, Random walk modelling etc. May be repeated up to 3 credits.
Prerequisite(s): PSYC 507 or equivalent.

PSYC 510. Computer Methodology
3 Credits (3)
Use of computers in psychological research with emphasis on developing experimental control programs.

PSYC 520. Learning
3 Credits (3)
Classical areas of learning, including instrumental and classical conditioning paradigms, habituation, reinforcement variables, stimulus generalization and transfer, and memory.

PSYC 522. Sensation and Perception
3 Credits (3)
Stimulus and decision variables in judging auditory and visual events. Topics include: detection of signals; signal intensity versus perceived strength; size, shape, and movement perception; reading and listening.

PSYC 523. Methods in Cognitive Psychology
3 Credits (3)
Experimental and correlational methodologies appropriate for investigating cognitive psychological theories and problems.
Prerequisite(s): PSYC 524 or consent of instructor.
PSYC 524. Cognitive Psychology  
3 Credits (3)  
Examines theoretical and empirical work on human cognition. Topics include: information processing theories, pattern recognition, memory, attention, language, problem solving, decision making, and reasoning.

PSYC 527. Social Psychology  
3 Credits (3)  
Current and traditional theories, research findings, and research methodologies of social psychology.

PSYC 529. Methods in Social Psychology  
3 Credits (3)  
Experimental, quasi-experimental, and correlational methodologies appropriate for investigating social psychological theories and problems.  
Prerequisite(s): Graduate student in psychology or consent of instructor.

PSYC 540. History and Systems of Psychology  
3 Credits (3)  
History of scientific method emphasizing outstanding methodological problems of contemporary science, especially psychology. Covers recent history of psychology and development of schools of psychology.

PSYC 547. Engineering Psychology  
3 Credits (3)  
Covers concepts, methods, and findings of human performance. Treats the human as a subsystem that receives, stores and processes information, makes decisions, and acts within a human-machine environment system.

PSYC 550. Teaching of Psychology  
3 Credits (3)  
This class serves both new and experienced teachers. It will help new teachers design and conduct a successful course and help experienced teachers improve their teaching.

PSYC 570. Special Topics  
1-3 Credits  
Specific subjects to be announced in the Schedule of Classes.

PSYC 590. Research Seminar in Psychology  
1 Credit (1)  
Presentations on research by students, faculty, and guest speakers. May be repeated for credit.

PSYC 598. Special Research Programs  
1-3 Credits  
Individual investigations either analytical or experimental. May be repeated for credit.

PSYC 599. Master’s Thesis  
1-15 Credits  
Thesis.

PSYC 600. Doctoral Research  
1-15 Credits  
This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

PSYC 698. Special Research Programs  
1-3 Credits  
Individual investigations either analytical or experimental. May be repeated for credit.

PSYC 700. Doctoral Dissertation  
1-15 Credits  
Dissertation.

Las Cruces, NM 88003-8001
Psychology - Bachelor of Arts

General Requirements

Students must complete all University degree requirements, which include: General Education requirements (p. 123), Viewing a Wider World requirements (p. 130), and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Students must receive a C- or better in courses.

| Credits | 120 |

---

1. Either MATH 1350G Introduction to Statistics, MATH 2350G Statistical Methods is required for the degree but students may need to take any prerequisites needed to enter MATH 1350G or MATH 2350G first.
2. See the General Education (p. 123) of the catalog for a full list of courses.
3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
4. PSYC 310 Experimental Methods: prerequisite of PSYC 1110G Introduction to Psychology and and either MATH 1350G,MATH 2350G, or A ST 311.
5. Additional electives to bring total credits in psychology to at least 34, with at least 24 of those 34 credits being upper division.
6. PHIL 346 Philosophy of Mind or PHIL 351 Philosophy of Science recommended.
7. Students who are considering graduate study are strongly encouraged to take math classes beyond the minimum statistics course requirement.
8. A course that includes a laboratory is highly recommended, and is required if intended to satisfy Gen Ed Area III.
9. Elective credit may vary based on General Education course selection, second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
Second Language Requirement

For the Bachelor of Arts in Psychology there is a two year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

**Option 1:**

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Complete one of the following sequences:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CHIN 1110 &amp; CHIN 1120 &amp; CHIN 2110 &amp; CHIN 2120</td>
<td>Mandarin Chinese I and Mandarin Chinese II and Mandarin Chinese III and Mandarin Chinese IV</td>
<td>3-14</td>
</tr>
<tr>
<td>FREN 1110 &amp; FREN 1120 &amp; FREN 2110 &amp; FREN 2120</td>

<td>4</td>
</tr>
<tr>
<td>MATH 1511G</td>
<td>Calculus and Analytic Geometry I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 1521G</td>
<td>Calculus and Analytic Geometry II</td>
<td>4</td>
</tr>
</tbody>
</table>

**Total Credits**: 15

### Option 6:
Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

### Option 7:
Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

### Option 8:
By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

### Option 9:
By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

### Option 10:
In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1350G Introduction to Statistics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

1 These courses may have prerequisites and/or co-requisites, and it is the student's responsibility for checking and fulfilling all those requirements.
2 See the General Education (p. 123) section of the catalog for a full list of courses.
3 See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.

Psychology - Undergraduate Minor

A student must pass at least 18 credits in Psychology courses with grades of C- or higher, and at least 9 of those credits must be upper division. A student may not earn both a BA in Psychology and a minor in Psychology.

Experimental Psychology - Master of Arts

The department offers an MA degree in general experimental psychology. The program provides students with sufficient electives to emphasize a particular sub-area of experimental psychology. The program is designed to provide graduates with the tools and knowledge necessary for further training at the doctoral level or for employment in industry or government.

MA students are required to complete:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 598</td>
<td>Special Research Programs</td>

</tbody>
</table>

1 Students are also encouraged to register for one credit of PSYC 590 Research Seminar in Psychology each semester.

When offered, PSYC 570 Special Topics may be considered content, quantitative methods, or experimental methods, depending on the specific course content.

Experimental Psychology - Doctor of Philosophy

The Ph.D. in psychology is offered in the major areas of cognitive, engineering and social psychology. Ph.D. candidates are required to complete the following coursework and tasks:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

**Comprehensive Examination:**

1. Pass written and oral components of the comprehensive exam

**Work Related Training Requirement:**

2. Complete a work-related training requirement (i.e., complete an internship of at least 10 weeks duration, or teach at least one 3-credit undergraduate course independently; pre-teaching requirements listed here)

**Final Oral Examination:**

3. Pass a final oral examination that consists primarily of an evaluation of the dissertation and the candidate's defense of it, but may extend over the entire field of the candidate's study.

Students are encouraged to register for one credit of PSYC 590 Research Seminar in Psychology each semester.

Students should also enroll in at least one credit of the appropriate supervised research course each semester (i.e., PSYC 600 Doctoral Research, PSYC 698 Special Research Programs, or PSYC 700 Doctoral Dissertation).

When offered, PSYC 570 Special Topics may be considered content, quantitative methods, or experimental methods, depending on the specific course content.

**Psychology - Graduate Minor**

Any master's or doctoral student can declare a minor in Psychology in addition to their major area of study.

Students may earn a minor in psychology at the M.A. or Ph.D. level by completing nine credits of any 500-level and above coursework in psychology except the following courses (PSYC 507, PSYC 508, PSYC 509, PSYC 590, PSYC 598, PSYC 599, PSYC 600, or PSYC 700).

All minors must be approved by the minor department head and dean of the Graduate School. Students must declare the Psychology minor on a Program of Study and Committee Form for the Master's and doctoral level. Demonstration of competency in the minor area will be required at both comprehensive and final examinations. Students must also include a representative from the Psychology department on their thesis, comprehensive, and/or dissertation committees. The representative from the minor department can also serve as the Dean's Representative on the committee.

**Theatre Arts**

**Undergraduate Program Information**

With strong emphases in acting, musical theater, new works and design/technical theatre, the program prepares students for graduate study, life in the profession, or a myriad of related job fields. Students gain practical experience through a wide array of courses designed to expose them to the varied aspects and job positions involved in theatrical production. Additional experience is gained via work on our public productions. The faculty is augmented by nationally-renowned guest theatre artists.

A minimum of 62 credits with a grade of C- or higher in theatre arts is required for the major. Theatre Arts does not require a second language.

Students enrolled in this department's major or minor may count credits in required applied courses toward their degrees beyond the normal maximum of 9 credits allowed in the College of Arts and Sciences. However, if a student changes the major or does not complete the requirements for the minor at the time of graduation, they may only count a maximum of 9 credits of the applied credits toward graduation.
Students preparing to teach in public schools may qualify for certification by completing the Bachelor of Science in Education degree with theatre arts as a teaching field. (See curricula in the College of Health, Education & Social Transformation (http://catalogs.nmsu.edu/nmsu/health-education-social-transformation/) section).

At any time the Theatre Arts program may be undergoing curriculum changes. For the most up-to-date information about degree requirements please visit https://theatre.nmsu.edu/ or visit the Theatre Arts Department at room 318 in the ASNMSU Center for the Arts Building on University Ave at Espina.

Theatre Arts Courses
THEA 1110G. Introduction to Theatre
3 Credits (3)
This course provides an introduction to the study of theatre. Students will examine various components that comprise theatre, such as acting, directing, playwriting, dramaturgy, scenic and costume design, stagecraft, spectatorship, history, theory, and criticism.
Learning Outcomes
1. Define and discuss basic theater terms and concepts.
2. Discuss the fundamental elements of theatre, and the ways in which theatre differs from other art forms.
3. Analyze and critique the elements of a live theatrical production.
4. Identify and describe the roles of various theatre artists including actors, directors, playwrights, dramaturges, and designers.

THEA 1210G. Acting for Non-Majors
3 Credits (3)
This class gives non-majors experience in the depth and craft of the actor’s art. Students will learn various terms, techniques, and practices of acting and will demonstrate their understanding in class. Through exercises and improvisations, partnered scenes, and group work, students will be better able to appreciate the work of others as they learn techniques of performing. May be repeated up to 3 credits.
Learning Outcomes
1. Develop fundamental physical, vocal, analytical, and imaginative skills for acting for the stage.
2. Apply fundamental techniques of voice and movement for the stage.
3. Apply principles of play text analysis to understand story, character, and meaning.
4. Gain a better understanding of an actor’s approach to goals, tactics, and obstacles.
5. Engage in character creation and development while preparing and performing monologues and scenes.
6. Learn a common vocabulary to help discuss the process of acting.
7. Employ collaborative methods of work with a partner and in groups.
8. Observe and evaluate acting skills of other actors.
9. Increase verbal and physical communication skills which are applicable in any field.
10. Develop personal and social responsibility via group work, research and self-reflection.
11. Increase confidence and self-esteem via continuous presentations with supportive feedback.
THEA 1221. Beginning Acting
3 Credits (3)
Basic understanding of self-expression through a variety of physical exercises, improvisation, and character study, culminating in scene or monologue work. Restricted to: THTR majors.

Learning Outcomes
1. Apply a common vocabulary that serves as a foundation in acting for the theatre major and minor
2. Communicate effectively in front of an audience, applying learned concepts while exercising freedom and control of voice, body, and imagination
3. Analyze the written character and live performance
4. Provide objective feedback to your classmate's work as well as your own, that supports a greater understanding of our craft while building trust within the collaborative ensemble

THEA 1222. Stage Movement
3 Credits (3)
Physical techniques for the actor to develop kinesthetic awareness and skills in characterization, archetypes, and stage combat. Restricted to: THTR majors.

Learning Outcomes
1. To provide fundamental training in a variety of movement techniques which can be applied to both theatrical performance and physical communication in everyday life.
2. Observation and critical skills will be advanced through class participation and outside assignments
3. Class exercises are aimed at guiding participants to uncover their own creative expression, while working with efficient, healthy body alignment

THEA 1223. The Art of Theatre
3 Credits (3)
This course introduces the variety and scope of theatre professions, the value and goals of the theatre major and an analysis of the art form from script to stage. Restricted to: Required for THTR majors majors.

Learning Outcomes
1. An overview of the history of theatre in the Western world
2. A general understanding of the artistic roles and functions within the theatre industry (including within NMSU Theatre as a model)
3. A strong preparation for independent in-depth script analysis and theatre critique

THEA 1310. Introduction to Costuming
3 Credits (3)
This course introduces students to basic skills generally used in creating costumes for theatre. During the semester students will be introduced to the costume shop, equipment, supplies, and processes. They will learn the process of sewing a garment and running a stage production.
Prerequisite(s)/Corequisite(s): THEA 1310L. Restricted to: THTR majors.

Learning Outcomes
1. Demonstrate basic hand and machine sewing skills.
2. Use basic costume craft tools and techniques.
3. Analyze fabric selection for the stage.
4. Draft and use patterns.
5. Take body measurements for patterning and construct a costume from those measurements.
6. Combine interpersonal communication skills with costume construction skills.
7. Analyze a script for costume design purposes.
8. Build a garment.

THEA 1310L. Costume Craft Lab
1 Credit (1)
Class members will assist in construction for productions in a studio environment.
Prerequisite(s)/Corequisite(s): THEA 1310.

Learning Outcomes
1. This laboratory class compliments THEA 1310: Costume Crafts.
2. It gives the student an opportunity to put into practice the skills learned in THEA 1310 as well as be introduced to and participate in the day-to-day operations of the Costume Shop.
THEA 1415. Running Crew I
2 Credits (1+2P)
Students learn about backstage and front of house production positions and work on a technical aspect of a product in a rehearsal and performance environment.

Learning Outcomes
1. Students will learn one, or more, of the basic technical elements of theatrical crew work.

THEA 2221. Intermediate Acting: Scene Study and Monologues
3 Credits (3)
Monologues and scene work, using character and script analysis. Prerequisite(s): THEA 1221 or THEA 1210 with C- or above.

Learning Outcomes
1. Students will gain further insight into the craft of acting and the techniques and skills required to present a successful stage performance.
2. Via the presentation of varied scenes and monologues, students will be exposed to a variety of theatrical literature.
3. Via research, students will gain knowledge of successful actors, acting techniques, and career advice.

THEA 2222. Intermediate Acting for Non-Majors
3 Credits (3)
A continuation of THEA 1210 with an emphasis on monologues, scenes and characterization. Prerequisite(s): THEA 1210

Learning Outcomes
1. Apply fundamental techniques of voice and movement for the stage.
2. Analyze a dramatic text and interpret a character and develop the skills necessary to score a script for character development.
3. Perform specific choices to create and perform goal-driven characters.
4. Demonstrate various physical and mental relaxation techniques.
5. Identify internal and external techniques to increase actor’s emotional range.
6. Demonstrate sensory exercises and apply this technique to scene work.
7. Articulate and implement key terminology of modern acting techniques.
8. Develop and articulate a basic personal artistic process.
9. Demonstrate the ability to work cooperatively on a creative/interpretative project.
10. Begin to develop professionalism and development of a critical eye through practice giving and receiving peer feedback, adherence to deadlines, memorization, flexibility and coachability.

THEA 2310. Stagecraft
3 Credits (3)
Student will explore basic skills for scenic designers and techniques of set construction for the stage, including building scenery, rigging, painting and properties.

Prerequisite(s)/Corequisite(s): THEA 2310L.

Learning Outcomes
1. Demonstrate a range of technical skills, which will qualify them to assist in the basic technical production of a play.
2. Demonstrate and apply how to safely and competently use hand tools, power tools, electrical, and electronic stage equipment.
3. Analyze the technical aspects of a play in performance.
4. Read and construct scenery from ground plans, elevations, and drawings.
5. Analyze a script from the perspective of a designer, artistic, and/ or technical director.

THEA 2310L. Stagecraft Laboratory
1 Credit (1)
Class members will assist with construction for productions in a studio environment.

Prerequisite(s)/Corequisite(s): THEA 2310.

Learning Outcomes
1. History of scenic design and the development of present day stage design.
2. How to create and interpret basic scenic ground plans, elevations, and detail drawings.
3. To construct basic scenic structures to include flats and platforms.
4. Various techniques of scenic painting and decorating.
5. The installations of theatre lighting instruments and sound equipment.
THEA 2340. Introduction to Design
3 Credits (3)
Introduction into our visual world via the language of designers, focusing on collaboration, creative thinking and presentation skills. The varied design professions in theatre and the performing arts will be explored. Restricted to: Required of all THTR Majors.

Learning Outcomes
1. Apply design vocabulary and descriptions when speaking about design.
2. Identify design tools and make choices about where to use them.
3. Apply the foundation information in understanding how design tools work.
4. Apply correct terminology in assessing design and script analysis.
5. Read and understand some of the design documents commonly used in the industry.

THEA 2415. Running Crew II
1 Credit (1)
Students learn about backstage and front of house production positions and work on a technical aspect of a product in a rehearsal and performance environment.

Learning Outcomes
1. To provide students with “hands on” experience participating in being a member of a running crew on a theatrical production.
2. Students will learn one, or more, of the basic technical elements of theatrical crew work.

THEA 2421. Vocal Production for the Actor
3 Credits (3)
Exploration and development of the actor’s vocal instrument, including relaxation, projection, diction and articulation. May be repeated up to 3 credits. Restricted to: THTR majors.

THEA 2993. Theatre Workshop I
0.5 Credits (.5)
Required for all freshman and sophomore theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

Learning Outcomes
1. This lab course is designed to create community via group meetings with your peers while providing a platform for our guest artists to present information regarding our profession.
2. As time allows, group discussions and sharing will further the sense of community and collaboration with your peers.
3. This forum also provides an opportunity to discuss and provide feedback for each production in the ASTC season.

THEA 2996. Theatre Topics
1-3 Credits (1-3)
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

Learning Outcomes
1. Varies

THEA 300. Theatre Workshop II
0.5 Credits (.5)
Required for all junior and senior theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

THEA 303. Theatre History I
3 Credits (3)
History of theatre and drama from ancient Greece to the English Renaissance.

THEA 304. Theatre History II
3 Credits (3)
History of theatre and drama from the Restoration to the 20th century. May be repeated up to 3 credits.

THEA 305. Advanced Vocal Production
3 Credits (.3)
Advanced exploration and development of the actor’s vocal instrument. May be repeated up to 3 credits.
Prerequisite(s): THEA 2421.
THEA 306. Script Analysis
3 Credits (3)
This class is designed to give you tools and specific processes to help you read and break down a text, so that you can make it come alive for audiences in the varied genres of theatre, film and animation.

Learning Outcomes
1. Determine the dramatic structure of a script
2. Write an analysis of a script for production
3. Verbally communicate an analysis of a script for production
4. Analyze a script from a specific perspective such as actor, director, designer, animator, etc.

THEA 307V. Society in Style: Fashion, History and Culture
3 Credits (3)
History of clothing for theatrical purposes, origins and evolution of period clothing in relation to social, political, and aesthetic factors of different periods.

THEA 308. Creative Writing: Playwriting
3 Credits (3)
Technique of one-act playwriting, and analysis of dramatic structure. Crosslisted with: ENGL 308
Prerequisite(s): ENGL 1110G.

THEA 310. Styles in Acting
3 Credits (3)
Analysis of differing styles of acting through scene work representing various time periods and genres. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): THEA 1221 or THEA 1210 with a C- or better.

THEA 311. Acting for Film and Television
3 Credits (3)
Specific techniques of acting for the camera are explored via hands-on experiential learning and an introduction to the business of the TV/Film industry
Prerequisite(s): THEA 1221 or THEA 1210 or permission of instructor.

THEA 312. Acting Shakespeare
3 Credits (3)
Acting Shakespeare's tragedies and comedies, including text work, scansion, movement, scene work, and monologues. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): THEA 1221 or THEA 1210 with a C- or better.

THEA 313. Improvisation
3 Credits (3)
Long and/or short form improvisation techniques in addition to a variety of exercises exploring terminology, character work and the elements of comedy.
Prerequisite(s): THEA 1210 or THEA 1221.

THEA 317. Musical Theatre
3 Credits (3)
Acting class focused on developing and refining skills necessary for performing in musicals. May be repeated up to 9 credits.
Prerequisite(s): THEA 1221 or THEA 1210 with a C- or better.

THEA 321V. Modern European Drama
3 Credits (3)
Masterworks of European drama from the 19th century to the present. Crosslisted with: ENGL 321V.

THEA 322. Dramatic Character
3 Credits (3)
How characters have been created for the stage from the beginning of theatrical performances in ancient Greece to the present day. Exploring characterization related to dramatic structure, style, and genre, and how dramatic characters differ from those in literary fiction. May be repeated up to 3 credits. Crosslisted with: ENGL 322.

THEA 323. American Drama
3 Credits (3)
Masterworks of American drama from the 20th century to the present. Crosslisted with: ENGL 323.

THEA 324. Singing for Musical Theatre
3 Credits (3)
Students will gain an understanding of stronger vocal health, aural skills, and rehearsal practice strategies as they work on musical theatre singing techniques and performances including solos, duets and small groups, and a final public showcase.

Learning Outcomes
1. The ability to practice strong vocal habits in order to independently maintain vocal health. Identify and utilize proper vocal warm-up techniques.
2. Display an improved level of music reading and aural awareness. Analyze and break down a piece of theatrical music into components for focused learning. Perform pieces of music theatre both individually and in a group with increased ease
THEA 329. Studies in Drama
3 Credits (3)
Subtitles vary. Study of a group of related works of drama, theory, or theatre practice. Crosslisted with: ENGL 329 and FDMA 329.

THEA 330. Special Topics: Variable
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes.

Learning Outcomes

1. To gain knowledge and/or skill in a specialty area of theatre

THEA 334. Introduction to Stage Makeup
3 Credits (3)
Basic principles of stage makeup: straight, character, and specialty. Includes study of various products, methods of application, and the effects of lighting on makeup.

THEA 337. Independent Study
1-3 Credits
Students propose and design their own course not covered through regular course offerings under the guidance of faculty. May be repeated up to 6 credits. Consent of Instructor required.

THEA 341. Scene Painting
3 Credits (3)
Use of historical painting techniques in a project-driven classroom. Projects include 2-D and 3-D work, color mixing and theory, painting scenery, and the use of paint for effects. Prerequisite(s): THEA 2310.

THEA 343. Costume Patterning
3 Credits (3)
Basic techniques in the production of flat patterns for modern and period silhouettes including some draping techniques. Consent of Instructor required.

THEA 345. Costume Practicum
1 Credit (1)
A practical course intended to provide students additional experience and greater responsibility within the workings of the Costume Shop. May be repeated up to 1 credits. Prerequisite(s): THEA 1310.

THEA 346. Scenic Practicum
1 Credit (1)
A practical course intended to provide students additional experience and greater responsibility within the workings of the Scene Shop. May be repeated up to 2 credits. Graded: S/U Grading (S/U, Audit). Prerequisite(s): THEA 2310.

THEA 347. Lighting Practicum
1 Credit (1)
A practical course intended to provide students hands-on experience executing theatrical lighting.

THEA 348. Running Crew III
1 Credit (1)
Students will work on a technical aspect of a production in a rehearsal and performance environment. Prerequisite(s): THEA 1415.

THEA 349. Running Crew IV
1 Credit
Students will work on a technical aspect of a production in a rehearsal and performance environment. Prerequisite(s): THEA 1415.

THEA 352. Costume Design
3 Credits (3)
Basic principles of costume design, including script analysis, principles of design, drawing and painting.

THEA 353. Scene Design
3 Credits (3)
Design for the performing arts. Basic design skills and projects to exercise those skills, history of design in the theatre and the designer's role in the production process. Final project includes a finished scene design. Prerequisite: THEA 2310 or consent of instructor.

THEA 354. Sound Design
3 Credits (3)
Hands-on training in theatrical sound design and implementation.
THEA 355. Lighting Design
3 Credits (3)
Basic aspects of theatre lighting, including electricity, color theory, history, and types of lighting instruments.

THEA 356. Theatre Production
1-3 Credits
Participation in the production of theatrical performances by stage managing, acting, designing, dramaturgy, or directing. May be repeated for a maximum of 6 credits. Graded S/U.

THEA 357. Computer Scenographics
3 Credits (3)
Project-oriented course teaching basic computer modeling skills. Projects focus on the creation of communication tools designers use in the theatrical process. Students will develop portfolios of completed projects. Consent of instructor required.
Prerequisite(s): THEA 352, THEA 353, or THEA 355.

THEA 360. Creative Drama
3 Credits (2+2P)
Methods of developing original dramatizations. Emphasis on curriculum problems and teaching techniques in elementary and secondary schools.

THEA 366. Summer Theatre
1-3 Credits
Experience in professional or academic summer theatre. May be repeated for a maximum of 3 credits. Graded: S/U. Restricted to THTR majors.
Prerequisite(s): Consent of department head.

THEA 384. Stage Management
3 Credits (3)
Study of stage management techniques and their application to play production. A working knowledge of union rules, and the procedure to facilitate these through proper communication skills.

THEA 395. Directing I
3 Credits (3)
Study and application of basic stage directing techniques.
Prerequisite(s): THEA 1210 or THEA 1221.

THEA 408. Shakespeare I
3 Credits (3)
Study in Shakespeare's early poems and plays. Repeatable for up to six credits under different subtitles.
Learning Outcomes
1. Analyze Shakespeare’s poetry using the methods of close reading Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare’s poems and plays; Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance

THEA 409. Shakespeare II
3 Credits (3)
Study in Shakespeare’s later plays. ENGL 408 is not a prerequisite. Repeatable for up to six credits under different subtitles. Crosslisted with ENGL 409.
Learning Outcomes
1. Analyze Shakespeare’s poetry using the methods of close reading; Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare’s poems and plays; Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance.

THEA 410. Advanced Acting: Contemporary Methods
3 Credits (3)
Acting techniques will be explored focusing on current trends in the profession, from Stanislavski, to Hagen to Meisner. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: THTR majors.
Prerequisite(s): THEA 1210 or THEA 1221.

THEA 414. Collaborative Theatre-Making
3 Credits (3)
This course introduces students to the techniques, skills and practice of the collaborative creation of new theatrical material.
Prerequisite(s): THEA 1221.

THEA 417. Musical Theatre II
3 Credits (3)
A continuation of THEA 317, allowing for more advanced musical theatre techniques.
Prerequisite(s): THEA 317.
THEA 430. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

THEA 435. Directed Reading
1-3 Credits
Directed individualized studies. May be repeated for a maximum of 3 credits.

THEA 439. Senior Seminar
3 Credits (3)
Course preparing students for professions in and related to the theatre. Restricted to: THTR majors.

THEA 440. Senior Seminar Practicum
1 Credit (1)
Capstone course preparing students to apply knowledge of theatre arts toward advanced training or career objectives in the discipline. Consent of instructor required.

Prerequisite(s)/Corequisite(s): THEA 439. Restricted to THTR majors.

THEA 450. The Michael Chekhov Acting Intensive
3 Credits (3)
An intensive overview of the performance techniques attributed to Michael Chekhov, applied to theatrical scenes and presentations. May be repeated up to 6 credits. Consent of Instructor required.

THEA 535. Directed Study
1-3 Credits (1-3)
For the highly motivated student. Independent projects and individual guidance. Graduate standing and consent of instructor required. May be repeated up to 6 credits.

Select one from the following: 3

THEA 352 Costume Design
THEA 353 Scene Design
THEA 354 Sound Design
THEA 355 Lighting Design

Select 9 credits from THEA 300/400 level courses 5 9

Second Language Requirement: (not required)

Electives, to bring the total credits to 120 6 17-20

Total Credits 120

1. See the General Education (p. 123) section of the catalog for a full list of courses.
2. A Mathematics General Education course is required but students may need to take any prerequisites needed to enter the course selected first.
3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
4. Theatre majors must enroll in Theatre Workshop each semester. THEA 2993 Theatre Workshop I for freshmen and sophomores and THEA 300 Theatre Workshop II for juniors and seniors, 2 credits total for each course equaling a total of 4 credits.
5. Courses from this category must not duplicate selections above.
6. Elective credit may vary based on General Education course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Second Language Requirement

For the Bachelor of Arts in Theatre Arts there is no second language requirement for the degree.

A Suggested Plan of Study

This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Credits** 18.5

### Third Year

**Fall**

General Education Elective Course | 3-4

**Credits**
Theatre Arts (Musical Theatre) - Bachelor of Arts

The Musical Theatre concentration is designed to provide students with training in musical theatre performance, including singing, dancing and acting.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

### Prefix | Title | Credits
--- | --- | ---
**General Education**

| Area I: Communications | English Composition - Level 1 | 10

---

1. MATH 1130G Survey of Mathematics is suggested for the degree but students may need to take any prerequisites needed to enter MATH 210G first or any other General Education Mathematics course.

2. See the General Education (p. 123) section of the catalog for a full list of courses

3. THEA 1221 Beginning Acting, THEA 2310 Stagecraft/THEA 2310L Stagecraft Laboratory, THEA 1310 Introduction to Costuming/ THEA 1310L Costume Craft Lab can be taken in any order, but all five courses must be completed by the end of Year Two.

4. THEA 321V Modern European Drama will not count towards the Viewing a Wider World requirement

5. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses

6. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**Voice or Applied Music-Vocal** | 6
**Second Language Requirement**

For the Bachelor of Arts in Theatre Arts with a Concentration in Musical Theatre there is no second language requirement for the degree.

**A Suggested Plan of Study**

This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

- DANC Course Elective (C- or better)  1-3
- MUSC 1992  Applied Music (C- or better)  2

| Credits     | 12.5 |

### Fourth Year

#### Fall

- Viewing a Wider World Course  6
- DANC Course Elective  3
- THEA 300  Theatre Workshop II (C- or better)  0.5
- THEA 439  Senior Seminar (C- or better)  3

Choose one from the following:

- Elective Course (Upper-Division)  3

| Credits     | 12.5 |

### Spring

- THEA 300  Theatre Workshop II (C- or better)  0.5

Choose one from the following:

- THEA 352  Costume Design (C- or better)  3
THEA 353  Scene Design (C- or better)
THEA 354  Sound Design (C- or better)
THEA 355  Lighting Design (C- or better)
Elective Course (Upper-Division) 8  4
Elective Course (Upper-Division) 8  3

Credits 10.5

Total Credits 120-124

1. MATH 1130G Survey of Mathematics is suggested for the degree but students may need to take any prerequisites needed to enter MATH 1130G first or any other General Education Mathematics course.
2. See the General Education (p. 123) section of the catalog for a full list of courses.
3. THEA 1221 Beginning Acting, THEA 2310 Stagecraft/ THEA 2310L Stagecraft Laboratory, THEA 1310 Introduction to Costuming/ THEA 1310L Costume Craft Lab can be taken in any order, but all five courses must be completed by the end of Year Two.
4. Students must complete a total of 6 credits of THEA 324 Singing for Musical Theatre, MUSC 1992 Applied Music (2 credits can be fulfilled with MUSC 2120, MUSC 2993, MUSC 351, MUSC 361 Concert Choir II, or MUSC 368).
5. THEA 321V Modern European Drama will not count towards the Viewing a Wider World requirement.
6. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
7. DANC Courses: (be mindful of course prerequisites when registering)
   - DANC 1130 Ballet I
   - DANC 1150 Modern Dance I
   - DANC 2130 Ballet II
   - DANC 2150 Modern Dance II
   - DANC 3130 Ballet Technique III
   - DANC 3150 Modern Dance III
8. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Theatre Arts - Undergraduate Minor

The Department of Theatre Arts has one minor in Theatre Arts. Students must pass a minimum of 18 credits in consultation with a theatre department faculty member. THEA credits must earn grades of C- or higher to earn the minor. A student cannot earn both a BA in Theatre Arts and a minor in Theatre Arts.

College of Business

Dean - James Hoffman

Interim Associate Dean (Academics) - Daniel James

Interim Associate Dean (Research) - Mary Jo Billiot

Mission of the College of Business

The College of Business transforms lives by providing highly respected programs, instruction and scholarly activities that drive economic, social, educational and community development for New Mexico's diverse population.

Requirements for the Bachelor Degrees

- Successful completion of the New Mexico General Education Requirements and NMSU Viewing a Wider World Courses.
- Successful completion of College of Business Requirements below and major requirements. For the Bachelor of Arts in Economics, see the Economics and International Business (p. 1125) section for specific requirements.
- A minimum cumulative grade point average (GPA) of 2.0 in all courses taken at NMSU to meet lower and upper division business core and major requirements.
- All majors except Economics and International Business require a minimum cumulative GPA of 2.0 in all courses taken to meet the requirements of the major. For Economics and International Business majors, a minimum cumulative GPA of 2.5 is required for courses taken to meet the requirements for the major.
- A minimum of 50% of business credits required for a Bachelor of Accountancy or Bachelor of Business Administration degree or 18 business credits required for a Bachelor of Arts in Economics degree must be completed in the College of Business and a minimum of 12 credits required in
the major must be completed in the College. See sections below for major-specific transfer criteria. A total of no more than six credits of courses designated as 300E may be used to satisfy the required upper division business elective, the ECON/A ST elective, and electives in the major.

The only courses that may be taken on an S/U option by students in the College of Business are those designated S/U only, general electives outside the college, and up to 9 credits of HNRS courses used to fulfill General Education requirements.

Before taking upper-division courses (numbered 300 or above) offered by the College of Business, students must complete all lower-division course requirements with the required minimum grades or better.

Upper division business course credits completed more than ten years prior to the degree application will be reviewed by the course department head and dean (or a designee) to determine their continued suitability to satisfy current degree, major and minor requirements and learning objectives.

**Major Courses**

24-27

**Electives, to bring the total credits 120**

Select additional credits to bring total degree credits to a minimum of 120 and upper division credits to 48. The number of general elective credits varies by student and major.

120

**Associate in Prebusiness Degree**

To complete the associate degree, 60 credits are required, including the General Education Requirements, College of Business Foundation and Business Core (lower division) requirements.

A minimum cumulative grade point average of 2.0 is also required. The last 15 credits towards the degree must be earned through the NMSU system.

**Minors in Business**

Minors are available in

- accounting
- advertising
- banking and financial planning
- business administration
- business law
- economics
- enterprise systems
- entrepreneurship and innovation
- finance
- information systems
- international business
- management
- marketing
- professional selling
- risk management and insurance
- sports marketing
- sustainability

Students pursuing the Bachelor of Individualized Studies or the Bachelor of Applied Studies are not eligible for minors from the College of Business other than the minor in business administration. At least 12 credits of the minor must be completed at the NMSU College of Business.
Preprofessional Programs

NMSU offers a number of programs designed for transfer to professional schools through its undergraduate colleges. The programs that are administered by the College of Business is Prelaw, it is also administered through the College of Arts and Sciences.

Prelaw Students

Law schools will accept undergraduates who have earned bachelor’s degrees in any major. Many prelaw students take some law courses in their undergraduate program. The College of Arts and Sciences supervises a Supplementary Major in Law and Society, which includes courses from a number of departments and several colleges. It is described under “Government” in the Arts and Sciences chapter. The College of Business offers a number of Business Law courses which can be found under the prefix BLAW in the course description chapter later in this catalog. The Department of Philosophy in the College of Arts and Sciences offers both a major and a minor in Justice, Political Philosophy, and Law that cultivates a reasoned understanding of law and legal institutions, as well as the moral theories that support the value and justice of these institutions. The description of this major is found under the description “Philosophy.”

Because the practice of law often involves business-related problems, the majors in the college provide an excellent preparation for the prelaw student. The college has attorneys on the faculty who are available as advisors. Please contact the Finance Department for more information.

Transferring Business Courses

The Transfer Course Equivalency Search tool found at https://miniapps.nmsu.edu/transfer/ serves as a general guide in evaluation of transfer courses. However, transferability and applicability to an NMSU business or accounting degree or minor is not guaranteed until review and approval by the College of Business. Generally, for upper division business courses taken elsewhere to fulfill the requirements of an upper division business or accounting "equivalent" course at NMSU, the transferring school must have been accredited by AACSB at the time the course was taken, or, if not, was regionally accredited and the course’s content and rigor were comparable to the "equivalent" course offered at NMSU. Transfer students are encouraged to contact the Associate Academic Dean in the College of Business for content and rigor review of potential upper division transfer courses prior to or shortly after enrollment at NMSU.

Bachelors Degrees

Bachelor of Accountancy (p. 1096)

Bachelor of Arts in Economics (p. 1135)

Bachelor of Business Administration

Majors in:

- Economics (p. 1139)
- Finance (p. 1162)
  - Banking & Financial Planning (p. 1164)
  - Entrepreneurial Finance (p. 1166)
  - Financial Analyst (p. 1168)
  - Risk Management & Insurance (p. 1171)
- General Business (p. 1180)
  - Entrepreneurship (p. 1187)
- Information Systems (p. 1100)
- International Business (p. 1142)
- Management
  - Human Resource Management (p. 1190)
  - Project & Supply Chain Management (p. 1193)
  - Small Business Management & Entrepreneurship (p. 1196)
- Marketing (p. 1208)
  - PGA Golf Management (p. 1214)

Masters Degrees

Master of Accountancy (p. 1108)

Master of Science (p. 1147)

Major in:

- Applied Statistics (p. 1147)
Master of Business Administration

Major in:
- Business Administration (p. 1112)
  - Agribusiness (p. 1116)
  - Finance (p. 1117)
  - Health Services Management (p. 1119)
- Health Services Management (Online) (p. 1120)
- Information Systems (p. 1121)
- Public Utility Regulations (p. 1123)

Master of Arts

Major in:
- Economics
  - Econometrics (p. 1149)
  - Public Policy (p. 1151)
  - Public Utility Policy and Regulation (p. 1152)

Accreditation

New Mexico State University has been accredited since 1926 by the Higher Learning Commission of the North Central Association of Colleges and Secondary Schools as a degree-granting institution. The university was accredited in 1954 by the American Association of University Women.

The baccalaureate and graduate degree programs in business and accounting offered in the College of Business are accredited by AACSB International —The Association to Advance Collegiate Schools of Business.

Business Administration - Undergradutate Minor

This minor is available to all bachelors degree seeking students, except those seeking the Bachelor of Accountancy and the Bachelor of Business Administration degrees. It is the only minor in Business open to students in the Bachelor of Applied Studies and the Bachelor of Individualized Studies. At least 12 of the credits for the minor must be completed in the NMSU College of Business.

Minor Requirements

Choose 18 credits of coursework from these business core courses: Nine of the credits must be at the upper division level.

1 Courses satisfy background knowledge requirements for the MBA program when completed with a B- grade or better.
2 Only one course may be applied to this minor.

Notes: A minimum GPA of 2.0 is required in the coursework for the minor.

Several courses listed above have prerequisites. It is the responsibility of the student to determine course prerequisites and other registration requirements.

Accounting and Information Systems

Undergraduate Program Information

The Bachelor of Accountancy degree is available to students choosing accounting as a major. The curriculum is designed to prepare you for the excellent opportunities that exist in public accounting practice and in business, government and nonprofit organizations. It is also appropriate for those who may choose to seek either the Master of Accountancy or the Master of Business Administration degree after graduation.
The Information Systems program has a focus on cyber security that prepares you for a variety of administrative and technical positions associated with the security of information systems. Potential employers include information system service organizations, public accounting/consulting firms, manufacturing and merchandising business, banks and other financial institutions, government and others that rely on information systems to support their business.

**Graduate Program Information**

The last two decades have witnessed a tremendous expansion in the knowledge base required for accounting professionals. The business environment has become increasingly complex, as evidenced by the growth in the body of national and international accounting and auditing standards, taxation, SEC and other regulatory requirements. The accountant must also be well versed in communications and analytical skills, computer-based information systems, professional ethics and global issues.

Neither the traditional four-year accounting program nor the MBA provides the educational breadth and depth necessary to fully prepare students for the demands now imposed by many accounting careers. The major objective of the Master of Accountancy (MAcc) program is to provide for these increased educational needs and to prepare students more adequately for careers as professional accountants in financial institutions, government, not-for-profit organizations and public practice. The program is designed to provide a technical and theoretical foundation in accountancy at the advanced level and yet allow the student to take courses to accommodate individual needs.

**Degrees for the Department**

**Bachelor Degrees**

Accounting - Bachelor of Accountancy (p. 1096)

Information Systems - Bachelor of Business Administration (p. 1100)

**Master Degree**

Accounting - Master of Accountancy (p. 1108)

**Minors for the Department**

**Undergraduate**

Accounting - Undergraduate Minor (p. 1106)

Enterprise Systems - Undergraduate Minor (p. 1107)

Information Systems - Undergraduate Minor (p. 1107)

**Graduate**

Information Systems - Graduate Minor (p. 1109)

**Regents Professor, Kenneth J. Martin, Ph.D., Interim Department Head**

Professors Mora; Associate Professors Billiot, Clemons, Joo, Melendrez; Assistant Professors Arslan, Doucet, Ewing, Fuqua, Park, Peters, Shen, Zhang; College Assistant Professor Hamilton, Mitchell, Shindi; Emeritus Professor Foster, Mills, Oliver, Scribner, Seipel, Tunnell

**Accounting Courses**

ACCT 101. Supplemental Instruction to ACCT 221

1 Credit (1)

Collaborative workshop for students in ACCT 221 – Financial Accounting. Course does not count toward departmental degree requirements. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

Corequisite(s): ACCT 221.
ACCT 200. A Survey of Accounting  
3 Credits (3)  
Emphasis on financial statement interpretation and development of accounting information for management. For engineering, computer science, and other non business majors. Community Colleges only.  
Prerequisite: one C S course or consent of instructor.  

ACCT 2110. Principles of Accounting I  
3 Credits (3)  
An introduction to financial accounting concepts emphasizing the analysis of business transactions in accordance with generally accepted accounting principles (GAAP), the effect of these transactions on the financial statements, financial analysis, and the interrelationships of the financial statements.  
Learning Outcomes  
1. Analyze business transactions, their effects on the financial statements and the interrelationships of the financial statements involving the following: Cash transactions; Receivables and Net Realizable Value; Operational Assets and Depreciation; Inventory; Current Liabilities; Long-term Liabilities  
2. Define, identify and demonstrate the impact of adjusting entries on financial statements.  
3. Explain and demonstrate the differences between cash and accrual basis accounting.  
4. Define and identify generally accepted accounting principles.  

ACCT 2120. Principles of Accounting II  
3 Credits (3)  
An introduction to the use of accounting information in the management decision making processes of planning, implementing, and controlling business activities. In addition, the course will discuss the accumulation and classification of costs as well as demonstrate the difference between costing systems.  
Prerequisite(s): ACCT 2110.  
Learning Outcomes  
1. Identify the differences between financial and managerial accounting.  
2. Illustrate the accumulation of costs in cost accounting systems.  
3. Describe the basic elements of the budgeting process, its objectives and budget preparation.  
4. Define and classify cost behavior.  
5. Perform cost-volume-profit analysis for decision-making.  
6. Perform differential (incremental) analysis for business decision making.  
7. Explain the cause of the variance and its effect on the income statement.  
8. Explain and demonstrate the difference between traditional costing and activity-based costing.  

ACCT 301. Financial Accounting I  
3 Credits (3)  
Concepts, principles, and practices of financial accounting, stressing the determination of income and financial position. A student who does not pass the class within three attempts will not be allowed to take class for a fourth.  
Prerequisite(s): C or better in ACCT 2110 or (OATS 120 and OATS 121) and ACCT 2120.  

ACCT 302. Financial Accounting II  
3 Credits (3)  
A continuation of ACCT 301.  
Prerequisite(s): C- or better in ACCT 301.  

ACCT 351. Accounting Systems  
3 Credits (3)  
Covers accounting information systems as processors of data for financial reporting and control of economic organizations.  
Prerequisite(s): C or better in ACCT 2110 or (OATS 120 and OATS 121) and ACCT 2120.  

ACCT 353. Cost Accounting  
3 Credits (3)  
The development and use of cost accounting information for inventory valuation, income determination, and cost control. A student who does not pass the class within three attempts will not be allowed to take class for a fourth.  
Prerequisite(s): C or better in ACCT 2110 or (OATS 120 and OATS 121) and ACCT 2120.  

ACCT 403. Federal Taxation I  
3 Credits (3)  
Basic federal income tax laws: emphasis on determination of taxable income of individuals. A student who does not pass the class within three attempts will not be allowed to take class for a fourth.  
Prerequisite(s): C or better in ACCT 2110 or (OATS 120 and OATS 121) and ACCT 2120.
ACCT 451. Auditing Theory and Practices
3 Credits (3)
Auditing standards, audit evidence, auditors reports and opinions, and professional responsibilities.
Prerequisite(s): ACCT 351 and C- or better in ACCT 302.

ACCT 455. Federal Taxation II
3 Credits (3)
Federal income tax laws applicable to partnerships, corporations, fiduciaries, tax research, tax planning.
Prerequisite(s): C- or better in ACCT 403 or consent of instructor.

ACCT 456. Accounting for Nonprofit Organizations
3 Credits (3)
Control and reporting problems unique to governmental units and other nonprofit organizations. Fund accounting principles, procedures, and reports.
Prerequisite(s): C- or better in ACCT 302.

ACCT 458. Accounting Data Analytics
3 Credits (3)
Data Analytics in financial and managerial accounting and auditing. Restricted to: Accounting majors.
Prerequisite(s): C- or Better in ACCT 301, ACCT 302, and ACCT 351.

ACCT 460. Fraud Examination and Prevention
3 Credits (3)
Covers business fraud as it is occurring in American society. Emphasis is on occupational fraud and financial statement fraud. Examines various types of fraud, its symptoms and effective investigation techniques. Effective fraud prevention measures are discussed throughout the course. Emphasizes case studies and the application of principles to actual fraud cases.
Prerequisites: a C- or better in ACCT 451 or concurrent enrollment.

ACCT 490. Selected Topics
1-3 Credits
Current topics in accounting. Prerequisites vary according to the seminar offered. May be repeated for a maximum of 12 credits under different subtitles.

ACCT 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): Consent of instructor.

ACCT 500. Concepts in Accounting
1 Credit (1)
Development, interpretation, and use of accounting information for financing, investing, operating, and managerial decision making.
Prerequisite(s): Admitted to MBA program.

ACCT 503. Accounting for Managers
3 Credits (3)
Concepts and principles of financial and managerial accounting. Presents techniques used to measure business transactions, prepare financial statements, techniques for management decision-making, planning, and control. Not open to MAcc students.
Prerequisite(s): B or better in both ACCT 2110 or (OATS 120 and OATS 121) and ACCT 2120.

ACCT 510. Technical and Professional Communication for Accountants
3 Credits (3)
Effective writing strategies for professional communications. Students will learn to write with a professional style and proper English usage and to work with a variety of technical and lay audiences. Emphasis on initiation, planning, composition, and evaluation of business and accounting workplace scenarios to develop communication skills used in a business environment. Restricted to: Master of Accountancy majors.

ACCT 530. Advanced Accounting
3 Credits (3)
This course is designed to provide in-depth study of current financial accounting concepts related to business combinations, financial statement consolidations, and foreign currency transactions and translations. Restricted to: Master of Accountancy majors.
Prerequisite(s): ACCT 302 with a grade of C or better.

ACCT 544. Financial Statement Analysis and Valuation
3 Credits (3)
Valuation of firms using financial information, financial statement analysis, and the valuation of individual assets and liabilities. Restricted to: Master of Accountancy majors.
Prerequisite(s): Acct 302; Graduate students only.
ACCT 550. Special Topics
3 Credits (3)
Seminar in current topics in various areas of accounting including financial, managerial, auditing, taxation, systems, and fund accounting. Prerequisites vary according to topic being offered.

ACCT 551. Advanced Auditing Theory and Practice
3 Credits (3)
Understanding and evaluating internal control in an EDP environment. Statistical sampling applications and current issues in auditing. Restricted to: Master of Accountancy majors.
Prerequisite(s): ACCT 451.

ACCT 555. Federal Tax Research
3 Credits (3)
Tax research methodology including case materials, critical judicial decisions, journal articles, and research services. Emphasis on tax planning. Restricted to: Master of Accountancy majors.
Prerequisite(s): ACCT 403.

ACCT 559. Ethics and Professionalism in Accounting
3 Credits (3)
Introduction to ethical reasoning, integrity, objectivity, independence, and professional accounting issues. Students will apply the concepts and theories to accounting-specific cases. Restricted to: Master of Accountancy majors.
Prerequisite(s): C or better in ACCT 451.

ACCT 560. Taxation of Corporations and Shareholders Advanced
3 Credits (3)
effects of taxation on the organization, operation, and reorganization of corporations and on their shareholders. Restricted to: Master of Accountancy majors.
Prerequisite(s): ACCT 403.

ACCT 564. Financial Accounting Research
3 Credits (3)
Interpretation and application of accounting principles to financial reporting issues of business and nonbusiness organizations. Consent of Instructor required. Restricted to: Master of Accountancy majors.
Prerequisite(s): ACCT 302.

ACCT 570. Taxation of Partnerships
3 Credits (3)
Taxation of partnership contributions and distributions, transfer of partnership interests, and allocations of partnership income. Also includes taxation of S corporations. Restricted to: Master of Accountancy majors.
Prerequisite(s): ACCT 403.

ACCT 580. Professional Accountancy
3 Credits (3)
Prepares students for the accounting profession and professional certification through study of a wide range of topics similar to those a student might encounter in their first year of employment. Restricted to: Master of Accountancy majors.

ACCT 598. Independent Study
1-3 Credits
Individual study directed by consenting faculty with prior approval of the department head. A maximum of 3 credits may be earned.
Prerequisite: consent of instructor.

ACCT 599. Master's Thesis
15 Credits
Thesis.

### ACCT Upper Division Electives

3

### Second Language: (not required)

Electives, to bring the total credits to 120  6

### Total Credits

120

---

1. MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G.
2. All Foundation Requirement Courses must be taken, or satisfied with transfer credits, regardless of which Mathematics or Statistics course satisfies the Area II: General Education course or the General Education Elective requirements: MATH 1220G, MATH 1430G and MATH 1350G or A ST 311 must be completed.
3. See the General Education (p. 123) section of the catalog for a full list of courses.
4. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses and how to fulfill this requirement.
5. A student who does not pass ACCT 301 Financial Accounting I, ACCT 353 Cost Accounting, or ACCT 403 Federal Taxation I within three attempts will not be allowed to take the class for a fourth.
6. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

---

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Information Systems - Bachelor of Business Administration

Every candidate for this major must fulfill the following requirements in addition to the general education common core, College of Business foundation and business core (p. 1087), Viewing a Wider World requirements and general electives.

Please note that some of the courses listed may have a prerequisite which would require a student to take an additional course. Substitutions for some of these courses may be considered if a student makes this request to the department.

#### Course Requirements

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

---

1. These courses have prerequisites and it is the students responsibility for checking and fulfilling all course prerequisites listed for these courses.
2. See the General Education (p. 123) section of the catalog for a full list of courses.
3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
4. Students must take all four courses: ACCT 351 Accounting Systems, ACCT 353 Cost Accounting, ACCT 403 Federal Taxation I and ACCT 458 Accounting Data Analytics. Students who do not pass ACCT 301 Financial Accounting I, ACCT 353 Cost Accounting, or ACCT 403 Federal Taxation I within three attempts will not be allowed to take the class for a fourth.
5. Graduate-Level Coursework Substitution: At the discretion of the Accounting Department and the Academic Dean of the Business College, qualified juniors/seniors may be allowed to enroll in graduate-level accounting courses to satisfy these requirements.

*qualified juniors/seniors who plan to pursue a Master of Accountancy should consult with the Master of Accountancy program coordinator for details about the requirements that must be met to qualify for early acceptance.

</tbody>
</table>

### Total Credits

| Total Credits   | 120 |

---

1. Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 130G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

2. See the General Education (p. 123) section of the catalog for a full list of courses.

3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses and how to fulfill this requirement.

4. All Foundation Requirement Courses must be taken, or satisfied with transfer credits, regardless of which Mathematics or Statistics course satisfies the Area II General Education course: MATH 1220G, MATH 1430G and MATH 1350G or A ST 311 must be completed.

5. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Total Credits**: 120
Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

See the General Education (p. 123) section of the catalog for a full list of courses.

See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses and how to fulfill this requirement.

All Foundation Requirement Courses must be taken, or satisfied with transfer credits, regardless of which Mathematics or Statistics course satisfies the Area II General Education course: MATH 1220G, MATH 1430G and MATH 1350G or A ST 311 must be completed.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

---

1. These courses have prerequisites and it is the student’s responsibility for checking and fulfilling all course prerequisites listed for these courses.
2. See the General Education (p. 123) section of the catalog for a full list of courses.
3. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
4. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
5. Information Systems Elective Courses:
   - BCIS 466 Business Analytics II, BCIS 480 E-Commerce Security, BCIS 490 Selected Topics
   - ICT 339 Introduction to Digital Forensics and Incident Response, ICT 377 Computer Networking I, ICT 477 Computer Networking II

---

### Accounting - Undergraduate Minor

To obtain a minor in Accounting, a student must complete 18 or more credit hours of approved course work in Accounting (ACCT), of which at least 12 hours are in courses numbered 300, or higher. All courses for the minor must be completed with a grade of C- or better. At least 12 credits must be completed at NMSU.

This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Total Credits: 18

Of the 12 hours of upper-division Accounting classes required for the minor, a minimum of 6 must be taken at NMSU. At least 12 credit hours must be completed at the NMSU College of Business. To count toward the minor, upper-division transfer courses must have been taken at an institution with AACSB Accounting accreditation.

**Enterprise Systems - Undergraduate Minor**

To obtain a minor in Enterprise Systems, a student must complete 18 or more credit hours of approved coursework. A cumulative grade point average of at least 2.0 over the 18 hours must be earned. At least 12 credits must be completed at NMSU. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Total Credits: 18
Accounting - Master of Accountancy

The Master of Accountancy program (MAcc) is recommended for students wishing to fulfill the Certified Public Accountant (CPA) 150-hour education requirement which most states, including New Mexico, have adopted.

Admission Requirements

Admission requirements of the NMSU Graduate School must be met before the applicant may be admitted to the MAcc program.

Consideration for admission to the MAcc program is dependent on an applicant's undergraduate record. The Graduate Management Admissions Test (GMAT) is also required, unless the student meets one of the GMAT waiver conditions listed below:

1. The student graduated with an undergraduate degree in accounting from a US AACSB accredited business school with at least a 3.25 GPA overall and a 3.25 GPA in their upper division accounting courses; or
2. The student is a graduate of NMSU's undergraduate accounting program with at least a 3.25 GPA overall and a 3.0 GPA in core upper division accounting classes; or
3. The student holds a recognized professional accounting credential (such as a CPA, CMA, CIA, CFE); or
4. The student holds a post baccalaureate degree (such as an MBA, MS, MA, JD) from an approved, US AACSB-accredited university with a minimum 3.0 GPA in graduate course work.

In addition to the aforementioned entrance requirements, an applicant's GPA in accounting prerequisites must be at least 3.0. For those students not receiving their undergraduate accounting degree at NMSU, it is expected that substantially all of the accounting prerequisite classes be from a US AACSB accredited business school or the application will need to be approved by the MAcc Admissions Committee. In this case the Admissions Committee may require that some of these prerequisite courses be retaken at an US AACSB institution such as NMSU.

Accounting Prerequisites (18 Credits)

Each applicant must complete, at a minimum, the following 18 credits of accounting courses from a US AACSB accredited business school prior to being considered as a candidate for the Master of Accountancy degree:

<table>

</tr>
</tbody>
</table>

Total Credits 18

No coursework applied toward the MAcc degree, including the prerequisite requirements, may be taken on an S/U basis.

Master of Accountancy Requirements

Candidates for the Master of Accountancy degree must successfully complete 30 graduate credits. Qualifying NMSU undergraduate accounting students can apply to have two graduate courses count for their undergraduate program as well as their graduate program.

MAcc Courses

Each student must complete 21 credits in accounting courses numbered above 520. These courses must include a research class (either ACCT 555 Federal Tax Research or ACCT 564 Financial Accounting Research) and Ethics in Accounting (ACCT 559 Ethics and Professionalism in Accounting). In addition, three of the credits may be in upper division undergraduate elective accounting courses numbered 450 or higher. Other specific courses to be completed by each candidate will be determined in the advisement process.

Other Courses

All students must also complete a total of 9 credits in other courses. Three of the credits must be ACCT 510 Technical and Professional Communication for Accountants, and the rest must be approved electives. Neither ACCT 503 Accounting for Managers nor any course fulfilling the foundation requirement may be included. Any student wishing to be waived from any of the above requirements may submit a petition in writing to the MAcc Director. Each request will be considered individually by the MAcc Committee.
Comprehensive Examination

There is no comprehensive examination requirement. However, satisfactory performance on a graduate portfolio assignment is a requirement for completing the MAcc degree.

Thesis: No thesis is required; however, under special approval, a candidate may elect to write a thesis under ACCT 599 Master's Thesis. Up to 6 credits may be earned for the thesis.

General

Graduate degrees require a cumulative graduate GPA of 3.0 or higher. The Department of Accounting and Information Systems requires, in addition, that every candidate for the MAcc degree maintain at least a 3.0 grade-point average in all accounting courses used to satisfy the core and elective course requirement. MAcc students may not retake 500-level accounting courses for which they have previously received a grade without the approval of the MAcc Admissions Committee.

Information Systems - Graduate Minor

This minor is for master's-level students who are not in the Masters of Business Administration (MBA) program. Students in the MBA program may choose a concentration in Information Systems (see the Business Administration (p. 1109) section).

To obtain a graduate minor in Information Systems (IS) students must satisfy the requirements as stated below for a minor at the master's level. For it to appear on the transcript, the student must list the minor on the Program of Study and Committee for Master's Student (Application for Admission to Candidacy) and have it signed by the head of the department offering the minor.

Requirements

The minor requires a minimum of 9 credits of graduate work.

Business Administration

Graduate Program Information

The business and accounting programs at NMSU, including the MBA program, are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The Master of Business Administration (MBA) program is a professional program designed to provide students with a solid background in business practices and the problem-solving and people skills needed to become successful leaders in the global business environment. Program graduates are prepared for administrative or managerial positions in a wide variety of organizations, both private and governmental. The MBA program is offered in a traditional classroom with some online delivery and in a cohort-based distance program with a synchronous online component. Details are available at http://business.nmsu.edu/mba/.

The Ph.D. program in Business Administration offers the opportunity to specialize in either Marketing or Management.

Degrees for the Department

Business Administration - Master of Business Administration (p. 1112)

Business Administration - Master of Business Administration (Online) (p. 1114)

Business Administration (Agribusiness) - Master of Business Administration (p. 1116)
Business Administration (Finance) - Master of Business Administration (p. 1117)

Business Administration (Health Services Management) - Master of Business Administration (Online) (p. 1120)

Business Administration (Information Systems) - Master of Business Administration (p. 1121)

Business Administration (Public Utility Regulations) - Master of Business Administration (p. 1123)

Engineering/MBA Program – Dual Degree (p. 1124)

Business Administration (Management) - Doctor of Philosophy (p. 1124)

Business Administration (Marketing) - Doctor of Philosophy (p. 1125)

Sustainability - Graduate Certificate (p. 1125)

Business Administration Courses

B A 104. Introduction to Business
3 Credits (3)
Survey and integration of functions in business organizations within their social and economic environment. Community Colleges only.

B A 105. Special Topics
1-3 Credits
Current topics in business and economics.

B A 202. Small Business Enterprise
3 Credits (3)
Appraisal of business functions within the framework of a small business organization.

B A 291. Business Administration and Economics Internship and Cooperative Education I
1-3 Credits
Introduction and applications of the principles of business administration and economics. Registration in one course allowed per co-op work phase; a minimum of 12 work weeks is required. Open only to students in the College of Business. Option of S/U or a grade. The amount of academic credit (1-3 cr.) will be determined by the academic experience, and not by the work experience.

B A 305. Leadership Training for COB Ambassadors
1 Credit (1)
Leadership development for volunteers serving as COB student ambassadors, focusing on COB undergraduate business degree programs, NMSU student services, public speaking and public relations.
B A 391. Business Administration and Economics Internship and Cooperative Education II
1-3 Credits
Applications of the principles of business administration and economics. Registration in one course allowed per co-op work phase; a minimum of 12 work weeks is required. Open only to students in the College of Business. Option of S/U or a grade. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not by the work experience.

B A 490. Selected Topics
3 Credits (3)
Prerequisites vary according to the seminar being offered.

B A 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.
Prerequisite: junior or above standing and consent of instructor.

B A 500. Macroeconomic Essentials
1 Credit (1)
Macroeconomic theory and public policy, national income concepts, unemployment, inflation, economic growth and international payment problems. Restricted to: MBA majors.

B A 501. Quantitative Tools for the MBA
1 Credit (1)
An overview of critical topics in math and statistics that will provide a quantitative foundation for students entering the Master of Business Administration program. Admission to the MBA program.

B A 545. Business Ethics
3 Credits (3)
Understanding of business ethics, social responsibilities of business organizations, and personal codes of conduct. Complexities of moral reasoning and principles of ethical behavior.

B A 550. Special Topics
3 Credits (3)
Interdisciplinary seminar in selected current business topics.
Prerequisite(s): Prerequisites vary according to the seminar being offered.

B A 590. Professional Paper/Presentation
3 Credits (3)
Paper written in close coordination with sponsoring professor and presented near the end of the student's final semester in the M.B.A. program. The paper will consist of a professional business report, a case study of a business or organization or a research report. Restricted to: MBA majors.
Prerequisite(s): Minimum of 3.0 average in: ACCT 503, BLAW 502, BFIN 503, and MKTG 503 or AEEC 551.

B A 598. Special Research Programs
1-3 Credits
Individual investigations either analytical or experimental. A maximum of 3 credits may be earned.
Prerequisite: consent of instructor.

B A 599. Master's Thesis
15 Credits
Thesis.

Business Administration - Master of Business Administration

The Master of Business Administration (MBA) program is a professional program designed to provide students with a solid background in business practices and the problem-solving and people skills needed to become successful leaders in the global business environment. Program graduates are prepared for administrative or managerial positions in a wide variety of organizations, both private and governmental. The business and accounting programs at NMSU, including the MBA program, are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The MBA program is offered in a traditional classroom with some online delivery and in a cohort-based distance program with a synchronous online component.

Details are available at [http://business.nmsu.edu/mba](http://business.nmsu.edu/mba).

Admissions

Applicants must meet the basic admission requirements of the Graduate School before they are considered for admission to the MBA program. To be considered for admission to the MBA program, applicants must meet one of the following criteria:

1. Have an undergraduate degree with a GPA of at least 3.0 from a regionally accredited U.S. College or University; or
2. Have achieved a minimum Graduate Management Admission Test (GMAT) score of 400 and a combined GMAT score and undergraduate GPA such that (GPA x 200) + GMAT is greater than or equal to 1050; or
3. Have a graduate degree from a regionally accredited U.S. college or university; or
4. Have a Professional Certification in one of the following: Certified Public Accountant (CPA): Certified Management Account (CMA), Chartered Financial Analyst (CFA), Certified Financial Planner (CFP), or Project Management Professional (PMP) with an official copy of the certificate; or
5. Have completed at least five years of relevant, full-time, post-degree, professional work experience with an undergraduate GPA of at least 2.50 from a regionally accredited U.S. college or university.

As an alternative to the GMAT, students may submit a GRE score which can be converted to the equivalent GMAT score. (Information about the GMAT can be found at www.mba.com.) If a GMAT score is required, the official score must be submitted to the MBA Program Office at least one month prior to initial enrollment in the program. GRE scores are sent directly to the NMSU Graduate School.

A maximum of 9 credit hours of the required MBA courses may be completed prior to the student's acceptance into the MBA degree program.

**Note:** Regardless of the pathway to admission, all students must have an undergraduate degree and complete the Background Knowledge courses with a grade of "B" or better in each course.

Background Knowledge

Although the MBA program is designed to encourage participation by students with a variety of educational backgrounds, the curriculum is fast paced. As a consequence, a minimum level of background knowledge is expected of all entering students, and those who lack the necessary background in any of the knowledge areas will be required to make up their deficiencies early in the program. Students may complete no more than 9 credits of required MBA courses prior to completion of the background knowledge courses.

Background knowledge may be demonstrated by successful completion (with a grade of A or B) of undergraduate courses in managerial accounting, financial accounting, macroeconomics, finance, statistics and calculus. At NMSU, the relevant courses are

<table>

Elective course 1

Total Credits 36

1 This elective must be selected from the approved course list on the MBA web page.

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses required for the General MBA degree.

The following course sequencing requirements must be satisfied:

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student’s program and is only open to students who have been accepted into the MBA degree program. ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, BFIN 503 Financial Management and MGMT 503 Marketing Management must be completed prior to enrollment in B A 590 Professional Paper/Presentation.

2. MGMT 590 Strategic Management must be completed at the end of the student’s program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree:

A student may satisfy the Graduate School’s requirement for a final exam by completing the General MBA Degree’s necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

(1) The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

(2) The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School’s requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.
A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (https://catalogs.nmsu.edu/search/?P=B%20A%20599) Master's Thesis in lieu of B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

Concentrations: Students in the on-campus MBA program may elect to pursue one of several MBA concentrations:

- Agribusiness (p. 1116)
- Finance (p. 1117)
- Health Services Management
- Information Systems (p. 1121)
- Public Utility Regulation (p. 1123)

Business Administration - Master of Business Administration (Online)

The Master of Business Administration (MBA) program is a professional program designed to provide students with a solid background in business practices and the problem-solving and people skills needed to become successful leaders in the global business environment. Program graduates are prepared for administrative or managerial positions in a wide variety of organizations, both private and governmental. The business and accounting programs at NMSU, including the MBA program, are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The MBA program is offered in a traditional classroom with some online delivery and in a cohort-based distance program with a synchronous online component.

Details are available at http://business.nmsu.edu/mba (http://business.nmsu.edu/mba/).

Admissions

Applicants must meet the basic admission requirements of the Graduate School before they are considered for admission to the MBA program. To be considered for admission to the MBA program, applicants must meet one of the following criteria:

1. Have an undergraduate degree with a GPA of at least 3.0 from a regionally accredited U.S. College or University; or
2. Have achieved a minimum Graduate Management Admission Test (GMAT) score of 400 and a combined GMAT score and undergraduate GPA such that (GPA x 200)+ GMAT is greater than or equal to 1050; or
3. Have a graduate degree from a regionally accredited U.S. college or university; or
4. Have a Professional Certification in one of the following: Certified Public Accountant (CPA); Certified Management Account (CMA), Chartered Financial Analyst (CFA), Certified Financial Planner (CFP), or Project Management Professional (PMP) with an official copy of the certificate; or
5. Have completed at least five years of relevant, full-time, post-degree, professional work experience with an undergraduate GPA of at least 2.50 from a regionally accredited U.S. college or university.

As an alternative to the GMAT, students may submit a GRE score which can be converted to the equivalent GMAT score. (Information about the GMAT can be found at www.mba.com.) If a GMAT score is required, the official score must be submitted to the MBA Program Office at least one month prior to initial enrollment in the program. GRE scores are sent directly to the NMSU Graduate School.

A maximum of 9 credit hours of the required MBA courses may be completed prior to the student's acceptance into the MBA degree program.

Note: Regardless of the pathway to admission, all students must have an undergraduate degree and complete the Background Knowledge courses with a grade of "B" or better in each course.

Background Knowledge

Although the MBA program is designed to encourage participation by students with a variety of educational backgrounds, the curriculum is fast paced. As a consequence, a minimum level of background knowledge is expected of all entering students, and those who lack the necessary background in any of the knowledge areas will be required to make up their deficiencies early in the program. Students may complete no more than 9 credits of required MBA courses prior to completion of the background knowledge courses.

Background knowledge may be demonstrated by successful completion (with a grade of A or B) of undergraduate courses in managerial accounting, financial accounting, macroeconomics, finance, statistics and calculus. At NMSU, the relevant courses are

Total Credits 36

1 This elective must be selected from the approved course list on the MBA web page.

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses required for the General MBA degree.

The following course sequencing requirements must be satisfied:

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student’s program and is only open to students who have been accepted into the MBA degree program. ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, BFIN 503 Financial Management and MKTG 503 Marketing Management must be completed prior to enrollment in B A 590 Professional Paper/Presentation.

2. MGMT 590 Strategic Management must be completed at the end of the student’s program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree: A student may satisfy the Graduate School's requirement for a final exam by completing the General MBA Degree's necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

1. The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

2. The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School's requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (https://catalogs.nmsu.edu/search/?P=B%20A%20599) Master's Thesis in lieu of B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

Students in the on-campus MBA program may elect to pursue a concentration in Finance. To fulfill this concentration, a student must take BFIN 535 and three additional 500-level BFIN courses (excluding BFIN 503 which is a required course for the General MBA) for a total of 12 credits. These courses can be used as substitutes for MGMT 512 (https://catalogs.nmsu.edu/search/?P=MGMT%20512) Quantitative Analysis for Business Decisions and B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

This elective must be selected from the approved course list on the MBA web page.

The following course sequencing requirements must be satisfied:

1. B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation must be completed during the final term of the student’s program and is only open to students who have been accepted into the MBA degree program. ACCT 503 (https://catalogs.nmsu.edu/search/?P=ACCT%20503) Accounting for Managers, BLAW 502 (https://catalogs.nmsu.edu/search/?P=BLAW%20502) Legal Environment of Business, BFIN 503 (https://catalogs.nmsu.edu/search/?P=BFIN%20503) Financial Management and MGMT 503 (https://catalogs.nmsu.edu/search/?P=MGMT%20503) Marketing Management must be completed prior to enrollment in B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

2. MGMT 590 (https://catalogs.nmsu.edu/search/?P=MGMT%20590) Strategic Management must be completed at the end of the student’s program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 (https://catalogs.nmsu.edu/search/?P=MGMT%20590) Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree: A student may satisfy the Graduate School’s requirement for a final exam by completing the General MBA Degree’s necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

1. The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).
The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School's requirement for a final exam.

**Note 1:** The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

**Note 2:** The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (Master's Thesis) in lieu of B A 590 (Professional Paper/Presentation). MBA students who want to have a concentration in Health Services Management must complete the following three Public Health courses (one of which fulfills the MBA elective requirement). For the Health Services Management Concentration, B A 590 Professional Paper/Presentation (required of all MBA students) will include a health services management project.

Elective Course  

Elective Course must be selected from the approved course list on the MBA web page.

Total Credits: **36**

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses required for the General MBA degree.

The following course sequencing requirements must be satisfied:

1. B A 590 (Master's Thesis) must be completed during the final term of the student’s program and is only open to students who have been accepted into the MBA degree program. ACCT 503 (Accounting for Managers)
New Mexico State University - Las Cruces

2. MGMT 590 (https://catalogs.nmsu.edu/search/?P=MGMT%20590) Strategic Management must be completed at the end of the student's program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 (https://catalogs.nmsu.edu/search/?P=MGMT%20590) Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree: A student may satisfy the Graduate School's requirement for a final exam by completing the General MBA Degree's necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

(1) The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

(2) The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School's requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (https://catalogs.nmsu.edu/search/?P=B%20A%20599) Master's Thesis in lieu of B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

MBA students who want to have a concentration in Health Services Management must complete the following three Public Health courses (one of which fulfills the MBA elective requirement). For the Health Services Management Concentration, B A 590 Professional Paper/Presentation (required of all MBA students) will include a health services management project.

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses required for the General MBA degree.

The following course sequencing requirements must be satisfied:

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student's program and is only open to students who have been accepted into the MBA degree program. ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, BFIN 503 Financial Management and MKTG 503 Marketing Management must be completed prior to enrollment in B A 590 Professional Paper/Presentation.

2. MGMT 590 Strategic Management must be completed at the end of the student's program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree:

A student may satisfy the Graduate School's requirement for a final exam by completing the General MBA Degree's necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

(1) The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

(2) The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School's requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (https://catalogs.nmsu.edu/search/?P=B%20A%20599) Master's Thesis in lieu of B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

Students in the on-campus MBA program may elect to pursue a concentration in Information Systems and must take additional coursework beyond that required to complete the MBA degree program. BCIS 502 (https://catalogs.nmsu.edu/search/?P=BCIS%20502) Business Information Systems is a required MBA course and a prerequisite for each of the courses in the concentration.

Any of these courses may also be used to fulfill the MBA elective requirement.
Business Administration (Public Utility Regulations) - Master of Business Administration

Elective course 1

Total Credits 36

1 This elective must be selected from the approved course list on the MBA web page.

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses required for the General MBA degree.

The following course sequencing requirements must be satisfied:

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student’s program and is only open to students who have been accepted into the MBA degree program. ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, BFIN 503 Financial Management and MKTG 503 Marketing Management must be completed prior to enrollment in B A 590 Professional Paper/Presentation.

2. MGMT 590 Strategic Management must be completed at the end of the student’s program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree:
A student may satisfy the Graduate School's requirement for a final exam by completing the General MBA Degree's necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

(1) The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

(2) The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School's requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (https://catalogs.nmsu.edu/search/?P=B%20A%20599) Master's Thesis in lieu of B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

Students in the on-campus MBA program may elect to pursue a concentration in Public Utility Regulation and must take the following courses. One of these courses will serve as the elective in the MBA program and two of the courses will substitute for courses MGMT 512 (https://catalogs.nmsu.edu/search/?P=MGMT%20512) and B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) in the standard MBA program (because the learning objectives of the utility regulation courses meet the learning objectives of the two basic MBA courses).

## Engineering/MBA Program – Dual Degree

Highly motivated undergraduate engineering students who would like to apply their quantitative skills and technical expertise to the business environment should consider the dual degree program offered through the College of Engineering and the College of Business. Undergraduate students who are accepted into this program can, with full time enrollment and careful scheduling of their coursework, complete the MBA degree requirements in as little as one year beyond completion of the BS degree. Information regarding the dual degree program may be obtained from the College of Engineering or the MBA Program Office (GU 114).

## Business Administration (Management) - Doctor of Philosophy

Phone: (575) 646-1201

http://business.nmsu.edu/academics/graduate-programs/mgt-phd/ (https://business.nmsu.edu/academics/graduate-programs/mgt-phd/)

The College of Business offers a program leading to a PhD in Business Administration with a concentration in Management. Our program meets the requirements of AACSB international by providing students with advanced management-related theoretical, research and applied knowledge and skills. We are committed to educating researchers, teachers, and scholars who will lead and shape business and organizational life in the decades to come. We prepare you to understand the complexities of business and its social and international contexts while you develop a specialized area of expertise. Our program is flexible in order to align programs of study with job opportunities and students’ interest areas. Research skills are developed through course work and mentoring relationships, as you will work with faculty to pursue joint research according to your interest and faculty members’ expertise. Our faculty prepare students for academic research and teaching careers in managerial and organizational sciences; consulting careers with industrial, governmental, health, or educational institutions; or leadership careers in organizational management and administration.
Business Administration (Marketing) - Doctor of Philosophy

Phone: (575) 646-3341

http://business.nmsu.edu/academics/graduate-programs/mktg-phd/ (https://business.nmsu.edu/academics/graduate-programs/mktg-phd/)

The College offers a program leading to a Ph.D. degree. The faculty of the PhD Program in Business Administration is committed to training researchers and educators who will shape business scholarship, practice and pedagogy. The program emphasizes preparing candidates to understand the complexities of modern business while they develop a specialized area of expertise in marketing or management. The PhD in Business Administration provides graduates with the opportunity to pursue a variety of career paths within academia and within industry. Currently concentrations are offered in management and marketing, and each admits students independently.

Program Requirements

- demonstrate competency in statistics and research methods;
- complete studies in a major field of concentration chosen from the departments of management or marketing in the College of Business;
- complete studies in a minor field of concentration or interest area that supports the student’s research, teaching and/or career goals;
- pass qualifying and comprehensive exams; and
- complete and successfully defend a doctoral dissertation.

Sustainability - Graduate Certificate

The Sustainability Graduate Certificate is open to students admitted to the Graduate School who have a GPA of 3.0 or higher. Completion of the certificate requires completion of each of the individual courses with a B or better.

¹ In MGMT 548 graduate students conduct an environmental audit during a consulting project to a small business, or a public, or a non-profit organization. The project includes at least two interventions that improve the sustainability of the organization (such as energy savings, reduction of use of natural resources, development of more sustainable relation to the ecosystem, and so forth).

Economics, Applied Statistics, and International Business

Undergraduate Program Information

The Department of Economics, Applied Statistics, and International Business (EASIB) offers undergraduate degrees in two majors in the bachelor of business administration -- one in economics and one in international business. The Department also offers a bachelor of arts in economics. Economics majors work in business, government, and the non-profit sector. The economics major is also a good choice for students who plan to attend graduate school in economics, law, business and other areas. International business is a good major for those interested in working in the international operations of a business or interested in working outside the United States. International Business graduates often obtain jobs in areas such as management or marketing but work in areas related to international aspects of the business.

Graduate Program Information

Graduate Study in Economics

EASIB cooperates with the Department of Agricultural Economics and Agricultural Business (AEAB) in offering graduate programs in economics, agricultural economics and economic development. The programs are jointly administered by faculty from the two departments. The objective of the master’s program is to prepare students for professional positions in business, government, or research institutions. Our master's degrees also are good preparation for those considering applying to a Ph.D. program. EASIB offers a Master of Arts in economics. There are three concentrations: regulatory economics, policy analysis, and econometrics. For more information on the Master of Science degree in agricultural economics, refer to the Agricultural Economics (p. 193) section in this catalog. The Doctor of Economic Development, also jointly administered by the EASIB and AEAB, is a unique program that provides advanced training in applied economic development. Graduates find jobs in industry and government.
Graduate Study in Applied Statistics
A graduate degree administered directly by EASIB is the Master of Applied Statistics. This degree is designed to produce graduates proficient in current practices in statistics and able to enter directly into positions in industry, government or private business. After completing this degree, a person will have the skills needed to execute data analyses, design experiments, and design and analyze surveys.

Graduate Study in Business Administration
The Department of Economics, Applied Statistics, and International Business cooperates with other departments of the College of Business to offer a Master of Business Administration and a Ph.D. in Business Administration. Within the Ph.D. program, the department offers a minor area of study and provides statistics courses to support the doctoral program. More information about these programs is available in this catalog under College of Business (https://catalogs.nmsu.edu/nmsu/business/#text).

Degrees for the Department

Bachelor Degree(s)
Economics - Bachelor of Art in Economics (p. 1135)
Economics - Bachelor of Business Administration (p. 1139)
International Business - Bachelor of Business Administration (p. 1142)

Master Degree(s)
Applied Statistics - Master of Science (p. 1147)
Economics - Master of Arts (p. 1148)
Economics (Econometrics) - Master of Arts (p. 1149)
Economics (Public Policy) - Master of Arts (p. 1151)
Economics (Public Utility Policy and Regulation) - Master of Arts (p. 1152)

Doctoral Degree(s)
Economics - Doctor of Economic Development (p. 1154)

Minors for the Department

Undergraduate
Economics - Undergraduate Minor (p. 1146)
International Business - Undergraduate Minor (p. 1146)

Graduate
Applied Statistics - Graduate Minor (p. 1156)
Economics - Graduate Minor (p. 1157)

Graduate Certificates
Public Utility Regulation and Economics - Graduate Certificate (p. 1156)
Public Utility Regulation and Economics - Graduate Certificate (Online) (p. 1156)

Christopher A. Erickson, Interim Department Head

Department of Economics, Applied Statistics and International Business:

Professors D. L. Daniel, Ph.D. (Southern Methodist)- nonparametrics; C. Enomoto, Ph.D. (Texas A&M)-econometrics, economic theory; C. A. Erickson, Ph.D. (Arizona State)-economic development, monetary theory, macroeconomics; D. A. Gegax, Ph.D. (Wyoming)-public utility economics, industrial organization; W. R. Gould, Ph.D. (North Carolina State)-biological sampling, wildlife and fisheries estimation; Y. F. Lee, Ph.D. (Southern Illinois-Carbondale)-international finance, international trade, international system, economic development; R. L. Steiner, Ph.D. (Oklahoma State)-likelihood methods, discrete distributions; D. M. VanLeeuwen, Ph.D. (Oregon State)-statistics; Associate Professors L. Blank, Ph.D. (Tennessee, Knoxville)-microeconomic theory, managerial economics, regulatory economics; C. Gard, Ph.D. (Washington)-biostatistics; R. McFerrin, Ph.D. (Texas A & M)-micro theory, American economic history; B. Widner, Ph.D. (Colorado State)-urban/regional, public finance, development; Assistant Professors B. Bai,
**Applied Statistics Courses**

**A ST 311. Statistical Applications**  
3 Credits (3)  
Techniques for describing and analyzing economic and biological data; estimation, hypothesis testing, regression and correlation; basic concepts of statistical inference.  
**Prerequisite(s):** MATH 1215.

**A ST 450. Special Topics**  
1-4 Credits  
Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

**A ST 465. Statistical Analysis I**  
3 Credits (3)  
An analytic introduction to the theory and methods of statistical inference. Sampling, frequency distributions (z, t, x², F), estimation, testing, and simulation. Crosslisted with: A ST 565.  
**Prerequisite(s):** MATH 2530G or consent of instructor.

**A ST 466. Statistical Analysis II**  
3 Credits (2+2P)  
Continuation of A ST 465. An analytic introduction to the theory and methods of statistical inference. Sampling, frequency distributions (z, t, x², F), estimation, testing, and simulation. Crosslisted with: A ST 566.  
**Prerequisite(s):** A ST 465 or consent of instructor.

**A ST 498. Independent Study**  
1-3 Credits  
Individual studies directed by consenting faculty with prior approval of the department head. Maximum of 3 credits per semester and a grand total of 3 credits.

**A ST 503. SAS Basics**  
3 Credits (2+2P)  
An introduction to the statistical software package, SAS, and its utilization in an interactive computing environment, primarily PC/SAS. Provides a fundamental understanding of the structure of SAS, its data management capabilities, and how to invoke a variety of descriptive and simple statistical SAS procedures.  
**Corequisite(s):** A ST 505.

**A ST 504. Statistical Software Applications**  
1 Credit (1)  
Optional Computing course to accompany A ST 506. Computer analysis of topics covered in A ST 505 and A ST 506.  
**Prerequisite(s):** A ST 503.  
**Corequisite(s):** A ST 506.

**A ST 505. Statistical Inference I**  
4 Credits (3+2P)  
A qualitative introduction to the concepts and methods of statistical inference. Sampling, frequency distributions (z, t, x², F), estimation, and testing. One-way analysis of variance. Simple linear regression.  
**Prerequisite:** consent of the instructor.

**A ST 506. Statistical Inference II**  
3 Credits (2+2P)  
Introduction to multiple regression; the analysis of variance for balanced studies; multiple comparisons, contrasts, factorials, experimental designs through split plots.  
**Prerequisite:** A ST 505 and the ability to use a standard computer package such as SAS (may be satisfied by A ST 503) or consent of instructor.

**A ST 507. Advanced Regression**  
3 Credits (3)  
Examination of multiple regression; residual analysis, collinearity, variable selection, weighted least squares, polynomial models, and nonlinear regression: linearizable and intrinsically nonlinear models.  
**Prerequisites:** A ST 503 and A ST 505 or consent of instructor.
A ST 509. Statistical Models for Complex Data Structures  
3 Credits (3)  
Statistical models for data that are not normally distributed or data with correlated observations. Covers generalized linear models for discrete and mixed models for correlated data structures. Analysis of data with unbalanced and missing cells.  
**Prerequisite(s):** A ST 506 with a grade of B or higher, or A ST 507 with a grade of B or higher, or consent of instructor.

A ST 512. Quantitative Analysis for Business Decisions  
3 Credits (3)  
Identification, collection, and analysis of an organization's data both internal and external, and use of the resultant information in managerial decision making. Crosslisted with: MGMT 512.

**Learning Outcomes**

1. Understand statistical methods commonly used in business. Identify statistical considerations in the design of studies. Properly interpret the results of statistical analyses and use results to make decisions regarding business problems. Effectively communicate business decisions orally and in writing, using statistics to defend decisions, as appropriate.

A ST 515. Statistical Analysis with R  
3 Credits (3)  
Introduction to R data types, basic calculations and programming, data input and manipulation, one and two sample tests, ANOVA, regression, diagnostics, graphics, probability distributions, and basic simulations in the R software environment.  
**Prerequisite(s):** A ST 505 or equivalent with consent of instructor.

A ST 540. Predictive Analytics  
3 Credits (3)  
This course covers data analytic techniques that can be used to predict and classify observations outside of the original data. Material includes linear and nonlinear regression models, linear and nonlinear classification models, and classification and regression trees. Students will gain hands-on experience using modern software packages to build predictive models and quantify the accuracy of these models.  
**Prerequisite(s):** A ST 507 or consent of instructor.

A ST 550. Special Topics  
1-4 Credits  
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

A ST 551. Introduction to Statistical Consulting  
1 Credit (1)  
Consideration of published material in the consulting process. Restricted to majors. Graded S/U.  
**Prerequisite:** consent of instructor.

A ST 552. Advanced Statistical Consulting  
1 Credit (1)  
Continuation of A ST 551 with emphasis on dealing with clients in order to identify statistically relevant features of a research study. Restricted to majors. Graded S/U.  
**Prerequisite:** A ST 551.

A ST 553. Practicum in Statistical Consulting  
1 Credit (1)  
Supervised experience under the guidance of senior faculty. May be repeated for a maximum of 2 credits. Restricted to majors. Graded S/U.  
**Prerequisite:** A ST 552.

A ST 554. Practicum in Statistics  
3 Credits (3)  
Practical experience in data analysis and the reporting of results; selecting and using statistical methods to analyze and interpret real-world problems; written and oral communication of findings.  
**Prerequisite(s):** A ST 503, A ST 506, A ST 507, and A ST 566, or consent of instructor.

A ST 555. Applied Multivariate Analysis  
3 Credits (3)  
Multivariate analysis of linear statistical models, including MANOVA and repeated measures. Analysis of correlation and covariance structures, including principal components, factor analysis, and canonical correlation. Classification and discrimination techniques.  
**Prerequisite(s):** A ST 506 and A ST 504 or consent of instructor.

A ST 556. Statistical Analysis I  
3 Credits (3)  
An analytic introduction to the theory and methods of statistical inference. Sampling, frequency distributions (z, t, x2, F), estimation, testing, and simulation. Crosslisted with: A ST 465.  
**Prerequisite(s):** MATH 2530G or consent of instructor.
A ST 566. Statistical Analysis II
3 Credits (2+2P)
Continuation of A ST 565. Crosslisted with: A ST 466.
Prerequisite(s): A ST 565 or consent of instructor.

A ST 567. Applied Linear Models I
3 Credits (3)
The mean model, including constraints, approach to linear models; nonidentity variance-covariance matrices. Some emphasis on computational aspects and relation to statistical packages.
Prerequisite: A ST 566 or consent of instructor.

A ST 568. Applied Linear Models II
3 Credits (3)
The relation of full to less-than-full rank linear models; complex data structures, including messy data, empty cells, and components of variance: extensions to categorical data analysis and nonparametric methods. Continues some emphasis on computational aspects.
Prerequisite: A ST 567.

A ST 596. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with prior approval by department head. May be repeated for a maximum of 3 credits.
Prerequisite: consent of instructor.

A ST 598. Special Research Problems
1-6 Credits
Individual analytical or experimental projects. Restricted to majors. Graded S/U.

A ST 599. Master's Thesis
1-6 Credits
Thesis.

Economics Courses
ECON 1110G. Survey of Economics
3 Credits (3)
This course will develop students' economics literacy and teaches students how economics relates to the everyday life of individuals, businesses and society in general. The course will also introduce students to the roles different levels of governments play in influencing the economy. At the conclusion of the course, students will be able to identify economic causes for various political and social problems at national and international levels, and have a better understanding of everyday economic issues that are reported in media and public forums.

Learning Outcomes
1. Gain and demonstrate a contextual understanding of economic terms and concepts.
2. Recognize and analyze common economic issues which relate to individual markets and the aggregate economy.
3. Learn basic economic principles that influence global trading and challenges relating to globalization.
4. Outline the implications of various economic policies on individuals and on economies.
5. Demonstrate ability to use diagrams and graphs to explain economic principles, policies and their applications.
6. Appreciate and understand how individual decisions and actions, as a member of society, affect economies locally, nationally and internationally.
7. Explain the roles of governments in influencing buyer and seller behavior in the market and how government failure occurs when intervention fails to improve or actually worsens economic outcomes.
8. Be able to apply course concepts to interpret, evaluate and think critically about economic events and policies, especially as regularly reported in the media and other public forums.
ECON 2110G. Macroeconomic Principles
3 Credits (3)
Macroeconomics is the study of national and global economies. Topics include output, unemployment and inflation; and how they are affected by financial systems, fiscal and monetary policies.

Learning Outcomes
1. Explain the concepts of opportunity cost, comparative advantage and exchange.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium and use supply and demand curves to analyze responses of markets to external events.
3. Explain the circular flow model and use the concepts of aggregate demand and aggregate supply to analyze the response of the economy to disturbances.
4. Explain the concepts of gross domestic product, inflation and unemployment and how they are measured.
5. Describe the determinants of the demand for money, the supply of money and interest rates and the role of financial institutions in the economy.
6. Define fiscal policy and monetary policies and how these affect the economy.
7. Students will be able to identify the causes of prosperity, growth, and economic change over time and explain the mechanisms through which these causes operate in the economy.

ECON 2110H. Principles of Macroeconomics Honors
3 Credits (3)
Macroeconomic theory and public policy designed: national income concepts, unemployment, inflation, economic growth and international payment problems. Must be a Crimson Scholar.
Prerequisite(s): MATH 1220G.

Learning Outcomes
1. Explain the concepts of opportunity cost, comparative advantage and exchange.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium and use supply and demand curves to analyze responses of markets to external events.
3. Explain the circular flow model and use the concepts of aggregate demand and aggregate supply to analyze the response of the economy to disturbances.
4. Explain the concepts of gross domestic product, inflation and unemployment and how they are measured.
5. Describe the determinants of the demand for money, the supply of money and interest rates and the role of financial institutions in the economy.
6. Define fiscal policy and monetary policies and how these affect the economy.
7. Students will be able to identify the causes of prosperity, growth, and economic change over time and explain the mechanisms through which these causes operate in the economy.

ECON 2120G. Microeconomics Principles
3 Credits (3)
This course will provide a broad overview of microeconomics. Microeconomics is the study of issues specific to households, firms, or industries with an emphasis on the role of markets. Topics discussed will include household and firm behavior, demand and supply, government intervention, market structures, and the efficient allocation of resources.

Learning Outcomes
1. Explain the concept of opportunity cost.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium.
3. Use supply and demand curves to analyze responses of markets to external events.
4. Use supply and demand analysis to examine the impact of government intervention.
5. Explain and calculate price elasticity of demand and other elasticities.
6. Demonstrate an understanding of producer choice, including cost and break-even analysis.
7. Compare and contrast the following market structures: perfect competition, monopoly, monopolistic competition, and oligopoly.
ECON 2120H. Principles of Microeconomics Honors
3 Credits (3)
Microeconomic theory and public policy: supply and demand, theory of the firm, market allocation of resources, income distribution, competition and monopoly, governmental regulation of businesses and unions. Must be a Crimson Scholar.
Prerequisite(s): MATH 1220G.
Learning Outcomes
1. Explain the concept of opportunity cost.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium.
3. Use supply and demand curves to analyze responses of markets to external events.
4. Use supply and demand analysis to examine the impact of government intervention.
5. Explain and calculate price elasticity of demand and other elasticities.
6. Demonstrate an understanding of producer choice, including cost and break-even analysis.
7. Compare and contrast the following market structures: perfect competition, monopoly, monopolistic competition, and oligopoly.

ECON 304. Money and Banking
3 Credits (3)
Income measurement and determination, monetary and fiscal policies.
Prerequisite(s): ECON 2110G or ECON 2110H or equivalent.

ECON 311. Intermediate Macroeconomic Theory
3 Credits (3)
Analysis of gross domestic product, the Classical, Keynesian, and Neo-Keynesian theories of income, employment, inflation and growth.
Prerequisite(s): ECON 2110G or ECON 2110H or equivalent.

ECON 312. Intermediate Microeconomic Theory
3 Credits (3)
Contemporary economic theory with emphasis upon value and distribution.
Prerequisite(s): ECON 2110G or ECON 2110H or equivalent.

ECON 324V. Developing Nations
3 Credits (3)
Economic analysis of problems related to development of developing nations. Issues such as growth, industrialization, poverty, population, international trade, foreign debt, and international economic relations.

ECON 325V. Economic Development of Latin America
3 Credits (3)
Economic analysis of problems related to development in Latin America, including the agrarian problem, debt and austerity programs, industrialization, inflation and unemployment, the drug trade, U.S.-Latin American relations, development strategies. Also individual countries problems.

ECON 332. Public Finance
3 Credits (3)
This course will examine the roles of government in modern, market-oriented, mixed economies. It will examine justifications for government participation in resource allocation, income distribution, and economic stabilization focusing primarily on the fiscal functions of government, taxation and public expenditure. Students will apply basic microeconomic analysis to analyze the impacts of public taxation and expenditures on economic decisions made elsewhere in the economy. In this course the emphasis will be on understanding the workings of public finance in fiscal federalist systems like the United States, but the principles taught will be applicable across other economic systems. Prerequisites: ECON 2120G or ECON 2120H

ECON 335V. Business and Government
3 Credits (3)
Relation of government to business through regulation; political, legal, and social implications. Crosslisted with: MGMT 335G

ECON 336. Labor Economics
3 Credits (3)
This course aims at developing students' understanding of how the labor market works. Topics to be covered include: labor supply and demand, wage differentials, wage structure, unemployment, gender issues, labor market discrimination, and migration. Prerequisites: ECON 2120G or ECON 2120H

ECON 337V. Natural Resource Economics
3 Credits (3)
Gain insight into important natural resource problems of our time. Apply economic principles to problems in the preservation, use, and development of agricultural, range, mineral, water, forestry, fishery, and environmental resources. Understand the use of cost-benefit analysis for government natural-resource projects, policies, and programs. Same as AEEC 337V.
Prerequisite: ECON 1110G or ECON 2120G or ECON 2120H.
ECON 345. Energy Economics
3 Credits (3)
Examines the economics of energy production including oil, coal, natural gas, renewables, and conservation as a substitute for energy production. Emphasis is on federal and state regulatory framework, and resulting public policy issues from a regional and national perspective.
Prerequisite(s): (ECON 2110G or ECON 2110H), (ECON 2120G or ECON 2120H).

ECON 384V. Water Resource Economics
3 Credits (3)
Use of economic principles to evaluate current and emerging issues in water resources. Applications focus on use of economic methods of analysis to current policy decisions surrounding agricultural, municipal, industrial, and environmental uses of water. Same as AEEC 384V.
Prerequisite: AEEC 1110 or ECON 2120G or ECON 2120H.

ECON 404. Collegiate Advisory Board, Federal Reserve
3 Credits (3)
Students serve on the Collegiate Advisory Board of the El Paso branch of the Federal Reserve Bank of Dallas. Guest speakers provide an overview of the Federal Reserve System, role of monetary policy, and issues facing specific industries in the local, national, and global economies. Students prepare reports, including a final paper, on an assigned industry in the regional or state economy and the current economic performance of their industry. Students must be of junior rank or higher with a GPA of at least 3.5. Consent of Instructor required.

ECON 405. Introductory Econometrics
3 Credits (3)
Multiple regression and correlation applied to economics and business; inference techniques; significance tests; simultaneous equations, estimation, and problems.
Prerequisite(s): MATH 1350G or A ST 311 (or equivalent).

ECON 432V. Economics of Health Care
3 Credits (3)
Analysis of the allocation of resources in the field of health and medical care.

ECON 445. Oil and Natural Gas Economics
3 Credits (3)
Examines the economics of oil and gas production. Topics covered include transportation, refining, federal and state regulatory framework, and resulting public policy issues from a regional and national perspective.
Prerequisite(s): ECON 345.

ECON 449. Open Economy Macroeconomics
3 Credits (3)
This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: IB 449.
Prerequisite(s): BFIN 341 OR ECON 311.

ECON 450. International Economics
3 Credits (3)
Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: IB 450
Prerequisite(s): ECON 2110G or ECON 2110H and ECON 2120G or ECON 2120H.

ECON 457. Mathematical Economics
3 Credits (3)
Application of mathematical tools, especially the calculus, to economic theory.
Prerequisite(s): MATH 1430G or equivalent.

ECON 471. Electricity Economics
3 Credits (3)
Regulatory policy and economic analysis related to the Electric Industry. Topics include characteristics of a utility and legal justification for regulation; characteristics and functions of a regulatory commission; history and structure of the industry; technology and network design; revenue requirements; cost allocation; and basic retail rate design. Crosslisted with: ECON 571.
Prerequisite(s): ECON 345.

ECON 489. Senior Economics Seminar
3 Credits (3)
Seminar primarily for economics majors in their final semester. Provides an opportunity to apply economic theory to a broad variety of topics.
Prerequisite(s): ECON 311 or ECON 312.

ECON 490. Selected Topics
1-3 Credits
Current topics in economics. Subject matter to be designated for each semester.
ECON 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. May be repeated for a maximum of 3 credits. **Prerequisite:** junior or above standing and consent of instructor.

ECON 503. Managerial Economics
3 Credits (3)
Theory and application of microeconomics to the management of organizations. **Prerequisite(s):** MATH 1350G or A ST 311 or equivalent with B or better.

ECON 545. Econometrics II
3 Credits (3)
Application of statistical techniques to estimation of economic relationships: demand functions, production and cost functions, and macroeconomic equations. **Prerequisite(s):** ECON 457 and AECE 540.

ECON 550. Special Topics
1-3 Credits
Seminars in selected current topics in the various areas of economics. Prerequisites vary according to the topic being offered.

ECON 571. Regulatory Policy and Industry Analysis: Electricity I
3 Credits (3)
Regulatory policy and economic analysis related to the Electric Industry. Topics include: characteristics of a utility and legal justification for regulation; characteristics and functions of a regulatory commission; history and structure of the industry; technology and network design; revenue requirements; cost allocation; and basic retail rate design.

ECON 572. Regulatory Policy and Industrial Analysis: Water and Natural Gas
3 Credits (3)
Regulatory policy and economic analysis related to the Natural Gas and Water industries. Topics include: history and structure of the industry; technology and network design; revenue requirements; and retail rate design.

ECON 573. Regulatory Policy and Industry Analysis: Electricity II
3 Credits (3)
Regulatory policy and economic analysis related to the Electric industry. Topics include: optimal generation mix; ancillary services; environmental policies; rate case procedures and strategies for effective testimony; advanced retail rate design; wholesale exchanges; unbundled transmission tariffs; market institutions and how different markets function; state and federal deregulation policies; Federal Energy Regulatory Commission orders and policies; demand-side management; and regulatory treatment of non-traditional retail services. Consent of instructor required. **Prerequisite(s):** ECON 571 or consent of instructor.

ECON 574. Advanced Seminar Regulatory Policy and Industry Analysis
3 Credits (3)
Advanced seminar and writing course specializing in regulatory policy and regulatory casework. Topics include: special policy & regulatory issues in telecommunications, electricity, natural gas, and water; preparation of written testimony; expert witness effectiveness including cross-examination; and contested case management. This course involves extensive reading and writing assignments. Consent of instructor required. **Prerequisite(s):** ECON 571 or consent of instructor.

ECON 581. International Economics
3 Credits (3)
Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. **Prerequisite(s):** ECON 311 and ECON 312.

ECON 582. Economics of Health Care
3 Credits (3)
Analysis of the allocation of resources in the field of health and medical care. Taught with ECON 432V with differentiated assignments for graduate students.

ECON 596. Independent Study
3 Credits (3)
Individual study program. Each offering will cover a subtitle. Maximum of 3 credits in a semester and 6 credits in a program. Consent of instructor required.

**Economic Development Courses**

ECDV 550. Introduction to Local and Regional Development
3 Credits (3)
Serves as the introductory course in the Doctor of Economic Development program. Overview of the economic development field.
ECDV 590. Special Topics
1-3 Credits (1-3)
Selected topics in the area of Economic Development. Subtitle reflects content. May be repeated up to 9 credits. Consent of instructor required.

ECDV 596. Individual Study
1-3 Credits (1-3)
Individual studies directed by consenting faculty with the prior approval of the Department Head. May be repeated up to 6 credits.

ECDV 651. Economic Development Theory
3 Credits (3)
Builds upon a general understanding of microeconomic and macroeconomic theory to focus specifically on theories of economic development at all levels. Prerequisites: AEEC 501 and 502

ECDV 661. Regional Economic Modeling
3 Credits (3)
Introduction to the tools and methods of regional economic development analysis. May be repeated up to 3 credits. Restricted to: ECDV majors. Prerequisite(s): AEEC 501, AEEC 502, and AEEC 540.

ECDV 664. Population Economics
3 Credits (3)
Examines the causes and consequences of demographic change. Examines theories of basic demographic processes, population projection and estimation. Consent of instructor required.

ECDV 668. Economic Development Finance
3 Credits (3)
Focuses on the tools and methods of economic development finance.

ECDV 670. Research in Economic Development
3 Credits (3)
Intense examination of the academic literature on economic development at all levels. Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 671. Sustainable Economic Development
3 Credits (3)
Focuses on the interconnections between economic development and the environment. Provides a broad set of tools and ideas related to the impacts of human activities on the environment. Prerequisites: AEEC 501, AEEC 502 and AEEC 540.

ECDV 673. Research Methods
3 Credits (3)
An overview of alternative research methods and tools. Students explore quantitative and qualitative research methods as alternatives and complements to statistical methods. Research design, ethics, and presentation are emphasized. Prerequisites: AEEC 501, AEEC 502 and AEEC 540.

ECDV 681. Urban Economic Development
3 Credits (3)
Examines causes and consequences of economic change in urban and metropolitan areas. Covers both theory and tools for analysis. Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 682. Rural Development
3 Credits (3)
Examines causes and consequences of economic change in rural areas, communities and small, open economies. Covers both theory and tools for analysis. Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 683. Seminar in National Economic Development
3 Credits (3)
Explores specific examples and cases of rural and urban economic development. Involves applied analysis of specific rural and/or urban economic issues/projects. Prerequisites: ECDV 681 and ECDV 682.

