2021-2022

BE BOLD. Shape the Future.
New Mexico State University
# TABLE OF CONTENTS

Las Cruces Academic Catalog ............................................. 15
University Leadership ......................................................... 16
The History of the University .................................................. 16
Academic Programs A-Z ......................................................... 17
Areas of Interest ................................................................... 25
    Applied and Clinical Health Sciences .................................. 25
    Applied Social and Behavioral Sciences ............................... 25
    Business .......................................................................... 26
    Communication, Media Study, and Creative Arts ...................... 26
    Humanities and Social Sciences .......................................... 26
    Life Sciences ................................................................... 26
    Physical Sciences and Engineering ...................................... 27
    Teacher Education ............................................................. 28
Undergraduate Admissions ...................................................... 28
Transfer Students ................................................................. 30
Military and Veterans Programs (MVP) ................................. 31
International Students ........................................................... 35
Tuition, Fees, and Other Expenses ........................................... 38
Financial Aid & Scholarship Services ...................................... 40
The Graduate School ............................................................. 42
General Education & Viewing the Wider World ....................... 54
Common Course Numbering Crosswalk ................................. 60
College of Agricultural, Consumer, and Environmental Sciences ................................................................. 98
    General Agriculture .......................................................... 100
    Agricultural and Extension Education ................................... 102
        Bachelor Degree(s) .......................................................... 102
            Agricultural and Community Development - Bachelor of Science in Agriculture ................................................. 108
            Agricultural and Extension Education (Advanced Technology Education) - Bachelor of Science in Agriculture ... 109
            Agricultural and Extension Education (Agricultural Communications) - Bachelor of Science in Agriculture ... 109
            Agricultural and Extension Education (Agricultural Education Teaching) - Bachelor of Science in Agriculture .......... 110
        Undergraduate Minor(s) .................................................... 112
            Agricultural and Extension Education - Undergraduate Minor ................................................................. 112
            Agricultural and Natural Resource Leadership - Undergraduate Minor ........................................................... 112
        Master Degree(s) ............................................................. 112
            Agricultural and Extension Education - Master of Arts .... 112
Graduate Minor(s) ................................................................. 113
Agricultural and Extension Education - Graduate Minor .......... 113
International Agricultural Development and Extension - Graduate Minor .......................................................... 113
Agricultural Economics and Agricultural Business ................ 114
    Bachelor Degree(s) ............................................................. 114
    Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture ................................................. 114
    Natural Resource Economics and Policy - Bachelor of Science in Agriculture ........................................................... 117
    Undergraduate Minor(s) ....................................................... 117
    Agricultural Business(s) ....................................................... 117
    Agricultural Business Management- Undergraduate Minor ................................................................. 117
    Natural Resource Economics- Undergraduate Minor .......... 118
    Master Degree(s) ................................................................. 119
    Agriculture (Agribusiness) - Master of Agriculture ............ 120
    Agriculture (Agribusiness) - Master of Business Administration ................................................................. 120
    Agricultural Economics - Master of Science ........................ 121
    Doctoral Degree(s) ............................................................. 122
    Economic Development - Doctor of Economic Development ........................................................................ 122
Animal and Range Sciences .................................................. 126
    Bachelor Degree(s) ............................................................. 126
        Animal Science (Animal Industry) - Bachelor of Science in Agriculture ................................................. 130
        Animal Science (Science) - Bachelor of Science in Agriculture ................................................................. 131
        Range Science - Bachelor of Science in Agriculture .......... 132
        Undergraduate Minor(s) .................................................... 133
            Dairy Science- Undergraduate Minor ................................ 133
            Horse Management - Undergraduate Minor .................. 133
            Human Animal Interaction - Undergraduate Minor ....... 133
            Livestock Production - Undergraduate Minor ............... 133
            Ranch Management - Undergraduate Minor .................... 133
            Range Science - Undergraduate Minor ........................ 133
            Master Degree(s) .......................................................... 133
                Agriculture (Domestic Animal Biology) - Master of Agriculture ................................................................. 133
            Animal Science - Master of Science .............................. 144
            Range Science - Master of Science ................................. 145
            Doctoral Degree(s) .......................................................... 145
            Animal Science - Doctor of Philosophy ........................... 146
            Range Science - Doctor of Philosophy ............................ 146
Graduate Minor(s) ........................................ 146
Animal Science - Graduate Minor ....................... 146
Range Science - Graduate Minor ........................ 146
Entomology, Plant Pathology and Weed Science .... 146
Bachelor Degree(s) ........................................ 146
Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture ......................... 150
Agricultural Biology (Applied Microbiology) - Bachelor of Science in Agriculture ................... 152
Agricultural Biology (Entomology) - Bachelor of Science in Agriculture ............................... 154
Agricultural Biology (Environmental Biology) - Bachelor of Science in Agriculture .................. 155
Agricultural Biology (Pest Biology and Management) - Bachelor of Science in Agriculture .... 157
Undergraduate Minor(s) .................................. 158
Entomology - Undergraduate Minor ..................... 158
Pest Management - Undergraduate Minor ............... 159
Plant Pathology - Undergraduate Minor ................ 159
Weed Science - Undergraduate Minor ................... 159
Master Degree(s) ............................................ 159
Agricultural Biology - Master of Science ............... 159
Family and Consumer Sciences ............................ 159
Bachelor Degree(s) ........................................ 177
Family and Child Science - Bachelor of Science in Family and Consumer Sciences ................. 177
Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences 178
Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences 180
Food Science and Technology (Culinary Science) - Bachelor of Science in Food Science and Technology 182
Food Science and Technology (Meat Science) - Bachelor of Science in Food Science and Technology 184
Food Science and Technology (Science, Technology and Engineering) - Bachelor of Science in Food Science and Technology 186
Human Nutrition and Dietetic Sciences (Nutrition Education) - Bachelor of Science in Family and Consumer Sciences ........................................ 188
Human Nutrition and Dietetic Sciences (Pre-Dietetics/Dietetics) - Bachelor of Science in Family and Consumer Sciences ........................................ 191
Undergraduate Minor(s) .................................. 194
Child Advocacy Studies (CAST) - Undergraduate Minor ....................................................... 194
Clothing, Textiles and Fashion Merchandising - Undergraduate Minor .................................. 194
Culinary Science - Undergraduate Minor ................ 194
Family and Child Science - Undergraduate Minor .................................................. 194
Food Science - Undergraduate Minor ..................... 194
Nutrition - Undergraduate Minor .......................... 194
Master Degree(s) ............................................ 194
Family and Consumer Sciences - Master of Science .................................................. 194
Fish, Wildlife and Conservation Ecology .................. 195
Bachelor Degree(s) ........................................ 199
Conservation Ecology - Bachelor of Science in Conservation Ecology ................................. 199
Fisheries and Wildlife Science (Aquatic Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology 201
Fisheries and Wildlife Science (Wildlife Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology 204
Undergraduate Minor(s) .................................. 206
Conservation Ecology - Undergraduate Minor .......... 206
Wildlife Science - Undergraduate Minor ................ 207
Master Degree(s) ............................................ 207
Fish, Wildlife and Conservation Ecology - Master of Science in Fish, Wildlife and Conservation Ecology 207
Graduate Minor(s) ........................................... 208
Fish, Wildlife and Conservation Ecology - Graduate Minor ........................................... 208
Plant and Environmental Sciences .......................... 208
Bachelor Degree(s) ........................................ 220
Agronomy - Bachelor of Science in Agriculture ......... 220
Environmental Science - Bachelor of Science in Environmental Science ............................... 222
Genetics and Biotechnology - Bachelor of Science in Genetics ............................................. 224
Horticulture - Bachelor of Science in Agriculture ......... 226
Soil Science (Environment and Resource Management) - Bachelor of Science in Agriculture .......... 228
Soil Science (Soil and Water Science) - Bachelor of Science in Agriculture ............................ 231
Soil Science (Soils) - Bachelor of Science in Agriculture .................................................. 233
Turfgrass Science and Management - Bachelor of Science in Agriculture ............................... 235
Undergraduate Minor(s) .................................. 240
Agronomy - Undergraduate Minor .......................... 240
Environmental Science - Undergraduate Minor ......... 240
English (English) - Bachelor of Arts .......................... 462
English (Literature, Language and Culture) - Bachelor of Arts ....................................................... 464
English (Rhetoric, Digital Media and Professional Communication) - Bachelor of Arts ....................... 467
Undergraduate Minor(s) ........................................ 469
Creative Writing - Undergraduate Minor .................. 469
English - Undergraduate Minor ................................ 469
Literature - Undergraduate Minor ............................ 470
Medieval and Early Modern Studies - Undergraduate Minor ..................................................................... 470
Rhetoric and Professional Communication - Undergraduate Minor .......................................................... 471
Master Degree(s) .................................................... 471
English - Master of Arts .......................................... 471
Creative Writing - Master of Fine Arts in Creative Writing .................................................................... 473
Doctoral Degree(s) ................................................... 473
Rhetoric and Professional Communication - Doctor of Philosophy ....................................................... 473
Geography .................................................................. 474
Bachelor Degree(s) ................................................... 480
Geography (Geographic Information Science & Tech) - Bachelor of Science ........................................ 480
Geography (Human/Environment Relationships) - Bachelor of Science ................................................. 483
Undergraduate Minor(s) ............................................. 485
Geographic Information Systems - Undergraduate Minor ....................................................................... 485
Geography - Undergraduate Minor ............................. 486
Master Degree(s) .................................................... 486
Geography - Master of Applied Geography ................. 486
Doctoral Degree(s) ................................................... 486
Geography - Doctor of Philosophy .............................. 486
Graduate Minor(s) .................................................... 487
Geographic Information Systems - Graduate Minor .... 487
Geological Sciences ................................................. 487
Bachelor Degree(s) ................................................... 492
Geology (Earth and Environmental Sciences) - Bachelor of Science ...................................................... 492
Geology (Earth Science Education) - Bachelor of Science ....................................................................... 494
Geology (Geological Sciences) - Bachelor of Science ...... 497
Undergraduate Minor(s) ............................................. 497
Geology - Undergraduate Minor ............................... 500
Master Degree(s) .................................................... 500
Geology - Master of Science ........................................ 500
Geology - Doctor of Philosophy .................................. 500
Graduate Minor(s) .................................................... 500
Government ............................................................. 507
Bachelor Degree(s) ................................................... 509
Government - Bachelor of Arts .................................. 509
Undergraduate Minor(s) ............................................. 509
American Government and Politics - Undergraduate Minor ................................................................. 509
Comparative Politics - Undergraduate Minor ............... 510
Government - Undergraduate Minor .......................... 510
International Relations - Undergraduate Minor .......... 510
Political Theory - Undergraduate Minor ..................... 510
Public Administration - Undergraduate Minor .......... 510
Public Law - Undergraduate Minor ............................ 510
Supplemental Major(s) ............................................. 511
Law and Society - Supplemental Major ........................ 511

LAS CRUCES ACADEMIC CATALOG

This catalog is the student’s guidebook to earning a degree or other academic credential. The catalog contains three important parts: (1) the official listing of NMSU’s academic programs and their requirements, (2) a listing of the courses offered at NMSU with descriptions and prerequisites, and (3) other information essential for student success including many of the rules and regulations that govern the student’s academic journey at NMSU.

As with any other journey, advance planning is essential. To avoid wrong turns and lost time, each student must chart their own path, with the help of their academic advisors and this guidebook. Each student is responsible for planning an academic program of study in compliance with university, community college, college and departmental requirements as set forth in the Catalog. In addition, each student is obligated to abide by the Academic Rules and Regulations as set forth in the Catalog, as well as the Student Social Code of Conduct, as set forth in the Student Handbook (available through the Dean of Students website).

Upon proper application and payment of fees, students will be awarded academic degrees and designations when the completion of the academic program requirements is verified by the relevant NMSU academic unit. Degrees and designations may be awarded under any catalog in effect on the date of degree or designation completion, provided that the catalog year is the same or subsequent to the year in which the student was first enrolled.

The academic program requirements of each catalog are effective for a period of six academic years. This 2021-2022 Catalog is effective summer 2021 through spring semester 2029. All other catalog content, including rules, regulations, course descriptions and prerequisites are effective only for the catalog’s denoted academic year. While content changes are typically implemented between Catalog years, the catalog does not represent a contract and NMSU reserves the right to make modifications to the catalog at any time.

Academic programs at the New Mexico State University System are available to all students without regard to age, ancestry, color, disability, gender, national origin, race, religion, sexual orientation or veteran status.

NMSU is transforming lives through discovery. With the help of your advisors, you can chart your own transformational journey, using this catalog as your guidebook.

Catalog Editor: Kori Plank
University Leadership

NEW MEXICO STATE UNIVERSITY

Chancellor
Dan Arvizu, Chancellor

President
John Floros, NMSU Las Cruces Campus President

Board of Regents
Michelle Lujan Grisham, Governor of New Mexico, Ex Officio Regent from Santa Fe.
Ammu Devasthali, Appointed Regent from Las Cruces for term December 31, 2022.
Arsenio Romero, Appointed Regent from Deming, NM for term December 31, 2021
Christopher Saucedo, Appointed Regent from Las Cruces for term expiring December 31, 2026.
Dina Chacón-Reitzel, Appointed Regent from Cebolla for term expiring December 31, 2024.

Provost/Academic
Parker, Carol, Senior VP & Provost
Campbell, Rebecca, Associate Provost for Academic Administration
Kollmann, Sherry, Vice Provost for Digital Learning
Smith, David, Associate Provost for Program Development & Accreditation
Stovall, Shelly, Associate Provost for Curriculum & Assessment

Vice Presidents/Vice Provosts
Burke, Andrew, Sr. VP Administration & Finance
Cifuentes, Luis, VP Research & Dean of the Graduate School
Dictson, Derek, VP University Advancement
Scott, Renay, VP Student Success

Deans
Camarena, Phame, Dean, Honors College and Crimson Scholars
Hoffman, James, Dean, Business College
Flores, Rolando, Dean, Agricultural, Consumer and Environmental Sciences College
Pichon, Henrietta, Interim Dean, Health, Education and Social Transformation College
Pontelli, Enrico, Dean, Arts and Sciences College
Reddi, Lakshmi, Dean, Engineering College

COMMUNITY COLLEGES ADMINISTRATION

Alamogordo
Van Winkle, Kenneth, Branch Executive Director
Cal, Mark P., VP Academic Affairs
Ricksecker, Anne., VP Student Success
Salinas, Antonio A., VP Business & Finance

Carlsbad
Van Winkle, Kenneth, Branch Executive Director
Garcia, Juanita, VP Student Services
Nwanne, Andrew I., Chief Academic Officer
Buckholz, Mark, VP Academic Affairs
Volpi, Karla, VP Business & Finance

Dona Ana
Torres, Monica F., Campus President
Brooks, Kelly, VP Business & Finance
Butler, Joe, VP Academic Affairs
Ledesma, Amadeo "Ike," VP Student Services

Grants
Van Winkle, Kenneth, Branch Executive Director
Chavez-Toivanen, Marlene, VP Academic Affairs
Clingman, Patrick, VP Student Services

The History of the University

New Mexico State University (NMSU) was founded in 1888 as the state’s land-grant university. Through serving the educational needs of New Mexico’s diverse population, NMSU has provided comprehensive programs of education, research, extension education and public service. Upon its founding, NMSU was known as Las Cruces College and later renamed New Mexico College of Agriculture and Mechanic Arts. In 1960, the constitution of New Mexico formally recognized the institution as NMSU. Today, NMSU is a major institution of higher education. Throughout its history, the university has preserved many traditions of its land-grant origin while also increasing emphasis on the fine arts, humanities, social and natural sciences.

For more history, points of pride, and the ranking of New Mexico State University please visit the About NMSU page of the university website.

Mission

The mission of the New Mexico State University system is to serve the diverse needs of the state through comprehensive programs of education, research, extension and outreach, and public service. As the state’s land-grant and space-grant university, and as a Hispanic Serving
Institution, NMSU fosters learning, inquiry, diversity and inclusion, social mobility, and service to the broader community.

Vision
By 2025, the NMSU system will excel in promoting social mobility for our diverse student populations, achieve the highest Carnegie research status (R1), and maintain our Carnegie Community Engagement classification.

Values
• Leadership: Promoting and creating the ability for Aggies to shape the future
• Excellence: Providing the highest level of education, research, outreach, and service
• Access: Welcoming diverse populations to higher education and to the NMSU community
• Diversity & Inclusion: Embracing our differences as an asset and actively seeking to include wide-ranging perspectives
• Student-Centered: Supporting the education of our students through every aspect of our university, every day

These values are encapsulated as: BE BOLD. Shape the future.

Accreditation
New Mexico State University has been accredited by The Higher Learning Commission (HLC) since 1926. The HLC may be contacted at:

The Higher Learning Commission
230 North LaSalle St.
Suite 7-500
Chicago, IL 60604-1411
Phone: (800) 621-7440

In addition, the university maintains various specialized and professional accreditations, as listed at the beginning of each college section in the catalog, and as found at https://accreditation.nmsu.edu/specialized-accreditation/.

NMSU Graduation and Retention Rates
These rates may be found on the NMSU Institutional Research web site at: http://oia.nmsu.edu/data-reports/oiareports/.

Programs A-Z

Academic Programs
Associate Degree Programs
NMSU awards both designated and undesignated associate degrees following completion of at least 60 semester credits (excluding “N” suffix courses). Please see the NMSU System Academic Regulations & Policies (p. 897) section of the catalog for specific information about Associate Degree Program graduation requirements. (Service personnel enrolled under the two-year Servicemembers Opportunity College Program may be exempt from this requirement.)

The designation Meritorious Graduate is awarded to the top 15 percent of the students receiving associate degrees within each college in any one academic year; the students must have completed 45 or more credits with computable grades at NMSU.

Las Cruces Campus
Detailed information on admission requirements, curricula, and associate degree or certificate requirements will be found in the section of this catalog devoted to the administering department/college.

• Associate of Arts
  Administered by the Community Colleges
• Associate of Fine Arts
  Administered by the Community Colleges
• Associate of Science
  Administered by the Community Colleges
• Associate of Science in Engineering Technology
  Administered by the College of Engineering

Designated Associate Degrees
The following designated associate degrees are granted to students completing the specified requirements of the degree.

• Associate in Art and Graphic Design
  Administered by the Community Colleges
• Associate in Criminal Justice
  Administered by the Community Colleges
• Associate in Education
  Administered by the Community Colleges
• Associate in Pre-business
  Administered by the College of Business
• Associate of Arts in Heritage Interpretation
  Administered by the Community Colleges

Community Colleges
Many of the associate degrees offered on Las Cruces campus, as well as other programs, are available at NMSU’s four community college campuses. For more information on community college campus offerings, refer to the “Community Colleges (p. 896)” chapter in this catalog and to their respective catalogs or admissions offices.

Please see the Community College Catalogs for more information about the Associate Degree Programs.

• Alamogordo Catalog
• Dona Ana Catalog
• Carlsbad Catalog
• Grants Catalog

Undergraduate Programs
For a full listing of all Undergraduate Programs offered at New Mexico State University, please see the Undergraduate Admissions webpage http://admissions.nmsu.edu/academics/.

Graduate Degree Programs
For a full listing of the Graduate Programs offered at New Mexico State University, please see the Graduate Admissions webpage

Academic Minors
Students seeking a degree may elect to complete one or more minors from those available, and the minor will be designated on their transcripts. Minors cannot be earned after the degree has been conferred. The minor may be in a single department or may be interdepartmental.
Specific requirements for these minors are available in printed form in departmental and deans’ offices. Specific the College sections for a complete list of the minors offered in that college.

Programs offered at New Mexico State University

Program are titled in the following styles:

- **Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture**
  - Major Title (Agricultural Biology), will appear on diplomas and transcripts
  - Concentration Title (Applied Biology), will appear on diplomas and transcripts
  - Degree Title (Bachelor of Science in Agriculture), will appear on diplomas and transcripts

- **Animation and Visual Effects - Bachelor of Creative Media**
  - Major Title (Animation and Visual Effects), will appear on diplomas and transcripts
  - Degree Title (Bachelor of Creative Media), will appear on diplomas and transcripts

*Note: that some degrees will have emphasis, options, pathways, etc. appear on the degree page, but these items will not appear on transcripts.*

- **Brewery Engineering - Undergraduate Minor**
  - Minor Title (Brewery Engineering), will appear on transcripts
  - Minor Level (Undergraduate Minor), corresponds with the level for the coursework required and what level a student must be in to declare the minor

A

- **Accounting - Bachelor of Accountancy** (p. 684)
- **Accounting - Master of Accountancy** (p. 689)
- **Accounting - Undergraduate Minor** (p. 688)
- **Advanced Manufacturing - Graduate Minor**
- **Advertising - Undergraduate Minor** (p. 751)
- **Aerospace Engineering - Bachelor of Science in Aerospace Engineering** (p. 878)
- **Aerospace Engineering - Doctor of Philosophy** (p. 884)
- **Aerospace Engineering - Master of Engineering in Aerospace Engineering** (p. 882)
- **Aerospace Engineering - Master of Engineering in Aerospace Engineering (Online)**
- **Aerospace Engineering - Master of Science** (p. 883)
- **Aerospace Engineering - Undergraduate Minor** (p. 881)
- **Aerospace Studies - Undergraduate Minor** (p. 260)
- **Africana Studies - Undergraduate Minor**
- **Agricultural and Community Development - Bachelor of Science in Agriculture** (p. 108)
- **Agricultural and Extension Education (Advanced Technology Education) - Bachelor of Science in Agriculture** (p. 109)
- **Agricultural and Extension Education (Agricultural Communications) - Bachelor of Science in Agriculture** (p. 109)
- **Agricultural and Extension Education (Agricultural Education Teaching) - Bachelor of Science in Agriculture** (p. 110)
- **Agricultural and Extension Education - Graduate Minor** (p. 112)
- **Agricultural and Extension Education Education - Master of Arts** (p. 112)
- **Agricultural and Extension Education - Master of Arts (Online)**
- **Agricultural and Extension Education - Undergraduate Minor** (p. 112)
- **Agricultural and Natural Resource Leadership - Undergraduate Minor** (p. 112)
- **Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture** (p. 150)
- **Agricultural Biology (Applied Microbiology) - Bachelor of Science in Agriculture** (p. 152)
- **Agricultural Biology (Entomology) - Bachelor of Science in Agriculture** (p. 154)
- **Agricultural Biology (Environmental Biology) - Bachelor of Science in Agriculture** (p. 155)
- **Agricultural Biology (Pest Biology and Management) - Bachelor of Science in Agriculture** (p. 157)
- **Agricultural Biology - Master of Science** (p. 159)
- **Agricultural Business Management - Undergraduate Minor** (p. 123)
- **Agricultural Economics - Master of Science** (p. 124)
- **Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture** (p. 119)
- **Agricultural Engineering - Undergraduate Minor** (p. 778)
- **Agriculture (Agribusiness) - Master of Agriculture** (p. 123)
- **Agriculture (Domestic Animal Biology) - Master of Agriculture** (p. 143)
- **Agronomy - Bachelor of Science in Agriculture** (p. 220)
- **Agronomy - Undergraduate Minor** (p. 240)
- **Algorithm Theory - Undergraduate Minor** (p. 408)
- **American Government and Politics - Undergraduate Minor** (p. 509)
- **Animal Science (Animal Industry) - Bachelor of Science in Agriculture** (p. 135)
- **Animal Science (Science) - Bachelor of Science in Agriculture** (p. 137)
- **Animal Science - Doctor of Philosophy** (p. 145)
- **Animal Science - Graduate Minor** (p. 146)
- **Animal Science - Master of Science** (p. 144)
- **Animation and Visual Effects - Bachelor of Creative Media** (p. 421)
- **Animation and Visual Effects - Undergraduate Minor** (p. 426)
- **Anthropology (Culture & Language) - Bachelor of Arts**
- **Anthropology - Bachelor of Arts** (p. 276)
- **Anthropology - Graduate Minor** (p. 284)
- **Anthropology - Master of Arts** (p. 281)
- **Anthropology - Undergraduate Minor** (p. 279)
- **Applied Mathematics - Supplemental Major** (p. 604)
- **Applied Statistics - Graduate Minor** (p. 717)
- **Applied Statistics - Master of Science** (p. 712)
- **Applied Studies (Zero-to-Four (Early Childhood)) - Bachelor of Applied Studies**
- **Applied Studies - Bachelor of Applied Studies** (p. 533)
- **Archaeology - Graduate Minor** (p. 284)
- **Archaeology - Undergraduate Minor** (p. 279)
- **Art (Art History) - Bachelor of Arts** (p. 301)
- **Art (Studio Art) - Bachelor of Arts** (p. 302)
- **Art - Bachelor of Fine Arts** (p. 304)
• Art - Master of Arts (p. 309)
• Art - Master of Fine Arts (p. 309)
• Art - Undergraduate Minor (p. 308)
• Art History - Undergraduate Minor (p. 308)
• Astronomy - Doctor of Philosophy (p. 315)
• Astronomy - Master of Science (p. 315)
• Astronomy - Undergraduate Minor (p. 314)
• Athletic Training - Master of Science
• Autism & Spectrum Disorders - Graduate Certificate
• Autism & Spectrum Disorders - Graduate Certificate (Online)

B
• Bilingual Education - Graduate Certificate (Online)
• Biochemistry - Bachelor of Science (p. 351)
• Biochemistry - Undergraduate Minor (p. 357)
• Bioinformatics (with Computer Science) - Graduate Minor (p. 613)
• Bioinformatics - Master of Science (p. 409)
• Bioinformatics - Undergraduate Minor (p. 408)
• Biology - Bachelor of Arts (p. 328)
• Biology - Bachelor of Science (p. 330)
• Biology - Doctor of Philosophy (p. 341)
• Biology - Master of Science (p. 340)
• Biology - Undergraduate Minor (p. 339)
• Biomedical Engineering - Undergraduate Minor (p. 764)
• Borderlands and Ethnic Studies - Graduate Certificate (p. 437)
• Brewery Engineering - Undergraduate Minor (p. 765)
• Business Administration (Agribusiness) - Master of Business Administration (p. 124)
• Business Administration (Agribusiness) - Master of Business Administration (p. 693)
• Business Administration (Finance) - Master of Business Administration (p. 694)
• Business Administration (Health Services Management) - Master of Business Administration
• Business Administration (Health Services Management) - Master of Business Administration (Online)
• Business Administration (Information Systems) - Master of Business Administration (p. 695)
• Business Administration (Management) - Doctor of Philosophy (p. 697)
• Business Administration (Marketing) - Doctor of Philosophy (p. 697)
• Business Administration (Public Utility Regulations) - Master of Business Administration (p. 696)
• Business Administration - Master of Business Administration (p. 691)
• Business Administration - Master of Business Administration (Online)
• Business Administration - Undergraduate Minor (p. 681)
• Business Law - Undergraduate Minor (p. 728)

C
• Chemical Engineering - Bachelor of Science in Chemical Engineering (p. 763)
• Chemical Engineering - Master of Science in Chemical Engineering (p. 766)
• Chemical Process Industry - Master of Engineering in Chemical Process Industry (p. 767)
• Chemical Process Industry - Master of Engineering in Chemical Process Industry (Online)
• Chemistry - Bachelor of Arts (p. 353)
• Chemistry - Bachelor of Science (p. 355)
• Chemistry - Doctor of Philosophy (p. 358)
• Chemistry - Master of Science (p. 357)
• Chemistry - Undergraduate Minor (p. 357)
• Chicano Studies - Supplemental Major (p. 580)
• Child Advocacy Studies (CAST) - Undergraduate Minor (p. 194)
• Child Advocacy Studies - Undergraduate Minor (p. 435)
• Civil Engineering - Bachelor of Science in Civil Engineering (p. 776)
• Civil Engineering - Master of Engineering in Civil Engineering (p. 779)
• Civil Engineering - Master of Engineering in Civil Engineering (Online)
• Civil Engineering - Master of Science in Civil Engineering (p. 780)
• Clinical Mental Health Counseling - Master of Arts
• Clinical Psychopharmacology - (Post-Doctoral) Master of Science
• Clinical Psychopharmacology - (Post-Doctoral) Master of Science (Online)
• Clothing, Textiles and Fashion Merchandising - Undergraduate Minor (p. 194)
• Communication and National Security - Graduate Minor (p. 367)
• Communication and National Security - Undergraduate Minor (p. 365)
• Communication Disorders - Bachelor of Science in Education
• Communication Disorders - Master of Arts
• Communication Studies - Bachelor of Arts (p. 363)
• Communication Studies - Graduate Minor (p. 367)
• Communication Studies - Master of Arts (p. 366)
• Communication Studies - Undergraduate Minor (p. 365)
• Comparative Politics - Undergraduate Minor (p. 509)
• Computational Engineering - Undergraduate Minor (p. 765)
• Computer Engineering - Undergraduate Minor (p. 806)
• Computer Science (Algorithm Theory) - Bachelor of Science (p. 388)
• Computer Science (Artificial Intelligence) - Bachelor of Science (p. 391)
• Computer Science (Big Data and Data Science) - Bachelor of Science (p. 393)
• Computer Science (Computer Networking) - Bachelor of Science (p. 396)
• Computer Science (Cybersecurity) - Bachelor of Science (p. 398)
• Computer Science (Human Computer Interaction) - Bachelor of Science (p. 400)
• Computer Science (Software Development) - Bachelor of Science (p. 403)
• Computer Science - Bachelor of Arts (p. 383)
• Computer Science - Bachelor of Science (p. 386)
• Computer Science - Bachelor of Science/Master of Science (p. 407)
• Computer Science - Doctor of Philosophy (p. 412)
• Computer Science - Graduate Minor (p. 413)
• Computer Science - Master of Science (p. 411)
• Computer Systems - Undergraduate Minor (p. 408)
- Conservation Ecology - Bachelor in Conservation Ecology (p. 333)
- Conservation Ecology - Bachelor of Science in Conservation Ecology (p. 199)
- Conservation Ecology - Undergraduate Minor (p. 206)
- Conservation Ecology - Undergraduate Minor (p. 339)
- Counseling and Community Psychology - Bachelor of Science
- Counseling and Community Psychology - Bachelor of Science (Online)
- Counseling and Education Psychology - Undergraduate Minor
- Counseling Psychology - Doctor of Philosophy
- Creative Writing - Master of Fine Arts (p. 473)
- Creative Writing - Undergraduate Minor (p. 469)
- Criminal Justice - Bachelor of Criminal Justice (p. 433)
- Criminal Justice - Bachelor of Science (Online)
- Criminal Justice - Master of Criminal Justice (p. 437)
- Culinary Science - Undergraduate Minor (p. 194)
- Cultural Resource Management - Graduate Certificate (p. 283)
- Curriculum and Instruction - Doctor of Philosophy
- Curriculum and Instruction - Doctor of Philosophy (Online)
- Cybersecurity - Bachelor of Science (p. 405)

D

- Dairy Science - Undergraduate Minor (p. 142)
- Dance (DanceSport) - Bachelor of Arts in Dance
- Dance - Undergraduate Minor
- Data Analytics - Master of Data Analytics (p. 410)
- Data Analytics - Master of Data Analytics (Online)
- Digital Communications - Graduate Certificate (p. 810)
- Digital Electronic Applications - Undergraduate Minor (p. 859)
- Digital Film Making - Bachelor of Creative Media (p. 424)
- Digital Film Making - Undergraduate Minor (p. 426)
- Digital Forensics - Undergraduate Minor (p. 859)
- Digital Signal Processing - Graduate Certificate (p. 811)

E

- Early Childhood Education - Bachelor of Science in Education
- Early Childhood Education - Undergraduate Minor
- Early Childhood Education Alternative Licensure - Graduate Certificate (Online)
- East Asian Studies - Undergraduate Minor
- Economic Development - Doctor of Economic Development (p. 125)
- Economics (Econometrics) - Master of Arts (p. 713)
- Economics (Econometrics) - Master of Arts (Online)
- Economics (Public Policy) - Master of Arts (p. 714)
- Economics (Public Policy) - Master of Arts (Online)
- Economics (Public Utility Policy and Regulation) - Master of Arts (p. 714)
- Economics (Public Utility Policy and Regulation) - Master of Arts (Online)
- Economics - Bachelor of Arts (p. 442)
- Economics - Bachelor of Arts in Economics (p. 705)
- Economics - Bachelor of Business Administration (p. 707)
- Economics - Doctor of Economic Development (p. 715)
- Economics - Graduate Minor (p. 717)

- Economics - Master of Arts (p. 713)
- Economics - Master of Arts (Online)
- Economics - Undergraduate Minor (p. 444)
- Economics - Undergraduate Minor (p. 712)
- Education (Bilingual Education) - Master of Arts
- Education (Curriculum & Instruction) - Master of Arts
- Education (Curriculum & Instruction) - Master of Arts (Online)
- Education (Early Childhood Education) - Master of Arts
- Education (Educational Learning Technologies) - Master of Arts

What Are Meta-Majors?

Meta-majors at NMSU are two-semester academic maps designed as planning tools for students who have not yet decided on a program of study. Each meta-major represents a broad cluster of degree programs. The meta-major academic maps include courses (such as English and Math) that lay the academic foundation for all of the degree programs represented by the specific meta-major as well as course options that facilitate exploration of the various disciplines represented.

Meta-majors share a common early pathway toward a degree, diverging as a student becomes more focused on an individual major. By identifying a limited number of meta-majors that encompass all the majors at NMSU, and helping students who are unsure about a major choose a meta-major consistent with their interests, we can help ensure that courses taken early in a collegiate career will count toward a degree, thereby lessening the academic wandering that can impede student success.

Students will be directed to a meta major only if they are uncertain what they want to study. Students who are certain of their major will be advised into courses that are in that major's degree plan.

Undergraduate Admissions and Orientation

Contact Information
Undergraduate Admissions and Orientation
MSC 3A
New Mexico State University
P.O. Box 30001
Las Cruces, NM 88003-8001
(575) 646-3121
https://admissions.nmsu.edu/

Under the policies and conditions set forth below, a student may be accepted for undergraduate admission to NMSU as either:

- A degree-seeking student or
- A nondegree student under the policies and conditions as set forth in this section.

Degree-Seeking Students
How to Apply as a First-Time Student (Regular Student)

Requirements for admission as a degree-seeking student:

- Application for admission, accompanied by a one-time $25 nonrefundable application fee
- Official high school transcripts with the student’s high school credits sent directly from the high school to NMSU Undergraduate Admissions
- Official results of the American College Testing (ACT) program or Scholastic Aptitude Test (SAT) sent directly from the testing centers to NMSU Undergraduate Admissions.
- If applicable, official post-secondary education transcripts sent directly from each institution attended to NMSU Undergraduate Admissions

All freshman applicants are required to submit scores from either the ACT or the SAT and final, official high school transcript showing a graduate date before a final admission decision is granted.

Freshman Admission Requirements
Students who meet the minimum high school course requirements of the state from which they receive their high school diploma must meet one of the following criteria in order to be admitted:

- Cumulative high school GPA of 2.75, or
- ACT composite score of 21 or SAT score of 1060, or
- Ranked in the top 20 percent of their graduating class

Applicants who meet at least one of the criteria listed above will be admitted to NMSU. An applicant who does not meet admission requirements may be admitted if a review of additional information indicates that the student would be successful at NMSU. When reviewing the admisibility of students, Undergraduate Admission and Orientation considers many factors, including high school GPA, test scores, dual-credit coursework, leadership experience, community involvement, and other accomplishments. Applicants may be asked for additional information, including academic letters of recommendation, in support of their application.
**Aggie Pathway**

In the Aggie Pathway program, NMSU’s system works together to assist students who do not meet the admission requirements to the university. Aggie Pathway students begin at one of NMSU’s community college campuses and may transition to the university campus upon meeting the following requirements:

- Successful completion of 24 credits, in addition to any required developmental courses
- 2.0 cumulative college GPA

All students participating in the Aggie Pathway program can attend academic, cultural and athletic events on the NMSU Las Cruces campus. Students enrolling through NMSU Doña Ana Community College campus also have access to on-campus housing and dining.

More information about Aggie Pathway is available at [https://aggiepathway.nmsu.edu/](https://aggiepathway.nmsu.edu/).

**How to Apply as a GED or HiSET Student**

Students must complete the GED or HiSET in English. Satisfactory scores on either the GED or HiSET tests, official high school transcript and official ACT or SAT scores are required.

**How to Apply as a Home School Student**

Home school educators must submit a signed transcript or document that lists the courses completed and grades earned by the student, as well as indicate the date the student completed or graduated from the home school program. An official ACT or SAT score is also required.

Home school students who are New Mexico residents and wish to participate in the Lottery Success Scholarship program are required to submit official New Mexico GED or HiSET test results in English.

**Aggie Welcome and Orientation**

Orientation for all new students is mandatory. At NMSU’s Aggie Welcome and Orientation (AWO) programs, students will attend information sessions, learn about campus resources, college life, meet with an academic advisor, and register for classes.

It is important that students submit an official ACT or SAT score prior to attending an AWO program as these scores are used to place students into courses during academic advising. Students who do not have an ACT or SAT score on file for their AWO program will not receive a final schedule upon completion of orientation and may be subject to a change of schedule upon receiving official test scores.

More information about Aggie Welcome and Orientation is available at [https://awo.nmsu.edu/](https://awo.nmsu.edu/).

**Nondegree-Sseeking Students**

**How to Apply as a Nondegree Seeking Student**

Nondegree admission is designed to meet the needs of non-traditional, part-time students who do not wish to pursue a degree at NMSU. Courses taken in this status may not be used to meet university admission requirements. Students interested in using nondegree credit for initial teacher certification or certification in a new field must contact the College of Education.

Students on nondegree status are ineligible to:

- Receive financial aid or student employment
- Participate in student government or intercollegiate athletics
- Receive benefits from any veterans’ program

Transcripts from previous institutions, high school, and/or results of college entrance exams may be required to assure readiness for university-level courses. A $20 one-time, non-refundable, nondegree application fee is required.

Nondegree students are subject to the same university regulations as degree-seeking students.

**Changing from Nondegree Status**

A nondegree student in good academic standing at NMSU must submit a formal application for a change of status from nondegree to degree-seeking. Requirements for regular admission must be met. Nondegree students may not transfer more than 30 credits from this status to any undergraduate degree program except for students participating in a high school concurrent enrollment program.

**How to Apply For Readmission**

Former students of the NMSU system, who have been out of school for more than two consecutive semesters, are required to make a formal application for readmission. Applications should be submitted to Undergraduate Admissions and Orientation before the start date of the semester for which the student plans to enroll.

A student who has attended other institutions during an absence must have official transcripts sent directly to Undergraduate Admissions and Orientation and must be eligible to return to the college or university they last attended. Transcripts must be received before the date of registration. Admission status at the time of readmission will generally be determined by previous NMSU academic standing. However, academic performance at other institutions attended during the applicant’s absence from NMSU may be taken into consideration in determining the student’s admission status.

**Opportunities for High Schools Students**

**Dual Credit for High School Students**

The Dual Credit program is designed to give high school students an opportunity to enroll at NMSU before high school graduation. Students must be either a junior or senior in high school and must be enrolled at least half time in high school courses. Under a Statewide Dual Credit Master Agreement between NMSU and the school district, students enrolled in approved dual credit courses are eligible to have the full cost of tuition and general fees waived.

**Eligibility Requirements**

- High school junior or senior
- High school grade point average (GPA) of 3.0 or higher
- ACT composite of 21 or SAT score of 1060
- For those student who have not had the opportunity to take the ACT or SAT, a PSAT score of 860 or above will be required
- Approval from a high school counselor
- Approval from a parent or guardian
- Meet with an NMSU Dual Credit Academic Advisor
- Completion of all required documentation:
  - Application for Admission
  - State Dual Credit Request Form
Transfer Students

- Student Acknowledgement and Parent Certification Form
- High School Transcript and Test Scores

Out-of-State Students and Legal Jurisdiction

By applying for admission/enrollment, both the student and parents agree that New Mexico law prevails and all litigation will be in federal or state court in New Mexico.

Applying for Admission

Application Materials

All documents submitted as part of the official admissions process become the property of NMSU and will not be returned to the student. Application materials are retained for one calendar year for students who apply but do not attend.

Application Deadlines

Applications for admission should be submitted online at least 30 days before the beginning of the regular semester or summer sessions in which the student intends to enroll. The deadline for application to NMSU’s Nursing Program is February 1st for the fall semester and September 1st for the Spring semester.

Transfer Students

NMSU evaluates eligible courses for NMSU transfer equivalency from postsecondary institutions that are regionally accredited or are candidates for regional accreditation. Credits from non-accredited institutions may be evaluated, by the student’s academic college, after the student has shown acceptable performance at NMSU for two semesters of full-time enrollment. Academic colleges, within NMSU, may have additional requirements for course transfer. Please contact the College Dean’s Office for more information.

Transcripts may need to be reevaluated when students transfer from one NMSU campus or College to another. Transcripts must be received before the date of registration.

Community/Junior College Transfers

Community/Junior college transfer students may be admitted and classified on the basis of acceptable credits earned at a two-year institution. However, transfer students are subject to the same graduation requirements as all NMSU baccalaureate-degree (bachelor’s) seeking students. Thirty (30) of the last 36 credit hours for every degree to be awarded from NMSU must be earned at NMSU.

Student Responsibility

Planning for effective transfer with maximum efficiency is ultimately the student’s responsibility. Responsible transfer planning includes early and regular consultation with the intended degree-granting institution to assure that all pre-transfer coursework will meet the requirements of the desired degree.

NMSU maintains a database (http://nmsudirect.nmsu.edu/) of commonly transferred courses from numerous institutions. Courses included in the database at the time the student is admitted to NMSU will automatically transfer to NMSU, provided the student follows all guidelines (see Currently Enrolled NMSU Students below). If a transferred course does not exist in the database, it is the student’s responsibility to provide departmental faculty with sufficient materials (e.g. catalog description, syllabi, etc.) to determine if any of the department’s courses may be equivalent to the credits being transferred.

Transfer Students- Admission Requirements

1. Transfer students must provide official transcripts sent directly from the University Student Records Office of each previously attended institution to the NMSU Admissions Office or official transcripts will be accepted if delivered in person only if in a sealed envelope from the granting institution and with current issue date. Official transcripts must be received before the date of registration.
2. Students who have not earned credit for the first semester of college English may be required to provide ACT or SAT scores directly to the NMSU Admissions Office.
3. Students with 24 or more college credit hours must have a cumulative grade point average (GPA) of at least 2.0.
4. Students with 24 or fewer college credit hours must fulfill the transfer and freshman admission requirements.
5. Students must be eligible to return to their last college or university.
6. Any student who conceals the fact that he/she has attended another college or university and has not submitted a transcript for each institution—whether or not credit was earned—will be subject to immediate suspension.
7. NMSU will uphold academic and judicial suspensions from other colleges and universities.

Transfer of International Credit

Applications for admission that include the transfer of credits earned at a non-U.S. university must include a professional foreign credit evaluation report from a member institution of the National Association of Credential Evaluation Services (NACES) for every transcript from a foreign secondary school and/or university attended.

General Requirements for Transfer Credits

Credit will be awarded for transfer courses as follows:

1. Grades earned in courses taken at other institutions are not included in the calculation of the NMSU GPA, except for grades earned by approved National Student Exchange students.
2. A grade of D or better is required to grant NMSU credit for courses identified as having an NMSU equivalent.
3. Colleges or departments may require a grade of C- or higher for courses required in their programs.
4. Each college determines which transferred courses are applicable toward a degree or a minor.
5. Transcripts may need to be reevaluated when students transfer from one NMSU campus or College to another.
6. Currently enrolled students must obtain prior approval from their academic department head and dean before courses taken at another institution will be applied toward meeting NMSU graduation requirements.

Student Responsibility

Planning for effective transfer with maximum efficiency is ultimately the student’s responsibility. Responsible transfer planning includes early and regular consultation with the intended degree-granting institution to assure that all pre-transfer coursework will meet the requirements of the desired degree.

NMSU maintains a database (http://nmsudirect.nmsu.edu/) of commonly transferred courses from numerous institutions. Courses included in the database at the time the student is admitted to NMSU will automatically transfer to NMSU, provided the student follows all guidelines (see Currently Enrolled NMSU Students below). If a transferred course does not exist in the database, it is the student’s responsibility to provide the departmental faculty with sufficient materials (e.g. catalog description, syllabi, etc.) to determine if any of the department’s courses may be equivalent to the credits being transferred.

Transfer Students- Admission Requirements

1. Transfer students must provide official transcripts sent directly from the University Student Records Office of each previously attended institution to the NMSU Admissions Office or official transcripts will be accepted if delivered in person only if in a sealed envelope from the granting institution and with current issue date. Official transcripts must be received before the date of registration.
2. Students who have not earned credit for the first semester of college English may be required to provide ACT or SAT scores directly to the NMSU Admissions Office.
3. Students with 24 or more college credit hours must have a cumulative grade point average (GPA) of at least 2.0.
4. Students with 24 or fewer college credit hours must fulfill the transfer and freshman admission requirements.
5. Students must be eligible to return to their last college or university.
6. Any student who conceals the fact that he/she has attended another college or university and has not submitted a transcript for each institution—whether or not credit was earned—will be subject to immediate suspension.
7. NMSU will uphold academic and judicial suspensions from other colleges and universities.

Transfer of International Credit

Applications for admission that include the transfer of credits earned at a non-U.S. university must include a professional foreign credit evaluation report from a member institution of the National Association of Credential Evaluation Services (NACES) for every transcript from a foreign secondary school and/or university attended.

General Requirements for Transfer Credits

Credit will be awarded for transfer courses as follows:

1. Grades earned in courses taken at other institutions are not included in the calculation of the NMSU GPA, except for grades earned by approved National Student Exchange students.
2. A grade of D or better is required to grant NMSU credit for courses identified as having an NMSU equivalent.
3. Colleges or departments may require a grade of C- or higher for courses required in their programs.
4. Each college determines which transferred courses are applicable toward a degree or a minor.
5. Transcripts may need to be reevaluated when students transfer from one NMSU campus or College to another.
6. Currently enrolled students must obtain prior approval from their academic department head and dean before courses taken at another institution will be applied toward meeting NMSU graduation requirements.

Student Responsibility

Planning for effective transfer with maximum efficiency is ultimately the student’s responsibility. Responsible transfer planning includes early and regular consultation with the intended degree-granting institution to assure that all pre-transfer coursework will meet the requirements of the desired degree.

NMSU maintains a database (http://nmsudirect.nmsu.edu/) of commonly transferred courses from numerous institutions. Courses included in the database at the time the student is admitted to NMSU will automatically transfer to NMSU, provided the student follows all guidelines (see Currently Enrolled NMSU Students below). If a transferred course does not exist in the database, it is the student’s responsibility to provide the departmental faculty with sufficient materials (e.g. catalog description, syllabi, etc.) to determine if any of the department’s courses may be equivalent to the credits being transferred.

Transfer Students- Admission Requirements

1. Transfer students must provide official transcripts sent directly from the University Student Records Office of each previously attended institution to the NMSU Admissions Office or official transcripts will be accepted if delivered in person only if in a sealed envelope from the granting institution and with current issue date. Official transcripts must be received before the date of registration.
2. Students who have not earned credit for the first semester of college English may be required to provide ACT or SAT scores directly to the NMSU Admissions Office.

4. Students with 24 or fewer college credit hours must fulfill the transfer and freshman admission requirements.
5. Students must be eligible to return to their last college or university.
6. Any student who conceals the fact that he/she has attended another college or university and has not submitted a transcript for each institution—whether or not credit was earned—will be subject to immediate suspension.
7. NMSU will uphold academic and judicial suspensions from other colleges and universities.

Transfer of International Credit

Applications for admission that include the transfer of credits earned at a non-U.S. university must include a professional foreign credit evaluation report from a member institution of the National Association of Credential Evaluation Services (NACES) for every transcript from a foreign secondary school and/or university attended.

General Requirements for Transfer Credits

Credit will be awarded for transfer courses as follows:

1. Grades earned in courses taken at other institutions are not included in the calculation of the NMSU GPA, except for grades earned by approved National Student Exchange students.
2. A grade of D or better is required to grant NMSU credit for courses identified as having an NMSU equivalent.
3. Colleges or departments may require a grade of C- or higher for courses required in their programs.
4. Each college determines which transferred courses are applicable toward a degree or a minor.
5. Transcripts may need to be reevaluated when students transfer from one NMSU campus or College to another.
6. Currently enrolled students must obtain prior approval from their academic department head and dean before courses taken at another institution will be applied toward meeting NMSU graduation requirements.

Student Responsibility

Planning for effective transfer with maximum efficiency is ultimately the student’s responsibility. Responsible transfer planning includes early and regular consultation with the intended degree-granting institution to assure that all pre-transfer coursework will meet the requirements of the desired degree.

NMSU maintains a database (http://nmsudirect.nmsu.edu/) of commonly transferred courses from numerous institutions. Courses included in the database at the time the student is admitted to NMSU will automatically transfer to NMSU, provided the student follows all guidelines (see Currently Enrolled NMSU Students below). If a transferred course does not exist in the database, it is the student’s responsibility to provide the departmental faculty with sufficient materials (e.g. catalog description, syllabi, etc.) to determine if any of the department’s courses may be equivalent to the credits being transferred.
Currently Enrolled NMSU Students
Currently, enrolled students must obtain prior approval from their academic department head and dean before courses taken at another institution will be applied toward meeting NMSU graduation requirements.

Religious Center Courses in Religion
Courses in religion, offered by the various religious centers through higher educational institutions with which they are affiliated, are open to all students and these or similar courses from other colleges/universities may be transferred for elective credit ("E") to NMSU. Registration for these courses is separate from the NMSU System's registration and is conducted by the religious center offering the course.

Graduate Transfer Credits
For more information about transferring graduate credits please visit the Graduate School (p. 45) section of this catalog.

Evaluation of Transfer Credits
NMSU has 3 levels of course credit transfer. Once a student has been admitted to NMSU, they are awarded credit for equivalent courses accordingly. Following award of credit as described in Levels 1 and 2 (below), application of any additional credit transfer via specific Program Articulation agreements will be approved by the student's academic department and dean, including additional courses in the major that may count toward a degree or a minor but, are not included in a Program Articulation.

Level 1
Automatic course-to-course equivalency credit transfer from colleges/universities in the state of New Mexico, per the New Mexico Higher Education Department (NM HED) articulation modules. Eligible credits for Level 1 transfers will be automatically applied to the student's transcript, provided minimal grade requirements are met. Level 1 equivalency includes:
1. New Mexico State Common Core general education courses
2. New Mexico State articulated academic programs (e.g. Business, Early Childhood Education, and NM Nursing Education Curriculum).

Level 2
Faculty established NMSU course-to-course equivalency transfer
1. Equivalency is determined by the designated departmental faculty in the department/program in which the equivalent course is offered, and may include a review of course description, syllabus and/or interaction with the other institution. If a course equivalency does not exist in the database, it is the student's responsibility to provide departmental faculty with sufficient materials to determine if any of the department's courses may be equivalent to the credits being transferred.

Military and Veterans Programs (MVP)
New Mexico State University (NMSU) is a military and veteran friendly university which strives to provide the best possible service for our military, veteran, and their dependents as they pursue their educational goals. NMSU Military and Veterans Programs promotes lifelong learning and professional development by offering:
- In-state tuition rates for active-duty military and their dependents stationed at regional military installations (including Ft. Bliss); or those eligible for U.S. Department of Defense (DoD) Tuition Assistance (TA) or U.S. Department of Veterans Affairs (VA) education benefits
- Advocacy from admission to graduation
- Student Veteran Housing for student veterans and their families
- Priority registration for military and veteran students
- Aggie Green Zone Training, educating faculty and staff about our student veterans and the unique value they bring to campus
Military and Veterans Programs (MVP)

- Salute Honor Society for student veterans
- Connection with Student Veterans Organizations (SVO) of NMSU
- Military, veteran, and dependent scholarships
- Internship opportunities

NMSU degree programs are approved by the State Approving Agency Directory at the New Mexico Higher Education Department. Eligible students may receive education benefits from the U.S. Department of Defense or U.S. Department of Veterans Affairs.

For further information contact:

Military and Veterans Programs
MSC 4740, PO Box 30001
Las Cruces, NM 88003-8001
(575) 646-4524
http://mvp.nmsu.edu

MVP Student Computer Lab and Lounge

The MVP Computer Lab is available to military, veteran, and dependent students. The lab has six computers with several common access cards (CAC) readers. The Computer Lab is open Monday through Friday from 8am-5pm. Enjoy a free cup of coffee while doing your homework and network with like-minded students. We offer free efax, copy, and printing services to further accommodate our students. The MVP Student Lounge is equipped with comfortable furniture, coffee station, a kitchen (microwave/refrigerator) area, and a place to study and relax between classes.

Costs

Active-Duty

Active-duty military personnel (Armed Forces) stationed in New Mexico or at Fort Bliss, Texas may complete a "Resident Tuition Application for Active Military, Veterans and Dependents of the US Armed Forces" waiver to qualify for in-state tuition. Spouses and children of active-duty personnel who are stationed in New Mexico or Fort Bliss, Texas who are not otherwise entitled to claim in-state residency, may apply for in-state tuition by submitting a "Resident Tuition Application for Active Military, Veterans and Dependents of the US Armed Forces" waiver to the Military and Veterans Programs. Applications are available at the Military and Veterans Programs, online at http://mvp.nmsu.edu, or through the University Student Records Office. Please contact MVP on the required documents needed to complete the waiver application.

Dependents Receiving VA Educational Benefits

Per NM 2015 HB 427:

A spouse or child of a veteran of the armed forces is entitled to pay tuition and fees at the rate provided for New Mexico residents; provided that the spouse or child is eligible for benefits pursuant to the federal Post-9/11 Veterans Educational Assistance Act of 2008 or any other federal law authorizing educational benefits for a veteran and the dependents of a veteran. Applications are available at the Military and Veterans Programs, online at http://mvp.nmsu.edu, or through the Office of University Student Records. Please contact MVP on the required documents needed to complete the waiver application.

Veterans

Veterans receiving U.S. Department of Veterans Affairs education benefits are eligible for in-state tuition through the Veterans In-State Tuition Act by submitting a "Resident Tuition Application for Active Military, Veterans and Dependents of the US Armed Forces" waiver. For further information concerning approved programs and application process, eligible persons should contact Military and Veterans Programs.

Veteran students enrolled under the following programs are responsible for their tuition and fees in the same manner as a nonveteran student:

- Montgomery GI Bill®-Active Duty (CH 30)
- Survivors’ and Dependents’ Educational Assistance (CH 35)
- Montgomery GI Bill®-Selected Reserve (CH 1606)

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill.

Allowing Veterans to Attend or Participate in Courses Pending VA Payment

Background

Section 103 of Public Law (PL) 115-407, ‘Veterans Benefits and Transition Act of 2018,’ amends Title 38 US Code 3679 by adding a new subsection (e) that requires disapproval of courses of education, beginning August 1, 2019, at any educational institution that does not have a policy in place that will allow an individual to attend or participate in a course of education, pending VA payment, providing the individual submits a certificate of eligibility for entitlement to educational assistance under Chapter 31 or 33.

Pending Payment Compliance

In accordance with Title 38 US Code 3679(e), New Mexico State University adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post-9/11 GI Bill® (Ch. 33) or Vocational Rehabilitation & Employment (Ch. 31) benefits, while payment to the institution is pending from VA. New Mexico State University will not:

- Prevent the student’s enrollment;
- Assess a late penalty fee to the student;
- Require the student to secure alternative or additional funding;
- Deny the student access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Produce the VA Certificate of Eligibility (COE) by the first day of class;
- Provide a written request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill.

Responsibility of Students Receiving VA Education Benefits

Students must be pursuing a degree in a specific program to be eligible for VA education benefits. Students must submit their degree plans or Student Academic Requirements (STAR) Degree Audit Report and
Concise Student Schedule to Military and Veterans Programs to be certified. For continued certification, students must submit their degree plans or STAR Degree Audit Report and Concise Student Schedule to MVP every semester they plan to use VA education benefits.

Students using VA Education Benefits must notify MVP when any of the following occur:

- Dropping or adding course(s)
- Withdrawing from course(s)
- Withdrawing from the University
- Discontinuing regular class attendance
- Changing programs (academic majors/minors)

VA education benefits are payable for regular attendance in courses that are part of the student’s program (major/minor) curriculum. VA education benefits are not payable for:

- Classes not attended regularly
- Repeating a course for which a passing grade meets degree requirements
- Classes for which credit is received through successful completion of a proficiency test or grade by examination
- Classes taken on an audit basis
- Classes that are dropped or withdrawn from
- Classes taken that are not part of the student’s program (major/ minor) curriculum

**Tuition Assistance**

Federal Tuition Assistance (TA) is a benefit paid to eligible members of the Air Force, Army, Coast Guard, Marines and Navy. The Department of Defense (DoD) has given each service the ability to pay up to $250 per semester credit hour of the actual cost of tuition (no fees) during the fiscal year (Oct. 1 - Sept. 30). TA must be requested and approved prior to the start date of the course. Refer to your Service portal for specific TA deadlines and procedures. TA is paid directly to the school by the individual services.

Service members must first be admitted to NMSU before they may enroll in any classes at NMSU. Prior to applying, speak with your military service or Educational Services Officer to know your education options and make an informed decision. Please be aware of NMSU admission and registration process:

1. Service members must apply online to be admitted,
2. Login to myNMSU.edu to register for classes, and
3. Request TA through their service online portal. Each service has its own criteria for eligibility, application process and restrictions. Refer to our website for service login information: http://mvp.nmsu.edu/tuition-assistance

It is important to request TA for the same class and section number as enrolled in NMSU for tuition and grading purposes. Only enrollments requested and approved through their service online portal will be eligible for TA. Refer to our website for further information at http://mvp.nmsu.edu/tuition-assistance or contact the Military and Veterans Programs for assistance.

**State Tuition Assistance**

New Mexico National Guard Tuition Scholarship Program (NMGTSP) also referred to as State Tuition Assistance (STA). The scholarship provides eligible members of the New Mexico National Guard an opportunity to complete a bachelor’s degree or below. Air National Guard yearly cap is $8,000. Army National Guard yearly cap is $4,000. STA fiscal year is from July 1 – June 30. STA is paid directly to the school and is invoiced after the term's Last Day to Drop a Course without a "W" (100% refund). Refer to our website for STA deadlines and procedures at https://mvp.nmsu.edu/tuition-assistance/state-tuition-assistance or contact the Military Veterans Programs for assistance.

**MyCAA Spouse Scholarship**

The My Career Advancement Account (MyCAA) Scholarship Program is a career development and employment assistance program. MyCAA helps military spouses, who have successfully completed high school, pursue licenses, credentials, or associate degrees with a specific concentration or major to pursue an occupation or career with transferable and portable skills. MyCAA provides a maximum education benefit of $4,000 with an annual fiscal year (Oct. 1 – Sept. 30) cap of $2,000 to assist eligible military spouses. Refer to our website for MyCAA eligibility and procedures at https://mvp.nmsu.edu/tuition-assistance/mycaa-program or contact Military and Veterans Programs for assistance.

**Regulations**

Note: These regulations apply to all campuses of NMSU and are effective with the publication of this catalog. Tuition amounts, fees, and similar items subject to annual review and change are all effective with the current catalog.

**Credit for Military Service**

New Mexico State University will award academic credit to United States military personnel for courses and Military Occupational Specialties (MOS), based on the American Council of Education Guide (ACE) as well as through national standardized tests, such as CLEP, AP, PEP and DANTES. Credit for military-training is in accordance with NMSU Faculty Senate Legislation Proposition 24-07/08, which was passed in May 2008. Military Training and Military Occupational Specialties (MOS) must have a recommendation evaluation by ACE (in the ACE Guide) for credit to be awarded. Courses accepted for transfer credit become part of the student's official NMSU transcript and academic record. If a student wishes to appeal a decision regarding the acceptance of military training/education and/or MOS for academic credit, the student must submit a written statement of appeal to the Dean of the College to which the student has applied. The Dean will review the merits of the appeal and render a decision. The decision of the Dean is final.

Only Primary MOS(s) are eligible for academic credit in the initial review and evaluation. Credit for Duty and/or Secondary MOS may be eligible for academic credit if the student petitions the college's Associate Dean. Primary MOS is the primary specialty of a soldier and reflects the broadest and most in-depth scope of military experience. Veterans, active-duty personnel, National Guard and Reservists who are current students or students applying for admission to New Mexico State University may be granted academic credit on a case-by-case basis upon evaluation of military transcripts - the Joint Service Transcript (https://jst.doded.mil/jst) and the Community College of the Air Force transcripts. Course equivalencies and credit hours awarded for a particular NMSU degree are determined by colleges and/or academic departments. Credit hours may be awarded for specific courses toward degree requirement, or as elective credit. The number of credit hours awarded will be determined by the college and/or academic department.
Note: Students submitting military transcripts for credit evaluation must keep in mind the Maximum Time Frame policy, see the Financial Aid Section (p. 40) for more information.

Graduate Student Status (Training Time)
VA education benefits are determined by the number of graduate credits of enrollment for a given semester or summer session. Listed below are the credit hours that determine student status (training time) for graduate students.

Fall and Spring semester: full-time enrollment includes 9 or more credit hours. Students are considered three-fourths time if they are enrolled in 7 to 8 credit hours. Half time enrollment is 5 - 6 credit hours. Students enrolled in less than 5 credit hours are reimbursed for tuition and allowable fees only.

There are several sessions within the summer term. For the 10-week summer session, full-time enrollment is 6 credit hours and half-time enrollment is 3 credit hours. During the five-week sessions, full-time enrollment is 4 credit hours and half-time enrollment is 2 credit hours.

Military Withdrawal
New Mexico State University understands that our military students may be called to active duty, specialized training, or disaster relief efforts with little notice. U.S. active duty military students wishing to withdraw from all their classes must present their orders and their request for full withdrawal, as indicated below. However, the below policy does not pertain to a student’s basic and/or annual training. A student who has an order for training is encouraged to formally request, through the proper military chain of command, a postponement of their orders until the summer or the end of the semester they are currently enrolled in. If a student’s request for postponement is denied, the student may then follow the below steps but must provide documentation that their postponement request was formally denied.

All NMSU students that have been called up for active duty must take the following steps in order to withdraw from all their classes:

1. **Military and Veterans Programs (MVP):** TA/VA students ordered to Active Duty must provide a copy of orders to the MVP office, in Corbett Center Student Union, Room 244, or by email mvp@nmsu.edu. To assist in reporting accurate information to their military service or the VA Regional Office, student should also provide, in writing, last day of class attendance.

2. **NMSU University Student Records:** All students presenting their orders to the University Student Records Office, (575) 646-3411, or records@nmsu.edu will receive a military withdrawal from classes and a full tuition and fees refund for that semester.

3. **Bookstore:** Students who still have their receipts for textbooks purchased the semester in which they are called to active duty will be given a full refund for these textbook purchases when they present their orders. Please contact the bookstore for assistance at (575) 646-4431 or nmsu@bkstr.com.

Veterans’ Attendance and Satisfactory Progress
The U.S. Department of Veterans Affairs requires all veterans receiving VA education benefits to make satisfactory progress and systematic advancement toward an educational objective or be liable for overpayments. Satisfactory progress and regular class attendance are expected of such students.

If a veteran receiving benefits is suspended for academic reasons, benefits are terminated and will be restored only after readmission to NMSU.

If the university has liability claims filed against it as a result of a veteran failing to meet compliance requirements of the U.S. Department of Veterans Affairs, the university will not release any academic records on the veteran until such time as the veteran has reimbursed the federal government for funds drawn in violation of those requirements.

A student receiving VA education benefits who is pursuing a degree program offered by New Mexico State University should adhere to the curriculum of that program. Failure to do so will result in the student being certified for less than full-time status or becoming liable for an overpayment.

Military Experience Waiver
Prior to graduating, during the student’s junior and/or senior year, NMSU students are required to take two 3-credit Viewing a Wider World (VWW) upper-division (300-400 level) courses. These courses strongly emphasize the international character and multicultural influences in the fields of study and strengthen information retrieval skills. There are two options that NMSU allows for replacing one of the two courses (3 credits) of VWW requirement with another form of educational experience, these are: (Study Abroad Experience or Military Experience for students who have served at least four weeks of U.S. Military Foreign/ Sea Service in a foreign country.

Steps needed to request a Military Experience Waiver (replacing 3 credits of VWW):

1. Obtain a copy of your DD Form 214 or Memo from you Commanding Officer proving your 4-week deployment
2. Provide the above copy to your college academic advisor to request waiver
3. Wait for your college to approve and confirm

Note: Credits are not being waived, only one of the two courses are being waived within the requirement. You may still need to complete three credits in consultation with your academic advisor. Please contact the MVP or your academic advisor for questions and concerns.

Resources for Students
Military and Veteran Housing
New Mexico State University is one of the first in the nation to offer on-campus housing specifically designated for student veterans and their families transitioning out of the military and into student life. The Department of Housing & Residential Life has worked in conjunction with the Student Veterans Organization of NMSU to offer affordable housing on campus to student veterans attending the university.

For more information, please contact Housing and Residential Life: (575) 646-3202, housing@nmsu.edu, http://housing.nmsu.edu.

Service Members Opportunity Consortium (SOC)
The NMSU system has been designated a Servicemembers Opportunity Colleges (SOC) Consortium university. As a member of SOC, NMSU has committed itself to fully support and comply with SOC principles and criteria, ensuring that service members and their families share in the postsecondary educational opportunities available to other citizens. Those eligible are provided with appropriately accredited educational programs, courses, and services. The flexibility of programs
and procedures particularly in admissions, counseling, credit transfer, course articulation, recognition of other applicable learning experiences, including those gained in the military, scheduling, course format and residency requirements are provided to enhance access of service members and their families to undergraduate education programs. All SOC rules and regulations apply, including:

- Credit for military training and experience – NMSU recognizes and uses ACE Guide in evaluating military training experiences
- Reduced academic residency requirements – 25% maximum for most programs; 30% for 100% online programs
- No final year or semester requirement
- Credit for nationally-recognized testing programs such as CLEP (General and Subject exams), DSST (DANTES Standardized Subject Tests)

http://mvp.nmsu.edu

Reserve Officer Training Corps (ROTC)
The Reserve Officer Training Corps is a commissioning program designed to attract, motivate, and train qualified students for military service as officers. The ROTC program is represented on the NMSU campus by the Department of Military Science (U.S. Army) and the Department of Aerospace Studies (U.S. Air Force).

Curricula in the Departments of Military Science and Aerospace Studies are divided into basic and advanced courses of two years each. Participation in the advanced courses is on a contractual basis and leads to military service as a commissioned officer. Elective academic credit is granted by the university for ROTC classes.

Students with prior military service or Junior ROTC experience may receive credit, although not academic credit, for all or portions of the basic courses.

All qualified cadets enrolled in ROTC receive a stipend that varies dependent upon the year the cadet is in the program. Scholarships, which pay full college tuition as well as various laboratory, textbook and incidental fees, are available on a competitive basis.

For more detailed information about the ROTC programs, see the College of Arts and Sciences departments of Aerospace Studies (p. 259) and Military Science (p. 607) in this catalog. Additional information may be obtained by contacting the departments directly at:

(575) 646-4030 (Army)
(575) 646-2136 (Air Force)

Aggies Green Zone Allies
Aggies Green Zone Allies are empathetic faculty and staff members that military, veteran, and dependent students can reach out to for support. Allies are not expected to be experts in military and veteran matters, but they can make a positive impact by lending a sympathetic ear and connecting students to appropriate resources.

Faculty and Staff receive an Allies designation after participating in the Aggies Green Zone program and their name and contact information are listed on the MVP website. For more information, please visit: https://mvp.nmsu.edu/green-zone-training/green-zone-allies

International Students
International students are an important and valuable part of the NMSU community. International students enjoy all the rights, privileges and protections of domestic students. They are subject to all the same responsibilities and regulations as their fellow domestic students. However, some special policies are applicable only to international students. The Office of International Student and Scholar Services (ISSS) is responsible for ensuring the visa and admissions requirements are met and explaining university standards for admission. Some students not seeking degrees, such as international exchange students, may also work directly with the Office of Education Abroad.

Federal Regulations
An international student is any individual attending NMSU while present in the United States on a non-immigrant student visa (F-1, F-2, J-1, J-2, H-4, NATO visas, and possibly others such as students in temporary protected status).

Lawful permanent residents (green card holders) should present documentation of their status to University Student Records and go through the same admission process as U.S. citizens.

The United States Department of Homeland Security has established rules for students in non-immigrant status, such as international exchange students, may also work seeking degrees, such as international exchange students, may also work and explaining university standards for admission. Some students not seeking degrees, such as international exchange students, may also work directly with the Office of Education Abroad.

1. For immigration purposes, each student must maintain full-time student status
   a. Full time status for fall and spring semesters is defined as 12 or more credits for undergraduates (only 3 online credits can apply to the full-time requirement).
   b. Full time status for summer is defined according to NMSU requirements (only 3 online credits can apply to the full-time requirement for students beginning their program in the summer).
   c. Exceptions possible for final semester. Consult ISSS officials for more details.

2. International students may not work off campus without authorization. On-campus employment may be authorized under certain conditions.

3. All international students must maintain an up-to-date record in the ISSS Office. This record must indicate the student’s current living address, phone number, and email address.

4. Prior to admission, a prospective international student must demonstrate the following:
   a. Academic ability to succeed in the chosen course of study.
6. Adequate financial support to complete the chosen course of study.
7. English language proficiency as defined by the university.

**University Procedures for International Students**

**Regular Undergraduate Admission (Degree Seeking)**

International students are subject to the same admissions standards as all other NMSU students, but some additional requirements apply. This section addresses those additional requirements. Visit [https://iss@nmsu.edu](https://iss@nmsu.edu/ for more information.

Applications for admission that include the transfer of credits earned at a non-U.S. university must include a professional Foreign Credential Evaluation (FCE) report from a member institution of the National Association of Credential Evaluation Services (NACES) for every transcript from a foreign secondary school and/or university attended. The ISSS department highly recommends that applicants consider using SpanTran for their FCE. NMSU has worked with SpanTran to provide applicants with clear understand of which evaluation is needed. SpanTran provides an applicant portal to track and access evaluations. SpanTran is a long standing member of NACES. For more information visit [https://spanside.secure.force.com/SpantranApplication](https://spanside.secure.force.com/SpantranApplication).

**English Language Proficiency Requirements**

For full undergraduate admission to the university, NMSU requires a score of 520 (paper-based) or 68 (internet-based) or better on the Test of English as a Foreign Language (TOEFL). Students whose native language is English should be able to demonstrate a 70% grading proficiency in all language classes. A waiver of the TOEFL/IETLS requirement may be considered for:

1. Students who are native speakers of English.
2. Students from the following countries will be exempt from providing a TOEFL score for admission purposes. However, NMSU retains the right to require the applicant/student to take the English Language Placement Test if deemed necessary:
   a. Anguilla, Antigua, Australia, Bahamas, Barbados, Barbuda, Belize, Bermuda, Botswana, Caicos Islands, Cameroon (Anglophone), Canada (except Quebec), Cayman Islands, Christmas Islands, Cook Island, Dominica, England, Eritrea, Fiji, Gambia, Ghana, Grand Cayman Islands, Grenada, Grenada and the Grenadines, Guernsey, Guyana, Ireland, Israel, Jamaica, Jersey, Kenya, Kiribati Islands, Lesotho, Liberia, Malawi, Malta, Mauritius, Micronesia (Federated States of), Montserrat, Namibia, Nauru, New Zealand, Nigeria, Norfolk Island, Papua New Guinea, Philippines, Scotland, Sierra Leone, Singapore, Solomon Islands, South Africa, St. Christopher, St. Helena, St. Kitts and Nevis, St. Lucia, St. Vincent & Grenadines, Swaziland, Tanzania, Trinidad & Tobago, Tristan da Cunha Island, Turks & Caicos Islands, Uganda, Virgin Islands, Wales, Zambia, Zimbabwe
3. Students completing high school in the United States who (a) have attended the high school for at least two full years and (b) have scored in at least the 75th percentile in English on the ACT.
4. Students transferring from a two-year college, community college, or university in the United States who have earned a minimum of 30 acceptable semester credits (45 acceptable quarter credits) with a GPA of 2.0 or better (acceptable credit means classes that require a high proficiency in both written and oral English).
5. Students scoring a 70%-—(3) or better in English with the International Baccalaureate.

The university reserves the right to require any prospective international student to meet the TOEFL or IELTS requirement.

**English Language Placement Test**

*Placement in writing classes for international students is determined by the results of the English Language Placement Test (ELPT).*

Based on the results of the ELPT, the student is either assigned to ENGL 1105M (a bridge course designed to ensure success in ENGL 1110M), or is allowed to enroll directly into ENGL 1110M (for multilingual students). Please note that these classes are only available on NMSU's Las Cruces Campus. International students excused from ENGL 1105M will be required to take ENGL 1110M. The student may then be required to complete one or more regular English classes as required for a particular degree. Completing basic English courses at other U.S. institutions does not automatically satisfy the ENGL 1110M requirement. Equivalencies for ENGL 1105M and equivalencies for ENGL 1110M or ENGL 1110G are determined by the University Student Records Office, who may refer exceptional cases to the English Department in the College of Arts and Sciences.

In cases of dramatic discrepancies between TOEFL/ IELTS scores and the ELPT, the ELPT results shall determine placement.

**Proof of Financial Support**

The university reserves the right to require advance deposit of funds for any period deemed reasonable prior to granting admission. Each prospective international student must submit a current financial support document with his/her application. This document must show that:

1. The person providing the financial support has the necessary funds.
2. The funds can be transferred from the student's home country to the United States.
3. Proof of adequate financial support should be sent directly to ISSS.

**Admission Restrictions**

International student admission may be prohibited based on one of the following conditions:

1. The dean of a chosen college, the department head of a chosen major, and the President of a Community College campus may refuse to grant admission.
2. There may be a disproportionate number of international students or a disproportionate number of a particular nationality in one department, college or community college.
3. Academic advisors may not be available.
4. Sufficient classroom-based courses are not available to maintain visa status (e.g. courses are online).

All application material, including letters of recommendation, transcripts, national examination scores, transcripts from colleges or universities (with an English translation), and test scores (including the TOEFL or IELTS) should be sent directly to the NMSU International Student and Scholar Services Office at [iss@nmsu.edu](mailto:iss@nmsu.edu). Please note that
transcripts, test scores and foreign credential evaluations sent directly from an applicant/student to NMSU will be considered unofficial. To be considered official, transcripts, test scores and foreign credential evaluations must come directly from the school, testing agency or evaluation agency. All documents can be emailed to isss@nmsu.edu.

**New International Student Orientation (NISO)**

New International Student Orientation (NISO) is a mandatory online orientation course for new undergraduate and graduate international students to NMSU. Orientation takes place each semester before classes begin.

NISO covers important legal rules and requirements students must follow to maintain their F-1 status, as well as information about acclimating to New Mexico State University and the Las Cruces community.

During NISO, new international students are required to submit certain documentation and physically check in with the International Student and Scholar Services office.

New international students should activate their NMSU email address https://myaccount.nmsu.edu/activation and reach out to the ISSS office at isss@nmsu.edu for specific NISO dates and further orientation information.

For full consideration for undergraduate admission, applicants are subject to the following deadlines:

<table>
<thead>
<tr>
<th>Date</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>July 1 (application initiated)</td>
<td>Fall Semester</td>
</tr>
<tr>
<td>July 15th (all documents submitted)</td>
<td>Fall Semester</td>
</tr>
<tr>
<td>October 1st* (Study Abroad and CELP Programs)</td>
<td>Spring Semester</td>
</tr>
<tr>
<td>November 15th (application initiated)</td>
<td>Spring Semester</td>
</tr>
<tr>
<td>December 1st (all documents submitted)</td>
<td>Spring Semester</td>
</tr>
</tbody>
</table>

*Admissions to summer terms in not available to new undergraduate international students due to the limited number of face to face course offerings.

*New international graduate students seeking admission to summer terms are encouraged to work closely with their department and The Graduate School to assure that the student is enrolled in a schedule that meets federal enrollment guidelines

* Contact the Office of Education Abroad for exchange program admission deadlines.

**Graduate International Students**

For more information on graduate international student procedures, please visit the Graduate School (p. 44) section of this catalog.

**Miscellaneous Regulations**

1. All international students are required to have student health insurance. Insurance will be automatically billed to the student’s account each semester. (See https://isss.nmsu.edu/index-3/health-insurance/ for more information.)

2. New international students are not permitted to register until all ISSS requirements are met, including attending orientation and taking the English Language Placement Test (when applicable, see English Language Proficiency Requirements section). All international students, are therefore, required to report to the campus to which they were admitted. The following are the offices that a student may need to report to:

   a. Las Cruces campus: International Student & Scholar Services, 152 Breland Hall Tel. (575) 646-2834, isss@nmsu.edu. (Note: Exchange students need to report to the Office of Study Abroad in 132 Garcia Center.)

   b. Doña Ana Community College: International Student & Scholar Services, 152 Breland Hall (exchange students need to report to the Office of Study Abroad in 132 Garcia Center)

   c. Alamogordo Community College: Office of Student Services, Student Services Building, second floor

   d. Carlsbad Community College: Office of Student Services, 150 University Drive, Room 111

   e. Grants Community College: Office of Student Services, Walter Martinez Building, Main Office Complex

3. Students in non-degree exchange J-1 visa status must be engaged full time in a prescribed course of study. Consult OEA for more details.

4. All international students are required to register at the Aggie Health and Wellness Center within a week of arriving to undergo a TB test or submit results of a current TB test done in the home country within a week of arriving. Guidelines will be provided by the Aggie Health and Wellness Center.

**International Exchange Students**

An Exchange Student is defined as a visiting student, who is coming to NMSU for one semester to one Academic Year, but is not seeking a degree. An Exchange Student typically comes to NMSU from one of NMSU’s partner universities or from one of NMSU’s partner consortiums.

All international exchange students are required to be enrolled in NMSU approved health insurance. Office of Education Abroad will enroll the students and bill the insurance amount to the student’s account.

Exchange Students are required to attend a mandatory Orientation before courses begin. This will be scheduled and facilitated by the Office of Education Abroad, abiding by guidelines set forth by the US government per J-1 visa requirements.

Exchange students are subject to the same English Language Proficiency policies outlined in the section on University Procedures for International Students.

**Application Process for International Exchange Students**

Prior to admission to NMSU, a prospective international exchange student must be nominated from their home university, complete an application with the Office of Education Abroad (OEA) and submit their required documents. The process is as follows:

1. Nomination for exchange must be submitted by the Home University to the Incoming Exchange Coordinator by March 15 for Fall semester and September 15 for Spring semester. Please see your home university exchange coordinator for more information and to complete the nomination process.
2. Once nomination is received, students will be directed to make an account at the OEA website: https://oea.nmsu.edu/students/incoming-exchange-students/applying-to-nmsu/

3. The student is then required to complete the Exchange Student Nomination Form Questionnaire and upload the following documents:
   a. Passport
   b. Transcripts (in English)
   c. Financial Document showing proof of $5000 per semester attended. ISEP students do not have to provide the financial documents
   d. Current TOEFL scores (2 years or less), see below for acceptable scores.

4. All international students, regardless of status, must apply for Admissions to NMSU https://isss.nmsu.edu/adm-step-1/. Once the Student’s OEA application has been approved, OEA Staff will submit the documents listed above to Admissions on behalf of the student.

Academic Restrictions
The majority of the NMSU catalog applies to Exchange Students, with the following exceptions:

• Exchange students must take the English Language Placement Test.
• Courses must be taken at Main Campus only. Community college courses, including DACC are not available to Exchange Students.
• The Nursing Department is the only department that is strictly off limits to exchange students, with case-by-case exception by the department and this would have to be approved well in advance of the student being nominated.
• Exchange students are required to abide by all pre-requisite requirements and class size restrictions (i.e, if a course is closed when the student goes to register, an exception cannot be made)
• Online courses are restricted due to visa requirements (no more than 3 credits can be taken online. Additional fees will apply.).

Tuition, Fees & Other Expenses
All costs are given for one term/semester. The university reserves the right to change any of the charges without notice.

Campus Tuition Rates
For a full listing of all tuition rates from the NMSU System please see the University Accounts Receivable website.

ASNMSU Fee (Fall/Spring 1-11 credit enrollment) | $33.50
ASNMSU Fee (Summer 1-8 credit enrollment)     | $12.40
Graduate Wellness/Fitness fee – (Fall/Spring 9-11 credits) | $159.30
Certificate degree fee                         | $10.00
Bachelor or Associate degree fee               | $35.00
Master or Doctorate degree fee                | $45.00
Degree application late filing fee             | $50.00
Late Registration Fee Base Cost               | $25.00
Engineering Technology Fee                    | $36.00-145.00

Course Fees (Fees Assessed Per Course)
See the Course Fee page for a list of courses with additional fees.

Applied Music courses - see Music (p. 613) section of catalog

Mandatory International Student Fees
All international students are required to have health insurance coverage. International student health insurance is provided by GeoBlue unless otherwise covered by comparable health and accident insurance approved by the International Student Services. International students will be required to purchase health insurance for spring and summer during spring registration unless they have applied for spring graduation. (See below) All international undergraduate students will be assessed a $36 International Student Program Fee each semester.

Optional Fees
Wellness/Fitness Fee - Rates may Increase for 2020-2021
The Wellness/Fitness fee is included in tuition for full-time students at the Las Cruces Campus. Options for part-time students enrolled at Las Cruces Campus include:

<table>
<thead>
<tr>
<th>Wellness</th>
<th>Fitness</th>
</tr>
</thead>
<tbody>
<tr>
<td>Term pass student enrolled in 6-11 credits</td>
<td>$79.00</td>
</tr>
<tr>
<td>Term pass student enrolled in 1-5 credits</td>
<td>$105.00</td>
</tr>
<tr>
<td>Single visit student enrolled in 1-11 credits</td>
<td>$35.00</td>
</tr>
</tbody>
</table>

The Wellness fee grants access to the Student Health Center with charges accruing for medications, lab work, testing or procedures. The Fitness fee grants access to the Student Activity Center.

Health Insurance
Students who have access to the Campus Health Center may choose to purchase a commercial insurance policy offered through the Health Insurance Marketplaces established by the Affordable Care Act (ACT). These exchanges are intended to provide consumers with a new way to shop for, compare costs and coverage benefits, and enroll in insurance coverage. For more information visit: www.healthcare.gov or www.bewellnm.com
Housing Services
See the Students Resources (p. 889) section for room descriptions, accommodations, application process, deposit requirement, regulations and eligibility.

For current rate information, please visit our website at: http://housing.nmsu.edu/.

Dining Services
See the Dining Services section for meal plan descriptions & pricing, application process, deposit requirement, regulations and eligibility. Freshmen living on campus must choose between Aggie Unlimited and Aggie Choice Plans.

Late Registration Fee
A late registration fee of $25 is imposed if registration has not been completed before the late-registration period begins. Failure to make scheduled payments with the University Accounts Receivable on due dates will result in additional liability.

Payment of Charges
By enrolling in classes at NMSU, a student makes a financial commitment to pay the tuition and fee charges associated with his/her enrollment. The enrollment action constitutes a financial obligation between the student and NMSU and that all proceeds of this agreement will be used for education purposes and constitute an education loan pursuant to 11 U.S.C §23(a) (8). Terms and Conditions of Course Registration are posted on the University Accounts Receivable (UAR) website and available at time of Registration. Payments can be made by mail, web, telephone, or in person at University Accounts Receivable. Cash, checks, money orders and limited types of credit cards are accepted. All financial aid received must be paid towards balances owed. Additional penalty charges will be assessed for failure to make payments when due. The University reserves the right to cancel registration of any student who fails to pay, when due, any indebtedness to the institution if not completed by the deadlines as outlined on the UAR website under important dates related to your Student Account. Transcripts and diplomas will be withheld until all financial obligations are paid in full. Students are prohibited from registering for a term/semester until all previous debts due to the University are paid in full.

Payment Plan
Tuition, fees and other charges posted to the student account may be deferred and paid over the course of the semester by signing up for a payment plan. Students with an account balance of $200 or greater must sign up for a payment plan by the “Last Day to Drop a Course and Receive a 100% Refund” date which is also known as the Census date. There is a $25 non-refundable enrollment fee and a down payment due at the time of enrollment for fall and spring semesters and a down payment for the summer semester. Equal monthly payments are due on the 15th of each month of the semester. A $10 late fee is assessed to the student account for late, partial or missed payments. Students who are required to sign up for a payment plan and fails to do so by the deadline will have their current semester courses cancelled.

Tuition Adjustments, Refunds and Forfeitures
Students officially withdrawing from all courses or dropping a course(s) during a semester or term are eligible for a 100-percent refund of tuition and fees through the deadlines listed online as outlined on the University Student Records website under Important Dates for Students for each term. Students withdrawing from a course(s) after that deadline will not be eligible for a refund and will remain liable for payment of full tuition and fee charges. Non-attendance does not constitute an official course drop or withdrawal. It is the student’s responsibility to withdraw from the university and/or drop a course if he/she decides to not attend once enrollment has taken place. All charges due to NMSU must be paid before refunds or adjustments will be permitted.

In cases of academic or disciplinary suspension, eligibility for tuition refunds and adjustments will depend on the conditions of the suspension and will be entirely at the option of the institution. Should unforeseen circumstances beyond the reasonable control of New Mexico State University result in curtailing classes, closing residence facilities, or otherwise withdrawing services that are a normal function of the institution, refunds of any nature will be at the discretion of the college/university administration.

Residence hall rentals and dining hall charges may be refunded in accordance with schedules adopted by these departments.

Delinquent and Prior-Term Balances
NMSU reserves the right to cancel the registration of any student who fails to pay, when due, any indebtedness to the institution.

Transcripts will be withheld until all financial obligations are paid in full.

Dishonored Financial Transactions - Checks, Credit Cards, ACH Transactions
The University charges a penalty on all dishonored cash instruments. Personal checks will not be accepted from students who have had previously dishonored checks.

Estimating Other Expenses
In addition to the direct costs stated above, other expenses per semester may include such items as textbooks and supplies (estimated at $625) and personal expenses (estimated at $1,251).

Cooperative Education
Students participating in the Cooperative Education Program who receive academic credit pay the same tuition and fees as regularly enrolled students. Work phase students who are assigned to campus or a nearby off-campus workstation may pay for the student wellness/fitness as if they were a part-time student enrolled in 1-5 credits.

Ways to Qualify for Lower Tuition Rates
Resident or nonresident status is determined in accordance to a uniform definition established for all New Mexico institutions by the Higher Education Department, State of New Mexico, NM Administrative Code (NMAC) 5.7.18. The University Student Records Office administers residency. Information on the following programs and offices that administer the reduced rate program may be obtained from the University Admissions, the University Financial Aid and Scholarship Services.

- American Indian Agreement
- Athletic Grant
- Colorado-Arizona Reciprocal Agreement
- Dual Credit
Financial Aid & Scholarship Services

University Financial Aid and Scholarship Services administers a broad spectrum of grants, scholarships, work-study funds, and loans in an attempt to meet the financial need of the university’s students.

Students applying for financial aid must complete a Free Application for Federal Student Aid (FAFSA) designed to determine, in accordance with state and federal guidelines, the difference between what the student and/or family is expected to contribute and the cost of attending any campus within the NMSU System. Among the factors that determine the family’s Expected Family Contribution (EFC) are:

1. Annual-adjusted gross income based on your/your parents tax return as reported to the Internal Revenue Service (IRS);
2. Savings, stocks, and/or bonds;
3. Other assets in the form of a business, farm or real estate;
4. Nontaxable income and benefits; and
5. Income and assets.

Students applying for financial aid should complete a FAFSA by visiting https://www.studentaid.gov/fafsa

Please refer to the NMSU-Las Cruces, Financial Aid and Scholarship Services web site for more information on aid and policies at fa.nmsu.edu.

General Eligibility Requirements
To receive financial aid you must be admitted to NMSU as a degree seeking student in an eligible degree or certificate program and demonstrate that you are qualified to obtain an education by:

- Having a high school diploma or recognized equivalent such as a General Education Development (GED) certificate or
- Completing a high school education in a home-school setting approved under state law or
- If you were enrolled in an eligible program at a college or career school prior to July 1, 2012, you may show you are qualified to obtain a financial aid by either:
  - Having passed an approved ability-to-benefit test (if you don’t have a diploma or GED, a college can administer a test to determine whether you can benefit from the education offered at that school); or
  - Completing six credit hours or equivalent course work toward a degree or certificate (you may not receive aid while earning the six credit hours)
- Be enrolled or accepted for enrollment as a regular student working toward a degree or certificate in an eligible program.
- Be a U.S. citizen or eligible noncitizen (state funded scholarships are available to undocumented students).
- Have a valid Social Security number. If you don’t have a Social Security number, you can find out more about applying for one at ssa.gov.
- Must be meeting satisfactory academic progress (SAP).
- Sign a statement on the FAFSA certifying that you will use Federal student aid only for educational purposes.
- Sign a statement on the FAFSA certifying that you are not in default of federal student loan.
- Register with the Selective Service, if required.

Financial Aid Awards
All financial aid awards are based on information provided by the student and/or parents, availability of funds, and eligibility requirements. Any award may be revised based on changes in enrollment, cost of attendance, application for graduation, family contribution or satisfactory academic progress. Withdrawals or reductions in enrollment may affect an award or any future awards. Financial Aid will not pay for audited courses or some repeats.

Grants
The Federal Pell Grant is a federal grant available to undergraduate students with documented financial need. If the Pell Grant is insufficient to pay educational expenses, the student may be eligible to receive other types of aid, including a Federal Supplemental Educational Opportunity Grant (SEOG) or Leveraging Education Assistance Partnership Program
from the institution, they must complete the Exit Counseling to avoid delays in receiving their transcripts or diplomas. Students may complete all these requirements at studentaid.gov.

Repayment of a Federal Direct loan begins six months after graduation or six months after enrollment drops below half-time (less than 6 credits for undergraduate students and less than 5 credits for graduate students).

**Withdrawals**

Recipients of financial aid grants and loans who stop attending class, drop credit-hours, or withdraw may be required to return all or a portion of awarded Title IV funds. Further information regarding the Return of Title IV funds is available on the NMSU-Las Cruces web site at fa.nmsu.edu/return-of-title-iv-funds.

**Financial Aid Satisfactory Academic Progress**

Federal regulations require that financial aid recipients meet certain academic standards to be eligible for federal financial aid. To ensure that financial aid recipients are making satisfactory academic progress (SAP), academic transcripts are reviewed at the end of each term to determine eligibility for the next term. All terms of attendance are reviewed, including periods in which the student did not receive financial aid. All transfer credit hours are taken into account when satisfactory progress is reviewed. The Financial Aid SAP standards are not the same as the NMSU System’s Academic Standards of Progress criteria. Students may learn more by visiting http://fa.nmsu.edu/sap.

**Elements of Financial Aid Satisfactory Academic Progress**

- **Qualitative Progress:** Undergraduate students must maintain a cumulative GPA of at least 2.0 (a C- average). Graduate students must maintain a cumulative GPA of at least 3.0 (a B average).
- **Completion Rate:** Students must complete a minimum of 70 percent of all coursework (registered credit hours) attempted within the NMSU System. Any course with a grade of withdraw (W), incomplete (I), repeats (RR), failure (F), audit (AU), or no credit (NC) are considered as attempted but not considered completed coursework. Repeated courses are included in the calculation.
- **Maximum Time Frame:** Students must complete their program within 150 percent of the published length required by the program. Students who have reached the maximum allowable time will be suspended from receiving financial aid. Limited developmental/remedial hours are excluded from this calculation. Total attempted hours including repeated courses and transfer coursework are included in the student’s maximum time frame calculation.

**Financial Aid Warning**

“Warning” is a status assigned to a student the first semester they fail to meet the standards of satisfactory academic progress (SAP) measured as Qualitative Progress and Completion Rate. If the student has not returned to satisfactory standing after this warning semester, they will be suspended from further financial assistance until satisfactory progress standards are met.

**Financial Aid Suspension**

Students are suspended from receiving financial aid if they do not meet satisfactory academic progress standards for financial aid purposes. Students on financial aid suspension will not receive any form of federal assistance.
or state financial aid (grants, loans, work study). Financial aid eligibility is reinstated when all standards of satisfactory progress are met.

The Appeal Process

Students suspended from financial aid may appeal the suspension if there are extenuating circumstances affecting their progress. Students who would like to appeal the suspension must submit an appeal form, available at: fa.nmsu.edu. They must also submit all supporting documentation to University Financial Aid and Scholarship Services.

A committee will review the appeal and may grant reinstatement of financial aid based on the extenuating circumstances that directly contributed to the deficient academic performance. To receive timely decisions from the committee, students are encouraged to submit appeals and supporting documentation by the priority date found at fa.nmsu.edu/sap.

The Graduate School

A number of academic departments of the university have a long history of providing formal graduate study. The first master’s degree from NMSU was awarded in 1896. In 1921, the president of NMSU appointed a committee to oversee graduate study. The Graduate School was formally established in 1956 with a full-time dean, and in the same year, 57 master’s degrees were awarded.

The Graduate School mission is to facilitate the exchange of ideas and the creation of knowledge, while fostering academic excellence. The Graduate School promotes a high-quality learning environment that embraces diversity. New Mexico State University is one of the few research extensive universities that reflect Hispanic, Native American, and other American cultures and the world. Our international students from Latin American, Asian, African and European countries add to the richness of our diversity. The quality of life for our students is of critical importance to the Graduate School and NMSU. We cultivate the collaboration of academic, professional and personal skills while helping students graduate in a timely manner.

Policies

Since graduate degrees are awarded for attainment in scholarship, the requirements stated in this catalog are to be considered as minimal. The major department or the dean of the graduate school may make additional requirements as deemed necessary for each candidate. Each student’s program is subject to the approval of the respective department head. Responsibility for securing approval of the proposed program of study rests with the student. Frequent consultation with the advisor is essential to satisfactory progress toward degree completion.

Graduate Degree Programs

For a full listing of the Graduate Programs offered at New Mexico State University, please see the Graduate Admissions webpage https://apply.nmsu.edu/

Admission for Graduate Students

A student seeking admission to graduate school at New Mexico State University must hold a minimum of a bachelor’s degree or an advanced degree from a regionally accredited institution. The program of preparation should be substantially equivalent in the distribution of academic subject matter to the requirements for a comparable degree at NMSU.

No student is officially admitted into a graduate program until a Certificate of Admission has been issued by the Graduate School. Although the Graduate School considers this certificate valid for a one year period, academic departments may require re-application if the admitted applicant does not enroll in the semester noted in the certificate.

Formal application is required of all prospective students, including graduates of NMSU, who seek admission to a graduate program.

- Students must submit: the Application for Admission as well as other supplemental documents required by the academic department.
- Supplemental documents may include, but are not limited to, unofficial college transcripts, test scores (TOEFL, IELTS, Duolingo, GRE, and GMAT), statement of purpose, writing samples, and letters of recommendation.

If a student is recommended for admission by the academic department, the student will be required to submit official transcripts, test scores, and the appropriate application fee directly to the Graduate School. Other official documents may be required. Official transcripts must be sent directly from the prior colleges or university directly to the Graduate School.

Categories of Graduate Students

A student seeking admission to a graduate program is assigned one of the following categories based upon previous academic performance:

Doctoral Regular

To be considered for admission to a doctoral program, an applicant must have a minimum grade-point average of 3.0. Some doctoral degree programs also require a master’s degree or its equivalent. NMSU does not admit a doctoral student on a provisional basis.

Master’s Regular

An applicant whose scholastic record is satisfactory will be admitted as a regular student. This classification includes:

1. an applicant whose grade-point average is greater than or equal to 3.0, or a grade-point average greater than or equal to 3.0 in the last half of undergraduate work,
2. an international applicant must hold at minimum a four year bachelor’s degree or its equivalent and whose grade-point average (or its equivalent) is greater than or equal to 3.0,
3. a continuing graduate student whose grade-point average is greater than or equal to 3.0, or
4. a student with prior graduate work at another institution whose minimum grade-point average is 3.0.
Master's Provisional
An applicant whose scholastic record is not satisfactory can be admitted as a provisional student. Students admitted with this classification can be either:

1. transferring graduate students whose cumulative grade-point average is less than a 3.0
2. Students whose grade-point average the last half of undergraduate work is less than a 3.0, but who does have a minimum grade-point average of 2.5

A student admitted provisionally must complete his or her first three courses, a total of 9 credits of graduate work, with a minimum grade-point average of 3.0. A provisional student who does not meet the 3.0 grade-point average after at least 9 credits of graduate work is subject to dismissal. A student admitted on a provisional basis is prohibited from working as a teaching assistant. However, he or she may work as a research assistant or a grader for one semester. A provisional student can be employed for one semester as a grader. To hire a provisional student, departments must submit an official letter to the Graduate School requesting permission.

Master's Undeclared
An applicant that has not decided on a specific graduate degree program and has an undergraduate minimum grade-point average of 2.5 may be considered for admission as an undeclared master student. International students with an F-1 visa are not eligible for undeclared master status. Information regarding restrictions as an undeclared master student can be obtained from the Graduate School.

Only undeclared regular status students who meet all Title IV eligibility requirements are eligible to receive federal financial aid for one consecutive 12-month period beginning the first term of enrollment. Questions about financial aid and undeclared master’s should contact Financial Aid and Scholarship Services. An applicant admitted as an undeclared master is not eligible to receive a graduate teaching assistantship.

Undeclared Student Enrollment Restrictions
• Students in this standing are restricted to enrolling in a maximum of 9 graduate credit hours. To continue enrollment the student must apply and be admitted into a degree-seeking program.
• Course restrictions placed by the graduate department may constrain enrollment by an undeclared student.
• An undeclared master student is restricted to transferring 9 graduate credit hours to a degree program.

Change of Status from Undeclared to a Degree Program
Changing status from an undeclared master’s to a degree program requires acceptance to the department by completing a new application for admission.

• If the student has nine graded graduate credit hours, the cumulative minimum grade-point average (GPA) must be 3.0 for the request to be considered.
• Undeclared applicants admitted to a degree program which have fewer than nine graded graduate credits and the undergraduate GPA is between 2.5 to 2.9 the recommendation for admission will be provisional student status.
• If the undergraduate GPA is 3.0 or greater, the admission recommendation will be regular student status.

Admission to a Graduate Certificate Program
The graduate certificate program of study is designed to develop or enhance a focused area of expertise. The primary purpose of a graduate certificate program is to provide specific skill training to meet employment needs locally, regionally, nationally and globally.

A graduate certificate is a focused collection of courses, consisting of 12-18 credits, successfully completed by a student in a given discipline or a set of related disciplines. A graduate certificate is not an official graduate degree of NMSU. A student that successfully completes a certificate program at the graduate level will receive a certificate of completion statement on his or her official transcript and a formal certificate from the Graduate School. A student has three years to complete a graduate certificate program.

The graduate certificate program is offered to both currently enrolled, degree-seeking students and students who enroll solely to obtain a certificate. Currently enrolled degree-seeking students must apply separately to the graduate certificate program. Students wishing to enroll solely in the certificate program must still meet all admissions criteria. Successful completion of a certificate program does not guarantee admission into a graduate degree program.

A student enrolled in a graduate certificate program cannot transfer credits from another institution towards the completion of the program. However, transfer credits taken in a graduate certificate program may be applied towards a graduate degree program in the same area of focus. The number of transfer credits will be determined by the program of study or official degree audit. The time limit on transfer credits is 5 years after the completion of the certificate.

Students only enrolled in a graduate certificate program are not eligible for a graduate assistantship.

Graduate Certificate Student
A student enrolled in a certificate program is not automatically enrolled in a graduate degree seeking program at NMSU. The status will change if he or she applies and is accepted to a graduate degree program. A student enrolled in a graduate certificate program is not eligible for a graduate assistantship.

Application Dates and Deadlines
Contact the graduate degree program for published application deadlines. If the graduate program does not publish a deadline, the Graduate School encourages the applicant to apply by March 15th for fall enrollment and by October 15th for spring enrollment to be considered for financial support. The Graduate School will continue to accept applications 30 days prior to the first day of classes.

Transcripts
An applicant is required to arrange to have one official transcript from each institution attended sent directly to the Graduate School.

If the applicant's undergraduate coursework is not complete at the time of application, she or he must submit a transcript showing the completion this course work directly after the degree has been granted. No application materials will be returned to the applicant.
Standardized Tests

Certain graduate programs may require standardized test scores for admission. An applicant may be required to take one or more of the following examinations as determined by the academic department:

- Graduate Record Examination,
- the Miller Analogies Test,
- the Graduate Management Admission Test.

(See academic department description for required testing.)

Readmission

An NMSU student who has been out of school for more than two consecutive terms is required to make formal application for readmission to the institution. The application will be reviewed by the academic department and the Graduate School. The application should be submitted at least 30 days prior to the start of the semester.

A student who has attended other institutions during the absence is required to submit official transcripts to the Graduate School prior to the date of registration and be eligible to return to the college or university last attended. Readmission status and academic standing will be determined by previous NMSU academic standing. Academic performance at other institutions attended during the applicant’s absence from NMSU will be taken into consideration in determining the student’s admission status.

Renewal of Application for Admission

The admission credentials for an applicant who does not register for the semester admitted are retained at the Graduate School for a period of one calendar year from the date of application. At the end of this period, credentials are discarded. A student wishing to renew his or her application after the one-year lapse must submit a new application.

Denied Admission

The Graduate School or the department may deny admission if the scholastic record or program of study is judged inadequate. If denied admission by a specific academic department, the applicant may be eligible to seek undeclared status as described in Categories of Graduate Students. If denied by the department, the student may wish to contact the department for additional information.

Admission may be denied to an otherwise qualified applicant when the desired program lacks resources to accommodate additional enrollment.

A student who is denied admission to one program and wishes to be considered for another program must complete a new application for the second program.

Application documents are retained by the Graduate School for one calendar year.

Non-Degree Admission

Non-degree admission is designed to meet the needs of an applicant who does not wish to pursue a degree or who has not yet completed the application process to a specific department. Academic advising for non-degree students is obtained from the academic department. No more than 9 graduate credits earned in non-degree status may be transferred to a graduate degree program. NMSU only recognizes graduate credit for non-degree work from the University of New Mexico (UNM). Transfer credit is restricted to 6 credits with the approval of the appropriate department, the college dean, and the graduate dean. A student classified as non-degree is not eligible to receive financial aid, student employment, or institutional tuition waivers; nor is he or she eligible to participate in student government or intercollegiate athletics; and is not eligible to receive benefits from veterans’ programs.

Visiting Student

A visiting student is a student taking graduate credit to transfer to his or her home institution. An Application for Admission to the Graduate School must be submitted 30 days prior to registration. The student is required to submit unofficial transcripts; however, the academic department must concur and admit a visiting student. Visiting students are not eligible for undeclared status or for graduate assistantships.

Out-of-State Students and Legal Jurisdiction

By applying for admission/enrollment, both the student and parents agree that New Mexico law prevails and all litigation will be held in New Mexico federal court or state court in Dona Ana County, New Mexico.

International Graduate Students

English Proficiency for Admission

- TOEFL 79 IBT; 550 PBT
- IELTS 6.5
- Duolingo 105

International students admitted into a master’s degree program, with TOEFL 68 to 78 IBT, 520 to 549 PBT or 6.0 IELTS, are required to sit for the English Placement Exam prior to beginning academic coursework. (The International Student and Scholar Services Office arranges this test upon arrival). If the results of the English Placement Exam do not meet the requirements for academic coursework the student may be required to take additional academic English classes (ENGL 1105M Intermediate ESL Composition and Grammar Review and/or ENGL 471 M Scholarly Writing for International Graduate Students).

Doctoral level students must provide official proof of an English Proficiency minimum score as stated above.

English Proficiency

All international students seeking a teaching assistantship must demonstrate proficiency in English and competency in pedagogy. Prior to the first semester in which the teaching assistantship is to be received, international students must undergo the NMSU International Teaching Assistant (ITA) screening administered by the NMSU English Department on behalf of the Graduate School. Students who pass the screening exam are immediately eligible for assignment to a teaching assistantship.
Program

Transfer of Graduate Credits into a Degree

Graduate students are required to enroll in 9 or more credits (exclusive of normal progress toward completing a degree). Therefore, all international maintenance of status related to full-time enrollment and making satisfactory work in residence. The department may also require work to be validated by examination.

1. Graduate credits taken at NMSU as undergraduate electives may be transferred to the student's graduate program at NMSU.
2. Graduate credits from another university may be transferred to NMSU, provided the credits were earned on the campus of an accredited institution.
3. Transferred course work (credit and hours) is maintained separately from NMSU course work.
4. Immediately after initial enrollment in the Graduate School, students must submit forms to obtain formal permission from their advisor, department head, and the dean of the Graduate School to transfer graduate-level course work. The department has the responsibility to accept or reject any number of transferred credits based on such elements as whether the work fits into a logical program for a degree, if grades of A or B have been earned in the courses proposed for transfer, and any other elements it deems relevant. Credit granted for work done at another institution is tentative until proven by satisfactory work in residence. The department may also require work to be validated by examination.
5. Transfer credits must meet the same time-limit requirements (seven years) as master level graduate classes at NMSU.
6. Course work taken at other institutions after initiation of Graduate School at NMSU must have prior approval of the department head and the dean of the Graduate School if such work is to be transferred. All requirements as to accreditation, level, grades and other elements described for initial transfer work will apply. Request for Transfer of Credit forms are available online.

Graduate Certificates

Students enrolled in certificate programs may not transfer credits from another institution towards the completion of the certificate program offered by NMSU. However, they can transfer credits taken in a graduate certificate program at NMSU into a graduate degree program at NMSU, provided that the courses will lead towards a graduate degree in the focused area of the certificate program. The number of transfer credits will be determined by the program of study. The time limit on course transfer is five years after the completion of the certificate.

Master's Level

In order to meet residency requirements at the master's degree level, students must take at least 50 percent of their required coursework at NMSU.

Masters of Fine Arts

Before consideration for candidacy, the department head and the graduate advisor will determine the number of transferable credits from a previous graduate program.

Specialist in Education Degree

A maximum of 6 graduate credits earned at another approved institution may apply to the Specialist in Education degree. Transfer credits must have been earned during the five-year period prior to completion of the specialist in education degree.

Doctorate Level

At the doctoral level, students may transfer course work that logically fits into the program of study.

Funding Opportunities for Graduate Students

The Graduate School offers awards, assistantships and fellowships to qualified graduate students. All awards require faculty nominations. Continuing and newly admitted students can request either a faculty member or the department head to nominate them for the awards of the Graduate School. In selecting individuals for any assistantship or fellowship and in the administration of appointments, New Mexico State University will not discriminate on grounds of age, ancestry, color, disability, gender, national origin, race, religion, sexual orientation or veteran status. The University limits the number of years a student may be supported on funds from the state of New Mexico. Departments may place additional limitations on the years of support. The student must be admitted to the Graduate School before a request for an assistantship or fellowship will be considered by the department or the Graduate School. For detailed information, application process and deadlines please consult https://gradschool.nmsu.edu/future-students/How To Apply

A student should check Graduate Assistant Employment Guidelines of the Graduate School. Departments may place additional limitations on the years of support.
Assistantships
Graduate assistantships, including teaching and research, offered by New Mexico State University are awarded primarily by the students' academic department. Employment guidelines may be found at: https://gradschool.nmsu.edu/Current%20Students/guidelines_on_employment_of_graduate_assistants.pdf

Students with assistantships must ensure that they are enrolled in, as well as successfully complete, 9 graded credits for full-time status. Graduate assistants should take no more than 15 course credits per semester. Students must also maintain a 3.0 grade-point average. Courses taken for audit may count for the total course load, but may not be counted in the minimum graduate assistant course load requirement. If course deficiencies are identified, the student can register for 3 undergraduate credits and a minimum of 6 graded graduate credits during their first semester at NMSU to be eligible for a graduate assistantship. The duties of a graduate assistantship normally require about 20 hours per week (full-time, fall and spring) of student's time. All graduate students awarded an assistantship must complete the online mandatory orientation offered by the Graduate School.

Teaching Assistantships
A student seeking appointment as a teaching assistant will be required to demonstrate proficiency in communication skills necessary for satisfactory service in the classroom. Departments may also require students to complete workshops/orientations in order to qualify for assistantships.

Eligibility for teaching assistantships includes:

- Acceptance by and subsequent registration in the Graduate School and academic department
- Classification as a "regular" graduate student
- All international students seeking a teaching assistantship must demonstrate proficiency in English and competency in Pedagogy.

Assistantships for Provisional Graduate Students
Graduate students accepted on a provisional basis cannot serve as teaching assistants. However, they can serve as research assistants. Eligibility includes:

- Acceptance by and subsequent registration in the Graduate School and academic department
- Classification as a provisional graduate student
- Enrolling in and successfully complete 9 graded credits with a minimum of 3.0 GPA.
- Funded on research projects of the faculty of NMSU

Provisional students can also be hired as graders for one semester. The department must hire the student as a Graduate other at the time of completing the hiring path, so that the student be allowed to work as a grader.

Diversity Graduate Assistantships
The diversity awards are awarded thru the nominations process and allocated to departments on a competitive basis to help increase the diversity and quality of the student body. Departments will commit matching funds to support these awards for the student. The diversity award can be used to recruit domestic students. Please note that the award is for an academic year. Departments will need to commit funds to the selected student for at least one additional semester or preferably a year. The selected student must be admitted to the department prior to being nominated for the diversity award.

Fellowships
The Graduate School maintains a Fellowship and Grant Information webpage providing a database of grants, fellowships and assistantships for graduate students. The university offers a number of fellowships available to both new and continuing students.

Graduate Assistant Tuition Fellowships
As an opportunity for departments to recruit and nominate outstanding graduate students to their programs, the Graduate School awards tuition fellowships to graduate assistants. Master's degree students will receive up to two years of support and doctoral degree students will receive up to three years of support. In order for students to qualify for a second and third year of support, they must maintain their status as graduate assistants for the duration of the tuition fellowship period. These awards are for students receiving 10 hour or 20 hour graduate assistantships. Students must be enrolled in and successfully complete 9 graded credits with a minimum of 3.0 GPA. The tuition fellowships are paid for fall or spring semesters only and do not include fees.

McNair Graduate Assistantships
The Graduate School wishes to support and recognize the success of the McNair program by offering several McNair Graduate Assistantships for one academic year with a match of one year from a department. Students must be nominated by the department for this award.

Merit-Based Enhancement Fellowships for Current Graduate Assistants
To help departments reward outstanding graduate assistants, the Graduate School offers Merit-Based Enhancement Fellowships to graduate assistants who are engaged in the teaching or research mission of New Mexico State University. The amount of the award is $4,000 for an academic year. Nominations must come from faculty.

Outstanding Graduate Assistantship Award
We also offer Outstanding Graduate Assistant awards of $2,000 to recognize the contributions of graduate assistants to the teaching and research mission of New Mexico State University. The awards allow faculty to show appreciation for the excellent work of graduate assistants. Current graduate assistants must be nominated by their faculty to be considered for the awards.

State of New Mexico Department of Higher Education (NMHED) Graduate Scholarship Programs
The State of New Mexico Higher Education Department Graduate Scholarship Program offers Graduate Fellowships/Assistantships for women and minority persons who are citizens or permanent U.S. residents and who are a first year student or a student that is beginning graduate studies in any graduate department at the master's or doctoral level at NMSU. The selected student must be admitted to a graduate program prior to applying for this award.

NMHED fellowships carry stipends of $7,200 per annum and matched with half-time (10 hours per week) teaching assistantship provided by the student's department for a total award of $15,800.
Eligibility:
• Priority will be given to New Mexico students from those groups with the most severe under-representation and students with the greatest financial need.
• A citizen of the United States or permanent resident.
• Agree to serve in an unpaid internship or assistantship at the eligible institutions, a government agency or private industry approved by his major department for ten hours per week during the academic year.
• Eligible according to a standard needs analysis or financial aid officer’s professional judgement.

The total amount of this award is based on the salary for a 20 hour graduate assistantship and usually increases from year to year, based on raises awarded by the State of New Mexico.

Fellowships are available for two years for master’s students and four years for doctoral students. One of the NMHED fellowships is, when possible, designated for a McNair Scholar. The nomination process can be found at: https://gradschool.nmsu.edu/Funding%20and%20Financial%20Aid%20.html.

In order for the student to establish financial need, students must complete a Free Application for Federal Student Aid (FAFSA) form available online in the Financial Aid Office. This form is not to be returned to the Graduate School. The results will be sent to the student and the Financial Aid Office. Students must have a complete file and have been approved for financial aid to be considered for this fellowship.

Preference will be given to those students that have a current FAFSA form on file at the NMSU Financial Aid office.

Graduate Assistants Salaries and Tax Withholding Guidelines
Internal Revenue Service tax withholding guidelines require graduate students employed through New Mexico State University to maintain at least 6 credits of course work during the fall and spring semesters and 3 credits of course work for summer sessions to be eligible for the student FICA tax exemption. Student employees who do not meet this requirement during any given pay period will be subject to Social Security taxes and Medicare taxes. Salaries for graduate assistants are as follows:

<table>
<thead>
<tr>
<th>Level</th>
<th>Salary</th>
</tr>
</thead>
<tbody>
<tr>
<td>I- G1</td>
<td>$18,163</td>
</tr>
<tr>
<td>II- G2</td>
<td>$18,583</td>
</tr>
<tr>
<td>III- G3</td>
<td>$19,003</td>
</tr>
</tbody>
</table>

Level I (G1) - Applies to regularly enrolled students pursuing a master’s degree. This level is also for a first year student seeking a doctoral degree who does not currently hold a master’s degree. Once the doctoral student becomes a second year student and passes their qualifying exam, they can obtain support as a Level II (G2) student.

Level II (G2) - Applies to students pursuing the Education Specialist or Doctoral degree who have passed the qualifying exam or who have a master’s degree in the same or cognate field and the recommendation of the head of their major department.

Level III (G3) - Applies to a doctoral student who has passed the comprehensive examination and has advanced to candidacy.

Student Records Office as the third Friday of the semester each spring and fall semester).

If New Mexico resident status has not been established by the time of any reappointment, the graduate assistant may be subject to non-resident tuition rates.

Applications for state residency may be obtained in the University Student Records Office located in the Educational Services building.

Social Security Numbers in Student Records
As required by law, social security numbers are collected from prospective and current students who
1. plan to seek employment on campus or
2. wish to receive financial aid.

In addition, the university is mandated by federal tax regulations to provide tuition and fee payment information to the student and the Internal Revenue Service, so that applicable educational tax credits may be computed. The social security number will be necessary to submit this tax reporting. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

In order to be employed by New Mexico State University all students must have obtained a social security number within eight weeks of being hired or risk losing their assistantship.

When an official social security number is issued to an international student, it is the student’s responsibility to inform Human Resources or the University Student Records Office as soon as possible.

Hourly Work
Eligibility for student payroll requires that a graduate student
1. be admitted to the Graduate School as well as to a department,
2. maintain a minimum cumulative GPA of 3.0, and
3. be enrolled for at least 9 graded credits.

A student may not work more than 20 hours per week during the academic year. Students looking for current job postings should check with Career Services, Garcia Annex, Room 204; or visit http://careerservices.nmsu.edu/.

Students not classified as residents of New Mexico but working at an hourly rate are not eligible to receive in-state tuition.

Contact Information
For more information, contact:
Graduate School, MSC 3-GS

Postdoctoral Fellowships
Those individuals who are exemplary scholars, who have recently been awarded a doctoral degree, but who wish to continue their education and research experience under the direction of a professor at New Mexico State University are classified as postdoctoral. The postdoctoral
fellowship is a regular professional appointment normally for one or two years. Under no circumstances will an individual remain in this classification for more than three years.

Postdoctoral fellowships are advertised and applications are submitted to the hiring department in compliance with the guidelines for hiring professional staff, but without the requirement for a position description questionnaire. An "E-Hire" staffing authorization request must be submitted to the office of Human Resources by the hiring department. No offer of employment may be made until approval has been given by Human Resources.

A postdoctoral fellow has the following privileges:

- may take 6 credits in spring and fall semesters, 4 credits per summer session without tuition charge
- is eligible to purchase an employee parking permit
- is eligible for other employee benefits available to regular employees, including annual and sick leave, as well as health, dental, and life insurances
- may purchase athletic tickets, activity tickets, and gymnasium privileges
- is eligible for library privileges

Persons classified as postdoctoral fellows pay Social Security and New Mexico State Educational Retirement.

The University recognizes and supports the concept of off-campus study and research as a valuable experience for graduate students. These experiences may take the form of internships, intensive study of specialized techniques with personnel at other institutions, and conducting research at specialized research facilities. Arrangements for such off-campus activities should be made with the student's committee and the graduate dean and should represent opportunities not normally available at this university. When the bulk of a student's research is to be conducted off-campus, both on- and off-campus advisors should be appointed and periodic meetings with the student's committee held to ensure timely progress. Such opportunities offer students considerable flexibility in their training and promote valuable contacts between the student, the university, industry, and research institutions. Students are encouraged to pursue these opportunities with their advisors and the graduate dean.

Agricultural Experiment Station

The Agricultural Experiment Station is the research division of the College of Agricultural, Consumer and Environmental Sciences. Faculty, professional personnel, and graduate students conduct basic and applied research concerned with biological, physical, and economic phases of food and fiber production, processing, and distribution; consumer health and nutrition; and the social and economic aspects of rural living. Energy, environmental, and natural resource conservation aspects of these broad disciplines offer many opportunities for the graduate student to undertake meaningful research investigations in both the laboratory and the field.

There are eight departments on the main campus with excellent laboratory facilities for research. In addition, the station maintains 13 field research centers including eight agricultural science centers, a forestry research center, a livestock research center, an animal insect lab, and two research ranches.

The station provides financial support to graduate research assistants and cooperates with research institutes at the university and with various state and federal agencies in providing opportunities for graduate research programs covering a wide scope of student interests. For further information, contact aesdean@nmsu.edu or visit http://aces.nmsu.edu/aes/.

Apache Point Observatory (APO-ARC)

Apache Point Observatory (APO) is located in the mountains of south-central New Mexico and is operated by New Mexico State University. The observatory is a major astronomical research facility that is home to four telescopes. The largest is a fully equipped 3.5-meter telescope that can be used for optical and infrared imaging, photometry, and spectroscopy. Apache Point Observatory is also the site of the Sloan Digital Sky Survey 2.5-meter telescope, which is running several different wide-field surveys touching on many facets of astronomy. NMSU owns and operates a 1-meter telescope at APO for wide field imaging. There is also a 0.5-meter telescope at the site.

Apache Point Observatory is owned by the Astrophysical Research Consortium (ARC). The consortium members include: New Mexico State University, the University of Colorado, the University of Virginia, the University of Washington, Georgia State University and Johns Hopkins University. NMSU manages and operates the observatory for the ARC consortium. Astronomy faculty and graduate students use the facility for various research projects. For further information, e-mail astro@nmsu.edu.

Arts and Sciences Research Center

The research center is the coordinating office for all scholarly activities within the College of Arts and Sciences. The primary functions are service to departments and faculty members, and the administration of grants and contracts. The center encourages and stimulates individual research and creative efforts in all areas of the college, and it facilitates the development of potential research programs within the college, and with other colleges, institutes, the Physical Science Laboratory, and external organizations. The center assists individual faculty members by providing small grants of "seed" money. Typically, support services fall within, but are not limited to, the following areas:

- Location of funding sources
- Administration of grants and contracts
- Financial management of grants and contracts
- Liaison with the Office of the Vice President for Research

https://artsci.nmsu.edu/as-research-center/

Bioinformatics Research Lab

The bioinformatics research lab develops efficient computational and statistical methods to model mechanisms of complex biological systems. The lab's work rigorously evaluates both the theoretical and practical effectiveness of computational methods for characterizing molecular interactions from high-throughput measurements such as next generation sequencing data. The lab's long term goal is to invent advanced computational technology to expedite quantitative understanding of the complexity of life processes.

Director: Joe Song
https://www.cs.nmsu.edu/~joemsong/group.shtml
Biology Research Facilities

The Department of Biology houses multiple core facilities and individually faculty-maintained research laboratories that have been successful in the acquisition of millions of dollars in research grants from the NIH and NSF, as well as other agencies. The facilities and equipment include a cell culture facility, insect and invertebrate rearing and microbiology culturing facilities, diverse microscopy laboratories, as well as a well-maintained herbarium and vertebrate museum holding more than 100,000 specimens from our region and beyond. Individual research laboratories are equipped to investigate organismal genomics, transcriptomics, and microbiome analysis; organismal and microbial evolutionary mechanisms and physiology; vaccine development; host-symbiont interactions; cell mitosis and cytokinesis; plant pathology; neuronal and muscular tissues; animal vocalization and behavior; computational modeling of biological phenomena; and molecular systematics.

Contact: Dr. William Gould (wgould@nmsu.edu)

Bureau of Business Research and Services

Founded in 1969, the bureau has two basic objectives. The first is to provide business and economic research services to both public and private sectors of the state, the region and the nation. Research capabilities in the behavioral and managerial sciences, business systems, economic and social sciences, marketing, statistical design and analysis and regional planning can be applied to problems relating to economic growth, business development and community needs in New Mexico.

The second objective of the bureau is to provide management training services to business organizations and associations, to government agencies, and to the public as well. Management development seminars, training programs, and analytical services are designed to meet specific organizational needs.

The Bureau of Business Research and Services is a member of the Association for University Business and Economic Research.

Carlsbad Environmental Monitoring and Research Center

Created in 1991 with a grant from the U.S. Department of Energy, the Carlsbad Environmental Monitoring & Research Center (CEMRC), a department of the College of Engineering, conducts environmental research, provides special analytical services, assists with technology development, and disseminates information for federal, state, and private sponsors. CEMRC is housed at Light Hall, a 26,000-square-foot facility located in Carlsbad, in southeast New Mexico. The facility’s laboratories include radiochemistry and associated nuclear spectroscopy, environmental organic and inorganic chemistry, in vivo bioassay, and field sampling. A primary activity of CEMRC is long-term environmental monitoring for contaminants in the region of the Waste Isolation Pilot Plant (WIPP), located near Carlsbad. The data produced from this project are summarized in periodic reports and are presented on the CEMRC web site at www.cemrc.org. Primary research areas of the CEMRC include studies of atmospheric dust and inorganic contaminants, human and ecological risk assessment, and development of radioanalytical and spectroscopic methods for measurement of naturally occurring and human-produced radioactive elements. Results of CEMRC research projects appear in peer-reviewed scientific journals and are presented at national and international meetings.

The Center for Animal Health and Food Safety

The Center was founded in 2007 and is comprised of three primary functional research units:

1. Chemical Analysis and Instrumentation Laboratory maintains high-end analytical instrumentation which is available to support collaborative research within NMSU, the State of New Mexico and other educational or industrial partners.
2. Food Safety Microbiology Laboratory specializes in research and development of foodborne pathogen detection and control; food product testing, including microbiological analyses, pH, aw; process evaluation of acidified foods, inoculation studies, shelf-life testing, and contracting to establish food safety plans (e.g. HACCP plans, Listeria control programs).
3. Veterinary Entomology Research Laboratory provides a state-of-the-art large animal research facility located on 45 acres, with a 5000 sq. ft. large animal laboratory, capable of housing 24 animals individually in environmentally controlled rooms. The laboratory maintains multiple insect rearing facilities for major ectoparasites including: house flies, stable flies, horn flies, face flies, mosquitoes, lice, mites and ticks. The facility has outdoor housing for 60 large animals in covered, individual outdoor stanchions, in addition to housing for wildlife species including: deer, elk, bighorn sheep and rabbits.

Director: Dr. Tanner Schaub (tscaub@nmsu.edu), (575) 646-5156

Center for Latin American and Border Studies

The Center for Latin American and Border Studies (CLABS) was established in 1979 by the College of Arts and Sciences and is located at the Nason House. CLABS supports Frontera NorteSur, an on-line journal about the U.S.-Mexico border. In addition, CLABS supports the collection at the NMSU library, travel for faculty to conferences, language training in Spanish and Portuguese, lectures by visiting speakers, curriculum development for teachers, the student Latin American organization, and other outreach activities. It has a faculty governance organization and helps administer the Nason foundation fund. In recent years the center has pursued an active program of research on U.S.-Mexico border policy issues, in cooperation with several universities in the United States and Mexico.

Contact: Center for Latin American and Border Studies 575-646-7041.

Chemistry and Biochemistry Research Facilities

The Department of Chemistry and Biochemistry has a comprehensive equipment base that supports research in nearly all phases of chemistry. It also has instrumentation dedicated to the department’s teaching mission. Major instruments supporting both missions include five nuclear magnetic resonance (NMR) spectrometers ranging from low field (200 MHz) to high field (500 MHz), two atomic absorption spectrometers, several UV-Vis spectrometers, two mass spectrometers (LS/MS) and four gas chromatograph instruments. Details about all instruments
located in the department’s facilities can be accessed at https://chemistry.nmsu.edu/research/.

Instrumentation Facilities Manager: Jaime Rodriguez (jarodrig@nmsu.edu)

Cooperative Extension Service
As a land-grant institution, New Mexico State University has a tripartite mission—instruction, research, and extension. The three parts of this mission are closely interrelated and mutually reinforcing. New Mexico State University’s Cooperative Extension Service serves a unique role in New Mexico. As the state’s land-grant university, and as mandated by its charter, it is the “leading object” for agriculture, home economics, engineering, business, health sciences, as well as educational programs in the liberal arts and natural sciences. NMSU’s uniqueness arises from its vision of teaching/learning, research, and extension/outreach functions—interdependent, mutually supportive and central to its land-grant mission.

The extension aspect of the university’s mission is the process of extending the intellectual expertise and resources of the university through teaching and applied research to address the social, civic, economic and environmental challenges and opportunities facing our state, region, nation, and global community. Extension entails an organized and planned program of activities; these activities bring the resources of the university to bear in a coherent and strategic fashion for the benefit of the citizens of New Mexico and the nation. Many faculty have split appointments with the Agricultural Experiment Station and serve as graduate advisors for students interested in extension as a career. For more information see http://extension.nmsu.edu/.

Core University Research Resources Laboratory
The Core University Research Resources Laboratory (CURRL) is a campus-wide, core facility providing all levels of technical support and consultation for investigators needing analytical and routine transmission, scanning electron microscopy, and light microscopy services. The integrated imaging facility is administered through the Office of the Vice President for Research and is considered a core research facility. The facility was established to furnish state-of-the-art microscopy instrumentation and techniques to investigators and their students for research and training. The laboratory is located in Skenne Hall, RM W152, and W160.

Director: Dr. Huiyao Wang (huiyao@nmsu.edu)

Data Management and Data Analysis (DATA) Research Lab
The Data Management and Data Analysis (DATA) research lab aims at advancing techniques for the effective management and analysis of complex data (e.g., sequence data, graph data, semi-structured data). The laboratory conducts research in modeling, storing, querying and mining large amount of complex data at both theory and application levels. The laboratory keeps active collaborations with scientists from other Computer Science areas and scientific disciplines to broaden the usage of data management and data mining techniques. The laboratory is located in Science Hall, Rm. 153.

Director: Huiping Cao
https://kddlab.nmsu.edu/

Dissect Laboratory
DISSECT (Discovering Science through Computational Thinking) is a laboratory established by a joint team of researchers from the Department of Computer Science and the College of Education. The lab is housed in Computer Science on the second floor of the Science Hall. DISSECT provides physical space and facilities to nurture interactions between computational scientists and educational researchers in order to develop innovative technologies that will expose K-12 students to fundamental principles of computing. The laboratory provides workspaces and high performance workstations for graduate students as well as a dedicated network and offices for researchers and visitors.

Director: Dr. Enrico Pontelli (epontell@cs.nmsu.edu)

Educational Research Center (EDRC)
The Educational Research Center (EdRC) in the College of Education is the administrative office which supports faculty in obtaining and managing external funding. The academic which supports faculty in obtaining and managing external funding. The academic component of the ERC, under the direction of the Associate Dean for Research, facilitates faculty involvement in research, publishing and outreach initiatives with the goal of building a strong research agenda for the college. The business component of the ERC is the Education Research and Budgeting Office (ERB) which assists in proposal submission, account setup and monitoring and provides oversight for the College’s unrestricted, restricted and legislative funds.

ERB Director: Juanita Hannan (juamendo@nmsu.edu)

Engineering Research Center
The mission of the College of Engineering’s Engineering Research Center (ERC) is to support the faculty and staff of the college in building research programs of nationally and internationally recognized excellence. The ERC assist faculty and staff in their pursuit of research funding, management of their research, and in ensuring research activities are in compliance with all relevant laws and regulations.

The ERC disseminates information to the college regarding state, national and international research trends, programs and policies. The ERC identifies potential funding opportunities and calls for proposals that may be a fit for college faculty and staff. The ERC works with the Office of the Vice President for Research and the other NMSU colleges to bring together multi-disciplinary teams.

Engineering Research Center for Bio-Mediated and Bio-Inspired Geotechnics (CBBG), Engineering Research Center for Re-inventing the Nation’s Urban Water Infrastructure (ReNUWIt), and Tran-Set: Transportation Consortium of South-Central States.

For proposal preparation, the ERC pre-award team assists the faculty with interpretation of sponsor guidelines, development of the proposal budget, completion of standardized forms, review of the proposal for adherence to sponsor requirements, and submission to the NMSU Office of Grants and Contracts for their review and final submission. The post-award staff assist the faculty and staff with award management, including working with the NMSU Sponsored Projects Accounting office. The ERC is responsible for financial management of college grants and contracts.

Contact: Dr. Phillip DeLeon (pdeleon@nmsu.edu)
Freeport-McMoran Copper & Gold Water Quality Laboratory
The Water Quality Laboratory in the College of Engineering was established by a gift from Freeport-McMoRan. It is located in ECIII rooms 106 and 110. Current capabilities of the lab include:

- Dionex ICS-2100 Ion Chromatographic System (ICS) with an AS-DV autosampler, the ICS-2100 is configurable for either anions or cations;
- PerkinElmer Elan DRC-e Inductively Coupled Plasma for Mass Spectrometry (ICP/MS) with dynamic reaction cell (DRC) capability;
- Perkin Elmer Series 200 High-Performance Liquid Chromatography (HPLC) with UV/Vis Detection;
- Gas Chromatography (Agilent model 7890) using a mass spectrometer detector (Agilent model 5975C) (GC/MS) using an Agilent 7693 autosampler;
- A 16-vessel Multiwave 3000 Microwave Reaction System by Anton Paar;
- Micromeritics ASAP 2050 High Pressure Sorption Analyser that uses a dewar with liquid nitrogen or antifreeze for temperature control. The antifreeze temperature is controlled from -20° to +75° Celsius using a PolyScience PD15R-30 recirculator bath;
- Shimadzu TOC-Vcsh Total Organic Carbon Analyser (TOC) with a Total Nitrogen Measurement Unit (TNM-1) option;
- Malvern Zetasizer Nano ZS for zeta potential and size measurement of suspended particles;
- Anton Paar Supras for zeta potential measurement of membranes, granules, or fiber particles; and
- a Millipore Direct Q3 water purification system.

Analyses may be performed by a researcher after receiving training on the device.

Contact: Dr. Phillip DeLeon, pdeleon@nmsu.edu

Geochemistry Research Laboratory
The Department of Geological Sciences houses a number of analytical instruments, all of which are available for use by graduate students, undergraduate researchers, and faculty. The department houses a Laser-Ablation Multi-Collector Inductively Coupled Plasma Mass Spectrometer (LA-MC-ICPMS) for analysis of isotopic ratios of microsamples, an X-ray fluorescence spectrometer for geochemical analysis of rocks and other solid materials, a thermal ionization mass spectrometer for analysis of isotopic ratios of solids and liquids, and a laser-induced breakdown spectrometer for the analysis of solid materials. Sample preparation equipment is available to support research on these instruments. In addition, mineral separation equipment including a jaw crushe, Gemini shaker table, Franz magnetic separator, and heavy liquids, is available for geochronologic or other mineralogic research projects.

Contact: Dr. Nancy McMillan, nmcmila@nmsu.edu

ICredits: Interdisciplinary Center of Research Excellence in Design of Intelligent Smartgrids Technologies
The Center, funded through a grant from the National Science Foundation, is focused on the development of novel hardware/software technologies and methodologies to enable the design, development, deployment and evaluation of microgrids and smartgrids. The Center is housed in Science Hall; it supports research activities at the boundaries between power systems and computer science. The Center also promotes the development of educational and outreach activities aimed at enhancing the awareness and training in all areas relevant to the smartgrids vision.

Contact: Dr. Enrico Pontelli, epontelli@nmsu.edu

Institute for Energy and the Environment
The Institute for Energy & the Environment (IEE) is a unit within the Engineering Research Center. IEE’s programmatic efforts focus on interdisciplinary research, education, and outreach to develop comprehensive solutions for environmental, energy and water challenges in the southwestern United States and worldwide. IEE offers opportunity for conducting research to the graduate and undergraduate students at NMSU. IEE’s major objectives include renewable energy, biofuel, advanced water treatment and desalination, and advancing education, training and outreach in areas of environment, energy and water.

Director: Dr. Phillip DeLeon, pdeleon@nmsu.edu

Knowledge Representation, Logic and Advanced Programming Laboratory (KLAP)
The KLAP lab was established in 1994 through an RIMI grant from the National Science Foundation and has developed into a focal research laboratory of international reputation. It is housed in the Department of Computer Science. KLAP’s research focus is to advance state-of-the-art knowledge in Artificial Intelligence and High Performance Computing and its application in diverse interdisciplinary domains such as bioinformatics and assistive technologies.

The lab provides a full meeting space (with multimedia projection capabilities), access to eight high performance work stations, a dedicated high performance computing server and a 40-core Infiniband Beowulf cluster. The lab has hosted international researchers and has graduated approximately 100 graduate students with MS and Ph.D. degrees. It has attracted almost $10,000,000 in external funding.

Director: Dr. Enrico Pontelli, epontelli@cs.nmsu.edu

Networks and Systems Optimization Lab (NSOL)
The Networks and Systems Optimization Laboratory (NSOL) supports research in networking and communication including, but not limited to: wireless networks, the Internet, supercomputing networks, and online social networks. This research includes optimization problems, protocol design and development, hardware design and development, and mechanisms for improving security and privacy of communications (including cybersecurity). The lab has a 24 core blade server (RAID-10) that is used for extended simulations and back-up, five desktops, five laptops, and four smartphones, which form a networking testbed.

Director: Satyajayant “Jay” Misra
http://nsol.nmsu.edu/

New Mexico Department of Agriculture
The New Mexico Department of Agriculture (NMADA), under the control of the NMSU Board of Regents, is responsible for administering laws and regulations that daily affect the lives of every citizen of the state.
These laws and regulations (concerning the production, preparation, processing, sale, and use of agricultural products; weights and measures; and petroleum products) are designed to assist producers, processors, and consumers. NMDA's marketing program provides guidance to commodity groups in the promotion of agricultural products. A broad consumer service in many areas other than agriculture is provided by the department. NMDA's director is New Mexico's secretary of agriculture and serves on the governor's cabinet as a liaison between state government and the agricultural industry. For further information, e-mail: pio@nmda.nmsu.edu. NMDA's web site is at http://www.nmda.nmsu.edu.

**New Mexico State University Library**

The New Mexico State University Library is a Destination for Discovery that offers access to rich content and research-level collections in two library facilities located in the heart of the campus. Zuhl and Branson libraries house over 1.8 million items and provide electronic access to scholarly journals and databases for both general academic and discipline-specific research. View the large geological collection and artworks on display at Zuhl Library and explore historical collections within the Archives and Special Collections Department at Branson Library. Reference assistance and research support are provided by a team of faculty and staff dedicated to student learning and success. There are a variety of study areas available including quiet and group spaces, some of which can be reserved. Over 100 PCs, scanners, laptops, and other resources are available for students to use. More detailed information may be found at http://lib.nmsu.edu.

**New Mexico Water Resources Research Institute**

The New Mexico Water Resources Research Institute (WRRI) at NMSU, established in 1963, was one of the first of 54 water institutes in the United States. The WRRI program encompasses all state universities in New Mexico and public agencies sponsoring water research. The institute serves as a coordinator, assisting researchers in obtaining funds, working with granting agencies, and serving as the administrator for projects. The annual budget of approximately $1.5 million is made available from federal, state, and/or private sources through a variety of grants and contracts. All research projects administered by the institute encourage graduate student participation. As a result, about 30 students a year receive scientific training through institute-sponsored projects. WRRI also sponsors the Annual New Mexico Water Conference, which has provided a public forum for state water issues since 1956. Public participation helps the institute focus its research program on areas of greatest need. The WRRI publishes research results of every project it administers and other miscellaneous reports. The WRRI also maintains a water resources reference room with 2,000 books and documents and the ability to link to 10,000 water-related documents on water issues facing the state and the nation. E-mail may be sent to nmwrri@nmsu.edu. The WRRI's homepage address is http://nmwrri.nmsu.edu.

**Oak Ridge Associated Universities Program (ORAU)**

Since 1991, students and faculty of New Mexico State University benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 98 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOA facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at http://www.orau.org, or by calling either of the contacts below.

ORAU's Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU's members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact:

Dr. Luis Cifuentes - Vice President for Research (575) 546-2481
ORAU Corporate Secretary (865) 576-3306; or Visit the ORAU Home Page (http://www.orau.org)

**Physics Research Facilities**

The Department of Physics operates a PANalytical Empyrean x-ray diffractometer for low-resolution powder diffraction, high-resolution diffraction, reciprocal space mapping with a triple-axis crystal, and x-ray reflectance. It also operates a J.A. Woollam variable angle of incidence ellipsometer (VASE) with a computer-controlled Berek waveplate compensator for measurements from 190 to 2500 nm, at room temperature and from 80 to 800 K. Both instruments are integrated into CURRL and available to the campus community and off-campus users for a fee. See http://xrd.research.nmsu.edu and http://ellipsometry.nmsu.edu for more information and to book time on the instruments.

Contact Dr. Stefan Zollner (zollner@nmsu.edu).

**Play and Interactive Experiences for Learning Lab (PIXL)**

The Play and Interactive Experiences for Learning (PIXL) Lab works at the intersection of games, human-computer interaction, and mixed reality, developing game experiences that educate and function as scientific experiments in HCI. Projects center around the best means of interfacing with games, including keyboard and mouse and controllers all the way to gesture-based input, wearable systems and mixed reality. Prior research has investigated the use of games for training firefighters, and ongoing research applies this to disaster response in general and military projects. The lab provides space for students, as well as access
The College of Education has research initiatives and labs in the following areas:

- The Kinesiology and Dance Department offers lab space for the study of biomechanics, sport psychology & motor learning, applie and basic physiology, healthy aging, physical education curriculum and kinesthetic learning.

- The Speech and Hearing Center's Benfer for voice and speech science research.

- The Special Education/Communication Disorders Department's Autism Research Initiative.

- Alliance for the Advancement of Teaching and Learning in collaboration with the Southwest Regional Educational Lab REL (Institute for Educational Services, IES) provides research for partner school district practitioners on accountability, special education/ response to intervention, literacy, leadership development, math and science achievement, and program evaluation.

- The Institute for Mathematics and Science Education oversees multiple mathematics and science grants as well as serving as the STEM Outreach Center for K-12 education.

- The Counseling and School Psychology Training and Research Center provides counseling services for students, training for graduate students in counseling, school psychology and counseling psychology, and conducts research on counseling outcomes and processes.

- A Reading Research Center is housed in the NMSU Children's Village and provides reading diagnostic services including analysis of reading using eye-tracking software.

Southwest Institute for Health Disparities Research

To address the substantial health disparities that exist in Southern New Mexico and the U.S./Mexican Border Region, New Mexico State University has recently established the Southwest Institute for Health Disparities Research within the College of Health and Social Services. The purpose of the Institute is to assist faculty to secure external funding and conduct research which has the potential to reduce health disparities and improve minority health, provide health related community outreach programming, provide training for researchers, lay groundwork for additional funded research, and attract highly qualified minority faculty and graduate students to NMSU. Additionally, the Institute serves as the coordinating office for all scholarly activities within the College of Health and Social Services http://swihr.research.nmsu.edu/.

Dr. Jill McDonald (jillmcd@nmsu.edu)

Southwest Technology Development Institute (SWTDI)

SWTDI, formally the SouthWest Regional Experimental Station or SWRES, was established in 1977 under DOE funding as a Photovoltaic research center. Over the last 30 years SWTDI has conducted extensive long term panel, inverter, and systems testing providing significant contribution to the field. One substantial consequence of the system testing has been the accumulation of knowledge related to the safety, installation methodology, design, and development industry standards in PV. Today SWTDI continues to be a leader in education and development of article 690 of the National Electric Code (NEC), Solar Photovoltaic Systems and continues its research in long term panel and inverter testing. However in 2012 SWTDI integrated with the Electrical and Computer Engineering Department of NMSU to broaden the research focus and has developed a microgrid for expanded research into renewable integration into the electric grid and demonstration of ongoing collaborative research with the ECE department on industry partners.

http://ece.nmsu.edu/research/swtdi
Spatial Applications and Research Center (SPARC)

The SpARC laboratory was established in 1982 as an applied contract research laboratory for the NMSU Geography Department. SpARC provides a variety of services including planning and research, GIS, image processing, modeling and training. The original purpose of the laboratory was to undertake externally funded projects under the direction of geography faculty and employ students within the department. Thirty-four years later, the laboratory continues to do project related work. It has employed more than 150 students, and provided assistance to more than 35 faculty members inside and outside Geography. The primary clients of the lab have been federal state and local government agencies, with an emphasis on applied transportation, water resource, and environmental research projects. The lab houses 11 high performance workstations, a range of mapping grade GPS units, and a large scanner/ploter. Software available for use includes database software, ENVI image processing software, TransCAD, and the entire suite of Esri GIS software.

Director: Dr. Christopher Brown (brownchr@nmsu.edu; (575) 646-1892)

Survey Research and Program Evaluation Center

The Survey Research and Program Evaluation Center (SRPEC) is designed to assist researchers, agency directors, business leaders, and policy makers in all aspects of survey research and program evaluation. Housed in the College of Health and Social Services, the Center has state-of-the-art hardware and software for conducting phone and internet surveys of any type and length as well as facilities for conducting face-to-face interviews and focus groups. SRPEC provides a wide array of services: questionnaire design, sampling, data collection, and statistical analysis for telephone, mail, and internet surveys. Center staff are also able to assist and conduct all forms of program evaluation from formative to summative approaches, including process, outcome and impact evaluations. Bilingual (Spanish/English) questionnaire translation and interviewing are also available.

Director: Dr. Joe Tomaka (tomaka@nmsu.edu; (575) 646-3525)

University Museum

Established in 1959, the New Mexico State University Museum has provided 50 years of service to the university and community. The University Museum assists NMSU in providing quality education, advancing knowledge through research, and celebrating the culture and history of the southwest and the University. The Museum serves the community as a repository and exhibitor of local and regional history and culture. Through its care and maintenance of donated ethnographic, historic and prehistoric objects, it preserves an important part of Southwestern and Border region culture and history. The Museum encourages faculty and student research using our diverse cultural materials.

The Museum’s collections are primarily anthropological (archaeological and ethnographic) with secondary collections in history and the natural sciences. Anthropological collections document the cultural diversity of the border in the Greater Southwest and northern Mexico. The Museum preserves and catalogs collections to promote research and access to cultural materials. Exhibits are developed by students and staff as well as brought in from other institutions.

Director: Dr. Fumi Arakawa (farakawa@nmsu.edu)
Curator: Anna Strankman (amstrank@nmsu.edu)

General Education & Viewing a Wider World Courses

Associates/Bachelor's General Education

The New Mexico General Education Requirements

General Education at NMSU provides all students with a broad foundation and common framework upon which to develop knowledge and skills, social consciousness and respect for self and others, thus enabling them to function responsibly and effectively now and in the future. General education courses at NMSU can be identified by the G suffix.

In accordance to state law (Post-Secondary Education Articulation Act), the New Mexico Higher Education Department has established a statewide model for General Education. Within the General Education model, is nine credits of electives that will be determined at an institutional level. The current approved NMSU General Education courses are listed below under each of the six general education areas.

The New Mexico General Education Requirements

General Education at NMSU provides all students with a broad foundation and common framework upon which to develop knowledge and skills, social consciousness and respect for self and others, thus enabling them to function responsibly and effectively now and in the future. General education courses at NMSU can be identified by the G suffix.

In accordance with state law (Post-Secondary Education Articulation Act), the New Mexico Higher Education Department has established a state-wide model for General Education. Within the General Education model, is nine credits of electives that will be determined at an institutional level. The current approved NMSU General Education courses are listed below under each of the six general education areas.

### General Education Elective

### Area I: Communications

Select one course from four of the following six content areas for a total of 12-14 credits.

Each course selected must be from a different area and students cannot take multiple courses in the same area.

### Alternatives for Meeting General Education Requirements (9 credit hour rule)

Students taking nine or more credits in a specific subject area, even though the courses are not designated as General Education courses, will have met the general education requirements for that subject area. The courses can meet both major and general education requirements for the degree. For example, a student may complete ARTS 2610 Drawing II, ARTS 1240 Design I and ARTS 1250 Design II (9 hours) and thereby satisfy one course from the Area VI: Creative and Fine Arts category even though none of those courses carries a G suffix. Please check with the Center for Academic Advising and Student Support.

The Viewing a Wider World (VWW) requirement fosters intelligent inquiry, abstract logical thinking, critical analysis, as well as the integration and synthesis of knowledge. The program strives for literacy in writing, reading, speaking and listening. It teaches mathematical structures, acquainting students with precise abstract thought about numbers and space. The program also encourages an understanding of science and scientific inquiry, as it provides a historical consciousness, including an understanding of one’s own heritage as well as respect for other peoples and cultures. To achieve its goals, the program includes an examination of values and stresses the importance of a carefully considered values system as it fosters an appreciation of the arts and general education. It provides the breadth necessary to have a familiarity with the various branches of human understanding. All VWW courses can be identified by the “V” suffix.

Prior to graduating, NMSU students are required to take two courses from separate colleges from the Viewing a Wider World list in the Catalog. These courses are upper-division (300-400 level) Viewing a Wider World courses and should be taken in a student’s junior and/or senior year. One of the two courses must be in a college other than their own. The other course may be taken within their home college, but this course:

1. must be in a different department from their major department;
2. must not be cross-listed with a course in their home department;
3. cannot be counted as one of the requirements for the student’s major.

These courses strongly emphasize the international character and multicultural influences in the fields of study and strengthen information retrieval skills. There are two options that NMSU allows for replacing 3 credits of VWW requirement with another form of educational experience, these are:

1. **Study Abroad Experience**: consisting of at least four weeks of a Study Abroad program or university coursework in a foreign country earning 3 credits.
2. **Military Experience**: for students who have served at least four weeks of military service in a foreign country.

The Military and Veterans Programs Office website provides the instructions on how to request the waiver for Military Experience replacing 3 credits of VWW.

*NOTE: This list is under continuous revision. Please check with the office of the college associate dean or with college advisors for additional eligible courses. Honors courses have a specific college designation based on course content. These are listed near the end of this section.*

### Alternatives for Meeting Viewing a Wider World Requirements

Students taking nine or more credits in a specific subject area, even though the courses are not designated as Viewing a Wider World courses, will have met the VWW requirements for that subject area.

The 9 credit hours must be in 300- to 400-level courses in one prefix area. For example, 9 upper-division ECON credits would fulfill one VWW area for students majoring in programs other than Economics.

### Common Course Numbering Crosswalk

The Post-secondary Education Articulation Act charges the New Mexico Higher Education Department with establishing and maintaining a common course numbering system, in consultation with faculty. To this end, the common course numbering system includes both equivalent (Common) and unique courses.

- **Common Course**: is any course that is offered at multiple institutions throughout the state, has the same prefix/number combination, the same title, the same description, and at least 80% of the learning outcomes for the course are the same.
- **Unique Course**: is any course that is unique to the institution (the NMSU system), has a prefix/number combination, title, description and learning outcomes that are unique to the institution (the NMSU System).

The table below shows the previous NMSU System-wide course prefix/number combination, the future Common Course Numbering prefix/number combination, and an indicator of whether the course is deemed Common or Unique throughout the state.

College of Agricultural, Consumer, and Environmental Sciences

Dean and Chief Administrative Officer - Rolando A. Flores

Associate Dean and Director of Academic Programs - Donald Conner

Associate Dean and Director of the Cooperative Extension Service - Jon C. Boren

Associate Dean and Director of the Agricultural Experiment Station - Leslie D. Edgar

Scholarship Coordinator - Ashley Lama-Mendoza

The College of Agricultural, Consumer, and Environmental Sciences is comprised of eight departments:

- Agricultural and Extension Education (p. 102)
- Agricultural Economics and Agricultural Business (p. 112)
- Animal and Range Sciences (p. 126)
- Entomology, Plant Pathology and Weed Science (p. 146)
- Family and Consumer Sciences (p. 159)
- Fish, Wildlife and Conservation Ecology (p. 195)
- Plant and Environmental Sciences (p. 208)
- School of Hotel, Restaurant and Tourism Management (p. 241)

College Undergraduate Degree Requirements

1. Complete general education common core requirements.
2. Complete course requirements for the major.
3. Earn a minimum of 120 semester credits. Of this total at least 48 semester credits must be in upper-division courses (numbered 300 or above).
4. Earn a cumulative grade-point average of no less than 2.0.

Preprofessional Programs

NMSU offers a number of programs designed for transfer to professional schools through its undergraduate colleges. The program that is administered by the College of Agricultural, Consumer and Environmental Sciences is Preveterinary Medicine. Several majors are aligned for students to apply for the New Mexico State University Osteopathic Medicine Pathway Program to Burrell College of Osteopathic Medicine.

Veterinary Medicine (Preprofessional Training Only, Non-Degree)

The Doctor of Veterinary Medicine (D.V.M.) degree is a professional degree that is not offered by any college or university in New Mexico; however, you may complete the preparatory program required for admittance to the professional colleges of veterinary medicine at New Mexico State University.
The D.V.M. degree normally requires four years of training in a professional college subsequent to completion of a preveterinary program that requires at least three years of college-level instruction. In most instances a baccalaureate degree is a distinct advantage to the applicant.

Curriculum requirements are determined by the particular school or college of veterinary medicine. The Department of Animal and Range Sciences maintains current requirements for Colorado State University, Washington State, Oregon State and Texas A&M. You should check with an advisor for specific course requirements. As a student from New Mexico, you may be eligible for financial assistance under the program of the Western Interstate Commission for Higher Education (WICHE). See the section on WICHE in the General Information chapter under Resources for Students for more information.

**Bachelor Degrees**

**Bachelor of Science**

**Major in:**

- Hotel, Restaurant and Tourism Management (p. 249)
- Human Development and Family Science (p. 177).

**Bachelor of Science in Agriculture**

**Majors in:**

- Agricultural and Community Development (p. 108);
- Agricultural and Extension Education;
  - Advanced Technology Education (p. 109)
  - Agricultural Communications (p. 109)
  - Agricultural Education Teaching (p. 110)
- Agricultural Biology;
  - Applied Biology (p. 150)
  - Applied Microbiology (p. 152)
  - Entomology (p. 154)
  - Environmental Biology (p. 155)
  - Pest Biology & Management (p. 157)
- Agricultural Economics and Agricultural Business (p. 119);
- Agronomy (p. 220),
- Animal Science;
  - Animal Industry (p. 136)
  - Science (p. 137)
- General Agriculture (p. 100)
- Horticulture (p. 226);
- Natural Resource Economics and Policy (p. 121);
- Range Science (p. 140);
- Soil Science;
  - Environment & Resource Management (p. 228)
  - Soil & Water Science (p. 231)
  - Soils (p. 233)
- Turfgrass Science and Management (p. 235);
  - Athletic Field (Option)
  - Golf Course (Option)
  - Turfgrass Business (Option)
  - Turfgrass Science (Option)
- Programs in also in Preveterinary Medicine (p. 100).

**Bachelor of Science in Conservation Ecology**

**Bachelor of Science in Environmental Science**

**Bachelor of Science in Family and Consumer Sciences**

**Majors in:**

- Family and Consumer Sciences Education (p. 178);
- Fashion Merchandising and Design (p. 180);
- Human Nutrition and Dietetic Sciences
  - Nutrition Education (p. 188)
  - Pre-Dietetics/Dietetics (p. 191)

**Bachelor of Science in Fish, Wildlife and Conservation Ecology**

**Major In:**

- Fisheries and Wildlife Science;
  - Aquatic Ecology & Management (p. 201)
  - Wildlife Ecology & Management (p. 204)

**Bachelor of Science in Food Science and Technology**

**Major in:**

- Food Science and Technology
  - Culinary Science (p. 182)
  - Meat Science (p. 184)
  - Science, Technology and Engineering (p. 186)

**Bachelor of Science in Genetics**

**Masters Degrees**

**Master of Agriculture**

**Major in:**

- Agriculture:
  - Agribusiness (p. 123)
  - Domestic Animal Biology (p. 143)

**Master of Arts**

**Major in:**

- Agricultural and Extension Education (p. 112)

**Master of Business Administration**

**Major in:**

- Business Administration
  - Agribusiness (p. 124)

**Master of Science**

**Majors in:**

- Agriculture Biology (p. 159)
- Agricultural Economics (p. 124)
- Animal Science (p. 144)
- Family and Consumer Sciences (p. 194)
  - Hotel, Restaurant and Tourism Management (Emphasis)
  - Clothing, Textiles and Fashion Merchandising (Emphasis)
• Family and Child Science - Marriage/Family Therapy (Emphasis)
• Family and Child Science - Teaching/Research (Emphasis)
• Food Science and Technology (Emphasis)
• General Family and Consumer Sciences (Emphasis)
• Fish, Wildlife and Conservation Ecology (p. 207)
• Horticulture (p. 241)
• Plant and Environmental Sciences (p. 241)
• Range Science (p. 145)
• Water Science and Management (no concentration) (p. 254)
  • Agricultural Water Resources
  • Water Economics & Policy
  • Water Informatics
  • Water Quality & Treatment
  • Watershed and Aquatic/Riparian Wetlands

Doctoral Degrees
Doctor of Economic Development

Doctor of Philosophy

Majors in:
• Animal Science (p. 145);
• Plant and Environmental Science (p. 241);
• Range Science (p. 146);
• Water Science and Management (no concentration) (p. 254)
  • Agricultural Water Resources
  • Water Economics & Policy
  • Water Informatics
  • Water Quality & Treatment
  • Watershed and Aquatic/Riparian Wetlands

Undergraduate Minors

• Agricultural & Extension Education (p. 112)
• Agricultural & Natural Resource Leadership (p. 112)
• Agricultural Business Management (p. 123)
• Agronomy (p. 240)
• Child Advocacy Studies (p. 194)
• Clothing, Textiles and Fashion Merchandising (p. 194)
• Conservation Ecology (p. 206)
• Culinary Science (p. 194)
• Dairy Science (p. 142)
• Entomology (p. 158)
• Environmental Science (p. 240)
• Family and Child Science (p. 194)
• Food Science (p. 194)
• Genetics & Biotechnology (p. 240)
• Horse Management (p. 142)
• Horticulture (p. 240)
• Hotel, Restaurant and Tourism Management (p. 251)
• Human Animal Interaction (p. 142)
• Livestock Production (p. 143)
• Natural Resource Economics (p. 123)
• Nutrition (p. 194)
• Pest Management (p. 159)
• Plant Pathology (p. 159)
• Ranch Management (p. 143)
• Range Science (p. 143)
• Soil Science (p. 240)
• Turfgrass Science and Management (p. 240)
• Weed Science (p. 159)
• Wildlife Science (p. 207)

Graduate Minors

• Agricultural & Extension Education (p. 112)
• Animal Science (p. 146)
• Fish, Wildlife and Conservation Ecology (p. 208)
• International Agricultural Development and Extension (p. 112)
• Range Science (p. 146)

Accreditation

The two teacher education options (Agricultural Education Teaching and Advanced Technology Education) in the Department of Agricultural and Extension Education are accredited by the Council for the Accreditation of Educator Preparation (formerly NCATE) and the State Public Education Department of New Mexico. It is critical that students consult their academic advisor prior to selection of courses for the agriculture, secondary science and teaching endorsements.

The Family and Consumer Sciences Education major in the Department of Family and Consumer Sciences is accredited by the Council for the Accreditation of Educator Preparation (formerly NCATE) and the State Public Education Department of New Mexico, and meets the teacher licensure requirements for the State of New Mexico. Course selection is restricted to meet accreditation requirements, so students should consult their academic advisor prior to selection of courses for the Family and Consumer Sciences Education program.

The Human Nutrition & Dietetic Science (HNDS) major, Dietetics option, is a Didactic Program in Dietetics (DPD) accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). The program meets national requirements to prepare students for a Dietetic Internship. Course selection is restricted to meet accreditation requirements. Students should consult their academic advisor prior to selection of courses for the HNDS Dietetics program.

General Agriculture - Bachelor of Science in Agriculture

The general agriculture major is designed for students searching for a well-rounded education that builds on the diversity of the other degree programs in the College of Agricultural, Consumer and Environmental Sciences (ACES). The flexibility of the general agriculture degree allows students to tailor a program to fit their individual interests and career goals. Students completing the program earn a Bachelor of Science in General Agriculture. Students choose general agriculture for a variety of reasons. Some may enter the program with a specific career goal in mind. Others may choose general agriculture to obtain a broader education that will give them more flexibility. The curriculum in General Agriculture is administered by the Department of Entomology, Plant Pathology and Weed Science.
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

</tbody>
</table>

1 See the General Education (p. 54) section of the catalog for a full list of courses.
2 A Mathematics course is required for the degree but students may need to take any prerequisites needed to enter the course first.
3 See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.
4 Some ACES classes will meet general education requirements.
5 At least 18 credits must be taken from the primary department and at least 12 credits must be taken from two secondary departments. A minimum of 52 credits (20 of which need to be 300+) of the 120 required for the degree, must be completed in courses offered by the College of Agricultural, Consumer, and Environmental Sciences.
6 Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

1. These courses have prerequisites and it is the students responsibility to check and fulfill all course prerequisites listed for these courses.
2. See the General Education (p. 54) section of the catalog for a full list of courses.
3. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

**Agricultural and Extension Education Undergraduate Program Information**

The department offers a broad-based curriculum with majors, options and minors that prepare students for many careers as professional educators, communicators and leaders in agricultural, natural resource, technology and related disciplines. Some example occupations that the department prepares its students to enter are agriculture teacher, media specialist, technology teacher, Extension agent, NMDA or USDA professional, industry educational specialist, and development specialist. Graduates work in domestic and/or international settings.

**General Undergraduate Degree Requirements**

You must meet the general education and departmental requirements for the degree and the major, option or minor chosen. You must establish a cumulative grade-point average of not less than 2.5 before you are admitted into the student teaching or other internship program. You need a minimum of 48 hours in technical agriculture for the secondary teaching certificate program in agriculture.

You may select technical courses required for completion of the majors and options from the following areas:

- agricultural economics (p. 112);
- agricultural mechanics;
- animal and range sciences (p. 126);
- entomology, plant pathology and weed science (p. 146);
- fish, wildlife and conservation ecology (p. 195);
- engineering (p. 752);
- also plant and environmental sciences (p. 208).

**Graduate Program Information**

The Department of Agricultural and Extension Education requires the following items be sent directly to the department for admission:

- Three letters of recommendation - Applicants should request letters of recommendation from individuals who know them well enough to comment on their professional skills and abilities, and on their ability to complete graduate-level work.
- Career statement - The two-page letter of application should clearly identify applicant’s professional and career goals as well as reasons for pursuing the degree.
• Personal Interview - Upon receipt of all application materials, a personal interview may be required at the discretion of the Departmental Graduate Committee.

*Do not send the above items to the Graduate School as this will cause a delay on your admission status.

General Graduate Degree Requirements

The major requires courses in research methods, teaching methods and data collection and analysis; a graduate seminar; and a thesis or creative component. The department also have two 9 credit minors which are available to students completing major work in other departments.

Thesis plan: Requires a minimum of 30 semester credits which includes 4-6 credits of thesis. (Both plans require a final oral examination).

Non-Thesis plan: Requires 32 semester credits of course work which includes a focused creative component. (Both plans require a final oral examination).

Flexibility in each program allows students to pursue professional interests and to develop specialized competencies in agricultural and extension education, technology education, and in technical and scientific areas. The department delivers courses in evening, weekend and distance formats (go to http://distance.nmsu.edu and click on degree programs, and then Agricultural and Extension Education) to accommodate student needs. Previous experience in teaching, extension and/or other professional education positions is highly recommended to be considered for a graduate teaching assistantship.

The department offers major work for a Master of Arts in Agricultural and Extension Education. The degree can be obtained with emphasis in

• Agricultural or Technology Teacher Education,
• Extension Education,
• International Extension and Development, and
• Adult Non-formal Education.

Degrees for the Department

Bachelor Degree(s)

Agricultural and Community Development - Bachelor of Science in Agriculture (p. 108)

Agricultural and Extension Education (Advanced Technology Education) - Bachelor of Science in Agriculture (p. 109)

Agricultural and Extension Education (Agricultural Communications) - Bachelor of Science in Agriculture (p. 109)

Agricultural and Extension Education (Agricultural Education Teaching) - Bachelor of Science in Agriculture (p. 110)

Master Degree(s)

Agricultural and Extension Education - Master of Arts (p. 112)

Agricultural and Extension Education - Master of Arts (Online)

Minors for the Department

Undergraduate

Agricultural and Extension Education - Undergraduate Minor (p. 112)

Agricultural and Natural Resource Leadership - Undergraduate Minor (p. 112)

Graduate

Agricultural and Extension Education - Graduate Minor (p. 112)

International Agricultural Development and Extension - Graduate Minor (p. 112)

Professor Steve Fraze, Department Head

Professors Edgar, Fraze, Hodnett, VanLeeuwen; Assistant Professors Hill, Norris, Spears

B. Chamberlin, Ph.D. (University of Virginia)-informal and non-formal learning, educational media design; D. Edgar, Ph.D. (Texas A&M)- agricultural education, agricultural mechanization, methods of instruction, curriculum design and evaluation; S. Fraze, Ph.D. (Texas A&M)-agricultural communications, agricultural education, agricultural extension; F. Hodnett, Ph.D. (New Mexico State)– youth development, youth leadership, youth program development. N Hill, Ph.D. (Texas Tech) - visual and science communication, community networks, public opinion, and the scholarship of teaching and learning; S Norris, Ph.D. (Texas A&M) - agricultural communications, agricultural literacy, science communication, national security, education, youth development; P. Skelton, Ph.D. (University of Nebraska)– youth development, sustainable agriculture and natural resource management; L Spears, Ph.D. (Iowa State University) - agricultural education and studies, curriculum and instructional technology; D. VanLeeuwen, Ph.D. (Oregon State) – statistics and research design

Agricultural Extension Education Courses

AXED 1110. Introduction to Agricultural, Extension, and Technology Education

3 Credits (3)

Orientation to programs, philosophies, competencies and leadership skills needed by professionals in agricultural and technology education, extension education, agricultural communications, and related career opportunities in industry, governmental agencies, and international organizations.

Learning Outcomes

1. Orient student to the AXED Department and their role as students.
2. Explore career opportunities (and the related skill sets needed for success) in public schools, career and technical institutions, the cooperative extension service, community, and international development, agricultural communications, agricultural industry associations and public service (e.g., NMDA and USDA).
3. Develop an understanding of the self-leadership skills needed to be effective in a variety of professional and personal environments.
4. Familiarize students with the aspects included within a total program in agricultural or technology education.
5. Strengthen skills in oral and written communications.
AXED 1120. Introduction to Agricultural Communication  
3 Credits (3)  
Students will learn about the history and theories of agricultural communications, be introduced to the degree program, explore careers in the field, and examine the role of media in agricultural communications. 
Learning Outcomes  
1. Identify classes needed in the degree program and relevant clubs.  
2. Recall important times in history of agricultural communication and journalism.  
3. Comprehend the communication process and identify its components.  
4. Identify effective and efficient media for agricultural communication.  
5. Analyze the various roles and uses of media in agriculture communication.  
6. Apply theories of communication and journalism to class assignments.

AXED 1130. Techniques in Agricultural Mechanization  
3 Credits (2+2P)  
Development of competencies in agricultural mechanics including safety, tool identification, operation and maintenance of hand and power tools, cold metal, drafting, and plumbing procedures. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry. 
Learning Outcomes  
1. To understand basic drafting language used in orthographic and isometric drawings.  
2. To develop an understanding of the proper use and safety of basic hand and power tools.  
3. To develop skills needed to operate basic hand and power tools correctly.  
4. To develop an understanding of surveying methods and building layout for construction.  
5. To develop an adequate level of competence in workshop techniques.  
6. To prepare students to properly teach and demonstrate these techniques to others who may use them as a means of earning a living.

AXED 2110. Metal Fabrication  
3 Credits (2+4P)  
Instruction and skill development in process and procedures of metal fusion, including gas and electric welding techniques, safety, and oxy-acetylene cutting and welding. Designed to improve mechanical skills needed in agriculturally related occupations in education and industry. 
Learning Outcomes  
1. To develop students understanding and appreciation for metal fabrication, design and teaching.  
2. To develop in the student an adequate level of competence in shop work techniques, so that the student may be able to properly teach and demonstrate multiple metal fabrication techniques to others who may use them as a mean of earning a living.  
3. To develop the student's fundamental techniques in shielded metal arc welding, oxy-acetylene welding and cutting operations, metal inert gas welding (MIG), and gas tungsten-arc welding as needed in repair and construction of agricultural equipment.  
4. Student will understand appropriate shop management techniques and have an appreciation for mechanized agriculture.  
5. To assist the student in developing an understanding and comprehension of the fundamental principles that apply to the area of basic shop work included in this course; such as proper selection of electrodes, oxy-acetylene filler rods, welding processes best suited for given welding conditions, the proper tool for the job, etc.  
6. To develop in the student comprehension of safety practices that apply to the areas of basic shop work, tools, and equipment required in the course.

AXED 2120G. Effective Leadership and Communication in Agriculture  
3 Credits (2+2P)  
Theory and practice in leadership and communication for professionals who must work effectively in leadership and supervisory roles with people in agricultural business, industry, government agencies, and education. Course focuses on contemporary leadership theories. Oral communication skills in informative and persuasive speaking, parliamentary procedure, and for small groups are developed. 
Learning Outcomes  
1. Understanding Leadership: Definitions of Leadership; Agricultural Education, FFA, Leadership; Leadership Categories; Democratic, Authorization, and Situational Leadership; Personality and Leadership Relations; Developing Leaders; Personal Leadership Development; Ability, Experience, and the Opportunity to Lead; Leadership in the Workplace; Human Relations, Technical, and Conceptual Skills  
2. Communication Skills: Communication and Leadership; The Purpose of Communication; Forms of Communication; Communication Barriers and Styles; Verbal and Nonverbal Communication; Feedback; Self Communication and Interpersonal Communication  
3. Leading Individuals and Groups: Group Dynamics and Team Building; Democratic Group Leadership; Importance of Groups; Types of Groups; Organizing Groups; Group Dynamics, Development, and Discussion  
4. Conducting Successful Meetings: Skills Developed by Bring an Officer; Basic Meeting Functions; Characteristics of a Good Meetings; Planning and Preparing for Meetings; The Meeting Room; Committees; Informative and Motivational Meetings; Group Member Involvement; Officer and Member Responsibilities; Developing a Program of Activities
AXED 2130. Early Field-Based Experience
2 Credits (2)
First-hand view of the roles of professional educators through field experiences with Cooperative Extension or other government agencies. Includes 4 weeks of classroom instruction and 30 hours of observation in a work setting. Consent of instructor required. Restricted to Las Cruces campus only.

Learning Outcomes
1. Identify successful characteristics, tips and strategies that an agricultural education professional may use as part of their program.
2. Identify key components of an agricultural education program
3. Actively observe a local agricultural education program.
4. Identify ways that your agency program networks and interacts with clientele and community

AXED 2140. Early Field-Based Experience in Agricultural and Technology Education
2 Credits (2)
First-hand view of the roles of professional educators through field experiences in a secondary agricultural or technology education setting. Includes 4 weeks of classroom instruction and 30 hours of observations in a classroom setting. Consent of instructor required.

Learning Outcomes
1. Explain student outcomes related to agricultural education
2. Examine the role of agriculture teachers to accomplish the purpose of agricultural education.
3. Explain the relationship between motivation and learning
4. Describe how teachers facilitate learning in an agriculture classroom.
5. Reproduce the three-circle model of agriculture education.
6. Provide an example of instruction in each of the three circles and instruction that happens in more than one circle.
7. Deliver instruction in a classroom or laboratory setting.
8. Deliver instruction related to FFA
9. Deliver instruction related to SAEP

AXED 2996. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 6 credits toward degree.

Learning Outcomes
1. Varies

AXED 300. Special Topics
1-4 Credits
Course addresses specific subjects and issues as identified by department. Topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 6 credits may be applied to a degree.

AXED 303. Small Engine Technology
3 Credits (2+2P)
Development of competencies in small gasoline engines; theory, operation, design, maintenance and safety. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry.

AXED 331. Agricultural Structures
3 Credits (2+3P)

AXED 348. Advanced Technology in the Agricultural Mechanization
3 Credits (2+3P)
Students will construct a project in the area of agricultural mechanization under the direction of instructor. Project must be completed within a semester and of sufficient complexity for 3 credits.
Prerequisite(s): AXED 1130 and AXED 2110 or consent of instructor.

AXED 360. Agricultural Communications
3 Credits (3)
Principles and practical experience in news writing, radio production, newsletter design, public meeting presentations, video productions, graphics, and public relations activities, especially as related to the fields of agriculture and family and consumer sciences.

AXED 380. Philosophy and Methods of Contests
3 Credits (3)
Covers the roles that career development events (contests) play in agricultural and technology education and in extension programs. Topics include competition and cooperation, winning and losing, ethics, use of community resources, and academic and employability skills taught through contests. Coaching as a teaching method is introduced and expanded. Students will assist with the coordination of various career development events. May be repeated up to 3 credits.

AXED 400. The Diffusion and Adoption of Agricultural Innovations
3 Credits (3)
Factors that influence the rates of diffusion and adoption of innovations. Consequences of adopting or rejecting innovations. Processes by which change agents influence introduction and adoption of innovations. Same as AXED 500.

AXED 415. Youth Program Development and Management
3 Credits (3)
Designed for professionals involved in youth group activities. Basic concepts in planning, conducting, and managing educational youth programs in a variety of organizations.

AXED 430. Teaching Adults in Nonformal Settings
3 Credits (3)
The adult and postsecondary learner; adult learning styles and principles; use of community resources and problem-solving techniques; and learning strategies for adults in formal and nonformal education.

AXED 436. Keys for Agricultural and Rural Development
3 Credits (3)
Introduction to concepts of development, the process of change, key factors that contribute to agricultural and rural development in a community, and strategies employed to effect change with implications for international students or domestic students planning to work internationally.
AXED 443. Curriculum Development and Assessment in Agricultural Education
3 Credits (3)
This course prepares students to develop curriculum, design lessons, and prepare appropriate assessments in an agricultural education setting. An emphasis will be placed on the developing curriculum using the currently established resources that are available to agriculture teachers. Restricted to: AXED majors.
Prerequisite(s): 2.5 GPA.

AXED 445. Developing Excellent Programs in Career and Technical Education
3 Credits (3)
Students learn to develop excellence in the three components of a successful secondary school program in career and technical education: classroom and laboratory instruction, career and technical student organizations, and career development activities. Community-based program planning, utilizing partners, program marketing, and professional development are addressed as strategies for achieving excellence. Methods of obtaining financing and maintaining accountability for the program are discussed.

AXED 446. Methods for Teaching Agricultural and Technology Education
3 Credits (3)
Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences. Restricted to AXED Majors
Prerequisite: GPA of 2.5 or above.

AXED 447. Directed Teaching in Agricultural or Technology Education
15 Credits (15)
Semester-long off-campus professional experience in directed teaching and observation provided in selected centers under secondary agricultural or technology education supervising teachers. Consent of Instructor required. Restricted to: AXED majors.
Prerequisite(s): AXED 445, 446 and consent of instructor.

AXED 448. Directed Teaching in Extension Education
3-12 Credits (3-12)
Four-to-fourteen-week, professional experiences in directed teaching and observation provided in cooperative extension at the county, regional, or state level. Consent of instructor required.

AXED 449. Directed Field Experience in Agricultural or Technology Education
3-12 Credits (3-12)
Four-to-fourteen-week, supervised learning experience in an approved teaching setting with application to educational, agricultural, technological, communications, public relations, or environmental practices. Consent of instructor required.

AXED 456. Introduction to Research Methods
3 Credits (3)
Introduction to research design and methodology in education and behavioral sciences. Overview of common research designs and data collection strategies. Prepares students to critique published research and understand basic skills including hypothesis development and conducting a literature search.
Prerequisite: junior standing.

AXED 460. Methods in Career and Technical Laboratory Instruction
2 Credits (2)
For students planning to teach agricultural or technology education at a secondary or postsecondary level. Focus on planning, delivering, and evaluating instruction in laboratories; and on CPR, first aid, and NCCER certifications. Laboratory safety and tool, equipment, and laboratory management systems are also emphasized. Restricted to AXED Majors.

AXED 466V. John Muir: Lessons in Sustainability
3 Credits (3)
This course examines the life of John Muir in the context of sustainability. Muir was a farmer, inventor, explorer, botanist, glaciologist, conservationist, and noted nature author. He was influential in the National Parks movement and in starting the Sierra Club. Living in the natural world influenced his faith and philosophy. By examining his life and the themes that shaped it, students will develop an understanding of what it means to live sustainably and to contribute beyond their personal lives to a sustainable future. May be repeated up to 3 credits.

AXED 475. Leadership On Agricultural and Natural Resource Issues
3 Credits (3)
Investigates leadership concepts and group dynamics as they relate to a changing world and complex agricultural and natural resource issues. Topics include emotional intelligence, leading change, political leadership, facilitating agreement, team building, and managing conflict in agricultural and natural resource settings.

AXED 480. International Agricultural Development
3 Credits (3)
Introduction to Agricultural topics (products, people, environment, culture, etc) that affect international development. Topics provide students with awareness, knowledge and understanding of teaching, research and service opportunities for those seeking experience or careers in international agricultural development. Taught with AXED 580.

AXED 484. Methods of Teaching Biological, Earth and Physical Sciences in Agriculture
3 Credits (3)
Students learn to set up and teach in a modular agriscience laboratory, utilizing a variety of technologies. Modules covered focus on incorporating biological, earth and physical sciences into agricultural instruction and may include: Tissue culture, animal anatomy, hydropodons microscopy, electrophoresis, microbiology, soils and plant nutrients, water quality, water systems, entomology, integrated pest management, and renewable energy applications. Students develop their own modules and/or experiments.

AXED 486. Effective Management of Volunteer Programs
3 Credits (3)
For individuals currently involved in, or interested in being involved in, the management and supervision of volunteer programs. Emphasis on practical application, utilizing a research and academic base. Explores the roles, functions, and tasks of volunteers and managers of volunteers including recruitment, orientation and training, supervision, evaluation, recognition and retention.

AXED 488. 4-H Youth Development
1 Credit (1)
On-line course explores 4-H Youth Development as an integral part of the Cooperative Extension Service. Topics to be addressed include mission, philosophy, delivery modes, audiences and partnerships. Course is relevant for anyone interested in pursuing a career in Cooperative Extension.
AXED 489. The FFA Organization: An Overview
1 Credit (1)
Online course addressing the history, mission, philosophy and structure of the New Mexico and National FFA Organizations and their relationship to supervised agriculture experiences and the agricultural education curriculum. Course is relevant for anyone interested in pursuing a career in agricultural education.

AXED 490. Independent Study in Agricultural, Extension, or Technology Education
1-3 Credits
Specific subjects are agreed upon by the student and instructor. May be repeated for a maximum of 6 credits.
Prerequisites: junior or senior standing and consent of instructor.

AXED 499. Undergraduate Research
1-4 Credits
Research experience in agricultural, extension, and technology education with applications to selected issues and problems.
Prerequisites: consent of instructor.

AXED 500. The Diffusion and Adoption of Agricultural Innovations
3 Credits (3)
Factors that influence rates of diffusion and adoption of innovations. Consequences of adopting or rejecting innovations. Processes by which change agents influence introduction and adoption of innovations. Taught with AXED 400 with differential assignments for graduate students.

AXED 515. Youth Program Development and Management
3 Credits (3)
Designed for professionals involved in youth group activities. Basic concepts in planning, conducting, and managing educational youth programs in a variety of organizations. Same as AXED 415 with differentiated assignments for graduate students.

AXED 525. Graduate Teaching Methods
3 Credits (3)
Examines the teaching and learning process, emphasizing the use of appropriate methods for teaching career and technical education subjects to youth or adults in formal and nonformal educational settings. Includes principles of teaching and learning styles, levels of cognition, syllabus development, lesson planning, teaching using a variety of methods, and evaluating students. For students who have no prior education in teaching methods.

AXED 530. Teaching Adults in Nonformal Settings
3 Credits (3)
The adult and postsecondary learner; adult learning styles and principles; use of community resources and problem-solving techniques; and learning strategies for adults in formal and nonformal education. Same as AXED 430 with differentiated assignments for graduate students.

AXED 536. Keys for Agricultural and Rural Development
3 Credits (3)
Introduction to concepts of development, the process of change, key factors that contribute to agricultural and rural development in a community, and strategies employed to effect change with implications for international students or domestic students planning to work internationally.

AXED 543. Curriculum Development and Assessment in Agricultural Education
3 Credits (3)
This course prepares students to develop curriculum, design lessons, and prepare appropriate assessments in an agricultural education setting. An emphasis will be placed on the developing curriculum using the currently established resources that are available to agriculture teachers. Restricted to: AXED majors.
Prerequisite(s): 2.5 GPA.

AXED 545. Developing Excellent Programs in Career and Technical Education
3 Credits (3)
Students learn to develop excellence in the three components of a successful secondary school program in career and technical education: classroom and laboratory instruction, career and technical student organizations, and career development activities. Community-based program planning, utilizing partners, program marketing, and professional development are addressed as strategies for achieving excellence. Methods of obtaining financing and maintaining accountability of the program are discussed. Same as AXED 445 with differentiated assignments for graduate students.

AXED 546. Methods for Teaching Agricultural and Technology Education
3 Credits (3)
Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences. Same as AXED 446. Restricted to AXED Majors
Prerequisites: GPA of 3.0 or above.

AXED 547. Directed Teaching in Agricultural or Technology Education
4-9 Credits (4-9)
Semester-long off-campus professional experience in directed teaching and observation provided in selected centers under secondary agricultural and technology supervising teachers. Consent of Instructor required. Restricted to: AXED majors.
Prerequisite(s): A teaching methods class and consent of instructor.

AXED 548. Directed Teaching in Extension Education
4-9 Credits (4-9)
Four- to fourteen-week professional experiences in directed teaching and observation provided in cooperative extension at the county, regional, or state level. Same as AXED 448 with reduced credit hours for graduate students. Restricted to majors. Main campus only.
Prerequisite: consent of instructor.

AXED 549. Directed Field Experience in Agricultural or Technology Education
4-9 Credits (4-9P)
A four-to-fourteen-week supervised learning experience in an approved teaching setting with application to educational, agricultural, technological, communications, public relations, or environmental practices. Same as AXED 449 with reduced credit hours for graduate students. Restricted to majors. Main campus only.
Prerequisite: consent of instructor.

AXED 556. Research Methods
3 Credits (3)
Students learn the research process as it is applied to solving problems in the behavioral sciences. Prepares students to conduct and critique research and to diffuse research findings. Implications, applications, and ethics of research also stressed. Students develop a research proposal for a problem of their choice. Same as FCSC 556.
AXED 565. New Mexico Water Issues
3 Credits (3)
Designed for agricultural and natural resource professionals who must educate others or provide leadership on complex water issues in New Mexico. Students will travel to four distinct geographic and cultural regions of the state and study water policies, issues, and delivery technologies in each region. Specific areas covered will be determined by resource professionals who will present past, current and future issues involved in the distribution of water. Urban impacts on water use will also be investigated.

AXED 571. Data Collection and Analysis
3 Credits (3)
Introduction to basic concepts of data collection and analysis. Interpretations from observational studies and controlled experiments. Roles of descriptive and inferential statistics in a complete data analysis. Mean, median, standard deviation, and graphical summaries of data. Correlation and simple regression. One- and two-sample tests and confidence intervals. Chi-square tests and basic analysis of variance. Competency in arithmetic and algebra required. An undergraduate statistics course is recommended.

AXED 575. Leadership on Agricultural and Natural Resource Issues
3 Credits (3)
Investigates leadership concepts and group dynamics as they relate to a changing world and complex agricultural and natural resource issues. Topics include emotional intelligence, leading change, political leadership, facilitating agreement, team building, and managing conflict in agricultural and natural resource settings. Taught with AXED 475 with differential assignments for graduate students.

AXED 580. International Agricultural Development
3 Credits (3)
Introduction to agricultural topics (products, people, environment, culture, etc.) that affect international development. Topics provide students with awareness, knowledge and understanding of teaching, research, and service opportunities for those seeking experience or careers in international agricultural development and education. Taught with AXED 480.

AXED 586. Effective Management of Volunteer Programs
3 Credits (3)
For individuals currently involved in, or interested in being involved in, the management and supervision of volunteer programs. Emphasis on practical application, utilizing a research and academic base. Explores the roles, functions, and tasks of volunteers and managers of volunteers including recruitment, orientation and training, supervision, evaluation, recognition and retention. Taught with AXED 486 with differentiated assignments for graduate students.

AXED 590. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 6 credits toward degree.

AXED 594. Workshops in Agricultural, Extension, and Technology Education
1-3 Credits
Workshop procedures applied to current trends in agricultural, extension, and technology education. Maximum of 7 credits toward a degree.

AXED 595. Internship/Cooperative Experience
1-6 Credits
Supervised professional on-the-job learning experience. Maximum of 6 credits toward a degree.
Prerequisite: Consent of instructor.

AXED 598. Creative Component
1-4 Credits
For nonthesis program. Individual investigations or projects, either qualitative or quantitative studies. Maximum of 6 credits toward a degree.
Prerequisite: consent of instructor.

AXED 599. Master’s Thesis
1-6 Credits
Thesis.

Name: Dr. Steve Fraze, Department Head

Office Location: Gerald Thomas Hall, Room 111
Phone: (575) 646-4511

Agricultural and Extension Education (Advanced Technology Education) - Bachelor of Science in Agriculture

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix | Title | Credits
--- | --- | ---
General Education

**Area I: Communications**

Total Credits 120

1. See the General Education (p. 54) section of this catalog for a full list of courses.
2. See the Viewing a Wider World (p. 58) section of this catalog for a full list of courses.
3. Elective credit may vary based on General Education course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Agricultural and Extension Education (Agricultural Education Teaching) - Bachelor of Science in Agriculture

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year
Semester 1
\begin{itemize}
  \item ACES 1210  Financial Fitness for College Students  1
  \item AXED 1110  Introduction to Agricultural, Extension, and Technology Education  3
  \item ENGL 1110G  Composition I  1
  \item AXED 1130  Techniques in Agricultural Mechanization  3
  \item ACES 1120  Freshman Orientation  1
  \item MATH 1215  Intermediate Algebra  3
\end{itemize}
Credits  15
Semester 2
\begin{itemize}
  \item MATH 1220G  College Algebra  1
  \item AXED 2120G  Effective Leadership and Communication in Agriculture  3
  \item AXED 2110  Metal Fabrication  3
  \item ANSC 1120  Introduction to Animal Science  3
\end{itemize}
Choose from one of the following:
\begin{itemize}
  \item HIST 1110G  United States History I
\end{itemize}

Second Year
Semester 1
\begin{itemize}
  \item GEOL 1110G  Physical Geology  4
  \item CHEM 1120G  Introduction to Chemistry Lecture and Laboratory (non majors)  4
  \item ENGL 2210G  Professional & Technical Communication  3
  \item HORT 1115G  Introductory Plant Science  4
\end{itemize}
Credits  15
Semester 2
\begin{itemize}
  \item AXED 445  Developing Excellent Programs in Career and Technical Education  3
  \item AXED 489  The FFA Organization: An Overview  1
  \item AXED 303  Small Engine Technology  3
  \item PSYC 1110G  Introduction to Psychology  3
  \item AXED 380  Philosophy and Methods of Contests  3
  \item AXED 2140  Early Field-Based Experience in Agricultural and Technology Education  2
\end{itemize}
Credits  15

Third Year
Semester 1
\begin{itemize}
  \item BIOL 2610G & BIOL 2610L  Principles of Biology: Biodiversity, Ecology, and Evolution and Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory  4
  \item GEOG 315V  World Agriculture and Food Problems  3
  \item AXED 331  Agricultural Structures  3
  \item SPED 350  Introduction to Special Education in a Diverse Society  3
  \item AXED 460  Methods in Career and Technical Laboratory Instruction  2
\end{itemize}
Credits  15
Semester 2
\begin{itemize}
  \item AXED 484  Methods of Teaching Biological, Earth and Physical Sciences in Agriculture  3
  \item AXED 446  Methods for Teaching Agricultural and Technology Education  3
  \item AXED 443  Curriculum Development and Assessment in Agricultural Education  3
  \item RDG 414  Content Area Literacy  3
  \item ANSC 310  Exhibiting Livestock  3
\end{itemize}
Credits  15

Fourth Year
Semester 1
\begin{itemize}
  \item AXED 447  Directed Teaching in Agricultural or Technology Education  15
\end{itemize}
Credits  15
Semester 2
\begin{itemize}
  \item AEBC 2110  Principles of Food and Agribusiness Management  3
  \item ANSC 304  Feeds and Feeding  3
  \item EPWS 325V  Insects, Humans, and the Environment  3
  \item RDG 414  Content Area Literacy  3
\end{itemize}
An additional Area II: Mathematics Course  3
Credits  15

Total Credits  120
A student needs to understand and complete any prerequisites prior to enrolling into this course.

A Graduate Faculty. A student minoring in AXED must complete at least another academic program, should select an advisor from the AXED department and departmental requirements.

A graduate student who wishes to minor in AXED, while majoring in another academic program, should select an advisor from the AXED department. A student minoring in AXED must complete at least nine credit hours of approved courses in the AXED department. A copy of the minor program must be approved by the AXED department head. Contact an advisor in AXED.

International Agricultural Development and Extension - Graduate Minor

A student who wishes to have a minor in Agricultural Development and Extension must complete nine credits of approved courses. Two courses are required for the minor: AXED 500 - Diffusion and Adoption of Agricultural Innovations and AXED 580 International Agricultural Development. A third three credit course may be selected from several approved electives.

Agricultural and Extension Education - Undergraduate Minor

The department offers a minor in agricultural and extension education, which may be earned by completion of 18 credits in the department. The minor must include 9 credits of upper-division courses.

Agricultural and Natural Resource Policy Course

A student who wishes to have a minor in Agricultural and Extension Education, the student must have a baccalaureate degree from an accredited college or university with an academic record that clearly demonstrates an ability to pursue graduate studies in this field. As a general rule, applicants will not be admitted to the program unless they have a 3.0 (out of a possible 4.0) cumulative point-hour ratio for all previous academic work, though the records of potential students will not be examined strictly from an academic perspective. Students with a GPA of 2.5-2.99 may be considered for admission on a provisional status.

The AXED Graduate Studies Committee reviews each application and decides whom to admit into the master’s program. Master’s degree students are admitted each semester.

The committee will consider only those applicants from whom all of the admission materials have been received. It is the applicant’s responsibility to ensure that all materials are received to meet graduate school and departmental requirements.

Agricultural and Extension Education - Graduate Minor

A graduate student who wishes to minor in AXED, while majoring in another academic program, should select an advisor from the AXED Graduate Faculty. A student minoring in AXED must complete at least nine credit hours of approved courses in the AXED department. A copy of the minor program must be approved by the AXED department head. Contact an advisor in AXED.

Agricultural and Natural Resource Leadership - Undergraduate Minor

The department offers a minor in agricultural and natural resource leadership, which may be earned by completing

The minor must include 9 credits of upper division courses.

Agricultural and Extension Education - Master of Arts

To be admitted to the graduate program in Agricultural and Extension Education, the student must have a baccalaureate degree from an accredited college or university with an academic record that clearly demonstrates an ability to pursue graduate studies in this field. As a general rule, applicants will not be admitted to the program unless they have a 3.0 (out of a possible 4.0) cumulative point-hour ratio for all previous academic work, though the records of potential students will not be examined strictly from an academic perspective. Students with a GPA of 2.5-2.99 may be considered for admission on a provisional status.

The AXED Graduate Studies Committee reviews each application and decides whom to admit into the master’s program. Master’s degree students are admitted each semester.

The committee will consider only those applicants from whom all of the admission materials have been received. It is the applicant’s responsibility to ensure that all materials are received to meet graduate school and departmental requirements.

Agricultural and Extension Education - Graduate Minor

A graduate student who wishes to minor in AXED, while majoring in another academic program, should select an advisor from the AXED Graduate Faculty. A student minoring in AXED must complete at least nine credit hours of approved courses in the AXED department. A copy of the minor program must be approved by the AXED department head. Contact an advisor in AXED.

International Agricultural Development and Extension - Graduate Minor

A student who wishes to have a minor in Agricultural Development and Extension must complete nine credits of approved courses. Two courses are required for the minor: AXED 500 - Diffusion and Adoption of Agricultural Innovations and AXED 580 International Agricultural Development. A third three credit course may be selected from several approved electives.

Agricultural Economics and Agricultural Business

Undergraduate Program Information

The Department of Agriculture Economics and Agricultural Business offers two Bachelor of Science in Agriculture degrees. A Bachelor of Science in Agriculture with a major in Agricultural Economics and Agricultural Business (AEAB) and a Bachelor of Science in Agriculture with a major in Natural Resource Economics and Policy (NREP).

Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture

The AEAB degree prepares students for entry level supervisory and management positions with companies that operate in the food and fiber supply chain. Positions may focus on areas of agribusiness management, agricultural production, financing, marketing, and economics. Recent AEAB graduates have accepted positions with national and international companies, non-profits, and government agencies.

In this program, faculty, students and industry work together to provide students with real-world examples and opportunities to apply their skills and knowledge from the required and elective courses. The curriculum is designed to educate students as business professionals with the necessary skills to succeed in professional positions. Depending on their interest, students can customize their path of study to include additional courses in marketing, finance, or natural resource management.

Natural Resource Economics and Policy - Bachelor of Science in Agriculture

The Department of Agriculture Economics and Agricultural Business offers the Bachelor of Science in Natural Resource Economics and Policy (NREP); an undergraduate degree that trains students on the socio-economic and bio-physical aspects of environmental and natural resource management and policy. With increasing competition for limited land, water and other natural resources in the U.S. and throughout the world, as well as growing concern about environmental degradation, there is a growing need for professionals who can assist in the process of balancing economic and environmental tradeoffs. The NREP major provides students with knowledge and skills to articulate and apply economic principles to a range of public and private sector issues such as land use, energy, wildlife, climate and air resources, and water. This major prepares students for entry level private and public sector positions in resource assessment, management, or administration.
Graduate Program Information

The Department of Agricultural Economics and Agricultural Business supports five graduate programs. Several of these programs are offered with cooperation from other departments on campus. The five degrees supported by AEAB include:

- Masters of Science in Agricultural Economics;
- Masters of Agriculture with a concentration in agribusiness;
- Masters of Business Administration with a concentration in agribusiness;
- Doctorate of Economic Development; and
- MS & Ph.D. in Water Science Management.

Masters of Science in Agricultural Economics

Master of Science (MS) in Agricultural Economics program provides rigorous training in economic theory, applied economic analysis and quantitative methods and is designed to prepare students for professional careers in business, government, research, and for continued education in pursuit of a Ph.D. The program requires students to complete a Master’s thesis working closely with a faculty committee.

Masters of Agriculture with a concentration in Agribusiness

Master of Agriculture (MAG-AB) with concentration in Agribusiness provides students with backgrounds or interests in agriculture with graduate-level training in agribusiness and applied economics. It is a degree alternative for individuals holding undergraduate degrees in various agricultural and food science fields. The program requires students to complete a creative component or thesis working closely with a faculty committee.

Masters of Business Administration with a concentration in Agribusiness

Master of Business Administration with concentration in Agribusiness (MBA-AB) prepares students for business and public sector careers in agriculture and the food and fiber industry. Graduates from this program are knowledgeable about U.S. and international food and fiber sectors and hold an AACSB International accredited MBA degree.

Doctor of Economic Development

Doctor of Economic Development (DED) is a professional doctorate designed to provide advanced training for economic development professionals. It is not designed to prepare graduates for academic careers.

Interdisciplinary Masters in Water Science and Management and Ph.D. in Water Science and Management

The Water Science program is an interdisciplinary program supported by AEAB faculty that provides graduate education for the next generation of water resources researchers, educators, and managers. The program provides knowledge and tools that can be used to address state, national, and international water challenges including water quality, quantity, timing/availability, and location of water resources.

Degrees for the Department

Bachelor Degree(s)

Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture (p. 119)

Natural Resource Economics and Policy - Bachelor of Science in Agriculture (p. 121)

Master Degree(s)

Agriculture (Agribusiness) - Master of Agriculture (p. 123)

Agriculture (Agribusiness) - Master of Business Administration (p. 124)

Agricultural Economics - Master of Science (p. 124)

Water Science Management - Interdisciplinary Masters

Doctoral Degree(s)

Economic Development - Doctor of Economic Development (p. 125)

Water Science and Management - Doctor of Philosophy

Minors for the Department

Agricultural Business Management-Undergraduate Minor (p. 123)

Natural Resource Economics-Undergraduate Minor (p. 123)

Professor, Jay Lillywhite, Department Head

Professors Hurd, Lillywhite, Ward

Associate Professors Acharya, Patrick

Assistant Professors Miller, Regmi, Robinson, Torell

College Professors Townsend

Department of Agricultural Economics and Agricultural Business:

J. Lillywhite, Department Head, Ph.D. (Purdue) – agribusiness management and marketing; R.N. Acharya, Ph.D. (Auburn) – food safety, logistics management, technology adoption, and marketing; P. Gutierrez, Ph.D. (Emeritus) (Oklahoma State) – extension, ranch economics, economic development; B. H. Hurd, Ph.D. (California-Davis) – water and natural resource economics; J. D. Libbin, Ph.D. (Iowa State) – farm management, production economics; F. Miller, Ph.D. (University of Texas-Dallas) – agricultural economics, policy, dairy, range livestock; M. Patrick, Ph.D. (Michigan State University) – Economic Development; M. Regmi, Ph.D. (Kansas State University) – agricultural finance, risk management, production economics; C. Robinson, Ph.D. (New Mexico State) – consumer behavior, agricultural production, marketing sales; R. Skagg, Ph.D. (Emeritus) (Utah State) – agriculture and natural resource policy; G. Torell, Ph.D. (University of Wyoming) – agricultural economics, natural resources, environmental economics; F. A. Ward, Ph.D. (Colorado State) – resource economics, welfare economics

Department of Economics, Applied Statistics and International Business:

C. A. Erickson, Department Head, Ph.D. (Arizona State) – economic development, monetary theory, macroeconomics; Professors D. L. Daniel, Ph.D. (Southern Methodist)- nonparametrics; C. Enomoto, Ph.D. (Texas A&M)-econometrics, economic theory; D. A. Gegax, Ph.D. (Wyoming)-public utility economics, industrial organization; W. R. Gould, Ph.D. (North Carolina State) – biological sampling, wildlife and fisheries estimation; Y. F. Lee, Ph.D. (Southern Illinois-Carbondale)-international finance, international trade, international system, economic development; R. L. Steiner, Ph.D. (Oklahoma State) – likelihood methods, discrete distributions; D. M. VanLeeuwen, Ph.D. (Oregon State)-statistics; Associate Professors L. Blank, Ph.D. (Tennessee, Knoxville)-microeconomic theory, manageral economics, regulatory economics; C. Gard, Ph.D. (Washington)-biostatistics; R. McFerrin, Ph.D. (Texas A & M) -micro theory, American economic history; B. Widner, Ph.D. (Colorado State)-urban/regional, public finance, development; Assistant
Professors B. Bai, MS (New Mexico State)-applied statistics; J. Bucheli, Ph.D. (New Mexico)-migration, economic development; L. LaPlue (Tennessee)-international and environmental economics; M. Li, Ph.D.(Pennsylvania State); J. Mamkhezri, Ph.D. (New Mexico)-energy, natural resources, environmental; C. Sroka (Ohio State)-count data models; P. J. Trainor, Ph.D. (Louisville)-biostatistics, bioinformatics, Bayesian statistics Emeritus Faculty R. V. Adkisson, Ph.D. (Nebraska)-international, public finance, economic development; K. Brook, Ph.D. (Texas-Austin)-macroeconomic theory, monetary policy; D.L. Clason, Ph.D. (Kansas State); M. Ellis , Ph.D. (California-Riverside); B. N. Matta, Ph.D. (Texas-Austin); J. T. McGuckin, Ph.D. (Wisconsin-Madison); J. T. Peach, Ph.D. (Texas-Austin)-quantitative economics, border studies, economic development; A.V. Popp, Ph.D., (Northern Illinois); D.B. Smith, Ph.D., E. S. Willman, Ph.D. (Indiana)

Agricultural Economics Courses

AEEC 1110. Introduction to Agricultural Economics and Business
3 Credits (3)
This course is an orientation to agricultural economics and business through the discovery process for the consumer in the food, fiber, and natural resource sectors of the global economy. The course discusses the application of micro-and macro-economic principles as they relate to agricultural economics and business. May be repeated up to 3 credits.
Learning Outcomes
1. Gain a broad understanding of the role of the consumer in the marketplace for agricultural commodities, producers, agencies and the global market structure.
2. Apply introductory economic principles to applied global situations.
3. Employ economic concepts in the application of production level decision making.
4. Employ economic principles to the basic and global agricultural community.
5. Understand relationships that exist between producers and consumers.

AEEC 1120. Careers in Food and Agribusiness
1 Credit (1)
This course is an orientation to agribusiness management including careers available in the food and fiber supply chain. Students will learn about agricultural production and marketing in New Mexico, the United States, and the world. Students will be introduced to faculty and staff within the department, learn about career opportunities available to AEAB graduates, and develop a greater appreciation of agricultural management issues. Students must be in Freshman status only or obtain consent of instructor to enroll.
Learning Outcomes
1. Become familiar with career opportunities in agricultural economics and agricultural business
2. Understand knowledge and skills desired by employers
3. Become acquainted with faculty and staff in the Department of Agricultural Economics and Agricultural Economics
4. Learn about the history of agribusiness domestically and internationally
5. Integrate the role of technology into modern agribusiness management

AEEC 2110. Principles of Food and Agribusiness Management
3 Credits (3)
This course introduces the business management theory and application of theory related to businesses within the food and fiber supply chain. Topics include management and financial principles, market planning, and organization theory in small business situations.
Learning Outcomes
1. Demonstrate, refine and expand written and oral communication skills
2. Develop an understanding of basic financial statements, their use and analysis
3. Understand the roles and management styles played in modern agribusiness
4. Learn about the history of agribusiness domestically and internationally
5. Integrate the role of technology into modern agribusiness management

AEEC 2120. Introduction to Food and Agribusiness Accounting
3 Credits (3)
This course outlines the purpose and methods of keeping and analyzing farm and ranch records. Course topics include financial statements, efficiency measures, analysis of the business, and tax computations.
Learning Outcomes
1. Understand the terminology and principles used in modern farm and ranch financial management statements. Evaluate capital investments, analyze farm business performance, and develop tools for financial planning and analysis.
2. Evaluate farm and ranch cash flows

AEEC 2130G. Survey of Food and Agricultural Issues
3 Credits (3)
Survey of food and agricultural issues, including: geography of food production and consumption; human-agricultural-natural resource relations; agriculture in the United States and abroad; modern agribusiness; food safety; food, agriculture, and natural resources policy; ethical questions; role and impact of technology. Crosslisted with: FSTE 2130G.
Learning Outcomes
1. Understand of global agriculture including production techniques used in various geographical regions, consumption trends, and policy and social constraints.
2. Synthesis information about agricultural issues and make informed arguments
3. Articulately discuss modern issues in agriculture
4. Write coherent arguments relative to personal beliefs regarding agricultural issues

AEEC 2140. Technology and Communication for Business Management
3 Credits (2+2P)
This course helps students improve their skills related to data analysis, information management, and communication. Drawing examples from a variety of management, business, technological and research situations, students discover the versatility and functionality of modern computer software. The course emphasizes a ‘hands-on’ approach.
Learning Outcomes
1. Demonstrate an understanding of the meaning of terms used to describe common techniques and concepts in business information systems. Demonstrate the use and application of tools to develop spreadsheets and documents at a professional level
AEIC 2996. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. Consent of instructor required.

Learning Outcomes
1. Varies

AEIC 300. Internship
1-4 Credits (1-4)
Professional work experience under the supervision of a faculty member. May be repeated up to 6 credits. Consent of instructor required. Graded: S/U Grading (S/U, Audit). Restricted to Las Cruces campus only.

Prerequisite(s): Consent of instructor.

AEIC 305. Marketing and Food Agricultural Products
3 Credits (3)
This course provides a review of marketing principles and techniques used throughout the food and fiber supply chain. The course introduces a broad variety of marketing topics including marketing strategy, consumer behavior, market segmentation, market research, competitive analysis, and the marketing mix. The course serves as a foundation for advanced courses in agricultural marketing. May be repeated up to 3 credits. Crosslisted with: MKTG 305.

Prerequisite(s): ECON 1110G or ECON 2120G.

Learning Outcomes
1. Articulate how agricultural commodities move through the food and fiber supply chain. Understand the importance of strategic marketing and how organizations within the food and fiber supply chain identify consumers and their preferences Understand key marketing concepts used by agribusiness marketers, including SWOT analysis, the marketing mix, advertising and public relations Know the basic outline and components of a marketing plan

AEIC 311. Financial Derivative Markets
3 Credits (3)
This course explores the role of financial derivatives in modern business, including income generation, risk management, and price discovery. Derivatives markets covered in the course include futures, options, and swaps. Course content focuses on the fundamentals of trading and hedging in a wide variety of markets, e.g., agriculture, interest rates, exchange rates. Students participate in simulated futures and options trading. Same as AEEC/BFIN 511 with additional coursework required at the graduate level. Cannot receive credit for both AEIC/BFIN 311 and AEIC/BFIN 511. Same as BFIN 311.

Learning Outcomes
1. Understand and explain the concept of risk, list various sources of risks observed in businesses, and identify common methods used to manage risk Demonstrate an understanding of the vocabulary associated with derivatives and derivative markets Articulate the role that derivative markets play in reducing risk and illustrate how they can be used in practice to reduce risk Illustrate how derivative markets can be used to generate income and manage risk through hedging

AEIC 313. Food and Agricultural Sales
3 Credits (3)
This course reviews the techniques of salesmanship. Course topics include identification and classification of buyer type and different approaches to sales based on client base. Improving oral communication skills through individual and/or group sales presentations. Students must be in Junior or above standing to enroll.

Learning Outcomes
1. Analyze sales situations and effectively identify pathways to closing the sale Demonstrate execution of the sales process – prepare, learn, communicate, evaluate Conduct product and customer analysis to build a sales strategy Exhibit enhanced relationship management and communication skills

AEIC 314. Agricultural and Natural Resource Law
3 Credits (3)
This course discusses the relationship of common-law principles, statutory law and regulatory law to problems involving agriculture with an emphasis on New Mexico issues. Legal problems relevant to agribusiness, torts, fencing laws, liability for agricultural pollution, irrigation water rights, corporations and partnerships, land tenure, farm and ranch tenancy, agricultural labor, farm and ranch management, and taxation.

Learning Outcomes
1. Understand the complexity of law as it relates to agriculture and natural resources Develop a basic understanding of the legal system in the U.S. including the role of federal and state agencies responsible for agricultural and natural resource regulation Articulate at a layperson’s level, the roles of the legislative, judicial, and executive branches of the government as they relate to agriculture and natural resources.

AEIC 315V. World Agriculture and Food Problems
3 Credits (3)
Survey of food and agricultural issues in the U.S. and other countries. Covers: role of agriculture in economic development; trade in food and agricultural products; global food production, consumption, and marketing patterns; economics of technical change and food assistance; agriculture and the environment. Same as GEOG 315V.

AEIC 325. Food and Agribusiness Finance and Planning
3 Credits (3)
This course reviews financial statements commonly used in agribusiness management. Students develop a better understanding of the linkages between the financial statements and how financial statements can be used to analyze businesses within the food and fiber supply chain. Excel spreadsheets are used to develop pro forma statements that can be used in determining the feasibility of business enterprises. For students who have not taken AEIC 2140 prior to enrolling in this course, they will need to demonstrate equivalent experience using spreadsheets to the instructor before enrolling.

Prerequisite: AEIC 2140 and (AEIC 2120, ACCT 2110 or ACCT 2120).

Learning Outcomes
1. Analyze financial statements commonly used in agribusinesses Understand the linkages between commonly used financial statements Develop pro forma financial statements that can be used in analyzing the feasibility of businesses Use financial statements to analyze agribusiness performance
AEEC 337V. Natural Resource Economics

3 Credits (3)

Gain insight into important natural resource problems of our time. Apply economic principles to problems in the preservation, use, and development of agricultural, range, mineral, water, forestry, fishery, and environmental resources. Understand the use of cost-benefit analysis for government natural-resource projects, policies, and programs. Same as ECON 337V.

Prerequisite: ECON 1110G or ECON 2120G.

AEEC 340. Economics of Food and Agricultural Markets

3 Credits (3)

This course focuses on the analysis of supply and demand characteristics of commodities with particular attention to agricultural products. Pays special attention to empirical analysis. Includes institutional aspects of pricing, temporal and spatial price relationships, price forecasting, and the economic consequences of pricing decisions.

Prerequisite: ECON 2120G, MATH 1430G, and A ST 311 or MATH 1350G.

Learning Outcomes
1. Become familiar with commonly used data analysis methods and tools Develop an understanding of the factors that influence agricultural prices Use data to analyze and solve real-world problems related to agricultural prices

AEEC 342. Economic Analysis of Food and Agribusiness

3 Credits (3)

This course uses economic and business theory to analyze business decision making. The course includes a discussion of economic, managerial, and financial considerations relevant to modern agribusinesses.

Prerequisite: ECON 2110G, ECON 2120G.

Learning Outcomes
1. Understand the role of managers within the food and fiber supply chain Develop an understanding of the applications of managerial economics as they related to businesses within the food and fiber supply chain Analyze market conditions and assess the position of a business within the market Identify and articulate optimal business decisions by analyzing economic and business information

AEEC 350. Spreadsheet Applications in Food and Agriculture

3 Credits (2+2P)

This course is an advanced course in electronic spreadsheets. Concepts and tools of data analysis and database management within a spreadsheet, emphasizing agricultural applications, are presented.

Prerequisite: AEEC 2140 or consent of instructor.

Learning Outcomes
1. Ability to effectively utilize some of the advanced features in Microsoft Excel by course end Transforming agricultural and agribusiness problems into spreadsheet models for analysis Increase critical thinking capacity with respect to solving problems/tasks Develop creativity in solving problems/tasks

AEEC 384V. Water Resource Economics

3 Credits (3)

Use of economic principles to evaluate current and emerging issues in water resources. Applications focus on use of economic methods of analysis to current policy decisions surrounding agricultural, municipal, industrial, and environmental uses of water. Same as ECON 384V.

Prerequisite: AEEC 1110 or ECON 2120G.

AEEC 385. Applied Production Economics

3 Credits (3)

This course introduces students to fundamental economic theories and analytical tools required for managing an agricultural operation. In particular, the principles of microeconomics will be reviewed and applied to the problems faced by farms and ranches. The course focuses only on economic making at the farm or ranch level.

Prerequisite: (ECON 2120G or ECON 2120H) and (MATH 1430G) and (A ST 311 or MATH 1350G).

Learning Outcomes
1. Analyze production function and calculate the total, average, and marginal products Derive profit-maximizing input and output combinations Evaluate the relationship between production, revenue, and profit functions Analyze crop budgets and determine optimal acreage allocation Measure the impact of risk and uncertainty on agricultural production

AEEC 400. Senior Seminar

1 Credit (1)

This course focuses on current topics and cases in the agribusiness literature stressing rigorous qualitative analysis of current problems and policy issues. During the course, students provide feedback about their experience within the Department and help identify ways in which the Department can improve. Restricted to: AEAB; NREP majors. Must be Senior standing to enroll.

Learning Outcomes
1. Illustrate an understanding of economic and business concepts as illustrated and applied in case analyses Articulate ways in which the Department can improve academically Prepare future steps in careers, e.g., resumes, cover letters, mock interviews Develop interpersonal communication skills

AEEC 420. Special Problems

1-3 Credits

Special problems in agricultural economics or agricultural business of particular interest to the individual student. Maximum of 3 credits per semester. No more than 6 credits toward degree. Consent of instructor required.

AEEC 425. Food and Agribusiness Financial Management

3 Credits (3)

This course provides a description and application of techniques and principles of financial management to problem situations faced by agricultural businesses, including financial statement development and analysis, capital budgeting, sources and costs of capital.

Prerequisite: ECON 2120G or ECON 2120H and ACCT 2110.

Learning Outcomes
1. Understand the time value of money and perform capital investment analysis for agricultural firms Interpret financial statements used by agricultural firms Comprehend farm financial risks and returns Discuss financing options for U.S. farm businesses
AEEC 445V. Agricultural Policy
3 Credits (3)
This course provides a historical and cultural background of food and agricultural policy in the United States. Analysis of food and agricultural problems, policy-making, and implementation. Economic evaluation of specific U.S. food and agricultural policy instruments, their domestic and international impacts.
Prerequisite: (ECON 2110G or ECON 2110H) and (ECON 2120G or ECON 2120H).

Learning Outcomes
1. Apply economic concepts to deepen understanding of agricultural policy, particularly with regard to macroeconomic importance to agriculture Describe inherent tradeoffs and opportunity costs in policy Identify the global impacts of U.S. agricultural policy Explain and describe important agricultural policy issues for a lay audience

AEEC 451. Food and Agribusiness Market Assessment
3 Credits (3)
This course is an application course in which self-managed teams develop and present marketing plans for agribusiness firms. Emphasis on integrating the marketing mix, particularly promotional elements. May be repeated up to 3 credits. Crosslisted with: MKTG 451.
Prerequisite(s): AEEC 305 or MKTG 305 or consent of instructor.

Learning Outcomes
1. Identify, organize ad conduct market research specific to the project Develop an understanding of primary and secondary research collection and analysis Exhibit enhanced relationship management, communication skills, and team building Develop written communication with final deliverable for implementation into the business world

AEEC 452. Food and Agribusiness Marketing Plan Development
3 Credits (3)
This course focuses on learning marketing research methods applicable to developing new food and agricultural products and repositioning existing products for new markets. Students will be required to prepare precise written and oral marketing plans to industry standards and will have opportunities to present written and oral plans at national competitions.

Learning Outcomes
1. Illustrate abilities to make decisions based on market research and analysis, including financial analysis, analysis of consumer trends, and the business environment Create professional marketing and business presentation Build effective teams to analyze and present real-world marketing opportunities Practice business decision making founded on evidence from market research

AEEC 456. Case Studies in Food and Agribusiness Management
3 Credits (3)
This course integrates production, marketing, accounting, finance, agricultural policy, human behavior, and business environment concepts in the management of agricultural businesses using a decision case approach. Student must be in Senior standing to enroll in this course.

Learning Outcomes
1. Exhibit an ability to understand complex and varying business and resource issues, including financial analysis, natural resource issues, and business operations Provide reasoning and rationale for decision making, identifying the best options from many potential decisions Practice business writing and communication skills

AEEC 458. Economics of Making and Marketing Wine
3 Credits (3)
This course is designed to provide a basic knowledge of the principles of winemaking with emphases on wine production and economics for small wineries and home winemaking. The course also focuses on the investment costs of starting small wineries and the costs of making wine and successful market strategies for small wineries. The class includes a hands-on lab that includes selecting, crushing, fermenting grapes, and all the steps required through bottling the wine. Students must be 21 to enroll in the class. Consent of instructor required.

Learning Outcomes
1. Identify and evaluate production costs, economics, and marketing strategies for small wineries Identify current technologies used in the production of wine for home and in a small winery Identify the processes required to make high-quality wine using hands-on winemaking techniques, sensory analysis, and testing Learn the basics of Viticulture (wine grape growing) practices

AEEC 470. Real Estate Appraisal
3 Credits (2+2P)
This course addresses issues influencing the value of real estate with some emphasis upon rural properties. Topics include courthouse records, property taxes, appraisal methodology, expert courtroom testimony, condemnation, and legal issues. Students will take field trips and write appraisals. Course material is relevant to students in Finance, Accounting, and Pre-Law, as well as Agriculture. Accredited for hours to apply to both pre-licensing and continuing education requirements of the New Mexico Real Estate Commission for both Appraisers and Real Estate Brokers. Students must be Junior or above to enroll.

Learning Outcomes
1. Distinguish between the Income Approach, Cost Approach, and Sales Comparison Approach Identify market abstracted influences on value Apply proper appraisal methodology Demonstrate appraisal knowledge by writing a residential appraisal and a farm appraisal

AEEC 499. Senior Thesis
3 Credits (3)
Develop a thesis project with a faculty advisor. The senior thesis requires students to work creatively to apply business and economic principles to address a problem of concern. Restricted to AEAB majors.
Prerequisites: consent of department head and have senior standing.

AEEC 501. Microeconomic Theory
3 Credits (3)
A rigorous re-examination of the pricing mechanism in the goods and factor markets. Development of theoretical tools of general applicability.
Prerequisite(s): ECON 371 and ECON 457, or consent of instructor.

AEEC 502. Macroeconomic Theory
3 Credits (3)
Contemporary aggregative theory regarding the interrelationships among national income, employment, the price level, money supply and interest rates, and implications of this theory for public policy in a mixed economy.

AEEC 503. Introduction to Quantitative Methods
3 Credits (3)
Introduce students to quantitative tools widely used in applied economic analysis such as regression analysis, statistical tests, and mathematical programming. Restricted to: Agricultural Economics and Business (Masters) majors.
AEEC 511. Advanced Futures and Options Markets
3 Credits (3)
Advanced hedging and speculating strategies using futures and options contracts. Coverage includes interest rates, stock indexes, metals, currencies, livestock, and grains. Concepts of price analysis (technical and fundamental) and basis analysis; technical paper is required. Same as AEEC/BFIN 311 with additional coursework required at the graduate level. Cannot receive credit for both AEEC/BFIN 311 and AEEC/BFIN 311. Crosslisted with: BFIN 511.

AEEC 520. International Agricultural Trade Theory and Policy
3 Credits (3)
Review and analysis of international trade models. Analysis of the effects of trade instruments such as tariffs, quotas, and subsidies on welfare and income distribution. Analysis of bilateral, regional, and multilateral trade agreements and their effect on the agricultural sector from both country-specific and global perspectives.
Prerequisite: ECON 371.

AEEC 522. Public Sector Economics I
3 Credits (3)
Introduction to the economic rationale for government intervention in the economy and the effects of that intervention on economic agents and the economy in general. Emphasis on the expenditure side of government policies. Same as POLS 522.

AEEC 540. Econometrics I
3 Credits (3)
An integration of quantitative and statistical techniques for research and management in economics and business.
Prerequisite(s): ECON 457 and ECON 405 or A ST 505.

AEEC 545. Advanced Agricultural Policy
3 Credits (3)
Historical and cultural background of food and agricultural policy in the United States. Analysis of food and agricultural problems, policy-making and implementation. Economic evaluation of specific U.S. food and agricultural policy instruments, their domestic and international impacts. Same as AEEC 445V with additional work required at the graduate level. Cannot receive credit for both AEEC 445V and AEEC 545.
Prerequisite: consent of instructor.

AEEC 550. Advanced Microcomputer Applications in Agriculture
3 Credits (2+2P)
An advanced course in electronic spreadsheets and the concepts and tools of database management emphasizing agricultural applications. Taught with AEEC 450 with additional coursework required at the graduate level. Cannot receive credit for both AEEC 450 and AEEC 550.
Prerequisite(s): AEEC 2140G or consent of instructor.

AEEC 551. Advanced Agribusiness Marketing
3 Credits (3)
Applications course in which self-managed teams apply marketing theory in the development and presentation of marketing plans for food and agribusiness firms. Course includes analysis of marketing problems with emphasis on strategic marketing issues changing trade policies, and global competitiveness.
Prerequisite: consent of instructor.

AEEC 556. Advanced Agribusiness Management
3 Credits (3)
Integration of production, marketing, accounting, finance, agricultural policy, human behavior, and business environment concepts in management of agricultural businesses using a decision case approach.

AEEC 575. Economics of Water Resource Management and Policy
3 Credits (3)
Focuses on issues, approaches and methods used in the assessment of water resource management and policy problems. Extends and further develops student understanding and comprehension of specific economic concepts and methods that are useful in the assessment and management of water resources, including cost-benefit analysis, welfare economics, non-market valuation, watershed management, and consideration of equity and ethical concerns. Students will develop critical reasoning, communication and analytic skills through active class discussions and assignments that emphasize both quantitative and written products.

AEEC 585. Production Economics
3 Credits (3)
Application of microeconomic theory to problems and decisions of food and agricultural firms. The theoretical foundation of production economics and the theory of the firm are developed. May be repeated up to 3 credits.
Prerequisite(s): MATH 1430G, ECON 312, and ECON 457.

AEEC 590. Special Topics
3 Credits (3)
Seminars in selected current topics in the various areas of agricultural economics and economics. Offerings will carry a subtitle.
Prerequisite: consent of instructor.

AEEC 593. Internship
1-6 Credits
Supervised professional on-the-job training experience in policy analysis.

AEEC 594. Internship
1-6 Credits
One semester to six months internship with a regulated firm or public utility commission. A faculty member will direct and evaluate the internship. For AEEC regulatory option students only.

AEEC 595. Internship
3 Credits (3)
Supervised professional on-the-job learning experience.
Prerequisite(s): Consent of instructor.

AEEC 596. Individual Study
1-3 Credits
Individual study programs. Each offering will carry a subtitle. Maximum of 3 credits in a semester and 6 credits in a program.
Prerequisite: consent of instructor.

AEEC 597. Non-Thesis Research Project
1-3 Credits (1-3)
Individual investigations, either analytical or experimental. Maximum of 3 credits per semester. No more than 3 credits toward a degree.

AEEC 598. Creative Component Project
3-6 Credits (3-6)
Individual investigations, either analytical or experimental. A minimum of 3 to 6 credits per semester. No more than 6 credits toward degree. Consent of instructor required. Restricted to AEEC majors.
Prerequisite(s): Consent of Instructor.

AEEC 599. Master's Thesis
1-15 Credits
Thesis.

Name: Dr. Jay Lillywhite
Office Location: GT Room 387
# Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

1. View the General Education (p. 54) section of the catalog for a full list of courses. It is strongly encouraged that students satisfy the Area II Laboratory Science category by enrolling in AGRO 1110G Introduction to Plant Science (Lecture & Lab).
2. MATH 1430G Applications of Calculus I is required for the degree but students may need to take any prerequisites needed to enroll in MATH 142G first.
3. View the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

---

### Required Specialty Area 5

5 credits

Select and Complete two courses (6 hrs) from one Specialty Area:

**Natural Resources**

- AECE 314 Agricultural and Natural Resource Law
- AECE/ECOL 384V Water Resource Economics
- AECE/ECOL 337V Natural Resource Economics

**Finance**

- AECE 311 Financial Derivative Markets
- AECE/ANSC 325

**Marketing**

- AECE/MKTG 451 Food and Agribusiness Marketing Assessment

---

### Second Language: (not required)

17-18 credits
Students who are interested in graduate degrees should consult with their academic advisor or faculty mentor early in their undergraduate program as some courses may have specific grade requirements and/or prerequisites. Our department participates in NMSU’s Graduate School MAP Program where students can take graduate courses during the last part of their undergraduate degree.

Specialty Areas are Natural Resources, Finance, and Marketing. Students must complete two courses from the selected Specialty Area.

Elective credits may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with the academic advisor.

### A Suggested Plan of Study for Students

A roadmap for students coming into Department of Agricultural Economics and Agricultural Business without deficiencies and without advanced coursework, e.g., AP course credit or dual credits wishing to pursue a degree in Agricultural Economics and Agricultural Business (AEAB).

This roadmap assumes student placement in MATH 1215 and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

See the General Education (p. 54) section the catalog for a full list of courses. It is strongly encouraged that students satisfy the Area II Laboratory Science category by enrolling in AGRO 1110G Introduction to Plant Science (Lecture & Lab).

MATH 1430G Applications of Calculus I is required for the degree but students may need to take any prerequisites needed to enroll in MATH 1430G Applications of Calculus I first.

* MATH 1215 and MATH 1220G are prerequisites, but if they are not needed use Free Elective Courses to replace the courses in the Roadmap.

See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

Elective credits may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with the academic advisor.

Specialty Area courses can be found on the Requirements (p. 119) tab of this degree. The areas are Natural Resources, Finance and Marketing. Students must complete two courses from the selected Specialty Area.

Students who are interested in graduate degrees should consult with their academic advisor or faculty mentor early in their undergraduate program as some courses may have specific grade requirements and/or prerequisites. Our department participates in NMSU's Graduate School MAP Program where students can take graduate courses during the last part of their undergraduate degree.

*The 4th Year Semester (Spring) shows 13 hours. Student's financial aid requirement may require them to enroll in 15 hours.

Enrollment Options:

- 120 Total Credits Required
- 48 Credits in courses numbered 300 or above
- Developmental coursework not counted
- Necessary English and Mathematics coursework
A Suggested Plan of Study for Students

A roadmap for students coming into the Department of Agricultural Economics and Agricultural Business without deficiencies and without advanced coursework, e.g., AP course credit or dual credits wishing to pursue the degree in Natural Economics and Policy (NREP).

This roadmap assumes student placement in MATH 1215 and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Agriculture (Agribusiness) - Master of Agriculture

The Master's of Agriculture with Concentration in Agribusiness degree provides students with the skills and knowledge necessary to successfully manage modern businesses operating in the food and fiber supply chain. The program curriculum has been developed with an emphasis on providing economic and business analytical knowledge and skills for students and industry professionals with a broad range of disciplinary backgrounds.

Candidates for the Master of Agriculture (MAG) with concentration in Agribusiness must successfully complete a minimum of 33 graduate credits. Students entering the Master of Agriculture program are required to have completed:

All students in the MAG program must successfully complete the following:

<table>
<thead>
<tr>

A Study Suggested Plan of Study

### First Year

#### Fall

- **AECC 503** Introduction to Quantitative Methods 3
- **AECC 530** Advanced Microcomputer Applications in Agriculture 3
- **AECC 526** Special Topics 3

#### Spring

- **AECC 511** Advanced Futures and Options Markets 3
- **AECC 590** Special Topics 3

#### Technical Course

- **AECC 599** Master’s Thesis 3

### Second Year

#### Fall

- **AECC 545** Advanced Agricultural Policy 3
- **AECC 598** Creative Component Project 3

#### Spring

- **AECC 551** Advanced Agribusiness Marketing 3
- **AECC 556** Advanced Agribusiness Management 3

### Total Credits: 33-36

---

1. Students in consultation with their Graduate Committee Chair and with the approval of the Department Graduate Committee Chair, select two technical agriculture courses. These courses may come from another discipline or college or maybe taught within the Department of Agricultural Economics and Agricultural Business.

2. In lieu of AECC 598 Creative Component Project or AECC 599 Master’s Thesis, students can take 2 additional courses approved by their committee chair and the Department’s Graduate Committee chairperson.

A thesis (AECC 599 Master’s Thesis, 4-6 credits) is not required but can replace the creative component. AECC 596 Individual Study. An oral defense must be scheduled and completed as prescribed by the Graduate School. The defense must be preceded by a seminar to present major findings of the creative component or thesis research to faculty, fellow students, and the interested public.

---

### Business Administration (Agribusiness) - Master of Business Administration

Candidates for the Master of Business Administration with concentration in Agribusiness (MBA-AB) must successfully complete a minimum of 36 graduate credit hours. Admission to the MBA-AB program is through the College of Business. The program includes numerous prerequisites in economics, accounting, and business as defined in the Business Administration and Economics section of this catalog. AECC 545 Advanced Agricultural Policy must be taken in the MBA-Agribusiness program if an agricultural policy course was not taken at the undergraduate level. A written paper and presentation following the guidelines described for B A 590 Professional Paper/Presentation is required. MBA-AB students can take the required minimum 4 thesis credit hours to substitute for B A 590 Professional Paper/Presentation. If a thesis (AECC 599 Master’s Thesis) is written in lieu of taking B A 590 Professional Paper/Presentation, an examining committee and thesis defense must be organized similar to that of the MS degree program. For more information about the requirements for the MBA specialization refer to the MBA section (p. 690) of this catalog.

Total Credits: 36

1. MBA-Agribusiness majors, with advisor approval, may take the required minimum 4 thesis hours (maximum of 6 hrs) in lieu of B A 590 Professional Paper/Presentation

2. AECC 545 must be taken as part of this AEAB Block if not previously completed as an undergraduate under AECC 445V.

### Agricultural Economics - Master of Science

Students entering the MS program are required to have completed

- intermediate microeconomics and intermediate macroeconomics (completed with a B grade or better),
- a college-level calculus class, and
- a course in statistics that included linear regression analysis.

Total Credits: 36
Students that have not completed these courses may be admitted with the requirement that they take them as deficiencies at the beginning of their graduate program. Prospective graduate students must have at least a 3.0 undergraduate GPA. Students with a GPA less than 3.25 must complete the GRE or the GMAT exam.

Completion of the Master of Science degree in agricultural economics requires completion of a minimum of 33 graduate credit hours. Twenty-one of the credits must have one of the following three prefixes: AEEC, ECON, or ECDV. Twenty-four of the credits must be associated with number courses greater than 500. All students in the MS program must successfully complete the following core courses:

<table>

</tbody>
</table>

Total Credits 33

1 AEEC 599 minimum hours required by the Graduate School are 4 with a maximum of 6 toward the degree. If a student elects to complete the minimum of 4 hours, they will need to take an additional course to meet the 33 hours required for the degree.

2 AEEC 545 must be taken as part of this AEAB Block if not previously completed as an undergraduate under AEEC 445V.

3 One of these two choices may include three (3) additional hours of AEEC 596. In lieu of these 2 additional graduate courses, a student may select a justifiable minor (9+ hours) per Graduate School policy and only 2 courses (6 hours) from the AEAB Block.

MS students are generally required to write a thesis (AEEC 599 Master’s Thesis (4-6 credits). Non-thesis options that include a non-thesis research project (AEEC 597 Non-Thesis Research Project, 3 credits) or an internship (AEEC 595 Internship, 3 credits) must have approval from the student’s committee and the graduate chairman. Students pursuing the MS degree may not complete the graduate program with more than one C grade in the core courses. If a student receives C grades in two of these core classes one of the classes must be repeated with a grade of at least B. In addition to core courses, nine additional credits must be completed from an agricultural economics and agricultural business (AEAB) course block. AEEC 545 Advanced Agricultural Policy must be taken in the graduate program if an agricultural policy course was not taken as an undergraduate. Individual study (AEEC 596 Individual Study) is limited to 6 credits hours toward a the degree. An oral defense is required of all master’s candidates and will be scheduled and completed according to the guidelines of the Graduate School. The oral defense must be preceded by an open seminar to present major research findings to faculty, fellow students and the interested public.

**Economic Development - Doctor of Economic Development**

The Doctor of Economic Development (DED) is designed to prepare students to be professionals in the area of economic development. To receive a DED, students must successfully complete 42 ECDV credits. Successfully passing 2 comprehensive exams (offered twice each summer) is required to register for ECDV courses. The five courses covered by the two exams represent 15 credit hours of course work, which the student may complete at another program or at NMSU.

DED minimum admission requirements:

All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy, and in addition the following:

- Bachelor's degree or equivalent
- Minimum undergraduate GPA: 3.0/4.0
- GRE or GMAT score is recommended (not required)
- Completion of one undergraduate courses in intermediate microeconomic (ECON 311 Intermediate Macroeconomic Theory or equivalent) and intermediate macroeconomic (ECON 312 Intermediate Microeconomic Theory or equivalent) both with grades of B or better
- Completion of one course in college-level calculus (MATH 1430G Applications of Calculus I or equivalent) and one course in statistics including regression analysis (ECON 405 Introductory Econometrics or equivalent), with grades of B or better in both courses
- Additional coursework in matrix algebra is recommended
- One course in mathematical economics ECON 457 Mathematical Economics or equivalent), with a grade of B or better
- International students must meet graduate school admission requirements for English proficiency

In addition, all applicants must successfully pass Comprehensive Exams covering the "Microeconomic Core" and the "Macroeconomic and Econometric Core" before taking upper level ECDV courses. The Microeconomic Core exam covers advanced microeconomic theory (AEEC 501 Microeconomic Theory and AEEC 596 Individual Study). The Macroeconomic and Econometric Core covers advanced macroeconomic theory (AEEC 502 Macroeconomic Theory), and econometrics (AEEC 540 Econometrics I and ECON 545 Econometrics II). Students who have not passed all of these "core" courses with a grade of B or better, or feel the need to study the material further, may take the courses, along with ECON 457 Mathematical Economics during the fall and spring semesters of their first year in the program.

- Comprehensive Exam I covers the "Microeconomics Core": AEEC 501, AEEC 596
- Comprehensive Exam II covers the "Macroeconomics and Econometrics Core": AEEC 502 Macroeconomic Theory, AEEC 540 Econometrics I and ECON 545 Econometrics II
• Students who fail a comprehensive exam may apply to take the exam a second time. Only under special circumstances are students allowed to take a comprehensive exam a third time.

All students in the DED program must successfully complete the following:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECDV 550</td>
<td>Introduction to Local and Regional Development</td>

</tr>
</tbody>
</table>

Teaching and research assistantships are available to qualified applicants, however, admission to the program does not imply or guarantee funding.

Detailed and updated information is available at [https://business.nmsu.edu/academics/graduate-programs/ded/](https://business.nmsu.edu/academics/graduate-programs/ded/).

All applicants must successfully pass Comprehensive Exams covering the "Microeconomic Core" and the "Macroeconomic and Econometric Core" before taking upper level ECDV courses. The Microeconomic Core exam covers advanced microeconomic theory (AEEC 501 Microeconomic Theory and AEEC 596 Individual Study). The Macroeconomic and Econometric Core covers advanced macroeconomic theory (AEEC 502 Macroeconomic Theory), and econometrics (AEEC 540 Econometrics I and ECON 545 Econometrics II).

Students who have not passed all of these "core" courses with a grade of B or better, or feel the need to study the material further, may take the courses, along with ECON 457 Mathematical Economics during the fall and spring semesters of their first year in the program.