ECDV 692. Seminar in Economic Development
3 Credits (3)
Seminars in selected topics in economic development. Subtitle reflects content. May be repeated up to 9 credits. Prerequisite: Completion of at least nine semester hours of ECDV courses.

ECDV 694. Internship
1-9 Credits (1-9)
Internship in Economic Development. May be repeated up to 9 credits. Restricted to: ECDV majors. Graded: S/U Grading (S/U, Audit). Prerequisite(s): Completion of core requirements of Doctor of Economic Development.
ECDV 699. Doctoral Project  
1-9 Credits (1-9)  
Doctoral Project. May be repeated up to 9 credits. Completion of all DED coursework and successful completion of comprehensive exams.

International Business Courses

I B 317. International Marketing  
3 Credits (3)  
Focuses on decisions relating to entering markets, market segmentation, marketing strategies, and tactics in the international arena. Same as MKTG 317.

Learning Outcomes

1. Develop understanding about what is involved in making international marketing decisions, including product, price, promotion, and place decisions to create a marketing mix. Acquire an overview on the contemporary issues in global marketing and the unique challenges faced by marketing managers in the dynamic global environment. Develop insights into how differences in global economic, cultural, social, political, and legal environments can affect marketing decisions. Develop strategic thinking in the context of complex problems and challenges faced by the contemporary global executives and managers. Develop ability to integrate the important global societal dimensions of diversity, environmental concerns, ethics, and technological change into their thinking. Develop knowledge and skills to analyze cross-cultural variables and their impact on international marketing. Discover sources of information for researching and evaluating international markets. Communicate effectively about marketing issues in group discussions, oral presentations and written reports. Work effectively as a team member in analyzing marketing issues. Develop leadership skills necessary to deal with the uncertainty and changes faced by today’s global marketers.

I B 351. International Business  
3 Credits (3)  
The various aspects of international business, and identification and analysis of problems encountered by multinational companies.  
Prerequisite: junior standing or consent of instructor.

I B 398. International Business and Economic Environments  
3 Credits (3)  
Description and analysis of various world regions, e.g., Pacific Rim, Eastern Europe, South Asia. Region will vary from semester to semester.

I B 449. Open Economy Macroeconomics  
3 Credits (3)  
This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: ECON 449.  
Prerequisite(s): BFIN 341 OR ECON 311.

I B 450. International Economics  
3 Credits (3)  
Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: ECON 450G  
Prerequisite(s): ECON 2110G or ECON 2110H and ECON 2120G or ECON 2120H.

I B 475. International Finance  
3 Credits (3)  
International aspects of financial transactions, decision-making, banking and financial markets. Crosslisted with: BFIN 475 and BFIN 575.  
Prerequisite(s): BFIN 341.

I B 489. Senior Seminar in International Business  
3 Credits (3)  
Capstone class for I B majors. Integration of previous classwork via the examination of case studies and completion of a major project.  
Prerequisite: I B core.

Office Location: Business Complex Room 234

Phone: (575) 646-7211

Website: https://business.nmsu.edu/departments/economics.html

Economics - Bachelor of Arts in Economics

The Bachelor of Arts major in Economics is the only bachelor of arts degree offered through the College of Business. It has the advantage of including a large number of general electives. This feature provides great flexibility to the student who, in addition to completing the courses for a major in economics, may wish to take a double major or take courses from a wide variety of other subjects of his or her own choosing. This program is suitable for, among others, students who plan to go to graduate school in economics, law, business, the social sciences or other areas.
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

A Suggested Plan of Study for Students

This roadmap assumes placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

* Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

* See the General Education (p. 123) section of the catalog for a full list of courses.

* See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses and how to fulfill this requirement.

* All Foundation Requirement Courses must be taken, or satisfied with transfer credits, regardless of which Mathematics or Statistics course satisfies the Area II General Education course: MATH 1220G, MATH 1430G and MATH 1350G or A ST 311 must be completed.

* Economics majors must earn a minimum cumulative GPA of 2.5 in the 27 credits of departmental requirements.

* Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

</tr>
</tbody>
</table>

1 Prerequisites are required, students are responsible for checking and fulfilling course prerequisites listed in the catalog.
2 See the General Education (p. 123) section of the catalog for a full list of courses.
3 Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
4 See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
5 Upper Division ECON electives are typically only offered during certain semesters, so students must plan accordingly.
6 **International Business Double Majors:** Students may not receive credit for both ECON 489 Senior Economics Seminar and I B 489 Senior Seminar in International Business. For this reason, students majoring in both Economics and International Business must consult with the Department Head to arrange a suitable substitution.
Economics - Bachelor of Business Administration

This program is especially suitable for students who find economics interesting and who intend, perhaps without additional formal education beyond the Bachelor degree, to take jobs in business or government. This degree prepares you for a wide variety of jobs including those leading eventually to positions of executive responsibility. It is also appropriate for those who may choose to seek a Master of Business Administration degree after graduation. It is also a great degree for someone interested in pursuing a career as a lawyer.

In addition to completing general education, (p. 123) College of Business foundation and business core (p. 1087), Viewing a Wider World (p. 130) requirements, and general electives (see above), every candidate for the bachelor of business administration in economics must complete each of these courses with a grade of C- or better.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

1. Prerequisites are required, students are responsible for checking and fulfilling course prerequisites listed in the catalog.
2. See the General Education (p. 123) section of the catalog for a full list of courses.
3. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
4. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
5. Upper Division ECON electives are typically only offered during certain semesters, so students must plan accordingly.
6. International Business Double Majors: Students may not receive credit for both ECON 489 Senior Economics Seminar and I B 489 Senior Seminar in International Business. For this reason, students majoring in both Economics and International Business must consult with the Department Head to arrange a suitable substitution.

---

**International Business - Bachelor of Business Administration**

The Bachelor of Business Administration in International Business is intended for those who plan to work for government agencies or firms with operations abroad or between the United States and foreign countries. The program prepares you for positions requiring knowledge of international payments, foreign exchange markets, global marketing, export and import procedures, and international investments.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above.

In addition to the course work indicated below, students must satisfy the following two requirements:

**Second language:** Students must demonstrate oral and written proficiency at the intermediate mid-level according to ACTFL (American Council on the Teaching of Foreign Languages) proficiency guidelines.

**International experience requirement:** Students must engage in an international experience equivalent to a semester abroad in a university where the language of instruction is not English. The department will determine the appropriateness of international experience. Study abroad programs must be pre-approved by IB advisors and the Department Head.

COMM 1130G Public Speaking
HNRS 2175G Introduction to Communication Honors
### Area II: Mathematics

- **MATH 1220G** College Algebra (Foundation Requirement) \(^1\) 3

### Area III/IV: Laboratory Sciences and Social/Behavioral Sciences

- **ECON 2110G** Macroeconomic Principles (Credits are counted in Business Core)
- **ECON 2120G** Principles of Microeconomics (Credits are counted in Business Core)
- **Area III: Laboratory Sciences Course (4 credits)** \(^2\)

### Area V: Humanities

3

### Area VI: Creative and Fine Arts

3

### General Education Elective

- **MATH 1430G** Applications of Calculus I (Foundation Requirement, must earn a grade of at least C-) \(^1\) 1
  - Viewpoint of a Wider World \(^3\) 6

### Departmental/College Requirements

### Foundation Requirements

Choose one from the following:

- **MATH 1350G** Introduction to Statistics
- **A ST 311** Statistical Applications (Foundation Requirement - doesn't count as Gen.Ed)

### Business Core: Lower Division (minimum grades of C- required)

- **ACCT 2110** Principles of Accounting I (not recommended for freshman year) 3
- **ACCT 2120** Principles of Accounting II 3
- **BCIS 1110** Introduction to Information Systems 3
- **BUSA 1110** Intro to Business 3

### Business Core: Upper Division

- **BCIS 338** Business Information Systems I 3
- **BLAW 316** Legal Environment of Business 3
- **BFIN 341** Financial Analysis and Markets 3
- **MGMT 309** Human Behavior in Organizations 3
- **MGMT 449** Strategic Management 3
- **MKTG 303** Principles of Marketing 3

Choose one from the following:

- **MGMT 344** Production and Operations Management
- **MGMT 470** Project Management in Organizations
- **BCIS 485** Enterprise Resource Planning

**Upper division Economics or Applied Statistics elective from the following prefixes: A ST (excluding A ST 311), ECON** 3

**Upper Division Business elective from the following prefixes: A ST, ACCT, B A, BCIS, BLAW, ECON, BFIN, I B, MGMT, MKTG (excluding A ST 311)** 3

### Major Courses

- **I B 351** International Business 3
- **I B/ECON 450** International Economics 3
- **I B/ECON 449** Open Economy Macroeconomics 3

Choose two from the following:

- **I B 475** International Finance 3
- **or BFIN 475** International Managerial Finance 3
- **ECON 324V** Developing Nations 3
- **ECON 325V** International Business and Economic Environments 3

**Upper Division Courses: Functional Business area** 15

Courses must be in a single functional business area beyond elsewhere required for the I B major \(^6\)

### Second Language (See “Second language requirement” description above)

### International Experience (see “International experience requirement” description above)

### Electives, to bring the total credits to 120 \(^7\)

10

### Total Credits

120

---

1. Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

2. See the General Education (p. 123) section of the catalog for a full list of courses.
See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses and how to fulfill this requirement.

All Foundation Requirement Courses must be taken, or satisfied with transfer credits, regardless of which Mathematics or Statistics course satisfies the Area II General Education course: MATH 1220G, MATH 1430G and MATH 1350G or A ST 311 must be completed.

Candidates must earn a minimum cumulative GPA of 2.5 in all major course requirements. At least 12 of the 15 credit hours counted toward the international business major courses must be earned at NMSU. No more than 3 of the 15 required major credits may be earned while studying abroad.

At least 9 of the 15 credit hours counted toward the international business functional area must be earned at NMSU. No more than 6 of the 15 required business functional area credits may be earned while studying abroad.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

---

1. Prerequisites are required, students are responsible for checking and fulfilling course prerequisites listed in the catalog.
2. See the General Education (p. 123) section of the catalog for a full list of courses.
3. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
4. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
5. Upper Division ECON electives are typically only offered during certain semesters, so students must plan accordingly.
6. Students are required to take the following in order to meet the requirements for the degree:
   - I B 450 International Economics or ECON 450 International Economics
7. **International Business Double Majors**: Students may not receive credit for both ECON 489 Senior Economics Seminar and I B 489 Senior Seminar in International Business. For this reason, students majoring in both Economics and International Business must consult with the Department Head to arrange a suitable substitution.
Other Requirements for the Major

Foreign language: Students must demonstrate oral and written proficiency at the intermediate mid-level according to ACTFL (American Council on the Teaching of Foreign Languages) proficiency guidelines. (Process for demonstrating proficiency to be coordinated with the NMSU Department of Languages and Linguistics. Any costs associated with proficiency demonstration will be paid by the student.)

International experience requirement: Students must partake of an international experience equivalent to a semester abroad in a university where the language of instruction is not English. The department will determine appropriateness of international experience. Study abroad programs must be pre-approved by IB advisors and Department Head.

Economics - Undergraduate Minor

The undergraduate minor in economics is appropriate for those who seek a better understanding of how micro- and macro-economic forces influence individuals, business and government decision making. Students thinking of a career in banking and finance, government service, or law will find the minor helpful.

A minor in economics consists of 18 or more credit hours of approved course work in economics (ECON), of which at least 12 are numbered 300 or higher, all completed with a grade of C- or higher. At least 12 credits must be completed at NMSU. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

</tbody>
</table>

1 ECON 1110G Survey of Economics may be substituted for one of Econ 251G Principals of Macroeconomics or Econ 252G Principals of Microeconomics with the approval of the Head of the Department of Economics, Applied Statistics, and International Business.

International Business - Undergraduate Minor

A minor in international business provides the student with a background in international business that can be useful in many settings given the increasing intensity of globalization. Especially those who wish to find work with large companies with an international presence or for those who may want to own their own business dealing internationally, the minor in international business can help lay the groundwork for a successful career.

A minor consists of 18 or more credit hours of approved course work in the International Business core, all completed with a grade of C- or higher. At least 12 credits must be completed at NMSU. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

</tr>
</tbody>
</table>

In addition, I B minors must meet the foreign language proficiency requirement described below.
Students must demonstrate oral and written proficiency in a foreign language at the intermediate mid-level according to the ACTFL (American Council on the Teaching of Foreign Languages) proficiency guidelines. (Process for demonstrating proficiency to be coordinated with the NMSU Department of Languages and Linguistics. Any costs associated with proficiency demonstration will be paid by the student.)

Applied Statistics - Master of Science

The Department of Economics, Applied Statistics and International Business offers the Master of Science (MS) degree in applied statistics. The applied statistics program produces graduates proficient in the practice of statistics and prepared to enter directly into positions in government or industry. Students in the program receive instruction in both the theory and the application of statistics, with an emphasis on experimental design and modeling. Statistical software packages, which are necessary for modern data analysis, are used throughout the curriculum. The program culminates in a capstone course in which students gain experience in analyzing real-world data.

Students from a variety of disciplines, including mathematics, psychology, engineering, and the natural sciences, have successfully completed the MS in applied statistics.

Admission

Requirements for regular admission to the MS in applied statistics include the following:

- A minimum 3.0-grade point average overall or in the last two years of study. Complete graduate and undergraduate transcripts must be supplied.
- Three semesters of calculus, equivalent to NMSU courses MATH 1511G Calculus and Analytic Geometry I, MATH 1521G Calculus and Analytic Geometry II, and MATH 2530G Calculus III, completed with grades of B or better.
- Three letters of reference from former professors or others able to evaluate the student’s academic potential.
- A one- to two-page typewritten letter of application, discussing academic objectives, professional plans, and specific reasons for selecting statistics as a field for advanced study.

In addition to the formal requirements above, some experience in computer programming is strongly recommended.

Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). Fluency in written and spoken English is essential to successful completion of the program. Further information regarding the TOEFL can be obtained from https://isss.nmsu.edu/index-8/.

Students must choose one of two options to complete the course requirements: the research option or the coursework-only option.

Research Option

Under the research option, the combined research (A ST 598 or A ST 599) and elective credits must equal nine. The number of research credits may vary from four to six, with the remaining credits fulfilled with electives.

Economics - Master of Arts

Economics - Master of Arts (no Concentration)

Candidates for the Master of Arts in economics must successfully complete a minimum of 30 graduate credits (concentrations may require more than 30 graduate credits). At least 12 credits beyond the core courses (AEEC 501 Microeconomic Theory, AEEC 502 Macroeconomic Theory, AEEC 540 Econometrics I) must be earned by taking courses taught by economics faculty members in the Department of Economics, Applied Statistics and International Business. At least two of the three core courses must be completed at NMSU. Twenty-one of the credits must have one of the four following prefixes: AEEC, ECON, ECDV, or AG E. At least twenty-four of the credits must be associated with courses numbered 500 or above. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. Students preparing to enter the program are encouraged to complete the following:

1. one course in intermediate microeconomic theory and one course in macroeconomic theory with minimum grades of B;
2. one course in college-level calculus; and
3. one course in statistics, including simple regression.

Those students not having completed these courses may be admitted with the requirement that the deficiencies be completed at the beginning of the graduate program.

The Master of Arts in Economics (regulatory economics) may be completed either face-to-face or online.

All students in the program must successfully complete a minimum of 30 credits including the following:

<table>
<thead>
<tr>

</tbody>
</table>

Notes:

1. No more than one course with a grade less than B can be used to fulfill the requirements for the MA Econ degree.
2. ECON 503 Managerial Economics cannot be counted toward the major in Economics.
3. A maximum of nine hours of approved transfer credit (with minimum grades of A) may be applied toward the degree.

Teaching and research assistantships are available to qualified applicants; however, admission to the program does not imply or guarantee an assistantship. It is not necessary to have an undergraduate degree in economics to enter the graduate program or to receive financial assistance.

The Masters of Arts in Economics (no concentration) may be completed either face-to-face or online.

Economics - Master of Arts (Online)

Economics - Master of Arts (no Concentration)

3. A maximum of nine hours of approved transfer credit (with minimum grades of A) may be applied toward the degree.

Teaching and research assistantships are available to qualified applicants; however, admission to the program does not imply or guarantee an assistantship. It is not necessary to have an undergraduate degree in economics to enter the graduate program or to receive financial assistance.

The Masters of Arts in Economics (no concentration) may be completed either face-to-face or online.

**Economics (Econometrics) - Master of Arts**

Candidates for the Master of Arts in economics must successfully complete a minimum of 30 graduate credits (concentrations may require more than 30 graduate credits). At least 12 credits beyond the core courses (AEEC 501 Microeconomic Theory, AEEC 502 Macroeconomic Theory, AEEC 540 Econometrics I) must be earned by taking courses taught by economics faculty members in the Department of Economics, Applied Statistics and International Business. At least two of the three core courses must be completed at NMSU. Twenty-one of the credits must have one of the four following prefixes: AEEC, ECON, ECDV, or AG E. At least twenty-four of the credits must be associated with courses numbered 500 or above. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. Students preparing to enter the program are encouraged to complete the following:

1. one course in intermediate microeconomic theory and one course in macroeconomic theory with minimum grades of B;
2. one course in college-level calculus; and
3. one course in statistics, including simple regression.

Those students not having completed these courses may be admitted with the requirement that the deficiencies be completed at the beginning of the graduate program. Those students interested in the concentration in regulatory economics are advised to complete two courses in college-level statistics.

Teaching and research assistantships are available to qualified applicants; however, admission to the program does not imply or guarantee an assistantship. It is not necessary to have an undergraduate degree in economics to enter the graduate program nor to receive financial assistance.

All students in the program must successfully complete a minimum of 30 credits including the following:

<table>

Economics - Doctor of Economic Development

The Doctor of Economic Development (DED) is a professional doctorate designed to provide advanced training for economic development professionals.

The Doctor of Economic Development (DED) is designed to prepare students to be professionals in the area of economic development. To receive a DED, students must successfully complete 42 ECDV credits. Successfully passing 2 comprehensive exams (offered twice each summer) is required to register for ECDV courses. The five courses covered by the two exams represent 15 credit hours of course work, which the student may complete at another program or at NMSU.

DED minimum admission requirements:

All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy, and in addition the following:

- Bachelor's degree or equivalent
- Minimum undergraduate GPA: 3.0/4.0
- GRE or GMAT score is recommended (not required)
- Completion of one undergraduate courses in intermediate microeconomic (ECON 311 Intermediate Macroeconomic Theory or equivalent) and intermediate macroeconomic (ECON 312 Intermediate Microeconomic Theory or equivalent) both with grades of B or better
- Completion of one course in college-level calculus (MATH 1430G Applications of Calculus I or equivalent) and one course in statistics including regression analysis (ECON 405 Introductory Econometrics or equivalent), with grades of B or better in both courses
- Additional coursework in matrix algebra is recommended
- One course in mathematical economics ECON 457 Mathematical Economics or equivalent), with a grade of B or better
- International students must meet graduate school admission requirements for English proficiency

In addition, all applicants must successfully pass Comprehensive Exams covering the "Microeconomic Core" and the "Macroeconomic and Econometric Core" before taking upper level ECDV courses. The Microeconomic Core exam covers advanced microeconomic theory (AECC 501 Microeconomic Theory and AECC 596 Individual Study). The Macroeconomic and Econometric Core covers advanced macroeconomic theory (AECC 502 Macroeconomic Theory), and econometrics (AECC 540 Econometrics I and ECON 545 Econometrics II).

Students who have not passed all of these "core" courses with a grade of B or better, or feel the need to study the material further, may take the courses, along with ECON 457 Mathematical Economics during the fall and spring semesters of their first year in the program.

- Comprehensive Exam I covers the "Microeconomics Core": AECC 501, AECC 596
- Comprehensive Exam II covers the "Macroeconomics and Econometrics Core": AECC 502 Macroeconomic Theory, AECC 540 Econometrics I and ECON 545 Econometrics II

Students who fail a comprehensive exam may apply to take the exam a second time. Only under special circumstances are students allowed to take a comprehensive exam a third time.

All students in the DED program must successfully complete the following:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECDV 550</td>
<td>Introduction to Local and Regional Development</td>

<td>3</td>
</tr>
</tbody>
</table>
Teaching and research assistantships are available to qualified applicants, however, admission to the program does not imply or guarantee funding.

Detailed and updated information is available at https://business.nmsu.edu/academics/graduate-programs/ded/.

All applicants must successfully pass Comprehensive Exams covering the "Microeconomic Core" and the "Macroeconomic and Econometric Core" before taking upper level ECDV courses. The Microeconomic Core exam covers advanced microeconomic theory (AEEC 501 Microeconomic Theory and AEEC 596 Individual Study). The Macroeconomic and Econometric Core covers advanced macroeconomic theory (AEEC 502 Macroeconomic Theory), and econometrics (AEEC 540 Econometrics I and ECON 545 Econometrics II).

Students who have not passed all of these "core" courses with a grade of B or better, or feel the need to study the material further, may take the courses, along with ECON 457 Mathematical Economics during the fall and spring semesters of their first year in the program.

- Comprehensive Exam I covers the "Microeconomics Core": AEEC 501 Microeconomic Theory, AEEC 596 Individual Study
- Comprehensive Exam II covers the "Macroeconomics and Econometrics Core": AEEC 502 Macroeconomic Theory, AEEC 540 Econometrics I and ECON 545 Econometrics II
- Students who fail a comprehensive exam may apply to take the exam a second time. Only under special circumstances are students allowed to take a comprehensive exam a third time

In preparation for the comprehensive exams, students who have not previously completed graduate level course work in economics will need to start their program with the following Roadmap.

<table>
<thead>

Applied Statistics - Graduate Minor

The minor in applied statistics is designed for graduate students majoring in other fields. It provides credentials that the student is capable of conducting statistical analyses in their area of specialization.

Master's level students wishing to minor in applied statistics at the master's level must have at least 10 credits of 500-level applied statistics courses. In accordance with Graduate School requirements, doctoral students must have at least 12 credits of 500-level applied statistics courses for a minor.

Students wishing to obtain the minor in applied statistics should contact an applied statistics faculty member to recommend appropriate applied statistics course work to be included in the plan of study and to serve as the graduate committee representative from the minor area.
Economics - Graduate Minor

The graduate minor in economics is appropriate for those who seek a better understanding of how micro- and macro- economic forces influence individuals, business and government decision making. Students interested in public utility regulation, banking and finance, government service, or law will find the minor especially interesting.

Graduate students wishing to earn a minor in economics must complete 12 semester credit hours, including:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Select at least two from the following:</td>

</tbody>
</table>

1 ECON 503 Managerial Economics cannot be counted toward the minor.

Students pursuing the economics minor must fulfill the course prerequisites before enrolling in the graduate courses.

Finance

Undergraduate Program Information

Finance is the management of money and cash flow for business organizations, government and individuals. The study of finance involves examining the theory and techniques of managing money, including analysis and management of risk. Finance students learn to apply tools and concepts from mathematics, statistics, economics and accounting to financial decision-making. With this knowledge, finance graduates are in high demand by employers and command some of the highest salaries for college graduates. Depending upon their career goals and interests, finance majors may use the electives in the major to focus their program of study on financial management, personal financial planning, investments, banking, and/or risk management and insurance.

Degrees for the Department

Finance - Bachelor of Business Administration (p. 1162)
Finance (Banking & Financial Planning) - Bachelor of Business Administration (p. 1164)
Finance (Entrepreneurial Finance) - Bachelor of Business Administration (p. 1166)
Finance (Financial Analyst) - Bachelor of Business Administration (p. 1168)
Finance (Risk Management & Insurance) - Bachelor of Business Administration (p. 1171)

Minors

Can only be earned by non-finance majors

Entrepreneurship and Innovation - Undergraduate Minor (p. 1174)
Finance - Undergraduate Minor (p. 1174)
Risk Management and Insurance - Undergraduate Minor (p. 1174)

Open to all majors

Business Law - Undergraduate Minor (p. 1173)

(Contact the Finance Department Head in BC 221 prior to signing up for Business Law Minor)

Finance - Graduate Certificate (p. 1175)

Professor Kenneth Martin, Department Head

Professors de Boyrie, Martin, Query, Sankaran; Assistant Professors Clements, Rahman, Yildirim; College Professors Pallares, James, Kealy; College Associate Professor Fuchs; College Assistant Professor Kerr; Emeritus Professors Ellis, Oretskin
Business Finance Courses

BFIN 2110. Introduction to Finance
3 Credits (3)
Introduces tools and techniques of financial management. Includes time value of money; financial planning, diversification and risk; debt and equity investment decisions; and financial statement analysis.
Prerequisite(s): OATS 106 or higher; OATS 120 or ACCT 2110; ECON 1110G or ECON 2110G.

Learning Outcomes
1. Explain the time value of money and its application in decision-making, including calculating present and future values of single payment and series of payments.
2. Identify the major sources of external long-term financing for corporations.
3. Explain risk-return tradeoff as it relates to diversification.
4. Differentiate the role of finance from other related disciplines such as accounting and economics.
5. Demonstrate knowledge of capital markets and securities (debt and equity).
6. Describe basic types of financial ratios and their uses.
7. Demonstrate the ability to prepare cash flows and make qualitative judgments on the relevance of the changes from one time frame to another.

BFIN 303V. Personal Financial Planning and Investing in a Global Economy
3 Credits (3)
Provides a framework for successful personal financial planning within an individual's career and income. Covers personal money management, federal and state taxation, the mathematics of finance and credit, housing, inflation, insurance, savings, and investments. Majors and minors may not use this course to satisfy their finance requirements.

BFIN 311. Financial Futures Markets
3 Credits (3)
Same as AEEC 311.

BFIN 322. Principles of Insurance
3 Credits (3)
Theory and practice of insurance and its economics and social significance; review of the major lines of insurance including life, health, and property liability insurance.

BFIN 323. Life/Health/Employee Benefits
3 Credits (3)
Approaches to problems of employee security from the perspective of businesses. Topics including pensions, profit-sharing plans, 401(k) plans, group life and health plans, and flexible benefit programs. The course also addresses individual life, health, and annuity contracts within a financial planning context.
Prerequisite: BFIN 322.

BFIN 324. Property and Liability Insurance
3 Credits (3)
Analysis of property and liability insurance with emphasis on handling of commercial exposures. Review of property and liability company operations including rate making and insurance accounting. Prerequisite: BFIN 322.

BFIN 325. Real Estate Principles and Law I
3 Credits (3)
Real estate law and the fundamental aspects of the real estate purchase transaction and the real estate lease agreement. Topics include real estate brokerage, marketing of real estate, fundamental legal aspects of real estate, present and future interests, air and water rights, methods of transfer, basics of financing and liens, and real estate leases. Same as BLAW 325.

BFIN 326. Business Risk Management
3 Credits (3)
The operational risks faced by firms and the study of various methods of handling these risks, including loss prevention, risk retention, self-insurance, corporate insurance programs, and capital markets. Prerequisites: BFIN 322.

BFIN 341. Financial Analysis and Markets
3 Credits (3)
Financial analysis for business financing and investing decisions. Prerequisites ACCT 2110, ECON 2110G, ECON 2120G, MATH 1220G, A ST 311 or MATH 1350G.

BFIN 355. Investments
3 Credits (3)
Prerequisite(s): BFIN 341 with a grade of C- or better.
BFIN 360. Financial Information Technology
3 Credits (3)
Integrated use of electronic financial information resources with spreadsheet and word processing applications in investigating financial issues and solving financial problems.
Prerequisite(s): a grade of C- or better in BFIN 341 or consent of instructor.

BFIN 385. Analysis of Financial Markets and Institutions
3 Credits (3)
Analysis of the financial system, emphasizing its institutions and instruments.
Prerequisite(s): BFIN 341 with a grade of C- or better.

BFIN 391. Finance Internship and Cooperative Education I
1-3 Credits
Introduction and application of finance principles in a work environment. Open only to students in the finance major or minor who will be working with an approved employer in a finance related position, over a period of 12 weeks or at least 300 work hours. Consent of instructor required.

BFIN 392. Insurance Internship and Cooperative Education I
1-3 Credits (1-3)
Introduction and application of insurance principles in a work environment. Open only to students in the finance major or insurance minor who will be working with an approved employer in an insurance related position, over a period of 12 weeks or at least 300 work hours. Consent of instructor required. Restricted to Finance majors.

BFIN 393. Banking Internship and Cooperative Education
1-3 Credits (1-3)
Professional banking experience with opportunities to engage in business analysis and to observe application of business principles in the management of a banking entity or a regulatory agency with banking oversight. Open only to students in the finance major or banking minor who will be working with an approved employer in a banking related position, over a period of 12 weeks or at least 300 work hours. May be repeated up to 3 credits. Consent of Instructor required.

BFIN 406. Theory of Financial Decisions
3 Credits (3)
Contemporary financial theory. Firm valuation, investments and financing decisions, risk analysis.
Prerequisite(s): BFIN 341 with a grade of C- or better.

BFIN 421. Personal Financial Planning for Professionals
3 Credits (3)
Introduction to personal financial planning, including goal setting and fact finding, cash management, credit, housing, retirement planning, taxation and estate planning. This course is intended for those planning careers in personal financial advising in one of the various financial services environments.
Prerequisite(s): BFIN 341, or consent of Instructor.

BFIN 435. Investment Analysis
3 Credits (3)
Efficiency of capital markets, modern portfolio management, special topics of current interest to investment analysts.
Prerequisite: BFIN 355.

BFIN 445. Fixed Income Markets, Instruments and Derivatives
3 Credits (3)
Course provides a broad introduction to treasury, corporate, municipal, mortgage backed and asset backed bond markets. The analytical techniques for valuing bonds, quantifying their exposure to changes in interest rate and credit risk exposures and investment decision-making are explored.
Prerequisite(s): BFIN 341.

BFIN 455. Derivative Markets and Securities
3 Credits (3)
Institutional aspects of derivative markets and the arbitrage based pricing of derivative instruments such as stock options, interest rate options, future contracts and swaps. The applied component of the course demonstrates use of these instruments as hedge and/or investment vehicles.
Prerequisite(s): BFIN 355.

BFIN 470. Real Estate Appraisal
3 Credits (2+2P)
This course addresses issues influencing the value of real estate with some emphasis upon rural properties. Topics include courthouse records, property taxes, appraisal methodology, expert courtroom testimony, condemnation, and legal issues. Students will take field trips and write appraisals. Course material is relevant to student in Finance, Accounting, and Pre-Law, as well as Agriculture. Accredited for hours to apply to both pre-licensing and continuing education requirements of the New Mexico Real Estate Commission for both Appraisers and Real Estate Brokers. Crosslisted with: AEEC 470.
Prerequisite(s): Junior or above standing.
BFIN 475. International Managerial Finance
3 Credits (3)
International aspects of financial transactions, decision-making, banking and financial markets. Crosslisted with: IB 475 and BFIN 575.

BFIN 480. Management of Financial Institutions
3 Credits (3)
Asset and liability management of financial institutions; emphasis on commercial bank management.
Prerequisite: BFIN 385 or consent of instructor.

BFIN 490. Selected Topics
1-3 Credits
Current topics in finance.
Prerequisites: vary according to the seminar being offered.

BFIN 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.
Prerequisites: junior or above standing and consent of instructor.

BFIN 500. Concepts in Finance
1 Credit (1)
An overview of fundamental principles of finance necessary for prospective MBA students who do not have an undergraduate background in finance. Includes: Time value of money concepts and calculations; risk and calculation of return given appropriate risk measures; bond risk characteristics and calculation of the value of a bond; calculation of the value of common stock (determination as to whether a stock is over-valued or under-valued); and calculation of the costs of capital and capital budgeting problems using the cost of capital.
Prerequisite(s): admitted to MBA Program or consent of course department.

BFIN 503. Financial Management
3 Credits (3)
Theory and application of financial analysis to asset management, project evaluation, capital structure, and dividend policy. Interrelationships among financial and other organizational decisions.
Prerequisite(s): BFIN 341 with a grade of B or better.

BFIN 511. Financial Futures Markets
Same as AEEC 511.

BFIN 521. Personal Financial Planning for Professionals
3 Credits (3)
Introduction to personal financial planning, including goal setting and fact finding, cash management, credit, housing, retirement planning, taxation and estate planning. This course is intended for those planning careers in personal financial advising in one of the various financial services environments.
For Graduate students only
Learning Outcomes
1. Describe the financial planning process, assess the external environment, use goals to establish financial direction, and analyze a client's present financial position. Estimate the impacts of income tax planning strategies, apply the basic process for retirement planning, and define the considerations for estate planning. Evaluate the roles of various insurance products in managing risks, and recognize the professional and ethical aspects of financial planning.

BFIN 535. Investment Concepts
3 Credits (3)
Investments in common stocks and other securities. Risk and return, securities markets, portfolio theory and management. For Graduate students only
Learning Outcomes
BFIN 545. Fixed Income Markets, Instruments and Derivatives
3 Credits (3)
Course provides a broad introduction to treasury, corporate, municipal, mortgage backed and asset backed bond markets. The analytical techniques for valuing bonds, quantifying their exposure to changes in interest rate and credit risk exposures and investment decision-making are explored. Assignments and exams will be differentiated from the undergraduate cross-listed course. In addition, graduate students are expected to complete a project. For Graduate students only.

Learning Outcomes
1. Describe basic features of a fixed-income security. Describe mechanisms available for issuing bonds in primary markets. Analyze repurchase agreements (repos) and the risks associated with them. Compute invoice prices, yields, spot rates, and forward rates. Compute PVBP, duration and convexity of a bond, duration of a portfolio of bonds. Construct the term-structure of interest rates, Yield curve strategies. Describe the process of calibrating a binomial interest rate tree to match a specific term structure. Explain the principles underlying, and factors that influence, the market's pricing of CDS. Explain and execute interest rate swaps.

BFIN 555. Derivative Markets and Securities
3 Credits (3)
Institutional aspects of derivative markets and the arbitrage based pricing of derivative instruments such as stock options, interest rate options, future contracts and swaps. The applied component of the course demonstrates use of these instruments as hedge and/or investment vehicles. Same as BFIN 455 with differentiated assignments for graduated students. For Graduate students only.

Learning Outcomes
1. Define forward contracts, futures contracts, options (call and puts), swaps, and credit derivatives and compare their basic characteristics. Determine the value at expiration and profit from a long or a short position in a call or put option, or combinations such as straddles, covered calls, spreads, put-call parity etc. Explain how the concepts of arbitrage, replication, and risk neutrality are used in pricing derivatives. Explain how the value of an option is determined using a multiperiod-period binomial model. Describe how the Black-Scholes-Merton model is used to value European options on equities. Interpret each of the option Greeks. Describe how a delta hedge is executed. Define implied volatility and explain how it is used in options trading. Describe a futures contract: long and short positions, hedging, basis risk, and hedge ratios.

BFIN 575. International Managerial Finance
3 Credits (3)
International aspects of financial transactions, decision-making, banking and financial markets. For Graduate students only.

Learning Outcomes
1. Explain and evaluate how the globalization process moves a business from a purely domestic focus in its financial relationships and composition to one truly global in scope. Describe what three major corporate currency exposure arises from multinational business. Define and explain the terms that are used in reference to exchange rates and currency regimes in addition to analyzing the characteristics of an ideal currency. Explain how nations measure their own level of international economic activity and how that is measured by the balance of payments. Show how interest rates and inflation affect each country and currency. Identify the forms of currency quotations used by currency dealers, financial institutions, and agents of all kinds when conducting foreign exchange transactions. Distinguish between spot, forward, swaps, and other types of foreign exchange financial instruments as well as foreign currency futures and options contracts. Demonstrate how both the diversifiable and non-diversifiable risks of an investor's portfolio may be reduced through international diversification. Evaluate the various internal and external sources of funds available for the financing of foreign subsidiaries.

BFIN 581. Management of Financial Institutions
3 Credits (3)
Asset and liability management of financial institutions; emphasis on commercial bank management. For Graduate students only.

Learning Outcomes

BFIN 590. Selected Topics
1-3 Credits (1-3)
Current topics in finance. Taught with BFIN 490 with differentiated assignments for graduate students. Consent of instructor required.

BFIN 598. Special Research Programs
1-3 Credits
Directed individual reading or research.
Prerequisite: consent of instructor.

Name: Ken Martin
Office Location: Business Complex, Room 215
Finance - Bachelor of Business Administration

Finance is the crossroads of economics, strategy and accounting, and the study of how firms and individuals allocate resources over time and under uncertain conditions. The finance curriculum provides a core foundation in corporate finance, investments, and financial institutions. The theory and concepts are then applied to problem-solving in a variety of areas including financial markets and institutions, corporate finance, international financial management, stock valuation and portfolio allocation, fixed-income markets, derivatives, risk management and insurance, and entrepreneurial finance.

Courses in the BBA in Finance are organized into four concentrations: Financial Analyst, Banking and Financial Planning, Risk Management and Insurance, and Entrepreneurial Finance. Students may pursue one or more concentrations. If a student chooses not to pursue a concentration, they may select four courses from any concentration or any BFIN prefix above BFIN 310.

Requirements

Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses. At least twelve of the credits for the major must be completed at NMSU.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Total Credits**

1. Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

2. See the General Education (p. 123) section of the catalog for a full list of courses.

3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.

4. For more information on concentrations see the pages below:  
   - Banking and Financial Planning (p. 1164)  
   - Entrepreneurial Finance (p. 1166)  
   - Financial Analyst (p. 1168)  
   - Risk Management and Insurance (p. 1171)

5. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Every candidate for this major must fulfill the general education common core (p. 123), College of Business foundation and business core (p. 1087), Viewing a Wider World (p. 123) requirements and general electives, in addition to the requirement for the major. Given below is a suggested study plan for a student pursuing a Finance major. If a student chooses to pursue one or more than one concentration, they should choose the electives that pertain to the concentration. If students choose not to pursue a concentration, they may take courses from any concentration or from any BFIN prefix above BFIN 310.

**A Suggested Plan of Study for Students**

1. Students may be required to take MATH 1215 Intermediate Algebra depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

2. See the General Education (p. 123) section of the catalog for a full list of courses.

3. See the Viewing A Wider World (p. 130) section of the catalog for a full list of courses.
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Every candidate for this major must fulfill the general education (p. 123), College of Business foundation and business core (p. 1087), Viewing a Wider World (p. 130) requirements and general electives, in addition to the requirement for the major. Given below is a suggested study plan for a student pursuing a Finance major. If a student chooses to pursue one or more than one concentration, they should choose the electives that pertain to the concentration. If students choose not to pursue a concentration, they may take courses from any concentration or from any BFIN prefix above BFIN 310.

**Finance (Entrepreneurial Finance) - Bachelor of Business Administration**

Finance is the crossroads of economics, strategy and accounting, and the study of how firms and individuals allocate resources over time and under uncertain conditions. The finance curriculum provides a core foundation in corporate finance, investments, and financial institutions. The theory and concepts are then applied to problem-solving in a variety of areas including financial markets and institutions, corporate finance, international financial management, stock valuation and portfolio allocation, fixed-income markets, derivatives, risk management and insurance, and entrepreneurial finance.

Courses in the BBA in Finance are organized into four concentrations: Financial Analyst, Banking and Financial Planning, Risk Management and Insurance, and Entrepreneurial Finance. Students may pursue one or more concentrations. If a student chooses not to pursue a concentration, they may select four courses from any concentration or any BFIN prefix above BFIN 310.

**Requirements**

Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses. At least twelve of the credits for the major must be completed at NMSU.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Business Law - Undergraduate Minor**

In a world that is increasingly subject to laws and regulations, every business needs employees who are savvy about the laws that affect business. The Business Law minor is comprised of a series of courses designed to provide a strong background in a wide range of laws that business needs to be aware of, and provide students with the ability to recognize – and avoid – legal pitfalls. Additionally, the Business Law minor will provide students with a clear understanding of how legal disputes are resolved and the ability to appreciate the cost and complexity of disputes, and enable students to reduce the costs and complexities by being able to communicate clearly with lawyers about the legal issues.

**Requirements**

Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses. At least twelve of the credits for the minor must be completed at NMSU. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies. Students interested in pursuing this minor should contact the Finance Department Head in BC 221 (https://maps.nmsu.edu/building_info/327/).

**Prefix** | **Title** | **Credits**

Entrepreneurship and Innovation (Business Cluster) - Undergraduate Minor

The Entrepreneurship and Innovation minor is designed to promote entrepreneurship to students across the NMSU campus. This minor will appeal to creative and ambitious students who envision launching and managing their own business or entering careers in innovation-driven fields. The flexible design allows students to complete a designated, approved cluster of related courses that provide a discipline-specific entrepreneurial flavor. Such clusters are under development.

Requirements

Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses. At least twelve of the credits for the minor must be completed at NMSU. This minor is not open to students in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Finance - Undergraduate Minor

The minor in Finance, available to students in most majors (business and non-business), affords students the opportunity to select their minor courses to provide a focus on any one of several sub-specialties within the field of Finance. Faculty advisors in the department can assist students in selecting their Finance electives to provide a focus in financial management, financial planning, or investments. (This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.)

Requirements

Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses and a minimum cumulative GPA of 2.0 in the BFIN courses. At least twelve credits for the minor must be completed at NMSU.

Management

Undergraduate Program Information

The major in general business is based on a broad range of course options rather than a narrow focus on a single discipline. Graduates find careers in large and small businesses, in government agencies and in the nonprofit sector. The general business major is well suited to the part-time and working student because it allows the student to select courses that will better meet their individual schedule. The entrepreneurship concentration is ideal for a student interested in starting or acquiring a small business or entering a family business upon graduation. The curriculum provides a focus on small and new enterprises, thus reflecting the entrepreneurial nature of contemporary business in the U.S.

The Department of Management invites you to consider a major in management. Do you like to work with people? Need help solving people problems at work? Hope to start your own business? Want to run an environmental project, or a bank, a store, a farm or a government agency? Are you interested in how people from diverse backgrounds work together to achieve common goals? If you answered yes to any of these questions, you should consider a major in management. The mission of the department is to prepare graduates, with a Bachelor of Business Administration, for management careers in a broad spectrum of New Mexico, national and globally oriented businesses. Management graduates work in small and large agricultural, manufacturing, government, transportation, public utility, merchandising, health care, environmental and communications organizations among others.

The study of management offers the opportunity to develop skills in utilizing human, physical and economic resources to achieve organizational objectives. These are important cross-functional skills in today’s competitive job market. Students will acquire the skills and knowledge to develop their potential and to lead others in a common mission. Management majors may choose from program concentrations in human resource management, project and supply chain management or small business management and entrepreneurship.

Degrees for the Department

General Business - Bachelor of Business Administration (p. 1180)

General Business (Entrepreneurship) - Bachelor of Business Administration (p. 1187)

Management (Human Resource Management) - Bachelor of Business Administration (p. 1190)

Management (Project & Supply Chain Management) - Bachelor of Business Administration (p. 1193)

Management (Small Business Management & Entrepreneurship) - Bachelor of Business Administration (p. 1196)

Minors for the Department

Management - Undergraduate Minor (p. 1199)

Sustainability - Undergraduate Minor (p. 1199)

Carlo A. Mora-Monge, Department Head

Professors Bishop, Hoffman, Jun; Associate Professors Flinchbaugh, Brewer; Assistant Professors Pimentel

Management Courses

MGMT 2110. Principles of Management
3 Credits (3)
An introduction to the basic theory of management including the functions of planning, organizing, staffing, leading, and controlling; while considering management’s ethical and social responsibilities.

Learning Outcomes
1. Explain the major functions of management including planning, organizing, communications, controlling, motivating, leading, and staffing.
2. Recognize major developments in the history of management thought.
3. Describe the basic managerial processes including decision-
4. making and other key skills necessary for managers to perform their roles.
5. Identify an organization’s stakeholders and the importance of social and ethical responsibility of managers.
6. Explain the formulation and implementation of strategic planning, including the relationship between goals, plans, vision statements, and mission statements.
7. Describe the strategies managers use to help organizations adapt to changing internal and external environments.
8. Explain organizational change, forces for change, sources of resistance to change, and the techniques managers can use to implement and facilitate change.
MGMT 309. Human Behavior in Organizations
3 Credits (3)
Interpersonal and organizational behavior, motivation, communication, team building, leadership, diversity management, legal and ethical issues, and politics in organizations. Credit may not be earned for both MGMT 309 and MGMT 315V.

MGMT 310V. Entrepreneurial Mindset
3 Credits (3)
This course provides the opportunity to learn to think like an entrepreneur in the broader context of social entrepreneurship, intrapreneurship, creative problem solving, opportunity recognition, and innovation.

MGMT 332. Human Resources Management
3 Credits (3)
Survey course in human resources management. Includes recruitment, selection, equal employment opportunity, performance appraisal, training, compensation, safety, and union-management relations.

MGMT 333. Training and Development
3 Credits (3)
Training and development of human resources, including training needs assessment, training approaches and techniques, and evaluation of training effectiveness.

MGMT 335V. Business and Government
3 Credits (3)
Crosslisted with: ECON 335G

MGMT 344. Production and Operations Management
3 Credits (3)
Management of physical and human resources; management information systems in operations; applications in various organizations.
Prerequisite: MATH 1350G or A ST 311; and BCIS 338 or BCIS 350.

MGMT 347. Management Functions and Processes
3 Credits (3)
Planning, organizing, directing, and controlling operating units in an organization. Applications to a variety of types of organizations.

MGMT 351. Supply Chain Management
3 Credits (3)
Acquisition and control and delivery of materials, parts, equipment, and services for end use in the organization. Applications to service and manufacturing industries, nonprofit, and governmental institutions.

MGMT 356. Small Business Management
3 Credits (3)
Principles and practice of managing a small enterprise with emphasis on growth and performance.

MGMT 375V. Global Environmental Assessment and Management
3 Credits (3)
Examines the principles of environmental assessment and management. Topics include global environmental concerns, industrial environmental management, life cycle assessment, system analysis, process improvement, and sustainable development, among others.

MGMT 388V. Leadership and Ethics
3 Credits (3)
Exploration of the multifaceted nature of leadership and principal-based ethics in modern society through readings and seminar discussion. May be repeated up to 3 credits.

MGMT 391. Management Internship and Cooperative Education I
1-3 Credits
Application of management skills to the work environment. Open only to students majoring or minoring in management. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not by the work experience. May be repeated for a maximum of 3 credits. Restricted to majors and minors.
Prerequisites: MGMT 309 and consent of instructor.

MGMT 448. Small Business Consulting
3 Credits (3)
Study analysis and presentation of recommendations for solving significant problems confronting small businesses.
Prerequisite(s): Senior standing or consent of instructor.

MGMT 449. Strategic Management
3 Credits (3)
Integrative approach to envisioning the future and shaping strategies for business success.
Prerequisite(s): BCIS 338 or BCIS 350; BLAW 316; BFIN 341; MGMT 309; MKTG 303; and one of the following: MGMT 344 or MGMT 470 or BCIS 485.
MGMT 451. Selection, Placement, and Performance Evaluation
3 Credits (3)
Staffing processes for organizations and the evaluation of employee performance. Use of selection methods and measurement of work behavior.

MGMT 453. Leadership and Motivation
3 Credits (3)
Theories of leadership and motivation. Motivational programs for complex organizations. Relationships between organizational power, authority, and management styles. Crosslisted with: IE 453

MGMT 454. Work Teams in Organizations
3 Credits (3)
Theories of small groups and their application to the work situation. Why and how groups form, grow, communicate, and maintain themselves. 
Prerequisites: senior or above standing.

MGMT 458. Comparative International Management
3 Credits (3)
Cultural influences on management are examined in a global business environment with a particular emphasis on human behavior in multinational organizations and the management of human resources. Same as IE 458.

MGMT 460. Compensation Management
3 Credits (3)
An overview of wage and salary administration, including job evaluation, wage and salary surveys, program administration, legal aspects of pay systems, and benefits administration. 
Prerequisite(s): MGMT 332 or consent of instructor.

MGMT 461. Seminar in Entrepreneurship
3 Credits (3)
For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Crosslisted with: MKTG 461.
Prerequisite(s): Senior standing or consent of instructor.

MGMT 465. Contemporary Issues in Human Resources Management
3 Credits (3)
Integrative course in human resources management, emphasizing the application of advanced concepts to complex personnel cases. 
Prerequisite: MGMT 332.

MGMT 470. Project Management in Organizations
3 Credits (3)
Roles, responsibilities, and techniques of project managers in managing projects effectively. Preparation for professional certification.

MGMT 490. Selected Topics
1-18 Credits (1-18)
Seminars in selected current topics in the various areas of management and administration. Prerequisites vary according to the seminar being offered.

MGMT 491. Management Internship and Cooperative Education II
1-3 Credits
Covers the application of management skills to the work environment. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not be the work experience. May be repeated for a maximum of 3 credits. Restricted to majors and minors.
Prerequisite: MGMT 309 and consent of instructor.

MGMT 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned. 
Prerequisites: junior or above standing and consent of instructor.

MGMT 502. Operations Management
3 Credits (3)
Systems and specialized models applied to the management of production facilities and service operations, including physical and human resources. 
Prerequisite(s): Graduate students only.

MGMT 503. Organizational Behavior and Management Processes
3 Credits (3)
Covers the theory and practice related to the successful management of human resources in organizations operating within a dynamic global environment. Course goals include developing alternative frameworks for analyzing issues related to human behavior, management science, and organizational structure and theory. 
Prerequisite: graduate students only.
MGMT 512. Quantitative Analysis for Business Decisions
3 Credits (3)
Identification, collection, and analysis of an organization’s data both internal and external, and use of the resultant information in managerial decision making.
Prerequisite: graduate students only.

MGMT 527. Negotiation and Business Dispute Resolution
3 Credits (3)
Same as BLAW 527.

MGMT 548. Small Business Consulting
3 Credits (3)
Study, analysis, and presentation of recommendations for solving significant problems confronting small businesses. Same as MGMT 448 with differentiated assignments for graduate students.
Prerequisite(s): Graduate standing.

MGMT 590. Strategic Management
3 Credits (3)
Covers the integration of functional, human, technological, and environmental aspects of business within the framework of management policy and strategy formulation. Formulate, implement, evaluate and control the various functions of the organization from a systems perspective. Understand the external environment and its impact on the organization. Restricted to majors.
Prerequisite: M.B.A. student in his or her final semester.

MGMT 591. Seminar in Entrepreneurship
3 Credits (3)
For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Same as MGT 461 with differentiated assignments for graduate students. Crosslisted with: MKTG 591.
Prerequisite(s): Graduate standing.

MGMT 598. Special Research Programs
1-3 Credits
Individual investigations either analytical or experimental. A maximum of 6 credits may be earned.
Prerequisite: consent of instructor.

MGMT 600. Doctoral Research
1-15 Credits
This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination. Restricted to management majors.

MGMT 601. Research in Management
1 Credit (1)
Ph.D. course provides opportunities for significant interaction between Management faculty and Management Ph.D. students. The course also provides opportunities for development of professional scholarly standards, ethics, and critiques, as well as insight into current research areas and topics supported by the Management Department and other relevant disciplinary areas. May be repeated for a maximum of 6 credits. Restricted to Ph.D. students. Graded S/U.

MGMT 640. Instructional Development for Teaching Business
3 Credits (3)
Pedagogical issues and techniques in collegiate business education. Includes course and curriculum development, outcomes assessment, class management, and teaching techniques. Practical issues faced in college instruction. Restricted to doctoral students.

MGMT 645. Seminar in Human Resources Management
3 Credits (3)
Seminar will address current issues in human resources management. Focus on research related to the selection, development, and effective use of human resources. Restricted to doctoral students.

MGMT 650. Seminar in Organizational Behavior
3 Credits (3)
Seminar will include specific organizational behavior topics; motivation, leadership, group and inter-group relations, and attitude theory. Focus on current research and theory. Restricted to doctoral students.

MGMT 655. Seminar in Organizational Systems and Theory
3 Credits (3)
Analysis of organizations from a macro perspective. Topics include organizational theory, organizational design, organizational environment, and sociotechnical systems. Restricted to doctoral students.
**MGMT 660. Research Design and Methodology**  
3 Credits (3)  
Topics will include philosophy of science, theory building, and research methods applicable to the study of organizational behavior. Restricted to doctoral students.

**MGMT 661. Qualitative Research Methods**  
3 Credits (3)  
In-depth coverage of selected topics in research methodology, including theory and logic of scientific investigation, grounded theory, action research, and ethnomethodology. Restricted to doctoral students.

**MGMT 670. Seminar in Operations Management**  
3 Credits (3)  
Seminar examines the major problem areas, research findings, and research methodologies of operations management. Focus on the critical evaluation of current theory and methodology.  
**Prerequisite(s):** Restricted to Doctoral students.

**MGMT 675. Seminar in Strategic Management**  
3 Credits (3)  
Survey of current and classical readings in strategy. Introduces the doctoral level student to strategic issues, strategic topics for research, and publication venues. Restricted to doctoral students.

**MGMT 685. Story Consulting to Organizations**  
3 Credits (3)  
Apply various qualitative story and narrative research methods (plot analysis, script analysis, life history, and restoring) to action research consulting project. Students will conduct story assessment and (propose or enact)intervention with a local consenting organization. Restricted to doctoral students.

**MGMT 690. Special Topics**  
3 Credits (3)  
Seminars in selected current topics in the various areas of management. May be repeated for unlimited credit. Restricted to doctoral students.  
**Prerequisite(s):** Vary according to seminar being offered.

**MGMT 698. Special Topics**  
1-3 Credits  
**Prerequisite:** consent of instructor.

**MGMT 700. Doctoral Dissertation**  
15 Credits  
**Prerequisite:** advancement to candidacy.

1. Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.
2. See the General Education (p. 123) Section of the catalog for a full list of courses
3. See the Viewing a Wider World (p. 130) Section of the catalog for a full list of courses
No more than 9 credits may be taken in any one prefix
- Accounting (ACCT)
- Business Administration (BA)
- Business Computer Information Systems (BCIS)
- Business Law (BLAW)
- Economics (ECON)
- Entrepreneurship (ENTR)
- Finance (FIN)
- International Business (IB)
- Management (MGT)
- Marketing (MKTG)

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Note: The general business option is offered through a 2+2 Online Distance Education Degree Completion Program as well. Program information is available on the College of Business website: http://business.nmsu.edu/academics/undergraduate/online-programs

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Electives, to bring the total credits to 120

| Total Credits | 120 |

1. Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

2. See the General Education (p. 123) Section of the catalog for a full list of courses.

3. See the Viewing a Wider World (p. 130) Section of the catalog for a full list of courses.

4. No more than 9 credits may be taken in any one prefix:
   - Accounting (ACCT)
   - Business Administration (BA)
   - Business Computer Information Systems (BCIS)
   - Business Law (BLAW)
   - Economics (ECON)
   - Entrepreneurship (ENTR)
   - Finance (FIN)
   - International Business (IB)
   - Management (MGT)
   - Marketing (MKTG)

5. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Note: The general business option is offered through a 2+2 Online Distance Education Degree Completion Program as well. Program information is available on the College of Business website: http://business.nmsu.edu/academics/undergraduate/online-programs (https://business.nmsu.edu/academics/undergraduate/online-programs/)

1. Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

2. See the General Education (p. 123) Section of the catalog for a full list of courses.

3. See the Viewing a Wider World (p. 130) Section of the catalog for a full list of courses.

4. Of the remaining 12 credits for the entrepreneurship concentration, no more than 9 credits may be taken in any one prefix:
   - Accounting (ACCT)
   - Business Administration (B A)
   - Business Computer Information Systems (BCIS)
   - Business Law (BLAW)
   - Economics (ECON)
   - Entrepreneurship (ENTR)
   - Finance (FIN)
   - International Business (I B)
   - Management (MGT)
   - Marketing (MKTG)

5. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

---

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Management (Human Resource Management) - Bachelor of Business Administration

Every candidate for this major must fulfill the following requirements in addition to the general education common core, College of Business foundation and the business core, Viewing a Wider World requirements and general electives. Students will choose one or more of the four options that follow.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

### Departmental/College Requirements

#### Foundation Requirements

Choose one from the following (grade of C- or better required):

- MATH 1350G Introduction to Statistics (Foundation Requirement)
- A ST 311 Statistical Applications (Foundation Requirement - doesn't count as Gen.Ed)

**3**

#### Business Core: Lower Division (minimum grades of C- required)

- ACCT 2110 Principles of Accounting I (not recommended for freshman year) **3**
- ACCT 2120 Principles of Accounting II **3**
- BCIS 1110 Introduction to Information Systems **3**
- BUSA 1110 Intro to Business **3**

**Business Core: Upper Division**

- BCIS 338 Business Information Systems I **3**
- BLAW 316 Legal Environment of Business **3**
- BFIN 341 Financial Analysis and Markets **3**
- MGMT 309 Human Behavior in Organizations **3**
- MGMT 449 Strategic Management **3**
- MKTG 303 Principles of Marketing **3**
- BCIS 485 Enterprise Resource Planning (counts as a major course also) **3**

#### Upper division Economics or Applied Statistics elective from the following prefixes: A ST (excluding A ST 311), ECON **3**

#### Upper Division Business elective from the following prefixes: A ST, ACCT, B A, BCIS, BLAW, ECON, ENTR, BFIN, I B, MGMT, MKTG (excluding A ST 311) **3**

#### Business Core: Upper Division Electives

- MGMT 332 Human Resources Management **3**
- MGMT 344 Production and Operations Management **3**
- MGMT 351 Supply Chain Management **3**
- BCIS 461 Business Analytics I **3**
- MGMT 470 Project Management in Organizations **3**

#### MGMT Upper Division Electives

**9**

#### Second Language: (not required)

**16**

**Total Credits** 120

---

1. Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

2. See the General Education (p. 123) section of the catalog for a full list of courses.

3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses and how to fulfill this requirement.

4. All Foundation Requirement Courses must be taken, or satisfied with transfer credits, regardless of which Mathematics or Statistics course satisfies the Area II General Education course: MATH 1220G, MATH 1430G and MATH 1350G or A ST 311 must be completed.

5. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

#### First Year

<td>18</td>
</tr>
</tbody>
</table>

1 One 3-credit upper division course in the College of Business may substitute for one of the required five management courses.

At least 12 credits for the minor must be completed at NMSU. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

To obtain a Management minor, a grade of C- or better must be attained in the courses required.

Sustainability - Undergraduate Minor

Students must complete 18 credits for the minor, nine credits of which must be upper division courses, and at least 12 credits of which must be completed at NMSU. A 2.0 GPA or better is required in the courses completed in fulfillment of the minor. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

| Thesis Statement |

These courses have prerequisites and it is the student's responsibility for checking and fulfilling all course prerequisites listed for these courses.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis, and students should discuss elective requirements with their advisor.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. However, students may end up needing to complete more or less on a case-by-case basis, and students should discuss elective requirements with their advisor.

See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
**Marketing**

**Undergraduate Program Information**

Marketing majors learn skills and knowledge relevant to the co-creation of goods, services, and ideas that uniquely meet the needs and wants of global customer markets and society at large. Career opportunities exist in marketing management, advertising, market research, promotion management, sales and sales management, social media, distribution management, and retailing. The major is designed to allow a great deal of choice so students may emphasize any combinations of these areas.

Most marketing majors enter into careers in business firms, although some find job opportunities in governmental and other nonprofit organizations. Still others become involved in owning and managing their own companies. Opportunities in entrepreneurship and small business are expanding at a rapid pace.

**Graduate Program Information**

The College offers a program leading to a Ph.D. degree (Doctor of Philosophy in Business Administration) (p. 1125). The faculty of the Ph.D. Program in Business Administration is committed to training researchers and educators who will shape business scholarship, practice, and pedagogy. The program emphasizes preparing candidates to understand the complexities of modern business while they develop a specialized area of expertise in marketing or management. The Ph.D. in Business Administration provides graduates with the opportunity to pursue a variety of career paths within academia and within industry. Currently a concentration is offered in marketing.

**Degrees for the Department**

Marketing - Bachelor of Business Administration (p. 1208)
Marketing - Bachelor of Business Administration (Online) (p. 1211)
Marketing (PGA Golf Management) - Bachelor of Business Administration (p. 1214)

**Minors for the Department**

Advertising - Undergraduate Minor (p. 1215)
Marketing - Undergraduate Minor (p. 1215)
Professional Selling - Undergraduate Minor (p. 1216)
Sports Marketing - Undergraduate Minor (p. 1216)

**Professor, David Daniel, Department Head**

Professors Hyman, Jasso; Associate Professor Niculescu; Assistant Professors Gazzoli, You, Zhu; College Professors Blaugrund, Gavin; College Assistant Professor Holguin; Emeritus Professor Sautter

**Marketing Courses**

MKTG 1210. Advertising
3 Credits (3)
A survey of currently available advertising media. A psychological approach to consumer persuasion; applied techniques in media selection, layout mechanics, production methods, and campaign structures.
Prerequisite: MKTG 2110.

**Learning Outcomes**

1. Define advertising and the relevant application of psychology in delivering the message. Explain the importance of various advertising media in the marketing mix. Identify and explain the social, ethical and legal issues advertisers must consider. Describe the significance of the marketing function in business. Explain the importance of advertising and other marketing communication tools. Demonstrate application of the planning process as it applies to marketing and advertising. Describe the factors that are weighted when considering the use of radio and television in the creative advertising mix. Describe the relationship between market segment, consumer behavior and selection of advertising campaign types. List the alternative means of reaching a target market and the technical challenges of each.
MKTG 1220. Small Business Marketing
3 Credits (3)
An overview of public relations principles, practices and purposes as applied to small business. Topics include basics of news release writing, media awareness, development and maintenance of a positive public image, branding, ethical marketing, and the relationships of public relations with advertising and marketing. Methods and practices used in small business are explored.
Prerequisite: MKTG 2110.
Learning Outcomes
1. Explain the importance of creating and sustaining a positive public awareness and image. Identify public relations practices as they relate to the management and marketing processes. Define branding and discuss its importance for small business. Describe the value of business event management and promotion for small business. Discuss how media relations, public relations, advertising and marketing efforts are interrelated and the importance of each.

MKTG 180. Level 1, PGA’s PGM Education Program (Part 1)
3 Credits (3)
Level 1 Part 1 of the PGA PGM Education Program. Introduction to the Policies and Procedures of the PGA Golf Mgt. Program and the PGA of America. Students will complete the PGA Qualifying Level, Facility Management 1A (Tournament Ops A, Rules of Golf B, and Career Enhancement B), and the corresponding Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

MKTG 181. Level 1, PGA’s PGM Education Program (Part 2)
3 Credits (3)
Level 1 Part 2 of the PGA PGM Education Program. This class will focus on Teaching and Coaching 1, the corresponding PGA Work Experience Activities, and PGA Teaching Seminars. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.
Learning Outcomes
1. Know how students learn and process golf knowledge and skills, and identify the implications for teaching Know how to define and distinguish between learning and performance Understand how juniors learn golf knowledge and skills, and identify implications for teaching Conduct a physical evaluation of a junior golfer and create developmentally appropriate exercise and training programs Establish student/teacher relationships that promote greater student learning and enjoyment Develop a communication style that fits the student and increases instructional effectiveness Analyze student’s instructional needs and set clear, purposeful learning and practice goals Know the format for an effective golf lesson Deliver effective explanations and demonstrations during a golf lesson 1Engage in self-assessment of teaching skills and competencies 1Recognize the appropriate clubhead path and clubface position information to improve a golfer’s performance 1Conduct appropriate assessments to determine the short game skill level of the golfer 1Gain understanding of the short game elements to help lower scores and improve the player’s performance 1Define club performance terms and specifications, including lie angle and clubface angle or position, and describe their effect on ball flight and player performance 1Define club performance terms and specifications, including lie angle and clubface angle or position, and describe their effect on ball flight and player performance: Observe a player’s swinging motion, ball flight, and equipment to evaluate the effectiveness of their equipment

MKTG 2110. Principles of Marketing
3 Credits (3)
Survey of modern marketing concepts and practices focusing on the marketing mix: product, pricing, promotion, and distribution strategies. Topics include: the marketing environment, consumer behavior, marketing research, target marketing, and the ethical and social responsibilities of marketers. May be repeated up to 3 credits.
Prerequisite(s): BUSA 1110.
Learning Outcomes
1. Describe the professional, ethical, and social responsibilities of marketers.
2. Explain the role of the product in the marketing mix, including the product life cycle, the relevance of product innovation, and product classifications.
3. Illustrate the role of promotion in the marketing mix, including the communication process and the promotional mix.
4. Explain the role of price in the marketing mix, including pricing objectives, pricing policies, and pricing methods.
5. Describe the operation of channels of distribution and supply chains, including functions of intermediaries and degrees of coverage.
6. Define the concepts of target markets and market segmentation with respect to elements of the marketing mix.
7. Explain the importance of market research and information systems in supporting marketing decision making.
8. Describe the dynamic environment(s) in which marketing decisions must be made.
MKTG 2220. Digital Marketing
3 Credits (3)
This course focuses on planning to create and market a website. Internal marketing topics such as registering with search engines, increasing traffic, segmenting and targeting markets, establishing an online presence, developing a marketing plan and reshaping business for the Web market are covered.
Prerequisite: MKTG 2110.
Learning Outcomes
1. Describe how search engines work. (Use knowledge to make recommendations to a website on how it can improve its organic search rankings - perform search engine optimization). Describe the various methods of online display advertising. Determine the appropriate key performance indicators (KPIs) for any type of website. Describe and implement best practices in marketing to a database of current and potential customers via email. Utilize knowledge of social media tactics to design an effective social media campaign. Implement online reputation management tactics to improve the online reputation of a brand. Develop and present a digital marketing plan for a small, local business.

MKTG 280. Level 1, PGA’s PGM Education Program (Part 3)
3 Credits (3)
Level 1 Part 3 of the PGA PGM Education Program. This class will focus on Facility Management 1B (Business Planning A, Customer Relations A, Golf Car A, Merchandising A, Turfgrass A), Level 1 Checkpoint Exams, and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

MKTG 281. Level 2, PGA’s PGM Education Program (Part 1)
3 Credits (3)
Level 2 Part 1 of the PGA PGM Education Program. This class will focus on Teaching and Coaching 2, Teaching and Coaching Seminars, and the corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.
Learning Outcomes
1. Explain how students learn golf knowledge and skills, and identify the implications for teaching for golf skills 1Identify the effective practice techniques 1Explain how juniors learn golf knowledge and skills, and identify the implications for teaching 1Structure an effective golf lesson 1Analyze student’s instructional needs and set clear, purposeful learning and practice goals 1Deliver effective explanations and demonstrations during a golf lesson 1Engage in self-assessment of teaching skills and competencies 1Recognize and apply the appropriate clubhead path and clubface position information to improve a golfer’s performance 1Conduct appropriate assessments to determine the skill level of the golfer 1Demonstrate basic knowledge of anatomy and physiology, and conduct a physical observation to identify movement capabilities and limitations that may affect a golfer’s performance 1Define club performance terms and specifications, and describe their effect on ball flight and player performance

MKTG 303. Principles of Marketing
3 Credits (3)
Process, functions, and principles in the current marketing system.
Learning Outcomes
1. Understand primary and changing perspectives on marketing and strategic management. Understand the fundamental principles and theories of marketing. Develop the capacity to obtain and process relevant information and analytical skills. Evaluate the impact of interactive media on marketing management. Apply relevant marketing concepts and analytical tools, identify viable alternatives, make informed choices, and recommend marketing implementation plans. Develop skills in organizing more effective strategic marketing and in implementing the market planning process. Develop, evaluate, and implement marketing management strategies in complex environments through recent, popular case study analyses. Formulate marketing management strategies on critical issues, problems, and business opportunities. Broaden perspectives of ethics and social responsibility, keep abreast of global developments, and adapt to changing environments.

MKTG 305. Marketing and Food Agricultural Products
3 Credits (3)
This course provides a review of marketing principles and techniques used throughout the food and fiber supply chain. The course introduces a broad variety of marketing topics including marketing strategy, consumer behavior, market segmentation, market research, competitive analysis, and the marketing mix. The course serves as a foundation for advanced courses in agricultural marketing. May be repeated up to 3 credits. Crosslisted with: AEEC 305.
Prerequisite(s): ECON 1110G or ECON 2120G.
Learning Outcomes
1. Articulate how agricultural commodities move through the food and fiber supply chain. Understand the importance of strategic marketing and how organizations within the food and fiber supply chain identify consumers and their preferences. Understand key marketing concepts used by agribusiness marketers, including SWOT analysis, the marketing mix, advertising and public relations. Know the basic outline and components of a marketing plan.
MKTG 310. Marketing Research
3 Credits (3)
Design, collection analysis, and presentation of research data.
Prerequisite(s): MATH 1350G and MKTG 303 or consent of instructor.
Learning Outcomes
1. Translate a marketing problem into a feasible research question. Recognize marketing research as a process that involves a sequence of activities, each compatible with the preceding activities. Compare and contrast alternative research designs. Identify the sources of marketing information and the various means for gathering such information. Recognize the biases and limitations of marketing data and basic data analysis. Interpret univariate and basic bivariate data analysis techniques (i.e., should be able to decide when a technique is appropriate and recognize the managerial implications of analytical results). Design and execute a basic survey research project. Assess ethical issues associated with various research approaches.

MKTG 311V. Consumer Behavior
3 Credits (3)
The different aspects of consumer behavior and the variables affecting consumer decisions. Analysis of current concepts and models.
Learning Outcomes
1. Know the consumer behavior concepts by integrating and adapting theories developed in disciplines such as psychology, sociology, anthropology, and economics. Use specific tools to tackle and analyze customer issues. Develop the ability to apply consumer behavior concepts from the perspective of marketing managers and public policy makers. Increase the awareness of and enhance the ability to make ethical decisions in consumer-related issues.

MKTG 311VH. Consumer Behavior Honors
3 Credits (3)
The different aspects of consumer behavior and the variables affecting consumer decisions. Analysis of current concepts and models. Same as MKTG 311V with differentiated assignments for honors students.
Prerequisite(s): 3.5 GPA or Higher.

MKTG 312. Personal Selling
3 Credits (3)
Implementation of the promotion process through interpersonal communications between salesperson and prospects. Serving customers by sales representatives.
Learning Outcomes
1. Demonstrate how personal selling can strategically enhance interpersonal communication skills, career management, personal productivity. Identify key issues and trends such as opportunities or threats, for evolving emerging sales approaches platforms.

MKTG 313. Retail Management
3 Credits (3)
Investigates retail business operations and focuses on the strategic profit model, store location, layout, display, merchandising, operations, and personnel.
Learning Outcomes
1. Analyze the role of retailing in society and basic retailing principles, ideas, and concepts as they relate to an understanding of our market-driven system. Compare and contrast segmentation and target market selection relative to a specific population product/service for different markets and retailing opportunities. Apply the concepts of the marketing mix to the formulation and evaluation of retailing strategies relative to particular target markets, environments (economic, technological and competitive), and desired positions in market places (both local and global). Areas to be addressed include communication strategy, branding, packaging, pricing, product/service design, methods of delivery and the product life cycle. Relate the concepts of marketing and retailing research, consumer behavior and strategy and their interrelationships. Compare and contrast analysis techniques and judgment that are useful to managers in acting with integrity to make decisions and taking action.

MKTG 314. Advertising Strategy
3 Credits (3)
Utilization of advertising as a business administration function; communication with consumers as a means of attaining marketing goals.
Learning Outcomes
1. Analyze advertising from a consumer perspective. Compare advertising strategy theories and concepts. Evaluate advertising critically and creatively.
MKTG 317. International Marketing
3 Credits (3)
Focuses on decisions relating to entering markets, market segmentation, marketing strategies, and tactics in the international arena. Same as I B 317.

Learning Outcomes
1. Develop understanding about what is involved in making international marketing decisions, including product, price, promotion, and place decisions to create a marketing mix. Acquire an overview on the contemporary issues in global marketing and the unique challenges faced by marketing managers in the dynamic global environment. Develop insights into how differences in global economic, cultural, social, political, and legal environments can affect marketing decisions. Develop strategic thinking in the context of complex problems and challenges faced by the contemporary global executives and managers. Develop ability to integrate the important global societal dimensions of diversity, environmental concerns, ethics, and technological change into their thinking. Develop knowledge and skills to analyze cross-cultural variables and their impact on international marketing. Discover sources of information for researching and evaluating international markets. Communicate effectively about marketing issues in group discussions, oral presentations and written reports. Work effectively as a team member in analyzing marketing issues. Develop leadership skills necessary to deal with the uncertainty and changes faced by today’s global marketers.

MKTG 324. Product/Service Development
3 Credits (3)
Covers product innovation, development, commercialization and resource recovery, price determination and administration strategies, and complementing planning processes.

Learning Outcomes
1. Understand the product/service development process. Identify market opportunities for new products. Use structured methods to evaluate and test product concepts. Apply tools learned in class to develop new products/services. Plan the launch of a product and evaluate its impact on the market. Efficiently work with and communicate ideas to team members.

MKTG 354. Sports Marketing
3 Credits (3)
The application of marketing concepts to the sports industry. Topics include fans/customers, products, and promotions across a range of sports.

Learning Outcomes
1. Discuss the domain of sports marketing Apply basic marketing tools (e.g., research, segmentation) to sports marketing contexts Recognize, evaluate, and accommodate the perspectives of participants and spectators as sports consumers Identify appropriate marketing mix options for sports products Appraise recent sports marketing trends Plan a career in sports marketing

MKTG 357. Internet and Social Media Marketing
3 Credits (3)
Focuses on the consumer psychology and marketing strategies at work in advertising and selling brands via the Internet and social media networks.

Learning Outcomes
1. Apply the concepts of the marketing mix to the formulation/evaluation of marketing strategies relative to Social Media policies that combine business objectives with appropriate use of Social Media channels and content. Compare and contrast the history of Social Media and recognize the various platforms of Social Media. Select/defend segmentation and target market selection relative to a specific population product/service that engages target audiences with a marketing message. Analyze business objectives and connect to appropriate Social Media tactics. Evaluate Social Media marketing content to shape the way we connect to and build relationships with users, consumers and businesses. Relate the concepts of marketing research to establish metrics for measuring Social Media marketing success.

MKTG 380. Level 2, PGA’s PGM Education Program (Part 2)
3 Credits (3)
Level 2 Part 2 of the PGA PGM Education Program. This class will focus on Facility Management 2 and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management majors.

Learning Outcomes
1. Define the business at the facility level in terms of vision, core values, facility characteristics and mission. Utilize the four Interaction Strategies in a variety of routine and challenging customer situations. Identify core business areas that support a customer-focused environment Know the characteristics of a merchandising operation that align with a facility’s business plan Understand how to define, assess, and develop tournament business at a facility.
MKTG 381. Level 3, PGA's PGM Education Program (Part 1)

3 Credits (3)
Level 3 Part 1 of the PGA’s PGM Education Program. This class will focus on Teaching and Coaching 3, Teaching and Coaching Seminars, and the corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management

Learning Outcomes
1. Explain how various types of feedback function to influence learning Define the major variables that influence learning and explain how they operate with implications for practice, learning, and teaching Provide effective instructional feedback after students’ practice and performance Explain how the form, precision, timing, frequency, and regulation of augmented feedback influence learning with implications for teaching and practice conditions Explain how the key practice factors influence learning with implication for designing practice conditions Establish relationships that promote greater student learning and enjoyment Plan long-term developmental programs for beginning and intermediate players Communicate effectively with students Develop a communication style that increases instructional effectiveness 1 Effectively determine and assign the appropriate drill or drill with an aid to improve the swing shape of the golfer 1 Use relevant technology to promote student learning 1 Effectively demonstrate and apply the appropriate specialty shot information to the benefit of the golfer 1 Demonstrate basic knowledge of current swing methodologies of noted instructors 1 Physical development of junior golfers 1 Assess the physical capabilities of adult golfer, describe implications for performance, and provide potential physical adjustments 1 Describe how to use bench, tools, and technologies for measuring and altering club performance 1 Perform analyses and make appropriate alterations to change ball flight, players performance, and teacher effectiveness

MKTG 400. Marketing Internship/Field Experience

3 Credits (3)
Internship of field experience in application of marketing principles. The student must accept an internship before being allowed to enroll in the course. Consent of instructor required. Restricted to MKTG majors.

MKTG 405. Negotiations in Marketing

3 Credits (3)
Negotiations in Marketing is designed to introduce and explore the major concepts and theories surrounding bargaining and negotiation strategies in marketing. Additionally, the course gives practical hands-on experience in negotiating, through a range of applied negotiations exercises and activities.

Prerequisite(s): MKTG 303.

MKTG 449. Promotion Management

3 Credits (3)
Covers concepts and problems in the use of advertising, internet marketing, social media marketing, personal selling, publicity, and other forms of promotion; planning, coordination, control, and evaluation of effectiveness.

Learning Outcomes
1. Analyze the role of advertising and promotion in society and basic marketing principles, ideas, and concepts as they relate to an understanding of our market-driven system Compare and contrast segmentation and target market selection relative to a specific population product/service for different markets and promotional opportunities Apply the concepts of the marketing mix to the formulation and evaluation of promotional strategies relative to particular target markets, environments (economic, technological and competitive), and desired positions in market places (both local and global) Areas to be addressed include communication strategy, branding, pricing, product/service design, and e-commerce Relate the concepts of marketing and advertising research, consumer behavior and strategy and their interrelationships Compare and contrast analysis techniques and judgment that are useful to managers in acting with integrity to make decisions and taking action in the promotional environment

MKTG 451. Food and Agribusiness Market Assessment

3 Credits (3)
This course is an application course in which self-managed teams develop and present marketing plans for agribusiness firms. Emphasis on integrating the marketing mix, particularly promotional elements. May be repeated up to 3 credits. Crosslisted with: AEEC 451.

Prerequisite(s): AEEC 305 or MKTG 305 or consent of instructor.

Learning Outcomes
1. Identify, organize ad conduct market research specific to the project Develop an understanding of primary and secondary research collection and analysis Exhibit enhanced relationship management, communication skills, and team building Develop written communication with final deliverable for implementation into the business world
MKTG 453. Sales Management
3 Credits (3)
The nature of the sales management function in industry. Focuses on intra and interdepartmental sales management activities.
Prerequisite: MKTG 312.
Learning Outcomes
1. Examined the linkage between personal selling, as a basket of activities, and the management of those marketing personnel who do selling (i.e., salespeople). Examined the role of the sales force in the achievement of a firm's marketing objectives. Undertaken numerous case-based analyses of typical sales management issues, including the hiring, firing, training, motivation, compensation, deployment, and evaluation of the firm's sales personnel. Developed decision-making skills and analytic capabilities in the development and management of both sales programs and salespeople.

MKTG 461. Seminar in Entrepreneurship
3 Credits (3)
For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business.
Crosslisted with: MGMT 461.
Prerequisite(s): Senior standing or consent of instructor.

MKTG 462. Advanced Sales
3 Credits (3)
Advanced instruction and skill development in interpersonal communication skills to broaden understanding of the professional sales role (especially in team selling situation), career management, personal productivity, negotiation, and coordination with other functional areas.
Prerequisite: MKTG 312.
Learning Outcomes
1. Students will learn "how" to sell (i.e., the behaviors and planning associated with selling today). Analyze the concept of what/how is perhaps equally important but not nearly as obvious, how and why buyers "buy". The course focus will be particularly on so-called "business-to-business" (B2B) sales jobs, as that is where many of the most interesting – and lucrative – sales positions reside.

MKTG 480. Level 3, PGA's PGM Education Program (Part 2)
3 Credits (3)
Level 3 Part 2 of the PGA's PGM Education Program. This class will focus on Facility Management 3, the Business Simulation Seminars, and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management Majors
Learning Outcomes
1. Assess the current state of the business by conducting a SWOT Analysis Describe the golf industry job market and the knowledge and skills required to succeed Identify areas where food services and golf operations should coordinate efforts Determine golf car needs in order to acquire a fleet that supports the facility's mission, customers, and physical characteristics Describe the organizational structure, key departments, reporting relationships, and job descriptions of a facility Utilize industry-proven pricing strategies to meet business objectives Describe the Performance System for supervising and delegating Describe practices that improve the golf course and protect the environment

MKTG 481. PGA Golf Management Final Experience
1 Credit (1)
The following are requirements for successful completion of this senior level PGA Golf Management capstone course: 16 months of internship, completion of the Qualifying Level, Level 1, Level 2, and Level 3 of the PGA's PGM Education Program and successful completion of the PGA's Playing Ability Test. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management majors.
Learning Outcomes
1. Describe the golf industry job market and the knowledge and skills required to succeed Access PGA employment resources and participate in professional growth and development

MKTG 489. Strategy and Policy
3 Credits (3)
Techniques and analysis of marketing strategy and policy planning and formulation. Senior standing or consent of instructor.
Prerequisite(s): MKTG 310.
Learning Outcomes
1. Relate marketing strategy to the environmental constraints and opportunities with which managers must deal Compare marketing strategy theories and concepts Evaluate appropriate strategic marketing decisions in various situations

MKTG 490. Selected Topics
1-18 Credits (1-18)
Covers materials and subjects not offered in regular Marketing courses. Students can take 18 credit hours of MKTG 490 if each class is a different subtitle. A maximum of 18 credit hours can be earned through MKTG 490.
MKTG 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.
Prerequisites: junior or above standing and consent of instructor.

MKTG 503. Marketing Management
3 Credits (3)
Analysis of marketing problems and the integration of organizational resources as well as behavioral and quantitative techniques into the development and implementation of solutions.

Learning Outcomes
1. Identify the fundamental principles and theories of marketing
   Outline primary and changing perspectives on marketing and strategic management
   Apply relevant marketing concepts and analytical tools
   Develop capacity to obtain and process relevant information with enhanced analytical skills
   Identify viable alternative to make informed choices and recommend marketing implementation plans
   Evaluate the impact of interactive media on marketing management
   Develop skills in organizing more effective strategic marketing and implementing the market planning process
   Practice implementing marketing management strategies in complex environments through case study analyses
   Formulate marketing management strategies on critical issues, problems, and business opportunities
   Synthesize perspectives of ethics and social responsibility in adapting to changing environments

MKTG 591. Seminar in Entrepreneurship
3 Credits (3)
For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business.
Same as MKTG 461 with differentiated assignments for graduate students. Crosslisted with: MGMT 591.
Prerequisite(s): Graduate standing.

MKTG 601. Marketing Management
3 Credits (3)
Covers the conceptual foundations of contemporary marketing management research, concepts, and literature. Fundamental to the understanding of contemporary marketing and the breadth of the field of marketing study.

Learning Outcomes
1. Identify the contemporary principles and theories of marketing strategy research
   Outline primary guidelines and trendy directions of marketing strategic research
   Improve theoretical foundation for research development in marketing strategy
   Develop capacity of analytical and quantitative skills required for empirics
   Apply relevant marketing theories, concepts and analytical methodology in research development
   Formulate research ideas pertinent to marketing strategies on critical issues, problems, and phenomena
   Practice complex research design, theoretical development and empirical operationalization
   Synthesize perspectives of ethics and social responsibility in scholarly research

MKTG 610. Marketing and the Scientific Method
3 Credits (3)
Issues related to the evolution of research philosophies and methodologies. Critical to the development of appreciation for the value of research and experimentation.

MKTG 620. Research- Theory Interface
3 Credits (3)
Theoretical and methodological issues involved in translating a theory into a research study. Prepares Ph.D. students to undertake dissertation research.
Consent of instructor required.

MKTG 625. Consumer Behavior
3 Credits (3)
Extensive reading of seminal and contemporary articles on consumer behavior and developing original research to explore cross-disciplinary issues relevant to the study of marketing.

MKTG 640. Measurement and Structural Equation Modeling
3 Credits (3)
Explores theories of measurement that underlie all quantitative analysis, including the use of structural equation models. Contrasts classical test theory with item response theory and generalizability theory. Covers PRELIS and LISREL, and critiquing structural equation models by other researchers. May be repeated up to 3 credits.
Prerequisite(s): A ST 505.

MKTG 670. Marketing Theory
3 Credits (3)
The evolution, development, construction, and evaluation of the major theoretical perspectives of marketing. Fundamental to the understanding of contemporary marketing and preparation for investigations into the nature and role of theory in marketing.
MKTG 690. Special Topics in Marketing
3 Credits (3)
A seminar on special topics in marketing. The topic of the course will vary according to the needs of the students in the program and the instructor. Ph.D. students may repeat this course up to three times for a maximum total of 9 credits.

MKTG 698. Selected Topics
1-9 Credits (1-9)
Materials and subjects not offered in regular marketing courses. May be repeated for a maximum of 18 credits under different subtitles.

MKTG 700. Doctoral Dissertation
15 Credits
Prerequisite: advancement to candidacy.

Electives, to bring the total credits to 120 ⁵

**Total Credits**

120

---

1. See the General Education (p. 123) of the catalog for a full list of courses.
2. MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G first.
3. All Foundation Requirement Courses must be taken, or satisfied with transfer credits, regardless of which Mathematics or Statistics course satisfies the Area II General Education course: MATH 1220G College Algebra, MATH 1430G Applications of Calculus I, and either MATH 1350G Introduction to Statistics or A ST 311 Statistical Applications must be completed.
4. See the Viewing a Wider World (p. 130) of the catalog for a full list of courses.
5. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

---

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in Mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from Fall to Spring semesters and is subject to modification or change. Online availability and enrollment may be limited. ⁴

Marketing - Bachelor of Business Administration (Online)

Marketing Major

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Note: The marketing major is also offered through an Online Distance Education Degree Completion Program. Program information is available on the College of Business website: http://business.nmsu.edu/academics/undergraduate/online-programs/ (https://business.nmsu.edu/academics/undergraduate/online-programs/)

1. These courses have prerequisites and it is the students responsibility for checking and fulfilling all course prerequisites listed for these courses.

2. See the General Education (p. 123) section of the catalog for a full list of courses.

3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.

4. Most, but not all, upper-division MKTG courses are offered online. However, most MKTG courses that are offered online are only offered once per year. Most online courses that are available for on-campus majors to take (i.e., not through the NMSU-O campus) have substantially limited enrollment – please plan accordingly.

5. While this course can currently be substituted for by other upper-division MKTG courses, it is likely to be required in future catalogs and taking it is strongly encouraged.
Marketing (PGA Golf Management) - Bachelor of Business Administration

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120.5 credits with 58.5 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Note: Students must apply separately to the PGA Golf Management Program for acceptance. Acceptance is limited to the fall of every year.

However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

### Advertising - Undergraduate Minor

If you are considering the Minor in Advertising, please visit the Department of Marketing, Business Complex, room 209 to arrange a consultation with a Marketing Faculty member for guidance and a suggested Plan of Study for the minor, etc. Students must have a cumulative grade point average of 2.0 in the 18 credits in order to earn the Minor in Advertising. Also, at least twelve credits for the minor must be completed at NMSU.

This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Requirements: 18 or more Credit Hours in an approved plan of study.

*Additional MKTG courses 1 3*

*Additional credits from any College of Business prefix (including MKTG) 1 6*

**Total Credits**: 18

1. All courses must be upper-division (300 level or above).

**College of Engineering**

*Dean - Lakshmi Reddi, Ph.D., P.E.*

*Associate Dean (Academic Programs) - Antonio ("Tony") Garcia, Ph.D.*

*Associate Dean (Research) - Hongmei Luo, Ph.D.*

*Associate Dean (Outreach and Recruitment) - Patricia Sullivan, Ph.D.*

*Assistant Dean (Student Success and Experiential Learning) - Gabe Garcia, Ph.D.*

*College Chief of Staff - Linda Fresques*
The College of Engineering comprises six departments:

- Chemical Engineering (p. 1223);
- Civil Engineering (p. 1241);
- Electrical and Computer Engineering (p. 1266);
- Engineering Technology and Surveying Engineering (p. 1340);
- Industrial Engineering (p. 1395);
- Mechanical and Aerospace Engineering (p. 1416).

**Mission of the College of Engineering**

The College of Engineering will uphold the land grant mission of NMSU through nationally recognized programs in education, research and professional and public service.

With respect to our undergraduate programs, we will accomplish our mission by focusing on the following goals:

1. To be nationally and internationally recognized for academic and research programs in engineering and engineering technology.
2. Provide world-class engineers and engineering technologists for industrial, government, and academic constituents of the College of Engineering.
3. To be the University of Choice for undergraduate engineering and engineering technology education in the region.
4. To serve as an engine for economic development in New Mexico through the advancement of engineering and technology.

Furthermore, graduates receiving baccalaureate degrees will demonstrate:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- an ability to communicate effectively with a range of audiences
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**Undergraduate Student Advisement**

Starting with the fall 2017 semester, students entering the College of Engineering will be advised by the Center for Academic Advising and Student Support (CAASS) located in Garcia Annex. Students may also change majors at the CAASS. Students uncertain about choosing a major may list themselves as undeclared in the College of Engineering and be advised by the CAASS. Undeclared students will be asked to choose a major after two semesters in the college. Students must have a declared major in order to graduate.

**Undergraduate General Education**

With the exception of math and science, the college accepts all coursework approved for inclusion in the New Mexico General Education Common Core. Calculus I, General Chemistry I and Engineering Physics I are required to satisfy areas II and III of the common core.

**S/U Coursework**

The college requires most degree requirements to be taken with traditional grading. Students may take selected humanities and social science courses under the S/U option. Other exceptions are specifically noted in the program descriptions later in this catalog.

**Undergraduate Math Placement**

Entering freshmen are placed into an appropriate math course based upon the results of the Math Placement Exam administered regularly by the NMSU mathematics department. Students with advanced placement or transfer credit for mathematics will be placed accordingly.

**Minors**

Minors are available from most departments within the College of Engineering, and they are outlined in the individual program descriptions.

**Undergraduate Cooperative Education**

After two semesters of satisfactory academic work (2.5 GPA or higher), an engineering student may go on a work phase with one of the many companies or governmental agencies with which the university has co-op agreements. The experience obtained through alternating periods of academic
and field work greatly contributes to the preparation of a student for professional life. Work phases are considered to be a vital part of the educational process, and students are counseled in the selection of co-op positions that will lead to progressive learning experiences. Earnings while on work phase provide a source of financial assistance to meet educational expenses.

A significant number of undergraduate engineering students are in the cooperative education program. Students may, with the approval of their department head, earn credit while participating in a co-op work phase. Co-op credits do not normally count toward the degree requirements, but are displayed on the transcript.

**Undergraduate General Academic Requirements**

For regular admission to the university and the College of Engineering, incoming freshman and transfer applicants must meet the university's qualifications for regular admission as stated in the undergraduate catalog in effect at the time of application. Students admitted to the College of Engineering will be classified by the college as a pre-[major] until the standard requirements described below for admission to the program major are met.

Pre-[major] students will be admitted into their respective programs once they have met the following criteria:

- Earn a minimum grade of C- in all of the following courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1215G</td>
<td>General Chemistry I Lecture and Laboratory for STEM Majors</td>
<td>4</td>
</tr>
<tr>
<td>or CHEM 1120G (engineering technology)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ENGL 1110G/1110H/1110M</td>
<td>Composition I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 1511G</td>
<td>Calculus and Analytic Geometry I</td>
<td>4</td>
</tr>
<tr>
<td>or MATH 1430G (engineering technology)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>PHYS 1310G</td>
<td>Calculus-Based Physics I</td>
<td>3</td>
</tr>
<tr>
<td>or PHYS 1230G (engineering technology)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Any of the above courses with earned AP credit (minimum score of 3) is exempt from the list. Transfer students may meet this criteria with determined passing credit of equivalent courses. PRE [major] students will be advised by their EG [major] department.

NMSU College of Engineering reserves the right to independently test any student's English proficiency upon arrival, including those who have earned scores satisfying minimum admission criteria. If the demonstrated level of English proficiency is not sufficient for academic success as determined by the Center for English Language Programs, support classes may be required to improve proficiency.

Students must earn a minimum cumulative GPA of 2.0 before enrolling in engineering courses numbered 300 or above. Students seeking to continue in engineering upper division courses with a GPA below 2.0 need to meet with the Associate Dean of Academics to create a course plan designed to increase their GPA and meet this criteria.

Students must earn a grade of C- or better in all engineering, technology, math and science courses (including associated prerequisite courses) required for the degree and also courses taken to satisfy the general education requirements for Area I-Communications, Area II-Mathematics/Algebra, and Area III-Laboratory Science. If a grade lower than C- is earned in any of these courses, the student is required to retake the course immediately during the next semester it is offered. An undergraduate student may attempt an engineering, math, or physical science course no more than three times to earn a passing grade of C- or better. Anytime a student earns less than a C-, a meeting with the appropriate engineering academic advisor is required to develop a plan for addressing this issue. If the student fails to pass any of these courses after three attempts, then the student will not be able to continue as an engineering major and will be counseled on other degree options.

**Engineering Transfer Policy**

Policy for engineering majors enrolling in courses at other institutions to meet College of Engineering Departmental Core Requirements:

1. NMSU Policy Manual Chapter 6, section 89, paragraph A. “The decision to award a student credit for work completed at another institution rests with the faculty.”

2. NMSU main campus engineering majors may take core classes at other institutions of higher education to meet NMSU College of Engineering Departmental Core if the NMSU core course cannot accommodate any more eligible students.

3. The following conditions and restrictions apply to any course not taken on the NMSU main campus:
   - The department must approve the course prior to enrollment (student to provide course syllabus and any other documentation to department head).
   - The course must be a class in a program that is accredited by an accreditation commission of ABET, Inc. and cannot be graded S/U.
   - The course must be substantially the same as the equivalent NMSU class and the student must have satisfied all NMSU prerequisite requirements.
The student shall provide a corresponding course syllabus and any other documentation required.

If NMSU prerequisite requirements are not satisfied, credit will be denied regardless of a passing grade for the course at the other institution.

4. In addition to 3 above, the following conditions apply to any on-line course not taken from the NMSU main campus.

- Scheduled exams, if any, shall be proctored.
- If NMSU prerequisite requirements are not satisfied, credit will be denied regardless of a passing grade for the course at the other institution.

Core requirements are defined as required departmental, discipline-related, courses within the major.

The student may choose to have NMSU proctored exams (https://dl.nmsu.edu/proctored-exams/)

For more information about transferring to New Mexico State University from another accredited institution, visit the NMSU Transfer Center.

Requirements for Graduation

The minimum requirements for undergraduate degrees are:

1. Satisfaction of the university requirements as previously outlined in the Regulations (p. 55) section of this catalog.
2. Satisfaction of the college requirements as outlined under General Academic Requirements, above.
3. Satisfaction of the departmental rules and course requirements as outlined in the individual program descriptions.

NOTE: In order to maintain quality, remain current, and satisfy changes in accreditation criteria, requirements which have been published may be changed. Any such changes will be announced and will not be retroactive. Always consult an academic advisor before registering for classes.

Master’s Accelerated Program

Students who have a GPA of 3.0 or more are eligible for the Master’s Accelerated Program (MAP) in engineering. The MAP allows a student to earn both a bachelor’s and master’s degree in as little as five years.

A master’s degree is increasingly becoming the professional degree of choice for engineering practice. Many employers encourage, or even require, their employees to seek the degree during their early career, and master’s holders often experience increased upward mobility and earn substantially greater salaries as a result.

General requirements:

- It takes 30 to 32 credit hours to complete a master’s degree.
- Up to 12 credits of your undergraduate coursework 450 and above may be counted toward the master’s.
- It’s possible to complete the master’s degree in 2-3 semesters beyond graduation with a bachelor’s degree.

Visit the Master’s Accelerated Program (MAP) (https://honors.nmsu.edu/for-students/masters-accelerated-program-map.html) page for more information.

Graduate Degrees

Graduate study is available in

- Advanced Manufacturing (p. 1220),
- Aerospace Engineering (p. 1418),
- Chemical Engineering (p. 1224),
- Civil Engineering (p. 1243),
- Electrical Engineering (p. 1268),
- Environmental Engineering (p. 1243),
- Industrial Engineering (p. 1397),
- Information Technology (p. 1394), and
- Mechanical Engineering (p. 1418).

See individual program descriptions for graduate degree requirements.

Bachelor Degrees

Bachelor of Information and Communication Technology (p. 1386)

Bachelor of Information and Communication Technology (Online) (p. 1389)
Bachelor of Science in Engineering

Majors in:

- Aerospace Engineering (p. 1427)
- Chemical Engineering (p. 1232)
- Civil Engineering (p. 1253)
- Electrical Engineering - Bachelor of Science in Electrical Engineering (p. 1281)
  - Electrical Engineering (Communications & Signal Processing ) (p. 1284)
  - Electrical Engineering (Computers & Microelectronics ) (p. 1288)
  - Electrical Engineering (Control & Power ) (p. 1291)
  - Electrical Engineering (Electromagnetics & Photonics ) (p. 1295)
  - Electrical Engineering (Space Systems ) (p. 1298)
- Engineering Physics
  - Aerospace (p. 1328)
  - Chemical (p. 1331)
  - Electrical (p. 1334)
  - Mechanical (p. 1337)
- Engineering Technology - Civil Degrees
  - Engineering Technology - Civil - Bachelor of Science in Engineering Technology (p. 1360)
  - Engineering Technology - Civil (Renewable Energy Technologies) - Bachelor of Science in Engineering Technology (p. 1364)
  - Engineering Technology - Civil (Transportation Technology) - Bachelor of Science in Engineering Technology (p. 1367)
- Engineering Technology - Electronics and Computer Degrees
  - Engineering Technology - Electronics and Computer - Bachelor of Science in Engineering Technology (p. 1370)
- Engineering Technology - Information Degrees
  - Engineering Technology - Information - Bachelor of Science in Engineering Technology (p. 1373)
- Engineering Technology - Mechanical Degrees
  - Engineering Technology - Mechanical - Bachelor of Science in Engineering Technology (p. 1376)
- Geomatics Degrees
  - Geomatics - Bachelor of Science (BS) (p. 1380)
  - Geomatics - Bachelor of Science (Online) (p. 1383)
- Industrial Engineering (p. 1402)
- Mechanical Engineering (p. 1430)

Masters Degrees

The College of Engineering offers three types of Master’s curriculum: thesis, project or coursework-only. The Master of Science (M.S.) degree is completed either with a thesis or a project. The Master of Engineering (M.E.) and Master of Information Technology (M-IT) degrees are completed without the preparation of a formal research thesis or project and is based only on coursework. Students interested in research and a career in R&D may prefer the M.S. thesis option, while students who select the M.E. or M-IT degrees may be more interested in acquiring knowledge and applying it in their professional workplace.

Departmental Master of Science

Master of Science in Aerospace Engineering (p. 1438)

Master of Science in Chemical Engineering

Master of Science in Civil Engineering (p. 1261)

Master of Science in Electrical Engineering (p. 1308)

Master of Science in Electrical Engineering (Online)

Master of Science in Environmental Engineering

Master of Science in Industrial Engineering

Master of Science in Industrial Engineering (Online) (p. 1410)

Master of Science in Mechanical Engineering
Departmental Master of Information Technology (Coursework Only)

Master of Information Technology (Online) (p. 1394)

Departmental Master of Engineering (Coursework Only)

Majors in:

- Aerospace Engineering (p. 1434)
- Aerospace Engineering (Online) (p. 1435)
- Chemical Process Industry (p. 1238)
- Chemical Process Industry (Online) (p. 1239)
- Civil Engineering (p. 1258)
- Civil Engineering (Online) (p. 1259)
- Electrical Engineering (p. 1303)
- Electrical Engineering (Online) (p. 1305)
- Industrial Engineering (p. 1405)
- Industrial Engineering (Online) (p. 1407)
- Mechanical Engineering (p. 1436)
- Mechanical Engineering (Online) (p. 1437)

Advanced Manufacturing - Concentration

The graduate concentration in advanced manufacturing educates students and creates a skilled workforce for the growing needs of new technologies and advanced products in the 21st century. The program provides hands-on experience on designing, adapting, and building parts using advanced materials by including new processes, changing the supply chain, and adapting business models. It also includes the design optimization, materials selection and characterization, process parameter mapping, data analytics, software development, and final part inspection among other concepts. This concentration is maintained by the College of Engineering but is open to any Master's level major/degree.

¹ With Approval of the advisor and instructor

Selection of Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester, but they must select a degree option and permanent advisor before registering for the second semester.

In considering a decision about option and advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of study to discuss specific educational objectives. The student can use these meetings to become familiar with faculty interests and research projects currently in progress. The faculty member must agree (in writing) to serve as the student's advisor.

Although there is no oral exam, students will be required to complete an exit-interview with one of Advanced Manufacturing concentration and one graduate faculty member from the master of engineering they select to study.

Doctoral Degree

Doctor of Philosophy

Majors in:

- Aerospace Engineering (p. 1439)
- Engineering
• Chemical Engineering (p. 1239)
• Civil Engineering (p. 1265)
• Electrical Engineering (p. 1312)
• Industrial Engineering (p. 1413)
• Mechanical Engineering (p. 1440)

Graduate Certificates

Digital Communications - Graduate Certificate (p. 1313)
Digital Signal Processing - Graduate Certificate (p. 1313)
Electric Energy Systems - Graduate Certificate (p. 1314)
Systems Engineering - Graduate Certificate (p. 1414)
Systems Engineering - Graduate Certificate (Online) (p. 1415)
Telemetry - Graduate Certificate (p. 1314)

Undergraduate Minors

• Aerospace Engineering (p. 1433)
• Agricultural Engineering (p. 1256)
• Biomedical Engineering (p. 1235)
• Brewery Engineering (p. 1235)
• Computational Engineering (p. 1236)
• Computer Engineering (p. 1302)
• Digital Electronic Applications (p. 1391)

Chemical & Materials Engineering

Mission

The New Mexico State University Chemical & Materials Engineering Department strives to prepare Chemical Engineering Bachelor of Science graduates to successfully and safely practice the chemical engineering profession, to engage in life-long personal and professional development, and to contribute to the betterment of their community and society.