• Comprehensive Exam I covers the "Microeconomics Core": AEEC 501 Microeconomic Theory AEEC 501 Microeconomic Theory AEEC 501 Microeconomic Theory AEEC 501 Microeconomic Theory AEEC 501 Microeconomic Theory AEEC 596 Individual Study AEEC 596 Individual Study AEEC 596 Individual Study AEEC 596 Individual Study AEEC 596 Individual Study

• Comprehensive Exam II covers the "Macroeconomics and Econometrics Core": AEEC 502 Macroeconomic Theory, AEEC 540 Econometrics I and ECON 545 Econometrics II

• Students who fail a comprehensive exam may apply to take the exam a second time. Only under special circumstances are students allowed to take a comprehensive exam a third time.

In preparation for the comprehensive exams, students who have not previous completed graduate level course work in economics will need to start their program with the following Roadmap.

### Animal and Range Sciences

### Undergraduate Program Information

The Department of Animal and Range Sciences provides opportunities for you to follow a variety of interests in modern scientific agriculture. The animal science curriculum provides a background for many phases of the food animal industry, from farm animal production on rangelands to management positions in the food processing industry to highly technical careers in research and companion animal management. The range science curriculum provides you with knowledge and skills necessary to sustainably manage rangelands for multiple uses. These curricula allow you to acquire the background necessary to adjust easily to variations in specific job opportunities. If you are majoring in either animal science or range science, you must meet general education requirements, have a minimum of 48 credits of upper-division courses (numbered 300 and
above), and complete a minimum of 35 credits in courses in the College Agricultural, Consumer and Environmental Sciences.

Graduate Program Information

The Department of Animal and Range Sciences offers graduate work leading to the Master of Science and the Doctor of Philosophy degrees with majors in animal science and range science. The Doctor of Philosophy degree in animal science is only in the areas of reproductive physiology or ruminant nutrition.

Prerequisite for admission as a regular graduate student in the department is the completion of a curriculum, substantially equivalent to that required of undergraduate students in animal or range science at this institution, 3.0 GPA, and three letters of reference.

For the Master of Science degree, a minimum of 30 semester credits of graduate work in the major and related subjects will be required, together with a thesis for most majors. A non-thesis option is available for certain students.

For the Master of Agriculture with specialization in Domestic Animal Biology, students must complete 32 credit hours of graduate courses which include 2 credits of ANSC 598 Special Research Programs for the creative component.

The Doctor of Philosophy student must demonstrate proficiency in a foreign language or research tool, such as experimental statistics, philosophy of science, computer science, or mathematics. Choice of the research tool will remain the option of the student subject to approval by the student’s graduate committee. Demonstration of proficiency may be accomplished by satisfactory completion of courses or by other suitable evidence acceptable to the student’s committee. In addition, doctoral students are required to complete advanced courses in a field of study closely related to animal science or range science. The number of courses to be completed in the related area will be determined by the student’s committee. Related areas of study often are biology, chemistry, or experimental statistics.

The Department of Animal and Range Sciences is a sponsoring department in the recently approved interdisciplinary graduate degree program that offers both a MS and Ph.D. degree in Water Science Management. The degree program is being handled through the College of Agricultural, Consumer and Environmental Sciences (ACES), and the program description, including application guidelines, classes involved, and topic areas being supported can be found in the catalog under the section describing ACES Programs. Interested students are encouraged to contact the Department Head of Animal and Range Sciences, Shanna Ivey at (575) 646-2515 for more information.

Graduate work in the department is designed to prepare the student for work in the fields of research, extension, teaching, production, and conservation.

Facilities available to graduate students include herds and flocks of the major livestock species, animal nutrition laboratories, physiology laboratories, meats laboratory, small animal laboratory, 25,000-specimen herbarium, two ranches of approximately 92,000 acres, and a 1,000-head experimental feedlot. Active cooperation is maintained with federal research agencies located on and off the campus.

A number of graduate assistantships will be available each year. Inquiries should be addressed to the head of the department.

Degrees for the Department

Bachelor Degree(s)

Animal Science (Animal Industry) - Bachelor of Science in Agriculture (p. 136)
Animal Science (Science) - Bachelor of Science in Agriculture (p. 137)
Range Science - Bachelor of Science in Agriculture (p. 140)

Master Degree(s)

Agriculture (Domestic Animal Biology) - Master of Agriculture (p. 143)
Animal Science - Master of Science (p. 144)
Range Science - Master of Science (p. 145)

Doctoral Degree(s)

Animal Science - Doctor of Philosophy (p. 145)
Range Science - Doctor of Philosophy (p. 146)

Minors for the Department

Undergraduate

Dairy Science - Undergraduate Minor (p. 142)
Horse Management - Undergraduate Minor (p. 142)
Human Animal Interaction - Undergraduate Minor (p. 142)
Livestock Production - Undergraduate Minor (p. 143)
Ranch Management - Undergraduate Minor (p. 143)
Range Science - Undergraduate Minor (p. 143)

Graduate

Animal Science - Graduate Minor (p. 146)
Range Science - Graduate Minor (p. 146)

Department Head Shanna L. Ivey

Professors Ashley, Bailey, Duff, Fasenko, Fernald, Ivey, Löest, Soto

Associate Professors Ganguli, Hernandez Gifford, Scholljegerdes, Summers

Assistant Professors Faist, Geli, Gouvêa,

College Track Associate Professors Campbell, Prihodko

College Track Assistant Professor Fuentes, Smythe

Instructors Priest

Co-operators (USDA) Estell, Herrick, Peters

Emeritus Faculty Allred, Cibils, Holechek, McDaniel, Ross, Thomas

S. L. Ivey, Department Head, Ph.D. (New Mexico State University)- ruminant nutrition/microbiology; K. W. Allred, Ph.D. (emeritus, Texas A&M University)– plant taxonomy; R.L. Ashley, Ph.D. (Colorado State University)– physiology of reproduction; D.W. Bailey, Ph.D. (Colorado State University)– rangeland management; J.W. Campbell, Ph.D. (New Mexico State University)– reproductive physiology; A.F. Cibils, Ph.D. (Colorado State University)–
growing management and ecology; G. C. Duff, Ph.D. (New Mexico State University)-animal nutrition; A. Faist, Ph.D. (University Colorado Boulder)-range ecology; G. M. Fasenko, Ph.D. (University of Minnesota)-companion animal management; A. G. Femald, Ph.D. (Colorado State University)-land use hydrology and water quality hydrology; S. Fuentes-Soriano, Ph.D. (University of Missouri-Saint Louis)-biology in plant systematics and evolution; H. M. E. Geli, Ph.D. (Utah State University)-landscape hydrology; J. Hernandez-Gifford, Ph.D. (Washington State University)-reproductive physiology; V. N. Gouvêa, Ph.D. (University of São Paulo, Brazil)-beef cattle nutrition and health; J. L. Holechek, Ph.D. (Oregon State)-range ecology; C. A. Lüest, Ph.D. (Kansas State University)-ruminant nutrition; K. C. McDaniel, Ph.D. (emeritus, Texas A&M University)-brush management; L. Pihodko, Ph.D. (Colorado State University)-range ecology; T. T. Ross, Ph.D. (emeritus, North Carolina State University)-physiology of reproduction and sheep production; E. J. Scholljegerdes, Ph.D. (University of Wyoming)-ruminant nutrition; B. G. Smythe, Ph.D. (New Mexico State University)-veterinary entomology; S. A. Soto-Navarro, Ph.D. (New Mexico State University)-ruminant nutrition; A. F. Summers, Ph.D. (University of Nebraska)-physiology of reproduction; J. D. Thomas, Ph.D. (emeritus, University of Missouri-Columbia)-meat science.

Adjunct faculty: C. D. Allison, Ph.D. (Texas A&M University)-range management; K. M. Harvstad, Ph.D. (Utah State University)-range animal nutrition; J. E. Herrick, Ph.D. (Ohio State University)-soils; M. R. Levi, Ph.D. (University of Arizona)-soil morphology/classification; T. J. Nagaraja, Ph.D. (Kansas State University)-rumen microbiology; D. P. Peters, Ph.D. (Colorado State University)-landscape ecology; S. Spiegel, Ph.D. (University of California Berkeley)-range management.

Cooperative Extension Service: D. Cram, Ph.D. (New Mexico State University)-range science; R. Hagevoort, Ph.D. (Texas A&M University)-dairy science; C. Gifford, Ph.D. (University of Idaho)-animal science; S. Smallidge, Ph.D. (New Mexico State University)-wildlife; J. L. Turner, Ph.D. (Kansas State University)-equine immunology and physiology; M. Ward, Ph.D. (North Dakota State University)-ruminant nutrition.

Animal Science Courses

ANSC 1110. Animal Science Careers
1 Credit (1)
Introduction to scientific disciplines and career options in animal-agriculture career skill development, including resume preparation, networking, importance of internships, and leadership experiences in animal agriculture.

Learning Outcomes
1. Increasing the understanding of career opportunities in animal agriculture.
2. Gain a broad experience in the development of creative thinking about the career choices available in animal agriculture.
3. Apply the increased knowledge of career development in the career path and internship directions for each student.
4. Gain leadership experience that will be impactful for the student in their pursuit of a career in animal agriculture.

ANSC 1120. Introduction to Animal Science
3 Credits (3)
This course is designed to provide an introduction to nutrients and their function in livestock animals. Basic feed identification, evaluation, and diet formulation will be discussed. The anatomy of the digestive tract of animals and their ability to utilize feedstuffs is presented. Classification, digestion, absorption, transport and metabolism of major nutrients required by animals are studied.

Learning Outcomes
1. Identify conventional and non-conventional feedstuffs that are fed to livestock animals.
2. Describe various methods for feed processing and storage.
3. Assess the nutritional value of a ration or feed ingredients.
4. Interpret the NRC (Nutrient Requirement Council) guidelines for feeding livestock.
5. List the basic digestive anatomy for all classes of livestock.
6. Describe nutritional deficiencies and digestive disorders common to livestock animals.

ANSC 1120H. Introduction to Animal Science Honors
3 Credits (3)
This course is designed to provide an introduction to nutrients and their function in livestock animals. Basic feed identification, evaluation, and diet formulation will be discussed. The anatomy of the digestive tract of animals and their ability to utilize feedstuffs is presented. Classification, digestion, absorption, transport and metabolism of major nutrients required by animals are studied. Additional course work will be required. Restricted to Las Cruces campus only.

Prerequisite(s): Eligibility for membership in honors college.

Learning Outcomes
1. Identify conventional and non-conventional feedstuffs that are fed to livestock animals.
2. Describe various methods for feed processing and storage.
3. Assess the nutritional value of a ration or feed ingredients.
4. Interpret the NRC (Nutrient Requirement Council) guidelines for feeding livestock.
5. List the basic digestive anatomy for all classes of livestock.
6. Describe nutritional deficiencies and digestive disorders common to livestock animals.

ANSC 1120L. Introduction to Animal Science Lab
1 Credit (2P)
Students will observe and participate in activities related to farm animal management and will include areas of livestock selection, nutrition, reproductive physiology, animal ID and animal health. This lab is required for animal science majors.

Prerequisite(s)/Corequisite(s): ANSC 1120.

Learning Outcomes
1. To provide the students with an understanding of the principles, concepts and terminology of today's livestock industry.

ANSC 1130. Western Equitation I
2 Credits (4P)
Basic principles of Western riding, including care and management of the riding horse, equitation equipment, and development of riding skills.
ANSC 1140. Introduction to Dairy Science
3 Credits (3)
Introduction to the basic aspects of dairy science and how to apply key concepts to the practical feeding and management of dairy cattle and production of dairy products. Students should also obtain an appreciation for the size and diversity of the dairy industry.
Prerequisite(s)/Corequisite(s): ANSC 1120. Restricted to Las Cruces campus only.
Learning Outcomes
1. Learn key concepts in dairy production and management
2. Be familiar with terms used in production of milk and milk products

ANSC 1160. Introductory Horse Science
3 Credits (2+2P)
The light horse industry; breeds; introduction to feeding, breeding, marketing and management; handling and selecting horses for breeding and performance.
Learning Outcomes
1. Describe and identify breeds of horses, their characteristics and their uses.
2. Demonstrate knowledge of basic physiology of horses by recalling parts of the horse, including bones, muscle, tendons and ligaments. Also, by ageing horses via teeth, body condition scoring and taking vital signs.
3. Demonstrate safe and proper handling of horses.
4. Demonstrate comprehension of basic nutrition and feedstuffs by formulating/correcting diets in clinical and non-clinical situations.
5. Recall aspects of basic reproduction by calculating a stallion book and recalling appropriate procedures for breeding.
6. Create informative articles that seek to educate the lay horse person about a topic covered in class.

ANSC 1170. Introduction to Animal Metabolism
3 Credits (3)
Principles underlying the mechanisms of animal metabolism as they relate to production, maintenance, and health of animals.
Prerequisite: CHEM 1215G.
Learning Outcomes
1. This course provides an introduction to the study of the physiology of life.
2. The first part of the course covers acids and bases and the chemical nature of organic compounds.
3. The second part of the course relates to the chemistry of biomolecules (nutrients) and summarizes the chemical reactions of life (metabolism).

ANSC 1180. Companion Animal in Society
3 Credits (3)
Examination of the historical, current, and potential future roles of companion animals in human society. Topics include animal domestication, breeds, exotic companion animals, the companion animal industry, and competitions and sports involving companion animals. Emphasis is on canine and feline species. May be repeated up to 3 credits. Restricted to Las Cruces campus only.
Learning Outcomes
1. Discuss the theories regarding why, how, and when companion animals became domesticated.
2. Describe how selective breeding has optimized certain physiological and behavioral traits of companion animals in order to fulfill the needs of individual people and society.
3. Explain the concept of human-companion animal interaction (HAI) and the influence this bond has on human behavior, health, society, and government policy/laws.
4. Understand the breadth and economic impact of the rapidly expanding companion animal industry and the recent expenditure trends of pet owners.
5. Discuss the past and present uses of companion animals and theorize regarding the future uses of companion animals in society.
6. Be effective in searching for, and critically evaluating, scientific based resources.

ANSC 2120. Equine Management
3 Credits (3)
Introduction and application of the business skills necessary to effectively manage the equine operation. Students will learn how to use strategic thinking and sound business management practices to succeed in the demanding equine industry.
Prerequisite: ANSC 1160.
Learning Outcomes
1. Develop a working knowledge of the business principles needed to operate a successful entrepreneurial enterprise.
2. Increase the awareness of the need for business principles in the aggregate function of an equine operation.

ANSC 2130. Western Equitation II
2 Credits (4P)
Intermediate principles of Western riding, including reading horse behavior, limbering-up exercises, and developing riding skills. Introduction to rollbacks, turnarounds and stops.
Prerequisite: consent of instructor.
Learning Outcomes
1. Increasing the understanding of the student relative to equitation practices
2. Increase the students’ ability to apply principles of Western Equitation to applied settings across a broad spectrum of outlets
3. Prepare the student to engage equine in a professional manner
ANSC 2140. Introduction to Companion Animal Science  
3 Credits (3)  
Introduction to the care of common companion animal species. Species specific housing and nutrition are covered in the context of maximizing animal health and well-being and reducing disease. May be repeated up to 3 credits.  
Learning Outcomes  
1. Accurately use scientific terminology common to the companion animal discipline.  
2. Compare and contrast the physiological similarities and differences between the various companion animal species studied in class.  
3. Create dietary plans based on the nutritional needs of different companion animal species to optimize animal health and lifespan.  
4. Identify symptoms of disease/injury at the early stages of illness in order to obtain Veterinary care and treatment as quickly as possible.  
5. Design and construct species specific cages/vivariums to maximize animal well-being and health.  
6. Educate others regarding providing the best possible care for a variety of companion animal species.

ANSC 2150. Management of Equine Operations  
3 Credits (3)  
Introduction and application of business skills necessary to effectively manage the equine operation. Students will learn how to use strategic thinking and sound business management practices to succeed in the demanding equine industry.  
Prerequisite(s): ANSC 1160.  
Learning Outcomes  
1. Acquire a working knowledge of different sectors of the equine industry, including business practices, management and marketing skills.

ANSC 2310. Introduction to Meat Science  
3 Credits (2+3P)  
Fundamental aspects of the red meat industry. Lecture topics and laboratory exercises include the nutrient value of meat, meat preservation, meat safety, muscle structure and contraction, slaughter and processing of beef, lamb and pork, sausage manufacture, meat curing, meat cookery, and muscle and bone anatomy.  
Learning Outcomes  
1. Increasing the understanding of meat science applications across animal agriculture.  
2. Increase the students’ ability to apply principles of production to the industry perspective.  
3. Apply the increased knowledge of meat science in a global situation.  
4. Gain an understanding of the components involved in the development and processing of the red meat industry.

ANSC 2330. Animal Production  
3 Credits (2+2P)  
Production and utilization of beef cattle, sheep, and swine; emphasis on feeding, breeding, management problems and marketing; selection of animals for breeding and market  
Learning Outcomes  
1. Increasing the understanding of meat animal production.  
2. Increase the students’ ability to apply principles of production to the industry perspective.  
3. Apply the increased knowledge of meat animal production to global situations.  
4. Gain a broader understanding of the importance of meat animals in the global food system.

ANSC 2340. Genetics in Animal Science  
3 Credits (3)  
Introduction to genetics and inheritance relative to livestock production. Introduction to procedures for collection and use of performance information in livestock improvement programs.  
Prerequisites: BIOL 2610G.  
Learning Outcomes  
1. Gain a broader understanding of the role genetic impacts in the livestock industry.  
2. Employ an increased knowledge of impact of genetics in the food animal industry and the production and economic principles that apply.  
3. Recognition of the global impacts of genetics in the food animal industry in a global setting.

ANSC 2996. Special Topics  
1-4 Credits  
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.  
Learning Outcomes  
1. Varies

ANSC 301. Animal and Carcass Evaluation  
3 Credits (2+2P)  
Determination of the market value of meat animals by relating live animal and carcass traits. Topics include the identification of economically important traits, grading, growth and development, wholesale and retail pricing, and futures and options markets.  
ANSC 303. Livestock, Meat and Wool Evaluation  
4 Credits (3+2P)  
Selection, classification, grading, and judging of livestock, meat, and wool.

ANSC 304. Feeds and Feeding  
3 Credits (2+2P)  
Digestibility of feeds, their nutritive values, grades, and classes, principles of ration formulation and computer ration formulations, and practical feeding of farm animals. Prerequisite(s): CHEM 1215G

ANSC 305. Principles of Genetics  
3 Credits (3)  
Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: AGRO 305, BIOL 305, HORT 305 and GENE 305  
Prerequisite(s): BIOL 2610G, BIOL 2110G and either CHEM 1215G or CHEM 1216.
ANSC 308. Horse Evaluation
4 Credits (2+4P)
Students will acquire a working knowledge of selection and classification of horses, learn criteria for evaluation and selection of breeding and show animals, gain a broad understanding of judging conformation and performance in the horse, and learn effective oral and written communication skills through defense of class placings. This course is considered an introduction to the NMSU Horse Judging Team.

ANSC 310. Exhibiting Livestock
3 Credits (1+4P)
Fitting and showing beef cattle, dairy cattle, sheep and swine.

ANSC 312V. Companion Animals and the Human-Animal Interaction
3 Credits (3)
The science behind human-animal interactions (HAI). An examination of the interactions between humans and companion animals and the effects on human and animal health and wellness. Cultural differences in HAI will be explored. Topics will include Animal Assisted Activity (AAA), Animal Assisted Therapy (AAT), and service animals. Emerging and future uses of companion animals in HAI will be discussed.

ANSC 320. Equine Behavior and Training
3 Credits (6P)
Basic principles, methods and philosophies of handling, breaking and training the two-year-old Western horse. May be repeated up to 6 credits.
Prerequisite(s): ANSC 2130 or consent of instructor.

ANSC 321. Advanced Equine Behavior and Training
3 Credits (6P)
Continuation of ANSC 320. Further development of skills required to advance the training of the two-year-old Western horse. Emphasis will be placed on lateral work, lead changes, turn-arounds, obstacles, and making the horse accustomed to ranch and trail riding situations.
Prerequisite(s): ANSC 320 or consent of instructor.

ANSC 325. Food and Agribusiness Finance and Planning
3 Credits (3)
Same as AEEC 325. May be repeated up to 3 credits. Crosslisted with: AEEC 325.

ANSC 350. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

ANSC 351V. Agricultural Animals of the World
3 Credits (3)
Global study of the development and use of animals for production of food and nonfood products. Climatic, cultural, and economic influences on systems of livestock production and species and breeds of livestock utilized will be evaluated.

ANSC 353. Advanced Livestock Evaluation
2 Credits (4P)
Advanced selection, classification and grading of livestock. May be repeated up to 2 credits. Consent of Instructor required.

ANSC 370. Anatomy and Physiology of Farm Animals
4 Credits (3+2P)
Structure and function of the animal body. Includes studies of the horse, cow, sheep, pig, and comparisons with the human body.
Prerequisite(s): CHEM 1215G and BIOL 2610G or BIOL 2110G.

ANSC 383. Equine Reproductive Management
3 Credits (1+4P)
Anatomy, physiology, and endocrinology of reproduction of the mare and stallion; training in modern reproductive techniques employed in the horse industry.
Prerequisites: ANSC 1160, ANSC 2150, and ANSC 370.

ANSC 390. Internship
1-3 Credits
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Graded S/U.
Prerequisite: consent of instructor.

ANSC 391. Undergraduate Research Experience
1-3 Credits (1-3)
Formal laboratory, library, or field study of problems related to animal sciences, emphasizing hypothesis development, testing, and reporting results. Projects are preplanned, reviewed, and approved. Students submit periodic written reports and final written and oral reports. May be repeated for a maximum of three credits. Consent of Instructor required.

ANSC 392. Animal Sciences Teaching/Extension Experience
1-3 Credits (1-3)
: Formal teaching experience related to animal sciences supervised by a faculty member. May involve classroom instruction, educational material development, and/or student evaluation and assessment. Students may also be involved in development, implementation, or assessment of adult or youth educational programs related to animal sciences, supervised by a faculty member. Students submit periodic written reports and a final written and oral report. May be repeated for a maximum of three credits. Consent of Instructor required.

ANSC 402. Animal Science Seminar
1 Credit (1)
A seminar course designed to inform students of the career opportunities, develop their interviewing and other interpersonal skills may also include reading, discussions, written reports, and seminar presentations of current relevant literature.

ANSC 402 H. Animal Science Seminar
1 Credit (1)
Taught with ANSC 402 with additional work.
Prerequisite(s): Meets Honors eligibility and/or Crimson Scholar status.

ANSC 411. Canine and Feline Behavior and Training
3 Credits (3)
The influence of domestication, breeds, genetics, and physiology on the behavior of canine and feline species. Training methods and modification of problem behaviors are examined. The impact of the pet parent on their animal's behavior is addressed. May be repeated up to 3 credits.
Prerequisite(s): Junior or Senior status or consent of the instructor.

ANSC 412. Canine and Feline Health and Diseases
3 Credits (3)
A review of common infectious and non-infectious diseases and the basics of the immune response. Pathophysiology and treatment of these diseases and the role the pet parent plays in pre-disposing their animals to disease. May be repeated up to 3 credits.
Prerequisite(s): ANSC 2140 or consent of instructor.

ANSC 421. Physiology of Reproduction
4 Credits (3+2P)
Fertility and the role of hormones, nutrition, selection, management and environment in the maintenance of high reproductive rate.
Prerequisite(s): ANSC 370.
ANSC 422. Animal Nutrition
3 Credits (3)
Nutrient utilization and measurement and nutrient requirements for the various body functions.
Prerequisite(s): CHEM 2115 or CHEM 313 or ANSC 1170.

ANSC 423. Animal Breeding
3 Credits (2+2P)
Mating systems, and selection procedures; calculation of inbreeding coefficients, genetic relationships, and gene frequency.
Prerequisite(s): ANSC 2340 or 305.

ANSC 424. Swine Production
3 Credits (2+2P)
Breeding, feeding, and care of swine.
Prerequisite(s): ANSC 304.

ANSC 425. Horse Science and Management
3 Credits (2+2P)
Senior level course requiring students to apply basic knowledge acquired in the previous courses to solve typical problems encountered in the horse industry. Specific topics include genetics and animal breeding, business and legal issues, reproduction, health, nutrition and exercise physiology.
Prerequisite(s): ANSC 304 and ANSC 370 or concurrent registration.

ANSC 426. Beef Production: Cow-Calf Management
3 Credits (2+2P)
Senior level course examining management practices for the cow-calf producers. Specifically focusing on nutrition, reproduction, genetics, marketing, and health. May be repeated up to 3 credits.
Prerequisite(s): ANSC 304 and (ANSC 2340 or ANSC 305) or concurrent registration.

ANSC 427. Dairy Production
3 Credits (2+2P)
Breeding, nutrition, physiology and management of dairy cattle.
Prerequisite(s): ANSC 304 and (ANSC 2340 or ANSC 305) or concurrent registration.

ANSC 428. Sheep and Wool Production
3 Credits (2+2P)
Genetics, nutrition, physiology and management of sheep. Wool grading, shearing, and disease control.
Prerequisite(s): ANSC 304 and junior status.

ANSC 429. Beef Production: Feedlot Management
3 Credits (2P)
Senior level course in feedlot management of beef cattle. Topics of interest include cattle handling and processing, health and nutrition, intake management, and growth. Feed mill operation, marketing strategies, and regulatory concerns associated with finishing cattle production may also be discussed.
Prerequisite(s): ANSC 304 or Consent of Instructor.

ANSC 448. Problems
1-4 Credits
Individual investigation in a specific area of animal science. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 458. Livestock Behavior, Welfare and Handling
3 Credits (2+3P)
Principles of animal behavior and evaluation of management practices on animal welfare in confined and rangeland livestock operations. Low stress livestock handling techniques. Design of livestock handling facilities. Crosslisted with: RGSC 458
Prerequisite(s): RGSC 2110 or ANSC 1120.

ANSC 462. Parasitology
3 Credits (3)
Same as EPWS 462.

ANSC 468. Advanced Dairy Herd Management
3 Credits (3)
The course is offered through the Southern Great Plains Dairy Consortium in Clovis, NM, and will include breeding, nutrition, physiology, health and management of large herd dairies of the Southwest. Students must apply for the course through the Consortium, and can take it more than once, as topics vary. Consent of instructor required.
Prerequisite(s): ANSC 304.

ANSC 480. Environmental Physiology of Domestic Animals
3 Credits (3)
Influence of environmental factors on physiological processes of domestic animals.
Prerequisite: ANSC 370.

ANSC 484. Ruminant Nutrition
3 Credits (3)
Energy, nitrogen, and mineral nutrition of ruminants with special emphasis on digestive physiology and metabolism of nonprotein nitrogen compounds.
Prerequisite: ANSC 422.

ANSC 488. Equine Nutrition and Exercise Physiology
3 Credits (2+2P)
Students will gain an in-depth understanding of nutrition and exercise physiology in the horse. Students will investigate the response of major physiological systems to exercise, conditioning and training, gastrointestinal physiology, nutrition requirements and clinical nutrition of the horse. Students must have Junior standing or higher to enroll in this course.

ANSC 501. Advanced Animal Nutrition (so)
3 Credits (3)
Emphasis on digestive physiology and metabolism. Basic mechanisms involved in the intake, digestion, and absorption of nutrients studied.
Prerequisite(s): CHEM 2115 or consent of instructor.

ANSC 504. Animal Physiology Techniques (se)
4 Credits (4)
Radioimmunoassay procedures. Methods and procedures for conducting reproductive physiology research in livestock. Includes animal preparation, sample collection, laboratory and cell culture procedures.
Prerequisite: consent of instructor.

ANSC 507. Laboratory Techniques in Nutrition (f)
4 Credits (2+6P)
Methodology and experimental procedures in measuring nutrient requirements and value of diets.
Prerequisites: ANSC 422 or consent of instructor.

ANSC 509. Endocrinology of Domestic Animals (f)
3 Credits (3)
The role of hormones in growth, development, metabolism, temperature regulation, lactation, and reproduction of domestic animals, including commercial applications.
ANSC 510. Range Nutrition Techniques (se)  
3 Credits (3)  
Animal and plant methods of determining quantity and quality of range forage. Same as RGSC 510.  
Prerequisite: ANSC 484 or consent of instructor.

ANSC 512. Research Methods in Animal Science (s)  
4 Credits (3+2P)  
Procedures used in animal science research, including planning and conduct of investigations and interpretation of results.

ANSC 515. Graduate Seminar  
1 Credit (1)  
Current topics.

ANSC 520. Advanced Nutritional Management I: Feedlot (se)  
3 Credits (3)  
Emphasis on feeding systems for beef cattle from weaning to slaughter. Primary focus on feedlot nutrition and management.  
Prerequisite: ANSC 484 or consent of instructor.

ANSC 521. Advanced Nutritional Management II: Cow Calf/Stocker (so)  
3 Credits (3)  
Emphasis on nutritional management for cow-calf and stocker operations. Primary focus on applications to range animal nutrition and management.  
Prerequisite: ANSC 484 or consent of instructor.

ANSC 522. Animal Nutrition (f)  
3 Credits (3)  
Nutrient utilization and measurement; nutrient requirements for the various body functions. Taught with ANSC 422 with additional requirements for graduate students. Recommended for nonmajors.  
Prerequisite(s): CHEM 2115.

ANSC 560. Rumen Microbiology (so)  
3 Credits (3)  
Issues in ruminal and gastrointestinal microbiology. Includes physiological and genetic mechanisms in carbohydrate and nitrogen utilization. Same as FSTE 560.  
Prerequisites: ANSC 501.

ANSC 580. Environmental Physiology of Domestic Animals  
3 Credits (3)  
Influence of environmental factors on physiological processes of domestic animals. Specific focus on fetal and developmental programming, heat and cold stress.

ANSC 588. Equine Nutrition and Exercise Physiology  
3 Credits (3)  
Students will gain and in-depth understanding of nutrition and exercise, conditioning and training, gastrointestinal physiology, nutrition requirements and clinical nutrition of the horse.  
Prerequisite(s)/Corequisite(s): ANSC 304 and ANSC 422.

ANSC 598. Special Research Programs  
1-4 Credits (1-4)  
Individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 599. Master’s Thesis  
15 Credits  

ANSC 600. Research  
1-15 Credits  
This course is for Ph.D. students before they have completed qualifiers. Consent of Instructor required. Thesis/Dissertation Grading.  
Prerequisite(s): ANSC 421 or consent of instructor.

ANSC 602. Advanced Reproductive Physiology (fo)  
3 Credits (3)  
Mechanisms of reproductive function; research methodology.  
Prerequisite(s): ANSC 421 or consent of instructor.

ANSC 602 L. Molecular Techniques in Reproductive Physiology (fo)  
2 Credits (4P)  
Molecular biology techniques used in the study of reproductive physiology in domestic animals. Extraction of RNA, DNA from endocrine tissues, northern analysis, culture of pituitary/ovarian tissue. Mechanisms of hormone action.  
Prerequisite: consent of instructor.

ANSC 604. Hypothalamo-Hypophyseal-Pineal Endocrinology (fe)  
1 Credit (1)  
Hormones and other neurochemicals synthesized and secreted by the hypothalamus, pituitary, and pineal glands. Neuroendocrinology of the hypothalamo-hypophyseal axis.  
Prerequisite: ANSC 509.

ANSC 605. Gonadal and Uterine Endocrinology (fe)  
1 Credit (1)  
Endocrinology of mammalian ovaries, testes, and uteri including developing trophoblasts.  
Prerequisite: ANSC 509.

ANSC 606. Endocrinology of Pregnancy, Parturition, and Lactation (fe)  
1 Credit (1)  
Hormones and other chemical messengers involved in maintenance of pregnancy, control of parturition, and initiation and maintenance of lactation in farm animals.  
Prerequisite: ANSC 509.

ANSC 621. Metabolic Functions and Dysfunctions (fe)  
3 Credits (3)  
Physiological chemistry of ruminants and other domestic animals, with attention to metabolic dysfunctions and nutritional toxicology.  
Prerequisites: CHEM 345 and ANSC 501.

ANSC 625. Nutrient Metabolism I: Mineral, Vitamin, and Nitrogen Metabolism (fo)  
4 Credits (4)  
Cellular metabolism, physiological function(s), toxicities, and deficiencies of minerals, vitamins and nitrogen in ruminants and nonruminants.  
Prerequisite: ANSC 501.

ANSC 626. Nutrient Metabolism II: Carbohydrates, Lipids, and Energetics (se)  
4 Credits (4)  
Basic principles of carbohydrate, lipid, and energy metabolism; integration of metabolism with emphasis on nutritional and biochemical processes related to efficiency of nutrient use.  
Prerequisite: ANSC 501.

ANSC 698. Special Research Programs  
1-4 Credits  
Advanced individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.
ANSC 700. Doctoral Dissertation
15 Credits

Range Science Courses

RGSC 1110. The Range Science Profession
1 Credit (1)
Introduction to scientific disciplines and career opportunities in rangeland science and management.
Learning Outcomes
1. To introduce students to the Range Science program and to a variety of career opportunities in Range Science.
2. To develop an individualized course curriculum that prepares the student to achieve their career goals.
3. To examine opportunities to gain practical work experience through internships and cooperative employment.

RGSC 2110. Introduction to Rangeland Management
3 Credits (3)
This course covers the principles of managing and understanding pasture and rangelands. Plant physiology and ecology, plant communities and rangeland sustainability and how they relate to livestock production and wildlife management will be discussed. Restricted to: Main campus only.
Learning Outcomes
1. Understand rangeland management operations.
2. Identify rangeland plants.
3. Gain a perspective of watershed management.
4. Discuss the management of rangeland resources.
5. Understand the process of rangeland evaluation through a broad understanding of monitoring and production of these rangelands.
6. Gain a perspective of the correlation of rangelands and the economic principles guiding resource management.
7. Understand the process of rangeland condition.
8. Understand the concepts of stocking rates and usage of rangelands.
9. Gain a broad perspective of different classes of land ownership; Tribal, federal, private and state.
10. Recognize vegetative communities, ecological sites, plant physiology and application to rangeland management considerations.

RGSC 2996. Special Topics
1-4 Credits
Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.
Learning Outcomes
1. Varies

RGSC 302V. Forestry and Society
3 Credits (3)
Global study of the development and use of forest resources for production of wood, fuel, fiber, and food products. Climatic, edaphic, cultural, and economic influences on forests of the world evaluated. Same as HORT 302V.

RGSC 316. Rangeland Plants
3 Credits (2+3P)
Identification, classification, cultural uses, and economic importance of native and introduced rangeland plants.

RGSC 317. Rangeland Communities
3 Credits (3)
Rangeland associations and communities, their plant species composition, and ecological factors affecting management of communities.

RGSC 318. Watershed Management
3 Credits (2+2P)
Management of rangeland and forest watersheds with emphasis on hydrologic cycle and land use effects on runoff and water quality.

RGSC 325. Rangeland Restoration Ecology
3 Credits (3)
Principles and practices of vegetation management and ecological restoration. Course emphasizes problems associated with rangeland degradation, and implementation of rangeland restoration and improvements.
Prerequisite(s): Sophomore standing or consent of instructor.

RGSC 350. Special Topics
1-4 Credits
Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

RGSC 357. Grass Taxonomy and Identification
3 Credits (1+4P)
Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Students must be Junior standing to enroll in this course.

RGSC 390. Internship
1-3 Credits
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Graded S/U.
Prerequisite: consent of instructor.

RGSC 402. Seminar
1 Credit (1)
A seminar course designed to inform students of the career opportunities, develop their interviewing and other interpersonal skills may also include reading, discussions, written reports, and seminar presentations of current relevant literature.
Prerequisite(s): Senior standing.

RGSC 402 H. Range Science Seminar
1 Credit (1)
Taught with RGSC 402 with additional work.
Prerequisite(s): Meets Honors eligibility and/or Crimson Scholar status and senior standing.

RGSC 406. Rangeland Team Competition
1 Credit (1)
Description and characteristics of range plants. May be repeated for a maximum of 4 credits.

RGSC 440. Rangeland Resource Ecology
3 Credits (3)
Prerequisite(s): Senior standing.
RGSC 440 L. Rangeland Resource Ecology Lab
1 Credit (2P)
Living and nonliving factors of the range environment, the life forms and role of range plants and animals on succession and interactions in range ecosystems. Corequisite(s): RGSC 440.

RGSC 448. Problems
1-4 Credits (1-4)
Individual investigation in a specific area of range science. Maximum of 4 credits per semester and a grand total of 6 credits. Consent of Instructor required.

RGSC 452. Vegetation Measurements for Rangeland Assessment
4 Credits (2+4P)
Sampling principles, sampling design, and measurement methods used to quantify vegetation attributes and to assess the structure and function of rangeland ecosystems. Laboratory emphasizes practical field techniques, quantitative analysis, and interpretation of results. Prerequisite(s): RGSC 294 and A ST 311.

RGSC 458. Livestock Behavior, Welfare and Handling
3 Credits (2+3P)
Principles of animal behavior and evaluation of management practices on animal welfare in confined and rangeland livestock operations. Low stress livestock handling techniques. Design of livestock handling facilities. Crosslisted with: ANSC 458. Prerequisite(s): RGSC 2110 or ANSC 1120.

RGSC 460. Rangeland and Natural Resource Planning and Management
4 Credits (3+3P)
Planning and problem solving in rangeland and natural resource management. Public land planning and policy. Application of land management principles to resolve rangeland, riparian and habitat issues. Prerequisite(s): Senior or graduate student standing.

RGSC 475. Climate Studies, Water, and Society
3 Credits (3)
The course provides a brief description of the Earth's climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water availability) vulnerability of human systems (e.g. agriculture) to climate change, and mitigation and adaptation strategies.

RGSC 485. Land Cover Analysis for Natural Resources
3 Credits (3)
This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. .hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis.

RGSC 509. Approaches to Rangeland Research
3 Credits (3)
Experimental design and statistical analysis of experimental results. Prerequisite(s): A ST 505 or consent of instructor.

RGSC 513. Advanced Rangeland Ecology
3 Credits (3)
Overview of the current state of knowledge in selected areas of rangeland ecology, with emphasis on currently developing ideas and issues relevant to rangeland management. Prerequisite(s): RGSC 440 or equivalent.

RGSC 515. Graduate Seminar
1 Credit (1)
Current topics. Graded S/U.

RGSC 516. Arid Land Management
3 Credits (3)
Survey of seminal and current literature dealing with management of arid and semiarid lands including soil-plant-animal interactions, plant community ecology, arid land assessment methods, and arid land hydrology.

RGSC 518. Watershed Methods and Management
3 Credits (3)
Management of rangeland and forest watersheds with emphasis on the hydrologic cycle and land use effects on runoff and water quality. Hydrologic monitoring methods problem sets required for graduate credit.

RGSC 520. Arid Land Plant Herbivore Interactions
3 Credits (3)
Survey of seminal and current literature dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.

RGSC 525. Advanced Rangeland Restoration Ecology
3 Credits (3)
Theory and application of restoration ecology and the principles and practices of ecological restoration. Course emphasizes problems associated with rangeland degradation and highlights current restoration management actions. May be repeated up to 3 credits.

RGSC 550. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

RGSC 551. Earth Data Retrieval
3 Credits (3)
This course covers topics related to identifying sources, preprocessing, utilizing earth data that can be used to monitor some hydrological and water related variables, vegetation growth and related biophysical properties. The course focuses on developing students' skills on how to handle and analyze high-level large amounts of research data in different formats (i.e., .hdf). The course highlights the use of remote sensing and land surface models-based (NLDAS) earth observation datasets (e.g., NDVI, LST, Ta, and ET). The course uses some open-source tools including Python, API as well as MATLAB. Crosslisted with: WSAM 551.

RGSC 557. Advanced Grass Taxonomy and Identification
3 Credits (1+4P)
Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Additional writing and grass identification assignments are required for graduate credit.
RGSC 575. Climate Studies, Water and Society  
3 Credits (3)  
The course provides a brief description of the Earth’s climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water availability) vulnerability of human systems (e.g. agriculture) to climate change, and mitigation and adaptation strategies. Crosslisted with: WSAM 575.

RGSC 585. Land Cover Analysis for Natural Resources  
3 Credits (3)  
This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis. Crosslisted with: WSAM 585.

RGSC 589. Landscape Hydrology Modeling  
3 Credits (3)  
The course “Landscape Hydrology Modeling” offers topics related to the physical hydrological processes that occur at different spatial and temporal scales in terms of understanding, quantitative evaluation, modeling, and visualization. It addresses precipitation, runoff, infiltration, and evaporation, as well as understanding impact of land use change on these processes. The course highlights and provide training on the use of hydrological modeling tools including WMS software, HydroVIS and ArcGIS software to help students understand, model, manipulate, and visualize hydrological data processes. The course offers hands-on learning experience on the use of these tools. Consent of Instructor required. Crosslisted with: WSAM 589.

RGSC 590. System Dynamics  
3 Credits (3)  
This course takes a system dynamics approach to the study of economics and natural resources management. We will examine some of the example theories such as Solow-Swan model and endogenous growth theories as well as the tragedy of the commons, using system dynamics tools to uncover the feedback and explicitly examine its impact on the dynamic behavior of the system. Through these examples, we will learn how to develop, validate, and use system dynamics models for policy design and analysis. Crosslisted with: WSAM 590.

Learning Outcomes  
1. identify common generic structures and behavioral modes in socioeconomic and ecological systems,  
2. define important feedback theories that explain the behavioral modes in socioeconomic and ecological systems, and  
3. implement the system dynamics method to translate the feedback theories into dynamic simulation models.

RGSC 598. Special Research Program  
1-4 Credits  
Individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

RGSC 599. Master’s Thesis  
15 Credits  

RGSC 600. Doctoral Research  
1-15 Credits  

RGSC 616. Advanced Arid Land Management  
3 Credits (3)  
In depth discussion of seminal and current literature dealing with management of arid and semi-arid lands including land tenure systems, soil-plant-animal interactions (emphasis on livestock grazing), plant community ecology and assessment methods, and arid land hydrology.

RGSC 620. Advanced Arid Land Plant-Herbivore Interactions  
3 Credits (3)  
In depth discussion of seminal work dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.

RGSC 698. Special Research Programs  
1-4 Credits (1-4)  
Advanced individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

RGSC 700. Doctoral Dissertation  
15 Credits  

Office Location: Knox Hall 202

Animal Science (Animal Industry) - Bachelor of Science in Agriculture

The animal industry concentration includes courses that prepare you for work in many phases of the livestock industry, such as livestock production on farms and ranches, the meat industry, the feed industry, livestock breed associations, and livestock publications.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

RGSC 325  Rangeland Restoration Ecology  
RGSC 458  Livestock Behavior, Welfare and Handling  

Business Electives  
Select one from the following:  
ACCT 2110  Principles of Accounting I  
AEEC 305  Marketing and Food Agricultural Products  
AEEC 456  Case Studies in Food and Agribusiness Management  
MGMT 361  Small Business Management  
MKTG 312  Personal Selling  

Non-Departmental Requirements (in addition to Gen.Ed/VWW)  

A ST 311  Statistical Applications  

Second Language: (not required)  

Electives, to bring the total to 120  

Total Credits  

1  
See the General Education (p. 54) section of the catalog for a full list of courses.  

2  
MATH 1220G College Algebra or MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G or MATH 1511G first.  

3  
See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses  

4  
Required of Industry and Science Options  

5  
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.  

Animal Science (Science) - Bachelor of Science in Agriculture  

The science concentration provides you with a strong background in technical science and prepares you for advanced studies leading to graduate or professional degrees.  

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective
Mathematics coursework.

1. See the **General Education** section of the catalog for a full list of courses.
2. MATH 1220G College Algebra or MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G or MATH 1511G first.
3. See the **Viewing a Wider World** section of the catalog for a full list of courses.
4. Required of Industry and Science Options.
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

\(^1\) Only 3 credits apply toward a double major or minor.
Range Science - Bachelor of Science in Agriculture

The following course work prepares you for study and management of rangelands through an integrated ecological approach with special emphasis on rangeland plants, livestock, wildlife, soils and watersheds. The course work is also well designed for those who want to continue study in graduate school. Any undergraduate student majoring in Range Science must earn a grade of C- or higher in Range Science (RGSC prefix) courses to satisfy degree requirements. Students earning a D or F in a Range Science (RGSC prefix) course will be expected to repeat that course until the student earns a grade of C- or higher.

Requirements

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

RGSC 460 | Rangeland and Natural Resource Planning and Management | 
Total Credits | 18 | 

1. RGSC 2110 Introduction to Rangeland Management A ST 311 Statistical Applications are pre-requisites for this course

Agriculture (Domestic Animal Biology) - Master of Agriculture

The Department of Animal and Range Sciences at New Mexico State University offers a non thesis coursework Master of Agriculture degree with a Concentration in Domestic Animal Biology (MAG-DAB) which provides students with graduate training in animal nutrition and physiology. The degree is earned after satisfactory completion of 32 credit hours of upper division and graduate-level courses. The curriculum is completed in two or three academic semesters and includes a creative component which can be met in several ways.

Students having an undergraduate degree in an area of agriculture or a related field may consider the MAG-DAB as an alternative to a Master of Science which traditionally involves preparation of a thesis. Students who may benefit from this program include those in need of additional advanced science-based coursework in preparation for applying to a professional program in veterinary medicine. Other individuals may be interested in careers in the cooperative extension service, education, or the feed and pharmaceutical industries where an advanced degree may be of benefit to advancement. The curriculum outlined below will assist students in preparing for a number of career opportunities.

Admission to the Program

The MAG-DAB program is administered through the Department of Animal and Range Sciences and is coordinated by the Animal Science
Creative Component

The creative component of the program involves completing at least two credits of ANSC 598 Special Research Programs. This requirement can be met in one of two ways. In consultation with the advisor, the student can select a topic of importance in domestic animal biology and prepare a comprehensive literature review covering that topic. An alternative way to meet this requirement is for the student, in consultation with the advisor, to conduct a research project and prepare a written manuscript for evaluation by the advisory committee. In either case, the student will present results of the project in the graduate Seminar (ANSC 515) and then be examined by the advisory committee.

In certain cases, the student may request approval from the Advisory Committee to complete two additional graduate courses (at least six credits) in lieu of one of the reports described above. If this approach is approved, the oral examination at the end of the program will cover all the courses completed during the MAG-DAB Program. Students pursuing this option must also prepare and present a topical seminar in ANSC 515 at some time during the program.

Animal Science - Master of Science

Requirements for Master of Science Degree in Animal Science

Admission

1. GPA of 3.0 or greater.
2. Three letters of recommendation.
3. Completion of the form, “Application for Graduate Admission in Animal Science” including a brief letter (personal statement) outlining the student’s background, career goals, and research interest.
4. Resume
5. Favorable evaluation for admission will be by consensus of the Animal Science Graduate Committee and will be contingent on availability of an advisor and research funding.
6. A requirement for admission as a masters graduate student in the department is completion of a curriculum substantially equivalent to that required of undergraduate students. Therefore, deficiency courses may be required after admission to the program, as determined initially by the Animal Science Graduate Committee.

General Requirements

A. Graduate students must maintain at least a 3.0 grade point average.
B. A minimum of 30 credit hours of graduate work is required of which:
   1. At least 15 credits must be in courses numbered 500 or above
   2. At least 15 credits must be in Animal Science courses
   3. At least 15 credits (exclusive of ANSC 598) must be taken with other than a single professor

C. Designated hours to be completed:
   1. At least four formal Animal Science courses numbered 500 or above
   2. At least six credits in ANSC 599 (Master's Thesis)
   3. At least two credits in ANSC 515 (Graduate Seminar)
   4. At least four credits in Experimental Statistics
D. Graduate Assistants
1. All graduate assistants must enroll as full-time students taking at least 9 graded graduate credits (courses numbered 450 and above). No audits can be taken as part of the 9 minimum credits. Only 3 of the 9 credits may be taken as an S/U option.
2. A graduate assistant may not enroll for more than 15 credits each semester.
3. If a student needs to take deficiency courses as part of the 9 credits, then a memo from the advisor or department head should be submitted to the Graduate School. If approved, the student can register for 3 undergraduate credits and a minimum of 6 graded graduate credits during their first semester at New Mexico State University.
4. Enrollment during summer sessions is not required.

E. Additional Requirements
1. A maximum of six credits in S/U courses may be taken during a Master's program
2. A maximum of six credits (four in a single semester) in ANSC 598 (Special Research Programs) may be taken during a Master's program.
3. If a minor is declared, a minimum of eight credits in this discipline must be completed and approved by that department.
4. In certain instances, deficiency courses may be required.
5. Attendance at graduate seminars is urged.
6. Graduate students are encouraged to adapt their thesis data for submission as a scientific journal article, an Experiment Station Bulletin, or research report.

F. The Masters Committee
The Masters Committee is appointed by the student's advisor with the approval of the Department Head and consists of four members including three from the animal science area and one representative from the Graduate School.

G. The Masters Final Examination
The Masters Final Oral Examination is primarily concerned with the thesis research conducted by the student but it may also extend over the entire discipline. Candidates for a Masters Degree are expected to demonstrate a thorough understanding of their research topic including how it was conducted, the results that were found, and what the results mean. They should also demonstrate knowledge of the general discipline of Animal Science.

Range Science - Master of Science
A GPA of 3.0 or higher is required for admission. GRE exam is not required. Prerequisite for admission as a regular graduate student in the department is the completion of a curriculum substantially equivalent to that required of undergraduate students. Therefore, deficiency courses may be required after admission to the program, as determined by the admissions committee and the student's graduate committee and advisor.

Graduate Program with the Thesis (Research) Option
A minimum of 30 credits of graduate work is required to graduate. At least one advanced statistics course or equivalent is required, as determined by the student's graduate committee. The thesis research project must be approved by the student's graduate committee. Every effort should be made to publish the thesis as a scientific journal article or Experiment Station publication.

Graduate Program with the Non-Thesis Option
A minimum of 32 credits of graduate work is required to graduate. A final written report is required.

The report will be on a topic approved by the student's graduate committee. Research for the report may involve field work and data gathering, but should also be strongly library- and literature-based.

The report should be of graduate quality and content, and should follow graduate school thesis format or the format of an acceptable scholarly journal. Final approval and acceptance of the report will be by the student's graduate committee. Every effort should be made to publish the report in an appropriate outlet (journal article, Experiment Station bulletin or report, Extension bulletin, etc.)

Animal Science - Doctor of Philosophy
Requirements for Ph.D. Degree in Animal Science
Admission
1. GPA of 3.0 or greater.
2. Three letters of recommendation.
3. Completion of the form, "Application for Graduate Admission in Animal Science" including a brief letter (personal statement) outlining the student's background, career goals, and research interest.
4. Resume
5. Favorable evaluation for admission will be by consensus of the Animal Science Graduate Committee and will be contingent on availability of an advisor and research funding.
6. A requirement for admission as a doctoral graduate student in the department is completion of a curriculum substantially equivalent to that required of undergraduate students. Therefore, deficiency courses may be required after admission to the program, as determined initially by the Animal Science Graduate Committee.
7. Non-thesis MS degrees are not acceptable although some of the courses may be transferred if deemed appropriate by the student's Doctoral Committee.

General Requirements
1. Graduate students must maintain at least a 3.0 grade point average.
2. A minimum of 90 credit hours of graduate work is required of which:
   a. At least 30 credits must be in courses numbered 600 or above.
   b. At least 18 credits must be in ANSC 700 (Doctoral Dissertation).
3. All graduate assistants must enroll as full-time students taking at least 9 graded graduate credits (courses numbered 450 and above). No audits can be taken as part of the 9 minimum credits. Only 3 of the 9 credits may be taken as an S/U option.
   a. A graduate assistant may not enroll for more than 15 credits each semester.
   b. If a student needs to take deficiency courses as part of the 9 credits, then a memo from the advisor or department head should...
be submitted to the Graduate School. If approved, the student can register for 3 undergraduate credits and a minimum of 6 graded graduate credits during their first semester at New Mexico State University.

c. Enrollment during summer sessions is not required.

4. Students admitted to the Doctoral program (passed qualifying exam) must continue to enroll in three credits of graduate work each semester (exclusive of summer sessions) until the dissertation is approved by the Graduate School.

5. In certain instances, deficiency courses may be required.

6. Two semesters of ANSC 515 (Graduate Seminar) are required and students are urged to attend seminar every semester that they are in residence.

7. No more than 6 credits of ANSC 698 may apply toward graduation.

8. The “Program of Study and Committee for Doctoral Students” form listing the graduate committee and courses to be taken, should be filed with the Graduate School after completion of 12 credits and after the qualifying exam, and before registering for additional courses.

Qualifying Examination

1. The Animal and Range Sciences Department may allow the M.S. Final examination to serve as a Ph.D. qualifying exam for students receiving an M.S. in Animal Science at NMSU. See “Guidelines for Graduate Studies” for further details.

2. Doctoral students must take a qualifying exam before completion of one semester of graduate work. The exam is scheduled by the student's advisor and administered by a provisional committee of at least 3 regular Animal Science faculty members in the student's area of concentration (reproductive physiology or ruminant nutrition). Its purpose is to evaluate the student's strengths and weaknesses, determine deficiency courses, and discuss a possible program of study (coursework).

3. After successful completion of this exam, a Doctoral Committee is appointed.

Doctoral Committee

1. The student's Doctoral Committee is selected by the student and the student's advisor, with approval of the Department Head and the Graduate Dean. The committee will consist of five or more members, as follows:
   a. The committee chair (advisor) and at least two other members must be from the regular Animal Science faculty in the student's concentration area (reproductive physiology or ruminant nutrition).
   b. One member must be from the Related Area.
   c. One member from the Research Tool Area.
   d. The member from the Related or Research Tool Area may serve as the Representative of the Graduate Dean.

2. Duties of the Doctoral Committee
   a. Prepare and file a preliminary program of study with the Graduate Dean
   b. Provide counsel for the student during the program
   c. Attend the comprehensive oral examination and the final dissertation defense.

NOTE: Changes in committee membership must be approved by the Graduate Dean.

Range Science - Doctor of Philosophy

A GPA of 3.0 or higher is required for admission. GRE exam is required. Prerequisite for admission as a regular graduate student in the department is the completion of a curriculum substantially equivalent to that required of undergraduate students. Therefore, deficiency courses may be required after admission to the program, as determined by the admissions committee and the student's graduate committee and advisor.

A minimum of 30 credits of graduate work plus 18 credits of dissertation (RGSC 700) are required to graduate. The Qualifying Exam will take place during the first semester of graduate work. Its purpose is to evaluate the student's strengths and weaknesses, determine deficiency courses, and discuss a possible program of study (coursework). The “Program of Study and Committee for Doctoral Students” form, listing the graduate committee and courses to be taken, should be filed with the Graduate School after completion of 12 credits and after the qualifying exam, and before registering for additional courses. The Comprehensive Exam is intended to test the knowledge of the major and minor fields of study. The student will be admitted to the exam after fulfilling the language/research tool requirement, after completion of adequate coursework (as determined by the department and the Graduate School), and when considered by the student's graduate committee to be adequately prepared. The exam is part written and part oral. The student is formally considered a candidate for the Ph.D. only after the successful completion of the comprehensive exam, the recommendation of the committee, and the approval of the graduate dean.

The research project must be approved by the student's graduate committee. The dissertation is expected to demonstrate the student's ability in independent investigation and to be a contribution to human knowledge. It shall display a mastery of the literature, present an organized, coherent development of ideas with a clear exposition of results, and provide a critical discussion of the student's conclusions. Every effort should be made to publish the dissertation as scientific journal articles. Final Exam is concerned primarily with the research work of the student as embodied in the dissertation, but it may also extend over the entire field of study. It is entirely oral. The final exam will be advertised to the public one week prior to the exam.

Animal Science - Graduate Minor

A minimum of 9 credit hours in graduate level classes with the ANSC prefix are required to obtain a graduate minor in Animal Science. Approval by the Animal and Range Sciences Department Head is required.

Range Science - Graduate Minor

A minimum of 9 credit hours in graduate level classes with the RGSC prefix are required to obtain a graduate minor in Range Science. Approval by the Animal and Range Sciences Department head is required.

Entomology, Plant Pathology and Weed Science

Undergraduate Program Information

Specific courses that meet these and the university general education requirements and additional courses in biology, chemistry, mathematics
and seminar are included below in departmental requirements. A total of 120 credits are required for graduation. At least 48 credits must be 300-level courses and above. Schedules in specific semesters will be developed with the help of a student’s academic advisor.

Graduate Program Information

The complexity of managing insects, plant diseases, and weeds is increasing environmental concerns, costs, and regulations requiring an integrated approach to management strategies. Future professionals in integrated pest management will be ecologically oriented, trained to manipulate biological and cultural technologies while minimizing chemical control options. The Master of Science degree program in agricultural biology is designed to produce graduates with the academic and research background needed to facilitate effective, innovative, and environmentally sound protection of plants and animals from a wide and varied spectrum of pests. Students will be prepared for careers in research, extension, teaching, private consulting, industry, and government or to continue in a broad range of Ph.D. programs. Specific opportunities will include positions as agricultural consultants, technical and sales representatives for industry, state departments of agriculture and USDA specialists, agricultural extension agents, and industry research and environmental technicians. There is currently a strong need for MS graduates trained in these areas, and the demand is expected to increase dramatically.

Students may wish to concentrate their graduate program in entomology, plant pathology, or weed science, or conversely may wish to be broadly trained in all three pest-management disciplines. Most students will be expected to complete a thesis. A non-thesis option is available, depending on prior training and experience and subject to approval by the department head. A non-thesis research option requires completion of a research paper, suitable as judged by the student’s graduate committee, for journal publication. Completion of an undergraduate degree essentially equivalent to that offered by the department is required for admission to the MS graduate program. Qualifications for admission will be reviewed by the departmental Graduate Admissions committee. Prospective graduate students must have at least a 3.0 undergraduate GPA, complete the GRE, and submit an official transcript, a letter of intent and three letters of recommendation.

Degrees for the Department

Bachelor Degree(s)

Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture (p. 150)

Agricultural Biology (Applied Microbiology) - Bachelor of Science in Agriculture (p. 152)

Agricultural Biology (Entomology) - Bachelor of Science in Agriculture (p. 154)

Agricultural Biology (Environmental Biology) - Bachelor of Science in Agriculture (p. 155)

Agricultural Biology (Pest Biology & Management) - Bachelor of Science in Agriculture (p. 157)

Master Degree(s)

Agricultural Biology - Master of Science (p. 159)

Minors for the Department

Entomology - Undergraduate Minor (p. 158)

Pest Management - Undergraduate Minor (p. 159)

Plant Pathology - Undergraduate Minor (p. 159)

Weed Science - Undergraduate Minor (p. 159)

Professor, Gerald K. Sims, Department Head

Professors Creamer, Bundy, Sanogo, Thomas, Thompson; Associate Professor Hanson, Mesbah, Pierce, Romero, Schutte; Assistant Professor Lehhoff, Affiliated Faculty Schroeder, Sweet, Bleiweiss; College Assistant Professor Lewis; College Associate Professor Randall; Emeritus Professor Arnold, Richman

G.K. Sims, Department Head, Ph.D. (Purdue) – soil microbiology; weed science; C. S. Bundy, Ph.D. (Georgia) – entomology; R. Creamer, Ph.D. (California-Davis) – plant pathology; N.P. Goldberg, Ph.D. (Arizona) – plant pathology; S. Hanson, Ph.D. (University of Wisconsin) – molecular plant pathology; E. Lehnhoff, Ph.D. (Montana State) Ecology and Environmental Science; B. E. Lewis, M.S. (New Mexico State) – economic entomology; A.O. Mesbah, Ph.D. (University of Wyoming) – weed science; J. Breen Pierce (Rutgers) – entomology; J. Randall, Ph.D. (New Mexico State University) – plant pathology; A. Romero, Ph.D. (University of Kentucky) – Entomology; S. Sanogo, Ph.D. (Pennsylvania State) – plant pathology; B. Schutte, Ph.D. (Ohio State) – Horticulture & Crop Science; C. A. Sutherland, Ph.D. (Oregon State) – extension entomology; S. H. Thomas, Ph.D. (Iowa State) – nematology; D.C. Thompson, Ph.D. (Colorado State) – entomology.

Entomology, Plant Pathology and Weed Science Courses

EPWS 1110. Applied Biology 3 Credits (3)

Introduction to applied biology and ecology focusing on insects, plants and pathogens in natural areas, crops and urban settings. EPWS 1110L is strongly recommended to take in the same semester. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Students will learn about the Department of Entomology Plant Pathology and Weed Science and will have the opportunity to meet the Las Cruces-based faculty in the department.

2. By the end of this course students will have gained a broad understanding of the pests in a wide range of systems, their interactions with other organisms, and the methods available to minimize the influence of pests on target commodities.
EPWS 302 H. General Entomology Honors
4 Credits (4)
An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insects orders and families. Laboratory focuses on identification of insect orders and families. Students in the Honors section will be given the opportunity to enhance their understanding of entomology with a more detailed examination into the lives of these fascinating organisms.
Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 303. Economic Entomology
3 Credits (3+2P)
Identification and life cycles of insects of economic significance, their relationship to humans and agriculture including biological interactions and controls. May be repeated up to 3 credits.
Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 310. Plant Pathology
4 Credits (4)
Causes and methods of prevention and treatment of diseases in plants.
Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 310 H. Plant Pathology Honors
4 Credits (4)
Cause and methods of prevention and treatment of diseases in plants. Students with an Honors designation will have additional project and report assignments.
Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 311. Introduction to Weed Science
4 Credits (3+2P)
Principles of weed science, with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Identification of local weeds. Crosslisted with: AGRO 311.
Prerequisite(s): CHEM 1215G, and BIOL 2110G.

EPWS 311 H. Introduction to Weed Science Honors
4 Credits (4)
Principles of weed science, with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Identification of local weeds. Students in the Honors section will be required to synthesize information from peer-reviewed journals pertaining to weed science. Crosslisted with: AGRO 311.
Prerequisite(s): CHEM 1120G, and BIOL 2110G.

EPWS 314. Plant Physiology
3 Credits (3)
Overview of photosynthesis, respiration, water relations of plants, minerals and organic nutrition, growth and development. Same as BIOL 314.
Prerequisites: BIOL 2110G, CHEM 1225G.

EPWS 314 H. Plant Physiology Honors
3 Credits (3)
Overview of photosynthesis, respiration, water relations of plants, minerals and organic nutrition, growth and development. Students with an Honors designation will have additional assignments that require them to synthesize information from primary literature sources.
Prerequisite(s): BIOL 2110G, CHEM 1225G.
EPWS 325V. Insects, Humans, and the Environment
3 Credits (3)
Overview of the interactions of the world's largest group of organisms with humans. Emphasizing the role of insects in the development of human cultures, including health, food and fiber production, art, music, and environmental issues; with discussions of historic, present day, and future impacts in underdeveloped, developing, and developed civilizations.

EPWS 373. Fungal Biology
3 Credits (2+2P)
Introduction to the taxonomy, morphology, physiology, and ecology of fungi. Same as BIOL 373.
Prerequisites: EPWS 310 or BIOL 311, or consent of instructor.

EPWS 380 H. Science and Society Honors
3 Credits (3)
Analysis and evaluation of how human activities affect the earth's environment and ecosystems. Examples of issues (local to global) will be examined in detail. Current science and the intersection of science and society will be discussed in relation to problems like world population, agricultural productivity, deforestation, climate change, medical advances and challenges, using fact based critical thinking approaches. Critical thinking and writing skills will be emphasized in independent assignments. Students seeking honors credit will perform additional work.
Prerequisite(s): Honors eligibility requirements.

EPWS 380V. Science & Society
3 Credits (3)
Analysis and evaluation of how human activities affect the earth's environment or ecosystems. Several examples, from global issues to local issues will be studied in detail. Current science and the intersection of science and public policy will be discussed in relation to problems like world population, agricultural productivity, deforestation, medical advances, and future prospects for the environment. May be repeated up to 3 credits.

EPWS 390. Internship
1-3 Credits
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. Maximum of 3 credits. Graded S/U.
Prerequisite: consent of instructor.

EPWS 420. Environmental Behavior of Pesticides
3 Credits (3)
Behavior of pesticide compounds in the environment, their function toward target and non target pest organisms including humans, effect of environmental conditions on pesticide function, ecology of organisms involved in pesticides degradation, overview of environmental regulation. CHEM 2115 recommended prior to course. May be repeated up to 3 credits.

EPWS 447. Seminar
1 Credit (1)
Organization and techniques for the oral presentation of research information. Restricted to: Main campus only.

EPWS 447 H. Seminar Honors
1 Credit (1)
Organization and techniques for the oral presentation of research information. Students taking EPWS 447 H will have the additional assignment of making a poster on either scientific research or a scientific topic.
Prerequisite(s): Honors eligibility requirements.

EPWS 449. Special Problems
1-3 Credits
Individual investigation in specific areas of entomology, plant pathology or plant physiology. Maximum of 3 credits per semester and a grand total of 6 credits.

EPWS 451. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.
Prerequisite: consent of instructor.

EPWS 455. Advanced Integrated Pest Management
3 Credits (3)
Examination of factors affecting the biology and ecology, population evaluations, and control of insect, disease, and weed pests with an emphasis on integrating management practices. Credit cannot be given for both EPWS 455 and EPWS 505. Crosslisted with: EPWS 505.
Prerequisite(s): Either EPWS 303 or EPWS 310 or EPWS 311, or consent of instructor.

EPWS 456. Biological Control
3 Credits (3)
Principles of plant and animal suppression using living organisms. Interaction of biological control organisms with biotic and abiotic factors will be stressed. Credit cannot be given for both EPWS 456 and EPWS 506.
Prerequisite: introductory course in entomology.

EPWS 462. Parasitology
3 Credits (3)
Introduction to classification, biology, ecology and management of the major parasites of human, domestic animals and wildlife.

EPWS 462 L. Parasitology Lab
1 Credit (1)
Introduction to classification, biology, ecology and management of the major parasites of human, domestic animals and wildlife. May be repeated up to 1 credits.

EPWS 471. Plant Mineral Nutrition
3 Credits (3)
Same as HORT 471 and AGRO 471.

EPWS 475. Urban Entomology
3 Credits (3)
Study of insects and related arthropods in urban settings, about their impact on humans and damages to building. Principles of Integrate Pest Management (IPM) strategies with emphasis on current control techniques for detection, control and monitoring. May be repeated up to 3 credits.
Prerequisite(s): Either BIOL 2610G or BIOL 2110G.

EPWS 486. Plant Virology
3 Credits (3)
An overview of viral pathogens associated with infectious plant disease. Includes pathogens, replication, genetics, transmission, and movement of plant viruses.

EPWS 492. Diagnosing Plant Disorders
3 Credits (2+3P)
Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as AGRO 492 and HORT 492.
Prerequisites: EPWS 303, EPWS 310.
EPWS 502. General Entomology
4 Credits (4)
Prerequisite(s): Either BIOL 2610G or BIOL 2110G.

EPWS 505. Advanced Integrated Pest Management
3 Credits (3)
Examination of the factors affecting the biology and ecology, population evaluations, and control of insect, disease, and weed pests, with an emphasis on integrating management practices. Crosslisted with: EPWS 455.
Prerequisite(s): EPWS 303 or EPWS 310 or EPWS 311 or consent of instructor.

EPWS 506. Biological Control
3 Credits (3)
Principles of plant and animal pest suppression using living organisms. Interaction of biological control organisms with biotic and abiotic factors will be stressed. Individual paper or project required. Credit cannot be given for both EPWS 456 and EPWS 506.
Prerequisite: Introductory course in entomology.

EPWS 510. Plant Pathology
4 Credits (4)
Cause and methods of prevention and treatment of diseases in plants. Projects and reports will be adjusted to graduate level status.
Prerequisite(s): Graduate status.

EPWS 511. Introduction to Weed Science (f)
4 Credits (3+2P)
Covers the principles of weed science with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Includes identification of local weeds. Research paper required for graduate credit. Crosslisted with: AGRO 511.
Prerequisite(s): CHEM 1215G and BIOL 2110G.

EPWS 514. Plant Physiology
3 Credits (3)
Overview of photosynthesis, respiration, water relations of plants, minerals and organic nutrition, growth and development.
Prerequisite(s): BIOL 2110G, CHEM 1225G.

EPWS 520. Environmental Behavior of Pesticides (so)
3 Credits (3)
Behavior of these compounds in the environment, their function toward target and non-target pest organisms including humans, effect of environmental conditions on pesticide function, ecology of organisms involved in pesticides degradation, overview of environmental regulation. CHEM 2115 recommended prior to course. May be repeated up to 3 credits.

EPWS 525. Scientific Writing- How to be a Productive and Effective Writing
1-3 Credits (1-3)
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: AGRO 525, HORT 525 and SOIL 525.

EPWS 549. Special Problems
1-4 Credits
Individual investigation in specific areas of entomology, plant pathology, and weed science. Maximum of 4 credits per semester and a total of 6 credits.

EPWS 551. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

EPWS 573. Fungal Biology
3 Credits (2+2P)
Introduction to the taxonomy, morphology, physiology, and ecology of fungi. Same as BIOL 573.
Prerequisite: EPWS 310 or consent of instructor.

EPWS 575. Urban Entomology
3 Credits (3)
Study of insects and related arthropods in urban settings, about their impact on humans and damages to building. Principles of Integrate Pest Management (IPM) strategies with emphasis on current control techniques for detection, control, and monitoring.
Prerequisite(s): Either BIOL 2610G or BIOL 2110G.

EPWS 590. Graduate Seminar
1 Credit (1)
Review of current scientific literature in entomology, plant pathology, and weed science, and verbal presentation of information. No more than 2 credits toward a degree.

EPWS 598. Graduate Internship
1-6 Credits
Supervised professional on-the-job learning experience. Limited to Master of Agriculture candidates. Not more than 6 credits toward the degree.

EPWS 599. Master's Thesis
15 Credits
Thesis.

Name: Entomology, Plant Pathology & Weed Science Department

Office Location: Skeen Hall, Room N141

Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture

The agricultural biology course work prepares you for a variety of careers in the biological sciences and agriculture. You will develop your curriculum with an academic advisor to attain your individual goals. Many will pursue advanced degrees in the sciences or prepare for admittance to professional schools (medical, dental, etc.). A diverse program is offered with five separate concentrations that allow you to tailor your program for careers in the commercial sector, such as agricultural consulting, and pest management or for careers with county, state, or federal agencies, such as research technicians, land managers, and extension agents. A minimum of 120 credit hours is required for graduation. Any undergraduate student majoring in Agricultural Biology must earn a grade of C- or higher in core (EPWS prefix) courses to satisfy
degree requirements. Students earning a D or F in a core (EPWS prefix) course will be expected to repeat that course until the student earns a grade of C- or higher. The following courses are required for a major in Agricultural Biology.

The Applied Biology concentration prepares you for professional advancement including admittance to medical, dental, veterinary and graduate schools. Students interested in the health professions must register with the Health Professional Advisory Committee no later than the sophomore year. Students should check the specific entrance requirements for the professional or graduate school of their choice prior to selecting electives within this option.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

### Prefix | Title | Credits

**Area I: Communications**<br>**English Composition - Level 1**<br>ENGL 1110G | Composition I | 4<br>ENGL 2130G | Advanced Composition | 3<br>ENGL 2210G | Professional & Technical Communication | 4<br>ENGL 2210H | Professional and Technical Communication Honors | 3<br>ENGL 2215G | Advanced Technical and Professional Communication | 3<br>**English Composition - Level 2** | 4<br>**Oral Communication**<br>AXED 2120G | Effective Leadership and Communication in Agriculture | 3<br>COMM 1115G | Introduction to Communication | 3<br>COMM 1130G | Public Speaking | 3<br>**Area II: Mathematics**<br>MATH 1220G | College Algebra | 3<br>MATH 1225G | College Algebra | 3<br>**Area III/IV: Laboratory Sciences and Social/Behavioral Sciences**<br>CHEM 1215G | General Chemistry I Lecture and Laboratory for STEM Majors | 4<br>CHEM 1225G | General Chemistry II Lecture and Laboratory for STEM Majors | 4<br>**Area IV: Social/Behavioral Sciences Course (3 credits)** | 3<br>**Area V: Humanities**<br>BIOL 2110G | Principles of Biology: Biodiversity, Ecology, and Evolution | 3<br>**Area VI: Creative and Fine Arts**<br>**General Education Elective**<br>**Electives, to bring the total credits to 120** | 14-16<br>**Suggested Electives**<br>MATH 1521G | Calculus and Analytic Geometry II | 4<br>PHYS 1240G | Algebra-Based Physics II | 3<br>or PHYS 2210G | Laboratory to General Physics for Life Science I | 3<br>**Total Credits** | 120<br>1. MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G College Algebra first.
2. See the General Education (p. 54) section of the catalog for a full list of courses.
3. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.
4. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Agricultural Biology (Applied Microbiology) - Bachelor of Science in Agriculture

The agricultural biology course work prepares you for a variety of careers in the biological sciences and agriculture. You will develop your curriculum with an academic advisor to attain your individual goals. Many will pursue advanced degrees in the sciences or prepare for admittance to professional schools (medical, dental, etc.). A diverse program is offered with five separate concentrations that allow you to tailor your program for careers in the commercial sector, such as agricultural consulting, and pest management or for careers with county, state, or federal agencies, such as research technicians, land managers,
and extension agents. A minimum of 120 credit hours is required for graduation. Any undergraduate student majoring in Agricultural Biology must earn a grade of C- or higher in core (EPWS prefix) courses to satisfy degree requirements. Students earning a D or F in a core (EPWS prefix) course will be expected to repeat that course until the student earns a grade of C- or higher. The following courses are required for a major in Agricultural Biology.

The Applied Microbiology biotin prepare you for professional positions in algal biofuels, environmental monitoring and improvement, industrial applications of microbiology, food sanitation, research or graduate study.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

### Departmental/College Requirements

**Area IV: Social/Behavioral Sciences Course** |  |  
**Electives, to bring the total credits to 120** |  |  
**Total Credits** |  | 120  

1. MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G College Algebra first.  
2. See the General Education (p. 54) section of the catalog for a full list of courses  
3. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses
Agricultural Biology (Entomology) - Bachelor of Science in Agriculture

The agricultural biology course work prepares you for a variety of careers in the biological sciences and agriculture. You will develop your curriculum with an academic advisor to attain your individual goals. Many will pursue advanced degrees in the sciences or prepare for admittance to professional schools (medical, dental, etc.). A diverse program is offered with five separate concentrations that allow you to tailor your program for careers in the commercial sector, such as agricultural consulting, and pest management or for careers with county, state, or federal agencies, such as research technicians, land managers, and extension agents. A minimum of 120 credit hours is required for graduation. Any undergraduate student majoring in Agricultural Biology must earn a grade of C- or higher in core (EPWS prefix) courses to satisfy degree requirements. Students earning a D or F in a core (EPWS prefix) course will be expected to repeat that course until the student earns a grade of C- or higher. The following courses are required for a major in Agricultural Biology.

The Entomology concentration prepares you for graduate degrees in entomology. Emphasis is placed on a broad background in field and laboratory aspects of insect biology and management.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Agricultural Biology (Pest Biology and Management) - Bachelor of Science in Agriculture

The agricultural biology coursework prepares you for a variety of careers in the biological sciences and agriculture. You will develop your curriculum with an academic advisor to attain your individual goals. Many will pursue advanced degrees in the sciences or prepare for admission to professional schools (medical, dental, etc.). A diverse program is offered with five separate concentrations that allow you to tailor your program for careers in the commercial sector, such as agricultural consulting, and pest management, or for careers with county, state, or federal agencies, such as research technicians, land managers, and extension agents. A minimum of 120 credit hours is required for graduation. Any undergraduate student majoring in Agricultural Biology must earn a grade of C- or higher in core (EPWS prefix) courses to satisfy degree requirements. Students earning a D or F in a core (EPWS prefix) course will be expected to repeat that course until the student earns a grade of C- or higher. The following courses are required for a major in Agricultural Biology.

The Pest Biology and Management concentration prepares you for careers such as insect, weed, and disease management; in both field and urban environments, including IPM and Sustainable/Organic Techniques research technician; federal and state agencies; border security; agricultural consulting; and extension positions.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Second Language: (not required)

Electives, to bring the total credits to 120 4

Total Credits 120

1. See the General Education (p. 54) section of the catalog for a full list of courses.

2. MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G College Algebra first.

3. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

4. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Agricultural Biology - Master of Science

There is currently a strong need for M.S. graduates trained in these areas, and the demand is expected to increase dramatically.

Students are prepared for careers in research, extension, teaching, private consulting, industry, and government or to continue in a broad range of Ph.D. programs. Specific career opportunities include positions as agricultural consultants, technical and sales representatives for industry, state departments of agriculture and USDA specialists, agricultural extension agents, industry research and environmental technicians.

The Master of Science degree program in Agricultural Biology is designed to produce graduates with the academic and research background needed to facilitate effective, innovative, and environmentally sound protection of plants and animals from a wide and varied spectrum of pests.

Please contact the office at (575) 646-3225 for details of a graduate degree plan.

Family and Consumer Sciences

Undergraduate Program Information

Courses and curricula in the department are designed to educate you as an individual and as a citizen in a changing society. They also develop a scientific attitude and the ability to conduct research directed toward solutions of problems affecting the quality of life for individuals, families and communities.

You must complete general education requirements, and a sequence of specialized course work is then identified for each major.

The following prefixes are used for courses:

- CTFM - Clothing, Textiles and Fashion Merchandising
- FCSC—Family and Consumer Sciences;
- FCST—Family and Child Science;
- FSTE—Food Science and Technology;
- NUTR—Nutrition

Graduate Program Information

The candidate for the master’s degree should have an undergraduate degree in a field related to the intended area of specialization. In addition to the Graduate School requirements, the admissions criteria for the Department of Family and Consumer Sciences Graduate Program include letters of reference, standardized test scores, and other materials.

Suggested departmental deadlines for review of admission materials are six weeks prior to the first day of the semester of desired start. A complete description of admission requirements should be obtained from the department.

Degrees for the Department

Bachelor Degree(s)

Human Development and Family Science - Bachelor of Science in Family and Consumer Sciences (p. 177)
Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences (p. 178)

Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences (p. 180)

Food Science and Technology (Culinary Science) - Bachelor of Science in Food Science and Technology (p. 182)

Food Science and Technology (Meat Science) - Bachelor of Science in Food Science and Technology (p. 184)

Food Science and Technology (Science, Technology and Engineering) - Bachelor of Science in Food Science and Technology (p. 186)

Human Nutrition and Dietetic Sciences (Nutrition Education) - Bachelor of Science in Family and Consumer Sciences (p. 188)

Human Nutrition and Dietetic Sciences (Pre-Dietetics/Dietetics) - Bachelor of Science in Family and Consumer Sciences (p. 191)

Master Degree(s)

Family and Consumer Sciences - Master of Science (p. 194)

Minors for the Department

Child Advocacy Studies (CAST) - Undergraduate Minor (p. 194)

Clothing, Textiles and Fashion Merchandising - Undergraduate Minor (p. 194)

Culinary Science - Undergraduate Minor (p. 194)

Family and Child Science - Undergraduate Minor (p. 194)

Food Science - Undergraduate Minor (p. 194)

Nutrition - Undergraduate Minor (p. 194)

Robert P. Moreno, Department Head

Professors  Marin, Montañez, Moreno

Associate Professors Delgado, Plawecki

Assistant Professors Ahn, Martin, Martinez-Monteagudo, Rogus, Sabillon Galeas

College Professor Vaillancourt

College Assistant Professors Azcarate, Coffeen, Phillips

I. Ahn, Ph.D. (Chung-Ang University, Korea)–textile and clothing; K. Coffeen, Ph.D. (New Mexico State University)–educational leadership; E. Delgado, Ph.D. (Technical University of Berlin, Germany)–food science and technology; S. Martin, Ph.D. (South Dakota State University)–nutrition and exercise science; M. Marin, Ph.D. (New Mexico State University)–counseling and educational psychology; M. Montanez, Ph.D. (Michigan State University)–psychology; R. Moreno, Ph.D. (Stanford University)–child development; S. Phillips, M.S. (New Mexico State University)–family and consumer sciences; S. Rogus, (New York University)–nutrition and food studies; L. Sabillon Galeas, Ph.D. (University of Nebraska-Lincoln)–food science and technology; K. Vaillancourt, Ph.D. (Virginia Tech University)–family studies

Cooperative Extension Service L. Banegas-Carreon, M.P.H. (New Mexico State University)–public health; W. Fedio, Ph.D. (University of Alberta-Canada)–food microbiology; N. Flores, Ph.D. (Kansas State University)–food science; B. Jorgensen, Ph.D. (Virginia Tech University)–family studies; S. Koukel, Ph.D. (Texas Tech University)–family and consumer sciences education; K. Martinez, Ph.D. (New Mexico State University)–educational leadership and administration; L. Olivas, M.Ed. (New Mexico State University)–education/curriculum and instruction; K. Plawecki, Ph.D. (University of Illinois)–nutritional sciences; L. Sabillon Galeas, Ph.D. (University of Nebraska-Lincoln)–food science and technology; C. Vanderpool, M.S. (University of New Mexico)–nutrition

Child Advocacy Studies Courses

CAST 1110. Introduction to Child Advocacy
3 Credits (3)
This is the introductory course for child advocacy studies (CAST). It covers different models for understanding child maltreatment, types and indicators of child maltreatment, controversial topics in the field, and issues and laws related to child maltreatment in various countries around the world. Students will develop critical thinking and analytical skills in assessing child maltreatment. Restricted to Dona Ana campus only.

Learning Outcomes
1. Demonstrate how to apply a model of critical thinking and analysis to child maltreatment issues.
2. Describe historical trends in child maltreatment and child advocacy.
3. Compare and contrast theories and models of child maltreatment.
4. Compare and contrast the indicators and consequences of different types of maltreatment.
5. Discuss cultural issues related to assessing and working with families.
CAST 2110. Professional and Systems Responses to Child Maltreatment
3 Credits (3)
Course examines the professionals and systems that respond to allegations of child abuse and neglect. Includes the differences between civil and criminal proceedings; components of a court-worthy child abuse and neglect investigation; basic child forensic interviewing; an overview of child sex offenders; and current research and controversial issues affecting the field. Restricted to Dona Ana campus only.
Prerequisite(s): CAST 1110.
Learning Outcomes
1. Define neglect, abuse, and violence including psychological, emotional, and spiritual maltreatment.
2. Describe the interpersonal dynamic of violence and abuse, and the varied and changing types of violence and abuse.
3. Identify risk factors for various categories of child abuse in the general population and identify high-risk population.
4. Describe the physical and behavioral health effects of violence, neglect, and abuse, including mental health impacts.
5. Identify the barriers to help-seeking for victimized children.
6. Describe models for intervention and prevention of child maltreatment.
7. Discuss various factors that affect children’s motivation for disclosure.
8. Discuss how values, attitudes, beliefs, and experiences related to child maltreatment may effect interaction with children and families
10. Identify methods utilized to evaluate the credibility of witnesses.
11. Describe the processes of collecting corroborative evidence beyond “hard science” items such as DNA.
12. Identify strategies for engaging non-offending caregivers in providing appropriate support for children who have disclosed maltreatment.
13. Identify commonly available community resources that may ensure a safe environment for children disclosing maltreatment.
14. Describe strategies for engaging appropriate professionals to ensure children's well-being following a disclosure of maltreatment.
15. Discuss cultural or developmental factors that may impact the well-being of children reporting maltreatment.
16. Discuss the scope of confidentiality in child maltreatment cases.
17. Describe why all children’s safety should be the priority during an investigation.
18. Describe the typology of sex offenders in child maltreatment cases.
19. Define the grooming process used by sex offenders.
20. Discuss circumstances that may cause children to recant the disclosure of child maltreatment.
21. Discuss how values, attitudes, beliefs, and experiences related to child maltreatment may effect interaction with children and families.
22. Describe legislative and agency mandates of common MDT team members.
23. Discuss the scope of authority and resources among MDT members.
24. Discuss the importance of maintaining appropriate professional boundaries between team members.
25. Identify the kinds of information that must be shared within the MDT team during an investigation or litigation.
26. Identify common educational resources needed by MDTs.
27. Describe ways to engage community stakeholders in preventing, investigating, and intervening in cases of child maltreatment.
28. Accurately describe the steps in the process following a report of child maltreatment.
29. Describe common questions asked by children and families during

CAST 2120. Prevention, Trauma Informed Treatment and Advocacy
3 Credits (3)
The purpose of this course is to prepare students to recognize the effects of child maltreatment and apply interventions strategies for children and their families. Multidisciplinary approaches to prevention, advocacy and treatment of child maltreatment survivors will be presented and discussed. Topics include violence prevention research, interdisciplinary family programs, how to advocate for survivors of child abuse, case management, working with families, mental health service and controversial issues.
Prerequisite(s): CAST 1110.
Learning Outcomes
1. Be able to create goals and identify services needed by maltreating families.
2. Understand the development of psychopathology in the child related to maltreatment.
3. Understand the documented effects of maltreatment such as depression, anxiety, sexualized behavior, neurological, suicide, and damaged ego development/sense of self.
4. Describe interdisciplinary family intervention programs such as in-home parenting programs, Stay Safe program, Incredible Years, ProjectSafe Care, ECPE, etc.
5. Explain mental health assessment, diagnosis, treatment, and availability of services for the survivor, the family and the offender.
6. Understand PTSD, reactive attachment disorder and other trauma responses; assessment and treatment.
7. Describe issues for adolescent and adult survivors of maltreatment such as eating disorders, low self-esteem and personality disorders.
8. Identify professional issues related to maltreatment such as how to approach families and an awareness of the effect of working with families on the professional.
9. Discuss the role of interdisciplinary approaches to child maltreatment intervention in planning for the future and advocating for the rights of children.
10. Explain violence prevention research, strategies, and programs.
11. Understand how battering, chemical dependency/maltreatment, mental illness, chronic illnesses, disabilities, and other family stressors influence intervention with survivors, their families and the offender.
12. Explain how issues of race, class, sexual orientation, religion, gender and social justice can influence professional practice with children who have been maltreated.
13. Explain the role of the child advocate in addressing social justice issues associated with intervention and prevention of child maltreatment, and in promoting social change that will result in fewer incidents of child maltreatment.

CAST 301V. Introduction to Child Advocacy
3 Credits (3)
Historical review and evolution of child welfare policies, initiatives and factors that influence child welfare service. Child welfare policies and services specific to the state of New Mexico are infused throughout the course. Taught with MSW 590. Cannot receive credit for CAST 301 and MSW 590.
CAST 302. Professional and Systems Responses to Child Maltreatment
3 Credits (3)
Course examines the professionals and systems that respond to allegations of child abuse and neglect. Includes the differences between civil and criminal proceedings; components of a court-worthy child abuse and neglect investigation; basic child forensic interviewing; an overview of child sex offenders; current research and controversial issues effecting the field. Students majoring in social work, criminal justice, education, sociology, psychology, nursing, and other areas will enhance their capacity to strengthen the safety net that protects children.
Prerequisite(s): CAST 301V.

CAST 303. Prevention, Trauma Informed Treatment and Advocacy
3 Credits (3)
The purpose of this course is to prepare students to recognize the effects of child maltreatment and to apply intervention strategies for children and their families. Multidisciplinary approaches to prevention, advocacy, and treatment of child maltreatment survivors will be presented and discussed. Topics include violence prevention research, interdisciplinary family programs, how to advocate for survivors of child abuse, short- and long-term effects of child abuse, case management, working with families, mental health services and controversial issues. Crosslisted with: FCST 301V.

CAST 501. Introduction to Child Advocacy
3 Credits (3)
This is the introductory course for child advocacy studies (CAST). It covers different models for understanding child maltreatment, types and indicators of child maltreatment, controversial topics in the field, and issues and laws related to child maltreatment in various countries around the world. Students will develop critical thinking and analytical skills in assessing child maltreatment at the graduate level.

Clothing, Textiles & Fashion Merchandising

CTFM 1110. Fundamentals of Fashion
3 Credits (3)
Survey of the fashion business from fiber to end product.
Learning Outcomes
1. Describe the roles and functions of industry jobs and sectors involved in the designing, production, marketing, and distribution of fashion brands within the global context.
2. Describe the business strategies of industry sectors involved in the designing, production, marketing, and distribution of fashion brands within the global context.
3. Describe the interrelationships among line planning, line development, and line presentation at manufacturing and retail levels.
4. Provide examples of the fashion industry’s environmental and social impact.
5. Learn about all career tracks involved in the fashion industry and the global fashion supply chain.
6. Synthesize industry-relevant information on current issues in the fashion industry.

CTFM 2120. Fashion Illustration
3 Credits (1+4P)
This course explores aspects of fashion illustration, from drawing basic fashion figures to producing finished professional illustrations in color. This course provides the opportunity for students to integrate their fashion design development with computer-aided systems. The emphasis is on fashion innovation and concept design exploration enhanced by computer applications. May be repeated up to 3 credits. Prerequisites: ARTS 1145G and CTFM 1110

Learning Outcomes
1. To learn Adobe Illustrator and Adobe Photoshop as drawing and design tools for electronic design and rendering.
2. To understand and utilize the computer as a tool for fashion design.
3. To understand methods of design input, including scanning, digitizing and resizing.
4. To develop customer profiles
5. To Understand Concept Style

CTFM 2130. Concepts in Apparel Construction
3 Credits (1+4P)
Students are introduced to professional standard sewing techniques and apparel construction. The techniques learned are applied to produce finished garments. Restricted to: FCSE,CTFM majors. Restricted to Las Cruces campus only.

Learning Outcomes
1. Define sewing construction terminology, equipment and sewing machine parts.
2. Learn to select suitable patterns and fabrics for garments.
3. Learn to alter commercial patterns for different body types.
4. Identify fabric types, finishes, and labeling.
5. Perform standard operating procedures on sewing machines.
6. Perform clothing construction techniques for various garments.
7. Apply knowledge of industry sewing methods to recognition of garment workmanship.

CTFM 2990. Fashion Practicum
1-3 Credits (1-3)
Applied field experience in the related areas of apparel design, fashion merchandising, and textile science. May be repeated up to 3 credits. Restricted to: CTFM majors. Restricted to Las Cruces campus only.

Learning Outcomes
1. Gain hands-on knowledge of the fashion industry.
2. Demonstrate the ability to analyze the practices of management, as observed in the industry.
3. Demonstrate an attitude that is appropriate for a prospective manager in the industry.
4. Demonstrate the understanding of, and the ability to use research and problem solving methods to develop, analyze, and present a critical incident analysis.

CTFM 300. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. Restricted to Las Cruces campus only.
Prerequisite(s): CTFM 1110; CTFM 2120.
CTFM 365. Apparel Analysis
3 Credits (3)
An in-depth investigation of the development, production and comparison of wearing apparel. Focus on the structural, functional and decorative aspects of apparel. Emphasis on sourcing of companies and materials, costing of the product line, comparing design and manufacturing techniques that affect price, quality, and size of apparel. Restricted to: CTFM majors.
Prerequisite(s): CTFM 1110 and CTFM 2130.

CTFM 366. Historic Fashion
3 Credits (3)
The study of clothing styles from 3500 BC through the 20th century. Restricted to: CTFM majors.
Prerequisite(s): CTFM 2120.

CTFM 371. Textile Science
3 Credits (1+4P)
The study of fiber characteristics, fabric properties and the manufacturing processes that affect the selection, use, and care of textile goods. Restricted to: CTFM majors.
Prerequisite(s): CTFM 1110.

CTFM 372. Fashion Merchandising
3 Credits (3)
A study of the processes required to bring consumer goods to the marketplace.
Prerequisite(s): CTFM 1110 and CTFM 2130.

CTFM 373. Advanced Apparel Construction II
3 Credits (1+4P)
This course builds on Basics of Apparel Construction and explores the application of advanced sewing technology across a range of fashion products. Restricted to: CTFM majors.
Prerequisite(s): CTFM 2130.

CTFM 375. Fashion Buying
3 Credits (3)
The application of planning, purchasing and controlling inventories using industry data and analytics. Includes merchandising math with an emphasis on product selection and pricing.
Prerequisite(s): ACCT 2110, CTFM 1110, and CTFM 2130.

CTFM 377. Fashion Study Tour
1-3 Credits (1-3)
Study of international/domestic fashion, designers, manufacturers, merchandisers and/or retailers. May be repeated up to 6 credits. Consent of Instructor required.

CTFM 384. Clothing for Special Needs
3 Credits (3)
Selection, adaptation, and design of clothing that is functional and attractive for special needs populations such as for active sportswear, the handicapped, the elderly, and various specialty populations.
Prerequisite: consent of instructor.

CTFM 401. Professional Development
1 Credit (1)
Introduction to the field experience including resume writing, interviewing skills, understanding business ethics and etiquette. Also includes a discussion of career paths and advice from industry guest speakers. Restricted to: CTFM majors.
Prerequisite(s): CTFM 372 and CTFM 375.

CTFM 402. Field Experience
1-3 Credits (1-3)
Practical experience in fashion, clothing design, manufacturing, merchandising, or retailing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: CTFM majors.
Prerequisite(s): CTFM 401.

CTFM 403. Post-Field Experience
1 Credit (1)
A case based approach to analyzing internship experiences. Students will share their experiences and prepare case studies about specific business issues they encountered during CTFM 402. Restricted to: CTFM majors.
Prerequisite(s): CTFM 402.

CTFM 460. Cultural Perspectives in Dress
3 Credits (3)
Explores the social, psychological and cultural aspects of dress and appearance. Consent of Instructor required.

CTFM 473. Flat Pattern for Apparel Design
3 Credits (1+4P)
Applied design principles to flat patterns techniques including bodies, skirts, sleeves, neckline, and bodice-sleeve combinations. Projects will require three-dimensional approaches in apparel design. Restricted to: CTFM majors.
Prerequisite(s): CTFM 2120 and CTFM 373.

CTFM 474. Fashion Promotion
3 Credits (3)
A comprehensive examination of promotion in the merchandising environment of fashion related goods. Restricted to: CTFM majors.
Prerequisite(s): CTFM 372.

CTFM 476. Draping for Apparel Design
3 Credits (1+4P)
Development of garment shapes using draping techniques. Emphasis placed on torso development, contouring principles and design development on the form. This course exposes the student to the design process, from initial concept and muslin sample development to final execution of the finished garments. Restricted to: CTFM majors.
Prerequisite(s): CTFM 2120 and CTFM 373.

CTFM 477. Capstone in Fashion Merchandising
3 Credits (3)
Synthesizes previous coursework. Students apply multi-disciplinary principles to the analysis of fashion merchandising case studies and industry related challenges.
Prerequisite(s): CTFM 372, CTFM 375 and CTFM 402.

CTFM 492. Special Problems
1-4 Credits
Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 6 credits toward a degree.

CTFM 571. Textile Science
3 Credits (1+4P)
The study of fiber characteristics, fabric properties and the manufacturing processes that affect the selection, use and care of textile goods. Students will be required to complete additional assignments beyond what is required for CTFM 371.

CTFM 598. Special Research Programs
1-4 Credits
Individual investigations, either analytical or experimental. May be repeated for a maximum of 4 credits per semester and no more than 6 credits toward a degree.
Family and Child Studies Courses

FCST 1130. Interpersonal Skills in Intimate Relationships
3 Credits (3)
Developing social skills within friendships, dating relationships, marriage, parenting, and families.

Learning Outcomes
1. To understand several theories that explain why some people have healthy interpersonal relationships while others do not.
2. To gain insight about one’s self.
3. To learn and improve upon selected relationship skills that improve quality of life.
4. To learn skills that improve interpersonal relationships

FCST 2110. Infancy and Early Childhood in the Family
3 Credits (3)
Research and theory relevant to prenatal development and the physical, mental, and socio-emotional development of the child from birth to age five. Attitudes, knowledge, and skills needed for working with young children and their families. Restricted to Las Cruces campus only.

Learning Outcomes
1. Evaluate how genes and the environment interact to impact human development. Describe the major events during the three periods of prenatal development. Assess the effects of environmental influences on the developing fetus. Outline the stages of birth and medical interventions that may be used. Discuss the capacities of the newborn baby. Evaluate how individuals and couples change during the transition to parenthood. Analyze the physical, cognitive, and social-emotional development of the child from birth through age five. Formulate ways that parents and professionals can promote the development of the child from birth to age 5.

FCST 2135. Adolescent Development and the Family
3 Credits (3)
Research and theory relevant to the physical, mental, social, and emotional development of the children ages 12 to 18. Attitudes, knowledge, and skills related to working with adolescents in the family system. Observation in a variety of settings may be required. Restricted to Las Cruces campus only.

Learning Outcomes
1. Compare adolescents of today with adolescents of the past.
2. Describe the physical, cognitive, and psychosocial development of the adolescent in the family system and evaluate individual differences in development.
3. Compare and contrast ways in which culture impacts adolescent development.
4. Assess effective parenting strategies with adolescents.
5. Analyze the influence of family, peers, school, and work on adolescent development.

FCST 2140. Adult Development and Aging
3 Credits (3)
Research and theory related to the physical, mental, social, and emotional development of older adults. Attitudes, knowledge, and skills related to working with older adults in the family system, including normative, and nonnormative transitions. Restricted to Las Cruces campus only.

Learning Outcomes
1. Compare and contrast theories of adult development and aging and apply theories to adult behavior.
2. Distinguish the similarities and differences of physical, emotional, cognitive, and psychosocial aspects of adult development.
3. Describe multicultural factors that impact attitudes toward aging and coping with aging family members.
4. Evaluate ways in which special issues (including but limited to Alzheimer’s Disease, heart disease, end of life issues) impact aging.
5. Devise a conceptualization of one’s own perspective in dealing with aging and aging family members.

FCST 300. Special Topics
1-4 Credits
Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

FCST 301. Family Resource Management
3 Credits (3)
The dynamics of family relationships and changes influencing contemporary families. Interaction between the family and other social systems will be examined. Open to nonmajors.

FCST 380. Family Dynamics
3 Credits (3)
Theories, principles, and skills essential for parents and professionals in guiding children within the family system. Problem prevention techniques are stressed.

FCST 424. Field Experience: Issues and Ethics
3 Credits (3)
Supervised work experience in community agencies providing services to family systems. Discussion of professional issues and ethical dilemmas. A total of 6 credits must be taken. Restricted to: FCS majors. Students must be in junior standing to enroll.

Prerequisite: FCST 380 or equivalent, and an overall GPA of at least 2.5.

Learning Outcomes
1. Upon completion of this course students will be able to integrate learning into applied settings.

FCST 449V. Family Ethnicities and Subcultures
3 Credits (3)
Comparative study of American family subsystems with respect to selected social, economic, and cultural backgrounds. Interaction of these subsystems in American society. Differentiated assignments for graduate students.
FCST 456. Research Methods
3 Credits (3)
Introduction to research design and methodology in education and behavioral sciences. Overview of common research designs and data collection strategies. Prepares students to critique published research and understand basic skills including hypothesis development and conducting a literature search. Same as AXED 456.

FCST 492. Special Problems
1-4 Credits
Individual research in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 6 credits.

FCST 510. Infancy and Early Childhood in the Family
3 Credits (3)
Research and theory relevant to prenatal development and the physical, mental, and socio-emotional development of the child from birth to age 5. Attitudes, knowledge, and skills needed for working with young children and their families. May be repeated up to 3 credits.

FCST 511. Middle Childhood Development in the Family
3 Credits (3)
Research and theory relevant to the physical, mental, and socio-emotional development of children from ages five to twelve. Attitudes, knowledge, and skills needed for working with school-age children and their families. May be repeated up to 3 credits.

FCST 524. Supervised Practicum
1-9 Credits
Supervised experience in organizations providing services to families and children. Course subtitled in the Schedule of Classes. May be repeated for a maximum of 9 credits. Graded S/U.
Prerequisite: consent of instructor.

FCST 525. Supervised Clinical Practice
1-9 Credits (2-18P)
Supervised clinical experience in Marriage and Family Therapy. Includes reviews of audio, video, and/or live sessions and case presentations. Maximum of 9 credits toward a degree. May be repeated up to 20 credits.

FCST 548. Adult Development and Aging
3 Credits (3)
Advanced study in research and theory related to the physical, mental, social, and emotional development of older adults. Attitudes, knowledge, and skills related to working with older adults in the family system, including normative and non-normative role transitions.

FCST 562. The Business and Practice of Marriage and Family Therapy
1 Credit (1)
This seminar course will provide students with an overview of the business and practice of Marriage and Family Therapy to the end that they will understand how to develop and maintain a private practice in the field of MFT. Restricted to: FCS (MFT) majors. Graded: S/U Grading (S/U, Audit).

FCST 572. Family Dysfunction and Diagnosis
3 Credits (3)
A study of the development of abnormal behavior patterns and characteristics to include the major mental and personality disorders and how these can influence and impact family systems. Emphasis is on the symptomology and/or life circumstances and events described in the various diagnostic categories.
Prerequisite(s): Students must be enrolled in a clinical program (i.e MFT, CEP, MSW).

FCST 582. Theories of Marriage and Family Therapy
3 Credits (3)
A balanced study of major theories, research, applications and principles of marriage and family therapy. This course will examine major therapy models and the theories they are derived from as well as the effectiveness of specific therapy models for specific mental health disorders through research.

FCST 583. Parenting and Child Guidance
3 Credits (3)
Theories, principles, and skills essential for parents and professionals in guiding children within the family system. Problem prevention techniques are stressed.

FCST 584. Family Law and Ethics
3 Credits (3)
Study of selected aspects of federal and state laws and ethical issues as they relate to the family system.

FCST 585. The Family System
3 Credits (3)
Contemporary family interaction: concepts, composition, resource and environment.

FCST 586. Sexuality and Family Dynamics
3 Credits (3)
Psychosocial and physiological aspects of human sexuality from a life span and family systems perspective.

FCST 587. Contemporary Marriage and Family Issues
3 Credits (3)
Investigation of one of the following topics each semester: dual career marriages, nontraditional relationships, aged in marriage.

FCST 589. Family Crises and Rehabilitation
3 Credits (3)
Examination of the major crises experienced by families. Emphasis on family system functioning rather than individual functioning. Preventative measures, positive coping strategies, and therapeutic intervention approaches examined.

FCST 590. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree.

FCST 592. Strategies in Family Therapy
3 Credits (3)
Effective intervention strategies in family therapy practice. Live and taped role plays of interventions for various family problems required. Constructive approaches for working with family systems and third-party payers.

FCST 598. Special Research Programs
1-4 Credits
Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

FCST 599. Master's Thesis
15 Credits
Thesis
Family and Consumer Science Courses

FCSC 2250. Overview of Family and Consumer Sciences Teaching
3 Credits (3)
Overview of planning and teaching skills. Supervised experiences in observing and directing the learning of secondary family and consumer sciences students. Philosophy and history of the profession.

Learning Outcomes
1. Explain the foci of FCS—past, present and future.
2. Begin to develop a professional role in FCS.
3. Formulate a personal philosophy of FCS, and of teaching.
4. Explain the teaching process.
5. Give examples of roles, responsibilities and qualities of effective and ethical teachers.
6. Assess the characteristics, backgrounds, and needs of learner audiences.
7. Explain various learning theories/principles.
8. Illustrate how various input factors influence teaching decisions.
9. Plan a researched based student-centered lesson with a learning activity in a FCS content area.
10. 1 Give examples of ways to evaluate learner growth.
11. 1 Present a FCS content-based lesson effectively to learners using PowerPoint presentation software and a selected teaching method.
12. 1 Evaluate one's own teaching and the teaching of others.
13. 1 Exhibit increased confidence in one's abilities as a teacher/educator.
14. 1 Exhibit excitement about assuming the teacher/educator role.

FCSC 2330. Housing and Interior Design
3 Credits (3)
Investigation of types of housing and factors impacting housing decisions for families. Selection, planning, and arrangement of interior components of homes to meet the needs of the family. Restricted to Las Cruces campus only.

Learning Outcomes
1. Differentiate between different architectural designs (i.e., Cape Cod, contemporary, craftsman, ranch, southern colonial, Spanish, Victorian, pueblo, New Mexican territorial, and territorial revival) and be able to identify historical, cultural, demographic, geographical, and environmental influences on style and aesthetics.
2. Analyze the fundamentals of housing for all families and cultures and understand the role housing plays in the ecological model of human ecology.
3. Define elements of design as related to housing and interiors (i.e., color, form, line, space texture).
4. Define principles of design as related to housing and interiors (i.e., balance emphasis, harmony, proportion, unity).
5. Compare and contrast the different periods of interior design from the 20th century to the present.
6. Analyze the influence of historical and cultural factors in the development of current interior trends.
7. Select and arrange interiors that are functional and aesthetically pleasing to designated interior design situations.
8. Identify, describe and make application of textiles as related to various furniture and interior design styles.
9. Design a three-dimensional tiny house or an interior space, using all concepts learned.

FCSC 345. Management Concepts in Family and Consumer Sciences Teaching
3 Credits (3)
Incorporation and application of management concepts in family and consumer sciences subject matter. Practical experience teaching management and ways to use management skills to plan, implement, and evaluate the teaching-learning transaction.

FCSC 348. Teaching in Informal Family and Consumer Sciences Settings
3 Credits (3)
Learning principles and theories with application in informal family and consumer sciences education situations. Includes supervised experience in use of teaching strategies.

Prerequisite: overall GPA of at least 2.5 or consent of instructor.

FCSC 400. Research Methods in Family and Consumer Sciences
3 Credits (3)
Introduction to research design and methodology in Family and Consumer Sciences. Overview of common research designs and data collection strategies. Prepares students to critique published research and perform basic skills including hypotheses development and conducting a literature search.

FCSC 444. Career and Technical Education Programs
3 Credits (3)
History and development of career and technical programs. Ancillary functions of family and consumer sciences teachers, including student evaluation and leadership development for students. Experiences in extension programs and teaching. Ethical issues and concerns of educators are introduced. Lifelong leadership development and evaluation tools for educators are explored. May be repeated up to 3 credits.

FCSC 446. Teaching Methods I for Family and Consumer Sciences
3 Credits (3)
Methods and strategies for teaching Family & Consumer Sciences content in middle and secondary schools. Organization and development of curriculum. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): FCSC 2250 and FCSC 345 and an overall GPA of 2.75, admitted to FCSE program; completion of NES Essential Basic Skills Tests I, II, & III.

Corequisite(s): FCSC 445.

FCSC 447. Teaching Methods II for Family and Consumer Sciences
3 Credits (3)
Planning, preparation, and strategies for teaching family and consumer sciences in middle and secondary schools. Preparation for employment. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): FCSC 446; overall GPA of 2.75, admitted to program.

FCSC 448. Supervised Teaching in Family and Consumer Sciences
12 Credits (12)
Seventy (70) days of full-time supervised teaching in selected middle or secondary schools. May be repeated up to 12 credits. Consent of Instructor required. Restricted to: FCSE majors.

Prerequisite(s): FCSC 446, an overall GPA of 2.75, and admitted to FCSE Program.

Corequisite(s): FCSC 447.

FCSC 492. Special Problems
1-4 Credits
Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and 6 credits toward degree.
FCSC 500. Research Methods
3 Credits (3)
This course covers the critical evaluation of research literature, development of research proposals and principles of program evaluation. Students will be introduced to the application of qualitative or quantitative methods. Students will be expected to develop research questions and test hypotheses using statistical analysis and a variety of methodologies.

FCSC 545. Graduate Study in Vocational Programs for Youth and Adults
3 Credits (3)
History and development of career and technical programs. Ancillary functions of family and consumer sciences teachers, including student evaluation and leadership development for students. Experiences in extension programs and teaching. Ethical issues and concerns of educators are introduced. Lifelong leadership development and evaluation tools for educators are explored. May be repeated up to 3 credits.

FCSC 546. Graduate Study in Teaching Methods I
3 Credits (3)
Objectives, content, and organization of family and consumer sciences in high schools; materials and methods of teaching. Additional assignments beyond FCSC 446 required for students registering in FCSC 546.

FCSC 547. Graduate Study in Teaching Methods II
3 Credits (3)
Planning, preparation, and strategies for teaching family and consumer sciences in the secondary schools. Additional assignments beyond FCSC 447 required for students registering in FCSC 547.

FCSC 548. Graduate Study in Supervised Teaching in Family and Consumer Sciences
12 Credits (70P)
Seventy of full-time, supervised teaching in selected schools. Additional assignments beyond FCSC 448 required for students registering in FCSC 548. Consent of Instructor required. 
Prerequisite(s): FCSC 446 or FCSC 546, and consent of instructor.

FCSC 590. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits toward a degree, 4 credits per semester.

FCSC 598. Special Research Programs
1-4 Credits
Individual investigations, either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

FCSC 599. Master’s Thesis
1-15 Credits
May be repeated for unlimited credit, maximum of 6 credits toward a degree.

Food Science and Technology Courses

FSTE 1120. ACES in the Hole Foods I
4 Credits (4)
Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products Restricted to Las Cruces campus only. Students enrolled in this class must possess A Food Handler Card.

Learning Outcomes
1. Apply basic scientific principles, procedures, techniques and standards in the production of food products.
2. Apply principles of sanitation and safety to the production of food products.
3. Assist in the development and evaluation of new and/or existing food products made for human consumption.
4. Prepare a resume and portfolio

FSTE 2110G. Food Science I
4 Credits (3+2P)
The scientific study of the principles involved in the preparation and evaluation of foods. May be repeated up to 4 credits.

Learning Outcomes
1. Explain basic scientific principles involved in the preparation of high quality food products.
2. Utilize scientific inquiry in the experimental investigation of factors influencing the chemical, physical and sensory properties of food products.
3. Apply basic scientific principles, procedures, techniques and standards in the preparation of all types of high quality food products.
4. Use basic methods of quantitative analysis to critically evaluate quality characteristics of food.
5. Use sensory science techniques and terminology to critically evaluate acceptability and quality characteristics of food.
6. Describe high quality characteristics of a variety of food products using appropriate terminology.
7. Apply principles of sanitation and safety to food preparation.

FSTE 2120. ACES in the Hole Foods II
4 Credits (8P)
Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. Student must also have a Food Handler Card to enroll in this course. 
Prerequisite(s): FSTE 1120.

Learning Outcomes
1. Apply basic scientific principles, procedures, techniques and standards in the production of food products.
2. Apply principles of sanitation and safety to the production of food products.
3. Assist in the development and evaluation of new and/or existing food products made for human consumption.
4. Prepare a resume and portfolio
FSTE 2130G. Survey of Food and Agricultural Issues  
3 Credits (3)  
Survey of food and agricultural issues, including: geography of food production and consumption; human-agricultural-natural resource relations; agriculture in the United States and abroad; modern agribusiness; food safety; food, agriculture, and natural resources policy; ethical questions; role and impact of technology. Crosslisted with AEEC 2130G.  
**Learning Outcomes**  
1. Understand of global agriculture including production techniques used in various geographical regions, consumption trends, and political and social constraints.  
2. Synthesis information about agricultural issues and make informed arguments  
3. Articulately discuss modern issues in agriculture  
4. Write coherent arguments relative to personal beliefs regarding agricultural issues  

FSTE 2996. Special Topics  
1-4 Credits  
Specific topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.  
**Learning Outcomes**  
1. Varies  

FSTE 320. Food Microbiology  
4 Credits (3+2P)  
Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. May be repeated up to 4 credits. Prerequisite(s): (BIOL 2610G and BIOL 2610L), or (BIOL 2110G and BIOL 2110L)  

FSTE 325. Food Analysis  
3 Credits (2+2P)  
Basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. May be repeated up to 3 credits.  
Prerequisite(s): CHEM 1215G or consent of instructor.  

FSTE 328. Introduction to Food Engineering  
3 Credits (2+2P)  
Basic engineering principles including mass and energy balances, fluid flow, heat transfer and chemical kinetics and their application to food processing unit operations. Video and laboratory participation are used to enhance course content and relevance. May be repeated up to 3 credits.  
Prerequisite(s): MATH 1430G or consent of instructor.  

FSTE 331. Food Preservation  
3 Credits (2+2P)  
Processes used in home and commercial food preservation, including canning, freeze-drying, drying, and irradiation. May be repeated up to 3 credits.  
Prerequisite(s): FSTE 2110G.  

FSTE 375. ACES in the Hole Foods III  
4 Credits (2+8P)  
Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. May be repeated up to 8 credits. Restricted to: FSTE majors.  
Prerequisite(s): FSTE 2120 and Have a Food Handler Card.  

FSTE 421. Food Chemistry  
3 Credits (3)  
Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing, and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods.  
**Prerequisites:** CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of instructor.  

FSTE 423. Food Processing Technologies  
4 Credits (3+2P)  
Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting.  
Prerequisite(s): FSTE 328.  

FSTE 425. Sensory Evaluation of Foods  
3 Credits (2+2P)  
Principles and procedures involved in the sensory evaluation of foods. Physiological, psychological and environmental factors affecting the evaluation of sensory properties. Analysis and interpretation of sensory data.  
Prerequisite(s): FSTE 2110G and A ST 311 or MATH 1350G.  

FSTE 429. Product Development  
3 Credits (1+4P)  
Application of chemical, physical, nutritional and psychological principles and experimental methods to the development and evaluation of a food product for a specified food product development competition.  
Prerequisite(s): FSTE 320 and FSTE 425.  

FSTE 430. Designing and Brewing Great Beers of the World  
3 Credits (1+4P)  
The science and technology of brewing unit operations and the ingredients used in beer brewing. That knowledge is then applied to designing and brewing classic world beer styles. Styles investigated change every semester but typically include India Pale Ale, Pale Ale, Stout, Porter, Hefeweisen, Scottish Ale, and Black IPA. Comprehensive evaluation of the product relative to style guidelines completes the design-brew-evaluate cycle. Students must be at least 21 years of age on the first day of class. May be repeated up to 3 credits.  

FSTE 450. Special Topics  
1-4 Credits  
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits towards a degree. Consent of instructor required.  

FSTE 475. ACES in the Hole Foods IV  
1-4 Credits (2-8P)  
Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. May be repeated up to 8 credits. Restricted to: FSTE majors.  
Prerequisite(s): FSTE 375 Have a Food Handler Card.
FSTE 480. Food Safety
3 Credits (3)
Provide students’ knowledge on good manufacturing practices and
prerequisite programs, conduct hazard analysis and determine preventive
controls, define process, food allergen, sanitation and supply-chain
preventive controls and discuss verification validation, recall and
recordkeeping requirements with training and educational opportunities
related to current best practices and guidance, and future regulatory
requirements by establishing the Produce Safety Alliance. Students
participate in a Mock Audit. Participants will receive an official FSPCA
Preventive Controls Qualified Individual certificate issues by AFDO after
attending this training program.
Prerequisite(s): FSTE 320 or BIOL 311, or consent of instructor.

FSTE 492. Special Problems
1-4 Credits
Individual research study in a selected subject of Family and Consumer
Sciences. Maximum of 4 credits per semester and a grand total of 8
credits towards a degree. Consent of instructor required.

FSTE 500. Data Analysis for Food Scientists
3 Credits (3)
An introduction to data analysis of food scientists. Modern statistical
techniques used to analyze typical data collected by food scientists and
researchers will be covered. Consent of Instructor required.

FSTE 520. Graduate Study in Food Microbiology
3 Credits (2+3P)
Detrimental and beneficial microbial aspects of food products. Methods of quantification and identification of microorganisms
associated with food spoilage and preservation. Additional work required at the graduate level.
Prerequisites: BIOL 2610G/2610L, or BIOL 2110G/2110L, or consent of
instructor.

FSTE 521. Graduate Study in Food Chemistry
3 Credits (3)
Comprehensive study of the chemical and physiochemical properties
of food constituents. Chemical changes involved in the production,
processing and storage of food products and basic techniques used to
evaluate chemical and physiochemical properties of foods. Additional
work required at the graduate level.
Prerequisites: CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of
instructor.