Undergraduate Program Information

Chemical engineers solve problems by combining the fundamentals of physical sciences (chemistry and physics) and life sciences (biology, microbiology, biochemistry) with the principles of engineering analysis, mathematics, and economics. The curriculum of study leading to the BSCHE continuously builds on prerequisite knowledge. The capstone course requires completion of a series of seven prerequisite courses, each having its own prerequisites. In this manner, the BSCHE produces graduates with highly developed problem-solving capabilities, strong communication and interpersonal skills, and an ability to seek out and assimilate knowledge beyond the classroom. Graduates apply these competencies to solve problems across a wide range of industries in the private and public sectors.

The work of a chemical engineer typically leads to the development of processes that convert raw materials (chemicals) into more useful or valuable products. Chemical engineers are pioneers of modern materials and associated processes that are essential to the fields of:

• nanotechnology;
• fuel cells;
• computer chip manufacture;
• environmental restoration and pollution prevention;
• biomedical, biotechnology and bioengineering;
• pharmaceutical manufacturing;
• food production;
• transportation (automotive and aerospace);
• advanced materials;
• petrochemical and refining;
• chemical synthesis and production; and
• power & energy (including the nuclear industry).

Graduates are also well-prepared to continue the study of law, medicine or advanced engineering topics at the graduate level.
Undergraduate Program Educational Objectives

The Chemical & Materials Engineering Department at New Mexico State University strives to produce undergraduates who will:

1. apply their problem-solving and communication skills to chemical engineering industries, government research labs, academia, and related fields;
2. implement safety practices in their work;
3. be on the path to leadership; and
4. build new skills sets through continuing education and professional development.

These Program Educational Objectives (PEOs), which are modified based on input from our constituencies, are consistent with the missions of NMSU, the College of Engineering and the Department of Chemical & Materials Engineering.

Graduate Program Information

The Department of Chemical and Materials Engineering offers graduate study leading to the M.E., M.S. and Ph.D. degrees with an emphasis in chemical engineering. Admission to the program is in accord with the general regulations of the Graduate School. The Graduate Record Examination (GRE) General Test is required for all applicants. All graduate students are required to pass all graduate engineering courses with a minimum grade of B-.

All graduate students must select a thesis or dissertation advisor by the end of their first year in the chemical engineering graduate program. Thesis/dissertation may be pursued in absentia at various industrial sites by special arrangement.

Graduate teaching and research assistantships, fellowships and traineeships are available. For consideration for financial assistance, completed applicants must be received by March 1. All support is contingent upon availability, eligibility and satisfactory progress toward the degree.

Each student admitted to the CHME grad program who has an undergraduate degree in a discipline other than chemical engineering must schedule a meeting with the CHME Department Head to identify undergraduate course deficiencies that the student must take to obtain a graduate degree in chemical engineering.

Graduate Program Educational Objectives

Chemical & Materials Engineering graduate students must:

1. demonstrate skills in the (1) design of experiments or simulations, (2) collection of experimental/simulated data, (3) development of appropriate models, and (4) make appropriate use of those models;
2. complete an independent research project, resulting in at least a thesis/dissertation and peer-reviewed journal article(s);
3. defend original research in front of a panel of peers and experts;
4. be knowledgeable of the contemporary issues that are relevant to their chosen area of research.

Degrees for the Department

Bachelor Degree(s)

Chemical Engineering - Bachelor of Science in Chemical Engineering (p. 1232)

Master Degree(s)

Chemical Process Industry - Master of Engineering in Chemical Process Industry (p. 1238)
Chemical Process Industry - Master of Engineering in Chemical Process Industry (Online) (p. 1239)
Chemical Engineering - Master of Science in Chemical Engineering (p. 1237)

Doctoral Degree(s)

Engineering (Chemical Engineering) - Doctor of Philosophy (p. 1239)

Minors for the Department

Undergraduate

Biomedical Engineering - Undergraduate Minor (p. 1235)
Brewery Engineering - Undergraduate Minor (p. 1235)
Computational Engineering - Undergraduate Minor (p. 1236)
Graduate

Materials Engineering - Graduate Minor (p. 1241)

Interim Department Head: Jessica P. Houston

Associate Department Head: Martha C. Mitchell

Professors Garcia, Houston, Luo, Mitchell, Associate Professors Andersen, Brewer, Manz Assistant Professors Martinez-Monteagudo, Zhou Emeritus Professors Bhada, Ghassemi, Johnson, Patton, Rockstraw

Research Interests:

P.K. Andersen (Ph.D., University of California, Berkeley) physicochemical hydrodynamics, nuclear chemical engineering, modeling and simulation, education and training.

C.E. Brewer (Ph.D., Iowa State) biomass thermochemical processing, sustainable agriculture, biorenewable resources, brewery engineering.

A.A. Garcia (Ph.D., University of California, Berkeley) drug delivery, diagnostic devices, nanobiotechnology, bioprocessing.

J. P. Houston (Ph.D., Texas A&M) biomedical engineering, biophotonics, flow cytometry.

H. Luo (Ph.D., Tulane) nanostructured materials, thin films, photovoltaics, batteries, electrocatalysts, photocatalysts.

T.A. Manz (Ph.D., Purdue) quantum chemistry simulations of materials, catalysis, and space physics.

S. Martinez-Monteagudo (Ph.D., University of Alberta, Canada) food engineering, valorization of byproduct streams, synthesis of sweeteners, and green extraction methods.

M.C. Mitchell (Ph.D., Minnesota) computer modeling and simulation of molecular-level phenomena, thermodynamic characterization of aerospace fuels, statistical mechanics, engineering education, diversity and inclusion in STEM.

M. Zhou (Ph.D., New Mexico State) gas adsorption and separation, energy storage devices, capacitive deionization.

Registered Professional Engineer

Chemical Engineering Courses

CHME 101. Introduction to Chemical Engineering Calculations
2 Credits (2)
Introduction to the discipline of chemical engineering, including: an overview of the curriculum; career opportunities; units and conversions; process variables; basic data treatments; and computing techniques including computer programming and use of spreadsheets.
Prerequisite(s)/Corequisite(s): MATH 1250G.

CHME 102. Material Balances
2 Credits (2)
Perform material balances in single- and multi-phase, reacting and non-reacting systems under isothermal conditions.
Prerequisite(s)/Corequisite(s): CHEM 1215G or CHEM 1265. Prerequisite(s): MATH 1250G, CHME 101.

CHME 201. Energy Balances & Basic Thermodynamics
3 Credits (3)
Chemical Engineering energy balances; combined energy and material balances including those with chemical reaction, purge and recycle; thermochemistry; application to unit operations. Introduction to the first and second laws of thermodynamics and their applications. May be repeated up to 3 credits.
Prerequisite(s): CHME 102, CHEM 1216 or CHEM 1215G, and MATH 1521G or MATH 1521H.

CHME 294. Communicating in Chemical Engineering
2 Credits (2)
Students will master the fundamentals of communicating as an engineer, with focus on both written and oral communication, both independently and collaboratively, including development of the skills of gathering information and making decisions.
Corequisite(s): ENGL 1110G, COMM 1115G.
CHME 303. Chemical Engineering Thermodynamics
4 Credits (4)
Applications of the First Law and Second Law to chemical process systems, especially phase and chemical equilibria and the behavior of real fluids. Development of fundamental thermodynamic property relations and complete energy and entropy balances. Modeling of physical properties for use in energy and entropy balances, heat and mass transfer, separations, reactor design, and process control.
Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): CHME 201, MATH 2530G.

CHME 305. Transport Operations I: Fluid Flow
3 Credits (3)
Theory of momentum transport. Unified treatment via equations of change. Shell balance solution to 1-D problems in viscous flow. Analysis of chemical engineering unit operations involving fluid flow. General design and operation of fluid flow equipment and piping networks. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): CHME 201, PHYS 1310G, MATH 2530G. Restricted to: CH E, CHME, CMEG majors.

4 Credits (4)
Prerequisite(s)/Corequisite(s): CHME 305 and MATH 392. Restricted to: CH E, CHME, CMEG, EPCHE majors.

3 Credits (3)
Theory of mass transport. Mass transfer coefficients. Analysis of chemical engineering unit operations involving mass transfer and separations. Equilibrium stage concept. General design and operation of mass-transfer equipment and separation sequences. May be repeated up to 3 credits. Restricted to: CHME, CMEG, CH E majors.
Prerequisite(s): CHME 303, CHME 306.

CHME 323 L. Transport Operations and Instrumentation Laboratory I
1 Credit (3P)
Laboratory experiments demonstrate the principles of process measurement and instrumentation through the determination of thermodynamic properties, transport phenomena properties, heat transfer, and material physical properties. Treatment of data includes regression techniques, analysis of error, and statistical analysis. May be repeated up to 1 credits.
Prerequisite(s)/Corequisite(s): CHME 306. Prerequisite(s): I E 311. Restricted to: CH E, CHME, CMEG majors.

CHME 324 L. Transport Operations and Instrumentation Laboratory II
1 Credit (3P)
Continuation of CHME 323L. Restricted to: CHME majors.
Prerequisite(s): CHME 323L.

CHME 352 L. Simulation of Unit Operations
1 Credit (1P)
Definition, specification, and convergence of basic unit operations in a process simulator. Course will cover pipe networks, pressure changers, heat exchangers, distillation columns, and chemical reactors.
Prerequisite(s)/Corequisite(s): CHME 307, CHME 441. Restricted to: CHME majors.

CHME 361. Engineering Materials
3 Credits (3)
Prerequisite(s): (CHEM 1215G or CHEM 1216) and MATH 1250G.

CHME 391. Industrial Employment
1-2 Credits
Employment in chemical, petroleum, food, biotechnology, materials, environmental, pharmaceutical, or other industry relevant to the discipline, with opportunity for professional experience and training in chemical engineering. Requires written report covering work period approved by employer. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CHME, CH E majors.
Prerequisite(s): Consent of department head.

CHME 392. Numerical Methods in Engineering
3 Credits (3)
Study and application of numerical methods in solving problems commonly encountered in engineering. The numerical methods are motivated by engineering problems rather than by mathematics. However, sufficient mathematical theory will be provided so that students can appreciate the insight into the techniques and their shortcomings of different methods. MATLAB will be used as the working environment for implementing and performing the numerical methods in computers. This course is an engineering elective open to all engineering majors.
Prerequisite(s)/Corequisite(s): MATH 392.
CHME 395V. Brewing Science and Society
3 Credits (3)
An overview of the science of brewing and the interrelationships between society, technology, business, and the evolution of the current beer market. Topics covered are history of brewing and the interrelationships between societal attitudes, technology, and cultural preferences; beer styles and evaluation techniques; production and characteristics of ingredients used in brewing; brewing unit operations; biochemistry of malting, mashing, and fermentation; engineering in the brewery; homebrewing; and societal and health issues related to beer and alcohol. Students must be at least 21 years of age by the first day of instruction of the semester to enroll in this course.

CHME 412. Process Dynamics and Control
3 Credits (3)
Prerequisite(s): CHME 441.

CHME 423 L. Unit Operations Laboratory I
1 Credit (3P)
Experiments with chemical engineering unit operations including the use of computer data acquisition. Covers control system instrumentation and development of empirical models from process data. Includes written and oral reports. Restricted to: CHME majors.
Prerequisite(s): CHME 307, CHME 441, CHME 324L.

CHME 424 L. Process Control Laboratory
1 Credit (3P)
Experiments with chemical engineering process control including the use of computer data acquisition and closed-loop process control. Covers control system instrumentation. Includes written and oral reports. Restricted to: CHME majors.
Prerequisite(s): CHME 412, CHME 423L.

CHME 441. Chemical Kinetics and Reactor Engineering
3 Credits (3)
Analysis and interpretation of kinetic data and catalytic phenomena. Applied reaction kinetics; ideal reactor modeling; non-ideal flow models. Mass transfer accompanied by chemical reaction. Application of basic engineering principles to design, operation, and analysis of industrial reactors. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): CHME 307. Prerequisite(s): CHEM 313, CHME 303. Restricted to: CHME,CMEG,CH E majors.

CHME 448. Industrial Safety
3 Credits (3)
An introduction to the fundamentals of chemical process safety, including toxicology, industrial hygiene, source models, fires and explosions, relief systems, hazard identification, risk assessment, environmental fate and transport, hazardous waste generation, pollution prevention, and regulatory requirements.
Prerequisite(s): CHEM 1216 or CHEM 1215G.

CHME 449. Intellectual Property for Engineers and Scientists
3 Credits (3)
An overview of intellectual property with an emphasis on patents. Terminology, patentability requirements, invention disclosures, inventorship, scope of claims, patent application content and the patent prosecution process, and post-allowance matters including infringement and enforcement. Taught with CHME 549.
Prerequisite(s): CHEM 1120G, CHEM 1215G, or CHEM 1216; and senior standing in engineering or a fundamental science major; or consent of instructor.

CHME 452. Chemical Process Design & Economic Evaluation
3 Credits (3)
Concepts in chemical engineering process design, including: capital and manufacture cost estimation; discounted cash flows; interest; taxes; depreciation; profitability analysis; project specifications. Restricted to: CHME,CH E majors.
Prerequisite(s): CHME 307, CHME 441.

CHME 452 L. Chemical Process Simulation
1 Credit (1P)
Construction and convergence of chemical processes in a process simulator. Students will understand how to access variables, define and converge design specifications and converge tear/recycle streams.
Prerequisite(s)/Corequisite(s): CHME 452. Prerequisite(s): CHME 352L. Restricted to: CHME majors.

CHME 455. Chemical Plant Design
3 Credits (3)
Design and analysis of integrated process plants. Consideration given to optimizing performance, operability, reliability, safety, control, energy integration, and cost effectiveness. Requires written report covering solution of a capstone design problem. Restricted to: CHME majors.
Prerequisite(s): CHME 452.
CHME 455 L. Chemical Plant Simulation
1 Credit (1P)
Construction, convergence, and optimization of chemical processes in a process simulator. Dynamic process simulation and control.
Prerequisite(s)/Corequisite(s): CHME 455. Prerequisite(s): CHME 412, CHME 452L. Restricted to: CHME majors.

CHME 461. Calculation of Material and Molecular Properties
3 Credits (3)
The aim is to describe and apply techniques for computing common properties of materials and molecules: optimized geometries, transition states, vibrational spectra, energies (electronic, internal energy, enthalpy, and Gibbs free energy), heat capacities, net atomic charges, atomic spin moments, and effective bond orders. These techniques allow one to estimate the thermodynamic properties of a chemical, as well as to compute the mechanisms and energy barriers for chemical reactions and catalytic processes, and to quantify the electronic, magnetic, and chemical ordering in materials. The theory behind these techniques will be described and students will perform hands-on computer exercises using common computational chemistry programs. Taught with CHME 561.
Prerequisite(s): CHEM 1226, MATH 1521G or MATH 1521H, (PHYS 2140 or PHYS 1320G).

CHME 463. Soft Matter
3 Credits (3)
Prerequisite(s): CHME 303, CHME 305, CHME 361.

CHME 464. Polymer Science & Engineering
3 Credits (3)
This course covers concepts in science and engineering of macromolecules, such as synthesis and chemistry, characterization of molecular weight, morphology, rheology, and mechanical behavior, structure and property relationships, and polymer processing. Taught with CHME 564. May be repeated up to 3 credits.
Prerequisite(s): CHEM 314.

CHME 465. Rheology and Viscoelasticity
3 Credits (3)
Navier-Stokes equation; non-Newtonian fluids; flow fields; rheometry; viscoelastic models; non-linear viscoelasticity; material functions; complex fluids, including emulsions, suspensions and nanocomposites. Taught with CHME 565. Consent of Instructor required.
Prerequisite(s): CHME 306.

CHME 467. Nanoscience and Nanotechnology
3 Credits (3)
This is a lecture/laboratory course designed to present the basic concepts, the techniques and the tools to synthesize and characterize nanometer scale materials, and the latest achievements in current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics and energy. It is intended for a multidisciplinary audience with a variety of backgrounds. This course should be suitable for graduate students as well as advanced undergraduates. Topics covered will include: nanoscience and nanotechnology, nanofabrication, self-assembly, colloidal chemistry, sol-gel, carbon nanotubes, graphene, thin film, lithography, physical vapor deposition, chemical vapor deposition, quantum dots, lithium batteries, X-ray diffraction, scanning electron microscopy, transmission electron microscopy, nanoelectronics, nanophotonics and nanomagnetics, etc. Taught with PHYS 520 and CH E 567. Crosslisted with: PHYS 520 and PHYS 467.
Prerequisite(s): (CHEM 116 or CHEM 112G), (PHYS 211G or PHYS 215G), (EH&S Safety training to include the courses: (1) Employee & Hazard Communication Safety (HazCom); (2) Hazardous Waste Management; and (3) Laboratory Standard).

CHME 470. Introduction to Nuclear Energy
3 Credits (3)
Atomic and nuclear structure, nuclear stability and radioactivity, nuclear reactions, detection and measurement of radiation, interaction of radiation with matter, radiation doses and hazard assessment, principles of nuclear reactors, and applications of nuclear technology.
Prerequisite(s): CHEM 1215G, MATH 1521G or MATH 1521H.

CHME 471. Health Physics
3 Credits (3)
Introduction to radiation protection, radiation/radioactivity, radioactive decay/fission, interactions of radiation and matter, biological effects of radiation, radiation measurement and statistics, sampling for radiation protection, radiation dosimetry, environmental transport, radiation protection guidance, external and internal radiation protection, and hazards analysis.
Prerequisite(s): MATH 1521G or MATH 1521H, CHME 470.
CHME 476. Nuclear Fuel Cycles
3 Credits (3)
Physical and chemical processes in the conventional nuclear fuel cycle: uranium mining and milling, conversion, enrichment, fuel fabrication, reactor operations, interim storage, reprocessing and recycling, waste treatment and disposal. Alternative fuel cycles and future prospects. Consent of Instructor required.
Prerequisite(s): CHME 470.

CHME 478. Electrochemistry: Basics & Applications
3 Credits (3)
The course will integrate theoretical studies and engineering applications of the mechanisms responsible for electrochemical devices, while identifying technological restrictions to practical applications through a general overview of underlying electrochemistry concepts of various types of energy storage devices, with a few categories discussed in depth. For non-CHME majors, CHEM 1226 (or equivalent) and MATH 1521G. A prerequisite knowledge test will be given in the first class for those who do not have these courses.
Prerequisite: CHME 201 for CHME majors.

Learning Outcomes
1. Gain overview of electrochemical cells and processes
   Understand Potential and thermodynamics of cells

CHME 479. Corrosion and Degradation of Materials
3 Credits (3)
Failure of engineering materials in aggressive environments. Chemical and electrochemical mechanisms of corrosion. Influence of chemical composition and microstructure on corrosion behavior. Types of corrosion and chemical attack, including uniform corrosion, galvanic corrosion, pitting and other forms of localized corrosion, stress corrosion cracking, and corrosion fatigue. Methods of corrosion mitigation including cathodic protection, coatings, passivation, and corrosion inhibitors. Corrosion in nuclear reactors and nuclear waste repositories.
Prerequisite(s): CHME 361.

CHME 481. Biomedical Engineering and Engineering Healthcare
3 Credits (3)
Orientation to solving human and world health issues with biological engineering systems, tools, and analysis methods. Introduces general concepts including applied biology for engineers, biophotonics, biosensing, bioinstrumentation, tissue and biomaterials engineering, biomedical engineering research practices, and physical bioanalytical methods. Taught with CHME 581. Restricted to: CHME, CH E majors.
Prerequisite(s): CHEM 1226, CHME 201.

CHME 486. Biofuels
3 Credits (3)
Introduction to the fundamentals and applications of biofuels and bioenergy production; biomass resources and their composition; types of biofuels; conversion technologies (thermochemical and biochemical conversion processes); biodiesel production, algae to biofuels; economic and environmental assessments; term paper of selected topics relevant to biofuels. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): CHME 201.

CHME 490. Senior Seminar
1 Credit (1)
Research seminar attended by graduate students is open to CHME undergraduates who are research active. May be repeated up to 2 credits. Students must be in Senior Standing to enroll in this course.
Prerequisite(s)/Corequisite(s): CHME 498. Restricted to: CHME, CH E majors.

CHME 491. Special Topics
3 Credits (3)
Lecture and/or laboratory instruction on special topics in chemical engineering. May be repeated up to 6 credits. Consent of Instructor required.
Prerequisite(s): Consent of instructor.

CHME 495. Brewing Science & Engineering
3 Credits (3)
Details of beer production, fermentation science, brewery operation, and process design & economics. Engineering considerations including process safety, fermentation kinetics, unit operations, and economies of scale. Beer styles, recipe formulation, product quantification for tax purposes, and brew analytical methods will also be discussed. Crosslisted with: FSTE 430. Restricted to: CH E, CHME, CMEG majors.
Prerequisite(s): CHME 395V, CHME 441, CHME 452.

CHME 495 L. Brewing Science & Technology Lab
1 Credit (3P)
Brewing and brewing operations in a one-barrel brewery. Topics addressed will include brewery safety, characteristics and handling of brewing ingredients, recipe formulation, water treatment, wort preparation, fermentation, waste disposal, and packaging.
Corequisite(s): CHME 495.
CHME 498. Undergraduate Research
1-3 Credits (1-3P)
Provides an opportunity for undergraduate students to work in research or areas of special interest such as design problems and economic studies under the direction of a faculty member. Written report covering work required. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CHME, CH E majors.
Prerequisite(s): Consent of instructor and department head.

CHME 501. Graduate Thermodynamics for Chemical Engineers
3 Credits (3)
Advanced applications of the first and second law to chemical process systems. The calculus of thermodynamics, equilibrium and stability criteria. Properties relationships for real fluids, both pure materials and mixtures. An introduction to molecular thermodynamics and statistical mechanics. Restricted to: CHME, CH E majors.

CHME 506. Graduate Transport Phenomena(s)
3 Credits (3)

CHME 516. Graduate Numerical Methods in Chemical Engineering
3 Credits (3)
Survey of numerical methods for solving problems commonly encountered in heat and mass transfer, fluid mechanics, and chemical reaction engineering.

CHME 542. Graduate Reactor Analysis and Design(s)
3 Credits (3)
Application and analysis of equations of continuity to multicomponent reaction systems. Introduction to homogeneous and heterogeneous catalysis, single-phase combustion, and shock reaction systems.

CHME 548. Industrial Safety
3 Credits (3)
Same as CHME 448 with graduate-level projects.
Prerequisite(s): CHEM 1216 or CHEM 1215G.

CHME 563. Soft Matter
3 Credits (3)
The physicochemistry of soft materials including gels, polymers and colloids, self-assembly, intermolecular forces, and colloidal forces. Taught with CHME 463. May be repeated up to 3 credits.
Prerequisite(s): CHME 302, CHME 305, CHME 361.

CHME 564. Polymer Science & Engineering
3 Credits (3)
Synthesis, structure, property relationships of synthetic polymers. Taught with CHME 464. May be repeated up to 3 credits.
Prerequisite(s): CHME 201, CHEM 314.

CHME 565. Rheology and Viscoelasticity
3 Credits (3)
This course is an introduction to rheology and viscoelasticity. In particular, the flow behavior of Non-Newtonian Fluids and Viscoelastic Fluids will be covered. Rheometry, the technique for characterization of fluids, will be discussed. Most of the course is quantitative and uses mathematical modeling. Taught with CHME 465.
Prerequisite(s): CHME 306.

CHME 567. Nanoscience and Nanotechnology
3 Credits (3)
This is a lecture/laboratory course designed to present the basic concepts, the techniques and the tools to synthesize and characterize nanometer scale materials, and the latest achievements in current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics and energy. It is intended for a multidisciplinary audience with a variety of backgrounds. This course should be suitable for graduate students as well as advanced undergraduates. Topics covered will include: nanoscience and nanotechnology, nanofabrication, self-assembly, colloidal chemistry, sol-gel, carbon nanotubes, graphene, thin film, lithography, physical vapor deposition, chemical vapor deposition, quantum dots, lithium batteries, X-ray diffraction, scanning electron microscopy, transmission electron microscopy, nanoelectronics, nanophotonics and nanomagnetics, etc. Taught with CHME 467.
Prerequisite(s): (CHEM 1225G or CHEM 1226) and (PHYS 1230G or PHYS 1310G).
CHME 578. Electrochemistry: Basics & Applications
3 Credits (3)
The course will integrate theoretical studies and engineering applications of the mechanisms responsible for electrochemical devices, while identifying technological restrictions to practical applications through a general overview of underlying electrochemistry concepts of various types of energy storage devices, with a few categories discussed in depth. Graduate project required. Student must be graduate students in chemical engineering or instructor approval.

Learning Outcomes
1. gain overview of electrochemical cells and processes understand Potential and thermodynamics of cells

CHME 579. Corrosion and Degradation of Materials
3 Credits (3)
Failure of engineering materials in aggressive environments. Chemical and electrochemical mechanisms of corrosion. Influence of chemical composition and microstructure on corrosion behavior. Types of corrosion and chemical attack, including uniform corrosion, galvanic corrosion, pitting and other forms of localized corrosion, stress corrosion cracking, and corrosion fatigue. Methods of corrosion mitigation including cathodic protection, coatings, passivation, and corrosion inhibitors. Corrosion in nuclear reactors and nuclear waste repositories. Taught with CHME 479.
Prerequisite(s): CHME 361.

CHME 586. Biofuels
3 Credits (3)
Introduction to the fundamentals and applications of biofuels and bioenergy production; biomass resources and their composition; types of biofuels; conversion technologies (thermochemical and biochemical conversion processes); biodiesel production, algae to biofuels; economic and environmental assessments; term paper of selected topics relevant to biofuels. May be repeated up to 3 credits. Restricted to: CHME, CHE majors.
Prerequisite(s): CHME 201.

CHME 590. Graduate Seminar
1 Credit (1)
Presentations on topics of professional interest in chemical engineering. Includes seminars by faculty, graduate students, and invited speakers from academia, government, and industry. May be repeated up to 6 credits. Restricted to: CHME majors.

CHME 594. Professional Communication in Chemical Engineering
2 Credits (2)
Connections between interpersonal relationships and the effective communication of information. Strategies for formal and informal written and verbal communication in the context of presentations, interviews, reports and publications. Factors affecting non-verbal communication. Special focus will be given to understanding and adapting to the audience’s perspective. 2 credits. Open to chemical engineering graduate students or by permission of instructor. This class will prepare you to communicate technical information effectively within a variety of contexts and to a variety of audiences. Class assignments will be partially based on current student needs such as preparing presentations for professional conferences, giving research progress reports, and writing research manuscripts. Restricted to: CHME majors.
Prerequisite(s): CHME graduate student standing.

CHME 595. Chemical Process Design and Business Analysis
3 Credits (3)
Graduate chemical process design principles, emphasizing literature review, patent search, heuristics application, process simulation assistance to process creation, synthesis of reactor and separator trains, second-law analysis, heat and power integration, process equipment mechanical design specifications, process design optimization, cost accounting and capital estimation, annual costs, earnings, and profitability analysis.
Prerequisite(s)/Corequisite(s): CHME 506, CHME 516, CHME 542. Prerequisite(s): CHME 452, CHME 455L or equivalent.

CHME 596. Chemical Process Industries Research
1 Credit (1)
Independent graduate-level chemical process design project development, literature search, and proposal/defense.
Prerequisite(s): CHME 595.

CHME 597. Advanced Chemical Process Industry Analysis
2 Credits (2)
In-depth analysis and defense of a timely commercially-relevant chemical process design.
Prerequisite(s): CHME 596.

CHME 598. Ph.D. Research- Level I
1-9 Credits (1-9)
Individual investigations either analytical or experimental. May be repeated up to 6 credits.

CHME 599. Master's Thesis
1-15 Credits (1-15)
Thesis.
CHME 690. Graduate Seminar  
1 Credit (1)  
Presentations on topics of professional interest in chemical engineering. Includes seminars by faculty, graduate students, and invited speakers from academia, government, and industry. Required each semester for every Ph.D. student. All candidates for graduate degrees required to give seminar. May be repeated up to 8 credits. Restricted to: CHME majors.

CHME 698. Ph.D. Research- Level II  
1-9 Credits (1-9P)  
Advanced topics for current research. Course subtitled in the Schedule of Classes. May be repeated up to 99 credits. Consent of Instructor required.  
Prerequisite(s): successful completion of Ph D qualifying exam.

CHME 700. Doctoral Dissertation  
1-9 Credits (1-9)  
Individual research in selected topics of current interest in chemical engineering. Up to 6 of the 18 credits of CHME 700 that are required for the Ph D may be completed before successful completion of comprehensive exam. Thesis/Dissertation Grading.

Learning Outcomes  
1. Demonstrate skills in the (1) design of experiments or simulations, (2) collection of experimental/simulated data, (3) development of appropriate models, and (4) make appropriate use of those models; Complete an independent research project, resulting in at least a thesis/dissertation and peer-reviewed journal article(s); Defend original research in front of a panel of peers and experts; Be knowledgeable of the contemporary issues that are relevant to their chosen area of research.

Office Location: Jett Hall 268  
Phone: (575) 646-1214  
Website: http://chme.nmsu.edu/  

Chemical Engineering - Bachelor of Science in Chemical Engineering  
The BS Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Requirements (Total Credits 124)  
In addition to satisfying the requirements of New Mexico State University and the College of Engineering, CHME majors must pass departmental courses with a grade of C- or better.  

CHME majors must have completed CHME 201 Energy Balances & Basic Thermodynamics prior to taking any 400-level CHME elective courses.  

Degree requirements can also be found summarized in flow diagrams found on the CHME website (https://chme.nmsu.edu/academics/undergrad/chme-flow-diagrams/).  

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 124 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

---

1. See the General Education (p. 123) section of the catalog for a full list of courses.
2. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.
3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses. Also see the 9-credit hour rule at the bottom of the page. CHMEs meet the 9-credit hour rule through the sequence CHEM 313/314/433, and thus only need to complete 3 credits of VWW.
4. chme.nmsu.edu/academics/syllabi/#CHME_Elective_Courses (https://chme.nmsu.edu/academics/syllabi/#CHME_Elective_Courses)
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Biomedical Engineering - Undergraduate Minor

The Biomedical Engineering minor-of-study is a 20-credit hour program of study designed to accomplish two objectives:

1. Require courses in basic biology, anatomy, physiology to provide students a basic understanding of life and the design and mechanics/dynamics of the human body. Also required is the only biomedical engineering course taught on the NMSU campus.
2. Permit students to select from a wide range of elective courses (https://chme.nmsu.edu/academics/minors/biomedical-engineering/) numbered above 400 that emphasize engineering topics with application to the design and development of medical devices.

Brewery Engineering - Undergraduate Minor

It has long been recognized that the study of chemical engineering is appropriate to the understanding of a vast range of concepts associated with the brewing industry. In 1935, an article by M. B. Donald described many of the fundamental process steps for which the BS degree in Chemical Engineering prepares a student to begin work in the industry. The following 18 credit hour minor of study is designed to prepare CHME students for careers in the brewing industry or as a craft brew entrepreneur as per the 4-year curriculum suggestions by the Master Brewer’s Association of the Americas. Elective courses are to be selected from the lists and guidelines maintained on the Brewery Engineering minor of study webpage (https://chme.nmsu.edu/academics/minors/brewery-engineering/).

Computational Engineering- Undergraduate Minor

The minor in Computational Engineering is designed to provide students with a concentration in the broad spectrum of computations in engineering, including experience with an object-oriented programming language, a background in computational math techniques, and a number of courses that develop or apply engineering software across a broad base of engineering design problems.

Electives must be taken from the list maintained on the Computational Engineering minor webpage (https://chme.nmsu.edu/academics/minors/computational-engineering/)

Materials Engineering - Undergraduate Minor

The Materials Engineering minor at New Mexico State University is part of a materials education program that addresses the growing demand for engineers and scientists with understanding of the wide range of materials, their properties and means of characterization. A student must pass 18 credits of courses with a grade C- or better. The minor elective courses are chosen from list available on the Chemical and Materials Engineering website (http://chme.nmsu.edu/academics/minors/materials-engineering/). No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

Nuclear Chemical Engineering - Undergraduate Minor

The Nuclear Chemical Engineering minor at New Mexico State University is part of a nuclear education program that addresses the growing demand for engineers and scientists with background in the nuclear industry. A student must pass 18 credits of elective courses with a grade C- or better. The courses are upper division courses. Three elective courses must be selected from the list maintained on the CHME website (http://chme.nmsu.edu/academics/minors/nuclear-chemeng/ (https://chme.nmsu.edu/academics/minors/nuclear-chemeng/)). No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

Pre-Law in Intellectual Property - Undergraduate Minor

The Pre-Law Intellectual Property minor at New Mexico State University is part of a pre-law education program that addresses the growing demand for lawyers with a strong understanding of a broad cross-section of STEM subjects. A student must pass 19 credits of courses with a grade C- or better chosen from Pre-Law Intellectual Property minor (https://chme.nmsu.edu/academics/minors/pre-law-intellectual-property-minor/) page available on the Chemical and Materials Engineering website. No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

Pre-Medicine Studies- Undergraduate Minor

The Pre-Medical School minor at New Mexico State University is part of a pre-medicine education program that addresses the growing demand for doctors, surgeons, and biomedical researchers with a strong understanding of a broad cross-section of STEM subjects and who model the human body as a series of interacting chemical process units. This minor of study is designed for students seeking a strong pre-med background (for both MCAT prep and program entry prereq completion) or who may be targeting a graduate degree in biomedical engineering. A student must pass 22 credits of courses with a grade C- or better. The minor includes 19 credit hours of required courses, and 3 credit hours of elective courses. No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

Chemical Engineering - Master of Science in Chemical Engineering

The program of study leading to the MS consists of 32 credits which includes:

- required CHME core graduate courses (14 credits);
- CHME elective courses numbered 455-589 (3 credits);
- other graduate elective courses (9 credits); and
- thesis as CHME 599 Master's Thesis (6 credits).

## Chemical Process Industry - Master of Engineering in Chemical Process Industry

The MECPI is a 30 credit hour coursework and/or project-based degree with flexibility of program design for professionals in the Chemical Process Industry. Proposals for the MECPI may be submitted at [https://chme.nmsu.edu/academics/grad/mecpi-degree-plan-proposal/](https://chme.nmsu.edu/academics/grad/mecpi-degree-plan-proposal/). MECPI requirements are as follows:

### CHME coursework (15 cr hr)

- minimum of 12 credit hours of coursework with CHME prefixes above the 500-level (not including CHME 595, 596, 597, or any research credits associated with the MS and Ph D), of which at least six hours must come from the core sequence of CHME 501, 506, 516, 542 (or equivalent content approved in advance by the MECPI committee).
- 3-credit hour course in industrial safety is required. CHME 548 is recommended, though other course options with similar content can be proposed.

### Professional Communications (3 cr hr)

Students must complete a minimum of 3 credit hours in professional communications. CHME 594 (2) and CHME 690 (1) are recommended to fulfill this requirement, but students may propose 500+ level communications courses beyond CHME to fulfill this requirement.

### Open Electives (6 cr hr)

Students are expected to take a minimum of 6 credits of electives from any areas such as business, economics, fundamental sciences, environmental sciences, etc., to be consistent with their personal MECPI theme or emphasis.

### Optional Engineering Project Sequence (6 cr hr)

Students will define and execute an engineering project through their employer while taking the following 3-semester course sequence (after completion of a minimum of 12 credit hours of CHME coursework toward the MECPI):

- **CHME 595. Chemical Process Design and Business Analysis** (3 credit hours) – Develop and present a proposal to demonstrate grasp of graduate-level chemical industry process design and assessment principles, emphasizing appropriate foundational tools (literature review, patent search, heuristics application, process simulation assistance to process creation, synthesis of reactor and separator trains, second-law analysis, heat and
power integration, process equipment mechanical design specifications, process design optimization, etc., as appropriate to the proposed project), with a requirement that the project include some form of economic and business assessment of the work.

- **CHME 596. Chemical Process Industries Research** (1 credit hour) - Independent project development based on proposal approved in CHME 595.
- **CHME 597. Advanced Chemical Process Industry Analysis** (2 credit hours) - In-depth analysis and defense of a timely commercially-relevant chemical process design, culminating in defense of the work before the MECPI committee.
- MECPI students may replace the project with an additional 6 credit hours of CHME coursework.

Students accepted into the MECPI program may use the online MECPI degree plan proposal form (https://chme.nmsu.edu/academics/grad/mecpi-degree-plan-proposal/) to request a tailored curriculum personalized to their individual needs based on their current or planned employment in the chemical process industries.

**Chemical Process Industry - Master of Engineering in Chemical Process Industry (Online)**

The MECPI is a 30 credit hour coursework and/or project-based degree with flexibility of program design for professionals in the Chemical Process Industry. Proposals for the MECPI may be submitted at https://chme.nmsu.edu/academics/grad/mecpi-degree-plan-proposal/. MECPI requirements are as follows:

**CHME coursework (15 cr hr)**
- minimum of 12 credit hours of coursework with CHME prefixes above the 500-level (not including CHME 595, 596, 597, or any research credits associated with the MS and Ph D), of which at least six hours must come from the core sequence of CHME 501, 506, 516, 542 (or equivalent content approved in advance by the MECPI committee).
- 3-credit hour course in industrial safety is required. CHME 548 is recommended, though other course options with similar content can be proposed.

**Professional Communications (3 cr hr)**
Students must complete a minimum of 3 credit hours in professional communications. CHME 594 (2) and CHME 690 (1) are recommended to fulfill this requirement, but students may propose 500+ level communications courses beyond CHME to fulfill this requirement.

**Open Electives (6 cr hr)**
Students are expected to take a minimum of 6 credits of electives from any areas such as business, economics, fundamental sciences, environmental sciences, etc., to be consistent with their personal MECPI theme or emphasis.

**Optional Engineering Project Sequence (6 cr hr)**
Students will define and execute an engineering project through their employer while taking the following 3-semester course sequence (after completion of a minimum of 12 credit hours of CHME coursework toward the MECPI):

- **CHME 595. Chemical Process Design and Business Analysis** (3 credit hours) – Develop and present a proposal to demonstrate grasp of graduate-level chemical industry process design and assessment principles, emphasizing appropriate foundational tools (literature review, patent search, heuristics application, process simulation assistance to process creation, synthesis of reactor and separator trains, second-law analysis, heat and power integration, process equipment mechanical design specifications, process design optimization, etc., as appropriate to the proposed project), with a requirement that the project include some form of economic and business assessment of the work.
- **CHME 596. Chemical Process Industries Research** (1 credit hour) - Independent project development based on proposal approved in CHME 595.
- **CHME 597. Advanced Chemical Process Industry Analysis** (2 credit hours) - In-depth analysis and defense of a timely commercially-relevant chemical process design, culminating in defense of the work before the MECPI committee.
- MECPI students may replace the project with an additional 6 credit hours of CHME coursework.

Students accepted into the MECPI program may use the online MECPI degree plan proposal form (https://chme.nmsu.edu/academics/grad/mecpi-degree-plan-proposal/) to request a tailored curriculum personalized to their individual needs based on their current or planned employment in the chemical process industries.

**Engineering (Chemical Engineering) - Doctor of Philosophy**

The program of study leading to the Ph.D. is available to students who have either a BS or MS in chemical engineering. Students with a BS must complete 30 course credits and 24 dissertation credits, for a total of 54 credits, including:

- required core CHME courses (14 credits);
- graduate elective courses (12 credits);
- CHME elective courses (3 credits);
- independent research as CHME 698 Ph.D. Research- Level II prior to completion of the comprehensive exam (6 credits);
• dissertation as CHME 700 after completion of the comprehensive exam (18 credits); and
• graduate seminar as CHME 690 Graduate Seminar (1 credit).

Ph.D. students must pass:

1. a qualifying examination within 24 months of starting their Ph.D. studies;
2. a comprehensive examination completed a minimum of nine months prior to the dissertation defense; and
3. an oral defense of the written dissertation before the dissertation committee.

4. PhD candidates in the College of Engineering, who have successfully completed their PhD Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

   Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student’s doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

   Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

### Materials Engineering - Graduate Minor

The Materials Engineering minor at New Mexico State University is part of a materials education program that addresses the growing demand for engineers and scientists with understanding of the wide range of materials, their properties and means of characterization. A student must pass 18 credits of courses with a grade C or better. The minor includes one required course (CHME 361 Engineering Materials), and the balance elective courses chosen from menus available on the Chemical and Materials Engineering website (http://chme.nmsu.edu/academics/minors/materials-engineering/). No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

### Civil Engineering

#### Undergraduate Program Information

#### Mission Statement

The mission of the Civil Engineering Department for the undergraduate program is to offer a high quality and accredited degree that prepares our graduates for professional licensure leading to successful civil engineering careers in the industry and government or for success in graduate education. Toward this end, the Civil Engineering Department will recruit and retain qualified and diverse faculty that are committed to student learning and development, and serve as role models to the undergraduate students.

Continued excellence in our undergraduate program is paramount to our mission by providing a strong technical foundation to our graduates for engineering design and problem solving; preparing quality graduates for licensure and professional careers in civil engineering; implementing modern and effective learning methods; maintaining close student-faculty learning interactions; and instilling life-long learning skills and goals for professional growth after graduation.

#### Program Educational Objectives

Through NMSU’s high-quality accredited civil engineering program, graduates will:

1. Be successfully employed in civil engineering or related careers and will become independent thinkers, ethical leaders, effective communicators, and collaborative professionals.

2. Be prepared to pursue professional licensure, appropriate certifications, graduate degrees, and/or professional development activities by fostering life-long learning skills and strategies.
3. Be competitive with graduates from programs across the world through their experience interacting with recognized faculty and industry professionals, and excelling in intercollegiate activities.

4. Build on fundamental knowledge and apply technical skills across disciplines in civil engineering and related fields to make data-driven decisions using engineering judgement.

**Program Criteria**

The Civil Engineering curriculum is developed based on the program criteria established collaboratively by the Engineering Accreditation Commission (EAC) of ABET Inc. and the American Society of Civil Engineers (ASCE). The curriculum specifically prepares civil engineering students at the baccalaureate level to graduate with the ability to:

1. Apply knowledge of mathematics through differential equations, calculus-based physics, general chemistry, and probability and statistics to assess uncertainty.
2. Analyze and solve problems in various areas of civil engineering.
3. Conduct experiments associated with civil engineering, as well as analyze and interpret the collected data.
4. Design a system, component, or process in various civil engineering contexts considering sustainability.
5. Explain basic concepts related to project management, business, public policy, and leadership.
6. Analyze issues related to professional ethics and explain the importance of professional licensure.

In accordance with the program criteria of ABET and ASCE, the Civil Engineering faculty responsible for teaching design-oriented courses are qualified in their respective professional areas by means of licensure, or a combination of education and design experience. Furthermore, the faculty are given responsibility and sufficient authority to define, revise, implement, and achieve program objectives.

**Graduate Program Information**

**Mission Statement**

The mission of the Civil Engineering Department regarding graduate education is to provide research-based and practice-oriented post-baccalaureate programs leading to Master of Science (M.S.), Master of Engineering (M.E.), and PhD degrees for students in the areas of environmental, geotechnical, structural, transportation, and water resources engineering. Toward this end, the Civil Engineering Department will recruit and retain qualified and diverse faculty that are committed to student learning and development, scholastic and research excellence, and professional service.

Continued excellence in our graduate program is paramount to our mission by providing advanced academic and technical foundations to our graduates; providing interdisciplinary and collaborative research opportunities and teaching experiences; implementing learning methods that promote critical-thinking and problem-solving; seeking external funding to support innovative research and graduate assistantships; and fostering an intellectual and creative environment that values diversity (of people, research and interests) and research ethics.

The Civil Engineering Department offers excellent opportunities for advanced study and professional training in several fields leading to the M.E. in Civil Engineering, M.S. in Civil Engineering, M.S. in Environmental Engineering, and Ph.D. degrees. Students work closely with the faculty on contemporary issues including, but not limited to, evapotranspiration monitoring of crops and riparian vegetation, ground stabilization, groundwater recharge, high performance materials, non-destructive testing and evaluation, remote sensing, renewable energy, resilient infrastructure, reservoir evaporation monitoring, riparian rehabilitation, structural health monitoring, sustainable construction, and water treatment and reuse.

The department has excellent facilities for teaching and research purposes including laboratories for mechanical, chemical and biological research. In addition, the department conducts research at various field sites located throughout New Mexico in collaboration with local, state, and federal agencies. Noteworthy features of the graduate programs are the energetic, highly motivated faculty and the low student-faculty ratio. The department regularly has several ongoing research projects of various size and scope employing graduate students. Teaching and research assistantships are available to qualified students and office space is normally provided to M.S. thesis and PhD students.

Students enrolling for graduate studies in civil engineering must have received a bachelor’s degree in engineering or one of the allied fields. A candidate for the M.S. in Civil Engineering or M.S. in Environmental Engineering degree may choose either a thesis or a non-thesis track. The M.E. in Civil Engineering degree requires only coursework. When a student enrolls for the Ph.D., a doctoral committee is formed to assist the student in planning a program appropriate to the student’s background and goals and to administer the required examinations. All Ph.D. candidates in civil engineering must have a demonstrated proficiency in English and two research tools. Mutual understanding between the Ph.D. candidate and his or her doctoral committee on the final nature of these two research tools will be on an individual basis.

**Master's Accelerated Program**

The Master's Accelerated Program (MAP) option provides students the opportunity to complete a B.S. in Civil Engineering and a master's degree (M.E. in Civil Engineering, M.S. in Civil Engineering or M.S. in Environmental Engineering) with 150 credit hours; the non-accelerated path requires 156 credit hours (B.S. requires 126 credit hours plus the M.E. or M.S. which require 30 credit hours each). Students accepted into this program follow the normal Civil Engineering undergraduate curriculum during their freshmen, sophomore, and junior level semesters. In their senior year, students take
two graduate courses (> 500) in place of two undergraduate electives (> 450). Alternatively, students may petition for the two undergraduate electives (> 450) to be counted towards the master's degree. In either case, the courses must be approved by the department head and completed with at least a grade of B. When students receive their bachelor's degree in Civil Engineering, there are 24 credit hours left for the master's degree which can be completed in 2 to 3 semesters for full-time students. Students must apply for admission during the final semester of their junior year and obtain prior approval by the department head before starting the MAP option.

Degrees for the Department

Bachelor Degree(s)
Bachelor of Science in Civil Engineering (BSCE) (p. 1253)

Master Degree(s)
Master of Engineering in Civil Engineering (MECE) (p. 1258)
Master of Science in Civil Engineering (MSCE) (p. 1261)
Master of Science in Environmental Engineering (MSENVE) (p. 1264)

Doctoral Degree(s)
Engineering (Civil Engineering) - Doctor of Philosophy (p. 1265)

Minors for the Department
Agricultural Engineering - Undergraduate Minor (p. 1256)
Environmental Engineering - Undergraduate Minor (p. 1256)
Structural Engineering - Undergraduate Minor (p. 1257)

Professor David V. Jáuregui¹, Department Head

Professor Lambis Papelis, Associate Department Head

Professors Bandini¹, Jáuregui¹, Khandan¹, Newtson¹, Papelis, Reddi¹ (Dean of College of Engineering), Samani¹, White¹ (Emeritus), Xu; Associate Professors Bawazir, Cortes, Wang; Assistant Professors Choe¹, Dehghan-Niri, Zhang¹

¹ Registered Professional Engineer

Civil Engineering Courses

C E 109. Computer Drafting Fundamentals
3 Credits (2+2P)
Same as DRFT 109, E T 109, SUR 109.

C E 151. Introduction to Civil Engineering
3 Credits (3)
Problem solving and use of computer software for civil engineering applications. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 1220G.

C E 198. Special Topics
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of department head.
C E 233. Mechanics-Statics
3 Credits (3)
Engineering mechanics using vector methods. May be repeated up to 3 credits.
Prerequisite(s): MATH 1521G or MATH 1521H, PHYS 1310G and cumulative GPA of 2.0.

C E 234. Mechanics-Dynamics
3 Credits (3)
Kinematics and dynamic behavior of solid bodies utilizing vector methods. May be repeated up to 3 credits. Crosslisted with: M E 234.
Prerequisite(s): C E 233, MATH 1521G or MATH 1521H, PHYS 1310G.

C E 256. Environmental Engineering and Science
3 Credits (3)
Principles in environmental engineering and science: physical chemical systems and biological processes as applied to pollution control. Crosslisted with: ENVS 2111
Prerequisite: CHEM 1215G and MATH 1511G or ENGR 190.

Learning Outcomes
1. To understand the nature of water quality parameters in the context of Civil Engineering and Environmental Science (Water Treatment/Wastewater Treatment/Environmental Science)
2. To learn to apply engineering and scientific solutions to water quality problems
3. To understand environmental regulations and their consequences on the design of pollution control systems

C E 256 L. Environmental Science Laboratory
1 Credit (1P)
Laboratory experiments associated with the material presented in C E 256. Same as ENVS 2111L.
Corequisite(s): C E 256.

C E 298. Special Topics
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of department head.

C E 301. Mechanics of Materials
3 Credits (3)
Stress, strain, and elasticity of materials. May be repeated up to 3 credits.
Prerequisite(s): C E 233 or M E 236.

C E 311. Civil Engineering Materials
3 Credits (2+3P)
Introduction to the structure, physical properties, testing and mechanical behavior of civil engineering materials and components made from these materials.
Prerequisite: C E 301.

C E 315. Structural Analysis
4 Credits (3+3P)
Classical analysis of determinate and indeterminate structures; introduction to modern methods of structural analysis using computer programs.
Prerequisite(s): C E 301.

C E 331. Fluid Mechanics and Hydraulics
3 Credits (3)
Prerequisite(s): PHYS 1310G, C E 233.

C E 331 L. Fluid Mechanics and Hydraulics Laboratory
1 Credit (1P)
Fundamentals and Theory of Fluid Mechanic, compressible and incompressible flow of fluids in open and closed conduits.
Prerequisite(s)/Corequisite(s): C E 331. Restricted to: C E majors.

C E 355V. Technology and the Global Environment
3 Credits (3)
A scientific basis for understanding changes in the global environment that result through the complex interactions of natural phenomena and the impacts of the activities of man.
Prerequisites: junior or senior standing, and the general education requirements for math and natural sciences.

C E 356. Fundamentals of Environmental Engineering
3 Credits (3)
Introduction to water treatment and water pollution and the analysis and design of selected treatment processes.
Prerequisite(s): C E 256.
C E 357. Soil Mechanics
3 Credits (2+3P)
Engineering properties of soils, consolidation settlement, compaction, water flow through soils, geostatic stresses, soil shear strength, lateral earth pressure, and soil laboratory testing.
Prerequisite(s): C E 160 or GEOL 1110G, and C E 301.

C E 382. Hydraulic and Hydrologic Engineering
3 Credits (3)
Analysis and design of hydraulic systems, including pipe networks, open channels, regulating structures, and pumping systems. Surface water and groundwater hydrology, analysis and design. May be repeated up to 3 credits.
Prerequisite(s): C E 331 and C E 331 L.

C E 398. Special Topics
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of department head.

C E 435. Technical Communication for Engineers
3 Credits (3)
The course addresses the fundamentals of communicating technical information that is clear, concise, and concrete to a wide variety of stakeholder types.

Learning Outcomes
1. Ability to write in a way that is clear. Ability to write in a way that is concise. Ability to write in a way that is concrete.

C E 444. Elements of Steel Design
3 Credits (3)
Analysis and design of tension members, beams, columns, and bolted and welded connections.
Prerequisite(s)/Corequisite(s): C E 311. Prerequisite(s): C E 315.

C E 445. Reinforced Concrete Design
3 Credits (3)
Design and mechanics of structural reinforced concrete members.
Prerequisite(s)/Corequisite(s): C E 311. Prerequisite(s): C E 315.

C E 452. Geohydrology
3-4 Credits (3+1P)
Origin, occurrence, and movement of fluids in porous media and assessment of aquifer characteristics. Development and conservation of ground water resources, design of well fields. Crosslisted with: ENVS 452 and GEOL 452.
Prerequisite(s): Junior or Senior.

C E 454. Wood Design
3 Credits (3)
Theory and design of wood structural members and systems subjected to gravity and lateral loads. Taught every other year, alternates with C E 455, Masonry Design.
Prerequisite(s)/Corequisite(s): C E 311. Prerequisite(s): C E 315.

C E 457. Foundation Design
3 Credits (2+3P)
Application of principles of classical soil mechanics to the design of shallow and deep foundations, and the fundamentals of geotechnical site investigation.
Prerequisite(s): C E 357.

C E 460. Site Investigation
3 Credits (2+2P)
Investigation and characterization of surficial and subsurface geologic materials and ground water for civil engineering projects. Includes exploration program, drilling and sampling, rock and soil classification and logging, groundwater monitoring, profiles, and preparation of geotechnical reports.
Prerequisite(s): C E 357.
Prerequisite(s)/Corequisite(s): C E 457.

C E 469. Structural Systems
3 Credits (3)
Design of structural systems for buildings and bridges. May be repeated up to 3 credits.
Prerequisite(s): C E 444 or C E 445.
C E 470. Design of Municipal and Hazardous Waste Landfills  
3 Credits (3)  
Solid waste and application of geotechnical engineering principles and methods to the site selection and design of municipal and hazardous waste landfills.  
Prerequisite(s): C E 357 and C E 452, or consent of instructor.

C E 471. Transportation Engineering  
3 Credits (3)  
Highway and traffic design and systems. Students must be in junior or senior standing to enroll.  
Prerequisite: MATH 1521G.  
Learning Outcomes  
1. Provide understanding of the principles of transportation engineering with a focus on highway engineering and traffic analysis. Provide basic skill set that will allow a student to address most of the transportation problems that are likely to appear in professional practice and on the Fundamentals of Engineering exam (FE) and the Principles and Practice of Engineering exam (PE). Provide foundation for future coursework in transportation should a student wish to pursue further coursework in the field.

3 Credits (3)  
Engineering economics, construction and project management. 
Prerequisite/Corequisite: C E 357.  
Learning Outcomes  
1. Understand time value of money and be able to perform economic analyses on engineering problems to determine whether a given project is worthwhile or to prioritize multiple alternatives based on present worth. Understand the mathematical and ethical implications of benefit/cost and internal rate of return analyses. Estimate durations and requirements of individual construction tasks. Develop construction schedules using Critical Path Method (CPM). Analysis. Understand the legal and ethical concerns involved in economic analysis and construction engineering.

C E 479. Pavement Analysis and Design  
3 Credits (3)  
Covers stresses and deflections in pavement layers, material characterization, flexible and rigid pavement design by AASHTO, and rehabilitation concepts.  
Prerequisite(s): C E 357.

C E 481. Civil Engineering Capstone Design  
3 Credits (3)  
Culminating multidisciplinary project-oriented capstone design. Ethics, professional development, global issues.  
Prerequisite(s)/Corequisite(s): C E 457, C E 471, C E 477. Prerequisite(s): C E 356, C E 382, and either C E 444 or C E 445.

C E 482. Hydraulic Structures  
3 Credits (3)  
Engineering design of water-regulating structures. Capstone design course. May be repeated up to 3 credits.  
Prerequisite(s)/Corequisite(s): C E 477. Prerequisite(s): C E 382.

C E 483. Surface Water Hydrology  
3 Credits (3)  
Hydrologic cycle and relationships between rainfall and surface water runoff.  
Prerequisite: C E 331 or consent of instructor.

C E 485. Design of Earth Dams  
3 Credits (3)  
Engineering design applied to site selection, foundation inspection and treatment, hydrology and hydraulics, stability, and seepage analysis. Economic and environmental factors. May be repeated up to 3 credits.  
Prerequisite(s): C E 357, C E 382.

C E 497. Senior Seminar  
1 Credit (1)  
Selected topics on the civil engineering profession and orientation for professional practice. Preparation for the FE exam. Students must be able to submit their application for degree while enrolled in this course.  
Learning Outcomes  
1. Prepare students for professional and ethical aspects of employment or graduate studies.

C E 498. Special Topics  
1-3 Credits  
May be repeated for a maximum of 9 credits.  
Prerequisite: consent of department head.
C E 501. Advanced Mechanics of Materials
3 Credits (3)
Study of stress and strain in two and three dimensions, theories of failure, stress concentrations, unsymmetrical bending, curved beams, beams on elastic foundations, column theories, torsion, thick-wall cylinders. Same as M E 501.
Prerequisites: C E 301, MATH 392.

C E 502. Advanced Mechanics of Steel Structures
3 Credits (3)
Advanced structural mechanics applicable to steel structures. Includes inelastic behavior, plastic analysis, column and frame stability and torsion.
Prerequisite: C E 444.

Learning Outcomes
1. Introduce students to advanced topics in structural mechanics of steel structures that are commonly encountered in structural engineering. Provide the background needed to understand the code requirements applicable to problems in plastic design of steel structures.

C E 503. Special Design and Analysis Program
3-6 Credits
Design and analysis covering subject matter of an approved 450 undergraduate departmental course plus an additional report or project. Course may be subtitled in the Schedule of Classes. May be repeated once for a total of 6 credits.
Prerequisite: consent of instructor/committee.

C E 504. Advanced Engineering Design
3 Credits (3)
Advanced engineering design covering subject matter of a selected capstone undergraduate design course plus an additional report or project. May be subtitled.
Prerequisite: consent of instructor/committee.

C E 506. Advanced Soil Mechanics
3 Credits (3)
Stress and strain analyses in soil, stress paths; drained and undrained shear strengths of granular soils and clays, consolidation, liquefaction, soil improvement.
Prerequisite: C E 457 or consent of instructor.

C E 507. Design of Earth Retaining Structures
3 Credits (3)
Lateral earth pressure theory, soil-reinforcement interaction, and analysis and design of rigid and flexible earth retaining structures for support of fills and excavations, including retaining walls, mechanically stabilized earth (MSE) walls, sheet pile walls, anchored walls, tiebacks and soil nailing.
Prerequisites: C E 357.
Prerequisites/Corequisites: C E 457.

C E 508. Advanced Soil Behavior
3 Credits (3)
The course covers particle-scale phenomena that govern the macro-scale behavior of soils. Topics covered in the class include classical concepts as well as contemporary advances in soil mechanics. The students will develop a fundamental understanding of soil-water interaction, theories of contact level deformation, and mass and energy transport through granular media. Consent of Instructor required.
Prerequisites: C E 357 or Instructor Consent.

C E 509. Deep Foundations
3 Credits (3)
Behavior, analysis and design of pile and pier foundations subjected to axial and lateral loads.
Prerequisite: C E 457 or consent of instructor.

C E 510. Introduction to Nondestructive Testing
3 Credits (3)
This course explores the application of different Nondestructive Testing (NDT) methods in material characterization and product qualification.
Prerequisites: C E 311 or CHME 361 or Consent of Instructor.

C E 514. Numerical Methods in Civil Engineering
3 Credits (3)
Mathematical, numerical, and programming foundations of applied numerical methods with a focus on Civil and Environmental Engineering applications using MATLAB.

Learning Outcomes
1. To provide necessary background and skills to use MATLAB as a programming language for engineering problem solving. To introduce classical and some modern methods for civil engineering numerical problem solving. Develop numerical algorithms and programs for solving civil engineering problems involving: (1) multi-dimensional integration, (2) multivariate differentiation, (3) ordinary differential equations, (4) partial differential equations, (5) optimization (6) parameter estimation methods such as linear and nonlinear least square methods.
C E 515. Finite Element Methods
3 Credits (3)
Introduces the finite element method. Topics may include beam, frame, plane stress, plane strain, axisymmetric, and 3-D stress elements. Includes static and dynamic analysis. Uses readily available finite-element software.
Prerequisite: graduate standing or consent of instructor.

C E 531. Open Channel Hydraulics
3 Credits (3)
Theoretical and applied hydraulics of open channels, with emphasis on nonuniform flow, rapidly varied flow, and wave formation.
Prerequisite: C E 382 or consent of instructor.

C E 535. Technical Communication for Engineers
3 Credits (3)
The course addresses the fundamentals of communicating technical information that is clear, concise, and concrete to a wide variety of stakeholder types. Same as C E 435 with differentiated assignments for graduate students.

Learning Outcomes
1. Ability to write in a way that is clear Ability to write in a way that is concise Ability to write in a way that is concrete

C E 544. Advanced Design of Steel Structures
3 Credits (3)
Connection design; beam-column analysis and design; composite construction; and plate girder design.
Prerequisite: C E 444.

Learning Outcomes
1. Introduce students to advanced topics in steel design that are commonly encountered in structural engineering Provide the background needed to practice structural steel design Provide the background needed to understand the code requirements applicable to difficult problems in structural steel design

C E 545. Advanced Concrete Design
3 Credits (3)
Advanced topics in ultimate strength design of reinforced concrete that include: concrete footings, retaining structures, short and long columns, torsion members, deep beams and shear walls, two-way slabs, and shear and moment transfer at slab-column connections.
Prerequisites: C E 445.

Learning Outcomes
1. Introduce students to advanced topics in reinforced concrete design that are commonly encountered in structural engineering Provide the background needed to practice structural concrete design Provide the background needed to understand the code requirements applicable to difficult problems in structural concrete design

C E 547. Bridge Engineering
3 Credits (3)
Topics related to prestressed concrete, reinforced concrete and steel bridge design according to the AASHTO specifications; bridge analysis and evaluation.
Prerequisite: C E 444 or C E 445.

Learning Outcomes
1. Introduce students to topics in bridge design that are commonly encountered in structural engineering Provide the background needed to understand the code requirements applicable to problems in bridge design

C E 554. Wood Design
3 Credits (3)
Theory and design of wood structural members and systems subjected to gravity and lateral loads. Design project required. Taught every other year, alternates with C E 555 - Masonry Design.

C E 557. Water Resources Development
3 Credits (3)
Students function as members of a consulting panel and prepare reports on major water resources development problems. Political, financial, and social aspects of water resources development are considered as well as scientific and technical details.
C E 571. Structural Dynamics
3 Credits (3)
Response of elastic structure to dynamic loading. Moving load, earthquake and blast loading.
Prerequisite: ENGR 234 and C E 315.
Learning Outcomes
1. Introduce students to topics in structural dynamics that are commonly encountered in structural engineering Provide the background needed to understand the code requirements applicable to problems in seismic and blast-resistant design

C E 572. Earthquake Engineering
3 Credits (3)
Earthquake characteristics; seismic loads; elastic and inelastic response; analysis and design of buildings for earthquakes.
Prerequisites: graduate standing and consent of instructor.

C E 579. Ground Improvement
3 Credits (3)
The objective of this course is to introduce common ground improvement techniques, including mechanical (compaction, soil reinforcement, preloading and accelerated consolidation) and chemical (cementing, ion-replacement, polymer bonding) stabilization methods, as well as seepage and dewatering. Emphasis will be placed on developing an understanding of the underlying physical and chemical processes involved in each case.
Prerequisite(s): C E 357.

C E 581. Ground Water Hydrology
3 Credits (3)
Mathematical treatment of water flow in porous media. Emphasis on hydraulics of water movement, including pumping and recharge wells, drainage, and water quality.
Prerequisites: MATH 392, G EN 452, and C E 382, or consent of instructor.

C E 582. Statistical Hydrology
3 Credits (3)
Application of statistical techniques to hydrologic data, including distributions, hypothesis testing, linear models, non-parametrics, and time-series and stochastic models. May be repeated up to 3 credits.

C E 585. Slope Stability Analysis and Design
3 Credits (3)
Design of earth slopes, causes of instability, limit equilibrium methods, slope reinforcement (geosynthetics soil nailing, tiebacks), seismic analysis, rock slope stability. Consent of instructor required.
Learning Outcomes
1. Be familiar with the implications of drainage conditions and pore water pressure in the soil as they relate to soil shear strength and slope stability.
   Be able to recognize the differences between short-term and long-term analyses (total versus effective stress analyses) applied to slope stability. Be able to perform hand calculations of slope stability for very simple cases. Be familiar with the set of input data usually required to perform stability analyses using software. Be able to design soil slopes with various soil profiles and geometry and reinforcement using slope stability software. Recognize and understand the effects of geologic and groundwater conditions on the stability of soil slopes. Understand the mechanisms by which the most common methods of slope stabilization work (tie-backs, soil nailing, geosynthetics).

C E 596. Special Topics
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of department head.

C E 598. Special Research Programs
1-3 Credits
Individual investigations either analytical or experimental. May be subtitled. Maximum of 3 credits per semester.

C E 599. Master's Thesis
1-15 Credits
Thesis.

C E 600. Doctoral Research
1-15 Credits
Research.

C E 604. Advanced Engineering Topics
3 Credits (3)
In depth study of a topic at the forefront of environmental engineering & science. Journal papers will be critically reviewed and students will be asked to write an analysis of the topic and present their thoughts orally.
C E 614. Advanced Numerical Methods in Civil Engineering
3 Credits (3)
Advanced mathematical, numerical, and programming for applied numerical methods with a focus on Civil and Environmental Engineering applications using MATLAB. Same as C E 514 with differentiated material and assignments for C E 614 students.

**Learning Outcomes**

1. To provide necessary background and skills to use MATLAB as a programming language for engineering problem solving. To introduce classical and some modern methods for civil engineering numerical problem solving. Develop numerical algorithms and programs for solving civil engineering problems involving: (1) multi-dimensional integration, (2) multivariate differentiation, (3) ordinary differential equations, (4) partial differential equations, (5) optimization (6) parameter estimation methods such as linear and nonlinear least square methods, and (7) time series analysis such as Fourier transform, wavelet, and basic filtering.

C E 615. Advanced Finite Element Methods
3 Credits (3)
Finite element method with emphasis on stress analysis. May include development and use of plane stress, plane strain, and 3-D and shell elements. Includes static, dynamic, and nonlinear analysis.

**Prerequisite:** graduate standing.

C E 682. Topics in Hydrodynamics II
3 Credits (3)
Selected topics in hydrometeorology, including the transfer of water and energy between the land surface and the lower atmosphere.

**Learning Outcomes**

1. This course helps lay the foundation for theoretical concepts useful in measurement, analysis and estimation of evaporation/evapotranspiration. Students learn some of the theoretical concepts and relationships useful in the phenomenon of evaporation as well as gain some field experience on measurement of evapotranspiration and open water evaporation.

C E 698. Special Research Programs
1-3 Credits
May be subtitled. May be repeated for a maximum of 9 credits.

C E 700. Doctoral Dissertation
1-15 Credits
Dissertation.

**Environmental Engineering Courses**

ENVE 450. Aquatic Chemistry
3 Credits (3)
Theoretical aspects of physical chemistry applied to the solution of environmental engineering problems. Emphasis on acid-base reactions, precipitation-dissolution reactions, complexation, and redox reactions. Same as ENVE 550.

**Prerequisite:** C E 256.

**Learning Outcomes**

1. Students will be able to use fundamental principles of physical chemistry as applied to acid-base, precipitation-dissolution, complexation, and redox reactions to determine the composition of waters, including natural waters and waters encountered in water and wastewater treatment processes.

ENVE 451. Unit Processes/Operation of Water Treatment
3 Credits (3)
Theory and applications of unit processes in environmental engineering. Physical and chemical water treatment methods are emphasized. Crosslisted with: ENVE 551.

**Prerequisite:** C E 356.

**Learning Outcomes**

1. Students will be able to use fundamental reactor design principles to design unit operations for water treatment, including sedimentation, coagulation, flocculation, filtration, and disinfection.

ENVE 452. Unit Processes/Operation of Wastewater Treatment
3 Credits (3)
Theory and applications of unit processes in environmental engineering. Biological wastewater treatment methods are emphasized. Crosslisted with: ENVE 552.

**Prerequisite:** C E 356.

**Learning Outcomes**

1. Students will be able to use fundamental reactor design principles to design unit operations for wastewater treatment, including sedimentation, aerobic and anaerobic microbial treatment, and disinfection.
ENVE 456. Environmental Engineering Design  
3 Credits (3)  
Design of chemical, physical, and biological operations and processes involved in water and wastewater treatment. Student can also be a graduate student to enroll if they have not completed C E 356.  
Prerequisite: C E 356.  
Learning Outcomes  
1. Students will be able to incorporate knowledge from previously taken engineering design and economics courses to complete an environmental design and solve a real world problem. Students will be able to communicate and explain their solution approach to a variety of audiences using different communication methods.

ENVE 459. Environmental Microbiology  
3 Credits (3)  
An introduction to the diverse roles of microorganisms in natural and engineered environments. The topics include cellular architecture, energetics, and growth; population and community dynamics; water and soil microbiology; biogeochemical cycling; and microorganisms in biodegradation and bioremediation of contaminants. Students must be a Senior or in Graduate Standing to enroll.  
Learning Outcomes  
1. Students will be able to demonstrate the significance of microbial processes in natural and engineered processes.

ENVE 487. Air Pollution Control Systems Design  
3 Credits (3)  
An introduction to sources and nature of air pollution, regulations, and risk analysis. Detailed study of air pollution control technologies and design of air pollution control equipment. Students must be a Senior or in graduate standing to enroll.  
Learning Outcomes  
1. Students will be able to explain the source and nature of air pollution. Students will be able to relate air pollution to regulations using a risk analysis approach. Students will be able to design air pollution control systems.

ENVE 504. Advanced Environmental Engineering Design  
3 Credits (3)  
Advanced engineering design covering the subject matter of the Environmental Engineering capstone undergraduate design course plus an additional report or project. May be subtitled. Consent of instructor required.  
Learning Outcomes  
1. Students will be able to incorporate knowledge from previously taken engineering design and economics courses to complete an environmental design and solve a real world problem. Students will be able to communicate and explain their solution approach to a variety of audiences using different communication methods.

ENVE 550. Aquatic Chemistry  
3 Credits (3)  
Theoretical aspects of physical chemistry applied to the solution of environmental engineering problems. Emphasis on carbonate equilibria solubility, buffering and redox conditions. May be repeated up to 3 credits. Consent of Instructor required. Crosslisted with: ENVE 450.  
Prerequisite(s): C E 256.

ENVE 551. Unit Processes/Operation of Water Treatment  
3 Credits (3)  
Theory and applications with unit processes in environmental engineering. Physical / chemical treatment methods emphasized. May be repeated up to 3 credits. Crosslisted with: ENVE 451.  
Prerequisite(s): C E 356.

ENVE 552. Unit Processes/Operation of Wastewater Treatment  
3 Credits (3)  
Theory and applications with unit processes in environmental engineering. Biological treatment methods emphasized. May be repeated up to 3 credits. Crosslisted with: ENVE 452.  
Prerequisite(s): Consent of instructor.
ENVE 556. Advanced Water Treatment and Reuse
3 Credits (3)
Overview of both the theoretical and practical aspects of advanced water treatment technologies and water reuse applications. Basic design features of the processes are presented, with emphasis on the underlying principles, including why and how a process works, what the significant variables are, and what the limitations of the process are. Problem solving skills and technical communication skills are emphasized.
Prerequisite: ENVE 551.
Learning Outcomes
1. Students will be able to design advanced water treatment processes, including membrane filtration, electrodialysis, ion exchange, advanced oxidation, photolysis, and distillation. Students will gain knowledge in water reuse applications including water quality criteria, regulations, and implementation issues.

ENVE 557. Surface Water Quality Modeling
3 Credits (3)
Modeling the impacts of waste disposal practices on surface waters. Emphasis on fate and transport of bacteria, dissolved oxygen, nutrients, and toxics in rivers, lakes, and tidal waters. Students must be in Graduate standing to enroll.
Learning Outcomes
1. The students will be able to use mathematical models to model the transport of constituents important for water quality, such as bacteria, viruses, nutrients, contaminants, and oxygen, in aqueous environments.

ENVE 598. Special Research Programs
1-3 Credits
Individual investigations either analytical or experimental. May be repeated up to 6 credits.

ENVE 599. Master’s Thesis
15 Credits
Thesis. May be repeated for a maximum of 6 credits.

ENVE 630. Fate and Transport of Environmental Contaminants
3 Credits (3)
Modeling of transport phenomena in natural and engineered systems for predicting the fate of contaminants in the air, soil, sediment, and water compartments of the ecosystem.
Prerequisite: ENVE 557.
Learning Outcomes
1. The students will be able to use mathematical models to model the transport of contaminants in gas, aqueous, and soil environments.

Agricultural Engineering Courses

A EN 459. Groundwater, Wells & Pumps
3 Credits (3)
Occurrence and movement of groundwater; design of water wells; selection and specification of pumps and power units.
Prerequisite: C E 382.
Learning Outcomes
1. Understand the occurrence and movement of groundwater in aquifers, and extraction of it. Ability to interpret pump specifications and data Select and detail power units for pumping systems

A EN 478. Irrigation and Drainage Engineering
3 Credits (2+3P)
Design and operation of surface and sprinkler irrigation systems; pumping and conveyances; introduction to principles and practices of drainage systems and wells.
Prerequisite: C E 382 or consent of instructor.

A EN 498. Special Topics
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

Department Head: David V. Jáuregui, PhD, PE
Administrative Assistant: Irma Morales
Associate Engineer: Stefan Perez
Program Coordinator: MaryLouise Pino
Civil Engineering - Bachelor of Science in Civil Engineering

Requirements (126 Credits)

In addition to the university requirements for graduation, all students including transfers must satisfy the requirements contained in the academic policies for the NMSU College of Engineering. Students must have a 2.0 grade-point average in all departmental courses and all prerequisites and co-requisites must be taken as required. If a student takes a class and a co-requisite for that class at the same time and does not achieve a grade of C- or better in the co-requisite, the student may take no further classes for which the course or the co-requisite are prerequisite. A student who completes a class three times without achieving a grade of C- or better will be dismissed from the Civil Engineering program, and not allowed to take any Civil Engineering courses from the department.

Students must complete all University degree requirements, which include the following: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 126 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements or elective credits, but may be needed for enrollment in the necessary English and Mathematics coursework.

**Elective Courses**

Choose two from the following: 6

- A EN 459  Groundwater, Wells & Pumps
- A EN 478  Irrigation and Drainage Engineering
- C E 444  Elements of Steel Design
- C E 452  Geohydrology
- C E 454  Wood Design
- C E 460  Design of Municipal and Hazardous Waste Landfills
- C E 479  Pavement Analysis and Design
- C E 483  Surface Water Hydrology
- C E 544  Advanced Design of Steel Structures
- C E 545  Advanced Concrete Design
- ENVE 450  Aquatic Chemistry
- ENVE 451  Unit Processes/Operation of Water Treatment
- ENVE 452  Unit Processes/Operation of Wastewater Treatment
- ENVE 487  Air Pollution Control Systems Design

**Capstone Design Course**

Choose one from the following: 3

- C E 469  Structural Systems
- C E 482  Hydraulic Structures
- C E 485  Design of Earth Dams
- ENVE 456  Environmental Engineering Design

**Second Language: (not required)**

Electives, to bring the total credits to 126 0

**Total Credits** 126

---

1. See the General Education (p. 123) section of the catalog for a full list of courses.
2. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to complete prerequisite(s) prior to enrolling in this course depending on math placement.
3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

1. Courses are typically taught in the Fall semester.
2. Courses are typically taught in the Fall, Spring and Summer semesters.
3. Courses are typically taught in the Fall and Spring semesters.
4. See the Viewing a Wider World (p. 130) section of the catalog to see a full list of courses.
5. Math Placement: MATH 1511G Calculus and Analytic Geometry I is the starting Math course for the degree but students may need to complete any prerequisites prior to enrolling in this course depending on math placement.
6. See the General Education (p. 123) section of the catalog for a full list of courses.
7. Courses are typically taught in the Fall and Summer semesters.
8. See your advisor for more detailed information about selecting elective courses that are approved to fulfill this requirement.
9. Courses are typically taught in the Spring semester.

### Environmental Engineering - Undergraduate Minor

This minor will build upon existing B.S. degree programs at NMSU in engineering and environmental science, and provides further preparation in modern and emerging technologies for upgrading the Nation's ageing utilities and infrastructure in the water, energy, and environment sectors. It includes 3 required courses (9 credits) from civil and environmental engineering, and 3 elective courses (9-10 credits) from civil engineering, environmental engineering, environmental science, and/or engineering technology.

ENVE 456  Environmental Engineering Design

**Elective courses (3 courses)**

To be selected from the following list of courses (numbered 300-499)

### Upper level courses in Civil Engineering
- C E 355V Technology and the Global Environment
- ENVE 450 Aquatic Chemistry
- ENVE 451 Unit Processes/Operation of Water Treatment
- ENVE 452 Unit Processes/Operation of Wastewater Treatment
- ENVE 459 Environmental Microbiology
- ENVE 487 Air Pollution Control Systems Design

### Upper level courses in Environmental Science
- ENVS 452 Geohydrology
- ENVS 462 Sampling and Analysis of Environmental Contaminants
- ENVS 470 Environmental Impacts of Land Use and Contaminant Remediation

### Upper level courses in Engineering Technology
- E T 381 Renewable Energy Technologies
- E T 382 Solar Energy Technologies
- E T 384 Wind and Water Energy Technologies
- E T 386 Sustainable Construction and Green Building Design

**Total Credits** 18-19

1. Cross-listed with ENVS 2111 Environmental Engineering and Science
2. May all be taken in same department or different departments
3. Courses numbered 450 and above may be used to satisfy course requirements for the accelerated master's degree program (requires department head approval and maximum of 6 credits)
4. Cross-listed with C E 452 Geohydrology

## Structural Engineering - Undergraduate Minor

This minor builds upon existing B.S. degree programs at NMSU in analysis, construction, and design of civil, mechanical, and aerospace structures. It includes 3 required courses (10 credits) from civil engineering and 3 elective courses (9-10 credits) from civil engineering, aerospace/mechanical engineering, and/or engineering technology.

Civil Engineering - Master of Engineering in Civil Engineering

The Master of Engineering degree in Civil Engineering (M.E. in CE) is a coursework only degree and several courses are offered online. The M.E. in CE degree requires a total of 30-31 credit hours consisting of one professional communications course (3 credit hours); seven technical electives in Civil, Environmental, and/or Agricultural Engineering (21-22 credit hours); and two electives from engineering disciplines outside the department and/or other areas of interest outside the college (6 credit hours).

1. Course offered online in the Fall, Spring, or Summer semester
2. Electives should be chosen from at least 2 different areas (e.g., geotechnical and structural, environmental and water resources/agricultural)
3. Up to 12 credit hours of undergraduate courses numbered 450-499 may be applied towards the M.E. in CE degree
4. Courses listed represent only a partial list of engineering electives that may be taken outside the department; courses in other areas of interest outside the college may be taken including, but not limited to, environmental science, mathematics, statistics, geography, soil science, geology, business, economics, and management (all M.E. in CE electives must be approved by graduate advisor and department head).

Civil Engineering - Master of Engineering in Civil Engineering (Online)

The Master of Engineering degree in Civil Engineering (M.E. in CE) is a coursework only degree and several courses are offered online. The M.E. in CE degree requires a total of 30-31 credit hours consisting of one professional communications course (3 credit hours); seven technical electives in Civil, Environmental, and/or Agricultural Engineering (21-22 credit hours); and two electives from engineering disciplines outside the department and/or other areas of interest outside the college (6 credit hours).

Civil Engineering - Master of Science in Civil Engineering

In support of the mission and vision statements for the graduate program, the department adopts the following goals for the Master of Science (M.S.) in Civil Engineering degree:

1. Prepare students to fulfill the academic prerequisites specified by the Americans Society of Civil Engineers (ASCE) for Licensure and Professional Practice in Civil Engineering.
2. Prepare students to attain the Body of Knowledge specified by ASCE necessary for entry into the practice of civil engineering at the professional level.
3. Prepare students in conducting applied research in areas relevant to the practice of civil engineering.
4. Prepare students for advanced graduate studies towards a terminal degree.

Students may choose from the geotechnical, structural, or water resources engineering options following the Thesis or Non-Thesis track, requirements of which are specified below. Exceptions to these requirements must be approved by the head of the department. Further information related to the M.S. degree may be found under the Academic Programs of Study (p. 55) section of the catalog.

Select 3 credits from courses outside the area or department (450 or higher) 2

1 Course offered online in the Fall, Spring, or Summer semester
2 Electives should be chosen from at least 2 different areas (e.g., geotechnical and structural, environmental and water resources/agricultural)
3 Up to 12 credit hours of undergraduate courses numbered 450-499 may be applied towards the M.E. in CE degree
4 Courses listed represent only a partial list of engineering electives that may be taken outside the department; courses in other areas of interest outside the college may be taken including, but not limited to, environmental science, mathematics, statistics, geography, soil science, geology, business, economics, and management (all M.E. in CE electives must be approved by graduate advisor and department head)
## Research Credits

### Total Credits

<table>
<thead>
<tr>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>30-31</td>
</tr>
</tbody>
</table>

### Notes

1. A course listed as core may be taken as one of the four optional courses if it is not counted already as one of the three core courses.
2. The optional course outside the area or department must be previously approved by the academic advisor or student's Graduate Committee.
3. A maximum of 6 credits are counted toward the Master's Degree program.
4. A course listed as background provides fundamental knowledge to pursue graduate studies in geotechnical engineering but does not satisfy the course requirements for the MS degree (exception: CE 457).

**Total credits needed for the Thesis Track are 24 credits of coursework and 6 credits of C E 599 Master's Thesis research.**

## Non-Thesis Track

The background and core courses for the Non-Thesis Track in Geotechnical Engineering are the same as those listed under the Thesis Track. Under optional courses, Non-Thesis students must select one additional course (i.e., total of five optional courses) from the list provided for the Thesis Track. In addition, Non-Thesis students must complete 3 credits of CE 598 - Special Research Programs in place of 6 credits of CE 599 and pass a final exit exam covering coursework and their research project.

**Total credits needed for the Non-Thesis Track are 27 credits of coursework and 3 credits of C E 598 Special Research Programs.**

## Option: Structural Engineering

Electives outside College of Engineering: A ST, AECC, GEOG, GEOL, MATH, STAT, and SOIL (must be approved by the Advisor and Committee Members).

Notes:

1. International students must be registered at least 9 credits per semester.
2. International students may be required to take English language courses to show proficiency in English.
3. At least half of the credits of the Master’s Degree program must be 500 level or higher.

Environmental Engineering - Master of Science in Environmental Engineering

Environmental engineering at New Mexico State University provides unique educational and research opportunities at the graduate level in the fields of water quality, aquatic chemistry, environmental microbiology, water treatment, water pollution control, wastewater treatment reclamation and reuse, desalination, industrial, hazardous, and solid waste management, groundwater remediation, contaminant fate and transport, resource recovery from waste streams, air pollution control, waste minimization, and pollution prevention. Therefore, course offerings emphasize basic engineering and scientific principles, as well as the design and application of environmental engineering unit operations and processes. Special problems and thesis research are closely matched with faculty expertise and the professional goals of graduate students. The programs of study are specifically designed for individual students, taking advantage of not only the program capabilities, but also of the complementary activities of the university as a whole as well as the student’s professional experience and work environment.

Graduate students satisfy degree requirements in environmental engineering by completing specific core course work. Course work in the graduate program includes the following:

- water and wastewater treatment
- solid and hazardous waste systems design
- environmental chemistry
- environmental microbiology
- environmental contaminant analysis
- industrial pollution control
- fate and transport of pollutants in engineered and natural systems and water quality in surface water and groundwater systems

Additional topics of interest to the students are offered through special topics classes and by courses taught outside of the College of Engineering.

The Master of Science (M.S.) program in Environmental Engineering requires either a thesis or non-thesis practice oriented experience. The thesis track consists of a minimum of 30 semester credit hours, including 6 credit hours of thesis. The non-thesis track is designed primarily for students who are working full time in engineering practice, but is also available to students working part time. This track consists of 30 semester credit hours, including
6 credit hours of an engineering practicum (ENVE 598 Special Research Programs) of which up to 3 credit hours can be earned for a professional engineering design experience. Transfer credit for courses taken elsewhere is evaluated on an individual basis. Up to 6 semester hours of graduate level courses may be used to satisfy M.S. degree requirements provided that the credits were not used towards another degree.

Required Curriculum

The graduate environmental engineering program of the Civil Engineering Department expects all M.S. students to meet certain requirements in pursuit of an advanced degree. Some of these requirements are related to the quantity, level, and quality of coursework. This Graduate Catalog details what is expected as a minimum for graduation, but it is up to the student and his/her advisor and graduate committee to determine the program of study for the student. The student and his/her advisor will create this program of study in the first semester of graduate work.

Students desiring to work toward an advanced degree in environmental engineering must have completed undergraduate preparation similar to that required for a Bachelor of Science degree in an ABET accredited engineering program or must have adequate background, as determined by the graduate faculty of the program. The background courses listed below may be required if the student did not take a similar course at the undergraduate level, as determined by the graduate faculty of the program.

Environmental engineering faculty will form a committee for every entering student. The faculty will evaluate the student's record and determine which deficiencies or core courses, if any, are needed by the student. The required curriculum consists of 12 credit hours of core courses, 6 credit hours of Master’s Thesis (thesis track) or Special Research Programs (non-thesis track), and 12 credit hours of elective courses. For all professional non-thesis programs, the department head will review the committee's decision.

Professional Development Electives for the Non-Thesis Track (outside the College of Engineering)

For students pursuing the non-thesis track, a minimum of 6 credit hours in graduate-level communications, management, economics, or other relevant disciplines are required as part of the 12 elective credit hour requirement. These courses will be selected by the student and must be approved by the student’s advisor and graduate committee.

Engineering (Civil Engineering) - Doctor of Philosophy

In support of the mission and vision statements for the graduate program, the Civil Engineering Department adopts the following goals for the Doctor of Philosophy (Ph.D.) degree:

1. Prepare students to develop and conduct fundamental and applied research to generate innovative and original solutions for civil engineering problems.
2. Prepare students for research-based professional careers or academic careers in the civil engineering discipline.
3. Develop a culture of research/teaching scholarship among students.

Students may specialize in environmental, geotechnical, structural, transportation, or water resources engineering. Further information related to the Ph.D. degree may be found under the Academic Programs of Study (p. 55) section of the catalog.
Additional Requirements

Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

- **Paper #1:** An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student’s doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

- **Paper #2:** An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Electrical and Computer Engineering

Undergraduate Program Information

Overview

The undergraduate electrical engineering program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc., and stresses the development of analytical tools and physical concepts required to prepare students for immediate employment or graduate study. The program is flexible, allowing students to choose elective coursework towards concentrations in:

- communications and signal processing,
- computers and microelectronics,
- control and power,
- electromagnetics and photonics, or
- space systems.

Alternatively, students can select "no concentration" for the greatest flexibility in course selection.

Undergraduate Electrical Engineering Program Educational Objectives

The Klipsch School is dedicated to providing a quality, hands-on, educational experience for our students. Below are the program educational objectives (PEOs) that describe the expected accomplishments of graduates during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.
2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

Related Areas of Study

Electrical and computer engineering students wishing to broaden their educational experience may elect to earn additional bachelor’s degrees in

- Engineering Physics
- Computer Science
- Mathematics
- Physics

Klipsch School students may also choose to earn a minor in one or more of the following fields:

- Computer Engineering
- Computer Science
- Mathematics
- Physics

Students must consult with an academic advisor in the offering department for specific requirements related to additional degrees and minors.

Transfer Credit

Credit earned at other institutions is generally accepted; however the following restrictions apply to transfer credits:

- Engineering credit must be earned at an ABET accredited school.
- Physics must be calculus based.
- If the NMSU requirement includes a lab, the transfer credit must include a lab.
- A grade of C-, or better, must have been earned.
• E E Courses numbered 300 or higher, Cornerstone and Capstone courses may not be transferred.
• Transfer credits for courses above 300 level are NOT ACCEPTED.

Master's Accelerated (BS/MS) Program (MAP)

Undergraduate students may apply for acceptance to the Master's Accelerated Program (MAP) after completing 60 semester hours of undergraduate coursework of which a minimum of 25 credit hours must be completed at NMSU. The GPA must be 3.0 or above. The students must meet all other requirements as specified by the program. The MAP program allows up to 12 credits of NMSU coursework (450 level or higher) taken during the undergraduate years to be counted toward the master's program of study. Students must receive a grade of B or higher in the courses to be counted for the graduate degree. The courses must logically fit into the master’s program. More information and the application for the MAP program can be found at: https://honors.nmsu.edu/masters-accelerated-program-map/

Graduate Program Information

Overview

The Klipsch School of Electrical and Computer Engineering offers graduate work leading to the Master of Science and Doctor of Philosophy degrees. Areas of emphasis for masters and doctoral students are:

• communications,
• computer engineering,
• digital signal processing,
• electromagnetics,
• electric energy systems,
• photonics, and
• microelectronics/VLSI.

Research in the above areas currently being conducted by the faculty ensures that doctoral candidates will work on the frontier of knowledge in these areas. The graduate programs are intended to provide broad graduate-level training in electrical engineering. In addition, appropriate courses in computer science, industrial engineering, mathematics, physics and business management may be integrated into a graduate student's program of study.

Students desiring to work toward an advanced degree in electrical engineering must have completed undergraduate preparation substantially equivalent to that required for the Bachelor of Science in Electrical Engineering degree at this institution. For students with undergraduate degrees in other disciplines, see below. For further information on the Klipsch School of Electrical and Computer Engineering, please consult the web page http://www.ece.nmsu.edu/ (http://ece.nmsu.edu).

Faculty Research Interests

• Machine Learning: Image Processing and Application Of Machine Learning and Deep Learning To Image Analysis, Focusing on Astronomy And Biomedical Image Analysis, Health Care, and Defense.

Support for Graduate Students

A number of teaching assistantships, research assistantships and fellowships are available. Teaching assistants are recommended by individual faculty for selection by the ECE Department’s Graduate Studies Committee. International students must pass university screening prior to being eligible for
selection as a TA. Nominations for new TAs are made by the advisor after a student is admitted. Research assistants are hired directly by the faculty member who has received a contract or grant for research.

The College of Engineering awards graduate scholarships and fellowships on behalf of Electrical and Computer Engineering. These include:

- the MIT/Lincoln Laboratory Fellowship,
- the Paul and Valerie Klipsch Grad Scholarship,
- the Admiral Paul Arthur Grad Scholarship, and
- the Barry Neil Rappaport Grad Scholarship.

Applications can be completed on-line at https://scholarships.nmsu.edu/. The priority deadline for the Scholar Dollar$ is March 1st. The Electrical Utility Management Program has a limited number of fellowships for students interested in pursuing master’s degrees in electrical energy systems.

**Admission**

Prospective graduate students for the Master of Science or Doctor of Philosophy in Electrical Engineering must first meet the entrance requirements of the Graduate School. The prospective US graduate student should make formal application to the Graduate Student Services office (http://gradschool.nmsu.edu/). International graduate students must start with the Admissions Office (https://isss.nmsu.edu/admissions). Official transcripts from all undergraduate and graduate institutions must be sent directly to the Graduate School. In addition, the student must arrange to have an official copy of the GRE (Graduate Record Examination) General Test scores sent to the Graduate School. International students must also submit their TOEFL (Test of English as a Foreign Language) scores. If the applicant meets the Graduate School’s minimum requirements, the application is sent to the Klipsch School’s Graduate Studies Committee for review. U.S. residents are given every chance of being successful in the pursuit of a graduate degree. If they do not meet the requirements of the Klipsch School, they can enter the Graduate School as "undeclared" where they must demonstrate competence in two or more graduate-level EE courses before they re-apply.

**Requirements for Students Without BSEE Degree or Equivalent**

Students without a BSEE degree or equivalent preparation will be expected to take classes covering the core knowledge required in our BSEE program. This includes mathematics through differential equations and basic engineering physics. The student’s graduate advisor will prepare an individualized deficiency schedule, based on the student’s academic background and work experience.

The following courses from our undergraduate program will be considered deficiencies for students without a BSEE

**Degrees for the Department**

**Bachelor Degree(s)**

Electrical Engineering (No Concentration) - Bachelor of Science in Electrical Engineering (p. 1281)

Electrical Engineering (Communications & Signal Processing) - Bachelor of Science in Electrical Engineering (p. 1284)

Electrical Engineering (Computers & Microelectronics) - Bachelor of Science in Electrical Engineering (p. 1288)

Electrical Engineering (Control & Power) - Bachelor of Science in Electrical Engineering (p. 1291)

Electrical Engineering (Electromagnetics & Photonics) - Bachelor of Science in Electrical Engineering (p. 1295)

Electrical Engineering (Space Systems) - Bachelor of Science in Electrical Engineering (p. 1298)
Master Degree(s)
Electrical Engineering - Master of Engineering (Coursework) (p. 1303)
Electrical Engineering - Master of Science in Electrical Engineering (Thesis or Technical Report) (p. 1308)

Doctoral Degree(s)
Engineering (Electrical Engineering) - Doctor of Philosophy (p. 1312)

Minors for the Department
Computer Engineering - Undergraduate Minor (p. 1302)
Electrical Engineering - Undergraduate Minor (p. 1302)

Graduate Certificates in the Department
Digital Communications - Graduate Certificate (p. 1313)
Digital Signal Processing - Graduate Certificate (p. 1313)
Electric Energy Systems - Graduate Certificate (p. 1314)
Telemetry - Graduate Certificate (p. 1314)

Interim Department Head, Steve Stochaj
Professors Borah, Creusere, DeLeon, Ng, Ramirez-Angulo, Ranade, Stochaj, Voelz;
Associate Professors Boucheron, Cho, Dawood, Furth, Huang, Prasad, Tang;
Assistant Professors Badawy, Che, Lavrova, Mitchell, Sandoval;
College Assistant Professors Boehmer;
Emeritus Professors Carden, Giles, Sheila Horan, Stephen Horan, Johnson¹, Jordan, Kersting, Ludeman, Merrill, Reinfelds, Smolleck¹, Steelman¹, Taylor
¹ Registered Professional Engineer (NM)

Electrical Engineering Courses
E E 200. Linear Algebra, Probability and Statistics Applications
4 Credits (3+3P)
The theory of linear algebra (vectors and matrices) and probability (random variables and random processes) with application to electrical engineering. Computer programming to solve problems in linear algebra and probability.
Prerequisite: C- or better in ENGR 140 and (MATH 1521G or MATH 1521H or ENGR 190).
Learning Outcomes
1. Perform vector and matrix operations, including matrix inversion, eigen analysis, finding basis and dimension of vector spaces and rank of a matrix, and solving a set of linear equations. Calculate probabilities using probability mass, density, and cumulative distribution functions for single and multiple, discrete and continuous random variables, and relate them to electrical engineering applications. Perform simple parameter estimation, such as finding sample mean and variance, and relate to confidence intervals. Describe random processes in the context of signal processing and communications systems problems. Use MATLAB to solve problems involving linear algebra and probability, including designing and performing simple numerical experiments.

E E 240. Multivariate and Vector Calculus Applications
3 Credits (3)
Vector algebra, cylindrical and spherical coordinates, partial derivatives, multiple integrals. Calculus of vector functions through electrostatic applications. Divergence, gradient, curl, divergence theorem, Stokes’s theorem, Coulomb’s Law, Gauss’s Law, electric field, electric potential. Applications in Matlab.
Prerequisite: C- or better in (MATH 1521G or MATH 1521H or ENGR 190) and ENGR 140.
Learning Outcomes
1. Students will demonstrate conceptual understanding of the fundamental principles and theories in vector calculus Students will analyze and solve problems using vector calculus in three coordinate systems
E E 300. Cornerstone Design
2 Credits (1+3P)
Application and realization of engineering principles to a guided team-based design project. Formulation and implementation of test procedures, evaluation of alternate solutions and oral and written communication of the design and test results. Restricted to: E E majors. Restricted to Las Cruces campus only.
Prerequisite: C- or better in ENGR 140 and ENGR 230.
Learning Outcomes
1. Formulate and implement test procedures for validation of requirements. Evaluate alternative design solutions. Document test procedures and design solutions. Implement design to include a printed-circuit board, electronics and coding.
2. Communicate the design and validation both orally and in writing to a wide range of target audiences. Work in teams.

E E 317. Semiconductor Devices and Electronics I
4 Credits (3+3P)
Analysis and design of opamp circuits, diode circuits and single-transistor MOS and BJT amplifiers. Introduction to solid-slate semiconductor devices.
Prerequisite: C- or better in ENGR 230 and CHEM 1215G.
Learning Outcomes
2. multi-meters, and oscilloscopes. Writing and documenting laboratory results.

E E 320. Signals and Systems I
3 Credits (3)
Introduction to the modeling and analysis of continuous- and discrete-time signals and systems using time- and frequency-domain methods suitable for both mathematical approaches and computer-aided simulations.
Prerequisite: C- or better in E E 200 and ENGR 230.
Prerequisite/Corequisite: MATH 392.
Learning Outcomes
1. Understand different types of signals (continuous-time, discrete-time, periodic, etc.) and how these signals are represented mathematically and in a computer. Understand systems representations (e.g., impulse responses), implementations (e.g., convolution and difference/differential equations), and properties (e.g., linearity). Gain insight into transform-domain analysis for signals and systems. Develop the ability to apply transform domain and LTI analysis to simple applications in signal processing, communications, and controls using Matlab.

E E 325. Signals and Systems II
4 Credits (3+3P)
Introduction to communication systems including amplitude and frequency modulation. Introduction to control systems including linear feedback systems, root-locus analysis, and graphical representations. Introduction to digital signal processing including sampling, digital filtering, and spectral analysis.
Prerequisite: C- or better in E E 320 and MATH 392.
Learning Outcomes
1. To model, analyze, simulate, and perform calculations with continuous- and discrete-time systems. To develop an understanding of basic modulations in communication systems. To gain insight into the basics of control systems. To develop insight into filtering and analysis of digital signals. To learn how to use MATLAB and SIMULINK to perform analysis, design, and simulation of communication, control, and signal processing systems.

E E 333. AC Circuit Analysis and Introduction to Power Systems
3 Credits (2+3P)
Steady-state analysis of AC circuits, three-phase circuits, and an introduction to power systems.
Prerequisite: C- or better in ENGR 230.
Learning Outcomes
1. To introduce students to the basic structure and requirements of any electric power supply system and the nature of power systems engineering and the profession which will establish background for further studies in power systems. To develop an understanding of components in a power system and to understand the basic electromagnetic and electromechanical principles involved in these components. To develop an understanding of the physical-principles—to-electric-equivalent circuit approach to the analysis and design of components and systems. To develop skills in equivalent circuit based analysis techniques building upon competencies developed in prior coursework. To explore analysis and design principles for the complete power system To understand measurement, analysis, simulation and design techniques, through laboratory exercises involving hardware and software.
E E 340. Fields and Waves
4 Credits (3+3P)
Static electromagnetic field. Maxwell’s equation and time-varying electromagnetic fields. Generalized plane wave propagation, reflection, transmission, superposition and polarization. Transmission line theory. Extensions to optical wave propagation. Applications including Time Domain Reflectometry (TDR) and fiber optic transmission. Laboratory experience with RF/microwave test equipment and optical apparatus.
Prerequisite: C- or better in ENGR 230 and E E 240.
Learning Outcomes
1. Students will demonstrate an understanding of the fundamental principles, theories, and equations (such as Maxwell’s) governing transmission lines, static and time-varying fields, propagation, reflection and transmission of plane waves, waveguides, and antennas. Students will analyze and solve electromagnetic-related problems by applying fundamental principles, theories, and equations (such as Maxwell’s equations). Students will demonstrate effective team work. Students will demonstrate the use of RF/microwave test equipment to perform basic RF circuit measurements.

E E 362. Introduction to Computer Organization
4 Credits (3+3P)
Concepts of modern computer organization, CPU control, pipelining, memory hierarchies, memory mapping, hardware-software interface, and operating systems.
Prerequisite: C- or better in ENGR 120 and MATH 1250G.
Prerequisite/Corequisite: ENGR 140.
Learning Outcomes
1. Be conversant with fundamental concepts of computer organization. Compare and contrast organizational features of different computer.
Understand the use of microprocessors and peripheral devices in practical applications

E E 395. Introduction to Digital Signal Processing
3 Credits (3)
Undergraduate treatment of sampling/reconstruction, quantization, discrete-time systems, digital filtering, z-transforms, transfer functions, digital filter realizations, discrete Fourier transform (DFT) and fast Fourier transform (FFT), finite impulse response (FIR) and infinite impulse response (IIR) filter design, and digital signal processing (DSP) applications. Laboratory will emphasize practical implementation of signal processing including real-time signal processing.
Prerequisite(s): C- or better in E E 325.

E E 400. Undergraduate Research
1-3 Credits
Directed undergraduate research. May be repeated for a maximum of 9 credits.
Prerequisite: consent of the department head.

E E 403. Geometric Algebra
3 Credits (3)
Geometric algebra provides a common mathematical language for many areas of physics (classical and quantum mechanics, electrodynamics, special and general relativity), computer science (graphics, robotics, computer vision), engineering, and other fields. Topics include: the geometric product and multivectors; Euclidean, Lorentzian, Galilean, and Projective Geometries; Complex, Hyperbolic, and Dual Numbers; Quaternions and Rotations.
Prerequisite: C- or better in E E 320.
Learning Outcomes
1. Formulate and solve problems related to multivectors and the geometric product while building geometric intuition. Formulate and solve problems related to complex, hyperbolic, and dual numbers as well as quaternions. Formulate and solve problems related to non-Euclidean spaces including Lorentzian, Galilean, and projective geometries.
E E 409. Hardware & Software Codesign
3 Credits (3)
This course introduces the concept and techniques of designing electronic systems that integrates both hardware and software components. Topics include nature of hardware and software, dataflow modeling, software and hardware implementations of dataflows, analysis of control flows and dataflows, FSM with Datapath, microprogramming, embedded cores, and trade-offs between hardware and software components, etc. Students gain experience in implementing hardware and software co-design solutions for solving real-world problems through hands-on laboratory/project on a programmable System-on-Chip (SoC) platform that integrates a dual-core ARM Cortex-A9 processor and FPGA fabrics. Students develop a fundamental understanding of state-of-the-art practices in developing codesign solutions to problems that prepare them well for industrial and academic careers in this field.
Prerequisite: C- or better in ENGR 140 and ENGR 130 and E E 362.
Learning Outcomes
1. Formulate and solve problems related to basic concepts and methodologies in hardware/software co-design. Analyze concurrent specification of an algorithm to be partitioned into software (C code) and hardware (HDL) components. Design and implement both the software and hardware components integration as a solution to real-world problems to achieve optimal performance, power and cost. Describe various types of system architectures regarding their attributes including speed, energy, design complexity, design cost, etc. Experience working with commercially available Computer-Aided Design (CAD) development tools such as Xilinx Vivado Experience working in translation between C code and HDL of practical problems and verify/test the solution on FPGA SoC architecture.

E E 412. ASIC Design
3 Credits (3)
This course provides students with experiential knowledge of modern application specific integrated circuits. Topics include ASIC packaging and testing, I/O pads and ESD, Verilog programming and simulation, FPGA verification, Register-transfer level synthesis, timing and area optimization, floorplanning and routing, digital interfaces, full custom and standard cell design, post-layout simulation, and PCB schematics and layout. Crosslisted with: E E 512.
Prerequisite(s)/Corequisite(s): E E 480.

E E 431. Power Systems II
3 Credits (3)
Analysis of a power system in the steady-state. Includes the development of models and analysis procedures for major power system components and for power networks. Crosslisted with: E E 542.
Prerequisite(s): C- or better in E E 333.

E E 432. Power Electronics
3 Credits (2+3P)
Basic principles of power electronics and its applications to power supplies, electric machine control, and power systems.
Prerequisite(s)/Corequisite(s): E E 325. Prerequisite(s): C- or better in E E 317 and E E 333.

E E 440. Photovoltaic Devices and Systems
3 Credits (3)
Prerequisite(s): C- or better in E E 317.
Learning Outcomes
1. Name at least three different types of photovoltaic materials and cells; Derive equations governing operation of photovoltaic cells; Design and create electrical engineering drawings for photovoltaic systems of different nameplate capacity; Describe principles of operation of the “balance of the system” (BOS) components of the photovoltaic system.

E E 443. Mobile Application Development
3 Credits (3)
Introduction to mobile application development. Students will develop applications for iOS devices including iPhone and iPad. Topics include object-oriented programming using Swift, model-view-controller (MVC) pattern, view controllers including tables and navigation, graphical user interface (GUI) design, data persistence, GPS and mapping, camera, and cloud and web services. Crosslisted with: E E 593.
Prerequisite(s): C- or better in C S 151 or C S 152 or C S 172 or C S 271 or C S 451 or C S 452.

E E 444. Advanced Image Processing
3 Credits (3)
Advanced topics in image processing including segmentation, feature extraction, object recognition, image understanding, big data, and applications. Crosslisted with: E E 588.
Prerequisite(s): C- or better in E E 446.
E E 446. Digital Image Processing  
3 Credits (3)  
Two-dimensional transform theory, color images, image enhancement, restoration, segmentation, compression and understanding. Same as E E 596.  
Prerequisite: C- or better in E E 325.  
Learning Outcomes  
1. Analyze human visual perception and the implications to science and society 
2. Formulate and analyze problems that utilize the mathematics behind multidimensional image processing 
3. Formulate and analyze problems involving multidimensional transformation transform-domain processing 
4. Formulate and analyze problems related to color image acquisition, processing, and display 
5. Implementing image processing algorithms on computers in Matlab or python

E E 447. Neural Signal Processing  
3 Credits (3)  
Cross-disciplinary course focused on the acquisition and processing of neural signals. Students in this class will learn about basic brain structure, different brain signal acquisition techniques (fMRI, EEG, MEG, etc.), neural modeling, and EEG signal processing. To perform EEG signal processing, students will learn and use Matlab along with an EEG analysis package. Crosslisted with: E E 597.  
Prerequisite(s): C- or better in E E 325.

E E 448. Signal Compression  
3 Credits (3)  
Fundamentals of information source encoding and decoding. Includes information theory bounds on source coding, lossless coding algorithms, scalar quantizing and vector quantizing.  
Prerequisite: E E 200.  
Learning Outcomes  
1. Formulate and analyze problems related to rate-distortion tradeoffs in compression 
2. Formulate and analyze problems related to scalar and vector quantization 
3. Formulate and analyze problems related to transform coding 
4. Formulate and analyze problems related to entropy coding (Huffman arithmetic) 
5. Formulate and analyze problems related to standardized codecs, including MPEG, JPEG, MP3 
6. Formulate and analyze problems related to compressive sensing/sampling

E E 449. Smart Antennas  
3 Credits (3)  
Smart antenna and adaptive array concepts and fundamentals, uniform and planar arrays, optimum array processing. Adaptive beamforming algorithms and architectures: gradient-based algorithms, sample matrix inversion, least mean square, recursive least mean square, sidelobes cancellers, direction of arrival estimations, effects of mutual coupling and its mitigation. Crosslisted with: E E 549.  
Prerequisite(s): C- or better in E E 325 and E E 340.

E E 452. Introduction to Radar  
3 Credits (3)  
Prerequisite(s): C- or better in E E 325 and E E 340.

E E 453. Microwave Engineering  
3 Credits (3)  
Techniques for microwave measurements and communication system design, including transmissions lines, waveguides, and components. Microwave network analysis and active device design. Crosslisted with: E E 521.  
Prerequisite(s): C- or better in E E 340.

E E 454. Antennas and Radiation  
4 Credits (3+3P)  
Prerequisite(s): C- or better in E E 340.
E E 458. Hardware Security and Trust
3 Credits (3)
This course introduces and investigates recent technology development for the design and evaluation of secure and trustworthy hardware and embedded systems. Topics include IoT security, cryptography, hardware security primitives, authentication and key generation, invasive and non-invasive attacks and countermeasures, IC piracy and intellectual property protection, hardware trojans, and secure boot. Same as E E 558.
Prerequisite: C- or better in E E 362.
Learning Outcomes
1. Understand the security goals of information security
2. Understand cryptography basics and their applications
3. Formulate and analyze problems related to security threats in integrated circuits, electronic devices and semiconductor supply chain
4. Formulate and analyze problems related to security countermeasures to the threats of integrated circuits and electronic devices
5. Use metrics to measure and assess the security level of security mechanisms or primitives in hardware security applications
6. Analyze and assess potential security vulnerabilities in hardware and embedded systems
7. Learn state-of-art security mechanisms and research topics in the hardware and embedded security area

E E 460. Space System Mission Design and Analysis
3 Credits (3)
Satellite system design, including development, fabrication, launch, and operations. A systems engineering approach to concepts, methodologies, models, and tools for space systems. Students must be in junior standing to enroll.
Learning Outcomes
1. Apply knowledge from science, math and engineering to satellite design.
2. Experience the “system engineering” of satellite design through the design of a space mission.
3. Understand the professional and ethical responsibilities related to satellite design.
4. Understand the impact of satellite related engineering solutions in a global, economic, environmental, and societal context.
5. Maintain a knowledge of contemporary professional, societal and global issues as they relate to satellites.

E E 462. Computer Systems Architecture
3 Credits (3)
The course covers uniprocessors, caches, memory systems, virtual memory, storage systems, with introduction to multiprocessor and distributed computer architectures; models of parallel computation; processing element and interconnection network structures, and nontraditional architectures. Crosslisted with: E E 562.
Prerequisite: C- or better in E E 362.
Learning Outcomes
1. Recognize the basic principles and current practices of computer architectures of processors, memory systems, interconnects, and input/output systems
2. Reason about the issues that influence the architectures of processors, memory systems, interconnects, and input/output systems
3. Evaluate and improve computer system performance through analysis and computer simulation
4. Solve and implement a small research problem in computer architecture.

E E 465. Machine Learning I
3 Credits (3)
An undergraduate-level introduction to machine learning algorithms, including supervised and unsupervised learning methods. Topics covered include clustering, linear regression models, linear discriminant functions, feed-forward neural networks, statistical pattern classification and regression, maximum likelihood, naive Bayes, non-parametric density estimation, mixture models, decision trees, and ensemble learning. Crosslisted with: E E 565.
Prerequisite: C- or better in E E 200.
Learning Outcomes
1. Formulate and solve problems related to the basic concepts and mathematical techniques of machine learning.
2. Gain an understanding of machine learning algorithms/methods by solving problems using software.
3. Gain experience doing independent study and research.
5. Gain practical experience through project-based assignments and technical report writing.

E E 467. ARM SOC Design
3 Credits (3)
The course aims to produce students who are capable of developing ARM-based SoCs from high level functional specifications to design, implementation and testing on real FPGA hardware using standard hardware description and software programming languages. Crosslisted with: E E 567.
Prerequisite: C- or better in E E 362 and E E 317.
Learning Outcomes
1. Formulate and solve problems requiring knowledge and understanding of ARM processor architectures and ARM-based SoCs
2. Capture the design of ARM-based SoCs in a standard hardware description
3. Conduct low-level software design for ARM-based SoCs and high-level application development
4. Demonstrate the ability to use and choose between different techniques for digital system design and capture;
5. Evaluate implementation results (e.g. speed, area, power) and correlate them with the corresponding high level design and capture;
6. Demonstrate the ability to use a commercial tools to develop ARM-based SoCs
E E 473. Introduction to Optics
3 Credits (3)
The nature of light, geometrical optics, basic optical instruments, wave optics, aberrations, polarization, and diffraction. Elements of optical radiometry, lasers and fiber optics. Crosslisted with: PHYS 473.
Prerequisite(s): C- or better in PHYS 1320G or PHYS 2120.

E E 475. Automatic Control Systems
3 Credits (3)
Prerequisite(s): C- or better in E E 325.

E E 476. Computer Control Systems
3 Credits (3)
Representation, analysis and design of discrete-time systems using time-domain and z-domain techniques. Microprocessor control systems.
Prerequisite(s): C- or better in E E 325.

E E 478. Fundamentals of Photonics
4 Credits (3+3P)
Prerequisite: C- or better in PHYS 1320G or PHYS 2120.

Learning Outcomes
1. Understand the fundamentals of the different theories of light including ray, wave, electromagnetic (vector) and photon optics, and how these theories are represented mathematically and on a computer. Develop the ability to perform calculations for the different theories (e.g., ray tracing, wave interference, polarization calculus, photon detection) to determine the propagation characteristics and describe the manipulation of light. Gain insight and experience with materials and devices for manipulating and detecting light (e.g., glass, mirrors, lenses, fiber optics, polarization elements, liquid crystals, semiconductors, and photodiodes). Apply the theoretical, mathematical, and practical understanding of optics to describe real-world applications of light technology with supporting analysis and calculations.

E E 479. Lasers and Applications
4 Credits (3+3P)
Prerequisite(s): C- or better in E E 340 or in PHYS 461.

E E 480. Introduction to Analog and Digital VLSI
3 Credits (3)
Prerequisite: C- or better in E E 362 and E E 317.

Learning Outcomes
1. Explain the basic concepts of CMOS VLSI system design Formulate and solve problems related to pseudo ideal operation of MOS transistors as switches and implementation with transistors of basic and complex Boolean functions Use modern software tools to simulate integrated circuits Formulate and solve problems related to operation and design of basic analog building blocks Formulate and solve problems related to operation and design of basic digital building blocks
2. Formulate and solve problems related to key aspects of performance characteristics (speed, power dissipation, Silicon area..) of VLSI systems and how to size transistors in order to achieve desired performance specifications.

E E 482. Electronics II
3 Credits (3)
Feedback analysis, application of operational amplifiers, introduction to data converters, analog filters, and oscillator circuits.
Prerequisite(s): C- or better in E E 317.

E E 485. Analog VLSI Design
3 Credits (2+3P)
Analysis, design, simulation, layout and verification of CMOS analog building blocks, including references, opamps, switches and comparators. Teams implement a complex analog IC. Crosslisted with: E E 523.
Prerequisite(s): C- or better in E E 320 and E E 480.
E E 490. Selected Topics
1-3 Credits
May be repeated for a maximum of 9 credits. Graduate students may not use credits of E E 490 toward an M.S. or Ph.D. in electrical engineering.
Prerequisite: consent of instructor.

E E 493. Power Systems III
3 Credits (3)
Analysis of a power system under abnormal operating conditions. Topics include symmetrical three-phase faults, theory of symmetrical components, unsymmetrical faults, system protection, and power system stability. Taught with E E 543.
Prerequisite(s): E E 491. Prerequisite(s): C- or better in E E 333 or E E 391.

E E 496. Introduction to Communication Systems
3 Credits (3)
Introduction to the analysis of signals in the frequency and time domains. A study of baseband digital transmission systems and digital/analog RF transmission systems. Introduction to telecom systems as well as satellite systems.
Prerequisite(s): C- or better in E E 325.

E E 497. Digital Communication Systems I
3 Credits (3)
Prerequisite(s): C- or better in E E 200 and E E 325.

E E 501. Research Topics in Electrical and Computer Engineering
1 Credit (1)
Ethics and methods of engineering research; contemporary research topics in electrical and computer engineering.

E E 510. Introduction to Analog and Digital VLSI
3 Credits (3)

E E 512. ASIC Design
3 Credits (3)
This course provides students with experiential knowledge of modern application specific integrated circuits. Topics include ASIC packaging and testing, I/O pads and ESD, Verilog programming and simulation, FPGA verification, Register-transfer level synthesis, timing and area optimization, floorplanning and routing, digital interfaces, full custom and standard cell design, post-layout simulation, and PCB schematics and layout. Recommended foundation: E E 480. Crosslisted with: E E 412.

E E 515. Electromagnetic Theory I
3 Credits (3)

E E 516. Electromagnetic Theory II
3 Credits (3)
Continuation of E E 515.

E E 520. A/D and D/A Converter Design
3 Credits (3)
Practical design of integrated data converters in CMOS/BJT technologies, OP-AMPS, comparators, sample and holds, MOS switches, element mismatches. Nyquist rate converter architectures: flash, successive approximation, charge redistribution, algorithmic, two step, folding, interpolating, pipelined, delta-sigma converters. Restricted to: Main campus only.
Prerequisite(s): E E 523.

E E 521. Microwave Engineering
3 Credits (3)
Techniques for microwave measurements and communication system design, including transmission lines, waveguides, and components. Microwave network analysis and active device design. Recommended foundation: E E 340. Crosslisted with: E E 453.

E E 523. Analog VLSI Design
3 Credits (2+3P)
Analysis, design, simulation, layout and verification of CMOS analog building blocks, including references, opamps, switches and comparators. Teams implement a complex analog IC. Recommended foundation: E E 320 and E E 480. Crosslisted with: E E 485.
E E 528. Fundamentals of Photonics
4 Credits (3+3P)
Prerequisite(s): PHYS 1320G or PHYS 2120) and E E 473/PHYS 473.

E E 529. Lasers and Applications
4 Credits (3+3P)
Laser operating principles, characteristics, construction and applications. Beam propagation in free space and fibers. Laser diode construction and characteristics. Hands-on laboratory. Recommended foundation: E E 351 or PHYS 461. Taught with: E E 479 with differentiated assignments for graduate students. Crosslisted with: PHYS 529

E E 534. Power System Relaying
3 Credits (3)

E E 537. Power Electronics
3 Credits (2+3P)
Basic principles of power electronics and its applications to power supplies, electric machine control, and power systems. Recommended foundation: E E 325, E E 317, and E E 333. Crosslisted with: E E 432.

E E 540. Photovoltaic Devices and Systems
3 Credits (3)

Learning Outcomes
1. Name at least three different types of photovoltaic materials and cells; Derive equations governing operation of photovoltaic cells; Design and create electrical engineering drawings for photovoltaic systems of different nameplate capacity; Describe principles of operation of the “balance of the system” (BOS) components of the photovoltaic system.

E E 541. Antennas and Radiation
4 Credits (3+3P)

E E 542. Power Systems II
3 Credits (3)

E E 543. Power Systems III
3 Credits (3)
Analysis of a power system under abnormal operating conditions. Topics include symmetrical three-phase faults, theory of symmetrical components, unsymmetrical faults, system protection, and power system stability. Recommended foundation: E E 431. Crosslisted with: E E 493.

E E 544. Distribution Systems
3 Credits (3)
Concepts and techniques associated with the design and operation of electrical distribution systems. Recommended foundation: E E 542 and E E 543.

E E 545. Digital Signal Processing II
3 Credits (3)
Non-ideal sampling and reconstruction, oversampling and noise shaping in A/D and D/A, finite word length effects, random signals, spectral analysis, multirate filter banks and wavelets, and applications. Recommended foundation: E E 395.

E E 548. Introduction to Radar
3 Credits (3)

E E 549. Smart Antennas
3 Credits (3)
E E 551. Control System Synthesis I
3 Credits (3)
An advanced perspective of linear modern control system analysis and design, including the essential algebraic, structural, and numerical properties of linear dynamical systems.

E E 556. Hardware & Software Codesign
3 Credits (3)
This course introduces the concept and techniques of designing electronic systems that integrates both hardware and software components. Topics include nature of hardware and software, dataflow modeling, software and hardware implementations of dataflows, analysis of control flows and dataflows, FSM with Datapath, microprogramming, embedded cores, and trade-offs between hardware and software components, etc. Students gain experience in implementing hardware and software co-design solutions for solving real-world problems through hands-on laboratory/project on a programmable System-on-Chip (SoC) platform that integrates a dual-core ARM Cortex-A9 processor and FPGA fabrics. Students develop a fundamental understanding of state-of-the-art practices in developing codesign solutions to problems that prepare them well for industrial and academic careers in this field.

Learning Outcomes
1. Formulate and solve problems related to basic concepts and methodologies in hardware/software co-design. Analyze concurrent specification of an algorithm to be partitioned into software (C code) and hardware (HDL) components. Design and implement both the software and hardware components integration as a solution to real-world problems to achieve optimal performance, power and cost. Describe various types of system architectures regarding their attributes including speed, energy, design complexity, design cost, etc. Experience working with commercially available Computer-Aided Design (CAD) development tools such as Xilinx Vivado Experience working in translation between C code and HDL of practical problems and verify/test the solution on FPGA SoC architecture.

E E 558. Hardware Security and Trust
3 Credits (3)
This course introduces and investigates recent technology development for the design and evaluation of secure and trustworthy hardware and embedded systems. Topics include IoT security, cryptography, hardware security primitives, authentication and key generation, invasive and non-invasive attacks and countermeasures, IC piracy and intellectual property protection, hardware trojans, and secure boot. Recommended foundation: E E 212. Crosslisted with: E E 458.

E E 562. Computer Systems Architecture
3 Credits (3)
The course covers uniprocessors, caches, memory systems, virtual memory, storage systems, with introduction to multiprocessor and distributed computer architectures; models of parallel computation; processing element and interconnection network structures, and nontraditional architectures. Recommended foundation is E E 212. Crosslisted with: E E 462.

E E 563. Computer Performance Analysis I
3 Credits (3)
Issues involved and techniques used to analyze performance of a computer system. Topics covered include computer system workloads; statistical analysis techniques such as principal component analysis, confidence interval, and linear regression; design and analysis of experiments; queuing system analysis; computer system simulation; and random number generation. Recommended foundation: E E 200 and E E 462.

E E 564. Architectural Concepts II
3 Credits (3)
Advanced topics related to computer architecture, guided by the current literature. Students are expected to have knowledge of computer architectures equivalent to C S 473 and of operating systems equivalent to C S 474. Crosslisted with: C S 573.

Learning Outcomes
1. Be able to explain the features in a modern multicore CPU architecture
   Be able to utilize hardware counter features of a CPU in performance evaluation
   Be able to explain the architecture of GPUs and their capabilities and drawbacks
   Be able to evaluate novel cutting-edge architectural features and designs
   Be able to present a research paper to an advanced audience.

E E 565. Machine Learning I
3 Credits (3)
A graduate-level introduction to machine learning algorithms, including supervised and unsupervised learning methods. Topics covered include clustering, linear regression models, linear discriminant functions, feed-forward neural networks, statistical pattern classification and regression, maximum likelihood, naive Bayes, non-parametric density estimation, mixture models, decision trees, and ensemble learning. Recommended foundation: E E 571 and MATH 480. Crosslisted with: E E 465.

E E 567. ARM SOC Design
3 Credits (3)
The course aims to produce students who are capable of developing ARM-based SoCs from high level functional specifications to design, implementation and testing on real FPGA hardware using standard hardware description and software programming languages. Recommended foundation is E E 212 and E E 317. Crosslisted with: E E 467.
E E 571. Random Signal Analysis  
3 Credits (3)  
Application of probability and random variables to problems in communication systems, analysis of random signal and noise in linear and nonlinear systems.

E E 572. Modern Coding Theory  
3 Credits (3)  
Error control techniques for digital transmission and storage systems. Introduction to basic coding bounds, linear and cyclic block codes, Reed-Solomon codes, convolutional codes, maximum likelihood decoding, maximum a posteriori probability decoding, factor graphs, low density parity check codes, turbo codes, iterative decoding. Applications to data networks, space and satellite transmission, and data modems. Recommended foundation: E E 200 and E E 496.

E E 573. Signal Compression  
3 Credits (3)  
Fundamentals of information source encoding and decoding. Includes information theory bounds on source coding, lossless coding algorithms, scalar quantizing and vector quantizing.

Learning Outcomes  
1. Formulate and analyze problems related to rate-distortion tradeoffs in compression  
2. Formulate and analyze problems related to scalar and vector quantization  
3. Formulate and analyze problems related to transform coding  
4. Formulate and analyze problems related to entropy coding (Huffman arithmetic)  
5. Formulate and analyze problems related to standardized codecs, including MPEG, JPEG, MP3  
6. Formulate and analyze problems related to compressive sensing/sampling

E E 575. Machine Learning II  
3 Credits (3)  
Prerequisite(s): E E 565.

E E 576. Geometric Algebra  
3 Credits (3)  
Geometric algebra provides a common mathematical language for many areas of physics (classical and quantum mechanics, electrodynamics, special and general relativity), computer science (graphics, robotics, computer vision), engineering, and other fields. Topics include: the geometric product and multivectors; Euclidean, Lorentzian, Galilean, and Projective Geometries; Complex, Hyperbolic, and Dual Numbers; Quaternions and Rotations.

Learning Outcomes  
1. Formulate and solve problems related to multivectors and the geometric product while building geometric intuition.  
2. Formulate and solve problems related to complex, hyperbolic, and dual numbers as well as quaternions.  
3. Formulate and solve problems related to non-Euclidean spaces including Lorentzian, Galilean, and projective geometries.

E E 577. Fourier Methods in Electro-Optics  
3 Credits (3)  
Linear systems theory, convolution and Fourier transformation are applied to one-dimensional and two dimensional signals encountered in electro-optical systems. Applications in diffraction, coherent and incoherent imaging, and optical signal processing. Recommended foundation: E E 320 and E E 528. Crosslisted with: PHYS 577.

E E 578. Optical System Design  
3 Credits (3)  
Optical design software is used to study optical systems involving lenses, mirrors, windows and relay optics. Systems considered include camera lenses, microscopes and telescopes. Recommended foundation: E E/PHYS 473, E E/PHYS 528 and E E/PHYS 577. Crosslisted with: PHYS 578.

E E 581. Digital Communication Systems I  
3 Credits (3)  

E E 583. Wireless Communication  
3 Credits (3)  
Cellular networks, wireless channels and channel models, modulation and demodulation, MIMO, diversity and multiplexing, OFDM, wireless standards including LTE and WiMAX. Recommended foundation: E E 571 and E E 325.

E E 585. Telemetering Systems  
3 Credits (3)  
Covers the integration of components into a command and telemetry system. Topics include analog and digital modulation formats, synchronization, link effects, and applicable standards. Recommended foundation: E E 395, E E 496, and E E 497.
E E 586. Information Theory  
3 Credits (3)  
This class is a study of Shannon's measure of information and discusses mutual information, entropy, and channel capacity, the noiseless source coding theorem, the noisy channel coding theorem, channel coding and random coding bounds, rate-distortion theory, and data compression. Restricted to: Main campus only. Crosslisted with: MATH 509  
Prerequisite(s): E E 571 or MATH 515.

E E 588. Advanced Image Processing  
3 Credits (3)  
Advanced topics in image processing including segmentation, feature extraction, object recognition, image understanding, big data, and applications. Crosslisted with: E E 444.  
Prerequisite(s): E E 446 or E E 596.

E E 590. Selected Topics  
1-9 Credits  
May be repeated for a maximum of 18 credits.

E E 593. Mobile Application Development  
3 Credits (3)  
Introduction to mobile application development. Students will develop applications for iOS devices including iPhone and iPad. Topics include object-oriented programming using Swift, model-view-controller (MVC) pattern, view controllers including tables and navigation, graphical user interface (GUI) design, data persistence, GPS and mapping, camera, and cloud and web services. Recommended foundation: C S 451 or C S 452. Crosslisted with: E E 443.

E E 596. Digital Image Processing  
3 Credits (3)  
Two-dimensional transform theory, color images, image enhancement, restoration, segmentation, compression and understanding. Crosslisted with: E E 446.

E E 597. Neural Signal Processing  
3 Credits (3)  
Cross-disciplinary course focused on the acquisition and processing of neural signals. Students in this class will learn about basic brain structure, different brain signal acquisition techniques (fMRI, EEG, MEG, etc.), neural modeling, and EEG signal processing. To perform EEG signal processing, students will learn and use Matlab along with an EEG analysis package. Crosslisted with: E E 447.

E E 598. Master's Technical Report  
1-9 Credits (1-9)  

E E 599. Master's Thesis  
1-15 Credits (1-15)  

E E 600. Doctoral Research  
1-15 Credits  
Research.

E E 615. Computational Electromagnetics  
3 Credits (3)  
The numerical solution of electromagnetics problems. Topics include differential equation techniques, integral equation methods, hybrid techniques, algorithm development and implementation, and error analysis. Particular algorithms, including FEM, finite differences, direct solvers, and iterative solvers, are studied.

E E 675. Machine Learning III  
3 Credits (3)  
A research-oriented treatment of machine learning algorithms, including supervised, unsupervised, and reinforcement learning methods. Topics covered include Markov decision processes, deep reinforcement learning, neural logic networks, genetic algorithms, genetic programs, generative adversarial networks, and adaptive resonance theory models.  
Prerequisite(s): E E 575.

E E 690. Selected Topics  
1-9 Credits  
May be repeated for a maximum of 9 credits.

E E 700. Doctoral Dissertation  
1-15 Credits (1-15)  
Name: The Klipsch School of Electrical and Computer Engineering
Office Location: Thomas and Brown Hall, Rm 106
1125 Frenger Mall
Las Cruces, NM 88003

Electrical Engineering - Bachelor of Science in Electrical Engineering

Overview
The Bachelor of Science in Electrical Engineering (B.S. EE) program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc. This particular option of the B.S. EE program has "no concentration," giving students the greatest flexibility in course selection.

Electrical Engineering Program Educational Objectives

Below are the program educational objectives (PEOs) that describe the expected accomplishments of graduate during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.
2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

Requirements (123-125 credits)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

</thead>
</table>

**Total Credits**: 123-125

---

1. See the General Education (p. 123) section of the catalog for a full list of courses.
2. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.
3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
4. STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Electrical Engineering (Communications and Signal Processing) - Bachelor of Science in Electrical Engineering

#### Overview

The Bachelor of Science in Electrical Engineering (B.S. EE) program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc. This particular concentration in the B.S. EE program gives students the opportunity to explore more deeply the area of **communications and signal processing**.

#### Electrical Engineering Program Educational Objectives

Below are the program educational objectives (PEOs) that describe the expected accomplishments of graduate during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.
2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

#### Requirements (123-125 credits)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Programming Elective
Select one course from the following:  3-4

- C S 151  C++ Programming
- C S 152  Java Programming
- C S 153  Python Programming I  
- C S 154  Python Programming II
- C S 172  Computer Science I
- C S 271  Object Oriented Programming

Second Language: (not required)
Electives, to bring the total credits to 123  0

Total Credits  123-125

1. See the General Education (p. 123) section of the catalog for a full list of courses.
2. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.
3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
4. STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).
5. Students may take C S 153 Python Programming I toward their Programming Elective or C S 453 Python Programming I toward their E E Concentration Electives, but not both.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

1. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.

2. See the General Education and Viewing a Wider World (p. 123) section of the catalog for a full list of courses.

3. Students must take both E E 395 Introduction to Digital Signal Processing and E E 496 Introduction to Communication Systems, both of which are offered in the Fall semester.

4. STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHEM, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).
Depending on availability of specific courses in the fall or spring semester, students may need to reorganize the ECE Electives, STEM electives, and/or Gen Ed/VWW electives in their final year. Students are strongly advised to consult with their ECE Faculty Mentor for assistance in planning their final year.

One Communications & Signal Processing Elective Courses must be from the E E Prefix. Communications & Signal Processing Elective Courses:
- E E 444 Advanced Image Processing
- E E 446 Digital Image Processing
- E E 447 Neural Signal Processing
- E E 460 Space System Mission Design and Analysis
- E E 465 Machine Learning I
- E E 477 Digital Game Design
- E E 478 Computer Security
- E E 490 Wireless Communications
- E E 497 Digital Communication Systems I
- C S 343 Algorithm Design & Implementation
- C S 372 Data Structures and Algorithms
- C S 453 Python Programming I
- C S 455 Artificial Intelligence I
- C S 476 Computer Graphics I
- C S 477 Digital Game Design
- C S 480 Applied Linear Algebra
- C S 481 Advanced Linear Algebra
- C S 491 Introduction to Real Analysis I

- MATH 481 Advanced Linear Algebra
- MATH 491 Introduction to Real Analysis I
- STAT 470 Probability: Theory and Applications

Electrical Engineering (Computers and Microelectronics) - Bachelor of Science in Electrical Engineering

Overview
The Bachelor of Science in Electrical Engineering (B.S. EE) program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc. This particular concentration in the B.S. EE program gives students the opportunity to explore more deeply the area of computers and microelectronics.

Electrical Engineering Program Educational Objectives
Below are the program educational objectives (PEOs) that describe the expected accomplishments of graduate during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.
2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

Requirements (123-125 credits)
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

1. See the General Education (p. 123) section of the catalog for a full list of courses.
2. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.
3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1511G and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### First Year

**Fall**
- ENGR 190: Introduction to Engineering Mathematics 4
- ENGL 1110G: Composition I 4
- CHEM 1215G: General Chemistry I Lecture and Laboratory for STEM Majors 4
- ENGR 120: DC Circuit Analysis 4

**Credits**: 16

**Spring**
- MATH 1511G: Calculus and Analytic Geometry I \(^1\) 4
- General Education Requirement (Area I, IV, V, VI or VWW) \(^2\) 3
- ENGR 130: Digital Logic 4
- ENGR 140: Introduction to Programming and Embedded Systems 4

**Credits**: 15

### Second Year

**Fall**
- MATH 1521G: Calculus and Analytic Geometry II 4
- PHYS 1310G & PHYS 1310L: Calculus-Based Physics I and Calculus-Based Physics I Lab 4
- E E 200: Linear Algebra, Probability and Statistics Applications 4
- ENGR 230: AC Circuit Analysis 4

**Credits**: 16

**Spring**
- MATH 392: Introduction to Ordinary Differential Equations 3
- PHYS 1320G & PHYS 1320L: Calculus-Based Physics II and Calculus-Based Physics II Lab 4
- General Education Requirement (Area I, IV, V, VI or VWW) \(^2\) 3
- E E 240: Multivariate and Vector Calculus Applications 3
- Choose one Programming course from the following: 3-4
  - C S 151: C++ Programming
  - C S 152: Java Programming
  - C S 153: Python Programming I
  - C S 154: Python Programming II
  - C S 172: Computer Science I
  - C S 271: Object Oriented Programming

**Credits**: 16-17

### Third Year

**Fall**
- E E 300: Cornerstone Design 2
- E E 320: Signals and Systems I 3
- E E 340: Fields and Waves 4
- General Education Requirement (Area I, IV, V, VI or VWW) \(^2\) 3
- General Education Requirement (Area I, IV, V, VI or VWW) \(^2\) 3

**Credits**: 15

**Spring**
- E E 317: Semiconductor Devices and Electronics I 4
- E E 325: Signals and Systems II 4
- E E 362: Introduction to Computer Organization 4
MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.

2 See the General Education and Viewing a Wider World (p. 123) section of the catalog for a full list of courses.

3 Students must take both E E 462 Computer Systems Architecture and E E 480 Introduction to Analog and Digital VLSI, both of which are offered in the Fall semester.

4 STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).

5 Depending on availability of specific courses in the fall or spring semester, students may need to reorganize the ECE Electives, STEM electives, and/or Gen Ed/VWW electives in their final year. Students are strongly advised to consult with their ECE Faculty Mentor for assistance in planning their final year.

6 One Computers & Microelectronics Elective Courses must be from the E E Prefix. Computers & Microelectronics Elective Courses:

- CHME 467 Nanoscience and Nanotechnology

### Electrical Engineering (Control & Power) - Bachelor of Science in Electrical Engineering

**Overview**

The Bachelor of Science in Electrical Engineering (B.S. EE) program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc. This particular concentration in the B.S. EE program gives students the opportunity to explore more deeply the area of control and power systems.

**Electrical Engineering Program Educational Objectives**

Below are the program educational objectives (PEOs) that describe the expected accomplishments of graduate during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.
2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

**Requirements (123-124 credits)**
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Electives, to bring the total credits to 123: 0

Total Credits: 123-124

1. See the General Education (p. 123) section of the catalog for a full list of courses.
2. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.
3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
4. STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

---

1. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.

2. See the General Education and Viewing a Wider World (p. 123) section of the catalog for a full list of courses.

3. Students must take both E E 431 Power Systems II and E E 475 Automatic Control Systems, both of which are offered in the Fall semester.

4. STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).

5. Depending on availability of specific courses in the fall or spring semester, students may need to reorganize the ECE Electives, STEM electives, and/or Gen Ed/VWW electives in their final year. Students are strongly advised to consult with their ECE Faculty Mentor for assistance in planning their final year.
One Control & Power Elective Courses must be from the E E Prefix. Control & Power Elective Courses:

- E E 432 Power Electronics
- E E 440 Photovoltaic Devices and Systems
- E E 476 Computer Control Systems
- E E 493 Power Systems III
- C S 343 Algorithm Design & Implementation
- CHME 361 Engineering Materials
- M E 481 Alternative and Renewable Energy
- M E 487 Mechatronics
- MATH 480 Applied Linear Algebra

**Electrical Engineering (Electromagnetics and Photonics) - Bachelor of Science in Electrical Engineering**

**Overview**

The Bachelor of Science in Electrical Engineering (B.S. EE) program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc. This particular concentration in the B.S. EE program gives students the opportunity to explore more deeply the area of electromagnetics and photonics.

**Electrical Engineering Program Educational Objectives**

Below are the program educational objectives (PEOs) that describe the expected accomplishments of graduates during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.
2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

**Requirements (124-127 credits)**

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 124 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Credits 16

Total Credits 124-127

1. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.

2. See the General Education and Viewing a Wider World (p. 130) section of the catalog for a full list of courses.

3. One Electromagnetics & Photonics Elective Courses must be from the E E Prefix. Electromagnetics & Photonics Elective Courses:
   - ASTR 402 Introduction to Astronomical Observations and Techniques
   - E E 449 Smart Antennas, E E 452 Introduction to Radar, E E 453 Microwave Engineering, E E 478 Fundamentals of Photonics
   - E E 479 Lasers and Applications
   - CHME 467 Nanoscience and Nanotechnology
   - M E 328 Engineering Analysis II
   - MATH 471 Complex Variables, MATH 472 Fourier Series and Boundary Value Problems, MATH 480 Applied Linear Algebra
   - PHYS 315 Modern Physics, PHYS 471 Modern Experimental Optics

4. Depending on availability of specific courses in the fall or spring semester, students may need to reorganize the ECE Electives, STEM electives, and/or Gen Ed/VWW electives in their final year. Students are strongly advised to consult with their ECE Faculty Mentor for assistance in planning their final year.

5. STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).

6. Students must take both E E 454 Antennas and Radiation and E E 473 Introduction to Optics, both of which are offered in the Spring semester.

Electrical Engineering (Space Systems) - Bachelor of Science in Electrical Engineering

Overview

The Bachelor of Science in Electrical Engineering (B.S. EE) program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc. This particular concentration in the B.S. EE program gives students the opportunity to explore more deeply the area of space systems.

Electrical Engineering Program Educational Objectives

Below are the program educational objectives (PEOs) that describe the expected accomplishments of graduate during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.

2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

Requirements (123-126 credits)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Electives, to bring the total credits to 123  
Total Credits  

1. See the General Education (p. 123) section of the catalog for a full list of courses.
2. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.
3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
4. STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

</table>

1. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.
2. See the General Education and Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
3. One Space Systems Elective Course must be from the E E Prefix. Space Systems Elective Courses:
   - E E 395 Introduction to Digital Signal Processing
   - E E 454 Antennas and Radiation
   - E E 473 Introduction to Optics
   - E E 478 Fundamentals of Photonics
   - A E 362 Orbital Mechanics
   - ASTR 401 Topics in Modern Astrophysics
4. Depending on availability of specific courses in the fall or spring semester, students may need to reorganize the ECE Electives, STEM electives, and/or Gen Ed/VWW electives in their final year. Students are strongly advised to consult with their ECE Faculty Mentor for assistance in planning their final year.
5. STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).
6. Students must take both E E 460 Space System Mission Design and Analysis and ASTR 402 Introduction to Astronomical Observations and Techniques which are both offered in the Spring semester.

Electrical Engineering - Master of Engineering in Electrical Engineering

Requirements and Options for M.E.E.E. Degree

The Program Educational Objectives for the Master of Engineering Program in Electrical Engineering are:

1. That graduates successfully apply advanced skills and techniques in one or more areas of emphasis.
2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

The M.E.E.E. is a coursework-only option for obtaining a master's degree. The requirement is a total of 30 credits of graduate course work, including passing with a grade of B or better six Graduate Expanded Core Courses from at least three different areas of emphasis. No oral exam is required for the MEEE.

Credits of E E 590 Selected Topics are limited to a total of 6. Other limitations and requirements that apply to all master's degrees are described elsewhere in this catalog.

Graduate Expanded Core Courses

The MEEE program requires students to take six courses from at least three different areas of emphasis from the list of Graduate Expanded Core Courses. Students who may wish to pursue a Ph.D. in the future are encouraged to include three courses from the MSEE Graduate Core Courses as part of their Graduate Expanded Core; the three MSEE Graduate Core Courses will satisfy one of the requirements for the Ph.D. qualifying exam. The areas of emphasis and credits are listed below for the Graduate Expanded Core Courses with additional specification as to which of those are the MSEE Graduate Core Courses.

### Graduate Electives: choose 3 to 4 courses

**Total Credits**: 30

<sup>1</sup> This course is one of the MSEE Graduate Core Courses. Students pursuing the MEEE who wish to pursue the Ph.D. in the future are encouraged to select three courses from this subset of courses to satisfy one of the requirements for the Ph.D. Qualifying Exam (https://ece.nmsu.edu/grad-study/phd-qualifying.html).

<sup>2</sup> This course is included in multiple areas of emphasis. Students may use this course to satisfy one area of emphasis.

### Included Prefixes

Graduate course work credits from the following prefixes are permitted for the MEEE degree. If a graduate course outside this list of prefixes logically fits into the MEEE program, see your graduate advisor about requesting an exception.

Electrical Engineering - Master of Engineering in Electrical Engineering (Online)

Requirements and Options for M.E.E.E. Degree

The Program Educational Objectives for the Master of Engineering Program in Electrical Engineering are:

1. That graduates successfully apply advanced skills and techniques in one or more areas of emphasis.
2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

The M.E.E.E. is a coursework-only option for obtaining a master's degree. The requirement is a total of 30 credits of graduate course work, including passing with a grade of B or better six Graduate Expanded Core Courses from at least three different areas of emphasis. No oral exam is required for the MEEE.

Credits of E E 590 Selected Topics are limited to a total of 6. Other limitations and requirements that apply to all master's degrees are described elsewhere in this catalog.

Graduate Expanded Core Courses

The MEEE program requires students to take six courses from at least three different areas of emphasis from the list of Graduate Expanded Core Courses. Students who may wish to pursue a Ph.D. in the future are encouraged to include three courses from the MSEE Graduate Core Courses as
part of their Graduate Expanded Core; the three MSEE Graduate Core Courses will satisfy one of the requirements for the Ph.D. qualifying exam. The areas of emphasis and credits are listed below for the Graduate Expanded Core Courses with additional specification as to which of those are the MSEE Graduate Core Courses.

Electrical Engineering - Master of Science in Electrical Engineering

M.S.E.E. Degree Options

The Program Educational Objectives for the Master of Science Program in Electrical Engineering are:

1. That graduates successfully apply advanced skills and techniques in one or more areas of emphasis.
2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

Two options exist for the Master of Science in Electrical Engineering degree. The requirements for each option are listed below:

1. Thesis: 24 credits of course work plus 6 credits of E E 599 Master’s Thesis plus oral exam

Thesis Option:

The Master of Science in Electrical Engineering Thesis Option requires:

1. 24 credits of course work plus 6 credits of E E 599 Master’s Thesis plus oral exam
2. Two graduate core courses and a third breadth elective (or third core course) from three different areas of emphasis

Note that credits of E E 590 Selected Topics are limited to a total of 9, of which at most 6 may be credits for courses that don't appear as regular classes in the printed schedule. In addition, each area of emphasis may have additional requirements for students in those areas. Other limitations and requirements that apply to all master’s degrees are described elsewhere in this catalog.

Technical Report Option:

The Master of Science in Electrical Engineering Technical Report Option requires:

1. 27 credits of course work plus 3 credits of E E 598 Master’s Technical Report plus oral exam
2. Two graduate core courses and a third breadth elective (or third core course) from three different areas of emphasis

Note that credits of E E 590 Selected Topics are limited to a total of 9, of which at most 6 may be credits for courses that don’t appear as regular classes in the printed schedule. In addition, each area of emphasis may have additional requirements for students in those areas. Other limitations and requirements that apply to all master’s degrees are described elsewhere in this catalog.

Graduate Core Courses and Breadth Electives

The MSEE program requires students to take two graduate core courses from two different areas of emphasis. In addition, either a third graduate core course OR one graduate breadth elective must be taken from a third area of emphasis. If a student wishes to pursue a Ph.D., the third class should come from the list of Graduate Core Courses as preparation for the Ph.D. qualifying exam. The graduate core courses, areas of emphasis, and credits are listed below for the Graduate Core Courses and the Graduate Breadth Electives.

Electrical Engineering - Master of Science in Electrical Engineering (Online)

Thesis Option:
The Master of Science in Electrical Engineering Thesis Option requires:

1. 24 credits of course work plus 6 credits of E E 599 Master's Thesis plus oral exam
2. Two graduate core courses and a third breadth elective (or third core course) from three different areas of emphasis

Note that credits of E E 590 Selected Topics are limited to a total of 9, of which at most 6 may be credits for courses that don't appear as regular classes in the printed schedule. In addition, each area of emphasis may have additional requirements for students in those areas. Other limitations and requirements that apply to all master's degrees are described elsewhere in this catalog.

Technical Report Option:
The Master of Science in Electrical Engineering Technical Report Option requires:

1. 27 credits of course work plus 3 credits of E E 598 Master's Technical Report plus oral exam
2. Two graduate core courses and a third breadth elective (or third core course) from three different areas of emphasis

Note that credits of E E 590 Selected Topics are limited to a total of 9, of which at most 6 may be credits for courses that don't appear as regular classes in the printed schedule. In addition, each area of emphasis may have additional requirements for students in those areas. Other limitations and requirements that apply to all master's degrees are described elsewhere in this catalog.

Graduate Core Courses and Breadth Electives
The MSEE program requires students to take two graduate core courses from two different areas of emphasis. In addition, either a third graduate core course OR one graduate breadth elective must be taken from a third area of emphasis. If a student wishes to pursue a Ph.D., the third class should come from the list of Graduate Core Courses as preparation for the Ph.D. qualifying exam. Engineering (Electrical Engineering) - Doctor of Philosophy

Requirements for Ph.D. Degree

The Program Educational Objectives for the Doctorate in Electrical Engineering are:

1. That graduates obtain relevant, productive employment performing research in academia, government or industry, and/or are teaching at institutions of higher education.
2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

The Ph.D. program is open to students with a master's degree. Exceptionally well qualified students may petition for direct entry to the Ph.D. program without first obtaining a master's degree.

Option 1 - Ph.D. with Completed MS Degree

1. Complete undergraduate deficiency coursework, if the student admitted has both master's and bachelor's degrees in fields other than electrical engineering. Complete graduate deficiency coursework, which consists of three graduate core courses from three different areas of emphasis, if the student has a master's degree in a field other than electrical engineering.
2. Complete a minimum of 18 credits beyond the master’s of graduate course work with the following restrictions:
   a. E E courses must be numbered 500 or higher. Non-E E courses must be 450 or higher.
   b. At least half of the 18 credits must be taken in the Klipsch School (E E).
c. At most 6 credits may be research, for example, E E 600 Doctoral Research, and E E 590 Selected Topics courses that are not listed as regular courses in the schedule.
e. If the MS degree is not E E, exclude credits from graduate deficiency coursework.

**Option 2 - Direct Ph.D. with BSEE or Equivalent, but no MS Degree**

2. Complete a minimum of 42 credits of graduate coursework, including the three graduate core courses with the following restrictions:
   a. At least half of the 42 credits must be numbered 500 or higher.
   b. At least half of the 42 credits must be taken in the Klipsch School (E E).
   c. At most 9 credits may be research, for example, E E 600 Doctoral Research, and E E 590 Selected Topics courses that are not listed as regular courses in the schedule.
   e. Courses excluded from the MSEE are also excluded from the Ph.D. program.
   f. At least half of the credits must be taken with other than a single professor.

**Common Requirements for all Ph.D. Candidates**

1. Take and pass the Ph.D. Qualifying Exam. It is expected that students will take the qualifying exam within one year of their MSEE or entering the Ph.D. program. The qualifying exam consists of two components: completing the graduate core (https://ece.nmsu.edu/grad-study/grad-core-courses.html) with a grade of B or better and presenting a written and oral summary of a topical literature review. For more details on the qualifying exam, see PhD Qualifying Exam (https://ece.nmsu.edu/grad-study/phd-qualifying.html).
2. Pass a comprehensive examination. The examination must be part written and part oral. The specific format of the exam is at the discretion of the examination committee. It may cover course work, include a proposal for dissertation research, and may be preceded by a written exam.
4. Submit evidence for a minimum of two publications related to the dissertation research, one of which is submitted to an internationally-recognized journal, such as IEEE Transactions, and the second of which may be with a professional conference, such as an IEEE conference. Submissions must be completed prior to the final oral exam. For more details on the publication requirement, see College of Engineering Ph.D. Publication Requirement Form (https://gradschool.nmsu.edu/Current%20Students/College-of-Engineering-Ph.D.-Publication-Requirement-Form1.pdf).
5. Pass a final oral exam which defends the dissertation.

Other limitations and requirements that apply to all Ph.D. degrees are described elsewhere in this catalog.

**Digital Communications - Graduate Certificate**

Digital Communications focuses on the problem of transmitting information from one place to another through some medium (e.g., RF wireless). This certificate introduces students to the basic theory as well as the application of that theory.

A 3.0 minimum cumulative GPA in four courses (12 credits) as described below will be required for award of this certificate. Dr. Deva Borah, International Foundation of Telemetering and Telecommunications Professor and Professor of the Klipsch School of Electrical and Computer Engineering, (575) 646-3357.

**Digital Signal Processing - Graduate Certificate**

Digital Signal Processing (DSP) focuses on the processing and analysis of digitized signals. This certificate introduces students to the basic theory as well as the application of that theory.
A 3.0 minimum cumulative GPA in four courses (12 credits) as described below will be required for award of this certificate. Dr. Charles Creusere, Frank Carden Chair in Telecommunications and Telemetering and Professor of the Klipsch School of Electrical & Computer Engineering, (575) 646-3919.

Electric Energy Systems - Graduate Certificate

Electric Energy Systems in recent times has started to develop a cross-disciplinary aspect due to developments and investments in the areas of renewables and smart electric grid technology. This trend is only likely to intensify over the years. Thus, in addition to the engineers already working in the area of electric energy systems, engineers from other areas in electrical and computer engineering may feel the need to develop core knowledge in the area of Electric Energy Systems, which is provided by this program.

A 3.0 minimum GPA in four courses (12 credits) as described below will be required for the awarding of this certificate. Dr. Sukumar Brahma, Associate Director of the Electric Utility Management Program and Associate Professor of the Klipsch of Electrical and Computer Engineering, (575) 646-7117.

Telemetry - Graduate Certificate

Telemetering is an applied discipline that uses concepts from communications, DSP, and computing to facilitate the transfer of sensed/measured data from one place to another over a typically wireless channel. This certificate introduces students to the basic theory as well as the application of that theory.

A 3.0 minimum cumulative GPA in four courses (12 credits) as described below will be required for award of this certificate. Dr. Charles Creusere, Frank Carden Chair in Telecommunications and Telemetering and Professor of the Klipsch School of Electrical & Computer Engineering, (575) 646-3919.

Engineering Physics

Undergraduate Program Information

The Engineering Physics program is offered jointly by the Department of Physics and the College of Engineering. The faculty is drawn from the Departments of Physics, Chemical and Materials Engineering, Electrical and Computer Engineering, and Mechanical & Aerospace Engineering.

The B.S. in Engineering Physics confers an engineering credential. Students in the program complete an engineering core curriculum, as well as a rigorous course of study in physics and mathematics. A strong laboratory component prepares students in experimental techniques and technology using state-of-the-art equipment. The B.S. degree in Engineering Physics is accredited by the Engineering Accreditation Commission (EAC) of ABET, Inc.

The goals of the program are:

1. to give students a strong education in the fundamentals of physics, engineering, applied mathematics and computation;
2. to develop skill in real-world problem solving starting from fundamental physical principles;
3. to improve communication skills; and
4. to develop ability to work in a team.

The student must choose one of four concentrations in

- Aerospace Engineering,
- Chemical Engineering,
- Electrical Engineering, or
- Mechanical Engineering.

Degrees for the Department

Engineering Physics (Aerospace) - Bachelor of Science in Engineering Physics (p. 1328)

Engineering Physics (Chemical) - Bachelor of Science in Engineering Physics (p. 1331)

Engineering Physics (Electrical) - Bachelor of Science in Engineering Physics (p. 1334)

Engineering Physics (Mechanical) - Bachelor of Science in Engineering Physics (p. 1337)

Professor, Stefan Zollner, Department Head

Professor, Heinz Nakotte, Engineering Physics Program Head

Physics Courses

PHYS 1111. Introductory Computational Physics
3 Credits (2+2P)
Introduction to computational techniques for the solution of physics-related problems.
Prerequisite(s): a C- or better in MATH 1220G or MATH 1250G or MATH 1511G.

PHYS 1112. Introductory Physics for the Health Sciences
3 Credits (3)
Algebra-level introduction to topics required for the Health Sciences including basic mechanics (including sound, mechanical waves and fluids), heat and thermodynamics, electricity and magnetism, optics and electromagnetic waves, atomic and nuclear physics and applications to medical imaging. Restricted to Community Colleges campuses only.
Prerequisite(s): MATH 1215 or Equivalent.

Learning Outcomes

1. The objective of the course is to familiarize the student with the concepts and methods used in the underlying physics associated with various Health Science disciplines.
2. The course will demonstrate how the basic principles of mechanics, thermodynamics, electricity, magnetism, electromagnetic waves and optics can be applied to solve particular problems in Health Sciences applications. Introduces the student to selected topics in modern physics including quantum physics, atomic and nuclear physics.
PHYS 1115G. Survey of Physics with Lab
4 Credits (3+3P)
Overview of the concepts and basic phenomena of physics. This course provides a largely descriptive and qualitative treatment with a minimum use of elementary mathematics to solve problems. No previous knowledge of physics is assumed. Includes laboratory.
Learning Outcomes
1. Apply concepts of classical mechanics (such as velocity, acceleration, force, inertia, momentum, torque, work, energy) to simple static and dynamic systems.
2. Apply concepts of thermodynamics (such as heat, temperature, internal energy, entropy) to simple processes.
3. Apply concepts of electricity and magnetism (such as fields, potential, charge conservation, static and dynamic induction) to simple circuits, motors, and other simple contrivances.
4. Apply simple geometric and wave optics in simple situations.
5. Test ideas using modern laboratory equipment.
7. Use computers to analyze and report laboratory results.
8. Draw appropriate conclusions from quantitative scientific observations.
9. Accurately and clearly communicate the results of scientific experiments.

PHYS 1125G. Physics of Music
4 Credits (3+2P)
Introduction for non-science majors to basic concepts, laws, and skills in physics, in the context of a study of sound, acoustics, and music.
Learning Outcomes
1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply basic classical mechanics to static and dynamic fluids, including Archimedes’ principle and Bernoulli’s principle.
3. Apply the general properties of waves to simple models of musical instruments.
4. Demonstrate knowledge of basic operating principles of wind, string, and percussion instruments.
5. Demonstrate knowledge of how objectively measurable properties of sound waves correspond to the perceptions of pitch, loudness, and timbre.
6. Demonstrate understanding of the description of vibrations and waves in terms of Fourier’s Theorem and normal modes.
7. Demonstrate understanding of vocalization in terms of physical principles such as resonance and fluid dynamics.
8. Demonstrate understanding of how the ear works.

PHYS 1230G. Algebra-Based Physics I
3 Credits (3)
An algebra-based treatment of Newtonian mechanics. Topics include kinematics and dynamics in one and two dimensions, conservation of energy and momentum, rotational motion, equilibrium, and fluids.
Learning Outcomes
1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of particles in one and two dimensions.
3. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of a rigid body in two dimensions.
4. Apply Newton’s theory of gravitation to circular orbits and demonstrate understanding of how Kepler’s laws of planetary motion provide the empirical foundation for Newton’s theory.
5. Apply the mathematics of vectors to the principles of Newtonian mechanics.
6. Apply principles of Newtonian mechanics to the case of static and dynamic incompressible fluids, including Archimedes’ and Bernoulli’s principles.

PHYS 1230L. Algebra-Based Physics I Lab
1 Credit (1)
A series of laboratory experiments associated with the material presented in PHYS 1230G.
Prerequisite(s)/Corequisite(s): PHYS 1230G.
Learning Outcomes
1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.
PHYS 1240G. Algebra-Based Physics II
3 Credits (3)
The second half of a two semester algebra-based introduction to Physics. This course covers electricity, magnetism and optics.
**Prerequisite(s):** a C- or better in PHYS 1230G or PHYS 2230G.
**Learning Outcomes**
1. Be able to state Coulomb's Law and Gauss's laws and apply them.
2. Apply the concepts of electric charge, electric field and electric potential to solve problems.
3. Analyze simple DC and AC circuits.
4. Apply the Lorentz force to solve problems.
5. Apply Faraday's law of induction (and Lenz's law) to solve problems.
6. Apply ray optics to practical lens systems such as microscopes and corrective lenses.
7. Apply the wave nature of light to the phenomena of reflection, refraction, and diffraction.

PHYS 1240L. Algebra-Based Physics II Lab
1 Credit (1)
A series of laboratory experiments associated with the material presented in PHYS 1240
**Prerequisite(s)/Corequisite(s):** PHYS 1240G.
**Learning Outcomes**
1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.

PHYS 1310G. Calculus-Based Physics I
3 Credits (3)
A calculus level treatment of classical mechanics and waves, which is concerned with the physical motion concepts, forces, energy concepts, momentum, rotational motion, angular momentum, gravity, and static equilibrium. May be repeated up to 3 credits.
**Prerequisite(s):** a C- or better in MATH 1511G or higher.
**Learning Outcomes**
1. Describe the relationships among position, velocity, and acceleration as functions of time.
2. Use the equations of kinematics to describe motion under constant acceleration.
3. Analyze linear motion using Newton’s laws, force, and linear momentum.
4. Analyze rotational motion using torque and angular momentum.
5. Analyze motion using work and energy.

PHYS 1310L. Calculus-Based Physics I Lab
1 Credit (3P)
A series of laboratory experiments associated with the material presented in Calculus-based Physics I. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-based Physics I.
**Prerequisite(s)/Corequisite(s):** PHYS 1310G.
**Learning Outcomes**
1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Experience the relationship between theory and experiment.

PHYS 1311. Problems in Calculus-Based Physics I
0.5-1 Credits (.5-1)
This is a supplemental course for Calculus-based Physics I. May be repeated up to 1 credits.
**Corequisite(s):** PHYS 1310G.
PHYS 1320G. Calculus-Based Physics II
3 Credits (3)
A calculus level treatment of classical electricity and magnetism. It is strongly recommended that this course is taken at the same time as Calculus-based Physics II laboratory. May be repeated up to 3 credits.

Prerequisite(s): A C- or better in PHYS 2110 or PHYS 1310G and MATH 1521G or higher.

Learning Outcomes
1. Apply the concepts of electric charge, electric field and electric potential to solve problems.
2. Sketch the electric field in the vicinity of point, line, sheet, and spherical distributions of static electric charge.
3. Sketch the magnetic field in the vicinity of line, ring, sheet, and solenoid distributions of steady current.
4. Describe the relationship between electric field and electric potential.
5. Calculate the Lorentz force on a moving charge for simple geometries of the fields and use it to analyze the motion of charged particles.
6. Apply the integral forms of Maxwell’s equations.
7. Calculate the energy of electromagnetic fields.
8. Analyze DC circuits.

PHYS 1320L. Calculus-Based Physics II Lab
1 Credit (3P)
A series of Laboratory experiments associated with the material presented in Calculus-Based Physics II. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-Based Physics II.

Prerequisite(s)/Corequisite(s): PHYS 1320G. Prerequisite(s): A C- or better in PHYS 2110L or PHYS 1310L.

Learning Outcomes
1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Experience the relationship between theory and experiment.

PHYS 1321. Problems in Calculus-Based Physics II
0.5-1 Credits (.5-1)
This is a supplemental course for Calculus-based Physics II.

Corequisite(s): PHYS 1320G.

PHYS 2110. Mechanics
3 Credits (3)
Newtonian mechanics.

Prerequisite(s)/Corequisite(s): MATH 1511G or higher.

PHYS 2110L. Experimental Mechanics
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2110. Science majors.

Prerequisite(s)/Corequisite(s): PHYS 2110.

PHYS 2111. Supplemental Instruction to PHYS 2110
0.5-1 Credits (.5-1)
This Optional workshop as a supplement to PHYS 2110. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.

Corequisite(s): PHYS 2110.

Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2110, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.
PHYS 2120. Heat, Light, and Sound
3 Credits (3)
Calculus-level treatment of thermodynamics, geometrical and physical optics, and sound. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.

PHYS 2120L. Heat, Light, and Sound Laboratory
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2120. Science majors.
Prerequisite(s)/Corequisite(s): PHYS 2120. Prerequisite(s): a C- or better in PHYS 2110L or PHYS 1310L.

PHYS 2121. Supplemental Instruction to PHYS 2120
0.5-1 Credits (.5-1)
This optional workshop supplements PHYS 2120 “Heat, Light, and Sound”. Students actively apply concepts and methods introduced in PHYS 2120 to problem solving and quantitative analysis. May be repeated up to 1 credits.
Corequisite(s): PHYS 2120.
Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2121, apply quantitative analysis to solve problems involving wave propagation and interference, geometric optics, heat transfer and thermodynamics.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline

PHYS 2140. Electricity and Magnetism
3 Credits (3)
Charges and matter, the electric field, Gauss law, the electric potential, the magnetic field, Ampere's law, Faraday's law, electric circuits, alternating currents, Maxwell's equations, and electromagnetic waves. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 1521G. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.

PHYS 2140L. Electricity & Magnetism Laboratory
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2140.
Prerequisite(s)/Corequisite(s): PHYS 2140. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G.

PHYS 2141. Supplemental Instruction to PHYS 2140
0.5-1 Credits (.5-1)
Optional workshop as a supplement to PHYS 2140. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.
Corequisite(s): PHYS 2140.
PHYS 2230G. General Physics for Life Science I  
3 Credits (3)
This algebra-based introduction to general physics covers mechanics, waves, sound, and heat. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT. May be repeated up to 3 credits.  
Prerequisite(s): A C or better in MATH 1215 or higher.  
Learning Outcomes  
1. Modeling: analyze real-world phenomena by deciding what information is relevant and constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain phenomena or function; use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text; critique assumptions and determine how to test the validity of a model and use the comparison of experimental data and prediction to refine the model.  
2. Conceptual understanding: describe the motion of any object in terms of displacement, velocity, and acceleration; analyze external forces acting on an object and determine if a system is in equilibrium or relate the net force to changes in motion; predict or analyze motion using conservation laws for energy and momentum; analyze forces and torques for a rigid object in static equilibrium; for a static fluid determine pressure and the buoyant force; apply idealized models of fluid flow to the circulatory system; describe the properties of pressure waves known as sound, apply the model of standing waves to musical instruments and discuss how sound is used to sense the environment; predict qualitative changes in the internal energy of a thermodynamic system when energy has been transferred due to work or heat and justify those predictions using conservation of energy (First law of thermodynamics). Identify which heat transfer processes occur in a described situation.  
3. Quantitative reasoning: use a physics problem-solving strategy (Identify relevant concepts; Introduce and study simplified models; Use symmetry arguments; Establish the relation between known and unknown quantities; Calculate a quantitative result using appropriate mathematical methods; Self-check reasonableness of assumptions and solutions); use scientific notation accurately and convert units if necessary.  
4. Communicating scientific information: interpret or generate graphs or other visual representations and be able to switch between various representations including text, mathematical description, or diagrams.  

PHYS 2230L. Laboratory to General Physics for Life Science I  
1 Credit (1)
Laboratory experiments in topics associated with material presented in PHYS 2230G.  
Prerequisite(s)/Corequisite(s): PHYS 2230G. Restricted to Las Cruces campus only.  

PHYS 2231. Supplemental Instruction to General Physics for Life Sciences I  
1 Credit (1)
This optional workshop supplements Physics for Life Sciences I. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.  
Corequisite(s): PHYS 2230G.  
Learning Outcomes  
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.  
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.  
3. in the contexts of concepts and physical laws discussed in PHYS 2230, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.  
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.  
5. develop learning strategies and use metacognition to promote thinking in the discipline.
PHYS 2240G. General Physics for Life Science II
3 Credits (3)
This algebra-based course covers electricity, magnetism, light, atomic physics, and radioactivity. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in PHYS 1230G or PHYS 2230G, and MATH 1220G or higher.

Learning Outcomes
1. Modeling: analyze real world phenomena by constructing simplified idealized models (an abstract description) that allow making predictions or explaining a phenomena or function; use multiple representations to build and communicate the model, including sketches, mathematical expressions, diagrams or graphs; decide what information is relevant and critique assumptions and models of others; determine how to test the validity of a model and use comparison of experimental data and prediction to refine the model.
2. Conceptual understanding: electric or magnetic fields can be used to describe interactions of objects that contain charges with their surroundings; changes that occur as a result of interactions are constrained by conservation laws (such as conservation of energy, conservation of charge or conservation of nucleon number); many macroscopic properties of materials can be described using microscopic models or related to their geometry; electromagnetic radiation can be modeled as a wave or as fundamental particles (photons); the direction of propagation of a wave may change when it encounters a boundary surface between two media of different properties (reflection or refraction); the spontaneous radioactive decay of nuclei is described by probability.
3. Quantitative reasoning: apply quantitative analysis and appropriate mathematical reasoning to describe or explain phenomena; use scientific notation accurately and convert units if necessary.
4. Communicating scientific information: interpreter generate graphs or other visual representations (e.g. field lines, equipotential lines) and be able to switch between various representations including text, mathematical description, or diagrams.

PHYS 2240L. Laboratory to General Physics for Life Science II
1 Credit (1)
Laboratory experiments in topics associated with material presented in PHYS 2240.
Prerequisite(s)/Corequisite(s): PHYS 2240G. Restricted to Las Cruces campus only.

PHYS 2241. Supplemental Instruction to General Physics for Life Sciences II
1 Credit (1)
This optional workshop is a supplement to Physics for Life Science II. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.
Corequisite(s): PHYS 2240G.

Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2240, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2996. Special Topics
1-3 Credits
Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Learning Outcomes
1. Varies

PHYS 2997. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

Learning Outcomes
1. Varies

PHYS 303V. Energy and Society in the New Millennium
3 Credits (3)
Traditional and alternative sources of energy. Contemporary areas of concern such as the state of depletion of fossil fuels; nuclear energy, solar energy, and other energy sources; environmental effects; nuclear weapons; and health effects of radiation. Discussion of physical principles and impact on society. Focus on scientific questions involved in making decisions in these areas. No physics background required.
PHYS 304. Forensic Physics
4 Credits (3+3P)
Theories, laboratory, and field techniques in the area of forensic physics.

PHYS 305V. The Search for Water in the Solar System
3 Credits (3)
Examines the formation, abundance and ubiquity of water in our Solar System stemming from comets, Martian and Lunar poles, Earth's interior and into the outer reaches of the Solar System. Topics will include nuclear synthesis, Solar System formation, remote sensing, as well as past, present and future NASA missions for water.

PHYS 315. Modern Physics
3 Credits (3)
An introduction to relativity and quantum mechanics, with applications to atoms molecules, solids, nuclei, and elementary particles. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in MATH 2530G and PHYS 2140 or PHYS 1320G.

PHYS 315 L. Experimental Modern Physics
3 Credits (1+6P)
Elementary laboratory in modern physics which supports the subject matter in PHYS 315. Required for physics majors. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): PHYS 315. Prerequisite(s): a C- or better in PHYS 2140L or 1320L.

PHYS 316. Supplemental Instructions to PHYS 315
1 Credit (1)
This optional workshop supplements PHYS 315 "Modern Physics". Students actively apply concepts and methods introduced in PHYS 315 to problem solving and quantitative analysis.

Corequisite(s): PHYS 315.

PHYS 325. Intermediate Experimental Physics
3 Credits (1+6P)
An exploration of a variety of experimental techniques in physics with an emphasis on the proper determination of statistical and systematic uncertainties. Students will work in teams and prepare professional written and oral reports of their work. This course cannot be used to replace M E 345 for students majoring in engineering.

Prerequisite(s)/Corequisite(s): PHYS 315. Prerequisite(s): a C- or better in PHYS 2140L or 1320L.

Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 350. Special Topics
1-3 Credits
Lectures, demonstrations, and discussions on such topics as lasers and holography, energy sources, clouds, and biophysics. May be repeated for a maximum of 12 credits under different subtitles.

PHYS 380. Individual Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 395. Intermediate Mathematical Methods of Physics
3 Credits (3)
Introduction to the mathematics used in intermediate-level physics courses. Topics include vector calculus, curvilinear coordinates, matrices, linear algebra, function spaces, partial differential equations, and special functions. This course cannot be used to replace M E 228 or M E 328 for students majoring in engineering. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): a C- or better in MATH 2530G.

Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
PHYS 400. Undergraduate Research  
1-3 Credits  
May be repeated for a maximum of 6 credits.  
Prerequisite: consent of instructor.

PHYS 420. Capstone Project I  
3 Credits (3P)  
Application of engineering physics principles to a significant design project. Includes teamwork, written and oral communication and realistic technical, economic and public safety requirements.

PHYS 421. Capstone Project II  
3 Credits (3P)  
Continuation of PHYS 420.

PHYS 450. Selected Topics  
1-3 Credits  
Readings, lectures or laboratory studies in selected areas of physics. May be repeated for a maximum of 12 credits.

PHYS 451. Intermediate Mechanics I  
3 Credits (3)  
Newtonian mechanics, including an introduction to the Lagrangian formulation. Topics include central force motion, rigid body motion, noninertial reference frames, oscillating systems, and classical scattering.  
Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 2530G.

Learning Outcomes  
1. Set up equations of motion for classical mechanical systems and solve them. Identify conserved quantities and understand the circumstances under which they arise (symmetries); in particular, know how to use conservation of energy, momentum, angular momentum to solve problems. Fluently use three-dimensional calculus as a language to do the above; be able to use spherical and cylindrical coordinates. Understand the paradigmatic examples of the harmonic oscillator, central force (in particular, gravitational) motion and rigid body motion, which serve as starting points for investigating more complicated realistic problems.

PHYS 454. Intermediate Modern Physics I  
3 Credits (3)  
Introduction to quantum mechanics, focusing on the role of angular momentum and symmetries, with application to many atomic and subatomic systems. Specific topics include intrinsic spin, matrix representation of wave functions and observables, time evolution, and motion in one dimension.  
May be repeated up to 3 credits.  
Prerequisite(s)/Corequisite(s): MATH 392 and PHYS 395. Prerequisite(s): a C- or better in PHYS 315.

PHYS 455. Intermediate Modern Physics II  
3 Credits (3)  
Continuation of subject matter of PHYS 454. Specific topics include rotation and translation in three dimensions, solution of central potential problems, perturbation theory, physics of identical particles, scattering theory, and the interaction between photons and atoms. May be repeated up to 3 credits.  
Prerequisite(s): a C- or better in PHYS 454, MATH 392, and PHYS 395.

PHYS 461. Intermediate Electricity and Magnetism I  
3 Credits (3)  
The first part of a two-course sequence in classical electrodynamics. Covered topics include static electric and magnetic fields, Laplace’s and Poisson’s equations, electromagnetic work and energy, Lorentz force, Gauss’s, Biot-Savart, and Ampere’s laws, Maxwell’s equations, as well as electric and magnetic fields in matter. May be repeated up to 3 credits.  
Prerequisite(s)/Corequisite(s): MATH 392 and PHYS 395. Prerequisite(s): a C- or better in PHYS 2140 or PHYS 1320G or equivalent and a C- or better in MATH 2530G.

PHYS 462. Intermediate Electricity and Magnetism II  
3 Credits (3)  
Continuation of subject matter of PHYS 461. Covered topics include Maxwell’s equations and their applications, electromagnetic waves, reflection, refraction, dispersion, radiating systems, interference and diffraction, as well as Lorentz transformations and relativistic electrodynamics. May be repeated up to 3 credits.  
Prerequisite(s): a C- or better in PHYS 461, MATH 392, and PHYS 395.

PHYS 468. Intermediate X-ray Diffraction  
3 Credits (3)  
Introduction to x-ray diffraction and reflectivity spectra. Topics include X-ray sources and detectors, atomic spectra, characteristic x-rays, thermionic emission, synchrotron radiation, instrument components, and beam conditioners. Prerequisite(s): a C- or better in PHYS 315 and PHYS 325.

Learning Outcomes  
1. Knowledge of structural properties of materials Experimental x-ray characterization techniques Presentation and writing skills in the discipline Ethics, teamwork, and career opportunities
PHYS 471. Modern Experimental Optics
3 Credits (1+6P)
Cumulative experience course in optics related to the material presented in PHYS 473 and PHYS 489.
Prerequisite: a C- or better in PHYS 315 and (PHYS 315 L or PHYS 325).

Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 475. Advanced Physics Laboratory
3 Credits (3P)
Cumulative experience course involving experiments in atomic, molecular, nuclear, and condensed-matter physics.
Prerequisite: a C- or better in PHYS 315 and (PHYS 315 L or PHYS 325).

Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 476. Computational Physics
3 Credits (3)
Scientific visualization, numerical differentiation and interpolation, numerical integration, root finding, linear algebra, eigensystems, ODE's, Boundary value problems, PDE's, Monte-Carlo calculations, data description and analysis, Fast Fourier Transforms, and applications to advanced physics problems. Recommended is the knowledge of a programming language.
Prerequisite(s): a C- or better in PHYS 1111 or equivalent and MATH 392.

Learning Outcomes
1. learn how to use computers for solving problems in the physical sciences,
2. obtain skills to implement numerical simulation and modeling strategies,
3. learn how to monitor and analyze data graphically, during and after computation,
4. obtain workflow organization skills needed for the solution of complicated systems.

PHYS 478. Fundamentals of Photonics
4 Credits (3+3P)
Prerequisite: C- or better in PHYS 1320G or PHYS 2120.

Learning Outcomes
1. Understand the fundamentals of the different theories of light including ray, wave, electromagnetic (vector) and photon optics, and how these theories are represented mathematically and on a computer. Develop the ability to perform calculations for the different theories (e.g., ray tracing, wave interference, polarization calculus, photon detection) to determine the propagation characteristics and describe the manipulation of light. Gain insight and experience with materials and devices for manipulating and detecting light (e.g., glass, mirrors, lenses, fiber optics, polarization elements, liquid crystals, semiconductors, and photodiodes). Apply the theoretical, mathematical, and practical understanding of optics to describe real-world applications of light technology with supporting analysis and calculations.

PHYS 480. Thermodynamics
3 Credits (3)
Thermodynamics and statistical mechanics. Basic concepts of temperature, heat, entropy, equilibrium, reversible and irreversible processes. Applications to solids, liquids, and gases. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in PHYS 2120, PHYS 315, and MATH 2530G.
PHYS 485. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHYS 488. Introduction to Condensed Matter Physics
3 Credits (3)
Crystal structure, X-ray diffraction, energy band theory, phonons, cohesive energy, conductivities, specific heats, p-n junctions, defects, surfaces, and magnetic, optical, and low-temperature properties.
Prerequisite: a C- or better in PHYS 315.
Learning Outcomes
1. Learn the fundamental concepts of solid-state physics: classification of solids, crystal structure, band structure of solids, lattice vibrations, optical and magnetic properties of solids. Develop an ability to formulate and solve complex problems in solid state physics by applying the fundamental principles of physics and mathematics. Develop and ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 489. Introduction to Modern Materials
3 Credits (3)
Structure and mechanical, thermal, electric, and magnetic properties of materials. Modern experimental techniques for the study of material properties.
Prerequisite: a C- or better in PHYS 315.
Learning Outcomes
1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 493. Experimental Nuclear Physics
3 Credits (1+6P)
Cumulative experience course in nuclear physics such as measurement of radioactivity, absorption of radiation, nuclear spectrometry.
Prerequisite: a C- or better in PHYS 315 and ( PHYS 315L or PHYS 325 ).
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communications: an ability to communicate effectively with a range of audiences. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 495. Mathematical Methods of Physics I
3 Credits (3)
Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.
Prerequisite(s): a C- or better in MATH 392 and PHYS 395.
Learning Outcomes
1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra. Evaluate integrals of analytic functions using the calculus of residues. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.

PHYS 500. Special Topics Seminar
1-2 Credits
Treatment of topics not covered by regular courses. Graded S/U. May be repeated.

PHYS 511. Mathematical Methods of Physics I
3 Credits (3)
Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.
Learning Outcomes
1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra. Evaluate integrals of analytic functions using the calculus of residues. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.
PHYS 520. Selected Topics
1-3 Credits
Formal treatment of graduate-level topics not covered in regular courses. May be repeated for a maximum of 9 credits.
Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

PHYS 521. Individual Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

PHYS 551. Classical Mechanics
3 Credits (3)
Lagrangian and Hamiltonian formulation of dynamics. Advanced treatments of most topics listed under PHYS 451, plus canonical transformations and Hamilton-Jacobi theory. PHYS 451 strongly recommended.

PHYS 554. Quantum Mechanics I
3 Credits (3)

PHYS 555. Quantum Mechanics II
3 Credits (3)
Continuation of topics in PHYS 554.
Prerequisites: PHYS 554 or consent of instructor.

PHYS 561. Electromagnetic Theory I
3 Credits (3)
Detailed advanced treatments of most topics listed under PHYS 461, PHYS 462, plus multipole radiation, collisions of charged particles and bremsstrahlung, scattering, and radiation reaction. PHYS 461 and PHYS 462 strongly recommended.

PHYS 562. Electromagnetic Theory II
3 Credits (3)
Continuation of topics in PHYS 561.
Prerequisites: PHYS 561 or consent of instructor.

PHYS 568. Elements of X-ray Diffraction
3 Credits (3)
Same as PHYS 468, but additional work required. Crosslisted with: CHME 588.

PHYS 571. Advanced Experimental Optics
3 Credits (3)
Taught with PHYS 471 with additional work required at the graduate level. Consent of Instructor required.
Prerequisite(s): PHYS 473 or PHYS 562.

PHYS 575. Advanced Physics Laboratory
3 Credits (3P)
Selected experiments in atomic, molecular, nuclear and condensed-matter physics.

PHYS 576. Advanced Computational Physics I
3 Credits (3)
Advanced treatment of topics listed under PHYS 476 plus additional work. Applications of numerical methods to advanced physics problems. Recommended is the knowledge of a programming language.

Learning Outcomes
1. learn to numerically solve problems that require higher mathematical and theoretical analysis,
2. experience how graduate research will be advanced and accelerated by the use of scientific computing skills.

PHYS 584. Statistical Mechanics
3 Credits (3)
PHYS 588. Condensed Matter Physics  
3 Credits (3)  
Same as PHYS 488, but additional work required.  
**Learning Outcomes**  
1. Learn the fundamental concepts of solid-state physics: classification of solids, crystal structure, band structure of solids, lattice vibrations, optical and magnetic properties of solids. Develop an ability to formulate and solve complex problems in solid state physics by applying the fundamental principles of physics and mathematics. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.  

PHYS 589. Modern Materials  
3 Credits (3)  
Same as PHYS 489 with differentiated assignments for graduate students. PHYS 554 recommended.  
**Learning Outcomes**  
1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.  

PHYS 591. Advanced High-Energy Physics I  
3 Credits (3)  
Taught with PHYS 491 with additional work required at the graduate level.  
**Prerequisite(s):** PHYS 555 or consent of instructor.  

PHYS 593. Advanced Experimental Nuclear Physics  
3 Credits (1+6P)  
Advanced experimental investigation of topics such as measurement of radioactivity, absorption of radiation, and nuclear spectrometry.  

PHYS 597. Space Plasma Physics  
3 Credits (3)  
Same as PHYS 497 but with added requirements.  

PHYS 599. Master's Thesis  
1-15 Credits (1-15)  
Thesis.  

PHYS 600. Research  
1-15 Credits  
Doctoral research. May be repeated.  

PHYS 620. Advanced Topics in Physics  
1-3 Credits  
Advanced formal treatment of topics not covered in regular courses. May be repeated for a maximum of 9 credits.  
**Prerequisite:** consent of instructor.  

PHYS 650. General Relativity I  
3 Credits (3)  
Basic foundations and principles of general relativity, derivation of the Einstein field equations and their consequences, the linearized theory, the Bel-Petrov classification of the curvature tensor, derivation of the Schwarzschild solution and the four basic tests of general relativity.  
**Prerequisite(s):** PHYS 511 or PHYS 561 or consent of instructor.  

PHYS 680. Independent Study  
1-3 Credits  
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.  
**Prerequisite:** graduate standing or consent of instructor.  

PHYS 688. Advanced Condensed Matter Physics  
3 Credits (3)  
Continuation of the advanced condensed matter physics presented in PHYS 588. Topics include electronic structure methods, optical, magnetic, and transport properties of solids, semiconductors, crystalline defects, nanostructures, and noncrystalline solids. PHYS 588 strongly recommended.  
**Learning Outcomes**  
1. Learn the fundamental concepts of advanced condensed state physics: band theory of solids, electronic structure methods, optical and magnetic properties of solids, bulk semiconductors, and properties of nano-structured materials. Develop an ability to formulate and solve complex problems in advanced condensed matter physics. Develop an ability to study independently and acquire new knowledge using appropriate learning strategies.
PHYS 689. Advanced Modern Materials
3 Credits (3)
Advanced topics in the physics of modern materials, such as crystalline, amorphous, polymeric, nanocrystalline, layered, and composite materials and their surfaces and interfaces. PHYS 555, PHYS 588, and PHYS 589 recommended.

Learning Outcomes
1. Learn the fundamental concepts of the physics of modern materials, such as crystalline, amorphous, polymeric, nanostructured, layered, and composite materials. Develop an ability to formulate and solve complex problems in the area of advanced physics of modern materials. Develop an ability to study independently and acquire new knowledge using appropriate learning strategies.

PHYS 691. Quantum Field Theory I
3 Credits (3)
Path integrals, gauge invariance, relativistic quantum mechanics, canonical quantization, relativistic quantum field theory, introduction to QED.
Prerequisites: PHYS 555 and PHYS 562, or consent of instructor.

PHYS 692. Quantum Field Theory II
3 Credits (3)
QED, running coupling constant, QCD, electroweak theory, asymptotic freedom, deep inelastic scattering, basic QCD phenomenology, path integrals in quantum field theory, lattice QCD.
Prerequisite: PHYS 691 or consent of instructor.

PHYS 700. Doctoral Dissertation
1-15 Credits (1-15)
Dissertation.

Phone: (575) 646-3831

Engineering Physics (Aerospace) - Bachelor of Science in Engineering Physics

A strong grasp of underlying physical principles behind the development of new technologies is necessary to keep up with new developments in a high-tech world. The Bachelor of Science (B.S.) in Engineering Physics degree program is designed to provide quality education to students for immediate employment with technical jobs in private industries (especially high-tech industries), research laboratories and public sectors. The program trains students with a combination of engineering knowledge, physics principles, mathematical background, problem-solving strategies and effective communication skills. The B.S. in Engineering Physics also provides an excellent preparation for graduate studies in either physics or an engineering discipline.

The B.S. degree in Engineering Physics confers an engineering credential. Students in the program complete an engineering core curriculum, as well as a rigorous course of study in physics and mathematics. A strong laboratory component prepares students in experimental techniques and technology using state-of-the-art equipment. The B.S. degree in Engineering Physics is accredited by the Engineering Accreditation Commission (EAC) of ABET, Inc.

The requirements for the Aerospace concentration is listed below. Students must earn a C- or better in all required courses.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 121 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

---

1. See the General Education (p. 123) section of the catalog for a full list of courses.
2. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

⁴ See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses. See Alternatives for meeting VWW requirements (nine-credit rule).
### Engineering Physics (Chemical) - Bachelor of Science in Engineering Physics

A strong grasp of underlying physical principles behind the development of new technologies is necessary to keep up with new developments in a high-tech world. The Bachelor of Science (B.S.) in Engineering Physics program is designed to provide quality education to students for immediate employment with technical jobs in private industries (especially high-tech industries), research laboratories and public sectors. The program trains students with a combination of engineering knowledge, physics principles, mathematical background, problem-solving strategies and effective communication skills. The B.S. in Engineering Physics also provides an excellent preparation for graduate studies in either physics or an engineering discipline.

The BS in Engineering Physics confers an engineering credential. Students in the program complete an engineering core curriculum, as well as a rigorous course of study in physics and mathematics. A strong laboratory component prepares students in experimental techniques and technology using state-of-the-art equipment. The B.S. degree in Engineering Physics is accredited by the Engineering Accreditation Commission (EAC) of ABET, Inc.

The requirements for the Chemical concentration are listed below. Students must earn a C- or better in all required courses.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Total Credits**: 15

1 These courses may have prerequisites and/or co-requisites, and it is the students' responsibility for checking and fulfilling all those requirements.
2 PHYS 2110 Mechanics/PHYS 2110L Experimental Mechanics and PHYS 2140 Electricity and Magnetism/PHYS 2140L Electricity & Magnetism Laboratory will not automatically count towards the Area III: Laboratory Science requirement, an exception will be made if students elect to take these courses.
3 See the General Education (p. 123) section of the catalog for a full list of courses.
4 See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
5 Technical electives are approved by the Engineering Physics advisors.

**Engineering Physics (Mechanical) - Bachelor of Science in Engineering Physics**

A strong grasp of underlying physical principles behind the development of new technologies is necessary to keep up with new developments in a high-tech world. The Bachelor of Science (B.S.) in Engineering Physics program is designed to provide quality education to students for immediate employment with technical jobs in private industries (especially high-tech industries), research laboratories and public sectors. The program trains students with a combination of engineering knowledge, physics principles, mathematical background, problem-solving strategies and effective communication skills. The B.S. in Engineering Physics also provides an excellent preparation for graduate studies in either physics or an engineering discipline.

The B.S. in Engineering Physics confers an engineering credential. Students in the program complete an engineering core curriculum, as well as a rigorous course of study in physics and mathematics. A strong laboratory component prepares students in experimental techniques and technology using state-of-the-art equipment. The BS degree in Engineering Physics is accredited by the Engineering Accreditation Commission (EAC) of ABET, Inc.

The requirements for the Mechanical concentration are listed below. Students must earn a C- or better in all required courses.
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### First Year

ENGR 234 Engineering Mechanics II 3

Credits 15

Third Year
Semester 1
PHYS 395 Intermediate Mathematical Methods of Physics 1 3
PHYS 461 Intermediate Electricity and Magnetism I 1 3
M E 326 Mechanical Design 1 3
M E 338 Fluid Mechanics 1 3
Area IV: Social and Behavioral Science Course 3 3

Credits 15

Semester 2
PHYS 462 Intermediate Electricity and Magnetism II 1 3
M E 341 Heat Transfer 1 3
M E 425 Design of Machine Elements 1 3
Area V: Humanities Course 3 3
VWW: Viewing a Wider World Course 4 3

Credits 15

Fourth Year
Semester 1
PHYS 451 Intermediate Mechanics I 1 3
PHYS 454 Intermediate Modern Physics I 1 3
ENGR 401 Engineering Capstone I 3
COMM 115G Introduction to Communication 3
Area VI: Creative and Fine Arts Course 3 3

Credits 15

Semester 2
PHYS 455 Intermediate Modern Physics II 1 3
ENGR 402 Engineering Capstone II 1 3
Technical Elective Course 5 3
Elective Course 2 3
VWW: Viewing a Wider World Course 4 3

Credits 14

Total Credits 120

1 These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements
2 PHYS 2110 Mechanics/PHYS 2110L Experimental Mechanics and PHYS 2140 Electricity and Magnetism/PHYS 2140L Electricity & Magnetism Laboratory will not automatically count towards the Area III: Laboratory Science requirement, an exception will be made if students elect to take these courses.
3 See the General Education (p. 123) section of the catalog for a full list of courses.
4 See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
5 Technical electives are approved by Engineering Physics advisors

Engineering Technology and Surveying Engineering

Undergraduate Program Information

Educational opportunities offered by the Department of Engineering Technology and Survey Engineering (https://et.nmsu.edu/) (ETSE) in the College of Engineering (https://engr.nmsu.edu/) place an emphasis on the theory and practical hands-on application of engineering principles and methods, under the motto of “linking theory and application”. Many ETSE graduates go on to earn advanced degrees but most typically begin their careers upon graduation and can select from public or private employment opportunities in a wide variety of fields.

Four ABET www.abet.org (http://www.abet.org/) accredited four-year Bachelor of Science (BS) degrees in Engineering Technology are offered by the department with majors in:

• Civil Engineering Technology (p. 1360) (CET) - Visit the (CET) (https://et.nmsu.edu/civil-engineering-technology/) webpage. Want to learn more? (https://et.nmsu.edu/files/2016/10/CET-Intro.pdf)
An ABET accredited four-year Bachelor of Science (BS) degree in Geomatics is offered by the department.

Two Bachelor’s degrees are also offered via a two-year degree completion programs for transfer students or for students interested in starting the degree at NMSU. The Geomatics and the Information and Communications Technology completion programs are offered completely online via a distance education format:

- Geomatics (p. 1380) - Visit the webpage (https://et.nmsu.edu/geomatics-surveying/) - offered online since Fall 2018.
- Information and Communication Technology (p. 1386) (ICT) - Visit the ICT (https://et.nmsu.edu/information-communication-technology/) webpage.

NMSU is accredited under the Higher Learning Commission (http://www.hlcommission.org/).

Opportunities are available for students to concentrate in a particular area within their major or earn a minor to complement their degree. Please visit the ETSE Majors, Minors, and Concentrations (https://et.nmsu.edu/majors-and-minors/) website to find more details.

**Mission Statement**

The Mission of the ETSE Department is to provide students with a quality engineering technology or surveying/geomatics education that links theory and application provides a rigorous fundamental education and gives students enhanced career opportunities.

The department’s goals supporting this mission are:

- to provide educational and social environments that promote and facilitate student learning
- to have a highly respected and visible department
- to foster the development of the department and
- to graduate students who are competent and sought after by industry

View the Educational Objectives of our Engineering Technology Programs (https://et.nmsu.edu/accreditation-and-assessment/outcomes/) page to see detailed information of what our students will gain upon graduating from an Engineering Technology and Surveying Engineering degree program.

**Requirements Related to Transfer of Academic Credit**

Students transferring to NMSU may receive transfer credit (https://engr.nmsu.edu/course-transfer-credit/) depending on completed courses and source institutions. Articulation agreements exist for many New Mexico Community Colleges and represent a framework for the transfer of academic credit. General degree requirements of the College of Engineering and NMSU also apply to ETSE department majors. The Engineering Transfer Policy (https://engr.nmsu.edu/engineering-transfer-policy/) applies to any course in an ABET-accredited major that is not to be completed on the NMSU main campus by a student already having official degree-seeking status within the department.

- The department head must approve the course prior to enrollment and the course must be offered by an ABET-accredited program (exceptions may be made when existing articulation agreements with NMSU are relevant). In all cases, a corresponding course syllabus and any other supporting documentation are to be submitted, together with the student’s completed online request, before the course will be considered for transfer credit approval.
- To qualify for approval, the technical content and rigor must also be substantially the same as the equivalent NMSU course and the student must have satisfied all relevant university prerequisite requirements. If program co- and prerequisite requirements are not met, transfer credit will not be approved.
- No credit for on-line courses of another institution may be substituted to meet departmental core curriculum requirements.

To formally request approval to transfer a core course from another institution, you must complete the Engineering Transfer Course Request Form. (https://engr.nmsu.edu/15466-2/)

**Academic Performance Requirements**

In addition to University (p. 55) and College of Engineering’s specific requirements (p. 1216), as outlined in the NMSU General Information and College of Engineering catalog sections, departmental majors are expected to maintain a status of academic good standing and to complete degree requirements in a timely manner.

Courses in engineering, technology, math and science (and their respective pre- and co-requisites) must be completed with a minimum grade of C- to be counted toward the fulfillment of degree requirements. This also includes all courses in the NM General Education Common Core Areas I, II, and III. If a
grade lower than C- is earned in one of the above-noted courses, the student will be required to retake that course during the first subsequent semester in which it is offered.

An ETSE student may attempt to complete core curriculum courses no more than three times for outcomes involving D or F letter grades. After this specified number of attempts without a passing grade of C- or better, the student will be prohibited from enrolling in any course offered within the college of engineering for a minimum period of one year; after which they may appeal to the college and department for re-admission into the program. Any credit earned outside the college during a period of academic suspension will not qualify for subsequent transfer credit toward core course degree requirements. Refer to the section of the catalog for university academic probation policies (p. 55).

Requirements for Graduation
The completion of ETSE undergraduate degrees are contingent upon fulfillment of

1. University requirements (p. 79) as outlined in relevant sections of this catalog,
2. policy expectations as outlined under College General Requirements (p. 1216), and
3. departmental requirements, as outlined above and within the individual program descriptions of this catalog.

Degrees for the Department

Bachelor's Degrees

Engineering Technology - Civil Degrees
Engineering Technology - Civil - Bachelor of Science in Engineering Technology (p. 1360)
Engineering Technology - Civil (Renewable Energy Technologies) - Bachelor of Science in Engineering Technology (p. 1364)
Engineering Technology - Civil (Transportation Technology) - Bachelor of Science in Engineering Technology (p. 1367)

Engineering Technology - Electronics and Computer Degrees
Engineering Technology - Electronics and Computer - Bachelor of Science in Engineering Technology (p. 1370)

Engineering Technology - Information Degrees
Engineering Technology - Information - Bachelor of Science in Engineering Technology (p. 1373)

Engineering Technology - Mechanical Degrees
Engineering Technology - Mechanical - Bachelor of Science in Engineering Technology (p. 1376)

Geomatics Degrees
Geomatics - Bachelor of Science (BS) (p. 1380)
Geomatics - Bachelor of Science (Online) (p. 1383)

Information and Communication Technology Degrees
Information and Communication Technology - Bachelor of Information and Communication Technology (p. 1386)
Information and Communication Technology - Bachelor of Information and Communication Technology (Online) (p. 1389)

Master's Degree
Information Technology - Master of Information Technology (Online) (p. 1394)

Minors for the Department

Digital Electronic Applications - Undergraduate Minor (p. 1391)
Digital Forensics - Undergraduate Minor (p. 1392)
Geomatics - Undergraduate Minor (p. 1392)
Information Security Technology - Undergraduate Minor (p. 1392)
Manufacturing - Undergraduate Minor (p. 1393)
Renewable Energy Technologies - Undergraduate Minor (p. 1393)

**Professor** Ruinian Jiang (https://myaccount.nmsu.edu/phonebook/?txtFirstName=Ruinian&txtLastName=Jiang&txtEmail=&chkEmployees=Employees), Ph. D., P.E.¹, Department Head

**Assistant Professor** Philip Braker (https://myaccount.nmsu.edu/phonebook/?txtFirstName=Philip&txtLastName=Braker&txtEmail=&chkEmployees=Employees), Associate Department Head

**Assistant Professor** Barbara Gamallo (https://myaccount.nmsu.edu/phonebook/?txtFirstName=Barbara&txtLastName=Gamallo&txtEmail=&chkEmployees=Employees), Associate Department Head

**Professors** Cooper¹, Jiang¹, Stevens¹; **Associate Professors** Elaksher², Furth, Nogales, Sassenfeld, Wurm²; **Assistant Professors** Ben Ayed, Braker, Elshinawy, B. Gamallo, E. Gamallo, Tapia; **Emeritus Faculty** Alexander, Burkholder¹,², Cameron, Hyde, Kelly, Reilly², Ricketts, Rico.

**Staff:** Administrative Assistant Carol Serna (https://myaccount.nmsu.edu/phonebook/?txtFirstName=carol&txtLastName=serna&txtEmail=&chkEmployees=Employees)

¹ Registered Professional Engineer (NM).
² Licensed Professional Surveyor (NM).

---

**Engineering Technology Courses**

**E T 101. Introduction to Engineering Technology and Geomatics**
1 Credit (1)
An introduction to geomatics and the various engineering technology disciplines, the engineering approach to problem solving, and the design process. Projects emphasize the importance of teamwork, written & oral communication skills, as well as ethical responsibilities.

**Learning Outcomes**
1. Various

**E T 104. Soldering Techniques**
1 Credit (3P)
Fundamentals of soldering, desoldering, and quality inspection of printed circuit boards.

**E T 109. Computer Drafting Fundamentals**
3 Credits (3+2P)
Crosslisted with: DRFT 109, C E 109 and SUR 109

**E T 110. Introduction to 3-D Modeling (Solid Works)**
3 Credits (2+3P)
Introduction to SolidWorks, a 3-D modeling software. The foundation for designing mechanical parts and assemblies.

**E T 120. Computation Software**
2-3 Credits (2-3)
The use of spreadsheet software in the field of engineering technology.

**E T 125. Introduction to Renewable Energy**
3 Credits (3)
Renewable energy systems, including topics in thermal-solar photovoltaic, wind, geothermal systems, and other current topics. Theory, practical applications, safety considerations and the economics of alternative renewable energy systems compared to conventional systems.

**E T 143. Civil/Survey Drafting I**
3 Credits (2+2P)
Introduction to drafting in the field of Civil Engineering. Drawings, projects, and terminologies related to topographic mapping, contour drawings, plan, and profiles as street/highway layout.

**Prerequisite(s):** DRFT 109.

**Learning Outcomes**
1. Students will develop a basic knowledge of AutoCad Civil 3D software as they relate to the civil drafting process. Students will become familiar with a basic understanding of computers, drafting and trigonometry is required. Use of long-term projects will be utilized to simulate real-world work environments to aid the understanding and applying vocabulary on surveying drafting plans. An ability to apply current knowledge and adapt to emerging applications of mathematics, science, engineering and technology
E T 153. Fundamentals of Networking Communications
3 Credits (3)
Introduction to networking basics, including computer hardware and software, electricity, networking terminology, protocols, LANs, WANs, OSI model, IP addressing, and design and documentation of basic network and structure cabling.

Learning Outcomes
1. Students will identify network types/protocols utilizing the OSI reference model and compute numbering system network problems. Students will explain issues related to managing and documenting network environments. Students will list, compare, and discuss industry standards for addressing computers on a network. Students will list and distinguish between computer networking historical milestones. Students will identify, compare, and evaluate networking data transport techniques. Students will identify and compare network transmission media and build/evaluate network cabling. Students will discuss IT industry certifications and summarize current technology trends.

E T 154. Construction Methods and Communications
3 Credits (3)
Blueprint reading, specifications, and introduction to materials used in construction.

E T 155. Network Operating Systems I
3 Credits (3+1P)
Introduction to a computer network operating system. May not be used as part of an E T degree program on main campus. Restricted to: Community Colleges only.
Prerequisite(s): E T 120 or E T 122.

E T 156. Introduction to Information Security
2 Credits (2)
This course introduces information security terminology, historical evolution of digital security, types of PC and network system vulnerabilities and types of information loss. In addition, methods of information protection and integrity, intrusion detection, and recovery of data are introduced.
Prerequisite(s)/Corequisite(s): E T 120. Restricted to Community Colleges campuses only.

E T 160. Windows Fundamentals for IET
3 Credits (3)
Fundamental review of the Windows operating system including installation and upgrades as well as managing applications, files, folders, devices and maintenance.

E T 182. Digital Logic
2 Credits (1+2P)
The use of truth tables, Boolean equations, and diagrams to define, simplify, and implement logic-valued functions.

Learning Outcomes
1. Demonstrate ability to convert numerical values to commonly-used digital representations and their use for arithmetic and logical functions. Demonstrate understanding of Boolean logic functions and truth tables. Demonstrate ability to simplify logic expressions. Demonstrate understanding of sequential logic functions, and the ability to integrate with combinational logic to produce a simple state machine. Familiarity with common integrated circuit issues, such as logic voltage levels, propagation delay, and fan-out.

E T 183. Applied DC Circuits
3 Credits (2+2P)
Application of Ohm's law, Kirchhoff's laws, Thevenin's, and Norton's theorems to the analysis of DC passive circuits. Embedded Lab.
Prerequisite(s)/Corequisite(s): MATH 1220G.

E T 183 L. Applied DC Circuits Lab
1 Credit (2P)
DC applied circuits lab.
Corequisite(s): E T 183.

E T 184. Applied AC Circuits
3 Credits (2+2P)
Application of circuit laws and theorems to analysis of AC passive circuits. Resonant circuit, polyphase circuit and magnetic circuit topics are introduced. Embedded Lab.
Prerequisite(s)/Corequisite(s): MATH 1250G. Prerequisite(s): E T 183.

E T 190. Applied Circuits
4 Credits (3+2P)
Application of Ohm's law, Kirchhoff's laws, and Thevenin's theorems to the analysis of AC and DC passive circuits. Electronic circuit topics are introduced. Embedded lab.
Prerequisite/Corequisite: MATH 1250G or MATH 1430G.

Learning Outcomes
1. Analyze and design DC circuits, including ideal op-amps, using concepts of voltage, current, power, Kirchhoff's laws, and network theorems. Design simple systems involving dc circuits. Work and learn in teams.
E T 191. Applied Circuits Laboratory
1 Credit (2P)
Applied Circuits Lab

E T 200. Special Topics
1-3 Credits
Directed study or project. May be repeated for a maximum of 6 credits.
Prerequisite: consent of department head.

E T 203. Computational Foundations
3 Credits (3)
Fundamental concepts of various proof techniques. These concepts will be applied to the use of computer algorithms, programming languages and other engineering and technology applications.
Prerequisite(s): MATH 1250G and E T 262.

E T 210. Intermediate 3-D Modeling (Solid Works)
3 Credits (3)
Intermediate 3-D modeling. Applied modeling of techniques to prepare for SolidWorks certification (CSWA).
Prerequisite(s): E T 110.

E T 217. Manufacturing Processes
3 Credits (3)
Introduction to manufacturing and processing, including: casting, forming, and machining. Emphasis on creating products with the appropriate techniques. Crosslisted with: I E 217.
Prerequisite: E T 110 and MATH 1220G.

Learning Outcomes
1. Various

E T 217 L. Manufacturing Processes Lab
1 Credit (3P)
Hands-on laboratory in machine shop to apply topics from E T 217, including: casting, forming, and machining.
Corequisite: E T 217.

Learning Outcomes
1. Various

E T 220. Internship
1-6 Credits
Internship requiring an approved number of hours of varied and progressive experience in the field of study. The scope and other requirements of the internship are stated in an individualized syllabus and through a memorandum of understanding between the faculty mentor and the industry partner. May be repeated up to 6 credits. Consent of Instructor required.
Prerequisite(s): E T 283.

E T 230. Introduction to Servo Systems
1 Credit (2P)
Introduction to Servo Systems. Topics include uses of servos in the industry, servo types, lop gains and frequency response, software control systems, damping, feedback, encoders, synchros and resolvers. Restricted to Community Colleges campuses only.
Prerequisite(s): E T 246.

E T 240. Applied Statics
3 Credits (3)
Fundamental topics of applied statics, including force system analysis, equilibrium, free body diagrams, methods of joints and sections, distributed loads, friction, centroids, area moments, and shear and moment diagrams.
Prerequisite(s)/Corequisite(s): MATH 1430G or MATH 1511G. Prerequisite(s): PHYS 1230G or PHYS 1310G.

E T 241. Applied Dynamics
3 Credits (3)
The foundation for understanding particles and bodies in motion and the forces involved, including: projectile motion, Newton's Laws of Motion, conservation of energy, and impulse and momentum.
Prerequisite: E T 240.
Prerequisite/Corequisite: (MATH 1440 or MATH 1521G or MATH 1521H).