FSTE 522. Food Processing Technologies
4 Credits (3+2P)
Common food processing unit operations such as raw material
preparation, separation, concentration, fermentation, pasteurization,
sterilization, extrusion, dehydration, baking, frying, chilling, freezing,
controlled atmosphere storage, water, waste and energy management,
packaging, materials handling and storage and process control.
Application of principles to processing food in a laboratory setting. Additional work beyond that for FSTE 423 required at the graduate level.
Prerequisite(s): FSTE 528.

FSTE 524. Sensory Evaluation of Foods
3 Credits (2+3P)
Principles and procedures involved in the sensory evaluation of foods.
Physiological, psychological and environmental factors affecting the
evaluation of sensory properties. Analysis and interpretation of sensory
data.
Prerequisite(s): FSTE 2110G and A ST 311 or MATH 1350G.

FSTE 525. Graduate Study in Food Analysis
3 Credits (2+3P)
Covers basic chemical and physical techniques used in establishing
nutritional properties and overall acceptance of food products. Additional
work required at the graduate level.
Prerequisite(s): CHEM 1215 G or consent of instructor.

FSTE 531. Food Preservation
3 Credits (3)
Processes used in home and commercial food preservation, including
canning, freezing, drying, and irradiation. Same as FSTE 331 with
additional work required at the graduate level.

FSTE 532. Designing and Brewing Great Beers of the World
3 Credits (2+2P)
The science and technology of brewing unit operations and the
ingredients used in beer brewing. That knowledge is then applied to
designing and brewing classic world beer styles. Styles investigated
change every semester but typically include India Pale Ale, Pale Ale,
Stout, Porter, Hefeweisen, Scottish Ale, and Black IPA. Comprehensive
evaluation of the product relative to style guidelines completes the
design-brew-evaluate cycle. Students must be at least 21 years of age on
the first day of class.

FSTE 560. Rumen Microbiology (so)
3 Credits (3)
Same as ANSC 560.

FSTE 575. ACES in the Hole Foods
1-4 Credits (2-8P)
Food production activities related to operation of ACES in the Hole
Foods, a student-run food company that will give FSTE majors hands-on
experience in all aspects of developing, producing and marketing food
products May be repeated up to 8 credits.
Prerequisite(s): Students must possess a food handler card.

FSTE 580. Food Safety
3 Credits (3)
Individual investigations either analytical or experimental. Maximum
of 4 credits per semester and no more than 6 credits towards a degree.
Consent of instructor required.

FSTE 598. Special Research Programs
1-4 Credits
Special research for doctoral students May be repeated up to 6 credits.
Consent of Instructor required.

FSTE 600. Special Research Program
1-6 Credits (1-6)
Special research for doctoral students May be repeated up to 6 credits.
Consent of Instructor required.

FSTE 601. Cooperative Extension Service Field Experience
1-3 Credits (1-3)
This course will provide students with knowledge and experience in
community outreach through the cooperative extension service. This
course is required for students pursuing a Ph.D. in FSHN. Students will
work collaboratively with extension faculty on applied projects. May be
repeated up to 3 credits. Consent of Instructor required. Restricted to:
FSHN majors.

FSTE 605. Doctoral Seminar
1 Credit (1)
Current topics and research in Food Science and Human Nutrition.
Course will include experts from the field as guest speakers. Students will
have the opportunity to present their doctoral proposals and/or research
findings.
FSTE 620. Advanced Studies in Food Microbiology
3 Credits (3)
Lectures, directed study, discussion and laboratory work in microflora of foods.
Prerequisite(s): FSTE 520 or consent of instructor.

FSTE 621. Advanced Studies in Food Chemistry
3 Credits (3)
Lectures, seminars and/or laboratory work dealing with chemical and physiochemical properties of food constituents. Chemical changes involved in the production and storage of food products.
Prerequisite(s): FSTE 521 or consent of instructor.

FSTE 625. Advanced Studies in Food Analysis
3 Credits (3)
Lectures, seminars, and/or laboratory work dealing with problem solving in food analysis. Consent of Instructor required.
Prerequisite(s): Consent of Instructor.

FSTE 626. Advanced Studies in Sensory Evaluation of Foods
3 Credits (3)
Lectures, direct study, and discussion of such topics as sensory evaluation of foods. Analysis and interpretation of sensory data.
Prerequisite(s): FSTE 525 or consent of instructor.

FSTE 652. Functional Foods for Health
3 Credits (3)
Integration of food science and human nutrition to analyze chemical properties and constituents that make a food product functional. Investigation of the physiological effects of functional foods and their relation to health. Overview of functional food development and production.

FSTE 698. Doctoral Research
1-6 Credits (1-6)
Research May be repeated up to 6 credits. Consent of Instructor required.

FSTE 700. Doctoral Dissertation
1-12 Credits (1-12)
Dissertation May be repeated up to 18 credits. Consent of Instructor required.
Prerequisite(s): Passed the qualifying exam and comprehensive exam.

Nutrition Courses

NUTR 2110. Human Nutrition
3 Credits (3)
This course provides an overview of nutrients, including requirements, digestion, absorption, transport, function in the body and food sources. Dietary guidelines intended to promote long-term health are stressed.
Learning Outcomes
1. Evaluate sources of nutrition information for reliability
2. Identify elements of a nutritious diet
3. Describe the digestion, transport, and absorption of nutrients
4. Describe the importance of nutrition in weight control and health
5. Identify nutritional needs as they relate to the life cycle and performance
6. Describe behavior modification techniques that promote good health
7. Evaluate popular nutrition trends for scientific accuracy and effectiveness
8. Develop skills in the planning and assessing of healthy meal plans
9. Describe the role of food choices in the development of chronic disease
10. Describe the role of food in the promotion of a healthy lifestyle

NUTR 2120. Seminar I - Becoming a Nutrition Professional
1 Credit (1)
This course will introduce students to the field experience, careers, and professions in nutrition. This course is required for students pursuing a Didactic Program in Dietetics verification statement. May be repeated up to 1 credits. Consent of Instructor required. Restricted to: HNDS majors.
Learning Outcomes
1. Describe career options within the fields of Nutrition Dietetics.
2. Outline the HNDS field experience process.
3. Explain the educational pathways in HNDS.
4. List requirements for admission into the HNDS Dietetics pathway.
5. Begin an HNDS student portfolio.
6. Discuss the importance of personal responsibility accountability

NUTR 3110. Nutrition Throughout the Lifecycle
3 Credits (3)
Relationship of the stages of the human life cycle to changes in nutrient need. Consent of Instructor required.
Prerequisite(s): NUTR 2110.
Learning Outcomes
1. Understand the value of collaborative work in nutrition care of individuals. Compare and contrast the physiological, behavioral, and psychosocial factors associated with each life stage that affect nutritional status. For each life cycle stage, create a nutritionally adequate menu that meets key nutrient needs. Culturally appropriate evidence-based interventions to address common nutrition-related conditions experienced in each lifecycle stage. Utilize the Nutrition Care Process to complete a nutrition assessment.

NUTR 3120. Food for Health
4 Credits (4)
This course is designed to provide students the opportunity to learn about the intersection of nutrition and health in terms of food and diet. Students will be introduced to basic concepts within nutrition education, nutrition communication, nutrition and health and food culture. This course is required for students pursuing a Didactic Program in Dietetics verification statement. May be repeated up to 4 credits.
Prerequisite(s)/Corequisite(s): NUTR 3110. Prerequisite(s): NUTR 2110, FSTE 2110G, HRTM 2120.
Learning Outcomes
2. Modify traditional recipes to improve nutritional value and/or meet standards of a therapeutic diet.
3. Explain cultural and religious considerations when planning menus for diverse groups.
4. Critically evaluate and modify recipes to meet the needs of various ethnic, religious, and special populations.
5. Develop and conduct a hands-on nutrition education for a target group to teach healthy eating skills.
**NUTR 3710. Food Systems & Policy in Dietetics**

3 Credits (3)

This course introduces students to food and nutrition policy issues, institutions, and stakeholders and their impacts on public health, sustainability, and the practice of dietetics in the US. The course will examine policy development and the roles of federal agencies, private firms, non-governmental organizations, and the media in food and nutrition policy. It will also examine international perspectives on food and nutrition policies and programs used to support global nutrition, health promotion, and wellness.

**Prerequisite(s):** Junior standing, NUTR 3110, NUTR 3120.

**Learning Outcomes**

1. Discuss the economic, political, social, and cultural factors that influence US food and nutrition policies and impact national food systems and population health.
2. Identify the psychological, social, cultural, and environmental factors that influence food choices, eating behaviors, and nutrition-related practices.
3. Describe the processes and major players involved in US food and nutrition policy development, implementation, monitoring/evaluation, and regulation.
4. Recognize the influence of food and nutrition policy on the practice of dietetics.

**NUTR 3750. Applied Nutrition Research**

3 Credits (3)

This course will introduce students to various types of nutrition research and equip them to locate and critique nutrition and dietetics research articles. Research analysis skills will then be applied to a review of the current literature on a nutrition topic and applied to dietetics practice. May be repeated up to 3 credits.

**Prerequisite(s):** MATH 1350G (or A ST 311); NUTR 2110, NUTR 3110, and NUTR 3120.

**Learning Outcomes**

1. Recall the various research methods, study designs, and statistical analyses used in nutrition research.
2. Compare and contrast research methods and analyses in nutrition research.
3. Analyze nutrition research for appropriateness of the methods and analyses.
4. Evaluate nutrition research to form sound, ethical conclusions and practice recommendations.

**NUTR 3996. Special Topics**

1-4 Credits (1-4)

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

**Prerequisite(s):** Junior or Senior standing, consent of instructor.

**Learning Outcomes**

1. Develop foundational knowledge in a specialized area of dietetics practice.

**NUTR 4110. Advanced Nutrition**

3 Credits (3)

Application of biochemistry and physiology to nutrition. May be repeated up to 3 credits. Prerequisite(s): BIOL 2221, (OR A ST 311); NUTR 3110

**Learning Outcomes**

1. Describe the processes of digestion and absorption within the human body. Compare and contrast the structure and function of key nutrients. Describe the metabolism of key nutrients under various conditions. Apply concepts of energy and nutrient metabolism to common medical conditions and other relevant situations such as exercising or fasting.

**NUTR 4210. Community Nutrition**

3 Credits (3)

Overview of the practice of community nutrition. Includes program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Same as NUTR 5210.

**Prerequisite: NUTR 3110, NUTR 3710.**

**Learning Outcomes**

1. Summarize the components of current national and local community nutrition programs. Explain how national or state level policy influences a community nutrition issue. Write a needs assessment for a community nutrition issue using reliable sources of community nutrition information and data and relevant research. Develop goals and objectives of a nutrition program that address a community nutrition issue. Develop a culturally appropriate nutrition education lesson plan that addresses a specific nutrition program objective.

**NUTR 4220. Food Service Organization and Management**

3 Credits (3)

Personnel, financial and general management in institutional and commercial food service operations.

**Prerequisite:** HRTM 2120.

**Learning Outcomes**

1. Evaluate food products and menu plans through the application of food service management theories and principles. Describe the process of and ethical considerations surrounding purchasing, receiving, storing and controlling inventory of a given food item. Evaluate food system, food safety practices, and scenarios. Evaluate a nutrition and foodservice budget and interpret financial data.

**NUTR 4230. Medical Nutrition Therapy I**

3 Credits (3)

Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics.

**Prerequisite:** NUTR 4110, BCHE 341.

**Corequisite:** NUTR 4230; NUTR 4233.

**Learning Outcomes**

1. Examine the role of medical nutritional therapy in disease processes. Apply nutritional assessment techniques utilizing the Nutrition Care Process. Compose nutrition care plans and utilize various styles of medical charting. Describe the interdisciplinary nature of working with a health care team in the delivery of medical nutritional therapy.
NUTR 4230L. Medical Nutrition Therapy I Lab
1 Credit (1P)
Supplements NUTR 4230. Students will perform nutrition assessments, nutrition focused physical exams, apply medical nutrition therapy-based interventions and practice patient discharge education for specific disease states. Elements of pathology and biochemistry of nutrition-related conditions are integrated into course topics. Restricted to: HNDS majors.
Corequisite(s): HNDS 4230.
Learning Outcomes
1. Evaluate nutrition counseling strategies tools in promoting behavior change and self-management. Apply behavior change theories and models to nutrition counseling sessions. Develop nutrition care plans for nutrition counseling clients. Analyze professionalism and ethics within nutrition counseling and education. Develop and present a nutrition education lesson based on current nutrition research.

NUTR 4233. Nutrition Counseling and Education
3 Credits (3)
This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education.
Prerequisite: NUTR 3110; FCSC 348.
Learning Outcomes
1. Evaluate nutrition counseling strategies tools in promoting behavior change and self-management. Apply behavior change theories and models to nutrition counseling sessions. Develop nutrition care plans for nutrition counseling clients. Analyze professionalism and ethics within nutrition counseling and education. Develop and present a nutrition education lesson based on current nutrition research.

NUTR 4235. Entering the Field of Dietetics
1 Credit (1)
Students will develop professional materials that will be used in their future careers including a personal statement, resume, and interview dialogues. Students will become familiar with career options in the field of dietetics and learn to navigate the processes of becoming a registered dietitian or dietetic technician, registered. Restricted to: HNDS majors. Students must be a Senior to enroll.
Prerequisite/Corequisite: NUTR 4210.
Learning Outcomes
1. Students will develop professional materials that will be used in their future careers including a personal statement, resume, and interview dialogues. Students will become familiar with career options in the field of dietetics and learn to navigate the processes of becoming a registered dietitian or dietetic technician, registered

NUTR 4240. Medical Nutrition Therapy II
3 Credits (3)
Continuation of NUTR 4230.
Prerequisite: NUTR 4230.
Corequisite: NUTR 4240L.
Learning Outcomes

NUTR 4240L. Medical Nutrition Therapy II Laboratory
1 Credit (1P)
Supplements NUTR 4240. Students will apply medical nutrition therapy to specific disease states with special emphasis on writing nutrition support orders and learning to utilize nutrition support equipment. Students will learn and apply advanced nutritional therapies and patient management strategies. Restricted to: HNDS majors.
Corequisite(s): HNDS 4240.
Learning Outcomes
1. Calculate nutrition support recommendations and document orders in the patient’s medical chart.
2. Demonstrate safe use of nutritional support equipment.
3. Master use of the Nutrition Care Process in case-based and simulated patient scenarios to conduct nutrition assessments and implement evidence-based interventions.
4. Critically evaluate lab values and client anthropometric data.
5. Select therapeutic diets for the treatment of medical conditions and their symptoms.

NUTR 4550. Billing and Coding for Dietetics
1 Credit (1)
This course provides students with an overview of billing and coding practices for medical nutrition therapy that ensure proper reimbursement for services. Students will learn nutrition related billing codes, apply nutrition care process terminology to documentation, and discover how policy affects current and future coverage of nutrition services.
Prerequisite(s)/Corequisite(s): NUTR 4240. Students must be in Senior standing to enroll in this course, NUTR 4230.
Learning Outcomes
1. Explain the use of Medical Nutrition Therapy CPT codes.
2. Properly document nutrition services in the medical record for full reimbursement of services.
3. Describe different Health Care Delivery Systems and how they impact nutrition services.
4. Explain Medicare, Medicaid, and private payer coverage for Medical Nutrition Therapy.

NUTR 4560. Field Experience- Clinical Dietetics
1-8 Credits (1-8)
Experience in various areas of clinical nutrition facilities with emphasis on nutrition care of patients. Practical experience with supervision by resident faculty as well as supervisor at work site. Performance at work site graded in accordance with university standards. One credit is earned for 40 hours of work. A total of 40 hours is required. May be repeated up to 8 credits. Consent of Instructor required.
Prerequisite(s): Senior standing, NUTR 4230, NUTR 4230L, consent of instructor.
Learning Outcomes
1. Apply dietetics knowledge to practice in various clinical settings.
2. Develop a field experience portfolio highlighting the development of clinical nutrition knowledge and skills.
3. Compare and contrast the responsibilities of Registered Dietitians in various clinical practice settings.
NUTR 4565. Field Experience Community Nutrition
1-8 Credits (1-8)
Experience working with nutritional problems of individual families of all socioeconomic and age levels and with agencies concerned with community nutrition. Practical experience with supervision by resident faculty as well as supervisor at the work site. Performance at work site graded in accordance with university standards. May be repeated up to 8 credits. Consent of Instructor required.
Prerequisite(s): Senior standing, NUTR 4210, consent of instructor.
Learning Outcomes
1. Apply dietetics knowledge to practice in various community settings.
2. Develop a field experience portfolio highlighting the development of community nutrition knowledge and skills.
3. Compare and contrast the responsibilities of Registered Dietitians in various community practice organizations.

NUTR 4991. Special Problems
1-4 Credits (1-4)
Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 8 credits. May be repeated up to 8 credits. Consent of Instructor required.
Prerequisite(s): Junior or Senior standing.
Learning Outcomes
1. Develop specialized knowledge and competencies in a selected nutrition and dietetics subject area.

NUTR 5110. Graduate Studies in Advanced Nutrition
3 Credits (3)
Covers biochemistry and physiology applied to nutrition. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4110. Crosslisted with: NUTR 4110.
Prerequisite(s)/Corequisite(s): Graduate student, NUTR 3110, NUTR 3710, NUTR 3750, or consent of the instructor.
Learning Outcomes
1. Describe the processes of digestion and absorption within the human body.
2. Compare and contrast the structure and function of key nutrients.
3. Describe the metabolism of key nutrients under various conditions.
4. Apply concepts of energy and nutrient metabolism to common medical conditions and other relevant situations such as exercise or fasting.

NUTR 5150. Orientation to Dietetic Internship
3 Credits (3)
Dietetic interns prepare for supervised practice rotations. Topics include professionalism, Code of Ethics, and dietetic internship portfolios. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. Assembly of dietetic intern portfolio that will be kept throughout dietetic internship.
2. Readiness to begin supervised practice rotations.
3. Understanding of steps and processes to successfully complete requirements of dietetic internship and Masters of Science in Family Consumer Sciences.
4. Upon completion of the course, students will be able to understand the importance of evidence-based information, research ethics, the Code of Ethics of the Profession of Dietetics, and the basic structure of an IRB proposal.

NUTR 5210. Graduate Study in Community Nutrition
3 Credits (3)
Overview on the practice of community nutrition to include program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4110. May be repeated up to 3 credits. Crosslisted with: NUTR 4210.
Prerequisite(s): Graduate student, NUTR 3110, NUTR 3710, NUTR 3750, or consent of the instructor.
Learning Outcomes
1. Summarize the components of current national and local community nutrition programs.
2. Explain how national or state-level policy influences a community nutrition issue.
3. Write a needs assessment for a community nutrition issue using reliable sources of community nutrition information and data, and relevant research.
4. Develop goals and objectives of a nutrition program that address a community nutrition issue.
5. Develop a culturally appropriate nutrition education lesson plan that addresses a specific nutrition program objective.
NUTR 5220. Graduate Studies in Food Service Organization and Management
3 Credits (3)
Personnel, financial and general management in institutional and commercial food service operations. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4220. May be repeated up to 3 credits.
Prerequisite(s): Graduate Students; HRTM 2120, NUTR 3120, or consent of instructor.

Learning Outcomes
1. Evaluate food products and menu plans through the application of food service management theories and principles.
2. Describe the process of and ethical considerations surrounding purchasing, receiving, storing, and controlling inventory of a given food item.
3. Evaluate food system, food safety practices, and management practices of a specific food service establishment.
4. Apply management theories and principles to quality assurance and human resource case scenarios.
5. Evaluate a nutrition and food service budget and interpret financial data.

NUTR 5230. Graduate Studies in Medical Nutrition I
3 Credits (3)
Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics. Additional assignments beyond NUTR 4230 required. May be repeated up to 3 credits. Crosslisted with: NUTR 4230.
Prerequisite(s): Graduate student, NUTR 3110, NUTR 4110, BIOL 2225 or BIOL 2221, or consent of instructor.

Learning Outcomes
1. Examine the role of medical nutritional therapy in disease processes.
2. Apply nutritional assessment techniques utilizing the Nutrition Care Process.
3. Compose nutrition care plans and utilize various styles of medical charting.
4. Describe the interdisciplinary nature of working with a health care team in the delivery of medical nutritional therapy.

NUTR 5233. Graduate Studies in Nutrition Counseling & Education
3 Credits (3)
This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education. Additional assignments beyond NUTR 4233 required. May be repeated up to 3 credits. Crosslisted with: HNDS 4233.
Prerequisite(s)/Corequisite(s): NUTR 5230. Students must be classified as a Graduate student to enroll in this course, NUTR 2110, NUTR 3110, FCSC 348.

Learning Outcomes
1. Evaluate nutrition counseling strategies and tools in promoting behavior change and self-management.
2. Apply behavior change theories and models to nutrition counseling sessions.
3. Develop nutrition care plans for nutrition counseling clients.
4. Analyze professionalism and ethics within nutrition counseling and education.
5. Develop and present a nutrition education lesson based on current nutrition research.

NUTR 5240. Graduate Studies in Medical Nutrition Therapy II
3 Credits (3)
Continuation of HNDS 546. May be repeated up to 3 credits. Crosslisted with: NUTR 4240.
Prerequisite(s): Graduate student, NUTR 5230 and NUTR 4230L or consent of instructor.

Learning Outcomes
1. Select appropriate medical nutrition therapy interventions for various disease processes.
2. Master nutrition assessment of patients/clients utilizing the Nutrition Care Process model.
3. Interpret medical terminology in patient chart notes and medical history records.
4. Evaluate laws regulations concerning dietetics.

NUTR 5610. Dietetic Intern Seminar
1 Credit (1)
Portfolio development for dietetic interns during supervised practice rotations. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes
1. CRDN 2: Apply evidence-based guidelines, systematic reviews and scientific literature.
2. CRDN 3: Justify programs, products, services and care using appropriate evidence or data.
3. CRDN 4: Evaluate emerging research for application in nutrition and dietetics practice.
4. CRDN 6: Incorporate critical-thinking skills in overall practice.
5. CRDN 1: Practice in compliance with current federal regulations and state statutes and rules, as applicable and in accordance with accreditation standards and the Scope of Nutrition and Dietetics Practice and Code of Ethics for the Profession of Nutrition and Dietetics.
6. CRDN 2: Demonstrate professional writing skills in preparing professional communications.
NUTR 5620. Dietetic Internship: Supervised Practice in Community Nutrition  
1-8 Credits (2-6P)  
Provides dietetic interns with a minimum of 500 clock hours of supervised practice in community nutrition to include an emphasis in Cooperative Extension Service. Dietetic interns work under the guidance of faculty and community nutrition professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: HNDS majors.  
Prerequisite(s): Acceptance into Dietetic Internship.  
Learning Outcomes  
1. CRDN 1 Select indicators of program quality and/or customer service and measure achievement of objectives. 
2. CRDN 2 Apply evidence-based guidelines, systematic reviews and scientific literature. 
3. CRDN 4 Evaluate emerging research for application in nutrition and dietetics practice. 
4. CRDN 5 Conduct projects using appropriate research methods, ethical procedures and data analysis. 
5. CRDN 14 Demonstrate advocacy on local, state or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession. 
6. CRDN 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings. 
7. CRDN 5 Develop nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience. 
8. CES Consult with organizations regarding food access for target populations. 
9. CES Evaluate the operation of Cooperative Extension Service nutrition programs in the areas of policies and procedures. 
10. CES Develop and deliver nutrition presentations to client/consumer audiences on various topics related to client/consumer needs. 
11. CES Ensure cultural relevancy and appropriateness of nutrition education. 
12. CES Assess educational needs and provide nutrition counseling based on individual needs, knowledge, medical needs, and socioeconomic status. 

NUTR 5630. Community Nutrition for Dietetic Interns  
3 Credits (3)  
Advanced topics in community nutrition to include conducting community nutrition needs assessments, program planning and grant writing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.  
Prerequisite(s): Acceptance into Dietetic Internship.  
Learning Outcomes  
1. CRDN 1 Select indicators of program quality and/or customer service and measure achievement of objectives. 
2. CRDN 2 Apply evidence-based guidelines, systematic reviews and scientific literature. 
3. CRDN 4 Evaluate emerging research for application in nutrition and dietetics practice. 
4. CRDN 5 Conduct projects using appropriate research methods, ethical procedures and data analysis. 
5. CRDN 14 Demonstrate advocacy on local, state or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession. 
6. CRDN 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings. 
7. CRDN 5 Develop nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience. 
8. CES Consult with organizations regarding food access for target populations. 
9. CES Ensure cultural relevancy and appropriateness of nutrition education. 

NUTR 5640. DI SUP PRACT FS MGT  
1-5 Credits (2-10P)  
Provides dietetic interns with a minimum of 300 clock hours of supervised practice in foodservice management. Dietetic interns work under the guidance of faculty and foodservice management professionals. Students must complete a total of 4 credit hours of NUTR 5640. May be repeated up to 5 credits. Consent of Instructor required. Restricted to: HNDS majors.  
Prerequisite(s): Acceptance into Dietetic Internship.
NUTR 5650. Foodservice Management for Dietetic Interns
3 Credits (3)
Advanced topics in foodservice systems management to include business planning and marketing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN 2: Demonstrate professional writing skills in preparing professional communications.
2. CRDN 15: Practice and/or role play mentoring and precepting others.
3. CRDN 4: Design, implement and evaluate presentations to target audiences.
4. CRDN 3: Demonstrate active participation, teamwork and contributions in group setting.
5. CRDN 7: Apply leadership skills to achieve desired outcomes.
6. CRDN 8: Demonstrate negotiation skills.
7. CRDN 4: Apply current informatics technology to develop, store, retrieve and disseminate information and data.
9. CRDN 7: Conduct feasibility studies for products, programs, or services with consideration of costs and benefits.
10. 1 CRDN 8: Develop a plan to provide or develop a product, program, or service that includes a budget, staffing needs, equipment and supplies.

NUTR 5660. Dietetic Internship: Supervised Practice in Clinical Dietetics
1-8 Credits (2-16P)
Provides dietetic interns with a minimum of 500 clock hours of supervised practice in clinical dietetics. Dietetic interns work under the guidance of faculty and dietetics professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
2. CRDN 4 Function as a member of interprofessional teams.
3. CRDN 11 Show cultural competence/sensitivity in interactions with clients, colleagues and staff.
4. CRDN 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
5. CRDN 2 Conduct nutrition focused physical exams.
6. CRDN 3 Demonstrate effective communication skills for clinical and customer services in a variety of formats.

NUTR 5670. Nutrition Care Process for Dietetic Interns
3 Credits (3)
Advanced topics in nutrition care process and model to include medical nutrition therapy and evidence-based research and outcomes assessment in clinical dietetics. Consent of Instructor required.
Prerequisite(s): Acceptance into Dietetic Internship. Restricted to: HNDS majors.
Learning Outcomes
1. CRDN 2: Apply evidence-based guidelines, systematic reviews and scientific literature.
2. CRDN 3: Justify programs, products, services and care using appropriate evidence or data.
3. CRDN 4: Evaluate emerging research for application in nutrition and diet.
4. CRDN 4 Evaluate emerging research for application in dietetics practice.
5. CRDN 2 Demonstrate professional writing skills in preparing professional communication. Perform the nutrition care process and use standardized nutrition language for individuals, groups, and populations of differing ages and health status, in a variety of settings.
6. CRDN 2 Conduct nutrition focused physical exams.

NUTR 5680. Review Course for National RD Exam
3 Credits (3)
Completion of dietetic internship portfolio and preparation for the national registration examination for dietitians. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: exclude HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. Demonstrate readiness to take the National Registration Examination for Dietitians.
2. Completion of all requirements of the NMSU Dietetic Internship.
3. Completion of all requirements to receive a Master of Science in Family Consumer Sciences from New Mexico State University.

NUTR 5991. Special Research Programs
1-4 Credits (1-4)
Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree. May be repeated up to 6 credits.
Prerequisite(s): Graduate Student.
Learning Outcomes
1. Develop analytical or experimental research skills in the areas of human nutrition and dietetics.

NUTR 5996. Special Topics
1-4 Credits (1-4)
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.
Prerequisite(s): Graduate student.
Learning Outcomes
1. Evaluate issues surrounding advanced nutrition and dietetics topics.

Website: http://aces.nmsu.edu/academics/FCS/
Human Development & Family Science - Bachelor of Science in Science

This major stresses the interrelationship of individuals across the life span and the impact of social and economic factors on the family system. Graduates are prepared for professional work with social and community agencies and other programs serving families. This degree program has been deemed a CFLE-approved academic program by the National Council on Family Relations’ Certified Family Life Educator program so that you can apply through the abbreviated application process to become a CFLE upon graduation. You must work closely with an advisor. You must achieve a grade of C- or higher in your required core and minor courses, and must retake required courses with a grade lower than C-. You must have a GPA of 2.5 or higher before enrolling in

Students are recommended to declare a minor related to the FCST field such as CAST, CEPY, ECED, GERO, PHLS, PSYC, SOCI, SOWK and GNDR in order to solidify the minor/elective requirements below and the suggested roadmap.

General Education Requirements
A list of specific general education requirements is available in the department. Please check with your advisor.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

A Suggested Plan of Study for Students
This roadmap assumes student placement in ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Preface
- **Title**: Human Development & Family Science - Bachelor of Science in Science
- **Credits**: 120

### General Education

#### Area I: Communications
- **English Composition - Level 1**
- **English Composition - Level 2**
- **Oral Communication**

#### Area II: Mathematics

#### Area III/IV: Laboratory Sciences and Social/Behavioral Sciences

#### Area V: Humanities

#### Area VI: Creative and Fine Arts

#### General Education Elective

#### Viewing A Wider World

### Departmental/College Requirements

<table>

### Electives, to bring the total credits to 120

1. **See the General Education (p. 54) section of the catalog for a full list of courses.**
2. A Mathematics course is required for the degree but students may need to take any prerequisites needed to enter the course first.
3. **See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.**
4. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

### Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences

This major prepares you to teach in middle or high school or in other settings such as the Cooperative Extension Service or community agencies. The major is an accredited education program which meets the requirements of the Pennsylvania Department of Education (PDE). PDE approval ensures that students will be prepared to teach and pass the state certification exams. PDE approval requires the completion of 202 credits of coursework.

#### Credits

**Total Credits**: 120-123

### Course Requirements

- **Area I: Mathematics Course**: 3-4 credits
- **Area II: Mathematics Course**: 4 credits
- **Area III: Laboratory Science Course**: 4 credits
- **Area IV: Social Science Course**: 6 credits
- **Area V: Creative & Fine Arts Course**: 3 credits
- **Area VI: Creative & Fine Arts Course**: 3 credits
- **Second Year**
- **Third Year**
- **Fourth Year**

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

### Additional Notes

1. Minor courses are selected with the approval of an FCS advisor from a minor related to the FCS field such as CAST, C EP, ECED, GER, PHLS, PSY, SOC, SWK and W S.
2. If a minor isn't declared, elective courses can be used.
3. See the General Education (p. 54) section of the catalog for a full list of courses.
4. FCST 2110 Infancy and Early Childhood in the Family, FCST 2135 Adolescent Development and the Family, FCST 2140 Adult Development and Aging and FCST 449V Family Ethnicities and Subcultures must all be taken in order to fulfill degree requirements, however the order in which the courses are taken is up to the students.
5. A 2.5 GPA is required to enroll in either course and students must complete the course, that is selected, with a C- or better.
6. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.
teacher licensure requirements for the State of New Mexico. In the spring semester of the senior year, you will apply all the principles of teaching that you have learned in a semester of student teaching in a selected school. Requirements for admission to the student teaching component of the Family and Consumer Sciences Education are:

1. an overall grade-point average of 2.75 or higher, and a grade-point average of 2.75 or higher in family and consumer sciences courses;
2. evidence of passing NES Essential Academic Tests I, II, III;
3. a C or better in all departmental courses; and
4. recommendation of the advisor.

You must have passed the NES Essential Academic Tests I, II, III and you must have a GPA of 2.75 or higher before enrolling in the following FCSE courses:

**Requirements**

A list of specific requirements is available in the department. Please check with your advisor.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Total Credits: 120

1. Approved VWW courses are: PHLS 301V Human Sexuality, BLAW 385V Employment and Consumer Law and MKTG 311V Consumer Behavior
2. Before being admitted to the program and enrolling in 400-level classes, students must pass the National Evaluation Series for Certification: Essential Academic Skills, Subtests I, II, and III.
3. Students must have a 2.75 GPA or higher in order to register for these courses.

---

### Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences

The Fashion Merchandising and Design major prepares students to achieve career goals in the diverse areas of the fashion industry. Students are prepared with well-rounded coursework related to the creative, technical and business aspects of the industry. The program develops the business knowledge, design fundamentals and industry experience needed to compete in today’s fashion industry. The required coursework includes completion of a minor in Marketing as well as gaining valuable hands-on field experience. A GPA of 2.5 or better is required to enroll in CTFM 402 Field Experience to complete the degree requirements.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

- CTFM 473 Flat Pattern for Apparel Design
- CTFM 474 Fashion Promotion
- CTFM 476 Draping for Apparel Design
- CTFM 477 Capstone in Fashion Merchandising

**Choose two courses from the following:**

- CTFM 377 Fashion Study Tour
- Any FCST Course
- Any FCSC Course

**Non-Departmental Requirements**

- ACCT 2110 Principles of Accounting I
- MGMT 388V Leadership and Ethics
- MKTG 313 Retail Management
- MKTG 317 International Marketing
- One MKTG 300 or above

Choose one course from the following:

- AEC 1145G Visual Concepts
- CTFM 1110 Fundamentals of Fashion
- CTFM 2130 Concepts in Apparel Construction
- Elective Course(s)

**Second Language: (not required)**

Electives, to bring the total credits to 120

**Total Credits**

120-123

1. See the General Education (p. 54) section of the catalog for a full list of courses
2. MATH 1350G Introduction to Statistics is required for the degree but students may need to take MATH 1215 as a prerequisite. If this course is used to fulfill the Math Basic Skills requirement, a C- or better is required.
3. See the Viewing a Wider World (p. 58) Section of the catalog for a full list of courses.
4. Offered summers only.
5. A GPA of 2.5 or higher is required before enrolling in CTFM 402 Field Experience.
6. Should be completed last semester.
7. Please review prerequisites prior to enrolling.
8. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
9. ACES 1120 Freshman Orientation/ACES 1210 Financial Fitness for College Students are strongly recommended for freshmen.

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1350G Introduction to Statistics. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

---

1. See the General Education (p. 54) section of the catalog for a full list of courses.
2. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
3. MATH 1350G Introduction to Statistics is required for the degree but students may need to take MATH 1215 as a prerequisite. If this course is used to fulfill the Math Basic Skills requirement, a C- or better is required.
4. One Area IV: Social/Behavioral Sciences course and one Area V: Humanities course must be taken in order to fulfill the General Education requirements.
5. If THTR 307V is taken then students will not need to take an additional Viewing a Wider World course.
6. Departmental Electives can be completed by taking either CTFM 377 Fashion Study Tour, any FCS course or any FCSE course, but make sure to check any prerequisites on courses before enrolling.

Please Note: Many scholarships require enrollment in a minimum of 15 credits per semester, so additional elective coursework may be required to remain eligible for scholarships.

**Food Science and Technology (Culinary Science) - Bachelor of Science in Food Science and Technology**

Food science is the science of food. Food scientists study the physical, microbiological, and chemical makeup of food. Food technology is the application of food science to the selection, preservation, processing, packaging, distribution, and use of safe food. The food industry is the largest manufacturing industry in the United States. This multidisciplinary field applies scientific disciplines including chemistry, microbiology, nutrition and engineering to develop new food products as well as the processes designed to improve food safety and the quality of foods. Food scientists develop new foods, add value to raw food commodities and improve the quality and safety of foods. There are
three concentration areas offered to allow students to focus on a specific area of interest:

1. Science, Engineering and Technology
2. Culinary Science
3. Meat Science

Consider exploring food science through our introductory course: Food Science I (FSTE 263G) which fulfills the general education Area III Laboratory Science requirement. Food scientists typically work in the food and beverage industry in the areas of quality assurance, product development, product procurement, research, sensory evaluation, sales, and food safety regulations. Graduates of the program will also be prepared for postgraduate studies leading to research, production and management careers in the food and feed industries, government and academia.

A minimum grade of C- is required in all classes with CHEM, BCHE, BIOL, FSTE, or NUTR prefix.

**Requirements**

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Second Language: (not required)**

- **See the General Education (p. 54) Section of the catalog for a full list of courses**
- MATH 1430G Applications of Calculus I is required for the degree but students may need to take any prerequisites needed to enter MATH 1430G first.
- **See the Viewing a Wider World (p. 58) Section of the catalog for a full list of courses**
- Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1430G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in Mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Total Credits: 120

1. See the General Education (p. 54) Section of the catalog for a full list of courses.
2. Students must take one Area V: Humanities and one Area VI: Creative and Fine Arts course in order to complete the General Education requirements.
3. MATH 1430G Applications of Calculus I is required for the degree but students may need to take any prerequisites needed to enter MATH 1430G first.
4. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
5. See the Viewing a Wider World (p. 58) Section of the catalog for a full list of courses.

Food Science and Technology (Meat Science) - Bachelor of Science in Food Science and Technology

Food science is the science of food. Food scientists study the physical, microbiological, and chemical makeup of food. Food technology is the application of food science to the selection, preservation, processing, packaging, distribution, and use of safe food. The food industry is the largest manufacturing industry in the United States. This multidisciplinary field applies scientific disciplines including chemistry, microbiology, nutrition and engineering to develop new food products as well as the processes designed to improve food safety and the quality of foods. Food scientists develop new foods, add value to raw food commodities and improve the quality and safety of foods. There are three concentration areas offered to allow students to focus on a specific area of interest:

1. Science, Engineering and Technology
2. Culinary Science
3. Meat Science
Consider exploring food science through our introductory course: FSTE 2130G Survey of Food and Agricultural Issues which fulfills the general education Area III Laboratory Science requirement. Food scientists typically work in the food and beverage industry in the areas of quality assurance, product development, product procurement, research, sensory evaluation, sales, and food safety regulations. Graduates of the program will also be prepared for postgraduate studies leading to research, production and management careers in the food and feed industries, government and academia.

A minimum grade of C- is required in all classes with CHEM, BCHE, BIOL, FSTE, or NUTR prefix.

### Requirements

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Students are encouraged to use the elective hours to complete a minor in a related area such as chemistry, microbiology, and business. Consult an advisor for requirements.

Human Nutrition and Dietetic Science (Nutrition Education) - Bachelor of Science in Family and Consumer Sciences

This concentration prepares students to become nutrition educators that work within the community and public health settings. This concentration focuses on health and wellness, the association between nutrition and health, and teaching healthy living. Graduates from the Nutrition Education concentration will have learned the skills to communicate evidence-based nutrition information, provide nutrition education, and blend nutrition with other health science subjects. The job opportunities for those graduating from this program include working as a nutrition educator or nutrition assistant in county agencies, Extension Services, community nutrition programs, schools and with health organizations.

Unlike the Dietetics concentration, this concentration does not prepare students to pursue the credential of a Registered Dietitian.

Concentration: Nutrition Education (General)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Due to the large number of PHLS course in the Nutrition Education option, students are encouraged to pursue a Public Health minor. Please see an advisor for more information and to view a Nutrition Education & Public Health minor roadmap.

NUTR 4220  Food Service Organization and Management

NUTR 4233  Nutrition Counseling and Education

NUTR 4565  Field Experience Community Nutrition

HRTM 363  Quantity Food Production and Service

HRTM 2110  Safety, Sanitation and Health in the Hospitality Industry

HRTM 2120  Food Production and Service Fundamentals

Choose one from the following:  3

- AXED 456  Introduction to Research Methods
- FCSC 400  Research Methods in Family and Consumer Sciences
- PHLS 451  Biometrics and Health Research
- PSYC 310  Experimental Methods
- SOCI 352  Social Research: Methods

Choose one from the following:  4-5

- FSTE 320  Food Microbiology
- BIOL 311 & 311 L  General Microbiology and General Microbiology Laboratory
- BIOL 2320 & BIOL 311 L  Public Health Microbiology and General Microbiology Laboratory

**Non-Departmental Requirements**

PHLS 2110  Foundations of Health Education

PHLS 395  Foundations of Public Health  3

PHLS 459  Infectious and Noninfectious Disease Prevention  3

PHLS 461  Health Disparities: Determinants and Interventions  3

PHLS 464V  Cross-Cultural Aspects of Health  3

Choose one from the following:  4

- BIOL 2210  Human Anatomy and Physiology I for the Health Sciences
- SPMD 2210  Anatomy and Physiology I and Anatomy and Physiology Laboratory

Choose one from the following:  4

- BIOL 2221  Human Physiology
- BIOL 2225  Human Anatomy and Physiology II
- SPMD 3210 & 3210L  Anatomy and Physiology II and Anatomy and Physiology II Lab
- SPMD 3410  Exercise Physiology

Recommended courses that are not required for the degree or verification statement

ACES 1120  Freshman Orientation (Highly recommended if new to NMSU)

or ACES 1210  Financial Fitness for College Students

Electives, to bring the total credits to 120  0

Total Credits  120-121

1. See the General Education (p. 54) section of the catalog for a full list of courses. Please refer to the HNDS Undergraduate Student Handbook for a list of recommended courses to choose from in order to fulfill these requirements.

2. MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G first.

3. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

4. Students who have taken a second level English course may be required to take another to fulfill the program’s technical/scientific writing requirement.

**Concentration: Nutrition Education**

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change. Please meet with an advisor to determine course progression.

To earn a Verification Statement from the NMSU DPD, students must:

1. Successfully complete an ACEND-accredited DPD program (e.g., the NMSU Dietetics Option), earn a degree and a verification statement.
   a. The verification statement ensures eligibility to apply to the next step.

2. Successfully complete an ACEND-accredited Dietetic Internship (DI) program, earn another verification statement.
   a. This 2nd verification statement enables eligibility to begin the next step.

3. Pass the Commission on Dietetic Registration (CDR) registration exam.

To earn a Verification Statement from the NMSU DPD, students must:

1. Complete all classes outlined in the Dietetics option roadmap.
2. Attain a C or higher (on campus or transfer) in classes with CHEM, BCHE, BIOL, SPMD, AHS/CHSS/NURS, FSTE and NUTR prefixes (C- does not count toward degree).

Students must complete all University degree requirements, which include: General Education requirements, Viewing A Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

PHIL 1145G  Philosophy, Law, and Ethics (either recommended) or Introduction to Ethics  

Choose one from the following:  
BIOL 2210  Human Anatomy and Physiology I for the Health Sciences (C or better, at DACC)  
SPMD 2210  Anatomy and Physiology I  
& 2210L  and Anatomy and Physiology Laboratory (C or better)  
BCHE 341  Survey of Biochemistry (C or better)  
A ST 311  or MATH 1350G  Statistical Applications  

Credits  17

Third Year

Fall

Choose one from the following:  
BIOL 2221  Human Physiology (C or better)  
BIOL 2225  Human Anatomy and Physiology II (C or better, at DACC)  
SPMD 3210  Anatomy and Physiology II  
& 3210L  and Anatomy and Physiology II Lab (C or better)  
SPMD 3410  Exercise Physiology (C or better)  
FSTE 320  Food Microbiology (C or better and only available Fall semesters)  
BIOL 311  General Microbiology  
& 311 L  and General Microbiology Laboratory (C or better)  

Credits  13

Fourth Year

Fall

Area VI: Creative & Fine Arts Course  
PHIL 4210  Community Nutrition (C or better, Fall only)  
NUTR 4235  Entering the Field of Dietetics (C or better, Fall only)  
NUTR 4230  Medical Nutrition Therapy I  
& 4230L  and Medical Nutrition Therapy I Lab (C or better, Fall only)  
NUTR 4233  Nutrition Counseling and Education (C or better, Fall only)  
NUTR 4220  Food Service Organization and Management (C or better, Fall only)  

Credits  15-16

Spring

NUTR 4550  Billing and Coding for Dietetics (C or better, Spring only)  
VWW - Viewing a Wider World Course  
NUTR 4560  Field Experience- Clinical Dietetics  
NUTR 4565  Field Experience Community Nutrition  
VWW - Viewing a Wider World Course  
NUTR 4240  Medical Nutrition Therapy II  
& 4240L  and Medical Nutrition Therapy II Lab (C or better, Spring Only)  

Credits  13

Total Credits  123-130

1 Pre-Dietetics courses must be completed and/or enrolled in prior to applying to the Dietetics program.
A minor in Child Advocacy Studies (CAST) is available. The minor requires a minimum of 18 hours of which 9 hours are specifically concentrated in the area of child advocacy at the 300 or higher level. Specific coursework requirements apply and consultation with an advisor for course requirements is urged.

A minor in Clothing, Textiles and Fashion Merchandising is available. The minor requires a minimum of 18 hours of which 9 hours must be at the 300 or higher level. Specific coursework requirements may apply. See an advisor for course requirements and scheduling.

A minor in Culinary Science is available. The minor requires a minimum of 18 credits of which a minimum of 9 hours must be at the 300 or higher level. Specific coursework requirements apply and consultation with an advisor for course requirements and scheduling is urged.

A minor in Family and Child Science is available. The minor requires a minimum of 18 hours of which a minimum of 9 hours must be at the 300 or higher level. Specific coursework requirements apply. See an advisor for course requirements and scheduling.

A minor in Food Science is available. The minor requires a minimum of 18 hours of which a minimum of 9 hours must be at the 300 or higher level.

Specific coursework requirements may apply. See an advisor for course requirements and scheduling.

A minor in Nutrition is available. The minor requires a minimum of 18 hours of which a minimum of 9 hours must be at the 300 or higher level. Specific coursework requirements may apply. See an advisor for course requirements and scheduling.

The Master of Science degree in Family and Consumer Sciences can be obtained with an emphasis in one of the following areas:

- clothing, textiles and fashion merchandising;
- family and child science (marriage and family therapy emphasis or teaching and research emphasis);
- family and consumer sciences education;
- food science and technology;
- general family and consumer sciences’
- hotel, restaurant and tourism management;
- human nutrition and dietetic sciences (dietetic internship emphasis or human nutrition emphasis)

*A minimum of 44 credits with a written comprehensive examination is required for the dietetic internship emphasis under the non-thesis plan; additional 4 credits of the thesis is required under a thesis plan for dietetic internship emphasis for a total of 48 credits.

A minor may be taken in a variety of supporting fields that fit the particular interests of the candidate. A minimum of 30 credits (including 4-6 credits of thesis) is required under the thesis plan and is the recommended program for most students. A non-thesis plan is available that requires a minimum of 32 credits of course work with a written comprehensive examination. Both plans require a final oral examination.

Students will take 3 credits of statistics and 3 credits of research methodology at the graduate level. Students may be required to take a graduate-level technical writing course based on demonstrated writing ability in initial graduate courses. Students who do not have degrees related to their intended areas of specialization may be required to do some leveling work. Prior to the completion of 12 credits, a program advisory committee will be established to determine, with the student, the courses that will be taken for the degree work.

For detailed information about the requirements for this program please contact the department at 575-646-3936 or visit their website.

Fish, Wildlife and Conservation Ecology

Undergraduate Program Information
Through lecture courses, labs, hands-on field experience and internships, the Department of Fish, Wildlife and Conservation Ecology will prepare you for a career in a variety of natural resource fields related to the conservation and management of wild animal populations and the natural systems they perpetuate. Award-winning professors will guide students in the study of how to manage fish and wildlife populations, their habitats, how their populations grow and contract, how different species influence the biotic community in which they live and how natural systems are affected by human activities.

Bachelor of Science in Fish, Wildlife and Conservation Ecology.

With the continuous growth of human populations and the ever dwindling of natural resources, natural resource professionals are needed now more than ever. Learn how to sustainably fish and wildlife populations and the habitats they utilize to ensure their long-term successful conservation. We offer two options within this degree. The Wildlife Ecology and Management option focuses on the ecology, conservation and management of wildlife (including mammals, birds, amphibians, and reptiles) in their natural habitats. The Aquatic Ecology and Management option focuses on the ecology, conservation and management of aquatic resources and the animals and plants found in them.

The department offers a minor in Wildlife Science for students majoring in other disciplines. The minor includes a minimum of 18 credit hours.

Bachelor of Science in Conservation Ecology

New Mexico State University offers an interdisciplinary, undergraduate program in Conservation Ecology. The goal of this program is to train biologists for the current and future challenges that we face in the conservation and wise use of natural resources. An overriding principle of the program is to provide a solid foundation in basic science coupled with a practical approach towards sustainability and stewardship. The curriculum encompasses several disciplines and includes a wide variety of courses from Fish, Wildlife and Conservation Ecology, Biology, and Geography.

This educational experience will provide students with an overview of global biodiversity and an understanding of the ecological and evolutionary processes that have created and sustained it. Courses in population and community ecology coupled with population viability analysis and risk assessment will give students the necessary background to understand the theory and development of these fields.
as well as the tools to tackle real-world problems. Courses in basic genetics, evolution, and conservation genetics will expose students to the importance of conserving genetic variation in order to maintain adaptive potential within populations, thereby sustaining the evolutionary process. Students will also receive background on wildlife law and environmental policy, information vital for assisting governing bodies in making decisions regarding the protection and wise use of our natural resources. Skills obtained in the application of geographic information systems, molecular genetics, and professional communication can also be acquired through various electives. If biochemistry is taken as an elective, this curriculum provides the necessary educational background for pre-vet requirements, thus preparing students for veterinary school and future jobs such as wildlife or zoo veterinarian, or conservation medicine practitioner. In sum, we seek to provide undergraduate students with an education that will allow them the opportunity to contribute to the conservation of all life on Earth.

The department offers a minor in Conservation Ecology for students majoring in other disciplines. The minor includes 20 credits.

To graduate from the Department of Fish, Wildlife and Conservation Ecology, an overall grade point average of 2.0 is required in courses taken in the major field and in all courses taken at NMSU.

Graduate Program Information

Master of Science in Fish, Wildlife and Conservation Ecology.

The Department of Fish, Wildlife and Conservation Ecology (FWCE) offers graduate work leading to the Master of Science degree with a major in Fish, Wildlife and Conservation Ecology. Faculty members in the department also may advise Ph.D. candidates through the graduate program in the Department of Biology, Department of Animal and Range Sciences, Department of Plant and Environmental Sciences, as well as other Ph.D. granting departments. For additional information please see the graduate catalog entries for the respective departments.

Minimum qualifications for admission to the graduate program include the following:

- 3.0 grade-point average in the last two years of undergraduate work
- Students who are most competitive for admission are those with a combined average GRE score greater than 70th percentile on the verbal and quantitative parts of the GRE.
- Course work in zoology, botany and animal ecology and a basic appreciation of sustainable use of natural resources, with supporting courses in mathematics, chemistry, physics and written and oral communication.

Applicants should submit a written composition of approximately 350 words that indicates the applicant's reasons for pursuing advanced study, explains personal and educational goals, and any additional experiences (e.g., military or career) or skills that might provide a foundation for graduate study. Applicants should submit three letters of recommendation (it is preferred that at least two letters come from university instructors) along with official GRE scores (use NMSU code 4531). Applicants should also contact a faculty member in the department that they would like to work with as an advisor, and that faculty member needs to agree to serve as the student's advisor.

Application forms, application fee and transcripts, GRE scores, letters of recommendation and letter of application should be submitted online to the Graduate School. Successful applicants will be selected from those who meet the criteria of grade-point average, GRE scores, and educational background described above and who appear to have professional promise as indicated by personal history and written references.

For the Master of Science degree, a minimum of 30 semester credits of graduate work in the major and related subjects is required, together with a thesis for most students. Of these credits, at least 15 must be in courses numbered 500 or above, and at least 15 must be for courses with the FWCE prefix. Those programs involving a thesis or research project include 4 to 6 credits of research (FWCE 598 Special Research Programs or FWCE 599 Master's Thesis). Students electing a minor in FWCE are required to take at least 9 credits in the minor field. A nonthesis option is available to some students, depending on prior training and experience, and subject to approval by the advisor and department head.

All students in the program must complete the following requirements:

- A ST 505 Statistical Inference I or equivalent
- One semester of Graduate Seminar (FWCE 515 Graduate Seminar - may be repeated for credit)
- A minimum of 3 additional credits from the Quantitative Methods category in addition to A ST 505 Statistical Inference I (eligible courses listed below)
- One course each from the Ecological Concepts, Organismal Biology and Ecological Techniques categories (eligible courses listed below)
- 4 to 9 credits from the Independent Study category (eligible courses listed below)

In addition, a student may petition to have up to 3 credits of special topics courses (FWCE 548 Graduate Problems) to apply to one of the three areas. Courses other than those listed may be acceptable, given permission by the student's supervisory committee.

Degrees for the Department

Bachelor Degree(s)

Conservation Ecology - Bachelor of Science in Conservation Ecology (p. 199)

Fisheries and Wildlife Science (Aquatic Ecology & Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 201)

Fisheries and Wildlife Science (Wildlife Ecology & Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 204)

Master Degree(s)

Fish, Wildlife and Conservation Ecology - Master of Science (p. 207)

Minors for the Department

Undergraduate

Conservation Ecology - Undergraduate Minor (p. 206)

Wildlife Science - Undergraduate Minor (p. 207)

Graduate

Fish, Wildlife and Conservation Ecology - Graduate Minor (p. 208)

Professor, Matt Gompper, Department Head

Professors Boeing, Boykin, Cain, Caldwell, Cowley, Desmond, Frey, Gompper, Roemer; Assistant Professor Gebresellassie, Klein, Lawson
Fish, Wildlife and Conservation Ecology Courses

FWCE 1110G. Introduction to Natural Resources Management  
4 Credits (3+2P)  
This class covers historical and current issues affecting the management of renewable natural resources with an emphasis on water, soil, rangeland, forest, fish, and wildlife resources. An emphasis is placed on the scientific method and critical thinking. In the laboratory students collect and analyze field data on topics covered above and write up each unit as a laboratory report.

Learning Outcomes  
1. Students should be able to recall, describe and explain the laws, treaties and acts that have led to our current management of natural resources in the United States.  
2. Students should recognize or explain what ecological processes are, the importance of ecological processes in maintaining ecosystem function and how human activities change ecological processes and the ecosystems dependent on those processes.  
3. In each of the six course and lab modules (water quality, soils, forestry, rangelands, wildlife and fisheries) students should be able to recall, describe and explain basic terminology, fundamental ecological principles and management techniques and challenges.  
4. Students should be able to interpret data presented graphically and in tables from class exercises and lectures.  
5. Students should be able to solve problems scientifically through field data collection, laboratory analyses and the use of quantitative methods (basic statistics, tables and graphs).  
6. Students should be able to communicate results from laboratory exercises (6 lab modules) orally and in writing.  
7. Students will learn to apply scientific thinking to real world problems through class discussion and short essays.  
8. Based on material from case studies presented in class and guest speakers.

FWCE 1120. Contemporary Issues in Wildlife and Natural Resources Management  
3 Credits (3)  
Ecological, socioeconomic, and political issues surrounding the management of our natural resources with an emphasis on fish and wildlife resources.

FWCE 2110. Principles of Fish and Wildlife Management  
3 Credits (3)  
Basic principles of fish and wildlife management including history, ecology, economics, and policy. Emphasis on wildlife and fisheries. Uses an ecosystem approach integrating living and nonliving resources.  
Prerequisite(s): FWCE 1110G.

Learning Outcomes  
1. The goal of this course is to provide a firm foundation in the principles of wildlife and fisheries management.  
2. Material will include a background in biological principles geared towards animal populations, characteristics and management of the habitats utilized by fish and wildlife techniques used to study and manage animals and their habitats, and aspects of the human dimension involved in wildlife and fisheries issues.  
3. This course serves as a core requirement for degrees offered in the Department of Fish, Wildlife and Conservation Ecology and as a required course for degrees in other departments such as Rangeland Resources.

FWCE 301. Wildlife Ecology  
3 Credits (3)  
General ecological theory with emphasis on concepts including biogeography, species interactions, population dynamics and disease ecology as they relate to the management and conservation of vertebrates. Prerequisite(s): BIOL 2610G

FWCE 330. Natural History of the Vertebrates  
4 Credits (3+3P)  
Evolution, ecology, and diversity of vertebrates. Topics include comparative anatomy and physiology, biogeography, community ecology, behavior, and conservation. Laboratory emphasizes identification of local taxa. Field trips may be required.  
Prerequisite(s)/Corequisite(s): BIOL 322. Prerequisite(s): BIOL 2610G and BIOL 2610L

FWCE 355. Wildlife Techniques and Analysis  
4 Credits (3+2P)  
FWCE 355 will provide a broad overview of basic skills and techniques that are commonly used by biologists in performing management, research, and reporting functions in natural resource fields with an emphasis on wildlife techniques, data processing and analysis.  
Prerequisite(s): FWCE 301, A ST 311.

FWCE 357. Fisheries Management and Analysis  
4 Credits (3+2P)  
Lectures and laboratory exercises provide a broad overview of basic skills and techniques used for assessing and managing fish populations.  
Prerequisite(s): FWCE 301 and A ST 311.

FWCE 391. Internship  
1-3 Credits (1-3)  
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/ U, Audit).  
Prerequisite(s): Consent of instructor.

FWCE 393. Professional Experience and Communication  
3 Credits (3)  
Professional work experience under the supervision of employer and/or a faculty member. Written report and presentation is required.  
Prerequisite(s)/Corequisite(s): FWCE 2110.
FWCE 402. Seminar in Natural Resource Management
1 Credit (1)
Review and discussion of current topics in natural resource management.
Prerequisite(s): Senior standing or above.

FWCE 409. Introduction to Population Ecology
3 Credits (3)
Prerequisite(s): MATH 1430G and FWCE 2110.

FWCE 430. Avian Field Ecology
4 Credits (3+3P)
Principles of avian ecology and management with an emphasis on taxonomy, physiology, behavior and field studies. Includes weekly field trips focusing on identification and behavior of Southwest birds.
Prerequisite(s)/Corequisite(s): FWCE 330.

FWCE 431. Mammalogy
4 Credits (3+2P)
Classification, identification, anatomy, physiology, life history, and ecology of mammals. Field trips required.
Prerequisite(s): FWCE 2110 and FWCE 330.

FWCE 432. Environmental Biology of Fishes
4 Credits (3+3P)
What makes a fish, a fish? Mechanisms of circulation, gas exchange, osmotic and ionic regulation, swimming, migration, reproduction, and chemoreception will be covered in this class. Taught with FWCE 532.
Prerequisite(s): CHEM 1215G and senior standing.

FWCE 434. Aquatic Contaminants and Toxicology
4 Credits (3+3P)
Basic principles and methodologies of aquatic toxicity testing; routes of exposure and modes of action; environmental legislation and ecological risk assessment. Taught with FWCE 534. Crosslisted with: ENVS 434.
Prerequisite(s): CHEM 1215G and senior standing.

FWCE 437. Wildlife Damage Management
3 Credits (3)
Introduction to basic need and appropriate methods for resolving human-wildlife conflicts and management of animal damage. Socioeconomic, ecological, and political factors. Field trips required. Taught with FWCE 537.
Prerequisite(s): BIOL 2610G, FWCE 2110, FWCE 301, FWCE 409.

FWCE 447. Wildlife Law and Policy
3 Credits (3)
Introduction to state and federal laws and policies for wildlife and the historical context for their development. Taught with FWCE 547.
Prerequisite(s): Junior or Senior level standing.

FWCE 448. Problems
1-3 Credits (1-3)
Individual investigations in fishery or wildlife science. Maximum 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.
Prerequisite(s): 18 credits in WLSC.

FWCE 450. Special Topics
1-4 Credits (1-4)
Specific subjects and credits as announced in the Schedule of Classes. Maximum of 4 credits per semester. May be repeated up to 9 credits. Consent of Instructor required.

FWCE 457. Ecological Biometry
3 Credits (3)
Use of ecological data to test scientific hypotheses, stochastic and statistical models for environmental data, data visualization, likelihood-based and information-based model selection. Emphasis on open-source software tools.
Prerequisite(s): MATH 1430G or MATH 1511G, A ST 311, FWCE 301.

FWCE 459. Aquatic Ecology
4 Credits (4)
Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Taught with FWCE 559.
Prerequisite(s): FWCE 301 or BIOL 301, CHEM 1225G, MATH 1430G.

FWCE 464. Management of Aquatic and Terrestrial Ecosystems
4 Credits (3+2P)
Principles and methods for managing aquatic and terrestrial ecosystems and their fish and wildlife resources. Emphasis on quantitative techniques, data collection and analysis for management of systems at a landscape spatial scale.
Prerequisite(s): (BIOL 301 or FWCE 301) FWCE 330, A ST 311.

FWCE 467. Herpetology
4 Credits (4)
Systematics, taxonomy, ecology, behavior, and conservation of amphibians and reptiles. Field trips required. Taught with FWCE 567.
Prerequisite(s): FWCE 330.

FWCE 471. GIS for Natural Resource Scientists
4 Credits (4)
Practical GIS class for students with little or no GIS experience. Class focuses on learning to use industry-standard software and applications in natural resource management. Taught with FWCE 571.

FWCE 472. Wildlife Museum Internship
1-4 Credits (1-4)
Substantial directed work experience in various functions of the wildlife natural history museum developed by the student in consultation with the faculty curator. Internships may involve aspects of collection development and management, public education programs, or other related museum activities. Internship must be approved by the faculty curator. May be repeated up to 9 credits. Consent of Instructor required.
Prerequisite(s): BIOL 2610G and BIOL 2610L.

FWCE 482. Ichthyology
4 Credits (3+2P)
Classification, morphology, identification, life history, and ecology of fishes.
Prerequisite(s): FWCE 330 or consent of instructor.

FWCE 509. Population Ecology (s)
3 Credits (2+2P)
Quantitative analysis of vital statistics and mechanisms promoting stability in wild populations. Theory and application of life tables and population models.

FWCE 515. Graduate Seminar
1 Credit (1)
Current topics.
FWCE 530. Large Mammal Ecology, Conservation and Management
3 Credits (3)
This course will cover aspects of large mammal ecology, management and conservation. Will include aspects of foraging ecology, resource and habitat selection, competition and resource partitioning, predation and population dynamics. Taught with FWCE 436.

FWCE 532. Environmental Biology of Fishes
4 Credits (3+3P)
What makes a fish, a fish? Mechanisms of circulation, gas exchange, osmotic and ionic regulation, swimming, migration, reproduction, and chemoreception will be covered in this class. Taught with FWCE 432; however, students are responsible for all requirements in FWCE 432, plus additional assignments.

FWCE 534. Aquatic Contaminants and Toxicology
4 Credits (3+3P)
Basic principles and methodologies of aquatic toxicity testing; routes of exposure and modes of action; environmental legislation and ecological risk assessment. Students are responsible for all requirements for FWCE 434 plus additional work.

FWCE 535. Special Topics
1-4 Credits (1-4)
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

FWCE 536. Advanced Avian Ecology
3 Credits (3)
Focuses on current topics and literature in avian ecology including systematics, mating systems, behavior, physiology, movement patterns and conservation. Includes required overnight field trips.
Prerequisite(s): Graduate standing or consent of instructor.

FWCE 537. Wildlife Damage Management
3 Credits (3)
Introduction to basic need and appropriate methods for resolving human-wildlife conflicts and management of animal damage. Socioeconomic, ecological, and political factors. Field trips required. Taught with FWCE 437. Students are responsible for all requirements for FWCE 437 plus additional work. Prerequisite(s): BIOL 2610G, FWCE 2110, FWCE 301 and FWCE 409

FWCE 540. Wildlife Habitat Relationships
3 Credits (3)
The study of wildlife-habitat relationships primarily seeks to describe how the distribution and abundance of resources used for food, cover and security, and constraints on the use of these resources influence the distribution of animals. This course will cover aspects of animal behavior related to how animals select habitat, theoretical models of habitat selection, the influence of inter- and intra-specific interactions on habitat selection, habitat quality, study designs for wildlife-habitat studies, modeling habitat selection and data analyses. Taught with FWCE 440.

FWCE 544. Wildlife Law and Policy
3 Credits (3)
Introduction to state and federal laws and policies for wildlife and the historical context for their development. Taught with FWCE 447.

FWCE 548. Graduate Problems
1-3 Credits (1-3)
Individual studies in fishery and wildlife sciences. Maximum of 3 credits per semester. No more than 6 credits of this course and FWCE 598, combined, toward a degree. May be repeated up to 6 credits.

FWCE 550. Ichthyology
4 Credits (4)
Classification, morphology, identification, life history, and ecology of fishes. Taught with FWCE 482.

FWCE 559. Aquatic Ecology
4 Credits (4)
Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Taught with FWCE 459.
Prerequisite(s): FWCE 301 or BIOL 301, CHEM 1225G, MATH 1430G.

FWCE 567. Herpetology
4 Credits (4)
Systematics, taxonomy, ecology, behavior and conservation of amphibians and reptiles. Field trips required. Taught with FWCE 467.

FWCE 568. Ichthyology
3 Credits (3)
Introduction to fish classification, systematics, and life history. Taught with FWCE 482; however, students are responsible for all requirements in FWCE 432, plus additional assignments.

FWCE 571. GIS for Natural Resource Scientists
4 Credits (4)
Practical GIS class for students with little or no GIS experience. Class focuses on learning to use industry-standard software and applications in natural resource management. Taught with FWCE 471.

FWCE 578. Advanced Aquatic Toxicology
4 Credits (3+3P)
Basic principles and methodologies of aquatic toxicity testing; routes of exposure and modes of action; environmental legislation and ecological risk assessment. Students are responsible for all requirements for FWCE 434 plus additional work.

FWCE 579. Aquatic Toxicology
4 Credits (3+3P)
Introduction to exposure and modes of action of aquatic contaminants with emphasis on chemical and physical properties, development of aquatic systems, pathways and environmental compartments. Taught with FWCE 482.

FWCE 582. Ichthyology
4 Credits (4)
Classification, morphology, identification, life history, and ecology of fishes. Taught with FWCE 482.

FWCE 598. Special Research Programs
1-3 Credits (1-3)
Individual investigations, either analytical or experimental. Maximum of 3 credits per semester. No more than 6 credits of this course and FWCE 548, combined, toward a degree. Not available to students in the nonthesis program. May be repeated up to 6 credits.

FWCE 599. Master's Thesis
1-9 Credits (1-9)

Conservation Ecology - Bachelor of Science in Conservation Ecology

Co-directors of the Program:
Professor, Michele Nishiguchi, Department Head, Biology
Professor, Matthew Gompper, Department Head, Fish, Wildlife and Conservation Ecology

Professors Bailey, Boecklen, Boeing, Caldwell, Cowley, Desmond, Gompper, Hanley, Houde, Milligan, Nishiguchi, Roemer, Smith, Wright; Associate Professors Cain, James, Mabry; Assistant Professors Ferrenberg, Orr

New Mexico State University offers an interdisciplinary, undergraduate program in Conservation Ecology. The goal of this program is to train biologists for the current and future challenges that we face in the conservation and wise use of our Earth's natural resources. An overriding principle of the program is to provide a solid foundation in
basic science coupled with a practical approach towards sustainability and stewardship. The curriculum encompasses several disciplines and includes a wide variety of courses from the Biology, Fish, Wildlife and Conservation Ecology; Geography; and Range Science departments.

The educational experience will provide students with an overview of global biodiversity and an understanding of the ecological and evolutionary processes that have created and sustained it. Courses in population and community ecology coupled with population viability analysis and risk assessment will give students the necessary background to understand the theory and development of these fields as well as the tools to tackle real-world problems. Courses in basic genetics, evolution, and conservation genetics will expose students to the importance of conserving genetic variation in order to maintain adaptive potential within populations, thereby sustaining the evolutionary process. Students will also receive background on wildlife law and environmental policy, information vital for assisting governing bodies in making decisions regarding the protection and wise use of our natural resources. Skills obtained in the application of geographic information systems, molecular genetics, and professional communication can also be acquired through various electives. In sum, we seek to provide undergraduate students with an education that will allow them the opportunity to contribute to the conservation of all life on Earth.

The requirements are listed below. In addition, each required course must be passed with a grade of C- or better.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

| B I O L 447 | Biometry | 3 |
| or FWCE 457 | Ecological Biometry | 3 |
| B I O L 462 | Conservation Biology | 3 |
| B I O L 467 | Evolution | 3 |
| B I O L 488 or BCHE 341 | Principles of Conservation Genetics | 3 |
| FWCE 2110 | Principles of Fish and Wildlife Management | 3 |
| FWCE 330 | Natural History of the Vertebrates | 4 |
| FWCE 402 | Seminar in Natural Resource Management | 1 |
| FWCE 409 | Introduction to Population Ecology | 3 |
| FWCE 447 | Wildlife Law and Policy | 3 |
| FWCE 464 | Management of Aquatic and Terrestrial Ecosystems | 4 |
| FWCE 482 | Ichthyology | 4 |
The Aquatic Ecology and Management Concentration is for students who want to focus on fish and aquatic systems. The Department of Fish, Wildlife and Conservation Ecology prepares students for careers in a variety of natural resource fields related to the management of wild animal populations and the natural systems they share.

To graduate, an overall grade point average of 2.0 is required in courses taken in the major field and in all courses taken at NMSU. In addition, each required course must be passed with a grade of C- or better. The department offers a minor in Fish, Wildlife and Conservation Ecology for students majoring in other disciplines. The minor includes a minimum of 18 credit hours.

The Aquatic Ecology and Management Concentration is for students who want to focus on fish and aquatic systems.

### Electives, to bring the total credits to 120

Select additional electives to bring total to 120 credits including 48 upper division credits.

### Total Credits 120

1. See the General Education (p. 54) Section of the catalog for a full list of courses.
2. Either MATH 1430G Applications of Calculus I or MATH 1521G Calculus and Analytic Geometry II is required for the degree but students may need to take any prerequisites needed to enter these courses.
3. One Viewing a Wider World (p. 58) course will be satisfied using the 9-hour rule: students with Biology as home department use FWCE courses and students with Fish, Wildlife and Conservation Ecology as home department use BIOL courses.
5. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The elective credits in the requirements list is the amount needed to bring the total to 120 credits and may vary based on the degree. Students may need to complete more or less courses on a case-by-case basis and each student should discuss elective requirements with their advisor.

### Second Language Requirement

For the Bachelor of Science in Conservation Ecology there is no second language requirement for the degree.

### Fisheries and Wildlife Science (Aquatic Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology

The Department of Fish, Wildlife and Conservation Ecology prepares you for careers in a variety of natural resource fields related to the management of wild animal populations and the natural systems they share.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

### Prefix Title Credits

### General Education

**Area I: Communications**

- English Composition - Level 1
- Composition I

**English Composition - Level 2**

- Professional & Technical Communication

**Oral Communication**

- Effective Leadership and Communication in Agriculture

- Introduction to Communication

- Public Speaking

**Area II: Mathematics**

- Applications of Calculus I 1

- Calculus and Analytic Geometry I

**Area III/IV: Laboratory Sciences and Social/Behavioral Sciences**

- Macroeconomic Principles

- Principles of Microeconomics

**Area V: Humanities**

- Survey of Physics with Lab

- Algebra-Based Physics I

**Area VI: Creative and Fine Arts**

- Principles of Biology: Cellular and Molecular Biology

- Principles of Biology: Cellular and Molecular Biology Laboratory

**General Education Elective**

- Principles of Biology: Cellular and Molecular Biology

**Viewing a Wider World**

- The second VWW requirement (3 credits) may be filled with the 9-credit hour rule. Please see your advisor for more information.

### Departmental/College Requirements

**Departmental Core Courses (29 credits)**

### New Mexico State University - Las Cruces 201
**Fundamentals of Wildlife Management**

**Departmental Botany Requirements (9 credits)**
- BIOL 312: Plant Taxonomy
- or RGSC 316: Rangeland Plants
- BIOL 313: Structure and Function of Plants

Select one from the following:
- BIOL 314: Plant Physiology
- RGSC 325: Rangeland Restoration Ecology
- RGSC 357: Grass Taxonomy and Identification
- RGSC 440: Rangeland Resource Ecology

**Departmental Physiology Requirements (3-4 credits)**
Select 3-4 credits from the following:
- ANSC 370: Anatomy and Physiology of Farm Animals
- BIOL 314: Plant Physiology
- BIOL 381: Animal Physiology
- FWCE 432: Environmental Biology of Fishes

**Concentration Coursework**
- **Techniques**
  - FWCE 357: Fisheries Management and Analysis
- **Management**
  - Choose one from the following: FWCE 434, Aquatic Contaminants and Toxicology; FWCE 459, Aquatic Ecology; RGSC 318, Watershed Management

**Organismal Biology**
Choose one from the following: BIOL 465, Invertebrate Zoology; EPWS 462, Parasitology; FWCE 467, Herpetology; FWCE 482, Ichthyology

**Wildlife Ecology and Management Electives**

**Non-Departmental Requirements (in addition to Gen.Ed/VWW)**
- AGRO 305, Principles of Genetics; or BIOL 305, Principles of Genetics
- A ST 311, Statistical Applications
- BIOL 322, Zoology
- CHEM 1215G, General Chemistry I Lecture and Laboratory for STEM Majors
- CHEM 1225G, General Chemistry II Lecture and Laboratory for STEM Majors

Select one from the following:
- GEOL 1110G, Physical Geology
- SOIL 2110, Introduction to Soil Science
- & 2110L, and Introduction to Soil Science Laboratory

**Second Language: (not required)**

**Electives, to bring the total credits to 120**

**Total Credits: 120**

---

1. MATH 1430G Applications of Calculus I or MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1430G or MATH 1511G first.
2. See General Education (p. 54) section of the catalog for a full list of courses.
3. See Viewing a Wider World (p. 58) section of the catalog for a full list of courses.
4. Three credits can be taken inside the College of ACES, but three credits must also be taken outside the College of ACES or 9 credits can be taken within a single department (e.g. Biology) that is outside the College of ACES.
5. Off campus students can take FWCE 1120 Contemporary Issues in Wildlife and Natural Resources Management Distance Education.
6. At least one course chosen must be a vertebrate taxonomy course with FWCE prefix, i.e., one of FWCE 467 Herpetology or FWCE 482 Ichthyology.
7. Students intending to pursue graduate studies should also take CHEM 2115 Survey of Organic Chemistry and Laboratory.
8. Elective credit may vary based on General Education course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**Additional Electives**

Take additional credits so the total adds up to at least 120 credits including 55 credits 300- and 400-level classes.

Students are encouraged to pursue a minor course of study with a department of their choosing. Compatible minors include, but are not limited to:
- animal science,
- biology,
- chemistry,
- environmental science,
- forensic sciences,
- geography,
- journalism,
- management,
- and range science.

**Notes:**
1. No more than 6 credits of Physical Education classes will count towards your degree.
2. Maximum of two grades of ‘D’ in FWCE classes will count towards a student’s degree.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1430G Applications of Calculus I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

2 See the General Education (p. 54) section of the catalog for a full list of courses.

3 See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses. Three credits can be taken inside the College of ACES, but three credits must also be taken outside the College of ACES or 9 credits can be taken within a single department (e.g. Biology) that is outside the College of ACES.

4 Management

5 Choose one from the following:
Additional Electives

Take additional credits so the total adds up to at least 120 credits including 55 credits 300- and 400-level classes.

Students are encouraged to pursue a minor course of study with a department of their choosing.

Compatible minors include, but are not limited to:

- animal science,
- biology,
- chemistry,
- environmental science,
- forensic sciences,
- geography,
- journalism,
- management,
- and range science.

Notes:

1. No more than 6 credits of Physical Education classes will count towards your degree.
2. Maximum of two grades of ‘D’ in FWCE classes will count towards a student’s degree.

1. A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1430G Applications of Calculus I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Conservation Ecology - Undergraduate Minor

A minor in Conservation Ecology is available for students who choose to major in other areas, but wish to include Conservation Ecology in their academic training. A minor in Conservation Ecology must include a minimum of 20 credits in the discipline with 9 of these coming from upper-division courses.

#### Requirements

<table>

Select 6 credits from the following:

| BIOL 312 | Plant Taxonomy | 3 |
| BIOL 305 | Principles of Genetics | 1 |
| FGSC 316 | Rangeland Plants | 1 |

---

1. These courses have prerequisites or co-requisites, and it is the students responsibility for checking and fulfilling all course prerequisites listed for these courses.
2. See the General Education (p. 54) section of the catalog for a full list of courses.
3. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.
For the Master of Science degree, students must complete a minimum of 30 semester credits, with at least 15 credits in the FWCE prefix. Those programs involving a thesis or research project include 4 to 6 credits of research (FWCE 598 Special Research Programs or FWCE 599 Master’s Thesis). Students electing a minor in FWCE are required to take at least 9 credits in the minor field. A nonthesis option is available to some students, depending on prior training and experience, and subject to approval by the advisor and department head.

All students in the program must complete the following requirements:

- A ST 505 Statistical Inference I (or equivalent)
- One semester of Graduate Seminar (FWCE 515 Graduate Seminar - may be repeated for credit)
- A minimum of 3 additional credits from the Quantitative Methods category in addition to A ST 505 Statistical Inference I (eligible courses listed below)
- One course each from the Ecological Concepts, Organismal Biology and Ecological Techniques categories (eligible courses listed below)
- 4 to 9 credits from the Independent Study category (eligible courses listed below)

In addition, a student may petition to have up to 3 credits of special topics courses (FWCE 548 Graduate Problems) to apply to one of the three areas. Courses other than those listed may be acceptable, given permission by the student’s supervisory committee.

### Wildlife Science - Undergraduate Minor

The Department offers a minor in Wildlife Science for students majoring in other disciplines. The minor consists of a minimum of 18 credit hours.

### Fish, Wildlife and Conservation Ecology - Master of Science

The Department of Fish, Wildlife and Conservation Ecology (FWCE) offers graduate work leading to the Master of Science degree with a major in Fish, Wildlife and Conservation Ecology. Faculty members in the department also may advise Ph.D. candidates through the graduate programs in the Department of Biology, Department of Animal and Range Sciences, Department of Plant and Environmental Sciences, as well as other Ph.D. granting departments. For additional information please see the graduate catalog entries for the respective departments.

For the Master of Science degree, a minimum of 30 semester credits of graduate work in the major and related subjects is required, together with a thesis for most students. Of these credits, at least 15 must be in courses numbered 500 or above, and at least 15 must be for courses with the FWCE prefix. Those programs involving a thesis or research project include 4 to 6 credits of research (FWCE 598 Special Research Programs or FWCE 599 Master’s Thesis). Students electing a minor in FWCE are required to take at least 9 credits in the minor field. A nonthesis option is available to some students, depending on prior training and experience, and subject to approval by the advisor and department head.

All students in the program must complete the following requirements:

- A ST 505 Statistical Inference I (or equivalent)
- One semester of Graduate Seminar (FWCE 515 Graduate Seminar - may be repeated for credit)
- A minimum of 3 additional credits from the Quantitative Methods category in addition to A ST 505 Statistical Inference I (eligible courses listed below)
- One course each from the Ecological Concepts, Organismal Biology and Ecological Techniques categories (eligible courses listed below)
- 4 to 9 credits from the Independent Study category (eligible courses listed below)

In addition, a student may petition to have up to 3 credits of special topics courses (FWCE 548 Graduate Problems) to apply to one of the three areas. Courses other than those listed may be acceptable, given permission by the student’s supervisory committee.

### Ecological Concepts: Eligible Courses

Select one course each from the Ecological Concepts, Organismal Biology and Ecological Techniques categories (eligible courses listed below)

- A ST 503 | SAS Basics | |
- A ST 506 | Statistical Inference II | |
- A ST 507 | Advanced Regression | |
- A ST 515 | Statistical Analysis with R | |
- A ST 550 | Special Topics | |
- FWCE 509 | Population Ecology (s) | |
- FWCE 457 | Ecological Biometry | |
- GEOG 585 | Advanced Spatial Analysis | |

### Organismal Biology: Eligible courses

Select one course each from the following:

- BIOL 484 | Animal Communication | |
- BIOL 489 | Genetic Aspects of Population Biology | |
- BIOL 568 | Communities and Ecosystems | |
- BIOL 587 | Behavioral and Evolutionary Ecology | |
- BIOL 488 | Principles of Conservation Genetics | |
- FWCE 459 | Aquatic Ecology | |
- FWCE 540 | Wildlife Habitat Relationships | |
- GEOG 557 | Fundamentals of Biogeography | |

### Fish, Wildlife and Conservation Ecology - Master of Science

The Department of Fish, Wildlife and Conservation Ecology (FWCE) offers graduate work leading to the Master of Science degree with a major in Fish, Wildlife and Conservation Ecology. Faculty members in the department also may advise Ph.D. candidates through the graduate programs in the Department of Biology, Department of Animal and Range Sciences, Department of Plant and Environmental Sciences, as well as other Ph.D. granting departments. For additional information please see the graduate catalog entries for the respective departments.

For the Master of Science degree, a minimum of 30 semester credits of graduate work in the major and related subjects is required, together with a thesis for most students. Of these credits, at least 15 must be in courses numbered 500 or above, and at least 15 must be for courses with the FWCE prefix. Those programs involving a thesis or research project include 4 to 6 credits of research (FWCE 598 Special Research Programs or FWCE 599 Master’s Thesis). Students electing a minor in FWCE are required to take at least 9 credits in the minor field. A nonthesis option is available to some students, depending on prior training and experience, and subject to approval by the advisor and department head.

All students in the program must complete the following requirements:

- A ST 505 Statistical Inference I (or equivalent)
- One semester of Graduate Seminar (FWCE 515 Graduate Seminar - may be repeated for credit)
- A minimum of 3 additional credits from the Quantitative Methods category in addition to A ST 505 Statistical Inference I (eligible courses listed below)
- One course each from the Ecological Concepts, Organismal Biology and Ecological Techniques categories (eligible courses listed below)
- 4 to 9 credits from the Independent Study category (eligible courses listed below)

In addition, a student may petition to have up to 3 credits of special topics courses (FWCE 548 Graduate Problems) to apply to one of the three areas. Courses other than those listed may be acceptable, given permission by the student’s supervisory committee.

### Quantitative Methods: Eligible Courses

Select minimum of 3 credits from the following:

- A ST 503 | SAS Basics | 3 |
- A ST 506 | Statistical Inference II | |
- A ST 507 | Advanced Regression | |
- A ST 515 | Statistical Analysis with R | |
- A ST 550 | Special Topics | |
- FWCE 509 | Population Ecology (s) | |
- FWCE 457 | Ecological Biometry | |
- GEOG 585 | Advanced Spatial Analysis | |

### Ecological Concepts: Eligible Courses

Select one from the following:

- BIOL 467 | Evolution | 3-4 |
- BIOL 484 | Animal Communication | |
- BIOL 489 | Genetic Aspects of Population Biology | |
- BIOL 568 | Communities and Ecosystems | |
- BIOL 587 | Behavioral and Evolutionary Ecology | |
- BIOL 488 | Principles of Conservation Genetics | |
- FWCE 459 | Aquatic Ecology | |
- FWCE 540 | Wildlife Habitat Relationships | |
- GEOG 557 | Fundamentals of Biogeography | |

### Organismal Biology: Eligible courses

Select one from the following:

- FWCE 530 | Large Mammal Ecology, Conservation and Management | 3-4 |
- FWCE 532 | Environmental Biology of Fishes | |
- FWCE 536 | | |
- FWCE 567 | Herpetology | |
Fish, Wildlife and Conservation Ecology - Graduate Minor

A minor in Fish, Wildlife, and Conservation Ecology requires 9 credits of graduate coursework that carries the FWCE prefix. Official minor documentation must be completed with the Department of Fish, Wildlife and Conservation Ecology. Students wishing to obtain a graduate minor in Fish, Wildlife and Conservation Ecology (FWCE) must: 1) obtain approval from the Department Head of the Department of Fish, Wildlife and Conservation Ecology Department Head; 2) have a FWCE faculty member as part of their graduate advisory committee; FWCE faculty member needs to approve the proposed program of study for the minor; 3) complete a minimum of 9 credit hours in graduate level (500) classes with the FWCE prefix. FWCE 509 Population Ecology (s) (3 s.h.) is required, plus an additional 6 credit hours.

Total Credits: 9-10

Plant and Environmental Sciences

Undergraduate Program Information

The undergraduate program in Plant and Environmental Science prepares you for a variety of careers in agriculture and related fields. Accordingly, a flexible curriculum has been designed that will allow specific programs to be developed in consultation with your academic advisor. Programs may also be developed if you wish to prepare for advanced studies in graduate school. In addition to the courses listed for each major, 35 credits must be taken in the College of Agricultural, Consumer and Environmental Sciences, and the university general education requirements must be met.

The minors require a minimum of 18 credits of which at least 9 hours must be at the 300 or higher level. Specific coursework requirements apply. See advisor for course requirements and scheduling.

Graduate Program Information

More than ever, we are linked in an interconnected world: both in agriculture and sustainability of environmental systems. The department has programs in:

- plant sciences,
- environmental science,
- soil science,
- water management,
- natural resources management and
- turf management.

Students trained in these areas are in demand for U.S. and international positions. This demand is at all levels of training—BS, MS, and Ph.D. Therefore, the course work and original research in Plant and Environmental Sciences leading to the Master of Science and Doctor of Philosophy are designed for and have proven to be successful in preparing students for commercial companies, educational institutions, governmental agencies and private production enterprises.

The student may emphasize study in several discipline areas described in the following pages:

- The agronomy section emphasizes sustainable crop production, plant-pest/disease/weed interactions, soil-water-plant relations, crop physiology, and breeding and genetics of cotton, alfalfa, maize and peanuts.
• The genetics section places special emphasis on genetic basis of agronomic or horticultural traits, applied bioinformatics, gene regulation and genomics.

• The environmental and soil science sections emphasize environmental quality and ecosystem services, bioremediation, recycling of organic wastes and wastewater, water use efficiency, soil-plant relations, soil-geomorphology and desert ecology, and the fertility, chemistry, physics, and microbiology of soils, including forest soils.

• The horticulture section emphasizes the creative use of plants by humans, and studies on the technical advancements in the husbandry of most economic commodity groups of fruits, vegetables, or ornamentals as well as managed turf. Emphasis may be in breeding and genetics of chile or onions, plant growth and development, nutrition, dormancy and cold hardiness, plant stress (water and/or salinity) response, fruit and vegetable physiology, forestry, and turfgrass.

Most students will be expected to complete a thesis. The research detailed in a thesis should be of a scope and quality to merit publication in a refereed journal. Depending on prior training and experience, a non-thesis option is available subject to approval by a departmental committee. The non-thesis option requires completion of a research project and paper of limited scope. In both the thesis and non-thesis options, suitability of the research project and resulting thesis or paper will be judged by the student’s graduate committee. A minor is recommended and may be taken in chemistry, biology, molecular biology, environmental management, applied statistics, toxicology or other areas.

Prerequisite to major graduate work is completion of a curriculum essentially equivalent to that required by the department for the BS degree at New Mexico State University.

Degrees for the Department

Bachelor Degree(s)

Agronomy - Bachelor of Science in Agriculture (p. 220)

Horticulture - Bachelor of Science in Agriculture (p. 226)

Soil Science (Environment & Resource Management) - Bachelor of Science in Agriculture (p. 228)

Soil Science (Soils) - Bachelor of Science in Agriculture (p. 231)

Turfgrass Science and Management - Bachelor of Science in Agriculture (p. 235)

Environmental Science - Bachelor of Science in Environmental Science (p. 222)

Genetics and Biotechnology - Bachelor of Science in Genetics (p. 224)

Master Degree(s)

Horticulture - Master of Science (p. 241)

Plant and Environmental Science - Master of Science (p. 241)

Doctoral Degree(s)

Plant and Environmental Science - Doctor of Philosophy (p. 241)

Minors for the Department

Agronomy - Undergraduate Minor (p. 240)

Environmental Science - Undergraduate Minor (p. 240)

Genetics and Biotechnology - Undergraduate Minor (p. 240)

Horticulture - Undergraduate Minor (p. 240)

Soil Science - Undergraduate Minor (p. 240)

Turfgrass Science and Management - Undergraduate Minor (p. 240)

Regents Professor, Rolston St. Hilaire, Department Head

Professors Angadi, Cramer, Guldian, Hanan, Heerema, Idowu, Leinauer, Marsalis, Picchioni, Pratt, Puppala, Ray, Shukla, Uleri, Yao, Zhang;

Associate Professors Burney, Darapuneni, Flynn, Goss, Grover, Holguin, Lombard, Walker; Assistant Professors Brungard, Djamian, Ghimire, Giese, Guzman, Lozada, Pietrasiak, Thompson; College Professors Lauriault, Stringam; College Associate Professor DuBois, Steele; College Assistant Professors Gioannini, Research Associate Professor Webb; Research Assistant Professor Edwards, Rodriguez-Uribe; Emeritae O’Connell; Sengupta-Gopalan Emeritus Bosland, Mexal, Monger, O’Neill; Affiliate faculty Rucker

R. St. Hilaire, Department Head, Ph.D. (Iowa State University)—plant stress physiology and landscape horticulture; S. Angadi, Ph.D. (University of Manitoba, Canada)—crop physiology; W. Boeing, Ph.D. (Louisiana State University)—aquatic ecology; C. Brungard, Ph.D. (Utah State University, Logan)—pedology; O. Burney, Ph.D. (Purdue University, West Lafayette)—silviculture and forest biology; K. C. Carroll, Ph.D. (University of Arizona)—hydrology and water resources; C. S. Cramer, Ph.D. (North Carolina State University)—onion breeding and horticulture; M. Darapuneni, Ph.D. (Texas A&M, College Station)—Agronomy and semi-arid crop rotations; K. Djamian, Ph.D. (University of Nebraska-Lincoln)—soil & water resources and irrigation engineering; D. DuBois, Ph.D. (University of Nebraska)—atmospheric science; B. Edwards, Ph.D. (Louisiana State University)—geomorphology, Aeolian processes; R. Flynn, Ph.D. (Auburn University)—soil and water quality; R. Ghimire, Ph.D. (University of Wyoming, Laramie)—silviculture; R. Gioannini, M.S. (New Mexico State University)—ornamental horticulture, landscape design; R. M. Goss, Ph.D. (University of Nebraska, Lincoln)—turf science; K. Grover, Ph.D. (Pennsylvania State University)—agronomy; S. J. Guldian, Ph.D. (University of Minnesota)—sustainable agriculture; J. Guzman, Ph.D. (New Mexico State University)—horticulture; N. Hanan, Assistant Professor Emeritus; C. C. Huber, Ph.D. (Queen Mary College, UK)—dryland ecology; R. J. Heerema, Ph.D. (University of California, Davis)—pecans; F. O. Holguin, Ph.D. (New Mexico State University)—biochemical analysis; J. Idowu, Ph.D. (Cranfield University, United Kingdom)—agronomy and land management; B. Leinauer, Ph.D. (Hohenheim University, Germany)—turfgrass; K. Lombard, Ph.D. (New Mexico State University)—horticulture; D. Lozada Ph.D. (University of Arkansas, Fayetteville)—plant and molecular biology; M. Marsalis, Ph.D. (Texas Tech University)—forages; G. A. Picchioni, Ph.D. (Texas A&M University)—plant-mineral relations; N. Pietrasiak, Ph.D. (University of California, Riverside)—soil and water sciences; R. Pratt, Ph.D. (Purdue University)—plant breeding and genetics; N. Puppala, Ph.D. (New Mexico State University)—plant breeding and genetics; I. M. Ray, Ph.D. (University of Wisconsin-Madison)—alfalfa breeding and genetics; L. Rodriguez-Uribe, Ph.D. (New Mexico State University)—molecular genetics; D. Rucker, Ph.D. (University of Arizona)—hydrogeophysics; M. K. Shukla, Ph.D. (University of Agricultural Sciences Vienna, Austria)—environmental soil physics; B. Stringam, Ph.D. (Utah State University)—biological and agricultural engineering; C. Steele, Ph.D. (King’s College, University of London, United Kingdom)—range soils;
M. Thompson, Ph.D. (New Mexico State University)—horticulture; A.L. Ulery, Ph.D. (University of California, Riverside)—environmental soil chemistry; S. J. Walker, Ph.D. (New Mexico State University)—horticulture; N. Webb Ph.D. (University of Queensland, Australia)—aeolian process, land degradation processes and rangeland management; S. Yao, Ph.D. (Cornell University)—pomology/horticulture; J. Zhang, Ph.D. (University of Arkansas, Fayetteville)—cotton breeding, genetics, and genomics

Emeritus
P.W. Bosland, Ph.D. (University of Wisconsin, Madison)—chile breeding and genetics; J.G. Mixel, Ph.D. (Colorado State University)—plant physiology; M. O’Neill, Ph.D. (University of Arizona, Tucson)—agronomy and crop physiology; C.H. Monger, Ph.D. (New Mexico State University)—soil genesis and classification

Agronomy Courses

**AGRO 1110G. Introduction to Plant Science (Lecture & Lab)**
4 Credits (3+2P)
This is an introductory course for understanding plant science. Basic biological, chemical, and physical principles of various plants are covered. The focus of this course is on plants/crops used in agriculture production of food and fiber as well as pasture and range plants. Plant taxonomy and soil properties will also be discussed. Same as HORT 1115G.

**Learning Outcomes**
1. Describe the basic structure of plants including growth and function.
2. Define photosynthesis, respiration, and translocation
3. Utilize plant taxonomy techniques to identify various plants.
4. Classify soils based on their chemical and physical properties.
5. Explain how different soil properties affect plant growth and sustainability.

**AGRO 2160. Plant Propagation**
3 Credits (2+2P)
Practical methods of propagating horticultural plants by seed, cuttings, layering, grafting, division and tissue culture. Examination of relevant physiological processes involved with successful plant propagation techniques. Crosslisted with HORT 2160.

**Learning Outcomes**
1. Practical methods of propagating plants by seed, cuttings, layering, grafting, division, and tissue culture through experiential, “hands-on” laboratories.
2. Relevant physiological principles involved in propagating horticultural plants through lecture discussions
3. and readings.

**AGRO 2996. Special Topics**
1-4 Credits (1-4)
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

**Learning Outcomes**
1. Varies

**AGRO 300. Special Topics**
1-4 Credits (1-4)
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

**AGRO 303V. Genetics and Society**
3 Credits (3)
Relates the science of genetics with social ramifications. Ways in which genetics and evolution interact with social, political, and economic issues. Includes genetic engineering, gene therapy, DNA fingerprinting, ancient DNA, plant and animal improvement, and future prospects. Students required to formulate value judgments on contemporary biological issues that will impact society. Crosslisted with: GENE 303V.

**AGRO 305. Principles of Genetics**
3 Credits (3)
Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: ANSC 305, BIOL 305, HORT 305 and GENE 305.

**Prerequisite(s):** BIOL 2610G, BIOL 2110G and either CHEM 1215G or CHEM 1216.

**AGRO 311. Introduction to Weed Science**
4 Credits (4)
Principles of weed science with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Identification of local weeds. Same EPWS 311.

**Prerequisite:** CHEM 1215G and BIOL 2110G.

**AGRO 315. Crop Physiology**
3 Credits (3)
Whole plant physiological processes as related to growth, development, yield, quality and post harvest physiology of crop plants within the environment of the crop community. Crosslisted with: HORT 315

**Prerequisite(s):** EPWS/BIOL 314 or consent of instructor.

**AGRO 365. Principles of Crop Production**
4 Credits (3+3P)
Basic principles of crop production including environmental and physiological factors limiting production, plant nutrition and soil science, soil-water management, cropping systems and management, pest management, and economic factors influencing crop production. Crosslisted with: HORT 365

**Prerequisite(s):** AGRO 1110G/HORT 1115G, CHEM 1215G or equivalent and MATH 1215 or equivalent.

**AGRO 377. Introduction to Turfgrass Management**
4 Credits (3+3P)
Establishment and maintenance of turfgrass with emphasis on seeding methods, soil and water management, mowing, disease, insects and turfgrass varieties. Consent of instructor required. Crosslisted with: HORT 377

**AGRO 391. Internship**
1-6 Credits
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/U, Audit).

**Prerequisite(s):** Consent of instructor.
AGRO 447. Seminar
1 Credit (1)
Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: HORT 447, ENVS 447 and SOIL 447.

AGRO 449. Special Problems
1-3 Credits (1-3)
Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

AGRO 450. Special Topics
1-4 Credits (1-4)
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

AGRO 462. Plant Breeding
3 Credits (3)
Principles and practices involved with the genetic improvement of plants. May be repeated up to 3 credits.
Prerequisite(s): ANSC/AGRO/BIOL/HORT/GENE 305 or GENE 315 and GENE 320.

AGRO 471. Plant Mineral Nutrition
3 Credits (3)
Basic and applied aspects of plant requirements for soil-derived minerals and the processes whereby minerals are acquired, absorbed, translocated, and utilized throughout the plant. Same as HORT 471 and EPWS 471.
Prerequisite: EPWS/BIOL 314, or concurrent enrollment, or consent of instructor.

AGRO 473. Sustainable Production of Agronomic Crops
4 Credits (3+2P)
Characteristics and objectives of sustainable agricultural systems with application to the production, utilization, and improvement of cereal grain, fiber, forage and oilseed crops.
Corequisite(s): AGRO 365/ HORT 365.

AGRO 492. Diagnosing Plant Disorders
3 Credits (2+3P)
Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as EPWS 492 and HORT 492.
Prerequisites: EPWS 303 and EPWS 310.

AGRO 500. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

AGRO 505. Research Orientation
4 Credits (3+2P)
Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: HORT 505, SOIL 505 and ENVS 505.

AGRO 506. Plant Genetics
3 Credits (3)
Advanced treatment of the principles of classical genetics and heredity with emphasis on the nature and action of the gene including molecular analysis. May be repeated up to 3 credits. Crosslisted with: HORT 506.
BCHE 341 recommended.
Prerequisite(s): AGRO 305/GENE 305/HORT 305/BIOL 305/ANSC 305 or consent of instructor.

AGRO 511. Introduction to Weed Science (f)
4 Credits (4)
Covers the principles of weed science with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Includes identification of local weeds. Research paper required for graduate credit. Same as EPWS 511.
Prerequisites: CHEM 1215G or BIOL 2110G, or consent of instructor.

AGRO 515. Crop Physiology
3 Credits (3)
Whole plant physiological processes as related to growth, development, yield, quality and post harvest physiology of crop plants within the environment of the crop community. Crosslisted with: HORT 515
Prerequisite(s): EPWS/BIOL 314 or consent of instructor.

AGRO 516. Molecular Analysis of Complex Traits
3 Credits (3)
Provide a comprehensive overview of molecular genetic analysis of complex phenotypes, including case histories/experiments in plants, animals and humans. Emphasize technological developments in DNA marker technologies and their application to molecular quantitative genetics. Explore the efficient application of these technologies in the future to complex genetic systems, breeding, and other areas of life sciences. Same as HORT 516.
Prerequisite: AGRO 305 or consent of instructor.

AGRO 525. Scientific Writing- How to be a Productive and Effective Writer
1-3 Credits (1-3)
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: HORT 525, EPWS 525, SOIL 525, AGRO 625, HORT 625 and SOIL 625.

AGRO 590. Graduate Seminar
1 Credit (1)
Current research discussions presented by masters level graduate students. Not more than one credit toward the degree. Same as HORT/ SOIL 590. Crosslisted with: HORT 590 and SOIL 590.

AGRO 595. Internship
1-6 Credits
Supervised professional on-the-job learning experience. Limited to Master of Agriculture candidates. Not more than 6 credits toward the degree.

AGRO 596. Masters Proposal
1 Credit (1)
Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: ENVS 596, GENE 596, HORT 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.
Prerequisite(s): Master level graduate students.
AGRO 597. University Teaching Experience
1-3 Credits (1-3)
Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ES course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Restricted to: Main campus only. Restricted to Agronomy and Horticulture Graduate Students. Crosslisted with: HORT 597 and SOIL 597

AGRO 598. Special Research Programs
1-6 Credits
Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits towards degree. Same as SOIL 598.

AGRO 599. Master's Thesis
15 Credits
Thesis.

AGRO 600. Doctoral Research
1-15 Credits
Research.

AGRO 609. Breeding for Plant Disease Resistance
3 Credits (3)
A practically-oriented course of lectures and discussion on concepts and principles of breeding for disease and pest resistance. Labs familiarize students with preparation, quantification, and application of inoculum to hosts. Same as HORT 609.

AGRO 610. Advanced Crop Breeding
4 Credits (3+3P)
Applications of breeding principles to crop improvement. Emphasis on breeding methodologies using modern techniques, including biotechnology. Same as HORT 610.
Prerequisite: AGRO 462 or consent of instructor.

AGRO 620. Instrumentation in Agronomy
3 Credits (3)
Use of instruments used in research in all areas of agronomy including gas chromatography, high performance liquid chromatography, neutron soil moisture probe, and other instruments. Same as HORT/SOIL 620.

AGRO 625. Scientific Writing- How to be a Productive and Effective Writer
1-3 Credits (1-3)
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Students in the 600-level course will be required to perform additional research than those students in the 500-level cross-listing. Crosslisted with: AGRO 525, HORT 525, EPWS 525 and SOIL 525.

AGRO 670. Biometrical Genetics and Plant Breeding
3 Credits (3)
A statistical approach to gene action and population parameters as applied to plant improvement. Same as HORT 670.
Prerequisite: AGRO 462 or consent of instructor.

AGRO 694. Doctoral Seminar
1 Credit (1)
Current research discussions presented by doctoral level graduate students. Not more than 2 credits toward the degree. Same as SOIL 694.
Prerequisite: doctoral level graduate students.

AGRO 696. Doctoral Proposal
1 Credit (1)
Current research proposal written by doctoral level graduate students. Not more than 1 credits toward the degree. May be repeated up to 1 credits. Crosslisted with: ENVS 696, AGRO 696, HORT 696 and SOIL 696.
Prerequisite(s): Doctoral level graduate students.

AGRO 697. University Teaching Experience
1-3 Credits (1-3)
Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: HORT 697 and SOIL 697

AGRO 698. Topics in Agronomy
1-6 Credits
Topics of current interest, designated by title and credit. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

AGRO 700. Doctoral Dissertation
15 Credits
Dissertation.

Environmental Science Courses

ENVS 1110G. Environmental Science I
4 Credits (3+2P)
Introduction to environmental science as related to the protection, remediation, and sustainability of land, air, water, and food resources. Emphasis on the use of the scientific method and critical thinking skills in understanding environmental issues.

Learning Outcomes
1. Students will learn to critically analyze cause-and-effect relationships in the environment
2. Students will integrate and synthesize knowledge and draw appropriate conclusions based on the scientific method

ENVS 2111. Environmental Engineering and Science
3 Credits (3)
Principles in environmental engineering and science: physical chemical systems and biological processes as applied to pollution control. Crosslisted with: C E 256
Prerequisite: CHEM 1215G and MATH 1511G or ENGR 190.

Learning Outcomes
1. To understand the nature of water quality parameters in the context of Civil Engineering and Environmental Science (Water Treatment/Wastewater Treatment/Environmental Science) To learn to apply engineering and scientific solutions to water quality problems To understand environmental regulations and their consequences on the design of pollution control systems
ENVS 2111L. Environmental Science Laboratory
1 Credit (1)
Laboratory experiments associated with the material presented in ENVS 2111. Same as C E 256 L.
Corequisite(s): ENVS 2111.
Learning Outcomes
1. List typical analyses commonly performed to evaluate physical, chemical, and microbiological parameters used to describe water quality.
2. Follow experimental procedures listed in the class laboratory manual, or other publications such as Standards Methods, to perform common water quality analyses.
3. Evaluate, analyze, and discuss experimental results and present the conclusions in the form of a professional report

ENVS 300. Special Topics
1-4 Credits
Special subjects and credits to be announced in the Schedule of Classes. Consent of instructor required. Maximum of 4 credits per semester. Restricted to majors.

ENVS 301. Principles of Ecology
3 Credits (3)
A survey of ecology including general theory, the adaptations of organisms, population dynamics, species interactions, and the structure and function of natural communities and ecosystems. Crosslisted with: BIOL 301
Prerequisite(s): BIOL 2610G, A ST 311, and grade of C or better in MATH 1511G or Math Placement Exam score adequate to enroll in mathematics courses beyond MATH 1511G.

ENVS 312. Emergency Response to Hazardous Material Incidents
2 Credits (2)
EPA approved Environmental Response Training Program Course 165.15. In compliance with OSHA 29 CFR 1910.120. Normally taken during last year of study. Same as E T 312 and WERC 312.
Prerequisite: consent of instructor.

ENVS 361. Basic Toxicology
3 Credits (3)
Same as TOX 361.
Prerequisite: CHEM 1120G or CHEM 1225G and BIOL 1190G.

ENVS 370. Environmental Soil Science
3 Credits (3)
Continuation of SOIL 2110 that emphasizes soil properties and processes that directly relate to environmental pollution problems. Same as SOIL 370.
Prerequisite: SOIL 2110.

ENVS 391. Internship
3 Credits (3)
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. Maximum of 3 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/ U, Audit).

ENVS 422. Environmental Chemistry
3 Credits (3)
Chemistry of organic and metal ion pollutants in the environment and principles important to their remediation including bioremediation. Restricted to: Main campus only. Crosslisted with: CHEM 422
Prerequisite(s): CHEM 1225G and either CHEM 2115 or CHEM 313.

ENVS 447. Seminar
1 Credit (1)
Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, HORT 447 and SOIL 447.

ENVS 449. Special Problems
1-3 Credits
Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and 6 credits toward a degree. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: E S majors.

ENVS 451. Special Topics
1-4 Credits (1-4)
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

ENVS 452. Geohydrology
4 Credits (3+2P)
Origin, occurrence, and movement of fluids in porous media and assessment of aquifer characteristics. Development and conservation of ground water resources, design of well fields. Crosslisted with: C E 452 and GEOL 452.

ENVS 457. Water Measurement
3 Credits (3)
The fundamentals of measuring water will be covered. Participants will learn about measurement techniques that are used to estimate evapotranspiration as well as commonly used water measurement structures to estimate water use. The benefits and problems that are associated with using each measurement will be discussed. Students will also learn about the principles of how to use water measurement as a management tool.
Prerequisite(s): MATH 1215 or higher, or consent of Instructor.

ENVS 460. Introduction to Air Pollution
3 Credits (3)
An introduction to the physics and chemistry of tropospheric air pollution including sources of air pollution, local and long-range transport, instrumentation, regulatory requirements, control technology.
Prerequisite(s): PHYS 1310G, CHEM 1225G, MATH 1511G.

ENVS 462. Sampling and Analysis of Environmental Contaminants
3 Credits (1+6P)
Theory, application, methodology, and instrumentation used in the sampling and analysis of environmental contaminants. Same as ENVE 462.
Prerequisites: ENVS 2111.
ENVS 470. Environmental Impacts of Land Use and Contaminant Remediation
3 Credits (3)
The course will cover the integrated assessment of soil erosion, contaminant transport in soil and water, and contaminant remediation from site scale to watershed scales. Understanding of the controlling factors for each type land use impact will be gained through the use of risk assessment, case studies, and computer modeling. Case studies will illustrate the processes under various environmental applications. This course will also cover the application of solute transport principles and methods for the remediation of contaminated soil and groundwater. It will also discuss the contaminated site characterization, monitoring, and remediation design. Discussions of innovative methodologies will be supported with case studies. May be repeated up to 3 credits. Crosslisted with: WSAM 470.
Prerequisite(s): ENVS 2111, ENVS 370, ENVS 452, ENVS 462.

ENVS 471. Water Quality and Geochemistry
3 Credits (3)
We will cover the connection of water chemistry with water quality and apply geochemical modeling to practical problems. Discussions of assessment methodologies will be supported with case studies. The focus of this course is on team-based project learning. Computer software and models (mainly PHREEQC from USGS) will be used to learn analysis techniques.
Prerequisite(s): ENVS 370 or ENVS 452 or consent of instructor.

ENVS 505. Research Orientation
4 Credits (4)
Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: AGRO 505, HORT 505 and SOIL 505.

ENVS 557. Water Measurement
3 Credits (3)
The fundamentals of measuring water will be covered. Participants will learn about measurement techniques that are used to estimate evapotranspiration as well as commonly used water measurement structures to estimate water use. The benefits and problems that are associated with using each measurement will be discussed. Students will also learn about the principles of how to use water measurement as a management tool.

ENVS 596. Masters Proposal
1 Credit (1)
Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, GENE 596, HORT 596 and SOIL 596. Restricted to: Masters PLEN and SOIL majors.
Prerequisite(s): Master level graduate students.

ENVS 599. Master's Thesis
1-15 Credits

ENVS 605. Arid Land Water Resources
3 Credits (2+2P)
The course will cover various issues of relevance to water resources and water supply management within the Southwest US and other semiarid and arid regions. Discussions may include development and sustainability, climate change and drought, socioeconomic and cultural, and transboundary issues. Students will develop literature reviews, draft proposals, and conduct presentations. May be repeated up to 3 credits. Crosslisted with: WSAM 605.

ENVS 696. Doctors Proposal
1 Credit (1)
Current research proposal written by PhD level graduate students. Consent of Instructor required. Crosslisted with: AGRO 696, HORT 696 and SOIL 696. Restricted to: Doctors PLEN majors.
Prerequisite(s): PhD level graduate students.
ENVS 700. Doctoral Dissertation
1-15 Credits

Genetics Courses
GENE 1110. Experimental Systems in Genetics
1 Credit (1)
Survey of molecular, biochemical, organismal, and computer science based approaches to investigate how genes determine important traits. Historical development and topics of current interest will be discussed.

Learning Outcomes
1. To give the students a historical perspective on the field of genetics.
2. To familiarize the students to introductory concepts and vocabulary to the field of genetics.
3. Introduce experimental systems within the field of genetics and to give perspective to current genetic research.
4. As this course is designed for beginning students as an overview of faculty and research labs on campus. The students majoring in genetics are encouraged to meet with faculty and to explore opportunities available to them on campus

GENE 305. Principles of Genetics
3 Credits (3)
Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: AGRO 305, ANSC 305, BIOL 305 and HORT 305
Prerequisite(s): BIOL 2610G, BIOL 2110G and either CHEM 1215G or CHEM 1216.

GENE 305 L. Genetic Techniques
1 Credit (3P)
Experimental procedures used in genetic research including: sexual transmission genetics, eukaryotic DNA isolation, DNA marker development and genotyping, polymerase chain reaction, and cytogenetics.
Prerequisite(s)/Corequisite(s): GENE 315, or AGRO/ANSC/Biol/HORT 305.

GENE 315. Molecular Genetics
3 Credits (3)
Covers fundamental principles of DNA structure and replication, transcription, translation, gene regulation, recombinant DNA technology, and a survey of genomics and bioinformatics. Recommend CHEM 313.
Prerequisite(s): CHEM 1225G and BIOL 2110G.

GENE 320. Hereditary and Population Genetics
3 Credits (3)
Covers fundamental principles of reproduction, variation, and heredity in plants and animals including: Mendelian inheritance, mitosis, meiosis, genetic linkage, random mating, genetic drift, natural selection, inbreeding, migration, mutation, interrelationships between individuals, populations and communities and the environment.
Prerequisite(s): CHEM 1215G & BIOL 2110G.
GENE 391. Genetics Internship
1-6 Credits (1-6)
Professional work experience in genetics under the joint supervision of an employer and a faculty member. Documentation of proposed internship activities must be submitted prior to the start of the internship. A written report is required after the internship is completed. No more than 6 credits toward a degree. May be repeated up to 6 credits. Graded: S/U Grading (S/U, Audit).

GENE 440. Genetics Seminar
1 Credit (1)
Organization, preparation, and presentation of genetic studies in model microorganism, plant, or animal systems that have been used to solve problems in molecular, cellular, and developmental biology. Consent of instructor required.
Prerequisite(s): Seniors only; GENE 315 & GENE 320.

GENE 449. Special Problems
1-3 Credits (1-3)
Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 3 credits toward a degree. Consent of instructor required.

GENE 450. Special Topics
1-3 Credits (1-3)
Specific subjects to be announced in the schedule of classes. Maximum of 3 credits per semester and a total of 3 credits toward a degree. Consent of instructor required.

GENE 452. Applied Bioinformatics
3 Credits (3)
Survey and application of publicly available bioinformatic tools that treat genomic DNA, cDNA, and protein sequences, RNA abundance, as well as tools that allow inference based on phylogenetic relationships.
Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315 and GENE 320, and BCHE 341, or BCHE 395.

GENE 486. Genes and Genomes
3 Credits (3)
Extensive coverage of nuclear and organelle genome structure in plants and animals, genome restructuring including duplication, aneuploidy, chromosome translocations and inversions, comparative genomics, and molecular systematics.
Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315, and GENE 320.

GENE 488. Gene Regulation
3 Credits (3)
Extensive coverage of signal transduction processes and approaches used to monitor large scale changes in gene regulation and protein synthesis that occur during development and in response to environmental changes.
Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315.

Horticulture Courses

HORT 1110G. Introductory Plant Science
4 Credits (3+2P)
Introduction to the physical, biological, and chemical principles underlying plant growth and development in managed ecosystems. In the laboratory portion of the class, students perform experiments demonstrating the principles covered in lecture. The course uses economic plants and agriculturally relevant ecosystems to demonstrate basic principles. Appropriate for nonscience majors. Same as AGRO 1110G.

Learning Outcomes
1. Describe the role plants play in everyday lives
2. Introduce career opportunities in plant and soil sciences, and related fields
3. Define plants through the concepts of plant structure and anatomy
4. Introduce the wide variety of plants cultivated throughout the world
5. Describe how plants work (growth, reproduction, physiology, and soil)
6. Describe how plants are manipulated to feed, clothe and entertain the world

HORT 2110. Ornamental Plants I
4 Credits (2+3P)
Covers identification, botanical characteristics, culture, and landscape uses of woody plants. Emphasis on deciduous trees, native shrubs, and evergreens.

Learning Outcomes
1. Given 35 ornamental plants selected from the course's plant list, 100% of students will be expected to correctly identify the genus, species, and common names of the plants with 70% accuracy.
2. Given plants selected from the course's plant list, 100% students will be expected to identify to landscape use of those plants with 85% accuracy.

HORT 2120. Ornamental Plants II
4 Credits (2+3P)
Identification, botanical characteristics, culture, and landscape uses of woody plants. Emphasis on flowering trees, cacti, and members of the pea and rose families.

Learning Outcomes
1. Given 35 ornamental plants selected from the course's plant list, 100% of students will be expected to correctly identify the genus, species, and common names of the plants with 70% accuracy.
2. Given plants selected from the course's plant list, 100% students will be expected to identify to landscape use of those plants with 85% accuracy.
HORT 2130. Floral Quality Evaluation and Design
2 Credits (1+2P)
Critical hands-on evaluation of the quality of cut and potted floral and tropical foliage crops, their specific merits and faults, and fundamentals of floral design.

Learning Outcomes
1. Identify common floriculture crops, or know resourcing to help identify the crop.
2. Evaluate quality (merit and fault) of common floriculture crops, based on industry standards and merit. Pi Alpha Xi and American Floral Endowment standards will be used for the purpose of this class.
3. Have a basic understanding of the floriculture industry, and identify career pathways within the industry.
4. Know, understand, creatively interpret, and execute basic principles of design in regards to floral design.
5. Use interpersonal communication, problem solving, basic math, and marketing during cash and carry “lab” time (flower sales) in developing job ready skills in floristry.
6. Layer principles of design, marketing, sales, and time management to create floral art in real-world scenarios.

HORT 2160. Plant Propagation
3 Credits (2+2P)
Practical methods of propagating horticultural plants by seed, cuttings, layering, grafting, division and tissue culture. Examination of relevant physiological processes involved with successful plant propagation techniques. Same as AGRO 2160.