Learning Outcomes
1. Various
E T 246. Electronic Devices I  
4 Credits (3+3P)  
Solid-state devices including diodes, bipolar-transistors, and field effect transistors. Use of these devices in rectifier circuits, small signal and power amplifiers.  
Prerequisite: E T 190 or E T 184 or ENGR 120.  
Learning Outcomes  
1. Various

E T 253. Networking Operating Systems II  
3 Credits (3+1P)  
Introduction to a computer network operating system. May not be used as part of an E T degree program on main campus. Restricted to Community Colleges campuses only.  
Prerequisite: E T 120 and E T 153.  
Learning Outcomes  
1. Identify Linux utilities and terminology. Use the Linux filesystem. Install, administer, and manage a Linux system. Utilize Linux user/group management. Install software packages. Apply data management skills.

E T 254. Concrete Technology  
3 Credits (2+2P)  
Fundamentals of aggregates, Portland cement, and asphalt used in design and construction.

E T 255. Linux System Administration  
3 Credits (3)  
Operating systems applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup and Maintenance of Linux Servers.  
Learning Outcomes  
1. Describe the key features of the Linux operating system. Plan the Linux Filesystem to match system requirements. Design BASH scripts to optimize common Linux operations. Interpret Linux performance data to solve hardware and software issues. Students will demonstrate the Core Linux System Administration. Students will be able to link the use of shell commands to managing Linux server daemons and software. Students will apply these concepts to build application servers running Linux, Apache, MySQL, and PHP (LAMP); Tomcat, CUPS print servers; and create backup solutions. Students will apply problem analysis, object-oriented structured logic, and development concepts. Students will demonstrate an understanding of theory and hands-on experience administrating a Linux Based server.

E T 256. Networking Operating Systems III  
3 Credits (3+1P)  
Introduction to a computer network operating system. May not be used as part of an E T degree program on main campus. Restricted to Community Colleges campuses only.  
Prerequisite(s): E T 253.  

E T 262. Software Technology I  
3 Credits (2+2P)  
An introduction to computer programming concepts as applied to engineering technology. Includes basic logic design, algorithm development, debugging and documentation. History and use of computers and their impact on society.  
Prerequisite/Corequisite: (E T 182 or ENGR 130) or (MATH 1250G or MATH 1430G).  
Learning Outcomes  
1. Set up and use a rich programming environment for programming with C Analyze existing code Employ effective use of basic programming and basic troubleshooting Write, debug and test code given software requirements Apply testing and documentation best practices Transfer programming knowledge and apply coding knowledge

E T 272. Electronic Devices II  
4 Credits (3+3P)  
Operational amplifiers, positive and negative feedback, computer aided circuit analysis. In addition circuits include integrator, differentiators and phase shift networks.  
Prerequisite: E T 246.  
Prerequisite/Corequisite: MATH 1430G or MATH 1435 or MATH 1511G.  
Learning Outcomes  
1. Various
E T 273. Advanced Networking Communications
4 Credits (2+4P)
Explores advanced networking communications to include Wireless Networking, Virtualization and Cloud Computing, Subnets and VLANs, Network Risk Management, Network Security Design, Network Performance, and WANS. The course covers the examination objectives and detailed preparation for students to take the CompTIA Network+ exam.
Prerequisite: E T 153.

Learning Outcomes
1. Identify, describe, and apply wireless transmission characteristics and standards. Explain the benefits of cloud virtualization and cloud computing.
2. Explain the purpose of network segmentation and describe how VLANs work and how they are used. Identify basic concepts of network risk management and configure devices for increased security. Identify network design security features and discuss options in network access control.
3. Use tools to evaluate network performance and discuss best practices for incident response and disaster recovery. Explain characteristics of WAN technology and troubleshoot connection methods.

E T 276. Electronic Communications
3 Credits (2+3P)
Antennas, transmission devices, A-M and F-M transmission and detection, pulse systems, microwave systems.
Prerequisite(s): E T 246.

E T 277. Computer Networking I for IET
3 Credits (2+2P)
Computer network design and applications for LAN, TCP/IP networks, routing and switching technologies, VLANs, and the OSI layers from physical to transport.
Prerequisite(s): E T 182.

E T 278. Web Design and Multimedia
3 Credits (3)
Introduction to front-end web development including webpage design, structure, layout, positioning, responsiveness, and foundational layers of how the web works. Video, audio, and other digital presentation tools are covered.
Learning Outcomes

E T 282. Digital Electronics
4 Credits (3+3P)
Applications of digital integrated circuits, multiplexers, counters, arithmetic circuits, and microprocessors.
Prerequisite(s)/Corequisite(s): (E T 190 or E T 184). Prerequisite(s): E T 182.

E T 283. Hardware PC Maintenance
3 Credits (3+1P)
Installing, configuring, troubleshooting, and maintaining personal computer hardware components.
Prerequisite(s): E T 120 or E T 122.

E T 284. Software PC Maintenance
3 Credits (3+1P)
Installing, configuring, troubleshooting, and maintaining personal computer operating systems.
Prerequisite(s): E T 120 or E T 122.

E T 285. Advanced Information Security
3 Credits (3)
The course covers detailed analysis of network security, including security operations and policy adherence; internal and external vulnerabilities; methods of identifying, controlling and managing system access, and the protection of system information.
Prerequisite(s)/Corequisite(s): E T 283. Prerequisite(s): E T 156.

E T 286. Information Security Certification Preparation
4 Credits (4)
The course covers the examination objectives and detailed preparation for a certification in information security.
Prerequisite(s): E T 285.

E T 290. Networking Wireless Communication
3 Credits (3+1P)
This course provides an introduction to wireless networking and communications. Some of the topics covered are protocols, transmission methods, and IEEE 802.11 standards. Wireless LAN (WLAN) fundamentals, devices, and security, cellular telephony, broadband, and satellite communications.
Prerequisite: E T 273.
E T 291. PC Forensics and Investigation
3 Credits (3)
Introduction to computer forensics and investigative fundamentals. Topics include understanding computer forensic and investigation law and requirements, processing crime and incident scenes, and the extraction, preservation, analysis and presentation of computer-related evidence.
Prerequisite(s): E T 120 or E T 122.

E T 300. Special Topics
1-3 Credits
Directed study or project. May be repeated for a maximum of 6 credits.
Prerequisite: consent of department head.

E T 305. Introduction to Product Design
3 Credits (2+3P)
The process of designing an innovative product for a real customer. Working through ideas, prototypes, 3-D models, concept validation, and entrepreneurship.
Prerequisite(s)/Corequisite(s): E T 210, E T 217, and (COMM 1115G or COMM 1130G or AXED 2120G or HNRS 2175G) or consent of instructor for non-MET majors.

E T 306. Fundamental and Applied Thermodynamics
3 Credits (3)
First and second laws, properties of substances, thermodynamic cycles including power generation and refrigeration.
Prerequisite: CHEM 1120G and E T 240 and (MATH 1430G or MATH 1435 or MATH 1511G) and (PHYS 1240G or PHYS 1320G) and (PHYS 1240L or PHYS 1320L).
Prerequisite/Corequisite: (E T 262 or ENGR 140) and (MATH 1440 or MATH 1521G).

Learning Outcomes
1. Students will acquire an understanding of the physical concepts and basic principles of fundamental and applied thermodynamics Students will become acquainted with the problem-solving methods and tools in the field of applied thermodynamics Students will gain experience through practice in the implementation of systematic, fundamental approaches to solving problems in applied thermodynamics.

E T 306 L. Thermodynamics Lab
1 Credit (3P)
Applications of thermodynamic theory to lab devices. Practice in testing, instrumentation, and data collection.
Corequisite: E T 306 .
Prerequisite/Corequisite: (ENGR 120 or E T 184 or E T 190).

Learning Outcomes
1. To provide the student with practical exposure to some of the fundamental concepts, experimental methods, and instrumentation encountered in the field of thermodynamics To familiarize the student with the development and application of procedures for laboratory work and for the acquisition, processing, evaluation, and (oral and written)presentation of experimental data To give the student additional experience in the preparation of technical reports and oral presentations which are accurate, concise, and informative.

E T 308. Fluid Technology
3 Credits (3)
Application of basic principles of fluid mechanics to practical applied problems.
Prerequisite: (MATH 1430G or MATH 1435 or MATH 1511G) and E T 240.

Learning Outcomes
1. To provide the student with practical exposure to some of the fundamental concepts, experimental methods, and instrumentation encountered in the field of fluid technology To familiarize the student with the development and application of procedures for laboratory work and for the acquisition, processing, evaluation, and presentation of experimental data, To give the student additional experience in the preparation of technical reports and oral presentations that are accurate, concise, and informative.

E T 308 L. Fluid Technology Lab
1 Credit (3P)
Measurements in fluid statics, dynamics, and hydraulic systems.
Prerequisite: (MATH 1430G or MATH 1435 or MATH 1511G) and E T 240.
Corequisite: E T 308.

Learning Outcomes
1. Various

E T 309V. Manufacturing: History and Technology
3 Credits (3)
The history of manufacturing, the technology on which it is based, and its impact on society.
ET 310. Applied Strength of Materials
3 Credits (3)
Application of principles of strength of materials to practical design and analysis problems.
Prerequisite: (MATH 1430G or MATH 1435 or MATH 1511G) and E T 240.
Prerequisite/Corequisite: MATH 1440 or MATH 1521G or MATH 1521H.
Learning Outcomes
1. To obtain knowledge of basic engineering materials and their use in civil and mechanical construction. To perform basic structural analysis, stress, strain, and deformation calculations as they apply to current engineering practices. To conduct appropriate experiments in the laboratory as they apply to strength of materials and be able to interpret the results. To effectively communicate results of laboratory work and in-class studies in written memoranda, business letters, and formal technical reports. To recognize that the field of engineering materials is constantly changing and therefore, needs to be studied throughout one's career.

ET 310 L. Applied Strength of Materials Lab
1 Credit (3P)
Testing and analyzing the physical properties of materials. Cursory review of Excel, PowerPoint, FEA, Instron machine, and testing standards.
Corequisite: E T 310.
Learning Outcomes
1. Various

ET 314. Communications Systems I
3 Credits (3)
Circuits and devices used for transmission, reception, and processing of RF signals. Prerequisite(s): E T 246 and (MATH 1250G or MATH 1430G)
Learning Outcomes
1. Learn the basics of analog and digital communication. Explore the fundamental communication concepts with hands-on experiments. Learn about basic antenna theory and satellite communications. Prepare technically sound reports and project.

ET 317. Advanced Manufacturing and Design
3 Credits (3)
Advanced 3-D modeling with current engineering design practices. Students will use SolidWorks add-ins such as CAMWorks, Product Data Management (PDM), and Model-Based Definition in conjunction with Geometric Dimensioning and Tolerancing (GD&T) practices. Students will have the opportunity to take the Certification SolidWorks Profesional Exam (CSWP).
Prerequisite(s): E T 210 and E T 217.

ET 324. Signal Processing and Filtering
4 Credits (3+3P)
Application of digital and analog signal conversion models. Discrete time signals and systems. Time and frequency domain concepts. Presentation of Fourier and Z transforms. Application of analog and digital signal filtering with and without feedback.
Prerequisite: E T 272.
Prerequisite/Corequisite: (MATH 1440 or MATH 1521G or MATH 1521H) and ((PHYS 1240G or PHYS 1320G) and (PHYS 1240L or PHYS 1320L)).
Learning Outcomes
1. Analyze signals (e.g. periodic, even) and systems (e.g. causal, linear) and differentiate between discrete and continuous time signals and systems. Determine the impulse response of a differential or difference equation. Apply the convolution theorem for continuous time signals to determine the response of linear systems to any input signal. Evaluate the Fourier series of periodic signals. Analyze the Fourier Transform of energy signals. Apply bilateral Laplace transforms for continuous signals. Analyze discrete time signals and systems using Z transforms. Apply the Sampling theorem, reconstruction, aliasing, and Nyquist's theorem to represent continuous-time signals in discrete time so that they can be processed by digital computers. Design and analyze signals and systems using the programming language MATLAB and/or Simulink.

ET 328. Kinematics of Machines
3 Credits (2+3P)
Prerequisite(s)/Corequisite(s): E T 305. Prerequisite(s): E T 210 and E T 241.

ET 332. Applied Design of Structures I
4 Credits (3+3P)
An introduction to structural analysis and design. Use of various building codes for development of allowable and factored loads on structures. Allowable stress and strength design concepts for structural components using concrete and steel. Required use of computer software such as spreadsheets, databases, and self-developed programs and design aids.
Prerequisite(s): E T 310 and (MATH 1440 or MATH 1521G or MATH 1521H).
E T 339. Introduction to Digital Forensics and Incident Response
3 Credits (2+3P)
Introduction to the skills required to perform digital forensics and incident response on Windows operating systems. Topics include: live response, evidence acquisition, Windows operating system artifacts, documentation and reporting.
Prerequisite(s): E T 255 and E T 160.

E T 344. Microcomputer Systems
3 Credits (2+3P)
Microcomputer and/or microcontroller systems applications and architectures with a software emphasis using programming languages.
Prerequisite: (E T 182 or ENGR 130) and (MATH 1250G or MATH 1430G).
Prerequisite/Corequisite: E T 362.
Learning Outcomes
1. Various

E T 354. Soil and Foundation Technology
4 Credits (3+3P)
Fundamentals of investigation of soil properties and their importance in design, construction, and testing as related to buildings, roads, dams, and other structures. Design of foundations considering slope stability, bearing capacity and settlement.
Prerequisite(s)/Corequisite(s): E T 310. Prerequisite(s): E T 254. Restricted to: ET U, ET E, ET M, C E, ET C majors.

E T 355. Site/Land Development and Layout
3 Credits (3)
Techniques, methods, and takeoffs for infrastructure layout, site plan design, grading, earthwork, utilities, road construction.
Prerequisite(s)/Corequisite(s): DRFT 143 or DRFT 153.

E T 360V. Technology in Business and Society
3 Credits (2+2P)
Examination of how technology affects business and society with specific attention to understanding the role of technical personnel and their interaction with nontechnical personnel.

E T 362. Software Technology II
3 Credits (3)
Topics include problem analysis, object-oriented programming (OOP), structured logic, and development concepts.
Prerequisite: E T 262 or ENGR 140.
Prerequisite/Corequisite: MATH 1250G or Higher.
Learning Outcomes
1. Set up and use a rich programming environment for programming with Python Analyze existing code Employ effective use of basic programming and basic troubleshooting Employ effective use of Object-Oriented Programming (OOP) and troubleshooting Apply testing and documentation best practices

E T 377. Computer Networking I
3 Credits (2+2P)
Computer network design and applications for LAN, TCP/IP networks, routing and switching technologies, VLANs, and the OSI layers from physical to transport.
Prerequisite: (E T 182 or ENGR 130) and (MATH 1250G or Higher).
Learning Outcomes
1. Define and distinguish the role of a network administrator (from other roles in the IT world) Identify the OSI model, its layers, and relationship to TCP/IP model Identify different cable media and networking devices and their use Design, configure, and troubleshoot basic networks. Identify MAC, IPv4, and IPv6 addressing Apply different techniques for IP allocation and subnet design (IPv4) Use Cisco IOS software for basic switch and router configurations Configure and troubleshoot basic setup for static and dynamic routing protocols

E T 381. Renewable Energy Technologies
3 Credits (3)
Renewable energy systems, including topics in thermal-solar, photovoltaic, wind, geothermal systems, and other current topics. Theory, practical applications, safety considerations and the economics of alternative renewable energy systems compared to conventional systems.
Prerequisite(s): MATH 1220G.

E T 382. Solar Energy Technologies
3 Credits (2+3P)
Solar energy technologies, including topics in passive, solar thermal, and photovoltaic systems. Theory, practical applications, safety considerations and the economics of solar renewable energy systems compared to conventional systems.
Prerequisite(s): MATH 1220G.
E T 384. Wind and Water Energy Technologies
3 Credits (3)
Wind and Water energy technologies, including topics in small and large scale systems. Theory, practical applications, safety considerations and the economics of wind and water renewable energy systems compared to conventional systems.
Prerequisite(s): MATH 1220G.

E T 386. Sustainable Construction and Green Building Design
3 Credits (3)
Sustainable Building materials, methods, and techniques including green architecture and design, codes, standards and specifications.
Prerequisite(s): MATH 1220G.

E T 396. Heat Transfer and Applications
3 Credits (2+3P)
Fundamentals of conduction, convection, and radiation heat transfer. Application of heat transfer, thermodynamics, and fluid mechanics principles to thermal system analysis and design.
Prerequisite(s): E T 306 and E T 308 and PHYS 1240G.

E T 398. Digital Systems
3 Credits (2+3P)
Advanced analysis and design of digital systems using state machine logic, programming of logic devices, implementation and testing.
Prerequisite: (E T 282 or ENGR 230) and (MATH 1250G or MATH 1430G).
Prerequisite/Corequisite: E T 362.

Learning Outcomes
1. Various

E T 400. Special Topics
1-3 Credits
Directed study or project. May be repeated for a maximum of 6 credits.
Prerequisite: consent of department head.

E T 401. Heating and Air-Conditioning Systems
3 Credits (3)
HVAC system design including heating and cooling load calculations, psychometrics, piping, duct layout, and system control. Same as M E 401.
Prerequisite(s): E T 306.
Corequisite(s): E T 396.

E T 402. Instrumentation
3 Credits (2+3P)
Sensors/transducers, signal conditioning and transmission for measurement and control systems. Student project in an area of instrumentation and/or control is required.
Prerequisite(s)/Corequisite(s): E T 396 or E T 398.

E T 407. Applied Power Technologies
4 Credits (3+3P)
Basic elements of modern power systems, energy sources, substation configuration, load cycles, and three-phase circuits. Students will gain experience in power factor correction, transmission line configurations and impedance, voltage regulation of transformers, and the per-unit system. Study of load flow, fault analysis, and economic operations is included.
Prerequisite: A C- or better in (MATH 1430G or MATH 1435 or MATH 1511G) and E T 272 and ((PHYS 1240G or PHYS 1320G) and (PHYS 1240L or PHYS 1320L)).

Learning Outcomes
1. Various

E T 410. Senior Seminar
1 Credit (1)
Transition from academics to business and industry. Graded S/U.
Prerequisite: senior standing in E T.

E T 412. Highway Technology
3 Credits (3)
Road-vehicle performance, geometric alignment, traffic analysis, highway materials, pavement design, and plan and profile development.
Prerequisite(s): E T 354.
E T 415. Manufacturing Management and Productivity
3 Credits (3)
Projects incorporating concurrent engineering, total quality management, design for manufacturability/assembly, and other contemporary topics in manufacturing.
Prerequisites: senior standing in E T.

E T 418. Applied Hydraulics
3 Credits (3)
Introduction to hydrology, hydraulic equations, hydraulic cross-sections, control structures, and collection and distribution of water, wastewater, and storm runoff using closed conduit and open channel flow.
Prerequisite(s): E T 308.

E T 420. Senior Internship
1-6 Credits
Internship requiring an approved number of hours of varied and progressive experience in the field of study. The scope and other requirements of the internship are stated in an individualized syllabus and through a memorandum of understanding between the faculty mentor and the industry partner. Taken in the senior year of program.
Prerequisites: Senior standing in E T.

E T 421. Senior Project
3 Credits (3)
Project in an area of civil engineering technology conducted under the direction of civil engineering technology faculty member. Project must be one that can be completed within a semester and of sufficient complexity for 3 credits. Taken last semester of program.

E T 426. Analysis and Design of Machine Elements
3 Credits (2+3P)
Analysis and design of power transmission components, including: gears, sprockets, belts, chains, bearings, and shafts. Experiential design project using SolidWorks and Excel modeling.
Prerequisite(s)/Corequisite(s): E T 305. Prerequisite(s): E T 210, E T 241, and E T 310.

E T 432. Applied Design of Structures II
4 Credits (3+3P)
Continuation of E T 332. Design of structural systems and study of their responses. Wood and masonry systems included.
Prerequisite(s): E T 332.

E T 435. Senior Project
3 Credits (2+3P)
Capstone course. Practical application of student’s cumulative knowledge to an assigned design projects. Design principles, teamwork, and project management skills are stressed. Demonstration of written and oral communication skills via project documentation and presentation of results. Must be graduating senior. Consent of Instructor required.

E T 439. Advanced Digital Forensics and Incident Response
3 Credits (3)
Advanced topics in digital forensics and incident response. Topics include network analysis and advanced cybersecurity concepts.
Prerequisite(s): E T 339 and E T 377.

Learning Outcomes
1. Students will become familiar with tools and processes to analyze and detect memory resident processes that include malware, rootkits, and user recoverable data. Students will also have exposure to methods and processes used by hackers to penetrate and compromise targets.

E T 444. Hardware and Software Senior Design
3 Credits (2+3P)
The design, development, implementation, documentation and formal demonstration of a microprocessor-based application to solve an engineering problem. Emphasis on microprocessor architectural concepts and software interfacing. A student project is require
Prerequisite(s): E T 344 and E T 398.

E T 454. Advanced Construction Technology
3 Credits (3)
Contractor design and construction methods concerning formwork, special foundations, shoring, excavations, pilings, steel erection, and various material handling components.
Prerequisite: E T 354 and E T 355.

E T 455. Cost Estimating and Scheduling
3 Credits (3)
Methods and techniques in construction estimating including final bid preparation, construction planning and scheduling using various network methods and other techniques.
Prerequisite: junior or senior standing in E T.
E T 456. Applied Power Technologies
4 Credits (3+3P)
Basic elements of modern power systems, energy sources, substation configuration, load cycles, and three-phase circuits. Students will gain experience in power factor correction, transmission line configurations and impedance, voltage regulation of transformers, and the per-unit system. Study of load flow, fault analysis, and economic operations is included.
Prerequisite: A C- or better in (MATH 1430G or MATH 1435 or MATH 1511G) and E T 272 and ((PHYS 1240G or PHYS 1320G) and (PHYS 1240L or PHYS 1320L)).

Learning Outcomes
1. Various

E T 458. Web Development and Database Applications
3 Credits (3)
Design, planning, and building of interactive and dynamic web applications which are customizable and contain real-time information. Topics include relational databases, object oriented programming, secure-coding practices and web security, user authentication and personalization, as well as front-end and back-end technology integration.
Prerequisite(s): E T 362 and E T 280.

Learning Outcomes
1. Setting up a development server Read, design, and write code for backend web dev. Design, create, and access databases that support web applications. Implement effective security and authentication on Web applications

E T 459. Construction Technology and Management
3 Credits (3)
This is a Technical Specialty course that builds on topics presented in the construction sequence thus far: E T 154, E T 254, E T 354, and E T 355. The course introduces students to the different civil engineering approach to construction and management, including planning, construction estimating & scheduling, foundations, formwork, concrete work, steel fabrication and erection installation, equipment basics, quality control, and safety. Methods and techniques involved in construction including use of Primavera Project Management® software.
Prerequisite/Corequisite: E T 354 and E T 355.

Learning Outcomes
1. Understand the basic concepts of construction planning, cost estimation, scheduling, and types of project management Obtain basic knowledge on techniques to construct structures based on site condition Develop work breakdown system and quantity take-offs Develop project cost estimation for different construction projects Prepare work schedule for construction project Identify and implement the suitable method and equipment to construct various structures.

E T 463. Advanced Linux and Python Scripting
3 Credits (3)
Advanced Linux Includes installation and maintenance of Unix/Linux/Windows versions of Python. Use of Python to solve numerous engineering problems using Python scripting as infrastructure.
Prerequisite(s): E T 255 and E T 362.

E T 464. Windows Enterprise Administration
3 Credits (3)
Installation, configuration, and maintenance of Windows Enterprise services which includes Active Directory, distributed file systems, SQL Server, Web Server, Authentication Procedures, and enterprise elasticity. Topics covered include: Server Maintenance and Troubleshooting Methodologies.
Prerequisite(s)/Corequisite(s): E T 339. Prerequisite(s): E T 362.

E T 472. Intelligent Transportation Systems (ITS)
3 Credits (3)
Traffic flow theory, telecommunication and information technology application in transportation, system architecture and standards, transportation management, incident and emergency management, corridor management, dynamic route guidance, in-vehicle systems, and traffic signal timing. Consent of instructor required.

E T 475. Special Topics in Information Technology
3 Credits (3)
Contemporary topics in Information Technology.
Prerequisite: (E T 362 or ICT 362) and (E T 377 or ICT 377)) or Consent of Instructor.

Learning Outcomes
1. Students will learn two way Bluetooth, Wi-Fi, and NFC communication technologies The student will practice building and programming IOT prototype devices The student will develop customer value proposition and perform one round of customer discovery The student will prototype their IOT device The student will demonstrate their IOT device The student will learn to integrate IOT devices into IT architecture
E T 477. Computer Networking II  
3 Credits (2+2P)  
Advanced concepts in computer network design and applications including managing the campus network infrastructure (LANs and virtual LANs), network services (DNS and DHCP), network security and firewall, network monitoring and forensics, wireless networks, high-speed optical networks and Internet.  
Prerequisite(s): E T 277 or E T 377.

E T 480. Innovation and Product Development  
3 Credits (3)  
Experiential product design and development. Students will learn about different types of innovation, business models, and methods for developing products. Students will apply the scientific method to develop a product idea of their own. Students will propose ideas, develop hypotheses, test hypotheses, and iterate until they have validated their product idea or identified a need to pivot.  
Prerequisite(s)/Corequisite(s): (COMM 1115G or COMM 1130G or AXED 2120G or HNRS 2175G).

E T 481. Engineering Principles for Elementary Teachers  
3 Credits (3)  
Introduction to hands-on engineering principles and projects useful for application in the Elementary classroom. Restricted to: Masters of Arts in Education in Elementary Mathematics and Science majors.  

Learning Outcomes  
1. An ability to engage in the problem-solving process within engineering applications. An ability to put scientific theory into practice within an engineering application. Knowledge of the use of engineering concepts with hands-on activities. An ability to make sense of complex engineering-related phenomenon within an elementary school frame.

E T 482. Manufacturing Technology  
3 Credits (2+2P)  
Fundamentals of computer aided manufacturing (CAM) and computer numerical control (CNC) machining. Students will learn how to program several variants of CNC machines, using both G/M code programming and computer aided manufacturing software. Emphasis will be on the effective design of parts to be made on CNC machines along with a hands on lab to give students experience on CNC machines. Students will individually design, manufacture, and keep items such as keychains, bottle openers, LED clocks, ergonomic handles, and license plates.  
Prerequisite(s): E T 210 and E T 217.

E T 483. Mobile App Programming and Development  
3 Credits (3)  
Planning and creation of mobile device applications. Programming tools and technical design considerations. Entrepreneurship and App development.  
Prerequisite: ((E T 362 or ICT 362) and (E T 377 or ICT 377)) or Consent of Instructor .  

Learning Outcomes  
1. The student will learn to create a modern and flexible mobile device User Interface using Java The student will develop a high functioning prototype their mobile app The student will implement a business model canvas including development of a customer value proposition and a minimum of one round of customer discovery The student will implement database and information storage using a mobile device The student will implement the developer's dashboard for their mobile app Student will publish and monetize their mobile app

E T 485. White Hat System Testing  
3 Credits (3)  
System penetration testing and repair. Review of methods utilized to gain access to unprotected systems. Testing system repairs and fixes for future prevention. Test documentation.  
Prerequisite: ((E T 362 or ICT 362) and (E T 377 or ICT 377)) or Consent of Instructor .  

Learning Outcomes  
1. The student will practice modern methods for penetration testing The student will demonstrate advanced ethical hacking methods The student will evaluate in-place security systems The student will run-through simulated attacks and system break-ins The student will learn to prepare detailed reports on system vulnerabilities and weaknesses

E T 490. Selected Topics  
1-3 Credits  
Selected topics in engineering technology and related areas.  
Prerequisite: consent of instructor.

E T 505. Special Topics in Information Technology  
3 Credits (3)  
Contemporary topics in Information Technology Restricted to: M-IT majors.

E T 539. Advanced Enterprise Security  
3 Credits (3)  
Advanced enterprise security design and analysis. Identification and minimization of cyber threats. Restricted to: M-IT majors.
E T 551. Enterprise Architecture I  
3 Credits (3)  
A study of current enterprise architecture methodologies, tools, and techniques. Restricted to: M-IT majors.

E T 552. Enterprise Architecture II  
3 Credits (3)  
Advanced topics in enterprise architecture including availability, access, and architecture map development. Restricted to: M-IT majors.  
Prerequisite(s): E T 551.

E T 555. Virtualization  
3 Credits (3)  
An analysis and review of system and IT virtualization techniques. Restricted to: M-IT majors.

E T 556. Development and Operations  
3 Credits (3)  
Software development including Python scripting. Operations programming. Restricted to: M-IT majors.

E T 577. Advanced Computer Networking  
3 Credits (3)  
Advanced networking design and analysis. Modernization of infrastructures. Restricted to: M-IT majors.

E T 583. Mobile App Programming and Development  
3 Credits (3)  
Planning and creation of mobile device applications. Programming tools and technical design considerations. Entrepreneurship and App development. Restricted to: M-IT majors.

E T 585. White Hat System Testing  
3 Credits (3)  
System penetration testing and repair. Review of methods utilized to gain access to unprotected systems. Testing system repairs and fixes for future prevention. Test documentation. Restricted to: M-IT majors.

E T 595. Capstone Projects in Information Technology  
3 Credits (3)  
Capstone course. Practical application of student's cumulative Information Technology knowledge to an assigned design projects. Project management skills. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: M-IT majors.

Information and Communication Technologies Courses

ICT 320. Introduction to Internet Protocols  
3 Credits (3)  
Present a overview of Internet Protocols Applications.

ICT 339. Introduction to Digital Forensics and Incident Response  
3 Credits (3)  
Introduction to the skills required to perform digital forensics and incident response on Windows operating systems. Topics include: live response, evidence acquisition. Windows operating system artifacts, documentation and reporting.  
Prerequisite(s): ICT 360.

ICT 350V. Introduction to Personal Computer Security and Privacy  
3 Credits (3)  
Introduction to Information Security and Privacy – Have you ever wondered what happens to all of your browsing history or data you fill out on websites go? Who has this data? What do they do with this data? How do you stop sharing your private information? This class will answer those questions and provide steps to make your online presence more secure.

Learning Outcomes
1. Classify security issues Classify Privacy protections Evaluate threats and countermeasures based on personal security breaches. Formulate a real-time privacy response Assess international privacy protections through a multicultural focus.

ICT 352. Software Programming for Information and Communication Technology  
3 Credits (3)  
Computer programming techniques for information and communication technology topics.
ICT 355. Linux System Administration
3 Credits (3)
Operating systems applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup, and Maintenance of Linux Servers.

Learning Outcomes
1. Create a virtual environment on a host system using VirtualBox. Develop single and multiple Linux Operating Systems within The VirtualBox Virtual Environment. Select applications on production Linux Operating Systems. Support the operation of the Linux Operating system using System Administration Techniques.

ICT 360. Operating Systems for ICT
3 Credits (3)
Fundamentals of operating systems with Windows and Linux including installation and configuration using the GUI as well as the command line, text editors, file systems, scripting and operating system management.

ICT 362. Software Technology II
3 Credits (3)
Topics include problem analysis, object-oriented programming (OOP), structured logic, and development concepts.

Prerequisite/Corequisite: ICT 352 or E T 262 or OECS 195 or C S 152 or C S 172.

Learning Outcomes
1. Set up and use a rich programming environment for programming with Python. Analyze existing code. Employ effective use of basic programming and basic troubleshooting. Employ effective use of Object-Oriented Programming (OOP) and troubleshooting. Apply testing and documentation best practices.

ICT 364. Windows Enterprise Administration
3 Credits (3)
Installation, configuration, and maintenance of Windows Enterprise services which includes Active Directory, distributed file systems, SQL Server, Web Server, Authentication Procedures, and enterprise elasticity. Topics covered include: Server Maintenance and Troubleshooting Methodologies.

Prerequisite(s)/Corequisite(s): ICT 339. Prerequisite(s): ICT 352.

ICT 377. Computer Networking I
3 Credits (3)
Computer network design and applications for LAN, TCP/IP networks, routing and switching technologies, VLANs, and the OSI layers from physical to transport.

Prerequisite(s)/Corequisite(s): MATH 1220G or above.

ICT 380. Web Design and Multimedia
3 Credits (3)
Introduction to front-end web development including webpage design, structure, layout, positioning, responsiveness, and foundational layers of how the web works. Video, audio, and other digital presentation tools are covered.

Learning Outcomes

ICT 435. Senior Project
3 Credits (3)
Capstone course. Practical application of student’s cumulative knowledge to an assigned design project. Design principles, teamwork, and project management skills are stressed. Demonstration of written and oral communication skills via project documentation and presentation of results. Must be graduating senior. Consent of Instructor required. Restricted to: ICT majors.

Prerequisite(s): ICT 364, ICT 377, and ICT 462.

ICT 450. Ethical Hacking
3 Credits (3)
Ethical Hacking and Penetration testing techniques.

Prerequisite(s): ICT 339.

ICT 457. Introduction to Information Security Technology
3 Credits (3)
This course provides an overview of security challenges and strategies of countermeasure in the information systems environment. Topics include definition of terms, concepts, elements, and goals incorporating industry standards and practices with a focus on availability, vulnerability, integrity and confidentiality aspects of information systems.
ICT 458. Web Development and Database Applications  
3 Credits (3)  
Design, planning, and building of interactive and dynamic web applications. Topics include relational databases, object oriented programming, and web security.  
Prerequisite(s)/Corequisite(s): ICT 362.

ICT 460. Multimedia Tools and Support  
3 Credits (3)  
Introduction to video, audio and other digital presentation methods. Addresses the latest multimedia technology advances and how they apply to the information and communication technology fields. Sample tools like ffmpeg, and Audacity are covered.  
Prerequisite(s): ICT 360.

ICT 462. Linux System Administration  
3 Credits (3)  
Operating system applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup and Maintenance of Linux Servers.  
Learning Outcomes  
1. Create a virtual environment on a host system using VirtualBox. Develop single and multiple Linux Operating Systems within The VirtualBox Virtual Environment. Select applications on production Linux Operating systems. Support the operation of the Linux Operating system using System Administration Techniques.

ICT 463. Advanced Linux and Python Scripting  
3 Credits (3)  
Advanced Linux Includes installation and maintenance of Unix/Linux/Windows versions of Python. Use of Python to solve numerous engineering problems using Python scripting as infrastructure.  
Prerequisite(s): ICT 362 and ICT 462.

ICT 477. Computer Networking II  
3 Credits (3)  
Advanced concepts in computer network design and applications including managing the campus network infrastructure (LANs and virtual LANs), network services (DNS and DHCP), network security as well as network monitoring.  
Prerequisite: ICT 377 or E T 377.  
Learning Outcomes  
1. VLSM, Summarization, and the TCP/IP model. Understanding of IPv6 basics Configuration of routing protocols using IPv6 Configuration of advanced router configurations Configuration of route redistribution, DHCP, DNS, NAT and PAT Configure network security and Access Control Lists (ACLs) Perform basic analysis of network data traffic Create, test and troubleshoot software simulations (Cisco Packet Tracer)

Surveying Courses

SUR 143. Civil/Survey Drafting I  
3 Credits (2+2P)  
Introduction to drafting in the field of Civil Engineering. Drawings, projects, and terminologies related to topographic mapping, contour drawings, plan, and profiles as street/highway layout.  
Prerequisite: DRFT 109.  
Learning Outcomes  
1. Students will develop a basic knowledge of AutoCad Civil 3D software as they relate to the civil drafting process. Students will become familiar with a basic understanding of computers, drafting and trigonometry is required. Use of long-term projects will be utilized to simulate real-world work environments to aid the understanding and applying vocabulary on surveying drafting plans. An ability to apply current knowledge and adapt to emerging applications of mathematics, science, engineering and technology

SUR 222. Introduction to Geomatics  
3 Credits (2+3P)  
Theory and practice of geomatics as applied to plane surveying in the areas of linear measurements, angle measurements, area determination, differential and trigonometric leveling, and topographic mapping. Crosslisted with: DRFT 222.  
Prerequisite: MATH 1250G or MATH 1430G.  
Learning Outcomes  
1. Various
SUR 285. Precise Digital Mapping
3 Credits (3)
Photogrammetric Mapping Principles, digital sensor including optical cameras, terrestrial, surveying control, IMU & GPS integration, stereo photography, analytical triangulation, orthorectification, precision and accuracy of measurement systems, sUAS (Small Unmanned Aerial Vehicles) applications to geospatial data collection and practical applications project fight/pre planning, sensor platform, FAA regulations and restrictions, introduction to laser scanning systems. Restricted to Las Cruces campus only.

SUR 292. Legal Principles and Boundary Law I
3 Credits (3)
Fundamentals of real property law; principles of land description; survey evidence and procedure in boundary determination, order of importance of conflicting elements; and liability, ethical and professional principles in boundary surveying; contemporary issues in boundary determination.
Learning Outcomes
1. Understand how the USPLSS was developed and used
2. Be able to locate and identify USPLSS survey monuments
3. Be able to apply single and double proportion methods
4. Be able to subdivide USPLSS sections
5. Be able to read, write and interpret USPLSS legal descriptions

SUR 312. Public Land Survey System Boundaries
3 Credits (3)
Fundamentals of the U.S. Public Land Survey System; rules for the survey of the public lands, field surveys; the rectangular system, corners, monuments, evidence; dependent and independent resurveys, corner restoration; plats and field notes, patents.
Learning Outcomes
1. Demonstrate an understanding of surveying boundary laws
2. Describe procedures for locating real property boundaries
3. Read, interpret and write legal descriptions of real property
4. Perform legal research of case and statutory law
5. Communicate research findings through written and oral presentation

SUR 328. Construction Surveying & Automation Technologies
3 Credits (2+3P)
Prerequisite: (SUR 222 or DRFT 222) and (MATH 1511G or MATH 1430G or MATH 1435).
Learning Outcomes
1. Various

SUR 330. Computer Applications of Surveying
3 Credits (2+3P)
Advanced application of concepts and tools used in the manipulation of geospatial data in a computer environment. Topics include the use of surveying-specific software applications for problem solving, analysis and generation of spatial data products. Advanced programming skills in a high level language are presented and applied.
Prerequisite: DRFT 109 AND SUR 222, and (MATH 1511G or MATH 1430G or MATH 1435) and (E T 262 or ENGR 140).
Learning Outcomes
1. Various

SUR 351. Spatial Data Adjustment I
3 Credits (3)
Theory of random error in observations/measurements. Use of statistics in spatial data analysis, statistical testing, advanced data structures. Emphasis on computer based problem solving and programming to solve spatial data problems.
Prerequisite: (SUR 222 or DRFT 222) and (MATH 1511G or MATH 1435 or MATH 1430G) and (A ST 311G or MATH 1350G).
Learning Outcomes
1. Various

SUR 361. Geodesy/Geodetic Control Surveying
3 Credits (3)
Horizontal and vertical control network design and consideration. Understand ellipsoid, geoid, horizontal and vertical datum, coordinates, precise leveling, astronomic, establishment of state plane zones, understanding reporting. Transform data between geodetic Latitude/Longitude, state plane, ground data, perform geodetic computations, ability to design GPS networks utilizing CORS stations, network adjustments. Perform a control survey, process data, adjust network, and prepare control report with Meta-data.
Prerequisite: (SUR 222 or DRFT 222) and (MATH 1511G or MATH 1435 or MATH 1430G).
Learning Outcomes
1. Various
SUR 370. Control Surveying
3 Credits (2+3P)
Prerequisite: SUR 222 and (MATH 1511G or MATH 1430G or MATH 1435).
Learning Outcomes
1. Various

SUR 401. Ethics and Professionalism in Surveying and Mapping
3 Credits (3)
Ethics as applied to the surveying profession. Includes case studies and problems.
Prerequisite: .
Learning Outcomes
1. An ability to communicate effectively with a range of audiences. An ability to understand ethical and professional responsibilities and the impact of technical and/or scientific solutions in global, economic, environmental, and societal contexts.

SUR 412. Advanced Topics in Boundary Surveying
3 Credits (2+3P)
Advanced land boundary topics including water boundaries, mineral claims, Spanish and Mexican land grants, state and national boundaries.
Prerequisite: SUR 312.

SUR 450. Senior Project
3 Credits (3)
Research project prepared by student. Includes class presentation. Students will learn how to research after the end of their formal education. Students must be in Senior Standing to enroll.
Learning Outcomes
1. An ability to identify, formulate, and solve broadly defined technical or scientific problems by applying knowledge of mathematics and science and/or technical topics to areas relevant to the discipline. An ability to formulate or design a system, process, procedure or program to meet desired needs. An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions. An ability to communicate effectively with a range of audiences.

SUR 451. Spatial Data Adjustment II
3 Credits (3)
Rigorous analysis of the theory of observations as applied to spatial data, application of least squares adjustments, ability to perform statistical analysis to determine accuracy of final product, constrained/free geospatial data integration, error ellipses, and pre-analysis of spatial data acquisition procedures.
Prerequisite: SUR 351.
Learning Outcomes
1. Understand the theory of least squares as applied to survey measurements Understand the relevance of weighting survey observations Be able to adjust vertical, horizontal and 3D networks by least squares Be able to transform coordinates between similar coordinate systems Be able to analyze survey errors and detect survey blunders

SUR 452. Spatial Data Integration and Analysis
3 Credits (3)
Surveying practice under the direction of a licensed, professional land surveyor requiring an approved number of hours. Planned work between the student and the surveyor should be designed to be part of a project that integrates spatial data. An individualized syllabus should be developed collaboratively with the industrial partner and approved by the geomatics faculty. The final deliverable must be certified by the licensed professional land surveyor. A written report by the student is required. Credit is given to past work experience in cases where students can demonstrate that requirements for the practicum are met and should be approved by geomatics faculty.
Learning Outcomes
1. An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions. An ability to communicate effectively with a range of audiences. An ability to understand ethical and professional responsibilities and the impact of technical and/or scientific solutions in global, economic, environmental, and societal contexts. 2. societal contexts. An ability to function effectively on teams that establish goals, plan tasks, meet deadlines, and analyze risk and uncertainty.

SUR 461. GNSS Positioning
3 Credits (2+3P)
Logistics of GNSS data collection, the GPS signal, codes and biases, error sources, differences between relative and autonomous GNSS positioning, code phase carrier phase, DGPS static and RTK surveys. Geodetic and GPS standards and specifications GNSS data processing, network adjustments, and evaluation of spatial data accuracy practical applications of GNSS May be repeated up to 3 credits.
Prerequisite(s): SUR 361.
SUR 464. Legal Principles and Boundary Law II
3 Credits (3)
ALTA Surveys and Standards, boundary evidence, order of evidence, Subdivision and Platting Law, Mexican and Spanish land grants, water boundaries, sequential and simultaneous conveyances. Consent of Instructor required.
Prerequisite(s): SUR 312.

SUR 485. Emerging Techniques in Geospatial Technologies
3 Credits (3)
Hydrographic, Altimetry, Space borne Imaging Systems, Mobile Mapping Systems, Mining and Agriculture Surveying Principles, Ranging technologies and applications such as LiDAR, SAR, and Bathymetry. Principles of terrestrial & airborne laser scanning, point cloud data management & extraction, scan registration and processing, and advanced ranging data acquisition systems. Consent of Instructor required.
Prerequisite(s): Senior standing.

Learning Outcomes
1. Outline the different techniques in mapping seabed. Describe the procedure of LiDAR mapping. Outline the remote sensing technologies used in mapping. Recognize the UAV mapping technologies. Produce surveying products from new technologies in geomatics.

Name: Mrs. Carol Serna, Engineering Technology and Surveying Engineering (ETSE)

Physical Address:
Ed and Harold Foreman Engineering Complex III
1060 Frenger Mall - Room 130
Las Cruces, NM 88003-1230
Map to ETSE (https://maps.nmsu.edu/?id=419&type=building)

Mailing Address:

Engineering Technology - Civil - Bachelor of Science in Engineering Technology

The Civil Engineering Technology (CET) Program at NMSU will prepare graduates with the technical and managerial skills necessary to enter careers in the planning, design, construction and operation of the built environment and global infrastructure. Graduates with the baccalaureate degree have strengths in their knowledge of design, construction, testing and operation of buildings and infrastructure with the ability to produce and utilize construction documents, analyze and design systems, specify project methods and materials, perform cost estimates and analyses, and manage technical activities in support of civil projects. Graduates from our ABET accredited CET program can pursue professional licensure and become professional engineers.

Program Educational Objectives
1. graduates are competent in at least one of the following areas:
   a. Land Development
   b. Infrastructure Development
   c. Heavy Civil Construction
   d. Cost Estimating
   e. Characterization and mechanical properties of construction materials.
2. graduates are proficient in the assessment of Engineering Alternatives.
3. graduates are:
   a. meeting the engineering needs of the region, both in the government and private sectors
   b. leaders in their specialized field of endeavor
4. graduates are pursuing their professional registration (Professional Engineer License)

The Civil Engineering Technology program is accredited (https://et.nmsu.edu/accreditation-and-assessment/degree-accreditation-information/) by the Technology Accreditation Commission (ETAC) of ABET www.abet.org (http://www.abet.org/)
Concentrations

• Renewable Energy Technologies (p. 1364)
• Transportation Technology (p. 1367)

Minors

• Renewable energy (p. 1393)
• Geomatics (p. 1392)

Types of jobs that graduates pursue in this field

• Civil Engineer
• Construction Manager
• Project Engineer
• Project Manager
• Design Engineer
• Construction Inspector
• Owner
• Estimator
• Distribution and Sales

Engineering Technology - Civil (No Concentration)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

1 For students wishing to pursue a technical master's degree, MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Applications of Calculus I and MATH 1440 Applications of Calculus II, will need to have an exception made for their degree audit.

2 *Students may need to take any prerequisites needed to enter the class(es) first.*

3 See the General Education (p. 123) section of the catalog for a full list of courses

4 Concentrations are "optional" educational sequences that students may choose to focus on particular areas related to CET. Concentrations may often be done without additional credits by judicious use of electives and other optional course requirements.

1. Students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I/MATH 1435 Applications of Calculus I or MATH 1521G Calculus and Analytic Geometry II/MATH 1440 Applications of Calculus II before enrolling in either option of coursework.

2. For students wishing to pursue a technical master's degree, MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Applications of Calculus I and MATH 1440 Applications of Calculus II, will need to have an exception made for their degree audit.

3. See the General Education (p. 123) section of this catalog for a full list of courses.

4. See the Viewing a Wider World (p. 130) section of this catalog for a full list of courses.

5. **Surveying Electives:** SUR 328, SUR 351, or SUR 361

6. **Technical Elective Courses:** E T 381, E T 382, E T 384, E T 386, and E T 472
### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Engineering Technology - Electronics and Computer - Bachelor of Science in Engineering Technology

Electronics and Computer Engineering Technology (https://et.nmsu.edu/electronics-and-computer-engineering-technology/) (ECET) program includes the design, building and testing of a wide range of electronic and computer circuits and systems, including hardware/software digital systems, microprocessor systems, analog circuits, machine or micro-controllers, communications devices, applied power systems, signal processing and filter circuits, instrumentation systems, and computer networks. Our program includes a diverse exposure to programming languages, as well as hardware description languages, such as VHDL.

The ECET program is accredited (https://et.nmsu.edu/accreditation-and-assessment/degree-accreditation-information/) by the Engineering Technology Accreditation Commission (ETAC) of ABET. www.abet.org (http://www.abet.org/).

Engineering Technology - Electronics and Computer (No Concentration)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 122 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Second Language: (not required)**

**Electives, to bring the total credits to 120**

**Total Credits**: 122-124

---

1. For students wishing to pursue a technical master's degree, MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Applications of Calculus I and MATH 1440 Applications of Calculus II, will need to have an exception made for their degree audit.

   *Students may need to take any prerequisites needed to enter the class(es) first.*

2. See the General Education ([https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#associatesbachelorsgetext](https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#associatesbachelorsgetext)) section of the catalog for a full list of courses. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses, rules, and alternative options.

3. Students must select one of the two PHYS course sequences, from the following, in order to meet the 8 credits of the Area III: Laboratory Sciences requirement.

   **Algebra-Based Sequence**
   - PHYS 1230G Algebra-Based Physics I/PHYS 1230L Algebra-Based Physics I Lab
   - PHYS 1240G Algebra-Based Physics II/PHYS 1240L Algebra-Based Physics II Lab

   **Calculus-Based Sequence**
   - PHYS 1310G Calculus -Based Physics I/PHYS 1310L Calculus -Based Physics I Lab
   - PHYS 1320G Calculus -Based Physics II/PHYS 1320L Calculus -Based Physics II Lab

4. Concentrations and Minors are "optional" educational sequences that permit students to focus on particular areas related to their major. Concentrations and Minors "may" often be done with few or no additional credits by judicious use of electives and other optional course requirements.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Credits 14

Total Credits 122-124

1 Students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I/MATH 1435 Applications of Calculus I or MATH 1521G Calculus and Analytic Geometry II/MATH 1440 Applications of Calculus II before enrolling in either option of coursework.

For students wishing to pursue a technical master's degree, MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Applications of Calculus I and MATH 1440 Applications of Calculus II, will need to have an exception made for their degree audit.

2 See the General Education (https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#associatesbachelorsgetext) section of the catalog for a full list of courses. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses, rules, and alternative options.

3 Students must select one of the two PHYS course sequences, from the following, in order to meet the 8 credits of the Area III: Laboratory Sciences requirement.

Algebra-Based Sequence
- PHYS 1230G Algebra-Based Physics I/PHYS 1230L Algebra-Based Physics I Lab
- PHYS 1240G Algebra-Based Physics II/PHYS 1240L Algebra-Based Physics II Lab

Calculus-Based Sequence
- PHYS 1310G Calculus -Based Physics I/PHYS 1310L Calculus -Based Physics I Lab
- PHYS 1320G Calculus -Based Physics II/PHYS 1320L Calculus -Based Physics II Lab

4 Concentrations are "optional" educational sequences that permit students to focus on particular areas related to their major. Concentrations "may" often be done without additional credits by judicious use of electives and other optional course requirements.

Engineering Technology - Information - Bachelor of Science in Engineering Technology

Information Engineering Technology (IET) (https://et.nmsu.edu/information-engineering-technology/) focusing on the study related to "Information Engineering" – its principles, technologies, networks, and applications. It is a vibrant discipline that has a tremendous impact on the economy as well as society. Information Engineering covers the following areas:

- applied computer programming and coding,
- solutions involving the creation, use, and administration of database technologies,
- information communications & networking environments,
- web and mobile technologies & applications,
- operating systems technologies,
- incident response and digital forensics,
- information security, and
- system integration.

Given the nature of the content in the IET program, students are expected to be familiar and have access to the following:

- a high-speed Internet connection,
- a sound card, 12G of RAM minimum,
- a microphone/Webcam,
- Microsoft Operating System 8.1 or newer and Office ®.

Graduates of the program can expect to enter the workforce with titles that include, but are not limited to Systems or Network Administrator, Project Manager, Database Administrator, Computer Forensics Examiner, Cloud Systems Administrator, and Systems Engineer.

The Information Engineering Technology program is accredited (https://et.nmsu.edu/accreditation-and-assessment/degree-accreditation-information/) by the Engineering Technology Accreditation Commission (ETAC) of ABET www.abet.org. (http://www.abet.org/)
Engineering Technology - Information (No Concentration)

Students must complete all university degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 121 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits but may be needed in order to take the necessary English and Mathematics coursework.

**Engineering Technology - Mechanical - Bachelor of Science in Engineering Technology**

MET (https://et.nmsu.edu/mechanical-engineering-technology/) majors learn theory and applications in the fields of manufacturing, product design and development, power systems, machinery, and fluid technology. Our students take courses in mechanisms and machines, computer aided modeling, heat transfer, and instrumentation, to name a few. They find employment in the design and testing of tools, engines, machines, and other complex
New Mexico State University - Las Cruces

mechanical devices. MET represents one of the broadest engineering technology disciplines. Our MET students also learn by designing and racing mini-baja cars, designing and constructing machines to help our farmers, and even building systems in other countries.

| Electives, to bring the total credits to | 126-128 |

1. See the General Education (p. 123) section of the catalog for a full list of courses. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.

2. For students wishing to pursue a technical master's degree, MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Applications of Calculus I and MATH 1440 Applications of Calculus II, will need to have an exception made for their degree audit.

3. *Students may need to take any prerequisites needed to enter the Math class(es) first.*

4. Elective credit may vary based on Math course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Concentrations and Minors are 'optional' educational sequences that students may choose to focus in particular areas related to their major. Concentrations and Minors may often be done without additional credits by judicious use of electives and other optional course requirements.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

For students wishing to pursue a technical master's degree, MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Applications of Calculus I and MATH 1440 Applications of Calculus II, will need to have an exception made for their degree audit.

*Students may need to take any prerequisites needed to enter the Math class(es) first.*

Elective credit may vary based on Math course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Concentrations and Minors are 'optional' educational sequences that students may choose to focus in particular areas related to their major. Concentrations and Minors may often be done without additional credits by judicious use of electives and other optional course requirements.

**Geomatics - Bachelor of Science in Geomatics**

Geomatics ([https://et.nmsu.edu/geomatics-surveying/](https://et.nmsu.edu/geomatics-surveying/)) is a rapidly developing engineering discipline that focuses on acquiring and analyzing precise spatial information. Geomatics engineers use a variety of technologies such as Unmanned Aerial Vehicles, Global Navigation Satellite Systems, High-Definition 3D Laser scanners, High-resolution satellite images, and Geographic Information Systems. They measure terrestrial and three-dimensional positions of points on, above, and below the earth’s surface and the distance and angles between them at a high level of precision. Geomatics engineers aid in the design of infrastructure including roads, bridges and legal boundaries for ownership. They provide precise data for natural resource managers, subdivision developers, and coastal monitoring systems.

The program is designed to provide cutting-edge industrial needs as well as to meet the educational requirements for registration as a Professional Land Surveyor in different states.

The mission of the Department of ETSE is to provide men and women with the rigorous, fundamental education needed to enter and succeed in the Geomatics and related professions. To accomplish this mission, the department will introduce students to the theory and application of recognized geomatics principles.

The Geomatics degree is offered online. Students can start as freshmen or transfer. As part of the curriculum requirements, transfer students must complete college-level work that includes General Education Area I, IV, V, and VI (19 credit: see the General Education ([https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#viewingawiderworldtext](https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#viewingawiderworldtext)) section of this catalog for a full list of courses), Calculus I and II (6-8 credit), Physics I (4 -credit), elective science with lab (4 credit), computer drafting (3 credit), statistics (A ST 311 or equivalent: 3 credit), computer programming (3 credit), plane surveying (3 credit), introduction to GIS (3-4 credit), surveying/civil drafting (3 credit), and approved electives to bring total transfer credits to 59.

**Requirements (120 Credits)**

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits but may be needed in order to take the necessary English and Mathematics coursework.

Students must also take the Fundamentals of Surveying examination prior to graduation.

Electives, to bring the total credits to 120  

Total Credits 120

1. See the General Education (p. 123) section of the catalog for a full list of courses. See the Viewing a Wider World (p. 130) section of this catalog for a full list of courses.

2. For students wishing to pursue a technical master's degree, MATH 1511G Calculus and Analytic Geometry I (or equivalent) and MATH 1521G Calculus and Analytic Geometry II (or equivalent) are recommended and will satisfy both the Area II and General Education Elective requirements.

   Students who take MATH 1435 Applications of Calculus I (or equivalent) and MATH 1440 Applications of Calculus II (or equivalent), will need to have an exception made for their degree audit.

   *for either Mathematics course selection students may need to take any prerequisites needed to enter the class(es) first.

3. Or any MATH 400 or above

4. Transfer students must complete college-level work that includes General Education Area I, IV, V, and VI (19 credit: see the General Education (https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#viewingawiderworldtext) section of this catalog for a full list of courses), Calculus I and II (6-8 credit), Physics I (4 -credit), elective science with lab (4 credit), computer drafting (3 credit), statistics (A ST 311 or equivalent: 3 credit), computer programming (3 credit), plane surveying (3 credit), introduction to GIS (3-4 credit), surveying/civil drafting (3 credit), and approved electives to bring total transfer credits to 59.

5. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case by case basis and students should discuss elective requirements with their academic advisor.

A Suggested Plan of Study for Students

The contents and order of this roadmap may vary depending on the students' transfer credits, some courses may need to be completed in addition to the ones listed below. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Information and Communication Technology - Bachelor of Information and Communication Technology

(120 credits)

Information and Communication Technology (ICT) (https://et.nmsu.edu/information-communication-technology/) is a distance education degree completion program. The program focuses on the knowledge and experience that is required to design, implement and manage a variety of information systems. The curriculum includes the study of:

- Networking and Network Security,
- Information Security,
- Application and Operating Systems Software,
- System Integration,
- Database Design and Management.

Graduates of the program can expect to enter the workforce with titles that include Systems or Network Administrator, Project Manager, Database Administrator, and Computer Support Specialist.

The ICT program is a distance education program and does not require any on-campus visits. Students who are successful in distance education programs typically are self-motivated, do not rely heavily on face-to-face instruction, work independently, and can remain on schedule. Students must have familiarity with and access to:

- a high-speed Internet connection,
- a sound card, 12G of RAM minimum,
- a microphone/Webcam,
- Microsoft Operating System 8.1 or newer and Office ®.

See the General Education (p. 130) section of this catalog for a full list of courses. See the Viewing a Wider World (p. 130) section of this catalog for a full list of courses.

For students wishing to pursue a technical master's degree, MATH 1511G Calculus and Analytic Geometry I (or equivalent) and MATH 1521G Calculus and Analytic Geometry II (or equivalent) are recommended and will satisfy both the Area II and General Education Elective requirements.

Students who take MATH 1435 Applications of Calculus I (or equivalent) and MATH 1440 Applications of Calculus II (or equivalent), will need to have an exception made for their degree audit.

*for either Mathematics course selection students may need to take any prerequisites needed to enter the class(es) first.

Or any MATH 400 and above.

Transfer students must complete college-level work that includes General Education Area I, IV, V, and VI (19 credit: see the General Education (https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#viewingawiderworldtext) section of this catalog for a full list of courses), Calculus I and II (6-8 credit), Physics I (4-credit), elective science with lab (4 credit), computer drafting (3 credit), statistics (A ST 311 or equivalent: 3 credit), computer programming (3 credit), plane surveying (3 credit), introduction to GIS (3-4 credit), surveying/civil drafting (3 credit), and approved electives to bring total transfer credits to 59.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case by case basis and students should discuss elective requirements with their academic advisor.
This program was not designed to be an engineering or engineering technology program, although there is a significant overlap with the engineering technology IET program offered by the department. Thus, the ICT program differs from all other baccalaureate programs offered by departments in the College of Engineering. The ICT program is accredited under NMSU's umbrella accreditation by the Higher Learning Commission (https://accreditation.nmsu.edu/) of the North Central Association of Colleges and Schools.

The program is designed to be a two-year degree completion educational path to a baccalaureate degree for graduates of computer and technology-related associate degree programs from community colleges or other two-year institutions. It is also a viable degree path for students who have completed the freshmen and sophomore years of computer or technology-related programs at four-year institutions including New Mexico State University.

Students must complete all university degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits but may be needed in order to take the necessary English and Mathematics coursework. The General Education requirements may be completed with transfer credits from any previous institutions.

Students may need to take any prerequisites needed to enter MATH 1220G College Algebra.

Transfer students are expected to have completed two years of college-level work that includes the General Education requirements (p. 123) for Areas I - VI. Viewing a Wider World (p. 130) courses will form part of the required 48 upper-level credit hours taken as part of the ICT program at NMSU.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra. The contents and order of this roadmap may vary depending on initial student placement in mathematics and previous English coursework that was transferred in. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

---

1. Students may need to take any prerequisites needed to enter MATH 1220G College Algebra.
2. Transfer students are expected to have completed two years of college-level work that includes the General Education requirements (p. 123) for Areas I - VI. Viewing a Wider World (p. 130) courses will form part of the required 48 upper-level credit hours taken as part of the ICT program at NMSU.
3. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

## A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra. The contents and order of this roadmap may vary depending on initial student placement in mathematics and previous English coursework that was transferred in. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Geomatics - Undergraduate Minor

Geomatics involves the application of knowledge to the analysis, design and execution of mapping, geomatics, geospatial information systems, and surveying. When performing this work, professionals must have an understanding of: the science of geomatic measurement and analysis; the legal principles of boundary location; the laws related to boundaries and land use; and applicable mathematical and computational theories and principles. Geomatics is made up of positional accuracy, land planning and development concepts pertinent to subdivision science. Geomatics professionals work for private surveying or engineering firms, for City, County, State or Federal Highway Departments, for State Lands Commissions, for the US Forest Service and for the US Bureau of Land Management, among others.

The mission of the Department of ETSE is to provide students with the rigorous, fundamental education needed to enter and succeed in the Geomatics and related professions. To accomplish this mission, the department will introduce students to the theory and application of recognized geomatics principles.

- PHYS 304  Forensic Physics
- PHIL 323V  Engineering Ethics
  or CJUS 425  Issues in Ethics, Law, and Criminal Justice
- E T 435  Senior Project (must be preapproved and information security topic)
  or ICT 435  Senior Project

**Total Credits**  19-20

---

**Manufacturing - Undergraduate Minor**

The *Manufacturing Minor* provides students with an augmenting skillset to better facilitate entry-level employment in manufacturing related industries. Students completing the Minor also acquire specialized knowledge needed for successful pursuit of a career in the manufacturing sector.

Typical skills gained from *Manufacturing Minor* coursework include: management and coordination of manufacturing processes, design for manufacturing, fabrication and assembly, product design and development, product specification, operations planning, scheduling, material handling, quality control, testing, evaluation and product validation.

A grade of C- or better is required in each course (may not be taken S/U). All prerequisites must be met before enrolling in a course. Engineering Technology students can meet most of the requirements for this minor by judicious selection of their electives.

</table>
The objective of this program is to provide opportunities for working professionals and traditional technology students to increase their knowledge and skillsets in the growing field of Information Technology. The professional Masters of Information Technology (M-IT) degree is a non-thesis, 100% online, professional development degree offered by the Department of Engineering Technology and Surveying Engineering (ETSE) in the NMSU College of Engineering. This degree is designed for working IT professionals and students interested in pursuing an advanced technology degree. Topics include system architecture, computer networking, development and application of software tools, cybersecurity, and virtual systems in the context of enterprise IT decision-making.

There are two paths to completing this degree. The first is a traditional program of 30 credits of masters’ level course work for students who currently hold a baccalaureate degree. The second is a baccalaureate to master’s accelerated track. In this track, undergraduates will successfully complete the first three years of an undergraduate baccalaureate program, which coincides with the requirements of the Engineering Technology BS degree in Information Engineering Technology (IET) or the BICT degree in Information and Communication Technology (ICT). The accelerated track master’s degree in engineering is not available to students who have already earned an undergraduate degree. Upon approval from the Graduate School, in the final year, up to 12 credits of IET/ICT degree’s required or elective courses numbered 450 and above may be considered “dual credits” applying to both the baccalaureate and the M-IT degree. When the student completes the baccalaureate degree and after admission to the M-IT program, the completed dual credit courses will be applied to the Master’s requirements. The final M-IT degree requirements will be chosen to complete the 30 credit requirement. Students will begin taking graduate-level classes when they have junior or senior standing (up to 9 credits). These courses double count, fulfilling requirements for both a baccalaureate and the M-IT degree.
**Optional Electives Outside of the Department/College**

**Total Credits** 30

1. Masters of Information Technology required course
3. See your faculty advisor for more information about selecting elective courses outside the department and/or the college.

The plan of study below was created with working professionals in mind. You will find guidelines for part-time students taking two courses per semester, including summer. Please note that the Masters of Information Technology program can be completed as a full-time student in one calendar year if that is your preference. Contact the program director or faculty advisor for other plans of study options and for further information. The program website is located at [https://enr.nmsu.edu/pmseie/](https://enr.nmsu.edu/pmseie/).

**First Year**

**Fall**
- E T 551 Enterprise Architecture I ³ 3
- E T 583 Mobile App Programming and Development (Recommended Elective) ² 3

**Credits** 6

**Spring**
- E T 552 Enterprise Architecture II ¹ 3
- E T 562 Development and Operations ¹ 3

**Credits** 6

**Summer**
- E T 585 White Hat System Testing (Recommended Elective) ² 3
- E T 595 Capstone Projects in Information Technology ¹ 3

**Credits** 6

**Second Year**

**Fall**
- E T 539 Advanced Enterprise Security ¹ 3
- E T 555 Virtualization ¹ 3

**Credits** 6

**Spring**
- E T 505 Special Topics in Information Technology (Recommended Elective) ² 3
- E T 577 Advanced Computer Networking ¹ 3

**Credits** 6

**Total Credits** 30

1. Masters of Information Technology required course
2. Masters of Information Technology Recommended Elective. Please consult with your faculty advisor when selecting from other elective options.

**Industrial Engineering**

**Undergraduate Program Information**

Industrial engineers design, develop, install and improve integrated systems. The integrated systems can involve people, equipment, information, financial resources, software, materials, or energy. Industrial engineers work in a variety of manufacturing, health care, utility, retail, government, and
research settings, therefore the tools and methods of the industrial engineer are both varied and broad. Industrial Engineers use knowledge and skills in engineering, mathematics, and physical and social sciences. They also use principles and methods of engineering analysis and design to monitor and improve systems. New Mexico State University’s undergraduate degree program in Industrial Engineering prepares students to join the workforce or pursue graduate education while setting the foundation for life-long learning.

Specifically, within 2-3 years of graduation, graduates of the program will have:

- successfully applied various industrial Engineering techniques in an integrated fashion to solve real-world problems in process design and/or improvement;
- been engaged in a successful career sustained by life-long learning experiences

In addition, the Engineering Accreditation Commission of ABET, Inc. criteria in conjunction with the Institute of Industrial Engineers, requires that:

- baccalaureate degree graduates will be able to demonstrate the ability to design, develop, implement and improve integrated systems that include people, materials, information, equipment, and energy;
- industrial engineering curricula include in-depth instruction allowing students to accomplish the integration of systems using appropriate analytical, computational, and experimental practices; and
- that faculty teaching in industrial engineering departments shows evidence of understanding professional practice and stay current in their respective professional areas. Program faculty must have a responsibility and sufficient authority to define, revise, implement and achieve program objectives.

**Master's Accelerated Program:** The Master's Accelerated Program (MAP) option provides excellent opportunities for academically qualified undergraduate students to begin working on a master's degree during their junior year and senior year. The student must obtain prior approval from the department head before starting the MAP. Note that the MAP is only applicable if the student has not yet completed a bachelor's degree.

**Graduate Program Information**

The Department of Industrial Engineering offers graduate work leading to the degrees of Master of Engineering in Industrial Engineering (MEIE), Master of Science in Industrial Engineering (MSIE), and Doctor of Philosophy (Ph.D.) with specialization in industrial engineering. Areas of emphasis include

- operations research and simulation analytics,
- manufacturing systems,
- quality and reliability engineering,
- engineering management and systems engineering.

Departmental admission requirements in addition to those of the Graduate School must be considered on an individual basis because of the diversity of backgrounds of applicants in the program. An applicant should meet or correspond directly with the department as a first step in determining his or her specific admission status. Applicants should present mathematics preparation equivalent to 9 credits of calculus for engineers, 3 credits of differential equations, and 3 credits of calculus-based probability and statistics.

The MEIE is a Professional Master's degree targeting a working professional who wants to pursue a Master's degree in Industrial Engineering. The minimum credit-hour requirements for the MEIE degree may be met in the following way:

- 30-semester credits of approved course work.

The MSIE is a research-oriented degree. The minimum credit-hour requirements for the MSIE degree may be met in any of the following ways:

- 24-semester credits approved course work and 6-semester credits of thesis (IE 599 Master’s Thesis) for a total of 30-semester credits or
- 27-semester credits approved course work and 3-semester credits of project (IE 598 Special Research Programs) for a total of 30-semester credits.

Approved course work must meet all requirements of the Graduate School, represent a consistent master's program in relation to a student’s graduate study goals as determined through consultation with the graduate program adviser, and be approved by a program committee of the graduate faculty of the department. Programs in the focus areas of operations research and simulation analytics, manufacturing systems, quality and reliability engineering, or engineering management and systems engineering can be developed with the aid of a faculty advisor.

Departmental facilities and equipment are available to support the research efforts of graduate students, including computer terminals and laboratories. In addition to departmental facilities, supporting facilities such as the Manufacturing Technology and Engineering Center (MTEC) and five interdisciplinary Research Clusters are available for research work.

The Ph.D. program is research-oriented with the final product being the dissertation. The general information (p. 55) chapter in this catalog describes the Ph.D. degree program. The Ph.D. in Industrial Engineering also includes the following requirements:

- the course work must include at least 12 credits at the 500 level in a related field,
- 6 credits of 600-level research courses covering two areas, and
- 18 credits of 700-level courses following successful completion of the comprehensive examination.
The department does not have any foreign language or research tool requirements. Interested individuals should correspond directly with the department to determine eligibility for admission.

**Degrees for the Department**

**Bachelor Degree(s)**
Industrial Engineering - Bachelor of Science in Industrial Engineering (BSIE) (p. 1402)

**Master Degree(s)**
Industrial Engineering - Master of Science in Industrial Engineering (MSIE) (p. 1408) as a research-oriented degree. If you are interested in pursuing an advanced degree for a career in the engineering sciences or in preparation for a Ph.D., our MS degree is for you.

Industrial Engineering - Master of Engineering in Industrial Engineering (MEIE) (p. 1405) as the coursework-only degree. It is a Professional Master’s degree targeting a working professional who wants to pursue a Master's degree in Industrial Engineering at New Mexico State University.

**Doctoral Degree(s)**
Engineering (Industrial Engineering) - Doctor of Philosophy (Ph.D.) (p. 1413)

**Minors for the Department**
Entrepreneurship - Undergraduate Minor (p. 1405)

**Graduate Certificates**
Systems Engineering - Graduate Certificate (p. 1414)

**Hansuk, Sohn, Interim Department Head**

**Professor** Edward Pines; Delia Valles-Rosales

**Associate Professors** Hansuk Sohn (Interim Department Head), John Mullen;

H. Sohn, Interim Department Head, Ph.D. (University of Iowa)—operations research applications in logistics, transportation, and health systems; E. Pines, Ph.D. (Penn State)—quality and continuous improvement, technology policy; J. Mullen, Ph.D. (Iowa State)—stochastic processes, quality, improvement, production system design; D. J. Valles-Rosales, Ph.D. (New Mexico State)—manufacturing systems, soft computing technologies, computer integrated manufacturing.

**Industrial Engineering Courses**

**I E 151. Computational Methods in Industrial Engineering**
3 Credits (3)
History, social implications, and application of computers and an introduction to computer programming, word processing, and database management systems. Satisfies General Education computer science requirement.
**Prerequisite:** MATH 1220G.

**I E 200. Special Problems-Sophomore**
1-3 Credits
Directed individual projects. May be repeated for a total of 3 credits.
**Prerequisite:** consent of faculty member.

**I E 217. Manufacturing Processes**
3 Credits (3)
Introduction to manufacturing and processing, including: casting, forming, and machining. Emphasis on creating products with the appropriate techniques. Crosslisted with: E T 217.
**Prerequisite:** E T 110 and MATH 1220G.

**Learning Outcomes**
1. Various

**I E 217 L. Manufacturing Processes Laboratory**
1 Credit (3P)
Laboratory associated with I E 217. May be repeated up to 1 credits.
**Prerequisite(s):** E T 110.
**Corequisite(s):** I E 217.
I E 300. Special Problems-Junior
1-3 Credits
Directed individual projects. May be repeated for a total of 3 credits.
Prerequisite: consent of faculty member.

I E 311. Engineering Data Analysis
3 Credits (3)
Methodology and techniques associated with identifying and analyzing industrial data.
Prerequisite: C- or better in MATH 1521G or MATH 1521H or ENGR 190.

Learning Outcomes
1. Ability to correctly interpret statistical reports
2. Ability to correctly identify and solve problems involving continuous and discrete probability and random variables.
3. Ability to correctly analyze random samples using methods that include: point estimates, confidence intervals, tests of hypothesis, analysis of variance (ANOVA), and linear regression.

I E 316. Methods Engineering
3 Credits (2+3P)
Methods analysis and design. Work measurement techniques. Job evaluation and wage incentive methods. May be repeated up to 3 credits.
Prerequisite(s): I E 217, I E 311, E T 110.

I E 335. Applied Problem Solving in Industrial Engineering
3 Credits (3)
Application of computational techniques to engineering problems including the use of commercial programs in statistics and applied mathematics. Restricted to majors.
Corequisite(s): I E 311.

I E 365. Quality Control
3 Credits (3)
Statistical analysis of quality in manufacturing. Acceptance sampling and control charts.
Prerequisite: I E 311 or equivalent.

I E 375. Manufacturing Processes II
3 Credits (3)
Review of basic manufacturing processes. Advanced topics in casting, forming, machining and joining; major process parameters; economics of processes.
Prerequisite: I E 217 or E T 217.

I E 381. Technology Ventures
3 Credits (3)
This course looks at how new technology ventures are formed at the individual entrepreneur and corporate levels. It covers the development of science and engineering based ventures from ideas through creating customer value. This is the first course in the Entrepreneurship Minor. The roles of science and engineering specialists in the creation of customer value are defined in preparation for development of technology-based enterprises.

I E 382. Business for the Practicing Engineer
3 Credits (3)
Business tools and skills, including technology commercialization, patent applications, preparing a technology-oriented business plan, reading and constructing financial documents, modeling and understanding markets, e-commerce, QFD, concurrent engineering, engineer's role in the global economy, and engineer's impact on product design and cost.
Prerequisite: engineering major, junior level or above.

I E 400. Undergraduate Research
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of faculty member.

I E 411. Occupational Safety
3 Credits (3)
Practical methods to improve safety in the workplace. Topics include OSHA and other regulations, hazard recognition, assessment and control, industry standards, risk assessment and safety management. Material is applicable to a variety of workplace settings. This course is intended for College of Engineering students who have completed their lower-division requirements in mathematics, engineering, technology, and basic science. Same as I E 561 with differential assignments. Prerequisite: Junior standing
I E 413. Engineering Operations Research I  
3 Credits (3)  
Deterministic operations research modeling including linear and integer programming.  
**Prerequisite:** MATH 1521G or MATH 1521H or ENGR 190.  
**Corequisite:** MATH 480.  
**Learning Outcomes**  
1. Ability to model optimization problems that can be solved by linear optimization. Ability to solve linear optimization problems Ability to interpret solutions of linear optimization problems in the context of the larger problem.

I E 423. Engineering Operations Research II  
3 Credits (3)  
Probabilistic operations research modeling, including queuing systems and their optimization; Markov chains. May be repeated up to 3 credits.  
**Prerequisite(s):** I E 311.  
**Corequisite(s):** MATH 392.

I E 424. Manufacturing Systems  
3 Credits (3)  
Organization and functions of manufacturing planning and control systems including forecasting, MRP, capacity planning, JIT systems, scheduling, and inventory control.  
**Prerequisite:** I E 311.

I E 451. Engineering Economy  
3 Credits (3)  
Discounted cash flows, economics of project, contract and specifications as related to engineering design.

I E 460. Evaluation of Engineering Data  
3 Credits (3)  
Analysis of engineering systems possessing variability, employing regression, analysis of variance, distribution theory, and experimental design methods.  
**Prerequisite:** I E 311 or equivalent.

I E 466. Reliability  
3 Credits (3)  
Application of statistical theory to engineering reliability estimation, reliability improvement, and the analysis of reliability test data.  
**Prerequisite:** I E 311 or equivalent.

I E 467. Discrete-Event Simulation Modeling  
3 Credits (3)  
Basic modeling concepts, organizations of simulations, input data analysis, random variate generation, simulation design and analysis, model validation, output analysis, and management of simulations. Differentiated graduate assignments. May be repeated up to 3 credits.  
**Prerequisite(s):** I E 311 or equivalent.

I E 478. Facilities Planning and Design  
3 Credits (3)  
Plant location methods, total process analysis, process integration, materials handling analysis, and traditional and computerized plant layout methodologies.  
**Prerequisite(s):** I E 316.  
**Prerequisite(s)/Corequisite(s):** I E 424.

I E 480. Senior Design  
3 Credits (2+3P)  
Multi-disciplinary team design project for external clients. Involves semester long activities including major design report and presentation.  
**Prerequisites:** senior standing, I E 467.

I E 490. Selected Topics  
1-3 Credits  
May be repeated for a maximum of 9 credits.  
**Prerequisite:** consent of the head of the department.

I E 505. Directed Readings  
1-3 Credits  
May be repeated for a maximum total of 6 credits.  
**Prerequisite:** consent of the head of the department.
I E 515. Stochastic Processes Modeling
3 Credits (3)
Introduction to the use of stochastic processes in the modeling of physical and natural systems. Use of generating functions, conditional probability and expectation, Poisson processes, random walk models, Markov chains, branching processes, Markov processes, and queuing processes in an applied setting.
Prerequisites: I E 311 or equivalent; and MATH 392 or equivalent.

I E 522. Queuing Systems
3 Credits (3)
Elements and classification of queuing systems, single server models, multi-server models, cost analysis and applications.

Learning Outcomes
1. Ability to model, analyze, and apply solutions to problems involving queueing systems
   Ability to read and understand literature in the queueing system analysis field.

I E 523. Advanced Engineering Economy
3 Credits (3)
Theoretical basis for engineering economy methods, problems of cost estimation, replacement, nonmonetary factors, and feasibility studies. Same as C E 523.

I E 524. Advanced Production and Inventory Control
3 Credits (3)
Organization and functions of manufacturing planning and control systems including forecasting, MRP, capacity planning, JIT systems, scheduling and inventory control. Same as I E 424 with differentiated assignments.

I E 525. Systems Synthesis and Design
3 Credits (3)
Examination of the production management complex in terms of its components and the synthesis of these components into an effective operating unit. Development of input-output models representing the basis structure of all production activities.

I E 530. Environmental Management Seminar
1 Credit (1)
Survey of practical and new developments in hazardous and radioactive waste management provided through a series of guest lectures and reports of ongoing research. Same as C E 530, E E 530, CHME 530.

I E 533. Linear Programming
3 Credits (3)
Linear programming problem formulation, simplex algorithm, theory of linear programming, duality, revised simplex algorithm, and sensitivity analysis.

I E 534. Nonlinear Programming
3 Credits (3)
Theoretical and computational methods to solve optimization problems in engineering, statistics, economics, and operations research. Topics include convexity, optimality conditions, Newton's method, Lagrange multipliers, search algorithms for unconstrained and constrained problems, as well as barrier and penalty methods.

Learning Outcomes
1. Ability to model situations which may be solved by nonlinear optimization and to interpret the results in the context of the larger problem
   Ability to employ several computer tools to correctly solve nonlinear optimization problems. Ability to read and understand literature in the field of nonlinear optimization
   Ability to select appropriate methods and algorithms from a core representative set of methods and tools to solve nonlinear optimization problems

I E 535. Discrete Optimization
3 Credits (3)
Combinatorial Optimization problems using both integer programming and graph theoretic approaches. Emphasis on modeling and computational algorithms.

I E 537. Large Scale Systems Engineering
3 Credits (3)
Systems engineering approaches to large-scale complex technological and societal problems. Concepts of interaction and structural graphs, matrices, delta, and Gantt charts. The hall matrix approach, structural concepts, reachability matrices, and cross impact-analysis, modeling and decision making.
I E 545. Characterizing Time-Dependent Engineering Data  
3 Credits (3)  
Theory and techniques employed in the characterization of stochastic processes commonly found in engineering applications. Distribution models include exponential, gamma, Weibull, and extreme value. Design and analysis of experiments involving complete and censored data and elevated stress. Analytical techniques include parametric, nonparametric, and graphical approaches with emphasis on modern computer tools. Exact and approximate maximum-likelihood techniques are stressed.  

Learning Outcomes  
1. Ability to characterize a process, based on data that is time-dependent or sequential in nature.

I E 561. Advanced Safety Engineering  
3 Credits (3)  
Regulation as well as qualitative, and quantitative methods to achieve and maintain safety in the workplace. Includes liability, worker's compensation, OSHA, hazard control, safety assessment, cost justification, and system analysis.  
Prerequisite: graduate status in engineering.

I E 563. Topics in Engineering Administration  
3 Credits (3)  
Study of qualitative and quantitative aspects. Consideration given to philosophical, psychological, political and social implications of engineering administrative decisions.

I E 567. Design and Implementation of Discrete-Event Simulation  
3 Credits (3)  
Basic modeling concepts, organizations of simulations, input data analysis, random variate generation, simulation design and analysis, model validation, output analysis, and management of simulations. Taught with I E 467 with differentiated assignments for graduate students.

I E 571. Advanced Quality Control  
3 Credits (3)  
Advanced topics in quality control and design of experiments for improvement of quality.  
Prerequisite: I E 311 or equivalent.

I E 575. Advanced Manufacturing Processes  
3 Credits (3)  
Covers major process parameters in casting, forming, machining, and joining. Process economics and selection of processes design and interactions.  
Prerequisite: graduate standing.

I E 590. Selected Topics  
1-3 Credits  
May be repeated for a maximum of 9 credits.  
Prerequisite: consent of the head of the department.

I E 598. Special Research Programs  
1-3 Credits  
Individual analytical or experimental investigations. May be repeated for a maximum total of 6 credits.  
Prerequisite: consent of instructor.

I E 599. Master's Thesis  
1-15 Credits  
Thesis.

I E 610. Topics in Operations Research  
3 Credits (3)  
Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 620. Topics in Computer Modeling  
3 Credits (3)  
Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 630. Topics in Engineering Management  
3 Credits (3)  
Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 690. Selected Topics  
1-15 Credits  
May be repeated.  
Prerequisite: consent of department head.
Industrial Engineering - Bachelor of Science in Industrial Engineering

Requirements (121 credits)

In addition to the university requirements for graduation, a student must have at least a 2.0 grade-point average in all departmental courses.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 121 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

1. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.

2. See the General Education (p. 123) section of the catalog for a full list of courses

3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses

4. Students are required to see the advisor for more detailed information about selecting engineering elective course that is approved to fulfill this requirement.

**A Suggested Plan of Study for Students**

This roadmap is a semester-by-semester planning guide for Industrial Engineering major. It assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in Mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from semester to semester and may be subject to modification or change. Roadmaps should be reviewed in consultation with your advisor.

#### Total Credits
121-122
1. MATH 1511G Calculus and Analytic Geometry I is the starting Math course for the degree but students may need to complete any prerequisites prior to enrolling in this course depending on math placement.

2. See the General Education (p. 123) Section of the catalog for a full list of courses.

3. **Engineering Electives:**
   - ENGR 234 Engineering Mechanics II
   - C E 301 Mechanics of Materials
   - M E 234 Mechanics-Dynamics
   - M E 240 Thermodynamics

4. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.

5. See your adviser for more detailed information about selecting the engineering elective course that is approved to fulfill this requirement.

---

**Entrepreneurship - Undergraduate Minor**

The Entrepreneurship Minor is designed to promote entrepreneurship to students across the NMSU campus. The Department of Industrial Engineering coordinates an engineering cluster of electives to support the three required classes offered by the College of Business.

**Industrial Engineering - Master of Engineering in Industrial Engineering**

The Department of Industrial Engineering offers the Master of Engineering (M.E. in IE) as the coursework-only degree. It is a Professional Master's degree targeting a working professional who wants to pursue a Master's degree in Industrial Engineering at New Mexico State University.

The program of study leading to the M.E. in IE degree consists of 30 credits. At least 50% of the course work must be taken from the Approved IE Department Course List. This means that students can take up to five electives from engineering disciplines outside the department and/or other areas of interest outside the college.

The M.E in IE degree is also offered by distance education for qualified applicants. The courses with section numbers M70 - M79 are designated as online.

Although there is no oral exam, students will be required to complete an exit interview with an IE faculty member.

Note that NMSU reserves the right to change the program requirements without prior notice. Information in the NMSU Graduate Catalog takes precedence over any other information.

**Admission**

Students seeking regular admission to graduate study in Industrial Engineering must meet departmental admission requirements in addition to those of the Graduate School (https://catalogs.nmsu.edu/nmsu/graduate-school/). The departmental requirements are listed below:

- A student holds a bachelor’s degree in Engineering from a school accredited by the Accreditation Board for Engineering and Technology (ABET) and has taken a course in calculus-based probability and statistics, or a student holds a bachelor’s degree from an accredited school and meets the math prerequisites of the Department of Industrial Engineering. The prerequisites are: 9 hours in calculus; 3 hours in differential equations; and 3 hours in calculus-based probability and statistics. All students must have a grade point average of 3.0 or above (based on A=4.0) during their last 60 hours of undergraduate study.
- A letter of intent should be written providing the department with information why the student wants to pursue a graduate degree, and professional and academic plans/goals.
Note that up to 15 credits may be transferred in if the student was enrolled in an approved graduate program. An applicant should meet or correspond directly with the IE graduate faculty as a first step in determining his or her specific admission status.

**Procedure**

Upon being admitted to graduate work in the department, the student will be assigned a temporary advisor until a permanent advisor is selected. Students should contact the department prior to the time of registration, so that preliminary advising can be done without pressure or haste.

**Selection of Advisor**

During the first 12 credit hours in the Industrial Engineering Graduate Program, all master's degree students must select a permanent advisor. This must be done prior to registration for the fifth course the student takes. In selecting an advisor, the student should communicate with several members of our graduate faculty to discuss specific program objectives. The student should also use these contacts to become familiar with faculty research projects that are currently in progress. The faculty member must consent to serve as the student’s advisor in writing. A list of the graduate faculty of the department with their areas of interest is found on the IE web page at http://www.nmsu.edu/~ie/.

**Submission of Programs**

After completing 12 credits of graduate coursework, a permanent “Program of Study” form must be submitted to the Graduate School. Acceptance of this program admits the student to candidacy for the degree.

- BFIN 500-level (With approval of advisor and instructor)
- MGMT 500-level (With approval of advisor and instructor)
- C S 500-level (With approval of advisor and instructor)
The optional courses outside the department and/or the college should be previously approved by the academic advisor. See your advisor for more detailed information about selecting elective courses.

Industrial Engineering - Master of Engineering in Industrial Engineering (Online)

The Department of Industrial Engineering offers the Master of Engineering (M.E. in IE) as the coursework-only degree. It is a Professional Master's degree targeting a working professional who wants to pursue a Master's degree in Industrial Engineering at New Mexico State University.

The program of study leading to the M.E. in IE degree consists of 30 credits. At least 50% of the course work must be taken from the Approved IE Department Course List. This means that students can take up to five electives from engineering disciplines outside the department and/or other areas of interest outside the college.

The M.E in IE degree is also offered by distance education for qualified applicants. The courses with section numbers M70 - M79 are designated as online.

Although there is no oral exam, students will be required to complete an exit interview with an IE faculty member.

Note that NMSU reserves the right to change the program requirements without prior notice. Information in the NMSU Graduate Catalog takes precedence over any other information.

Admission

Students seeking regular admission to graduate study in Industrial Engineering must meet departmental admission requirements in addition to those of the Graduate School (https://catalogs.nmsu.edu/nmsu/graduate-school/). The departmental requirements are listed below:

- A student holds a bachelor’s degree in Engineering from a school accredited by the Accreditation Board for Engineering and Technology (ABET) and has taken a course in calculus-based probability and statistics, or a student holds a bachelor’s degree from an accredited school and meets the math prerequisites of the Department of Industrial Engineering. The prerequisites are: 9 hours in calculus; 3 hours in differential equations; and 3 hours in calculus-based probability and statistics. All students must have a grade point average of 3.0 or above (based on A=4.0) during their last 60 hours of undergraduate study.
- A letter of intent should be written providing the department with information why the student wants to pursue a graduate degree, and professional and academic plans/goals.

Note that up to 15 credits may be transferred in if the student was enrolled in an approved graduate program. An applicant should meet or correspond directly with the IE graduate faculty as a first step in determining his or her specific admission status.

Procedure

Upon being admitted to graduate work in the department, the student will be assigned a temporary advisor until a permanent advisor is selected. Students should contact the department prior to the time of registration, so that preliminary advising can be done without pressure or haste.

Selection of Advisor

During the first 12 credit hours in the Industrial Engineering Graduate Program, all master’s degree students must select a permanent advisor. This must be done prior to registration for the fifth course the student takes. In selecting an advisor, the student should communicate with several members of our graduate faculty to discuss specific program objectives. The student should also use these contacts to become familiar with faculty research projects that are currently in progress. The faculty member must consent to serve as the student’s advisor in writing. A list of the graduate faculty of the department with their areas of interest is found on the IE web page at http://www.nmsu.edu/~ie/.

Submission of Programs

After completing 12 credits of graduate coursework, a permanent “Program of Study” form must be submitted to the Graduate School. Acceptance of this program admits the student to candidacy for the degree.

The optional courses outside the department and/or the college should be previously approved by the academic advisor. See your advisor for more detailed information about selecting elective courses.

**Industrial Engineering - Master of Science in Industrial Engineering**

The Department of Industrial Engineering offers the Master of Science (M.S.) in Industrial Engineering with focus areas of manufacturing, operations research and engineering management. Students may choose one of two options for completing their M.S. degree and the requirements for each option are listed below:

- **Thesis option:** 24 credits of course work plus 6 credits of I E 599 Master's Thesis.
- **Project Option:** 27 credits of course work plus 3 credits of I E 598 Special Research Programs.

Whether students write a thesis or complete a project, the program of study leading to the M.S. degree consists of 30 credits. At least 50% of the course work must be taken from the Approved IE Department Course List. This means that students can take up to five electives from engineering disciplines outside the department and/or other areas of interest outside the college.

Note that NMSU reserves the right to change the program requirements without prior notice. Information in the NMSU Graduate Catalog takes precedence over any other information.

**Admission**

Students seeking regular admission to graduate study in Industrial Engineering must meet departmental admission requirements in addition to those of the Graduate School (https://catalogs.nmsu.edu/nmsu/graduate-school/). The departmental requirements are listed below:

- A student holds a bachelor’s degree in Engineering from a school accredited by the Accreditation Board for Engineering and Technology (ABET) and has taken a course in calculus-based probability and statistics, or a student holds a bachelor’s degree from an accredited school and meets the math prerequisites of the Department of Industrial Engineering. The prerequisites are: 9 hours in calculus; 3 hours in differential equations; and 3 hours in calculus-based probability and statistics. All students must have a grade point average of 3.0 or above (based on A=4.0) during their last 60 hours of undergraduate study.
You must write a statement of intent describing your intended research. This statement should be 200-300 words and should discuss your graduate research interests and suggest a faculty member who might advise your research. Refer to the research interests of IE graduate faculty for possible advisors. You will not be admitted if you do not submit this statement, as it is part of your application for admission.

Note that up to 15 credits may be transferred if the student was enrolled in an approved graduate program. An applicant should meet or correspond directly with the IE graduate faculty as a first step in determining his or her specific admission status.

Procedure

Upon being admitted to graduate work in the department, the student will be assigned a temporary advisor until a permanent advisor is selected. Students should contact the department prior to the time of registration, so that preliminary advising can be done without pressure or haste.

Selection of Advisor

During the first 12 credit hours in the Industrial Engineering Graduate Program, all master’s degree students must select a permanent advisor. This must be done prior to registration for the fifth course that the student takes. In selecting an advisor, the student should communicate with several members of the IE graduate faculty to discuss specific program objectives. The student should also use these contacts to become familiar with faculty research projects that are currently in progress. The faculty member must consent to serve as the student’s advisor in writing. A list of the department graduate faculty along with their areas of interest is found on the IE web page (https://ie.nmsu.edu/).

Submission of Programs

After completing 12 credits of graduate coursework, a permanent “Program of Study” form must be submitted to the Graduate School. Acceptance of this program admits the student to candidacy for the degree.

- I E 530  Environmental Management Seminar
- I E 537  Large Scale Systems Engineering
- I E 561  Advanced Safety Engineering
- I E 563  Topics in Engineering Administration

Depending on contents, the following two courses are applicable to any of the above four areas:

- I E 505  Directed Readings
- I E 590  Selected Topics

**Optional Electives**

- E E 500-level (With approval of advisor and instructor)
- M E500-level (With approval of advisor and instructor)
The optional courses outside the department and/or the college should be previously approved by the academic advisor. See your advisor for more detailed information about selecting elective courses.

Requirements for Graduation

It is the responsibility of the student to complete all forms before submitting them to the IE department. Blank forms will not be accepted.

1. **Application for Diploma (Degree)** At the start of the semester in which you are to graduate you must file an Application for Diploma (Degree) and fee with the NMSU Registrar Office. To find the application as well as deadlines, log onto MyNMSU (https://idp.quicklaunchssoc.com/authenticationendpoint/login.do?commonAuthCallerPath=%2Fpassivests&forceAuth=false&passiveAuth=false&tenantDomain=nmsu.edu&wa=wsignin1.0&wct=2019-05-13T23%3A08%3A13Z&wctx=rm%3D0%26id%3Dpassive%26ru%3D%2523%2523cas%2523%2523login%2523service%2523https%2523%2523nmsu.edu%2523%2523F%2523login%2523wtrealm=https%2523%2523A%2523F%2523cps55.quicklaunchssoc.com%2523F%2523sessionDataKey=087d2127-1263-4157-bb55-50e1596d0a6b&relyingParty=https%2523%2523A%2523F%2523cps55.quicklaunchssoc.com%2523F%2523type=passivests&sp=cps55.quicklaunchssoc.com&isSaaSApp=false&authenticators=BasicAuthenticator:LOCAL) and click on the Student and Financial Aid tab, then under QuickLinks select Student Records. Filing dates are on the Graduate School Calendar that is maintained on the Graduate School web site.

2. **Program of Study** – After you have completed 12 NMSU credits, you are required to complete a form entitled Program of Study and Committee for Master’s Students (http://gradschool.nmsu.edu/wp-content/uploads/sites/5/2015/04/masters_program_of_study.pdf). This form is found on the NMSU Graduate School Forms (http://gradschool.nmsu.edu/graduate-forms/) web page.

3. **Schedule Your Master’s Exam** – Whether you write a thesis, complete a project or take all course work, you must schedule a final examination during your last semester of course work/research. Examination committee rules are in the Graduate Catalog and schedule dates are found on the Graduate School Deadlines (http://gradschool.nmsu.edu/deadlines/deadlines.htm) page. You should plan to have your adviser, a second IE graduate faculty member, and an external (outside the IE department) faculty member. The external member will also serve as the Dean of the Graduate School's Representative. To ensure that a Faculty Member is currently a member of the Graduate Faculty and their appointment expiration date please visit http://gradschool.nmsu.edu/gradfac1.htm

4. **Other Forms** – Additional forms can be found on the Graduate School website (http://gradschool.nmsu.edu/).

To schedule and take your exam:

- Schedule a 2-hour time block that is convenient for you and your selected faculty committee. **Students are responsible for contacting and scheduling their committee.**
- Schedule use of the IE Conference Room, Room 279 EC III, with the Industrial Engineering Secretary. At that time, if you are presenting a project or thesis, schedule the use of any equipment you may require such as the In Focus projector, laptop, etc.
- Complete the Master’s Final Examination Form (http://gradschool.nmsu.edu/wp-content/uploads/sites/5/2015/04/masters_final_examination_form.pdf). You must schedule your exam a minimum of 10 working days in advance. This means your form must be at the Graduate School at that time.
- Consult with your adviser to discuss your examination. This can be by phone or e-mail.
- Be on time for your examination. If you’re using equipment for presenting research, you should arrive early to set up.

Please plan to attend, with your family and friends, the College of Engineering’s Sociedad de Ingenieros ceremony that is held to recognize our engineering graduates. This ceremony is held the Friday evening before Graduation.

**Industrial Engineering - Master of Science in Industrial Engineering (Online)**

The Department of Industrial Engineering offers the Master of Science (M.S.) in Industrial Engineering with focus areas of manufacturing, operations research and engineering management. Students may choose one of two options for completing their M.S. degree and the requirements for each option are listed below:

- **Thesis option**: 24 credits of course work plus 6 credits of I E 599 Master's Thesis.
- **Project Option**: 27 credits of course work plus 3 credits of I E 599 Special Research Programs.
Whether students write a thesis or complete a project, the program of study leading to the M.S. degree consists of 30 credits. At least 50% of the course work must be taken from the Approved IE Department Course List. This means that students can take up to five electives from engineering disciplines outside the department and/or other areas of interest outside the college.

Note that NMSU reserves the right to change the program requirements without prior notice. Information in the NMSU Graduate Catalog takes precedence over any other information.

4. **Other Forms**
   - Additional forms can be found on the Graduate School website (http://gradschool.nmsu.edu/).

### To schedule and take your exam:

- Schedule a 2-hour time block that is convenient for you and your selected faculty committee. **Students are responsible for contacting and scheduling their committee.**
- Schedule use of the IE Conference Room, Room 279 EC III, with the Industrial Engineering Secretary. At that time, if you are presenting a project or thesis, schedule the use of any equipment you may require such as the In Focus projector, laptop, etc.
- Complete the Master’s Final Examination Form (http://gradschool.nmsu.edu/wp-content/uploads/sites/5/2015/04/masters_final_examination_form.pdf). You must schedule your exam a minimum of 10 working days in advance. This means your form must be at the Graduate School at that time.
• Consult with your adviser to discuss your examination. This can be by phone or e-mail.
• Be on time for your examination. If you’re using equipment for presenting research, you should arrive early to set up.

Please plan to attend, with your family and friends, the College of Engineering’s Sociedad de Ingenieros ceremony that is held to recognize our engineering graduates. This ceremony is held the Friday evening before Graduation.

**Engineering (Industrial Engineering) - Doctor of Philosophy**

The Department of Industrial Engineering offers the Doctor of Philosophy (Ph.D.) in Engineering with a specialization in Industrial Engineering.

The program of study leading to the Ph.D. degree must include a minimum of 30 graduate credits plus 18 dissertation (I E 700) credits. Your program must also include 12 credits in related areas at the 500 level that are appropriate to your research. Typical areas include statistics, electrical engineering, mathematics, or mechanical engineering. You may not transfer in credits from your master’s degree to meet this requirement. Refer to http://ie.nmsu.edu for a program description and current research areas.

**Ph.D. Admissions**

Admission to the Industrial Engineering Ph.D. program requires that you have a master’s degree in industrial engineering or a closely-related (as determined by the IE faculty) field. Although individual situations vary, you should have earned the equivalent of a minimum 3.7 grade point average in that program. We require the TOEFL of international students. We do not require the GRE.

You must write a statement of intent describing your intended research. This statement should be 400-600 words. It should discuss your doctoral research interests and suggest a faculty member who might advise your research. Refer to the research interests of IE graduate faculty for possible advisors. You will not be admitted if you do not submit this statement as it is part of your application for admission.

**Time Line for a Ph.D. Program**

Individual programs vary, however, you can expect to spend three to five years (mostly full-time) earning your degree. Below are the key milestones of every program:

1. **Admittance to the program and begin course work.** In coordination with your academic advisor, select 500 level courses to help you prepare for the Qualifying Exam. This would include IE topics on the general part of the exam, as well as topics related to your intended research.

2. **Pass qualifying examination.** If you enter the program in Summer or Fall, you must take the qualifying examination in January. If you enter in Spring, you must take the qualifying examination in August. Details regarding the examination may be obtained from the department office. If you do not pass the examination on your first attempt, you may be allowed, based on the recommendation of the faculty, to take the exam again the next time it is offered. If you do not pass the examination on your second attempt, you will be dropped from the Ph.D. program.

3. **Form your committee and prepare a research proposal.** During this time, you are expected to be a full-time student. The Graduate School requires at least one academic year of residency as defined in the Graduate Catalog. You should take at least six credits of I E 600 level courses. At this time, you should expect to file your Program of Study with the Graduate School.

4. **Pass comprehensive examination.** The comprehensive examination consists of two parts: written and oral presentation of your research proposal. You must pass the examination within 24 months of passing the qualifying examination. You may not take 700 level courses until you have passed both parts of your comprehensive examination.

5. **Conduct research, write dissertation, pass final examination.** During this time your advisor and committee guide your work. During this time, you are enrolled for I E 700 courses. Your program must include a minimum of 18 credits of I E 700 Doctoral Dissertation. There is a minimum time span of one year between the comprehensive examination and the final oral examination (e.g., the dissertation defense). If more than five years have passed since you passed the comprehensive examination, you may be required to pass another comprehensive examination.

**Ph.D. Qualifying Exam**

1. **Format**
   • Exam offered in two parts:
     • Foundations of IE, all day Thursday
     • IE Specific area exam: all day Friday.

2. **Content**
   • **IE Foundation Portion of the Exam** (all students will take identical exam for the foundation portion) Foundation portion consists of four areas:
     • Operations Research Deterministic and Stochastic
     • Probability and Statistics
     • Industrial Engineering Theory
     • Combination of questions from one or all of these four areas. Selection of Manufacturing, Engineering Economy, Process Improvement, Methods.
• **IE Research Topics Portion of the Exam** (Each student taking the qualifier must select two of the topics listed below for testing at least 6 weeks before the exam is offered. The student will work with his or her advisor on selecting the topics. The advisor must submit the two selected areas to the Chair of the Examining Committee at least one month before the exam is offered.)
  - Manufacturing
  - Computer/Simulation Modeling
  - Stochastic Operations Research
  - Queueing Theory
  - Design Optimization (product, facility, process, etc.)
  - Algorithmic Optimization (Dynamic cases)
  - Quality Control
  - Systems Integration and Control
  - Facility Design and Layout
  - Reliability

**Additional Requirements**

Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifying Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

- **Paper #1**: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student’s doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

- **Paper #2**: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

**Systems Engineering - Graduate Certificate**

**Program Availability**

This distance education program is available to working professionals who have undergraduate degrees in engineering, engineering technology, and related fields. It is also an option for persons with graduate degrees who seek career renewal. Systems engineering provides a unique opportunity for working professionals to integrate their work experience with advanced coursework.