Learning Outcomes
1. Practical methods of propagating plants by seed, cuttings, layering, grafting, division, and tissue culture through experiential, “hands-on” laboratories.
2. Relevant physiological principles involved in propagating horticultural plants through lecture discussions and readings.

HORT 2990. Floriculture Field Practicum
1 Credit (1)
Participation as team member in the National Intercollegiate Floral Quality Evaluation and Design Competition. Intensive week-long travel for competition, networking with industry, academia, and floriculture tours. May be repeated for a maximum of 3 credits.
Prerequisite(s): HORT 2130 or consent of instructor.

Learning Outcomes
1. Varies

HORT 2996. Special Topics
1-4 Credits
Specific subjects and credits as announced. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

Learning Outcomes
1. Varies

HORT 300. Special Topics
1-4 Credits
Specific subjects as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

HORT 302V. Forestry and Society
3 Credits (3)
Global study of the development and use of forest resources for production of wood, fuel, fiber, and food products. Climatic, edaphic, cultural, and economic influences on forests of the world evaluated. Same as RGSC 302V.

HORT 305. Principles of Genetics
3 Credits (3)
Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: AGRO 305, ANSC 305, BIOL 305 and GENE 305
Prerequisite(s): BIOL 2610G, BIOL 2110G and either CHEM 1215G or CHEM 1216.

HORT 307. Landscape Design
3 Credits (2+3P)
Design elements, the design process, and contemporary planting design used in the design of residential and small commercial landscapes. Basic drafting, drawing, and landscape plan presentation techniques. Prerequisites: HORT 2110 or HORT 2120 or concurrent enrollment or consent of instructor.

HORT 310. Medicinal Herbs
3 Credits (3)
Introduction to ethnobotany, including plant cultivation, extraction methods, and analysis of active chemistries.

HORT 315. Crop Physiology
3 Credits (3)
Whole plant physiological processes as related to growth, development, yield, quality and post harvest physiology of crop plants within the environment of the crop community. Crosslisted with: AGRO 315
Prerequisite(s): EPWS/BIOL 314 or consent of instructor.

HORT 365. Principles of Crop Production
4 Credits (3+3P)
Basic principles of crop production including environmental and physiological factors limiting production, plant nutrition and soil science, soil-water management, cropping systems and management, pest management, and economic factors influencing crop production. Crosslisted with: AGRO 365
Prerequisite(s): AGRO 1110G/HORT 1115G, CHEM 1215G or equivalent and MATH 1215 or equivalent.

HORT 377. Introduction to Turfgrass Management
4 Credits (3+3P)
Establishment and maintenance of turfgrass with emphasis on seeding methods, soil and water management, mowing, disease insects and turfgrass varieties. Crosslisted with: AGRO 377

HORT 378. Turfgrass Science
4 Credits (3+3P)
Introduction to the scientific fundamentals for turfgrass management cultural practices, pest management, rootzone construction and ecology. Prerequisite(s): HORT 377 or consent of instructor.

HORT 391. Internship
1-6 Credits
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of instructor required. Graded: S/U. Crosslisted with: AGRO 391 and SOIL 391
HORT 447. Seminar
1 Credit (1)
Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, ENVS 447 and SOIL 447.

HORT 449. Special Problems
1-3 Credits
Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

HORT 450. Special Topics
1-4 Credits
Specific subjects as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

HORT 462. Plant Breeding
3 Credits (3)
Principles and practices involved with the genetic improvement of plants. May be repeated up to 3 credits.
Prerequisite(s): ANSC/AGRO/BIOL/HORT/GENE 305 or GENE 315 and GENE 320.

HORT 471. Plant Mineral Nutrition
3 Credits (3)
Basic and applied aspects of plant requirements for soil-derived minerals and the processes whereby minerals are acquired, absorbed, translocated, and utilized throughout the plant. Same as AGRO/EPWS 471.
Prerequisite: EPWS/BIOL 314, or concurrent enrollment, or consent of instructor.

HORT 479. Advanced Turfgrass Science
3 Credits (3)
Extensive reviews of turfgrass sciences including ecology, physiology, entomology, pathology, weed science, and soil science.
Prerequisite: HORT 378 or consent of instructor.

HORT 485. Vegetable Crop Management
4 Credits (3+2P)
Physiological, environmental and cultural aspects of vegetable crop production. Corequisite(s): AGRO 365/HORT 365

HORT 488. Greenhouse Management
4 Credits (3+3P)
Principles and practices involved in greenhouse structures and construction, site considerations, heating and cooling systems, greenhouse crop production techniques, sustainability practices. May be repeated up to 4 credits.
Prerequisite(s): HORT/AGRO 365 or consent of instructor.

HORT 492. Diagnosing Plant Disorders
3 Credits (2+3P)
Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as EPWS 492 and AGRO 492.
Prerequisites: EPWS 303 and EPWS 310.

HORT 500. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

HORT 505. Research Orientation
4 Credits (3+2P)
Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: AGRO 505, SOIL 505 and ENVS 505.

HORT 506. Plant Genetics
3 Credits (3)
Advanced treatment of the principles of classical genetics and heredity with emphasis on the nature and action of the gene including molecular analysis. May be repeated up to 3 credits. Crosslisted with: AGRO 506, BCHE 341 recommended.
Prerequisite(s): AGRO 305/GENE 305/HORT 305/BIOL 305/ANSC 305 or consent of instructor.

HORT 515. Crop Physiology
3 Credits (3)
Whole plant physiological processes as related to growth, development, yield, quality and post harvest physiology of crop plants within the environment of the crop community. Crosslisted with: AGRO 515
Prerequisite(s): EPWS/BIOL 314 or consent of instructor.

HORT 525. Scientific Writing How to be a Productive and Effective Writer
1-3 Credits (1-3)
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review Crosslisted with: AGRO 525, AGRO 625, EPWS 525, SOIL 625 and SOIL 525.

HORT 530. Graduate Seminar
1 Credit (1)
Current research discussions presented by masters level graduate students. Not more than one credit toward the degree. Same as AGRO/SOIL 590. Crosslisted with: AGRO 590 and SOIL 590.

HORT 590. Internship
1-6 Credits
Supervised professional on-the-job learning experience. Limited to Master of Horticulture or Plant & Environmental Science candidates. Not more than 6 credits toward the degree.

HORT 595. Masters Proposal
1 Credit (1)
Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 595, SOIL 595, GENE 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.
Prerequisite(s): Master level graduate students.

HORT 597. University Teaching Experience
1-3 Credits (1-3)
Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student’s lectures. Consent of instructor required. Crosslisted with: AGRO 597 and SOIL 597

HORT 598. Special Research Programs
1-6 Credits
Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits toward a degree.
Prerequisite: consent of instructor.

HORT 599. Master's Thesis
15 Credits
Thesis.
HORT 609. Breeding for Plant Disease Resistance  
3 Credits (3)  
A practically-oriented course of lectures and discussion on concepts and principles of breeding for disease and pest resistance. Labs familiarize students with preparation, quantification, and application of inoculum to hosts. Same as AGRO 609.

HORT 610. Advanced Crop Breeding  
4 Credits (3+3P)  
Applications of breeding principles to crop improvement. Emphasis on breeding methodologies using modern techniques, including biotechnology. Same as AGRO 610.  
Prerequisite: AGRO 462 or consent of instructor.

HORT 620. Instrumentation in Agronomy  
3 Credits (3)  
Use of instruments used in research in all areas of agronomy including gas chromatography, high performance liquid chromatography, neutron soil moisture probe, and other instruments. Same as AGRO/SOIL 620.

HORT 625. Scientific Writing- How to be a Productive and Effective Writer  
1-3 Credits (1-3)  
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Students in the 625 course will be required to perform additional research than those students in the 525 cross-listing. Crosslisted with: AGRO 525, EPWS 525, HORT 525 and SOIL 525.

HORT 696. Doctors Proposal  
1 Credit (1)  
Current research proposal written by PhD level graduate students. Consent of Instructor required. Crosslisted with: AGRO 696, ENVS 696 and SOIL 696. Restricted to: Doctors PLEN majors.  
Prerequisite(s): PhD level graduate students.

HORT 697. University Teaching Experience  
1-3 Credits (1-3)  
Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student’s lectures. Consent of Instructor required. Crosslisted with: AGRO 697 and SOIL 697.

Soil Courses

SOIL 2110. Introduction to Soil Science  
3 Credits (3)  
An overview of fundamental concepts in soil science and soils as a natural resource. Students will be introduced to the physical, chemical, and biological properties as it relates to soil management in environmental science, conservation, and agronomy. Prerequisite: (CHEM 1120G or MATH 1215 or higher) or CHEM 1215G  
Learning Outcomes  
1. Understand and use the technical terminology associated with the use and management of soils.  
2. Understand the classification of soils and the processes leading to their formation.  
3. Identify key physical, chemical, and biological properties of soils.  
4. Explain the impact of land use and management decisions as it relates to soil degradation and environmental problems.

SOIL 2110L. Introduction to Soil Science Laboratory  
1 Credit (1)  
Morphological, chemical, physical and biological properties of soil in the laboratory and field.  
Prerequisite(s): SOIL 2110.  
Learning Outcomes  
1. Learn techniques for sampling and characterizing soils in the region.  
2. Understand how soils are formed and the processes that occur within the soil profile.  
3. Gain fundamental knowledge on soil physical, chemical, and biological properties and how each can influence the overall function of a particular soil.  
4. Develop critical thinking and analytical skills within laboratory and field settings.  
5. Encourage collaboration, inclusiveness and critical thinking.

SOIL 2996. Special Topics  
1-4 Credits  
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.  
Learning Outcomes  
1. Varies.

SOIL 300. Special Topics  
1-4 Credits  
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

SOIL 312. Soil Management and Fertility  
3 Credits (3)  
Management, conservation, and fertility of soils; physical conditions affecting growth, nutrition, and plant production.  
Prerequisite(s): SOIL 2110.  
Corequisite(s): SOIL 312L.

SOIL 312 L. Soil Management and Fertility Lab  
1 Credit (1)  
Hands-on experience. Includes field trips, videos, calculations, visiting lecturers and other lab activities as possible.  
Prerequisite(s): SOIL 2110.  
Corequisite(s): SOIL 312.

SOIL 370. Environmental Soil Science  
3 Credits (3)  
Continuation of SOIL 2110 that emphasizes soil properties and processes that directly relate to environmental pollution problems. Same as ENVS 370.  
Prerequisite: SOIL 2110.

SOIL 391. Internship  
1-6 Credits (1-6)  
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/U, Audit).
SOIL 424. Soil Chemistry
3 Credits (3)
Basic elements of soil chemistry including clay mineralogy, cation and anion exchange and the chemistry of problem (acid, saline and flooded) soils. Credit not given for both SOIL 424 and SOIL 479.
Prerequisite(s): SOIL 2110L or CHEM 1215G and CHEM 1225G.

SOIL 447. Seminar
1 Credit (1)
Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, HORT 447 and ENVS 447.

SOIL 449. Special Problems
1-3 Credits
Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

SOIL 450. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits towards a degree. May be repeated up to 9 credits. Consent of Instructor required.

SOIL 456. Irrigation and Drainage
3 Credits (3)
Principles and practices required for irrigation to exist as a permanent economy. Equipment and methods for measurement and control of water.

SOIL 472. Soil Morphology and Classification
4 Credits (2+2P)
Terminology used to describe soils. Soil classification systems of the world with emphasis on systems used in the United States. Theory of classification and taxonomy as applied to soils. May be repeated up to 4 credits. Crosslisted with: GEOG 472.
Prerequisite(s): SOIL 2110.

SOIL 476. Soil Microbiology
3 Credits (3)
Nature and physiology of soil microorganisms, how they affect plant growth and recycle nutrients. Land farming, bioremediation and other environmental problems as influenced by soil microorganisms. SOIL 2110 and BIOL 311 recommended. Same as BIOL 476.

SOIL 476 L. Soil Microbiology Laboratory
1 Credit (3P)
Enumeration of soil microorganisms, their activities, and transformations they mediate. Same as BIOL 476L.
Prerequisites: SOIL 476 or concurrent enrollment.

SOIL 477. Environmental Soil Physics
3 Credits (3)
A description of the physical characteristics of porous media including soil. Examination of processes describing the transport of water, chemicals, heat and gases through porous media with application to environmental quality, waste management, and crop production.

SOIL 477 L. Environmental Soil Physics Laboratory
1 Credit (1)
Concurrent enrollment with SOIL 477 recommended. Hands on experience with techniques for characterizing soil physical properties such as particle size distribution, bulk density, water retention, hydraulic conductivity and solute transport. Demonstrations of field and laboratory techniques for measuring moisture content, soil water potential, gas/air flow and thermal conductivity.
Prerequisite(s): SOIL 2110.

SOIL 479. Environmental Soil Chemistry
3 Credits (3)
Basic elements of soil chemistry including discussion of clay mineralogy, cation and anion exchange and the chemistry of problem (acid, saline and flooded) soils. Credit not given for both SOIL 424 and SOIL 479.
Prerequisite(s): SOIL 2110L or CHEM 1215G and CHEM 1225G.

SOIL 500. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

SOIL 505. Research Orientation
4 Credits (3+2P)
Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: HORT 505, AGRO 505 and ENV 505.

SOIL 525. Scientific Writing- How to be a Productive and Effective Writer
1-3 Credits (1-3)
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: AGRO 525, AGRO 625, HORT 525, HORT 625, SOIL 625 and EPWS 525.

SOIL 590. Graduate Seminar
1 Credit (1)
Current research discussions presented by master level graduate students. Not more than one credit toward the degree. Same as AGRO/HORT 590. Crosslisted with: AGRO 590 and HORT 590.

SOIL 596. Masters Proposal
1 Credit (1)
Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, ENV 596, GENE 596 and HORT 596. Students must be a Master level graduate student to enroll in this course. Restricted to: Masters HORT, Masters PLEN majors.

SOIL 597. University Teaching Experience
1-3 Credits (1-3)
Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: AGRO 597 and HORT 597.

SOIL 598. Special Research Programs
1-6 Credits
Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

SOIL 600. Doctoral Research
1-15 Credits
Research.

SOIL 625. Scientific Writing- How to be a Productive and Effective Writer
1-3 Credits (1-3)
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Students in the 625 course will be required to perform additional research than those students in the 525 cross-listing. Crosslisted with: AGRO 525, HORT 525 and EPWS 525.
SOIL 650. Advanced Topics
1-3 Credits
Colloquium on contemporary topics associated with agriculture, environmental science and engineering. Multidisciplinary topics will be chosen to encourage participation of students from diverse disciplines. May be repeated for a maximum of 9 credits.
Prerequisite: consent of instructor.

SOIL 652. Advanced Soil Physics
3 Credits (3)
Advanced treatment of soil physics, modeling, includes working on an existing/new research project, modeling existing or new data, step by step guide on the use of some 1-D and 2-D models. Specific areas of specialization will be field scale variability of soil properties, water flow, solute transport, and plant water relations.
Prerequisite(s): SOIL 477 and computer literacy; or consent of instructor.

SOIL 655. Moisture Heat Contaminant Transport Modeling
3 Credits (3)
Provides clear coverage of the basic principles of heat, moisture and contaminant transport through porous media, and a step-by-step guidance and hands on application on the use of some spreadsheet based and physically based one-and two-dimensional transport models. A similar course does not exist in the college for students that can encourage them to pursue modeling as a means of solving vadose zone and groundwater contamination and remediation problems. Consent of instructor required.

SOIL 694. Doctoral Seminar
1 Credit (1)
Current research discussions presented by doctoral level graduate students. Not more than 2 credits toward the degree. Same as AGRO 694.
Prerequisite: doctoral level graduate students.

SOIL 696. Doctoral Proposal
1 Credit (1)
Current research proposal written by doctoral level graduate students. Not more than 1 credit toward the degree. Same as AGRO 696.
Prerequisite: doctoral level graduate students.

SOIL 697. University Teaching Experience
1-3 Credits (1-3)
Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: AGRO 697 and HORT 697

SOIL 698. Topics in Agronomy
1-6 Credits
Topics of current interest, designated by title and credit. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

Office Location: Skee Hall room N127
Phone: (575) 646-3405
Website: [http://aces.nmsu.edu/academics/pes/](http://aces.nmsu.edu/academics/pes/)

**Agronomy - Bachelor of Science in Agriculture**

Agronomy is an understanding of the principles of plant and soil science and an application of these principles in the production of crops. Commercial sector careers include positions in agricultural consulting companies, agricultural seed or chemical companies, research and development with commercial companies, as well as farm and/or ranch management. Careers in county, state or federal agencies are in the areas of USDA, Cooperative Extension Service, Natural Resources Conservation Service, Forest Service and Bureau of Land Management.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### First Year

Electives, to bring the total credits to 120 3

| Total Credits | 120 |

---

1. See the General Education (p. 54) Section of the catalog for a full list of courses.
2. See the Viewing a Wider World (p. 58) Section of the catalog for a full list of courses.
3. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
Environmental Science - Bachelor of Science in Environmental Science

The environmental science major is a multidisciplinary program based on a strong general science curriculum and an environmental curriculum that focuses on environmental problems and solutions. Although administered by the Department of Plant and Environmental Sciences, a multidisciplinary advisory committee recommends curriculum and other changes to the program. Graduates are very competitive for careers in industry and government and have excellent preparation for graduate programs in a variety of fields. A grade of C- or better must be earned in the Basic Background and Core Requirements.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

These courses have prerequisites and it is the students responsibility to check and fulfill all course prerequisites listed for these courses.

2 See the General Education (p. 54) section of the catalog for a full list of courses.

3 The department recommends utilizing the following courses to fulfill the additional elective credits needed for Financial Aid requirements.

**First Year - Semester 1:**
- MATH 1225G College Algebra
- ACES 1120 Freshman Orientation

**First Year - Semester 2:**
- MATH 1250G Trigonometry & Pre-Calculus

**Second Year - Semester 1:**
- CHEM 1121 General Supplemental Instruction I

**Second Year - Semester 2:**
- CHEM 1122 General Supplemental Instruction II

4 See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

### Genetics and Biotechnology - Bachelor of Science in Genetics

**Codirectors of the Program:**

**Professor**, Michele Nishiguchi, Department Head, Biology

**Professor**, Rolston St. Hilaire, Department Head, Plant and Environmental Sciences

**Professors** Bailey, Cramer, Hanley, Houde, Milligan, Nishiguchi, Ray, St. Hilaire, Serrano, C. Shuster, M. Shuster, Smith, Unguez, Zhang; **Associate Professors** Curtiss, James, Xu

**Assistant Professors** Indriolo

Have you ever wondered why your hair or eye color, facial features, or the build of your body resembles that of your parents, grandparents, or other close relatives? What factors are responsible for generating all the variety of colors and shapes of flowers, trees, and different types of animals? If these questions have crossed your mind, then you have been thinking about Genetics; the science of heredity. Genetics is studied at the DNA/gene/genome level (molecular genetics, biotechnology, genomics and bioinformatics), the level of organisms (classical or Mendelian genetics), and within/among populations of individuals (population and quantitative genetics).

One of the most significant scientific accomplishments in history has been the use of genomic technologies to recently identify most human genes, as well as, most genes for a number of other animals, plants, fungi, and bacteria. Geneticists now have tremendous opportunities to use molecular, biochemical, mathematical, and computer science-based (bioinformatics) approaches to investigate how these genes determine observable traits. This information can be used to significantly advance human health and well being, and to meet the food and fiber needs of the world.

A degree in Genetics can provide excellent preparation for careers in academic research and technical support, teaching, agriculture, the biotechnology industry, medicine and health sciences, forensic science, technical writing, and sales or marketing. It is also an excellent background for students wishing to enter a graduate program, medical school, and veterinary school.

Undergraduates in the Genetics program must earn a grade of C- or better to receive credit for Departmental and Non-Departmental required courses. Within the Departmental Required courses, Tier I courses must be taken by all majors, for a total of 31 credit hours*. To accommodate differing interests among students, a series of Tier II courses comprising 9-11 credits are provided. Ethical considerations of genetic based technologies will be infused throughout the curriculum, with a focused course on Science and Ethics in the Tier III portion of the core curriculum.

*Note: This includes BIOL 2610G which also counts as a General Education elective.

## Requirements

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, other Non-Departmental requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

### General Education Requirements

### Area II: Mathematics

- MATH 1521G Calculus and Analytic Geometry II | 4 |
- CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors | 11 |
- CHEM 1225G General Chemistry II Lecture and Laboratory for STEM Majors | 11 |
- Area IV: Social/Behavioral Sciences (3 credits) | 1 |

### Area V: Humanities | 3 |

### Area VI: Creative and Fine Arts | 3 |

### General Education Elective | 3 |

### Viewing a Wider World | 6 |

### Departmental/College Requirements

**Tier I Requirements**

- BIOL 2110G Principles of Biology: Cellular and Molecular Biology | 4 |
- BIOL 302 Molecular Biology Techniques Laboratory | 3 |
- BIOL 446 Bioinformatics and NCBI Database | 3 |
- BIOL 455 Biometry | 3 |
- BIOL 467 Evolution | 3 |
- GENE 1110 Experimental Systems in Genetics | 1 |

*Note: This includes BIOL 2610G which also counts as a General Education elective.
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Horticulture - Bachelor of Science in Agriculture

Horticulture includes a wide variety of topics that relate to fruit, vegetable and ornamental crops. Careers range from production management to processing and marketing, retail and wholesale management, greenhouse and nursery production, floriculture, landscaping, turf management, research and development, various service activities and positions with local, state and federal agencies.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix | Title | Credits

### Notes

1. See the General Education (p. 54) section of the catalog for a full list of courses.
2. MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G first.
3. Requires a grade of C- or above in horticulture courses.
4. See the Viewing a Wider World (p. 58) Section of the catalog for a full list of courses.
5. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
Soil Science (Environment and Resource Management) - Bachelor of Science in Agriculture

Soil scientists investigate the physical, chemical and biological characteristics and behavior of soils, their description and classification, and their management for both agricultural and non-agricultural uses. Career opportunities include: industry jobs; environmental consulting firms; and federal, state and local government careers working on various environmental, agricultural and ecological projects.

Soil science is integrated into the management of the environment and natural resources. Students interested in careers of conservation, environmental management, urban planning, waste disposal and...
related fields in government and industry may choose from a variety of course offerings. The economic and social implications as well as the technological aspects of resource management are included in the concentration courses.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework. In addition to the courses listed for each major, you must take 35 credits in the College of Agricultural, Consumer and Environmental Sciences and at least 24 credits of soil science related courses with a grade of C- or above including:

| **Total Credits**                                    | 123-125 |

1. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

2. The degree requires either MATH 1430G Applications of Calculus I or MATH 1511G Calculus and Analytic Geometry I, students who do not test into these courses will have additional MATH courses to complete in this semester and where "Elective Courses" are listed in the Roadmap.

3. See the General Education (p. 54) section of the catalog for a full list of courses.

4. Please see your academic advisor for a list of appropriate courses to satisfy the concentration coursework requirements.

5. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.
Students must two courses from the following, to fulfill degree requirements:

- BIOL 2110G Principles of Biology: Cellular and Molecular Biology
- BIOL 2610G Principles of Biology: Biodiversity, Ecology, and Evolution
- BIOL 311 General Microbiology

**Soil Science (Soil and Water Science) - Bachelor of Science in Agriculture**

Soil scientists investigate the physical, chemical and biological characteristics and behavior of soils, their description and classification, and their management for both agricultural and non-agricultural uses. Career opportunities include: industry jobs; environmental consulting firms; and federal, state and local government careers working on various environmental, agricultural and ecological projects.

The soil and water science concentration is for students interested in careers in water management and water quality. Employment opportunities exist with irrigation districts, consulting firms, and government agencies dealing with water management and quality. The optimum use of water in semi-arid areas is emphasized through selection of courses in the technical and social sciences.

Students must complete all University degree requirements, which include: General Education Requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework. In addition to the courses listed for each major, you must take 35 credits in the College of Agricultural, Consumer and Environmental Sciences and at least 24 credits of soil science related courses with a grade of C- or above including:

**Concentration Coursework ⁴**

Select at least one course from each of the following four categories to bring total concentration coursework to 30 credits

- All course selections must in addition to the courses required under the Departmental/College and Non-Departmental Requirements sections listed above

**Category 1: Crop Production & Protection**

Course category areas are as follows:

- Agronomy
- Entomology
- Plant Pathology
- Weed Science
- Horticulture

**Category 2: Soil & Water Engineering Management**

Course category areas are as follows:

- Agricultural Engineering
- Agricultural Economics
- Civil Engineering
- Environmental Sciences
- Horticulture
- Soil

**Category 3: Ecology**

Course category areas are as follows:

- Biology
- Geography
- Geology
- Range Science
- Soil
- Waste-Management
- Wildlife Science

**Category 4: Advanced Science, Computing & Statistics**

Course category areas are as follows:

- Math
- Chemistry
- Physics
- Computer-Oriented
- Statistics or Applied Statistics

**Non-Departmental Requirements (in addition to Gen.Ed/VWW)**

- CHEM 2115 Survey of Organic Chemistry and Laboratory (or above except CHEM 310V) | 4
- PHYS 1230G Algebra-Based Physics I | 3

Choose two from the following (lab is NOT required for this major):

- BIOL 2610G Principles of Biology: Biodiversity, Ecology, and Evolution | 6
- BIOL 2110G Principles of Biology: Cellular and Molecular Biology
- BIOL 311 General Microbiology
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1430G Applications of Calculus I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

| **Credits**                                                         | 11      |

**Total Credits** 120-122
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Students must two courses from the following, to fulfill degree requirements:

- BIOL 2110G Principles of Biology: Cellular and Molecular Biology
- BIOL 2610G Principles of Biology: Biodiversity, Ecology, and Evolution
- BIOL 311 General Microbiology

The degree requires either MATH 1430G Applications of Calculus I or MATH 1511G Calculus and Analytic Geometry I, students who do not test into these courses will have additional MATH courses to complete in this semester and where "Elective Courses" are listed in the Roadmap.

Please see your academic advisor for a list of appropriate courses to satisfy the concentration coursework requirements.

See the General Education (p. 54) section of the catalog for a full list of courses.

See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

### Soil Science (Soils) - Bachelor of Science in Agriculture

Soil scientists investigate the physical, chemical and biological characteristics and behavior of soils, their description and classification, and their management for both agricultural and non-agricultural uses. Career opportunities include: industry jobs; environmental consulting firms; and federal, state and local government careers working on various environmental, agricultural and ecological projects.

Crop production and plant growth are emphasized in the soils concentration. Soil management, soil conservation, and soil reclamation are related to plant growth for those students interested in both private industry and government employment opportunities as well as farm management.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework. In addition to the courses listed for each major, you must take 35 credits in the College of Agricultural, Consumer and Environmental Sciences and at least 24 credits of soil science related courses with a grade of C- or above including:

### Departmental/College Requirements

- SOIL 2110 Introduction to Soil Science 4
- SOIL 2110L Introduction to Soil Science Laboratory 4
- SOIL 312 Soil Management and Fertility and Soil Management and Fertility Lab 4
- SOIL 447 Seminar 1

Choose one SOIL Elective Course (300-level or above) 3

Select 12-13 credits from the following:

- SOIL 424 Soil Chemistry
- SOIL 479 Environmental Soil Chemistry
- SOIL 456 Irrigation and Drainage
- SOIL 472 Soil Morphology and Classification
- SOIL 476 Soil Microbiology
- SOIL 477 Environmental Soil Physics

### Concentration Coursework ⁴

Select at least one course from each of the following four categories to bring total concentration coursework to 30 credits.

All course selections must in addition to the courses required under the Departmental/College and Non-Departmental Requirements sections listed above.

#### Category 1: Crop Production & Protection

Course category areas are as follows:

- Agronomy
- Entomology
- Plant Pathology
- Weed Science
- Horticulture

#### Category 2: Plant Biology & Ecology

Course category areas are as follows:

- Biology
- Rangeland Resources

#### Category 3: Soil, Water & Agricultural Business Management

Course category areas are as follows:

- Agricultural Economics
- Geography
- Economic Geology
- Range Science
- Soil

#### Category 4: Advanced Science, Computing & Statistics

Course category areas are as follows:

- Math
- Chemistry
- Physics
- Computer-Oriented
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Credits 17

Total Credits 120

1 These courses have prerequisites and it is the students responsibility for checking and fulfilling all course prerequisites listed for these courses.
Turfgrass Science and Management - Bachelor of Science in Agriculture

Turfgrass managers help build, maintain, and manage golf courses, athletic fields, parks, and other recreational areas. The curriculum of each option allows you to focus on a specific segment of the turfgrass industry. All majors are required to pursue two internships with a golf course, parks department, athletic field, lawn care operator or other acceptable turfgrass segment. A grade of C- or above in all Core & Option credits is required.

**Option: Athletic Field**

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

See the General Education (p. 54) section of the catalog for a full list of courses.

MATH 1220G College Algebra or MATH 1430G Applications of Calculus I is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G or MATH 1430G first.

See the Viewing a Wider World (p. 58) Section of the catalog for a full list of courses.
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

### Option: Golf Course

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Total Credits: 120

---

1. See the General Education (p. 54) section of the catalog for a full list of courses.
2. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G or MATH 1430G first.
3. See the Viewing a Wider World (p. 58) Section of the catalog for a full list of courses.
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**Option: Turfgrass Business**

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Select 7 or more credits from the following:

- AGRO 311: Introduction to Weed Science
- EPWS 310: Plant Pathology
- EPWS 314: Plant Physiology
- HORT 377: Introduction to Turfgrass Management
- HORT 391: Internship
- HORT 471: Plant Mineral Nutrition
Horticulture - Master of Science
Prerequisite to major graduate work is completion of a curriculum essentially equivalent to that required by the department for the BS degree at New Mexico State University. Qualifications for admission will be reviewed by the departmental graduate faculty.

See the PES Graduate Handbook for specific course requirements.

Plant and Environmental Science - Master of Science
See the PES Graduate Handbook for specific course requirements.

Plant and Environmental Science - Doctor of Philosophy
Qualifications for admission will be reviewed by the departmental graduate faculty. Applications should include a letter of interest. A 3.3 grade-point average for the most recently completed degree (B.S. or M.S.) is needed for admission for Ph.D. studies. The department requires the GRE scores and three letters of recommendation, transcripts, as well as the student’s letter of interest as an admission requirement. Acceptance requires that a graduate faculty member in the applicant's area of interest accept the student into their program.

A student planning a program leading to a Ph.D. must satisfy one of the following departmental requirements approved by the doctoral committee:

1. A thorough knowledge of a language other than English
2. A reading ability in two foreign languages
3. Reading ability in one foreign language and proficiency with a research tool
4. Reading ability in one foreign language and one semester of supervised teaching experience
5. Proficiency with a research tool and one semester of supervised teaching
6. Two semesters of supervised teaching

A number of graduate assistantships are available each year. Inquiries should be addressed to the department.

See the PES Graduate Handbook for specific course requirements.

School of Hotel, Restaurant and Tourism Management
Undergraduate Program Information
The School of Hotel, Restaurant & Tourism Management is committed to the broad land-grant mission of New Mexico State University. The school’s mission is to serve the needs of our constituents through innovative teaching, research, service, professional applications and partnerships in a multi-cultural and international environment.

This bachelor degree program prepares students for supervisory and management positions in all areas of the diverse and growing hospitality and tourism industry. The full bachelor of science degree program is available through NMSU main campus as well as completely online through NMSU Online. The program also provides a foundation for continuing development to advance to more senior management or to pursue entrepreneurial opportunities. In this service-oriented, professional program, faculty, students and industry partners bring together theory and practice to forge hospitality management excellence. The curriculum is designed to educate students as individuals and professionals in a changing society. Students take a core curriculum featuring courses in a broad spectrum of skills and knowledge needed for industry and personal success. They develop an individual plan with a faculty mentor for selecting professional elective courses based on their interests. A grade of C- or better must be earned in each upper-division HRTM class to satisfy the requirement of the major.

Students are required to participate in an internship program that is offered only after completion of 400 hours of hospitality work experience. The internship sequence consists of three, one-credit courses: HRTM 307 Professional Development, HRTM 408 Hospitality Internship, and HRTM 409 HRTM Internship Seminar and includes another 400 hours in the field, normally the summer between the student’s junior and senior year. The HRTM 408 course is a prerequisite for several of the student’s final 400-level courses. Thus, at the end of both the work experience practicum and the internship, students will have completed a minimum of 800 hours professional work experience in the field.

Special Features of the School of Hotel, Restaurant, and Tourism Management
The School of Hotel, Restaurant and Tourism Management provides excellent opportunities for experiential learning. Students take hands-on food and beverage and meetings and events courses in the 100 West Café and Bobby Lee Lawrence Academy of Wine. The Hospitality Technology Lab seats 39 for courses using hospitality simulation and general software programs.

The School of HRTM has a special relationship with the NMSU Courtyard by Marriott hotel and Total Management Systems, Inc. to provide educational opportunities for our students. Corporate executives and property managers are frequent guest speakers in classes. Part-time jobs, internships, and management opportunities are available at the property as well as the company's other locations throughout the state.

The School houses the Marriott Hospitality Futures Center. The center is funded through a grant by the J. Willard and Alice S. Marriott Foundation, A newly refurbished office suite has been designated to allow the campus and surrounding community to discover the many opportunities available when exploring a career in hospitality. It will include facilitated workshops, and a strong dedication to outreach throughout New Mexico, El Paso, and the surrounding areas to student groups, public schools, and our industry partners. The HRTM’s Annual Career Fair brings 25 – 30 companies to campus each February to interview students for jobs, internships, management training programs and other career opportunities. Many recruiters come to campus at other times of the year as well.
Trips to major industry trade shows throughout the country and field trips to major properties are only a few of the professional activities available to our students. HRTM’s Faculty Led International Program (FLIP) takes students to Florence, Italy each summer. The School’s National Society for Minorities in Hospitality chapter is extremely active and represents HRTM at many college, university, and national activities. Other student organizations include Eta Sigma Delta, Delta Sigma Pi, College Ambassadors, and Peer Mentors.

**Graduate Program Information**

Students can earn a Master of Science degree in Family and Consumer Sciences with an emphasis in Hotel, Restaurant and Tourism Management (HRTM). Students can complete the program on campus or completely online through NMSU Online. The emphasis in HRTM combines both coursework and research to expand the student’s knowledge, abilities, and problem-solving skills.

Students begin the program by learning about the current trends in a wide range of hotel, restaurant and tourism academic research areas. Students also take graduate classes that apply to their chosen area of specialization. Some students focus on general hospitality management. However, most choose an area of interest such as tourism, foodservice, hotel operations, culinary arts, destination management, revenue management, sales and marketing, hospitality or culinary education, beverage management, vacation ownership, hospitality information systems, or human resource management/training. Some of our students are hospitality educators who may desire to take specialization courses in online teaching or educational technology.

Students with undergraduate degrees in closely related fields (including Business, Information Technology, Food Science, Culinary Arts, and Education) are strongly encouraged to apply as are students from under-represented groups and international students. We also welcome applications from non-traditional applicants who have work experience in the hotel, restaurant and tourism business. These students bring unique views to our program and strengthen our breadth and diversity.

In addition to the Graduate School requirements, the admissions criteria for the Department of Family and Consumer Sciences Graduate Program include letters of reference, a statement of interest essay, and resume. Suggested departmental deadlines for review of admission materials are six weeks prior to the first day of the semester of desired start. Please obtain a complete description of admission requirements from the department.

A minimum of 30 credits (including 4-6 credits of thesis) is required under the thesis plan. A non-thesis plan is available that requires a minimum of 32 credits of course work with a written comprehensive examination. Both plans require a final oral examination. Students will take 3 credits of statistics and 3 credits of research methodology at the graduate level. Students without work experience in HRTM will complete a paid internship in their area of specialization. Prior to the completion of 12 credits, the student will form a program advisory committee and determine the appropriate courses for the degree work.

There are a limited number of graduate teaching assistant positions available for HRTM emphasis students.

**Degree for the Department**

Hotel, Restaurant and Tourism Management - Bachelor of Science (p. 249)

Hotel, Restaurant and Tourism Management - Undergraduate Minor (p. 251)

Director - Jean Hertzman

Professors - Jean Hertzman; Keith Mandabach; Betsy Stringam
College Assistant Professors - Daren Bloomquist; Julie Correa; John Hartley; Peter Mitchell
Professor Emeritus - Priscilla Bloomquist

**Hotel, Restaurant and Tourism Management Courses**

HRTM 1120G. Introduction to Tourism
3 Credits (3)
Survey of travel and tourism development and operating characteristics.

**Learning Outcomes**

1. Define tourism and related terms. Identify and explain the role of the elements of the destination mix. Identify the potential socio-cultural, economic and environmental impacts of tourism.
2. Identify and describe the role of key governmental and nongovernmental organizations in tourism.
3. Describe basic tourism planning and development principles.
4. Discuss the unique challenges of tourism marketing and standard marketing methods.
5. Describe the components of the tourism distribution system.
6. Demonstrate a basic understanding of traveler behavior including motivations and barriers to travel. Identify major factors that influence traveler flows. Describe the role of major modes of transportation in the tourism system.
7. Identify and describe the three pillars of sustainable tourism development. Explain personal and social responsibility as it relates to sustainable tourism development. Demonstrate effective communication and critical thinking skills.

HRTM 1130. Introduction to Hospitality Management
3 Credits (3)
Overview of the major segments of the hospitality industry, with a focus on basic management principles.

**Learning Outcomes**

1. Understand the concept of management contracts and franchising.
2. Recognize and understand needed leadership qualities to achieve organizational objectives.
3. Understand the hospitality industry within the global environment.
4. Identify company and industry trends.
5. Understand the functions of all departments in a hospitality organization (restaurant, hotel, club, etc.).
6. Apply the concepts of convention management, meeting and event planning, and casino management.
7. Understand the concepts of quick and institutional/contract foodservice management.
8. Understand the principles of bar management and compare and contrast wines, beers and distilled spirits.
9. Manage the process of service delivery.
10. Identify and solve managerial problems.
11. Manage a diverse workforce and develop positive employee relations to reduce turnover.
HRTM 2110. Safety, Sanitation and Health in the Hospitality Industry
1 Credit (1)
Addresses public health, HACCP, and food safety responsibilities in
the hospitality industry. Sanitation certification test allows students
to receive national ServSafe Food Protection Manager Certification.
Restricted to Las Cruces campus only.

Learning Outcomes
1. Identify the hazards to safe food and the foods at risk in a
   foodservice operation.
2. Identify and discuss the Hazard Analysis Critical Control Point
   (HACCP) system and be able to design a HACCP flowchart.
3. Demonstrate knowledge of how to protect food during purchasing,
   receiving, storing, preparing, holding, and serving.
4. Discuss the procedures for ensuring sanitary equipment, facilities,
   and food-handling practices.
5. Explain how to set-up cleaning, safety, pest control, crisis
   management, and training programs.

HRTM 2120. Food Production and Service Fundamentals
3 Credits (1+4P)
Basic overview of food service systems including menu management,
purchasing and production. The course includes basic principles of
food fabrication and production. Topics include knife skills, culinary
terminology, product identification, quality standards, nutritional cooking
theory and application of food preparation techniques. The course
includes laboratory aspects and demonstration of basic food production
techniques, service styles, practices and procedures in food service
operations including culinary math. This course provides students with
an understanding of food service sanitation and culinary nutrition.
Completion of a national certification examination is required. Students
who have not completed HRTM 2110 before enrolling in the course
must have proof of valid ServSafe Food Protection Manager certificate.
Restricted to Las Cruces campus only. Prerequisite(s)/Corequisite(s):
HRTM 2110
Prerequisite(s): HRTM 1130 or FSTE 2110G.

Learning Outcomes
1. Demonstrate use of standard recipes and how to reduce and increase
   their yields.
2. Demonstrate basic culinary knife cuts, basic fabrication and mise en
   place
3. Demonstrate basic cookery techniques of dry, moist and a
   combination of heat
4. Demonstrate the proper plating and garnishing of foods
5. Describe personal behaviors required for the safe handling of
   food
6. Identify and properly operate kitchen equipment.
7. Pass the ServSafe Exam
8. Describe the three forms of food contaminants and preventative
   measures.
9. Demonstrate how to properly “set” a table for service
10. Demonstrate how to provide dining room service with proper
    etiquette
11. Demonstrate safe work habits, identify safety hazards, and employ
    preventative safety measures.
12. Maintain positive relations with fellow students and faculty through
    teamwork.
13. Exhibit appropriate work habits and attitudes; demonstrate a
    willingness to compromise.
14. Demonstrate a positive attitude, conversation skills, personal
    hygiene and work attire.
HRTM 2130. Hotel Operations I
3 Credits (3)
Analysis of hotel operations to include: guest services, reservations, reception, guest/city ledger and the night audit. May be repeated up to 3 credits. Restricted to Las Cruces campus only.
Prerequisite(s): HRTM 1130.
Learning Outcomes
1. Outline the history, magnitude and culture of the hotel industry
2. Define and identify hotel ownership and operational structures
3. Outline the organization and structure of a hotel and resort.
4. Describe and calculate the components and processes of room reservation forecasting, pricing and revenue management.
5. Outline and explain the flow of the guest from pre-arrival through arrival, room occupancy and departure.
6. Demonstrate the procedures and processes for Guest Accounting, the City Ledger, Guest Credit and the Night Audit.
7. Discuss problem solving and guest service associated with the front office and other departments of the hotel and resort.
8. Forecast impacts of technology to the guest services and hotel operations
9. Describe the day to day activities and responsibilities of a Hotel Front Office Manager or a Hotel Assistant General Manager (AGM).

HRTM 2996. Special Topics
1-4 Credits
Specific subjects and credits to be assigned on a semester basis for both lecture and laboratory assignments. May be repeated for a maximum of 4 credits.
Prerequisite: consent of instructor.
Learning Outcomes
1. Varies

HRTM 301. Hotel, Restaurant, and Tourism Marketing
3 Credits (3)
The development of effective marketing programs for hospitality service organizations. Prerequisites: HRTM 1130

HRTM 302. Hospitality Management Accounting
3 Credits (3)
Specialized accounting for hotel revenue and expenses; accounting for inventory, property, and equipment; hospitality payroll accounting; hotel departmental financial statements; income statement, balance sheet, and statement of cash flows; the analysis of financial statements; interim and annual reports; budgeting expenses; forecasting sales; budgetary reporting and analysis; and financial decision making.
Prerequisite: ACCT 2110.

HRTM 304. Hospitality and Travel Law
3 Credits (3)
Specialized applications of the law to the hospitality and tourism industry. Prerequisite: HRTM 1130

HRTM 307. Professional Development
1 Credit (1)
Covers essential elements of career management including preparation for a successful internship. Restricted to majors. Graded S/U.

HRTM 311. Hospitality Leadership Management
3 Credits (3)
Examines modern leadership theory in the context of the hospitality industry. Connects contemporary leadership topics to their historical antecedents through focused reading, discussion and film.
Prerequisites: HRTM 1130 and HRTM 1120.

HRTM 363. Quantity Food Production and Service
4 Credits (1+6P)
Covers quantity food production and service including cooking concepts, sanitation and safety, teamwork, dining room service, and management responsibilities. Students will apply this knowledge developing product for sale in a student run restaurant. Proof of current ServSafe Food Protection Manager or NM Food Handler certification required. May be repeated up to 4 credits.
Prerequisite(s): HRTM 2120.

HRTM 408. Hospitality Internship
1 Credit (1)
Hospitality and tourism professional work experience for HRTM majors only. Restricted to majors.
Prerequisites: HRTM 307 and consent of instructor.

HRTM 409. HRTM Internship Seminar
1 Credit (1)
A case based approach to analyzing internship experiences. Students will write case studies about specific business issues they encountered during HRTM 408 (Internship) and analyze them. Restricted to majors.
Prerequisites: HRTM 408.

HRTM 410. Hospitality Cost Control
3 Credits (3)
Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers.) Provides tools needed to communicate effectively about global financial issues affecting the hospitality business. May be repeated up to 3 credits.
Prerequisite(s): HRTM 302, HRTM 363.

HRTM 412. Beverage Management
3 Credits (3)
Survey of all aspects of beverage management, including wine/beer/ distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation. May be repeated up to 3 credits.
Prerequisite(s): HRTM 363.

HRTM 413. Restaurant Operations Management
4 Credits (1+6P)
Provides a detailed understanding of the processes of restaurant operations management. Students are expected to increase kitchen and service technical skills, develop and cook from recipes, develop a personal leadership style, understand food and wine pairing, and supervise front and back of the house operations. Provides the opportunity to perform a detailed analysis of a food and beverage operation. Proof of valid ServSafe Food Protection Manager or NM Food Handler certification and current NM Alcohol Server certification required. May be repeated up to 4 credits.
Prerequisite(s): HRTM 363.

HRTM 414. Wine Appreciation
3 Credits (3)
An experiential examination of wine through lectures, guest speakers and focused tasting of wine and food. Topics include viticulture, wine making varietals, terroir, wine service, tasting and evaluation techniques, and food pairings. Student must be at least 21 years old. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): Consent of instructor.
HRTM 416. Hotel, Restaurant and Tourism Industry Purchasing, Selection, and Procurement
3 Credits (3)
Purchasing methods for the hotel, restaurant and tourism industries based on standards of quality, grade, care, and storage for food and nonfood supplies. Purchasing, installation, operation, and care of large foodservice equipment.

Learning Outcomes
1. Differentiate purchasing functions in different types of hotel, restaurant and tourism operations and determine how internal and external forces impact purchasing decisions.
2. Outline and describe the duties and responsibilities of hotel, restaurant and tourism purchasing managers.
3. Develop product recommendations for hotel, restaurant and tourism food and equipment through the use of various product evaluation methods.
4. Identify examples of unethical purchasing practices throughout history, research present a code of purchasing ethics for a hotel, restaurant or tourism company.
5. Analyze hotel, restaurant and tourism industry supplier selection criteria and recommend a supplier based on those criteria.
6. Apply mathematical models to calculate recipe costs as well as order quantities and times. Determine how to reduce AP prices.
7. Outline and describe each step of the flow of inventory and determine which controls are needed for security of inventory.
8. Explain product grades and explain grading procedures and procurement criteria for meats, poultry, eggs, dairy, produce, marine products, groceries, and nonfood items.

HRTM 420. Club Management and Marketing
3 Credits (3)
Provides an understanding of the general operational and administrative procedures practiced in private clubs from a marketing perspective with a special emphasis on managing and marketing club food and beverage operations and service. It will provide the professional golf management and hospitality students with the unique sensitivities required in managing and operating in the increasingly lucrative club management market.

HRTM 430. Hospitality Facilities Management
3 Credits (3)
Exploration of the engineering and maintenance requirements specific to the hospitality industry. Emphasis on environmental issues, renovation and management of the physical plant. May be repeated up to 3 credits.
Prerequisite(s): HRTM 2130, HRTM 408.

HRTM 431. Hotel Operations II
3 Credits (3)
The duties and administration of a hotel front office, including housekeeping. Additional focus on the procedures of reservations and night audit. Students also gain exposure to property management systems. May be repeated up to 3 credits.
Prerequisite(s): HRTM 2130.

HRTM 432. Hotel Revenue and Sales Management
3 Credits (3)
Examines methods used for profitably managing capacity, including dynamic pricing and allocation of the rooms inventory across market segments to maximize revenues. Focuses on the integration of revenue management principles with information technology, management, marketing and sales concerns at the property and market level. May be repeated up to 3 credits.
Prerequisite(s): HRTM 2130.

HRTM 434. Senior Capstone Experience
3 Credits (3)
Synthesizes all previous work. Students apply multi-disciplinary principles to the analysis of hospitality business cases and tourism problems.
Prerequisite: HRTM 408.

HRTM 435. Resort Management
3 Credits (3)
This course introduces students to the operation and management of full service resort properties, including the management of resort recreational amenities.
Prerequisite(s): HRTM 2130 or consent of instructor.

HRTM 436. Sustainability in the Hospitality Industry
3 Credits (3)
This course provides a summary and definition of the concept and roots of sustainability and climate change as well as their impact and effect on the hospitality industry while providing the rationale for sustainable development for the industry. A review of environmentally sound management strategies for all operational management areas ranging from eco-design, energy, waste and water management, food security, sourcing of agricultural products leads to a detailed strategy for planning and evaluating the sustainability of a hospitality operation in terms of corporate responsibility and social entrepreneurship. The content is focused on a global perspective of sustainability in the industry.

Learning Outcomes
1. Recognize, interpret and summarize the global challenges facing the hospitality industry caused by climate change driving the need for sustainability in the industry.
2. Explain implementation strategies for responsible environmentally sound hospitality management practices for hotel, food and beverage and tourism businesses.
3. Evaluate sustainable development practices and the importance of personal and corporate social development.
4. Analyze, evaluate and communicate the sustainability practices of a hospitality operation.

HRTM 443. Meetings, Conventions and Special Events
3 Credits (3)
Examination of the role of the meeting/event planner, including setting objectives, site selection, negotiations, design, budgeting, marketing, registration, on-site logistics, and evaluation. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): Consent of Instructor.
HRTM 444. Entertainment Business and Venue Management
3 Credits (3)
This course will review and examine the principles and practices associated with managing a public assembly venue and the nature of the venue and entertainment business. This is a comprehensive course designed to cover all aspects of incorporated event practices such as marketing, production, contracts, ticketing, and security.

Learning Outcomes
1. Analyze the origin and history of public assembly venues and the role they play within the community.
2. Analyze different ownership and management structures and how governance relationships impact operational management.
3. Analyze the business and financial operations of a public assembly venue.
4. Describe the booking process, the entities involved, and the importance of relationships.
5. Analyze and create marketing and sales strategies for both a public assembly venue and an event that is booked in the venue.
6. Identify and analyze the ticket system options available to venue managers, as well as their importance in access management, financial accountability, and data collection.
7. Analyze the role and importance of ancillary revenue sources, as well as the need for creativity and entrepreneurship.
8. Describe the operational systems and processes required to maintain a venue and produce events.
9. Analyze the event planning process and how it is used to produce an event experience for guests and clients.
10. Analyze management’s role in developing and maintaining a safe and secure public assembly venue.

HRTM 450. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.
Prerequisite: consent of instructor.

HRTM 492. Special Problems
1-4 Credits
Individual research in a selected subject area of hospitality management. Maximum of 4 credits per semester and a total of 6 credits toward a degree.
Prerequisite: consent of instructor.

HRTM 501. The Hospitality Industry and Sustainable Competitive Strategy
3 Credits (3)
An examination of the hospitality industry, and its contemporary strategic management principles and practices. Key components, industry organization, and competitive environment of the hospitality industry are analyzed. Strategic decision making principles are examined to create sustainable competitive advantages for hospitality and service industry leaders and organizations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes
1. Analyze key components, industry organization, and competitive environment of the hospitality industry.
2. Examine strategic decision making principles to create sustainable competitive advantages for hospitality and service industry leaders and organizations.

HRTM 502. Advanced Hospitality Services Management
3 Credits (3)
This course explores and applies the design and management of service quality in global hospitality organizations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes
1. Investigate the design and management of service quality in global hospitality organizations to create authentic and memorable hospitality experiences.
2. Design and manage service delivery systems to create a culture of service excellence.
3. Define and discuss the relationship between service and financial performance in hospitality organizations.

HRTM 503. Hospitality Organizational Leadership and Human Resources
3 Credits (3)
Application of key organizational, leadership and human resource theories to global hospitality organizations. Analysis of key hospitality industry leaders, companies and systems. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes
1. Apply organizational, leadership and human resource theories to global hospitality organizations.
2. Analyze key hospitality industry leaders, companies and systems.
3. Coordinate teams to provide effective management and maintain successful employee and guest relations.

HRTM 504. Marketing Strategy for Global Hospitality
3 Credits (3)
Application, analysis and evaluation of marketing theories, strategies and tactics for developing sustainable competitive advantage in the global hospitality industry. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes
1. Explore and analyze global hospitality markets, including the values and expectations of global hospitality consumers.
2. Analyze and evaluate marketing theories, strategies and tactics for developing sustainable competitive advantage in the global hospitality industry.
3. Design marketing strategies that will promote and sustain positive guest/customer relationships.
4. Apply concepts of digital marketing to hospitality organizations.

HRTM 505. Hospitality Research Methods & Analysis
3 Credits (3)
Application of appropriate statistical procedures and research methodologies within the hospitality industry. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes
1. Analyze hospitality operational data.
2. Develop the framework for researching hospitality operations and organizations.
3. Implement appropriate statistical procedures and research methodologies to hospitality operations.
4. Examine problems in hospitality, formulate and clarify research topics to address these problems.
HRTM 506. Contemporary Global Issues in Hospitality
3 Credits (3)
Contemporary issues confronting the global hospitality industry. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes
1. Discuss contemporary issues confronting the global hospitality industry.
2. Project how contemporary global issues will impact hospitality organizations.
3. Evaluate new developments in hotel and restaurant management

HRTM 510. Hospitality Cost Control
3 Credits (3)
Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers). Provides tools needed to communicate effectively about global financial issues affecting the hospitality business. Same as HRTM 410 with additional work for graduate credit. Consent of Instructor required.

HRTM 511. Hospitality Financial Analysis
3 Credits (3)
Financial and accounting decision processes as applied to the hospitality industry. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes
1. Use the Uniform Systems of Accounts for the Lodging and Restaurant industries, and accounting and financial reporting standards and procedures for the hospitality industry.
2. Use hospitality financial and accounting tools such as REVPAR and Food Cost Percentage to analyze hospitality operations.
3. Define and apply terminology and principles required to develop and analyze Hospitality Management financial statements.
4. Perform financial and accounting decision making as applied to the hospitality industry.

HRTM 512. Beverage Management
3 Credits (3)
Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation. Same as HRTM 412 with additional work for graduate credit. Consent of Instructor required.

HRTM 515. Applied Management Project
3 Credits (3)
Students will develop a project scope based on problems presented within the hospitality industry. Projects incorporate concepts and skills developed in previous coursework. Students will take this course in their last semester of the Master of Hospitality Degree. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes
1. Develop a project scope based on problems presented within the hospitality industry.
2. Use collaborative problem solving to execute the project.
3. Define and identify a business research problem and explain its importance to study.
4. Identify sources and strategies for locating related literature.
5. Plan research regarding the business problem.
6. Write the professional paper.
7. Present the professional paper.

HRTM 516. Hotel, Restaurant and Tourism Industry Purchasing, Selection and Procurement
3 Credits (3)
Purchasing methods for the hotel, restaurant and tourism industries based on standards of quality, grade, care, and storage for food and nonfood supplies. Purchasing, installation, operation, and care of large foodservice equipment.

Learning Outcomes
1. Differentiate purchasing functions in different types of hotel, restaurant and tourism operations and determine how internal and external forces impact purchasing decisions.
2. Outline and describe the duties and responsibilities of hotel, restaurant and tourism purchasing managers.
3. Develop product recommendations for hotel, restaurant and tourism food and equipment through the use of various product evaluation methods.
4. Identify examples of unethical purchasing practices throughout history, research present a code of purchasing ethics for a hotel, restaurant or tourism company.
5. Analyze hotel, restaurant and tourism industry supplier selection criteria and recommend a supplier based on those criteria.
6. Apply mathematical models to calculate recipe costs as well as order quantities and times. Determine how to reduce AP prices.
7. Outline and describe each step of the flow of inventory and determine which controls are needed for security of inventory.
8. Explain product grades and explain grading procedures and procurement criteria for meats, poultry, eggs, dairy, produce, marine products, groceries, and nonfood items.

HRTM 530. Facilities Management
3 Credits (3)
Exploration of the engineering and maintenance requirements specific to the hospitality industry. Emphasis on environmental issues, renovation and management of the physical plant. Same as HRTM 430 with additional work for graduate credit. Consent of Instructor required.
HRTM 531. Hotel Operations II  
3 Credits (3)  
The duties and administration of a hotel front office, including housekeeping. Additional focus on the procedures of reservations and night audit. Students also gain exposure to property management systems. Same as HRTM 431 with additional work for graduate credit. Consent of Instructor required.

HRTM 532. Hotel Revenue and Sales Management  
3 Credits (3)  
Examines methods used for profitably managing capacity, including dynamic pricing and allocation of the rooms inventory across market segments to maximize revenues. Focuses on the integration of revenue management principles with information technology, management, marketing and sales concerns at the property and market level. Same as HRTM 432 with additional work for graduate credit. Consent of Instructor required.

HRTM 535. Resort Management  
3 Credits (3)  
This course introduces students to the operation and management of full service resort properties, including the management of resort recreational amenities.  
Prerequisite(s): Consent of instructor.

HRTM 536. Sustainability in the Hospitality Industry  
3 Credits (3)  
This course provides a summary and definition of the concept and roots of sustainability and climate change as well as their impact and effect on the hospitality industry while providing the rationale for sustainable development for the industry. A review of environmentally sound management strategies for all operational management areas ranging from eco-design, energy, waste and water management, food security, sourcing of agricultural products leads to a detailed strategy for planning and evaluating the sustainability of a hospitality operation in terms of corporate responsibility and social entrepreneurship. The content is focused on a global perspective of sustainability in the industry.  
Learning Outcomes  
1. Recognize, interpret and summarize the global challenges facing the hospitality industry caused by climate change driving the need for sustainability in the industry.  
2. Explain implementation strategies for responsible environmentally sound hospitality management practices for hotel, food and beverage and tourism businesses.  
3. Evaluate sustainable development practices and the importance of personal and corporate social development.  
4. Analyze, evaluate and communicate the sustainability practices of a hospitality operation.

HRTM 543. Meetings, Conventions and Special Events  
3 Credits (3)  
Examination of the role of the meeting/event planner, including setting objectives, site selection, negotiations, design, budgeting, marketing, registration, on-site logistics, and evaluation. Same as HRTM 443 with additional work for graduate credit. Consent of Instructor required.

HRTM 546. Methods for Teaching Hospitality and Culinary Education  
3 Credits (3)  
Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.  
Learning Outcomes  
1. Compare and contrast curriculum theories.  
2. Develop syllabi for hospitality courses using theories and models of course design.  
3. Apply instructional techniques in hospitality education.  
4. Design tests and other assessments for hospitality courses.  
5. Write a teaching philosophy.

HRTM 550. The World of Hospitality Higher Education  
3 Credits (3)  
Survey of the history, organization, and administration of hospitality higher education programs. Explores differences between types of degree programs – associate, bachelor, graduate and sources of funding – public, private, proprietary. Investigates the role of the faculty member in non-instructional activities, such as working with administrative and support departments, accreditation, service, community outreach, fundraising, and industry relations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.  
Learning Outcomes  
1. Discuss the history of higher education and hospitality management programs.  
2. Analyze how general higher education principles, laws, and finance apply to hospitality management programs.  
3. Compare the characteristics, administration, and operations of programs based on type of degrees offered.  
4. Compare the characteristics, administration, and operations of programs based on sources of funding.  
5. Analyze the role of the faculty in hospitality education in collaborating with various educational departments and support services.  
6. Analyze the role of the faculty in hospitality education in collaborating with external stakeholders.

HRTM 590. Special Topics  
1-4 Credits  
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree.  
Prerequisite: consent of instructor.

HRTM 598. Special Research Programs  
1-4 Credits  
Individual investigations, either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.  
Prerequisite: consent of instructor.

HRTM 599. Master’s Thesis  
1-6 Credits (1-6)  
Thesis.  
Prerequisite: consent of instructor.

Name: Dr. Jean Hertzman, Director  
jhertzma@nmsu.edu
Mathematics coursework. Credits, but may be needed in order to take the necessary English and will not count towards the degree requirements and/or elective credits in courses numbered 300 or above. Developmental coursework requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above.

### Core Courses

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above.

### Departmental/College Requirements

HRTM 1120  Introduction to Tourism  3
HRTM 1130  Introduction to Hospitality Management  3
HRTM 2110  Safety, Sanitation and Health in the Hospitality Industry  1

### General Education

#### Area I: Communications

Choose one from the following, 4:

- ENGL 1110G  Composition I
- ENGL 1110H  Composition I
- ENGL 1110M  Composition I

#### Area II: Mathematics

MATH 1350G  Introduction to Statistics  3

#### Area III/IV: Laboratory Sciences and Social/Behavioral Sciences

ECON 1110G  Survey of Economics  3

#### Area III: Laboratory Sciences Course (4 credits) 2

Either an Area III/IV: Laboratory Sciences Course or Social/Behavioral Sciences Course (4 or 3 credits)  3

#### Area V: Humanities 2

Area VI: Creative and Fine Arts 2  3

### General Education Elective 2

Any "G" course, excluding Area I and crosslisted courses  3-4

#### Viewing A Wider World

Choose one from the following, 6:

- AXED 2120G  Effective Leadership and Communication in Agriculture  3
- COMM 1115G  Introduction to Communication  3
- COMM 1130G  Public Speaking  3
- HNRS 2175G  Introduction to Communication Honors  3

### Departmental Electives

#### Departmental Electives (the following are typical offerings):

- HRTM 412  Beverage Management  3
- HRTM 413  Restaurant Operations Management  3
- HRTM 414  Wine Appreciation  3
- HRTM 416  Hotel, Restaurant and Tourism Industry Purchasing, Selection, and Procurement  3
- HRTM 420  Club Management and Marketing  3
- HRTM 431  Hotel Operations II  3
- HRTM 432  Hotel Revenue and Sales Management  3
- HRTM 435  Resort Management  3
- HRTM 436  Sustainability in the Hospitality Industry  3
- HRTM 443  Meetings, Conventions and Special Events  3
- HRTM 444  Entertainment Business and Venue Management  3
- HRTM 450  Special Topics  3
- HRTM 492  Special Problems  3

### Non-Departmental Requirements (in addition to Gen.Ed/VWW)

ACES 1120  Freshman Orientation  1
ACCT 2110  Principles of Accounting I  3
Any MKTG #300 and above  3
BFIN 341  Financial Analysis and Markets  3
MGMT 309  Human Behavior in Organizations  3
MGMT 332  Human Resources Management  3
Electives, to bring the total credits to 120  6

#### Total Credits

120-122

1. MATH 1350G Introduction to Statistics is required for the degree but students may need to take any prerequisites needed to enter MATH 1350G first.
2. See the General Education (p. 54) section of the catalog for a full list of courses. Please consult your HRTM faculty mentor to select appropriate courses.
3. Viewing A Wider World Requirement - Two courses in two different colleges, with at least one from outside ACES. See list of approved courses in the catalog. (300+ level courses with a "V" behind them.) See the Viewing a Wider World (p. 58) section of the catalog for a full list.
4. Complete during final semester.
5. Departmental Electives (the following are typical offerings):
   - HRTM 412 Beverage Management  3
   - HRTM 413 Restaurant Operations Management  3
   - HRTM 414 Wine Appreciation  3
   - HRTM 416 Hotel, Restaurant and Tourism Industry Purchasing, Selection, and Procurement  3
   - HRTM 420 Club Management and Marketing  3
   - HRTM 431 Hotel Operations II  3
   - HRTM 432 Hotel Revenue and Sales Management  3
   - HRTM 435 Resort Management  3
   - HRTM 436 Sustainability in the Hospitality Industry  3
   - HRTM 443 Meetings, Conventions and Special Events  3
   - HRTM 444 Entertainment Business and Venue Management  3
   - HRTM 450 Special Topics  3
   - HRTM 492 Special Problems  3
It is strongly suggested that students use their elective credits to earn a minor such as Marketing, Business Administration, Food Science and Technology, Human-Animal Interaction, or a Language. *Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

## A Suggested Plan of Study for Students

This roadmap assumes student placement in ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Total Credits

120

1 MATH 1215 Intermediate Algebra is the required prerequisite for MATH 1350G, so students place directly into MATH 1350G Introduction to Statistics then they can take an elective in its place.

2 See the General Education (p. 54) section of the catalog for a full list of courses.

3 Students must take only one Area V and one Area VI course.

4 It is strongly suggested that students use their elective credits to earn a minor such as Marketing, Business Administration, Food Science and Technology, Human-Animal Interaction, or a Language. *Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

5 See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.
Departmental Electives (the following are typical offerings):

- HRTM 412 Beverage Management
- HRTM 413 Restaurant Operations Management
- HRTM 414 Wine Appreciation
- HRTM 416 Hotel, Restaurant and Tourism Industry Purchasing, Selection, and Procurement
- HRTM 420 Club Management and Marketing
- HRTM 431 Hotel Operations II
- HRTM 432 Hotel Revenue and Sales Management
- HRTM 435 Resort Management
- HRTM 436 Sustainability in the Hospitality Industry
- HRTM 443 Meetings, Conventions and Special Events
- HRTM 444 Entertainment Business and Venue Management
- HRTM 450 Special Topics
- HRTM 492 Special Problems

Hotel, Restaurant and Tourism Management - Undergraduate Minor

A minor in the School of Hotel, Restaurant and Tourism Management consists of 18 or more credit hours of approved course work of which at least 12 must be numbered 300 or higher: all completed with a grade of "C" or higher.

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HRTM 1130</td>
<td>Introduction to Hospitality Management</td>
<td>3</td>
</tr>
<tr>
<td>HRTM 302</td>
<td>Hospitality Management Accounting</td>
<td>3</td>
</tr>
</tbody>
</table>

Choose one additional HRTM course (200-level):

- HRTM 1120 Introduction to Tourism
- HRTM 2130 Hotel Operations I
- HRTM 2120 Food Production and Service Fundamentals

Choose nine credits of 300- or 400-level courses:

- HRTM 301 Hotel, Restaurant, and Tourism Marketing
- HRTM 304 Hospitality and Travel Law
- HRTM 307 Professional Development
- HRTM 311 Hospitality Leadership Management
- HRTM 363 Quantity Food Production and Service
- HRTM 408 Hospitality Internship
- HRTM 409 HRTM Internship Seminar
- HRTM 410 Hospitality Cost Control
- HRTM 412 Beverage Management
- HRTM 413 Restaurant Operations Management
- HRTM 414 Wine Appreciation
- HRTM 416 Hotel, Restaurant and Tourism Industry Purchasing, Selection, and Procurement
- HRTM 420 Club Management and Marketing
- HRTM 430 Hospitality Facilities Management
- HRTM 431 Hotel Operations II
- HRTM 432 Hotel Revenue and Sales Management
- HRTM 435 Resort Management
- HRTM 436 Sustainability in the Hospitality Industry
- HRTM 443 Meetings, Conventions and Special Events
- HRTM 444 Entertainment Business and Venue Management
- HRTM 445 Hospitality Management Accounting

Water Science and Management

Graduate Program Information

New Mexico faces serious challenges concerning the supply, development, quality, management and administration of water resources; responses to the challenges will have major impacts on the regional economy, environmental quality and the quality of life of the residents of New Mexico. A major need exists to train the next generation of water resource researchers, educators, and managers to address these challenges, both inside and outside New Mexico. To help meet these needs, an interdisciplinary program in Water Science & Management (WSM) has been developed at NMSU by the departments of:

- Agricultural Economics and Agricultural Business,
- Animal and Range Science,
- Civil Engineering,
- Geography, and
- Plant and Environmental Sciences.

The primary purposes of the interdisciplinary masters and doctoral degree programs in WSM are to provide graduate education for addressing state, national, and international water issues, and to train the next generation of water professionals needed to meet the challenges noted above. A Master of Science WSM degree can be earned with 26 credits of formal course work, plus additional thesis research credits, and a Doctor of Philosophy WSM can be earned with 30-40 credits of formal course work beyond the masters, plus additional dissertation research credits.

Admission Requirements

Admission Requirements for the Master of Science (MS) in water science and management include all general requirements for a graduate degree as set forth in the NMSU Catalog, plus the following:

- Possession of a bachelor’s degree from an accredited university grade point average of 3.5 or higher on a 4.0 scale. However, students with grade point averages between 3.0 and 3.5 will be given consideration, this degree being preparatory to the Water Science and Management degree.
- A letter of intent or statement of purpose that addresses individual professional and personal goals related to water science and management and discusses how these goals fit within the degree programs at NMSU. It is expected that the candidate will have made
contact with prospective advisor(s) at NMSU and speak to how he or she would work with said advisor(s) to advance their research and study.

- Three letters of recommendation submitted directly from persons who know the applicant professionally, including a recommendation from the candidate’s current employer/sponsor. These letters should provide evidence of professional ability, research experience and the potential for professional development.
- A brief resume or curriculum vitae not to exceed five pages that summarize the candidate’s background and qualifications.

**Admission Requirements for the Doctor of Philosophy (Ph.D.)** in water science and management include all general requirements for a graduate degree as set forth in the NMSU Catalog, plus the following:

- Possession of a master’s degree from an accredited university with a grade point average of 3.5 or higher on a 4.0 scale. However, students with grade point averages between 3.0 and 3.5 will be given consideration. This degree being preparatory to the Water Science and Management doctorate.
- Three letters of recommendation submitted directly from persons who know the applicant professionally, including a recommendation from the candidate’s current employer/sponsor. These letters should provide evidence of professional ability, research experience, and the potential for professional development.
- In addition, applicants to the Ph.D. program should provide evidence of research experience. This could include a master’s thesis, a professional paper, peer reviewed manuscripts, consulting reports, or other evidence of experience conducting research.
- A letter of intent or statement of purpose that addresses individual professional and personal goals related to water science and management and discusses how these goals fit within the degree programs at NMSU. It is expected that the candidate will have made contact with prospective advisor(s) at NMSU and speak to how he or she would work with said advisor(s) to advance their research and study.
- A brief resume or curriculum vitae not to exceed five pages that summarize the candidate’s background and qualifications.

**Water Science & Management Graduate Courses**

To view the list of core courses required for our Master of Science and Doctor of Philosophy degrees please see the [Degrees](p. 252) tab. The following courses on this tab are electives from the designated water list for the relevant concentrations.

Five (5) concentrations are offered in the program and are detailed on the program page:

- **Agricultural Water Resources** relates to the major use of ground and surface water in providing safe and secure food systems while ensuring ecosystem services. This field of study includes water allocation, water conservation and water management issues facing urban water supply and irrigated agriculture.
- **Watershed, Riparian and Aquatic Systems** includes the processes of organizing and guiding land and other resources used in a river basin to provide desired goods and services without adversely affecting soil and water resources. Watershed, riparian, and aquatic system management involves an array of nonstructural (vegetation management) practices, as well as an array of structural (engineering) activities, when conditions warrant.
- **Water Quality and Treatment** includes processes used to make water acceptable for desired end-uses. These can include use as drinking water, industrial processes, agricultural uses and environmental management. The goal of water treatment processes is to remove existing contaminants in the water or reduce the concentration of such contaminants so the water becomes fit for its desired end-use.
- **Water Economics and Policy** examines the demand for water by all its competing uses, including irrigated agriculture, energy, urban supply, and environmental restoration and management. Policies are examined for their influence on water supplies, water demands, and economic values of water reallocations among agricultural, environmental, energy, and urban users. It examines the role of water markets, water user decisions, institutional adjustments, and water-related policies with respect to resource costs, water quality, profitability, and environmental effects.
- **Water informatics** is an interdisciplinary science primarily concerned with the collection, classification, manipulation, storage, retrieval and especially the dissemination of water information, including both human and machine readable documents. Examples of human readable documents include maps, field data sheets, operational schedules, and long term asset management plans with narrative text. Machine readable documents include files for geographic information systems (GIS), Global Positioning Systems (GPS), relational database management systems and emerging applications.

**Degrees for the Department**

**Master Degree(s)**

Water Science and Management - Master of Science (p. 254)

**Doctoral Degree(s)**

Water Science and Management - Doctor of Philosophy (p. 254)

**Affiliated Faculty** – S. Angadi, Ph.D. (University of Manitoba, Canada); S. Archambault, Ph.D. (UNM); A. Salim Bawazir, Ph.D. (NMSU); M.P. Bleiweiss, M.S. (California State-Los Angeles); W.Boeing, Ph.D. (Louisiana State); K. Boykin, Ph.D. (NMSU); C. E. Brewer, Ph.D. (Iowa State); C. Brown, Ph.D. (San Diego State/California-Santa Barbara); S. W. Brown, Ph.D. (NMSU); K. C. Carroll, Ph.D. (Arizona); D. E. Cowley, Ph.D. (Wyoming); D. S. Crum, Ph.D. (NMSU); M. N. DeMers, Ph.D. (Kansas); C. M. Downes, Ph.D. (New Mexico); D. W. DuBois, Ph.D. (Nevada); D. D. Fugdas, Ph.D. (Oregon); W. M. Fedio, Ph.D. (University of Alberta, Canada); A. G. Sam Fernald, Ph.D. (Colorado State); R. Flores, Ph.D. (Kansas State); R. Foudazi, Ph.D. (Cape Peninsula University of Technology, South Africa); A. Ganguli, Ph.D. (Oklahoma State); A. Ghassemi, Ph.D. (NMSU); R. M. Goss, Ph. D. (Nebraska); W. R. Gould, Ph.D. (North Carolina State); S. J. Guldan, Ph.D. (Minnesota); P. Gutierrez, Ph.D. (J. Herrick, Ph.D. (Ohio State); B. Hurd, Ph.D. (California-Davis); M. D. Johnson, Ph.D. (NMSU); N. Khandan, Ph.D. (Drexel University); J. P. King, Ph.D. (Colorado State); S. Langarudi, Ph.D. (Worcester Polytechnic); A. S. Lara, Ph.D. (NMSU); B. Leinauer, Ph.D. (Hohenheim University, Germany); H. Luo, Ph.D. (Tulane); M. C. Mitchell, Ph.D. (Minnesota); L. Papelis, Ph.D. (Stanford); G. A. Picchioni, Ph.D. (Texas A&M); R. C. Pratt, Ph.D. (Purdue); A. Rango, Ph.D. (Colorado State); D. A. Rockstraw, Ph.D. (Oklahoma); R. Sallenne, Ph.D. (University of Guelph, Canada); Z. A. Samani, Ph.D. (Utah State); M. K. Shukla, Ph.D. (University of Agricultural Sciences-Vienna, Austria); G. Sims, Ph.D. (Purdue); G. B. Smith, Ph.D. (North Carolina State); R. G. Smits, Ph.D. (Purdue); S. N. Smirnov, Ph.D. (Novosibirsk University, Russia); R. St. Hilaire, Ph.D. (Iowa State); C. M. Steele, Ph.D. (King’s College, University of London, UK); K. Stevens, M.S. (NMSU); B. L. Stringam, Ph.D. (Utah State); A. L. Ullery, Ph.D. (California-Riverside); J. Ursu, Ph.D. (Texas Tech); F. A. Water Science and Management Courses

WSAM 470. Environmental Impacts of Land Use and Contaminant Remediation
3 Credits (3)
The course will cover the integrated assessment of soil erosion, contaminant transport in soil and water, and contaminant remediation from site scale to watershed scales. Understanding of the controlling factors for each type land use impact will be gained through the use of risk assessment, case studies, and computer modeling. Case studies will illustrate the processes under various environmental applications. This course will also cover the application of solute transport principles and methods for the remediation of contaminated soil and groundwater. It will also discuss the contaminated site characterization, monitoring, and remediation design. Discussions of innovative methodologies will be supported with case studies. May be repeated up to 3 credits. Crosslisted with: ENVS 470.

WSAM 550. Special Topics
1-4 Credits (1-4)
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 9 credits.
Learning Outcomes
1. Readings, discussions, and/or field and laboratory investigation of selected problems.

WSAM 551. Earth Data Retrieval
3 Credits (3)
This course covers topics related to identifying sources, preprocessing, utilizing earth data that can be used to monitor some hydrological and water related variables, vegetation growth and related biophysical properties. The course focuses on developing students’ skills on how to handle and analyze high-level large amounts of research data in different formats (i.e., .hdf). The course highlights the use of remote sensing and land surface models-based (NLDAS) earth observation datasets (e.g., NDVI, LST, Ta, and ET). The course uses some open-source tools including Python, API as well as MATLAB. Crosslisted with: RGSC 551.

WSAM 575. Climate Studies, Water and Society
3 Credits (3)
The course provides a brief description of the Earth’s climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water availability) vulnerability of human systems (e.g. agriculture) to climate change, and mitigation and adaptation strategies. Crosslisted with: RGSC 575.

WSAM 585. Land Cover Analysis for Natural Resources
3 Credits (3)
This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. .hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis. Crosslisted with: RGSC 585.

WSAM 589. Landscape Hydrology Modeling
3 Credits (3)
Understand the landscape scale of hydrologic cycle and related hydrological processes. Quantitatively evaluate hydrological system components. Retrieve, visualize and model some of the physical processes using some of the available tools. Consent of Instructor required.

WSAM 590. System Dynamics
3 Credits (3)
This course takes a system dynamics approach to the study of economics and natural resources management. We will examine some of the example theories such as Solow-Swan model and endogenous growth theories as well as the tragedy of the commons, using system dynamics tools to uncover the feedback and explicitly examine its impact on the dynamic behavior of the system. Through these examples, we will learn how to develop, validate, and use system dynamics models for policy design and analysis. Crosslisted with: RGSC 590.
Learning Outcomes
1. Identify common generic structures and behavioral modes in socioeconomic and ecological systems,
2. Define important feedback theories that explain the behavioral modes in socioeconomic and ecological systems, and
3. Implement the system dynamics method to translate the feedback theories into dynamic simulation models.

WSAM 599. Masters Thesis
1-15 Credits (1-15)

WSAM 600. Doctoral Research
1-15 Credits (1-15)
Assigned credit for research preformed. May be repeated up to 15 credits. Consent of Instructor required.
Learning Outcomes
1. Identify appropriate research methodologies.
2. Reflect on their own research, identifying lessons learned, strengths, and ways to improve.
3. Communicate confidently and constructively with faculty advisors.

WSAM 605. Arid Land Water Resources
3 Credits (2+2P)
The course will cover various issues of relevance to water resources and water supply management within the Southwest US and other semiarid and arid regions. Discussions may include development and sustainability, climate change and drought, socioeconomic and cultural, and transboundary issues. May be repeated up to 3 credits. Crosslisted with: ENVS 605.

WSAM 610. Water and Sustainable Economic Development
3 Credits (3)
For graduate students in the Water Science and Management or other research degree programs, use the water economics literature as a model for student research leading to an M.S. thesis or Ph.D. dissertation. 

WSAM 700. Doctoral Dissertation
1-15 Credits (1-15)
Water Science and Management - Master of Science

This degree is designed primarily for students who wish to complement their primary discipline by obtaining scientific, technical, and managerial expertise in water. The Master’s degree can be earned with 27 credits of formal course work, plus 6 additional thesis research credits, as detailed below. The degree also have five available concentrations.

Thesis

WSAM 599 | Masters Thesis | 6

Total Credits 21-22

1 With the consent of the instructor and the approval of the student’s advisor, C E 582 Statistical Hydrology or GEOG 585 Advanced Spatial Analysis may be used as a substitute.

2 Seminar may be substituted by WSAM 605 Arid Land Water Resources, or WSAM 610 Water and Sustainable Economic Development, or GEOG 501 Research Design and History of Geographic Thought.

Water Science and Management - Doctor of Philosophy

This degree is designed to give students a thorough and comprehensive knowledge of water science and hydrology and training in methods of research. The Ph.D. degree can be earned in about 33-35 credits of formal course work beyond the Masters Degree, plus 18 additional dissertation research credits, for a minimum total of 75 credits beyond the BS degree, as detailed below. This degree has five available concentrations.

Electives (in consultation with the student’s committee) 27

Dissertation

WSAM 700 | Doctoral Dissertation | 18

Total Credits 63-65

1 With the consent of the instructor and the approval of the student’s advisor, C E 582 Statistical Hydrology or GEOG 585 Advanced Spatial Analysis may be used as a substitute.

2 Seminar may be substituted by WSAM 605 Arid Land Water Resources, or WSAM 610 Water and Sustainable Economic Development, or GEOG 501 Research Design and History of Geographic Thought.

Students are expected to have a basic foundation in Geographic Information System (GIS) within a classroom, research experience, or professional experience. Students without this background are required to take an appropriate GIS class as advised by their advisor such as: GEOG 578 Fundamentals of Geographic Information Science (GIS), or FWCE 535 Special Topics.

College of Arts and Sciences

Dean - Enrico Pontelli

Associate Dean (Research) - James Murphy

Associate Dean (Academics) - Joseph Lakey

Executive Administrative Assistant - Sheri Pettit
Business Manager - Lucille Casas

Undergraduate programs offered in the College of Arts and Sciences prepare students for a variety of career opportunities and for graduate study. The broad curriculum offered provides both the motivation and the tools for lifelong learning experiences.

While the ultimate responsibility for planning an academic program in compliance with university, college and departmental requirements rests with the student, the college recognizes the importance of helping students work out appropriate academic programs.

Students should consult the "Academic Regulations (p. 897)" section of the catalog regarding general limitations for total credit hours, independent study and registration under S/U option, registration deadlines, and conditions required to make academic progress and maintain good academic standing. Students may not revise or do additional course work after the semester has ended in order to raise a grade in any course. Exceptions will be made for students completing an official Incomplete grade.

College Undergraduate Degree Requirements

1. In accordance with NMSU policy, students in all majors in the College of Arts and Sciences must meet the Basic Academic Skills requirements in English and Mathematics prior to enrolling in upper division courses numbered 300 or higher. See "Basic Academic Skills (p. 897)" under Performance/Progress in the NMSU System Academic Regulations & Policies section.

2. University graduation requirements. See "Graduation/Commencement (p. 897)" in the Regulations & Policies section. In order to graduate, undergraduate students must have met all degree requirements for their program, earned a minimum of 120 university level credits, or more if required for the degree, of which at least 48 must be upper division (except for the Bachelor of Applied Studies, which requires 36 upper division credits) and must have a cumulative GPA of 2.0 in all courses taken at NMSU. Each student must complete at least 30 of the necessary credits for their Bachelor Degree at NMSU. A minimum of "C-" in all courses counting toward the major, supplemental major and minor is required of all students.

S/U Grading Option for Undergraduate Students

Instructors may establish individual standards for an S grade, but the minimum standard for an S grade in the College of Arts and Sciences courses is a C-.

Developmental and Applied Credit Limitations for Undergraduate Students

The College of Arts and Sciences will accept all applied coursework, which includes Occupational Education courses, BOT, FDMA, FYEX (not including FYEX 1112 The Freshman Year Experience and UNIV 350 Peer Education), ARTS/ARTH (applied), DANC (applied), MUSC (applied and participation), THEA (applied), NURS, A EN, AXED, and AEEC. These courses count towards overall credit hours to bring the student's total to the minimum credit hours required. Students must still complete all university requirements: General Education; Viewing a Wider World; the required number of upper division credits, as well as all requirements for their declared major degree. Students should contact their Arts and Sciences Student Records Specialist regarding the acceptability of specific courses.

Independent Study/Directed Reading Courses for Undergraduate Students

Students are limited to six credits in any independent study course. Independent study courses include directed reading and special topic courses, which do not carry a subtitle.

Majors, Minors and Supplementary Majors for Undergraduate Students

Except for the Bachelor of Applied Studies and Bachelor of Individualized Studies, students who wish to obtain a bachelor's degree must select a major field or fields. For a listing of majors, the student should refer to the list of majors in this catalog. Course requirements for majors are listed under individual departments. Students should consult the department with any questions about requirements. Until a major is selected, the student is designated as undeclared.

Each major consists of not less than 24 credits in the major field, of which 18 or more must be in upper-division courses (300 and above). Some departments also require specific courses outside the major field. Please refer to the departmental section of the catalog for specific nondepartmental requirements. Students must earn a grade of C- or better for all course requirements indicated for each major, minor, or supplementary major, including any nondepartmental courses required. Students may not count an S grade towards completion of any major, minor or supplementary major requirement unless a course is automatically S/U for all enrolled students. A student may not earn a minor that bears the same name as a bachelor's degree that the student is earning. (For example, a student earning a B.S. in Biology cannot also earn a minor in Biology.) It is imperative that students consult the departmental sections of this catalog for advice in planning to fulfill requirements for their declared majors. The requirements for academic minors in the College of Arts and Sciences are found under each offering department or program section of this catalog.

Supplementary Majors

Requirements for supplementary majors are found as follows:

- the Supplementary Majors in Chicano Studies, Latin American Studies, and Linguistics (p. 547) are listed under Languages and Linguistics (p. 547);
- the Supplementary Major in Law and Society (p. 500) is listed under Government (p. 500); and
- the Supplementary Major in Applied Mathematics (p. 582) is listed under Mathematical Sciences (p. 582).

Most students have considerable latitude in choosing elective courses. These are the courses beyond university and major requirements that a student must take to bring her or his total credits to the minimum overall credits required for the degree. This latitude provides students with opportunities to major in more than one field, to take a minor or to devise interdisciplinary programs tailored to individual interests or future career needs.

Regardless of the option elected, students should consult regularly with an advisor and track their progress towards degree completion and graduation using the online degree audit system STAR (Student Academic Requirements), at: http://www.myNMSU.edu.

Preprofessional Studies

NMSU offers a number of programs designed for transfer to professional schools through its undergraduate colleges. Several programs in the
College of Arts and Sciences provide preparation for Law and Health professions.

- Pre-Health Professions advising is coordinated by the Center for Academic Advising and Student Support (CAASS).
- Pre-Law advising is coordinated by the Department of Government. Students interested in attending law school must first obtain a bachelor’s degree but that degree can be in any subject. Many pre-law students take some law courses in their undergraduate program; law related courses are taught in government, philosophy, criminal justice and other departments. The Department of Government coordinates the interdisciplinary Supplementary Major in Law and Society. See the NMSU Department of Government webpage. The Department of Philosophy offers both a major and a minor in Justice, Political Philosophy, and Law. See the NMSU Department of Philosophy webpage.

Bachelors Degrees
Bachelor of Applied Studies (p. 533)

Bachelor of Arts

Majors in:

- Anthropology (p. 276)
  - Culture & Language
- Art
  - Art History (p. 301)
  - Studio Art (p. 302)
- Biology (p. 328)

- Philosophy (p. 640)
- Physics (p. 654)
- Psychology (p. 665)
- Theatre Arts (p. 674)
  - Musical Theatre (p. 676)

Bachelor of Creative Media

Majors in:

- Animation and Visual Effects (p. 421)
  - 2D Production Studio (Pathway)
  - 3D Production Studio (Pathway)
- Digital Film Making (p. 424)

Bachelor of Criminal Justice (p. 433)

Bachelor of Criminal Justice (Online)

Bachelor of Fine Arts

Major in:

- Art (p. 304)
  - Museum Conservation
  - Studio Art (Emphasis)

Bachelor of Individualized Studies (p. 535)

Bachelor of Music

Major in:

- Music
  - Instrumental Performance (p. 624)
  - Piano Performance (p. 626)
  - Vocal Performance (p. 628)

Bachelor of Music Education

Major in:

- Music Education
  - K12 Instrumental (p. 630)
  - K12 Vocal (p. 632)

Bachelor of Science

Majors in:

- Biochemistry (p. 351)
- Biology (p. 330)
- Chemistry (p. 355)
- Computer Science (p. 386)
  - Algorithm Theory (p. 388)
  - Artificial Intelligence (p. 391)
  - Big Data and Data Science (p. 393)
  - Computer Networking (p. 396)
  - Cybersecurity (p. 398)
  - Human Computer Interaction (p. 400)
  - Software Development (p. 403)
- Cybersecurity (p. 405)
- Genetics and Biotechnology (p. 334)
- Geography
  - Geographic Information Science & Tech (p. 480)
  - Human Environment Relationships (p. 483)
- Geology
• Earth and Environmental Systems (p. 492)
• Earth Science Education (p. 494)
• Geological Sciences (p. 497)
• Mathematics
  • Actuarial Science and Insurance (p. 596)
  • Applied Mathematics (p. 596)
  • Foundations (p. 598)
  • General Mathematics (p. 600)
  • Probability and Statistics
  • Secondary Mathematics Education (p. 602)
• Microbiology (p. 336)
• Physics (p. 656)

Dual Degrees
Bachelor of Science/Master of Science in Computer Science (p. 407)

Masters Degrees
Master of Applied Geography (p. 486)

Master of Arts

Majors in:
• Anthropology (p. 281)
• Art (p. 309)
  • Art History (Emphasis)
• Communication Studies (p. 366)
• English (p. 471)
  • Creative Writing (Emphasis)
  • English Studies for Teachers (Emphasis)
  • Literature (Emphasis)
  • Rhetoric, Digital Media & and Professional Communication (Emphasis)
  • Technical and Professional Communication (Concentration Online)
• Experimental Psychology (p. 668)
• Government (p. 511)
• History (p. 527)
  • Public History (p. 528)
• Spanish (p. 581)
  • Linguistics (Area of Study)
  • Literature (Area of Study)
• Spanish (Online)

Master of Criminal Justice

Master of Data Analytics (p. 410)

Master of Data Analytics (Online)

Master of Fine Arts

Major in:
• Art (p. 309)
  • Studio Art (Emphasis)

Master of Fine Arts in Creative Writing

Master of Music

Major in:
• Music
  • Conducting
  • Music Education
  • Music Education (Online)
  • Performance

Master of Public Administration

Master of Science

Majors in:
• Astronomy (p. 315)
• Bioinformatics (p. 409)
• Biology (p. 340)
  • Behavioral, Ecological and Evolutionary Biology (Emphasis)
  • Cell & Organismal Biology (Emphasis)
  • Microbiology (Emphasis)
• Chemistry (p. 357)
• Computer Science (p. 411)
• Geology (p. 500)
• Mathematics (p. 605)
• Molecular Biology (p. 612)
• Physics (p. 659)
  • Space Physics (p. 659)

Dual Degrees
Master of Public Administration/Master of Arts in Public History (p. 512)

Master of Public Administration/Master of Criminal Justice (p. 512)

Doctoral Degrees

Doctor of Philosophy

• Astronomy (p. 315)
• Biology (p. 341)
  • Behavioral, Ecological and Evolutionary Biology (Emphasis)
  • Cell & Organismal Biology (Emphasis)
  • Microbiology (Emphasis)
• Chemistry (p. 358)
• Computer Science (p. 412)
• Experimental Psychology (p. 668)
• Geography (p. 486)
• Mathematics (p. 605)
• Molecular Biology (p. 612)
• Physics (p. 659)
• Rhetoric and Professional Communication (p. 473)

Supplemental Majors
• Applied Mathematics (p. 604)
• Chicano Studies (p. 580)
• Latin American Studies (p. 579)
• Law and Society (p. 511)
• Linguistics (p. 580)

Graduate Certificates
• Borderlands and Ethnic Studies (p. 437)
• Cultural Resource Management (p. 283)
• Museum Studies (p. 283)

Undergraduate Minors
• Aerospace Studies (p. 260)
• Algorithm Theory (p. 408)
• American Government and Politics (p. 509)
• Animation and Visual Effects (p. 426)
• Anthropology (p. 279)
• Archaeology (p. 279)
• Art (p. 308)
• Art History (p. 308)
• Astronomy (p. 314)
• Biochemistry (p. 357)
• Bioinformatics (p. 408)
• Biology (p. 339)
• Chemistry (p. 357)
• Child Advocacy Studies (p. 435) (through the FCS department, in the College of ACES)
• Communication and National Security (p. 365)
• Communication Studies (p. 365)
• Comparative Politics (p. 509)
• Computer Systems (p. 408)
• Conservation Ecology (p. 339)

• Spanish (p. 579)
• Strategic Communication (p. 546)
• Sustainability (p. 280)
• Theatre Arts (p. 678)

Graduate Minors
• Anthropology (p. 284)
• Archaeology (p. 284)
• Bioinformatics (p. 613)
• Communication and National Security (p. 367)
• Communication Studies (p. 367)
• Computer Science (p. 413)
• Computer Systems (p. 284)
• Gender & Sexuality Studies (p. 537)
• Geographic Information Systems (p. 487)
• History (p. 528)
• Molecular Biology (p. 613)
• Native American Studies (p. 284)
• Physics (p. 660)
• Psychology (p. 668)
• Security & Intelligence Study (p. 512)
  • In the College of Arts and Sciences, the Department of Chemistry and Biochemistry is accredited by the American Chemical Society.
  • The Bachelor of Science in Computer Science is accredited by ABET.
  • Music curricula in the Department of Music are accredited by the National Association of Schools of Music.
  • The Master of Public Administration program in the Department of Government is accredited by the National Association of Schools of Public Affairs and Administration.
Aerospace Studies

Undergraduate Program Information

Air Force Reserve Officer Training Corps (AFROTC) is a nationwide program that allows students to pursue commissions (become officers) in the United States Air Force (USAF) while simultaneously attending college. AFROTC classes are held on college campuses throughout the United States and Puerto Rico; students can register through normal course registration processes. AFROTC consists of four years of Aerospace Studies classes (Heritage and Values of the United States Air Force, Team and Leadership Fundamentals, Leading People and Effective Communication, and National Security Affairs/Preparation for Active Duty), and a corresponding Leadership Laboratory for each year (where students apply leadership, demonstrate command and effective communication, develop physical fitness, and practice military customs and courtesies). College students enrolled in the AFROTC program (known as “cadets”) who successfully complete both AFROTC training and college degree requirements will graduate and simultaneously commission as Second Lieutenants in the Active Duty Air Force.

Freshman and Sophomore Years (General Military Course or GMC)

This group provides a general background knowledge of the military establishment with emphasis on the Air Force. GMC courses may be taken out of sequence.

Junior and Senior Years (Professional Officer Course or POC)

This group constitutes an in-depth study of topics that provides a broad preparation for a career as an Air Force officer. Students must have certain qualifications for entry and have a desire to be commissioned in the Air Force. These qualifications include, achieving a passing score on the Air Force Officer’s Qualifying Test, passing a physical fitness test, and successfully completing a medical exam. They must also complete a four- or five-week summer orientation course.

Students may, with departmental approval, take POC courses out of normal sequence. However, compressed or dual enrollment in upper-division POC courses is normally prohibited. Through this department, you can also earn a minor in Aerospace Studies.

Leadership Laboratory

This is an integral and mandatory portion of the Aerospace Studies curriculum. Within the framework of the cadet wing, it provides a progression of experiences designed to develop each student’s leadership potential and serves as an orientation to military life.

Minors for the Department

Aerospace Studies - Undergraduate Minor (p. 260)

Lieutenant Colonel Dee Bochte, Department Head

Assistant Professors and Staff: Capt Isaac Castillo, Capt Chris Kuennen, TSgt Nicole Joens, TSgt Jeffrey Mayo, and Ms. Patti Alarcon

Aerospace Studies Courses

AERO 121. Heritage and Values
2 Credits (1.25+2P)
“Heritage and Values of the United States Air Force,” is a survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Includes Leadership Lab practicum. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

AERO 122. Heritage and Values II
2 Credits (1.25+2P)
“Heritage and Values of the United States Air Force,” is a survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, and organization of the Air Force. Includes Leadership Lab practicum. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

AERO 221. Team and Leadership Fundamentals
2 Credits (1.25+2P)
“Teams and Leadership Fundamentals,” focuses on laying the foundation for teams and leadership. The topics include skills that allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Includes Leadership Lab practicum. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

AERO 222. Team and Leadership Fundamentals II
2 Credits (1.25+2P)
“Teams and Leadership Fundamentals,” focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Includes Leadership Lab practicum. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

AERO 223. Air Force Leadership Development
1 Credit (2P)
This course prepares cadets to excel in field training. Cadets are prepared in all facets of field training, including: leadership competency evaluations, the Cadet's Guide to Field Training, individual drill evaluations, attention to detail, dining hall procedures, maintenance of living areas, and the group problem solving process. Restricted to: Main campus only.
AERO 301. Leading People and Effective Communication
4 Credits (3+2P)
"Leading People and Effective Communication," teaches cadets advanced
skills and knowledge in management and leadership. Special emphasis is
placed on enhancing leadership skills and communication. Cadets have
an opportunity to try out these leadership and management techniques
in a supervised environment as juniors and seniors. Includes Leadership
Lab practicum.
Prerequisite(s): Completion of AERO 121/AERO 122 and AERO 221/
AERO 222, or permission of instructor.

AERO 302. Leading People and Effective Communication II
4 Credits (3+2P)
"Leading People and Effective Communication," teaches cadets advanced
skills and knowledge in management and leadership. Special emphasis is
placed on enhancing leadership skills and communication. Cadets have
an opportunity to try out these leadership and management techniques
in a supervised environment as juniors and seniors. Include Leadership Lab
practicum.
Prerequisite(s): Completion of AERO 121/AERO 122 and AERO 221/
AERO 222, or permission of instructor.

AERO 401. National Security, Leadership Responsibilities and
Commissioning Preparation
4 Credits (3+2P)
"National Security Affairs/Preparation for Active Duty," is designed for
college seniors and gives them the foundation to understand their role
as military officers in American society. It is an overview of the complex
social and political issues facing the military profession and requires a
measure of sophistication commensurate with the senior college level.
The final semester provides information that will prepare the cadets for
Active Duty. Includes Leadership Lab practicum.
Prerequisite(s): Completion of AERO 121/AERO 122, AERO 221/
AERO 222, and AERO 301/AERO 302, or permission of instructor.

AERO 402. National Security, Leadership Responsibilities and
Commissioning Preparation II
4 Credits (3+2P)
"National Security Affairs/Preparation for Active Duty," is designed for
college seniors and gives them the foundation to understand their role
as military officers in American society. It is an overview of the complex
social and political issues facing the military profession and requires a
measure of sophistication commensurate with the senior college level.
The final semester provides information that will prepare the cadets for
Active Duty. Includes Leadership Lab practicum.
Prerequisite(s): Completion of AERO 121/AERO 122, AERO 221/
AERO 222, AERO 301/AERO 302, and AERO 401 or permission of
instructor.

AERO 411. Aerospace Studies Independent Study
1 Credit (1)
This course provides in-depth research on specified topics of the United
States Air Force and NMSU's Detachment 505 history. Consent of
instructor required.
Prerequisite(s): AERO 301, AERO 302, AERO 401, AERO 402.

Phone: (575) 646-2136

Select two from the following:
- HIST 312V Modern Latin America
- POLS 360 International Relations
- POLS 371 Latin American Politics
- MGMT 333 Training and Development
- MGMT 347 Management Functions and Processes
- MGMT 388V Leadership and Ethics
- MGMT 453 Leadership and Motivation
- M SC 310 Leading Small Organizations I
- M SC 320 Leading Small Organizations II
- M SC 401 Leadership Challenges and Goal Setting

Total Credits 22

Anthropology

Anthropology Program Information
Anthropology is the study of humankind, a multidisciplinary endeavor
involving the social sciences, the humanities, and the natural sciences.
Anthropologists study the human species and the human condition in
all its diversity. Anthropologists ask questions such as: "Who are we?"
"Where did we come from?" "How did we get here?" "Why are we different
from each other?" and, "How can we better understand each other?"

Studies in anthropology might focus, for example, on human
palaeontology, evolution, contemporary human health and biological
variation, the culture of medicine and contemporary health systems,
agriculture and foodways, historic archaeology of the Camino Real, Native
American visual culture, Indigenous ways of knowing, gender and culture,
or archaeology of the American Southwest and Mesoamerica.

Undergraduate education at New Mexico State University covers all four
sub-disciplines of the field:

- Biological Anthropology - the study of human origins, primate
  relatives, and human biological diversity
- Archaeology - the study of the origin and change of the human past
  in both historic and prehistoric times, using material remains
- Cultural Anthropology - the study of beliefs, values, shared
  understandings, traditions and modern practices of peoples from
  around the world
- Linguistic Anthropology - the study of human language, linguistic
  diversity, and speech

Graduate Program Information
The Anthropology M.A. program is designed for students who are
interested in the traditional sub-disciplines of anthropology, as well
as such related fields as cultural resource management, food studies, medical anthropology, museum studies, and social impact assessment. The program is directed toward students who intend to take a terminal M.A. degree and students who intend, after NMSU, to enter a Ph.D. program. In addition to the M.A. in anthropology, our program also offers graduate minors in anthropology, archaeology, food studies, and Native American studies, as well as graduate certificates in cultural resource management and museum studies.

An undergraduate anthropology degree is not required for entry into the M.A. program. Students who lack the equivalent of ANTH 301, ANTH 315, and ANTH 355 may be required to take these courses. ANTH 350 or the equivalent is recommended.

Degrees for the Department
Bachelor Degree(s)
- Anthropology - Bachelor of Arts (p. 276)
- Anthropology (Culture & Language) - Bachelor of Arts

Master Degree(s)
- Anthropology - Master of Arts (p. 281)

Minors for the Department
Undergraduate
- Anthropology - Undergraduate Minor (p. 279)
- Archaeology - Undergraduate Minor (p. 279)
- Medical Anthropology - Undergraduate Minor
- Native American Studies - Undergraduate Minor (p. 280)
- R (p. 281) Ligious Studies - Undergraduate Minor (p. 281)
- Sustainable Development - Undergraduate Minor (p. 280)

Graduate
- Anthropology - Graduate Minor (p. 284)
- Archaeology - Graduate Minor (p. 284)
- Food Studies - Graduate Minor (p. 284)
- Native American Studies - Graduate Minor (p. 284)

Graduate Certificates
- Cultural Resource Management - Graduate Certificate (p. 283)
- Museum Studies - Graduate Certificate (p. 283)

Professor, Rani T. Alexander, Department Head

Professors
- Alexander, Arakawa, Stanford, Walker; Associate Professors Jenks, Scott; Assistant Professors Badoni, Olszowy; College Professors Pepion, Emeritus Professors Benefit, Chaiken, Conelly, Eber, McCrossin, O'Leary, Rushforth, Staski, Trevathan.

Anthropology Courses

ANTH 1115G. Introduction to Anthropology
3 Credits (3)
Anthropology is the systematic study of the humanity both past and present. The course introduces students to the four subfields of anthropology, which include archaeology, biological, linguistic and cultural anthropology. Students will learn about the concepts and methods that anthropologists use to study our species and gain a broader perspective on the human experience.

Learning Outcomes
1. Describe and summarize terms, approaches, and cultural and biological adaptations in the four subfields of anthropology. Explain and analyze conceptual and ethical arguments in the four subfields of anthropology. Effectively communicate content, perspectives, and ideas in four subfields of anthropology. Critically evaluate sources, approaches, and arguments in the four subfields of anthropology.

ANTH 1135G. Introduction to Biological Anthropology
3 Credits (3)
This course provides a basic introduction to the broad field of biological anthropology. The research interests of biological anthropologists include the history and development of modern evolutionary biology, molecular and population genetics, modern primates, the primate and human fossil record, and modern human biological diversity.

Corequisite(s): ANTH 1135L.

Learning Outcomes
1. Summarize the basic principles of evolution and recognize how they apply to the human species. Recognize the biological and behavioral continuity of humans with all life, and especially other modern primate species. Identify ways in which the human species is biologically and behaviorally unique. Summarize fossil evidence for human evolution. Distinguish the major Paleolithic industries and outline the behavioral and cognitive changes indicated by the fossil and archæological evidence. Critically evaluate popular accounts of human variation and human evolution. Interpret modern human dilemmas (e.g., overpopulation, co-evolution of disease, and genetic engineering) from an evolutionary perspective. Discuss in class and analyze in writing scholarly arguments concerning course concepts.
ANTH 1135L. Introduction to Biological Anthropology Lab
1 Credit (2P)
This laboratory course expand on the topics covered in lecture course and uses scientific methods and principles to examine evidence for the process of evolution, the nature of heredity, human evolutionary history and family tree relationships, primate ecology and behavior, and modern human diversity. Hands-on experience with fossil and skeletal material will be an important part of the learning process. Corequisite(s): ANTH 1135G

Learning Outcomes
1. Demonstrate an understanding of the scientific method. Employ principles of Mendelian genetics to determine genotype and phenotype probabilities, and calculate gene, genotype, and phenotype frequencies using the Hardy-Weinberg Equilibrium formula.
2. Demonstrate an understanding of cell structure and functions. Use common lab and anthropometric equipment such as a compound microscope and calipers. Discuss primate evolution, and compare and contrast members of the Primate order in terms of structure, behavior, and phylogeny. Classify hominid species based upon selected traits such as anatomical changes associated with bipedalism, changes in the size and structure of the brain, and the development of culture. Locate and describe the major bones of the human skeleton, and identify characteristics of human skeletons or skulls such as gender, age, and ancestry. Discuss current research in genome analysis of various hominid populations.

ANTH 1136. Introduction to Historic Preservation
3 Credits (3)
Introduction to historic preservation, its history, goals, methods, legal basis, and economic importance. Explores public role in decision-making. Community Colleges only.

Learning Outcomes
1. Understand why historic preservation is important;
2. be familiar with what is important to preserve;
3. know who among the general public, state, and federal governments is responsible for preserving the past;
4. Have gained experience in how we all preserve.

ANTH 1137G. Human Ancestors
3 Credits (3)
Evolutionary history of the human species from its origin in the primate order, with primary emphasis on the evolution of humankind during the past three million years. Examination of the social lives of apes and consideration of similarities to and differences from them. Biological foundations of human behavior, emphasizing thought, movement, and interaction.

Learning Outcomes
1. Describe the evolution of the human species, from its origin in the primate order to the emergence of Homo sapiens, and to the present-day.
2. Describe the social lives of apes and identify similarities to and differences between apes and humans.
3. Explain the biological foundations of human behavior.

ANTH 1140G. Introduction to Cultural Anthropology
3 Credits (3)
This an introductory course that provides an overview of cultural anthropology as a subfield within the broader discipline of anthropology and as a research approach within the social sciences more generally. The course presents core concepts and methods of cultural anthropology that are used to understand the ways in which human beings organize and experience their lives through distinctive cultural practices. More specifically, this course explores social and cultural differences and similarities around the world through a variety of topics such as: language and communication, economics, ways of making a living, marriage and family, kinship and descent, race, ethnicity, political organization, supernatural beliefs, sex and gender, and globalization. This course ultimately aims to present a broad range of perspectives and practices of various cultural groups from across the globe.

Learning Outcomes
1. Introduce students to the basic concepts and research methods of cultural anthropology as one of the disciplines of social science, including fundamental concepts, such as culture and society, which form the pillars of the discipline (e.g., cultural relativism, cultural persistence and change, world-view and enculturation). Comprehend the importance of studying cultural anthropology. Demonstrate knowledge of the practice of anthropological research in the modern world that is increasingly multicultural, transnational and globally interconnected (e.g., globalization and modern world system). Demonstrate an awareness of how students’ own cultures shape their experiences and the way they see the world, as well as help them understand and interact with other cultures. Understand how beliefs, values and assumptions are influenced by culture, biology, history, economic, and social structures. Gain a sense of relationship with people possessing different experiences from their own. Gain a deeper understanding and appreciation for cultural anthropology as a broad discipline through learning about its practices, and differentiating cultural anthropology from other disciplines that study

ANTH 1160G. World Archaeology
3 Credits (3)
This course is an exploration of human evolution and cultural development throughout the world. Students will be introduced to basic archaeological methods and theories and will learn how archaeological research has contributed to our understanding of major themes in human prehistory, including human evolution, the origins of culture, migration and colonization, animal and plant domestication, and the rise and fall of civilizations.

Learning Outcomes
1. Describe and explain the major developments in human prehistory.
2. Identify and describe major archaeological cultures throughout the world.
3. Employ critical thinking skills in the evaluation of competing theories about the past.
4. Select and use relevant archaeological evidence to explain how prehistoric populations adapted to their natural and cultural environments.
5. Demonstrate competency in written communication.
ANTH 2140G. Indigenous Peoples of North America
3 Credits (3)
This course is a general survey of the history and ethnology of indigenous groups in North America. The course is designed to give students a comprehensive view of major issues pertaining to the indigenous cultures of North America, such as family structure, social organization, subsistence and contemporary economies, environmental adaptation, Indian-White relations, religious practices, and contemporary issues.

Learning Outcomes
1. Demonstrate familiarity with common elements pertaining to the languages and social organization of indigenous peoples in North America.
2. Recognize fundamental differences and similarities among traditional indigenous cultures.
3. Describe social relations of indigenous peoples in relationship to other ethnic groups.
4. Identify and analyze important ways that European societies and cultures and indigenous societies and cultures interacted from the time of Columbus to the present.
5. Evaluate the impacts of Euroamerican policies and programs on indigenous cultures.
6. Distinguish major social issues facing contemporary indigenous communities in North America.
7. Understand objectives and limitations of cross-cultural analysis in anthropology as they relate to the study of indigenous peoples in North America.
8. Demonstrate research and communication skills as they relate to the study of indigenous peoples in North America.

ANTH 2150. Indigenous Peoples of the American Southwest
3 Credits (3)
This course is a study of indigenous cultural groups of the American Southwest. Students will explore historical and contemporary cultural and social patterns of American Indian, Hispanic and Anglo-American groups.

Learning Outcomes
1. Describe socio-cultural developments, geographic environments, and characteristics of major cultural groups that currently inhabit the American Southwest.
2. Recognize underlying similarities as well as the wide range of variability of the cultural groups in the American Southwest.
3. Recognize the impacts and effects of Euroamerican colonization on indigenous cultural groups in the American Southwest.
4. Describe the historical interactions and accommodations among indigenous cultural groups in the American Southwest.
5. Examine the processes of cultural change within major cultural groups in the American Southwest.
6. Identify and analyze some of the contemporary issues faced by major cultural groups in the American Southwest.

ANTH 2160. Indigenous Peoples of the American Southwest
3 Credits (3)
This course is a general survey of the history and ethnology of indigenous groups in the American Southwest. Students will explore historical and contemporary cultural and social patterns of American Indian, Hispanic and Anglo-American groups.

Learning Outcomes
1. Describe socio-cultural developments, geographic environments, and characteristics of major cultural groups that currently inhabit the American Southwest.
2. Recognize underlying similarities as well as the wide range of variability of the cultural groups in the American Southwest.
3. Recognize the impacts and effects of Euroamerican colonization on indigenous cultural groups in the American Southwest.
4. Describe the historical interactions and accommodations among indigenous cultural groups in the American Southwest.
5. Examine the processes of cultural change within major cultural groups in the American Southwest.
6. Identify and analyze some of the contemporary issues faced by major cultural groups in the American Southwest.

ANTH 2996. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Learning Outcomes
1. Varies

ANTH 301. Cultural Anthropology
3 Credits (3)
Human concepts of culture and life processes.
ANTH 315. Introduction to Archaeology
3 Credits (3)
Concepts and methods for study of prehistoric cultures; history of archaeological research.

ANTH 318. Historical Archaeology
3 Credits (3)
This survey course explores the development of historical archaeology, its methods and theory, and popular research themes within the discipline. Students will be introduced to the ways that archaeologists identify and analyze historical-period documents, oral histories, features, and artifacts, and how they use these data to deepen our understanding of the recent past. Crosslisted with: ANTH 518.

Learning Outcomes
1. Critically evaluate historical sources.
2. Identify and analyze common historical-period artifacts and features.
3. Utilize historical and archaeological evidence in research.
4. Demonstrate how historical archaeology can be used to draw attention to and highlight the contributions of diverse populations in history.
5. Demonstrate improved oral and written communication skills.

ANTH 320. Anthropological Linguistics
3 Credits (3)
The study of language and culture with particular emphasis on the cultural factors in the communication process.

ANTH 330V. Magic, Witchcraft and Religion
3 Credits (3)
Provides an overview of old and new methods and theories for the study of religion. Exposure to the ways groups of people in diverse cultural systems construct and change their religious traditions to serve practical and meaningful ends. Crosslisted with: HIST 330V and SOCI 330V.

ANTH 345. Introduction to Museology
3 Credits (3)
This course provides a broad introduction to the museum world. Through discussion of readings, examination of case-studies, and practical assignments, students will gain an understanding of the museum as an institution, as well as learn the challenges and responsibilities that museums and their staff encounter. Topics include the history of museums, contemporary debates surrounding the definition of museums, ethical and legal issues, and community connections. The course will cover various types of museums—including art, history, ethnographic, indigenous, and scientific—and discuss how these thematic orientations impact museum practice. Students will also explore common museum processes such as collecting, cataloguing, conservation, exhibition, research, and education through practical exercises using the collections of the University Museum in Kent Hall, as well as through case studies of museums around the world.

Learning Outcomes
1. Describe the major conceptual and practical influences on museums today—including issues of historical development, ethics, missions, and thematic orientations. Critically engage with diverse types of museums as cultural institutions, their practices, and the communities with whom they engage. Implement skills relevant to the museum profession, such as collections management, condition reporting, exhibition and programming planning, and research.

ANTH 347. Museum Confidential
3 Credits (3)
This course will introduce students to many of the fundamental concepts behind the creation of a museum exhibition. Drawing from the extensive permanent collection of the University Museum, housed in the basement of Kent Hall, students will gain hands-on experience with exhibition development, resulting in the creation of a temporary public exhibition in the west gallery of the Museum. By turning the museum inside-out, this course will be a unique behind-the-scenes experience. Through readings and discussion, we will also examine historic and contemporary interpretations of exhibitions and collections from the cabinet of curiosity and wunderkammer, to readymades and Mark Dion's re-imagined museums. Crosslisted with: ANTH 547.

Learning Outcomes
1. Explain the basic concepts and terminology of the museum
2. Differentiate the functions, roles, duties and responsibilities of museums
3. Describe the types of museums and their historical development
4. Discuss the challenges and responsibilities that museums and their staff members encounter, most especially in collections
5. Employ the fundamental principles and practices of museum documentation (knowledge of deaccessioning and the challenges faced by museum and inherited collections)
6. Apply the fundamental principles and practices of collection management
7. Synthesize the fundamental principles and practices of museum exhibition planning and design including the role of the curator

ANTH 349. Museum Anthropology
3 Credits (3)
This course provides an introduction to the methodological and theoretical approaches of museum anthropology. Students will gain experience with all these aspects of museum anthropology in the course by engaging with critical scholarship, analyzing case studies, and practicing collections-based research methods utilizing the collections of the University Museum. Through assignments students will analyze objects in the museum's collections using techniques of close looking, drawing, photography, sequences of making, and external research using scholarly sources. Students will gain skills in primary and secondary research, the analysis of material culture, and the practicalities of navigating research in museums.

Learning Outcomes
1. Differentiate the functions, roles, duties and responsibilities of museums
2. Changed over time. Critically engage with the intersections between museums as institutions and the practice of anthropology, including the politics of representation. Implement methodological research skills as a student-scholar by conducting independent research based on museum collections. Convert collections-based research into written and media works characteristic of
3. Scholar-facing and public-facing practice in museum anthropology, curatorship, and
ANTH 350. Anthropological Theory  
3 Credits (3)  
This course introduces students to historical and contemporary theory in anthropology with a focus on understanding why theory matters in our discipline. Key questions the course explores include: How have anthropologists thought about the concept of culture in different ways throughout the history of anthropology? What is the relevance of anthropological theory, both inside and outside the discipline? What new and promising trajectories do we see in anthropological theory today?

ANTH 355. Biological Anthropology  
3 Credits (3)  
An introduction to the fundamentals of the scientific method and organic evolution specific to the study of human origins and contemporary biological variation. Non-human primate diversity and behavior are also considered.

Learning Outcomes  
1. Increase scientific literacy.  
2. Improve specific skill areas including: Critical thinking; Expository writing; Analytical reading; Oral presentation skills.  
3. Establish foundational knowledge as a basis for further study in: Evolutionary theory; Human variation and adaptation; Primatology; Human origins and evolution.

ANTH 356. Forensic Anthropology  
3 Credits (3)  
Overview of the field of forensic anthropology. Topics covered include basic human osteology; skeletal examination and documentation; skeletal trauma; personal identification; forensic taphonomy and the process of decomposition; archaeology and scene processing; sex, age, stature, and ancestry estimation; and contemporary issues and limitations in the field of forensic anthropology.

Learning Outcomes  
1. Learn about the scientific method and how to apply scientific findings to field work.  
2. Learn about the history and applications of forensic anthropology.  
3. Gain a practical understanding of the methods, applications, and limitations of forensic anthropology as relates to police and other investigations.  
4. Learn to identify human bones and the process of building a biological profile of human remains.  
5. Learn about decomposition and how forensic anthropologists process and interpret crime scenes.

ANTH 357V. Medical Anthropology  
3 Credits (3)  
This course introduces students to evolutionary, ecological, interpretive, political-economic, and applied anthropological perspectives on health, illness, and healing to address some of the major questions in the field. How do humans adapt to changing environments that bring with them new illnesses and diseases? How do anthropologists understand the multiple meanings of health and illness cross-culturally? How can anthropologists effectively study health inequalities? What can medical anthropological perspectives contribute to addressing the health issues that we face in our current global context?

Learning Outcomes  
1. Explain medical anthropology to someone unfamiliar with the field. Meeting this goal requires that you are able to: Define medical anthropology; Define health, illness, sickness, disease, and healing; Explain basic research methods in medical anthropology; Identify the different perspectives within medical anthropology.  
2. Evaluate health problems from medical anthropological perspectives. Meeting this goal requires that you are able to: Accomplish goal 1; Identify different medical anthropological perspectives in research and reporting on health problems; Identify what is missing (based on your knowledge of medical anthropological perspectives) in addition to what is present in research and reporting on health problems.  
3. Apply medical anthropological perspectives to current health problems. Meeting this goal requires that you are able to: Accomplish goals 1 and 2; Develop deeper understanding of medical anthropological perspectives by formulating "in your own words" definitions of medical anthropological perspectives; Identify multiple facets of major health issues.

ANTH 360V. Food and Culture Around the World  
3 Credits (3)  
Study of the interaction between food and human culture from an anthropological perspective. Examines the traditional role of food in local economies, social relations, and identity around the world. Also examines the impact of globalization on traditional food systems and cultures.

ANTH 362V. Environmental Anthropology  
3 Credits (3)  
This course examines environmental studies from an anthropological perspective. The class focuses on how cultural values mediate environmental management. The class covers topics such as environmental anthropology, large scale development, biodiversity conservation, sustainable development, indigenous groups, consumption, and globalization.

Learning Outcomes  
1. Students will understand the impact of cultural values on how humans interact with the environment. Students will understand how different cultural perspectives can be used to address environmental problems. Students will critically reflect on their own environmental values and recognize how these values are shaped by our own culture.
ANTH 375. Pottery Analysis in Archaeology
3 Credits (3)
This course introduces the basic concepts, methods, and approaches used in the analysis of archaeological pottery. The purpose of the course is first to provide hands-on experience with the full range of analytical techniques routinely applied to ceramic materials recovered from archaeological sites, but to also provide a contextual framework for the interpretation and evaluation of these data. Classes consist of brief introductory lectures, and seminar presentation and discussion of course readings. Lab meetings consist of exercises designed to provide you with practical experience working with the materials and measures covered in lectures and readings. Crosslisted with: ANTH 575.

Learning Outcomes
1. Students will learn the theory underlying pottery analysis as well as some of the methods used to identify and interpret pottery;
2. Students will learn to think about the organization of pottery technology from a behavioral rather than a purely typological framework;
3. Students will have the opportunity to develop and then evaluate a research question or problem statement within a chosen theoretical framework, as well as have the opportunity to evaluate that question or questions using both qualitative and quantitative analyses;
4. Students will gain the skills needed to assess pottery analysis reports and undertake pottery analyses for senior thesis, M.A. theses, and CRM contexts.

ANTH 376. Lithic Technology Organization
3 Credits (3)
Advanced seminars and laboratory exercises to learn and develop techniques and methods that will help us determine how to interpret behavioral and cultural information from lithic (stone tool) data.
Prerequisite(s): ANTH 315.

ANTH 378. Introduction to Lab Methods in Archaeology
3 Credits (3)
Laboratory techniques used in the analysis of archaeological materials.

ANTH 385. Internship in Anthropology
3-12 Credits (3-12)
Applied or field experience to gain professional expertise. Placements with public agencies, NGOs, or research organizations. Topical focus tailored to student’s individual needs through consultation with instructor.
Prerequisite(s): Junior status, consent of instructor and GPA 2.8 or better.

ANTH 388. Intermediate Archaeological Field School
2-6 Credits (2-6)
Training in archaeological field methods, including excavations of prehistoric sites, record keeping, mapping and analysis of data. Consent of Instructor required.

ANTH 389. Archaeological Mapping
3-6 Credits (3-6)
Techniques for mapping archaeological sites and recording spatial distributions of archaeological data using a variety of surveying equipment and computer mapping software.

ANTH 399. Professionalism & Practice in Anthropology
3 Credits (3)
Capstone course for seniors designed to allow students to synthesize the anthropological knowledge they have acquired and connect theory to application in preparation for entry into a career. Restricted to: ANTH majors.

ANTH 402. Contemporary Medical Anthropology
3 Credits (3)
Contemporary Medical Anthropology This advanced seminar in medical anthropology addresses contemporary issues in the field of medical anthropology through theoretical and ethnographic texts. Topics span a wide range of studies in medical anthropology and may include such issues as the social production of health and illness, medical pluralism, discourses of mental health, the practice of complementary and alternative medicine, health disparities, the political economy of infectious disease, race and biological variation in biomedicine, and implementing biocultural perspectives. Crosslisted with: ANTH 546.
Prerequisite(s): ANTH 301 or ANTH 355 or ANTH 357V or consent of instructor.

Learning Outcomes
1. Discuss current issues relevant to the study of medical anthropology.
2. Apply medical anthropological concepts and ideas to theoretical and practical health issues.
3. Acquire skills in the critical appraisal of ethnographic literature.

ANTH 407. Native American Education
3 Credits (3)
This is a survey course that explores the education of Natives from multiple perspectives; the perspectives of Native theories and practices, the colonizers’-imposed education theories and practices, U.S. federal educational policies and practices, tribal systems of education, and responses from those experiencing the education. Starting with traditional education, the course will examine colonial education, federal and tribal efforts, contemporary models of Indian education including issues and challenges, and the educational sovereignty of tribes.

Learning Outcomes
1. Describe (verbally and written) traditional methods of education used by Native Americans. Discuss and interpret (verbally and written) the theories and practices of educating Natives in different eras. Compare (verbally and written) the different systems of education for Native Americans. Articulate (verbally and written) contemporary Native American educational issues and challenges. Be able to articulate (verbally and written) support for educational sovereignty of tribes. Research, analyze, and orally present a written paper about an American Indian boarding school and its legacy.

ANTH 414. The Archaeology of Religion
3 Credits (3)
The class offers an in-depth introduction to the Archaeology of Religion focusing on the theoretical framework of artifact agency. The course begins with a discussion of the role of material culture in society and religion (artifact agency theory) and then moves through a series of case studies that highlight important themes in the archaeology of religion. These themes include the Religion among the Earliest Paleolithic Cultures, Relationships between Houses and Temples, Sacrifice (Artifact, Animal and Human), New Religious Movements, and Witchcraft Persecution.

Learning Outcomes
1. Students will develop a stronger understanding of the role of religious material culture in anthropology and archaeology. Students will develop strong research skills by applying that knowledge of material culture theory in a term paper that explores artifact agency in an ancient religion. Students will develop strong communication skills through the preparation of a written term paper and class power point presentation of that research.
ANTH 415. Applied Anthropology  
3 Credits (3)  
Examines the intellectual roots of applied anthropology and early case studies of anthropologists working as administrators. Examines the ethical and methodological approaches that applied anthropologists employ. Examination of case studies that show role of applied anthropologists in improving human service delivery, cultural preservation, planning and implementing programs of participatory change, advocacy, and economic development. Taught with ANTH 515.

ANTH 419. Topics in Prehistoric Archaeology  
3 Credits (3)  
Specific subjects in prehistoric archaeology as announced in the Schedule of Classes. May be repeated up to 6 credits.

ANTH 431V. Nutritional Anthropology  
3 Credits (3)  
This course provides biological, ecological, and cross-cultural perspectives on human nutrition. Topics covered include human nutritional evolution, dietary adaptation, variation in human foodways and habits, relationships between diet and health, nutrition transitions, and methods for studying human diet and nutrition in field settings.  
Learning Outcomes  
1. Understand the ways in which biology, culture, and ecology shape human nutritional outcomes and dietary patterns. Be able to identify methods best suited to answering questions about human diet and nutrition in field settings. Be able to develop a research question and basic research strategy.

ANTH 434. Human Evolution  
3 Credits (3)  
Overview of human biological evolution from the emergence of Miocene apes to modern human diaspora. May be repeated up to 3 credits. Crosslisted with: BIOL 434.  
Prerequisite(s): ANTH 355 or consent of instructor.

ANTH 435. Human Health and Biological Variation  
3 Credits (3)  
Overview of contemporary human biological variation and adaptability within a scientific evolutionary and biocultural framework. Special emphasis is placed on human adaptation to the environment and the sociocultural, epidemiological, and evolutionary factors that underlay contemporary issues in human health and disease. Crosslisted with: ANTH 535.  
Learning Outcomes  
1. Develop critical thinking skills and scientific literacy through discussion, reading, and writing exercises and evaluating scientific theories, data, and research methods.  
2. Develop an understanding of evolutionary theory, and how human organic evolution shapes variation, adaptation, and health in contemporary human populations.  
3. Learn how human evolutionary history has shaped the global distribution of contemporary human biological diversity.  
4. Understand the scientific critique of the biological race concept, and how social inequality, particularly racism, can become embodied.  
5. Understand the various ways that humans adapt to the environment on different timescales.  
6. Study life course theory and how experiences during development impact health across the life course.  
7. Develop specific transferable skills, including written communication, public speaking, and information gathering (research), and for graduate students, research questions development, hypothesis testing, basic data analysis/visualization in Excel.

ANTH 436. Evolutionary Medicine  
3 Credits (3)  
This course provides an overview of evolutionary medicine, a field that applies evolutionary theory to understanding variation in human biology and health and treating and preventing disease. Topics covered in the course include evolutionary perspectives on diet and nutrition, chronic disease, infectious disease, cancer, stress, mental health, reproductive health, women's health, and child growth and development.  
Learning Outcomes  
1. Understand the basic principles of evolutionary theory. Understand how anthropologists and medical and public health professionals can apply evolutionary theory to understand human health and disease. Understand both the promise and limits of evolution as an explanatory paradigm for variation in human health and disease. Be able to apply principles of evolutionary medicine to development of a research proposal. Develop collaborative and oral presentation skills through a group presentation.
ANTH 441. Indigenizing Methodologies in Native American Studies
3 Credits (3)
This course utilizes decolonizing (indigenizing) methodologies and praxis to gain insight into the complex effects of oppression and colonization. The course uses critical and indigenous concepts to identify and analyze hegemonic, ethnocentric, historic and contemporary human rights and social justice issues of indigenous people. Emphasis includes research theory and methodology, such as community participatory action research, that is collaborative, inclusive, and pragmatic to ethics, intellectual property, and cultural boundaries of indigenous people. Crosslisted with: ANTH 541.

Learning Outcomes
1. The student is able to describe and explain some of the complex effects of oppression and colonization on indigenous peoples.
2. The student is able to identify historic and contemporary issues that have influenced and affected the study and research of indigenous peoples.
3. The student is able to convey particular research theory and methodology that is collaborative, inclusive, and pragmatic to ethics and cultural boundaries of indigenous people.

ANTH 444. Native American Visual Culture
3 Credits (3)
This course examines the various theoretical and methodological challenges inherent to the study of indigenous art, including the issues of identity, sovereignty, gender, cultural critique, and the role of the artist. In addressing the interdisciplinary nature of the field, students will seek to find strategies in approaching their own research. Crosslisted with: ANTH 544.

Learning Outcomes
1. Identify NA / Indigenous, film/video writers and directors.
2. Locate NA / Indigenous nations with their geo-physical location.
4. Apply “colonizing” / “decolonizing” methodologies.
5. To practice writing short analytical journal entries.
6. To learn effective group discussion techniques

ANTH 449. Directed Reading
1-6 Credits
Comprehensive reading on selected topics. May be repeated for a maximum of 6 credits.

Prerequisite(s): Upper division anthropology majors with consent of instructor.

ANTH 449 H. Directed Reading Honors
1-3 Credits
Same as ANTH 449. Additional work to be arranged. May be repeated for a maximum of 6 credits.

ANTH 453. Native American Women
3 Credits (3)
Students investigate the status, experience, and contributions of Native American women from pre-contact to contemporary times. Identifying the contribution of Native American women to societies, communities, and Nations as keepers of knowledge, teachings, and traditions. Crosslisted with: ANTH 553.

Learning Outcomes
1. Explore and examine the roles of American Indian women within a tribal society and analyze the impact of colonization and decolonization upon their place / roles over time.
2. Evaluate historical and contemporary issues of importance to American Indian women and their communities.
3. Assess a topic, book or issue of importance to Native women through a research paper, case study, or exam demonstrating in-depth knowledge and understanding.
4. Demonstrate in-depth knowledge and understanding of Native American women histories and contemporary issues.
5. Formulate a paper on Native woman/tribal women from historical or contemporary sources and share with class (undergraduates).
6. Demonstrate in-depth knowledge and understanding of Native American women through an exam/final (undergraduates).

ANTH 454. An Indigenous Peoples History of the United States
3 Credits (3)
This course is a history of United States as experienced by the Indigenous people. It delineates the Indigenous experience as reflected in Native American scholarship and research. The Indigenized and decolonized Native perspective provides an educative authenticity of Indigenous knowledge comprehensible to all, particularly the non-Indian.

Learning Outcomes
1. The student can identify and describe significant historic periods as experienced by the Indigenous inhabitants in United States The student it able to compose a brief summary review of the Native American historic periods as evidenced in scholarship and research.
2. The student is able to identify and differentiate aspects of the Native American historic experience in relationship to the standard linear chronicle timeline as reflected in U.S. history. The student it able to compose a brief summary review of the Native American historic periods as evidenced in scholarship and research.
3. The student is able to identify and describe significant historic periods as experienced by the Indigenous inhabitants in United States The student it able to compose a brief summary review of the Native American historic periods as evidenced in scholarship and research.
4. The student is able to identify and differentiate aspects of the Native American historic experience in relationship to the standard linear chronicle timeline as reflected in U.S. history. The student it able to compose a brief summary review of the Native American historic periods as evidenced in scholarship and research.
5. The student is able to identify and differentiate aspects of the Native American historic experience in relationship to the standard linear chronicle timeline as reflected in U.S. history. The student it able to compose a brief summary review of the Native American historic periods as evidenced in scholarship and research.
6. The student is able to identify and differentiate aspects of the Native American historic experience in relationship to the standard linear chronicle timeline as reflected in U.S. history. The student it able to compose a brief summary review of the Native American historic periods as evidenced in scholarship and research.

ANTH 455. Federal Indian Policy
3 Credits (3)
Federal Indian policy and its impact on Native Americans. This course will provide basic understanding of how federal Indian policy impacts almost all activities and situations with Native Americans. Course will also look at issues such as sovereignty and how it impacts most interactions with tribal groups.

ANTH 456. Native American Intersections in Museums
3 Credits (3)
This course explores the changing relationships and complex intersections between Native people and museums. We will examine how museum practices of collection and exhibition influence ways in which knowledge is formed and presented, and interrogate the role of museums as crucial sites for discourse around issues of ownership, indigenous knowledge and representation. Case studies revealing shifting meanings of objects, curatorial challenges, the development of tribal museums and repatriation complexities will be used to critically engage with Native responses via art, criticism and legal action. Crosslisted with: ANTH 556.
Learning Outcomes

1. Identify multiple anthropological perspectives on sex, reproduction, and birth. Anthropologists approach questions about human sex, reproduction, and birth in a variety of ways. You will be able to identify and discuss some major perspectives in this area.

2. Critically analyze anthropological concepts of sex, reproduction, and birth. This course focuses on discussion of anthropological ideas about sex, reproduction, and birth. Not all fully agree with one another nor do they all fully answer the questions you may have. You should approach the materials we read and discuss from a critical angle.

3. Apply anthropological concepts about sex, reproduction, and birth to contemporary anthropological "problems." Throughout the course, you will reflect on the usefulness of different perspectives on sex, reproduction and birth to address current issues that we face in our globalized world.

ANTH 458. Fertility, Reproduction and Birth
3 Credits (3)
This course examines biocultural variation in reproductive health and birth practices, with topics such as gendered roles and responsibilities, pregnancy and birth as rites of passage, cultural concepts of personhood, global family planning initiatives, the medicalization of pregnancy and birth, developing reproductive technologies, and reproductive health disparities.

Prerequisite(s): ANTH 301 or ANTH 355 or ANTH 357V or consent of instructor.

Learning Outcomes

1. Explain the goals of cultural resource management (CRM) Describe the major laws and regulations that govern CRM in the United States, in the state of New Mexico, and abroad

2. Mexico, and abroad

3. Identify some common challenges with implementing these laws and regulations Determine the eligibility of cultural resources for listing on the NRHP, and justify this determination

ANTH 459. Peru: From Incas to Inca Kola
3 Credits (3)
Explores issues of cultural and national identity in Peru from the Incas to the present, focusing on the modern period. Themes include indigenous resistance and adaptation to colonial rule, nationalism, militarism, terrorism, globalization, and the drug trade. Crosslisted with: HIST 459

ANTH 463. Cultural Resource Management I
3 Credits (3)
This course introduces you to the field of cultural resource management (CRM) and to the federal and state laws and regulations that govern most archaeology and historic preservation projects conducted today. Class lectures, readings, and written assignments will cover the major relevant US federal laws (NHPA, NEPA, ARPA, NAGPRA); New Mexico state cultural resource laws, regulations, and permitting practices; and major international heritage laws. Particular emphasis will be placed on understanding how to evaluate and nominate cultural resources for listing on the National Register of Historic Places (NRHP). Good oral and written communication skills are essential for success in CRM, so students will be provided with numerous opportunities to develop these skills in class.

Learning Outcomes

1. Explain the goals of cultural resource management (CRM) Describe the major laws and regulations that govern CRM in the United States, in the state of New Mexico, and abroad

2. Mexico, and abroad

3. Identify some common challenges with implementing these laws and regulations Determine the eligibility of cultural resources for listing on the NRHP, and justify this determination

ANTH 464. Curation Crisis in Archaeology
3 Credits (3)
This collection management course will introduce students to collections curation, collections care, and collections-based research. Archaeological collections stewardship begins before an archaeologist steps foot into the field and continues well after the recovered collections reach the repository. This course provides students with an understanding of the curation "crisis" using archaeological collections curated at the University Museum as a case study and the responsibilities that archaeologists have to the collections they generate.

Learning Outcomes

1. Learn about the management of archaeological collections Learn about the management of, access to, and use of archaeological collections Learn about the curation crisis at a small museum (e.g., Kent Hall University Museum) Learn about collections-based research Learn about various ways of disseminating archaeological collections to the public Change the perception of the "just digging and we will deal with the collections later" approach.

ANTH 467. Archaeology of the American Southwest
3 Credits (3)
Description and analysis of prehistoric archaeology of the American Southwest including paleo-environmental reconstruction, culture change, and relations with contemporary cultures.

Prerequisite: ANTH 315.

ANTH 472. Primate Behavior and Ecology
3 Credits (3)
Survey of the social behavior and ecology of nonhuman primates. Crosslisted with: BIOL 472.

ANTH 474. Human Osteology
3 Credits (3)
A survey of the functional, developmental, and evolutionary biology of the human skeleton. Identifying bones and teeth from hands-on experience with skeletal and dental material. Provides a foundation for human evolutionary studies, bioarchaeology and forensic anthropology. May be repeated up to 3 credits. Crosslisted with: BIOL 424.

ANTH 474 L. Human Osteology Lab
1 Credit (1P)
Laboratory for ANTH 474. Experiences and activities related to identifying teeth and bones of the human skeleton. Students are recommend to take ANTH 355 or an equivalent before enrolling in this course. Crosslisted with: BIOL 424 L.

Corequisite(s): ANTH 474.

ANTH 477. Zooarchaeology
3 Credits (3)
Detailed study and analysis of taphonomic processes affecting animal bone recovered from archaeological and paleontological contexts. May be repeated up to 3 credits.

ANTH 485. Special Research Project
1-3 Credits
Anthropological, archaeological, or museum field work or laboratory experience in academic, private, state, or federal agencies. Must spend 30 hours in a field, museum, or laboratory setting per credit hour earned. May be repeated up to 6 credits.

Prerequisite(s): Complete 12 ANTH credits and consent of instructor.
ANTH 486. Community Engagement and Service Learning
3 Credits (3)
Course combines classroom instruction with a local community service project. Formal instruction component will examine social science research findings and perspectives on a locally relevant social issue or problem. In the service learning component, students will be trained and work on a local community service project. Students will develop field experience and methodological skills in community engagement. Projects and social issues may vary for different semesters.

ANTH 488. Archaeological Field School Advanced
1-6 Credits
Archaeological field methods, including excavations of prehistoric sites, record keeping, mapping and analysis of data. Consent of Instructor required.

ANTH 497. Special Topics
1-6 Credits (1-6)
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.
Prerequisite(s): Junior or above standing.

ANTH 500. Seminar in Anthropological Theory
3 Credits (3)
Detailed focus on specific areas of anthropological theory. Course subtitled in the Schedule of Classes. Course may be repeated.
Prerequisite(s): graduate standing in Anthropology or consent of instructor.

ANTH 502. Fundamentals of Anthropology
1-4 Credits (1-4)
Review of fundamental knowledge and theories in biological, cultural, or linguistic anthropology or archaeology. Graded S/U.

ANTH 503. Anthropological Theory
3 Credits (3)
This seminar is designed to introduce graduate students to the major concepts and developments in anthropological theory. Students will develop an understanding of the major principles, contributions, and limitations of anthropological theory from the 1890s to the present. The course will address theoretical developments in biological anthropology, sociocultural anthropology, archaeology, and public and applied anthropology.

Learning Outcomes
1. Articulate the history of theoretical developments in multiple anthropological subfields and explain the holistic connections among them.
2. Explain and critique the major theoretical formulations of the field, including: human biological evolution and variation; cultural relativism; practice theory; life history and formation processes of archaeological, paleontological, and contemporary sites and specimens; historical contingency in culture change and globalization; human ecology and environmental anthropology, past and present; indigenous perspectives, participatory action research, and collaborative research designs; identity and the intersections of gender, sex, race, class, and other categories, past and present; origins and contemporary variation of inequality and socioeconomic disparities; political economy, domination and resistance, past and present; the development and critique of diverse narratives of the past drawn from archaeological/material, visual and performative, documentary, and oral historical media; stewardship of tangible and intangible cultural heritage.
3. Read and practice in the norms of written and verbal expression across multiple theoretical domains in anthropology.

ANTH 505. Issues in Anthropological Practice
3 Credits (3)
Anthropological approaches to research design, implementation, and dissemination. Restricted to: Main campus only.

ANTH 506. Advanced Studies in Physical Anthropology
1-3 Credits
Lectures, seminars, or laboratory research in selected topics. May be repeated for a maximum of 12 credits.
Prerequisite(s): graduate standing in Anthropology or consent of instructor.

ANTH 507. Advanced Studies in Archaeology
1-3 Credits
Lectures, seminars, field or laboratory research in selected topics. May be repeated for a maximum of 12 credits.
Prerequisite(s): graduate standing in Anthropology or consent of instructor.

ANTH 508. Advanced Studies in Cultural Anthropology
1-3 Credits
Lectures, seminars, or field research in selected topics. May be repeated for a maximum of 12 credits.
Prerequisite(s): graduate standing in Anthropology or consent of instructor.

ANTH 509. Advanced Studies in Anthropological Linguistics
1-3 Credits
Lectures, seminars, or field research in selected topics. May be repeated for a maximum of 12 credits.
ANTH 512. Quantitative Analytical Methods in Anthropology
3 Credits (3)
This class is an introduction to statistical analysis of anthropological and social science data. Students will learn how quantitative and statistical techniques are used in the analysis of anthropological problems and how to evaluate statistical arguments in the literature. No previous background in statistics is required. We will consider data collection, sampling and statistical populations, exploratory summaries of data, and the importance of choosing appropriate statistical techniques. All course work will emphasize anthropological interpretation through applied statistical methods. The course has a four-field focus (archaeology, biological anthropology, cultural anthropology, and linguistics), and students will work with readings, examples, and problem assignments from each subfield.

Learning Outcomes
1. Articulate the difference between descriptive and inferential statistics.
2. Explain the difference between a population and a sample and learn how to draw random samples (various methods — simple random, stratified, systematic, etc.) in the field and using numerical data and statistical procedures within SAS or other STATPACKS (SPSS, R).
3. Use appropriate graphs, tables, and measures of central tendency and dispersion to display and summarize distributions of nominal, ordinal, interval and ratio level data.
4. Understand the Normal Distribution and the assumptions required for hypothesis testing.
5. Perform hypothesis testing and interpret the results for univariate, bivariate, and multivariate statistical procedures, including Chi Square, T-tests, Non-parametric Comparison tests, ANOVA, Correlation, Simple Linear Regression, Multiple Regression, Cluster and Discriminant Analysis (as time permits).
6. Develop an exploratory statistical analysis for original anthropological data and write a final paper interpreting the results.

ANTH 514. Advanced Issues in the Archaeology of Religion
3 Credits (3)
The class offers an in-depth introduction to the Archaeology of Religion focusing on the theoretical framework of artifact agency. The course begins with a discussion of the role of material culture in society and religion (artifact agency theory) and then moves through a series of case studies that highlight important themes in the archaeology of religion. These themes include the Religion among the Earliest Paleolithic Cultures, Relationships between Houses and Temples, Sacrifice (Artifact, Animal and Human), New Religious Movements, and Witchcraft Persecution.

Learning Outcomes
1. Students will develop a stronger understanding of the role of religious material culture in anthropology and archaeology and be required to lead class discussions. Students will develop strong research skills by applying that knowledge of material culture theory in a term paper that explores artifact agency in an ancient religion. Students will develop strong communication skills through the preparation of a written term paper and class power point presentation of that research.

ANTH 515. Applied Anthropology
3 Credits (3)
Examines the intellectual roots of applied anthropology and early case studies of anthropologists working as administrators. Examines the ethical and methodological approaches that applied anthropologists employ. Examination of case studies that show the role of applied anthropologists in improving human service delivery, cultural preservation, planning and implementing programs of participatory change, advocacy, and economic development. Taught with ANTH 415.

ANTH 516. Advanced Archaeology of the American Southwest
3 Credits (3)
Advanced topics in Southwestern archaeology including ritual architecture, environmental reconstruction, violence, site formation processes, and experiment and research.

ANTH 517. Advanced Topics in Mesoamerican Archaeology
3 Credits (3)
Specific subjects in Mesoamerican archaeology to be announced in the Schedule of Classes. May be repeated for a maximum of 6 credits.

Prerequisite: graduate standing.

ANTH 518. Advanced Historical Archaeology
3 Credits (3)
This survey course explores the development of historical archaeology, its methods and theory, and popular research themes within the discipline. Students will be introduced to the ways that archaeologists identify and analyze historical-period documents, oral histories, features, and artifacts, and how they use these data to deepen our understanding of the recent past. Crosslisted with: ANTH 318.

Learning Outcomes
1. Critically evaluate historical sources.
2. Identify and analyze common historical-period artifacts and features.
3. Utilize historical and archaeological evidence in research.
4. Demonstrate how historical archaeology can be used to draw attention to and highlight the contributions of diverse populations in history.
5. Demonstrate improved oral and written communication skills.

ANTH 519. Advanced Topics in Prehistoric Archaeology
3 Credits (3)
Seminar on specialized research archaeology.

Prerequisite: graduate standing.

ANTH 520. Ethnographic Field Methods
3 Credits (3)
Basic methodologies used in conducting qualitative ethnographic research. Projects in participant observation, ethnographic interviews, life history interviews, folk taxonomy construction, and coding of field notes.

ANTH 522. Archaeological Field School-Graduates
2-6 Credits
Techniques of archaeological data collection, analysis, and interpretation. Emphasis on archaeological field work in the Southwest.

ANTH 523. Archaeological Mapping
3-6 Credits (3-6)
Techniques for mapping archaeological sites and recording spatial distributions of archaeological data using a variety of surveying equipment and computer mapping software.
ANTH 528. Advanced Native American Education
3 Credits (3)
This is a survey course that explores the education of Natives from multiple perspectives; the perspectives of Native theories and practices, the colonizers'-imposed education theories and practices, U.S. federal educational policies and practices, tribal systems of education, and responses from those experiencing the education. Starting with traditional education, the course will examine colonial education, federal and tribal efforts, contemporary models of Indian education including issues and challenges, and the educational sovereignty of tribes.

Learning Outcomes
1. Describe (verbally and written) traditional methods of education used by Native Americans. Discuss and interpret (verbally and written) the theories and practices of educating Natives in different eras. Compare (verbally and written) the different systems of education for Native Americans. Articulate (verbally and written) contemporary Native American educational issues and challenges. Be able to articulate (verbally and written) support for educational sovereignty of tribes. Research, analyze and orally present a written a paper about an American Indian boarding school and its legacy.

ANTH 529. Advanced Evolutionary Medicine
3 Credits (3)
This course provides an overview of evolutionary medicine, a field that applies evolutionary theory to understanding variation in human biology and health and treating and preventing disease. Topics covered in the course include evolutionary perspectives on diet and nutrition, chronic disease, infectious disease, cancer, stress, mental health, reproductive health, women’s health, and child growth and development.

Learning Outcomes
1. Understand the basic principles of evolutionary theory. Understand how anthropologists and medical and public health professionals can apply evolutionary theory to understand human health and disease. Understand both the promise and limits of evolution as an explanatory paradigm for variation in human health and disease. Be able to apply principles of evolutionary medicine to development of a research proposal. Develop collaborative and oral presentation skills through a group presentation.

ANTH 531. Issues in Nutritional Anthropology
3 Credits (3)
This course provides biological, ecological, and cross-cultural perspectives on human nutrition. Topics covered include human nutritional evolution, dietary adaptation, variation in human foodways and habits, relationships between diet and health, nutrition transitions, and methods for studying human diet and nutrition in field settings.

Learning Outcomes
1. Understand the ways in which biology, culture, and ecology shape human nutritional outcomes and dietary patterns. Be able to identify methods best suited to answering questions about human diet and nutrition in field settings. Be able to develop a research question and basic research strategy.

ANTH 533. Advanced Issues in Women, Gender, and Culture
3 Credits (3)
Survey of the history of anthropological ideas about gender and women, and a comparison of gender roles, relations, and ideologies across a range of cultures. Same as W S 533.
ANTH 444. Advanced Native American Visual Culture 3 Credits (3)
This course examines the various theoretical and methodological challenges inherent to the study of indigenous art, including the issues of identity, sovereignty, gender, cultural critique, and the role of the artist. In addressing the interdisciplinary nature of the field, students will seek to find strategies in approaching their own research. Crosslisted with: ANTH 441.

Learning Outcomes
1. Identify NA / Indigenous, film/video writers and directors.
2. Locate NA / Indigenous nations with their geo-physical location.
4. Apply "colonizing" / "decolonizing" methodologies.
5. To practice writing short analytical journal entries.
6. To learn effective group discussion techniques.

ANTH 445. Advanced Indigenizing Methodologies in Native American Studies 3 Credits (3)
This course utilizes indigenizing methodologies and praxis to gain insight into the complex effects of oppression and colonization. Critical and indigenous concepts are used to identify and analyze hegemonic, ethnocentric, historic and contemporary human rights and social justice issues of indigenous people. Research theory and methodology such as community participatory action research that is collaborative, inclusive, and pragmatic to ethics, intellectual property, and cultural boundaries of indigenous people is emphasized. Crosslisted with: ANTH 441.

Learning Outcomes
1. The student is able to describe and explain some of the complex effects of oppression and colonization on indigenous peoples.
2. The student is able to identify historic and contemporary issues that have influenced and affected the study and research of indigenous peoples.
3. The student is able to convey particular research theory and methodology that is collaborative, inclusive, and pragmatic to ethics and cultural boundaries of indigenous people.

ANTH 542. Cultural Resource Management II 3 Credits (3)
Continuation of ANTH 540. This course introduces students to the business and practice of doing contractual cultural resource management in the United States.

Learning Outcomes
1. Map an archaeological site (meeting New Mexico state standards for archaeological survey)
2. Document an archaeological site (using a Laboratory of Anthropology site form)
3. Prepare a written site description suitable for inclusion in a survey report
4. Analyze and present data using relevant software (e.g., Excel, Access)
5. Prepare a research proposal or report (meeting New Mexico state standards)

ANTH 543. Indigenous Ways of Knowing 3 Credits (3)
This course examines Indigenous knowledge and ways of knowing as a means to gain an appreciation of an epistemology and ontology that may be outside the boundaries of Eurocentric theory, concepts, and principles. Knowledge development through mythology and story telling is viewed from the nature of difference rather than comparative analysis.

ANTH 544. Advanced Native American Visual Culture 3 Credits (3)
This course examines the various theoretical and methodological challenges inherent to the study of indigenous art, including the issues of identity, sovereignty, gender, cultural critique, and the role of the artist. In addressing the interdisciplinary nature of the field, students will seek to find strategies in approaching their own research. Crosslisted with: ANTH 444.

Learning Outcomes
1. Identify NA / Indigenous, film/video writers and directors.
2. Locate NA / Indigenous nations with their geo-physical location.
4. Apply "colonizing" / "decolonizing" methodologies.
5. To practice writing short analytical journal entries.
6. To learn effective group discussion techniques.

ANTH 545. Advanced Museology 3 Credits (3)
This course provides a broad introduction to the museum world. Through discussion of readings, examination of case-studies, and practical assignments, students will gain an understanding of the museum as an institution, as well as learn the challenges and responsibilities that museums and their staff encounter. Topics include the history of museums, contemporary debates surrounding the definition of museums, ethical and legal issues, and community connections. The course will cover various types of museums—including art, history, ethnographic, indigenous, and scientific—and discuss how these thematic orientations impact museum practice. Students will also explore common museum processes such as collecting, cataloguing, conservation, exhibition, research, and education through practical exercises using the collections of the University Museum in Kent Hall, as well as through case studies of museums around the world.

Learning Outcomes
1. Describe the major conceptual and practical influences on museums today—including issues of historical development, ethics, missions, and thematic orientations. Critically engage with diverse types of museums as cultural institutions, their practices, and the communities with whom they engage. Implement skills relevant to the museum profession, such as collections management, condition reporting, exhibition and programming planning, and research.
ANTH 547. Museum Field Methods  
3 Credits (3)  
This course will introduce students to many of the fundamental concepts behind the creation of a museum exhibition. Drawing from the extensive permanent collection of the University Museum, housed in the basement of Kent Hall, students will gain hands-on experience with exhibition development, resulting in the creation of a temporary public exhibition in the west gallery of the Museum. By turning the museum inside-out, this course will be a unique behind-the-scenes experience. Through readings and discussion, we will also examine historic and contemporary interpretations of exhibitions and collections from the cabinet of curiosity and wunderkammer, to readymades and Mark Dion’s re-imagined museums. Crosslisted with: ANTH 347.  

Learning Outcomes  
1. Explain the basic concepts and terminology of the museum  
2. Differentiate the functions, roles, duties and responsibilities of museums  
3. Describe the types of museums and their historical development  
4. Discuss the challenges and responsibilities that museums and their staff members encounter, most especially in collections  
5. Employ the fundamental principles and practices of museum documentation (knowledge of deaccessioning and the challenges faced by museum and inherited collections)  
6. Apply the fundamental principles and practices of collection management  
7. Synthesize the fundamental principles and practices of museum exhibition planning and design including the role of the curator  
8. Object handling and basics of preventive conservation  

ANTH 549. Advanced Museum Anthropology  
3 Credits (3)  
This course provides an introduction to the methodological and theoretical approaches of museum anthropology. Students will gain experience with all these aspects of museum anthropology in the course by engaging with critical scholarship, analyzing case studies, and practicing collections-based research methods utilizing the collections of the University Museum. Through assignments students will analyze objects in the museum’s collections using techniques of close looking, drawing, photography, sequences of making, and external research using scholarly sources. Students will gain skills in primary and secondary research, the analysis of material culture, and the practicalities of navigating research in museums.  

Learning Outcomes  
1. Describe major theoretical approaches to museum anthropology, and how these have changed over time. Critically engage with the intersections between museums as institutions and the practice of anthropology, including the politics of representation. Implement methodological research skills as a student-scholar by conducting independent research based on museum collections. Convert collections-based research into written and media works characteristic of scholar-facing and public-facing practice in museum anthropology, curatorship, and museum studies.  

ANTH 551. Advanced Indigenous Peoples History of the United States  
3 Credits (3)  
This course is a history of United States as experienced by the Indigenous people. It delineates the Indigenous experience as reflected in Native American scholarship and research. The Indigenized and decolonized Native perspective provides an educative authenticity of Indigenous knowledge comprehensible to all, particularly the non-Indian.  

Learning Outcomes  
1. The student can identify and describe significant historic periods as experienced by the Indigenous inhabitants in United States The student is able to identify and differentiate aspects of the Native American historic experience in relationship to the standard linear chronicle timeline as reflected in U.S. history. The student it able to compose a brief summary review of the Native American historic periods as evidenced in scholarship and research.  

ANTH 553. Advanced Native American Women  
3 Credits (3)  
Students investigate the status, experience, and contributions of Native American women from pre-contact to contemporary times. Identifying the contribution of Native American women to societies, communities, and Nations as keepers of knowledge, teachings, and traditions. Crosslisted with: ANTH 453.  

Learning Outcomes  
1. Explore and examine the roles of American Indian women within a tribal society and analyze the impact of colonization and decolonization upon their place / roles over time.  
2. Evaluate historical and contemporary issues of importance to American Indian women and their communities.  
3. Assess a topic, book or issue of importance to Native women through a research paper, case study, or exam demonstrating in-depth knowledge and understanding.  
4. Demonstrate in-depth knowledge and understanding of Native American women histories and contemporary issues.  
5. Formulate a paper on Native woman/tribal women from historical or contemporary sources and share with class (undergraduates).  
6. Demonstrate in-depth knowledge and understanding of Native American women through an exam/final (undergraduates).  
7. Demonstrate in-depth knowledge and understanding of Native American women through a research presentation/final paper (graduates).  

ANTH 556. Advanced Native American Intersections in Museums  
3 Credits (3)  
This course explores the changing relationships and complex intersections between Native people and museums. We will examine how museum practices of collection and exhibition influence ways in which knowledge is formed and presented, and interrogate the role of museums as crucial sites for discourse around issues of ownership, indigenous knowledge and representation. Case studies revealing shifting meanings of objects, curatorial challenges, the development of tribal museums and repatriation complexities will be used to critically engage with Native responses via art, criticism and legal action. Crosslisted with: ANTH 456.
ANTH 560. Advanced Forensic Anthropology
3 Credits (3)
Overview of the field of forensic anthropology. Topics covered include basic human osteology; skeletal examination and documentation; skeletal trauma; personal identification; forensic taphonomy and the process of decomposition; archaeology and scene processing; sex, age, stature, and ancestry estimation; and contemporary issues and limitations in the field of forensic anthropology.

Learning Outcomes
1. Understand how scientific findings from fields like biological anthropology are applied in forensic anthropology. Understand the history and range of applications of forensic anthropology. Gain a practical understanding of the methods, applications, and limitations of forensic anthropology as relates to police and other investigations. Gain a practical understanding of how forensic anthropologists identify human bones and the process of building a biological profile of human remains. Understand processes like decomposition and recovery of remains at crime scenes.

ANTH 564. Advanced Curation Crisis in Archaeology
3 Credits (3)
This collection management course will introduce students to collections curation, collections care, and collections-based research. Archaeological collections stewardship begins before an archaeologist steps foot into the field and continues well after the recovered collections reach the repository. This course provides students with an understanding of the curation crisis using archaeological collections curated at the University Museum as a case study and the responsibilities that archaeologists have to the collections they generate.

Learning Outcomes
1. Learn about the maintenance of archaeological and repository collections over time. Learn about the management of, access to, and use of archaeological collections. Learn about the curation crisis at a small museum (e.g., Kent Hall University Museum). Learn about collections-based research. Learn about the development of a small as well as large archaeological database. Learn about various ways of disseminating archaeological collections to the public. Change the perception of the “just digging and we will deal with the collections later” approach.

ANTH 574. Advanced Human Osteology
3 Credits (3)
Advanced Human Osteology surveying the functional, developmental and evolutionary biology of the human skeleton. Identifying bones and teeth from hands-on experience with skeletal and dental material. Provides a foundation for human evolutionary studies, bioarchaeology and forensic anthropology. May be repeated up to 3 credits. Crosslisted with: BIOL 574.

ANTH 575. Advanced Pottery Analysis in Archaeology
3 Credits (3)
This course introduces the basic concepts, methods, and approaches used in the analysis of archaeological pottery. The purpose of the course is first to provide hands-on experience with the full range of analytical techniques routinely applied to ceramic materials recovered from archaeological sites, but to also provide a contextual framework for the interpretation and evaluation of these data. Classes consist of brief introductory lectures, and seminar presentation and discussion of course readings. Lab meetings consist of exercises designed to provide you with practical experience working with the materials and measures covered in lectures and readings. Crosslisted with: ANTH 375.

Learning Outcomes
1. Students will learn the theory underlying pottery analysis as well as some of the methods used to identify and interpret pottery;
2. Students will learn to think about the organization of pottery technology from a behavioral rather than a purely typological framework;
3. Students will have the opportunity to develop and then evaluate a research question or problem statement within a chosen theoretical framework, as well as have the opportunity to evaluate that question or questions using both qualitative and quantitative analyses;
4. Students will gain the skills needed to assess pottery analysis reports and undertake pottery analyses for senior thesis, M.A. theses, and CRM contexts.

ANTH 576. Lithic Technology Organization
3 Credits (3)
Advanced seminars and laboratory exercises to learn and develop techniques and methods that will help us determine how to interpret behavioral and cultural information from lithic (stone tool) data. Consent of Instructor required.

ANTH 577. Advanced Zooarchaeology
3 Credits (3)
Detailed study and analysis of taphonomic processes affecting animal bone recovered from archaeological and paleontological contexts.

ANTH 578. Advanced Lab Methods in Archaeology
3 Credits (3)
Examination of advanced laboratory techniques used in the analysis of archaeological materials.

ANTH 579. Qualitative Data Analysis and Interpretation
3 Credits (3)
This course focuses on methods for qualitative data analysis, both computer-assisted and non-computer-assisted, and interpretation. It includes writing up data for academic articles or theses.

ANTH 585. Method and Theory in Archaeology
3 Credits (3)
Focus on major methodological and theoretical aspects of contemporary archeology.

ANTH 587. Field Work in Latin America
3-12 Credits
Covers anthropological field methods in Latin America that also incorporate in-field lab analysis. No S/U grading.
Prerequisite: consent of instructor.

ANTH 596. Readings
1-6 Credits
Individual study of selected readings and topics. May be repeated for a maximum of 6 credits. Consent of instructor required.
ANTH 597. Internship
1-9 Credits
Anthropological or archaeological internship in private, state, or federal agency. May be repeated for a maximum of 18 credits. Consent of instructor required. Restricted to ANTH majors.
Prerequisite(s): graduate standing.

ANTH 598. Special Research Problems
1-6 Credits (6)
Individual analytic or experimental investigations. May be repeated under different subtitles for a maximum of 6 credits. Consent of instructor required. Restricted to ANTH majors.
Prerequisite(s): graduate standing.

ANTH 599. Master's Thesis
1-15 Credits
Thesis. Consent of instructor required. Restricted to ANTH majors.
Prerequisite(s): graduate standing.

Anthropology - Bachelor of Arts

The field of anthropology provides a broadly based education in the social and biological sciences. Undergraduate anthropology majors develop an understanding of human diversity that will benefit them in a wide variety of careers. They have particular advantage in positions that require contact with different cultures and ethnic groups or with large organizations that provide human services.

Students intending to become professional anthropologists pursue careers in teaching, archaeological research, museums, public and private cultural resource management, international development and business, human services and health care, forensic sciences, urban planning, agricultural development, and administration. While anthropology is a traditional academic discipline, it also has become an applied profession.

Today, many anthropologists hold important positions in government, business, public policy organizations, and health professions. Anthropology’s broad perspective on human diversity and intercultural relations provides students with valuable professional skills. NMSU anthropologists are committed to teaching practical knowledge and useful skills that will contribute to students’ career goals and to their intellectual development.

Requirements

The BA in Anthropology requires 36 credits, 15 in upper division core courses (ANTH 301 Cultural Anthropology, ANTH 315 Introduction to Archaeology, ANTH 355 Biological Anthropology, ANTH 350 Anthropological Theory, and ANTH 399 Professionalism & Practice in Anthropology). Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Total Credits 120

1 A grade of C- or better must be earned.
2 See the General Education (p. 54) section of the catalog for a full list of courses.
Students taking nine or more credits in a specific subject area, even though the courses are not designated as General Education courses, will have met the general education requirements for that subject area.

All students must take one Area III: Laboratory Science (4 credits), one Area IV: Social/Behavioral Science Course (3 credits) and one additional course in either area (3-4 credits) in order to complete the requirement.

Students must complete two Viewing the Wider World Courses (p. 58) (VWW) for a total of 6 credits. One VWW must be from outside of the College of Arts and Sciences, and the second must be from outside of Anthropology. A student may substitute three credits taken as study abroad for one of the VWW course requirements.

### Second Language Requirement

For the Bachelor of Arts in Anthropology, all majors must reach a one year proficiency in a foreign language (through 2120 level with a C- or better) or equivalent/placement. Student who choose to earn the Concentration in Culture and Language must reach a two year proficiency in a foreign language (through 2120 level with a C- or better) or equivalent/placement. The options to complete these requirements are listed below. The number of credits that a student needs to take may vary depending on what level of language proficiency they already possess. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree. Please note that language immersion courses are available through the Office of Experiential Learning and Education Abroad.

</table>

**Option 4:**

Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

**Option 5:**

Obtain college certification of completion of two years of a second language at the high school level with a grade of C- or higher in the second-year level.

**Option 6:**

By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

**Option 7:**

By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

**Option 8:**

In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**First Year**

### Total Credits

| Credits | 120-123 |

---

1. Students must take one Area III: Laboratory Sciences course, one Area IV: Social/Behavioral Science Course and an additional course in either area in order to fulfill the General Education requirements.

2. Students must take one Area V: Humanities course and one Area VI: Creative and Fine Arts course in order to fulfill their General Education requirements. Students completing the Concentration in Culture and Language may take LING 2110G for their Area V requirement.

3. See the General Education (p. 54) section of the catalog for a full list of courses.
Anthropology - Undergraduate Minor

Students who earn a minor in Anthropology must earn 18 credits, distributed as follows:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 301 Cultural Anthropology</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>ANTH 315 Introduction to Archaeology</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>ANTH 350 Anthropological Theory</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>ANTH 355 Biological Anthropology</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Upper division Anthropology courses 300 or above</td>
<td>9</td>
<td></td>
</tr>
<tr>
<td>Anthropology courses (any level)</td>
<td>6</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits: 18

Students who earn a B.A. in Anthropology may not also earn a minor in Anthropology. Students earning the minor must pass 18 credits with grades of C- or higher. Nine of the credits must be upper-division. Students may count S only in courses in which all grades are S/U.

Archaeology - Undergraduate Minor

The Undergraduate Minor in Archaeology is an interdisciplinary program through which students develop a deeper understanding of global culture change and the long-term anthropogenic impacts to our planet. Archaeologists use the material evidence of landscapes, sites, and artifacts to reconstruct past lifeways and interpret human behavioral variation and cultural change. They apply their knowledge to promote stewardship of cultural resources and respect for diverse pasts. The minor offers students the opportunity to acquire training in archaeology through experiential learning of field data collection techniques, laboratory analysis of archaeological materials, and cross disciplinary skills needed for careers in public and private cultural resource management, historic preservation, and heritage conservation. NMSU occupies a strategic position as a land grant institution in a multi-cultural regional setting, combined with its geographic location on a binational border. Students in different programs can use the minor in archaeology to enhance their undergraduate degrees and prepare themselves professionally to seek careers and graduate degrees in archaeology, public lands management, environmental sciences, public history, geography, or teaching.

The minor requires 18 credit hours, distributed as follows.

- At least 12 credits must be earned in upper division (300+) courses.
- At least one course and no more than two courses (6 credits) must be earned in a field other than Anthropology.
- At least three credits must be earned in each division — required, area studies, field methods, and laboratory methods.

The Native American Studies (NAS) minor focuses on Native American cultures and societies. It encompasses contemporary and historical experiences of American Indians and examines the contributions of Indigenous peoples to life in the United States and other American nations. This specialization has developed in reaction to Western academic views of Native Americans and to the frequently restrictive, assimilationist approach within universities to issues concerning Native peoples. NAS contributes to a new understanding of Native American cultures and societies from contemporary and historical perspectives.

Students must pass a total of 18 credits of which at least 9 of which must be upper division. ANTH 2140G Indigenous Peoples of North America is the required course for the minor. A grade of C- or better must be obtained for each course. Students may count S grades only in courses in which all grades are S/U, and no more than 6 hours of S credit can be accepted. Students may count no more than 12 credits in Anthropology. Please contact the Department of Anthropology regarding the minor.

The purpose of the Native American Studies Undergraduate Minor is:

- To provide an opportunity for all students to learn about Native American cultures and societies through an interdisciplinary program
- To facilitate research and other creative activities concerning and benefiting Native American peoples
- To serve the University and State of New Mexico in ways supporting and illuminating Native American lifeways

The Native American Studies (NAS) minor focuses on Native American cultures and societies. It encompasses contemporary and historical experiences of American Indians and examines the contributions of Indigenous peoples to life in the United States and other American nations. This specialized field has developed in reaction to Western academic views of Native Americans and to the frequently restrictive, assimilationist approach within universities to issues concerning Native peoples. NAS contributes to a new understanding of Native American cultures and societies from contemporary and historical perspectives. NAS encourages the creation of knowledge about Native Americans from previously unexplored or little-known materials and questions the premises of existing academic disciplines in a way promoting the reinterpretation of existing materials.

The purpose of the Native American Studies Undergraduate Minor is:

- To provide an opportunity for all students to learn about Native American cultures and societies.
- Facilitate research and other creative activities that concern Native American peoples and that have potential benefit for them.
- Serve the University and State of New Mexico in ways that support and illuminate the rich heritage of Native American peoples.

The minor in Native American Studies focuses on Native American cultures and societies, deals with contemporary and historical experiences of American Indians, and examines the contributions of Indigenous peoples to life in the United States and other American nations. NMSU occupies a unique strategic position as a land grant institution in a multi-cultural regional setting, combined with its geographic location on a binational border. Students in different programs can use the minor in sustainable development to enhance their undergraduate degree and prepare themselves professionally to seek careers and graduate degrees in sustainable and international development.

A minor in Sustainability is available for students who want to include sustainable development in their academic training. The minor requires 18 credit hours.

### Anthropology - Master of Arts

The Anthropology M.A. program is designed for students who are interested in the traditional sub-disciplines of anthropology, as well as such related fields as cultural resource management, food studies, medical anthropology, and museum studies. The program is directed to prepare students to evaluate critically the roles religion plays in cultures of the world. Students engage with the study of religion across disciplines including Anthropology, Art History, History, Native American Studies, Government, History, Native American Studies, and Sociology. The curriculum covers archaeological evidence of religion, new religious movements, religious iconography, forms of religious organization, politics and religion, and religious violence. The minor is particularly appropriate for students who pursue careers impacted by religious practices and beliefs such as health professions, legal careers, government agencies, religious vocations, and charitable organizations.

Students must take the required core class ANTH 330V MAGIC WITCHCRAFT AND RELIGION. Students must pass a total of 18 credits of which at least 9 are upper division. Students must earn C- or higher grades in each course and cannot count S/U courses unless all grades in the course are S/U. No more than 9 credits (upper or lower division) can be earned in any one department. Please contact the Department of Anthropology regarding substitutions and questions for the minor.

to both students planning to complete a professional M.A. degree and students planning to enter a Ph.D. program. In addition to the M.A. in Anthropology, our program offers graduate minors in anthropology, archaeology, food studies, and Native American Studies, as well as Graduate Certificates in cultural resource management and museum studies. The faculty encourage all graduate students to develop graduate minors and certificates, enhancing their specialized training in anthropology.

An undergraduate anthropology degree is not required for entry into the M.A. program. Applicants who lack the equivalent of ANTH 301, ANTH 315, and ANTH 355 may be required to take these courses or corresponding sections of ANTH 502, ANTH 350 or the equivalent is recommended. Applicants without an undergraduate degree in anthropology are encouraged to contact the Graduate Advisor before applying to the M.A. program in anthropology.

The M.A. Program in Anthropology at NMSU is enrolled as an eligible graduate program under the Western Regional Graduate Program (WRGP). WRGP allows master's, graduate certificate, and doctoral students who are residents of Western Interstate Commission for Higher Education (WICHE) member states to enroll in graduate programs outside of their home state and pay in-state resident tuition. Residents of the following states and territories are eligible to attend the M.A. Program in Anthropology at NMSU for in-state tuition rates: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, U.S. Pacific Territories and Freely Associate States, Utah, Washington, and Wyoming. Interested graduate applicants should apply directly to the NMSU Graduate School and identify themselves as WICHE WRGP applicants. WRGP applicants must meet NMSU’s WRGP admission requirements and deadlines. If you have further questions about the WRGP program and your eligibility, please contact Lois Stanford at lstanfor@nmsu.edu.

Admission Requirements

To apply to the Anthropology Masters Degree program the following materials are required:

- Graduate School application form and fees
- Official undergraduate and graduate transcripts from all colleges and universities attended, with a 3.0 GPA minimum.
- A letter from the candidate addressing his or her interests and graduate school objectives
- Letters of recommendation from three persons familiar with the candidate's academic record

All the above items should be submitted through the Graduate School's central admission system at: https://gradschool.nmsu.edu/

NOTE: The GRE is not required.

NOTE: In addition to the above, international applicants also need to view the requirements of admission to the university and provide additional documentation online, at this page: https://issb.nmsu.edu/index-2/

NOTE: students may matriculate in either August or January. If a student wishes to be considered for a Graduate Assistantship, the application must be completed by February 15 for admission in the fall semester. Assistantships are not usually offered for students matriculating in January, but they may be considered in subsequent semesters for an award.

For more information about the Anthropology Graduate Program contact:

Dr. Lois Stanford, Anthropology Graduate Advisor at: lstanfor@nmsu.edu

Dr. Rani Alexander, Anthropology Department Head at: raalexan@nmsu.edu

Cultural Resource Management - Graduate Certificate

The Graduate Certificate in Cultural Resource Management provides specialized archaeological training that enables students to pursue careers in cultural resource management, heritage, and historic preservation in the public or private sectors. The curriculum includes cultural resource management and historic preservation laws and regulations, area classes in prehistoric and historical archaeology, field classes, and laboratory methods courses in archaeology, history, and geography. Students take courses in traditional classroom and laboratory formats, as well as in the field, and may complete the certificate in one year.

The Certificate may be completed as a stand alone certification or in conjunction with the M.A. degree in Anthropology or any other related field.

If you wish to complete a graduate certificate, you must apply for admission to this non-degree program. Even if you already enrolled in a graduate program at NMSU, you will need to complete a separate application to be admitted to the certificate program. Once you have been admitted to the program and have completed all of the necessary coursework, you will need to apply to be awarded the certificate through your myNMSU account.

Please contact the Anthropology Graduate Advisor, Dr. Lois Stanford (lstanfor@nmsu.edu) for information about how to complete the application.

The Graduate Certificate in Cultural Resource Management requires 18 credits of coursework and must be completed within 3 years. The certificate requires six credits from two required courses and 12 credits from a comprehensive list of electives in anthropology and cognate fields. Students are required to take at least one course in History or Geography. All these courses are designed to promote expertise in cultural resource management.

### Required Courses

- **ANTH 540** Cultural Resource Management 3
- **ANTH 542** Cultural Resource Management II 3

### Elective Courses

Select 12 credits from the following:

1. Some of these courses have prerequisites, consult the graduate catalog for details.
2. Other classes may be included in the list of elective courses at the discretion of the Department and with approval of the Anthropology Department Head.

#### Core Curriculum

- **ANTH 455** Federal Indian Policy
- **ANTH 507** Advanced Studies in Archaeology
- **ANTH 512** Quantitative Analytical Methods in Anthropology
- **ANTH 516** Advanced Archaeology of the American Southwest
- **ANTH 518** Advanced Historical Archaeology
- **ANTH 522** Archaeological Field School-Graduates
- **ANTH 523** Archaeological Mapping
- **ANTH 574** Advanced Human Osteology
- **ANTH 576** Lithic Technology Organization
- **ANTH 577** Advanced Zooarchaeology
- **ANTH 578** Advanced Lab Methods in Archaeology
- **GEOG 553** Geomorphology
- **GEOG 573** Introduction to Remote Sensing

#### Controlled Electives

Select two from the following:

- **ANTH 540** Cultural Resource Management
- **ANTH 544** Advanced Native American Visual Culture

---

1. earning a grade of B or better
The purpose of the Anthropology Graduate Minor is to:

1. Enable students to develop a specialization in anthropology at the level of 500 or above. A minor in anthropology provides a useful concentration for students developing professional careers in teaching, environmental sciences, international business, community development, social work, art, and historic preservation. We recommend that students consult the anthropology graduate advisor and focus their coursework in the appropriate subfield.

This list is regularly modified as new courses are added to the catalog, or old ones are phased out. Eligible courses are determined by a committee with at least one representative from Art, Anthropology and History. Substitutions may be approved with the advice of Museum Studies Faculty in Art, History, and Anthropology by the Department Head of Anthropology.

TheAnthropology - Graduate Minor

For the minor in anthropology, students are required to complete at least 9 credits (3 courses) of graduate-level anthropology coursework at the level of 500 or above. A minor in anthropology provides a useful concentration for students developing professional careers in teaching, environmental sciences, international business, community development, social work, art, and historic preservation. We recommend that students consult the anthropology graduate advisor and focus their coursework in the appropriate subfield.

To include a minor on a student’s transcript, the minor must be listed on the NMSU Graduate Program of Study, and this form must be signed by the anthropology graduate advisor. Graduate students majoring in anthropology may not also earn a minor in the same field.

The Archaeology - Graduate Minor

The graduate minor in archaeology allows students in other programs to develop a specialization in archaeology. A minor in archaeology provides a useful concentration for students developing professional careers in cultural resource management, public lands management, environmental sciences, public history, geography, or teaching.

In order to complete the minor requirements, students are required to complete 9 credit hours (3 courses) of graduate level courses. The core courses for the minor are:

1. ANTH 547 Museum Field Methods
2. ANTH 549 Advanced Museum Anthropology
3. ANTH 556 Advanced Native American Intersections in Museums
4. ANTH 564 Advanced Curation Crisis in Archaeology
5. ARTS 501 Museum Conservation Techniques I
6. ARTS 502 Museum Conservation Techniques II
7. ARTH 546 Museum and Curatorial Studies
8. ARTH 579 Graduate Seminar: Art Theory, Criticism, Historiography
9. HIST 579 Oral History
10. HIST 581
11. HIST 583 Advanced Historic Preservation
12. HIST 586 Interpreting Historic Places for the Public

Total Credits: 18

1. This list is regularly modified as new courses are added to the catalog, or old ones are phased out. Eligible courses are determined by a committee with at least one representative from Art, Anthropology and History. Substitutions may be approved with the advice of Museum Studies Faculty in Art, History, and Anthropology by the Department Head of Anthropology.

The purpose of the Archaeology Graduate Minor is to:

1. Develop specialized knowledge of the complex and dynamic relationship between food and culture
2. Explore the role of culture in food production, distribution and consumption across different cultures
3. Apply ideas and knowledge from graduate seminars to fieldwork for MA thesis or internship in a food studies topic
4. Enable students to develop a specialization in food studies within their respective graduate program

The purpose of the Food Studies Graduate Minor is to:

1. Explore the role of culture in food production, distribution and consumption across different cultures
2. Apply ideas and knowledge from graduate seminars to fieldwork for MA thesis or internship in a food studies topic
3. Provide an opportunity for all students to learn about Native American cultures and societies.
4. Facilitate research and other creative activities that concern Native American peoples and that have potential benefit for them.

1. Alternative classes may be substituted for one of the core classes with the approval of the Anthropology Department Head.
2. In these cases, the student’s class research project should focus on a food studies theme.

Students are expected to conduct a food studies thesis, applying anthropological theoretical frameworks and ethnographic methodologies to the study of a food-related topic. Non-thesis students may select a food studies internship. Possible topics include sustainable development, alternative food movements, community food security, community health, nutrition, food safety, globalization of food, indigenous knowledge systems, food self-sufficiency, among others.

The purpose of the Native American Studies Graduate Minor is to:

1. Provide an opportunity for all students to learn about Native American cultures and societies.
2. Facilitate research and other creative activities that concern Native American peoples and that have potential benefit for them.

1. This list is regularly modified as new courses are added to the catalog, or old ones are phased out. Eligible courses are determined by a committee with at least one representative from Art, Anthropology and History. Substitutions may be approved with the advice of Museum Studies Faculty in Art, History, and Anthropology by the Department Head of Anthropology.

Students should choose among these core offerings with the advice of their MA thesis chair and minor area committee member. The minor in archaeology is not available to graduate anthropology majors. Substitutions for special topics courses available by permission of Anthropology Department Head.

Food Studies - Graduate Minor

The purpose of the Food Studies Graduate Minor is to:

1. Explore the role of culture in food production, distribution and consumption across different cultures
2. Apply ideas and knowledge from graduate seminars to fieldwork for MA thesis or internship in a food studies topic
3. Enable students to develop a specialization in food studies within their respective graduate program
4. Develop specialized knowledge of the complex and dynamic relationship between food and culture

Alternative classes may be substituted for one of the core classes with the approval of the Anthropology Department Head.

In these cases, the student’s class research project should focus on a food studies theme.

Students are expected to conduct a food studies thesis, applying anthropological theoretical frameworks and ethnographic methodologies to the study of a food-related topic. Non-thesis students may select a food studies internship. Possible topics include sustainable development, alternative food movements, community food security, community health, nutrition, food safety, globalization of food, indigenous knowledge systems, food self-sufficiency, among others.

Native American Studies - Graduate Minor

The purpose of the Native American Studies Graduate Minor is to:

1. Provide an opportunity for all students to learn about Native American cultures and societies.
2. Facilitate research and other creative activities that concern Native American peoples and that have potential benefit for them.

Alternative classes may be substituted for one of the core classes with the approval of the Anthropology Department Head.

In these cases, the student’s class research project should focus on a food studies theme.

Students are expected to conduct a food studies thesis, applying anthropological theoretical frameworks and ethnographic methodologies to the study of a food-related topic. Non-thesis students may select a food studies internship. Possible topics include sustainable development, alternative food movements, community food security, community health, nutrition, food safety, globalization of food, indigenous knowledge systems, food self-sufficiency, among others.
• Serve the University and State of New Mexico in ways that support and illuminate the rich heritage of Native American peoples.

The Graduate minor in Native American Studies focuses on Native American cultures and societies, deals with contemporary and historical experiences of American Indians, and examines the contributions of Indigenous peoples to life in the United States and other American nations. This specialization has developed in reaction to Western academic views of Native Americans and to the frequently restrictive, assimilationist approach within universities to issues concerning Native peoples. NAS contributes to a new understanding of Native American cultures and societies from contemporary and historical perspectives.

To qualify for a graduate minor in Native American Studies, students are required to complete 9 credit hours (3 classes) of graduate level courses. To record a minor on a student's transcript, the minor must be listed on the Graduate School's Program of Study form, and the Native American Studies advisor in the Department of Anthropology must sign this form.

1. Alternative classes may be substituted with the approval of the student's MA chair and the Director for the Graduate Minor in Native American Studies, Dr. Donald Pepion dpepion@nmsu.edu.

Art

Undergraduate Program Information

Within the scope of the university's land-grant mission, the Department of Art capitalizes on its unique geographic location to serve and reflect diverse border communities, support learning that combines innovative and hybrid techniques, critical and cultural theory, contemporary exhibitions, and art historical inquiry. Capitalizing on the specialties and research agendas of our faculty, we provide an environment and a platform for aesthetic and critical engagement through the application of studio, art historical and theoretical methodologies. Our curriculum fosters learning through immersion in experimental, collaborative and cross-disciplinary activity. Students develop their artistic aesthetic and professional growth by engaging with a variety of approaches to their individual research practice. Students research also includes critique and discourse related to the context of both historical and contemporary issues, and the development of new strategies of inquiry into contemporary culture and knowledge. As artists, historians, and conservators, we provide a space for active engagement with varied disciplines in local, national and international communities.

The department offers four undergraduate degrees: a Bachelor of Arts (BA) with a concentration in Studio Art, a BA with a concentration in Art History, a Bachelor of Fine Arts (BFA) in Studio Art and a BFA in Museum Conservation. Our studio degrees provide students with the opportunity to either specialize or diversify their program of study in the following media areas: graphic design and media arts, ceramics, sculpture, metals and jewelry, photography and lens-based media, painting and drawing, printmaking and museum conservation. We also provide for intermedia concentration if students are interested in practices such as installation, performance and multi-media.

BA in Art History – This program is designed to give students a broad familiarity with the visual arts through the study of aesthetics, cultural contexts, pictorial traditions, stylistic development and technical practices.

BA in Studio Art – The BA provides a solid background in materials, techniques and idea development across all media areas combined with art historical studies. Students have the opportunity to specialize or generalize in various medias.

BFA in Studio Art – The BFA curriculum provides students with a multidisciplinary understanding of contemporary visual arts. Students who wish to embark on a professional career in art apply to the BFA program through a portfolio process in their sophomore year. Areas of potential specialization include photography and lens-based media, graphic design and media arts, ceramics, drawing, painting, jewelry/metal smithing, printmaking and sculpture. Students may also elect to focus on several areas of specialization for an intermedia concentration. This degree culminates with a BFA thesis exhibition.

BFA in Museum Conservation - the BFA in Museum Conservation is an interdisciplinary degree, combining the studio arts, art history, anthropology, history, chemistry and conservation technologies to yield skills in the conservation of material objects of all types and historical value. NMSU offers one of only a few undergraduate degrees in museum conservation in the country.

The study of art provides an appropriate background for the pursuit of careers in studio art and art history in such areas as: the visual arts; graphic design; conservation; library work; museum work; advertising; architecture and interior design; photography; crafts; cinematography; education and art therapy; publishing; theatre; set design; television; industry and business; communication; management and research in the creative and academic areas. A major in art also provides students with a broad humanistic background appropriate to preparation for advanced degrees in other fields.

Graduate Program Information

The Department of Art offers a Master of Fine Arts in Studio Art and Master of Arts with an emphasis in Art History. Graduate students focus on an individualized program of study, supported by required coursework and mentorship with the graduate faculty. Art History students can concentrate on topics within Medieval to Contemporary Western European art, and Arts of the Americas. Master of Fine Art students are encouraged to work across disciplines and cultivate their personal research within the broad context of 21st-century art, art history and theory. The department supports work in and across the following areas: ceramics, graphic design, time-based media, lens-based media,
jewelry and metalsmithing, painting and drawing, printmaking, sculpture and museum conservation.

 Degrees for the Department
 Bachelor Degree(s)
 Art (Art History) - Bachelor of Arts (p. 301)
 Art (Studio Art) - Bachelor of Arts (p. 302)
 Art - Bachelor of Fine Arts (p. 304)

 Master Degree(s)
 Art - Master of Arts (p. 309)
 Art - Master of Fine Arts (p. 309)

 Minors for the Department
 Art - Undergraduate Minor (p. 308)
 Art History - Undergraduate Minor (p. 308)
 Museum Conservation - Undergraduate Minor (p. 308)

 Professor, Julia Barello, Department Head

 Professors Barelo; Associate Professors Cully, Furuhashi, Goehring; Assistant Professors Clark, d'Agostino, Lamb, Salas; College Associate Professors Cole-Dorn, Fitzsimmons; College Assistant Professor Marinas-Feliner; Museum Director Sage; Conservator Marinas-Feliner

 J. Barello, Department Head, MFA (University of Wisconsin-Milwaukee)– Jewelry and Metals; J. Clark, MFA (Cranbrook Academy of Art)– Ceramics; T. Cole-Dorn, MFA (New Mexico State University)– Painting and Drawing; C. Cully, MFA (University of Arizona)– Painting and Drawing; B. d'Agostino MFA (University of Maryland Baltimore Country)– Graphic Design; J. Fitzsimmons, MA (New Mexico State University)– Art History; M. Furuhashi, MFA (University of Illinois- Champagne)– Jewelry and Metals; M. Goehring, Ph.D. (Case Western Reserve)– Art History; B. Lamb, MFA (University of New Mexico)–Photography; S. Marinas-Feliner, MA Art Conservation (Universidad Complutense de Madrid, Spain) and MA Anthropology (New Mexico State University)– Art Conservator; M. Sage, MFA (MICA)– University Art Museum Director; A. Salas, Ph.D. (University of Texas at Austin)- Art History; ARTH 2110G. History of Art I

 3 Credits (3)
 This survey course explores the art and architecture of ancient pre-historic cultures through the end of the fourteenth century. While focused primarily on the art of the Western civilizations, this course will also provide insights into the works of other major cultures in order to provide alternate views of art and history. Emphasis will be placed on the relationship of artworks to political, social, spiritual, intellectual, and cultural movements that affect and are affected by their creation and development.

 Learning Outcomes
 1. Identify major artworks from a variety of regions and time periods.
 2. Investigate the methods of producing various works of art.
 3. Articulate an understanding and appreciation for the political, social, spiritual, intellectual, and cultural contexts of art forms.
 4. Comprehend and apply terms, methodologies and concepts common to studies of art history, developing a language to further understanding of art.
 5. Compare works across a range of historical styles and periods.

 ARTH 2120G. History of Art II

 3 Credits (3)
 This survey course will explore the architecture, sculpture, ceramics, paintings, drawings, and glass objects from the 14th century to the modern era. While focused primarily on the art of the Western civilizations, this course will also provide insights into the works of other major cultures in order to provide alternate views of art and history. Emphasis will be placed on the relationship of artworks to political, social, spiritual, intellectual, and cultural movements that affect and are affected by their creation and development. May be repeated up to 3 credits.

 Learning Outcomes
 1. Identify major artworks from a variety of regions and time periods.
 2. Investigate the methods of producing various works of art.
 3. Articulate an understanding and appreciation for the political, social, spiritual, intellectual, and cultural contexts of art forms.
 4. Comprehend and apply terms, methodologies and concepts common to studies of art history, developing a language to further understanding of art.
 5. Compare works across a range of historical styles and periods.

 ARTH 2136. Writing in Art

 3 Credits (3)
 This class looks at the variety of writings associated with art history and studio art practice. It explores the discipline of art history itself, and introduces students to the specific ways in which art historians study art. Within a workshop setting, students will practice approaches to research, understanding art and writing about art. Students will also be introduced to professional writing practices, including digital formats, relating to studio art.

 Learning Outcomes
 1. Develop visual literacy in looking at art
 2. Analyze a complex art historical argument
 3. Apply art specific vocabulary to critically-based writings and discussions of art
 4. Develop writing skills to articulate the relationship of art to the human experience
ARTH 300. Special Topics in Art History
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes, individual topics may not be repeated. Restricted to Las Cruces campus only.
Prerequisite: ARTH 2110G, ARTH 2120G, and ARTS 2671 or consent of instructor.

Learning Outcomes
1. Analysis of specific problems in art history

ARTH 305. Medieval Art
3 Credits (3)
History of painting, stained glass, sculpture, architecture and manuscript illumination in Europe from the Early Christian period to the end of the Gothic period; taught with ARTH 505.
Prerequisite(s): ARTH 2110G, ARTH 2120G, and ARTS 2671 or consent of instructor.

ARTH 306. Art of China I: Neolithic to Song Dynasty
3 Credits (3)
Survey of the art of China from the neolithic period to the end of the Song dynasty. Non-majors welcome. Each topic may be taken one time.
Prerequisite: ARTH 2110G, ARTH 2120G, and ARTS 2671 or consent of instructor.

Learning Outcomes
1. Identify the principal periods and dynasties up to the Song dynasty and the major political, philosophical and religious ideas that emerged during those periods. Describe the principal stylistic characteristics of two-dimensional and three-dimensional artworks and architecture for each period. Analyze how the form, function and style of art correspond to religious beliefs and funerary practices. Identify some of the major monuments of Chinese painting and be able to discuss their specific historical contexts and meaning. Identify basic elements of Buddhist and Taoist iconography.

ARTH 307. Art of China II: Song Dynasty to Today
3 Credits (3)
Survey of art, architecture and landscape design of China from the Song Dynasty to the present day. Crosslisted with: ARTH 512.
Prerequisite(s): ARTS 2671 or ARTH 2110G or HIST 2250G and HIST 2251G or consent of instructor.

ARTH 310. Native American Art
3 Credits (3)
Cross-cultural introduction to art of the prehistoric and historic native people of the North, Central, and South Americas. Considers the artistic expression and the function of art in diverse cultural and environmental contexts.
Prerequisite(s): ARTH 2110G, ARTH 2120G, and ARTS 2671 or consent of instructor.

ARTH 311. Art of China I: Neolithic to Song Dynasty
3 Credits (3)
Survey of the art of China from the neolithic period to the end of the Song dynasty. Non-majors welcome. Each topic may be taken one time.
Prerequisite: ARTH 2110G, ARTH 2120G, and ARTH 2670 or HIST 2250G and HIST 2251G or consent of instructor.

Learning Outcomes
1. Identify the principal periods and dynasties up to the Song dynasty and the major political, philosophical and religious ideas that emerged during those periods. Describe the principal stylistic characteristics of two-dimensional and three-dimensional artworks and architecture for each period. Analyze how the form, function and style of art correspond to religious beliefs and funerary practices. Identify some of the major monuments of Chinese painting and be able to discuss their specific historical contexts and meaning. Identify basic elements of Buddhist and Taoist iconography.

ARTH 312. Art of China II: Song Dynasty to Today
3 Credits (3)
Survey of art, architecture and landscape design of China from the Song Dynasty to the present day. Crosslisted with: ARTH 512.
Prerequisite(s): ARTS 2671 or ARTH 2110G or HIST 2250G and HIST 2251G or consent of instructor.

ARTH 313. Art of the Americas
3 Credits (3)
Examines the arts and history of the Americas. Each topic may be taken only once.
Prerequisite: ARTH 2110G, ARTH 2120G, and ARTH 2136 or consent of instructor.

Learning Outcomes
1. Locate works of art in relation to the cultures from which they originate, historicizing and contextualizing them in socio-political histories. Identify and employ methodology(ies) and theoretical approaches salient to the specific forms of art practice which they are studying. Evaluate, comment upon, and formulate approaches to the artistic practices of people of the Americas.

ARTH 314. Art in the Nineteenth Century
3 Credits (3)
History of painting, sculpture, architecture, and other arts created during the long nineteenth century. Non-majors welcomed. Each topic may be taken one time.
Prerequisite: ARTH 2110G, ARTH 2120G, and ARTS 2671 or consent of instructor.

Learning Outcomes
1. Recognize how identity is perceived and constructed and the contemporary challenges to the creation of the "Other" identify and place art objects within political, social, artistic and philosophical contexts. Acquire the tools to determine how issues of race and identity are being explored and understood today. Interpret and evaluate the relationship of art to the human experience.

ARTH 315. Race and Art
3 Credits (3)
Traces race, representation and appropriation through a historical and cultural lens. Issues of identity up to and including contemporary visual expression are examined. Non-majors welcomed. Each topic may be taken one time.
Prerequisite: ARTH 2110G, ARTH 2120G, and ARTH 2136 or consent of instructor.

Learning Outcomes
1. Identify and place art objects within political, social, artistic and philosophical contexts. Summarize the major styles that emerged in the 19th century. Analyze the importance of context for these major styles. Explain different methodologies of Art History and their relevance for understanding the art movements that emerged during this time period. Develop analytical processes, writing skills and research methodology to interpret and articulate the relationship of art to the human experience.
ARTH 345. Latin American Film
3 Credits (3)
Surveys films and their histories from Latin American and the LatinX diaspora.
Prerequisite: ARTH 2110G, ARTH 2120G, and ARTS 2136, or consent of instructor.
Learning Outcomes
1. Discuss, distinguish among, and analyze film techniques, genres, distribution systems, and movements, particularly as they relate to Latin America. Demonstrate an historical understanding of the political histories, movements, and changes in Latin America. Locate films in relation to the cultures from which they originate, historicizing and contextualizing them in socio-political histories. Identify and employ methodology(ies) and theoretical approaches salient to filmic context for these major styles. Explain different methodologies of Art History and their relevance for understanding Twenty Century Art. Apply art specific vocabulary to critically based writings and discussions of the art objects studied. Develop analytical processes, writing skills and research methodology to interpret and articulate the relationship of art to the human experience.

ARTH 344. Gender, Sexuality, and Art in the Americas
3 Credits (3)
This course examines woman power/trans/ queer discourses of both the global south and those of people of color in the United States in relation to Latin, Central, and North America.
Prerequisite: ARTH 2110G, ARTH 2120G, and ARTS 2136, or consent of instructor.
Learning Outcomes
1. Identify and analyze arguments and problems within gender and sexualities of the global south. Locate works of art in relation to the cultures from which they originate, historicizing and contextualizing them in socio-political histories. Identify and employ methodology(ies) and theoretical approaches salient to the specific forms of art practice which they are studying. Evaluate, comment upon, and formulate approaches to the artistic practices of people of the Americas based in feminist, decolonial methodologies.
ARTh 500. Special Topics in Art History
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes. Individual topics may only be taken one time. Students must be Graduate students to enroll.

Learning Outcomes
1. Analyze specific problems in Art History
2. Evaluate approaches to specific problems in Art History

ARTh 510. Advanced Native American Art
3 Credits (3)
Cross-cultural introduction to art of the prehistoric and historic native people of the North, Central, and South Americas. The artistic expression and the function of art considered in diverse cultural and environmental contexts. Crosslisted with: ARTH 310.
Prerequisite(s): Graduate standing.

ARTh 511. Art of China I: Neolithic to Song Dynasty
3 Credits (3)
Survey of the art of China from the neolithic period to the Song dynasty. Students must be a Graduate student to enroll.

Learning Outcomes
1. Identify the principal periods and dynasties up to the Song dynasty
2. Analyze the fossil records and the major political, philosophical and religious ideas that emerged during those periods. Describe the principal stylistic characteristics of two-dimensional and three-dimensional artworks and architecture for each period
3. Analyze how the form, function and style of art correspond to religious beliefs and funerary practices.
4. Identify some of the major monuments of Chinese painting and be able to discuss their specific historical contexts and meaning
5. Identify basic elements of Buddhist and Daoist iconography

ARTh 521. Art of the Americas
3 Credits (3)
Examines the arts and history of the Americas. Rotating topics; each topic may be taken only once. Crosslisted with: ARTH 321. Students must be in Graduate standing to enroll.

Learning Outcomes
1. Locate works of art in relation to the cultures from which they originate, historicizing and contextualizing them in socio-political histories
2. Identify and employ methodology(ies) and theoretical approaches salient to the specific forms of art practice which they are studying
3. Evaluate, comment upon, and formulate approaches to the artistic practices of people of the Americas

ARTh 525. Northern Renaissance Art
3 Credits (3)
History of painting, manuscript illumination and graphics in Northern Europe from the late 14th century to the mid-16th century; taught with ARTH 325.
Prerequisite(s): Graduate standing.

ARTh 536. Race and Art
3 Credits (3)
This course explores the visual expression of race and identity in art and visual culture from a diverse geographical and historical range. Each topic may only be taken one time. Crosslisted with: ARTH 336. Students must be Graduate students to enroll.

Learning Outcomes
1. Recognize how identity is perceived and constructed and the contemporary challenges to the creation of the “Other”
2. Identify and place art objects within political, social, artistic and philosophical contexts
3. Acquire the tools to determine how issues of race and identity are being explored and understood today. Interpret and evaluate the relationship of art to the human experience
4. Formulate a question concerning race and art and using analysis, evaluate the research on that question and create an original argument

ARTh 538. Art in the Nineteenth Century
3 Credits (3)
History of painting, sculpture, architecture, and other arts created in in the 19th century; taught with ARTH 338. Students must be in Graduate standing to enroll.

Learning Outcomes
1. Identify and place art objects within political, social, artistic and philosophical contexts
2. Summarize the major styles that emerged in the 19th century
3. Analyze the importance of context for these major styles
4. Explain different methodologies of Art History and their relevance for understanding the art movements that emerged during this time period
5. Formulate a question in art history relating to the topic of the course, evaluate and assess research, and create an original argument concerning that problem

ARTh 539. History of Photography
3 Credits (3)
Course studies history, theory and use of photographic practices in art, especially from formal introduction of the process in 1839 to the present. Crosslisted with: ARTH 339.
Prerequisite(s): Graduate standing.

ARTh 542. Global Modernisms
3 Credits (3)
Examines themes and monuments of created from the end of the 19th century to 1968 emphasizing modern and avant-garde cultural practices. Crosslisted with: ARTH 342. Students must be Graduate students to enroll.

Learning Outcomes
1. Identify and place art objects within political, social, artistic and philosophical contexts
2. Summarize the major styles that emerged in the early Twentieth Century to 1968
3. Analyze the importance of context for these major styles
4. Explain different methodologies of Art History and their relevance for understanding the art of this period
5. Apply art specific vocabulary to critically based writings and discussions of the art objects studied
6. Formulate a question in art history relating to the topic of the course, evaluate and assess research, and create an original argument concerning that problem
ARTH 543. Contemporary Global Art Practices  
3 Credits (3)  
Examines the myriad of contemporary art practices, media, and forms from 1968 to the present. Crosslisted with: ARTH 346. Students must be in Graduate standing to enroll.  
Learning Outcomes  
1. Identify and place art objects within political, social, artistic and philosophical contexts. Summarize the major styles and practices that emerge in the Contemporary period. Analyze the importance of context for these major styles and practices. Explain different methodologies of Art History and their relevance for understanding Contemporary Art. Apply art specific vocabulary to critically based writings and discussions of the art objects studied. Formulate a question in contemporary art, evaluate and assess research, and create an original argument concerning that problem.

ARTH 544. Gender, Sexuality, and Art in the Americas  
3 Credits (3)  
This course examines woman power/trans/queer discourses of both the global south and people of color in the United States in relation to art from Latin, Central, and North America. Cross-listed with ARTH 344. Students must be in graduate standing to enroll.  
Learning Outcomes  
1. Identify and analyze arguments and problems within gender and sexualities of the global south. Locate works of art in relation to the cultures from which they originate, historicizing and contextualizing them in socio-political histories. Identify and employ methodology(ies) and theoretical approaches salient to the specific forms of art practice which they are studying. Evaluate, comment upon, and formulate approaches to the artistic practices of people of the Americas based in feminist, decolonial methodologies.

ARTH 545. Latin American Film  
3 Credits (3)  
Surveys films and their histories from Latin America and the LatinX diaspora. Taught with ARTH 345. Students must be in graduate standing to enroll.  
Learning Outcomes  
1. Discuss, distinguish among, and analyze film techniques, genres, distribution systems, and movements, particularly as they relate to Latin America. Demonstrate an historical understanding of the political histories, movements, and changes in Latin America. Locate films in relation to the cultures from which they originate, historicizing and contextualizing them in socio-political histories. Identify and employ methodology(ies) and theoretical approaches salient to filmic works.

ARTH 546. Museum and Curatorial Studies  
3 Credits (3)  
This museum and curatorial studies course surveys practices, objects, and histories. Taught with ARTH 346. Students must be in graduate standing to enroll.  
Learning Outcomes  
1. Historicize the development of museums, patronage, collecting, looting, and restitution; noting distinctions between cultures, geographic regions, and nation-state systems. Identify and analyze arguments and problems within museum studies. Distinguish between the professional positions, institutional functions, and governing missions within and among distinct types of art institutions. Evaluate, comment upon, and formulate approaches to exhibition design in both their practical and ideological functions.

ARTH 578. Seminar in Art History  
3 Credits (3)  
Reading, research, and discussion of advanced problems in art history; rotating topics will be announced in the course schedule. Individual topics may only be taken once. Students must be Graduate students to enroll.  
Learning Outcomes  
1. Analyze advanced problems in art history and evaluate approaches to advanced problems in art history.

ARTH 579. Graduate Seminar: Art Theory, Criticism, Historiography  
3 Credits (3)  
Theories and methodologies in art history and art criticism.  
Prerequisite: graduate standing.

ARTH 597. Independent Study in Art History  
3 Credits (3)  
Supervised independent study in topics in art history. Students must be in graduate standing to enroll.  
Learning Outcomes  
1. Student will formulate a question in art history, evaluate and assess research, and create an original argument concerning that problem.

ARTH 599. Art History Thesis  
1-15 Credits (1-15)  
Art history master’s thesis research. Students must be in Graduate standing to enroll.  
Learning Outcomes  
1. Student will formulate a question in art history, evaluate and assess research, and create an original argument concerning that problem.

Studio Art Courses

ARTS 1121. Foundations in Art  
3 Credits (2+4P)  
The Foundations course will focus on a deceptively simple question. “What is Contemporary Art, and how can we make it?” Through the exploration of basic visual design concepts, collaborative learning, and interdisciplinary studio production, this course will help us to discover what it means to be an artist in the 21st century.  
Learning Outcomes  
1. Create original works of art through the investigation of ideas and concepts resulting in the communication of meaning. Develop forms that convey meaning. Evaluate works of art through critiques that appraise how the form communicates meaning. Justify the decisions that were made in the use and application of the chosen medium and form to communicate meaning in a work of art. Analyze the differences in clarity of communication between works of art based subject matter, medium and form. Apply knowledge provided in lectures to produce works of art that communicate meaning. Demonstrate an ability to express concepts in visual form. Understand how the choice of subject matter, medium and form translate in the expression of concepts through discussion and description. Remember the fundamental tenets of art, elements and principles of design, through the duplication of them in works of art as well their use in discussions.
ARTS 1145G. Visual Concepts
3 Credits (2+4P)
Visual Concepts is an introduction to the philosophies of art, visual thinking, and principles of visual organization. Designed to give students a broad view of aesthetic traditions, ideologies, and techniques basic to the creation and evaluation of art. Principles and concepts are taught in a common lecture and applied in parallel small studio sections. For non-art majors only.

Learning Outcomes
1. Develop understanding of history, major styles and contemporary issues in art.
2. Introduce students to the language of visual perception and aesthetic evaluation.
3. Introduce students to the fundamental processes of visual perception and artistic expression.
4. Develop students' confidence in using various art materials for artistic expression.
5. Develop students' ability to verbalize ideas and processes in art making.
6. Develop student's ability to communicate through writing about art and art experiences.

ARTS 1240. Design I
3 Credits (3)
This course introduces the fundamentals of two-dimensional design as it applies to fine art and commercial contexts. Emphasis will be on basic color theory, elements of dynamic composition, vocabulary of visual arts and design, and development of visual conceptual skills. Students will use a variety of materials and techniques. Restricted to Community Colleges campuses only.

Learning Outcomes
1. Produce art works that apply and organize the elements of two-dimensional form (line, shape, value, texture, color and space).
2. Produce artworks that apply the principles of two-dimensional design (harmony, variety, repetition, balance, rhythm, proportion, dominance, movement, and economy).
3. Demonstrate effective use of materials and techniques with consideration for craftsmanship and presentation.
4. Use visual art vocabulary in the development and critique of work.
5. Explore concepts and ideas: from conceptual, realistic/referential to non-representational.

ARTS 1250. Design II
3 Credits (3)
This course introduces the basic formal (aesthetic), spatial, and physical aspects of 3-D form as they can be applied to sculptural and functional design. Techniques that explore structure, mass, volume, scale, surface, form, and function are covered, along with various media, which may include paper, wood, clay, and/or metal. Restricted to Community Colleges campuses only.

Learning Outcomes
1. Apply the artistic qualities of the elements of art and principles of design to three-dimensional form.
2. Create 3 dimensional form using varied sculptural methods, construction techniques and media.
3. Produce 3 D design projects safely with proper use of equipment and materials.
4. Apply realistic, referential, and abstract concepts and ideas to projects.
5. Demonstrate knowledge of 3-D related art vocabulary, origin and trends in sculpture, and 3-D design fundamentals.

ARTS 1310. Introduction to Ceramics
3 Credits (2+4P)
This course introduces the technical processes and conceptual concerns of working with ceramic material. Various methods of forming functional and expressive works out of clay are explored. Methods used include handbuilding and throwing, basic clay bodies, slip and glaze, and atmospheric firing.

Learning Outcomes
1. Explain the transformation of the ceramic material from raw clay form to glazed ceramic object.
2. Demonstrate proficiency of technical ceramic skills.
3. Explain larger concepts and design principles.
4. Apply basic 3-D design principles in the formation of a work of art, as they apply to the ceramic media.
5. Create ceramic works of art based on conceptual prompts.
6. Critically evaluate a variety of artwork.
7. Gain an understanding of the history of ceramic art from a multicultural perspective.

ARTS 1320. Ceramics I
3 Credits (2+4P)
An introduction to the medium of clay incorporating hand building and wheel throwing to introduce the student to both the sculptural and utilitarian uses of clay. The student will also be introduced to a variety of glazing and firing techniques.

Learning Outcomes
1. Demonstrate through critical discourse or writing an introductory knowledge of the history of ceramics, and ceramic language and terminology.
2. Demonstrate through mechanical application an introductory knowledge of the properties of clays, glazes, and a variety firing techniques.
3. Produce a body of work that exemplifies good ceramic design through the effective use of form, surface, and color.
4. Through the production a body of work demonstrate competency in hand building and throwing on the wheel.
ARTS 1410. Introduction to Photography
3 Credits (2+4P)
This course introduces the making of photographic images from a broad viewpoint to consider both as an art practice and as a cultural practice. The course covers technical information on camera use and functionality, composition and visual design, digital workflow and editing, professional functions of manipulating and enhancing images, and printing correctly and effectively. The historical aspects of photography are also covered. May be repeated up to 3 credits.

Learning Outcomes
1. Gain fluency with basic camera function as well as a working knowledge of other photographic equipment and software to produce technically competent photographs
2. Have a familiarity with current image-editing software to enhance images as well as developing a digital workflow for the management of digital images
3. Be able to develop creative solutions to visual photographic problems
4. Gain awareness of contemporary issues in contemporary art photographic practice that can be applied to the one’s own individual practice
5. Develop the ability to critically analyze and discuss photographic images
6. Print and produce a final project that demonstrates synthesis of ideas presented in the course readings, critiques, and individual research
7. Demonstrate photographic terminology, and the many ways photographs function in society, both currently and historically

ARTS 1520. Digital Media I
3 Credits (2+4P)
This course provides an introduction to two of Adobe’s major software applications, Illustrator and Photoshop, which are essential in creating artwork, designing promotional materials, websites and more. Part of the course deals with creating a variety of documents using the major tools of each program, and gaining an understanding of the contemporary graphic design industry and basic elements and principles of design.

Learning Outcomes
1. Demonstrate appropriate skills in configuring and navigating computer systems software applications as appropriate to digital image making needs including organization of files using keywords and running batch processes.
2. Exhibit an understanding of a layer based bitmap editing program, through photo retouching, precise use of selection tools, and color adjustment techniques.
3. Create imagery using a vector based illustration program which demonstrates an understanding of vector based drawing tools.
4. Integrate the use of bitmap and vector images using bitmap and vector based image making applications to demonstrate a basic understanding of composition, color, and appropriate image size and resolution.

ARTS 1610. Drawing I
3 Credits (2+4P)
This course introduces the basic principles, materials, and skills of observational drawing. Emphasis is placed on rendering a 3-D subject on a 2-D surface with visual accuracy. Other topics include historical and contemporary references as well as an investigation of linear perspective, line, value, shape, space & composition. May be repeated up to 3 credits.

Learning Outcomes
1. Produce drawings that demonstrate techniques and mechanics of observational drawing.
2. Demonstrate competency in the following practices: measuring and sighting, gesture, contour line, negative space, shape, value, space, volume, plane and texture.
3. Create drawings primarily from observation with black and white traditional drawing media.
4. Demonstrate effective verbal or written response to one’s own art and the art of others.

ARTS 1630. Painting I
3 Credits (2+4P)
This course introduces the tradition of painting as a medium for artistic expression. Students will investigate materials, tools, techniques, history and concepts of painting. Emphasis is placed on developing descriptive and perceptual skills, color theory, and composition. May be repeated up to 3 credits.

Prerequisite(s): ARTS 1610.

Learning Outcomes
1. Produce paintings that demonstrate the tradition of methods, techniques, materials, and tools of oil painting.
2. Construct a variety of support structures and grounds on which paintings are created
3. Examine the historical origins and practices of painting from the personal, social and cultural perspective.
4. Identify and apply environmentally safe painting practices, care of tools, equipment, and facilities, as well as disposal of mediums, solvents and paints.
5. Apply basic color theory to representational and non-representational painting.

ARTS 1710. Introduction to Printmaking
3 Credits (2+4P)
This course provides direct experience of exploring basic printmaking processes, including relief, intaglio, and monoprint processes, as well as the investigation of materials/media, tools, techniques, history, and concepts of printmaking. Emphasis is given to solving problems through thematic development while producing a portfolio of prints.

Learning Outcomes
1. Properly operate a printing press and safely handle materials and equipment.
2. Demonstrate an adequate ability to utilize basic historical printmaking techniques that are widely relevant to contemporary artistic expressions.
3. Utilize formal elements of art and design (line, shape, value, texture, space, and color), to create prints that are formally sophisticated.
4. Create imagery that contains conceptual depth, which can be interpreted by viewers with regard to social, cultural, political, geographical, and/or psychological experiences and relevance.
ARTS 1711. Computer-Based Illustration
3 Credits (2+4P)
Introduction to the principles of computerized drawing and design. Using the basic concepts, drawing tools, and vocabulary of Adobe Illustrator.
Prerequisite: ARTS 1610, ARTS 1240, or consent of instructor.
Learning Outcomes
1. Demonstrate drawing with the pen tool.
2. Demonstrate the use of blending color and creating shapes.
3. Create spot colors and effectively use them in a page layout.
4. Demonstrate formatting and creating typography.
5. Demonstrate the use of layers, effects, graphic styles, symbols, and brushes
6. Demonstrate competency in creating digital graphics using of Adobe Illustrator software

ARTS 1712. Digital Graphics
3 Credits (2+4P)
Importing and exporting images and text into various desktop publishing formats. Exploring imaging, drawing, and page layout applications. Introduction to typography.
Prerequisite: ARTS 1520.
Learning Outcomes
1. Demonstrate competency in the use of InDesign software.
2. Create appropriate visual solutions based on target marketing information.
3. Demonstrate competency in the design and production of advertising and promotional materials.
4. Present ideas and concepts effectively and competently.
5. Visually demonstrate design solutions to be used in a portfolio

ARTS 1713. Web Page Design
3 Credits (2+4P)
Introduction to the creation of well-designed and organized Web sites. Emphasis on building creative but functional user-friendly sites. Introduction to HTML, Flash, Java Script, and Web-authoring software. Community Colleges only.
Prerequisite: ARTS 1520.
Learning Outcomes
1. Outline the structure and functionality of a typical website.
2. Demonstrate design and layout skills.
3. Demonstrate competency in the use of Dreamweaver software.
4. Demonstrate competency in the use of photo editing software.
5. Demonstrate skills learned for website functionality.
6. Create an Internet compatible website.

ARTS 1810. Jewelry and Small Metal Construction I
3 Credits (2+4P)
This course introduces the basic techniques, materials, and tools traditionally used in the creation of jewelry and/or small-scale sculptural objects.
Learning Outcomes
1. Apply basic jewelry fabrication techniques (such as: piercing, cold connections, soldering, metal forming, casting and stone setting) to complete projects. Create design sketches of the objects prior to fabrication. Demonstrate knowledge of materials and safe practices for making jewelry, as well as small functional and non-traditional objects. Analyze projects through critiques, oral presentations, and discussions.

ARTS 2010. Portfolio Development
3 Credits (2+4P)
This course presents the practicalities of building an art career with emphasis on developing a professional portfolio through visual aids, resumes, statements, and presentations. It covers professional practices of the studio artist including self-promotion, contracts, research tools for exhibition venues and other art related opportunities.
Prerequisites: ARTS 1712, ARTS 2611, and ARTS 1520, or consent of instructor.
Learning Outcomes
1. Develop a portfolio package with visual aids, photographic documentation, resumes, bios and artist statements.
2. Analyze the qualifications, procedures and portfolio requirements necessary for professional art related opportunities.
3. Complete an oral presentation on a series of personal works.
4. Distinguish pathways for navigating the business side of being a professional artist.

ARTS 2355. Stained Glass
3 Credits (2+4P)
Instruction in the fundamental fabrication and design techniques for stained glass. Introduction to visual decision making skills, historical, and critical issues of the medium. Community Colleges only.
Learning Outcomes
1. Demonstrate an understanding of the theory, principles and procedures that comprise the art and science of designing at least four (40 stained glass techniques through both written and verbal assessments, as well as, actual completed examples of each technique.
2. Properly select and safely employ various glass studio tools, instruments, procedures, methods and techniques in the fabrication processes of stained glass.
4. Work cooperatively in a studio classroom.
5. Relate historical background and significant developments of glass in general and stained glass in particular.
6. Understand the chemical processes associated with various processes used in working with and manipulating glass.
7. Develop critical thinking and problem solving strategies in various stained glass fabrication technics.
8. Be able to critically analyze, assess and appreciate the value of glass works of every kind.
ARTS 2410. Black & White Photography
3 Credits (2+2P)
This course introduces the fundamental techniques of black and white photography, which includes camera functions and use, exposure techniques and film processing, traditional darkroom printing, and presentation of work. Same as ARTS 1410.
Learning Outcomes
1. Demonstrate competent film development and photographic printing skills
2. Demonstrate an emerging understanding of aesthetic, compositional, conceptual, and communicative tools in photography including lighting and dynamic composition techniques.
3. Be able to critically analyze and discuss photographic images using photographic terminology
4. Demonstrate proper image adjustment and correction techniques, and apply proper exposure techniques

ARTS 2430. Photographic Portraiture
3 Credits (2+2P)
This course covers the study of professional photography that involves people, including studio and environmental portraits. Topics include studio and exterior lighting techniques, and selecting lighting equipment and supplies. Restricted to: Community Colleges only.
Prerequisite(s): ARTS 1410 or FDMA 1545.
Learning Outcomes
1. Demonstrate successful operation of studio lighting equipment and accurately define lighting equipment terminology
2. Illustrate the principles of photographic lighting
3. Demonstrate and apply how to use and modify natural light effectively
4. Demonstrate understanding of different approaches such as formal, informal, candid, vernacular and their cultural implications
5. Distinguish historic and contemporary cultural notions informing different types of portraits

ARTS 2431. Introduction to Graphic Design
3 Credits (2+4P)
Introduction to the principles of visual communication and digital media, letterforms, typography and identity marks. Projects produced using conventional and digital tools.
Learning Outcomes
1. Demonstrate working knowledge of the graphic design software.
2. Identify and apply basic design concepts for the purpose of visual communication.
3. Conduct visual research and create presentations on design topics.
4. Solve graphic design problems through solving fundamental communication challenges by sketching, drawing, typographic composition, use of image and color.

ARTS 2440. Photo Finishing & Presentation
2 Credits (1+2P)
Use of visual language for personal expression. Freelance photography; care of original photos; preparation of portfolios, photographic markets, exhibitions and judging, galleries and copyrights. Students will prepare a photographic portfolio. Restricted to: Community Colleges only.
Prerequisite(s): FDMA 1545.
Learning Outcomes
1. Define your target market and create a complete “Personal Promotional Package”
2. Produce a professional Resume Cover Letter.
3. Produce a professional looking Business Card, Letterhead Mailing Labels
4. Produce a single page Promotional Piece, (and possible follow-up material)
5. Produce a PDF Formatted Portfolio (Create in Photoshop Export as PDF)
6. Produce a clean, professional looking traditional hard portfolio with 20-30 pieces
7. Present the Entire Promotional Portfolio and promo materials in a “Job Interview”

ARTS 2510. Drawing II
3 Credits (2+4P)
This course introduces color and colored media as an element of composition while emphasizing descriptive and perceptual drawing skills and conceptual approaches to contemporary drawing. Restricted to ART and ANVE/DFM majors.
Prerequisite(s): ARTS T610.
Learning Outcomes
1. Create drawings in wet and dry color media.
2. Practice analyzing and visually translating observed subjects from realistic, referential, and/or objective form, to non-representational or abstract imagery
3. in drawings.
4. Compose fully developed drawings that include a conceptual or historical basis.
5. Engage in effective written and oral critique in response to one’s own art and the art of others.

ARTS 2511. Advanced Computer-Base Illustration
3 Credits (2+4P)
Design custom graphics and create special effects with filtering, special effects on type, graphing, technical illustrations, and three-dimensional drawing using Adobe Illustrator.
Prerequisites: ARTS 1212, ARTS 1711, and ARTS 1520, or consent of instructor.
Learning Outcomes
1. Demonstrate competency in the use of Adobe Illustrator software.
2. Create appropriate visual solutions based on target marketing information.
3. Demonstrate competency in the design and production of advertising and promotional materials.
4. Present ideas and concepts effectively and competently.
5. Visually demonstrate design solutions to be used in a portfolio
ARTS 2616. Aspects of Drawing
2-3 Credits
Continued work in drawing with emphasis on personal creative endeavor. Community Colleges only.
Prerequisites: ARTS 1610 and ARTS 2610.
Learning Outcomes
1. Advanced skill level in the visual dynamics of line involved in the creation of drawing.
2. Advanced skill level in the visual dynamics of shape involved in the creation of drawing.
3. Advanced skill level in the visual dynamics of value involved in the creation of drawing.
4. Advanced skill level in the visual dynamics of color involved in the creation of drawing.
5. Advanced skill level in the visual dynamics of color involved in the combination of line, shape, value and color involved in the creation of drawing.

ARTS 2630. Painting II
3 Credits (2+4P)
This course focuses on the expressive and conceptual aspects of painting, building on the observational, compositional, technical, and critical skills gained previously. Students will investigate a variety of approaches to subject matter, materials, and creative processes through in-class projects, related out-of-class assignments, library research or museum/gallery attendance, written responses, and critiques. Prerequisite(s): ARTS 1610 and ARTS 1630
Learning Outcomes
1. Produce paintings building on the skills and techniques learned in Painting I
2. Solve unique format, support, ground, over and under texturing surface challenges
3. Practice analyzing and translating observed subjects from realistic, referential, and/or objective form, to non-representational imagery
4. Create paintings that explore personal content, stylization, symbolism, narrative, and/or iconography

ARTS 2635. Painting III
2-3 Credits
Continuation of ARTS 2630.
Prerequisites: ARTS 1610, ART 1240 (for art majors), ART 1630, or consent of instructor.
Learning Outcomes
1. Color mixing and color relationships
2. Create illusions of space and volume
3. The student will strengthen his or her own personal artistic style. Knowledge of the proper use and maintenance of painting tools
4. Explore and learn the technique of a master painter of the past.
5. Awareness of nature, “eye hand response,” and an imaginative or personal use of the medium.
6. Awareness of the creative process, exploring unforeseen possibilities
7. An ability to work independently.
8. Understanding of painting styles and arts vocabulary

ARTS 2839. Introduction to Sculpture
3 Credits (2+4P)
Beginning sculpture students “explore space” while learning new processes and skills, including mold making, welding and woodworking.
Learning Outcomes
1. Be able to utilize a variety of traditional materials and sculpture processes, including: mold making, metal fabrication/wood fabrication, and the creative integration of mixed media.
2. You will learn to differentiate between objects and installations, and be prepared to explore sculpture in upper division, topics based courses.

ARTS 2993. Art Workshop
0.5 Credits (.5)
Required for all freshman and sophomore Art majors for four semesters, this workshop is designed to build professional student cohorts within the Department of Art; incorporate visiting artist and scholar lectures into the curriculum; and actively involve students in exhibitions and gallery and departmental events. May be repeated up to 4 credits. Crosslisted with: ARTS 308. Restricted to: BA Studio Art, BA Art History BFA Studio Art, BFA Museum Conservation majors. Restricted to Las Cruces campus only.
Learning Outcomes
1. Varies

ARTS 2996. Special Topics in Studio
1-3 Credits
Specific subjects and credits to be announced in the Schedule of Classes. No more than 9 credits toward a degree.
Prerequisite: consent of instructor.
Learning Outcomes
1. Varies

ARTS 308. Art Workshop
0.5 Credits (.5)
Required for all junior and senior Art majors for four semesters, this workshop is designed to build professional student cohorts within the Department of Art; incorporate visiting artist and scholar lectures into the curriculum; and actively involve students in exhibitions and gallery and departmental events. May be repeated up to 4 credits. Crosslisted with: ARTS 308. Restricted to: BA studio art, BA Art History BFA studio art, BFA Museum Conservation majors.

ARTS 340. Internship in Art
1-9 Credits (3P)
This course provides students with the opportunity for workplace learning as an important component in their program of study. Students can identify an internship in graphic design, photography, conservation or other studio areas; or within broader arts institutions such as museums, galleries and visual arts centers which will provide them with professional experience that will support the successful achievement of their career goals in art. May be repeated up to 9 credits. Crosslisted with: ARTS 440 and ARTS 540. Restricted to: BA Studio Art, BA Art History BFA Museum Conservation, BFA Studio Art MA Art History MFA Studio Art majors. Prerequisite(s): ARTH 2110G, ARTH 2120G, ARTS 2671 and eighteen credits of ARTS/ARTH 200 or ARTS/ARTH 300 level studio courses.
ARTS 350. Special Topics in Intermediate Drawing and Painting
3 Credits (2+4P)
Intermediate drawing and painting course focusing on the following topics: Realism, Color, Narrative, and Abstraction. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 6 credits.
Prerequisite(s): ARTS 1610 and ARTS 1630, or consent of instructor.
Learning Outcomes
1. Apply fundamental elements and principles of design to art production specific to an intermediate level drawing and painting course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering intermediate level tools and processes in drawing and painting. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary drawing and painting. Create original works of art through the application of medium, tools, techniques and concepts specific to drawing and painting.

ARTS 355. Special Topics in Intermediate Graphic Design
3 Credits (2+4P)
Intermediate graphic design course focusing on the following topics: web design, typography, motion graphics, publication design. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 12 credits.
Prerequisite(s): ARTS 2431 or consent of instructor.
Learning Outcomes
1. Apply fundamental elements and principles of design to art production specific to an intermediate level graphic design course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering intermediate level tools and processes in graphic design. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary graphic design. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary graphic design.

ARTS 360. The Figure
3 Credits (2+4P)
Introduction to working from live models, anatomical skeletons, source images and the imagination in a variety of two-dimensional media, including painting and drawing. An emphasis is placed on anatomical accuracy and with a focus on the figure as an expressive subject. May be repeated up to 6 credits.
Prerequisite(s): ARTS 1610 or consent of instructor.

ARTS 365. Intermediate Sculpture Special Topics
3 Credits (2+4P)
Intermediate sculpture students will expand their fabrication skills in metal, wood and mixed media. Assignments incorporate topics such as Pop art, Process Art, and The Body in Contemporary Art. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 6 credits.
Prerequisite(s): ARTS 2839 or consent of instructor.

ARTS 370. Special Topics in Intermediate Digital Photography
3 Credits (2+4P)
Intermediate digital photography course addressing techniques and production of photo media within the context of contemporary art. Course focuses on the following rotating special topics: Networks, Photobook and Video art. May be repeated up to 12 credits.
Prerequisite(s): ARTS 1410, or consent of instructor.
Learning Outcomes
1. Apply fundamental elements and principles of design to art production specific to an intermediate level photography course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering intermediate level tools and processes in photography. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary photography. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary photography.

ARTS 373. Intermediate Analog Photography
3 Credits (2+4P)
Introduction to skills and techniques of black and white film photography within the context of contemporary art. Emphasis on analog camera work and darkroom procedures. 35 mm SLR or rangefinder film camera required for course. May be repeated up to 6 credits.
Prerequisite(s): ARTS 1410, or consent of instructor.

ARTS 374. Intermediate Ceramics Multiples (Design and Production)
3 Credits (2+4P)
Intermediate ceramics course focusing on an introduction to the technical processes of throwing, prototyping, mold making, glaze calculation, and alternative firing. May be repeated up to 3 credits.
Prerequisite(s): ARTS 1310 or consent of instructor.
Learning Outcomes
1. Develop the basic visual and tactile problem solving skills necessary to making one part and two part molds. Demonstrate competency in using these techniques to translate basic cylindrical, spherical, and rectangular forms. Develop ability to make successful clay casts from properly made molds. Apply the principles of design to creating multiples: Balance, Emphasis, Rhythm, Contrast, Proportions, and Scale. Movement. Develop basic skills in glazing and a variety of other surface design techniques. Apply the visual element to glazing and surface design of ceramic forms: Line, Shape, Mass, Value, Color, Texture, Pattern, Space Through research, writing, and class critiques develop the ability to think, speak and write about the conceptual relevance to creating multiples in contemporary art.
ARTS 375. Intermediate Ceramics Sculptural Concerns
3 Credits (2+4P)
Intermediate ceramics course focusing on the refinement of technical skills with an emphasis on conceptual development related to materiality. 
**Prerequisite(s):** ARTS 310 or consent of instructor.

**Learning Outcomes**
1. Refine and master the basic skills in all the standard ceramic building techniques. This includes wheel throwing, coil building, and slab building. Demonstrate competency is using these techniques to replicate complex geometric, organic, and figurative forms. Through the guidance of course assignments begin to develop original conceptual themes and natures to translate into sculptural forms. Through the guidance of course assignments begin to develop original conceptual themes and natures to translate into sculptural form. Refine and master glazing and surface design techniques. Begin to develop ability to mix glazes and slips. Demonstrate clear understanding of the visual element to glazing and surface design: Line, Shape, Mass, Value, Color, Texture, Pattern, Space. Through research, writing, and class critique refine the ability to think, speak and write about contemporary ceramic sculpture in a competent and nuanced way.

ARTS 376. Museum/Gallery Research Internship
1-9 Credits
Research internship in museum or gallery. Requirements determined by instructor in cooperation with supervising museum/gallery professional. May be repeated up to 9 credits. Consent of instructor required. 
**Prerequisite(s):** ARTH 2110G, ARTH 2120G, ARTS 2671, or consent of instructor.

ARTS 385. Special Topics in Intermediate Metals/Jewelry
3 Credits (2+4P)
Intermediate Metals/Jewelry course focusing on the following topics: design and production, materiality and sculptural concern. Techniques may include casting, complex construction, forming, and mix media. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 12 credits. 
**Prerequisite(s):** ARTS 1810 or consent of instructor.

**Learning Outcomes**
1. Apply fundamental elements and principles of design to art production specific to an intermediate level metals/jewelry course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering intermediate level tools and processes in metals/jewelry. Evaluate/appraise original works of art through the application of medium, tools, techniques, and concepts specific to contemporary metals/jewelry. Create original works of art through the application of medium, tools, techniques, and concepts specific to contemporary metals/jewelry.

ARTS 394. Special Topics in Studio
3 Credits (3)
Specific subjects and credits to be announced in the Schedule of Classes online. Topics cannot be repeated. May be repeated up to 9 credits.

ARTS 401. Museum Conservation Techniques I
3 Credits (2+3P)
Introduces the student to conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. This course also includes how to document the condition of an object during the conservation process.

**Learning Outcomes**
1. Identify and explain strengths and weaknesses of the theory of conservation. Analyze a ceramic object through testing and observation; evaluate the results of an object to be conserved. Create and defend a conservation treatment plan based on the conservation theory and the principles of conservation for cultural objects, tests results, observations, and personal experience in the lab. Apply conservation and restoration techniques to the ceramic object in the lab, after analyzing, evaluating and creating a treatment plan for the object. Create a Condition Report of the ceramic object by describing the condition and its treatment during the conservation process.

ARTS 402. Museum Conservation Techniques II
3 Credits (2+3P)
Continues conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. 
**Prerequisite(s):** ARTS 401.

**Learning Outcomes**
1. Analyze different types of materials by examining two objects, a painted canvas and a painted wood panel, through testing and observation and evaluate the results of the objects to be conserved. Create and defend a conservation treatment plan based on the conservation theory and the principles of conservation for cultural objects, tests results, observations, and personal experience in the lab. Apply conservation and restoration techniques to both objects in the lab, a painted canvas and a painted wood panel, after analyzing, evaluating and creating a treatment plan for the object. Create a Condition Report for each object, describing the condition of the object, history, the problems the object presents, its treatment during the conservation process, and any remaining issues after treatment.
ARTS 403. Preventative Conservation/Collections Care
3 Credits (3)
Introduces the student on how to mitigate the deterioration and damage of cultural property in a museum setting through the formulation and implementation of policies and procedures. The course addresses most aspects of collections management and care for objects in storage, exhibitions and during transportation.

Learning Outcomes
1. Understand the principles of Preventive Conservation and Collections Care and develop conservation skills through recognizing, describing, explaining, locating, and reporting symptoms and causes of the agents of deterioration that affect all types of art objects. Apply methods of Preventive Conservation and collections care for causes of deterioration in museum collections. Analyze and Evaluate several museums and create a Museum Assessment that could serve a plan of action to remediate any problems encountered. Create a plan for re-organizing a museum based on the Museum Assessment. Create a binder based on the readings from class that includes all the causes of deterioration of materials, how to prevent deterioration, and environmental control of collections.

ARTS 404. Applied Projects in Museum Conservation
3 Credits (3)
This course provides student with the practical application of techniques and policies learned in previous museum conservation coursework with the underpinnings of basic museum and conservation practices, particularly in collection care, preventive conservation, conservation, ethics, teamwork and security. Rotating special projects. May be repeated up to 6 credits.

Prerequisite(s): ARTS 401, ARTS 402, ARTS 403 or ARTS 501, ARTS 502, ARTS 503.

Learning Outcomes
1. Analyze and examine the different types of materials that compose one or various objects through testing and observation and evaluate the results of the object/s to be conserved. Create and defend the conservation treatment plan based on conservation theory and the principles of conservation for cultural objects, the tests results, and the observations. Apply conservation and restoration techniques to the object/s in the lab after analyzing, evaluating and creating a treatment plan for the object/s. Create Condition Reports, one for each object, by describing the condition of the object and its treatment during the conservation process.

ARTS 440. Internship in Art
1-9 Credits (3P)
This course provides students with the opportunity for workplace learning as an important component in their program of study. Students can identify an internship in graphic design, photography, conservation or other studio areas; or within broader arts institutions such as museums, galleries and visual arts centers which will provide them with professional experience that will support the successful achievement of their career goals in art. May be repeated up to 9 credits. Crosslisted with: ARTS 340 and ARTS 540.

Prerequisite(s): ARTH 2110G, ARTH 2120G, ARTS 2671 and eighteen credits of ARTS/ARTH 200 or ARTS/ARTH 300 studio courses.

ARTS 450. Special Topics In Advanced Drawing and Painting
3-6 Credits (2-4+4P)
Advanced drawing and painting course focusing on the following topics: Identity, Place, Spirituality, and Body. Topics will be announced in the course schedule. May be repeated up to 12 credits.

Prerequisite(s): 6 credits of ARTS 350, or consent of instructor.

Learning Outcomes
1. Apply fundamental elements and principles of design to art production specific to an advanced level drawing and painting course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering advanced level tools and processes in drawing and painting. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary drawing and painting. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary drawing and painting.