**Program Objectives**

The objectives of this program are:

- To provide technical professionals an opportunity to advance their careers through advanced education in systems engineering.
- To develop and improve relationships with the College of Engineering's constituencies by offering a program that addresses a known need for professional graduate-level development.
- To provide an opportunity for non-traditional students to consider advancing their education in areas that will foster their career development.
- To enable program students to become aware of current faculty research in systems engineering areas.

**Requirements**

A 3.0 minimum cumulative GPA in four courses as described below will be required for award of the Systems Engineering Graduate Certificate Program.

**Admission to the NMSU Graduate School**

Students must apply and be admitted to NMSU as a non-degree student to take classes. For more information, contact:

NMSU Graduate School
Box 30001, MSC 3G
Las Cruces, NM 88003
(575) 646-2736
http://gradschool.nmsu.edu/ (http://gradschool.nmsu.edu)

To complete the Certificate Program, students must be admitted to the Graduate School as certificate students. If you are considering pursuing a degree in electrical or industrial engineering, you should contact that department for admissions requirements and advising.

### Mechanical Engineering and Aerospace Engineering

#### Undergraduate Program Information

The mission of the Mechanical and Aerospace Engineering Department at New Mexico State University is threefold:
• to educate those who will advance knowledge and become the future leaders of industry and academia;
• to conduct both basic and applied research in mechanical and aerospace engineering and related interdisciplinary areas; and
• to provide service to the profession, to the State of New Mexico, to the country, and to the future development of engineering worldwide.

A critical focus within the department is to afford undergraduates of varying backgrounds and abilities every opportunity for achieving success in the mechanical and aerospace engineering professions. To address this focus, the faculty of the Mechanical and Aerospace Engineering Department, with input from other constituents, have established the following program educational objectives that inform the overall undergraduate programs:

• Our graduates will gain relevant employment and/or pursue a graduate degree.
• Our graduates will advance in their level of workplace responsibility.

**Graduate Program Information**

Graduate programs of study are available leading to the degrees of

• Doctor of Philosophy in Aerospace Engineering
• Doctor of Philosophy in Engineering with a concentration in Mechanical Engineering,
• Master of Science in Aerospace Engineering,
• Master of Science in Mechanical Engineering,
• Master of Engineering in Aerospace Engineering,
• Master of Engineering in Mechanical Engineering.

Areas of active research in mechanical engineering include the following:

• experimental fluids with application to wind power,
• computational fluid dynamics,
• energy systems and components,
• thermal management,
• space transportation,
• modeling and analysis of machining processes,
• micromechanics and cross property connections,
• computational mechanics with application to material properties,
• renewable energy,
• nonlinear dynamics and vibration,
• reduced order modeling in multibody dynamics,
• structural dynamics and fluids,
• robotics,
• composite materials and nanomaterials.

Areas of active research in aerospace engineering include the following:

• computational, theoretical, and experimental aerodynamics,
• vortex dynamics,
• flow control,
• aeroelasticity and flutter,
• space dynamics and control,
• spacecraft motion estimation,
• propulsion,
• ground simulation of reduced gravity environments,
• structural health monitoring, and
• unmanned aerial systems.

Laboratory facilities supporting graduate research include a large low-speed wind tunnel, a large water channel, a robotics, controls and UAS lab, a reduced gravity simulation lab, a space dynamics and controls lab, and a composite materials lab. A mechanical testing lab is also available in the College of Engineering.

In addition to fulfilling the basic requirements for admission to the Graduate School, applicants are expected to have an undergraduate degree equivalent to a BS in mechanical or aerospace engineering from a university accredited by ABET. Graduate students whose BS degree is in a discipline other than A E or M E will normally be required to take undergraduate courses in M E or A E in order to prepare for graduate course work; such
undergraduate preparatory work will be determined by the graduate coordinator on a case by case basis. A candidate for the master’s degree can choose one of two options: a thesis option or a course-only option. Both options require a minimum of 30 credits of graduate study.

Doctoral candidates must complete a program of study determined by the student and his or her advisory committee. The student must successfully pass a written qualifying examination (administered during the student’s first year of full-time study) and an oral comprehensive examination administered after approximately 80 percent of the course work is completed. The student must submit and defend an acceptable dissertation based on independent investigation in a field of study approved by the advisory committee. The requirements for the MS and Ph.D. degrees are stated below.

Degrees for the Department

Bachelor Degree(s)

Aerospace Engineering - Bachelor of Science in Aerospace Engineering (p. 1427)

Mechanical Engineering - Bachelor of Science in Mechanical Engineering (p. 1430)

Master Degree(s)

Aerospace Engineering - Master of Engineering (p. 1434)

Aerospace Engineering - Master of Engineering (Online) (p. 1435)

Mechanical Engineering - Master of Engineering (p. 1436)

Mechanical Engineering - Master of Engineering (Online) (p. 1437)

Aerospace Engineering - Master of Science in Aerospace Engineering (p. 1438)

Mechanical Engineering - Master of Science in Mechanical Engineering (p. 1438)

Doctoral Degree(s)

Aerospace Engineering - Doctor of Philosophy (p. 1439)

Engineering (Mechanical Engineering) - Doctor of Philosophy (p. 1440)

Minors for the Department

Aerospace Engineering - Undergraduate Minor (p. 1433)

Mechanical Engineering - Undergraduate Minor (p. 1434)

Department Head: Jay Frankel, Ph. D.

Associate Department Head: Young Lee, Ph. D.

Professors: Chaitanya, Frankel, Y. H. Park, Sevostianov; Associate Professors: Drach, Garcia, Gross, Kota, Lee, Shashikanth, Shu; Assistant Professors: Abdelkefi, Alaie, Haghshenas-Jaryani, Kuravi, H. J. Park, Sun, Wang; College Assistant Professors: Armstrong, Livings

A. Abdelkefi, Ph.D. (Virginia Tech)—nonlinear dynamics, energy harvesting, aeroelasticity, fluid-structure interaction, vibration and controls; S. Alaie, Ph.D. (UNM)—implantable microsensors, advanced manufacturing and medical devices; T. Armstrong, Ph.D. (NMSU)—Mechanics of Materials, Military Aircraft Systems, Engineering Education; V. Chaitanya, Ph.D. (Johns Hopkins)—materials characterization, materials degradation, corrosion, electrochemistry, failure analysis, energy, bioengineering, additive manufacturing, food-energy-water nexus; B. Drach, Ph.D. (New Hampshire)—mechanics of composite materials, multi-scale modeling and characterization; J. Frankel, Department head, Ph.D. (Virginia Tech)—heat transfer, hypersonics; G. V. Garcia, Ph.D. (Texas A&M)—damage detection, experimental mechanics, vibration; A. Gross, DEngr. (Aachen)—computational fluid dynamics, fluid mechanics, aircraft design and propulsion, unmanned aerial systems, wind energy; M. Haghshenas-Jaryani, Ph.D. (UT Arlington)—Soft Robotics, Bio-inspired and Bio-mimetic Robotics, Dynamics and Control; K. Kota, Ph.D. (Central Florida)—heat transfer enhancement on engineered surfaces, energy efficiency, thermal management, water desalination, surface micro-manufacturing; S. Kuravi, Ph.D. (Central Florida)—renewable energy, thermal systems, concentrating solar power, thermal desalination, energy storage; Y. S. Lee, Associate Department Head, Ph.D. (Illinois Urbana-Champaign)—aeroelastically, fluid-structure interaction, nonlinear system identification; R. Livings, Ph.D. (Iowa State)—nondestructive evaluation, finite element analysis, machine learning; Y. H. Park, Ph.D. (Iowa)—design optimization, computational solid mechanics, atomistic and molecular simulations; H. J. Park, Ph.D. (Michigan)—dynamics, optimal control; I. Sevostianov, Ph.D. (St. Petersburg, Russia)—micromechanics of materials, mechanics of biomaterials, mathematical physics; B. Shashikanth, Ph.D. (Southern California)—fluid mechanics, dynamical systems, controls; F. Shu, Ph.D. (Purdue)—experimental fluid dynamics, biofluidics, microfluidics, flow control, and turbulent flow; L. Sun, Ph.D. (Brigham Young)—unmanned systems, towed cable systems, sensor network, cooperative estimation and control, optimal control; Y. Wang, Ph.D. (Penn State)—computational fluid dynamics, multi-phase & reacting flows, aerospace propulsion, bio/micro-Fluidics.
Aerospace Engineering Courses

A E 339. Aerodynamics I
3 Credits (3)
Fluid properties, conservation equations, incompressible 2-dimensional flow; Bernoulli's equation; similarity parameters; subsonic aerodynamics: lift and drag, analysis and design of airfoils. Restricted to: A E majors.
Prerequisite: (M E 237 or ENGR 234) and (M E 228 or PHYS 395).
Learning Outcomes
1. Ability to apply knowledge of mathematics, science, and engineering;
2. Ability to design and conduct experiments, as well as to analyze and interpret data;
3. Ability to design a system, component or process to meet desired needs within realistic constraints;
4. Ability to identify, formulate, and solve engineering problems.

A E 362. Orbital Mechanics
3 Credits (3)
Dynamics of exoatmospheric flight of orbiting and non-orbiting bodies; 2-body orbital dynamics and Kepler's laws; orbits in 3 dimensions; orbit determination; orbit design and orbital maneuvers; lunar and interplanetary trajectories.
Prerequisite: (M E 228 or PHYS 395), (M E 237 or ENGR 234), and M E 261.
Learning Outcomes
1. Ability to apply knowledge of mathematics, science, and engineering;
2. Ability to identify, formulate, and solve engineering problems;
3. Ability to use the techniques, skills and modern tools necessary for engineering practice.

A E 363. Aerospace Structures
3 Credits (3)
Advanced concepts of stress and strain, introduction to the analysis of aero structures, complex bending and torsion, thin walled sections and shells, computational techniques. Prerequisites: C E 301

A E 364. Flight Dynamics and Controls
3 Credits (3)
Fundamentals of airplane flight dynamics, static trim, and stability; spacecraft and missile six degree of freedom dynamics; attitude control of spacecraft.
Prerequisite: (M E 228 or PHYS 395), (M E 237 or ENGR 234), and M E 261.
Learning Outcomes
1. Ability to apply knowledge of mathematics, science, and engineering;
2. Ability to identify, formulate, and solve engineering problems;
3. Ability to use the techniques, skills and modern tools necessary for engineering practice.

A E 400. Undergraduate Research
1-3 Credits (1-3)
Performed with the direction of a department faculty member. May be repeated for a maximum of 6 credits.
Prerequisite(s): Consent of faculty member.

A E 405. Special Topics
3 Credits (3)
Topics of modern interest to be offered by the departmental staff. Consent of instructor required.

A E 419. Propulsion
3 Credits (3)
Propulsion systems, thermodynamic cycles, combustion, specific impulse; principles of gas turbines, jet engines, and rocket propulsion systems. Prerequisites: A E 439

A E 424. Aerospace Systems Engineering
3 Credits (3)
Basic principles of top down systems engineering and current practice; preliminary and detailed design of aircraft and space vehicles, including requirement, subsystem interaction, and integration, tradeoffs, constraints and non-technical aspects.
Prerequisite(s): A E 362.

A E 428. Aerospace Capstone Design
3 Credits (3+2P)
Team Project-analysis, design, hands-on build test, evaluate.
Prerequisite(s)/Corequisite(s): A E 447. Prerequisite(s): A E 363 and A E 424.
A E 439. Aerodynamics II
3 Credits (3)
Principles of compressible flow, momentum and energy conservation; thermal properties of fluids; supersonic flow and shock waves; basics of supersonic aerodynamics.
Prerequisite(s): A E 339, M E 240, and M E 328.

A E 447. Aerofluids Laboratory
3 Credits (2+3P)
Use of subsonic wind tunnels and other flow to study basic flow phenomena and methods of fluid measurement and visualization.
Prerequisite(s)/Corequisite(s): A E 439. Prerequisite(s): M E 345.

A E 451. Aircraft Design
3 Credits (3)
Conceptual design of aircraft based on existing designs, empirical relationships, and theory. Dimensioning, structural design, and performance analysis of major subcomponents such as fuselage, wing, and propulsion system. Static stability and control analysis.
Prerequisite(s): A E 339 and A E 363.

A E 452. Control System Design
3 Credits (3)
Introduction to the control of dynamical systems, with a focus on mechanical and aerospace systems, including basic systems theory, controllability / observability, feedback and stabilization, PID controls, root-locus plot, and Bode diagram.
Prerequisite: M E 261, M E 328 and (M E 237 or ENGR 234).

Learning Outcomes
1. Construct a block diagram to find a transfer function for a dynamical system; Analyze control systems by utilizing various linear control theories such as root-locus design method, bode / Nyquist plots, and lead / lag compensation techniques; Design and simulate automatic control systems for mechanical and aerospace engineering applications.

A E 464. Advanced Flight Dynamics and Controls
3 Credits (3)
Advanced airplane flight dynamics and stability control system design, longitudinal and lateral autopilots, missile/rocket control systems, and guidance systems.
Prerequisite(s): A E 364 or consent of instructor.

A E 509. Individualized Study
3 Credits (3)
Individualized study covering specialized topics in aerospace engineering. Consent of instructor required. Restricted to A E & M E majors.

A E 510. Special Topics
1-6 Credits (1-6)
Topics in aerospace engineering. May be repeated for a maximum of 6 credits. Consent of instructor required.

A E 527. Control of Mechanical Systems
3 Credits (3)
Rigorous introduction to the control of dynamical systems, with a focus on mechanical systems. Includes basic systems theory, controllability, feedback and stabilization, observers and dynamic feedback, and applications of methods to systems of importance in mechanical engineering. Consent of instructor required. Cross-listed with: M E 527

A E 564. Advanced Flight Dynamics and Controls
3 Credits (3)
Advanced airplane flight dynamics and stability control system design, longitudinal and lateral autopilots, missile / rocket control systems, and guidance systems May be repeated up to 3 credits.
Prerequisite(s): A E 364 or consent of instructor.

A E 598. Special Research Programs
1-3 Credits (1-3)
Individual investigations, either analytical or experimental. May be repeated for a maximum of 6 credits. Restricted to A E & M E majors.

A E 599. Master's Thesis
1-15 Credits (1-15)

A E 600. Doctoral Research
1-15 Credits (1-15)
This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination. Graded: Thesis/Dissertation.
A E 700. Doctoral Dissertation
15 Credits (15)

Mechanical Engineering Courses

M E 159. Graphical Communication and Design
2 Credits (1+3P)
Sketching and orthographic projection. Covers detail and assembly working drawings, dimensioning, tolerance specification, and design projects.
Prerequisite(s)/Corequisite(s): MATH 1250G.

M E 210. Electronics and System Engineering
3 Credits (2+3P)
Introduction to microcontrollers, measurement systems, motion actuators, sensors, electric circuits, and electronic devices and interfacing. Students required to work individually and in teams to design and test simple electromechanical systems. Restricted to Las Cruces campus only.
Prerequisite: MATH 1521G or MATH 1521H or ENGR 190.

Learning Outcomes
1. Ability to apply knowledge of mathematics, science, and engineering;
2. Ability to design and conduct experiments, as well as to analyze and interpret data;
3. Ability to design a system, component or process to meet desired needs within realistic constraints;
4. Ability to identify, formulate, and solve engineering problems;
5. Ability to use the techniques, skills and modern tools necessary for engineering practice.

M E 222. Introduction to Product Development
3 Credits (2+3P)
Introduction to modern methods used in the realization of products. Traditional manufacturing processes, such as metal stamping, turning, milling, and casting are reviewed. Modern methods of rapid prototyping and model making are discussed in context of computer-aided design. Techniques for joining metals, plastics, and composites are discussed. Role of quality control is introduced. May be repeated up to 3 credits. Restricted to: exclude majors.
Prerequisite(s): M E 159 or E T 110.

M E 228. Engineering Analysis I
3 Credits (3)
Introduction to engineering analysis with emphasis on engineering applications. Topics include ordinary differential equations, linear algebra, and vector calculus with focus on analytical methods. Restricted to Las Cruces campus only.
Prerequisite(s): MATH 2530G.

M E 234. Mechanics-Dynamics
3 Credits (3)
Kinematics and dynamic behavior of solid bodies utilizing vector methods.
Prerequisite(s)/Corequisite(s): MATH 2530G. Prerequisite(s): C E 233.

M E 236. Engineering Mechanics I
3 Credits (3)
Force systems, resultants, equilibrium, distributed forces, area moments, friction, and kinematics of particles. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): PHYS 1310G. Prerequisite(s): MATH 1521G or MATH 1521H.

M E 237. Engineering Mechanics II
3 Credits (3)
Kinetics of particles, kinematics and kinetics rigid bodies, systems of particles, energy and momentum principles, and kinetics of rigid bodies in three dimensions. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 2530G. Prerequisite(s): M E 236.

M E 240. Thermodynamics
3 Credits (3)
First and second laws of thermodynamics, irreversibility and availability, applications to pure substances and ideal gases.
Prerequisite: PHYS 1310G.
M E 261. Mechanical Engineering Problem Solving
3 Credits (2+3P)
Introduction to programming syntax, logic, and structure. Numerical techniques for root finding, solution of linear and nonlinear systems of equations, integration, differentiation, and solution of ordinary differential equations will be covered. Multi function computer algorithms will be developed to solve engineering problems.
Prerequisite: MATH 1521G or MATH 1521H or ENGR 190.
Learning Outcomes
1. Ability to apply knowledge of mathematics, science, and engineering;
2. Ability to identify, formulate, and solve engineering problems;
3. Ability to use the techniques, skills and modern tools necessary for engineering practice.

M E 326. Mechanical Design
3 Credits (3)
Design methodology and practice for mechanical engineers.
Prerequisite: (M E 237 or ENGR 234) and C E 301.
Learning Outcomes
1. Ability to design a system, component or process to meet desired needs within realistic constraints;
2. Ability to function on multidisciplinary teams;
3. Understanding of professional and ethical responsibility;
4. Knowledge of contemporary issues.

M E 328. Engineering Analysis II
3 Credits (3)
Advanced engineering analysis with emphasis on engineering applications. Topics include systems of ordinary differential equations, Fourier analysis, partial differential equations, and functions of complex variable with focus on analytical methods. May be repeated up to 3 credits.
Prerequisite(s): M E 228.

M E 331. Intermediate Strength of Materials
3 Credits (3)
Covers stress and strain, theories of failure, curved flexural members, flat plates, pressure vessels, buckling, and composites. May be repeated up to 3 credits.
Prerequisite(s): C E 301 and M E 328.

M E 332. Vibrations
3 Credits (3)
Vibration of single and n-degree of freedom systems considering free, forced, and damped motion. Lagrange s equations. Dynamic stability. Controls. Matrix iteration. May be repeated up to 3 credits.
Prerequisite(s): M E 328, M E 237, and M E 261.

M E 333. Intermediate Dynamics
3 Credits (3)
Three dimensional kinematics and kinetics, orbital motion, Lagrange s equations, dynamic stability, and controls. May be repeated up to 3 credits.
Prerequisite(s): M E 328 and M E 237.

M E 338. Fluid Mechanics
3 Credits (3)
Properties of fluids. Fluid statics and fluid dynamics. Applications of the conservation equations continuity, energy, and momentum to fluid systems. Restricted to: M E majors.
Prerequisite: (M E 237 or ENGR 234) and (M E 228 or PHYS 395).
Learning Outcomes
1. Ability to apply knowledge of mathematics, science, and engineering;
2. Ability to design and conduct experiments, as well as to analyze and interpret data;
3. Ability to design a system, component or process to meet desired needs within realistic constraints;
4. Ability to identify, formulate, and solve engineering problems.

M E 340. Applied Thermodynamics
3 Credits (3)
Thermodynamic cycles, Maxwell relations, Gibbs and Helmholtz functions, mixtures, psychometrics, chemical reactions, chemical equilibrium.
Prerequisite: M E 240.
M E 341. Heat Transfer
3 Credits (3)
Fundamentals of conduction, convection, and radiation. Design of heat transfer systems.
Prerequisite: M E 240, (M E 338 or A E 339), and (M E 228 or PHYS 395).

Learning Outcomes
1. Students have the ability to apply knowledge of mathematics, science, and engineering;
2. Students have the ability to identify, formulate, and solve engineering problems.

M E 345. Experimental Methods I
3 Credits (2+3P)
Emphasis on experimental techniques, basic instrumentation, data acquisition and analysis, and written presentation of results. Includes experiments in dynamics and deformable body mechanics.
Prerequisite: (M E 228 or PHYS 395), (M E 210 or PHYS 2140), and (M E 237 or ENGR 234).
Prerequisite/Corequisite: C E 301.

Learning Outcomes
1. Ability to design and conduct experiments, as well as to analyze and interpret data;
2. Ability to communicate effectively;
3. Ability to use the techniques, skills and modern tools necessary for engineering practice.

M E 349. MAE Career Seminar
1 Credit (1)
Seminar course covering topics relevant to mechanical and aerospace engineering juniors (job placement, interviewing techniques, resume preparation, etc.). Restricted to: M E and A E majors.
Prerequisite(s): Junior Standing.

M E 400. Undergraduate Research
1-3 Credits
Performed with the direction of a department faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of faculty member.

M E 401. Heating/Air-Conditioning System
3 Credits (3)
HVAC system design including heating and cooling load calculations, psychometrics, piping, duct layout, and system control. May be repeated up to 3 credits.
Prerequisite(s): M E 340 and M E 341.

M E 405. Special Topics
3 Credits (3)
Topics of modern interest to be offered by the departmental staff. May be repeated up to 12 credits.
Prerequisite(s): Senior standing.

M E 425. Design of Machine Elements
3 Credits (3)
Design of machine elements through the application of mechanics. Fatigue and theories of failure. Design projects assigned.
Prerequisite(s): M E 326.

M E 426. Design Project Laboratory I
3 Credits (6P)
Students address a design problem in which innovation and attention to detail are emphasized. Solution of the problem entails applications of mechanics and/or the thermal sciences.
Prerequisite(s)/Corequisite(s): M E 425.

M E 427. Design Project Laboratory II
3 Credits (6P)
Continuation of M E 426.
Prerequisite: M E 426.

M E 445. Experimental Methods II
3 Credits (2+3P)
Emphasis on experimental techniques, instrumentation and data acquisition in fluid mechanics, heat transfer, and thermodynamics. Laboratory results will be presented in written and verbal formats.
Prerequisite(s): (M E 338 or A E 339), M E 340, M E 341, and M E 345.
ME 449. Mechanical Engineering Senior Seminar
1 Credit (1)
Senior seminar course covering topics relevant to graduating mechanical engineering seniors (job placement, interviewing techniques, resume preparation).
**Prerequisite:** senior standing.

ME 452. Control System Design
3 Credits (3)
Introduction to the control of dynamical systems, with a focus on mechanical and aerospace systems, including basic systems theory, controllability / observability, feedback and stabilization, PID controls, root-locus plot, and Bode diagram.
**Prerequisite:** M E 261, M E 328 and (M E 237 or ENGR 234).

**Learning Outcomes**
1. Construct a block diagram to find a transfer function for a dynamical system; Analyze control systems by utilizing various linear control theories such as root-locus design method, bode / Nyquist plots, and lead / lag compensation techniques; Design and simulate automatic control systems for mechanical and aerospace engineering applications.

ME 456. Experimental Modal Analysis
3 Credits (3)
Emphasis on hands-on techniques for structural vibration tests for practical applications. Interpretation of experimental results by means of advanced signal processing tools, basic system identification methodology, and reduced-order modeling procedures. May be repeated up to 3 credits.
**Prerequisite(s):** M E 332, M E 228, and M E 261, or consent of instructor.

ME 458. Properties and Mechanical Behavior of Materials
3 Credits (3)
**Prerequisite:** CHME 361.

**Learning Outcomes**
1. Students will learn how to correlate mechanical behavior of materials with their microstructure, processing history and composition. As practicing engineers, they will be able to recognize impact of operating conditions, predict life span, and design materials to improve reliability and efficiency. They will be able to select appropriate materials for a given application from class of materials such as metals, polymers, ceramics and composites.

ME 460. Applied Finite Elements
3 Credits (3)
Introduction to the practical aspects of structural finite element modeling. Course focuses on providing a working knowledge of how to effectively incorporate finite element techniques into the design process. May be repeated up to 3 credits. Crosslisted with: M E 518.
**Prerequisite(s):** M E 425.

ME 481. Alternative and Renewable Energy
3 Credits (3)
Current and future energy needs of the United States and the world will be considered primarily from the standpoint of renewable energy sources such as solar, wind, ocean, and biomass. Technical, economic, and environmental aspects of each technology will be addressed.
**Prerequisite(s):** M E 341, and (M E 338 or A E 339).

ME 486. Introduction to Robotics
3 Credits (3)
This course provides students with an introduction to the theories and methods for analysis, design, and control of robotic manipulators. This course is devoted to understanding the spatial descriptions and transformations, kinematics, and dynamics of these mechanisms and how to practically implement these concepts into actual robotic manipulators.
**Prerequisite:** M E 328 and (ENGR 234 or M E 237).

**Learning Outcomes**
1. Model and analyze the kinematics and dynamics of robotic manipulators; Program and control these robotic platforms; Apply the theoretical methods into industrial robots; Implement the knowledge and experiences in real-world engineering projects.

ME 487. Mechatronics
3 Credits (2+3P)
Introduction to the analysis and design of computer-controlled electromechanical systems, including data acquisition and conversion, force and motion sensors, actuators, mechanisms, feedback control, and robotic devices. Students required to work in teams to construct and test simple robotic systems. May be repeated up to 3 credits.
**Prerequisite(s):** M E 210 and M E 345.
M E 502. Elasticity I  
3 Credits (3)  
Introduction to stress tensor, strain tensor, constitutive law, energy theorems, plane stress and plane strain. Also covers torsion of shafts and propagation of stress waves in elastic solids.

M E 503. Thermodynamics  
3 Credits (3)  
A comprehensive study of the first and second laws of thermodynamics, nonequilibrium processes, equations of state, and statistical thermodynamics.

M E 504. Continuum Mechanics  
3 Credits (3)  
Basic introduction to the Mechanics of Continuous Media. Its aim is to prepare the student for more advanced courses in Solid and Fluid Mechanics. The topics to be covered include: introduction to Cartesian tensors, tensor algebra and calculus; Lagrangian and Eulerian kinematics; Cauchy and Piola-Kirchhoff stresses; general principles of conservation; constitutive theory for ideal fluids, Newtonian and non-Newtonian fluids, finite and linear elasticity.

M E 505. Fundamentals of the Theory of Plasticity  
3 Credits (3)  
Basic concepts in continuum mechanics, equations of the plastic state, equations of elastic-plastic equilibrium, criteria for yielding, initial and subsequent yield surfaces, two-dimensional and axi-symmetric plasticity problems, dynamic problems.  
Prerequisite(s): M E 502.

M E 509. Individualized Study  
3 Credits (3)  
Individualized study covering specialized topics in mechanical and aerospace engineering. Consent of instructor required.

M E 510. Special Topics  
1-6 Credits  
Topics in mechanical engineering. May be repeated for a maximum of 6 credits.  
Prerequisite: consent of the department head.

M E 511. Dynamics  
3 Credits (3)  
An advanced study of the dynamical behavior of systems of particles and rigid bodies, with emphasis on the theoretical background of dynamics.

M E 512. Vibrations  
3 Credits (3)  
Free and forced vibrations for discrete and continuous systems with single or multiple degrees of freedom. Introduction to nonlinear and random vibration and solution techniques for such systems.

M E 517. Nonlinear Dynamics and Chaos  
3 Credits (3)  
Singular points, periodic solutions, stability, and local bifurcations for ODEs and maps; phase space methods, invariant manifolds, and Poincare maps; nonsmooth, periodic, time-delay, and Hamiltonian systems; perturbation, averaging, and harmonic balance methods; center manifold reduction and normal forms; strange attractors, Liapunov exponents, attractor dimension; dissipative and Hamiltonian chaos

M E 518. Finite Element Analysis  
3 Credits (3)  
Introduction to finite element method. Topics include mathematical modeling, variational formulation, shape functions, truss, beam, solid, and shell elements. Includes static, dynamic, and nonlinear analysis. May be repeated up to 3 credits. Crosslisted with: M E 460.

M E 527. Linear Systems Theory  
3 Credits (3)  
Introduction to control of linear multi-input-multi-output (MIMO) systems. Topics include representation of system dynamics using the state-space model, linearization, internal and input-to-output stability, controllability, observability, optimal control, linear quadratic regulator, and observer.  
Prerequisite: (M E 452 or A E 452) equivalent, or consent of instructor.

Learning Outcomes  
1. Students are able to design linear multi-input-multi-output (MIMO) control systems.
M E 529. Nonlinear and Optimal Control
3 Credits (3)
Introduction to nonlinear systems and optimal control theory and its mathematical foundations. Includes equilibrium finding, phase plane analysis, Lyapunov stability theorems, feedback linearization, Pontryagin’s maximum principle, necessary conditions and sufficient conditions for optimality, and optimal control problems in mechanical and aerospace engineering.
Prerequisite: (M E 452 or A E 452) or equivalent or consent of instructor.
Learning Outcomes
1. Analyze the stability and performance properties of nonlinear systems and design nonlinear feedback control systems; Use optimal control theory and numerical optimization methods to solve engineering problems; Design and simulate nonlinear and optimal control systems for mechanical and aerospace engineering applications.

M E 530. Intermediate Fluid Mechanics
3 Credits (3)
Application of exact and empirical solutions to fundamental flow problems, including viscous and inviscid behavior. These applications establish a theoretical basis for the origin and physical role of common terms in the governing equations.

M E 533. Computational and Theoretical Fluid Mechanics
3 Credits (3)
Application of fluid mechanics theory and computational approaches to advanced flow problems, including viscous/inviscid and laminar/turbulent behavior. Complex flow problems addressed through development of a theoretical formulation, followed by application of computational fluid dynamic (CFD) tools, and finally presentation and validation of solution data.
Prerequisite: M E 530 or consent of instructor.

M E 534. Advance Computational Fluid Dynamics
3 Credits (3)
Advanced techniques for large-scale numerical simulations of fluid flows: spectral numerical methods, including Fourier and other expansions, Galerkin and collocation projections, computational methods to solve incompressible and compressible Navier-Stokes equations, high-resolution methods for hyperbolic equations with discontinuous solutions, and issues related to implementation on supercomputers.
Prerequisite(s): M E 533.

M E 536. Hydrodynamic Stability and Turbulence
3 Credits (3)
Introduction to fundamentals of hydrodynamic stability, classical linear stability analysis of parallel shear flows and rotating flows, nonlinear stability, basic concepts in turbulence theory
Prerequisite(s): M E 533.

M E 540. Intermediate Heat Transfer
3 Credits (3)
Fundamentals of conduction, convection, and radiation heat transfer. Emphasis on the application of combined heat transfer to the solution of problems not accessible at the undergraduate level.

M E 558. Properties and Mechanical Behavior of Materials
3 Credits (3)
Prerequisite: CHME 361.

M E 570. Engineering Analysis I
3 Credits (3)
Introduction to engineering analysis with emphasis on engineering applications. Topics include linear algebra, linear ordinary differential equations, and linear partial differential equations with focus on analytical methods.

M E 580. Engineering Analysis II
3 Credits (3)
Engineering analysis with emphasis on engineering applications. Topics include analytical and numerical methods in linear and nonlinear ordinary and partial differential equations.
Prerequisite: M E 570 or consent of instructor.

M E 586. Introduction to Robotics
3 Credits (3)
This course provides students with an introduction to the theories and methods for analysis, design, and control of robotic manipulators. This course is devoted to understanding the spatial descriptions and transformations, kinematics, and dynamics of these mechanisms and how to practically implement these concepts into actual robotic manipulators.
Prerequisite: M E 328 and (ENGR 234 or M E 237).
**M E 587. Mechatronics**  
3 Credits (2+3P)  
Introduction to the analysis and design of computer-controlled electromechanical systems, including data acquisition and conversion, force and motion sensors, actuators, mechanisms, feedback control, and robotic devices. Students required to work in teams to construct and test simple robotic systems. Crosslisted with: M E 487.

**M E 598. Special Research Programs**  
1-3 Credits  
Individual investigations, either analytical or experimental. May be repeated for a maximum of 6 credits.

**M E 599. Master's Thesis**  
15 Credits  
Thesis.

**M E 600. Doctoral Research**  
1-15 Credits  
This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

**M E 698. Special Research Programs**  
1-3 Credits  
May be repeated for a maximum of 6 credits.

**M E 700. Doctoral Dissertation**  
15 Credits  
Dissertation.

### Aerospace Engineering - Bachelor of Science in Aerospace Engineering

The aerospace engineering program prepares students for a range of professional engineering careers in aerospace and related professions. The aerospace engineering curriculum covers the important classical areas of low and high speed aerodynamics, propulsion, orbital mechanics, flight mechanics and control, aerospace structures and laboratory practice. In addition, the principles of systems engineering and design that are necessary to conceive, design, analyze and troubleshoot complex engineering systems are covered extensively and are considered to be especially important in the overall educational experience. Students will also be encouraged to participate in significant non-classroom experiences, including:

- co-ops and internships;
- industrial and laboratory field trips;
- guest speakers from outside NMSU;
- the New Mexico Space Grant Program;
- special seminar programs on current topics in aerospace.

Aerospace engineers find employment in areas of launch vehicles, space vehicles and missions, aircraft systems design, land and sea vehicle design, robotics and automated manufacturing, safety and other areas. The aerospace engineering background also allows graduates to pursue careers in non-aerospace fields of engineering. Graduates of the aerospace engineering program will be prepared to apply the following skills to problems of interest either in the industry or research and development:

- engineering sciences,
- mathematics,
- computational methods,
- modern experimental methods,
- effective communication skills and
- systems engineering principles.

The aerospace engineering program is also intended to prepare students to pursue graduate study, which can be of significant benefit in the aerospace profession. The general goals of the aerospace engineering program, as well as the program educational objectives, are the same as those stated above for the mechanical engineering program.
Requirements (121 Credits)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 121 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

In addition to the NMSU and College of Engineering requirements for graduation, a student must obtain a minimum grade of C- in all math, science, and engineering courses applied toward their B.S. in AE and/or ME minor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Requirements (121 Credits)

In addition to the NMSU and College of Engineering requirements for graduation, a student must obtain a minimum grade of C- in all math, science and engineering courses applied toward their B.S in ME and/or AE minor.

### Mechanical Engineering - Bachelor of Science in Mechanical Engineering

The mechanical engineering program prepares students for a wide range of professional engineering careers in such areas as: research and development; design; facilities operation and maintenance; management; and production. Graduates of the program will be prepared to apply engineering sciences, mathematics, computational methods, modern experimental methods, and effective communication skills to problems of interest in industry as well as government or scholarly topics. Employment opportunities for graduates are extensive. These opportunities include: energy and utility; manufacturing; automotive; aerospace; defense and space; research and development; and many others. The emphasis in the curriculum is on engineering sciences (solid mechanics, thermal sciences, fluid mechanics and materials science); mathematics; engineering analysis; engineering design; general sciences; and communication balanced with general education topics and electives. Graduates of the program will also be prepared for graduate studies (subject to grade-point and standardized test qualifications). Students will be prepared to take the fundamentals of engineering examination (and are encouraged to do so) as a step towards professional registration.
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 121 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

1. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.

2. See General Education (p. 123) section in the catalog for a full list of courses.

3. See Viewing a Wider World (p. 130) section in the catalog for a full list of courses.
### Mechanical Engineering - Undergraduate Minor

#### Math and Science
- **MATH 1511G**: Calculus and Analytic Geometry I (4 credits)
- **MATH 1521G**: Calculus and Analytic Geometry II (4 credits)
- **MATH 2530G**: Calculus III (3 credits)
- **PHYS 1310G**: Calculus-Based Physics I (3 credits)

#### Required Engineering
- **C E 301**: Mechanics of Materials (3 credits)
- **M E 240**: Thermodynamics (3 credits)
- **ENGR 233**: Engineering Mechanics I (3 credits)
- **ENGR 234**: Engineering Mechanics II (3 credits)
- **M E 328**: Engineering Analysis II (3 credits)
- **M E 338**: Fluid Mechanics (3 credits)
- **M E 425**: Design of Machine Elements (3 credits)

#### Technical Elective
Select one from the following:
- **M E 452**: Control System Design
- **M E 456**: Experimental Modal Analysis
- **M E 460**: Applied Finite Elements
- **M E 481**: Alternative and Renewable Energy
- **M E 487**: Mechatronics

#### Total Credits
38

Technical Electives cannot be used to satisfy BSME Engineering elective requirement.

### Aerospace Engineering - Master of Engineering in Aerospace Engineering

#### Coursework Option

#### Requirements
- **M E 570**: Engineering Analysis I (3 credits)

#### Core Courses
Select one course from each of the following 4 topic areas: 12

**Aerodynamics**
- Select one from the following:
  - **M E 530**: Intermediate Fluid Mechanics
  - **M E 533**: Computational and Theoretical Fluid Mechanics

**Structural Dynamics and Control**
- Select one from the following:
  - **M E 512**: Vibrations
  - **A E 527**: Linear Systems Theory

**Mechanics**
- Select one from the following:
  - **M E 502**: Elasticity I
  - **M E 504**: Continuum Mechanics

**Engineering Analysis**
- Select one from the following:
New Mexico State University - Las Cruces

M E 518 Finite Element Analysis
M E 580 Engineering Analysis II

Additional Requirements
Select 4 additional A E courses (500 level or above) from the following: 1
12
Core Courses listed above
Research Area Courses
A E 509 Individualized Study
A E 510 Special Topics
Select one course (500 level or above) from related areas 2
3

Total Credits 30

1 Graduate M E courses may be substituted for A E courses with the approval of the Graduate Program Coordinator.
2 If course is not in A E or M E program, approval of the Graduate Program Coordinator is required.

Selection of Permanent Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester, but they must select a degree option and permanent advisor before registering for the second semester.

In considering a decision about option and advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of study to discuss specific educational objectives. The student can use these meetings to become familiar with faculty interests and research projects currently in progress. The faculty member must agree (in writing) to serve as the student's advisor.

All students must pass a final examination. The final examination is to be conducted by the student's advisory committee and is taken after completing all coursework.

**Publication Requirement:** a refereed conference paper accepted or a refereed journal article in review or accepted by graduation. The M.S. thesis can be a reformatted version of this paper. Exceptions may be made on a case by case basis by the department head.

**Selection of Permanent Advisor**

Newly admitted graduate students will be assigned a temporary advisor for the first semester, but they must select a degree option and a permanent advisor before registering for the second semester.

When considering a decision about a degree option and an advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of study to discuss specific educational objectives. The student can use these meetings to become familiar with faculty interests and research projects currently in progress. The faculty member must agree (in writing) to serve as the student's advisor.

All students must pass a final examination. The final examination is to be conducted by the student's advisory committee and is taken after completing all thesis work.

**Aerospace Engineering - Doctor of Philosophy**

The student's academic program is not judged satisfactory unless it prepares the student to contribute to the advancement of knowledge in the field of Aerospace Engineering. The degree of Doctor of Philosophy is indicative of distinguished achievement in the areas of scholarship and original research. Therefore, a dissertation of high quality is required of all doctoral students in Aerospace Engineering. Students must follow the degree requirements listed below to complete the Ph.D. course of study.

- A minimum of 36 credit hours of coursework (500 level or above) beyond the Bachelor of Science degree, at least 18 of which must support the student's research area.
- A minimum of 24 credit hours of research, A E 700 Doctoral Dissertation, which may include a maximum of 6 credit hours of A E 600 Doctoral Research. A E 600 Doctoral Research is intended for those students who have not completed the qualification examination, a prerequisite for A E 700 Doctoral Dissertation.
- A student is required to have one refereed journal paper accepted and a second one accepted or in review by graduation. The Ph.D. dissertation can be a compilation and reformatted version of these published or accepted journal papers. Exceptions may be made on case by case basis by the Department Head.

**Ph.D. Program Transfer Credits**

A student who has completed a Master of Science degree in M E, A E, or a closely related field may transfer up to 24 credits of graduate coursework, approved by the student's advisor, into a Ph.D. program of study.

**Selection of Permanent Ph.D. Advisor**

Newly admitted graduate students will be assigned a temporary advisor for the first semester. The student must select a permanent advisor before registering for the second semester. In selecting a permanent advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of enrollment to discuss specific objectives. The student should use these meetings to become familiar with faculty research interests and research projects currently in progress. The faculty member must consent (in writing) to serve as the student's advisor.

Policies governing the Ph.D. written qualifying examination, the Ph.D. written and oral comprehensive examination, the student’s Ph.D. committee, and the Ph.D. dissertation are contained in the department's Graduate Program website.

**Additional Requirements**

Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

- **Paper #1:** An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student’s doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.
Engineering (Mechanical Engineering) - Doctor of Philosophy

The student's academic program is not judged satisfactory unless it prepares the student to contribute to the advancement of knowledge in the field of Mechanical Engineering. The Degree of Doctor of Philosophy is indicative of distinguished achievement in the areas of scholarship and original research. Therefore, a dissertation of high quality is required of all doctoral students in Mechanical Engineering. Students must follow the degree requirements listed below to complete the Ph.D. course of study.

- A minimum of 36 credit hours of coursework (500 level or above) beyond the Bachelor of Science degree, at least 18 of which must support the student's research area.
- A minimum of 24 credit hours of research, M E 700 Doctoral Dissertation, which may include a maximum of 6 credit hours of M E 600 Doctoral Research. M E 600 Doctoral Research is intended for those students who have not completed the qualification examination, a prerequisite for M E 700 Doctoral Dissertation.
- A student is required to have one refereed journal paper accepted and a second one accepted or in review by graduation. The Ph.D. dissertation can be a compilation and reformatted version of these published or accepted journal papers. Exceptions may be made on case by case basis by the Department Head.

Ph.D. Program Transfer Credits

A student who has completed a Master of Science degree in M E, A E, or a closely related field may transfer up to 24 credits of graduate coursework, approved by the student's advisor, into a Ph.D. program of study.

Selection of Permanent Ph.D. Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester. The student must select a permanent advisor before registering for the second semester. In selecting a permanent advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of enrollment to discuss specific objectives. The student should use these meetings to become familiar with faculty research interests and research projects currently in progress. The faculty member must consent (in writing) to serve as the student's advisor.

Policies governing the Ph.D. written Qualifying Examination, the Ph.D. written and oral comprehensive examination, the student's Ph.D. committee, and the Ph.D. dissertation are contained in the department's Graduate Program website.

Additional Requirements

Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifying Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

College of Health, Education and Social Transformation

Interim Dean - Henrietta Williams Pichon
Interim Associate Dean for Academic Affairs - Phillip Post
Interim Associate Dean for Academic Affairs - Teresa Keller
Interim Associate Dean for Research - Jill McDonald
Interim Associate Dean for Research - TBD
Co-Director of Research Operations and Fiscal & Data Management - Juanita Hannan
Co-Director of Research Operations and Fiscal & Data Management - Aida Lopez
Coordinator, Educational Support and Resource Center-Margo Trevino-Torres
Coordinator of Student and Academic Programs - Patrick Mendoza
The College of Health, Education, and Social Transformation (HEST) was established in 2021 to serve students, faculty, and staff whose efforts are aimed at improving individual, societal, and policy outcomes. The college was formed by combining the previous College of Education and College of Health and Social Services, as well as the Department of Sociology from the College of Arts & Sciences. We offer stackable credentials, certificates, and degrees in the following areas: Communication disorders; counseling and educational psychology; kinesiology; nursing; public health; social work; sociology; and teacher preparation, administration, and leadership (TPAL).

General Undergraduate Requirements

1. Complete at least 120 - 132 acceptable credits, including a minimum of 48 credits in courses numbered 300 or above. NMSU Viewing the Wider World (VWW) classes are included in the 48-credit hour requirement.
2. Minimum GPA varies per degree program. Please refer to your department/school for application, admission, and/or program GPA requirements. Each department has information about minimum GPA, program prerequisites, and program-specific testing requirements. Application to a HEST program does not automatically end in acceptance.
3. Satisfy New Mexico general education requirements. Detailed degree maps, program information, and curricula are available in the HEST Undergraduate Resource Center and the Center for Academic Advising and Support Services (CAASS).
4. Students must complete all professional education courses and all courses in their teaching field or major degree with a grade of C- or better.
5. All students, including transfer students, must complete the last 30 semester credits required for the baccalaureate degree within the New Mexico State University system. The four-year Servicemen’s Opportunity College Program students are not exempt from this regulation.
6. Students in teacher preparation programs (including secondary education minors), Nursing, Social Work, and Public Health must apply and be accepted into these programs based on a set of prerequisites and a competitive admission process. For information about these application and admission processes, please refer to each department’s information in this catalog.
7. In addition, if department faculty at any time determine that a student is performing below expected program standards in a particular skill, that department may require that a plan for remediation be developed to promote student success.

General Education Requirements (non-teacher education programs)

1. Nine-ten credits in General Education Area I: Communication
2. Three credits in General Education Area II: Mathematics
3. Four credits in General Education Area III: Laboratory Science
4. Three credits from General Education Area IV: Social/Behavioral Sciences
5. Three-four credits from either General Education Area III: Laboratory Science or Area IV: Social/Behavioral Sciences
6. Three credits in General Education Area V: Humanities
7. Three credits in General Education Area VI: Creative and Fine Arts
8. Three-four additional credits from a General Education Elective (excluding Area I: Communications and cross-listed courses)

General Education Requirements (teacher education programs)

1. Nine-ten credits in General Education Area I: Communication
2. Six credits in General Education Area II: Mathematics
3. Eight credits in General Education Area III: Laboratory Science
4. Nine credits from General Education Area IV: Social/Behavioral Sciences
5. Nine credits from General Education Area V: Humanities and Area VI: Creative and Fine Arts

HEST department programs may require more credit hours or additional courses specific to the major. Check the departmental pages for degree requirements in each program of study.

While the ultimate responsibility for planning an academic program in compliance with university, college, and departmental requirements rests with the student, the College recognizes the importance of sound and accessible advising for academic programs. Students formally admitted to a HEST major are provided academic advising within the department of that major. Students not formally admitted to a program of professional studies are advised by CAASS.

Transferring Undergraduate Courses

Certain courses within the curricula offered by HEST programs have been identified as transferable from NMSU to other public two-year and four-year institutions in New Mexico. The equivalent course at other institutions can be identified using the common course number. Similarly, students from other institutions can use the common course number to identify education courses that can be transferred to NMSU.

The School of Nursing offers the New Mexico Nursing Education Consortium (NMNEC) state-wide.
Preprofessional Programs

NMSU offers a number of programs designed for transfer to professional schools through its undergraduate colleges. The programs that are administered by the HEST are Pre-Nursing, Pre-Social Work, Pre- Public Health Sciences. Students new to NMSU, or who are working toward completion of their respective departmental pre-requisites are able to declare a pre-professional major in HEST. Once pre-requisites have been satisfied, an application process is required specific to each major. Application details and requirements are available through the "Academic Departments" link on the HEST website (http://health.nmsu.edu), and also through the Central Advising Center (CAASS).

Graduate Work

HEST offers curricula leading to the degrees of

- Master of Arts,
- Master of Science,
- Specialist in Education,
- Doctor of Education
- Doctorate of Nursing Practice,
- Doctor of Philosophy.

Those interested in pursuing graduate degrees should consult the Graduate Catalog for full information at https://catalogs.nmsu.edu/nmsu/graduate-school/

Bachelor Degrees

Bachelor of Applied Studies

Majors in:

- Zero to Four (Early Childhood) (p. 1651)

Bachelor of Arts

Major in

- Sociology (p. 1768)
- Sociology (Online) (p. 1771)

Bachelor of Arts in Dance

Major in:

- Dance
  - DanceSport (p. 1527)

Bachelor of Public Health

Bachelor of Public Health (Online)

Bachelor of Science

Major in:

- Educational Leadership (p. 1658)

Bachelor of Science in Counseling and Community Psychology (p. 1467)

Bachelor of Science in Counseling and Community Psychology (Online) (p. 1471)

Bachelor of Science in Education

Majors in:

- Communication Disorders (p. 1489)
- Early Childhood Education (p. 1654)
- Elementary Education (plus Bilingual and/or TESOL Endorsement)
• Language Arts K-8 (p. 1660)
• Math K-8 (p. 1663)
• Science K-8 (p. 1666)
• Social Studies K-8 (p. 1668)

• Secondary Education (with concentrations also known as teaching fields) in:
  • Secondary Education General Science (p. 1670)
  • Secondary Education Language Arts (p. 1674)
  • Secondary Education Math (p. 1678)
  • Secondary Education Social Studies (p. 1682)

• Special Education
  • Special Education (Elementary Education) (p. 1685)
  • Special Education (Secondary Education) (p. 1688)

**Bachelor of Science in Kinesiology**

Major in:

• Kinesiology
  • Exercise Science (p. 1532)
  • Performance Psychology (p. 1535)
  • Physical Education (p. 1538)

**Bachelor of Science in Nursing**

**Bachelor of Social Work**

**Masters Degrees**

**Master of Arts**

Majors in:

• Clinical Mental Health Counseling (p. 1475)
• Communication Disorders (p. 1492)
• Education
  • Bilingual Education (p. 1705)
  • Curriculum & Instruction (p. 1705)
  • Curriculum & Instruction (Online) (p. 1711)
  • Early Childhood Education (p. 1714)
  • Educational Learning Technologies (p. 1715)
  • Educational Learning Technologies (Online) (p. 1716)
  • Elementary Mathematics and Science (p. 1717)
  • Language, Literacy & Culture (p. 1717)
  • Language, Literacy & Culture (Online) (p. 1718)
  • Teaching English Speakers of Other Languages (p. 1719)
• Educational Leadership & Administration
  • Master's Higher Education Administration (p. 1720)
  • Master's Higher Education Administration (Online) (p. 1721)
  • Master's Pk-12 Administration (p. 1723)
  • Master's Pk-12 Administration (Online) (p. 1724)
• Sociology (p. 1774)
• Sociology (Online) (p. 1775)
• Special Education (p. 1726)
• Special Education (Online) (p. 1728)

**Master of Arts in Teaching**

Majors in:
• Spanish (p. 1719)

Master of Public Health

Major in:

• Public Health
  • Health Behavior and Health Promotion (p. 1597)
  • Health Behavior and Health Promotion (Online) (p. 1599)
  • Health Management, Administration, & Policy (p. 1601)
  • Health Management, Administration & Policy (Online) (p. 1603)

Master of Science

Major in:

• Athletic Training (p. 1543)
• Clinical Psychopharmacology (p. 1476)
• Clinical Psychopharmacology (Online) (p. 1476)

Master of Science in Nursing - Nursing Leadership & Administration (Online)

Master of Social Work

Master of Social Work (Online)

Specialist in Education:

• School Psychology (p. 1479)

Dual Degrees

Master of Public Health/ Master of Social Work (p. 1605)

Doctoral Degrees

Doctor of Education

Major in:

• Educational Leadership & Administration
  • Dr. Education Higher Education Administration (p. 1730)
  • Dr. Education Pk-12 Administration (p. 1731)

Doctor of Nursing Practice

Major in:

• Nursing Practice (Online) (p. 1577)
  • Family Nurse Practitioner (Online) (p. 1577)
  • Population Health Leadership (Online) (p. 1578)
  • Psychiatric/Mental Health (Online) (p. 1579)

Doctor of Philosophy

Major in:

• Counseling Psychology (p. 1477)
• Curriculum and Instruction (p. 1732)
  • Bilingual/TESOL (Option)
  • Critical Pedagogies (Option)
  • Early Childhood Education (Option)
  • Language, Literacy & Culture (Option)
  • Educational Learning Technologies
  • Special Education (Option)
• Curriculum and Instruction (Online) (p. 1733)
• Bilingual/TESOL (Option)
• Critical Pedagogies (Option)
• Early Childhood Education (Option)
• Language, Literacy & Culture (Option)
• Educational Learning Technologies
• Special Education (Option)
• Educational Leadership & Administration
  • Dr. Philosophy Higher Education Administration (p. 1734)
  • Dr. Philosophy Pk-12 Administration (p. 1736)
• Kinesiology (p. 1545)
• School Psychology (p. 1478)

Graduate Certificates
• Autism & Spectrum Disorders (p. 1739)
• Autism & Spectrum Disorders (Online) (p. 1739)
• Bilingual Education (Online) (p. 1739)
• Early Childhood Education Alternative Licensure (Online) (p. 1739)
• Elementary Education Alternative Licensure (p. 1740)
• Family Nurse Practitioner - Post-Masters Certificate (Online) (p. 1581)
• Online Teaching & Learning Technologies (p. 1740)
• Online Teaching & Learning Technologies (Online) (p. 1741)
• Principal Licensure - Graduate Certificate (p. 1742)
• Psychiatric/Mental Health Nurse Practitioner - Post-Master Certificate (Online) (p. 1582)
• Public Health - Graduate Certificate (p. 1605)
• Public Health - Graduate Certificate (Online) (p. 1605)
• Secondary Education Alternative Licensure (p. 1742)
• Special Education Alternative Licensure (p. 1743)
• Teaching English to Speakers of Other Languages (Online) (p. 1744)

Undergraduate Minors
• Africana Studies (p. 1702)
• Counseling and Educational Psychology (p. 1474)
• Dance (p. 1541)
• Early Childhood Education (p. 1703)
• Educational Leadership and Administration (p. 1703)
• Exercise Science (p. 1543)
• Gerontology (p. 1596)
• Public Health Sciences (p. 1597)
• Secondary Education (p. 1704)
• Sociology (p. 1776)
• U.S.-Mexico Border Health Issues (p. 1597)

Graduate Minors
• Educational Administration (Higher Education) (p. 1738)
• Educational Administration (Pk-12) (p. 1738)
• Educational Administration (Doctoral) (p. 1738)
• Gerontology (p. 1606)
• Integrated Behavioral Health Care (p. 1480)
• Spanish Counseling (p. 1481)
• Special Education (p. 1738)
• U.S.-Mexico Border Health Issues (p. 1606)
Accreditation
The programs offered by HEST provides undergraduate students that combines a broad general education with an emphasis on professional preparation in a variety of disciplines. These programs are nationally accredited while some require approval by the State of New Mexico. These programs include:

Teacher Preparation: The university’s teacher preparation program, which involves several colleges and which is directed by the College Health, Education, and Social Transformation, was re-accredited in 2018 by the Council for the Accreditation of Education Preparation Programs (CAEP). The undergraduate and graduate programs that prepare individuals for licensure to work in public and private schools in New Mexico have been approved by the New Mexico State Public Education Department.

Counseling and Educational Psychology: The Master of Arts (MA) in Clinical Mental Health Counseling, accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP); the Specialist in Education (Ed. S.) in school psychology, accredited by the National Association of School Psychologists (NASP) and the doctoral (Ph. D.) program in counseling psychology accredited by the American Psychological Association (APA). The post-doctoral program in Clinical Psychopharmacology holds APA designation.

Health and Social Services: The baccalaureate degree program in the School of Nursing is accredited by the Commission of Collegiate Nursing Education (CCNE). The undergraduate program in Nursing is approved by the New Mexico Board of Nursing.

The baccalaureate degree program in the School of Social Work is accredited by the Council on Social Work Education (CSWE). The Bachelor of Public Health and Masters of Public Health degree programs in the Department of Public Health Sciences are accredited by the Council on Education for Public Health (CEPH).

The Communication Disorders master’s program in Speech-Language Pathology is accredited by the American Speech-Language-Hearing Association (CAA - ASHA).

The undergraduate Athletic Training Degree in Kinesiology is accredited by the Commission on Accreditation of Athletic Training Education (CAATE).

Counseling and Education Psychology
Undergraduate Program Information
The Bachelor of Science (B.S.) in Counseling and Community Psychology (CCP) prepares students to work at the bachelors level with a focus on case management, interpersonal skills, understanding human behavior, multicultural awareness, awareness of mental health issues and licensure as a substance abuse counselor. The Counseling and Community Psychology undergraduate major prepares students for graduate school in order to become practitioners in the field of psychology with an additional focus on research and graduate psychology practice opportunities.

Graduate Program Information
The major thrust of the Counseling and Educational Psychology (CEP) Department is the preparation of personnel for work in counseling, educational diagnostics, school psychology, counseling psychology and related areas. Four graduate degrees are available:

1. Masters of Arts (M.A.) in Clinical Mental Health Counseling
2. Specialist in Education (Ed.S.) in School Psychology
3. Doctor of Philosophy (Ph.D.) in Counseling Psychology
4. Doctor of Philosophy (Ph.D.) in School Psychology
5. Postdoctoral Masters of Science (M.S.) in Clinical Psychopharmacology

Departmental Admission Requirements
Admission requirements and procedures are specific to each degree program in the Department of Counseling and Educational Psychology. Applicants must meet the basic admission requirements of the Graduate School before they are considered for admission to CEP graduate programs. To be considered for admission to CEP Graduate Programs, application requirements may include, but are not limited to the following:

1. Graduate Record Examination (GRE) scores from within the last 5 years (please check with the degree program to determine if this will be required)
2. Completion and submission of NMSU on-line graduate application form and fee
3. Receipt of official undergraduate and graduate transcripts of all colleges and universities previously attended by the NMSU Admissions Office
4. Letters of recommendation from persons familiar with the applicant’s academic and/or professional record (please check with the degree program to determine the number needed)
5. Curriculum vitae or resume which includes a list of completed upper-division and/or graduate coursework related to counseling, school psychology, counseling psychology or related professions.
6. Letter of intent and/or statement of purpose (please check with the degree program to determine what the content should include)
7. Writing Sample (doctoral programs requirement only; optional for all other programs)
8. Interviews are required as a part of the selection process

For more information about the CEP Department contract the department office or visit the departmental website. For questions related to degree programs admission procedures and requirements please contact the Program Director and/or Program Admissions Director, program websites indicate contact information for these individuals.

**CEP Departmental Policy on Enrollment Restrictions for Graduate Courses**

**Restricted Enrollment:**

Due to student demand, limited university resources and the nature of graduate training programs which lead to licensure in the helping professions, enrollment in CEP graduate level courses is restricted to those graduate students who have been admitted to both the Graduate School, as well as to the particular academic program.

This restriction also applies to persons who may wish to audit a course. It is anticipated that certain situations may warrant an exception from the general rule limiting enrollment. The process to obtain an exception is provided in the following section.

**Exception Criteria and Process:**

Exceptions to this policy may be granted by the department head, provided a screening process similar and equally rigorous to that required for admission to the program is performed. An exception must be requested prior to enrollment and shall include:

1. Consideration and validation of the reason provided by the individual requesting to enroll, which must include academic and professional qualifications relevant to the professional level of study. For example, active licensure as a psychologist is required to audit or register for courses in the postdoctoral program in Psychopharmacology.
2. Agreement from the individual that they will comply with all program requirements imposed for those who are admitted to the program, such as a background check.
3. Examples of justifications that will be considered sufficient to warrant an exception and permit students to register for graduate courses in CEP include:
   a. Previous admission by NMSU for purposes of a graduate minor in the helping professions. For example, the Minor in Integrated Behavioral Healthcare, which is also open to graduate students previously admitted to Social Work, Public Health, Nursing, and Marriage and Family Therapy programs.
   b. Licensed graduates of the Postdoctoral MS of Clinical Psychopharmacology program who need continuing education credits to maintain competency.
4. Written, including electronic, approval from the:
   a. Course Instructor,
   b. Program Director, and
   c. CEP Department Head.

**Degrees for the Department**

**Bachelor Degree(s)**

- Counseling and Community Psychology - Bachelor of Science (p. 1467)
- Counseling and Community Psychology - Bachelor of Science (Online) (p. 1471)

**Master Degree(s)**

- Clinical Mental Health Counseling - Master of Arts (p. 1475)
- Clinical Psychopharmacology - Master of Science (Post Doctoral) (p. 1476)
- Clinical Psychopharmacology - Master of Science (Post Doctoral) (Online) (p. 1476)

**Specialist Degree(s)**

- School Psychology - Specialist in Education (p. 1479)

**Doctoral Degree(s)**

- Counseling Psychology - Doctor of Philosophy (p. 1477)
- School Psychology - Doctor of Philosophy (p. 1478)
Minors for the Department
Undergraduate
Counseling and Educational Psychology - Undergraduate Minor (p. 1474)

Graduate
Integrated Behavioral Health Care - Graduate Minor (p. 1480)
Spanish Counseling - Graduate Minor (p. 1481)

Associate Professor, Elsa C. Arroyos, Interim Department Head

Regents Professor: E. Adams; College Professor: C. McDougall; Associate Professors: E. Arroyos, G. De Necochea, T. Hitter, M. Kalkbrenner, A. Lopez; Assistant Professors: B. Lee, A. Pérez-Rojas, L. Peterson, M. Sidwell; Emeritus Professors: E. Vázquez, L. Vázquez

E. Adams, Ph.D. (Ohio State University)-multiculturalism & diversity, mindfulness, supervision; E. Arroyos, Ph.D. (University of Iowa)- school psychology and multicultural training and competence, mentoring, and women in academia; G. De Necochea (University of California, Santa Barbara)-outreach, access, persistence/retention, and leadership development of diverse populations of students, staff and faculty in higher education; T. Hitter, Ph.D. (New Mexico State University)-counseling psychology, identity and self-concept, sexuality and sexual satisfaction; M. Kalkbrenner, Ph.D. (Old Dominion University)-college student mental health, reducing barriers to help seeking behaviors among mental health professionals, and experiential learning; B. Lee (University of Missouri)-vocational psychology, career development, marginalized populations, multicultural counseling, multicultural/social justice training; A. Lopez, Ph.D. (University of Texas-San Antonio)-multicultural counseling, social justice, immigration, bilingual counseling/supervision, eating disorders and body image; C. L. McDougall, Ph.D. (University of North Dakota)-clinical psychopharmacology, cross-cultural psychology; A. Pérez-Rojas, Ph.D. (University of Maryland)-counseling psychology process and outcome with emphasis on the therapeutic relationship, college student mental health, bilingualism, acculturation, Latino/a mental health, and role of culture in psychotherapy; L. Peterson, Ph.D. (Texas A&M University)-bilingual and multicultural school psychology, school-based mental health, professional issues in school psychology; M. Sidwell (Mississippi State University, Starkville)-support disabled children, their teachers and families through functional behavior supports, training, and consultation in school and community settings; E. Vázquez, Ph.D. (University of Iowa)-school psychology, assessment, psychoeducational interventions, acculturation, ethnic and linguistic diversity; L. Vázquez, Ph.D. (University of Iowa)-counseling psychology, multicultural curriculum development and counseling, bilingual therapy, acculturation, identity development, and phenotype research.

Counseling and Educational Psychology Courses

CEPY 1120G. Human Growth and Behavior
3 Credits (3)
Introduction to the principles of human growth and development throughout the life span.

Learning Outcomes
1. Students will demonstrate an understanding of the scientific study of processes of change and stability throughout the human lifespan (i.e. Human Development).
2. Students will demonstrate a familiarity with the generally recognized stages of human development from conception to death.
3. Students will be able to demonstrate understanding of the normal and exceptional patterns of human development.
4. Students will be able to demonstrate understanding of recent research development regarding the identified stages of human development as they relate to gender and multicultural issues

CEPY 1150. Career Excellence
1 Credit (1)
Professional career curriculum to assist students in developing an understanding and ability to articulate who they are as emerging professionals through personal assessment activities. The focus will be on providing students with tools and strategies for reflection, planning, and goal-setting. Course does not count toward CEP minor. Spring only course offering. Restricted to: College of Education Majors only majors. Restricted to Las Cruces campus only.

Learning Outcomes
1. Demonstrate an understanding of the relationship between academic and professional career success. Express a familiarity with professionalism and career culture and communicate a comprehension of various professional career skills. Apply material learned to other aspects to professional excellence. Develop a career life plan that will highlight goals, taking into account life circumstances. Become competent in appropriate professional communication.
CEPY 1160. Academic Excellence
1 Credit (1)
The course is designed to provide you students with a foundation in their personal academic process. The course will assist students in developing an understanding and ability to articulate who they are as beginning college students through personal assessment activities. The focus will be on providing students with tools and strategies for reflection, planning, and goal-setting. Topics discussed will include time management, study skills, test taking skills, stress management, motivational and academic discipline skills, interpersonal skills and college survival skills. We intend for this to be a supportive, respectful and collaborative environment where everyone can learn and grow. Fall only course offering. Restricted to: College of Education majors.

Learning Outcomes
1. Students will be able to demonstrate an understanding of the relationship between time management and academic success. Students will be able to express a familiarity with college culture. Students will be able to communicate a comprehension of study skills and test taking strategies. Students will be able to apply material learned to other aspects to enhance academic excellence. Students will be able to develop an academic life plan that will highlight goals, taking into account life circumstances. Become competent in appropriate academic communication.

CEPY 2110. Learning in the Classroom
3 Credits (3)
This class introduces you to the basic principles of learning, including cognition, motivation, and assessment. You will examine the relationships between theory, research, and practice in learning, memory, child development, motivation, and educational assessment for the school setting. This course will provide the student with concepts and principles of educational psychology that will form a framework for thinking about learning and instruction and how theories of learning are connected to classroom situations

Learning Outcomes
1. Define learning and compare and contrast the factors that cognitive, behavioral, and humanistic theories believed to influence the learning process, giving specific examples of how these principles could be used in the classroom.
2. Observe and reflect upon the teaching learning processes in economically, socially, culturally and educationally diverse classroom populations in order to develop a current understanding of students and families in public and private school.
3. Discuss how theories of information processing and cognitive theories of learning can impact memory, study strategies, and how certain teaching techniques can help students learn.
4. Compare teacher-centered and student-centered approaches to learning, and to identify a positive learning environment.
5. Identify various methods to motivate students and create effective learning environments.
6. Use major concepts of child and adolescent development, human learning, and social and cultural influences in planning and implementing classroom instruction, strategies, and management.
7. Evaluate the best means of accommodating instruction to meet individual needs and differences.
8. Students will examine how learning style, cultural and social issues and learning disabilities impact the learner’s effectiveness in the classroom setting.
9. Explain different types of assessment used to assess learning and provide examples of effective assessment practices.
10. Discuss the relationship between motivation and classroom management

CEPY 2120. The Preschool Child
3 Credits (3)
Survey of psychological development from conception to age five.

Learning Outcomes
1. Demonstrate an understanding of major theories of early childhood development
2. Demonstrate an understanding of recognized stages of human development from prenatal to preschool years
3. Explore cultural influences that may create variability in human development
4. Apply major theories to themselves and reflect on their early childhood development.
CEPY 2130. Adolescence - School Setting
3 Credits (3)
This course is designed to present the student with an introduction to the area of adolescent development with an emphasis on the positive aspects of this life stage. Students will be encouraged to be reflective on the topics presented in class that will include issues on diversity, culture, health, and well-being, emerging adulthood and suggestions for improving the lives of adolescents.

Learning Outcomes
1. Students will become knowledgeable about the historical background of adolescent development.
2. Students will become knowledgeable about the major theories related to adolescence.
3. Students will evaluate different developmental theories and their fit across cultures as you reflect on your personal experiences through discussions and videos you will watch.
4. Students will identify key developmental milestones, conflicts, and concepts of each chapter presented by utilizing critical thinking skills as you complete summary questions.
5. Students will define relevant terms, ideas, and concepts in the study of adolescent development through quizzes and homework assignments.

CEPY 2140. Explorations of Counseling & Community Psychology
3 Credits (3)
An introduction and exploration of various career options and functions within the mental health disciplines to aid in professional development. Emphasis will be placed on depth and scope of the choices available including research, teaching, community work, public policy, and clinical work and prevention (e.g. counseling, psychotherapy, assessment, consultation). May be repeated up to 6 credits.

Learning Outcomes
1. Acquire knowledge of historical and contemporary issues which affect the provision of mental health services by members of diverse mental health disciplines including clinical, counseling, school, and community psychologists, clinical mental health counselors, and others.
2. Acquire knowledge pertaining to education and training requirements for various disciplines.
4. Acquire survey-level knowledge of various inquiry approaches applicable to research pertaining to mental health and well-being—both at the individual and community level.
5. Understand the mental health recovery model and explore the lived experiences of individuals with mental health problems in contemporary society.
6. Understand the principles of sensitivity and respect for diverse populations as integral to professional practice in diverse mental health disciplines and settings, including practice in educational and community settings.

CEPY 2140H. Exploration of CCP
3 Credits (3)
An exploration of careers, activities, & techniques in counseling, school, and community psychology. Taught with CEPY 2140 with differentiated instruction and/or independent project to be determined. Restricted to Las Cruces campus only.

Learning Outcomes
1. Demonstrating knowledge of the basic functions of careers in counseling, community and school psychology.
2. Establishing a familiarity with the educational requirements necessary for a career in counseling, community, and school psychology.
3. Acknowledging and enhancing sensitivity and respect for diverse populations in various counseling areas; including educational and community settings.
4. Beginning to develop the interpersonal skills needed to succeed in the counseling, community and school psychology professions
5. .

CEPY 300V. Human Relations Training
3 Credits (3)
Gain skills, knowledge, and sensitivity for living and working with others.

CEPY 320. Sex Roles in Education
3 Credits (3)
Physiological, psychological, and political aspects of sex role socialization and the effects of these factors on personal development.

CEPY 420. Introduction of Mindfulness Practice
3 Credits (3)
Students will learn about contemplative practices through learning and participation in various mindfulness practices. Engages students in a practice or experience that leads to reflection and, thus, acquired knowledge about themselves, others, and group functioning.

CEPY 451V. Introduction to Counseling
3 Credits (3)
Principles of counseling for nonmajors.
CEPY 455. Addictions Prevention and Recovery
3 Credits
Understanding addictions process, prevention, and recovery, including biological, interpersonal and sociological influences, and intervention strategies. Taught with CEPY 555.

CEPY 456. Family Guidance
3 Credits (3)
Systems based guidance procedures for enhancing family strengths and development, and application of family guidance procedures for prevention and remediation of problems. Taught with CEPY 561.
Prerequisite(s): CEPY 1120G.

CEPY 495. Psychology, Multiculturalism and Counseling
3 Credits (3)
Understanding social identities such as race, ethnicity, sexual orientation, age, social class and spirituality as it relates to psychosocial development, academic achievement and counseling.

CEPY 495 H. Psych., Multiculturalism & Counseling
3 Credits (3)
Understanding social identities such as race, ethnicity, sexual orientation, age, social class and spirituality as it relates to psycho-social development, academic achievement and counseling. Taught with CEPY 495. Differentiated instruction/independent project to be determined.

CEPY 498. Internship in Counseling & Community Psychology
1-6 Credits (1-6)
Students will explore in more depth the fields of counseling, community, and school psychology professions by completing an internship. Through the completion of the internship students will gain hands on work experience, enhance sensitivity for respect with working with diverse populations, and hone their interpersonal skills needed to succeed in the counseling, community, and school psychology professions. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CCP majors.

CEPY 499. Independent Study
1-6 Credits
Individual study directed by consenting faculty.

CEPY 503. Introduction to Counseling
3 Credits (3)
Overview of counseling theory, techniques, ethics, and professional issues. Same as CEPY 451V. This course is open to all majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: C G, CMHC, CEP, SPSY majors.

CEPY 505. Appraisal of Psychoeducational Achievement in a Diverse Society
3 Credits (3)
Advanced theory and use of norm and criterion referenced instruments in the classroom: planning of prescriptive and educational programs. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Define assessment and describe the steps in the assessment process. *Practitioner Describe a flowchart for the screening/referral/evaluation process according to NewMexico regulations. *Research, Pedagogy Describe the uses of criterion and norm-referenced instruments as well as alternative forms of assessment (observation, curriculum based assessment and informal techniques). *Practitioner, Effectiveness Identify and discuss instruments/assessment procedures appropriate for use in identifying academic achievement, learning aptitude, vocational aptitude, performance in specific areas, and social emotional functioning. *Effectiveness Identify appropriate instruments/assessment procedures required for the exceptionality recognized under New Mexico regulations. *Effectiveness Administer and score 24 instruments in reading, math, written language and processing and to utilize these results in completing test interpretations and psycho-educational reports. *Effectiveness Interpret, report, and utilize assessment date in special education programming. *Reflection, Pedagogy Determine the assessment needs of students who are speakers of languages other than English. *Diversity Evaluate a test, write a review, and demonstrate and explain it in class. *Practitioners 1Synthesize information gathered through comprehensive assessment procedures into a practical whole. *Assessment, Evaluation

CEPY 511. Introduction to Inferential Statistics
3 Credits (3)
An introduction to the theories and techniques of inferential statistics as applied to education and psychology. Includes sampling distributions, confidence intervals, t-test, correlation, and chi-square. Intended primarily for post-baccalaureate students. Both hand calculation and computer packages will be employed. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: C G, CMHC, SPSY, CEP, NURS, FCS majors.
CEPY 512. Human Development  
3 Credits (3)  
Theory and research regarding cognitive, social, and emotional development across the lifespan with emphasis on enhancing human development. Non majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CMHC, C, G, CEP, SPSY majors.

CEPY 515. Learning Theory  
3 Credits (3)  
Survey and comparison of theory and research regarding human learning as they apply to development, education, and counseling. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Crosslisted with: CEPY 615

Learning Outcomes  
1. Students can expect to gain an understanding of a variety of learning theories. Students will learn the historical context of each theory and the interactions between the theories. Students will learn how learning theories stimulate scholarly activity, and their impact on educational practice and psychology. Students can expect to gain an understanding of the relationships of theory to practice, their origin, their strengths and limitations, and their empirical bases. Students will learn the validity of learning theories to a multicultural society. Students will be expected to acquire the ability to evaluate the quality of learning theories more critically as foundations for instructional theory and counseling strategy.

CEPY 517. Multicultural Counseling  
3 Credits (3)  
Understanding age, gender, ethnicity, socioeconomic status and culture in relation to human development, education, and counseling. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes  
1. Awareness will be accomplished by assisting students in the exploration and identification of students’ individual cultural assumptions (i.e. WORLDVIEW) in relation to people diverse from themselves. This will be accomplished via modeling, observations, readings, group processing and other experiential exercises. Knowledge will be accomplished by exploring the question, “What is Multiculturalism” in its many forms, roles, and relationships. It will begin with the examination of the psychology of multiculturalism and the requirements of cultural competency in intercultural communications. In addition, a review of various theories of diversity (i.e. identity development, acculturation, worldview, bilingualism, and disability, to name a few) will be embedded in readings, assignments, and class discussion. Exploration of various diverse populations will also be integrated into this course. Skills will focus on “How to” of multicultural competency and its practical applications to everyday interactions. Students will learn about basic issues related to assumptions that are used in communication intra-cultural and intercultural interactions.

CEPY 519. Psychology of Social Identities  
3 Credits (3)  
Theory, research and practice from feminist and multicultural perspectives will examine the integration of social identities such as gender, sexual orientation, race, ethnicity, age, social class, spirituality, and ability in relation to counseling psychology. Same as CEPY 619. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes  
1. Heighten the student’s awareness of multiple social identities, worldview beliefs, and other within-group variables. Aid the student in developing a knowledge base in the realms of social psychology and multicultural research, culturally-responsive interventions and professional practice. Provide experiences for the application of this awareness and knowledge as a means of developing the skills necessary for being a reflective decision-maker, creative problem solver, and responsive service provider for diverse individuals in a variety practice settings and intervention modalities.

CEPY 520. The Art & Science of Mindfulness  
1-3 Credits (1-3)  
In this course students will learn about contemplative practices by learning about and participating in various mindfulness practices for self-care and to increase well-being. Students will learn about psychological theories and research that support the use of mindfulness in helping others increase their well-being. Students will learn how to teach mindfulness to others. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes  
1. To learn about mindfulness practices for self-care. To incorporate mindfulness practices into daily life. To learn how mindfulness practices may increase well-being. To increase students’ knowledge of mindfulness theory and research. To develop skills to teach mindfulness to others.
CEPY 522. Organization and Administration of School Counseling Services
3 Credits (3)
Procedures for establishing and maintaining counseling programs in the schools. Professional and ethical issues in school counseling and group laboratory experience to enhance self-awareness and interpersonal skills for effective professional relationships. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Students will learn about the history of school guidance/counseling and apply that knowledge to assess current trends and the quality of services provided in counseling programs with respect to the changing needs of today’s diverse systems. Students will learn to develop and administer a school guidance/counseling program according to professional and ethical standards developed by The American School Counseling Association’s (ASCA) National Model of School Counseling. Students will be introduced to a variety of technology-based career development applications, educational resources and research to promote academic advancement and social-emotional well-being. Additionally, students will explore the use of technology designed to implement, monitor, and evaluate a comprehensive school counseling program. Students will gain an understanding of effective teamwork within a school setting including theories, models, and processes of consultation and change with teachers, administrators, and other school personnel. Students will explore strategies and methods of advocacy with families and communities designed to empower them to address issues of social justice within an educational system. Students will build a framework for facilitating school-level individual and group counseling services. They will analyze and interpret trends in academic achievement by understanding the cultural context of the school environment as it relates to groups of students and to institutional functioning.

CEPY 524. Professional Issues in Mental Health Counseling
3 Credits (3)
History, roles, organizational structures, settings, ethics, standards, laws, and credentialing related to mental health counseling. Group laboratory experience to enhance self-awareness and interpersonal skills for effective professional relationships. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Students should understand and demonstrate ethical decision-making processes and resources. Students should demonstrate understanding of the expectations and requirements of their new professional identity. Students should demonstrate knowledge of history and philosophy of the counseling profession and its specialty areas. Students should demonstrate understanding of the multiple professional roles and functions of counselors across specialty areas, and their relationships with human service and integrated behavioral health care systems, including inter-agency and inter-organizational collaboration and consultation. Students should demonstrate knowledge and understanding of counselors’ roles and responsibilities as members of interdisciplinary community outreach and emergency management response teams. Students should demonstrate knowledge and understanding of the role and process of the professional counselor advocating on behalf of the profession; advocacy processes needed to address institutional and social barriers that impede access, equity, and success for clients.

CEPY 532. Research Methods
3 Credits (3)
Develop research and program evaluation including critical literature review, generating questions, quantitative and qualitative methodology, analysis, and writing proposals. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Students will understand how to critically evaluate research relevant to the practice of clinical mental health counseling. Become knowledgeable of models of program evaluation for clinical mental health programs. Demonstrate knowledge of evidence-based treatments and basic strategies for evaluating counseling outcomes in clinical mental health counseling. Apply relevant research findings to inform the practice of clinical mental health counseling. Develop measurable outcomes for clinical mental health counseling programs, interventions, and treatments. Analyze and use data to increase the effectiveness of clinical mental health counseling interventions and programs.

CEPY 540. History and Systems of Psychology
3 Credits (3)
History and systems of psychology related to contemporary applied psychology. This course will focus largely on the history of modern psychology and on the major systems (or schools) of psychology. Restricted to: SPSY, CEP, C G majors.

Learning Outcomes
1. Effectively discuss historical and philosophical antecedents and contexts of psychology and compare and contrast multiple perspectives on important issues in this field. Apply global awareness to this topic (e.g., intersecting identities; how interlocking oppressions vary by epoch, continent, nation, cultural group, region, organizational system; etc.) Develop professional arguments; support opinions with reason and personal experience; and demonstrate higher order thinking and creative engagement (for definitions of terms like analyze, synthesize, evaluate, and create. Develop thoughtful inquiries that inspire scholarly discourse and further investigation; consider which types of evidence are needed to find answers; and effectively facilitate respectful, thought-provoking discussions of controversies and debatable topics.
CEPY 542. Appraisal Theory and Technique

3 Credits (3)
Selection, administration, and interpretation of tests and other assessment methods. Topics include reliability, validity, norms, cultural factors, and ethics related to appraisal. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CEP graduate majors only.

Learning Outcomes
1. Basic concepts of standardized and non-standardized testing and other assessment techniques, including norm-referenced and criterion-referenced assessment, environmental assessment, performance assessment, individual and group test and inventory methods, psychological testing, and behavioral observations (II-G-7-b) Statistical concepts, including scales of measurement, measures of central tendency, indices of variability, shapes and types of distributions, and correlations (II-G-7-c). Reliability (i.e., theory of measurement error, models of reliability, and the use of reliability information) (II-G-7-d) Validity (i.e., evidence of validity, types of validity, and the relationship between reliability and validity) (II-G-7-e) Social and cultural factors related to the assessment and evaluation of individuals, groups, and specific populations (II-G-7-f) Ethical strategies for selecting, administering, and interpreting assessment and evaluation instruments and techniques in counseling (II-G-7-g)

CEPY 549. Indigenous Research Methods

3 Credits (3)
Students will gain an understanding of ethical and respectful research practices from an Indigenous/culturally appropriate vantage. They will thoroughly examine the works of Native/Tribal and Indigenous scholarship. Additionally, safeguards for ethical research practices with native populations will be thoroughly examined with regard to intent, practice, and integration of outcome. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: C G,CMHC,CEP,SPSY majors.

CEPY 550. Counseling Theory and Technique

3 Credits (3)
Major theories of counseling with an emphasis on development of the ability to offer theory-based counseling and consultation. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Students will demonstrate the ability to foster counseling and helping relationships that are based on studies of the counseling process in a multicultural society and include an orientation to wellness and prevention as desired counseling goals. Students will be able to apply theories and models of counseling, including a systems approach, to conceptualize clients, help select appropriate counseling interventions, and so the student begins to develop a personal model of counseling based on current professional research and practice with the aid of processes provided in this course. Students will demonstrate the ability to foster counseling and helping relationships that include essential interviewing, counseling, and case conceptualization skills as well as developing the ability to provide professional feedback in consultation with other trainees. Students will demonstrate the ability to foster counseling and helping relationships that include developmentally relevant counseling treatment or intervention plans, the development of measurable outcomes for clients, and evidence-based counseling strategies and techniques for prevention and intervention Students will be able to demonstrate counselor characteristics and behaviors that influence helping processes. Students will demonstrate knowledge and ability to provide suicide prevention, crisis intervention, trauma-informed, and community-based strategies, such as Psychological First Aid.

CEPY 551. Diagnosis and Treatment Planning

3 Credits (3)
Appraisal and conceptualization of mental disorders and other problems through diagnostic interviewing using the DSM. Treatment planning for counseling with children, adolescents, and adults. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Students will know the etiology, the diagnostic process and nomenclature, treatment, referral, and prevention of mental and emotional disorders. Students will know the principles, models, and documentation formats of biopsychosocial case conceptualization and treatment planning. Students will understand current literature that outlines theories, approaches, strategies, and techniques shown to be effective when working with specific populations of clients with mental and emotional disorders. Students will understand the basic classifications, indications, and contraindications of commonly prescribed psychopharmacological medications so that appropriate referrals can be made for medication evaluations and so that the side effects of such medications can be identified. Students will know the principles of the diagnostic process, including differential diagnosis, and the use of current diagnostic tools, such as the current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM). Students will understand the established diagnostic criteria for mental and emotional disorders, and describes treatment modalities and placement criteria within the continuum of care. Students will know the impact of co-occurring substance use disorders on medical and psychological disorders. Students will understand the relevance and potential biases of commonly used diagnostic tools with multicultural populations. Students will understand appropriate use of diagnosis during a crisis, disaster, or other trauma-causing event. Students will be able to differentiate between diagnosis and developmentally appropriate reactions during crises, disasters, and other trauma-causing events.
CEPY 552. Career/Life Planning and Vocational Assessment
3 Credits (3)
Vocational choice theories, relationship between career choice and life style, sources of occupational and educational information, and approaches to decision making and values clarification. Laboratory involves supervised interpretation of vocational assessment. This course is open to all majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CEP graduate majors.

Learning Outcomes
1. Career development theories and decision-making models. Career, vocational, educational, occupational and labor market information resources, and career information systems. Career development program planning, organization, implementation, administration, and evaluation. Interrelationships among and between work, family, and other life roles and factors, including the role of multicultural issues in career development. Career and educational planning, placement, follow-up, and evaluation. Assessment instruments and techniques relevant to career planning and decision making. Career counseling processes, techniques, and resources, including those applicable to specific populations in a global economy.

CEPY 554. Counseling Theory and Techniques for School Psychologists
3 Credits (3)
Major theories of counseling with an emphasis on development of the ability to offer theory-based counseling and consultation. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: SPSY,CMHC,C G,CEP majors.

CEPY 556. Addictions Counseling
3 Credits (3)
Emphasis on alcohol and other psychoactive substance abuse. Also includes eating disorders, gambling, and other addictive behaviors. Covers review of psychopharmacology, assessment, and diagnosis with the major focus on treatment and professional issues. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Recognize the potential for substance use disorders to mimic and coexist with a variety of medical and psychological disorders. Know the disease concept and etiology of addiction and co-occurring disorders. Identify standard screening and assessment instruments for substance use disorders and process addictions.

CEPY 558. Child and Adolescent Counseling Theory and Technique
3 Credits (3)
Counseling theory and technique applied to children and adolescents from a developmental perspective in school and mental health settings. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Students will demonstrate understanding of their psychosocial and cultural context and how such phenomena influence their values, beliefs and, therefore, theoretical orientation to counsel children and adolescents. Students will examine and apply critical perspectives related to counseling children and adolescents. Students will compare and contrast various theoretical perspectives in the area of counseling children and adolescents. Students will develop a knowledge base leading toward becoming a culturally responsive practitioner in the area of counseling with individuals from a variety of diverse backgrounds. Students will identify, describe, and apply legal and ethical issues relevant to practice in the area of counseling children and adolescents in various settings. Students will collaborate with others in the process of developing relevant treatment plans and providing counseling services to children and adolescents in diverse settings.

CEPY 562. Family Therapy Theory and Technique
3 Credits (3)
Major theories of family therapy and associated assessment, intervention and evaluation techniques. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Students will be able to explain a systems perspective and differentiate family and other systems theories and major models of family and related interventions. Students will be able to demonstrate and apply an understanding of the family life cycle and impact on family and individual functioning. Students will be able to prepare and utilize various forms of assessment for families and couples, including observation, collection of collateral information, and interviewing. Students will be able to illustrate awareness of and skill in the use of formal and informal assessment measures used in family and couple counseling. Students will be able to summarize evidence-based interventions and treatments for family and couple counseling. Students will be able to analyze multicultural counseling theories and techniques for diverse family types and apply multicultural and family theories to one’s own experience. Students will be able to demonstrate an ability to communicate and relate effectively with families and couples. Students will be able to describe ethical issues related to counseling families and couples and be able to identify a process to make sound judgments.
CEPY 563. Primary Care Psychology
3 Credits (3)
Didactic and experiential learning in primary care psychology issues. Through this course students will learn about the cultural necessity of the integration of mental and physical health issues and multidisciplinary collaboration. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: C G,SPSY,CMHC,MSW,CEP,MPH majors.

CEPY 566. Group Work Theory and Technique
3 Credits (3)
Didactic and experiential learning in group theory and practice. Laboratory involves experiences in group participation and leadership. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CEP graduate majors.

Learning Outcomes
1. Provide students with an intellectual understanding of group work theory and technique. Provide students with an experiential understanding of group work. To help students develop specific group facilitation competencies

CEPY 569. Indigenous Counseling Internship
1-6 Credits (1-6)
The primary purpose for this course is to provide students with the opportunity to study and practice under a well-known and recognized indigenous healing practitioner with the primary goal of affirming and activating the holistic paradigm of Indigenous knowledge into their work as practitioners in the helping professions to reveal the wealth and richness of Indigenous languages, worldviews, teachings and experiences. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: C G,CMHC,SPSY,CEP majors.

CEPY 572. Counseling Practicum
1-6 Credits (1-6P)
Supervised experience of counseling and consultation. Weekly individual and group supervision involves review of audio, video, and/or live sessions and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Crosslisted with: CEPY 662. Restricted to: CEP graduate majors only.

Learning Outcomes
1. Understands ethical and legal considerations specifically related to the practice of clinical mental health counseling. Understands a variety of models and theories related to clinical mental health counseling, including the methods, models, and principles of clinical supervision. Understands the management of mental health services and programs, including areas such as administration, finance, and accountability. Demonstrates the ability to apply and adhere to ethical and legal standards in clinical mental health counseling. Recognizes the importance of family, social networks, and community systems in the treatment of mental and emotional disorders. Uses the principles and practices of diagnosis, treatment, referral, and prevention of mental and emotional disorders to initiate, maintain, and terminate counseling. Applies multicultural competencies to clinical mental health counseling involving case conceptualization, diagnosis, treatment, referral, and prevention of mental and emotional disorders. Applies effective strategies to promote client understanding of and access to a variety of community resources. Demonstrates appropriate use of culturally responsive individual, couple, family, group, and systems modalities for initiating, maintaining, and terminating counseling. 1 Demonstrates the ability to use procedures for assessing and managing suicide risk. 1 Applies current record-keeping standards related to clinical mental health counseling. 1 Provides appropriate counseling strategies when working with clients with addiction and co-occurring disorders. 1 Demonstrates the ability to recognize his or her own limitations as a clinical mental health counselor and to seek supervision or refer clients when appropriate. 1 Maintains information regarding community resources to make appropriate referrals. 1 Advocates for policies, programs, and services that are equitable and responsive to the unique needs of clients. 1 Demonstrates the ability to modify counseling systems, theories, techniques, and interventions to make them culturally appropriate for diverse populations. 1 Knows the principles and models of assessment, case conceptualization, theories of human development, and concepts of normalcy and psychopathology leading to diagnoses and appropriate counseling treatment plans. 1 Understands various models and approaches to clinical evaluation and their appropriate uses, including diagnostic interviews, mental status examinations, symptom inventories, and psychoeducational and personality assessments. 1 Demonstrates skill in conducting an intake interview, a mental status evaluation, a biopsychosocial history, a mental health history, and a psychological assessment for treatment planning and caseload management. 2 Demonstrates appropriate use of diagnostic tools, including the current edition of the DSM, to describe the symptoms and clinical presentation of clients with mental and emotional impairments. 2 Demonstrates the ability to conceptualize an accurate multi-axial diagnosis of disorders presented by a client and discuss the differential diagnosis with collaborating professionals.
CEPY 578. Advanced Counseling Practicum  
3-6 Credits (3-6P)  
Supervised experience of appraisal and individual, family, and/or group counseling and consultation serving child, adolescent, and/or adult clients. Weekly individual and group supervision involves review of counseling sessions and case presentations. This course will carry a subtitle to reflect the practicum setting. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 12 credits. Restricted to: CMHC,CEP,SPSY,C G majors.  
Prerequisite(s): CEPY 572 or consent of instructor.  
Learning Outcomes  
1. Obtain a minimum of 150 clinical hours including 60 hours of direct service (face-to-face) with clients appropriate to the program. *For students enrolled in only 6 credits, this translates to 300 clinical hours, including 120 hours of direct service. Obtain one hour a week of individual supervision with the on-site supervisor and a minimum of 1½ hours per week of group supervision with a program faculty member. Students will have the opportunity to become familiar with a variety of professional activities in addition to direct service such as record keeping, information and referral, in-service, and staff meeting. Students will have an opportunity to gain supervised experience in the use of a variety of professional resources such as assessment instruments, technologies, professional literature, and research. Students receive a formal evaluation by site supervisor and program faculty member. Students will have opportunity to work with clients who represent the ethnic and demographic diversity of their community. Students will formally evaluate their supervisors and learning experience at the end of their internship experiences. Students will be covered by professional liability insurance while enrolled in this course. Students will adhere to ethical standards of ACA and related entities, and applications of ethical and legal considerations in professional counseling. 1 Students will have an opportunity to apply concepts of mental health education, consultation, collaboration, outreach and prevention strategies, and community mental health advocacy.

CEPY 579. Clinical Psychopharmacology  
3 Credits (3)  
Basic biological aspects of psychopharmacology with applications to clinical populations and treatment implications. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.  
Learning Outcomes  
1. Students will be able to understand and apply concepts related basic neuroanatomy, neurochemistry, and neurophysiology. Students will be able to understand and apply basic knowledge related basic biological basis of the interdependence between behavior, cognition, and emotion. Students will understand the pharmacology and pharmacodynamics of major drug groups used in the treatment of CNS diagnoses; including, but no limited to, antidepressants, antipsychotics, anxiolytics, anticonvulsants, and natural remedies or herbal supplementation. Students will recognize the strengths and weaknesses of a wide range of research methodologies to screen compounds and test the mechanisms of action of drugs. Students will understand the drug development process from target identification to FDA approval and ongoing safety surveillance. Students will appreciate how pharmacological investigation informs the understanding of the underlying pathology of the illness. Students will access, critique, and assimilate evidence from scientific studies as it relates to translational neuroscience and the search for promising targets for psychotropic drugs. Students will become familiar with to the indication, contraindication, therapeutic drug monitoring, and effectiveness of medications across DSM-V classifications. As well as psychotropic drug tapering or switching. The implications of patient characteristic and medical co-morbidities are addressed. Students will share informed opinions about advances and challenges in experimental (off-label) psychopharmacology; and of their opinions of integrated psychotherapy or combined medicine. 1 Students will work effectively with peers and Instructor; as part of multidisciplinary learning environment.

CEPY 580. Counseling Internship  
3-12 Credits (3-12)  
Supervised experience in a professional counselor role in a school or agency. Students perform all counselor functions including appraisal, individual/family/group counseling, consultation, administration, program development, research, and/or evaluation. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 12 credits. Restricted to: C G,CEP,CMHC,SPSY majors.  
Prerequisite(s): CEPY 578.  
Learning Outcomes  
1. Obtain a minimum of 600 clinical hours including 240 hours of direct service (face-to-face) with clients appropriate to the program. *For students enrolled in only 6 credits, this translates to 300 clinical hours, including 120 hours of direct service. Obtain one hour a week of individual supervision with the on-site supervisor and a minimum of 1½ hours per week of group supervision with a program faculty member. The student has the opportunity to become familiar with a variety of professional activities in addition to direct service such as record keeping, information and referral, in-service, and staff meeting. The student has an opportunity to gain supervised experience in the use of a variety of professional resources such as assessment instruments, technologies, professional literature, and research. Students receive a formal evaluation by site supervisor and program faculty member. Students will have opportunity to counsel clients who represent the ethnic and demographic diversity of their community. Students will formally evaluate their supervisors and learning experience at the end of their internship experiences. Students will be covered by professional liability insurance while enrolled in internship. Students will adhere to ethical standards of ACA and related entities, and applications of ethical and legal considerations in professional counseling. 1 Students will have an opportunity to apply concepts of mental health education, consultation, collaboration, outreach and prevention strategies, and community mental health advocacy.
CEPY 598. Special Research Programs  
1-6 Credits (1-6)  
Individual investigations either analytical or experimental. Maximum of 6 credits per semester and total of 9 credits overall. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 9 credits. Restricted to: C G, SPSY, CMHC, CEP majors.

Learning Outcomes  
1. Learning outcomes will vary depending on course content.

CEPY 599. Master’s Thesis  
1-15 Credits (1-15)  
Thesis. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes  
1. To develop and complete master's research thesis.

CEPY 607. Curriculum-Based Assessment and Intervention  
3 Credits (3)  
The study and practice of curriculum-based assessment and intervention for academic skills and problems among children and adolescents. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes  
1. Students will demonstrate knowledge of multiple perspectives related to construction of knowledge in the core subject areas associated with school curricula. Students will demonstrate the ability to examine and apply critical perspectives related to educational assessment. Students will demonstrate mastery of design, administration, scoring, and interpretation of curriculum-based assessment measures. Specifically, the student will demonstrate the ability to initiate and maintain rapport with students/clients; Gain mastery in constructing, administering, scoring, and interpreting curriculum-based measurement (CBA) batteries; Analyze and interpret the results of evaluations, identifying the strengths and challenges to achievement based on these tests. Communicate effectively these interpretations, along with relevant background information, in the form of concise, well-written reports; Develop appropriate recommendations based on assessment data, background information, and observational data; Develop, implement, and monitor an intervention plan for a student directly linked to assessment data.

CEPY 608. Diagnostic Class  
3 Credits (3)  
Emphasis on developing the knowledge, skills, and necessary application abilities related to diagnosis and associated interventions related to mental health and psychopathology issues that impact a student's ability to navigate the education setting. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes  
1. Students will be expected to demonstrate the knowledge of the etiology, the diagnostic process and nomenclature, treatment, referral, and prevention of mental and emotional disorders. Students will be expected to demonstrate knowledge of the principles, models, and documentation formats of biopsychosocial case conceptualization and treatment planning. Students will be expected to demonstrate understanding of current literature that outlines theories, approaches, strategies, and techniques shown to be effective when working with specific populations of clients with mental and emotional disorders. Students will be expected to demonstrate understanding of basic classifications, indications, and contraindications of commonly prescribed psychopharmacological medications so that appropriate referrals can be made for medication evaluations and so that the side effects of such medications can be identified. Students will be expected to demonstrate knowledge of the principles of the diagnostic process, including differential diagnosis, and the use of current diagnostic tools, such as the current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM). Students will be expected to demonstrate understanding of the established diagnostic criteria for mental and emotional disorders, and describes treatment modalities and placement criteria within the continuum of care. Students will be expected to demonstrate knowledge of the the impact of co-occurring substance use disorders on medical and psychological disorders. Students will be expected to demonstrate understanding of the relevance and potential biases of commonly used diagnostic tools with multicultural populations. Students will be expected to demonstrate understanding of the appropriate use of diagnosis during a crisis, disaster, or other trauma- causing events. Students will be expected to differentiate between diagnosis and developmentally appropriate reactions during crises, disasters, and other trauma-causing events.

CEPY 612. Human Development  
3 Credits (3)  
Same as CEPY 512 with differentiated assignments for Ed.S and Ph.D. students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: SPSY, CEP majors.
CEPY 615. Learning Theory
3 Credits (3)
Survey and comparison of theory and research regarding human learning as they apply to development, education, and counseling. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Crosslisted with: CEPY 515

Learning Outcomes
1. Students can expect to gain an understanding of a variety of learning theories. Students will learn the historical context of each theory and the interactions between the theories. Students will learn how learning theories stimulate scholarly activity, and their impact on educational practice and psychology. Students can expect to gain an understanding of the relationships of theory to practice, their origin, their strengths and limitations, and their empirical bases. Students will learn the validity of learning theories to a multicultural society. Students will be expected to acquire the ability to evaluate the quality of learning theories more critically as foundations for instructional theory and counseling strategy.

CEPY 616. Spanish for Mental Health Professionals
3 Credits (3)
This course emphasizes the vocabulary for Mental Health Professionals to include academic, psychological and medical terminology. Students will incorporate Spanish terms in assessment and treatment plans through role plays. Further, the course will include an overview of the use of interpreters and translators in working with culturally and linguistically diverse clientele. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: SPSY, CEP majors.

Prerequisite: Enrolled in Bilingual School Psychology Training Grant with instructor consent.

Learning Outcomes
1. Students will be able to demonstrate brief, basic conversation in Spanish using mental health and health-care related expressions and terminology. Students will be able to understand and respond to relevant cultural and linguistic client concerns related to presenting issues. Students will be able to increase their Spanish speaking capabilities when engaged in their professional roles (e.g. conducting clinical interviews, gathering mental health histories, conducting assessments and delivering interventions using various theoretical frameworks). Students will understand cultural and social factors that influence the practitioner-client relationship and communication with Latinx clients. Students will be able to engage effectively in role play situations involving application of concepts learned.

CEPY 617. Psychology of Multiculturalism
3 Credits (3)
In this advanced course for post-master’s graduate students in applied fields of psychology, students will apply psychological concepts related to multiculturalism as well as critical race theories, feminist theories, queer theories, and liberation theories to understand intersecting social identities. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: SPSY, CEP majors.

Learning Outcomes
1. Students will understand and apply multicultural and pluralistic characteristics within and among diverse groups nationally and internationally. Students will understand and apply theories and models of multicultural counseling, cultural identity development, and social justice and advocacy. Students will understand and apply multicultural counseling competencies. Students will understand and apply the impact of heritage, attitudes, beliefs, understandings, and acculturative experiences on an individual’s views of others. Students will understand and apply the effects of power and privilege for counselors and clients. Students will understand and apply help-seeking behaviors of diverse clients. Students will understand the impact of spiritual beliefs on clients' and counselors' worldviews. Students will understand and apply strategies for identifying and eliminating barriers, prejudices, and processes of intentional and unintentional oppression and discrimination.

CEPY 618. Psychology of Poverty
3 Credits (3)
This course is designed to examine the nature, extent and impact of poverty on Southwestern populations and across the United States in relation to assessment and interventions and its impact on the education and psychological well-being of children and families. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: SPSY, CEP majors.

Learning Outcomes
1. Students will learn how views of poverty have evolved in history. Students will be aware and demonstrate the skills of the different methods used to measure and understand poverty. Students will identify and apply relevant issues from education, health disparities, and criminal justice related to the psychology of poverty. Students will evaluate and present their own self-awareness and understanding of their worldview of poverty, along with its impact of how they view others in poverty. Students will conduct self-assessments regarding their range of liberalism/conservatism; implicit bias and how it impacts their interpretation of information of poverty. Students will understand and lead discussions as to why poverty remains so prevalent in U.S. society. Students will be able to articulate the within group differences and similarities of racial and ethnic backgrounds or family types that are susceptible to poverty. Students will learn successful interventions in working with children, adolescents and families impacted by the psychology of poverty.
CEPY 619. Psychology of Social Identities
3 Credits (3)
Same as CEPY 519 with differentiated assignments for Ph.D. students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Heighten the student’s awareness of multiple social identities, worldview beliefs, and other within-group variables. Aid the student in developing a knowledge base in the realms of social psychology and multicultural research, culturally-responsive interventions and professional practice. provide experiences for the application of this awareness and knowledge as a means of Develop the skills necessary for being a reflective decision-maker, creative problem solver, and responsive service provider for diverse individuals in a variety practice settings and intervention modalities.

CEPY 622. Ethical/Professional Issues in Counseling Psychology
3 Credits (3)
History of counseling psychology, scientist-practitioner model, American Psychological Associations Ethical Principles of Psychologists and Code of Conduct. Focus on current ethical, professional, and scientific issues. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: CEP majors.