ARTS 455. Special Topics in Advanced Graphic Design
3 Credits (2+4P)
Advanced graphic design course focusing on the following special topics: special projects, identity design, storytelling, portfolio. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 15 credits.

Prerequisite(s): 6 credits of ARTS 355, or consent of instructor.

Learning Outcomes
1. Apply fundamental elements and principles of design to art production specific to an advanced level graphic design course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering advanced level tools and processes in graphic design. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary graphic design. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary graphic design.

ARTS 465. Advanced Sculpture Special Topics
3-6 Credits (2-4+4P)
Thematic classes deepen students’ knowledge of contemporary sculpture and extended media through a series of interpretive assignments that culminates in a unified body of work. Course topics include: "Artists’ Maps”, Installation Art/Land Art”, “Sculpture and the 1960s”, “Sculpture and the 1970’s”. Topics will be announced in the course schedule. May be repeated up to 18 credits.

Prerequisite(s): ARTS 365 or permission of the instructor.
ARTS 470. Advanced Digital Photography
3 Credits (2+4P)
Advanced digital photography course addressing technique and production of photo media within the context of contemporary art. Course focuses on the following rotating topics: Temporality, Photocyanotype, Installation and Video Art. Each topic may only be taken once.
Prerequisite: ARTS 370 or consent of instructor.

Learning Outcomes
1. Apply fundamental elements and principles of design to art production specific to an advanced digital photography course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering advanced level tools and processes in digital photography. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary photography. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary photography.

ARTS 474. Advanced Ceramics Design and Production
3-6 Credits (3-6)
Advanced ceramics course focusing on the technical processes of throwing, prototyping, mold making, glaze calculation, and alternative firing. Discussions may also include issues of professional practice, marketing, and branding. May be repeated up to 6 credits.
Prerequisite(s): ARTS 374 and ARTS 375, or consent of instructor.

Learning Outcomes
1. Refine the basic visual and tactile problem solving skills necessary to making two part molds, and develop the ability to make complex multipart molds. Demonstrate competency is using these techniques to translate complex geometric and organic forms. Develop pertinent conceptual reasoning for creating multiples of a form in ceramic material. Demonstrate clear understanding of the principles of design in designing ceramic multiples: Balance, Emphasis, Rhythm, Contrast, Proportions, and Scale. Movement. Develop basic skills in glazing and a variety of other surface design techniques. Demonstrate clear understanding of the visual element of art to the glaze and surface design of ceramic multiples: Line, Shape, Mass, Value, Color, Texture, Pattern, Space. Through research, writing, and class critiques refine the ability to think, speak and write about the conceptual relevance to creating multiples in contemporary art and articulate.

ARTS 475. Advanced Ceramics Sculptural Concerns
3-6 Credits (2-4+4P)
Advanced ceramics course focusing on conceptual development as it relates the creation of a unified body of work. Topics may include discussions of advanced techniques, professional practices, and contemporary issues in ceramics. May be repeated up to 15 credits.
Prerequisite(s): ARTS 374 and ARTS 375, or consent of instructor.

Learning Outcomes
1. Strive to innovate the standard ceramic building techniques in a way that contributes to, and is informed by, the field of ceramic sculpture. Develop a cohesive body of work, which explores completely original concepts and themes. Demonstrate clear understanding of the principles of design by challenging them in an informed way. Refine and master glazing and surface design techniques. Begin to develop ability to mix glazes and slips. Demonstrate clear understanding of the visual element of art by challenging them in an informed way. Through research, writing, and class critique refine the ability to think, speak and write about contemporary ceramic sculpture in a competent, nuanced, and critical way. Begin to measure one's work against the larger context of contemporary art.

ARTS 485. Special Topics in Advanced Metals/Jewelry
3-6 Credits (2-4+4P)
Advanced Metals/Jewelry course focusing on the following topics: conceptual development and personal aesthetic and style, professional practices, contemporary issues in Metals/Jewelry, and senior exhibition. Techniques may include enameling, coloring, historical processes, and digital technology. Topics will be announced in the course schedule. Each topic may only be taken once.
Prerequisite: 6 credits of ARTS 385, or consent of instructor.

Learning Outcomes
1. Apply fundamental elements and principles of design to art production specific to an intermediate level metal/jewelry course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering intermediate level tools and processes in metal/jewelry. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary metal/jewelry. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary metal/jewelry.

ARTS 490. Museum Conservation Internship
1-6 Credits (1-6)
The goal of this internship is to provide a student with a practical learning experience in preventative conservation techniques and policies so that they can relate what they have learned in the classroom from ART 403 Preventative Conservation/Collections Care to applied situations. It will provide the student an opportunity to learn skills and knowledge needed in working with museum collections. Tasks and projects will be assigned by the instructor. 3 credits required for BFA in Museum Conservation.
May be repeated up to 6 credits.
Prerequisite(s): ARTS 403.

ARTS 494. Special Topics in Studio
3 Credits (3)
Specific subjects and credits to be announced in the Schedule of Classes online. May be repeated up to 9 credits.

ARTS 495. Undergraduate Studio Thesis
3-6 Credits (3-6)
Special research and independent study leading to undergraduate thesis exhibition. May be repeated up to 6 credits. Consent of Instructor required.
Prerequisite(s): Consent of instructor.

ARTS 496. Fundamentals of Studio Management
1 Credit (1)
Advanced studio course designed to introduce students to the fundamentals of studio management. Includes training in proper tools use and maintenance; safety procedures; and practical experience with studio oversight. Concurrent registration in advanced level studio course of the same media area required. May be repeated for a maximum of 3 credits. Restricted to majors. Graded S/U.
Prerequisite: consent of instructor.

ARTS 499. Problems in Studio Art
1-6 Credits (1-6)
Individualized study in specialized studio areas not covered by other advanced courses. May be repeated up to 9 credits. Consent of Instructor required.
ARTS 501. Museum Conservation Techniques I  
3 Credits (2+3P)  
Introduces the student to conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. This course also includes how to document the condition of an object during the conservation process. May be repeated up to 3 credits. Crosslisted with: ARTS 401.

ARTS 502. Museum Conservation Techniques II  
3 Credits (2+3P)  
Continues conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. Crosslisted with: ARTS 402.  
Prerequisite(s): ARTS 501.

ARTS 503. Preventive Conservation/Collections Care  
3 Credits (3)  
Introduces the student on how to mitigate the deterioration and damage of cultural property in a museum setting through the formulation and implementation of policies and procedures. The course addresses most aspects of collections management and care for objects in storage, exhibitions and during transportation. Crosslisted with: ARTS 403.

ARTS 504. Applied Projects in Museum Conservation  
3 Credits (3)  
This course provides students with the practical application of techniques and policies learned in previous conservation coursework with the underpinnings of basic museum and conservations practices, particularly in collection care, preventative conservation, conservation, ethics, teamwork and security. May be repeated up to 6 credits. Crosslisted with: ARTS 404.  
Prerequisite(s): ARTS 401, ARTS 402, ARTS 403 OR ARTS 501, ARTS 502, ARTS 503.

ARTS 505. Preventive Conservation/Collections Care  
3 Credits (3)  
This course provides students with the practical application of techniques and policies learned in previous conservation coursework with the underpinnings of basic museum and conservations practices, particularly in collection care, preventative conservation, conservation, ethics, teamwork and security. May be repeated up to 6 credits. Crosslisted with: ARTS 404.  
Prerequisite(s): ARTS 401, ARTS 402, ARTS 403 OR ARTS 501, ARTS 502, ARTS 503.

ARTS 510. Internship in Art  
1-9 Credits (3P)  
This course provides students with the opportunity for workplace learning as an important component in their program of study. Students can identify an internship in graphic design, photography, conservation or other studio areas; or within broader arts institutions such as museums, galleries and visual arts centers which will provide them with professional experience that will support the successful achievement of their career goals in art. May be repeated up to 9 credits. Crosslisted with: ARTS 440 and ARTS 340.

ARTS 520. Drawing and Painting Workshop  
3-6 Credits (2-4+4P)  
Graduate level drawing and painting course focusing on the development of concepts, expression and visual form. May be repeated up to 27 credits.  
Prerequisite(s): Graduate standing.

ARTS 555. Graphic Design  
3 Credits (3)  
May be repeated up to 27 credits.

ARTS 560. Painting Workshop  
3-9 Credits  
Advanced work with painting skills. Emphasis on critical analysis and development of body of work. May be repeated up to 27 credits.  
Prerequisite(s): Graduate standing.

ARTS 565. Sculpture Media  
3-9 Credits  
May be repeated up to 27 credits.

ARTS 570. Photography Seminar  
3-9 Credits (3-9)  
Graduate students develop and implement a research program using photographic media and processes. Outcomes and program developed in consultation with photography faculty.  
Prerequisite:  
Learning Outcomes  
1. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary photography at the graduate level.

ARTS 575. Ceramic Arts  
3-9 Credits  
May be repeated up to 27 credits.

ARTS 576. Museum/Gallery Research Internship  
1-9 Credits  
Research internship in museum or gallery. Requirements determined by instructor in cooperation with supervising museum/gallery professional. For art history credit. May be repeated for a maximum of 9 credits.  
Prerequisite: graduate standing.

ARTS 580. Printmaking Workshop  
3-6 Credits  
May be repeated for a maximum of 33 credits.  
Prerequisite(s): Graduate standing.

ARTS 585. Metals and Jewelry Design  
3-9 Credits  
May be repeated up to 27 credits.

ARTS 595. Problems in Studio  
1-6 Credits  
Individualized study in specialized studio areas not covered by other advanced courses. May be repeated up to 12 credits. Consent of Instructor required.

ARTS 596. Graduate Studio Seminar  
3 Credits (3)  
Explores issues in contemporary art making and their relationship to personal work. Presentation of research in oral, visual, and written form. May be repeated for a maximum of 18 credits. Restricted to majors.  
Prerequisite(s): Graduate standing.

ARTS 598. Studio Thesis  
1-15 Credits  
Special research in studio, leading to an exhibition and written thesis statement.  
Name: Julia Barello, Department Head  
Office Location: Devasthali Hall, Room 118
Art (Art History) - Bachelor of Arts

The art history program is designed to give the student a broad familiarity with the visual arts through the factual and theoretical study of aesthetics, cultural contexts, iconography, pictorial traditions, stylistic development and technical practices. Students are encouraged to take related courses in anthropology, history, languages and literature, music history, philosophy, religion, theatre and costume history.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Second Language Requirement

For the Bachelor of Arts- Art with a concentration in Art History there is a two year second language requirement for the degree. Students must demonstrate a reading knowledge of a second language either by completing the 2120 or 2140 course or by taking a 300-level literature course (FREN, GRMN, SPAN, PORT, JAPN or CHIN). Art History majors may not use SIGN 2110 American Sign Language III to fulfill the language requirement.

A Suggested Plan of Study

This roadmap assumes student placement in ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Art (Studio Art) - Bachelor of Arts

The Bachelor of Arts is designed to give the student a broad interdisciplinary understanding of the areas of painting/drawing, graphic design, printmaking, sculpture, photography, ceramics, conservation, jewelry and metalsmithing, through a series of introductory and special topics courses and the history and appreciation of art in the context of a liberal education. Students are required to take 30 credits of upper-level studio art classes and 18 credits of Art History.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Art - Bachelor of Fine Arts

Concentration: Museum Conservation

Art Conservation is the study of the preservation and restoration of art as well as of other cultural and natural objects. The B.F.A. degree with an concentration in Museum Conservation provides an academic structure within which students master specific sets of practical skills while developing broad professional and theoretical perspectives toward the issue of conserving objects in a museum or collection setting. By combining theory with practice, the program offers students the interpretative, quantitative and administrative skills needed for careers as conservators, curators, registrars, collections managers, exhibit designers and museum administrators, all of whom must have specialized training in the care and handling of works of art to be successful.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count toward the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

1  See the General Education (p. 54) section of the catalog for a full list of courses.

2  See the General Education (p. 54) section of the catalog for a full list of courses.

3  Please see the Courses (p. 286) tab of the Art Department page within this catalog to determine which courses are Studio Art (ARTS) and which are Art History (ARTH).

4  See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

5  Students can take one 4 credit Upper-Division Elective or can take one 3 credit Upper-Division and a 1 credit Elective to fulfill the requirement.

6  Both ART 2110G and ART 2120G count towards Area VI and the General Education elective and Department/College Requirements.

7  Both CHEM 1215G and CHEM 1225G count towards Area III and Area III-IV General Education elective and Department/College Requirements.

8  Choose one sequence from the following for eight credits:

9  See the Area III-IV General Education elective and Department/College Requirements section of the catalog for a full list of courses.

10 See the Area III-IV General Education elective and Department/College Requirements section of the catalog for a full list of courses.
**Mathematics coursework.** Beside the credits, but may be needed in order to take the necessary English and will not count towards the degree requirements and/or elective credits in courses numbered 300 or above. Developmental coursework requirements, and elective credits to total at least 120 credits with 48

Students must complete all University degree requirements, which must apply in the spring of their sophomore year for acceptance into the capstone class in the final semester of study. Students seeking a BFA career in art. The Bachelor of Fine Arts degree is a professional recommended for those students who wish to embark on a professional

printmaking, sculpture and museum conservation. This program is design and media arts, jewelry/metalsmithing, painting, photography, printmaking, sculpture and museum conservation. This program is recommended for those students who wish to embark on a professional career in art. The Bachelor of Fine Arts degree is a professional baccalaureate degree, which requires a senior thesis exhibition and capstone class in the final semester of study. Students seeking a BFA must apply in the spring of their sophomore year for acceptance into the BFA program - this is done via a portfolio review.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Second Language Requirement**

For the Bachelor of Arts- Art with a concentration in Museum Conservation there is no second language requirement for the degree.

**Emphasis: Studio Art**

The studio art curriculum is designed to give the student a broad, transdisciplinary understanding of the field of visual arts, including appreciation and criticism, art history, ceramics, drawing, graphic design and media arts, jewelry/metalsmithing, painting, photography, printmaking, sculpture and museum conservation. This program is recommended for those students who wish to embark on a professional career in art. The Bachelor of Fine Arts degree is a professional baccalaureate degree, which requires a senior thesis exhibition and capstone class in the final semester of study. Students seeking a BFA must apply in the spring of their sophomore year for acceptance into the BFA program - this is done via a portfolio review.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Second Language Requirement**

For the Bachelor of Arts- Art with a concentration in Museum Conservation there is no second language requirement for the degree.

**Concentration: Museum Conservation (Option A)**

**A Suggested Plan of Study**

This roadmap assumes student placement in ENGL 1110G Composition 1. The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Museum Conservation - Undergraduate Minor

The Museum Conservation minor requires 18 credits. Students cannot earn both a bachelor’s degree in the Department of Art and the Museum Conservation minor unless they pass at least 6 credits in the minor beyond the requirements of the major. An undergraduate minor in Museum conservation requires the completion of 9 credits of the three 400 level museum conservation courses listed below, and 9 credits of the courses selected from one of the three tracks listed below.

1. **Introductory ARTS Courses:** Certain ARTS 200-level courses, in addition to the ones below, may count but only apply for Transfer Students.
   - ARTS 1310 Introduction to Ceramics
   - ARTS 1410 Introduction to Photography
   - ARTS 1610 Drawing I
   - ARTS 1630 Painting I
   - ARTS 1710 Introduction to Printmaking
   - ARTS 1810 Jewelry and Small Metal Construction I
   - ARTS 2431 Introduction to Graphic Design
   - ARTS 2839 Introduction to Sculpture

2. See the General Education (p. 54) section of the catalog for a full list of courses.

3. Please see the Courses (p. 286) tab of the Art Department page within this catalog to determine which courses are Studio Art (ARTS) and which are Art History (ARTH).

4. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.
Art - Master of Arts

Emphasis: Art History

An emphasis in art history requires a minimum of 33 credits of art history courses, 6 of which must be thesis credits. Additionally, 3 credits of related courses outside the Art Department must be taken with the approval of the department head and the student's major advisor.

Reading proficiency in a foreign language is also required and should be acquired prior to the beginning of thesis research for which it will be employed. A reading proficiency exam will be arranged in conjunction with the major advisor. Admission to the MA program with an emphasis in art history is based on an accredited BA or BS degree (or equivalent), including at least 18 credits in art history, museum studies, visual studies, or related disciplines. Undergraduate deficiencies must be completed before advancement to candidacy.

Prefix  Title  Credits
ARTH 579  Graduate Seminar: Art Theory, Criticism, Historiography 3
ARTH 599  Art History Thesis 6
Six 500-level ARTH Courses 24
One 450 and above level course outside of the Department of Art 3
Total Credits 36

Candidacy and Thesis Committee Selection

Upon satisfactory completion of all required coursework (except thesis credits) and foreign language requirement, the student will prepare a thesis proposal under the direction of the major professor. The student will then select the second member of his or her thesis committee and submit the proposal to this committee member for approval. With the backing of these two advisors, the student must then present the proposal to the department faculty. After a successful presentation, the student will advance to candidacy and select the third committee member, who may be from outside the art department.

Art - Master of Fine Arts

Emphasis: Studio Art

Art requirements for an MFA degree with an emphasis in studio art include a minimum of 60 credits of academic work, usually completed in three years. Of those 60 credits,

- 9 must be taken in art history,
- 6 in non-art courses numbered 450 or above,
- 6 in ARTS 598 Studio Thesis
- 3 in ARTH 579 Graduate Seminar: Art Theory, Criticism, Historiography
- 12 in ARTS 596 Graduate Studio Seminar.

In order to remain in good standing in the MFA program, a student must maintain an average GPA of 3.0. Any grade lower than B- in an Art Department graduate course is considered failing. In the event that a student fails a required course, they must repeat the class in order to get credit for it. If a student is awarded a graduate assistantship, he or she must maintain an average GPA of 3.0.
The Department of Astronomy offers graduate work leading to the Doctor of Philosophy and Master of Science degrees. To be admitted as a regular student to the NMSU Graduate School as a major in astronomy, a student must present a suitable undergraduate background with emphasis (12-16 credits) on junior-senior level physics, and mathematics.

Information on assistantships and fellowships in teaching and research can be obtained from the department.

Each entering graduate student will be assigned a committee that will guide the student in choice of courses, suggest training if needed to remedy deficiencies and determine specific degree requirements in accord with the student's needs and objectives, and in agreement with departmental policies. The program requires 33 traditional course credits (11 classes), 4 seminar class credit hours, plus research in an area of specialization. Regular consultations with departmental faculty members will guide the student in choice of courses, suggest training if needed to remedy deficiencies and determine specific degree requirements in accord with the student's needs and objectives, and in agreement with departmental policies. The Department is a full partner in the SDSS project. The Department also operates the Dunn Solar Telescope and the Visitor Center at the Sunspot Solar Observatory. The Department also operates a 24-inch telescope on Tortugas Mountain, near the NMSU campus.

The department is home to the NASA Planetary Data System Atmosphere Node, where solar system exploration data are archived.

Degrees for the Department

Master Degree(s)
Astronomy - Master of Science (p. 315)

Doctoral Degree(s)
Astronomy - Doctor of Philosophy (p. 315)

Minors for the Department
Astronomy - Undergraduate Minor (p. 314)

Professor, James McAteer, Department Head

Professors Chanover, Churchill, Holtzman, Jackiewicz, Murphy; Associate Professors McAteer; Assistant Professors Burchett, Finlator, Lyra, Nielsen, Prescott, Shetye; College Professors Beebe Observatory Specialist Edwards

J. Burchett, Ph.D. (University of Massachusetts) - galaxies and gas; R. F. Beebe, Ph.D. (Indiana-Bloomington) - planetary astronomy and stellar spectra; N. Chanover, Ph.D. (New Mexico State) - planetary astronomy; C. Churchill, Ph.D. (California-Santa Cruz) - galaxies and intergalactic medium; K. Finlator, Ph.D. (University of Arizona) - galaxy evolution, the intergalactic medium, cosmological reionization; J. Holtzman, Ph.D. (California-Santa Cruz) - stars and stellar populations in galaxies; J. Jackiewicz, Ph.D. (Boston College) - helioseismology, stars, theoretical condensed matter physics; Vladimír Lyra (Uppsala University) - planet formation, habitability; R. T. J. McAteer, Ph.D. (Queen's University, Belfast) - solar physics, Sun-Earth connection; J. Murphy, Ph.D. (U. Washington) - planetary atmospheres and exploration; E. Nielsen, Ph.D. (University of Arizona) - extrasolar planets; M. Prescott, Ph.D. (University of Arizona) - Lyman-alpha nebulae, kinematics of gas within cosmic web; J. Shetye, Ph.D. (Armagh Observatory) - solar physics

Astronomy Courses

ASTR 1115G. Introduction Astro (lec+lab)
4 Credits (3+2P)

This course surveys observations, theories, and methods of modern astronomy. The course is predominantly for non-science majors, aiming to provide a conceptual understanding of the universe and the basic physics that governs it. Due to the broad coverage of this course, the specific topics and concepts treated may vary. Commonly presented subjects include the general movements of the sky and history of astronomy, followed by an introduction to basic physics concepts like Newton's and Kepler's laws of motion. The course may also provide modern details and facts about celestial bodies in our solar system, as well as differentiation between them – Terrestrial and Jovian planets, exoplanets, the practical meaning of "dwarf planets", asteroids, comets, and Kuiper Belt and Trans-Neptunian Objects. Beyond this we may study stars and galaxies, star clusters, nebulae, black holes, and clusters of galaxies. Finally, we may study cosmology—the structure and history of the universe. The lab component of this course includes hands-on exercises that work to reinforce concepts covered in the lecture, and may include additional components that introduce students to the night sky.

Learning Outcomes

1. Students will discuss the night sky as seen from Earth, including coordinate systems, the apparent daily and yearly motions of the sun, Moon, and stars, and their resulting astronomical phenomena.
2. Students will list and apply the steps of the scientific method.
3. Students will describe the scale of the Solar System, Galaxy, and the Universe.
4. Students will explain telescope design and how telescopes and spectra are used to extract information about Astronomical objects.
5. Students will describe the formation scenarios and properties of solar system objects.
6. Students will describe gravity, electromagnetism, and other physical processes that determine the appearance of the universe and its constituents.
7. Students will describe methods by which planets are discovered around other stars and current results.
8. Students will describe the structure, energy generation, and activity of the sun.
9. Students will compare our sun to other stars and outline the evolution of stars of different masses and its end products, including black holes.
10. Students will describe the structure of the Milky Way and other galaxies and galaxy clusters.
11. Students will describe the origin, evolution, and expansion of the universe based on the Big Bang Theory and recent Astronomical observations.
12. Students will describe conditions for life, its origins, and possible locations in the universe.
ASTR 1116. Introduction to Astronomy Lab, Special 1 Credit (1)
This lab-only listing exists only for students who may have transferred to NMSU having taken a lecture-only introductory astronomy class, to allow them to complete the lab requirement to fulfill the general education requirement. Consent of Instructor required, at some other institution). Restricted to Las Cruces campus only.
Prerequisite(s): Must have passed Introduction to Astronomy lecture-only.
Learning Outcomes
1. Course is used to complete lab portion only of ASTR 1115G or ASTR 112
2. Learning outcomes are the same as those for the lab portion of the respective course.

ASTR 1120G. The Planets 4 Credits (3+2P)
Comparative study of the planets, moons, comets, and asteroids which comprise the solar system. Emphasis on geological and physical processes which shape the surfaces and atmospheres of the planets. Laboratory exercises include analysis of images returned by spacecraft. Intended for non-science majors, but some basic math required.
Learning Outcomes
1. Students will describe the sky as seen from Earth, the apparent daily and yearly motions of the Sun, Moon, planets and stars, and resulting astronomical phenomena.
2. Students will apply the process of the scientific method in an astrophysical setting.
3. Students will describe the structure of the solar system and explain the development of the currently accepted model of solar system formation.
4. Students will explain how telescopes and spectra are used to extract information about astronomical objects.
5. Students will describe properties of minor solar system objects, such as dwarf planets, moons, asteroids, meteoroids, and comets.
6. Students will compare and contrast bulk and unique properties of the Terrestrial and Jovian worlds.
7. Students will describe how gravity and other physical processes determine the appearance of the solar system and its constituents.

ASTR 301V. Revolutionary Ideas in Astronomy 3 Credits (3)
Examines recent fundamental scientific revolutions that have shaped our view of Earth and the universe. Topics in astronomy range from exoplanets to black holes to dark energy and raise questions about the very nature of how we use the scientific method to see the unseen, and how this shapes science research today.
Prerequisite(s): Any general education science course.

ASTR 305V. The Search for Life in the Universe 3 Credits (3)
Use of information from several of the sciences to explore the likelihood that life exists elsewhere in the universe. Subjects include an overview of historical ideas about the possibility of life elsewhere in the universe, the chemistry and biology of life on Earth, recent explorations for life within our solar system, and current search strategies for life in the universe and their scientific basis.

ASTR 308V. Into the Final Frontier 3 Credits (3)
Exploration of space: a brief review of the history of space flight, the Apollo program, joint U.S.-Soviet space missions, and unstaffed exploration of the planets. Emphasis on knowledge gained through these efforts. Includes new space initiatives. Same as HNRS 308V.

ASTR 400. Undergraduate Research 1-3 Credits
Supervised individual study or research. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

ASTR 401. Topics in Modern Astrophysics 3 Credits (3)
This course is designed for students interested in astrophysics who have some background in math and physics and want to learn about basic astrophysics and interesting current topics. The course will cover basic astrophysical concepts such as orbital mechanics, light, and radiative processes and transfer. These concepts will be applied to the discussion of exciting modern topics involving planets, exoplanets, stars, galaxies, and/or cosmology, with topical emphasis determined by the instructor.
Prerequisite(s): MATH 1521G and (PHYS 2110 or PHYS 1310G).

ASTR 402. Introduction to Astronomical Observations and Techniques 3 Credits (3)
Designed for students interested in astrophysics who have some background in math and astronomy and want to learn about techniques for obtaining and analyzing astronomical data. This course will review the properties of light and discuss the process of experimental design. The course will describe basic observational tools such as telescopes and detectors. It will discuss how data is obtained, and how features of the detector and the Earth's atmosphere can be corrected for. Some topics in basic astronomical data analysis will be discussed, with topical emphasis determined by the instructor. Some simple data analysis projects will be assigned.
Prerequisite(s): MATH 1511G and (PHYS 2140 or PHYS 1320G) and (ASTR 1120G, ASTR 1115G, or ASTR 401).

ASTR 403. Fundamentals of Astronomy 3 Credits (3)
This course is designed to ensure a basic, quantitative knowledge of fundamental topics in astronomy and astrophysics. These topics include orbital mechanics, properties of radiation, principles of stellar radiation and spectra, structure and dynamics of the Milky Way, properties of galaxies, and basic cosmology. While this course is designed for first year graduate students, it is also cross-listed as a undergraduate course for students who have already had some exposure to astronomy and are prepared for a fast-paced review of fundamental topics and concepts in astronomy. Undergraduates will have a reduced homework load. Consent of Instructor required. Crosslisted with: ASTR 505.
Prerequisite(s): ASTR 401 or demonstrated background in astronomy and problem solving.

ASTR 500. Seminar 1 Credit (1)
Organized group study treating selected topics.

ASTR 503. Astrophysics 3 Credits (3)
This course is designed to ensure a basic, quantitative knowledge of fundamental topics in astronomy and astrophysics. These topics include orbital mechanics, properties of radiation, principles of stellar radiation and spectra, structure and dynamics of the Milky Way, properties of galaxies, and basic cosmology.
ASTR 506. Stellar Dynamics and Hydrodynamics  
3 Credits (3)  
Graduate level course on basic stellar dynamics and fundamentals of hydrodynamics.

ASTR 530. Gas and Radiative Processes in Stars, Galaxies and the IGM  
3 Credits (3)  
This course will introduce the basic physics of the the primary gaseous environments in the universe and their observational signatures. Astrophysical environment to be addressed will include the atmospheres of stars, the interstellar medium, the circumgalactic medium, and the intergalactic medium. Physical processes covered will include gas hydrodynamics, radiative and collisional excitation and ionization balance in astrophysics, atomic processes and detailed balancing, heating and cooling balance, and evolution. From the observational point of view, the course will discuss the spectral signatures of these processes, including stellar spectra, 21-cm spectra, emission line spectra from HII regions and planetary nebulae, and absorption lines from the interstellar medium, circumgalactic medium, and intergalactic medium.

ASTR 535. Observational Techniques I (f)  
3 Credits (3)  
Up-to-date introduction to modern observational astronomy in a two-semester sequence. Topics include: introduction to computers, error analysis in data, the different types of optical telescopes, and optical and infrared photometry, image processing, and detectors.

ASTR 545. Stellar Spectroscopy  
3 Credits (3)  
This course covers the physics of stellar atmospheres with emphasis on using spectra as a diagnostic tool for understanding the properties of stars. Topics include spectral classification, radiative transfer, gas equilibrium physics, line and continuum opacities, adiabatic and superadiabatic convection, and extraction of observed quantities from spectra for deducing physical conditions of the source.

ASTR 555. Galaxies I  
3 Credits (3)  
Fundamentals of the properties of galaxies and galaxy components, including stars and stellar populations, gas and dust, central black holes, and dark matter. Includes a detailed description of the properties of the Milky Way Galaxy.

ASTR 565. Stellar Interiors  
3 Credits (3)  
Internal constitutions of stars, computation of stellar models, and stellar evolution.

ASTR 598. Special Research Programs  
1-6 Credits  
Individual investigations, either analytical or experimental.

ASTR 599. Master’s Thesis  
15 Credits  
Master’s level research in astrophysics or observational astronomy.

ASTR 600. Pre-dissertation Research  
1-15 Credits  
Research.

ASTR 605. Interstellar Medium  
3 Credits (3)  
Basics of radiative transfer and processes in the interstellar medium. Properties of dust and infrared emission from grains. Applications to neutral atomic and molecular gas and ionized plasmas in galaxies. May be repeated up to 3 credits.

ASTR 610. Radio Astronomy  
3 Credits (3)  
Techniques in observational radio astronomy, including single dish and interferometer arrays. Physical processes that produce radio emission, with a focus on continuum emission. May be repeated up to 3 credits.  
Prerequisite(s): Consent of instructor.

ASTR 616. Galaxies II  
3 Credits (3)  
Galaxy formation within a cosmological context. Topics include an introduction to cosmology, the growth of linear and nonlinear structures, the formation of dark matter halos, galaxy growth and feedback processes, and their observational signatures in the intergalactic and circumgalactic media.

ASTR 620. Planetary Surface and Atmospheric Processes  
3 Credits (3)  
Evaluation and analysis of observational data on solar system objects to determine their nature and physical conditions, with emphasis upon atmospheres (composition, structure, thermodynamics, evolution, etc.) May be repeated up to 3 credits. Restricted to: ASTR majors.

ASTR 621. Planetary System Formation  
3 Credits (3)  
The physical processes involved in planetary system formation are addressed. Specific foci include molecular cloud collapse, disk processes, and competing theories of planet formation within disks. Additional topics to be discussed may include: the solar wind, planetary magnetic fields, planetary ring processes, and mineralogy. May be repeated up to 3 credits. Restricted to: ASTR majors.

ASTR 625. Cosmology  
3 Credits (3)  
Discussion of our current knowledge of the structure of the universe and current research methods. Topics include the distance scale, clustering of galaxies, large-scale structure, metrics, dark matter, and cosmological probes such as distant quasars, radio galaxies, and gravitational lenses.

ASTR 630. Numerical and Statistical Methods in Astrophysics  
3 Credits (3)  
Provides basic background in numerical and statistical methods relevant to astrophysical research. Topics include a review of probability and probability distribution functions, Bayesian and frequentist approaches, data simulation, parameter estimation, Markov Chain Monte Carlo, and other topics. May be repeated up to 3 credits.

ASTR 670. Heliophysics  
3 Credits (3)  
Explore the Sun and its processes. the heliosphere, and its interactions with the planets. Topics include: A introductory description of space weather and its physics; energy interaction with the space environment; the quiet Sun and its interactions with planetary atmospheres (with an emphasis on Earth); Magnetohydrodynamics; frozen-in flux; the solar wind; magnetized fluid dynamics; the active Sun(flares and coronal mass ejections); the effects of Space Weather.

ASTR 698. Special Topics.  
1-9 Credits  
Special topics.

ASTR 700. Doctoral Dissertation  
15 Credits  
Dissertation.

Select one from the following:  
- ASTR 301V Revolutionary Ideas in Astronomy

1 Three credits of ASTR 400 Undergraduate Research may replace one of these courses.

2 ASTR 401 Topics in Modern Astrophysics and ASTR 402 Introduction to Astronomical Observations and Techniques are the preferred classes but are generally offered only in alternate years. Three credits of ASTR 400 Undergraduate Research may replace one of these courses, but not the same three if used above.

3 Cross-listed with graduate classes and require special permission.

4 Alternative 400-level courses in the physical sciences, engineering, or related fields, including one-time seminars, may be proposed on a case-by-case basis to fulfill this requirement, drawn from the fields of astronomy, biochemistry, biology, chemistry, computer science, geology, geophysics, mathematics, physics, statistics or from engineering. Proposals should include a clear justification that connects the course materials to a particular topic in astronomy or astrophysics.

5 This requirement will generally be fulfilled by two 3-credit courses. Students may request the 4 credit option instead, if an appropriate topic and instructor for 1 credit of ASTR 400 Undergraduate Research are available. ASTR 401 Topics in Modern Astrophysics and ASTR 402 Introduction to Astronomical Observations and Techniques are generally offered only in alternate years, and have prerequisites.

6 ASTR 401 Topics in Modern Astrophysics and ASTR 402 Introduction to Astronomical Observations and Techniques are the preferred classes but are generally offered only in alternate years. Three credits of ASTR 400 Undergraduate Research may replace one of these courses, but not the same three if used above.

7 Cross-listed with graduate classes and require special permission.
Astronomy - Master of Science

The Astronomy Department at NMSU offers programs leading to the Master of Science and the Doctor of Philosophy degrees. Graduate courses cover topics in astrophysics, stellar atmospheres, observational techniques, the interstellar medium, galactic structure, star formation and evolution, extragalactic objects, cosmology, and solar system studies. Students also take courses in other relevant fields to broaden their knowledge and capabilities.

Astronomy - Doctor of Philosophy

The Astronomy Department at NMSU offers programs leading to the Master of Science and the Doctor of Philosophy degrees. Graduate courses cover topics in astrophysics, stellar atmospheres, observational techniques, the interstellar medium, galactic structure, star formation and evolution, extragalactic objects, cosmology, and solar system studies. Students also take courses in other relevant fields to broaden their knowledge and capabilities.

Biology

Undergraduate Program Information

A student may earn the Bachelor of Arts in biology or the Bachelor of Science in biology, genetics, microbiology, or conservation ecology through major studies in the Department of Biology. The Bachelor of Science in biology or microbiology is recommended for premedical and predental students, for those preparing to teach biology and other sciences at the secondary and college levels, for those interested in the numerous fields of biological research and applied biology, and for those planning on obtaining an advanced degree in biology.

Freshmen should begin taking required biology and chemistry courses in their first year. Degree plans for specific areas of interest can be obtained from the Biology Success Center in Foster Hall room 204. More information on the Department of Biology is available on our web site.

A student must earn a grade of C- or better to receive credit for any nondepartmental or departmental requirement for any major or minor offered by the Department of Biology.

Students who wish to explore a minor or supplementary course work in a specific discipline to enhance their academic experience are encouraged to speak with an advisor. The Biology Department offers minors in biology, microbiology, human biology, conservation ecology, or genetics and biotechnology. A student may not earn a major and a minor in the same discipline.

A student must fulfill a second language requirement to receive a Bachelor of Arts or Bachelor of Science degree in the Biology and Microbiology majors. This requirement does not apply to the Conservation Ecology major, offered jointly with the Department of Fisheries, Wildlife and Conservation Ecology, or the Genetics and Biotechnology major, offered jointly with the Department of Plant and Environmental Science. To meet the second language requirement, the student must do one of the following:

- Complete two semesters of second language courses numbered 1110 and 1120 with a grade of C- or better. Spanish speakers should complete SPAN 1210 Elementary Spanish for Heritage Learners I, SPAN 1220 Spanish for Heritage Learners II or SPAN 2210 Spanish for Heritage Learners III with a C- or better to fulfill the requirement.

---

6 Taking any of the non-astronomy classes for this requirement requires prior approval from the head of astronomy on a case-by-case basis, with a clear connection being established between the proposed research or design project and a particular topic in astronomy or astrophysics (astronomy instrumentation or observational projects are particularly encouraged); no more than 3 non-ASTR credits can be counted toward the minor.

7 Generally offered in alternate years.

8 Cross-listed with graduate classes and require special permission.

9 Alternative 400-level courses in the physical sciences, engineering, or related fields, including one-time seminars, may be proposed on a case-by-case basis to fulfill this requirement, drawn from the fields of astronomy, biochemistry, biology, chemistry, computer science, geology, geophysics, mathematics, physics, statistics, or from engineering. Proposals should include a clear justification that connects the course materials to a particular topic in astronomy or astrophysics.
• Challenge the 1120 level of French, Chinese, German, Japanese, or Spanish; or the 1130 level for the Spanish-for Heritage Learners student or the 1130 level for Portuguese.

• Obtain college certification of completion of two years of a second language at the high school level with a grade of C- or higher in the second-year level. (i.e. equivalent to FREN 2120 French IV, GRMN 2120 German IV, SPAN 2120 Spanish IV, etc.)

• Complete two semesters of American Sign Language, courses SIGN 1110 American Sign Language I and SIGN 1120 American Sign Language II, with a grade of C- or better.

• Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

• Obtain certification of a working knowledge of a Native American language from the American Indian program director.

• Obtain certification of a working knowledge of a second language if such language is not taught at NMSU from the head of the Department of Languages and Linguistics.

• In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

Graduate Program Information

The Department of Biology offers research and coursework that cover the natural world whether it is at the molecular, organismic, or ecosystem level. Our goal is to prepare students for careers in diverse areas such as ecology, microbiology, evolution, botany, health science, and biology education through formal coursework, research experiences, interactive seminars, and professional development activities. Biology graduate students conduct their own research in a productive environment using state-of-the-art facilities. The Biology Department offers the following degree emphasis:

• Thesis Masters research program in Biology (M.S.)
• Non-thesis Masters program in Biology (M.S.)
• Non-thesis Masters program in Biology (Biotechnology emphasis) (M.S.)
• Doctorate research program in Biology (Ph.D.)

For research toward the Master of Science or the Doctorate of Philosophy, students can choose among the Department’s three areas of emphasis:

1. Behavioral, Ecological, and Evolutionary Biology
2. Cell and Organismal Biology
3. Microbiology

There are two formal course requirements for all Biology Graduate students, with the exception of students in the accelerated non-thesis MS Biotechnology option. These core courses are described in the Biology Graduate Handbook available for download from the Graduate Student section of the Biology website.

All prospective applicants must submit all required materials specified in the Department Graduate Application Packet available in the Graduate Student section of the Biology website.

Degrees for the Department

Bachelor Degree(s)
Biology - Bachelor of Science (p. 330)
Biology - Bachelor of Arts (p. 328)
Microbiology - Bachelor of Science (p. 336)
Conservation Ecology - Bachelor of Science in Conservation Ecology (p. 333)
Genetics and Biotechnology - Bachelor of Science in Genetics (p. 334)

Master Degree(s)
Biology - Master of Science (p. 340)

Doctoral Degree(s)
Biology - Doctor of Philosophy (p. 341)

Minors for the Department

Biology - Undergraduate Minor (p. 339)
Microbiology - Undergraduate Minor (p. 340)
Conservation Ecology - Undergraduate Minor (p. 339)
Genetics and Biotechnology - Undergraduate Minor (p. 339)

Human Biology - Undergraduate Minor (p. 339)

Biology Courses

BIOL 1120G. Human Biology
3 Credits (3)
This course is an introduction to modern biological concepts with an emphasis on the relevance to humans and their relationships with the environment.

Learning Outcomes
1. Explain that biology is a scientific discipline based on observations and experimentations.
2. Explain the process of scientific inquiry and explain how scientific knowledge is discovered and validated.
3. Describe the chemical basis of living organisms and how biomolecules contribute to the structure and function of cells.
4. Develop a basic familiarity with cells and cell organelles.
5. Describe the structure and function of DNA as well as how DNA is used in the production of proteins.
6. Describe the basic principles of genetics and heredity leading to human diversity.
7. Identify the major features of the systems in the human body, and understand the anatomy and physiology of them.
8. Describe the roles of the organ systems in maintaining homeostasis.
9. Explain the principles of evolution by means of natural selection explaining the diversity of life.
10. Describe how science and technology have impacted life in particular to society and the environment (e.g. medicine, forensic science, agriculture, ecology, sustainability).

BIOL 1120L. Human Biology Laboratory
1 Credit (3P)
This course introduces exercises, experiences, and activities exploring biological concepts and theories relevant to humans and their relationship to the environment in a laboratory setting.

Prerequisite(s)/Corequisite(s): BIOL 1120G.

Learning Outcomes
1. Understand general principles of cell structure and function.
2. Understand general principles of genetics.
3. Understand basic human anatomy and physiology.
4. Communicate scientific information effectively.
5. Demonstrate an understanding of the scientific method.
6. Knowledge of appropriate laboratory skills
7. Apply quantitative reasoning and scientific thinking to real world problems.

BIOL 1120G. Human Biology Laboratory
1 Credit (3P)
This course introduces exercises, experiences, and activities exploring biological concepts and theories relevant to humans and their relationships with the environment.

Learning Outcomes
1. Explain that biology is a scientific discipline based on observations and experimentations.
2. Explain the process of scientific inquiry and explain how scientific knowledge is discovered and validated.
3. Describe the chemical basis of living organisms and how biomolecules contribute to the structure and function of cells.
4. Develop a basic familiarity with cells and cell organelles.
5. Describe the structure and function of DNA as well as how DNA is used in the production of proteins.
6. Describe the basic principles of genetics and heredity leading to human diversity.
7. Identify the major features of the systems in the human body, and understand the anatomy and physiology of them.
8. Describe the roles of the organ systems in maintaining homeostasis.
9. Explain the principles of evolution by means of natural selection explaining the diversity of life.
10. Describe how science and technology have impacted life in particular to society and the environment (e.g. medicine, forensic science, agriculture, ecology, sustainability).

BIOL 1190G. Contemporary Problems in Biology
4 Credits (3+3P)
Fundamental concepts of biology will be presented using examples from relevant problems in ecology, medicine and genetics. For nonscience majors only. Community Colleges only.

Learning Outcomes
1. Identify the unity and diversity of living things
2. Identify the structure and function of cells and biological molecules
3. Recognize and demonstrate patterns of inheritance
4. Describe mechanisms of evolution
5. Describe the human body systems including immune response
6. Discuss population dynamics and ecological systems
7. Describe the process of scientific inquiry, solve problems scientifically, and communicate on a scientific level
8. Apply quantitative analysis and scientific thinking to scientific and real world problems
BIOL 1996. Topics in Biology  
1-3 Credits (1-3)  
Introductory level coverage of biological topics. May be repeated up to 9 credits.  
Learning Outcomes  
1. Varies

BIOL 2110G. Principles of Biology: Cellular and Molecular Biology  
3 Credits (3)  
This course introduces students to major topics in general biology. This course focuses on the principles of structure and function of living things at the molecular, cellular and organismic levels of organization. Major topics included are introduction to the scientific process, chemistry of cells, organization of cells, cellular respiration, photosynthesis, cell division, DNA replication, transcription, and translation. Must be taken with BIOL 2110L to meet general education requirements. May be repeated up to 3 credits.  
Prerequisite(s)/Corequisite(s): BIOL 2110G; Prerequisite(s): MATH 1215 or higher and a C- or better in CHEM 1120G or CHEM 1215G or CHEM 1216.  
Learning Outcomes  
1. Apply the scientific method to develop and evaluate hypotheses and propose an experiment to test a scientific hypothesis related to cell biology and molecular biology.  
2. Describe the distinguishing characteristics of various biological molecules (water, carbohydrates, lipids, proteins, and nucleic acids). (HED Area 3, Competency 3)  
3. Compare and contrast the basic features of cells and how prokaryotic cells differ from eukaryotic cells. (HED Area 3, Competency 3)  
4. Understand how organisms maintain homeostasis in a dynamic environment.  
5. Describe how biological molecules are acquired and how they are subsequently used to meet the metabolic needs of organisms. (HED Area 3, Competency 3)  
6. Describe membrane structure and function.  
7. Describe and analyze the nature of bioenergetic transformations and metabolism within the cell.  
8. Describe the processes of cellular respiration and photosynthesis.  
9. Analyze with specific detail the processes of DNA replication, transcription, and translation.  
10. Analyze with specific detail the types, mechanisms, and regulation of cellular division.  
11. Assess important applications of cell and molecular biology to energy use, medicine, and other day-to-day processes. (HED Area 3, Competency 1,3,4,5)

BIOL 2110L. Principles of Biology: Cellular and Molecular Biology Laboratory  
1 Credit (3P)  
This course introduces students to major topics in general biology. This course focuses on the principles of structure and function of living things at the molecular, cellular and organismic levels of organization. Major topics included are introduction to the scientific process, chemistry of cells, organization of cells, cellular respiration, photosynthesis, cell division, genetics, DNA replication, transcription, and translation. May be repeated up to 1 credit.  
Prerequisite/Corequisite(s): BIOL 2110G; Prerequisite(s): MATH 1215 or higher, and a C- or better in CHEM 1120G or CHEM 1215G or CHEM 1216.  
Learning Outcomes  
1. Describe and apply the scientific method to generate testable hypotheses in evolution and ecology.  
2. Design and conduct laboratory experiments using relevant laboratory equipment and methods.  
3. Analyze and report data generated during laboratory activities and experiments.  
4. Communicate scientific results from experiments in Mendelian genetics, evolution, ecology, and biodiversity.

BIOL 2210. Human Anatomy and Physiology I for the Health Sciences  
4 Credits (3+3P)  
This course is the first of two that serve as an introduction to human anatomy and physiology for biology majors and allied health students. The course entails describing, explaining, and analyzing structure and function from the submicroscopic to the organismal level with emphasis on anatomic, directional, and sectional terminology, basic cellular structure and metabolism, tissue differentiation and characteristics, and organ system structure and function; Specifically the integumentary, skeletal, muscular, and nervous systems.  
Prerequisite(s)/Corequisite(s): CHEM 1120G or CHEM 1215G. Restricted to: Community Colleges only.  
Learning Outcomes  
1. Describe and apply anatomical terminology.  
2. Describe multi cellular organization.  
3. Distinguish and describe major tissue types.  
4. Describe the structure and function of the integumentary system.  
5. Describe the structure and function of the skeletal system.  
6. Describe the structure and function of the muscular system.  
7. Describe the structure and function of the nervous system.  
8. Describe the structure and function of the special senses.  
9. Define homeostasis and describe specific examples for the integumentary, skeletal, muscular, and nervous systems.
BIOL 2221. Human Physiology
3 Credits (3)
Physical and chemical operation of the organs and systems of the human body. Not open to students who have passed BIOL 354 or BIOL 381. 
Prerequisite(s): Grade of at least C- in BIOL 2110G; BIOL 2110L; CHEM 1215G or CHEM 1120G.
Learning Outcomes
1. Understand the central physiological principle of homeostasis
2. Be able to explain why concentration gradients are essential to maintain homeostasis
3. Understand the regulation of homeostasis by neuronal / endocrine chemical messengers
4. Understand that changes in bodily function occur throughout the entire life span of the human animal
5. Incorporate the importance of evolutionary biology to your understanding of human disease
6. Teach a physiological concept to your classmates
7. Design experiments to test physiological concepts
8. Put in plain words how the laws of thermodynamics can explain human disease

BIOL 2225. Human Anatomy and Physiology II
4 Credits (3+3P)
This course is the second of two that serve as an introduction to human anatomy and physiology for biology majors and allied health students. The course entails describing, explaining, and analyzing structure and function from the submicroscopic to the organismal level with emphasis on specific cellular, tissue, and organ structure and physiology, and organ system structure and function; specifically the endocrine, cardiovascular, respiratory, urinary, and reproductive systems. Additionally, an analysis of these concepts is included: fluid and electrolyte balance, pregnancy, growth and development from zygote to newborn, and heredity. Restricted to: Community Colleges only. 
Prerequisite(s): BIOL 2210, CHEM 1120G or CHEM 1215G.
Learning Outcomes
1. Identify and describe the major anatomical features of the endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems.
2. Analyze the physiological roles of the endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems in maintaining homeostasis in the human body.
3. Explain how fluid and electrolyte balance is maintained in the human body.
4. Compare and contrast the anatomy and physiology of male and female reproductive systems.
5. Describe pregnancy from conception to parturition including human growth and development from zygote to newborn.
6. Explain heredity and genetic control.

BIOL 2310. Microbiology
3 Credits (3P)
Introduction to the basic principles of microbiology, microbial pathogenesis, host defenses and infectious diseases. The course will emphasize concepts related to the structure and function of microorganisms, including their mechanisms of metabolism and growth. Host parasite interactions will also be emphasized, including mechanisms of microbial pathogenesis and mechanisms of host defenses against infectious diseases. Restricted to Community Colleges campuses only.
Prerequisite(s): CHEM 1120G or CHEM 1215G or CHEM 1225G.
Corequisite(s): BIOL 2310L.
Learning Outcomes
1. Describe and compare the structure and function of prokaryotic and eukaryotic cells.
2. Describe and compare the techniques used for staining of and microscopic observation of bacteria including morphology.
3. Describe the nutritional requirements for bacterial growth and the impact of environmental factors on bacterial growth (temperature, pH, oxygen, etc.).
4. Describe and compare the mechanisms of aerobic respiration, anaerobic respiration, and fermentative metabolism.
5. Describe the mechanism of bacterial growth by binary fission, and laboratory methods used for observing and measuring bacterial growth.
6. Describe the mechanisms of bacterial DNA replication, RNA transcription, and translation, and compare and contrast with eukaryotic cells.
7. Describe the structure and replication strategies of viruses.
8. Describe and contrast mechanisms of innate nonspecific immunity and adaptive specific immunity.
10. Differentiate between host microbe relationships, mechanisms of microbial pathogenesis, differentiate between communicable and noncommunicable diseases and describe mechanisms of direct and indirect transmission of communicable diseases.
**BIOL 2310L. Microbiology Lab**

1 Credit (3P)

This course will emphasize both the theory and hands-on application of techniques used in a microbiology laboratory for the growth and identification of bacterial species. Students will learn microscopy skills and staining techniques for the observation of bacteria. Students will also learn aseptic techniques used for isolation of bacteria, inoculation of cultures, and interpretation of selective and differential growth media for the identification of bacterial species.

**Prerequisite:** BIOL 2310 or BIOL 2320 or concurrent enrollment.

**Learning Outcomes**
1. Demonstrate skills of microscopy.
2. Demonstrate skills of bacterial staining.
3. Demonstrate aseptic technique for inoculation of bacterial growth media.
4. Interpret results from selective and differential media.
5. Demonstrate appropriate use of diagnostic reagents.
6. Interpret results of diagnostic assays.
7. Identify unknown bacterial species through the use of a dichotomous key, inoculation and interpretation of laboratory assays, and application of the scientific method.

**BIOL 2320. Public Health Microbiology**

3 Credits (3)

This course introduces microbiology on the health profession level. It incorporates cell structure, metabolism, growth, controls of growth, infectious epidemiology, etiology, pathogenicity, and relative virulence of pathogens. It will lead to students assessing a clinical infection scenario from the microbiological perspective that includes making diagnoses based on data from appropriate diagnostic tests, investigating appropriate treatment options, and making recommendations for prevention.

**Prerequisite:** BIOL 2110G and BIOL 2110L.

**Learning Outcomes**
1. To describe the general concepts of disease processes and factors associated with disease causation.
2. To identify the function of basic cellular structures, determining the process of cellular malfunctions.
3. To describe the response of the body to injury and immunologic challenge.
4. To discuss the etiology, pathogenesis, and treatment modalities of frequently occurring diseases.

**BIOL 2505. Pathophysiology**

3 Credits (3)

This course is designed to provide the conscientious student with a solid foundation for understanding the pathophysiological processes of the human organism. Successful completion of this course will promote the general student learning outcomes listed below. Corequisite/Prerequisites(s): AHS 154 or BIOL 2225. Restricted to: Community Colleges only.

**Prerequisite(s):** AHS 153 or BIOL 2210.

**Learning Outcomes**
1. To describe the general concepts of disease processes and factors associated with disease causation.
2. To identify the function of basic cellular structures, determining the process of cellular malfunctions.
3. To describe the response of the body to injury and immunologic challenge.
4. To discuss the etiology, pathogenesis, and treatment modalities of frequently occurring diseases.
Learning Outcomes

1. The cellular adaptations occurring in atrophy, hypertrophy, hyperplasia, dysplasia, and metaplasia; the types and causes of cellular injury; and the types of necrosis.

2. The different compartments for body fluids; the factors that affect water movement; the processes that drive and affect capillary exchange; the mechanisms causing edema; the electrolytes in body compartments; the various electrolyte imbalances; the body mechanisms that maintain acid-base balance; and the various acid-base imbalances and how they are compensated for.

3. The interrelationships of DNA, RNA, and proteins; the various types of mutations; the various types of mutagens, the various types of numerical and structural chromosomal aberrations; the various genetic terms; the single-gene disorders discussed in class; the multifactorial disorders discussed in class.

4. The relationships between genes, environment, and multifactorial diseases; the criteria used to define multifactorial disease; the characteristics of multifactorial traits; and the various features of the threshold model.

5. The terms related to tumor/cancer biology, classification, and nomenclature; the various features of cancer biology, including the characteristics of cancer and the genetic basis of cancer; features related to cancer invasion and metastasis; and the clinical manifestations and treatments of cancer.

6. Features related to innate and adaptive immunity; features related to the first, second, and third lines of defense; the mechanisms and manifestations of inflammation; components/mechanisms related to the complement, clotting, and kinin systems; mechanisms of wound healing; and features of dysfunctional wound healing.

7. Aspects/mechanisms of specific (adaptive) immunity; features related to the structure, function, and classification of immunoglobulins; features related to hapten, antigens, immunogens, and epitopes; the different types of antigens; features related to immunological memory; and features related to the different types of active and passive immunity.

8. Aspects related to allergy, autoimmunity, and alloimmunity; aspects/mechanisms/examples related to the four basic types of hypersensitivity reactions; mechanisms and examples related to autoimmunity; and aspects/mechanisms related to immunodeficiency.

9. The risk factors for infection; the six components of the chain of infection; general concepts, terms, and processes/mechanisms related to basic microbiology; and the mechanisms of microbial pathogenicity.

10. General concepts, terms, and processes/mechanisms related to normal hormonal action; mechanisms of hormonal alterations; processes/mechanisms related to the pathophysiology of the various disorders discussed in class; and the clinical manifestations and treatment of the hormonal alterations discussed in class.

Prerequisite(s): Grade of C- or higher in BIOL 2210 and BIOL 2225.

Learning Outcomes

1. The different types of sensory modalities; the different dysfunctions of the general and special senses; the different pain theories discussed in class; the various aspects of the neuroanatomy and neuromodulation of pain; the various clinical descriptions of pain; the various aspects of temperature regulation; components of the pathogenesis of fever; the various disorders of temperature regulation; the various aspects of sleep disorders; the various components of visual dysfunction; and the various aspects of auditory, gustatory, and olfactory dysfunction.

2. The various alterations in cognitive systems; the various alterations in arousal; the outcomes of alterations in arousal; the various alterations in awareness; the various seizure disorders; the various data processing deficits; various alterations in cerebral hemodynamics; and alterations in neuromotor function.

3. The various disorders of the central and peripheral nervous systems; and the various disorders of the neuromuscular junction.

4. The components of normal blood; the process/stages of hematopoiesis; the various normal RBC laboratory values; the components and functions of the lymphatic system; the various types of imbalances of erythropoiesis; the various types of anemias and their causes; the various types of polycythemia and their causes; the processes related to hemostasis; the various alterations of white blood cells and their causes; and the various alterations of lymphoid and hemostatic function.

5. The various diseases of the veins; the various diseases of the arteries; the various aspects of atherosclerosis; features related to the pathogenesis and consequences of coronary artery disease; the disorders of the heart wall and their consequences; the various aspects of valvular dysfunction; aspects of the pathogenesis and manifestations of rheumatic disease; the causes, pathogenesis, and manifestations of infective endocarditis; the causes, manifestations, and pathophysiology of heart failure; and the various types of shock.

6. The various signs and symptoms of pulmonary disease; the various conditions caused by pulmonary disease/injury; the various disorders of the chest wall and pleura; and the causes, manifestations, and pathophysiology of selected pulmonary disorders.

7. The features and consequences of upper and lower urinary tract obstruction; the various types of urinary tract infection; the causes, pathogenesis, and clinical manifestations of glomerulonephritis; the various features of nephrotic and nephritic syndrome; and the various features (etiopathology, and clinical manifestations) of both acute kidney injury and chronic kidney disease.

8. The various clinical manifestations of gastrointestinal dysfunction; the various aspects (etiopathology, and clinical manifestations) of disorders of motility; the causes, manifestations, and pathophysiology of gastroparesis; features related to the causes, manifestations, and pathophysiology of peptic ulcer disease; features related to the etiology, pathogenesis and pathophysiology of selected malabsorption syndromes, inflammatory bowel diseases, diverticular disease of the colon, appendicitis, and irritable bowel syndrome; the various types of vascular insufficiency; the various disorders of nutrition and their causes and clinical manifestations; and the various aspects of the general and special senses; the various pain theories discussed in class; the various aspects of the neuroanatomy and neuromodulation of pain; the various clinical descriptions of pain; the various aspects of temperature regulation; components of the pathogenesis of fever; the various disorders of temperature regulation; the various aspects of sleep disorders; the various components of visual dysfunction; and the various aspects of auditory, gustatory, and olfactory dysfunction.
BIOL 2610G. Principles of Biology: Biodiversity, Ecology, and Evolution
3 Credits (3)
This course is an introduction to the dynamic processes of living things. Major topics include the mechanisms of evolution, biological diversity, Mendelian genetics, and ecology.
Prerequisite/Corequisite: grade of C- or better in MATH 1215 or higher, or a Math Placement Exam score adequate to enroll in mathematics courses beyond MATH 1215.
Learning Outcomes
1. Understand the scientific method and apply it to biological topics of genetics, evolution, ecology, and biodiversity. Apply quantitative reasoning and scientific thinking to real world problems. Identify and describe the basic principles of evolution. Analyze the relationships between the genetics of populations and evolution. Analyze the processes of speciation. Describe how the hierarchical classification scheme is used to categorize organisms. Describe how DNA research has modernized bio systematics. Compare and contrast the general characteristics of each of the living domains and kingdoms. Relate the structure of organisms to the way they function. 1 Explain how the life histories of organisms are adapted for different environments. 1 Relate the complexity of behavior to the overall complexity of an organism. 1 Describe the ecological roles played by organisms in each kingdom. 1 Compare basic ecological principles at the population and community levels of organization. 1 Describe and compare energy relationships and the cycling of materials in ecosystems. 1 Identify and describe the basic principles of Mendelian genetics.

BIOL 2610L. Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory
1 Credit (3P)
This laboratory course is an introduction to the dynamic processes of living things. This course introduces students to the methods used in the study of Mendelian genetics, evolution, ecology, and biological diversity. Designed for students continuing in life sciences.
Prerequisite/Corequisite: BIOL 2610G; grade of C- or better in MATH 1215 or higher, or a Math Placement Exam score adequate to enroll in mathematics courses beyond MATH 1215.
Learning Outcomes
1. Describe and apply the scientific method to generate testable hypotheses in evolution and ecology. Design and conduct laboratory experiments using relevant laboratory equipment and methods. Analyze and report data generated during laboratory activities and experiments. Communicate scientific results from experiments in Mendelian genetics, evolution, ecology, and biodiversity.

BIOL 2996. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 6 credits. Community Colleges only.
Learning Outcomes
1. Varies

BIOL 301. Principles of Ecology
3 Credits (3)
A survey of ecology including general theory, the adaptations of organisms, population dynamics, species interactions, and the structure and function of natural communities and ecosystems. MATH 1511G and A ST 311 recommended. Same as ENVS 301. Crosslisted with: ENVS 301.
Prerequisite(s): BIOL 2610G, MATH 1220G.

BIOL 302. Molecular Biology Techniques Laboratory
3 Credits (6P)
This combined lecture and laboratory course emphasizes molecular biology laboratory practices through the hands-on application of commonly applied techniques, protocols, and equipment. The topics covered include both the fundamental development of empirical data as well as data analysis using stand-alone and web-based resources. Consent of instructor required.
Prerequisite(s): BIOL 2110G or equivalent, and MATH 1220G.

BIOL 305. Principles of Genetics
3 Credits (3)
Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: HORT 305 and AGRO 305.
Prerequisite(s): BIOL 2610G and BIOL 2110G, or BIOL 2110G and BCHE 140, either CHEM 1215G or CHEM 1216, and MATH 1220G.

BIOL 309. Guided Biological Research Lab
3 Credits (3)
This laboratory course provides a guided experience to hands-on research in biology. It is intended for early-career undergraduates who have finished the introductory sequence of Biology courses. Topics will vary with instructor.
Prerequisite(s): BIOL 2610G, BIOL 2110G, and MATH 1220G.

BIOL 311. General Microbiology
3 Credits (3)
Principles of physiology, molecular biology, ecology, and taxonomy of microorganisms.
Prerequisite(s): BIOL 2110G and MATH 1220G.

BIOL 311 L. General Microbiology Laboratory
2 Credits (4P)
Microbiology techniques and procedures, including isolation and identification of microorganisms and biotechnology procedures that employ microorganisms.
Prerequisite(s)/Corequisite(s): BIOL 2320 or BIOL 311. Prerequisite(s): BIOL 2110G and MATH 1220G.

BIOL 312. Plant Taxonomy
3 Credits (2+3P)
Classification and identification of representative plant families and local plants. Emphasis on ability to use technical sources. Saturday field trips may be recommended.
Prerequisite(s): BIOL 2610G and MATH 1220G.

BIOL 313. Structure and Function of Plants
3 Credits (2+3P)
Structure, function, and survey of plants. BIOL 2110G recommended.
Prerequisite(s): BIOL 2610G, MATH 1220G, and sophomore-level standing.

BIOL 314. Plant Physiology
3 Credits (3)
Photosynthesis, respiration, water relation of plants, minerals and organic nutrition, growth and development.
Prerequisite(s): BIOL 2110G and CHEM 1225G.

BIOL 322. Zoology
3 Credits (2+3P)
Structure, function, and survey of animals. BIOL 2110G recommended.
Prerequisite(s): BIOL 2610G, MATH 1220G, and at least sophomore-level standing.
BIOL 350. Special Topics
1-4 Credits
Specific subjects announced in Schedule of Classes and offered as scheduled courses. May be repeated for unlimited credit.

BIOL 351. Biology Internship
1-6 Credits
Substantial off-campus experience in biology selected by student in consultation with regular biology faculty member. Internship must be approved by faculty member. Student will supply mutually agreed upon documentation of internship activities after the internship is completed. May be repeated up to 6 credits. Restricted to: BIOL, Mbio, CEC, GEBT majors. Graded: S/U Grading (S/U, Audit).
Prerequisite(s): 45 college credits, 2.5 or better GPA, consent of instructor.

BIOL 353. Pre-Professional Human Anatomy
4 Credits (4)
Pre-professional clinic-oriented survey of human anatomy. Designed primarily for pre-nursing majors. Provides comprehensive anatomical training for students planning careers in health and allied health sciences, such as medicine, dentistry, nursing, physical therapy, physicians aid, human nutrition, and food science. Suitable as a biology elective. Concurrent enrollment in BIOL 353 L is recommended but not required. May be repeated up to 4 credits.
Prerequisite(s): BIOL 2110G and either CHEM 1120G, CHEM 1215G, or CHEM 1216.

BIOL 353 L. Pre-Professional Human Anatomy Laboratory
1 Credit (3P)
Laboratory experience in human anatomy using anatomical models and cad dissections. Designed as a learning aid to support and augment BIOL 353 pre-professional Human Anatomy. For students planning careers in health and allied health sciences such as medicine, dentistry, nursing, physical therapy, physicians aid, human nutrition, and food science. May be repeated up to 1 credits.
Prerequisite(s)/Corequisite(s): BIOL 353. Prerequisite(s): BIOL 2110G and either CHEM 1120G, CHEM 1215G, or CHEM 1216.

BIOL 354. Physiology of Humans
3 Credits (3)
Principles of integrative functions in humans. A systems approach emphasizing tissues, organs, and their regulation.
Prerequisite(s): BIOL 2110G and MATH 1220G.

BIOL 354 L. Laboratory of Human Physiology
1 Credit (3P)
Laboratory to accompany BIOL 354.
Prerequisite(s): MATH 1220G and either BIOL 2221, BIOL 381, BIOL 354, or concurrent enrollment in BIOL 354.

BIOL 373. Fungal Biology
3 Credits (3+2P)
Same as EPWS 372.
Prerequisite: EPWS 310 or BIOL 311 or consent of instructor.

BIOL 377. Cell Biology
3 Credits (3)
Fundamentals of eukaryotic cell structure, organization, and function. Emphasis on membranes, subcellular organelle systems, cytoskeleton, and cell cycle. Includes basic aspects of molecular biology. May be repeated up to 3 credits. BIOL 2610G recommended.
Prerequisite(s): (BIOL 2110G, BIOL 305 or GENE 315) and MATH 1220G.

BIOL 381. Animal Physiology
3 Credits (3)
Principles of integrative function in animals, emphasizing tissues, organs, organ systems, and regulation. Includes adaptations of animals to their environments. BIOL 2610G and BIOL 377 recommended.
Prerequisite(s): BIOL 2110G and junior-level standing, MATH 1220G.

BIOL 382. Plant Signalling and Development
3 Credits (3)
This is a course that introduces plant signalling pathways and their role in development to students. The lectures are structured to facilitate in-class discussions on the current state and future directions in this field. Topics will cover a wide range of biological questions and the methods used to study them. May be repeated up to 3 credits.
Prerequisite(s): BIOL 305 or GENE 315, and MATH 1220G.

BIOL 385. An Introduction to Cancer
3 Credits (3)
This course will cover 3 areas of cancer research and their interdisciplinary connections: clinical cancer research, epidemiology and public health, and basic cancer research. May be repeated up to 3 credits.
Prerequisite(s): BIOL 305 or GENE 315 or equivalent and MATH 1220G.

BIOL 388. Biology Research Programs
1-3 Credits
Directed studies and research experiences, by arrangement with instructor. May be repeated for a maximum of 6 credits.

BIOL 402. Biology Honors Thesis
1-3 Credits (1-3)
Provides guidance in how to write a scientific paper in the sciences. Students will produce an honors thesis based on previous independent research. Consent of instructor required.
Prerequisite(s): MATH 1220G and consent of instructor.

BIOL 412. Seminar in Microbiology
1 Credit (1)
Seminar to aid students in assessment and presentation of current topics in microbiology.
Prerequisite(s): BIOL 311, BIOL 311 L, and MATH 1220G.

BIOL 417. Topics in Environmental Microbiology
3 Credits (3)
This is an advanced undergraduate course based on current literature in Environmental Microbiology, and is a seminar-style, discussion-based class. Topics typically include marine microbiology, ancient DNA, and the human microbiome. Crosslisted with: BIOL 577.
Prerequisite(s): MATH 1220G, BIOL 477 or consent of instructor.

BIOL 424. Human Osteology
3 Credits (3)
A survey of the functional, developmental, and evolutionary biology of the human skeleton. Identifying bones and teeth from hands-on experience with skeletal and dental material. Provides a foundation for human evolutionary studies, bioarchaeology and forensic anthropology. Students are recommended to take ANTH 355 or an equivalent before enrolling in this course. BIOL 424L should be taken concurrently when it is offered. Crosslisted with: ANTH 474.

BIOL 427. Symbiosis
3 Credits (3)
In-depth treatment of the ecology, evolution, and mechanisms that are found in symbiotic systems. May be repeated up to 3 credits. Crosslisted with: BIOL 527.
Prerequisite(s): BIOL 2610G, BIOL 2110G, and MATH 1220G.
Biol 434. Human Evolution
3 Credits (3)
Overview of human biological evolution from the emergence of Miocene apes to the modern human diaspora. BIOL 424L should be taken concurrently when it is offered. Crosslisted with: ANTH 434.
Prerequisite(s): ANTH 355.

Biol 436. Disease Vector Biology
3 Credits (3)
Fundamentals of disease vector biology with emphasis on molecular biology. Explores an overview of vector borne diseases, insect endocrinology, insect immunity, olfaction, vector genome projects and transgenic insect techniques. Includes student presentations and literature discussions. Crosslisted with: BIOL 536
Prerequisite(s): BIOL 2110G, BIOL 305, and MATH 1220G.

Biol 442. Genomics Technology
3 Credits (3)
The course introduces current genomic techniques in genome sequencing, transcriptome analysis, detection of genetic variation, and metagenomics. May be repeated up to 3 credits. Crosslisted with: BIOL 562.
Prerequisite(s): BIOL 2110G, BIOL 305 or BIOL 478 or GENE 315, and MATH 1220G.

Biol 446. Bioinformatics and NCBI Database
3 Credits (3)
The course discusses how to use NCBI database and bioinformatic tools for research with genomics approaches. The topics include nucleotide and protein sequence analysis, similarity search with blast algorithms, gene/genome annotation, protein structure analysis, gene expression analysis, and metagenomic study.
Prerequisite(s): BIOL 2110G, BIOL 305 or BIOL 478 or GENE 315, and MATH 1220G.

Biol 450. Special Topics
1-3 Credits
Specific subjects announced in the Schedule of Classes and offered as scheduled courses. May be repeated for unlimited credit.

Biol 451. Physiology of Microorganisms
3 Credits (3)
Aspects of cellular physiology unique to prokaryotes. BCH 395 recommended.
Prerequisite(s): C- or better in BIOL 311, MATH 1220G.

Biol 455. Biometry
3 Credits (3)
Biometry is the analysis of biological data using mathematical and statistical models. The course will cover basic theories of probability and statistics and will introduce principles of sampling, estimation, experimental design, and hypothesis testing. Students will analyze biological data using computer programs and will perform tests for goodness-of-fit, independence, analysis of variance, correlation, and regression.
Prerequisite(s): BIOL 2310G or BIOL 2110G, and MATH 1220G.

Biol 459. Darwinism Versus Creationism
3 Credits (3)
This course examines the debate regarding Creationism versus Darwinism as explanations for the origin and diversification of life on Earth. Topics covered include the nature and philosophy of science, new-world creationism, old-world creationism, intelligent design, history of evolutionary thought, modern evolutionary theory, and the Creationism-Darwinism debate at the societal, political, and educational interfaces. The course structure will include formal lectures and in-class discussion of assigned readings.
Prerequisite(s): BIOL 2610G or BIOL 2110G, and MATH 1220G.

Biol 459 H. Darwinism versus Creationism Honors
3 Credits (3)
This course will examine the history and philosophy surrounding the debate between Darwinism and Creationism. The course will also examine the consequences of the debate at the interface of sociology, economics, politics, and education. The Honors version of the course (BIOL 459H) will require a term paper in addition to the requirements of BIOL 459. Crosslisted with: BIOL 459.
Prerequisite(s): BIOL 2610G or BIOL 2110G, and MATH 1220G.

Biol 462. Conservation Biology
3 Credits (3)
Examination of the value of biological diversity, the natural processes that control biological diversity, and the ways in which human activities have resulted in the loss of biological diversity, both regionally and globally.
Prerequisite(s): BIOL 301 and either MATH 1430G or MATH 1511G.

Biol 465. Invertebrate Zoology
4 Credits (3+3P)
Survey, ecology, behavior and physiology. BIOL 322 recommended.
Prerequisite(s): MATH 1220G, BIOL 2610G, and junior-level standing.

Biol 466. Invertebrate Zoology Field Trip
1 Credit (1)
A one-week field trip for the study of marine invertebrates. Registrants must provide own camping gear. Graded: S/U.
Prerequisite(s): MATH 1220G, BIOL 465 or equivalent (or concurrent enrollment) or consent of instructor.

Biol 467. Evolution
3 Credits (3)
Covers theory, historical background, population variation, natural selection, adaptation, speciation.
Prerequisite(s): BIOL 2610G, BIOL 305 or GENE 320, and MATH 1220G.

Biol 469. Biology of Emerging Infectious Diseases
3 Credits (3)
This class will investigate the evolutionary and ecological drivers of disease emergence. The effect of emerging diseases on human health will be addressed throughout the class, but the class will also consider the consequences of disease emergence for the health of wildlife and plant populations. Additionally, the class will consider the mechanisms used to control disease emergence and why they succeed or fail.
Prerequisite(s): BIOL 1220G, Introductory Genetics (BIOL 305 or equivalent) or consent of the instructor.
BIOL 470. Developmental Biology
3 Credits (3)
The purpose of this course is to introduces students to the principles that govern the development of a single fertilized egg cell into a complex multicellular organism. These principles, and often the molecular mechanisms by which they are accomplished, appear to be universal for all multicellular organisms including both plants and animals. We will explore issues such as: how cells become committed to particular cell fates and how this commitment is maintained; how organs acquire particular shapes, sizes and positions; the developmental causes of some human diseases; how the environment affects development; and, how changes in development provide the material basis for evolutionary change.
Prerequisite(s): BIOL 2110G, BIOL 305, and MATH 1220G.

BIOL 472. Primate Behavior and Ecology
3 Credits (3)
Survey of the social behavior and ecology of nonhuman primates. Crosslisted with: ANTH 472.

BIOL 473. Ecology of Microorganisms
3 Credits (2+3P)
The metabolic interactions of microorganisms in the environment, with emphasis on their roles in ecological processes.
Prerequisite(s): MATH 1220G, BIOL 311 or consent of instructor.

BIOL 474. Immunology
3 Credits (3)
Basic concepts of the immune response.
Prerequisite(s): MATH 1220G, BIOL 305, and CHEM 2115 or CHEM 313.

BIOL 475. Virology
3 Credits (3)
Mechanisms of viral infections of animals and man. BCHE 395 or BIOL 305 are recommended.
Prerequisite(s): BIOL 311 and MATH 1220G.

BIOL 476. Soil Microbiology
3 Credits (3)
Nature and physiology of soil microorganisms, how they affect plant growth and recycle nutrients. Land framing, bioremediation, and other environmental problems as influenced by soil microorganisms. SOIL 2110 and BIOL 311 recommended. Same as SOIL 476.

BIOL 476 L. Soil Microbiology Laboratory
1 Credit (3P)
Enumeration of soil microorganisms, their activities, and transformations they mediate. Same as SOIL 476L.
Prerequisite(s)/Corequisite(s): BIOL 476.

BIOL 477. Applied and Environmental Microbiology
4 Credits (4)
A lecture-laboratory course on the microorganisms and the reactions they mediate which either impact the environment or have industrial applications. Reading of current literature will be emphasized. Topics include bioremediation, water quality, and aspects of industrial and food microbiology.
Prerequisite(s): MATH 1220G, BIOL 311, and 311 L, or consent of instructor.

BIOL 478. Molecular Biology of Microorganisms
3 Credits (3)
The biochemical basis for gene mutation, recombination, and expression with emphasis on prokaryotes. Includes fundamentals of recombinant DNA technology. BIOL 305 and BCHE 395 recommended.
Prerequisite(s): BIOL 311 and MATH 1220G.

BIOL 479. Medical Microbiology
3 Credits (3)
An in-depth overview of microbial pathogens associated with human infectious disease. Etiological agents, pathogenesis, and processes leading to the disease state and the therapies of infectious disease.
Prerequisite(s): MATH 1220G and BIOL 311 required, BIOL 474 recommended.

BIOL 479 L. Medical Microbiology Laboratory
1 Credit (1)
Overview of common procedures used by medical microbiologists to identify agents of disease or microbial pathogen traits. May be repeated up to 1 credits.
Prerequisite(s)/Corequisite(s): BIOL 479. Prerequisite(s): MATH 1220G, BIOL 311, BIOL 311 L.

BIOL 480. Animal Behavior
3 Credits (3)
A survey of the field of animal behavior. BIOL 322 recommended.
Prerequisite(s): MATH 1220G, BIOL 2610G, and junior-level standing.

BIOL 484. Animal Communication
3 Credits (3)
An examination of how animals produce and perceive signals, what factors influence the form of signals in different sensory modalities, and how conflicts between senders and receivers affect signaling strategies. Weekly discussion from the primary literature and group research products.
Prerequisite(s): BIOL 2610G or consent of instructor, and MATH 1220G.

BIOL 488. Principles of Conservation Genetics
3 Credits (3)
Fundamentals of the genetics of small populations. Genetic technologies used in studying small populations. Application of genetics and evolution to the conservation of biological populations.
Prerequisite(s): MATH 1220G and BIOL 305.

BIOL 489. Genetic Aspects of Population Biology
3 Credits (3)
Basic theory of population genetics and how that theory has guided, and been influenced by, studies of natural populations.
Prerequisite(s): MATH 1220G and BIOL 305 or equivalent.

BIOL 490. Neurobiology
3 Credits (3)
Fundamentals of neurobiology with an emphasis on properties of neurons and glia, principles of synaptic transmission, development of nervous system and organization of motor and sensory systems.
Prerequisite(s): BIOL 2110G, MATH 1430G or equivalent.

BIOL 498. Biology Research Programs
1-3 Credits
Directed studies and research experiences, by arrangement with instructor. May be repeated for a maximum of 6 credits.

BIOL 509. Guided Biological Research Lab
3 Credits (3P)
This laboratory course provides a guided experience to hands-on research in biology. It is intended for early-career graduate students wishing an introduction to research practices. Topics will vary with instructor. Crosslisted with: BIOL 309.

BIOL 510. Current Topics in Biology
3 Credits (3)
Introduction to diverse topics in modern biology, including dynamic areas of current research.
BIOL 514. Plant Physiology
2 Credits (2)
Same as EPWS 514.
Prerequisites: BIOL 2110G and CHEM 1225G.

BIOL 520. Molecular Cell Biology
3 Credits (3)
An in-depth look at cellular processes and structures at the molecular level. Emphasis is placed on formal student presentations and discussions of current literature.
Prerequisite: BIOL 377 or equivalent.

BIOL 527. Symbiosis
3 Credits (3)
In-depth treatment of the ecology, evolution, and mechanisms that are found in symbiotic systems. May be repeated up to 3 credits. Crosslisted with: BIOL 427.
Prerequisite(s): Graduate status.

BIOL 536. Advanced Disease Vector Biology
3 Credits (3)
Prerequisite(s): BIOL 2110G and BIOL 305.

BIOL 540. Science and Ethics
1-3 Credits (1-3)
Ethical concerns facing researchers in the basic and applied biological sciences. Coverage of responsible conduct in research including scientific integrity and research misconduct, mentor/trainee responsibilities, data management, authorship, publication practices, human subjects, animal welfare, intellectual property, conflicts of interest and effort and collaborative science. Emphasis on ethical reasoning skills. Discussion of ethical and societal implications of issues selected from a broad range of contemporary research areas (genetics, reproductive biology, environmental sciences, nanoscience, drug discovery, bioengineering, neuroscience). Substituted. May be repeated up to 4 credits. Crosslisted with: PHIL 540.

BIOL 541. Professional Development Seminar
1-3 Credits
Practical aspects of career enhancement including job seeking, professional presentations, grant proposals, etc.
Prerequisite: consent of instructor.

BIOL 550. Special Topics
1-3 Credits
Readings, discussions, and/or field and laboratory investigation of selected problems. Possible topics: human genetics, systematic entomology, or parasitism in animals. May be repeated for unlimited credit.
Prerequisite: consent of instructor, and designation of a specific topic before registration.

BIOL 562. Advanced Genomics Technology
3 Credits (3)
This course covers current genomics techniques in genome sequencing, transcriptome analysis, detection of genetic variation, and metagenomics. May be repeated up to 3 credits. Consent of Instructor required. Crosslisted with: BIOL 442.

BIOL 565. Biology In The K-6 Curriculum
3 Credits (3)

Learning Outcomes
1. Explain that biology is a scientific discipline based on observations and experimentations.
2. Explain the process of scientific inquiry and explain how scientific knowledge is discovered and validated.
3. Describe the chemical basis of living organisms and how biomolecules contribute to the structure and function of cells.
4. Develop a basic familiarity with cells and cell organelles.
5. Describe the structure and function of DNA as well as how DNA is used in the production of proteins.
6. Describe the basic principles of genetics and heredity leading to human diversity.
7. Identify the major features of the systems in the human body, and understand the anatomy and physiology of them.
8. Describe the roles of the organ systems in maintaining homeostasis.
9. Explain the principles of evolution by means of natural selection explaining the diversity of life.
10. Describe how science and technology have impacted life in particular to society and the environment (e.g. medicine, forensic science, agriculture, ecology, sustainability).
11. Describe the benefits of a case study approach to teaching.
12. Align biology content with specific K-6 (e.g. NGSS) science standards 1 Design an instructional case study (complete with teaching notes and assessment) to address specific K-6 science standards.

BIOL 566. Advanced Bioinformatics and NCBI Database
3 Credits (3)
The course discusses how to use NCBI database and bioinformatic tools for research with genomics approaches. The topics include nucleotide and protein sequence analysis, similarity search with blast algorithms, gene/genome annotation, protein structure analysis, gene expression analysis, and metagenomic study. Consent of Instructor required.

BIOL 568. Communities and Ecosystems
3 Credits (3)
Community ecology is an interdisciplinary field that integrates numerous theories, concepts, and methods to study the patterns and dynamics of biotic assemblages. Because biotic groups affect the biogeochemical and biogeochemical processes that govern Earth system functioning, community ecology also plays an increasingly large role in the study of ecosystem ecology, a discipline which seeks to understand the processes governing nutrient and energy flow across the Earth system. This course will explore the theories and methods for study of biodiversity, biogeography, and community assembly, as well as the pathways through which communities exert influence on ecosystem functioning. Topics will also include evolutionary influences on communities, the integration of community ecology into conservation and land management, and community ecology in an era of rapid environmental change.
BIOL 572. Advanced Primate Behavior and Ecology  
3 Credits (3)  

BIOL 577. Advanced Topics in Environmental Microbiology  
3 Credits (3)  
This course is based on current literature in Environmental Microbiology, and is a seminar-style, discussion-based class. Topics typically include marine microbiology, ancient DNA and the human microbiome.  
Prerequisite(s): Consent of instructor.

BIOL 581. Physiology of Animals  
3 Credits (3)  
Comprehensive treatment of integrative physiology of animals, emphasizing tissues, organ systems, and regulatory control, including neuroendocrine function, circulation, respiration, and excretion. Term paper required. BIOL 2610G, BIOL 377 recommended.  
Prerequisite: BIOL 2110G.

BIOL 582. Advanced Plant Signalling and Development  
3 Credits (3)  
This is a course that introduces plant signalling pathways and their role in development to students. The lectures are structured to facilitate in-class discussions on the current state and future directions in this field. Topics will cover a wide range of biological questions and the methods used to study them. May be repeated up to 3 credits.  
Prerequisite(s): BIOL 305 or GENE 315, and MATH 1220G.

BIOL 587. Behavioral and Evolutionary Ecology  
3 Credits (3)  
This course will investigate the causes and consequences of phenotypic variation and the adaptive value of phenotypic traits.

BIOL 590. Neuroscience  
1-3 Credits  
Detailed examination of the principles underlying nervous system organization and function. Emphasis on recent advances in multidisciplinary, integrated approaches to study the nervous system. May be repeated up to 9 credits.

BIOL 598. Special Research Programs  
1-9 Credits  
Individual investigations either analytical or experimental.

BIOL 599. Master's Thesis  
15 Credits  
Thesis.

BIOL 600. Doctoral Research  
1-15 Credits  
Research.

BIOL 610. Seminar  
1-3 Credits (1-3)  
Oral presentation and discussion of journal articles and ongoing research projects. May be repeated up to 6 credits. Graded: S/U Grading (S/U, Audit).

BIOL 612. Microbiology Seminar  
1 Credit (1)  
Seminar to aid graduate students in assessment and presentation of classical and current topics in microbiology.

BIOL 697. University Teaching Experience  
1-3 Credits  
Certain graduate students will be permitted to teach up to one-third of one of the biology courses. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures.

BIOL 698. Selected Topics  
1-3 Credits  
Selected topics for doctoral students.

BIOL 700. Doctoral Dissertation  
15 Credits  
Dissertation.

Genetics Courses

GENE 1110. Experimental Systems in Genetics  
1 Credit (1)  
Survey of molecular, biochemical, organismal, and computer science based approaches to investigate how genes determine important traits. Historical development and topics of current interest will be discussed.  
Learning Outcomes  
1. To give the students a historical perspective on the field of genetics.  
2. To familiarize the students to introductory concepts and vocabulary to the field of genetics.  
3. Introduce experimental systems within the field of genetics and to give perspective to current genetic research.  
4. As this course is designed for beginning students as an overview of faculty and research labs on campus. The students majoring in genetics are encouraged to meet with faculty and to explore opportunities available to them on campus.

GENE 305. Principles of Genetics  
3 Credits (3)  
Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: AGRO 305, ANSC 305, BIOL 305 and HORT 305.  
Prerequisite(s): BIOL 2610G, BIOL 2110G and either CHEM 1215G or CHEM 1216.

GENE 305 L. Genetic Techniques  
1 Credit (3P)  
Experimental procedures used in genetic research including: sexual transmission genetics, eukaryotic DNA isolation, DNA marker development and genotyping, polymerase chain reaction, and cytogentic.  
Prerequisite(s)/Corequisite(s): GENE 315, or AGRO/ANSC/BIOL/HORT 305.

GENE 315. Molecular Genetics  
3 Credits (3)  
Covers fundamental principles of DNA structure and replication, transcription, translation, gene regulation, recombinant DNA technology, and a survey of genomics and bioinformatics. Recommend CHEM 313.  
Prerequisite(s): CHEM 1225G and BIOL 2110G.
GENE 320. Hereditary and Population Genetics
3 Credits (3)
Covers fundamental principles of reproduction, variation, and heredity in plants and animals including: Mendelian inheritance, mitosis, meiosis, genetic linkage, random mating, genetic drift, natural selection, inbreeding, migration, mutation, interrelationships between individuals, populations and communities and the environment.
Prerequisite(s): CHEM 1215G & BIOL 2110G.

GENE 391. Genetics Internship
1-6 Credits (1-6)
Professional work experience in genetics under the joint supervision of an employer and a faculty member. Documentation of proposed internship activities must be submitted prior to the start of the internship. A written report is required after the internship is completed. No more than 6 credits toward a degree. May be repeated up to 6 credits. Graded: S/U Grading (S/U, Audit).

GENE 440. Genetics Seminar
1 Credit (1)
Organization, preparation, and presentation of genetic studies in model microorganism, plant, or animal systems that have been used to solve problems in molecular, cellular, and developmental biology. Consent of instructor required.
Prerequisite(s): Seniors only; GENE 315 & GENE 320.

GENE 449. Special Problems
1-3 Credits (1-3)
Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 3 credits toward a degree. Consent of instructor required.

GENE 450. Special Topics
1-3 Credits (1-3)
Specific subjects to be announced in the schedule of classes. Maximum of 3 credits per semester and a total of 3 credits toward a degree. Consent of instructor required.

GENE 452. Applied Bioinformatics
3 Credits (3)
Survey and application of publicly available bioinformatic tools that treat genomic DNA, cDNA, and protein sequences, RNA abundance, as well as tools that allow inference based on phylogenetic relationships.
Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315 and GENE 320, and BCHE 341, or BCH 395.

GENE 486. Genes and Genomes
3 Credits (3)
Extensive coverage of nuclear and organelle genome structure in plants and animals, genome restructuring including duplication, aneuploidy, chromosome translocations and inversions, comparative genomics, and molecular systematics.
Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315, and GENE 320.

GENE 488. Gene Regulation
3 Credits (3)
Extensive coverage of signal transduction processes and approaches used to monitor large scale changes in gene regulation and protein synthesis that occur during development and in response to environmental changes.
Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315.

Name: Biology Department
Office Location: Foster Hall room 275
The number of credits required to satisfy this requirement will vary depending on the option a student chooses.

Electives, to bring the total credits to 120 5

Selective sufficient electives to bring the total to 120, including at least 48 upper-division credits.

Total Credits 120

1 See the General Education (p. 54) section of the catalog for a full list of courses.
2 Either MATH 1430G Applications of Calculus I or MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need prerequisite courses before entering one of these.
3 See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.
4 Choice of Biology electives should be done in consultation with an advisor.
5 Elective credit may vary depending on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The elective credit in the requirement list is the amount needed to bring the total to 120 credits and may vary based on the degree. Students may need to complete more or less courses on a case-by-case basis and each student should discuss this with their advisor.

Second Language Requirement

For the Bachelor of Arts in Biology there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

<td>Spanish for Heritage Learners II</td>
<td></td>
</tr>
<tr>
<td>or SPAN 2210</td>
<td>Spanish for Heritage Learners III</td>
<td></td>
</tr>
</tbody>
</table>

Option 4:

Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

Option 5:

Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

Option 6:

By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

Option 7:

By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

Option 8:

In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Biology - Bachelor of Science

The major in biology provides a solid academic base for those planning to enter any of the various fields of the biological sciences. The program allows considerable latitude. Degree plans for specific areas of interest can be obtained from the Biology Success Center in Foster Hall room 204.

#### Requirements

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

#### Credits

Total Credits 120-123

---

1. These courses have prerequisites and it is the students responsibility for checking and fulfilling all course prerequisites listed for these courses.

2. See the General Education (p. 54) section of the catalog for a full list of courses.

3. Elective credit may vary depending on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The elective credit in the requirement list is the amount needed to bring the total to 120 credits and may vary based on the degree. Students may need to complete more or less courses on a case-by-case basis and each student should discuss this with their advisor.

4. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.
At least one upper-division course must include a laboratory and/or field experience. The laboratory/field requirement can be satisfied by any BIOL course above the 300 level that includes a laboratory or is a field course—including BIOL 350 Special Topics or BIOL 450 Special Topics.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The elective credits in the requirement list is the amount needed to bring the total to 120 credits and may vary depending on the degree. Students may need to complete more or less courses on a case-by-case basis and each student should discuss this with their advisor.

Second Language Requirement

For the Bachelor of Science in Biology there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

Option 1:

Prefix | Title | Credits
--- | --- | ---
CHIN 1110 & CHIN 1220 | Mandarin Chinese I and Mandarin Chinese II | 4-8
FREN 1110 & FREN 1220 | French I and French II | 4-8
GRMN 1110 & GRMN 1220 | German I and German II | 4-8
JAPN 1110 & JAPN 1220 | Japanese I and Japanese II | 4-8
SPAN 1110 & SPAN 1220 | Spanish I and Spanish II | 4-8
PORT 1110 & PORT 1220 | Portuguese I and Portuguese II | 3-6

For Heritage Speakers:

SPAN 1210 & SPAN 2210 | Elementary Spanish for Heritage Learners I and Spanish for Heritage Learners II | 3-6
or SPAN 2210 | Spanish for Heritage Learners III | 3-6

Option 2:

Prefix | Title | Credits
--- | --- | ---
SIGN 1110 | American Sign Language I | 3
SIGN 1220 | American Sign Language II | 3

Option 3:

Prefix | Title | Credits
--- | --- | ---
CHIN 1120 | Mandarin Chinese II | 4
or FREN 1120 | French II | 4
or GRMN 1120 | German II | 4
or JAPN 1120 | Japanese II | 4
or SPAN 1120 | Spanish II | 4
or SPAN 2210 | Spanish for Heritage Learners II | 3
or SPAN 2210 | Spanish for Heritage Learners III | 3

Challenge the 1120 level for the following courses:

Port 1110 | Portuguese II | 3
or SPAN 1220 | Spanish for Heritage Learners II | 3
or SPAN 2210 | Spanish for Heritage Learners III | 3

Challenge the 1120/1220/2210 level for the following courses:

New Mexico State University - Las Cruces 331
**Option 4:**
Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

**Option 5:**
Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

**Option 6:**
By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

**Option 7:**
By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

**Option 8:**
In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

**Total Credits** | | **120-122**

¹ These courses have prerequisites and it is the students responsibility for checking and fulfilling all course prerequisites listed for these courses.
See the General Education (p. 54) section of the catalog for a full list of courses.

See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

Conservation Ecology - Bachelor in Conservation Ecology

Co-directors of the Program:
Professor, Charles Shuster, Department Head, Biology
Professor, Matthew Gompper, Department Head, Fish, Wildlife and Conservation Ecology

Professors Bailey, Boecklen, Boeing, Caldwell, Cowley, Desmond, Gompper, Hanley, Houde, Milligan, Nishiguchi, Roemer, Smith, Wright; Associate Professors Cain, James, Mabry, Assistant Professors Ferrenberg, Orr

New Mexico State University offers an interdisciplinary, undergraduate program in Conservation Ecology. The goal of this program is to train biologists for the current and future challenges that we face in the conservation and wise use of our Earth's natural resources. An overriding principle of the program is to provide a solid foundation in basic science coupled with a practical approach towards sustainability and stewardship. The curriculum encompasses several disciplines and includes a wide variety of courses from the Biology, Fish, Wildlife and Conservation Ecology; Geography; and Range Science departments.

The educational experience will provide students with an overview of global biodiversity and an understanding of the ecological and evolutionary processes that have created and sustained it. Courses in population and community ecology coupled with population viability analysis and risk assessment will give students the necessary background to understand the theory and development of these fields as well as the tools to tackle real-world problems. Courses in basic genetics, evolution, and conservation genetics will expose students to the importance of conserving genetic variation in order to maintain adaptive potential within populations, thereby sustaining the evolutionary process. Students will also receive background on wildlife law and environmental policy, information vital for assisting governing bodies in making decisions regarding the protection and wise use of our natural resources. Skills obtained in the application of geographic information systems, molecular genetics, and professional communication can also be acquired through various electives. In sum, we seek to provide undergraduate students with an education that will allow them the opportunity to contribute to the conservation of all life on Earth.

The requirements are listed below. In addition, each required course must be passed with a grade of C- or better.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

New Mexico State University - Las Cruces 333
**Second Language Requirement**

For the Bachelor of Science in Conservation Ecology there is no second language requirement for the degree.

**Genetics and Biotechnology - Bachelor of Science in Genetics**

Codirectors of the Program:

**Professor**, TBA, Department Head, Biology  
**Professor**, Rolston St. Hilaire, Department Head, Plant and Environmental Sciences  

Professors Bailey, Cramer, Hanley, Houde, Milligan, Nishiguchi, Ray, St. Hilaire, Serrano, C. Shuster, M. Shuster, Smith, Unguez, Zhang; **Associate Professors** Curtiss, James, Xu **Assistant Professors** Indriolo

Have you ever wondered why your hair or eye color, facial features, or the build of your body resembles that of your parents, grandparents, or other close relatives? What factors are responsible for generating all the variety of colors and shapes of flowers, trees, and different types of animals? If these questions have crossed your mind, then you have been thinking about Genetics; the science of heredity. Genetics is studied at the DNA/gene/genome level (molecular genetics, biotechnology, genomics and bioinformatics), the level of organisms (classical or Mendelian genetics), and within/among populations of individuals (population and quantitative genetics).

One of the most significant scientific accomplishments in history has been the use of genomic technologies to recently identify most human genes, as well as, most genes for a number of other animals, plants, fungi, and bacteria. Geneticists now have tremendous opportunities to use molecular, biochemical, mathematical, and computer science-based (bioinformatics) approaches to investigate how these genes determine observable traits. This information can be used to significantly advance human health and well being, and to meet the food and fiber needs of the world.

A degree in Genetics can provide excellent preparation for careers in academic research and technical support, teaching, agriculture, the biotechnology industry, medicine and health sciences, forensic science, technical writing, and sales or marketing. It is also an excellent background for students wishing to enter a graduate program, medical school, and veterinary school.

Undergraduates in the Genetics program must earn a grade of C- or better to receive credit for Departmental and Non-Departmental required courses. Within the Departmental Required courses, Tier I courses must be taken by all majors, for a total of 31 credit hours*. To accommodate differing interests among students, a series of Tier II courses comprising 9-11 credits are provided. Ethical considerations of genetic based technologies will be infused throughout the curriculum, with a focused course on Science and Ethics in the Tier III portion of the core curriculum.

*Note: This includes BIOL 2610G which also counts as a General Education elective.

**Requirements**

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, other Non-Departmental requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or
above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

PHYS 2240G | General Physics for Life Science II | 4 | 
or PHYS 1240G | Algebra-Based Physics II | 4 | 
**Electives, to bring the total credits to 120** | 18-20 | 
Select electives to bring total to 120 credits including 48 upper division credits. |  | 
**Recommended Electives** |  | 
BIOL 351 | Biology Internship | 3 | 
GENE 391 | Genetics Internship | 3 | 
GENE 449 | Special Problems | 3 | 
HNRS courses | 5 | 
**Total Credits** | 120 | 
See the General Education Section (p. 54) of the catalog for a full list of courses. |  | 
**Second Language Requirement** |  | 
For the Bachelor of Science in Genetics with a major in Genetics and Biotechnology there is no second language requirement for the degree. |  | 
**A Suggested Plan of Study for Students** |  | 
This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change. |  | 
**First Year** |  | 
**Fall** |  | 
BIOL 2610G | Principles of Biology: Biodiversity, Ecology, and Evolution | 3 | 
GENE 1110 | Experimental Systems in Genetics | 1 | 
CHEM 1215G | General Chemistry I Lecture and Laboratory for STEM Majors | 4 | 
ENGL 1110G | Composition I | 4 | 
**Area IV: Social/Behavioral Science Course** | 3 | 
**Credits** | 15 |
Microbiology - Bachelor of Science

The major in microbiology provides a solid academic base for those planning to enter any of the various fields of microbiology.

Requirements

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix          Title                                      Credits

General Education

Area I: Communications
- English Composition - Level 1                          1
- English Composition - Level 2                          1
- Oral Communication                                    1

Area II: Mathematics
- MATH 1511G    Calculus and Analytic Geometry I        4

Area III/IV: Laboratory Sciences and Social/Behavioral Sciences
Choose one sequence from the following (4 credits)
- PHYS 1230G & PHYS 1230L    Algebra-Based Physics I and Algebra-Based Physics I Lab
- PHYS 2230G & PHYS 2230L    General Physics for Life Science I and Laboratory to General Physics for Life Science I

Choose one sequence from the following (4 credits)
- PHYS 1240G & PHYS 1240L    Algebra-Based Physics II and Algebra-Based Physics II Lab
- PHYS 2240G & PHYS 2240L    General Physics for Life Science II and Laboratory to General Physics for Life Science II

Area IV: Social/Behavioral Sciences course (3 credits)  3

Area V: Humanities                                    3

Area VI: Creative and Fine Arts                        3

General Education Elective

**Second Language Requirement (see below)**

The number of credits required to satisfy this requirement will vary depending on the option a student chooses.

**Electives, to bring the total credits to 120**

Select sufficient electives to bring total credits to 120 including 48 upper-division credits.

**Total Credits**

| Credits |
|---------|---------|
| 120 | 120 |

---

1. See the **General Education** (p. 54) section of the catalog for a full list of courses.
2. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take prerequisites courses before entering MATH 1511G.
3. See the **Viewing a Wider World** (p. 58) section of the catalog for a full list of courses.
4. Students may take both BIOL 451 Physiology of Microorganisms and BIOL 475 Virology; the second course will count as a microbiology elective.
5. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The elective credits in the requirement list is the amount needed to bring the total to 120 credits and may vary depending on the degree. Students may have to take more or less courses on a case-by-case basis and each student should discuss this with their advisor.

**Second Language Requirement**

For the Bachelor of Science in Microbiology there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

**Option 1:**

<table>
<thead>
<tr>
<th>Prefix</th>

<td>Spanish for Heritage Learners II</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 2210</td>
<td>Spanish for Heritage Learners III</td>
<td>3</td>
</tr>
</tbody>
</table>

**Option 4:**

Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.
Option 5:
Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

Option 6:
By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

Option 7:
By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

Option 8:
In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

1 These courses have prerequisites and/or co-requisites and it is the students responsibility for checking and fulfilling all requirements for these courses.
2 See the General Education (p. 54) section of the catalog for a full list of courses.
Biology - Undergraduate Minor

The courses of the Biology minor represent core biological content, critical for a general view of biology. A student cannot earn a bachelor’s degree in Biology and also earn a minor in Biology.

Requirements

A minor in Biology must include 20 credits in Biology, of which at least 9 credits must be numbered 300 and above.

No more than 3 credits of special topics or individual study courses may be applied to the minor. A grade of C- or better must be earned in all courses.

Select two from the following: 6

BIOL 305 | Principles of Genetics |
GENE 315 | Molecular Genetics |
GENE 320 | Hereditary and Population Genetics |

Total Credits 18

Conservation Ecology - Undergraduate Minor

A minor in Conservation Ecology is available for students who choose to major in other areas, but wish to include Conservation Ecology in their academic training. A minor in Conservation Ecology must include a minimum of 20 credits in the discipline with 9 of these coming from upper-division courses.

Requirements

<table>

Select 6 credits from the following: 6

BIOL 312 | Plant Taxonomy |
or RGSC 316 | Rangeland Plants |

Total Credits 20

Human Biology - Undergraduate Minor

The Human Biology minor is intended to provide academic recognition for students who wish to focus a significant amount of attention on courses that deal with human beings from a wide variety of biological standpoints. Thus, course work may encompass topics representing a range of viewpoints such as biological function, human ecology, human origins, and psychology. Successful completion of this minor will provide students with a valuable interdisciplinary perspective on the human condition. This program consists of a minimum of 18 hours, that includes a minimum of 12 from within the Biology Department and a minimum of 3 outside the department. Successful completion of the minor will be certified by the Biology Department. A grade of C- or better is required of all minor courses.
Requirements

Prefix | Title | Credits
--- | --- | ---
**Required Departmental Courses**
BIOL 2110G & BIOL 2110L | Principles of Biology: Cellular and Molecular Biology and Principles of Biology: Cellular and Molecular Biology Laboratory | 4

Select 3-4 credits from the following: 1  
BIOL 2221 | Human Physiology |  
BIOL 353 | Pre-Professional Human Anatomy |  
BIOL 354 | Physiology of Humans |  

**Additional Courses**
Select sufficient credits to total 18 credits from within and outside Biology department:

Within Department
Select a minimum of 5 credits from the following:
BIOL 1120G | Human Biology |  
BIOL 305 | Principles of Genetics |  
BIOL 353 L | Pre-Professional Human Anatomy Laboratory |  
BIOL 354 L | Laboratory of Human Physiology |  
BIOL 385 | An Introduction to Cancer |  
BIOL 424 | Human Osteology |  
BIOL 434 |  |  
BIOL 469 | Biology of Emerging Infectious Diseases |  
BIOL 470 | Developmental Biology |  
BIOL 474 | Immunology |  
BIOL 490 | Neurobiology |  

Outside Department
Select a minimum of 3 credits; maximum 6 credits from the following:
ANTH 1135G & ANTH 1135L | Introduction to Biological Anthropology and Introduction to Biological Anthropology Lab |  
ANTH 355 | Biological Anthropology |  
ANTH 357V | Medical Anthropology |  
ANTH 435 | Human Health and Biological Variation |  
ANTH 436 | Evolutionary Medicine |  
ANTH 458 | Fertility, Reproduction and Birth |  
HNRS 2170G | The Human Mind |  
HNRS 306V | Science, Ethics and Society |  
PHLS 301V | Human Sexuality |  
PSYC 375 | Psychology and the Brain |  

Total Credits | 18-19

1 Any of BIOL 2221 Human Physiology, BIOL 353 Pre-Professional Human Anatomy, or BIOL 354 Physiology of Humans not taken as a departmental requirement can be taken as one of the departmental elective courses.

Microbiology - Undergraduate Minor

A student cannot earn a bachelor's degree in Microbiology and also earn a minor in Microbiology.

Requirements

Prefix | Title | Credits
--- | --- | ---
**Required Courses**
BIOL 311 | General Microbiology | 3

BIOL 311 L | General Microbiology Laboratory | 2
BCHE 341 | Survey of Biochemistry | 3-4

Biology - Master of Science

The Master of Science degree can be obtained through either a thesis option or a non-thesis option. Both options require 30 credits of course work. The non-thesis option can be completed as an accelerated (one-year) program concentrating in biotechnology or through an individual degree plan in consultation with the student's Master of Science committee.

There are two formal course requirements for all Biology Graduate students, with the exception of students in the accelerated non-thesis MS Biotechnology option. These core courses are

Prefix | Title | Credits
--- | --- | ---
Course Requirements
BIOL 510 | Current Topics in Biology | 3
BIOL 540 | Science and Ethics | 1-3

For research toward the Master of Science degree, students can choose among the Department's three areas of emphasis:

1. **Behavioral, Ecological and Evolutionary Biology**
The Behavioral, Ecological and Evolutionary Biology program is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that encompass the behavior, ecology, and evolution of living and extinct taxa.

2. **Cell and Organismal Biology**
The Cell and Organismal Biology program is appropriate for all Graduate students who wish to emphasize those areas of biology that integrate function and structure in cells, tissues, and organisms. This emphasis focuses in faculty areas of expertise in cell and molecular biology, neurobiology, developmental biology, and physiology.

3. **Microbiology**
The Microbiology curriculum is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that occur in microbes (bacteria, viruses, fungi, and protists) such as their physiology, ecology, development or evolution.

All graduate students should develop their curriculum plan in consultation with the faculty advisor and graduate committee. Details of sample course sequences within the different emphases are described in the Biology Graduate Handbook available for download from the
Graduate Student section of the Biology website http://bio.nmsu.edu/grads/.

Graduate students may also earn a minor in other graduate departments and programs.

**Biotechnology Program**

This is an accelerated (one year) non-thesis Master of Science degree in Biology that focuses on biotechnology. The program requires 30 hours of course work. The courses in this program are designed to prepare students for biotechnology-related careers in basic and applied research; in product development and testing; and in policy-making, regulation and law enforcement. The program of study includes practical training in molecular biology, genomics and bioinformatics, statistical analysis, business, bioethics and professional development skills. Additional graduate course work will provide students with further expertise in their individual areas of interest, including cell, molecular, and microbial biology; environmental, ecological and evolutionary biology; and general and integrative biology. Students who complete this training will be prepared for successful employment in academic, corporate, and government settings.

1 Students are expected to choose 5 or more courses numbered 450 or above in microbiology, organismal and cellular biology, genetics, or ecology.
2 This may include a research internship in a biotechnology company or in a Biology Department laboratory. Credits earned during an internship count towards the required elective credits.

**Biology - Doctor of Philosophy**

The Department of Biology offers graduate study leading to the Doctor of Philosophy degree. Our goal is to prepare students for careers in the various fields in biology through formal coursework and research experiences as well as through seminars and discussion groups.

There are two formal course requirements for all Biology Graduate students, with the exception of students in the accelerated non-thesis MS Biotechnology option. These core courses are:

Doctor of Philosophy students can choose among the Department's three areas of emphasis:

1. **Behavioral, Ecological and Evolutionary Biology**
   The Behavioral, Ecological and Evolutionary Biology program is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that encompass the behavior, ecology, and evolution of living and extinct taxa.

2. **Cell and Organismal Biology**
   The Cell and Organismal Biology program is appropriate for all Graduate students who wish to emphasize those areas of biology that integrate function and structure in cells, tissues, and organisms. This emphasis focuses in faculty areas of expertise in cell and molecular biology, neurobiology, developmental biology, and physiology.

3. **Microbiology**
   The Microbiology curriculum is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that occur in microbes (bacteria, viruses, fungi, and protists) such as their physiology, ecology, development or evolution.

All graduate students should develop their curriculum plan in consultation with their faculty advisor and graduate committee. Details of sample course sequences within the different emphases are described in the Biology Graduate Handbook available for download from the Graduate Student section of the Biology website http://bio.nmsu.edu/grads/.

Graduate students may also earn a minor in other graduate departments and programs.

**Chemistry and Biochemistry**

**Undergraduate Program Information**

A degree in chemistry or biochemistry enables a student to pursue a wide variety of careers in: research, production, sales, management and teaching. These degrees are also an excellent preparation for professional studies in medicine, dentistry, forensics, veterinary science, optometry, pharmacology, pharmacy and law.

Chemistry majors who have completed the requirements for the Bachelor of Science degree may receive American Chemical Society certification if they take one additional one-semester course which includes 1 credit of laboratory.

All departmental and nondepartmental requirements may not be taken S/U and must earn a C- or better final grade.

This department does not have a foreign language requirement for any of its degrees.

**Graduate Program Information**

The Department of Chemistry and Biochemistry offers programs leading to the MS and Ph.D. degrees in Chemistry in the areas of physical, organic, inorganic, biological, and analytical chemistry. Admission to these programs without deficiency is based on an undergraduate program essentially equivalent to that pursued by a chemistry or biochemistry major at this university. All applying students must submit undergraduate transcripts, a personal statement and CV, and arrange for 3 letters of recommendation. All foreign students from undergraduate
The core course work required of students entering with no previous graduate study in chemistry or biochemistry consists of courses exploring the concepts of Energy, Structure, Dynamics, and Measurements as applied to all disciplines of chemistry and biochemistry as well as short courses in Safety, Research Ethics, and Professional Development. Successful completion of a Qualifying Exam taken after the first year of coursework will determine whether a student is qualified to pursue continued study at the M.S. or Ph.D. level. Ph.D. candidates must take at least 6 additional credits of specialized coursework chosen in consultation with the thesis committee while M.S. candidates must take at least 3 additional credits. Ph.D. candidates must successfully complete a Comprehensive Exam in order to be eligible to write and defend a Ph.D. thesis. All students are expected to participate in discussion groups and department colloquia.

Since research is central in both the M.S. and Ph.D. programs, the early selection of a research advisor is encouraged. Students may choose to rotate through up to 3 research labs during their first semester before selecting a research advisor. Financial support is provided to all graduate students during their first year through teaching assistantships. Continued support may be provided through a research or teaching assistantship, depending upon individual laboratory funding. All support is contingent upon satisfactory academic and research performance. In addition, numerous traineeships and fellowships are available to qualified students. Inquiries regarding these opportunities should be directed to the graduate program coordinator.

Degrees for the Department

Bachelor Degree(s)
Chemistry - Bachelor of Arts (p. 353)
Biochemistry - Bachelor of Science (p. 351)
Chemistry - Bachelor of Science (p. 355)

Master Degree(s)
Chemistry - Master of Science (p. 357)

Doctoral Degree(s)
Chemistry - Doctor of Philosophy (p. 358)

Minors for the Department
Biochemistry - Undergraduate Minor (p. 357)
Chemistry - Undergraduate Minor (p. 357)

Shelley Lusetti, Department Head

Professors Arterburn, Herndon, Lyons, Rayson; Associate Professors Ashley, Houston, Lusetti, Maio, Yukl; Assistant Professors Baker, Carlisle, Talipov, Windorf; College Associate Professor Dunlavy, College Assistant Professors Chinnasamy, Potenza; Emeritus Professors Eiceman, Gopalan, Johnson, Kuehn, Lara, Quintana, Smirnov

S. Lusetti, Department Head, Ph.D. (Wisconsin–Madison) – biochemistry; enzymology of DNA repair; J. B. Arterburn, Ph.D. (Arizona) – organic chemistry; synthetic medicinal and chemical biology; A. K. Ashley, Ph.D. (Colorado State) – biochemistry and toxicology; DNA replication and repair; cancer; C. A. Baker, Ph.D. (Florida State) – analytical chemistry; separation science, micro- and nanotechnologies for neuroscience and astrobiology; S. M. Carlisle, Ph.D. (Louisville) – biochemistry; bioinformatics, cancer and metabolic disease; J. W. Herndon, Ph.D. (Princeton) – organic chemistry; organo-transition metal complexes, synthesis of biologically important cyclic compounds; K. D. Houston, Ph.D. (Texas- MD Anderson) – biochemistry; molecular mechanisms of hormone action in tumorigenesis; B. A. Lyons, Ph.D. (Cornell) – physical biochemistry; NMR spectroscopic studies of signal transduction pathways in breast cancer; W. A. Maio, Ph.D. (Johns Hopkins) – organic chemistry; total synthesis of marine natural products and explorations of new chemical methods; G. D. Rayson, Ph.D. (Texas-Austin) – analytical chemistry, spectroscopy; M. R. Talipov, Ph.D. (Bashkir State) – Theoretical Physical Chemistry; electronic structure calculations, ab initio calculations, density functional theory calculations; C. J. Windorf, Ph.D. (UC-Irvine) – inorganic chemistry; organometallic f-element and transition metal chemistry, redox chemistry; E. T. Yukl, Ph.D. (Oregon Health and Science) – biochemistry; x-ray crystallography and spectroscopy of bacterial metalloproteins

Biochemistry Courses

BCHE 140. Introduction to Biochemistry
1 Credit (1)
A description of the nature of inquiry in biochemistry, especially with respect to the interaction of chemistry and biology. Both historical development and topics of current interest will be discussed. Graded S/U.

BCHE 241. Introduction to Research in Biochemistry
1-3 Credits
Techniques and procedures of biochemical research. May be repeated for a maximum of 3 credits.
Prerequisites: 8 credits of chemistry and 3.0 GPA in chemistry.

BCHE 341. Survey of Biochemistry
4 Credits (3+3P)
Basic principles of biochemical processes and the structure/function of the major classes of biomolecules, with introductions to metabolism and the central dogma of biochemistry. The chemical and biological properties of major biomolecules (DNA, proteins, May be repeated up to 4 credits.
Prerequisite(s): C- or better in CHEM 2115 or CHEM 314.

BCHE 395. Biochemistry I
3 Credits (3)
Principles governing chemistry and physics of life processes with emphasis on the relationships between molecular structure and cell function. Basic principles of biochemical processes, enzymeology, and the structure/function of the major classes of biomolecules with introductions to metabolism. Introduction to catabolic metabolism.
Prerequisite(s): C or better in CHEM 314.

BCHE 396. Biochemistry II
3 Credits (3)
Introduction to anabolic metabolism and hormonal regulation. Biochemical principles of the mechanism and regulation of replication, transcription, recombination and translation in prokaryotes and eukaryotes. Introduction to DNA-based information technology. Taught with BCHE 396 H.
Prerequisite(s): C or better in BCHE 395.

BCHE 396 H. Biochemistry II Honors
3 Credits (3)
Taught with BCHE 396 with additional work required.
BCHE 424. Experimental Biochemistry I
3 Credits (1.25+6P)
Laboratory techniques required for experimentation with recombinant DNA such as nucleic acid isolation and purification, polymerase chain reaction (PCR), sequence analysis, and directed mutagenesis using genetic material from both prokaryotic and eukaryotic organisms.

Prerequisite(s): C- or better in BCHE 395, and BCHE 396 or GENE 315.

Learning Outcomes
1. Conduct experiments safely
2. Select and manipulate plasmids to achieve desired recombinant DNA for experimentation
3. Obtain relevant DNA sequence information for gene of interest from public databases
4. Make buffers and reagents necessary for transforming and isolating plasmid DNA from E. coli
5. Transform and isolate plasmid DNA to be used for cloning of gene of interest
6. Design primers for PCR to enrich gene of interest from genomic DNA
7. Analyze DNA sequence and choose appropriate restriction enzymes for cloning gene of interest
8. Design primers for PCR to incorporate restriction sites at the ends of gene of interest
9. Perform restriction digest on plasmid DNA and PCR products
10. Perform ligation reaction to combine gene of interest with plasmid DNA
11. Analyze sequence of plasmid containing gene of interest to validate the outcome of experimentation

BCHE 425. Experimental Biochemistry II
3 Credits (3)
Introduction to fundamental techniques used to explore structure and function of biological macromolecules such as proteins, carbohydrates, lipids, and nucleic acid. Course covers analyzing and reporting experimental data; enzymology; quantitative methods to determine biological molecules; basic principles of electrophoresis, chromatography, and spectroscopic immunochemistry. May be repeated up to 3 credits.