Learning Outcomes
1. Students will be knowledgeable of and act in accordance with the current version of the APA Ethical Principles of Psychologists and Code of Conduct, relevant laws, regulations, rules, and policies governing health service psychology at the organizational, local, state, regional, and federal levels, and relevant professional standards and guidelines; Recognize ethical dilemmas as they arise, and apply ethical decision-making processes in order to resolve the dilemmas; Conduct self in an ethical manner in all professional activities. Students will develop an understanding of how their own personal/cultural history, attitudes, and biases may affect how they understand and interact with people different from themselves; Apply knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service. Students will be expected to behave in ways that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others; Engage in self-reflection regarding one’s personal and professional functioning and engage in activities to maintain and improve performance, well-being, and professional effectiveness. Students will be expected to produce and comprehend oral, nonverbal, and written communications that are informative and well-integrated; demonstrate a thorough grasp of professional language and concepts; Demonstrate effective interpersonal skills and the ability to manage difficult communication well.

CEPY 624. Ethics, Law & Professional Issues in School Psychology
3 Credits (3)
This course provides an introduction and overview of the profession of school psychology with emphasis on the roles, functions, and competencies of the school psychologist within the context of legal and ethical practice. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: SPSY majors.

Learning Outcomes
1. Students will demonstrate an understanding of various professional issues, role functions, and historical contexts related to the field of school psychology. Students will demonstrate the ability to examine and apply critical perspectives related to various professional issues, role functions, and the historical contexts associated with the field of school psychology. Students will explore best practices issues associated with school psychology role functions and practices. Students will demonstrate the development of skills leading her or him toward becoming a culturally responsive practitioner in the field of school psychology. Students will obtain knowledge of the National Association of School Psychologists (NASP) Principles of Professional Ethics (2020) and the American Psychological Association’s Ethical Principles of Psychologists and Code of Conduct (2010; 2016 amendments) and learn to apply these principles to specific areas of practice such as assessment, direct and indirect intervention, consultation, and research. Students will understand complexities of ethical and legal issues occurring in school settings and will develop ethical decision-making skills. Students will demonstrate knowledge of the provisions of state and federal statutes such as the Individuals with Disabilities Education Improvement Act (2004), Every Student Succeeds Act (2017) and Section 504 of the Rehabilitation Act of 1973 as well as other case laws related to the practice of school psychology and learn how to apply these mandates to the practice of school psychology. Students will understand the importance of developing awareness of the legal and ethical issues affecting their professional identity and the need to remain current on these issues throughout their careers as school psychologists. Students will continue to emerge as critical thinkers, reflective decision-makers, and creative problem-solvers, in general.
CEPY 630. School Psychology Research and Program Evaluation
3 Credits (3)
Survey and analysis of research and program evaluation procedures in school psychology. Critical review of literature, formulating questions, quantitative and qualitative methodology, and data analysis as foundations for reading research literature and generating research, program evaluation, and/or grant proposals. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: SPSY, CEP majors.

Learning Outcomes
1. Students will advance their foundational knowledge of research methodology and research design. Students will develop skills and knowledge to conduct comprehensive literature reviews. Students will critique scientific research studies by applying attained knowledge in research methodology and design. Students will produce a research proposal they will conduct in their areas of interest within the field of school psychology. Students will present a research proposal that will conduct within the field of school psychology. Students will demonstrate skills and knowledge for program evaluation by developing a program evaluation plan. Students will demonstrate knowledge and skills necessary to conduct single-subject design studies.

CEPY 632. Counseling Psychology Research
3 Credits (3)
Survey and analysis of research and program evaluation procedures in counseling psychology. Critical review of literature, formulating questions, quantitative and qualitative methodology, and data analysis are covered as a foundation for reading research literature and generating research, program evaluation, and/or grant proposals. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: SPSY, CEP majors..

Learning Outcomes
1. Students refine their foundational knowledge of research methods. Students learn how to conduct comprehensive literature reviews in counseling psychology. Students learn about sampling procedures and their limitations. Students refine their knowledge about measurement applied to research (including the reliability, validity, norms and cultural relevance of measurement procedures). Students refine their knowledge of statistics and the application of statistics to deriving conclusions from research data. Students learn about ethical issues related to conducting research. Students apply knowledge and skills in the areas described above to the critique of counseling psychology research. Students apply knowledge and skills in the areas described above to the development of a draft proposal for research they can conduct in their area of interest within counseling psychology. Students present and defend a proposal for research in counseling psychology.

CEPY 634. Introduction to Qualitative Research
3 Credits (3)
This course is intended to be an introduction to qualitative research methods for persons wishing to understand, apply, and conduct qualitative studies with human subjects in the fields of counseling and psychology. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Students will understand the importance of applying and conducting culture-centered and ethical psychological research among persons from ethnic, linguistic, and racial minority backgrounds. Students will understand the shift that has taken place in the past century from ignoring cultural variables to that of valuing the vast amounts of uncharted knowledge that is contained therein. Students will gain a deeper understanding of the qualitative paradigm that informs research and the way we conduct and consume it. Students will understand the components that make up good qualitative research considering carefully the variables that inform the proposed outcome of the study. Students will assess the benefit of research to the entities, individuals and communities being studied. Students will learn to be grounded in the empirical and conceptual literature on the ways that culture influences the variables under investigation, as well as psychological and social science research traditions and skills. Students will be aware of their cultural assumptions on which their research questions are based (Egharevba, 2001). Students will learn to be aware of, and if appropriate, to apply indigenous theories when conceptualizing research studies. They are encouraged to include members of cultural communities when conceptualizing research, with particular concern for the benefits of the research to the community (Fontes, 1998; LaFromboise, 1988). Students will learn to consider the psychological (rather than demographic) contextual factors of race, ethnicity, language, gender, sexual orientation, socio-economic status, and other social dimensions of personal experience in conceptualizing their research design (Fouad Brown, 2000; Quintana et al., 2001). Students will strive to recognize and incorporate research methods that most effectively complement the worldview and lifestyles of persons who come from a specific cultural and linguistic population; e.g., quantitative and qualitative research strategies (Hoshmand, 1989; Marin Marin, 1991; Ponterotto Casas, 1991). Students will learn to consider culturally sensitive assessment techniques and data-generating procedures. In analyzing and interpreting data from research studies and in proposed research, students will learn to consider cultural influences as possible explanations for their findings. Students will learn the importance of considering the benefit to participants, and to include participants in the interpretation of results. They are encouraged to find ways for the results to be of benefit to the community, and to represent the participants’ perspectives accurately and authentically.
CEPY 636. Advanced Statistics
3 Credits (3)
An intermediate course focusing on more advanced theories and techniques of inferential statistics as applied to education and psychology. Includes ANOVA, planned contrasts, ANCOVA, simple regression, and non-parametrics. Both hand calculation and computer packages will be employed. Open to all College of Education majors.

Learning Outcomes
1. Students will understand how to describe procedural steps to submit proposals to the IRB at NMSU. Students will be able to create data files and use SPSS to clean and examine datasets to assess data quality. Students will be understand how to plan to address a research question, identify appropriate statistical tests and variables. Students will be able to use SPSS to run statistical analyses to examine differences in means or relationships between two variables. Students will understand how to assess assumptions and interpret findings of these analyses. Students will understand key concepts, such as statistical significance, error, effect size, sample size, and statistical power.of analytic approaches, findings, and interpretation of the data. Students will be able to effectively communicate using scientific writing and accurate portrayal of the data in terms.

CEPY 637. Multivariate Statistics
3 Credits (3)
Theories and techniques of multivariate statistics as applied to education and psychology. Includes multiple regression, logistic regression, MANOVA, factor analysis, and structural equation modeling. Computer packages will be the primary tool for data analysis. Open to all majors of the College of Education.

Learning Outcomes
1. To be able to construct statistical models, both non-multivariate (e.g., multiple regression) and multivariate (e.g., MANOVA, MANCOVA), and carry out the analysis using statistical software (e.g., SPSS, R). To be able to interpret results of both non-multivariate and multivariate analyses, in the context of the data. To be able to generate original research questions that can be answered with quantitative methods discussed in this course. To be able to carry out a quantitative method discussed in this course to answer a research question(s), and to be able to appropriately interpret the results. To be able to read published research in your field of study that makes use of multivariate methods, and critically interpret the results based on the claims and evidence provided.

CEPY 642. Psychometrics
3 Credits (3)
An introduction to psychometrics, including topics such as theory and techniques of psychological measurement, scale and inventory construction, reliability, validity, evaluation of measurement quality, classical and contemporary measurement theory, and standardization. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Consent of Instructor required. Restricted to: SPSY,CEP majors.

Learning Outcomes
1. Students will acquire knowledge and skills in psychometrics. Students will understand and apply psychometric theory through the completion of instrument evaluation, instrument development, and factor analysis projects.

CEPY 646. Academic & Behavioral Assessment & Intervention
3 Credits (3)
This course introduces basic concepts, methods, and applications of academic and behavior assessment and intervention. Students will learn how to conduct functional/informal assessments of academic and behavior and how to write behavior and academic plans. Methods appropriate for assessment and intervention of school-age children will be emphasized. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: CEP graduate majors.

Learning Outcomes
1. Students will gain and demonstrate knowledge on how behavior assessment fits within psychological/psycho-educational assessment.
2. Students will demonstrate the ability to examine and apply critical perspectives related to educational assessment.
3. Students will learn the rational, defining features and theoretical underpinnings of behavioral assessment.
4. Students will learn how to conduct and complete functional assessments of behavior.
5. Students will learn how to develop and evaluate a satisfactory positive behavior intervention plan.
6. Students will develop and/or learn techniques of behavioral observation.
7. Students will learn how to integrate behavioral observation findings with other assessment methods.

CEPY 647. Appraisal of Cognitive Functioning
3 Credits (3)
Taught with CEPY 547 with differentiated assignments for doctoral students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CEP,SPSY majors.
CEPY 648. Appraisal of Personality
3 Credits (3)
Selection, administration, scoring, interpretation, and report writing using major objective and projective tests of personality. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CEP, SPSY majors.

Learning Outcomes
1. Knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service. Produce and comprehend oral, nonverbal, and written communications that are informative and well-integrated; demonstrate a thorough grasp of professional language and concepts. Demonstrate current knowledge of diagnostic classification systems, functional and dysfunctional behaviors, including consideration of client strengths and psychopathology. Demonstrate understanding of human behavior within its context (e.g., family, social, societal and cultural). Demonstrate the ability to apply the knowledge of functional and dysfunctional behaviors including context to the assessment and/or diagnostic process. Select and apply assessment methods that draw from the best available empirical literature and that reflect the science of measurement and psychometrics; collect relevant data using multiple sources and methods appropriate to the identified goals and questions of the assessment as well as relevant diversity characteristics of the service recipient. Interpret assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision-making biases, distinguishing the aspects of assessment that are subjective from those that are objective. Communicate orally and in written documents the findings and implications of the assessment in an accurate and effective manner sensitive to a range of audiences.

CEPY 651. Diagnosis and Treatment Planning
3 Credits (3)
Same as CEPY 551 with differentiated assignments for Ph.D. students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Students will be expected to demonstrate knowledge of the etiology, the diagnostic process and nomenclature, treatment, referral, and prevention of mental and emotional disorders. Students will be expected to demonstrate knowledge of the principles, models, and documentation formats of biopsychosocial case conceptualization and treatment planning. Students will be expected to demonstrate practice of using the DSM 5 to create differential diagnoses. Students will be expected to construct an initial treatment plan based upon a systemic and differential diagnosis. Students will be expected to formulate a culturally relevant diagnosis and treatment plan. Students will be expected to discuss the barriers to assessment and treatment, as it relates to mental illness stigma.

CEPY 652. Career/Life Planning and Vocational Assessment
3 Credits (3)
Same as CEPY 552 with differentiated assignments for Ed.S and Ph.D. students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: SPSY, CEP majors.

Learning Outcomes
1. Knowledge and understanding of career development theories and decision-making models. Knowledge and understanding of career, vocational, educational, occupational and labor market information resources, and career information systems. Knowledge and understanding of career development program planning, organization, implementation, administration, and evaluation. Knowledge and understanding of interrelationships among and between work, family, and other life roles and factors, including the role of multicultural issues in career development. Knowledge and understanding of career and educational planning, placement, follow-up, and evaluation. Knowledge and understanding of assessment instruments and techniques relevant to career planning and decision making. Knowledge and understanding of career counseling processes, techniques, and resources, including those applicable to specific populations in a global economy.

CEPY 658. Child and Adolescent Counseling Theory and Technique
3 Credits (3)
Same as CEPY 558 with differentiated assignments for Ph.D. students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Students will be able to demonstrate an understanding of their psychosocial and cultural context and how such phenomena influence their values, beliefs and, therefore, theoretical orientation to counsel children and adolescents. Students will be able to demonstrate the ability to examine and apply critical perspectives related to counseling children and adolescents. Students will be able to compare and contrast various theoretical perspectives in the area of counseling children and adolescents. Students will be able to demonstrate the development of a knowledge base leading toward becoming a culturally responsive practitioner in the area of counseling with individuals from a variety of diverse backgrounds. Students will be able to identify, describe, and apply legal and ethical issues relevant to practice in the area of counseling children and adolescents in various settings. Students will be able to collaborate with others in the process of developing relevant treatment plans and providing counseling services to children and adolescents in diverse settings.
CEPY 662. Family Therapy Theory and Technique
3 Credits (3)
Taught with CEPY 562 with differentiated assignments for Ed.S and Ph.D students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Crosslisted with: CEPY 572. Restricted to: CEP,SPSY, CEP majors.

CEPY 670. Behavioral Health Practicum
1-6 Credits
An intensive supervised experience in providing behavioral health services at an on or off campus interdisciplinary health setting. Supervision provided by doctoral level psychologist faculty in collaboration with other team disciplines' supervising faculty involves audio, video, and/or live observation of counseling sessions and team interventions and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: MSW, CEP, SPSY majors. Graded: S/U Grading (S/U, Audit).

CEPY 671. Consultation
3 Credits (3)
Didactic and experimental trainings in theory-based consultation. Supervision provided by faculty involves audio, video, and/or live observation consultation activities and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CEP graduate majors.

CEPY 672. Practicum in School Psychology: Psychoeducational
1-6 Credits
Supervised practicum in psychological and educational evaluation. Skill development in ecological assessment, including interviewing, observations micro-counseling, acculturation, world view, and ethnic identity formation. Graded: S/U. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: CEP graduate majors. Graded: S/U Grading (S/U, Audit).
Prerequisite(s): CEPY 647, CEPY 505.

CEPY 673. Counseling Psychology Theory/Practicum
1-6 Credits
Theories of counseling and psychotherapy and their application during supervised counseling with clients. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: CEP majors.
Prerequisite(s): Consent of instructor.

CEPY 675. Practicum in School Psychology: Psychological
1-6 Credits
School-based supervised experience for the advanced student. Provides experiences in various roles and models of service delivery (group, multifactored, integrative, family assessments) expected of school psychologists. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: CEP graduate majors.

Learning Outcomes
1. Enhance the knowledge and skill students already possess and aid in the development of new knowledge and skills (related to psychological, behavioral needs of students). Provide students with the opportunity to respond to supervision and use supervision in a constructive manner. Provide students with the opportunity to share experiences as school psychologists in training in a supportive environment. Provide the students with the opportunity to engage in learning activities that will assist them in functioning independently as school psychologists (i.e., data-based decision-making and accountability). Provide the instructor with the opportunity to observe the student's ability to plan and execute successful interventions and demonstrate diagnostic skills. Students will be able to establish a counseling relationship with students' clients through the provision of individual and/or group counseling as stated on their IEP's. Students will be exposed to current issues, theories, and practices in the field of school psychology. Students will be able to integrate theory/research and practice via case presentations. Students will be able to demonstrate knowledge and integration of technology in their practice as school psychologist. 1 Students will refine their skills in working with culturally and linguistically diverse students, families, educators, and other professionals.
CEPY 676. Field Experience in Educational Diagnostics
1-6 Credits (1-6)
CEPY 676 is designed to provide students with supervised school-based experiences and practices. The goal of the course is for students to master the competencies required for the delivery of academic services in the educational diagnosticians role. The specific emphases in this course are placed on a data-based decision-making skills, psychoeducational assessment activities, and academic interventions. Under faculty and school-system staff supervision, students will assume service delivery responsibilities and with increasing independence will respond to the diagnostic and intervention needs of students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: CEP, SPSY majors. Graded: S/U Grading (S/U, Audit).
Prerequisite(s): CEpy 647, CEpy 608, CEpy 505, CEpy 672.
Learning Outcomes
1. Students will demonstrate sound diagnostic reasoning and data-based decision-making through the formulation of possible preliminary hypotheses and testing of hypotheses via use of appropriate assessment methods. Students will demonstrate skills in planning appropriate assessments, taking into consideration contextual factors, referral concerns, and background information; and will select appropriate evaluation methods. Students will demonstrate skills related to devising and implementing evidence-based academic interventions and provide recommendations for students in need. Students will demonstrate sensitivity in regards to cultural diversity and diversity of values, as well as begin the process of being culturally competent in their professional practices. Students will become familiar with and practice in accordance with best practices and relevant standards of the profession. Students will become familiar with the application of state special education rules and regulations. Students will identify and apply relevant legal and ethical responsibilities and requirements. Students will demonstrate effective interpersonal skills with clients and colleagues.

CEPY 677. Group Work Theory/Practicum
1-6 Credits (1-6)
Application of theory in group work with clients and in supervising group leaders in training. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: CEP, SPSY majors.
Prerequisite: CEpy 673.
Learning Outcomes
1. Apply the basic elements of group theory to small groups, including principles of group dynamics, group process components, developmental stage theories, group member roles and behaviors, and therapeutic factors. Demonstrate effective leadership skills and intervention strategies in simulated class discussions to actual group sessions in the community. Possess knowledge of ethical and professional issues encountered by group leaders. Develop awareness of the relative advantages of group work for clients and counselors, as well as other practical advantages; discern when group may not be the preferred modality for clients. Distinguish characteristics of various group theories and approaches. Identify relevant socio-cultural factors and multicultural considerations in group work and its impact on theory, process, and group leadership skills. Communicate how they have improved their skill development relative to self-awareness and group leadership. Have knowledge of professional group organizations, certifications (Certified Group Psychotherapist), and be able to effectively market group skills in preparation for the pre-doctoral internship year.

CEPY 678. Advanced Counseling Psychology Practicum
1-6 Credits (1-6)
Supervised counseling psychology experience including appraisal, diagnosis, case conceptualization, treatment planning, theory-based counseling and evaluation. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. Graded: S/U. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 12 credits. Restricted to: CEP majors. Graded: S/U Grading (S/U, Audit).
Prerequisite(s): CEpy 677.
Learning Outcomes
1. To increase skill level in clinical work with individual/group/couple therapy and initial intakes through practice, formal supervision, and group case discussion. To integrate one’s theoretical orientation into a brief practice therapy model and to improve treatment planning ability. To improve treatment planning ability by increasing knowledge and integration of empirically supported interventions. To increase exposure and use of assessment procedures and tools in clinical work. To be cognizant of cultural/diversity issues with clients and develop enough self-awareness to respond effectively to a wide range of clients. To examine professional identity concerns as they arise and increase one’s knowledge base about specific areas of clinical interest. To adhere to APA’s Ethical Principles of Psychologists and Code of Conduct and Specialty Guidelines for the Delivery of Service by Counseling Psychologists and Guidelines for Providers of Psychological Services to Ethnic, Linguistic, and Culturally Diverse Populations, and to develop a more applied understanding of them. To increase one’s knowledge of relevant Mental Health Statutes and the Board of Psychologist Examiners Rules and Regulations for the state in which you are practicing (NM or TX). To demonstrate self-awareness and self-reflection through ongoing self-evaluation of counseling skills. 1 To learn how to design and implement outreach presentations and to gain experience in consulting with interdisciplinary staff. 1 To become familiar with and acquire practice with career counseling and the use of career inventories.
CEPY 679. Supervision Theory and Practicum
1-6 Credits
Didactic and experimental training in theory-based supervision. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of supervision sessions and case presentations. May be repeated for a maximum of 6 credits. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: CEP majors.
Prerequisite(s): CEPY 675 or CEPY 678; and consent of instructor.

CEPY 680. Internship in Counseling Psychology I
1-18 Credits (1-18)
Full-time equivalent of one-half calendar year of internship preferably in an APA-approved or APA-equivalent site. Available to Ph.D. students who have successfully completed their comprehensive exams. May be repeated for a maximum of 18 credits. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 18 credits. Restricted to: CEP majors.

Learning Outcomes
1. Students will complete the full-time equivalent of one calendar year internship at a site accredited by the American Psychological Association (APA) that has been matched with the student through the APPIC process.

CEPY 681. Advanced Multicultural School Psychology Field Experience
3 Credits (3)
Supervised school psychology field experience including appraisal diagnosis, case conceptualization, treatment planning, theory-based counseling and evaluation from a multicultural perspective with diverse populations. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of sessions and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Consent of Instructor required. Restricted to: SPSY, CEP, CEP majors.
Prerequisite(s): CEPY 672, CEPY 675.

CEPY 682. Internship in Counseling Psychology II
1-18 Credits
Full-time equivalent of one-half calendar year of internship preferably in an APA-approved or APA-equivalent site. Available to Ph.D. students who have successfully complete their comprehensive exams. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 18 credits. Restricted to: CEP majors.
Prerequisite(s): Consent of instructor.

CEPY 684. Internship in School Psychology
1-12 Credits (1-12)
Supervised experience in school psychology. May be repeated for a maximum of 12 credits. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 12 credits. Restricted to: SPSY majors. Graded: S/U Grading (S/U, Audit).
Prerequisite(s): CEPY 672, CEPY 675.

CEPY 685. Doctoral Internship in School Psychology
6-12 Credits (6-12)
Supervised doctoral internship experience in school psychology. 1800 to 2000 clock hours are completed on a full-time basis. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 12 credits. Consent of Instructor required. Restricted to: SPSY, CEP majors. Graded: S/U Grading (S/U, Audit).
Prerequisite(s): CEPY 672, CEPY 675, CEPY 681.

CEPY 693. Dissertation Seminar
3 Credits (3)
Same as ELAD 693, SPED 693. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes
1. Reflect on abilities to identify and effectively manage strengths and potential barriers that may impact progress on dissertation by thoroughly analyzing strengths and barriers and developing an action plan. Conceptualize a dissertation topic that is germane to the field of Counseling Psychology and provide a convincing argument supporting the need for such research. Conduct extensive and systematic literature searches for previous research and theory relevant to dissertation topic. Write a comprehensive outline and annotated bibliography of the literature that incorporates the most relevant research and theoretical work associated with dissertation topic to inform literature review. Clearly state research questions and hypotheses that will be examined in dissertation. Create a detailed and comprehensive action plan that adheres to APA ethical guidelines for research that a reader can use to replicate dissertation study (i.e., method section). Demonstrate understanding of the importance of having a diverse sample. Present dissertation research to the class in a simulated proposal meeting. Become more adept at providing support and challenge to student peers during weekly seminars and simulated proposal meetings. Identify strategies for choosing and working with your dissertation committee effectively. Demonstrate your knowledge of APA writing style.
CEPY 698. Selected Topics
1-6 Credits
Offered under various subtitles which indicate the subject matter covered. A maximum of 6 credits in any one semester and a total of 18 credits overall. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 18 credits. Restricted to: CEP majors.

CEPY 699. Ed.S. Thesis
1-15 Credits
Study and research at the Specialist in Education level. Each problem to be designated by a qualifying subtitle. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 88 credits. Restricted to: CEP majors. Thesis/Dissertation Grading.

CEPY 700. Doctoral Dissertation
15 Credits
Dissertation. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 88 credits. Restricted to: CEP,C EP majors. Thesis/Dissertation Grading.

Second Language: (not required)

Electives, to bring to the total credits to 120 ¹,4

Select sufficient electives from approved CEP Department list (https://cep.nmsu.edu/academic-programs/counseling-and-community-psychology) to meet 120 minimum credit hours for the Bachelor degree (minimum of 24 credits required). ⁵

Total Credits 120

¹ A grade of C or better is required for all CCP core courses.
² MATH 1220G College Algebra (or any MATH higher math course, excluding MATH 1130G Survey of Mathematics) is required for the degree but students may need to take any prerequisites needed to enter either MATH 1220G College Algebra or higher (excluding MATH 1130G Survey of Mathematics) first.
³ CEPY 300V Human Relations Training and CEPY 451V Introduction to Counseling may not be used as a VWW.
⁴ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
⁵ Electives for CCP program are selected from list of approved electives.

---

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Total Credits**

120-121
These courses may have prerequisites and/or co-requisites, and it is the students' responsibility for checking and fulfilling all those requirements. See the General Education (p. 123) section of the catalog for a full list of courses. See the Non-Departmental Requirements (p. 1467) section of the Requirements tab for the program. Select from approved CEP Department list (https://cep.nmsu.edu/academic-programs/counseling-and-community-psychology (https://cep.nmsu.edu/academic-programs/counseling-and-community-psychology/)).

See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.

## Counseling and Community Psychology - Bachelor of Science (Online)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Second Language: (not required)**

Electives, to bring to the total credits to 120 1,4

Select sufficient electives from approved CEP Department list (https://cep.nmsu.edu/academic-programs/counseling-and-community-psychology (https://cep.nmsu.edu/academic-programs/counseling-and-community-psychology/)) to meet 120 minimum credit hours for the Bachelor degree (minimum of 24 credits required). 5

Total Credits 120

1 A grade of C or better is required for all CCP core courses.

2 MATH 1220G College Algebra (or any MATH higher math course, excluding MATH 1130G Survey of Mathematics) is required for the degree but students may need to take any prerequisites needed to enter either MATH 1220G College Algebra or higher (excluding MATH 1130G Survey of Mathematics) first.

3 CEPY 300V Human Relations Training and CEPY 451V Introduction to Counseling may not be used as a VWW.

4 Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

5 Electives for CCP program are selected from list of approved electives.

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Counseling and Education Psychology - Undergraduate Minor

A minor in Counseling and Educational Psychology (CEP) is available to the student receiving a bachelor’s degree from another department in the university. The minor in CEP is designed to be useful to the undergraduate who is preparing to enter one of the helping professions such as psychology, education, social work, criminal justice or nursing. A total of 18 credits is required to obtain the CEP minor, of which, at least 9 credits must be at 300 level or above.

Clinical Mental Health Counseling - Master of Arts

The CEP department offers a Clinical Mental Health Counseling program which leads to a Masters of Arts degree (M.A.). The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). It prepares professional counselors to perform mental health counseling in agencies, hospitals, and private practice. Successful completion of the Clinical Mental Health Counseling program qualifies students to pursue licensure as clinical mental health counselors with the New Mexico Counseling and Therapy Practice Board.

Annual application deadline: February 1

For more information on program application requirements and process, see Clinical Mental Health Counseling, M.A., program website (https://cep.nmsu.edu/academic-programs/counseling-guidance-m-a/).

Requirements

The 60-credit counseling curriculum requires two years full-time study or three years part time study on campus, and covers the following areas: human development, appraisal; diagnosis and treatment planning; individual, family and group counseling; consultation; career/life planning; research; and professional issues. Specialized training and supervised experience is offered in mental health agencies, hospitals, and in schools.

Clinical Psychopharmacology - (Post-Doctoral) Master of Science

The curriculum for the Postdoctoral Master of Science in Clinical Psychopharmacology (MSCP) degree program is modeled on the American Psychological Association (APA) recommended curriculum, adopted in 1998, set forth by the Blue Ribbon Task Force (comprised of national experts in psychopharmacology including physicians, psychiatrists, Department of Defense Demonstration Project prescribing psychologists, neuroscientists, pharmacists and nurses). In addition, the NMSU program adheres to all regulations set forth by the New Mexico Board of Psychologist Examiners and the New Mexico Board of Medical Examiners. And is designed in congruence with New Mexico state law for prescribing psychologists. The program is dynamic, changing with the field, and has been modified according to recommended revisions of the American Psychological Association in 2009, then again in 2019 (https://www.apa.org/education/grad/rxp-designation-criteria.pdf). The MSCP is an APA Designated Postdoctoral Psychopharmacology Education and Training Program. New Mexico State University is only one of three university programs in the country with said designation status.

Counseling Psychology - Doctor of Philosophy

The CEP Department offers a doctoral program that leads to a Ph.D. in Counseling Psychology. The program is accredited by the American Psychological Association. For more information on this accreditation contact

The Office of Program Consultation and Accreditation
American Psychological Association
750 1st Street, NE
Washington, DC 20002
Phone: (202) 336-5979.

The program is based on the scientist-practitioner model through which both research and service delivery skills are acquired. Graduates of the program are prepared to conduct research, provide service, teach and supervise. The program prepares students for licensure as psychologists. The two aims of the program are:

1. To prepare entry level counseling psychologists who are self-reflective and competent in both the practice and science of the profession.
2. To prepare counseling psychologists who think critically about the socio-cultural context of their work and promote social justice

Annual application deadline: December 15

For more information on program application requirements and process, see Counseling Psychology, Ph.D., program website (https://cep.nmsu.edu/academic-programs/counseling-psychology-phd/).

Program Requirements

CEP faculty conduct periodic reviews of students' progress in the programs, including their academic performance, counseling and psycho-educational skills, professionalism and ethics. Deficits identified through faculty reviews may result in recommendations that students engage in remedial work or that they pursue alternative career goals.

School Psychology - Doctor of Philosophy

The mission of the School Psychology doctoral program is to prepare school psychologists as scientists, practitioners and advocates for mental health and social justice in health service psychology settings, including public schools. The program addresses state and national shortages of personnel who are fully credentialed to serve the needs of children with disabilities. The primary goal of the school psychology program is to prepare scholars to become problem-solvers with the essential entry-level competencies to serve in the schools and agencies that serve school age populations.

The program develops 3 major components: 1) Knowledge of psychological and educational foundations; 2) Skills in data-based decision-making, assessment, consultation, intervention and research; and 3) The capacity to apply knowledge and skills to promote mental health and development and prevent school failure and other disabling conditions. Specifically, the program will accomplish the following goals.

1. Prepare and graduate highly qualified school psychologists to meet the academic and psychological needs of infants, toddlers, children, youth and their families from diverse backgrounds (i.e., high need children with disabilities).
2. Increase the number of personnel who demonstrate the competencies needed to provide high-quality instruction, evidence-based interventions and services for children with disabilities.
3. Retain scholars in a high quality-training program to increase the numbers of school psychologists including scholars from bilingual and traditionally underrepresented backgrounds.
4. Provide the workforce needed to meet state licensure for Level 3 school psychologists.

Annual Application Deadline: January 15

For more information on program application requirements and process, see School Psychology, Ph.D. program website: https://cep.nmsu.edu/academic-programs/school-psychology-phd/

Curriculum

Preparation occurs from a developmental sequence of courses that follow scientifically based research and empirically validated strategies. The school psychology program at NMSU adheres to the scientist-practitioner model. This integrated approach to scholarship and practice promotes development of interlocking skills fostering a career-long process of psychological investigation, assessment, and intervention. Throughout the curriculum, the importance of knowledge and experience with a wide range of individual differences including, but not limited to ethnicity, gender, disability, age, culture, sexual orientation, religion, and race are emphasized. Ethical and legal issues, which guide service delivery, are also stressed throughout the curriculum. The American Psychological Association (APA) and National Association of School Psychologists (NASP) Standards and competencies provide the foundation for the program’s conceptual framework. Candidates will complete 81 credits of coursework, at least 450 clock-hours of practica (9 total credits) and an 1800 clock-hour doctoral internship. Of the 1800 clock-hour internship, 750 will be expected to be in a school setting.

School Psychology - Specialist in Education

The CEP Department offers a School Psychology program that leads to a Specialist in Education (Ed. S.) degree. The program is accredited through the National Association of School Psychologists. The program provides additional education beyond the M.A. to prepare professionals for licensure as school psychologists in New Mexico and throughout the United States. The School Psychology program prepares its candidates to work with preschoolers, children, adolescents and families. The various settings where School Psychologists are employed include public schools and other organizations that require advanced assessment, counseling, consultation and other interventions. The program trains its candidates to serve students with diverse educational, psychological and emotional needs from various backgrounds. Such training also includes working with all school personnel to help make education a positive and rewarding experience for their students. Students admitted to the School Psychology program also have the opportunity to achieve a Masters degree in Counseling and Guidance with a concentration in Educational Diagnostics on the way to obtaining the specialist degree. Students would need to complete additional curricular, field experiences and degree requirements.

Annual application deadline: January 15

For more information on program application requirements and process, see School Psychology, Ed.S., program website:

https://cep.nmsu.edu/academic-programs/school-psychology/

Integrated Behavioral Health Care - Graduate Minor

The Minor in Integrated Behavioral Health Care, offered through the Counseling and Educational Psychology (CEP) department, is open to graduate students enrolled in CEP programs Clinical Mental Health Counseling, School Psychology, Counseling Psychology and to graduate students who are enrolled in Social Work, Public Health, Nursing and Marriage and Family Therapy programs.

It was established in the interest of meeting the needs of graduate students in the health professions who are receiving, or seeking training in, interdisciplinary or interprofessional collaborations with other healthcare disciplines. The provision of integrated behavioral health services fits within the university’s broader goal of meeting the needs of the citizens of New Mexico and the department’s commitment to graduating competent service providers who can be effective members of a health care team.

Students will successfully complete 9 credits of coursework specific to this program of study in order to obtain a Minor in Integrated Behavioral Health Care. For application and coursework details, please contact the CEP department office or visit the departmental website at https://cep.nmsu.edu.

Through the courses in this minor students develop knowledge and skills in the following areas:

1. Apply the biopsychosocial model of health and illness with primary care patients,
2. Apply knowledge regarding the mind-body connection to address such issues as stress management, emotion regulation and sleep medicine,
3. Apply culturally responsive behavioral assessment/interventions,
4. Demonstrate behavioral health consultation skills with other health care providers, and
5. Develop interprofessional collaboration skills that include understanding the roles of all healthcare professionals and learning how to communicate effectively in order to engage in service delivery as a team.

Prerequisites

In order to begin the Minor courses, students must currently be enrolled in a Behavioral Health program. There are no other prerequisites.

How to Apply

If you are interested in pursuing a minor in Integrated Behavioral Healthcare, you should complete the attached application and return it to the IBH Minor coordinator, Eve Adams (eadams@nmsu.edu). It is best to meet with the program coordinator before enrolling in relevant coursework, but it is possible to obtain the minor after taking one of the courses in the program of study. The application form allows the CEP department to keep track of potential minors in order to determine what courses need to be offered at any given time. To declare the Minor with the Graduate School, the student should list all relevant completed coursework on the Program of Study form that is submitted to the Graduate School prior to graduating. This form must be signed by Dr. Adams. A IBH Minor faculty member is also required to sit on the student’s graduate committees, including the comprehensive exam and the dissertation proposal and defense exams.

Program of Study

Students will successfully complete 9 credits of work from the courses listed below in order to obtain a Minor in Integrated Behavioral Health Care.

Spanish Counseling - Graduate Minor

The Minor in Spanish Counseling, offered through the Counseling and Educational Psychology department is open to graduate students who are enrolled in CEP’s Counseling, School Psychology, and Counseling Psychology programs, and to graduate students who are enrolled in Social Work and Marriage and Family Therapy programs. It was established in the interest of meeting the needs of bilingual counseling students who seek training in the provision of Spanish language mental health services.

In order to begin the Minor courses, students must currently be enrolled in a Mental Health program as described above. They must demonstrate intermediate level Spanish language skills as evidenced by the Spanish Placement Exam and an oral interview with the program coordinator.

Advanced level in Spanish counseling skills is required for the completion of the Minor. If a student feels that he/she needs to improve his/her level of academic Spanish prior to completing the required course work, or if the program coordinator determines that it is necessary, the student has the option of taking additional Spanish courses through the Languages and Linguistics department. Students will be required to take Spanish language courses until they have satisfied this requirement. Please note that online courses will not fulfill this requirement.

Prerequisites

In order to begin the Minor courses, students must currently be enrolled in a Mental Health program as described above. They must demonstrate intermediate level Spanish language skills as evidenced by the Spanish Placement Exam and an oral interview with the program coordinator.

Advanced level in Spanish counseling skills is required for the completion of the Minor. If a student feels that he/she needs to improve his/her level of academic Spanish prior to completing the required course work, or if the program coordinator determines that it is necessary, the student has the option of taking additional Spanish courses through the Languages and Linguistics department (e.g. SPAN 312, SPAN 313, SPAN 314, and SPAN 315). Students will be required to take Spanish language courses until they have satisfied this requirement. Please note that online courses will not fulfill this requirement.

How to Apply

If you are interested in pursuing a minor in Spanish Counseling and, you should complete the attached application and return it to the program coordinator. You are advised to meet with the program coordinator before enrolling in relevant coursework. This form apprizes the CEP department of your intention to pursue the Minor. To declare the Minor with the Graduate School, the student should list all relevant completed coursework on the Program of Study form that is submitted to the Graduate School prior to graduating. The form needs to be signed by the student’s Academic Advisor, Dept. Head, Minor Faculty and Academic College Dean before submitting to the Graduate School. A Minor Faculty member is also required to sit on the committee for the student’s Final Exam. For Doctoral students, this includes orals, dissertation proposal and defense exams.

Program of Study

Students will successfully complete 9 credits of coursework specific to this program of study in order to obtain a Minor in Spanish Counseling. Courses will be taught by culturally competent faculty, adjunct professors, or community mental health professionals in the aforementioned disciplines. Students will choose one course from each of the following components: 1) Counseling language development, 2) Clinical experience, and 3) Sociocultural experiences.

Component #1: Counseling Language Development

CEPY 616 Spanish for Mental Health Professionals This course will help students acquire the necessary Spanish language skills needed to function as Spanish-speaking mental health professionals. The course will cover psychological terminology, concepts, and theories in Spanish. Examination of the professional roles of bilingual mental health professionals and their roles within Latina/o and underserved communities will also be addressed in this course.

CEPY 550 Counseling Theory and Technique This course will assist students in learning and practicing basic, culturally-appropriate micro counseling skills in Spanish through individual, dyad, and small group participation.

Component #2: Clinical Experience

CEPY 598 Special Research Programs/ CEPY 698 Selected Topics This course will require students to spend a minimum of 6 hours per week at a bilingual site, providing counseling, assessment, or supervision services within a variety of clinical settings that serve Spanish-speaking populations. The Minor coordinator must approve all placements. This course will also integrate a Spanish-speaking student process group for bilingual counseling students. In this group, students will have the opportunity to develop bilingual multicultural counseling competencies. Students may also present clinical cases, theoretical perspectives, interventions or techniques in Spanish and receive feedback and support from other bilingual members. A summer semester immersion experience in providing counseling services in Spanish in a Latin American and/or primarily Spanish-speaking country may be substituted for this experience.

Students have the option of completing their clinical hours for this course over 2 semesters if so desired. The course requires an additional 6 clinical hours/week (if taken in one semester) or 3 clinical hours/week (if class is taken over the course of two semesters).

Note: This course is not to replace required practicum or internship experiences necessary for degree completion. Students are allowed to count hours they are accruing for their internship and/or practicum as long as they are (1) enrolled in both courses [598/698 and either 578/675 or 580/684] (2) are meeting the requirements for the 598/698 course [i.e. attending class meetings, etc.] and (3) a separate log is kept documenting work with Spanish speaking clients; this log also has to be signed by both 598/698 instructor and site supervisor

CEPY 670 Behavioral Health Practicum This course will provide students the opportunity to participate in a supervised service-learning experience within community-based, interdisciplinary, primary care settings that serve medically underserved and high-risk groups. Students will each write and present a case study in Spanish regarding a Spanish-speaking client. Students will receive bilingual supervision regarding various topics such as training in Motivational Interviewing and discussion of Spanish-speaking clients from their practicum experience.
MSW 597 Special Topics This course will allow students to develop and practice skills in Spanish relevant to working with children and families in the child welfare system with a focus on the child protection process.

FCST 525 Supervised Clinical Practice This course offers supervised clinical experience in Marriage and Family Therapy.

Component #3: Sociocultural Experiences

SPAN 547 Advanced Hispanic Film/SPAN 548 Advanced U.S.-Hispanic Film Advanced study of major films from Spain and Spanish-America and/or by Hispanics of the U.S.

SPAN 567 Advanced Study in Chicano Literature Study of all genres of Chicano literature.

*All courses outlined in the Program of Study have to be taken face-to-face. However, Spanish Counseling Minor Committee will review individual requests for any exceptions to this requirement.

Communication Disorders

General Information

The NMSU Program in Communication Disorders offers an undergraduate program leading to a Bachelor of Science degree and a graduate program leading to a Master’s degree in Communication Disorders. The Master's degree in Communication Disorders satisfies the educational requirements to obtain state licensure and national certification in Speech-Language Pathology.

Further information regarding the fields of Audiology and Speech-Language Pathology may be obtained on the American Speech-Language-Hearing Association (http://www.asha.org) website. Information about the NM license requirements can be found on the website of the New Mexico Regulations & Licensing Department (http://www.rld.state.nm.us/boards/speech_language_pathology_audiology_and_hearing_aid_dispensing_practices.aspx).

Undergraduate Information

The NMSU undergraduate program in Communication Disorders offers a pre-professional Bachelor of Science degree that prepares students for graduate work in Speech-Language Pathology or Audiology. Students who complete a Bachelor’s degree in Communication Disorders may either go on to complete a Master’s degree in Speech-Language Pathology, complete a doctoral degree in Audiology, or complete additional supervised clinical hours to become a Speech-Language Pathology Assistant (SLPA) or an Apprentice of Speech Language Pathology (ASL). Currently, the State of New Mexico does not license Speech-Language Pathology Assistants, but it may do so in the future.

Students who have declared a major in Communication Disorders are required to successfully complete a minimum of 120 credits for the Bachelor of Science degree in Communication Disorders. This includes a minimum of 54 upper division credits as well as a minimum of 9 credits from an approved list of electives.

Graduate Information

The Department of Communication Disorders at NMSU offers a Master’s degree in Speech-Language Pathology which meets the educational requirements for certification by the American Speech-Language-Hearing Association (ASHA) (https://www.asha.org/#https://wwwashaorg/) as well as the educational requirements for state licensure. Students entering the graduate program with an undergraduate major in Communication Disorders can expect to complete the program in two years (including the summer between the two years) and be awarded a Masters of Arts in Communication Disorders with a specialization in Speech-Language Pathology. To complete this course of study, each student is expected to meet the program’s academic and clinical competency criteria which are aligned with the requirements of state and national certifying bodies for licensure and clinical certification. The graduate program for students without a background in Communication Disorders is generally one year longer because one year of leveling is required.

Information for Prospective Students

The Master of Arts (M.A.) program in Speech-Language Pathology: Communication Disorders at New Mexico State University is accredited by the Council on Academic Accreditation (CAA) in Speech-Language Pathology of the American Speech-Language-Hearing Association (ASHA) (http://www.asha.org/), 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.

Please apply to our graduate program in Communication Disorders via the NMSU Graduate School (https://apply.nmsu.edu/apply/). The deadline for applications is February 1st of each year.

Bachelor Degree(s)

Communication Disorders - Bachelor of Science in Education (p. 1489)
Master Degree(s)

Communication Disorders - Master of Arts (p. 1492)

Interim Department Head: Dr. Heike Lehnert-LeHouillier

**Professors:** Dr. Boutsen; **Associate Professors:** Dr. Lehnert-LeHouillier; **Assistant Professors:** Dr. Mohapatra, Dr. Wilson; **College Assistant Professors:** Mrs. Muñoz, Mrs. Bencomo, Mrs. Lindsay, Mrs. Nuanes, **Emeritus Professors:** Dr. Farmer, Dr. Valdez

Mrs. Bencomo, MA (New Mexico State University): clinical education, speech and language disorders in children;

Dr. Boutsen, Ph.D. (Southern Illinois University): motor speech disorders, voice disorders, fluency disorders, anatomy and physiology of speech mechanisms;

Dr. Lehnert-Lehouiller, Ph.D. (State University of New York at Buffalo): speech science, speech sound disorders, phonetics, autism spectrum disorders;

Mrs. Lindsay, MS (Southwest Texas State University): clinical education, dysphagia;

Dr. Mohapatra, Ph.D. (University of Georgia): acquired neurogenic communication disorders, neural bases of communication, biofeedback training;

Mrs. Muñoz, MA (New Mexico State University): clinical education, dysphagia;

Mrs. Nuanes, MA (New Mexico State University): clinical education, pediatric speech and language disorders;

Dr. Wilson, Ph.D. (University of New Mexico): pediatric language disorders, transcranial direct current stimulation, autism spectrum disorders;

Sign Language Courses

**SIGN 1110. American Sign Language I**

3 Credits (3)

American Sign Language I is an introductory level language course in the language of the American Deaf Culture. Content includes ASL vocabulary and conversational skills; linguistic features of ASL; and skills in narrative/storytelling. In-class activities, comprehension and expressive examinations, narrative and storytelling assignments in addition to semester projects are venues for students to demonstrate their learning. In addition, Deaf Culture and Deaf Community issues are addressed.

**Learning Outcomes**

1. Engage in basic conversations using ASL, such as introducing oneself, exchanging personnel information, and talking about one’s surroundings.
2. Demonstrate the use of grammatical structures, including spatial referencing, use of classifiers, role shifting, ASL syntax, and non-manual signals (NMS).
3. Demonstrate clear sign production using an understanding of sign parameters: handshapes, movement, location, palm orientation, and NMS in targeted lexicon.
4. Demonstrate the use of basic ASL vocabulary and expressions necessary for conversations about real-life situations.
5. Evaluate and provide feedback concerning peers’ and one’s own uses of ASL.
6. Develop culturally-appropriate behaviors and conversation strategies within a variety of contexts for interacting with people who are Deaf.
7. Demonstrate effective use of comprehension and expressive ASL skills through narrative and/or storytelling activities.
8. Describe issues of the American Deaf community and Culture.

**SIGN 1120. American Sign Language II**

3 Credits (3)

American Sign Language II is a continuation course that builds on concepts and skills developed in American Sign Language I. Students gain further exposure to ASL structure and grammar, and Deaf Culture and the Deaf community. Emphasis is on increasing students’ ability to comprehend other signers and express themselves with more elaboration when conversing or presenting in ASL.

**Prerequisite:** SIGN 1110 or consent of instructor.

**Learning Outcomes**

1. Further develop basic conversational skills in ASL, taking on more complicated topics.
2. Apply knowledge of ASL grammar, including classifiers, spatial referencing and agreement, role shifting, and non-manual markers.
3. Develop ASL vocabulary, fingerspelling, number, narrative and storytelling skills.
4. Evaluate and provide feedback concerning peers’ and one’s own uses of ASL.
5. Demonstrate effective use of comprehension and expressive ASL skills through conversation, discussion, narrative and/or storytelling activities.
6. Demonstrate knowledge and appreciation of the American Deaf community and ASL.
7. Through first-hand experience in the American Deaf community and ASL, relate and reflect on perspectives of the community.
SIGN 2110. American Sign Language III  
3 Credits (3)  
This is an intermediate level course in American Sign Language (ASL). Expected areas of intermediate skill and knowledge development include: language comprehension and production, conversational use, narratives, ASL language features and further knowledge of and interaction with Deaf culture and the Deaf community.  
Prerequisite: SIGN 1120.  
Learning Outcomes  
1. Demonstrate intermediate ASL vocabulary, conversation and narrative/storytelling skills.  
2. Demonstrate fundamental ASL features including visual/spatial orientation, constructed dialogue and action, spatial referencing, classifiers, non-manual behaviors and syntax/word order.  
3. Demonstrate appropriate use of cultural behaviors and conversational strategies.  
4. Translate written and spoken English to ASL and vice versa.  
5. Self-evaluate and provide feedback to peers concerning ASL usage.  
6. Examine the culture of the American Deaf community through engaging in community activities and its language.

SIGN 574. American Sign Language III  
3 Credits (3)  
Continuation of ASL II. Focus on more complex grammatical features. Students will comprehend and generate medium length stories, narratives, and discussions including culturally significant topics.  
Prerequisite: SPHS 375 or consent of instructor.

Speech & Hearing Science Courses

SPHS 2110. Introduction to Communication Disorders  
3 Credits (3)  
This introductory course provides an overview of common speech, language, and hearing disorders in children and adults including etiologies, characteristics, prevention, identification, assessment and intervention. The course provides an overview of the field of speech-language pathology and audiology.  
Learning Outcomes  
1. Describe normal human communication anatomy and processes as they relate to speech and language production.  
2. Describe the nature of speech, language, and hearing disorders and differences.  
3. Describe the principles of prevention, assessment and intervention of communication disorders.  
4. List requirements for licensure, certification, and other relevant professional credentials.  
5. Exhibit basic knowledge of contemporary professional issues in speech-language pathology.  
6. List possible psychosocial implications of various communication disorders.  
7. Identify cultural, educational, legal, and ethical issues related to communication disorders.  
8. Describe the scope of practice of speech-language pathologists and audiologists.

SPHS 301. Language Acquisition  
3 Credits (3)  
This course introduces students to the study of the development of language, speech, and communication. Includes language sampling. May be repeated up to 3 credits. Crosslisted with: SPHS 509. Restricted to: C DS,C D majors.  
Prerequisite(s): B or better in SPHS 2110; Cumulative GPA of 3.2 or higher.

SPHS 322. Anatomy and Physiology of Speech Mechanisms  
3 Credits (3)  
Structure and function of systems underlying human speech sound production and processing, including respiratory, phonatory, and articulatory components. May be repeated up to 3 credits. Crosslisted with: SPHS 502. Restricted to: C DS,C D majors.  
Prerequisite(s): B or better in SPHS 2110, SPHS 323, SPHS 422, SPHS 324, and SPHS 301; and minimum 3.2 GPA.

SPHS 323. Phonetics  
3 Credits (3)  
The science of phonetics, including work with the International Phonetic Alphabet. Taught with SPHS 501. May be repeated up to 3 credits. Restricted to: C DS,C D majors.  
Prerequisite(s): B or better in SPHS 2110; Cumulative GPA of 3.2 or better.

SPHS 324. Introduction to Speech Science  
3 Credits (3)  
Basic concepts and theories in acoustics, speech production and speech perception. Includes laboratory experience with instrumental measurement and analysis of speech systems. May be repeated up to 3 credits. Crosslisted with: SPHS 503. Restricted to: C DS,C D majors.  
Prerequisite(s): B or better in SPHS 2110, SPHS 323, SPHS 422; and minimum 3.2 GPA.
SPHS 326. Clinical Methods and Procedures
3 Credits (3)
Guidelines and procedures associated with the clinical and supervisory processes. Provide opportunities to complete the supervised clinical observation requirement for participation in clinical practicum. May be repeated up to 3 credits. Crosslisted with: SPHS 506. Restricted to: C DS,C D majors.
Prerequisite(s): B or better in SPHS 2110, SPHS 323, SPHS 422, SPHS 324, SPHS 301; and minimum 3.2 GPA.

SPHS 421. Speech and Language Disorders
3 Credits (3)
Bases, symptoms, etiologies, and clinical management of issues related to disorders of articulation, phonology, voice and resonance, and fluency. May be repeated up to 3 credits. Crosslisted with: SPHS 504. Restricted to: C DS,C D majors.
Prerequisite(s): B or better in SPHS 2110, SPHS 323, SPHS 422, SPHS 324, and SPHS 301; and minimum 3.2 GPA.

SPHS 422. Audiology
3 Credits (3)
Anatomy and physiology of the auditory system, bases of auditory disorders, and basic audiometric procedures. May be repeated up to 3 credits. Crosslisted with: SPHS 507. Restricted to: C DS,C D majors.
Prerequisite(s): B or better in SPHS 2110, and a minimum of 3.2 GPA.

SPHS 423. Neural Bases of Communication Disorders
3 Credits (3)
Study of the neuroanatomy and neurophysiology of communication and communication disorders. Includes review of the central nervous system and peripheral nervous system relationship to speech motor control, language, and hearing. May be repeated up to 3 credits. Crosslisted with: SPHS 510. Restricted to: C DS,C D majors.
Prerequisite(s): B or better in SPHS 2110, SPHS 301, SPHS 323, SPHS 422, SPHS 324, SPHS 421, SPHS 322, SPHS 326 and minimum 3.0 GPA.

SPHS 424. Aural Rehabilitation
3 Credits (3)
Overview of hearing aids and amplification devices including cochlear implants. Review of the bases and psychosocial aspects of hearing loss. Clinical management of hearing loss consistent with ASHA’s scope of practice for SLPs. May be repeated up to 3 credits. Crosslisted with: SPHS 508. Restricted to: C DS,C D majors.
Prerequisite(s): B or better in SPHS 2110, SPHS 323, SPHS 422, SPHS 324, SPHS 301, SPHS 421, SPHS 322, SPHS 326; and minimum 3.2 GPA.

SPHS 501. Phonetics
3 Credits (3)
The science of phonetics, including work with the International Phonetic Alphabet. Restricted to majors. Same as SPHS 390 with differentiated assignments for graduate students.
Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 502. Anatomy and Physiology of Speech Mechanisms
3 Credits (3)
Structure and function of systems underlying human speech sound production and processing including nervous, respiratory, and articulatory components. Restricted to majors. Same as SPHS 370 with differentiated assignments for graduate students.
Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 503. Speech Science
3 Credits (2+3P)
Basic concepts and theories in acoustics, speech production, and speech perception. Laboratory experience with instrumental measurement and analysis of speech systems. Restricted to majors. Same as SPHS 380 with differentiated assignments for graduate students.
Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 504. Speech and Language Disorders
3 Credits (3)
Prerequisite(s): B or better GPA.

SPHS 505. Research Methods
3 Credits (3)
Introduction to basic qualitative, quantitative, and single subject research methodology in speech-language pathology and audiology. Restricted to majors.
Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 506. Clinical Methods and Procedures
3 Credits (3)
Guidelines and procedures associated with the clinical and supervisory processes. Provide opportunities to complete the supervised clinical observation requirement for participation in clinical practicum. Differentiated assignments for graduate students. Taught with SPHS 326. Restricted to: C DS,C D majors.
Prerequisite(s): B or better GPA.
SPHS 507. Audiology
3 Credits (3)
Anatomy and physiology of the auditory system, bases of auditory disorders, and basic audiometric procedures. Differentiated assignments for graduate students. Taught with SPHS 422. Restricted to: C D, C DS majors.
Prerequisite(s): Minimum of 3.0 GPA.

SPHS 508. Aural Rehabilitation
3 Credits (3)
Prerequisite(s): Minimum 3.0 GPA.

SPHS 509. Language Acquisition
3 Credits (3)
Normal development of communication across the age span. Includes language sampling and analysis. A minimum grade of B- in all graduate courses and a minimum overall GPA of 3.0 required. Taught with SPHS 360 with differentiated assignments for graduate students. Restricted to CD majors andLING majors majors.

SPHS 510. Neural Bases of Communication Disorders
3 Credits (3)
Study of the neuroanatomy and neurophysiology of communication and communication disorders. Includes review of the central nervous system and peripheral nervous system relationship to speech motor control, language, and hearing. Crosslisted with: SPHS 423. Restricted to: CD, CDS majors.

SPHS 521. Professional Issues and Multicultural Practices in Communication Disorders
3 Credits (3)
This course includes a range of topics pertinent to students entering professional practice as speech-language pathologists including current legal, cultural, ethical, and clinical service provision issues. Restricted to: C DS,C D majors.
Prerequisite(s): Minimum of 3.0 GPA.

SPHS 522. Assessment of Communication Disorders
3 Credits (3)
Diagnostic theories and management of communication disorders using standardized and descriptive methodology. Includes the practice of interviewing, testing, and oral and written reporting. Restricted to: C DS,C D majors.
Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 525. Pediatric Language and Disorders
3 Credits (3)
Normal communication development of neonates, infants, toddlers, and preschoolers; etiologies, and treatment of cognitive, linguistic and social elements of communication problems in family systems. May be repeated up to 3 credits. Restricted to: C DS,C D majors.
Prerequisite(s): Minimum grade of B and an overall GPA of 3.0 or higher.

SPHS 530. School Age Language and Disorders
3 Credits (3)
Normal communication-learning development of elementary, secondary, and postsecondary students; etiologies, diagnosis, and treatment of interpersonal communication and language-based academic disorders. May be repeated up to 3 credits. Restricted to: C DS,C D majors.
Prerequisite(s): A minimum grade of B in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 535. Aphasia & Cognitive Linguistic Disorders
3 Credits (3)
Etiologies, diagnosis, assessment, and treatment of adult aphasia and cognitive-linguistic disorders. Restricted to: C DS,C D majors.
Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 541. Advanced Spanish Morpho-Syntax for Education Professionals
3 Credits (3)
This class has been designed for Heritage Speakers of Spanish who work in educational settings. It will cover the essential linguistic theory and fundamental structures of the Spanish language. This includes, but is not limited to, verb morphology, morphosyntactic and syntactic structures. The main goal of this course is to determine what usages fall within the norms of an individual’s speech community, or if there are elements that fall outside those norms.
Prerequisite(s): Students have to be fluent in Spanish as course will be conducted in Spanish.

SPHS 542. Articulation and Phonological Disorders
3 Credits (3)
Advanced study of the symptoms, etiologies, assessment, and clinical management of articulation and phonological disorders including cleft palate and disorders of resonance Restricted to: C DS,C D majors.
Prerequisite(s): A minimum grade of B- in all graduate courses and a minimum overall GPA of 3.0 is required.
SPHS 545. Introduction to Augmentative and Alternative Communication
3 Credits (3)
Assessment and intervention for children and adults with developmental disabilities; Alternative communication strategies and systems for individuals with severe speech and/or language impairments. May be repeated up to 3 credits. Restricted to: C DS, C D majors.
Prerequisite(s): Graduate standing; overall GPA of 3.0.

SPHS 547. Cognitive-Linguistic Communication Disorders
3 Credits (3)
Topics include attention, memory, executive function, and underlying neuropathologies, with emphasis on assessment, diagnosis, prognosis, treatment and recovery processes in cognitive communication disorders related to traumatic brain injury, dementia, and right hemisphere brain damage. May be repeated up to 3 credits. Restricted to: C DS, C D majors.
Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0.

SPHS 548. Best Practices in Bilingual/Multicultural Assessment for Practitioners
3 Credits (3)
The purpose of this course is to provide future speech-language pathologists, educational diagnosticians and special educators with a foundation for evaluating the linguistic, cognitive and academic skills of students from any cultural linguistic background. The course covers a review of the literature on best practices for working with interpreters during assessments. Practitioners will be expected to gather qualitative information about cultural/linguistic and educational histories of school-age children and integrate those results with the results of standardized tests.

SPHS 583. Dysphagia
3 Credits (3)
Study of the anatomy and physiology of swallowing and upper aerodigestive systems. Review of the bases and etiologies of child and adult swallowing disorders, including diagnosis, assessment, and treatment. Restricted to: C DS, C D majors.
Prerequisite(s): A course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 584. Fluency Disorders
3 Credits (3)
Speech fluency development and the disorders of stuttering, cluttering, and neurogenic dysfluency. Restricted to: C DS, C D majors.
Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 585. Motor Speech Disorders
3 Credits (3)
Advanced studies of dysfunction of the nervous system that affect speech. Includes evaluation, diagnosis, and treatment of speech apraxias and dysarthrias. Restricted to: C DS, C D majors.
Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 586. Voice Disorders/Head and Neck Anomalies
3 Credits (3)
Advanced studies of anatomy and physiology of the vocal tract with emphasis on diagnosis, assessment, and treatment of voice disorders, laryngectomy, cleft palate, and other oral-facial anomalies. Restricted to: C DS, C D majors.
Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 589. Practicum in Speech-Language Pathology
1-4 Credits (1-4)
Supervised clinical practice in a variety of speech, language, and hearing disorders. Practicum includes diagnostic, treatment, and management work through direct patient/client contact. Attendance at weekly clinical staff meetings is required. May be repeated up to 15 credits. Restricted to: C DS, C D majors.
Prerequisite(s): Good standing in the graduate school; a course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 590. Clinical Education
1 Credit (1)
This course is specifically designed to target the knowledge base necessary to initiate clinical practicum in the CD Program. The learning objectives are based upon the Council of Academic Accreditation in Audiology and Speech-language Pathology (CAA) standards and knowledge areas. These learning outcomes are developed to assist students in clinical practicum and are specific to the services provided to clients of the NMSU Edgar R. Garrett Speech and Hearing Center. Restricted to: C DS, C D majors.
Corequisite(s): SPHS 589.

Learning Outcomes
1. Demonstrate an understanding of successful strategies to work with families and clients from various clinical settings/cultural backgrounds.
   Demonstrate an understanding of ethical and confidential service delivery. Identify characteristics of properly written clinical reports. Demonstrate skill in oral and written or other forms of communication sufficient for entry into professional practice. Demonstrate knowledge of entry level and advanced certifications, licensure, and other relevant professional credentials.
SPHS 591. Special Topics
1-9 Credits
Individual and/or group study of special topics identified by subtitle. May be repeated up to 9 credits. Restricted to: C DS majors. 
Prerequisite(s): Prior arrangement with faculty; a course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 599. Master’s Thesis
15 Credits
Thesis.

SPHS 640. Externship in Communication Disorders
3-9 Credits (3-9)
This course is designed to provide opportunities for the developing clinician to provide treatment to and evaluations for clients in a full term externship experience under the supervision of a licensed SLP. May be repeated up to 9 credits. Consent of Instructor required. Restricted to: C DS,C D majors.

Communication Disorders - Bachelor of Science in Education

The Communication Disorders curriculum provides specialized preparation for students who plan to enter a graduate program in speech-language pathology or audiology. Students supplement their academic study of typical communication development, communication disorders, and clinical management with observation of the clinical experience in the department’s Edgar R. Garrett Speech and Hearing Center and/or via alternative clinical education such as virtual patients. Students must maintain a B or better in all CD courses and maintain a cumulative GPA of 3.2 or higher, to remain in the program.

The undergraduate program provides approximately one-half of the academic requirements needed for certification by the American Speech-Language-Hearing Association and licensure by the New Mexico Regulations & Licensing Department. Certification and licensure at state and national levels require completion of the master’s degree. Details regarding certification are available from the American Speech-Language-Hearing Association (http://www.asha.org/certification/) (ASHA), and the New Mexico Regulations & Licensing Department (http://www.rld.state.nm.us/boards/speech_language_pathology_audiology_and_hearing_aidDispensing_practices.aspx).

Professional employment opportunities for speech-language pathologists and audiologists are numerous within settings such as school systems, community clinics, medical centers, hospitals, private practice, residential programs, and schools for individuals with disabilities.

Program Requirements

Required coursework (120 credits; minimum 48 upper-division credits)

Electives to meet the 120 minimum credit hours for this degree can either come from any minor that a student chooses to pursue or any other elective courses not counting elsewhere towards the degree. Recommended minors for this degree are Linguistics, Spanish, or CEP.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

SIGN 1120  American Sign Language II  3
or SPAN 1120  Spanish II

Electives, to bring total credits to 120  27
15 credits must be upper-division

Total Credits  120

1  MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G first.
2  See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
3  SPAN 1110 Spanish I/SPAN 1120 Spanish II or an advanced Spanish course
4  Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year
Semester 1  Credits

SPHS 2110  Introduction to Communication Disorders  3
Choose from one of the following:  3
Communication Disorders - Master of Arts

Students entering the graduate program with an undergraduate major in Communication Disorders can expect to complete the program in two years and be awarded a Masters of Arts in Communication Disorders with a specialization in Speech-Language Pathology. The graduate program for students without a Communication Disorders background is generally one year longer because one year of leveling is required. Enrollment in graduate
courses in Communication Disorders is limited to students who have been accepted into the graduate program in Communication Disorders. To complete this course of study, each student is expected to meet the program’s academic and clinical competency criteria which are aligned with the requirements of state and national certifying bodies for licensure and clinical certification. Details regarding certification are available from the American Speech-Language-Hearing Association (http://www.asha.org/certification/) (ASHA), and the New Mexico Regulations & Licensing Department (http://www.rld.state.nm.us/boards/speech_language_pathology_audiology_and_hearing_aid Dispensing_practices.aspx).

The Master of Arts education program in speech-language pathology at New Mexico State University is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association (ASHA), 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.

Program Requirements

The traditional Master's degree plan requires a minimum of 62 graduate credit hours and the completion of at least 400 clinical hours.

Leveling Program

The Leveling Program is designed for students with an undergraduate degree other than Communication Disorders. The graduate courses to be taken during the leveling year are listed below. In addition to these courses, students who did not complete at least one 3 credit hour course in all of the following subjects: Biology, Physics or Chemistry, and Statistics prior to starting the leveling program, should plan on completing these courses as well.

Kinesiology

Undergraduate Program Information

The Department of Kinesiology provides students with the education necessary to pursue careers in allied health sciences (Athletic Training, Medical School, Physician's Assistant, Physical and Occupational Therapy, Chiropractic Medicine, Nursing, Ultrasound, Radiography, etc.) Physical Education,
Dance and a variety of careers in the fitness and wellness industry. Details of the degree programs and their respective concentrations are provided below.

The department also offers minors in Dance and Exercise Science.

**Graduate Program Information**

The PhD in Kinesiology encompasses opportunities for focused study in physiological, biomechanical, psychological, and pedagogical domains of human movement. Program emphasis is placed on the acquisition of skills needed for high quality research and innovative teaching. Students are expected to become proficient in research methods within their respective areas of interests. The program prepares students for postdoctoral or faculty positions in higher education, or positions in applied sport and clinical settings. Students are expected to work with specific faculty members to explore interests in Exercise Physiology, Biomechanics, Strength & Conditioning, Sport Psychology, Motor Behavior, Aging, Physical Education, and Dance.

**Admission**

The Department of Kinesiology offers a Doctorate of Philosophy (PhD) in Kinesiology. To maximize consideration for admittance (for a recommended August start date), candidates should submit applications by January 15 of that same year.

Students are admitted to graduate study on the basis of their potential for achievement in research, scholarship and teaching. The most promising applicants will be accepted. Because the number of students that the department can successfully accommodate is limited, it will not always be possible to admit all qualified applicants. The admissions committee will consider any material that a candidate for admission wishes to present. Application forms and instructions are available here: [http://prospective.nmsu.edu/graduate/apply/index.html](http://prospective.nmsu.edu/graduate/apply/index.html). The minimum application consists of the following:

1. A completed Graduate School admission application.
2. Complete transcripts of all college work, reflecting a bachelors and a masters degree - preferred (or 30 hours of graduate work) in a related field of study, and a minimum cumulative GPA of 3.0 in prior degree programs.
3. Scores on the Graduate Record Examination (GRE) (there is no minimum requirement; however, scores will be considered during the admission process).
4. Three letters of recommendation from professors, employers or others who are qualified to evaluate your potential for successful graduate work.
5. A curriculum vitae or resume.
6. A personal statement explaining how graduate work at NMSU fits your educational and career goals.
7. A reference to the specific member whose work is of particular interest to you.
8. A letter of support from at least one faculty member from the Department of Kinesiology and Dance indicating an interest in guiding you through your program of studies.

**Degrees for the Department**

**Bachelor Degree(s)**

- Dance (DanceSport) - Bachelor of Arts in Dance (p. 1527)
- Kinesiology (Exercise Science) - Bachelor of Science in Kinesiology (p. 1532)
- Kinesiology (Performance Psychology) - Bachelor of Science in Kinesiology (p. 1535)
- Kinesiology (Physical Education) - Bachelor of Science in Kinesiology (p. 1538)

**Master Degree(s)**

- Athletic Training - Master of Science (p. 1543)

**Doctoral Degree(s)**

- Kinesiology - Doctor of Philosophy (p. 1545)

**Minors for the Department**

- Dance - Undergraduate Minor (p. 1541)
- Exercise Science - Undergraduate Minor (p. 1543)

**Faculty and Administration**

**Department Head:** Phillip G. Post, PhD
Graduate Faculty

- Christopher A. Aiken, PhD, Graduate Program Coordinator (Assistant Professor-Motor Behavior, Louisiana State University)
- Joseph M. Berning, PhD, Kinesiology Program Director, (Professor-Exercise Physiology, University of Nebraska)
- Jemin Kim, PhD (Assistant Professor-Biomechanics, Texas Women's University)
- Sang-Rok, Lee, PhD (Assistant Professor-Exercise Physiology, Florida State University)
- Kimberly L. Oliver, PhD (Professor-Physical Education, Virginia Polytechnical Institute)
- Phillip G. Post, PhD (Professor-Sports Psychology, University of Tennessee)
- Larissa True, PhD (Associate Professor-Motor Behavior, Michigan State University)

Instructional Faculty

- Raquel S. Aranda, MS (College Assistant Professor-Physical Education, New Mexico State University)
- Michael Gregory, MA, Clinical Coordinator AT (College Instructor-Athletic Training, New Mexico State University)
- Shon Meyer, MS (College Assistant Professor-Kinesiology, University of Idaho)
- Kimberly O’Connell, MS Athletic Training Program Director, (College Assistant Professor-Athletic Training, California University of Pennsylvania)

Dept Phone: (575) 646-2215

Dance Courses

DANC 1110G. Dance Appreciation
3 Credits (3)
This course introduces the student to the diverse elements that make up the world of dance, including a broad historic overview, roles of the dancer, choreographer and audience, and the evolution of the major genres. Students will learn the fundamentals of dance technique, dance history, and a variety of dance aesthetics. Restricted to: Main campus only.

Learning Outcomes
1. Explain a range of ideas about the place of dance in our society.
2. Identify and apply critical analysis while looking at significant dance works in a range of styles.
3. Identify dance as an aesthetic and social practice and compare/contrast dances across a range of historical periods and locations.
4. Recognize dance as an embodied historical and cultural artifact, as well as a mode of nonverbal expression, within the human experience across historical periods and cultures.
5. Use dance to consider contemporary issues and modes of thought.

DANC 1130. Ballet I
1 Credit (1)
This course is the beginning level of ballet technique. Students learn the basic fundamentally and performance skills of ballet techniques, which may include flexibility, strength, body alignment, coordination, range of motion, vocabulary, and musicality. May be repeated for a maximum of 2 credits.

Learning Outcomes
1. Apply fundamental movements of ballet techniques.
2. Enhance flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, range of motion, and musicality.
3. Employ basic theories of classical ballet placement and proper alignment.
4. Develop basic ballet terminology, variations in timing and changes of facing, and barre and center combinations.
DANC 1131. Introduction to Ballroom Dance
1 Credit (1)
Introduction to ballroom dance for non dance majors. Students will learn basic ballroom technique and partnering work. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

Learning Outcomes
1. learn to dance Figures 1-7 in 3 American Style Ballroom dances
2. develop rhythmic accuracy in movement
3. develop the skills to adapt to a variety of dance partners
4. develop adequate social and recreational dance skills
5. develop proper carriage, poise, and grace that pertain to Ballroom dance
6. learn to recognize Ballroom music and its application for the appropriate dances
7. understand different possibilities for dance variations and their applications to a variety of Ballroom dances
8. understand and appreciate the process of creating original patterns and variations

DANC 2250. Contemporary Dance Ensemble I 
1 Credit (1)
Performance-based instruction for students pursuing a career in contemporary dance. Instruction includes contemporary dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes
1. (Performance) An understanding of the artistry of the dancer
2. (Performance) An understanding of the art and interpretation of choreography
3. (Performance) An improvement of movement performance skill
4. (Performance) An understanding of various dance movement vocabulary
5. (Performance) An increased awareness of stage presence and projection
6. (Performance) An understanding of technical stage production
7. (Production) An understanding of costume design and construction
8. (Production) An understanding of behind the scene workings of a dance performance

DANC 2251. Spanish Dance Ensembles I 
1 Credit (1)
Performance-based instruction for students pursuing a career in dance with an emphasis in Spanish Dance. Instruction includes dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes
1. An understanding of the artistry of the dancer
2. An understanding of the art and interpretation of choreography
3. An improvement of movement performance skill
4. An understanding of various dance movement vocabulary
5. An increased awareness of stage presence and projection
6. An understanding of technical stage production
7. An understanding of behind the scene workings of a dance performance
8. An understanding of the marketing and promotional aspects of performance
9. An understanding of costume design and construction

DANC 2265. Principles of Choreography I 
3 Credits (3)
Solo dance choreography technique. The course must be passed with a grade of C- or higher. Offered only in Fall semester during even years.

Learning Outcomes
1. ability to create original choreographic material for solo work (289) or group work (389), understanding of how to create a movement theme/motif, and ability to take improvisational material and turn it into choreography

DANC 2270. Improvisation I 
2 Credits (2)
Development of movement improvisational skills with complex examination of improvisational structures. Offered only in Fall semester during odd years.

Learning Outcomes
1. An understanding of the movement potential of the body
2. An understanding of the principles of motion
3. An awareness and skill of movement motivation
4. An improvement of static and dynamic balance
5. An understanding of temporal, spatial, effort and motion awareness
6. An understanding of group dynamics
7. An awareness of other media that can motivate movement

DANC 2310. Bronze American Rhythm 
2 Credits (2)
Bronze level American Rhythm patterns, techniques, and partnering with emphasis on elements of dance. May be repeated up to 6 credits.

Learning Outcomes
1. Learn to dance the Bronze DIVIDA Manual in American Rhythm
2. Develop Bronze level dance technique
3. Gain deeper understanding of the Elements of Dance
4. Develop rhythmic accuracy in movement, ability to dance on time discover phrasing
5. Further develop lead follow skills that will enable you to dance at more advanced levels
DANC 2311. Bronze American Smooth  
2 Credits (2)  
Bronze level American Smooth patterns, technique, and partnering with an emphasis on the elements of dance. May be repeated up to 4 credits.  
Learning Outcomes  
1. Learn to dance the Bronze DIVIDA Manual in International Latin  
2. Develop Bronze level dance technique  
3. Gain deeper understanding of the Elements of Dance  
4. Develop rhythmic accuracy in movement, ability to dance on time discover phrasing  
5. Further develop lead follow skills that will enable you to dance at more advanced levels  

DANC 2320. Bronze International Latin  
2 Credits (2)  
This is the style of Latin dance that is danced around the globe and is featured in the World DanceSport Championships. Students will learn the Bronze Level figures and techniques in four (4) International Style dances: Rumba, Cha Cha, Samba & Jive. May be repeated up to 8 credits. Restricted to Las Cruces campus only.  
Learning Outcomes  
1. Learn to dance the Bronze DIVIDA Material for the International Latin Syllabus  
2. Develop Bronze level dance technique  
3. Gain deeper understanding of the Elements of Dance  
4. Develop Smooth accuracy in movement, ability to dance on time discover phrasing  
5. Further develop lead follow skills that will enable you to dance at more advanced levels

DANC 3110. DanceSport Pedagogy: Smooth  
3 Credits (3)  
In this teacher education course, students will begin to develop skills necessary in becoming a successful, professional Ballroom Dance Instructor. Students will gain technical mastery of Bronze level figures in the four (4) American Style Smooth Ballroom Dances to include the Waltz, Foxtrot, Tango and Viennese Waltz. Students will gain practical teaching experience in the area of Group Class Instruction with required in class practicums. May be repeated up to 12 credits. Consent of Instructor required.  
Prerequisite(s): DANC 2311.  
Learning Outcomes  
1. Students will understand several philosophies of teaching  
2. They will gain teaching skills through practical experience.  
3. The students will teach both group and private lessons.  
4. The student will gain knowledge about learning styles.
DANC 3114. Dance Sport II
1 Credit (1)
Advanced performance-based, team formation dance in a variety of Latin and social dances.
Prerequisite: Consent of instructor and audition-based.
Learning Outcomes
1. Strengthen the students’ ability to prepare for show and medleys formation routines, Develop the skills required to learn choreography quickly, commitment to excellence and unity within a team. to proudly representing NMSU

DANC 3130. Ballet Technique III
3 Credits (3)
The study of intermediate/advanced classical ballet technique including vocabulary, history and practical application of functional anatomy.
Prerequisite: DANC 2130 or consent of instructor.
Learning Outcomes
1. A student will learn advanced mastery of ballet skills and be able to demonstrate their skillset through performance

DANC 3130L. Ballet Technique III Lab
1 Credit (1)
This course is designed for the acquisition of intermediate/advanced level ballet technique and skill development. May be repeated up to 2 credits. Consent of Instructor required.
Prerequisite(s): DANC 2130.

DANC 3140. Flamenco III
3 Credits (3)
Advanced study in flamenco dance technique, its cultural history and pedagogy methods. May be repeated up to 12 credits. Consent of Instructor required.

DANC 3140L. Flamenco Dance III Lab
1 Credit (1)
This course is designed for the acquisition of advanced level Flamenco dance technique and skill development. May be repeated up to 2 credits. Consent of Instructor required.

DANC 3142. Classical Spanish Dance III
3 Credits (3)
Advanced study of Classical Spanish Dance with castanets, cultural history, and pedagogy methods. A expanded focus on integration of different classical genres with focus on solo work. May be repeated up to 12 credits. Consent of Instructor required. Prerequisite(s): DANC 2142

DANC 3142L. Spanish Dance III Lab
1 Credit
This course is designed for the acquisition of advanced level of Spanish dance technique and skill development. May be repeated up to 2 credits. Consent of Instructor required.

DANC 3145. Flamenco Structure and Improvisation
3 Credits (3)
A Study of various elements necessary in an improvisational setting in Flamenco. Using a cross section of Flamenco forms as a format. Students study the compass of each Palo, then move to several traditional letras appropriate to these forms.

DANC 3150L. Modern Dance Technique III Lab
1 Credit (1)
This course is designed for the acquisition of intermediate/advanced level modern dance technique and skill development.
Prerequisite: DANC 2150.
Learning Outcomes
1. To advance student skillset in the art of modern dance

DANC 3155. Hip Hop Dance Ensemble II
1 Credit (1)
Advanced performance-based instruction for students pursuing a career in hip hop dance. Instruction includes dance repertory and choreography for stage, commercial/industry, and competitive dance areas. May be repeated up to 4 credits. Consent of Instructor required.

DANC 3157. Advanced Hip Hop Dance
3 Credits (3)
The study of advanced hip hop dance covering West coast and Southern styles with the inclusion of the history and evolution of Hip-Hop dance. May be repeated up to 9 credits. Consent of Instructor required.
Prerequisite(s): DANC 2157.

DANC 3175. Dance Studio Management
3 Credits (3)
The study and practice of studio management. Includes the study of financial procedures, marketing, entrepreneurship, leadership, management, fund-raising, and other related topics. Offered Spring odd years only. May be repeated up to 3 credits.

DANC 3250. Contemporary Dance Ensemble II
1 Credit (1)
Advanced performance-based instruction for students pursuing a career in contemporary dance. Instruction includes contemporary dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 6 credits. Consent of Instructor required.

DANC 3251. Spanish Dance Ensemble II
1 Credit (1)
Performance-based instruction for students pursuing a career in dance with an emphasis in Spanish Dance. Instruction includes dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required.

DANC 3265. Principles of Choreography II
3 Credits (3)
Continued investigation of the choreographic process with an emphasis on group choreography. Course must be passed with a grade of C or higher. Consent of Instructor.
Prerequisite: DANC 2265.
Learning Outcomes
1. To learn advanced concepts associated with choreography of dance

DANC 3310. Silver American Rhythm
3 Credits (3)
Silver level American Rhythm patterns and technique with emphasis on performance.
Prerequisite: DANC 2310.
Learning Outcomes
1. To enhance advanced dance sport skills beyond Bronze Level

DANC 3311. Silver American Smooth
3 Credits (3)
Silver level American Smooth patterns and technique with emphasis on performance.
Prerequisite: DANC 2311.
Learning Outcomes
1. Advance introductory skill levels and enhancing technique towards Gold level

DANC 3320. Silver International Latin
3 Credits (3)
Students will learn Silver Level syllabus figures in four (4) International Style dances: Rumba, Cha Cha, Samba & Jive and Bronze Level figures in Paso Doble. Continued training and practice in International Style Latin dance technique.
Prerequisite: DANC 2320.
Learning Outcomes
1. Learn and work towards mastery for the four different styles of dances in Dance Sport
DANC 3321. Silver International Standard
3 Credits (3)
Learn Silver Level syllabus figures in the five (5) International Style Standard dances: Waltz, Tango, Viennese Waltz, Foxtrot & Quickstep. Students will focus on increased technical understanding to increase their ability in partnering and musicality. May be repeated up to 9 credits. Consent of Instructor required.
Prerequisite(s): DANC 2321.

DANC 3460. Dance For Musical Theater III
3 Credits (3)
This course provides students with an understanding of the Tap and Jazz Dance technique for use in Musical Theater and other performance genres at the intermediate level. This course is designed for students to gain knowledge and understanding of Tap and Jazz Dance as art forms. May be repeated up to 9 credits.
Prerequisite(s): DANC 2460 or consent of instructor.

Learning Outcomes
1. An understanding of traditional styles of dance used for musical theater.
2. An understanding of anatomy, kinesiology, and development of movement principles
3. Improvement of muscular strength, flexibility, and elasticity
4. An understanding of motion awareness and movement vocabulary

DANC 3510V. World Dance
3 Credits (3)
Examination of dance forms from a cross-cultural perspective, focusing on the role of dance in different cultures around the globe. Same as HNRS 347V. May be repeated up to 3 credits.

Students will learn to develop a curriculum design, apply teaching methods, and structure lesson plans for teaching specific dance styles. Course must be passed with a grade of C- or higher.

Learning Outcomes
1. Student will be able to demonstrate how to properly teach a specific dance style.

DANC 4265. Advanced Choreographic Project
1-6 Credits (1-6)
Individual directed studies in choreography with a culminating performance. May be repeated up to 6 credits. Consent of Instructor required.

DANC 4310. Gold American Rhythm
3 Credits (2+2P)
Advanced level American Rhythm dance technique and partnering work with choreography and performance emphasized. Includes cultural history and pedagogy methods.
Prerequisite: DANC 3310.

Learning Outcomes
1. To enhance dance sport skills beyond Silver Rhythm

DANC 4311. Gold American Smooth
3 Credits (3)
Gold level American Smooth technique and choreography with an emphasis on performance and competition dancing.
Prerequisite: DANC 3311.

Learning Outcomes
1. Continue to work towards mastery of dance sport perfection through advanced training

DANC 4320. Gold International Latin
3 Credits (3)
Students will complete all syllabus figures through the Gold level in the Rumba, Cha Cha, Samba, Jive and Paso Doble. Advanced training and practice in International Style Latin dance technique. May be repeated up to 9 credits. Consent of Instructor required.
Prerequisite(s): DANC 3320.
DANC 4321. Gold International Standard
3 Credits (3)
Students will learn Gold Level syllabus figures in the five (5) International Style Standard dances: Waltz, Tango, Viennese Waltz, Foxtrot & Quickstep. Students will focus on physical and cognitive mastery of standard dance technique and elements as well as high-level performance ability, musicality and choreography. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): DANC 3321.

DANC 4610. DanceSport Certification Preparation
3 Credits (3)
The Professional Certification process offers extraordinary benefits to dance teachers, deeply enriching their dancing and teaching, and greatly expanding their career opportunities. This intensive course is designed to fully prepare students in taking the DVIDA and/or ISTD exams in the Smooth, Rhythm, Standard or Latin dances depending on course offered. See subtitle for specific style being taught in schedule of classes. May be repeated up to 12 credits. Consent of Instructor required.

DANC 4710. Senior Culminating Experience
2 Credits (2)
Exit course for graduating seniors. Students will apply comprehensive knowledge of performance and production and/or pedagogy experience, to culminate in a dance production and/or teaching project. May be repeated up to 4 credits. Restricted to: DANC majors.

DANC 4990. Flamenco Practicum
1 Credit (1)
Directed learning experiences for careers in Spanish Dance. May be repeated up to 4 credits. Consent of Instructor required.

DANC 4996. Special Topics
1-3 Credits (1-3)
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes
1. Varies

DANC 4997. Problems
1-6 Credits (1-6)
Problems in dance education, dance pedagogy, dance performance and independent work in their solutions. May be repeated up to 6 credits. Consent of Instructor required.

Learning Outcomes
1. Varies

DANC 5114. DanceSport Ensemble
1 Credit (1)
Advanced Rehearsal and performance of DanceSport choreography with emphasis on formation and competition dances. May be repeated up to 6 credits.

DANC 5130. Advanced Theory of Ballet Technique
1-6 Credits (1-6)
Advanced study of dance pedagogy and theory with practice in ballet technique. May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 4130.

DANC 5140. Advanced Theory of Flamenco Technique
1-6 Credits (1-6)
Advanced study of dance pedagogy and theory with practice in Flamenco technique. May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 3140.

DANC 5142. Advanced Theory of Classical Spanish Dance Technique
3 Credits (3)
Advanced study of dance pedagogy and theory with practice in Classical Spanish Dance technique. May be repeated up to 9 credits. Consent of Instructor required. Crosslisted with: DANC 3142.

DANC 5145. Advanced Theory of Flamenco Dance Structures and Improvisation
3 Credits (3)
The advanced study of various elements necessary in an improvisational setting in Flamenco dance. Using a cross section of Flamenco musical forms as a format. Students study the compass of each palo, then move to several traditional letras appropriate to these forms. May be repeated up to 6 credits. Consent of Instructor required.

DANC 5150. Advanced Theory of Modern Dance Technique
1-6 Credits (1-6)
Advanced study of dance pedagogy and theory with practice in Modern dance technique. May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 4150.
DANC 5155. Advanced Hip Hop Dance Ensemble
1 Credit (1)
Rehearsal and performance of Hip Hop repertory with emphasis on flamenco structures, artistic expression, and athletic versatility. May be repeated up to 6 credits.

DANC 5157. Advanced Theory of Hip Hop Dance Technique
3 Credits (3)
Advanced study and research of Hip Hop dance styles. May be repeated up to 12 credits. Consent of Instructor required.

DANC 5250. Dance Ensemble III
1 Credit (1)
Rehearsal and performance of dance repertory with emphasis on advanced understanding of musicality, dynamic phrasing, artistic expression, and athletic versatility within a broad range of styles. May be repeated up to 4 credits. Consent of Instructor required.

DANC 5251. Advanced Spanish Dance Ensemble
1 Credit (1)
Rehearsal and performance of Spanish Dance repertory with emphasis on flamenco structures, artistic expression, and athletic versatility. May be repeated up to 6 credits.

DANC 5310. Advanced Theory of American Rhythm Technique
1 Credit (1)
Advanced study of dance pedagogy and theory with practice in American Rhythm technique

Learning Outcomes
1. Student will demonstrate advanced techniques in American Rhythm style

DANC 5311. Advanced Theory of American Smooth Technique
1 Credit (1)
Advanced study of dance pedagogy and theory with practice in American Smooth technique

Learning Outcomes
1. Student will be able to demonstration specific skills in American Smooth Techniques

DANC 5320. Advanced Theory of International Style Latin American
1 Credit (1)
Advanced study of International Latin American technique, styling and partnering skills.

Learning Outcomes
1. Student will be able to demonstrate advanced skills in Latin American Dance

DANC 5321. Advanced Theory of International Style Ballroom
1 Credit (1)
Advanced study of International Ballroom technique, styling and partnering skills.

Learning Outcomes
1. Student will be able to demonstrate advanced skills in Ballroom techniques

DANC 5510. Movement Research Investigation
3 Credits (3)
Preparation for writing a master’s thesis or dissertation. Writing of three chapters: Chapter 1- Introduction of topic under review, Chapter 2 - literature review, Chapter 3 – application of the literature review in the teaching or performance profession. May be repeated up to 3 credits. Consent of Instructor required.

DANC 5550. Advanced Theory of Dance Pedagogy
3 Credits (3)
Advanced study of dance pedagogy theory and practice. To be conducted during the students second semester.

Learning Outcomes
1. Student will be able to demonstrate skill sets both academically and through practical demonstration by teaching various age groups in the art of dance

DANC 5710. Dance Administration and Leadership
2 Credits (2)
The study and investigation of both management and leadership theories and how to apply these theories in practice.

DANC 5900. Master’s Thesis
1-6 Credits (1-6)
This course is for graduate dance students who choose to write a thesis instead of a performance or teaching project. May be repeated up to 6 credits. Thesis/Dissertation Grading.
DANC 5992. Directed Studies
1-4 Credits (1-4)
Supervised projects and/or research in theoretical studies, inclusive of community service projects. May be repeated up to 4 credits. Consent of Instructor required.

DANC 5996. Special Topics
1-6 Credits (1-6)
Specific subjects offered in addition to standard academic curriculum. Course title to be announced in the Schedule of Classes. May be repeated up to 6 credits. Consent of Instructor required.

DANC 5998. Dance Internship
2 Credits (2)
Internship opportunities in either dance education, dance performance/production, or dance administration. Internship site determined by both Director of Dance Program and graduate student. Consent of Instructor required.

DANC 6998. Dance Internship II
3 Credits (3)
Internship opportunities in either dance education, dance performance/production, or dance administration. Internship site determined by both Director of Dance Program and graduate student. May be repeated up to 3 credits.

Physical Education Courses

PHED 1110. Dance:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1230. Individual Sport:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1290. Team Sport:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1310. Swim I:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1320. Aqua Fit:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1410. Yoga:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies
PHED 1430. Pilates:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1510. Training:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1620. Fitness:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1630. Career Fitness:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation.
Learning Outcomes
1. Varies

PHED 1670. Aerobics:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1710. Martial Arts:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1830. Running:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation.
Learning Outcomes
1. Varies

PHED 1910. Outdoor Experience
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 2996. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. Each offering will carry appropriate subtitle. May be repeated for a maximum of 6 credits.
Learning Outcomes
1. Varies
Sports Medicine

SPMD 1110. Introduction to Athletic Training
3 Credits (3)
Introduction to the principles of athletic training. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes
1. Understand the historical development of athletic training and sports medicine.
2. Understand the knowledge and experiences needed to become a Certified Athletic Trainer.
3. Understand the specific responsibilities and duties of an athletic trainer.
4. Understand the diverse jobs settings within the profession of athletic training.
5. Understand the relationship between the athletic trainer and the sports medicine team.
6. Understand some of the general and specific injuries and medical conditions that occur in athletics; their causes, signs and symptoms, treatments, rehabilitation, and prevention.
7. Understand some of the contemporary issues and problems facing the athletic training profession.

SPMD 1120. Medical Terminology
3 Credits (3)
Study of the structure of medical language with emphasis on sports medicine-related terminology. To include analysis and interpretation of medical documentation. Restricted to: Las Cruces campus only.

Learning Outcomes
1. Master the fundamentals of word analysis, including the separation of terms into word roots or combining forms, common prefixes, and suffixes.
2. Differentiate types of medical terms and the relationships among terms.
3. Develop a proficiency in the use of physiological and anatomical terms as reflected in medical documents.
4. Master the terms, words, phrases, and symbols that describe the human body in its various states of health and disease, including essential anatomical terms.

SPMD 1190. Clinical Practicum I
2 Credits (2)
Introduction to the clinical aspects of the athletic training education program. Must maintain at least 3.0 GPA. May be repeated up to 4 credits. Consent of Instructor required. Restricted to: Athletic Training majors. Restricted to Las Cruces campus only.

Learning Outcomes
1. The Athletic Training Program application procedures.
2. The ability to perform selected taping and wrapping techniques.
3. Knowledge of HIPAA guidelines, pre-participation physical examinations, environmental illnesses, the history of Athletic Training and its governing bodies, Evidence Based Practice and its implications in the field of athletic training, evaluation procedures for the injured athlete, NMSU AT program and its affiliated clinical sites.
4. Proper documentation for the athletic training environment including SOAP notes.

SPMD 1195. Clinical Practicum II
3 Credits (3)
Athletic training related content and psycho-motor skills are introduced, enhanced, and assessed in the classroom and clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses while providing increased depth of understanding and clinical practice. Must maintain a 3.0 GPA. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Demonstrate knowledge and skill in emergency situation prevention, recognition, and management.
2. Demonstrate proficiency in basic skills of musculoskeletal injury recognition and management.
3. Demonstrate competency in basic pre-participation exam skills, including but not limited to taking vital signs.
4. Demonstrate competency in wound care and first aid.
SPMD 1310. Introduction to Kinesiology
3 Credits (3)
An introduction to the field of Kinesiology which will explore areas such as exercise physiology, sport and exercise psychology, motor behavior, biomechanics, strength and conditioning, exercise prescription, as well as professional and graduate programs, and allied health and applied careers opportunities.

Learning Outcomes

SPMD 1350. Social Foundations of Physical Activity
3 Credits (3)
Historical and cultural foundations and vocational, scientific, and educational data on careers in health education, physical education, and recreation.

Learning Outcomes

1. Improve students' knowledge of foundations of physical education. (Research) (Standard 4 j, k, l, m, o, p)
2. Improve students' abilities to analyze current physical activity issues based on historical, philosophical, sociological, and psychological perspectives. (Research) (Standard 4 i, m, e, g)
3. Improve students' knowledge of and ability to critically analyze how gender, race, social class, sexual orientation, and ability issues affect physical education and performance programs. (Research, Diversity) (Standard 4 j, k, l, m, o; Standard 2 d, g, j, f, k)
4. Improve students' knowledge of forces influencing the development of physical education programs. In particular, attitudes, values, and beliefs about gender, race, social class, sexual orientation, and ability, etc. (Diversity, Practitioners, Reflection, Pedagogy) (Standard 1 a, b, h, l; Standard 4 j, k, l, m, o; Standard 2 a, d, g, j, f, k)
5. Improve students' knowledge of strategies for becoming an advocate in the school and/or community to promote a variety of physical activity opportunities. (Practitioners) (Standard 2 m, n; Standard 3 n, o, p, q, r; Standard 10 d, j, p)
6. Improve students' knowledge of current educational issues and trends. In particular, socio-cultural issues that affect educational, fitness, and sports settings. (Diversity, Research) (Standard 4 j, k, l, m, o, p; Standard 9 a, c, e, f, m, n)
7. Improve students' knowledge of how students' learning is influenced by individual experiences, talents, and prior learning, including language and family/community values and conditions. (Diversity, Research) (Standard 1 b, h, l; Standard 2 d, g, j, k, m, n, o; Standard 3 l)
8. Improve students' knowledge of the impact of international changes on the content of physical education, fitness, and sports programs. (Research) (Standard 4 j, k, l, m, o, p)
9. Improve students' ability to critically analyze how gender, race, sexuality and social class issues affect how we view the body, and how these views can affect students' health and participation in physical education, fitness, and sports programs. (Diversity, Reflection) (Standard 2 d, g, j, f, k, m, o)
10. Improve students' ability to become critically aware of how their feelings, beliefs, and values in relation to gender, race, social class, sexual orientation, and ability issues will affect their abilities to work as professionals in the fields of physical education, sport, or fitness. (Diversity, Reflection) (Standard 2 d, g, j, f, k, m, o)
11. Improve students' knowledge of and ability to critically analyze cultural stereotypes of diverse populations of people. (Diversity) (Standard 2 d, g, j, f, k, m, o)
12. Improve students' knowledge of how cultural stereotypes influence the development of physical education, fitness and sport programs. (Research, Diversity) (Standard 2 d, g, j, f, k, m, o; Standard 4 j, k, m, o, p, q; Standard 8 p)
13. Improve students' knowledge of how groups influence individuals, and how individuals influence groups in a democratic society. (Diversity) (Standard 2 d, g, j, f, k, m, o; Standard 4 m, p)
14. Improve students' abilities to communicate in ways that demonstrate sensitivity to all learners. (Diversity, Effectiveness) (Standard 1 d, h, l; Standard 2 d, g, j, f, k, m, o)
15. Improve students' ability to communicate in ways that demonstrate sensitivity to all learners. (Diversity, Effectiveness) (Standard 1 d, h, l; Standard 2 d, g, j, f, k, m, o)
16. Students will demonstrate through writing the ability to apply the issues discussed in class to their specific fields in ways that benefit society. (Evaluation) (Standard 9 e, g, l, m)
17. Students will develop their ability to take the content from readings and present it in thought provoking ways to their classmates. (Research, Evaluation, Reflection) (Standard 9 e, g, l, m; Standard 10 a, d, h, n)
18. Writing proficiency is required for a passing grade in this course. (Standard 4 l)
19. Improve students' abilities to use computers and other technologies to communicate, network, and/or foster inquiry. (Standard 10 g)
20. Consult professional literature, colleagues, and other resources to develop as a professional. (Standard 10 e, f, h, l, n, r)
SPMD 2130. Emergency Response in Sports Medicine
2 Credits (2)
Designed to provide knowledge and experience in emergency care procedures, blood borne pathogens, and first aid. Students will receive certification in CPR/AED for the Professional Rescuer and in First Aid, upon successful completion of course. May be repeated up to 4 credits. Restricted to Las Cruces campus only.
Prerequisite(s): Consent of Instructor.
Learning Outcomes
1. Identify the individuals involved in the Emergency Response Team
2. Construct the components of an effective emergency Action Plan
3. Assess the scene and patient during an emergency situation
4. Demonstrate proper universal precautions and wound care
5. Demonstrate effective Cardiopulmonary Resuscitation, AED use
6. Demonstrate effective Rescue Breathing Airway Management techniques
7. Demonstrate effective splinting techniques
8. Demonstrate understanding of the techniques utilized in cervical stabilization
9. Identify components of acute care for general medical and orthopedic emergencies.

SPMD 2210. Anatomy and Physiology I
3 Credits (3)
Detailed study of the structure and function of the human musculoskeletal, cardiovascular, respiratory, and peripheral nervous systems. Designed specifically for students interested in allied health professions.
Learning Outcomes
1. The student will learn and identify bones, connective tissue, joints and muscular structures of the human body. The student will study joints and associated structures of the body. The student will learn about skeletal muscle, origins, insertions, and actions. The student will learn about the fundamentals of the nervous system and associated structures. The student will learn about smooth and cardiac muscle and their association actions. The student will learn the structures associated with the cardiovascular system (heart and blood vessels). The student will learn the location of all visceral organs. Evaluation of knowledge is determined through practical identification of anatomical structures via written opened ended exams.

SPMD 2210L. Anatomy and Physiology Laboratory
1 Credit (1P)
Students will engage in activities designed to enhance appreciation of the anatomical structures related to the content areas for SPMD 2210. Restricted to Las Cruces campus only.
Learning Outcomes
1. The student will learn and identify bones, connective tissue, joints and muscular structures of the human body.
2. The student will study joints and associated structures of the body.
3. The student will learn about skeletal muscle, origins, insertions, and actions.
4. The student will learn about the fundamentals of the nervous system and associated structures.
5. The student will learn about smooth and cardiac muscle and their association actions.
6. The student will learn the structures associated with the cardiovascular system (heart and blood vessels).
7. The student will learn the location of all visceral organs.
8. Evaluation of knowledge is determined through practical identification of anatomical structures via written opened ended exams.

SPMD 2250. Fitness for Health and Sport
3 Credits (3)
A study of the fitness needs for health enhancement and sport participation.
Learning Outcomes
1. Recognize the importance of incorporating positive fitness/wellness habits within one’s lifestyle in terms of enhancing longevity, disease prevention, and overall quality of life. Examine various physiological benefits and adaptations to such factors as muscular strength, muscular endurance, cardiovascular fitness, flexibility, and body composition when certain stimuli are applied to each. Assessment of these characteristics will be witnessed primarily in practical experiences within the course’s laboratory settings. Identify current trends and/or health patterns within society in regards to scientific findings, declination in health habits, and increases in health ailments. Compare various nutritional concepts, specifically proper dietary habits and their impact on weight management aspects. Describe the role physical activity and sport specific training play on competitive athletic performance.
SPMD 2310. Career Preparation
1 Credit (1)
From concept to implementation: Career exploration, setting up degree plans, finding graduate programs, developing professional resumes, writing letters of application, seeking letters of recommendation, and interview preparation. Graded: S/U Grading (S/U, Audit).

Learning Outcomes
1. Career opportunities within human movement and allied health fields
2. Chose both a primary and secondary career of their interest
3. Search for appropriate graduate schools to match their career choices
4. Create a plan by aligning their undergraduate curriculum with their career choices
5. Explore additional education (dual majors, minors, and certifications specific to their chosen field)
6. Study and create a professional resume
7. Create a curriculum vita as a historical reference for future job prospects
8. Write a professional letter of application for jobs and school applications
9. Learn how to seek “outstanding” letters of recommendation
10. Study appropriate interview protocol
11. Practice interviews (one on one, panel and group)

SPMD 3010. Orthopedic Examination, Evaluation and Diagnosis of Lower Extremity Injuries
4 Credits (3+1P)
Examines normal human anatomy, mechanisms of athletic injury, and deviation from normal anatomy following athletic injury to the lower extremity. Must maintain at least 3.0 GPA. Consent of Instructor required.

Learning Outcomes
1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the lower extremity
2. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries. Determine and apply therapeutic interventions designed to maximize the patient's participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries.

SPMD 3050. Therapeutic Modalities
4 Credits (4)
The physiological effects, indications, contraindication, dosage, and maintenance of therapeutic modalities related to the treatment of athletic or activity-related injuries. May be repeated up to 4 credits. Consent of Instructor required. Must maintain 2.75 GPA.

Prerequisite(s): Consent of Instructor, SPMD 2210.

Learning Outcomes
1. Demonstrate proper assessment techniques to identify appropriate therapeutic modalities for the treatment of injury and illnesses. Design treatment plans based upon sound clinical assessment and appropriate selection of modalities that address the physiological and psychological needs of the patient. Demonstrate competence with the application of a wide variety of modalities including patient preparation, modality application and modification based upon clinical findings using principles of evidence based practice. Perform appropriate documentation of treatments to include patient history, evaluation, treatment goals, expectations and treatment outcomes. Demonstrate competence with the collection and analysis of baseline and post-treatment data to evaluate and interpret treatment outcomes based upon principles of evidence-based practice.

SPMD 3090. Clinical Practicum III
3 Credits (3)
Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Practice sessions are conducted to assist the student in achieving clinical proficiency skills.
2. Depending on the difficulty level, selected clinical proficiencies will be evaluated in this clinical.
3. For those proficiencies indicated, students will need to show proficiency either in this clinical or in a later clinical class.
Kinesiology

SPMD 3093. Clinical Practicum IV
3 Credits (3)
Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Identify and locate muscles, tendons, ligaments and bony structures. Demonstrate basic evaluation skills, including but not limited to: taking a history, observation, differential diagnoses, palpation, ROM, neurological/circulation, MMT, special tests, clinical impression, plan. Demonstrate taping, bracing skills, appropriate emergency care skills, select and properly fit athletic equipment, appropriate removal of athletic equipment in the event of an emergency, the ability to develop and answer a clinically relevant question.

SPMD 3110. Racquet Sports
2 Credits (2)
Knowledge and skills related to the racquet sports of tennis, badminton, and pickleball with emphasis on developmental strategies and skill performance that influences pedagogical content knowledge. Administrative issues will be addressed.

SPMD 3120. Theory and Technique of Lifelong Outdoor Leisure Activities
2 Credits (2)
Knowledge and skills related to lifelong outdoor leisure activities, including the examination of environmental science and awareness, kinesiology, and fundamental motor skills.

SPMD 3130. Theory and Technique of Sports and Games
2 Credits (2)
Knowledge and skills related to team sports and games, with emphasis on developmental strategies and skill performance that influence pedagogical content knowledge. Administrative issues will also be addressed.

SPMD 3140. Designing Student Centered Afterschool Physical Activity Clubs
3 Credits (3)
Knowledge, skills and field based practical application for creating student centered and student designed after school physical activity clubs.

SPMD 3150. Theory and Technique of Dance and Rhythms
2 Credits (2)
Knowledge and skills related to dance and rhythms, with emphasis on the analysis of dance elements and its role in physical education.

SPMD 3160. Elementary School Physical Education
3 Credits (2+2P)
Methods for teaching physical education at the elementary level. Primary focus on creating a learning environment for the acquisition and enhancement of developmentally appropriate locomotor, manipulative, and nonmanipulative skills. Field experience included. Consent of Instructor required.
Prerequisite(s): GPA of 2.5.

Learning Outcomes
1. All course objectives are linked to the InTASC Teaching Standards
2. Improve your knowledge of K-5 physical education content, disciplinary concepts, and tools of inquiry related to the development of a physically educated person (Standard 4 j, k, l, n; Standard 5 i, Standard 6 j; Standard 7 g, k, l; Standard 8 l; Standard 9 o).
3. Improve your knowledge of and ability to plan instruction based on curriculum goals/objectives and students' experiences. (Standard 1 a, b, d, e, h, i; Standard 2 a, b, c, g, e; Standard 4 j, m, n, o; Standard 5 j, k; Standard 9 a, c, h, l)
4. Improve your ability to design and teach developmentally appropriate K-5 physical education curriculum for diverse learners. (Standard 1 a, b, d, e, h; j; Standard 2 a, b, c, d, f, g, h, j, k, l, m; Standard 4 b, c, d, e, f; Standard 5 b, d, h, r; Standard 7 a, b, c, d, e, g, h, j, k, l, n, q)
5. Improve your knowledge of, and ability to teach a variety of manipulative, nonmanipulative and locomotor skills and concepts. (Standard 7 a, b, c, d, e, g, h, j, k, l, n, q; Standard 8 l)
6. Improve your ability to teach using a variety of strategies such as cooperative learning, problem-based learning, direct instruction, etc. that facilitate learning (Standard 8 a, b, d, e, f, h, l, j, k, l, m, n, s)

SPMD 3210. Anatomy and Physiology II
3 Credits (3)
Detailed study of the structure and function of the human endocrine, immune, digestive, reproductive, integumentary, central nervous and renal systems. Designed specifically for students interested in allied health professions.
Prerequisite: SPMD 2210 or consent of instructor.

Learning Outcomes
1. Students will demonstrate knowledge through testing, practical skills and demonstration an understanding in visceral anatomy and physiological functioning.
SPMD 3210L. Anatomy and Physiology II Lab
1 Credit (1)
The students will develop skills in palpating various bony landmarks as well as origins and insertions of major soft tissues. In addition, problem based learning scenarios will be used to complement the SPMD 3210 lecture material and thereby further students understanding of certain physiologic systems including neural, digestive, reproductive, endocrine, and integumentary.
Prerequisite: SPMD 2210; SPMD 2210L; or approved transfer equivalent.
Learning Outcomes
1. To demonstrate through practical application and demonstration a comprehensive understanding of visceral operations and diseases.

SPMD 3250. Introduction to Exercise Science: Exercise Physiology and Biomechanics
3 Credits (3)
This course serves to provide a broad introduction to both the physiology of exercise and the mechanics of human movement. The conceptual framework of the course will allow for the development of a broad knowledge base regarding these concepts and the latter portions of the course will focus on real world application of the concepts.
Learning Outcomes
1. Students will learn a basic introduction to both exercise physiology and biomechanics and be able to demonstrate their knowledge of the introductory topics by providing real world examples.

SPMD 3310. Lifetime Activities
2 Credits (2)
Knowledge and skills related to the lifetime activities of swimming, weight training, and other fitness promoting activities with emphasis on learning progressions.
Prerequisite(s): GPA 2.5.
Learning Outcomes
1. All course objectives are linked to the InTASC Teaching Standards
2. Improve your ability to design and teach developmentally appropriate fitness lesson plans for diverse learners (e.g. aerobics, yoga, strength training). (Standard 7 a, b, c, l, j Standard 8 a, b, d)
3. Improve your ability to modify instructions, lesson plans and tasks based on students’ strengths and needs. (Standard 1 b, Standard 3 e, Standard 7 b, c, i, j, l, Standard 8 a, b, d)
4. Improve your knowledge of, and ability to teach a variety fitness content (Standard 7 a, g, h, k, l, n)
5. Improve your ability to plan effective lesson plans to insure equity and sensitivity to students with diverse characteristics. This includes structuring a safe, educational environment that facilitates learning for all students. (Standard 3, e, Standard 7 q, i)
6. Improve your ability to use self-assessment and peer-assessment to reflect on your teaching and plan for adaptations/adjustments (Standard 8 b, d, Standard 9 g).
7. Improve your ability to evaluate and modify instructional resources and curriculum to better meet the needs of their students. (Standard 4 f, Standard 7 g, Standard 8 a)

SPMD 3350. Inferential Statistics in Sport and Exercise Science
3 Credits (3)
Statistical concepts and methods basic to experiential research to include normal distribution, z-tests, t-tests, analysis of variance and regression analysis. An understanding of sport and exercise science theory is required for students enrolling in this course
Learning Outcomes
1. Upon successful completion of this course the student will be able to competently assess exercise data using a variety of techniques that include measures of central tendency, variability, distributional assessments, correlation, regression, and mean testing (t-test and ANOVA).

SPMD 3410. Exercise Physiology
3 Credits (3)
Basic physiological principles as they apply to exercise and fitness programs. Laboratory experiences included. Requires 2.75 GPA.
Prerequisite: SPMD 2210 or SPMD 2250; GPA 2.75.
Learning Outcomes
1. To gain knowledge of the structure and function of the body systems (muscle, cardiorespiratory, etc.). To gain knowledge related to the body system in reference to acute bout of exercise (responses), as well as following chronic exposure to exercise (adaptions). To understand laboratory procedures used to study the body system. To be able to integrate knowledge related to the function of each system and apply this information to humans undergoing exercise training.
SPMD 3450. Biomechanics
3 Credits (3)
The application of anatomical, mechanical and electrical concepts to better understand the fundamental nature of human movement.
Prerequisite: SPMD 2210 and GPA of 2.75.
Learning Outcomes
1. Learn the basic anatomical, kinematic, and kinetic concepts
2. Learn how the human body generates mobility
3. Learn the kinematic concepts, laws, and principles that govern the human body motion
4. Learn the kinetic concepts, laws, and principles that govern the human body motion
5. Learn how the forces acting on the body in a fluid and how the human body motion is affected
6. Learn how to utilize the principles and concepts to solve problems

SPMD 3450L. Biomechanics Laboratory
1 Credit (1)
This course serves to provide an introduction to human movement and its analysis. The conceptual framework of the course will allow for the application of anatomical, mechanical, and electrical concepts in order to better understand the fundamental nature of movement.
Prerequisite(s): SPMD 2210; GPA 2.75.
Learning Outcomes
1. Use physical laws of motion to quantitatively analyze human performance.
2. Use physical descriptors of movement to qualitatively analyze human performance.
3. Apply principles of kinetics kinematics to solve problems of human motion.
4. Gain exposure to the various data collection and analysis tools in biomechanics.
5. Apply critical thinking skills to problem solving and writing assignments.
6. Use teamwork to complete an experimental motion analysis projects.

SPMD 3550. Psychology of Sport
3 Credits (3)
Development of coaching techniques to enhance sport performance based on understanding and use of psychological principles.
Prerequisite: GPA 2.75.
Learning Outcomes
1. Identify psychological characteristics associated with peak performance
2. Describe and explain factors practitioners should consider when diagnosing, designing, and implementing a mental training intervention.
3. Recognize and define the psychological constructs of —for example but not limited to —concentration, confidence, motivation, stress/anxiety, and arousal
4. Understand how personality attributes and the environment affect human performance and injury rehabilitation

SPMD 3610. Health and Exercise Psychology
3 Credits (3)
The course examines the reciprocal relationship among physical activity, exercise behavior, and psychological determinants associated with adopting and maintaining an exercise program. Topics include theories of behavioral change, exercise psychology interventions, the benefits/pitfalls of exercise, and psychological factors influencing patient rehabilitation.
Prerequisite(s): GPA 2.75.

SPMD 3650. Motor Development
3 Credits (3)
Covers development of motor skills from infancy through maturity. Focus on the principles of motor development, early motor behavior, stage theory, and assessment. Field experiences will augment lecture and readings.
Prerequisite(s): GPA 2.5.

SPMD 3710. Motor Learning
3 Credits (3)
An examination of the theoretical foundations and related literature that underline the learning, performing, and retention of motor skills with implications for effective teaching and coaching.
Prerequisite(s): GPA 2.5.
Learning Outcomes
1. Assess functional differences between motor skill types
2. Compare motor control theories and how they control human movement
3. Critically evaluate current research in motor learning
4. Assess practice schedules and provide recommendations on how practice might be improved in both therapy and sport settings
5. Compare the pros and cons for retention and transfer testing
6. Examine the influence of attention on skill performance and debate the role of attention on motor skill preparation
SPMD 4010. Orthopedic Examination, Evaluation and Diagnosis of Upper Extremity Injuries
4 Credits (3+1P)
Examines normal human anatomy, mechanisms of athletic injury, and deviation from normal anatomy following athletic injury to the upper extremity. Must maintain a 3.0 GPA. Consent of Instructor required.

Learning Outcomes
1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the upper extremity.
   Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries. Determine a therapeutic intervention designed to maximize the patient’s participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patients’ overall health and quality of life.

SPMD 4015. Therapeutic Exercise
3 Credits (3)
The physiological effects, indications, contraindications, dosage, and maintenance of therapeutic modalities related to the treatment of athletic or activity-related injuries. Must maintain a 3.0 GPA. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes
1. Apply appropriate clinical reasoning to the selection of therapeutic exercises based upon evidence-based practice guidelines, relevant physical findings, indications, contradictions and precautions. Demonstrate appropriate application of therapeutic exercises and techniques including selection, application, patient instruction, and documentation. Design an individualized therapeutic exercise program incorporating appropriate modifications for tissue repair timelines, physiological and psychological factors, and any additional clinical findings. Demonstrate effective assessment skills to determine safe levels of physical activity for patients.

SPMD 4020. Orthopedic Examination, Evaluation and Diagnosis of Core, Spine and Head Injuries
3 Credits (3)
Advanced clinical assessment techniques and applications. Must maintain at least a 3.0 GPA. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Students will incorporate advanced clinical reasoning skills and apply clinical prediction rules as appropriate. Interpret and apply physical examination findings for appropriate treatment or referral. Apply clinical knowledge for diagnosing injuries and illness of the core, spine, head, and face. Implement prevention guidelines associated with sudden death and catastrophic injury in athletics.

SPMD 4025. Pharmacology in Athletic Training
2 Credits (2)
An introduction to general medical conditions and pharmacological applications in the athletic training setting. Emphasis on the laws governing the development and distribution, indications, contraindications, precautions, and interactions of prescription and over-the-counter medications. Must maintain a 3.0 GPA. May be repeated up to 2 credits. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Describe the principles of pharmacology as they relate to the field of sports medicine. Demonstrate the uses and abuses of drugs in sports.
   Formulate a philosophical and ethical base of thinking in reference to the field of athletic training as it relates to pharmacology. Describe federal, state and local laws, regulations and procedures for proper storage, disposal, transportation, dispensing and documentation for prescription and nonprescription medications.

SPMD 4030. Organization and Administration in Athletic Training
3 Credits (3)
An introduction to management, leadership, financial strategies, professional development and legal issues related to the athletic training setting. Must maintain 3.0 GPA. May be repeated up to 3 credits. Restricted to: Athletic Training majors.

Learning Outcomes
1. Demonstrate mastery of health care management concepts. Demonstrate comprehension of legal and ethical issues in Athletic Training and healthcare management. Construct policies and procedures relevant to running an athletic training clinic or organization. Demonstrate basic concepts of management including distribution of financial resources, inventory and athletic training facility design/evaluation. Summarize appropriate human resources policies relevant to athletic training staffing.
SPMD 4090. Clinical Practicum V
3 Credits (3)
Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Utilize critical thinking skills and apply relevant clinical evidence in the evaluation, treatment and rehabilitation of athletic injuries of the upper extremity. Perform a comprehensive evaluation of the upper extremity to include the shoulder, elbow, forearm, wrist and hand; and then design a specific plan of treatment, and rehabilitation program for injuries and conditions of the upper extremity. Demonstrate an understanding of the referral process as warranted in situations dealing with athletic injuries. Demonstrate an understanding of professional communication as it relates to rehabilitation, plan of care documentation and the referral process. Demonstrate an understanding of the time commitment needed to perform as an ATC by completing the clinical hours required for this course.

SPMD 4093. Clinical Practicum VI
3 Credits (3)
Athletic training psycho-motor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Students might complete a general medical rotation with this course. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Recognition of general medical conditions including emergent physical and psychological conditions for intervention, referral or return to play criteria as appropriate. Demonstrate proper clinical examination techniques for the assessment of general medical conditions including signs and symptoms of catastrophic and emergent conditions. Develop and implement prevention strategies for at-risk individuals and large groups. Demonstrate professional communication skills as related to athletic training including both written and verbal communication. Define and utilize evidence-based practice in the clinical decision making process.

SPMD 4095. Clinical Practicum VII
3 Credits (3)
Athletic training psycho-motor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Students may complete a general medical rotation as part of this course. Must maintain 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Be prepared to sit for the Board of Certification (BOC) examination. Confidently understand the BOC exam format, and method of delivery. Meet the requirements to maintain certification, including evidence based practice requirements and continuing education units and their reporting cycles. Demonstrate competence in in the following educational content areas for the practice of Athletic Training: evidence-based practice, prevention and health promotion, clinical examination and diagnosis, acute care of injury and illness, therapeutic interventions, psychosocial strategies and referral, healthcare administration, professional development and responsibility.

SPMD 4098. Advanced Athletic Training I
1-3 Credits (1-3)
Advanced clinical experiences and education in athletic training. Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainer's Association Education Council. May be repeated up to 9 credits. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Describe an advanced clinical setting. Demonstrate advanced clinical reasoning skills. Demonstrate advanced clinical competence in one or more of the domains as described by the National Athletic Trainers Association Education Council.

SPMD 4110. Adapted Physical Education
3 Credits (3)
Selection and scope of corrective activities in posture and body mechanics, and the adaptation of movement activities for the exceptional student.

SPMD 4130. Methods of Teaching Secondary Physical Education
6 Credits (6)
Theoretical and practical applications of curriculum, pedagogy and assessment for teaching secondary physical education. Provides the students opportunities to develop curriculum, teach, and assess student learning through a supervised practicum in both middle and high school physical education settings. Consent of Instructor required.

Prerequisite(s): SPMD 3160.
SPMD 4210. Advanced Exercise Physiology
3 Credits (3)
Detailed study of the integrated response of neuromuscular, cardiovascular, and respiratory systems to acute and chronic exercise, nutrition, and environmental conditions with a strong emphasis on laboratory experiences.
Prerequisite(s): SPMD 3410 and GPA of 2.75 or consent of instructor.
Learning Outcomes
1. Fundamental concepts about nutrition and its application to human performance
2. Advanced understanding of nutrition and its association with human bioenergetics
3. Human bioenergetics and its responsibility for performance enhancement and outcomes
4. Energy transfer and expenditure under various physical and environmental conditions
5. Pulmonary and cardiovascular responses to exercise
6. Cardiovascular and cellular adaptations to altitude

SPMD 4250. Principles of Strength and Conditioning
3 Credits (3)
Application of research, theory, and methods of high-intensity, resistive overload training. Performance-specific topics include management, nutrition. Requires SPMD 2250 or SPMD 3410; GPA of 2.75.
Prerequisite: SPMD 2250 or SPMD 3410: GPA 2.75.
Learning Outcomes
1. Examine both applied and theoretical practices implemented towards various strength and conditioning concepts based on National Strength and Conditioning Association (NSCA) guidelines. Discuss various acute and chronic adaptations to the above said applied and theoretical practices to include, but not limited to, musculoskeletal adaptation, muscular power output, speed and agility characteristics, plyometric training, body composition characteristics, and cardiovascular characteristics, among many others. Recognize strength and conditioning adaptations regarding special populations, such as youth, female, and elderly populations.

SPMD 4250L. Principles of Strength and Conditioning Laboratory
1 Credit (2P)
An applied examination of the theory, principles, rules and regulations associated with various strength and conditioning exercises to include but not limited to Olympic lifting, powerlifting, bodybuilding, plyometrics, speed, agility and speed-endurance development. Lab required for Kinesiology majors. GPA of 2.75.
Prerequisite: SPMD 2250 or SPMD 3410; GPA 2.75.
Learning Outcomes
1. Examine applied practices towards various human performance concepts based on National Strength and Conditioning Association (NSCA) guidelines. Assess various physiological adaptations to the above applied practices, including muscular hypertrophy, muscular power output, speed and agility drills, plyometric training, body composition assessment, and non-traditional training modes, among numerous others. Demonstrate proficiency towards proper administration of performance assessments and exercises to participants of various skill levels as well as possess the capability of instruction and demonstration of said assessments and exercises

SPMD 4350. Exercise Testing and Prescription
3 Credits (3)
This combined lecture and lab class introduces students to the scientific basis for and principles of exercise testing and prescription. The focus is on basic approaches to exercise testing and prescription for healthy adults, while application to some special populations with chronic disease will be discussed.
Prerequisite: SPMD 3410 or consent of instructor; GPA 2.75.
Learning Outcomes
1. Examine the appropriate administration of exercise tests for the assessment of health-related and performance-related fitness. Apply principles pertaining to appropriate exercise prescription for the general population of healthy adults. Analyze the psychological determinants of appropriate exercise programming. Demonstrate the ability of proper diagnosis and interpretation towards a standard 12-lead ECG reading, including heart rates, heart rhythms, and common arrhythmias. Assist every course participant in the preparation processes to sit for any of ACSM's credential-based exams.

SPMD 4410. Exercise for Special Populations
3 Credits (3)
Fundamentals of kinesiology adapted for adults with various diseases and disabilities. Focus will be on the application of exercise assessment and prescription for selected conditions.
Prerequisite: SPMD 3410 or consent of instructor; GPA of 2.75.
Learning Outcomes
1. Pathophysiology of various cardiovascular, pulmonary, metabolic, skeletal muscle, orthopedic, and mental diseases. Diagnostic testing of various diseases. Medical management of various diseases. Exercise testing and prescription for a variety of chronic disease states
SPMD 4450. Pathophysiology and Human Function(s)
3 Credits (3)
Students will discuss basic concepts of pathophysiology such as inflammation & repair, infectious diseases, neoplasms, and diseases of specific physiological systems. In addition, students will discuss a variety of case studies, and in so doing will be able to relate pathophysiologic conditions to symptoms, activity restrictions and disability.
Prerequisite(s): SPMD 2210; SPMD 2210L; SPMD 3410; GPA 2.75.

SPMD 4510. Neurophysiology and Human Function
3 Credits (3)
Students will discuss neurologic control of human movement. Topics will include central and peripheral nervous system functions, with particular emphasis given to somatosensory afferent and motor efferent control. In addition, students will develop an understanding of the techniques employed to assess neurologic function in various patient populations.
Prerequisite(s): SPMD 2210; SPMD 2210L; SPMD 3410; and GPA of 2.75.

SPMD 4550. Exploring Extreme Human Performance
3 Credits (3)
A reading, writing and documentary based course studying human’s quest and the related sacrifices associated with participating in extreme performance activities such as the Olympics, wakeboarding, snowboarding, military special forces, ultra-run events, marathons, etc. Consent of Instructor required.
Prerequisite(s): Consent of instructor and GPA 2.75.

SPMD 4610. Senior Seminar
3 Credits (3)
Capstone course for Kinesiology. Consent of Instructor required and a minimum GPA of 2.75. Students must be in Senior Standing to enroll.
Prerequisite: GPA 2.75.
Learning Outcomes
1. The Student Learning Outcomes are dependent on instructor and specific direction of course with individual group of students. Similar to an independent instruction.

SPMD 4805. Emergency Response
2 Credits (2)
Comprehensive approach to the identification of risk factors, preparation of emergency action plans, and recognition and care of emergency medical conditions including those that may lead to sudden death. This is a hybrid course combining online instructional components and clinical skills experience including clinical safety (blood-borne pathogens, ECC, first-aid, etc), and on-field emergency management. Consent of Instructor required.
Learning Outcomes
1. Identify the individuals involved in the Emergency Response Team
2. Construct the components of an effective Emergency Action Plan.
3. Assess the scene and patient during an emergency situation.
4. Demonstrate proper universal precautions and wound care.
5. Demonstrate effective Cardiopulmonary Resuscitation, AED use.
7. Demonstrate effective splinting techniques.
8. Demonstrate understanding of the techniques utilized in cervical stabilization
9. Identify components of acute care for general medical and orthopedic emergencies

SPMD 4997. Problems
1-3 Credits (1-3)
Independent study in either Kinesiology and/or Athletic Training May be repeated up to 9 credits. Consent of Instructor required.

SPMD 4998. Internship
6 Credits (6P)
A part-time internship in an approved wellness, fitness, athletic, recreation, research lab or other program as agreed upon by the internship supervisor. The student will gain experience in all phases of management and operation. This is a 6-hour internship which can be repeated for an additional 6-credit hours at the same or a different location allowing the student to gain one or multiple field experiences. Field instructor supervision will oversee the students performance. This internship may require relocation to a site outside of the Las Cruces area.
Learning Outcomes
1. Students will apply their academic program didactic knowledge, skills and abilities at a professional site gaining hands-on learning experiences under the supervision of a practicing professional. Students will learn in a working environment such that the internship becomes the capstone of their undergraduate education allowing them practical experience in a career field of their choice.
SPMD 5005. Foundations of Athletic Training
3 Credits (3)
This course provides an introduction to clinical decision making and covers standard techniques and procedures for the evaluation and diagnosis of musculoskeletal injuries and common illnesses, injury prevention concepts, documentation and management. Consent of Instructor required.

Learning Outcomes
1. Demonstration of clinical decision making skills
   Articulation of standard techniques and procedures for evaluation and diagnosis
   Produce standardized documentation of clinical findings.

SPMD 5010. Graduate Athletic Training Seminar I
1-3 Credits (1-3)
Advanced seminar topics in athletic training. Students will explore generalized topics within the field of athletic training under the direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program. Students may engage in teaching and research opportunities in unique areas. Students may explore athletic training topics within the classroom or independently through designated resources. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5015. Graduate Athletic Training Seminar II
1-3 Credits (1-3)
Advanced seminar topics in athletic training. Students will explore more specialized topics within the field of athletic training under the direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program. Students should be prepared to further explore topics previously covered in SPMD 5310 (Graduate Athletic Training Seminar I). Students may engage in teaching and research opportunities in unique areas. Students may explore athletic training topics within the classroom or independently through designated resources. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5020. Graduate Athletic Training Research I
1-3 Credits (1-3)
Advanced research topics in athletic training. Students will explore research and evidence based practices within the field of athletic training. Students will work under the direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program faculty member. Students should be prepared to further explore research topics within a specific discipline with the intent of disseminating and sharing information with the athletic training community. Topics previously covered in SPMD 5310 (Graduate Athletic Training Seminar I) Students may engage in teaching and research opportunities in unique areas. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in assessing and conducting research for the athletic training community.

SPMD 5025. Graduate Athletic Training I
1-3 Credits (1-3)
Advanced clinical experiences and education in athletic training. Students will examine topics in athletic training in conjunction with faculty members within the Commission on the Accreditation of Athletic Training Education (CAATE) Athletic Training Program at New Mexico State University. Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainers’ Association Education Council. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5030. Graduate Athletic Training II
3 Credits (3)
Advanced clinical experiences and education in athletic training. Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainers’ Association Education Council. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.
SPMD 5050. Clinical Education I
3 Credits (3)
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice. Consent of Instructor required.

Learning Outcomes
1. Demonstrate basic evaluation, taping, bracing and emergency care skills. Select and properly fit protective equipment for a variety of injury and sport scenarios. Demonstrate proper equipment removal for emergency care of the injured athlete. Perform a pre-participation examination including physical evaluation, documentation and referral if needed.

SPMD 5120. Lower Extremity Injury Evaluation + Lab
4 Credits (4)
This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the lower extremity. Consent of Instructor required.

Learning Outcomes
1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the lower extremity. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries. Determine and apply therapeutic interventions designed to maximize the patient’s participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries.

SPMD 5150. Clinical Education II
3 Credits (3)
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.

Prerequisite(s): SPMD 5050.

Learning Outcomes
1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor.

SPMD 5180. Therapeutic Interventions I
4 Credits (3+1P)
Study of physical rehabilitation theory and techniques used as therapeutic intervention for orthopedic injuries and conditions.

Learning Outcomes
1. Demonstrate appropriate application techniques for therapeutic modalities to include thermal, electrical, ultrasound and mechanical therapeutic modalities. Demonstrate proper clinical assessment techniques to establish treatment and rehabilitation plans for a variety of orthopedic injuries and conditions including proper documentation procedures. Demonstrate knowledge of the physiological and pathological processes of trauma, wound healing and tissue repair and their role/implications within the therapeutic intervention process.

SPMD 5205. Evidence Based Practice
2 Credits (2)
This course investigates the concepts of evidence based practice as it relates to musculoskeletal assessment, diagnosis and therapeutic interventions with a primary focus on clinician- and patient-oriented outcome measures and appropriate referral decisions. Students will explore primary literature focused on clinical questions related to a comprehensive approach to injury evaluation.

Learning Outcomes
1. Define evidence-based practice as it relates to athletic training clinical practice. Explain the role of evidence in the clinical decision-making process. Describe and differentiate the types of quantitative and qualitative research, research components, and levels of research evidence. Describe a systematic approach (eg, five step approach) to create and answer a clinical question through review and application of existing research. Develop a relevant clinical question using a pre-defined question format (eg, PICO= Patients, Intervention, Comparison, Outcomes; PIO = Patients, Intervention, Outcomes).
SPMD 5220. Upper Extremity Injury Evaluation + Lab
4 Credits (3+1P)
This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the upper extremity. Consent of Instructor required.

Learning Outcomes
1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the upper extremity
   Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries. Determine a therapeutic intervention designed to maximize the patient’s participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patient's overall health and quality of life.

SPMD 5250. Clinical Education III
3 Credits (3)
Integration of clinical competencies during an immersive, supervised, field based experience in athletic training to link theory into practice.
Prerequisite(s): SPMD 5150.
Learning Outcomes
1. Students will be proficient in the day to day operations of an athletic training room. This immersive experience will prepare students for future employment as a full-time athletic trainers. Students will demonstrate skills in all aspects of athletic training including patient-centered care, clinical examination, diagnosis and intervention, prevention, health promotion and wellness and healthcare administration.

SPMD 5280. Therapeutic Interventions II
4 Credits (3+1P)
A detailed study of the physiological effects, indications, contraindication, dosage, and maintenance of modern therapeutic devices related to the treatment and rehabilitation of orthopedic injuries and conditions.
Prerequisite(s): SPMD 5180.
Learning Outcomes
1. Demonstrate proper clinical assessment techniques to establish treatment and rehabilitation plans for a variety of orthopedic injuries and conditions including proper documentation procedures. Demonstrate knowledge of the physiological and pathological processes of trauma, wound healing and tissue repair and their role/implications within the therapeutic intervention process. Design treatment plans based upon sound clinical assessment and appropriate selection of modalities that address the physiological and psychological needs of the patient. Demonstrate competence with the collection and analysis of baseline and post-treatment data to evaluate and interpret treatment outcomes based upon principles of evidence-based practice. Demonstrate competence with the application of a wide variety of modalities including patient preparation, modality application and modification based upon clinical findings using principles of evidence based practice.

SPMD 5310. Inferential Statistics in Sports and Exercise Science
3 Credits (3)
This course serves to provide an introduction to statistical analyses. The conceptual framework of the course will allow for the application of a variety of statistical concepts in order to better understand the nature of data associated with scientific literature publications. Consent of Instructor
Learning Outcomes
1. Upon successful completion of this course the student will be able to competently assess exercise data using a variety of techniques that include measures of central tendency, variability, distributional assessments, correlation, regression, and mean testing (t-test and ANOVA).

SPMD 5350. Principles of Strength and Conditioning
3 Credits (3)
Application of research, theory, and methods of high-intensity, resistance training. Performance-specific topics include management, nutrition, exercise prescription, periodization, lifting techniques, testing, and evaluation. Course will emphasize standards set forth by the National Strength and Conditioning Association preparing students interested in sitting for the NSCA certification examinations. Consent of Instructor
Learning Outcomes
1. Understanding of general physiology and its responses to acute and chronic exercise Understanding of cardiovascular effects of exercise, training and sport Understanding of strength training affects on special populations such as youth, women and the elderly Understanding of musculoskeletal changes from exercise, training and sport Practicality and application of power and strength training Comprehension of training programs and how they pertain to different training aspects Demonstrate principles of plyometrics and training Understand and demonstrate principles of periodization
SPMD 5410. Biomechanics
3 Credits (3)
The application biomechanical analysis of human movement as it relates to human performance through the use of anatomical, mechanical and electrical concepts. Consent of Instructor
Learning Outcomes
1. The student will be able to competently assess physical anatomy, analyze linear and angular forces, examine gait, understand the relationships between kinetics and kinematics, understand how muscle and bone architecture impact human movement, and be familiar with the utilization of various data collection methods used in evaluating and improving human movement.

SPMD 5450. Exercise for Special Populations
3 Credits (3)
Fundamentals of kinesiology adapted for adults with various diseases and disabilities. Focus will be on the application of exercise assessment and prescription for selected conditions. Consent of Instructor
Learning Outcomes
1. To develop an understanding of the pathophysiology of various cardiovascular, pulmonary, metabolic, skeletal muscle, orthopedic, and mental diseases. To provide a medical perspective in the treatment and management of individuals with these conditions in which exercise therapy may be beneficial. To provide a sound understanding of exercise testing and prescription for a variety of chronic disease states. To be able to assess, interpret, and evaluate case studies of diseased individuals and to develop comprehensive rehabilitation programs based on this information. To develop the ability to articulate / present information of various diseases / conditions in a professional manner both formally and in a one on one setting.

SPMD 5510. Psychology of Sport
3 Credits (3)
Development of coaching techniques to enhance sport performance based on understanding and use of psychological principles. Consent of Instructor
Learning Outcomes
1. Identify psychological characteristics associated with peak performance Describe and explain factors practitioners should consider when diagnosing, designing, and implementing a mental training intervention. Recognize and define the psychological constructs of —for example but not limited to —concentration, confidence, motivation, stress/anxiety, and arousal. Understand how personality attributes and the environment affect human performance and injury rehabilitation.

SPMD 5550. Skill Acquisition and Performance
3 Credits (3)
Behavioral and physiological examination factors that influence the acquisition and performance of motor skills. Consent of Instructor
Learning Outcomes
1. Describe and explain the principles and processes underlying skilled performance Know the factors to consider when diagnosing, designing, and assessing learning experiences Understand the elements of an effective instructional plan for skill acquisition

SPMD 6005. Athletic Training Research I
2 Credits (2)
Instruction and development of research skills through the study of published reports and readings in athletic training and related fields. Consent of Instructor required.
Learning Outcomes
1. Describe a systematic approach (eg, five step approach) to create and answer a clinical question through review and application of existing research. Develop skill in utilizing multiple scales for critical appraisal of literature and research studies. Develop a relevant clinical question utilizing a predefined question format and conduct a literature review on the subject. Describe multiple forms of research, research and literature resources and the differences between narrative reviews, systematic reviews and meta analyses. Describe and apply concepts of diagnostic accuracy and clinical prediction rules as they pertain to patient centered care and evidence based practice.

SPMD 6010. Organization and Administration in Athletic Training
2 Credits (2)
Organization and administration of athletic training services including management, leadership, financial, human resources, facility, information technology and risk management.
Learning Outcomes
1. Students will employ values consistent with the NATA code of ethics for all health care administration actions. Demonstrate knowledge of legal, ethical and risk management concepts in athletic training and health care administration. Demonstrate mastery of a variety of health care management concepts. Demonstrate comprehension of fiscal management strategies, resource management and facility design as it relates to athletic training.
SPMD 6020. Evaluation of the Head, Neck, Spine and Torso
3 Credits (3)
This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the head, neck and spine.
Prerequisite(s): SPMD 5220.
Learning Outcomes
1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the head, neck, spine and torso. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries and illnesses. Determine a therapeutic intervention designed to maximize the patient’s participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patients' overall health and quality of life.

SPMD 6050. Clinical Education IV
3 Credits (3)
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite(s): SPMD 5150.
Learning Outcomes
1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor.

SPMD 6110. Professional Preparation
3 Credits (3)
Knowledge and skills for successful pursuit of athletic training credentials, employment and continuing professional competency; emphasis on current topics and issues contributing to the professional preparation of athletic training. Student must be enrolled in their final semester of the MSAT program to enroll in this course.
Learning Outcomes
1. Students will create a profile with the Board of Certification (BOC) in preparation for their BOC Examination Students will analyze their individual strengths and weaknesses through practice examinations in order to prepare for a successful challenge of the BOC Examination Students will demonstrate knowledge of basic human resources policies and procedures and the hiring process for athletic trainers. Students will self-assess professional competence and create professional development plans according to personal and professional goals and requirements.

SPMD 6150. Clinical Education V
3 Credits (3)
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite(s): SPMD 6050.
Learning Outcomes
1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor. Students will demonstrate professional behaviors congruent with the ethical standards of the profession of athletic training. Students will develop, implement, and revise policies that pertain to prevention, preparedness, and response to medical emergencies and other critical incidents.

SPMD 6280. General Medical Conditions & Therapeutic Medications
3 Credits (3)
Pathophysiology, assessment, and appropriate intervention and referral for general medical conditions and disabilities; common diagnostic tests and imaging assessment tools; commonly used therapeutic medications.
Prerequisite(s): SPMD 5280.
Learning Outcomes
1. Recognition of general medical conditions including emergent physical and psychological conditions for intervention, referral or return to play criteria as appropriate. Demonstrate proper clinical examination techniques for the assessment of general medical conditions including signs and symptoms of catastrophic and emergent conditions. Demonstrate knowledge of common therapeutic medications and the general medical conditions they treat within the fields of athletic training and sports medicine. Demonstrate knowledge of the principles of pharmacology, including pharmacokinetics and pharmacodynamics, as they relate to the fields of athletic training and sports medicine. Demonstrate knowledge of federal, state and local laws, regulations and procedures for proper storage, disposal, transportation, dispensing and documentation dealing with prescription and non-prescription medications.
SPMD 6310. The Social Construction of the Body
3 Credits (3)
This course will explore how people’s health and physical activity experiences and choices are often shaped by cultural narratives and expectations of the male and female body. Designed for graduate students in allied health and physical activity professions.

SPMD 6350. Advanced Exercise Physiology
3 Credits (3)
Detailed study of the integrated response of neuromuscular, cardiovascular and respiratory systems to acute and chronic exercise, nutrition and environmental conditions with a strong emphasis on laboratory experience. Consent of Instructor

Learning Outcomes
1. Fundamental concepts about nutrition and it application to human performance
2. Advanced understanding of nutrition and its association with human bioenergetics
3. Human bioenergetics and its responsibility for performance enhancement and outcomes
4. Energy transfer and expenditure under various physical and environmental conditions
5. Pulmonary and cardiovascular responses to exercise
6. Cardiovascular and cellular adaptations to altitude

SPMD 6410. Cardiovascular Physiology
3 Credits (3)
This graduate level course provides an in-depth study of cardiovascular structure and function. The course assumes that students have a strong background in human physiology. Topics include, but are not limited to: cellular structure of the heart and vascular system; cardiac function, including electrophysiology of the heart; vascular function; neurohumoral control of the heart and circulation, organ blood flow, exchange function of the microcirculation; the impact of common cardiovascular diseases on cardiovascular structure and function, and cardiovascular adaptations to chronic exercise. Consent of Instructor

Learning Outcomes
1. The student will demonstrate a comprehensive knowledge cardiovascular structure and function
2. The student will be able to relate common cardiovascular pathophysiology to cardiovascular functional impairments and physical functional limitations.
3. The student will be able to discuss chronic exercise training adaptations on the cardiovascular system and their value as a treatment strategy for cardiovascular diseases.

SPMD 6450. Skeletal Muscle: Structure and Function
3 Credits (3)
Basic muscle morphology and physiology with molecular and cellular adaptations in skeletal muscle as consequences to varying exercise regimens. Consent of Instructor

Learning Outcomes
1. To gain knowledge of the structure and function of skeletal muscle
2. To gain knowledge related to the skeletal muscle in reference to cellular and molecular responses and adaptations to exercise
3. To understand laboratory procedures used to study muscle metabolism
4. To develop ability to scientifically critique published papers and present them in a professional manner

SPMD 6510. Designing Resistance Training Program
3 Credits (3)
Detailed study of the physiological concepts associated with designing resistance-training programs for children, women, seniors, athletic performance and rehabilitation. Consent of Instructor

Learning Outcomes
1. Fundamental components associated with resistance training and exercise prescription
2. Compare and contrast isometric, dynamic, variable, isokinetic, eccentric, concentric resistance training
3. Design programs guided by a needs analysis
4. Demonstrate appropriate techniques and implement systems for training
5. Study physiological adaptations of resistance training for women, children, seniors, athletics and rehabilitation
6. Understand anatomical and physiological changes associated with detraining
7. Integrate components and concepts of resistance training for program design (periodization)
8. Explore alternative training programs

SPMD 6710. Project
1-12 Credits (1-12)
Selected projects for doctoral students. May be repeated up to 12 credits. Consent of Instructor required.

SPMD 6750. Kinesiology Research
1-3 Credits (1-3)
Research to be conducted under the direction of a Kinesiology faculty member. May be repeated up to 15 credits. Consent of Instructor required.

SPMD 6996. Special Topics
1-3 Credits (1-3)
Offered under various subtitles that indicate the subject matter. May be repeated for a maximum of 3 credits per semester and a total of 9 credits overall. May be repeated up to 9 credits. Consent of Instructor required.
SPMD 6999. Capstone Project I
3 Credits (3)
Students will prepare an individualized capstone project
Prerequisite(s): SPMD 5205.

SPMD 7000. Doctoral Dissertation
1-18 Credits (1-18)
Doctoral Dissertation hours to be conducted under the direction of a Kinesiology Faculty. May be repeated up to 18 credits. Thesis/Dissertation Grading.

Name: Phillip G. Post, Academic Department Head
Name: Maggie Karveller, Department Secretary and Administrative Assistant
Office Location: Activity Center Room 204
Phone: (575) 646-2215

Dance (DanceSport) - Bachelor of Arts in Dance

Students must complete all University degree requirements including General Education and Viewing a Wider World coursework. All students are required to take Dance Core Courses (which include, but are limited to, classes from all dance concentrations) and courses from their concentration area. Cross training develops dancers who are well rounded professionals, competitors, and teachers. The B.A. prepares students for a professional performance and/or teaching career, as well as the appropriate background to pursue advanced degrees in teaching, performance, choreography and other related fields. Grades of C- or better are required in Area I: ENGL 1110G Composition I; Area II: Mathematics; as well as Dance Core Courses and Dance Concentration Courses. The College of Education requires a minimum GPA of 2.5 for graduation. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Students must complete a minimum of 120 credits with 48 credits in courses numbered 3000 (300) or above.

DanceSport or Ballroom Dance is the study of partner dancing in four different styles: Social or American Rhythm and Smooth and International Latin American and Standard Ballroom. This includes social dances such as Night Club, Two-Step, Salsa, Swing, Argentine Tango and more. This concentration trains students in dance techniques for careers in dance education (teaching), dance production and professional performance and competition.

The DanceSport concentration consists of 102 credits earned through General Education, VWW, Dance Core, Dance Technique in addition to 18 credits of Electives totaling a minimum of 120 credit hours.

DANC Elective Course(s)  3-10

**Electives, to bring the total credits to minimum of 120**  18

Students can declare a minor from another department to fulfill the elective requirement or take additional DANC courses.

**Total Credits**  120

---

1. See the General Education (p. 123) Section of the catalog for a full list of courses.
2. A Mathematics General Education course is required for the degree but students may need to take any prerequisites needed to enter the Mathematics course of their course.
3. See the Viewing a Wider World (p. 130) Section of the catalog for a full list of courses.
4. Elective credit may vary based on General Education course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
5. Students who choose to complete the elective credits with a Minor from another department/program will have to meet the minimum number of credits that are required for that minor. This may increase the total number of credits for graduation.
# A Suggested Plan of Study for Students- Even Start Year

This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

---

1. These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements.

2. See the General Education (p. 123) section of the catalog for a full list of courses.

3. See the Requirements (p. 1527) tab for a full list of courses that meet the DanceSport Techniques Course requirement.

4. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
Students who choose to complete the elective credits with a Minor from another department/program will have to meet the minimum number of credits that are required for that minor. This may increase the total number of credits for graduation.

*Elective credit could also be more or less than what is listed based on the General Education course selection.

Kinesiology (Exercise Science) - Bachelor of Science in Kinestiology

The Bachelor of Science in Kinesiology degree program can be completed in one of three concentration areas: Exercise Science, Performance Psychology or Physical Education. For the required number of concentration area credit hours see the program descriptions below. Regardless of the concentration, students are required to complete 120 total semester hours for the Kinesiology degree. Additionally, students pursuing a Kinesiology degree will be responsible to ensure that they complete 48 upper division credits (3000 (300) and 4000 (400) level courses). Kinesiology students must maintain a minimum 2.75 GPA in order to enroll in most upper division SPMD courses. ENGL 1110G, Area II courses, Kinesiology Core courses, Concentration Area courses and Approved Electives must be completed with a grade of C- or better.

Successful completion of the Kinesiology degree will support a variety of careers in health sciences, biomedical research, and teaching.

Information about Kinesiology and potential employment opportunities may be obtained at the Department of Kinesiology and Dance in the Activity Center 204, phone 646-2215.

Students must complete all University degree requirements, which include: General Education, Viewing a Wider World, and program specific courses to total a minimum of 120 credits with 48 credits in courses numbered 3000 (300) or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Exercise Science Concentration is the preferred pathway for anyone seeking careers in Allied Health Fields (e.g. Medical Doctor, Doctor Osteopathic, Physical/Occupational Therapy, Chiropractic, Physicians Assistant, Athletic Training, etc.) as well as Human Performance (e.g. Strength and Conditioning, Corporate Fitness, Personal Training)

Departmental Requirements (in addition to Gen.Ed/VWW)
Choose one from the following: 3
A ST 311  Statistical Applications  3
MATH 1350G  Introduction to Statistics  3
MATH 2350G  Statistical Methods  3
SPMD 3350  Inferential Statistics in Sport and Exercise Science  3

Electives, to bring the total credits to 120 5

Total Credits 120-122

1. See the General Education (p. 123) section of the catalog for a full list of courses
2. A Mathematics General Education course is required for the degree but students may need to take any prerequisites needed to enter the course of their choosing first.
3. Students who select A ST 311 Statistical Applications or SPMD 3350 Inferential Statistics in Sport and Exercise Science will need to take an additional General Education course to complete the requirement.
4. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses
5. A list of approved electives can be found on the degree plans. (https://kind.nmsu.edu/kin/)
Degree plans can be found at 1) Center for Academic Advising and Student Support (Garcia Annex), 2) College of Education (O'Donnell Hall) Advising Center, 3) Kinesiology Website (https://kind.nmsu.edu/kin/), 4) Kinesiology Department (Room 204, Activity Center), and/or 5) Program Director: Kinesiology

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Total Credits**: 120-122

1. These courses may have prerequisites and/or co-requisites, and it is the student's responsibility for checking and fulfilling all those requirements.
2. See the General Education (p. 123) section of the catalog for a full list of courses.
3. See the Viewing a Wider World (p. 130) section of the catalog for a full list of courses.
4. Select from approved Department list at https://kind.nmsu.edu/kin/.

### Kinesiology (Performance Psychology) - Bachelor of Science in Kinestiology

The Bachelor of Science in Kinesiology degree program can be completed in one of three concentration areas: Exercise Science, Performance Psychology or Physical Education. For the required number of concentration area credit hours see the program descriptions below. Regardless of the concentration, students are required to complete 120 total semester hours for the Kinesiology degree. Additionally, students pursuing a Kinesiology degree will be responsible to ensure that they complete 48 upper division credits (3000 (300) and 4000 (400) level courses). Kinesiology students must maintain a minimum 2.75 GPA in order to enroll in most upper division SPMD courses. ENGL 1110G, Area II courses, Kinesiology Core courses, Concentration Area courses and Approved Electives must be completed with a grade of C- or better.

Successful completion of the Kinesiology degree will support a variety of careers in health sciences, biomedical research, and teaching.

Information about Kinesiology and potential employment opportunities may be obtained at the Department of Kinesiology and Dance in the Activity Center 204, phone 646-2215.

Students must complete all University degree requirements, which include: General Education, Viewing a Wider World, and program specific courses to total a minimum of 120 credits with 48 credits in courses numbered 3000 (300) or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

With a concentration in Performance Psychology, students can also receive a Minor in Psychology. Official Minor documentation and verification of completion must be approved through the Department of Psychology.

Kinesiology (Physical Education) - Bachelor of Science in Kinestiology

The Bachelor of Science in Kinesiology degree program can be completed in one of three concentration areas: Exercise Science, Performance Psychology or Physical Education. For the required number of concentration area credit hours see the program descriptions below. Regardless of the concentration, students are required to complete 120 total semester hours for the Kinesiology degree. Additionally, students pursuing a Kinesiology degree will be responsible to ensure that they complete 48 upper division credits (3000 (300) and 4000 (400) level courses). Kinesiology students must maintain a minimum 2.75 GPA in order to enroll in most upper division SPMD courses. ENGL 1110G, Area II courses, Kinesiology Core courses, Concentration Area courses and Approved Electives must be completed with a grade of C- or better.

Successful completion of the Kinesiology degree will support a variety of careers in health sciences, biomedical research, and teaching.

Information about Kinesiology and potential employment opportunities may be obtained at the Department of Kinesiology and Dance in the Activity Center 204, phone 646-2215.

Students must complete all University degree requirements, which include: General Education, Viewing a Wider World, and program specific courses to total a minimum of 120 credits with 48 credits in courses numbered 3000 (300) or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

With a concentration in Physical Education and successfully meeting state requirements, students will be eligible to teach in the school system (e.g. Elementary, Middle and High School settings).

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Total Credits 18

1. Official minor documentation must be completed with the Department of Kinesiology and Dance. Upon completion of all coursework, final signature approval must be obtained by the Department Head or Kinesiology Program Director.

2. Many courses above such as SPMD 3410, SPMD 3450, SPMD 3450L, SPMD 3710, SPMD 4210, SPMD 4250, SPMD 4250L, SPMD 4350 and SPMD 4410 all require SPMD 2210 Anatomy and Physiology I as a prerequisite.

Athletic Training - Master of Science

The Master of Science in Athletic Training program will begin admitting students into the program starting Spring 2023 as they move curriculum to align with the change in licensure requirements. Interested students can contact the Athletic Training Program Director, Kim O'Connell (kbrock@nmsu.edu).

The MSAT program at NMSU will consist of a minimum of 60 credit hours of coursework to be completed primarily in the home department of KinD at NMSU through both traditional and hybrid courses. The program provides a two (2) year comprehensive exposure to AT using a three-faceted approach. In developing the proposed MSAT curriculum for NMSU, the curricula of 18 other AT graduate level professional programs (see section 3.5 for a list of schools), along with CAATE educational standards, were reviewed to guide the current MSAT proposal. The three-faceted approach includes the following:

1. In-class components that provide the theoretical and laboratory coursework background in the areas of injury prevention and care, injury evaluation and treatment, and therapeutic interventions of athletic injuries.

2. Clinical components that provide a progressive approach with observation, integrative and immersive experiences in clinical settings both on and off-campus internships.

3. A capstone component that will be the successful challenge of the national Board of Certification (BOC) exam.

A Suggested Plan of Study:

The program follows a cohort model, with students progressing through the required coursework in a specific sequence. Below is a proposed plan of study for the MSAT:

First Year

Semester 1
SUMMER
SPMD 5005  Foundations of Athletic Training  3
SPMD 4805  Emergency Response  2

Credits  5

Semester 2
FALL
SPMD 5050  Clinical Education I  3
SPMD 5120  Lower Extremity Injury Evaluation + Lab  4
SPMD 5180  Therapeutic Interventions I  4
SPMD 5310  Inferential Statistics in Sports and Exercise Science  3

Credits  14

Semester 3
SPRING
SPMD 5150  Clinical Education II  3
SPMD 5220  Upper Extremity Injury Evaluation + Lab  4
SPMD 5280  Therapeutic Interventions II  4
SPMD 6005  Athletic Training Research I  2

Credits  13

Second Year

Semester 1
SUMMER
SPMD 6010  Complete Course Title Organization and Administration in Athletic Training  2
SPMD 5205  Evidence Based Practice  2
SPMD 5250  Clinical Education III  3

Credits  7

Semester 2
FALL
SPMD 6050  Clinical Education IV  3
SPMD 6280  General Medical Conditions & Therapeutic Medications  3
SPMD 6020  Evaluation of the Head, Neck, Spine and Torso  3
SPMD 5510  Psychology of Sport  3

Credits  12

Semester 3
SPMD 6150  Clinical Education V  3
Kinesiology - Doctor of Philosophy

Coursework

The PhD in Kinesiology requires a minimum of 36 credit hours of formal coursework (beyond a masters degree) and an expected 24 credit hours of research and dissertation work. Thus, the minimum expected credit hour accumulation is 60 credit hours.

At least 12 credit hours must come from graduate courses in the department of Kinesiology and Dance, and the student must have at least one course in each of the foundational knowledge content areas (CA) in Kinesiology, including:

1. Relationships among physical activity, health and quality of life
2. Scientific foundations for study of physical activity and human movement
3. Social, cultural and historical context of the study of physical activity
4. Practice of physical activity

At least 12 credit hours must be taken in research methodologies, at least 3 credits of which must be in experimental statistics, and at least 3 credits from a qualitative methods course(s). There are many options for these courses on the NMSU campus that will permit the student to meet this requirement.

The remaining 12 credit hours are taken at the direction of the student’s advisor and committee, and agreed upon at the time of the student’s qualifying exam (see below).

Examinations

Students seeking the Doctor of Philosophy degree in Kinesiology must pass a (1) Qualifying Examination that must be completed before accumulating more than 24 credit hours towards their degree, a (2) Comprehensive Exam including written and/or oral elements that must be completed prior to beginning a final dissertation project, and a (3) Final Exam that features the defense of their final dissertation study.

Dissertation

The candidate for the degree of Doctor in Philosophy in Kinesiology must complete a dissertation in a focused area of study. The student and his/her committee must agree upon the dissertation topic and approval of the dissertation requires consent of the plurality of the student’s committee members. The student must complete a minimum of 18 dissertation credit hours.

Graduate courses currently offered in the department of Kinesiology & Dance

Nursing

Undergraduate Program Information

NMSU’s School of Nursing (SON) offers a Bachelor of Science in Nursing (BSN) degree. The degree plan provides two options to accommodate either the beginning nursing student and the beginning nursing student with a baccalaureate degree in another major. Students graduating from the two options are eligible to take the NCLEX-RN® examination for licensure as a registered nurse upon completion of their program of studies. This BSN degree is also offered at two additional satellite sites at NMSU Grants, NM and NMSU Alamogordo, NM.

The BSN degree program is approved by the New Mexico Board of Nursing and accredited by the Commission on Collegiate Nursing Education (CCNE). Approval by the New Mexico Board of Nursing is required for graduates to be eligible to take the National Council Licensing Examination (NCLEX-RN®) for licensure as a registered nurse. Accreditation by the CCNE assures prospective students and employers that the program has met national education standards.

The NMSU SON is a full member of the New Mexico Nursing Education Consortium (NMNEC) and offers the NMNEC BSN curriculum.

NMSU pre-nursing and transfer students should contact the pre-nursing advisors in the Center for Academic Advising and Student Support (CAASS) at Garcia Center for information on the pre-nursing curriculum. Second degree students should contact the School of Nursing Advising Center (https://schoolofnursing.nmsu.edu/nursing/son-pages/SON-Advising-Center.html) to determine eligibility for the Pathways or Roadrunner options. Contact the School of Nursing Advising Center (https://schoolofnursing.nmsu.edu/nursing/son-pages/SON-Advising-Center.html) for the BSN program application (all options) and information about the HESI A2 Entrance Exam, Military students, and specific questions about the nursing program.

School of Nursing Advising Office: HSS 110, 575-646-7311, nursing@nmsu.edu

Application and Admission Requirements: Traditional 4-year BSN Program

Application and admission requirements for the four-year BSN program are as follows:

1. Obtain admission to NMSU.
2. Satisfy NMSU basic academic competency requirements in English and Math.
3. Completed or in the last semester of nursing prerequisite courses (see BSN degree plan (https://schoolofnursing.nmsu.edu/nursing/son-documents/BSN%20Degree%20Plan%202021-2022.pdf)).
4. Prerequisite science courses must have been completed within the past seven years at the time of application.
5. Minimum nursing prerequisite course GPA 2.75 or above, which includes grades earned from all higher education institutions.
6. Minimum of C-grade in all prerequisite and general education courses.
7. Completion of the HESI-A2 Admission Exam (https://schoolofnursing.nmsu.edu/nursing/son-pages/bsn-program.html) (Biology, Chemistry, Math and all English sections) by the application deadline with a score of >75% in each section.
8. Submit a complete BSN program application and all supporting documents by the program deadline (see below). No incomplete applications will be considered.

Students should meet with a School of Nursing advisor to determine eligibility to apply to the five-semester BSN program and to obtain the BSN program application.

Application deadlines:

- February 1st—for consideration for Fall admission to the nursing major (Las Cruces, Grants and Alamogordo applicants)
- September 1st—for consideration for Spring admission to the nursing major (Las Cruces applicants only).

For more information on the application/admission policies and procedures, please visit the School of Nursing website (https://schoolofnursing.nmsu.edu/nursing/son-pages/bsn-program.html).

NOTES: Admission to the BSN program is competitive and available seats in each class are limited. Admission scores are based primarily on nursing prerequisite GPA and scores on the HESI A2 Entrance Exam. Any applicant not admitted to the nursing major may reapply during the next admission cycle. Applicants for fall semester admission may not finish nursing prerequisites in the summer session immediately preceding the fall semester in which they wish to be admitted.
Application and Admission Requirements: Second Degree Options (Roadrunner and Pathways)

The Nursing Program offers two options for 2nd degree seeking students. Both programs are designed for students who already have a Bachelor's degree in another major but would like to pursue a Bachelor of Science in Nursing (BSN). The Roadrunner option starts in the summer semester and is completed in 19 months. Students in the Pathways option are admitted with the traditional 4-year BSN students in fall and spring semesters. Please refer to the School of Nursing website (https://schoolofnursing.nmsu.edu/nursing/son-pages/2nd-degree-BSN-options.html) for more information about the two options.

Application and admission requirements for the Roadrunner and Pathways BSN options are as follows:

1. Obtain admission to NMSU as a second bachelor's degree-seeking student.
2. Have a minimum GPA of 3.0 on a 4.0 scale for first bachelor's degree.
3. Achieve a B grade in all nursing prerequisite courses: Anatomy and Physiology or A&P I and A&P II (8 credits), Microbiology with lab, and Statistics (3 credits). Roadrunner applicants must have completed Pathophysiology (4-6 credits) prior to the start of the program.
4. Nursing prerequisite courses must not be older than 7 years at the time of application. Pathway applicants must complete at least two prerequisites prior to application. Roadrunner applicants must complete three prerequisites prior to application.
5. Completion of the HESI-A2 Admission Exam (https://schoolofnursing.nmsu.edu/nursing/son-pages/bsn-program.html) (Biology, Chemistry, Math and all English sections) by the application deadline with a score of > 75% in each section.
6. Submit a complete BSN program application and all supporting documents by the program deadline (see below). No incomplete applications will be considered.

Application deadlines:

- February 1st—for consideration for Fall admission to the nursing major (Las Cruces, Grants and Alamogordo Pathways applicants)
- February 1st—for consideration for Summer admission to the nursing major (Las Cruces campus Roadrunner option)
- September 1st—for consideration for Spring admission to the nursing major (Las Cruces Pathways applicants only)

For more information on the application/admission policies and procedures, please visit the School of Nursing website (https://schoolofnursing.nmsu.edu/nursing/son-pages/bsn-program.html). Second degree students must contact an advisor from the NMSU School of Nursing Advising Center (https://schoolofnursing.nmsu.edu/nursing/son-pages/SON-Advising-Center.html).

NOTES: Admission to the BSN program is competitive and available seats in each class are limited. Admission scores are based primarily on nursing prerequisite GPA and scores on the HESI A2 Entrance Exam. Any applicant not admitted to the nursing major may reapply during the next admission cycle. Pathways applicants for fall semester admission may not finish nursing prerequisites in the summer session immediately preceding the fall semester in which they wish to be admitted.

Graduate Program Information

MSN Degree

The Master's of Science in Nursing (MSN) provides graduate level education and training in the field of Nursing Leadership and Administration. Students enrolled in the Nursing Leadership and Administration MSN program acquire the knowledge and experience to assume leadership positions in a wide range of health care systems and fulfill the fundamental requirements to secure middle and top-level administrative positions in health care agencies. The MSN Leadership and Administration degree option is available to nurses who possess an RN license and a Bachelor of Science degree in Nursing (BSN). Courses for this degree are delivered through distance education (i.e., online), which allows nurses to advance their careers while working and remaining in their communities.

Please visit the School of Nursing website (https://schoolofnursing.nmsu.edu/nursing/son-pages/MSN-Program.html) or contact the Nursing Graduate Advisor for more information about application and admission requirements at (575) 646-7770.

Application deadline: July 15th for a fall semester start

DNP Degree

The Doctor of Nursing Practice (DNP) degree is a terminal degree in nursing that focuses on advancing nursing practice directed towards improving nursing care outcomes for individuals, families, communities, and systems. The program emphasizes culturally sensitive practice, evidenced-based practice, and translation of research to practice as it relates to improving the care of individuals, families, groups and communities experiencing or at risk for health disparities. The complexity of health care combined with rapidly increasing knowledge and the need for both evidence-based practice and translation of research to practice support the scholarship goals of the DNP. Students in the DNP program complete a year-long final project. A minimum of 1000 supervised clinical contact hours must be completed for the DNP degree.

MSN-DNP
The post-MSN Doctor of Nursing Practice (DNP) concentration allows persons with a MSN degree to obtain a terminal degree in nursing that builds on current master's programs by providing education in evidence-based practice, quality improvement, leadership, policy advocacy, informatics, and systems thinking to prepare graduates to lead efforts to improve patient outcomes. Nurses with MSN's who are working in both APRN and non-APRN roles are encouraged to apply. Upon admission, a review of supervised contact hours obtained in the MSN degree will be conducted and students will be notified regarding the number of supervised clinical contact hours required in the program to meet the minimum requirement of 1000 supervised contact hours.

**BSN-DNP**

The post-BSN Doctor of Nursing Practice (DNP) option allows baccalaureate-prepared RNs to assume advanced practice nursing (APRN) roles within the health care arena in the following specialty areas: Family Nurse Practitioner and Psychiatric-Mental Health Nurse Practitioner. In this DNP concentration, students must take courses in advanced pathophysiology, advanced assessment, and advanced pharmacology, in addition to specialty courses within their area of study. The clinical training consists of over 1000 supervised clinical contact hours completed in the student's clinical specialty and related areas.

Please visit the School of Nursing website (https://schoolofnursing.nmsu.edu/nursing/son-pages/DNP-Program.html) or contact the Nursing Graduate Advisor for more information about application and admission requirements at (575) 646-7770.

**Application deadline:** March 15th for a fall semester start

**Post-Graduate APRN Certificates**

This program is for currently certified Master’s or doctorally-prepared nurse practitioners, certified nurse midwives, and certified registered nurse anesthetists who wish to obtain the coursework needed to sit for certification in another specialty Post-Graduate certificates are offered in the following specialties: Family Nurse Practitioner and Psychiatric-Mental Health Nurse Practitioner.

Please visit the School of Nursing website (https://schoolofnursing.nmsu.edu/nursing/son-pages/APRN-Program.html) or contact the Nursing Graduate Advisor for more information about application and admission requirements at (575) 646-7770.

**Application deadline:** March 15th for a fall semester start

**PhD in Nursing Science Degree**

The intent of the nursing PhD program is to prepare individuals who can assume leadership roles in academia, to support scholarship in teaching, research, and professional service activities. The focus of the program is on nursing scholarship that promote the development of new knowledge directed at improving nursing care outcomes for individuals, families, communities and systems. Holistic nursing scholarship as it relates to improving the care of individuals, families, groups and communities experiencing or at risk for health disparities is emphasized. Students in the PhD program complete a dissertation.

The School of Nursing is not currently admitting students to the PhD in Nursing Science degree program.

**Degrees for the Department**

**Bachelor Degree(s)**

Nursing - Bachelor of Science in Nursing (p. 1571)

**Master Degree(s)**

Nursing Leadership and Administration - Master of Science in Nursing (Online) (p. 1575)

**Doctoral Degree(s)**

Nursing Practice - Doctor of Nursing Practice (Online) (p. 1577)

Nursing Practice (Family Nurse Practitioner) - Doctor of Nursing Practice (Online) (p. 1577)

Nursing Practice (Population Health and Leadership) - Doctor of Nursing Practice (Online) (MSN-DNP track) (p. 1578)

Nursing Practice (Psychiatric/Mental Health Nurse Practitioner) - Doctor of Nursing Practice (Online) (p. 1579)

**Post Graduate APRN Certificate(s)**

Family Nurse Practitioner - Post-Masters Certificate (APRN) (Online) (p. 1581)

Psychiatric/Mental Health Nurse Practitioner - Post Graduate Certificate (APRN) (Online) (p. 1582)

Alexa Doig, Director of the School of Nursing
New Mexico State University - Las Cruces

Wanda Borges, Associate Director for Graduate Programs

Teresa León, Associate Director for the Undergraduate Program

New Mexico Nursing Education Consortium

NMNC 3110. Introduction to Nursing Concepts
3 Credits (3)
This course introduces the nursing student to the concepts of nursing practice and conceptual learning. Same as NMNC course no.: NMNC 1110. Restricted to: BSN, BSNP, BSNR, NMNC majors. Restricted to Las Cruces campus only.

Learning Outcomes
1. Integrate knowledge from nursing pre- and co-requisites into a conceptual learning model.
2. Apply conceptual learning to select nursing concepts.
3. Define personal values, beliefs, and attitudes about health and wellness.
4. Describe importance of identifying patient safety issues.
5. Describe roles and values of nursing and members of the health care team.
6. Describe standards and regulations that apply to nursing practice.

NMNC 3120. Evidence-Based Practice
3 Credits (3)
The focus of this course is the principles of evidence-based nursing practice. It includes the identification of clinical practice problems, the evaluation of available evidence, and the integration of evidence with clinical expertise and patient preferences in application to practice. Restricted to: NURS majors. Students must be admitted to the nursing program to enroll in this course.

Corequisite(s): NMNC 3110, NMNC 3135.

Learning Outcomes
1. Examine integrating evidence-based practice with diverse patients’ values.
2. Identify clinical practice problems and issues.
3. Explain the research process.
4. Describe how evidence is generated through the research process.
5. Appraise evidence and standards of care that support best clinical outcomes and patient safety.
6. Utilize informatics to access evidence-based practice guidelines.

NMNC 3135. Principles of Nursing Practice
4 Credits (4)
This course introduces the nursing student to the application of concepts through clinical skills in seminar, laboratory, and/or clinical settings. Principles of communication, assessments, safety, and interventions including accurate calculation, measurement, and administration of medications will be included. Same as NMNC course no.: NMNC 1135. Students must be admitted to the nursing program to enroll in this course. May be repeated up to 4 credits. Restricted to: BSN majors only.

Corequisite(s): NMNC 3110, NMNC 3120.

Learning Outcomes
1. Describe the different types and characteristics of communication in professional nursing practice.
2. Utilize the concepts presented in Level One nursing courses in the application to the care of the patient.
3. Demonstrate the principles of safety during the implementation of nursing skills.
4. Demonstrate the learned skills in patient based scenarios.
5. Utilize the nursing process to provide safe and effective care.
NMNC 3210. Health and Illness Concepts I
3 Credits (3)
This course will focus on health and illness concepts across the lifespan. Concepts covered are related to homeostasis/regulation, sexuality/reproductive, protection/movement, and emotional processes. Same as NMNC course no.: NMNC 1210. Restricted to: NURS majors.
Prerequisite(s): NMNC 3110, NMNC 3120 & NMNC 3135.
Corequisite(s): NMNC 3220, NMNC 3230, NMNC 3235.
Learning Outcomes
1. Describe the scope, risk factors, physiologic processes, attributes, and clinical management of selected concepts and exemplars across the lifespan.
2. Discuss evidence-based practices and health care standards of care related to the concepts/exemplars of the course.
3. Explain the collaboration necessary related to the concepts/exemplars of the course.
4. Utilize informatics and resources related to the concepts/exemplars of the course.
5. Integrate considerations of normal physiology and healthy adaptations into nursing practice of patients across the lifespan.

NMNC 3220. Health Care Participant
3 Credits (3)
This course introduces the nursing student to the attributes of the health care participant as an individual, a family, or a community. Same as NMNC course no.: NMNC 1220. Restricted to: NURS majors.
Prerequisite(s): NMNC 3110, NMNC 3120 & NMNC 3135.
Corequisite(s): NMNC 3210, NMNC 3230, NMNC 3235.
Learning Outcomes
1. Identify values, beliefs and attitudes toward health and illness of the health care recipient.
2. Articulate the role of nursing in relation to the health of vulnerable populations and elimination of health disparities.
3. Describe the protective and predictive factors which influence the health of families, groups, communities, and populations.
4. Describe the use of evidence-based practices to guide health teaching, health counseling, screening, outreach, disease and outbreak investigation, referral, and follow-up throughout the lifespan.
5. Describe the use of information and communication technologies in preventive care.
6. Examine the health care and emergence preparedness needs of the local community and in the state of New Mexico.
7. Identify clinical prevention and population-focused interventions with attention to effectiveness, efficiency, cost-effectiveness, and equity.

NMNC 3230. Nursing Pharmacology
3 Credits (3)
This course introduces the nursing student to pharmacologic nursing practice from a conceptual approach. Same as NMNC course no.: NMNC 1230. Restricted to: BSN, BSNP, BSNR, NURS majors.
Prerequisite(s): NMNC 3110, NMNC 3120 & NMNC 3135.
Corequisite(s): NMNC 3210, NMNC 3220, and NMNC 3235.
Learning Outcomes
1. Identify the nurse’s professional role related to pharmacotherapeutics in diverse populations across the lifespan.
2. Identify safety issues and minimize risk potential associated with pharmacotherapeutics and complementary and alternative medicine.
3. Utilize evidence-based information integrating pharmacologic and pathophysiologic concepts to guide medication therapeutics.
4. Describe health care system protocols related to pharmacotherapeutics.
5. Identify methods of communication with the health care team related to pharmacotherapeutics.
6. Utilize informatics systems related pharmacotherapeutics.
7. Describe common classes of drugs that are used in health care, including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics.
NMNC 3235. Assessment and Health Promotion
4 Credits (4)
This course introduces the nursing student to the assessment of and the health promotion for the health care participant as an individual, a family, or a community. This course uses seminar, laboratory and/or clinical settings. Same as NMNC course no.: NMNC 1235. Restricted to: NURS majors.
Prerequisite(s): NMNC 3110, NMNC 3120 & NMNC 3135.
Corequisite(s): NMNC 3210, NMNC 3220, NMNC 3230.
Learning Outcomes
1. Assess physical health including a focus on the health/illness beliefs, values, attitudes, developmental level, functional ability, culture, and spirituality of the participant.
2. Assess family health including a focus on family health history, environmental exposures, and family genetic history to identify current and future health problems.
3. Collaborate with a community to assess their health needs.
4. Utilize community assessment data and evidence-based practice as basis for identifying community health needs.
5. Share community assessment data with other health care professionals to identify needed interventions.
7. Explain the role of the nurse in relation to advocacy for the health care recipient.
8. Analyze education materials for health literacy concerns.

NMNC 4310. Health & Illness Concepts II
3 Credits (3)
This course covers health and illness concepts across the lifespan with the focus on chronic conditions. Concepts covered are related to oxygenation and hemostasis, homeostasis and regulation, protection and movement, and cognition and behavior processes. Same as NMNC course no.: NMNC 2310. Restricted to: NURS majors.
Prerequisite(s): NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, & NMNC 3235.
Corequisite(s): NMNC 4320 & NMNC 4335.
Learning Outcomes
1. Relate the scope, risk factors, physiologic processes, attributes, and clinical management of selected concepts and exemplars across the lifespan.
2. Investigate evidenced-based practice, standards of nursing care, and factors to improve safety related to selected concepts and exemplars.
3. Examine how members of the health care team collaborate in the delivery of care related to selected concepts and exemplars.
4. Discuss available technology for the delivery of nursing care related to selected concepts and exemplars.
5. Apply selected health and illness concepts to the nursing care of patients across the lifespan.

NMNC 4320. Professional Nursing Concepts I
3 Credits (3)
This course covers foundational concepts for professional development, including selected professional attributes and care competencies. Same as NMNC course no.: NMNC 2320. Restricted to: BSN, BSNP, BSNR, NURS majors. Corequisite(s): NMNC 4310 & NMNC 4335.
Prerequisite(s): NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, & NMNC 3235.
Learning Outcomes
1. Examine the ethical values, virtues, principles, and policies that guide the moral delivery of health care.
2. Relate the nurse’s interpretation of patient needs, concerns, and health problems with nursing decisions.
3. Discuss the factors which motivate individuals, groups, and organization to deliver quality nursing care.
4. Determine how interactions of health care team members provide quality patient care.
NMNC 4335. Care of Patients with Chronic Conditions
4 Credits (8P)
The focus of this course is to provide safe, evidence-based nursing care for patients with chronic conditions, across the lifespan in a variety of settings. This course builds upon curricular concepts. This course is a combination of lab and clinical. Same as NMNC course no.: NMNC 2335. Restricted to: BSN, BSNP, BSNR, NURS majors.
**Prerequisite(s):** NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, & NMNC 3235.
**Corequisite(s):** NMNC 4310 & NMNC 4320.
**Learning Outcomes**
1. Demonstrate ethical practice in the delivery of nursing care to patients with chronic conditions.
2. Apply understanding of the principles of safe nursing care for patients with chronic conditions.
3. Demonstrate knowledge of appropriate evidence-based protocols when providing nursing care to patients with chronic conditions.
4. Apply understanding of appropriate health care policy, finance, and regulatory environments in the care of patients with chronic conditions.
5. Communicate effectively with patients with chronic conditions and health care team members.
6. Demonstrate an understanding of the technology used in the care of patients with chronic conditions.
7. Utilize the nursing process to deliver nursing care to patients with chronic conditions.

NMNC 4410. Health & Illness Concepts III
4 Credits (4)
This course will cover health and illness concepts, with the focus on acute conditions across the lifespan. Concepts covered are related to homeostasis/regulation, oxygenation/ hemostasis, protection/ movement, and emotional processes. Same as NMNC course no.: NMNC 2410. Restricted to: BSN, BSNP, BSNR, NURS majors.
**Prerequisite(s):** NURS 360, NURS 361, & NMNC 3120.
**Corequisite(s):** NMNC 4435 & NMNC 4445.
**Learning Outcomes**
1. Anticipate health care participant's risk for potentially harmful situations related to the concepts/exemplars of the course.
2. Integrate evidence-based practices and health care standards of care related to the concepts/exemplars of the course.
3. Differentiate the multiple roles of the health care team related to the concepts/exemplars of the course.
4. Integrate use of appropriate technology related to the concepts/exemplars of the course.
5. Interrelate risk factors, concepts, physiologic processes, patient attributes, and clinical management of the exemplars covered in this course.

NMNC 4435. Clinical Intensive I
4 Credits (4)
This is the first of two Level Four clinical courses in which the student will apply the curricular concepts in the management of care participants with acute conditions across the lifespan. Same as NMNC course no.: NMNC 2435. Restricted to: BSN, BSNP, BSNR, NURS majors.
**Prerequisite(s):** NMNC 4310, NMNC 4320 & NMNC 4335.
**Corequisite(s):** NMNC 4435 & NMNC 4445.
**Learning Outcomes**
1. Integrate nursing practice concepts into their professional nursing practice.
2. Integrate diverse patient values into plan of care for patients with acute illness.
3. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice.
4. Integrate an evidence-based approach in the delivery and evaluation of nursing care to acutely ill patients across the lifespan.
5. Evaluate the use of policies and procedures within the acute care settings.
6. Effectively collaborate with the health care team in the delivery of patient care.
7. Integrate use of appropriate technology for the delivery of nursing care to acutely ill patients.
NMNC 4445. Clinical Intensive II
4 Credits (4)
This is the second of two Level Four clinical courses in which the student will apply the curricular concepts in the management of care participants with acute conditions across the lifespan. Same as NMNEC course no.: NMNEC404. Restricted to: BSN, BSNP, BSNR, NURS majors.
Prerequisite(s): NMNC 4310, NMNC 4320 & NMNC 4335.
Corequisite(s): NMNC 4410 & NMNC 4435.
Learning Outcomes
1. Integrate nursing practice concepts into their professional nursing practice.
2. Integrate diverse patient values into plan of care for patients with acute illness.
3. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice.
4. Integrate an evidence-based approach in the delivery and evaluation of nursing care to acutely ill patients across the lifespan.
5. Evaluate the use of policies and procedures within the acute care setting.
6. Effectively collaborate with the health care team in the delivery of patient care.
7. Integrate use of appropriate technology for the delivery of nursing care to acutely ill patients.

NMNC 4510. Concept Synthesis
3 Credits (3)
This course focuses on the synthesis of curricular concepts in the care of complex patients. Restricted to: BSN, BSNP, BSNR, NURS majors.
Prerequisite(s): NMNC 4410, NMNC 4435 & NMNC 4445.
Corequisite(s): NMNC 4520, NMNC 4535 & NMNC 4545.
Learning Outcomes
1. Synthesize curricular concepts into patient-centered nursing practice that is appropriate for diverse individuals, families, and communities.
2. Synthesize the evidence base into nursing care of patients across the lifespan.
3. Evaluate leadership principles that integrate the application of health care policies and standards.
4. Evaluate effectiveness of interprofessional collaboration in the delivery of health care for quality patient outcomes.
5. Evaluate technologies for the management of information and in the delivery of patient care.

NMNC 4520. Professional Nursing Concepts II
3 Credits (3)
This course covers policy concepts for professional nursing. Restricted to: BSN, BSNP, BSNR, NURS majors.
Prerequisite(s): NMNC 4410, NMNC 4435 & NMNC 4445.
Learning Outcomes
1. Integrate principles of quality improvement and safety into nursing practice within health care organizations and systems.
2. Demonstrate leadership behaviors through the application of policies that apply to health care delivery.
5. Compare and contrast health care policies and evidence-based practice.

NMNC 4535. Clinical Intensive III
4 Credits (4)
The focus of this clinical course is application of the curricular concepts in the management of care participants with complex conditions across the lifespan. Same as NMNEC course no.: NMNEC503. Restricted to: BSN, BSNP, BSNR, NURS majors.
Prerequisite(s): NMNC 4410, NMNC 4435 & NMNC 4445.
Corequisite(s): NMNC 4510, NMNC 4520, & NMNC 4545.
Learning Outcomes
1. Integrate diverse patient values into plan of care for patients with complex illness.
2. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice.
3. Integrate an evidence-based approach in the delivery and evaluation of nursing care to patients with complex illness across the lifespan.
4. Evaluate the use of policies and procedures within the complex care setting.
5. Effectively collaborate with the health care team in the delivery of patient care.
6. Integrate use of appropriate technology for the delivery of nursing care to patients with complex illness.
NMNC 4545. BSN Capstone
4 Credits (4)
The synthesis, integration, and application of concepts to professional nursing practice will be applied in the final clinical course to ensure readiness to enter practice. Restricted to: BSN, BSNP, BSNR, NURS majors.
Prerequisite(s): Successful completion of all previous nursing courses.
Corequisite(s): NMNC 4510, NMNC 4520, & NMNC 4535.
Learning Outcomes
1. Synthesize and integrate nursing practice concepts into their professional nursing practice.
2. Engage in professional nursing practice that is patient-centered and appropriate for diverse individual, families, and communities.
3. Integrate principles of quality improvement and safety into nursing practice within health care organizations and systems.
4. Deliver nursing care that is evidence-based.
5. Demonstrate leadership behaviors through the application of policies that apply to health care delivery.
7. Utilize technologies for the management of information and in the delivery of patient care.

Nursing Courses
NURS 110. Pre-Nursing Freshman Seminar
1 Credit (1)
This Freshman seminar provides an introduction to the university and its resources, an orientation to the pre-nursing curriculum, and overview of concepts for professional nursing practice. Emphasis is placed on exploring the nurse’s role as an integral member of the healthcare team across multiple contexts and settings, and developing a professional identity. Consent of Instructor required.

NURS 120. Introduction to Pharmacology
3 Credits (3)
General principles of pharmacology including methods of administration, effect on the body, interactions with other drugs, and classification of drugs. Focus on the health care provider's role in safe pharmacologic intervention. May be repeated up to 3 credits. Crosslisted with: HIT 120. Restricted to Community Colleges campuses only.

NURS 130. Foundations of Pharmacology
3 Credits (3)
This course provides the nursing student with an introduction to the foundations of pharmacology including: science of drug action, principles of medication administration, accurate calculation of drug doses, medication therapy across the lifespan, application of medications to treat health alterations, normal and adverse responses by the client to medication therapy, medication safety, medication regulation, national patient safety goals, and appropriate nursing interventions to achieve the desired goals of medication therapy. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: Community Colleges only.
Corequisite(s): NURS 147 & NURS 149 Restricted to: NUR majors.

NURS 134. Foundation of Nursing Skills and Assessment
3 Credits (1+6P)
This course provides nursing students with introductory nursing knowledge related to performance of nursing skills and assessment including: techniques of fundamental nursing care, basic and intermediate nursing skills, and foundational physical assessment techniques associated with care across the lifespan. Open to students who have been accepted into the nursing program. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 136 & NURS 137 or permission of the Program Director.

NURS 136. Foundations of Nursing Practice
6 Credits (4+6P)
This course will introduce the nursing student to foundational theoretical concepts of professional nursing practice, the nursing process, and foundational nursing skills. It includes developmental concepts related to clients across the lifespan. Clinical experiences in the simulation lab, long-term care, the community, and rehabilitation settings will provide the student with the opportunity to apply learned skills to provide total care to meet needs of one adult client and to develop care planning skills related to actual problems. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 134, NURS 137.
NURS 137. Care of Geriatric Patient
3 Credits (3)
This course will introduce the nursing student to foundational concepts of age-appropriate/specific care of the older adult who represents the largest population of individuals placing demands on the healthcare system. It includes basic and complex concepts and issues related to care of the older client across the care continuum, provision of cost-effective care in a resource sparse environment. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the nursing program to enroll in this course. Restricted to: NURS majors. Restricted to Community Colleges campuses only.
Corequisite(s): NURS 134 & NURS 136.

NURS 140. Pathophysiology for Allied Health Professionals
3 Credits (3)
Introduction to the nature of disease and its effect on body systems. Deals with the disease processes affecting the human body via an integrated approach to specific disease entities. Includes a review of normal functions of the appropriate body systems. Diseases are studied in relationship to their etiology, pathology, physical signs and symptoms, diagnostic procedures, complication, treatment modalities, and prognosis. Restricted to Allied Health and Health Information Technology majors. Restricted to: Community Colleges only.

NURS 146. Common Health Deviations
6 Credits (4+6P)
Common health deviations and the manner by which they alter various body functions are explored. The role of the licensed practical nurse in assisting clients with common health deviations is presented. Ethical and legal implications and the role of the practical nurse are also considered. The licensed practical nursing student will utilize the application of knowledge to client care situation both in the subacute and acute care settings. The nursing process is presented as guide for coordinating client care. Grade of C or better. May be repeated up to 6 credits. Restricted to: Carlsbad campus only.
Prerequisite(s): NURS 153, NURS 156, NURS 154, NURS 157, and NURS 210 or consent of program director.

NURS 147. Adult Health I
6 Credits (4+6P)
This course focuses on application of the nursing process and theoretical concepts of care for adults with commonly occurring health problems. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to continue development of: prioritization skills, proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, care planning skills related to patient actual, psychosocial, and potential problems in the delivery of total nursing care to meet needs of one adult client. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to Community Colleges campuses only.
Corequisite(s): NURS 130, NURS 147 lab, & NURS 149.

NURS 149. Mental Health Nursing
3 Credits (2+3P)
This course will allow the nursing student to develop skills necessary to provide nursing care for clients with mental health problems in various health care settings including: common mental health disorders, psychosocial dysfunction, psychosocial safety/substance abuse issues, violence, suicide, restraints, developmental age related pathophysiology, psychopharmacology, cultural/religious considerations, grief/loss, promotion of mental health, and therapeutic communication. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to develop ability to develop: proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, care planning skills related to patient actual, psychosocial, and potential problems in the delivery of total nursing care to meet needs of one client across the life span with acute/chronic mental health needs. Students must be concurrently enrolled in both the lecture and lab sections of this course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program in order to enroll in the course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 130, NURS 147, & NURS 149L.

NURS 150. Medical Terminology
3 Credits (3)
Understanding of the basic elements of medical words. Use of medical abbreviations. Same as OEHO 120 and BOT 150. May be repeated up to 3 credits. Crosslisted with: BOT 150, AHS 120 and HIT 150.

NURS 153. Medication and Dosage Calculation
1 Credit (1)
Techniques of dosage calculation for medication and fluid administration. RR applicable. Students must meet NMSU basic skills requirement in mathematics to enroll in this course.
Corequisite(s): NURS 156 and NURS 154.
NURS 154. Physical Assessment
2 Credits (2)
Beginning techniques of physical assessment by systems will be presented using the nursing process as a guide for providing safe client centered care throughout the life span. Grade of C or better is required. May be repeated up to 2 credits. Restricted to: NURSING majors. Restricted to Carlsbad campus only.
Prerequisite(s): BIOL 1130 or BIOL 2210.
Corequisite(s): NURS 153, NURS 156.

NURS 155. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes.

NURS 156. Basic Nursing Theory and Practice
6 Credits (4+6P)
Introduction to the nursing profession and the beginning skills of nursing practice as it relates to normalcy. The nursing process is presented as a means of guiding the student in providing safe client centered care. Ethical and legal aspects of nursing practice are also included. Basic clinical nursing skills will be presented and practiced in the nursing lab. The student will perform these skills with clients in an actual health care setting. May be repeated up to 6 credits. Consent of Program Director requires. Restricted to: NURSING majors. Restricted to Carlsbad campus only.
Corequisite(s): NURS 153, NURS 154.

NURS 157. Maternal/Child Health Deviations
8 Credits (6+6P)
This course introduces the student to the concepts and principles of nursing care of the family from conception to adolescence. Utilizing the assessment, analyzing, planning, and implementation phases of the nursing process (the Care map), the student focuses on the supportive-educative nursing system to assist members of the family in meeting self-care requisites and how they are affected by the health deviations common to each developmental level beginning with conception and ending with adolescence. Knowledge gained in theoretical instruction is then applied to the patient care situation. After an introduction to the necessary clinical skills in the campus laboratory setting, students will participate in clinical experiences with the focus on the family from conception to adolescence. The assessment, analysis, planning, and implementation phases of the nursing process are emphasized as a tool to assist patients in meeting universal and developmental self-care requisites. Utilizing the nursing process, the student provides safe, client-centered care to diverse clients and families. Theoretical instruction is applied to client care situations. Students collaborate with clients, families, and the interdisciplinary team in meeting health care needs. Experiences may occur in the physician’s office, local health department, day care centers, schools, or the hospital. Grade of C or better required. Restricted to: NURSING majors. Restricted to Carlsbad campus only.
Prerequisite: NURS 156, NURS 153, and NURS 154.

Learning Outcomes
1. Determine how values of clients, families and medical personnel impact the involvement of clients in their health care related to maternal/child and pediatric clients. Implement individualized client care utilizing an evidenced based approach related to maternal/child and pediatric clients. Choose health protection, health promotion, and disease prevention strategies in the care of maternal/child and pediatric clients. Apply the scope, risk factors, physiologic processes, and clinical management strategies to maternal/child and pediatric clients. Give examples of significant information to report to other disciplines. Apply the principles of delegation in the provision of client care with maternal/child and pediatric clients. Utilize evidenced based information to implement a plan of care and employ nursing interventions for maternal/child and pediatric clients. Use the principles of ethical practice in the delivery of nursing care for maternal/child and pediatric clients. Apply policies, procedures and standards of care related to maternal/child and pediatrics in the provision of client care. Apply nursing interventions to reduce risk of harm to self and others related to maternal/child and pediatric clients. Choose available technology for delivery of nursing care related to maternal/child and pediatric clients.

NURS 201. Special Topics
1-4 Credits
Specific topics to be announced in the Schedule of Classes. May be repeated for a maximum of 10 credits. Restricted to: Community Colleges only.
Prerequisite: admission to the nursing program.

NURS 209. Independent Study
1-4 Credits
Individual studies to meet identified student needs. May be repeated for a maximum of 10 credits. Restricted to: Community Colleges only.
Prerequisite: admission to the nursing program.
NURS 210. Pharmacological Requisites of the Childbearing Family
1 Credit (1)
Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care will be discussed focusing on medications commonly utilized with the childbearing family. Medication classes to be discussed include labor and delivery, analgesic, vitamins, respiratory, gynecological, endocrine, and anti-microbial/anti-infective drugs. Grade of C or better required.
Prerequisite(s): NURS 153, NURS 154 and NURS 156.
Corequisite(s): NURS 157.
Learning Outcomes
1. Effective communication skills in reading, writing, listening, and speaking. Basic critical thinking skills including problem identification, evidence acquisition, evidence evaluation, and reasoning/conclusion. An understanding of personal and social responsibility. An ability to apply the fundamental concepts of quantitative reasoning in mathematics and science. Appropriate information and digital literacy, and skills for personal and professional use.

NURS 211. Pharmacological Requisites of Simple Health Deviations
1 Credit (1)
Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care are addressed focusing on medications related to the psychiatric, gastrointestinal, musculoskeletal, gynecological, hematological, and anti-neoplastic client. Grade of C or better required. Restricted to: Carlsbad campus only.
Prerequisite(s): BIOL 2210 and BIOL 2225 and NURS 153, NURS 154, NURS 156, NURS 157 and NURS 210.
Corequisite(s): NURS 246 and NURS 258.

NURS 212. Pharmacological Requisites of Complex Health Deviations
1 Credit (1)
Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care is examined focusing on medications related to complex health deviations. Drug classes to be discussed include cardiovascular, renal, endocrine, and neurological. Grade of C or better required.
Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 246, NURS 258, NURS 210 and NURS 211.
Corequisite(s): NURS 256 and NURS 260.
Learning Outcomes
1. Apply principles of teaching/learning in educating clients on the use, adverse effects and interactions of pharmacotherapeutic agents used to treat complex health deviations. Collaborate with members of the health care team in the delivery of pharmacotherapeutics to clients with complex health deviations. Give examples of commonly prescribed drugs used to treat clients with complex health deviations and related pharmacokinetics and pharmacodynamics. Discuss the relationship between the use of pharmacotherapeutics and the treatment of disease in clients with complex health deviations. Identify safety issues and minimize risk potential associated with pharmacotherapeutics.

NURS 224. Maternal Child Nursing
5 Credits (4+3P)
This course provides the intermediate nursing student with an in-depth review of care of the childbearing woman, family structures and roles, and nursing care of the child from birth through adolescence. Emphasis includes the care of pre-partum, intra-partum and postpartum clients, the neonatal and health deviations in pediatric clients. Clinical experiences in the simulation lab, the community, and acute care settings will provide the student with the opportunity to apply learned skills to provide total care to meet needs of up to two adult, neonatal, or pediatric clients and to apply care planning skills related to actual, psychosocial and potential problems. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 235, & NURS 236.

NURS 226. Adult Health II
6 Credits (4+6P)
This course focuses on application of nursing process and theoretical concepts of care for adults with complex health alterations. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to apply: prioritization skills, maintain proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, and care planning skills related to patient actual, psychosocial, and potential problems in the delivery of nursing care to meet needs of three adult clients. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 224 & NURS 235.
NURS 235. Nursing Leadership and Management
1 Credit (1)
This course introduces the intermediate nursing student to professional practice principles of nursing leadership and management including: health policy and politics, fiscal management & budgeting, conflict management, decision making, interdisciplinary practice, working with teams, roles in disaster planning and management, application of standards of care to risk management, organization of care delivery, health care systems, processes, and practice environments. May be repeated up to 1 credits. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to Community Colleges campuses only.
Corequisite(s): NURS 224,NURS 226.

NURS 236. Nursing Preceptorship - Adult Health III
6 Credits (2+12P)
This course is the final course involving care of the patient with acute or chronic illness. It focuses on care of patients with complex or multi-system problems allowing the graduating nursing student to discuss and apply all the skills learned in previous nursing courses. After successfully passing the HESI exam, students have clinical practice with preceptor in various health care settings. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to: organize care of a group of clients, maintain proficiency in performance of nursing skills, collaborate with clients, families, peers and health care team members, and support care planning skills related to patient actual, psychosocial, and potential problems in the delivery of nursing care to meet needs of the preceptors group of clients. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program and have successfully completed all level 1, 2 and 3 nursing courses may enroll in this course. Clinical may include inpatient or outpatient care, days, evenings, nights, or weekend experiences. Students are required to work the preceptors assigned schedule. NCLEX Review must be done concurrently. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 201.

NURS 246. Health Deviations I
7 Credits (4+9P)
Introduction to medical/surgical clients, whose health care needs are routine and predictable. Focus is on simple health deviations, including concepts relative to health promotion and maintenance. The nursing process is utilized to provide evidenced based, safe client centered care. Students are expected to apply clinical judgment, communicate and collaborate with clients and the interdisciplinary team in providing care for a group of two to three clients. Grade of C or better required. May be repeated up to 7 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.
Prerequisite(s): NURS 153, NURS 156, NURS 154, NURS 157 and NURS 210.
Corequisite(s): NURS 211,NURS 258.

NURS 256. Health Deviations II
8 Credits (6+12P)
Concepts and principles applied to clients with complex health deviations. Building upon knowledge gained in NURS 246, focus will be on acutely ill clients. The nursing process continues to serve as a guide to provide safe, client centered care. The student collaborates with the interdisciplinary team in all aspects of client care. Student experiences the role of the staff nurse under the guidance and direction of the nursing instructor. Grade of C or better required. May be repeated up to 8 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.
Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 210, NURS 211, NURS 246, and NURS 258.
Corequisite(s): NURS 212,NURS 260.

Learning Outcomes
1. Apply each step of the nursing process as a method of organizing the nursing care for patients with complex health deviations. Discuss the patient’s health care needs that occur as a result of complex health deviations. Explain methods the nurse can employ in allowing the patient to assume the right and responsibility for his own care. Incorporate the concepts and principles derived from the biological, developmental, social, nutritional and computer sciences and nursing knowledge that relate to the nursing care of patients with complex health deviations. Explain the roles and functions of the members of the health care team including ancillary personnel as they relate to the care of patients with complex health deviations. Explain the rationale for the performance of the following technical skills: a. EKG monitoring; b. Rhythm strip interpretation; c. Hemodynamic monitoring and interpretation; d. Tracheal suctioning Recognize the nurse's role in establishing a therapeutic relationship with patients experiencing complex health deviations.

NURS 258. Psychosocial Requisites: A Deficit Approach
3 Credits (2+3P)
Nursing theory and practice as it relates to the care of the client experiencing psychosocial health deviations. The role of the nurse is discussed along with the ethical and legal aspects of care for the client with psychosocial disorders. Building upon the communication skills of listening and responding, the student develops the therapeutic skills of interpersonal relationships. Grade of C or better is required. May be repeated up to 3 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.
Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 210, and NURS 246.
Corequisite(s): NURS 211,NURS 246.
NURS 260. Management of Patients with Health Deviations
2 Credits (2)
A capstone course to the nursing program in which principles in management and delegation to less prepared personnel is explored. A review of leadership roles, legal issues, quality initiatives, informatics and scope of practice is included. Preparation for the NCLEX is an integral portion of the course. Grade of C or better is required. May be repeated up to 2 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.
Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 210, NURS 211, NURS 246, and NURS 258.
Corequisite(s): NURS 212, NURS 256.

Learning Outcomes
1. Discuss nursing practice concepts relevant to the practice of professional nursing. Evaluate principles of quality improvement and safety into nursing practice within healthcare organizations and systems. Apply leadership concepts through the application of policies that apply to healthcare delivery. Promote a culture of safety through anticipating and eliminating potentially harmful situations. Collaborate in systems analysis when clinical errors or near misses occur to reduce harm, minimize blame, and encourage transparency. Integrate evidence in determining best clinical practice. Demonstrate basic knowledge of healthcare policy, finance, and regulatory environments, including local, state, national, and global healthcare trends. Use an ethical framework to evaluate the impact of policies of healthcare, especially for vulnerable populations.

NURS 315. Introduction to Professional Nursing for the R. N.
3 Credits (3)
Transition course for the R.N. providing an overview of theories and concepts that are the bases for professional nursing practice.

NURS 322. Nursing Health Assessment
3 Credits (3)
Theoretical basis for the biopsychosocial assessment of individual patients across the life span for the RN. Restricted to Majors.

NURS 324. Nursing Care of the Older Adult
3 Credits (3)
Survey course addressing nursing care provisions for the elderly population in a variety of acute, community and home settings.

NURS 325. Human Pathophysiology for Nursing
3 Credits (3)
Concepts of alteration and adaptation in structure and function of the human body across the life span.

NURS 328. Human Pathophysiology Foundation for Nursing
4 Credits (4)
Human pathophysiology concepts of adaptation and alteration in function and structure across the life span and their implications for nursing practice. May be repeated up to 4 credits. Restricted to: BSNR,BSN,BSNP or consent of instructor majors.
Prerequisite(s): Grade of C or better in both (BIOL 353 & BIOL 2221/BIOL 354), or (BIOL 2210 & BIOL 2225), or (SPMD 2210 & SPMD 371).
Corequisite(s): NMNC 3110, NMNC 3135, NURS 362.

NURS 353. Nursing Informatics
3 Credits (3)
This course addresses nursing informatics principles and practices. Key concepts include relationship with evidence-based nursing practice, use of decision support systems, clinical information systems, telehealth, and standardized nursing language. May be repeated up to 3 credits. Restricted to: BSNC majors.

NURS 360. Introduction to Nursing Concepts
3 Credits (3)
This course introduces the nursing student to the concepts of nursing practice and conceptual learning. Same as NMNEC course no.: NMNEC 101 Students must be admitted to the Nursing Program to enroll in this course. Restricted to: NURS majors.
Corequisite(s): NMNC 3120.

NURS 376. Research and Evidence-Based Practice for the Practicing RN
3 Credits (3)
Course provides introduction to evidenced-based practice and research principles for the practicing RN. Evidence-based practice principles and processes are covered. Foundations of research (quantitative and qualitative) research designs and research evaluation are included. Emphasis is placed on ethical and practical issues in critiquing and using research/evidence-based findings. Restricted to BSNC majors.
Prerequisite(s): A ST 311, or admission to RN-BSN Option with consent of instructor.

NURS 397. Special Topics
1-9 Credits (1-9)
Specific subjects to be announced in the Schedule of Classes. May be repeated for at total of 21 credits.

NURS 420. Community Health Nursing
3 Credits (3)
Concepts basic to the nursing care of families, groups, and communities with an emphasis on health promotion, disease prevention, and health maintenance.
NURS 425. Health Literacy for a Global Society
3 Credits (3)
This is a course which addresses the importance of health literacy in an emerging global society, covering the primary aspects of global health literacy. The course explores and analyzes the challenges of health literacy in various areas of our world today, with an emphasis on the development of an action plan to improve health literacy in a select world area. The course is designed to assist students in locating, interpreting, and evaluating sources and content of health information, and in developing effective strategies and tools to assess, communicate, and educate about health literacy. Approximately one-third of the course is dedicated to exploring and evaluating emerging technologies and health literacy. Active student participation is expected and group work within class or online is commonly utilized.

Learning Outcomes
1. Apply the principles of health literacy to selected health care cases, using global, regional, and local perspectives. Apply international and national standards and recommendations for health literacy to selected health care cases, using global, regional, and local perspectives. Analyze the impact of health literacy on quality of life at the local, regional and global level. Use emerging technologies to evaluate and promote health literacy at the local, regional, and global level. Analyze the impact of cultural issues on the health literacy of selected health care cases and world areas. Analyze the use of an interdisciplinary approach to health literacy on selected health care cases and world areas. Analyze the impact of ethical issues on the health literacy of selected health care cases and world areas. Assessment: Discussion board and Final project grading rubrics.

NURS 426. Community Health Nursing for the R.N.: Clinical
3 Credits (6P)
Nursing process applied to the care of families, groups, and communities.

NURS 460. Strategies for Student Success
3 Credits (3)
This course is designed to assist and support students as they identify learning needs and develop a plan for successfully mastering nursing knowledge. Course activities and assignments will be designed to address student's self-identified learning goals to enhance their opportunity for success. Restricted to NURS, BSN, BSNP, BSNR majors.

NURS 475. Issues and Trends in Professional Nursing
3 Credits (3)
Explores the challenges associated with issues and trends in health care and the legal and ethical implications of professional nursing practice.

NURS 476. Nursing Organization & Management for the R.N.: Clinical
3 Credits (6P)
Nursing process applied to organization, management, and delivery of health care. An integrating experience for the R.N. student designed to facilitate the transition to professional practice. Students work with mentors in a clinical setting to develop professional nursing roles related to leadership and management.

NURS 477. Nursing Organization and Management for the RN
3 Credits (3)
Course covers nursing organization, leadership, and management principles, theories, and research for the practicing RN. Restricted to BSNC majors.

NURS 490. Independent Study
1-3 Credits
Individual studies with prior approval of department head.

NURS 505. Theoretical Foundations of Advanced Nursing
3 Credits (3)
This course is a graduate-level introduction to nursing theory. This course assists students in understanding the nature of theory development in nursing, evidence-based practice and related disciplines. Students examine the definitions and meanings of the basic concepts of theory along with theory development and will explore an analysis of selected theories/models and their application to nursing practice, research, education, and administration. Students must be enrolled in the graduate program in nursing or have the permission of advisor and faculty of course to enroll in course. Restricted to NURS majors.

NURS 506. Health Policy for Advanced Nursing Practice
3 Credits (3)
Course provides a conceptual approach to understanding health policy including the social, legal, political and ethical factors that influence policy development. Strategies for influencing policy direction and change are examined. Restricted to: NURS, NUSC, NURP majors.
NURS 507. Evidence-Based Practice for Healthcare Leaders
3 Credits (3)
This course is designed to prepare nurse administrators and other healthcare leaders with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. May be repeated up to 3 credits. Restricted to: Online MSN in Nursing Administration majors.

Learning Outcomes
1. Utilize information sources, such as bibliographic databases and electronic resources and experts, to locate existing knowledge relevant to healthcare and nursing practice.
2. Critically appraise selected research designs, methods of data collection (quantitative and qualitative), and data analytic methods in relation to selected clinical practice and healthcare systems problems.
3. Discuss the relevance of theory and conceptual frameworks to health care research and practice.
4. Evaluate the use of evidence-based practice models to investigate clinical practice and healthcare systems problems.
5. Discuss the ethical, cultural, and professional concerns with human subjects in nursing research and considerations for evidence-based practice.

NURS 509. Quality Improvement for Healthcare Leaders
3 Credits (3)
This course is designed to prepare nurse administrators and other healthcare leaders with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. Restricted to: exclude Online MSN in Nursing Administration majors.

Learning Outcomes
1. Explain the value of improvement science in healthcare and its impact on healthcare quality.