Prerequisite(s): C- or better in BCHE 424.

Learning Outcomes
1. Understand and implement various methods of protein purification as well as qualitative and quantitative analysis of protein preparations
2. Become proficient in absorbance and fluorescence spectroscopy
3. Determine ligand binding parameters
4. Understand and measure enzyme kinetics and inhibition
5. Perform basic protein crystallization and structure determination
6. Develop skills in scientific writing and presentation

BCHE 432. Physical Biochemistry
3 Credits (3)
This course focuses on modern Biophysical techniques used in protein and nucleic acid research. Topics are covered in some detail at the theoretical level. The course content is delivered entirely by podcast. Podcast contributions are from several different faculty from within their particular area(s) of expertise. Topics covered include (but are not limited to): biomolecular NMR, atomic force microscopy, light scattering, circular dichroism, ultracentrifugation, isothermal titration calorimetry, positron emission tomography, computerized tomography, ultrasound, functional MRI, protein fluorescence, mass spec/ proteomics, protein molecular dynamics simulations, and X-ray diffraction. Course credit qualifies for minor degree in chemistry as a physical-analytical chemistry emphasis. CHEM 431, or CHEM 433.

Prerequisite(s): BCHE 395.

BCHE 440. Biochemistry Seminar
1 Credit (1)
Introduction to current literature in biochemistry and molecular biology. Selected topics in the field will be presented by the faculty. Students will present written and oral reports from literature searches. Restricted to: BCHE majors.

Prerequisite(s): BCHE 395.

BCHE 441. Advanced Research in Biochemistry
1-3 Credits
Investigation of biochemical problems and the development of special techniques. May be repeated for a maximum of 3 credits.

Prerequisites: consent of instructor, 16 credits of chemistry and 3.0 GPA in chemistry for nonmajors.

BCHE 451. Special Topics
1-3 Credits
Same as CHEM 451. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

BCHE 455. Independent Studies
1-3 Credits
Independent studies directed by consulting faculty.

Prerequisite: consent of instructor.

BCHE 540. Seminar in Biochemistry
1 Credit (1)
Formal seminar presentation in current topics in biochemical research. May be repeated for a maximum of 3 credits.

BCHE 542. Biochemistry I
3 Credits (3)
Relationship between macromolecular structure and function. Basic enzymology. Energy metabolism.

Prerequisite(s): CHEM 314 and CHEM 431 or CHEM 433; or BCHE 395 or equivalent.

BCHE 545. Molecular and Biochemical Genetics
3 Credits (3)
An accelerated treatment of the molecular basis of gene expression. Discussion of chemical, enzymological, and genetic techniques of molecular biology. Same as BIOL 545.

Prerequisite: BCHE 542 or equivalent.

BCHE 546. Biochemistry II
3 Credits (3)
Intermediary metabolism: catabolic and anabolic pathways of carbohydrates, lipids, amino acids, and nucleic acids, including their regulation.

Prerequisite: BCHE 542 or BCHE 395 with consent of instructor.
BCHE 590. Discussions in Biochemistry
1 Credit (1)
Current research problems in biochemistry. May be repeated for a maximum of 6 credits. Graded: S/U Grading (S/U, Audit).

BCHE 598. Special Research Programs
1-3 Credits
May be repeated for a maximum of 6 credits. Same as CHEM 598. Graded S/U.

BCHE 599. Master's Thesis
15 Credits
May be repeated for a maximum of 6 credits. Same as CHEM 599.

BCHE 600. Research
1-15 Credits
May be repeated for a maximum of 20 credits. PR/U grading. Same as CHEM 600.

BCHE 647. Physical Biochemistry
3 Credits (3)
Fundamental applications of physical chemistry to the investigation of biological metabolites and biological macromolecules, including proteins, oligo-nucleotides, and molecular arrays with an emphasis on understanding biological functions based on chemical structures. Taught with BCHE 451.
Prerequisite(s): ‘C’ or better in CHEM 431 or CHEM 433 or BCHE 542.

BCHE 649. Topics in Biochemistry
1-3 Credits
Selected topics of current interest designated by title and credit. May be repeated for a maximum of 3 credits.

BCHE 650. Advanced Seminar
1 Credit (1)
Discussion of biochemical research in progress that relates to a doctoral candidate’s thesis research. Intended for students who have earned a master’s degree or the equivalent and have made significant research progress for preparation of the doctoral dissertation. May be repeated for a maximum of 3 credits.

BCHE 700. Doctoral Dissertation
20 Credits
May be repeated for a maximum of 20 credits. Graded PR/U. Same as CHEM 700.

Chemistry Courses

CHEM 1111. Basic Chemistry
3 Credits (3)
For students whose preparatory science or math training has been deficient. Does not meet the chemistry requirement in any curriculum.
Prerequisite: Enhanced ACT composite score of at least 18 or a grade of C- or better in CCDM 114N.

Learning Outcomes
1. The goals and objectives for CHEM 1111 are to equip students with the necessary problem solving skills to be successful in CHEM 1215G/1225G.

CHEM 1120G. Introduction to Chemistry Lecture and Laboratory (non-majors)
4 Credits (3+3P)
This course covers qualitative and quantitative areas of non-organic general chemistry for non-science majors and some health professions. Students will learn and apply principles pertaining, but not limited to, atomic and molecular structure, the periodic table, acids and bases, mass relationships, and solutions. The laboratory component introduces students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment.
Prerequisite: CCDM 114N or A S 103 or MATH 1215 or higher.

Learning Outcomes
1. (Lecture) Use the different systems of measurements and perform conversions within the same system of measurement and between different systems of measurements.
2. (Lecture) Identify elements from their name or symbol, use the periodic table to describe reactivity patterns of elements and to predict compound formation.
3. (Lecture) Describe the basic structure of an atom using subatomic particles, and apply these concepts to nuclear reactions.
4. (Lecture) Describe ion formation and the difference between covalent and ionic compounds. Name and write formulas for ionic and simple molecular compounds.
5. (Lecture) Write and balance chemical reactions. Use balanced reactions in stoichiometric calculations.
6. (Lecture) Describe the differences between the solid, liquid and gas phases. Use the gas laws in calculations, and apply these laws to everyday situations.
7. (Lecture) Explain different types of energy, and how energy is released or absorbed in a reaction.
8. (Lecture) Describe acid and base behavior.
9. (Lecture) Explain the intermolecular attractive forces that determine physical properties; apply this knowledge to qualitatively evaluate these forces and predict the physical properties that result.
10. (Lecture) Explain the intermolecular attractive forces that determine physical properties; apply this knowledge to qualitatively evaluate these forces and predict the physical properties that result.
11. (Laboratory) Practice concepts associated with laboratory safety, including the possible consequences of not adhering to appropriate safety guidelines.
12. (Laboratory) Demonstrate the computational skills needed to perform appropriate laboratory-related calculations to include, but not be limited to determining the number of significant figures in numerical value, solving problems using values represented in exponential notation, solving dimensional analysis problems, and manipulating mathematical formulas as needed to determine the value of a variable.
13. (Laboratory) Perform laboratory observations (both qualitative and quantitative) using sensory experience and appropriate measurement instrumentation (both analog and digital).
14. (Laboratory) Record quantitatively measured values to the correct number of significant figures and assign the correct units.
15. (Laboratory) Master basic laboratory techniques including, but not limited to weighing samples (liquid and solid), determining sample volumes, measuring the temperature of samples, heating and cooling a sample or reaction mixture, decantation, filtration, and titration.
16. (Laboratory) Draw appropriate conclusions based on data and analyses.
17. (Laboratory) Present experimental results in laboratory reports of appropriate length, style and depth, or through other modes as required.
18. (Laboratory) Determine chemical formulas and classify different types of
CHEM 1121. General Supplemental Instruction I
1 Credit (1)
Collaborative workshop for students in General Chemistry I. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.
Corequisite(s): CHEM 1215G.

CHEM 1122. General Supplemental Instruction II
1 Credit (1)
Collaborative workshop for students in General Chemistry II. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.
Corequisite(s): CHEM 1225G.

CHEM 1123. Principles of Supplemental Instruction III
1 Credit (1)
Collaborative workshop for students in CHEM 1120G, Principles and Applications of Chemistry. Course does not count toward departmental degree requirements. May be repeated for maximum of 2 credits.
Corequisite(s): CHEM 1120G.

CHEM 1215G. General Chemistry I Lecture and Laboratory for STEM Majors
4 Credits (3+3P)
This course covers descriptive and theoretical chemistry.
Prerequisite: (1) grade of C- or better in MATH 1215 or higher, or a Mathematics Placement Exam Score adequate to enroll in mathematics courses beyond MATH 1215.

Learning Outcomes
1. Use dimensional analysis, the SI system of units and appropriate significant figures to solve quantitative calculations in science. Understand the differences between physical and chemical changes to matter. Classify types of matter. Understand the scientific method in the context of scientific discoveries. Explain the structure of atoms, isotopes and ions in terms of subatomic particles. Analyze how periodic properties (e.g. electronegativity, atomic and ionic radii, ionization energy, electron affinity, metallic character) and reactivity of elements results from electron configurations of atoms. Understand the creation of different types of compounds (ionic and molecular), comparing and contrasting their structures, naming schemes and formulas. Apply knowledge of electronic structure to determine molecular spatial arrangement and polarity. Understand bulk pure substances, their properties and their states of matter by understanding and identifying intermolecular forces. Apply kinetic molecular theory to relate atomic level behavior to macroscopic properties. Introduce the mole and apply the mole concept to amounts on a macroscopic and a microscopic level. Understand mixtures, solubility by considering intermolecular forces and expressing concentration in molarity. Identify different reaction types. Apply the law of conservation of mass to reactions. Perform stoichiometry on balanced reactions. Laboratory Student Learning Outcomes Demonstrate and apply concepts associated with laboratory safety, including the possible consequences of not adhering to appropriate safety guidelines. Demonstrate the computational skills needed to perform appropriate laboratory related calculations to include, but not be limited to determining the number of significant figures in numerical value with the correct units, solving problems using values represented in exponential notation, solving dimensional analysis problems, and manipulating mathematical formulas as needed to determine the value of a variable. Perform laboratory observations (both qualitative and quantitative) using sensory experience and appropriate measurement instrumentation (both analog and digital). Prepare solutions with an acceptable accuracy to a known concentration using appropriate glassware. Master basic laboratory techniques including, but not limited to weighing samples (liquid and solid), determining sample volumes, measuring the temperature of samples, heating and cooling a sample or reaction mixture, decantation, filtration, and titration. Draw conclusions based on data and analyses from laboratory experiments. Relate laboratory experimental observations, operations, calculations, and findings to theoretical concepts presented in the complementary lecture course.
CHEM 1216. General Chemistry I Lecture and Laboratory for CHEM Majors
4 Credits (3+3P)
As the first of a two-semester sequence, this course teaches fundamental concepts in chemistry, including the electronic structure of atoms, chemical periodicity, nature of chemical bonds, molecular structure, the three phases of matter, etc. Designed for majors in chemical and other physical sciences, including engineering. May be appropriate for the life science major. It is assumed that the students are familiar with college algebra, chemical nomenclature, stoichiometry, and scientific measurements. The laboratory component is designed to complement the theory and concepts presented in lecture, and will introduce students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment.
Prerequisite(s): Eligible to take MATH 1250G and an ACT composite score of 22 or higher.
Learning Outcomes
1. Apply the mole concept to amounts at a microscopic level and use this to perform stoichiometric calculations for reactions in solution, gases and thermochemistry. Calculate solution concentrations in various units. Apply the gas laws and kinetic molecular theory to relate atomic level behavior to macroscopic properties. Explain the electronic structure of atoms, isotopes and ions in terms of its subatomic particles. Analyze how periodic properties (e.g. electronegativity, atomic and ionic radii, ionization energy, electron affinity, metallic character) and reactivity of elements results from electronic configurations of atoms. Understand the nature of chemical bonds (ionic and covalent). Apply knowledge of electronic structure to determine molecular structure and polarity. Understand the formation of different phases of matter and the underlying fundamental intermolecular interactions. Describe physical states and changes, and distinguish these from chemical changes. Describe the energy conversions that occur in chemical reactions and state changes, relating heat of reaction to thermodynamic properties such as enthalpy and internal energy; apply these principles to measure and calculate energy changes in reaction. 1 Apply principles of general chemistry to specific real-world problems in environment, engineering and health-related fields.

CHEM 1225G. General Chemistry II Lecture and Laboratory for STEM Majors
4 Credits (3+3P)
This course is intended to serve as a continuation of general chemistry principles for students enrolled in science, engineering, and certain preprofessional programs. The course includes, but is not limited to a theoretical and quantitative coverage of solutions and their properties, kinetics, chemical equilibrium, acids and bases, entropy and free energy, electrochemistry, and nuclear chemistry. Additional topics may include (as time permits) organic, polymer, atmospheric, and biochemistry. The laboratory component is designed to complement the theory and concepts presented in lecture, and will introduce students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment.
Prerequisite(s): C- or better in CHEM 1215G.
Learning Outcomes
1. Explain the intermolecular attractive forces that determine physical properties and phase transitions, and apply this knowledge to qualitatively evaluate these forces from structure and to predict the physical properties that result. Calculate solution concentrations in various units, explain the effects of temperature, pressure and structure on solubility, and describe the colligative properties of solutions, and determine solution concentrations using colligative property values and vice versa. Describe the dynamic nature of chemical equilibrium, and apply LeChatelier’s Principle to predict the effect of concentration, pressure and temperature changes on equilibrium mixtures as well as describe the equilibrium constant and use it to determine whether equilibrium has been established, and calculate equilibrium constants from equilibrium concentrations and vice versa. Describe the different models of acids and base behavior and the molecular basis for acid strength, as well as apply equilibrium principles to aqueous solutions, including acid/base and solubility reactions, and calculate pH and species concentrations in buffered and unbuffered solutions. Explain titration curves as well as calculate concentrations of reactants. Explain and calculate the thermodynamic functions, enthalpy, entropy and Gibbs free energy, for a chemical system, and relate these functions to equilibrium constants.
Student Learning Outcomes – Laboratory Demonstrate and apply concepts associated with laboratory safety, including the possible consequences of not adhering to appropriate safety guidelines. Demonstrate the computational skills needed to perform appropriate laboratory related calculations to include, but not be limited to determining the number of significant figures in numerical value with the correct units, solving problems using values represented in exponential notation, solving dimensional analysis problems, and manipulating mathematical formulas as needed to determine the value of a variable. Perform laboratory observations (both qualitative and quantitative) using sensory experience and appropriate measurement instrumentation (both analog and digital). Prepare solutions with an acceptable accuracy to a known concentration using appropriate glassware. Perform basic laboratory operations related to, but not limited to, colligative properties of solutions, chemical equilibria, acid/base titrations, electrochemistry. Draw conclusions based on data and analyses from laboratory experiments. Relate laboratory experimental observations, operations, calculations, and findings to theoretical concepts presented in the complementary lecture course.
CHEM 1226. General Chemistry II Lecture and Laboratory for CHEM Majors
4 Credits (3+3P)
As the second of a two-semester sequence, this course teaches fundamental concepts in chemistry, including solutions, equilibria, electrochemistry, thermodynamics and kinetics. Designed for majors in chemical and other physical sciences, including engineering. May be appropriate for the life science major. It is assumed that the students are familiar with college algebra, chemical nomenclature, stoichiometry, and scientific measurements. The laboratory component is designed to complement the theory and concepts presented in lecture, and will introduce students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment.
Prerequisite(s): C- or better in CHEM 1216.
Learning Outcomes
1. Describe the colligative properties of solutions and explain them using intermolecular forces. Determine solution concentrations using colligative property values and vice versa. Explain rates of reactions, rate laws, and half-life; determine the rate, rate law and rate constant of a reaction and calculate concentration as a function of time and vice versa. Understand the principle of catalysis. Explain the collision model of reaction dynamics, including activation energy, catalysts and temperature; Derive a rate law from a reaction mechanism and evaluate the consistency of a mechanism with a given rate law. Describe the dynamic nature of chemical equilibrium and its relation to reaction rates; apply Le Chatelier’s Principle to predict the effect of concentration, pressure and temperature changes on equilibrium mixtures. Describe the equilibrium constant and use it to determine whether equilibrium has been established; calculate equilibrium constants from equilibrium concentrations (including pressures) and vice versa. Describe the different models of acids and base behavior, and the molecular basis for acid strength.

CHEM 2111. Explorations in Chemistry
1 Credit (1)
The major intent of this course is to deepen your interest in chemistry and make you aware of research and career opportunities in the field. During this semester we hope to discuss both old and new developments in chemistry that impact our lives. We also want to build our communication skills that are so necessary in our profession. Graded S/U.

CHEM 2115. Survey of Organic Chemistry and Laboratory
4 Credits (3+3P)
This course is a one-semester survey of organic and biological chemicals. Students will be introduced to nomenclature, molecular structure, properties, and reactions of hydrocarbons, alcohols, carboxyls, organic acids and bases, carbohydrates, lipids, and proteins. The handling of organic chemicals, simple organic reactions, tests for functional groups, and synthesis will be learned in the laboratory component of this course. May be repeated up to 4 credits.
Prerequisite(s): CHEM 1225G.
Learning Outcomes
1. Identify common organic functional groups.
2. Translate between the IUPAC names and structures of simple organic molecules.
3. Predict the products of certain organic chemical reactions from reagents and conditions presented.
4. Predict physical and chemical behavior of organic molecules based on structure.
5. Synthesize several classes of organic compounds in the laboratory that were previously studied in the lecture component of this course.
6. Recognize and name the four basic bioorganic units and certain of their derivatives and macromolecules.
7. Construct 3 dimensional models of organic compounds.
8. Understand and apply safety principles associated with Organic Chemistry laboratory operations and activities.
9. Present experimental results in laboratory reports of appropriate length, style and depth, or through other modes as required.
10. Draw/recognize stereochemistry and explain its relevance to bioorganic molecules.

CHEM 2120. Integrated Organic Chemistry and Biochemistry
3 Credits (3)
This course is a one-semester introduction to Organic Chemistry and Biochemistry designed for students in health and environmental occupations. The course surveys organic compounds in terms of structure, physical, and chemical properties, followed by coverage of the chemistry of specific classes of organic compounds in the biological environment. Students will apply course concepts to everyday organic and biological chemistry problems in preparation for careers in health and environmental fields.
Prerequisite: CHEM 1120G or CHEM 1215G.
Learning Outcomes
1. Identify and name basic organic compounds.
2. Construct/draw organic compounds from the names.
3. Predict the products of certain organic chemical reactions from reagents and conditions presented.
4. Recognize and name the four basic bioorganic units and certain of their derivatives and macromolecules.
5. Compare and contrast the function and location of the four bioorganic units and their macromolecules and cofactors.
6. Draw/recognize stereochemistry and explain its relevance to bioorganic molecules.
7. Discuss the pathways and functions of some of the cellular metabolic processes.
8. Recognize and describe metabolic cellular processes and macromolecular structure with respect to health and/or disease state
**CHEM 2226. General Chemistry III**  
3 Credits (2+3P)  
Quantitative aspects of general chemistry: solid state structure, equilibrium, thermodynamics, and kinetics. Required of chemical science majors who have taken CHEM 1215G/1225G.  
**Prerequisite:** CHEM 1225G.  
**Learning Outcomes**  
1. describe the process of scientific inquiry  
2. solve problems scientifically  
3. communicate scientific information  
4. apply quantitative analysis to scientific problems  
5. apply scientific thinking to real world problems

**CHEM 2991. Introduction to Research**  
1-3 Credits (3+9P)  
Techniques and procedures of chemical research. May be repeated for a maximum of 3 credits.  
**Prerequisites:** 8 credits of chemistry and a 3.0 GPA in chemistry.  
**Learning Outcomes**  
1. Varies

**CHEM 2996. Special Topics in Chemistry**  
1-6 Credits (1-6)  
Specific subjects in Chemistry. These subjects will be announced in the 'Schedule of Classes'. It may be repeated under different topics for a maximum of 12 credits.  
**Learning Outcomes**  
1. Varies

**CHEM 303. Organic Supplemental Instruction I**  
1 Credit (1)  
Collaborative workshop for students in Organic Chemistry I. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.  
**Corequisite(s):** CHEM 313.

**CHEM 304. Organic Supplemental Instruction II**  
1 Credit (1)  
Collaborative workshop for students in Organic Chemistry II. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.  
**Corequisite(s):** CHEM 314.

**CHEM 313. Organic Chemistry I**  
3 Credits (3)  
Nomenclature, uses, basic reactions, and preparation methods of the most important classes of aliphatic and aromatic compounds.  
**Prerequisite(s):** C- or better in CHEM 1225G or CHEM 1226.

**CHEM 314. Organic Chemistry II**  
3 Credits (3)  
An in-depth focus on reactions and mechanisms as they relate to organometallic compounds, alcohols, ethers, ketones, aldehydes, carboxylic acid derivatives, and amines. May be repeated up to 3 credits.  
**Prerequisite(s):** C- or better in CHEM 313.  
**Learning Outcomes**  
1. Identify several new functional groups and other key features of organic compounds  
2. Interpret 1H / 13C NMR, IR, UV-Vis, and Mass spectrometry data and have the ability to correlate structural elements with spectral features  
3. Understand the chemical reactivity and reaction mechanisms relating, but not limited, to organometallic compounds, alcohols, ethers, ketones, aldehydes, carboxylic acids, and amines. Mechanistic highlights include: etherification, acetal formation / removal, alcohol oxidation, carbonyl addition reactions, enolate (and related) reactions, formation of carboxylic acid derivatives, and nucleophilic acyl substitution processes. Apply these mechanistic and reactivity considerations to these same groups when they appear as substructures in larger biologically-important molecules (e.g. carbohydrates, amino acids, and lipids). Design concise, three to five step syntheses of simple organic molecules using reactions learned in both CHEM 313 and 314 Qualitatively assess stability, solubility properties, chemical reactivity, spectral properties, and potential reactions that would lead to preparation, simply via visual inspection of structure.

**CHEM 315. Organic Chemistry Laboratory**  
2 Credits (6P)  
Techniques, preparative and analytical methods in organic chemistry. May be repeated up to 2 credits.  
**Prerequisite(s)/Corequisite(s):** CHEM 314. Prerequisite(s): C- or better in CHEM 313 or consent of instructor.

**CHEM 351. Analytical Chemistry**  
4 Credits (2+6P)  
The fundamentals of quantitative chemical analysis.  
**Prerequisite(s):** C- or better in CHEM 1225G or CHEM 1226.

**CHEM 371. Analytical Chemistry**  
4 Credits (2+6P)  
The fundamentals of quantitative chemical analysis.  
**Prerequisite(s):** C- or better in CHEM 1225G or CHEM 1226.

**CHEM 422. Environmental Chemistry**  
3 Credits (3)  
Chemistry of organic and metal ion pollutants in the environment and principles important to their remediation including bioremediation.  
Restricted to: Main campus only. Crosslisted with: ENVS 422  
**Prerequisite(s):** CHEM 1225G and either CHEM 2115 or CHEM 313.
CHEM 424. Soil Chemistry
3 Credits (3)
Same as SOIL/GEOL 424.

CHEM 431. Physical Chemistry
3 Credits (3)
Principles that govern the physical and chemical behavior of matter. May not be counted toward Bachelor of Science degree in Chemistry.
Prerequisite(s): CHEM 1226 or CHEM 2226; MATH 1521G; PHYS 1240G or PHYS 2240G or PHYS 2140 or PHYS 1320G.

CHEM 431 H. Physical Chemistry Honors
3 Credits (3)
Same as CHEM 431. Additional work to be arranged.
Prerequisite(s): CHEM 1226 or CHEM 2226; MATH 1521G or MATH 1521H; PHYS 1240G or PHYS 2240G or PHYS 2140 or PHYS 1320G.

CHEM 433. Physical Chemistry I
3 Credits (3)
Laws and theories underlying chemical phenomena.
Prerequisite(s): CHEM 1226 or CHEM 2226; MATH 2140 or PHYS 1320G, or consent of instructor.

CHEM 433 H. Physical Chemistry I Honors
3 Credits (3)
Same as CHEM 433. Additional work to be arranged.
Prerequisite(s): CHEM 1226 or CHEM 2226; MATH 1521G or MATH 1521H; PHYS 1240G or PHYS 2240G or PHYS 2140 or PHYS 1320G, or consent of instructor.

CHEM 434. Physical Chemistry II
3 Credits (3)
Laws and theories underlying chemical phenomena.
Prerequisite(s): CHME 302 or CHEM 433.

CHEM 435. Physical Chemistry Laboratory
2 Credits (6P)
Prerequisite: concurrent registration in CHEM 434.

CHEM 441. Advanced Research
1-3 Credits (3+9P)
Investigation of chemical problems and the development of special techniques. May be repeated for a maximum of 3 credits.
Prerequisites: consent of instructor, 16 credits of chemistry and 3.0 GPA in chemistry for nonmajors.

CHEM 443. Senior Seminar
1 Credit (1)
Discussions of current chemical research, impact of chemistry on society and/or ethics as applied to chemists. Each student will present a written and an oral report on an approved topic.
Prerequisite: CHEM 431 or CHEM 433.

CHEM 451. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.
Prerequisite: consent of instructor.

CHEM 455. Independent Studies
1-3 Credits
Independent studies directed by consulting faculty.
Prerequisite: consent of instructor.

CHEM 456. Inorganic Structure and Bonding
3 Credits (3)
Theoretical principles and a systematic study of the periodic table.
Prerequisite: CHEM 356 or CHEM 431 or CHEM 433.

CHEM 466. Advanced Organic Chemistry
3 Credits (3)
Recent developments in synthesis and theoretical principles of organic chemistry.
Prerequisite: CHEM 314.

CHEM 471. Instrumental Methods of Analysis
4 Credits (3+3P)
Analytical techniques, including optical and procedures.
Prerequisites: CHEM 371 and either PHYS 1240G or PHYS 1320G.

CHEM 475. Central Concepts in Chemistry - Safety
1 Credit (1)
Students will obtain university safety training plus departmental-specific safety guidelines for the research laboratory.
Learning Outcomes
1. Students completing this course will be knowledgeable of all safety guidelines delineated by the University, College, and Department.
2. When possible accident case-studies will be incorporated within the curriculum.

CHEM 476. Central Concepts in Chemistry - Research Ethics
1 Credit (1)
Students will complete Federal Agency (NSF, NIH, etc.) on-line training modules in responsible conduct in research and discuss relevant case-studies of research misconduct.
Learning Outcomes
1. Completion of this class will yield researchers fully aware of federal and professional guidelines regarding the ethical conduction and dissemination of data and conclusions.

CHEM 477. Central Concepts in Chemistry - Professional Development
1 Credit (1)
Students will receive basic instruction in research dissemination strategies (presentations) and career planning.

3 Credits (3)
This course will provide the students with a detailed examination of several topics in chemical energetics. These topics include: (1) basic thermodynamics concepts, (2) statistical thermodynamics (3) chemical equilibria, and (4) intermolecular interactions.
Learning Outcomes
1. Students completing this course will gain an understanding of chemical thermodynamics and equilibria as they relate to all areas of chemistry.

CHEM 502. Central Concepts in Chemistry - Structure
3 Credits (3)
This course will provide the students with a detailed examination of several topics in chemical reactivity. These topics include: (1) principles of chemical bonding and (2) organic, inorganic and biochemical structure determination.
Learning Outcomes
1. Students completing this course will understand the fundamental components of molecular interactions and their impact on molecular structure and function in all areas of chemistry.
2. In addition, they will learn the theory and practice of physical techniques used to determine molecular structure.
CHEM 503. Central Concepts in Chemistry - Dynamics
3 Credits (3)
This course will provide the students with a detailed examination of several topics in chemical reactivity. These topics include: (1) basic kinetic concepts, (2) fundamental gas phase kinetics (3) organic, inorganic and biochemical reaction mechanisms.

Learning Outcomes
1. Students who successfully complete this course will understand the fundamentals of chemical dynamics: from simple gas or solution phase reaction mechanisms to biomolecular interactions.

CHEM 504. Central Concepts in Chemistry - Measurements
3 Credits (3)
This course will provide the students with a detailed examination of several topics in chemical measurements. These topics include: (1) spectroscopic, electrochemical and chromatographic techniques, (2) statistical methods of measurement and validation relevant to biomolecules, synthetic polymers and mixtures.

Learning Outcomes
1. The collection of quantitative data is central to all subdisciplines of chemistry.
2. Students completing this course will understand the basic principles of chemical measurements and the uncertainties inherently associated with those measurements.
3. They will also gain knowledge of tools available to minimize those uncertainties in data interpretation.

CHEM 507. Chemistry of the Elements
3 Credits (3)
Discussion of the reactions and structures of inorganic compounds.

CHEM 510. Graduate Student Seminar
1 Credit (1)
Research seminar for graduate students in Chemistry. Enrollment required each semester for all graduate students. Masters or Doctoral candidates presenting a research seminar enroll for a letter grade. All other participating students enroll using the S/U grading option.

Learning Outcomes
1. Graduate students will gain experience organizing a research presentation. Graduate students will develop oral presentation skills.

CHEM 514. Organic Structure Determination
3 Credits (3)
Modern spectroscopic techniques for characterization of organic compounds.

CHEM 515. Modern Organic Chemistry
3 Credits (3)
Recent developments in synthesis and theoretical principles of organic chemistry.

CHEM 516. Physical Organic Chemistry
3 Credits (3)
Physical organic chemistry.

CHEM 520. Comprehensive Literature Review Seminar for Graduate Students
1 Credit (1)
Graduate student presents a literature review on an approved topic. The seminar presentation will include cover new developments of primary significance to the topic based on current research papers and culminate in a testable hypothesis. A passing grade allows the student to take the comprehensive exam.

Learning Outcomes
1. Student will prepare an abstract of their presentation understandable to a broad chemistry/biochemistry audience Student will demonstrate a reasonable understanding of every concept introduced Student will present a well-organized topic leading to a logical hypothesis Student will demonstrate the ability to develop a data-supported hypothesis

CHEM 521. Chemical Instrumentation
3 Credits (2+3P)
Theory and application of electronic devices to chemical analysis.

CHEM 526. Advanced Analytical Chemistry
3 Credits (3)
Equilibria, and the theories of gravimetric, volumetric, and instrumental analysis.

CHEM 527. Separations
3 Credits (3)
Covers the fundamentals of separation methods and relationships to modern analytical techniques such as gas chromatography and liquid chromatography.

CHEM 529. Spectrochemical Analysis
3 Credits (3)
Fundamentals, instrumentation, and applications of spectrochemical analysis.

CHEM 536. Chemical Thermodynamics
3 Credits (3)
First, second, and third laws of thermodynamics, and the concepts, interrelations, and applications of thermodynamic state functions.

CHEM 537. Quantum Chemistry
3 Credits (3)
Fundamentals of quantum mechanics.

Prerequisite: consent of instructor.

CHEM 538. Chemical Kinetics
3 Credits (3)
Empirical analysis of rate measurements, collision theory, transition state theory, and chain reactions.

CHEM 598. Special Research Programs
1-3 Credits
Individual investigations, either analytical or experimental. Graded S/U.

CHEM 599. Master's Thesis
15 Credits
Thesis preparation.

CHEM 600. Research
1-15 Credits
Course used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

CHEM 619. Topics in Organic Chemistry
1-3 Credits
Selected topics of current interest designated by subtitle.
CHEM 629. Advanced Topics in Analytical Chemistry  
3 Credits (3)  
Discussion of advanced topics in the field of analytical chemistry. May be repeated with different subtitles. Consent of instructor required.

CHEM 639. Topics in Physical Chemistry  
1-3 Credits  
Selected topics of current interest designated by subtitle.

CHEM 700. Doctoral Dissertation  
17 Credits  
Dissertation preparation.

Biochemistry - Bachelor of Science

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework. All departmental and nondepartmental requirements may not be taken S/U and must earn a C- or better final grade.

PHYS 1320L | Calculus-Based Physics II Lab |  

Second Language Requirement: (not required)  
Electives, to bring the total credits to 120.
Select sufficient electives to bring total credits to 120, including 48 upper division.

**Total Credits** 120

1. See the General Education (p. 54) section of the catalog for a full list of courses
2. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.
3. CHEM 1216 General Chemistry I Lecture and Laboratory for CHEM Majors and CHEM 1226 General Chemistry II Lecture and Laboratory for CHEM Majors are recommended and are acceptable General Education substitutions for CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors and CHEM 1225G General Chemistry II Lecture and Laboratory for STEM Majors but will need a degree audit exception that can be coordinated with your advisor.
4. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses
5. PHYS 2110 Mechanics is the recommended Physics I course for B.S. majors. PHYS 1230G Algebra-Based Physics I, PHYS 2230G General Physics for Life Science I, and PHYS 1310G Calculus-Based Physics I are acceptable and are recommended in the decreasing order listed.
6. PHYS 2140 Electricity and Magnetism is the recommended Physics II course for B.S. majors. PHYS 1240G Algebra-Based Physics II, PHYS 2240G General Physics for Life Science II, and PHYS 1240G Algebra-Based Physics II are acceptable and are recommended in the decreasing order listed. Students are highly cautioned to check prerequisites for the individual courses when schedule planning.
7. Students are strongly encouraged to verify prerequisite/corequisite requirements for Physics labs when schedule planning.

**Second Language Requirement**

For the Bachelor of Science with a major in Biochemistry there is no second language requirement for the degree.

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Area VI: Creative and Fine Arts Course**
Mathematics coursework, but may be needed in order to take the necessary English and will not count towards the degree requirements and/or elective credits in courses numbered 300 or above. Developmental coursework requirements, and elective credits to total at least 120 credits with 48 include: General Education requirements, Viewing a Wider World Students must complete all University degree requirements, which and must earn a C- or better final grade.

Departmental and nondepartmental requirements may not be taken S/U that are not counted in the Bachelor of Science in Biochemistry. All Students who complete a Bachelor of Science in Biochemistry and wish to complete the Bachelor of Arts in emphasis in a second field of study. Students who complete a Bachelor

Chemistry - Bachelor of Arts
The Bachelor of Arts curriculum is designed to provide flexibility with less depth in chemistry, physics, and mathematics. The program may be used by students planning extensive study in other areas and requires emphasis in a second field of study. Students who complete a Bachelor of Science in Biochemistry and wish to complete the Bachelor of Arts in Chemistry must complete 3 additional upper division chemistry credits that are not counted in the Bachelor of Science in Biochemistry. All departmental and nondepartmental requirements may not be taken S/U and must earn a C- or better final grade.

Requirements
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

2 MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Chemistry - Bachelor of Science

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework. All departmental and nondepartmental requirements may not be taken S/U and must earn a C- or better final grade.

**Total Credits:** 120

1. These courses may have prerequisites and/or co-requisites, and it is the student's responsibility for checking and fulfilling all those requirements.
2. See the General Education (p. 54) section of the catalog for a full list of courses.
3. The Emphasis area is composed of courses outside either chemistry or biochemistry degrees (non-departmental and departmental requirements cannot be used for emphasis area credit). These courses must have a common theme, which complement (whenever possible) principles learned on either chemistry or biochemistry. For example, astronomy and physics courses could be taken as an emphasis area in astrophysics. See a faculty mentor for approval of the courses to be used for an emphasis area. A minimum of 18 credits can be used as an Emphasis area (which could constitute a minor in some cases), but at least nine credits must be upper division.
4. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

Chemistry - Master of Science

The Master of Science in Chemistry is offered in the major emphasis areas of analytical, inorganic, organic, and physical chemistry, and biochemistry. The M.S. degree can be obtained through either a thesis option or a non-thesis option. Both options require at least 30 credits of course work. The thesis option program is designed to teach students modern approaches to chemistry and biochemistry (courses), experimental methods to problem-solving (research), and communication skills in the discipline (seminars and colloquia). All M.S. candidates are required to complete the courses below, pass a qualifying exam at the end of the first year, and pass a final comprehensive examination. Thesis-option students additionally complete a written thesis.

Discussions in Chemistry 1 Seminar 2 Additional Course Requirements 3 Research Credits 4

Total Credits 30-51

3 See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.
4 Students who need to enroll in 15 credits a semester for Financial Aid purposes will need to enroll in additional elective credits to meet that requirement.
Discussions in Chemistry participation is required in at least one of the following courses: CHEM 560, CHEM 570, CHEM 580, or BCHE 590 Discussions in Biochemistry.

Seminar presentation is required in at least one of the following courses: CHEM 510 Graduate Student Seminar, CHEM 520 Comprehensive Literature Review Seminar for Graduate Students, CHEM 530, or BCHE 540 Seminar in Biochemistry.

Additional courses in subsequent years are chosen based on major emphasis area, through consultation with the thesis committee or an advisor.

Information about additional course requirements: Through consultation with the thesis committee (thesis option) or an advisor (non-thesis option), students must complete 9-12 additional course credits. These courses can include BCHE 542 Biochemistry I, BCHE 545 Molecular and Biochemical Genetics, BCHE 546 Biochemistry II, BCHE 647 Physical Biochemistry or BCHE 649 Topics in Biochemistry (Biochemistry); CHEM 507 Chemistry of the Elements (Inorganic); CHEM 514 Organic Structure Determination, CHEM 515 Modern Organic Chemistry, CHEM 516 Physical Organic Chemistry, CHEM 517, or CHEM 619 Topics in Organic Chemistry (Organic); CHEM 521 Chemical Instrumentation CHEM 526 Advanced Analytical Chemistry, CHEM 527 Separations, CHEM 528, CHEM 529 Spectrochemical Analysis, or CHEM 629 Advanced Topics in Analytical Chemistry (Analytical); and CHEM 536, CHEM 537 Quantum Chemistry, CHEM 538 Chemical Kinetics, CHEM 539, or CHEM 639 Topics in Physical Chemistry (Physical).

Chemistry - Doctor of Philosophy

The Ph.D. in chemistry is offered in the major emphasis areas of analytical, inorganic, organic, and physical chemistry and biochemistry. The graduate program is designed to teach students modern approaches to chemistry and biochemistry (courses), experimental methods to problem-solving (research), and communication skills in the discipline (seminars and colloquia). Ph.D. candidates are required to complete the courses below, pass a qualifying exam at the end of the first year, pass both a written and oral comprehensive exam before the fourth year, and prepare a written thesis and pass a final oral examination.

</table>

Beginning in the second semester, all Ph.D. students must enroll in 1 credit of CHEM 510 Graduate Student Seminar, attending each semester. Students are required to prepare a formal presentation of their research work no fewer than twice during graduate study, typically in the 3rd and 4th years. Satisfactory performance in this course also requires attendance of all departmental seminars.

CHEM 520 Comprehensive Literature Review Seminar for Graduate Students is given on a topic of the student’s choice as part of the Comprehensive Exam and will be assigned a letter grade. A grade of C+ or lower will require the student to repeat the course a maximum of once.

Additional courses in subsequent years are chosen based on major emphasis area, through consultation with the thesis committee.

At least 18 credits must be either CHEM 700 Doctoral Dissertation or BCHE 700 Doctoral Dissertation. 700-level research credits are taken after the completion of the comprehensive exam. Remaining credits can be CHEM 600 Research or BCHE 600 Research.

Information about additional course requirements: Through consultation with the thesis committee, students must complete 6-12 additional course credits. These courses can include BCHE 542 Biochemistry I, BCHE 545 Molecular and Biochemical Genetics, BCHE 546 Biochemistry II, BCHE 647 Physical Biochemistry, or BCHE 649 Topics in Biochemistry (Biochemistry); CHEM 507 Chemistry of the Elements (Inorganic); CHEM 514 Organic Structure Determination, CHEM 515 Modern Organic Chemistry, CHEM 516 Physical Organic Chemistry, CHEM 517, or BCHE 546 Molecular and Biochemical Genetics, BCHE 547 Physical Biochemistry, or BCHE 549 Topics in Organic Chemistry (Organic); CHEM 521 Chemical Instrumentation, CHEM 526 Advanced Analytical Chemistry, CHEM 527 Separations, CHEM 528, CHEM 529 Spectrochemical Analysis, or CHEM 629 Advanced Topics in Analytical Chemistry (Analytical); and CHEM 536, CHEM 537 Quantum Chemistry, CHEM 538 Chemical Kinetics, CHEM 539, or CHEM 639 Topics in Physical Chemistry (Physical).

Communication Studies

Undergraduate Program Information

Communication Studies focuses on the complex role that human communication plays in everyday life.

The undergraduate program in Communication Studies is designed to enhance students’ interpersonal skills, presentation skills, and critical thinking skills. Thus the successful graduate should be able to work effectively with people, assimilate, organize and analyze information, solve problems, make effective presentations and show potential for leadership. The program prepares students for careers in several professions, such as training and development, public relations, law, advertising and sales, government service, mediation, customer relations, human resources, international service, fundraising, and the ministry.

Graduate Program Information

The Master of Arts in Communication Studies provides students with a social scientific approach to the study of human interaction, using quantitative and qualitative methods. Our curriculum is designed to explore how communication takes place interpersonally, within organizations, within our political system, and between and within cultures. Students take courses in interpersonal communication,
organizational communication, political communication, and/or cultural communication. All graduate students take courses in communication theory and research methods. In addition, students can take courses in topic areas such as conflict management, small group communication, persuasion, and nonverbal communication.

The program offers a wide variety of courses allowing students an opportunity to select topics pursuant to their special interests. In addition to courses, students have the opportunity to practical experience by participating in professional activities offered by the department; for example, graduate teaching assistantships, research, and colloquia.

Master's Accelerated Program Information
The Master's Accelerated Program is an opportunity for qualified, advanced undergraduate students to begin graduate study while still enrolled as an undergraduate student. Students accepted into the program will be able to take up to 12 credits that can be applied to a Master's degree in Communication Studies at New Mexico State University. This equates to one third of the required credits to obtain a graduate degree in Communication Studies at NMSU.

Student Qualifications
Potential MAP students must meet the minimum qualifications for the program as outlined in the Graduate School policy concerning MAP programs. In addition to these qualifications, students must meet the following requirements in order to be eligible for application to the MAP program.

- Must be a junior or senior
- Must have a GPA of 3.25 or higher
- Must apply to the program with sufficient time to take the 12 credit hours that will be applied toward the overall program of study. (Students will not be able to retroactively apply credits to MAP program).
- Must participate in the online graduate student development program run through the graduate school. (Note: this training must be completed while the student is still an undergraduate student.)

Eligible courses for the MAP Program in Communication Studies
- Students may take any COMM course numbered 500 or higher. If students want to enroll in COMM 505 Research Methods, COMM 506 Qualitative Research Methods in Communication, or COMM 583 Seminar in Theories of Communication, then they must receive permission from the Department Head.
- Students may elect to take all 12 credits numbered 500 or higher.
- Students have the option to take the following:
  - Any two courses (6 credits) numbered 450 or above in the Department of Communication Studies.
  - Students will not be allowed to use more than two courses (6 credits) for credit toward a graduate degree in Communication Studies. If a student uses courses numbered 450 or greater in the MAP program (up to 6 credits), then that student will not be able to use any other course below 500 to count toward the M.A. in Communication Studies.
- Graduate courses do not substitute for undergraduate core courses unless approved by the professor teaching the graduate course.
- Students who are accepted into the Communication Studies MAP program will only be allowed to matriculate into the graduate program in Communication Studies at NMSU.

• Students who enroll in a MAP program other than Communication Studies will not be able to apply those credits toward a graduate degree in Communication Studies at NMSU.

Professors J. Flora, A. Hubbell, Associate Professor G. Armfield, Assistant Professor S. Lee, G. Morales, Professor Emeritus K. Hacker

G. Armfield, Ph.D. (University of Missouri-Columbia) – communication and sport and organizational communication; J. Flora, Ph.D. (University of Kansas) – family communication and interpersonal communication; A. Hubbell, Ph.D. (Michigan State University) – health communication and organizational communication; S. Lee, Ph.D. (University of Wisconsin-Madison) – Digital Media Technologies and Political Communication; G. Morales, Ph.D. (University of New Mexico) – Communication and Culture and Health Communication.

Communication Studies Courses
COMM 1115G. Introduction to Communication
3 Credits (3)
This survey course introduces the principles of communication in the areas of interpersonal, intercultural, small group, organizational, public speaking, and mass and social media.

Learning Outcomes
1. Describe basic communication terms, forms and concepts.
2. Identify basic communication research methods and theories.
3. Explain the significance of ethics and diversity in communication processes.
4. Apply various concepts and skills in multiple communication contexts
COMM 1130G. Public Speaking
3 Credits (3)
This course introduces the theory and fundamental principles of public speaking, emphasizing audience analysis, reasoning, the use of evidence, and effective delivery. Students will study principles of communication theory and rhetoric and apply them in the analysis, preparation and presentation of speeches, including informative, persuasive, and impromptu speeches.

Learning Outcomes
1. Demonstrate effective speech preparation.
2. Demonstrate effective speech delivery through use of language, nonverbal elements and the creation of presentation aids.
3. Analyze a potential audience and tailor a speech to that audience.
4. Evaluate presentations according to specific criteria.
5. Explain common propaganda techniques and logical fallacies, and identify them in the speech of others.
6. Recognize diversity and ethical considerations in public speaking.

COMM 2110. Communication Theory
3 Credits (3)
This course provides an exploration of major theories, concepts and methods of research in the study of human communication.

Learning Outcomes
1. Identify, explain, and illustrate key concepts and principles of the major traditions of communication theory.
2. Analyze practical problems and situations using theories.
3. Integrate research correctly and ethically from credible sources to support the primary purpose of communication.

COMM 2111. Introduction to the Communication Major
1 Credit (1)
This is a one-credit course for new Communication Studies majors. It helps them get acquainted with the department, the department head (professor for this course, the professors, other students, and the department student organizations. It also deals with degree mapping and career mapping and any problems the students are having in their first year. Finally, the students learn about the the Communication Studies discipline and various communication careers they can pursue with their degree. The class meets one day each week for one hour. Restricted to: Communication Studies majors. Restricted to Las Cruces campus only.

Learning Outcomes
1. To give you some knowledge about your major and this department.
2. To help you learn more about the study of human communication in general and we approach it in our various courses.
3. To make you comfortable with the department, its professors and graduate students, as well as staff.
4. To assist you in finding important resources for earning your degree in Communication Studies with a high GPA.
5. To engage you and your concerns in earning your degree.
6. To advise you in ways that match your goals with the department goals.

COMM 2996. Special Topics
1-3 Credits
Specific subjects and credits to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Learning Outcomes
1. Varies

COMM 2997. Independent Study
1-3 Credits
Individualized, self-paced projects for students with a special interest in communication topics. May be repeated for a maximum of 6 credits.

Prerequisites: COMM 1115G and sophomore standing.

Learning Outcomes
1. Varies

COMM 305. Communication Research Methods
3 Credits (3)
Introductory course in communication research. Emphasis on how to be an effective consumer of research.

COMM 310. Communication Theory and Discovery
3 Credits (3)
This course combines the content of the former COMM 2110 and COMM 305 courses. The course explores the nature of communication science, major communication theories, and how communication research is conducted and interpreted.

COMM 351. Persuasion Theory and Practice
3 Credits (3)
Training in understanding and applying the principles and techniques of argumentation and persuasion.

COMM 370. Organizational Communication
3 Credits (3)
Communication strategies and patterns of private and governmental organizations, including research on the communication process.

COMM 376. Communication and Culture
3 Credits (3)
Cultural and intercultural communication theory and behavior, with a concentration on the development of specific communication skills which should facilitate effective intercultural communication.

COMM 377. Conflict Management
3 Credits (3)
Communication strategies to manage and negotiate conflict in intrapersonal, interpersonal, group, and organizational settings.

COMM 384. Interpersonal Communication
3 Credits (3)
Theories of interpersonal communication and relational communication including study of relevant models, contexts and constructs.

COMM 425. Small Group Communication
3 Credits (3)
Principles and methods of modern group discussion with emphasis on the role of the group in problem solving.

COMM 440. Political Communication
3 Credits (3)
Presidential and congressional campaigns, political persuasion techniques, political advertising, power in language, and media aspects of political information. Ideology, resistance to political manipulation, and dependence of democracies on communication.

COMM 450. Technologies of Human Communication
3 Credits (3)
Development and evolution of human communication technologies from prehistory through the future of computer-mediated communication networks. Examines behavioral, cognitive, social, cultural, and political issues of new communication technologies and their use and management.

Prerequisite: junior or senior standing.
COMM 455. Fundamentals of Communication and National Security
3 Credits (3)
This course addresses communication perspectives informing national security, strategic intelligence, and the intelligence process. Students will examine U.S. national security history, policy, the development of the Intelligence Community, and intelligence as processes of communication. This course serves as an introduction to national security studies.

COMM 456. Communication and the Intelligence Cycle
3 Credits (3)
The course addresses communication requirements and the technical, cognitive, and cultural complexity of the collaborative research environment. Students participate in novel, team-based problem scenarios that provide the foundation for acquiring advanced cognitive analytic methods and strategies. Students will engage in interdisciplinary information science processes and will develop and present analytic products responding to national security requirements.

COMM 457. Strategic Communication and Public Diplomacy
3 Credits (3)
This course covers history, theory, and research related to the use of communication to change attitudes in favor of U.S. national security interests. Students will examine the use of strategic communication and influence in diplomacy, intelligence, and military communities in terms of specific strategies, effects, and issues. Students will learn to distinguish public diplomacy, information operations, public affairs, and other forms of political communication that are used by the U.S. government to persuade target populations about American interests and goals. Topics include soft power, intelligence-based negotiation processes, and research methods used to identify influence techniques or groups that threaten U.S. national security.

COMM 458. Intercultural Communication and National Security
3 Credits (3)
This course provides a concentration on cultural factors in international affairs and conflicts, how culture affects perceptions of national interests, and the relationship of U.S. national security to understand the general and political cultures of other nations. Students will integrate cultural and intercultural communication theory and behavior, with an emphasis on the development of specific communication skills to facilitate developing cultural knowledge in government and political contexts. Students will learn how to study the cultural factors that affect international conflicts and how strategic communication should address such cultural factors.

COMM 460. Deception and Communication
3 Credits (3)
Deceptive communication including nonverbal indicators of lies, types of lies, and influence of relationships on lying behavior and interpretation.

COMM 462. Family Communication
3 Credits (3)
A communication perspective on traditional and nontraditional family configurations, roles, interaction patterns, and conflict. Includes an examination of media depictions of families and family interaction, as well as current social and political issues related to the family.

COMM 465. Nonverbal Communication
3 Credits (3)
Study of and experimentation with nonverbal aspects of human communication as vital components of the total communication process.

COMM 467. Leadership Communication
3 Credits (3)
Examination of traditional theories and concepts of leader-follower dynamics; presentation of cognitive, systems, and symbolic interpretative views of leadership with an emphasis on persuasion and motivation in leader-follower interactions.

COMM 471. Sports Communication
3 Credits (3)
This course provides a senior-level exploration of the role sports and sports communication plays in contemporary culture. Readings will examine the interrelationship between sports and media in society, the identities that fans assume when engaging in fanship and sports viewership, the pervasiveness of sports communication practices in the sports industry, the role of media in story telling, and the way cultural identifiers of class, ethnicity, and gender play out in the media. This is taught with COMM 571.

COMM 475. International Communication
3 Credits (3)
Exploration of the forms and channels of communication substantially influenced by international cultural and political factors. Covers: global communication technology; news, information and entertainment flows; international diplomacy and negotiation, communication in war and peace.

COMM 477. Environmental Communication
3 Credits (3)
Examines the link between communication and environment within the context of communication scholarship. Topics include sense of place, cultural approaches to interacting with environment as well as exploring current themes surrounding environment.

COMM 480. Health Communication
3 Credits (3)
Examination of central issues in communication theory and practice as applied to health care. Includes communication in health care organizations, media dissemination of health information, role of communication in disease prevention and health promotion, and symbolic meaning of illness within cultures.

COMM 485. International Teaching Assistant Development
3 Credits (3)
International teaching assistants will receive instruction in communicative skills to enable them to meet their responsibilities at NMSU. Course includes lectures, seminars, video-taped presentations, and tutorial sessions emphasizing pedagogic and presentation skills and styles.

Prerequisite: consent of instructor.

COMM 490. Independent Study
1-3 Credits
Individualized, self-paced projects for advanced students. May be repeated for a maximum of 6 credits.

Prerequisites: COMM 1115G and junior standing with consent of participating instructor.

COMM 491. Selected Topics
1-6 Credits
Individual and/or group study of selected topics. To be identified by subtitle. May be repeated for a maximum of 12 credits.

Prerequisite: prior arrangement with faculty supervisor(s).
COMM 495. Communication Internship
3 Credits (3)
Internship opportunity to apply what has been learned to a real-world situation. May be repeated for a maximum of 6 credits. Restricted to majors.
Prerequisite: junior standing and 3.0 GPA in major.

COMM 505. Research Methods
3 Credits (3)
Seminar in the quantitative study of human communication phenomena, research design, and statistical analysis.

COMM 506. Qualitative Research Methods in Communication
3 Credits (3)
Survey of qualitative research methods in the study of human communication, including historical and critical approaches, interviewing, participant-observation, and communication ethnography. Students apply methods to their own research.

COMM 540. Seminar in Political Communication
3 Credits (3)
Political communication theory, research, and issues. Empirical studies of campaigns, movements, news media, voter decision-making, political participation, socialization, and knowledge. Political theory, field research, communication science findings and research methods.

COMM 550. Seminar in Communication Technologies
3 Credits (3)
Seminar on design, usage, and social impact of electronic mail, communication through computer networks, and new technologies of organizational communication such as group decision support systems (GDSS). Each student will study an actual application of a major communication technology in an organization.

COMM 551. Seminar in Persuasion
3 Credits (3)
Work with an actual persuasion campaign, such as public information, political, or commercial marketing campaigns. Includes case studies of large-scale persuasion efforts, current theoretical models of persuasion processes, and methods for studying, evaluating, and refining messages for optimal effects.
Prerequisite: COMM 351 or consent of instructor.

COMM 555. Seminar Fundamentals of Communication and National Security
3 Credits (3)
This seminar course addresses communication perspectives informing national security, strategic intelligence, and the intelligence process. Students will examine U.S. national security history, policy, the development of the Intelligence Community, and intelligence as processes of communication. This course serves as an introduction to national security studies. Graduate students are required to fulfill advanced research and presentation requirements.

COMM 556. Seminar Communication and the Intelligence Cycle
3 Credits (3)
This seminar course addresses communication requirements and the technical, cognitive, and cultural complexity of the collaborative research environment. Students participate in novel, team-based problem scenarios that provide the foundation for acquiring advanced cognitive analytic methods and strategies. Students will engage in interdisciplinary information science processes and will develop and present analytic products responding to national security requirements. Graduate students will be required to fulfill advanced research and presentation requirements.

COMM 557. Seminar Strategic Communication and Public Diplomacy
3 Credits (3)
The seminar course covers history, theory, and research related to the use of communication to change attitudes in favor of U.S. security interests. Students will examine the use of strategic communication and influence in diplomacy, intelligence, and military communities in terms of specific strategies, effects, and issues. Students will learn to distinguish public diplomacy, information operations, public affairs, and other forms of political communication that are by the U.S. government to persuade target populations about American interests and goals. Topics include soft power, intelligence-based negotiation processes, and research methods used to identify influence techniques of groups that threaten U.S. national security. Graduate students will be required to fulfill advanced research and presentation requirements.

COMM 558. Seminar Intercultural Communication and National Security
3 Credits (3)
The seminar course provides a concentration on cultural factors in international affairs and conflicts, how culture affects perceptions of national interests, and the relationship of U.S. national security to understand the general and political cultures of other nations. Students will integrate cultural and intercultural communication theory and behavior, with an emphasis on the development of specific communication skills to facilitate developing cultural knowledge in government and political contexts. Students will learn how to study the cultural factors that affect international conflicts and how strategic communication should address such cultural factors. Graduate students will be required to fulfill advanced research and presentation requirements.

COMM 562. Seminar in Family Communication
3 Credits (3)
This course examines cutting edge research on family communication, as well as classic theories and research findings that have influenced and revolutionized the way scholars conceptualize family interaction. Topics include basic family communication processes, communication in family subsystems, communication during family stress, and the role of family interaction in health and well-being. Students will explore how family relationships are built, maintained, and destroyed by communication as well as the potentially important and long lasting effects of family relationships on individuals.

COMM 565. Seminar in Nonverbal Communication
3 Credits (3)
This course focuses on human physical behaviors as the basis of communication between persons. This physical behavior includes such variables as the voice, face, eyes, posture, gesture, space, territory, clothing, and touch. The content of the course considers the individual and social factors affecting the production of such behaviors, and the effects of such behaviors on others’ attitudes, perceptions, cognitions, and relationships. Applications of research and theory in nonverbal communication to infant development, personality, sex differences, marital satisfaction, relationship development, culture, aging, and brain functioning are also studied throughout the course.

COMM 570. Seminar in Organizational Communication
3 Credits (3)
Communication strategies and patterns of private and governmental organizations, including research on communication systems.
COMM 571. Seminar in Sports Communication  
3 Credits (3)  
This seminar provides a graduate-level exploration of the role sports and sports communication plays in contemporary culture. Readings will examine the interrelationship between sports and media in society, the identities that fans assume when engaging in fanship and sports viewership, the pervasiveness of sports communication practices in the sports industry, the role of media in story telling, and the way cultural identifiers of class, ethnicity, and gender play out in the media. This is taught with COMM 471.  

COMM 576. Seminar on Communication and Culture  
3 Credits (3)  
Cultural and intercultural communication theory and research. Focuses on discovering and describing distinctive ways of speaking within and between cultures.

COMM 583. Seminar in Theories of Communication  
3 Credits (3)  
Communication systems, symbolic processes, analysis of messages.

COMM 584. Seminar in Interpersonal Communication  
3 Credits (3)  
Theories of interpersonal communication and communication within a relationship, including study of relevant models, contexts, and constructs.

COMM 590. Independent Study  
1-6 Credits  
Individualized, self-paced projects.  
Prerequisite: consent of instructor.

COMM 591. Special Topics  
1-9 Credits  
Individual and/or group study of special topics. To be identified by subtitle.  
Prerequisite: prior arrangement with faculty supervisor(s).

COMM 595. Communication Internship for Graduate Students  
3 Credits (3)  
Internship opportunity to apply what students have learned to the real world. Restricted to majors.  
Prerequisite: 9 credits of M.A. degree.

COMM 598. MA PROJECT  
1-6 Credits (1-6)  
Project credits are used for the master's degree project option. May be repeated up to 6 credits. Restricted to: Comm Studies graduate majors only. majors.

COMM 599. Master's Thesis  
1-15 Credits  
Thesis.  
Department Head: Greg G. Armfield, Ph.D.

Communication Studies - Bachelor of Arts  
In addition to completing the general education requirements of the university and the college, students majoring in communication studies are required to complete 21 credits of core COMM courses and 15 credits of COMM electives for a total of 36 credits. Any exception to these policies requires department head approval.  

All COMM courses must be completed with a grade of C- or better.

Undergraduate Course Rotation:

Fall
COMM 310 Communication Theory and Discovery  
COMM 376 Communication and Culture  
COMM 384 Interpersonal Communication  
Spring
COMM 351 Persuasion Theory and Practice  
COMM 370 Organizational Communication  
COMM 495 Communication Internship

Requirements
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Departmental/College Requirements  
Core Courses  
18  
The department requires 21 total credits of Core Courses with the classes listed below and COMM 265G from the General Education requirements

COMM 310 Communication Theory and Discovery
Second Language Requirement

For the Bachelor of Arts in Communication Studies there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement.

Option 1:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIN 1110 &amp; CHIN 1220</td>
<td>Mandarin Chinese I and Mandarin Chinese II</td>
<td>4-8</td>
</tr>
<tr>
<td>FREN 1110 &amp; FREN 1120</td>
<td>French I and French II</td>
<td>4-8</td>
</tr>
<tr>
<td>GRMN 1110 &amp; GRMN 1120</td>
<td>German I and German II</td>
<td>4-8</td>
</tr>
<tr>
<td>JAPN 1110 &amp; JAPN 1120</td>
<td>Japanese I and Japanese II</td>
<td>4-8</td>
</tr>
<tr>
<td>SPAN 1110 &amp; SPAN 1120</td>
<td>Spanish I and Spanish II</td>
<td>4-8</td>
</tr>
<tr>
<td>PORT 1110 &amp; PORT 1120</td>
<td>Portuguese I and Portuguese II</td>
<td>3-6</td>
</tr>
</tbody>
</table>

For Heritage Speakers:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN 1210 &amp; SPAN 1220</td>
<td>Elementary Spanish for Heritage Learners I and Spanish for Heritage Learners II</td>
<td>3-6</td>
</tr>
<tr>
<td>or SPAN 2210</td>
<td>Spanish for Heritage Learners III</td>
<td>4-8</td>
</tr>
</tbody>
</table>

Option 2:

Complete the following sequence for American Sign Language (with a C- or better):

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SIGN 1110 &amp; SIGN 1120</td>
<td>American Sign Language I and American Sign Language II</td>
<td>3-6</td>
</tr>
</tbody>
</table>

Option 3:

Challenge or complete the 1120 level for the following courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIN 1120</td>
<td>Mandarin Chinese II</td>
<td>4</td>
</tr>
<tr>
<td>or FREN 1120</td>
<td>French II</td>
<td>4</td>
</tr>
<tr>
<td>or GRMN 1120</td>
<td>German II</td>
<td>4</td>
</tr>
<tr>
<td>or JAPN 1120</td>
<td>Japanese II</td>
<td>4</td>
</tr>
<tr>
<td>or SPAN 1120</td>
<td>Spanish II</td>
<td>4</td>
</tr>
</tbody>
</table>

OR

Challenge or complete the 1120/1220/2210 level for the following courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PORT 1120</td>
<td>Portuguese II</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 1220</td>
<td>Spanish for Heritage Learners II</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 2210</td>
<td>Spanish for Heritage Learners III</td>
<td>3</td>
</tr>
<tr>
<td>or SIGN 1120</td>
<td>American Sign Language II</td>
<td>3</td>
</tr>
</tbody>
</table>

Option 4:

Participate in an experiential learning study abroad course sponsored by NMSU or an approved International Internship that enhances the students’ cultural competency through cultural understanding and experience. Please meet with the head of the Department of Communication Studies for information. Students must pass the course with a C- or higher.

Option 5:

Pass (with a C- or higher) any three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

Option 6:

Obtain college certification of completion of two years of a second language at the high school level with a grade of C- or higher in the second-year level.

Option 7:

By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

Option 8:

By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

Option 9:

In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Note: If any of the above courses are not available the department will consider course substitutions.

### Communication Studies - Undergraduate Minor

A minor in Communication Studies consists of 18 credits; at least 9 of those credits must be in courses numbered 300 or above. All courses must be completed with grades of “C-” or better.

<table>

Note: If any of the above courses are not available the department will consider course substitutions.
Communication Studies - Master of Arts

The department offers thesis, comprehensive exam, and applied project options in its Masters of Arts program. All options require a minimum of 36 credits, which includes not only Communication Studies courses but at least one course from outside the department. The thesis option requires at least 30 credits of coursework, 6 credits of thesis hours (COMM 599 Master’s Thesis), and an oral defense of the thesis and coursework. The comprehensive exam option requires 36 credits of coursework, plus six hours of written examination, followed by an oral defense. The applied project option requires at least 30 credits of coursework, 6 credits of project hours (COMM 598 MA PROJECT) and an oral defense of the project and coursework. All options require a minimum of 30 credit hours of Communication Studies courses.

Select 15 credits from Communication Studies electives for the thesis option. Take 15 credits plus at least 3 credits from related disciplines for the comprehensive exam option. Two courses (6 credits) for courses that have numbers 450+ can be counted. For all options, a total of 36 credits is required.

An M.A. Tracking Form for thesis, comprehensive exam, and applied project options is found on the department website.

Graduate course rotation:

Fall
COMM 540 Seminar in Political Communication
COMM 570 Seminar in Organizational Communication
COMM 583 Seminar in Theories of Communication

Spring
COMM 505 Research Methods/COMM 506 Qualitative Research Methods in Communication
COMM 576 Seminar on Communication and Culture
COMM 584 Seminar in Interpersonal Communication

Thesis Option:

Prefix  Title  Credits
COMM 505  Research Methods  3
or COMM 506  Qualitative Research Methods in Communication  3
COMM 583  Seminar in Theories of Communication  3
Select three courses from the following:  9
COMM 540  Seminar in Political Communication  3

Total Credits  36

In order to graduate, students will need a total of 36 credits, of which 30 credits must be from COMM coursework. Please consult your advisor about your specific requirements and how to complete them in order to graduate.

Comprehensive Exam Option:

Prefix  Title  Credits
COMM 505  Research Methods  3
or COMM 506  Qualitative Research Methods in Communication  3
COMM 583  Seminar in Theories of Communication  3
Select three courses from the following:  9
COMM 540  Seminar in Political Communication  3
COMM 570  Seminar in Organizational Communication  3
COMM 576  Seminar on Communication and Culture  3
COMM 584  Seminar in Interpersonal Communication  3
Select 9-12 credits from COMM Electives  9-12
Select 3-6 credits must be from courses in Related Fields (outside of COMM courses and must be numbered 450+)  3-6
Total Credits  36

In order to graduate, students will need a total of 36 credits, of which 30 credits must be from COMM coursework. Please consult your advisor about your specific requirements and how to complete them in order to graduate.

Applied Project Option:

Prefix  Title  Credits
COMM 505  Research Methods  3
or COMM 506  Qualitative Research Methods in Communication  3
COMM 583  Seminar in Theories of Communication  3
Select three courses from the following:  9
COMM 540  Seminar in Political Communication  3
COMM 570  Seminar in Organizational Communication  3
COMM 576  Seminar on Communication and Culture  3
COMM 584  Seminar in Interpersonal Communication  3
Select 9-12 credits from Electives in Related Fields, 3-6 credits from (graduate levels; numbered 450+).  9-12
Select 3-6 credits must be from courses in Related Fields (outside of COMM courses and must be numbered 450+)  3-6
Total Credits  36
In order to graduate, students will need a total of 36 credits, of which 30 credits must be from COMM coursework. Please consult your advisor about your specific requirements and how to complete them in order to graduate.

A GPA of 3.0 or better must be maintained overall and grades in each course must be a B or better.

**Entrance Requirements for Graduate Study in Communication Studies**

Students wishing to enroll in the Master program in Communication Studies must meet the following criteria:

1. Hold a BA or BS degree, from an accredited institution of higher learning; Social Science disciplines are preferred.
2. Hold a minimum grade point average of 3.00

*The Graduate Record Exam (GRE) General Test is not required for admission; however, existing GRE scores that are high will strengthen a candidate's application and are highly regarded in the awarding of Graduate Assistantships.*

**Communication and National Security - Graduate Minor**

This minor is aimed at graduate students who seek employment in national security, intelligence, international business, military affairs in other nations, and other positions which require knowledge of how communication affects the national image of the United States and how Americans communicate with members of other cultures about political matters. Graduate students will be required to write a special analysis for each course that is not required of the undergraduate students. Each graduate student will also be required to present a one-hour lecture on an area of research specialization.

**Requirements**

Students will take three of four courses below plus one outside course approved by the department. The list below is our expected course rotation.

**Communication Studies - Graduate Minor**

Students who wish to take a minor in Communication Studies will need to accumulate a minimum of 9 graduate credits in Communication Studies courses. Students are encouraged to contact the Communication Studies Department Head for direction in the selection of courses.

**Computer Science**

Computer Science is the area of study that encompasses all of the theory and practice of computing. The mission of the Department of Computer Science at New Mexico State University is to provide formal education in the core disciplines of computer science, as well as to prepare our graduates for research, development and academic careers. For more information on the Department of Computer Science, please visit the website [www.cs.nmsu.edu](http://www.cs.nmsu.edu).

**Undergraduate Program Information**

The undergraduate computer science programs prepare students for graduate study in computer science and for employment in positions involving the design, construction and application of computer systems. Undergraduate degree programs include a Bachelor of Science (ABET accredited), Bachelor of Arts, and four minor degree tracks. The B.S. degree is the traditional computer science degree program, while the B.A. degree offers a more open, flexible degree plan that is easier to combine with studies in other disciplines. The minors offer specialized tracks in algorithm theory, bioinformatics, computer systems and software development. With technology underpinning almost every area of human endeavor today, students across NMSU should consider pursuing a minor or at least taking some computer science courses. Computer science majors should review their programs of study in consultation with their advisors each semester, preferably using the most recent Undergraduate Catalog.

**Graduate Program Information**

The department offers both Master of Science and Doctor of Philosophy graduate degrees in computer science, along with a Master of Science in Bioinformatics. We also encourage students in other disciplines to do a graduate minor in computer science. Graduate students typically work closely with a faculty member in a specific area of research. The department offers expertise in several research areas, such as: artificial intelligence and knowledge representation; computer and wireless networks; data mining and machine learning; game design and human-computer interaction; bioinformatics; high performance computing; software engineering and programming languages; theory of computing; and assistive technologies.

A number of laboratories have been established to coordinate research activities, including:

- the Knowledge representation, Logic and Advanced Programming (KLAP) lab;
• the Play and Interactive Experiences for Learning (PtxL) lab;
• the Knowledge Discovery and Data Mining (KDD) lab;
• the Programming Languages, Environments, and Automated Software Engineering (PLEASE) lab;
• the Bioinformatics Research lab;
• the Multimedia Management lab;
• the Cryptography, Privacy and Security Research (CrySPR) lab; and
• the Network and Systems Optimization Lab (NSOL).

Department members are also directing the iCREDITS interdisciplinary Center of Research Excellence in Design of Intelligent Technologies for Smartgrids, offering educational and research opportunities in smartgrids.

**Entrance Requirements for Graduate Study in Computer Science**

The Graduate Record Exam (GRE) General Test is not required for admission; however, high GRE scores will strengthen a candidate’s application and are highly regarded in the awarding of Graduate Assistantships. To be admitted without undergraduate deficiencies, an entering student must have completed undergraduate preparation substantially equivalent to that required for the Bachelor of Science degree in Computer Science at New Mexico State University; in particular, this includes courses equivalent to

Deficiencies should be satisfied as early in the student graduate program as possible, through the regular undergraduate courses, the C S 460 - C S 468 transition courses, or through tests administered by faculty members in the relevant areas. Students should consult with their Graduate Advisor to address issues related to deficiencies. Deficiencies are also assigned to applicants whose transcripts denote low grades in selected areas. Admission is often denied to candidates with little background in Computer Science. Instructions for prospective applicants can be found at [https://www.cs.nmsu.edu](https://www.cs.nmsu.edu).

**Entrance Requirements for Graduate Study in Bioinformatics**

The Graduate Record Exam (GRE) General Test is not required for admission; however, high GRE scores will strengthen a candidate’s application and are highly regarded in the awarding of Graduate Assistantships. Students wishing to enroll in the Master program in Bioinformatics must meet the following criteria:

1. Hold a BS degree, from an accredited institution of higher learning, in either a computational field (e.g., Computer Science) or in life sciences (preferably Biology, Biochemistry, or Environmental Sciences)
2. Hold a minimum grade point average of 3.2

Applicants will be expected to provide a Career statement, motivating the interest in bioinformatics and a minimum of three letters of reference.

**Graduate Assistantships**

Graduate assistantships (in the form of Teaching and Research assistantships) are expected to be available during the academic year. Inquiries should be addressed to the departmental Graduate Committee. Research assistantships are available at the discretion of individual research project leaders in the Department or elsewhere on campus. Submitting detailed vitae, letters of reference, and GRE test scores are encouraged when applying for any assistantship.

**Degrees for the Department**

**Bachelor Degree(s)**

- Computer Science - Bachelor of Arts (p. 383)
- Computer Science - Bachelor of Science (p. 386)
- Computer Science (Algorithm Theory) - Bachelor of Science (p. 388)
- Computer Science (Artificial Intelligence) - Bachelor of Science (p. 391)
- Computer Science (Big Data and Data Science) - Bachelor of Science (p. 393)
- Computer Science (Computer Networking) - Bachelor of Science (p. 396)
- Computer Science (Cybersecurity) - Bachelor of Science (p. 398)
- Computer Science (Human Computer Interaction) - Bachelor of Science (p. 400)
- Computer Science (Software Development) - Bachelor of Science (p. 403)
- Cybersecurity - Bachelor of Science (p. 405)

**Bachelor-Master Degree(s)**

- Computer Science - Bachelor of Science/Master of Science (p. 407)

**Master Degree(s)**

- Bioinformatics - Master of Science (p. 409)
- Data Analytics - Master of Data Analytics
- Data Analytics - Master of Data Analytics (Online)
- Computer Science - Master of Science (p. 411)

**Doctoral Degree(s)**

- Computer Science - Doctor of Philosophy (p. 412)

**Minors for the Department**

**Undergraduate**

A student cannot earn more than one of the undergraduate minors unless they pass at least 6 credits in the second minor beyond the requirements of the first minor. The maximum number of undergraduate minors that a student may earn is two. Most courses for the minors listed below have prerequisites. Please check the undergraduate catalog for individual course prerequisites. Students interested in pursuing a computer science
minor are encouraged to pick up more information at the departmental office.

Algorithm Theory - Undergraduate Minor (p. 408)
Bioinformatics - Undergraduate Minor (p. 408)
Computer Systems - Undergraduate Minor (p. 408)
Software Development - Undergraduate Minor (p. 409)

Graduate
Computer Science - Graduate Minor (p. 413)

Faculty
Professor Son Tran, Department Head

Professors Cook, Pontelli, Misra, Song, Tran; Associate Professors Cao, Pivkina, Toups; Assistant Professors Hamdi, Hamilton, Le, Nagarkar, Vishwanathan, Wang; College Professor, Distinguished Steiner; College Associate Professor Cooper

H. Cao, Ph.D. (Hong-Kong)—data mining, databases, data integration, applied machine learning; J. Cook, Ph.D. (Colorado)—software engineering, high performance computing; S. Hamdi, Ph. D. (Georgia State)—machine learning, data mining, deep learning, graph representation learning; W. Hamilton, Ph.D. (Texas A&M)—media design, online communities, online education, and video game design/culture; T. Le, Ph.D. (Singapore Management University, Singapore)—data mining and machine learning, dimensionality reduction, visualization, topic models, embedding and generative models; S. Misra, Ph.D. (Arizona State)—communication networks, social networks, high performance computing, security and privacy; P. Nagarkar, Ph.D. (Arizona State)—query optimization, indexing, data analytics, big data; I. Pivkina, Ph.D. (Kentucky)—artificial intelligence, computer science education, data mining; E. Pontelli, Ph.D. (New Mexico State)—parallel processing, logic programming, knowledge representation, bioinformatics, assistive technologies; M. Song, Ph.D. (Washington)—statistical computing, systems biology, bioinformatics, computer vision; Z Toups, Ph.D. (Texas A&M)—digital games, human-computer interaction, mixed reality; S. Tran, Department Head, Ph.D. (Texas-El Paso)—artificial intelligence, knowledge representation, planning, logic programming, non-monotonic reasoning; R. Vishwanathan, Ph.D. (North Texas)—cyber-physical system security, web security, network security.  

College Faculty:
S. Cooper, Ph.D. (New Mexico State)—computer networks; E. Steiner, Ph.D. (Oklahoma State)—computer science education

Computer Science Courses
C S 117. Introduction to Computer Animation
3 Credits (3)
Introductory course for learning to program with computer animation as well as learning basic concepts in computer science. Students create interactive animation projects such as computer games and learn to use software packages for creating animations in small virtual worlds using 3D models. Recommended for students considering a minor/major in computer science or simply interested in beginning computer animation or programming.

Prerequisite: MATH 1215 or higher.
Learning Outcomes
1. Use various data types and the corresponding operations. Write C++ programs that contain expressions, program control, functions, arrays, and input/output. Explain basic object-oriented programming concepts. Demonstrate proficiency in using classes, inheritance, pointers, streams, and recursion.

C S 152. Java Programming
3 Credits (2+2P)
Programming in the Java language. May be repeated up to 3 credits.

Prerequisite(s): MATH 1215 or higher.

C S 153. Python Programming I
3 Credits (3)
This course is an introduction to programming in the Python language, covering fundamental scripts, data types and variables, functions, and simple object creation and usage. The focus will be on preparing students to use Python in their own areas. No prior programming experience is required. Taught with C S 453.

Prerequisite: MATH 1215 or higher.

Learning Outcomes
1. Develop an algorithm to solve a problem. Demonstrate the ability to use Python data types: int, float, strings, and lists; and the built-in functions associated with those data types. Edit and debug programs using the Spyder IDE for Python. Implement algorithms using the Python features of assignment, input, output, branches, loops, and functions. Explain the fundamental concepts of object-oriented programming with Python Design and implement Python classes based on given attributes and behaviors. Work with existing Python modules such as math, random, and os. Write Python programs that input data from files and store results in files.

C S 154. Python Programming II
3 Credits (3)
This course covers advanced Python programming, including classes, objects, and inheritance, embedded programming in domain applications, database interaction, and advanced data and text processing. The focus will be on preparing students to use Python in their own areas.

Prerequisite(s): C S 153 or C S 453.

C S 157. Topics in Software Programming and Applications
3 Credits (2+2P)
Current topics in computer programming and software applications. Topic announced in the Schedule of Classes. May be repeated if subtitle is different.
C S 158. R Programming I
3 Credits (3)
This course is an introduction to data processing in the R language, covering fundamental script configuration, data types and data collections, R control structures, and basic creation of graphs and data visualizations. This course will not focus on the statistical capabilities of R, though some basic statistical computations will be used.
Prerequisite(s): MATH 1220G.

C S 171G. Introduction to Computer Science
4 Credits (3+2P)
Computers are now used widely in all area of modern life. This course provides understanding of the theoretical and practical foundations for how computers work, and provides practical application and programming experience in using computers to solve problems efficiently and effectively. The course covers broad aspects of the hardware, software, and mathematical basis of computers. Weekly labs stress using computers to investigate and report on data-intensive scientific problems. Practical experience in major software applications includes an introduction to programming, word processing, spreadsheets, databases, presentations, and Internet applications.
Prerequisite(s): MATH 1130G or MATH 1215 or higher.

C S 172. Computer Science I
4 Credits (3+2P)
Computational problem solving; problem analysis; implementation of algorithms using Java. Object-oriented concepts, arrays, searching, sorting, and recursion. Taught with C S 460.
Prerequisite: (A C or better in either MATH 1250G or MATH 1430G) OR (A C or better in MATH 1220G and a 1 or better in the CS Placement Test).

Learning Outcomes
1. Develop algorithms to solve problems Implement algorithms using the C and C++ languages including imperative and object-oriented language features. Beyond what was learned in C S 172, E E 112, or E E 161 demonstrate a noticeable increase in understanding of problem analysis and program design. Demonstrate proficiency in using control structures including if statements (single selection), switch (multiple selection), and loops (repetition). Demonstrate proficiency in using arrays and functions Create UML class and relationship diagrams. Design a class to model a real-world person, place, thing, or event. Use editing and debugging software to create, debug, and test C and C++ programs. Understand the basic terminology used in object-oriented programming. 1 Create a make file to build an executable from a set of C or C++ source files.

C S 271. Object Oriented Programming
4 Credits (3+2P)
Prerequisite: At least a C- in C S 172 or E E 112.

Learning Outcomes
1. Develop an algorithm to solve a problem. Implement algorithms using the C and C++ languages including imperative and object-oriented language features. Beyond what was learned in C S 172, E E 112, or E E 161 demonstrate a noticeable increase in understanding of problem analysis and program design. Demonstrate proficiency in using control structures including if statements (single selection), switch (multiple selection), and loops (repetition). Demonstrate proficiency in using arrays and functions Create UML class and relationship diagrams. Design a class to model a real-world person, place, thing, or event. Use editing and debugging software to create, debug, and test C and C++ programs. Understand the basic terminology used in object-oriented programming. 1 Create a make file to build an executable from a set of C or C++ source files.

C S 272. Introduction to Data Structures
4 Credits (3+2P)
Design, implementation, use of fundamental abstract data types and their algorithms: lists, stacks, queues, deques, trees; imperative and declarative programming. Internal sorting; time and space efficiency of algorithms. Taught with C S 463.
Prerequisite: At least a C- in C S 172, or placement.

Learning Outcomes
1. Be able to implement and use lists Be able to implement and use stacks Be able to implement and use queues Be able to implement and use trees Be able to perform the run time analysis of basic algorithms using Big O notation Be able to implement, use, and analyze searching algorithms Be able to solve a problem recursively Take a problem statement from a user and convert it into a Java program that fulfills the user's needs Create object oriented Java classes that effectively separate and hide implementation details from client applications

C S 273. Machine Programming and Organization
4 Credits (3+2P)
Computer structure, instruction execution, addressing techniques; programming in machine and assembly languages. Taught with C S 464.
Prerequisite: At least a C- in C S 172 or E E 112.

Learning Outcomes
1. Describe the architecture of a microcontroller, the interconnections between the components, and the basic units inside the CPU Use signed and unsigned numbers, the associated branching instructions, and the corresponding flags in the status register Explain immediate, direct, indirect addressing modes, their opcode and operands, and their utilities Map high-level programming language features to assembly instructions, including loops, conditionals, procedure calls, value and reference parameter passing, return values, and recursion Interface with I/O devices including LED and sensors via digital input and output, and analog-to-digital conversion Program timers/ counters and interrupts to control real-time applications Design an assembly program
C S 278. Discrete Mathematics for Computer Science  
4 Credits (3+2P)  
Discrete mathematics required for Computer Science, including  
the basics of logic, number theory, methods of proof, sequences,  
mathematical induction, set theory, counting, and functions. Taught with  
C S 465.  
Prerequisite: At least C- in C S 172.  
Learning Outcomes  
1. Use logic to specify precise meaning of statements, demonstrate  
the equivalence of statements, and test the validity of arguments  
Construct and recognize valid proofs using different techniques  
including the principle of mathematical induction Use summations,  
formulas for the sum of arithmetic and geometric sequences  
Explain and apply the concepts of sets and functions Apply counting  
principles to determine the number of various combinatorial  
configurations

C S 343. Algorithm Design & Implementation  
3 Credits (3)  
Introduction to efficient data structure and algorithm design. Basic graph  
algorithms. Balanced search trees. Classic algorithm design paradigms:  
divide-and-conquer, greedy scheme, and dynamic programming. Taught with  
C S 493.  
Prerequisite: At least a C- in C S 272, or consent of instructor.  
Learning Outcomes  
1. Be able to use and implement sorting algorithms Be able to design  
and implement graph algorithms Be able to design and implement  
algorithms using the divide-and-conquer technique Be able to design  
and implement algorithms using the greedy technique Be able to  
design and implement algorithms using the dynamic programming  
technique Be able to use and implement balanced search trees Be  
able to use and implement hashing techniques Be able to perform the  
runtime analysis of basic algorithms using Big O notation

C S 370. Compilers and Automata Theory  
4 Credits (3+2P)  
Methods, principles, and tools for programming language processor  
design; basics of formal language theory (finite automata, regular  
expressions, context-free grammars); development of compiler  
components. Taught with C S 466.  
Prerequisite: At least a C- in C S 271, C S 272, and C S 273.  
Learning Outcomes  
1. Understand the language theory concepts of regular languages,  
context free languages, regular expressions, context free grammars,  
and formal language hierarchy Use Thompson’s construction to  
convert from regular expression to NFA, and subset construction  
to convert from NFA to DFA Apply recursive descent parsing in  
programming a parser of a small grammar Understand the ideas in LL  
and LR parsing of context-free language classes Understand and use  
table-driven top-down (LL(1)) and bottom up (SLR) parsing to parse a  
sentence

C S 371. Software Development  
4 Credits (3+2P)  
Software specification, design, testing, maintenance, documentation;  
informal proof methods; team implementation of a large project. Taught with  
C S 468.  
Prerequisite: At least a C- in C S 271 and C S 272.  
Learning Outcomes  
1. Understand and explain the activities and structure of different styles  
of software development processes, including waterfall, (spiral,)  
itertative, and agile methodologies Apply requirements knowledge  
and techniques to create functional and non-functional requirements  
for a software system Apply high and low level design ideas to  
create an object-oriented design of a software system Use good  
design and programming ideas to implement individual and team  
software systems in compiled OOP languages Apply white and black  
box testing techniques and tools to individual and team software  
development Use UML class diagrams (and sequence diagrams) to  
capture aspects of system design and/or requirements (domain)  
Use practical software development tools, including version control  
systems, automated build tools, and testing tools

C S 372. Data Structures and Algorithms  
4 Credits (3+2P)  
Introduction to efficient data structure and algorithm design. Order  
notation and asymptotic run-time of algorithms. Recurrence relations and  
solutions. Abstract data type dynamic set and red-black trees. Classic  
algorithm design paradigms: divide-and-conquer, dynamic programming,  
greedy algorithms. Taught with C S 469.  
Prerequisite: At least a C- in CS 272 and C S 278.  
Learning Outcomes  
1. Analyze the growth of functions via asymptotic notation Evaluate  
the asymptotic running time of a given algorithm Solve recurrence  
relations of the kinds encountered in algorithm analysis Design  
algorithms using the divide-and-conquer technique Design algorithms  
using the greedy technique Design algorithms using the dynamic-  
programming technique Use and analyze balanced binary search  
trees Analyze the design, correctness, and time complexity of basic  
graph algorithms

C S 380. Introduction to Cryptography  
3 Credits (3)  
The course covers basic cryptographic primitives, such as symmetric,  
public-key ciphers, digital signature schemes, and hash functions, and  
their mathematical underpinnings. Course helps students understand  
basic notions of security in a cryptographic sense: chosen plaintext and  
chosen ciphertext attacks, games, and reductions. Course also covers  
computational number theory relevant to cryptography. Consent of  
Instructor required. Taught with: C S 525.  
Prerequisite: C S 278 (or equivalent) with a C or better.  
Learning Outcomes  
1. Describe basic cryptographic primitives, including symmetric ciphers,  
asymmetric ciphers, digital signatures, message authentication  
codes, and hash functions. Understand the mathematical,  
fundamental underpinnings of cryptography, and how to reason about  
the security of crypto primitives: indistinguishability (IND) properties  
of ciphertexts, CPA/CCA games, and reductions to fundamental math  
assumptions; Be able to discuss number theory/algebra underpinning  
the design of cryptographic primitives, in some depth.
C S 382. Modern Web Technologies
3 Credits (3)
In this course, we will take a full-stack approach to modern web application design. We will start with the fundamentals including HTML5, CSS3, Javascript, JSON, and the underlying networking concepts and protocols driving the modern web. We will then move on to more advanced topics including javascript backend development with Node.js, NoSQL database design with MongoDB, cloud computing, and responsive web design. Finally, we cover advanced topics including the design and implementation of browser extensions and real-time web technologies like WebRTC and WebSockets. Consent of Instructor required. Taught with: C S 532.

Learning Outcomes
1. Understand the fundamental technologies and operation of the web. Design and develop responsive interactive web sites. Deploy web applications on Cloud Computing Platforms. Leverage modern tools and packages to develop full stack web applications. Be fluent in the application of emerging web technologies like browser extensions, WebSockets, and WebRTC. Use existing materials and references on the web to learn new skills.

C S 409. Independent Study
1-6 Credits (1-6)
Faculty supervised investigation, to culminate in a written report. May be repeated up to 6 credits.

Prerequisite(s): Written agreement with faculty supervisor.

C S 419. Computing Ethics and Social Implications of Computing
1 Credit (1)
An overview of ethics for computing majors includes: history of computing, intellectual property, privacy, ethical frameworks, professional ethical responsibilities, and risks of computer-based systems.

Prerequisite: At least a C- in C S 371.

Learning Outcomes
1. Understand the fundamental technologies and operation of the web. Design and develop responsive interactive web sites. Deploy web applications on Cloud Computing Platforms. Leverage modern tools and packages to develop full stack web applications. Be fluent in the application of emerging web technologies like browser extensions, WebSockets, and WebRTC. Use existing materials and references on the web to learn new skills.

C S 449. Senior Thesis
4 Credits (4)
Capstone course in which C S majors apply computer science skills to complete a research project, culminating in a written thesis report. Restricted to: C S majors.

Prerequisite: At least a C- in C S 370 and C S 371.

Learning Outcomes
1. Apply design and development principles in the construction of software systems of varying complexity. Apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices. Design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs. Use current techniques, skills, and tools necessary for computing practice. Analyze a problem, identify, and define the computing requirements appropriate to its solution. Communicate effectively with a range of audiences via presentations and technical reports.

C S 451. C++ Programming
3 Credits (3)
Programming in the C language. Taught with C S 151. Recommended for nonmajors only. Not for CS undergraduate students.

Learning Outcomes
1. Use various data types and the corresponding operations. Write C++ programs that contain expressions, program control, functions, arrays, and input/output. Explain basic object-oriented programming concepts. Demonstrate proficiency in using classes, inheritance, pointers, streams, and recursion.

C S 452. Java Programming
3 Credits (2+2P)
Programming in the Java language. More advanced than C S 152. Recommended for nonmajors only. Not for CS undergraduate standing. May be repeated up to 3 credits.

C S 453. Python Programming I
3 Credits (3)
This course is an introduction to programming in the Python language, covering fundamental scripts, data types and variables, functions, and simple object creation and usage. The focus will be on preparing students to use Python in their own areas. No prior programming experience is required. Taught with C S 153. More advanced than C S 153.

Learning Outcomes
1. Develop an algorithm to solve a problem. Demonstrate the ability to use Python data types: int, float, strings, and lists; and the built-in functions associated with those data types. Edit and debug programs using the Spyder IDE for Python. Implement algorithms using the Python features of assignment, input, output, branches, loops, and functions. Explain the fundamental concepts of object-oriented programming with Python. Design and implement Python classes based on given attributes and behaviors. Work with existing Python modules such as math, random, and os. Write Python programs that input data from files and store results in files.
C S 454. Python Programming II
3 Credits (3)
This course covers advanced Python programming, including classes, objects, and inheritance, embedded programming in domain applications, database interaction, and advanced data and text processing. The focus will be on preparing students to use Python in their own areas. For graduate students only. Has more advanced work than C S 154, and does not count towards CS major requirements. Not for CS undergraduate students. May be repeated up to 3 credits. Restricted to: exclude C S majors.
Prerequisite(s): C S 153 or C S 453.

C S 457. Topics in Software Programming and Applications
3 Credits (2+2P)
Current topics in computer programming and software applications. Topic announced in the Schedule of Classes. More advanced than C S 157. recommended for non-majors only. May be repeated if subtitle is different.
Prerequisite(s): Graduate standing.

C S 458. R Programming I
3 Credits (3)
This course is an introduction to data processing in the R language, covering fundamental script configuration, data types and data collections, R control structures, and basic creation of graphs and data visualizations. This course will not focus on the statistical capabilities of R, though some basic statistical computations will be used. For graduate students only. Has more advanced work than C S 158. Does not count towards CS major requirements. May be repeated up to 3 credits.
Prerequisite(s): Good understanding of college algebra or higher.

C S 460. Computer Science I Transition
3 Credits (3)
Computational problem solving; problem analysis; implementation of algorithms. Recursive structures and algorithms. For CS graduate students only; cannot be used to meet a CS student's program of study. Taught with C S 172.
Learning Outcomes
1. Develop algorithms to solve problems. Implement algorithms using the fundamental programming features of sequence, selection, iteration, and recursion. Apply an understanding of primitive and object data types. Design and implement classes based on given attributes and behaviors. Explain the fundamental concepts of object-oriented programming.

C S 462. Object Oriented Programming Transition
3 Credits (3)
Introduction to problem analysis and problem solving in the object-oriented paradigm. Practical introduction to implementing solutions in the C++ language. Hands-on experience with useful development tools. Cannot be used in a CS student's program of study. Consent of Instructor required. Taught with C S 271.
Prerequisite: At least a C- in C S 172 or C S 460 or consent of instructor.
Learning Outcomes
1. Develop an algorithm to solve a problem. Implement algorithms using the C and C++ languages including imperative and object-oriented language features. Demonstrate a noticeable increase in understanding of problem analysis and program design beyond what was learned in C S 172, E E 112, or E E 161. Demonstrate proficiency in using control structures including if statements (single selection), switch (multiple selection), and loops (repetition). Demonstrate proficiency in using arrays and functions. Create UML class and relationship diagrams. Design a class to model a real-world person, place, thing, or event. Use editing and debugging software to create, debug, and test C and C++ programs. Understand the basic terminology used in object-oriented programming.

C S 463. Introduction to Data Structures Transition
3 Credits (3)
Design, implementation, use of fundamental abstract data types and their algorithms: lists, stacks, queues, deques, trees; imperative and declarative programming. Internal sorting; time and space efficiency of algorithms. Cannot be used in a CS student's program of study. Consent of Instructor required. Taught with C S 272.
Prerequisite: At least a C- in C S 172 or C S 460 or consent of instructor.
Learning Outcomes
1. Be able to implement and use lists. Be able to implement and use stacks. Be able to implement and use queues. Be able to implement and use trees. Be able to perform the run time analysis of basic algorithms using Big O notation. Be able to implement, use, and analyze searching algorithms. Be able to solve a problem recursively. Take a problem statement from a user and convert it into a Java program that fulfills the user's needs. Create object oriented Java classes that effectively separate and hide implementation details from client applications.
C S 464. Machine Programming and Organization Transition
3 Credits (3)
Computer structure, instruction execution, addressing techniques; programming in machine and assembly languages. Cannot be used in a C S student's program of study. Consent of Instructor required. Taught with C S 273.
Prerequisite: At least a C- in C S 172 or C S 460 or consent of instructor.
Learning Outcomes
1. Describe the architecture of a microcontroller, the interconnections between the components, and the basic units inside the CPU Use signed and unsigned numbers, the associated branching instructions, and the corresponding flags in the status register Explain immediate, direct, indirect addressing modes, their opcode and operands, and their utilities Map high-level programming language features to assembly instructions, including loops, conditionals, procedure calls, value and reference parameter passing, return values, and recursion Interface with I/O devices including LED and sensors via digital input and output, and analog-to-digital conversion Program timers/ counters and interrupts to control real-time applications Design an assembly program.

C S 465. Discrete Math for Computer Science Transition
3 Credits (3)
Logical connectives, sets, functions, relations, graphics, trees, proofs, induction, and application to computer science. For C S graduate students only. Cannot be used in a C S student's program of study. Consent of Instructor required. Taught with C S 278.
Prerequisite: At least a C- in C S 172 or C S 460 or consent of instructor.
Learning Outcomes
1. Use logic to specify precise meaning of statements, demonstrate the equivalence of statements, and test the validity of arguments Construct and recognize valid proofs using different techniques including the principle of mathematical induction Use summations, formulas for the sum of arithmetic and geometric sequences Explain and apply the concepts of sets and functions Apply counting principles to determine the number of various combinatorial configurations.

C S 466. Compilers and Automata Transition
3 Credits (3)
Methods, principles, and tools for programming language processor design; basics of formal language theory (finite automata, regular expressions, context-free grammars); development of compiler components. For C S graduate students only; cannot be used in a students program of study. Taught with C S 370.
Prerequisite: At least a C in C S 271 or C S 462, in C S 272 or C S 463, in C S 273 or C S 464, or consent of instructor.
Learning Outcomes
1. Understand the language theory concepts of regular languages, context free languages, regular expressions, context free grammars, and formal language hierarchy Use Thompson's construction to convert from regular expression to NFA, and subset construction to convert from NFA to DFA Apply recursive descent parsing in programming a parser of a small grammar Understand the ideas in LL and LR parsing of context-free language classes Understand and use table-driven top-down (LL(1)) and bottom up (SLR) parsing to parse a sentence.

C S 468. Software Development Transition
3 Credits (3)
Software specification, design, testing, maintenance, documentation; informal proof methods; team implementation of a large project. For C S graduate students only. Cannot be used in a C S student's program of study. Consent of Instructor required. Taught with C S 371.
Prerequisite: At least a C- in C S 271 or C S 462, in C S 272 or C S 463, or consent of instructor.
Learning Outcomes
1. Understand and explain the activities and structure of different styles of software development processes, including waterfall, (spiral,) iterative, and agile methodologies. Apply requirements knowledge and techniques to create functional and non-functional requirements for a software system. Apply high and low level design ideas to create an object-oriented design of a software system. Use good design and programming ideas to implement individual and team software systems in compiled OOP languages. Apply white and black box testing techniques and tools to individual and team software development. Use UML class diagrams (and sequence diagrams) to capture aspects of system design and/or requirements (domain). Use practical software development tools, including version control systems, automated build tools, and testing tools.

C S 469. Data Structure and Algorithms Transition
3 Credits (3)
Prerequisite: At least a C- in C S 272 or C S 463, in C S 278 or C S 465, or consent of instructor.
Learning Outcomes
1. Analyze the growth of functions via asymptotic notation Evaluate the asymptotic running time of a given algorithm. Solve recurrence relations of the kinds encountered in algorithm analysis. Design algorithms using the divide-and-conquer technique. Design algorithms using the greedy technique. Design algorithms using the dynamic programming technique. Use and analyze balanced binary search trees. Analyze the design, correctness, and time complexity of basic graph algorithms.

C S 471. Programming Language Structure I
3 Credits (3)
Syntax, semantics, implementation, and application of programming languages; abstract data types; concurrency. Not for C S graduate students.
Prerequisite: At least a C- in C S 370 and C S 371.
Learning Outcomes
1. Improve the background for choosing appropriate programming languages for certain classes of programming problems. Increase the ability to learn new programming languages. Critically evaluate what paradigm and language are best suited for a new problem. Demonstrate the use of the primary segments for a running program. Apply the principles of functional programming. Apply the principles of logic programming. Program a simple parallel program with threads. Program in at least five different programming languages. Program in C to demonstrate architecture details.
C S 473. Architectural Concepts I
3 Credits (3)
Comparison of architectures to illustrate concepts of computer organization; relationships between architectural and software features. Not for C S graduate students.
Prerequisite: At least a C- in C S 273 and C S 370.
Learning Outcomes
1. Explain the concepts in instruction set architecture Analyze the behavior of pipelined CPU data path and control Analyze behavior and performance of memory hierarchies with different cache designs Describe the implementation of binary integer and floating point representation and arithmetic Identify and analyze performance of instruction level parallelism and multi-core parallelism Describe virtual memory and architectural support for operating systems Understand the organization of various kinds of secondary storage devices, and their performance and tradeoffs Create software that demonstrates performance of architectural features and evaluate the effects of software change

C S 474. Operating Systems I
3 Credits (3)
Operating system principles and structures, and interactions with architectures. Not for C S graduate students.
Prerequisite: At least a C- in C S 273, C S 371, and C S 372.
Learning Outcomes
1. Explain OS control and management of hardware resources Explain OS management and execution of processes Explain OS control and management of real and virtual memory Explain classical concurrency issues and their solutions Analyze and implement threads Analyze OS interaction with networks and architecture

C S 475. Artificial Intelligence I
3 Credits (3)
Fundamental principles and techniques in artificial intelligence systems. Intelligent Agents; solving problems by searching; local search techniques; game-playing agents; constraint satisfaction problems; knowledge representation and reasoning. Further selected topics may also be covered. Not for C S graduate students. Taught with C S 505.
Prerequisite: At least a C- in C S 272 and C S 278.
Learning Outcomes
1. Use various search algorithms commonly used in problem-solving Use methods for solving constraint satisfaction problems Use propositional and first-order logic to represent knowledge Use logical inference methods to derive conclusions from a knowledge base Use adversarial search for game-playing agents Analyze the different search strategies Design and implement heuristic search for problem-solving

C S 476. Computer Graphics I
3 Credits (3)
Languages, programming, devices, and data structures for representation and interactive display of complex objects. Not for C S graduate students. Taught with C S 506.
Prerequisite: At least C- in C S 370 or C S 371.
Learning Outcomes

C S 477. Digital Game Design
3 Credits (3)
An introduction to digital game design. Topics include design, development, and playtesting of games. The course is structured to use team-based learning. Not for C S graduate students. Taught with C S 517.
Prerequisite/Corequisite: C S 371.
Learning Outcomes
1. Describe, analyze, and/or critique games with a consistent vocabulary Design, develop, and playtest games Understand the formal systems of games Communicate game designs through demonstrations and presentations

C S 478. Computer Security
3 Credits (3)
Introduction to the art and science of computer security. Fundamentals of computer security including elementary cryptography, authentication and access control, security threats, attacks, detection and prevention in application software, operating systems, networks and databases. Not for C S graduate students. Taught with C S 513.
Prerequisite: At least a C- in C S 272, C S 273 or consent of instructor.
Learning Outcomes
1. Describe fundamental concepts in security and privacy Understand requirements of security in different contexts Describe practical implementation challenges in security/privacy system design Explain at a high-level symmetric and public key cryptography Explain various access control mechanisms such as authentication, authorization Understand aspects of secure system design that a computer programmer/engineer needs to account for

C S 479. Special Topics
1-12 Credits
Topics announced in the Schedule of Classes. May be repeated under different subtitles. Not for C S graduate students. May be repeated up to 12 credits.
C S 480. Linux System Administration
3 Credits (3)
Basic system administration for Linux environments. Topics include user managements, file systems, security, backups, system monitoring, kernel configuration and other relevant aspects of system administration. Not for Computer Science graduate students.
Learning Outcomes
1. Be able to properly set up, configure, and maintain a Linux-based set of networked computers with shared resources Understand the significance of proper administration of systems and its impact on users, their data and computational resources, and the security of the overall installation

C S 481. Visual Programming
3 Credits (3)
Design and implementation of programs using visual (i.e. dataflow or diagrammatic) programming techniques, with an emphasis on real-time data processing. Students will learn how to design visual programs, including how to handle cycles and state maintenance, and will learn to process audio, video, and other data using visual programs. Not for C S graduate students. Taught with C S 518.
Prerequisite: At least a C- in C S 272 and C S 278.
Learning Outcomes
1. Develop software in graph-based visual environments Understand flows of control in visual programming environments Use signals, digital and analog, to drive software Communicate software design and evaluation with presentations, demos, and reports
C S 482. Database Management Systems I
3 Credits (3)
Database design and implementation; models of database management systems; privacy, security, protection, recovery. Not for C S graduate students. Taught with C S 502.
Prerequisite: At least a C- in C S 272 and C S 278.
Learning Outcomes
1. Utilize the basic concepts of relational database model Utilize database query languages (e.g. SQL) Identify data integrity and security requirements Analyze, capture, and model user requirements for building database systems using conceptual models Design and normalize relational schemas Apply application development methods to implement a database system

C S 483. Introduction to Robotics
3 Credits (3)
Basic AI-based robotic architecture and concepts, with an emphasis on building and programming mobile robots. Not for C S graduate students. Taught with C S 503.
Prerequisite: At least a C- in C S 272 and C S 273.
Learning Outcomes
1. Analyze the strengths and weaknesses of basic robotic architectures (deliberative, reactive, hybrid) Use the basics of Monte Carlo localization in map construction and robot navigation Design and implement robots for special deliberative and reactive purposes Program robots to navigate in both known and unknown areas Program robots to map an unknown area

C S 484. Computer Networks I
3 Credits (3)
Fundamental concepts of computer communication networks: layered network architecture, network components, protocol stack and service. Example of application, transport, network and data link layers, protocols primarily drawn from the Internet (TCP, UDP, and IP) protocol multimedia networks; network management and security. Not for C S graduate students. Taught with C S 504.
Prerequisite: At least a C- in C S 272 and CS 273.
Learning Outcomes
1. Explain the layered model of networking using the OSI and TCP/IP models Describe the purpose and concepts of each layer in the OSI and TCP/IP models Describe IP as a particular network layer protocol Describe TCP and UDP as particular transport layer protocols Describe Ethernet (11) and WiFi (15) as particular data link layer protocols Describe and analyze routing and routing issues Describe and analyze data link layer switching Describe the need for application protocols such as HTTP Explain other network issues such as multicasting and audio/video data streaming Implement socket-based network programs

C S 485. Human-Centered Computing
3 Credits (3)
Covers iterative, human-centered interface design, including prototyping and evaluation. Basics of graphic design and visualization. Not for C S graduate students. Taught with C S 515.
Prerequisite: At least C- in C S 371.
Learning Outcomes
1. Describe, analyze, and/or critique a device interface using a design vocabulary Enact a human-centered process of interaction design: gather data; develop a data-driven design; iterate design through testing; and evaluate results Conduct human-computer interaction research by proposing, developing, and conducting experiments; analyzing data; and developing synthesized results Communicate design and evaluation with presentations, demos, and reports Implement a variety of interaction techniques

C S 486. Bioinformatics
3 Credits (3)
Introduction to bioinformatics and computational biology. Computational approaches to sequences analysis, protein structure prediction and analysis, and selected topics from current advances in bioinformatics. Not for C S graduate students. Taught with C S 516.
Prerequisite: At least a C- in C S 272 and C S 278.
Learning Outcomes
1. Explain the biology motivation of a bioinformatics question Formulate a computational problem and its solution to address a molecular biology question Implement basic bioinformatics algorithms such as sequence alignment, pattern matching, and genome assembly Evaluate the performance of a bioinformatics algorithm on real data sets Argue the correctness of a bioinformatics algorithm Analyze the complexity of a bioinformatics algorithm

C S 487. Applied Machine Learning I
3 Credits (3)
An introductory course on practical machine learning. An overview of concepts for both unsupervised and supervised learning. Topics include classification, regression, clustering, and dimension reduction. Classical methods and algorithms such as linear regression, neural networks, support vector machines, and ensemble approaches. Recent techniques such as deep learning. Focused on applying of machine learning techniques in application domains. Not for Graduate Majors. Taught with: C S 519.
Prerequisite: At least a C- in C S 272, MATH 1511G; or consent of instructor.
Learning Outcomes
1. Implement and utilize different data processing techniques Differentiate and assess several dimension reduction techniques Utilize several classifiers (SVM, Decision tree, k-Nearest Neighbor, and logistic regression) and differentiate their advantages and disadvantages Explain and demonstrate regression analysis Describe and illustrate clustering approaches Apply ensemble learning approaches
2. Implement several neural network classifiers, including deep learning models
C S 488. Introduction to Data Mining
3 Credits (3)
Techniques for exploring large data sets and discovering patterns in them. Data mining concepts, metrics to measure its effectiveness. Methods in classification, clustering, frequent pattern analysis. Selected topics from current advances in data mining. Taught with C S 508.
Prerequisite: At least a C- in C S 272 and C S 278.
Learning Outcomes
1. Explain and recognize different data mining tasks such as data pre-processing, visualization, classification, regression, clustering, association rules, and anomaly detection
2. Apply classical data mining / machine learning algorithms for classification, clustering, association rules, and anomaly detection
3. Evaluate and compare the performance of different data mining / machine learning algorithms
4. Utilize data mining algorithms to analyze data in real applications using a data mining tool

C S 489. Bioinformatics Programming
3 Credits (3)
Computer programming to analyze high-throughput molecular biology data including genomic sequences, bulk and single-cell transcriptome, epigenome, and other omics data. Quality control, library size normalization, confounding effect removal, clustering, statistical modeling, trajectory inference, and visualization. Taught with C S 509.
May be repeated up to 3 credits.
Learning Outcomes
1. Write R scripts and functions to manipulate biological sequences, genome annotation, and gene expression data
2. Perform high-throughput data analysis with established R packages
3. Detect differential gene expression on RNA sequencing data
4. Perform single-cell RNA sequencing data analysis
5. Assess statistical significance of analytical results
6. Create automatic data analysis pipeline to link multiple software packages

C S 491. Parallel Programming
3 Credits (3)
Programming of shared memory and distributed memory machines; tools and languages for parallel programming; techniques for parallel programming; parallel programming environments. Not for C S graduate students. Taught with C S 521.
Prerequisite: At least a C- in C S 370 or consent of instructor.
Learning Outcomes
1. Describe existing parallel architectures including shared memory versus distributed memory platforms
2. Apply basic techniques for organizing parallel computations
3. Apply basic techniques for performance measurement and theoretical limitations of parallelism
4. Explain alternative parallel techniques and hardware
5. Perform performance Analysis of different parallel programming techniques
6. Program shared memory machines using threads, processes, and the OpenMP library
7. Program using a message passing paradigm and obtain working knowledge of the Message Passing Interface (MPI)

C S 493. Algorithm Design and Implementation
3 Credits (3)
This course introduces the basic knowledge of designing classical algorithms and implementing these algorithms using a programming language. In particular, the course teaches various data structures, including graphs and balanced binary search trees, and efficient schemes to implement these data structures. This course also teaches basic algorithm design techniques including divide-and-conquer, greedy scheme, and dynamic programming. This course covers graph algorithms, including graph traversals (depth-first search and breadth-first search), connectivity, shortest paths, and minimum spanning trees.
Graduate standing. Not for CS students. Taught with C S 343.
Prerequisite: At least a C- in C S 272, or Consent of Instructor.
Learning Outcomes
1. Be able to use and implement sorting algorithms
2. Be able to design and implement graph algorithms
3. Be able to design and implement algorithms using the divide-and-conquer technique
4. Be able to design and implement algorithms using the greedy technique
5. Be able to design and implement algorithms using the dynamic programming technique
6. Be able to use and implement balanced search trees
7. Be able to use and implement hashing techniques
8. Be able to perform the run time analysis of basic algorithms using Big O notation

C S 494. Introduction to Smart Grids
3 Credits (3)
This course is an introduction to the technologies and design strategies associated with the Smart Grid. The emphasis will be on the development of communications, energy delivery, coordination mechanisms, and management tools to monitor transmission and distribution networks.
Topics include: Smart grid introduction and evolution; Power systems; Networking and transport control; Artificial intelligence & agent coordination; Data mining for smart grids.
Taught with C S 514.
Prerequisite: At least a C- in C S 272 and a C- in E E 230; or Consent of instructor.
Learning Outcomes
1. Get basic understanding of how conventional power system is operated and protected
2. Understand and use basic knowledge of communication techniques in smart grids
3. Understand and use basic knowledge for the coordination of the different units in smart grids
4. Understand and apply data mining techniques for protecting smart grids
C S 496. Cloud and Edge Computing
3 Credits (3)
The course presents a top-down view of cloud computing, from applications and administration to programming and infrastructure. Its main focus is on the concepts of networking and parallel programming for cloud computing and large scale distributed systems which form the cloud infrastructure. The topics include: overview of cloud computing, cloud systems, parallel processing in the cloud, distributed storage systems, virtualization, security in the cloud, and multicore operating systems. Students will study state-of-the-art approaches to cloud computing followed by large cloud corporations, namely Google, Amazon, Microsoft, and Yahoo. Students will also apply what they learn through project developments using Amazon Web Services. Not for graduate CS majors. Taught with: C S 522.
Prerequisite: At least a C- in C S 372; background in C S 484/C S 504 is preferred or consent of instructor.
Learning Outcomes
1. The emphasis of the course will be on the understanding the concepts and the engineering trade-offs involved in the design of cloud computing systems Cloud deployment models, cloud service models (software-as-a-service, infrastructure-as-a-service, protocol-as-a-service), cloud architecture, cloud-edge security, service level agreements, and load balancing in cloud and datacenters Learn about cloud computing, especially what are their fundamental components, how these components interact, and how the technology is evolving for the future (edge computing, cloudlets, mobile edge computing, etc.).

C S 502. Database Management Systems I
3 Credits (3)
Database design and implementation; models of database management systems; privacy, security, protection, recovery; taught with C S 482; requires more advanced graduate work than C S 482. Students are expected to have solid knowledge of data structures and discrete mathematics.
Learning Outcomes
1. Utilize the basic concepts of relational database model Utilize database query languages (e.g. SQL) Identify data integrity and security requirements Analyze, capture, and model user requirements for building database systems using conceptual models Design and normalize relational schemas Apply application development methods to implement a database system

C S 503. Introduction to Robotics
3 Credits (3)
Basic AI-based robotic architectures and concepts, with an emphasis on building and programming mobile robots; taught with C S 483; requires more advanced graduate work than C S 483. Students are expected to have solid knowledge of data structures and machine-level programming.
Learning Outcomes
1. Analyze the strengths and weaknesses of basic robotic architectures (deliberative, reactive, hybrid) Use the basics of Monte Carlo localization in map construction and robot navigation Design and implement robots for special deliberative and reactive purposes Program robots to navigate in both known and unknown areas Program robots to map an unknown area

C S 504. Computer Networks I
3 Credits (3)
Fundamental concepts of computer communication networks: layered network architecture, network components, protocol stack and service. Example of application, transport, network and data link layers, protocols primarily drawn from the Internet (TCP, UDP, and IP) protocol suite; local and wide area networks, wireless and mobile networks, multimedia networks; network management and security; taught with C S 484; requires more advanced graduate work than C S 484. Students are expected to have solid knowledge of data structures, machine-level programming. Knowledge of statistics (at the level of MATH 371 or MATH 470) is recommended.
Learning Outcomes
1. Explain the layered model of networking using the OSI and TCP/IP models Describe the purpose and concepts of each layer in the OSI and TCP/IP models Describe IP as a particular network layer protocol Describe TCP and UDP as particular transport layer protocols Describe Ethernet (802-11) and WiFi (802-15) as particular data link layer protocols Describe and analyze routing and routing issues Describe and analyze data link layer switching Describe the need for application protocols such as HTTP Explain other network issues such as multicasting and audio/video data streaming Implement socket-based network programs

C S 505. Artificial Intelligence I
3 Credits (3)
Fundamental principles and techniques in artificial intelligence systems. Knowledge representation formalisms; heuristic problem solving techniques; automated logical deduction; robot planning methods; algorithmic techniques for natural language understanding, vision and learning; taught with C S 475; requires more advanced graduate work than C S 475. Students are expected to have strong knowledge of algorithms and data structures (at the level of C S 372).
Learning Outcomes
1. Use various search algorithms commonly used in problem-solving
2. Use methods for solving constraint satisfaction problems
3. Use propositional and first-order logic to represent knowledge
4. Use logical inference methods to derive conclusions from a knowledge base
5. Use adversarial search for game-playing agents
6. Analyze the different search strategies
7. Design and implement heuristic search for problem-solving

C S 506. Computer Graphics I
3 Credits (3)
Languages, programming, devices, and data structures for representation and interactive display of complex objects. Taught with C S 476. Requires more advanced graduate work than C S 476. Students are expected to have knowledge of compilers design and software engineering equivalent to C S 370 and C S 371.
Learning Outcomes
1. Techniques used in three-dimensional graphics Computer Graphics lightning and shading Client-server graphics using WebGL
2. Geometric and Solid modeling
3. Computer Graphics implementation algorithms
C S 508. Introduction to Data Mining
3 Credits (3)
Techniques for exploring large data sets and discovering patterns in them. Data mining concepts, metrics to measure its effectiveness. Methods in classification, clustering, frequent pattern analysis. Selected topics from current advances in data mining. Students are expected to have a preparation in Discrete Mathematics and Data Structures equivalent to C S 272 and C S 278. Requires more advanced graduate work than C S 488. Taught with: C S 488.

Learning Outcomes
1. Explain and recognize different data mining tasks such as data pre-processing, visualization, classification, regression, clustering, association rules, and anomaly detection
2. Apply classical data mining / machine learning algorithms for classification, clustering, association rules, and anomaly detection
3. Evaluate and compare the performance of different data mining / machine learning algorithms
4. Utilize data mining algorithms to analyze data in real applications using a data mining tool

C S 509. Bioinformatics Programming
3 Credits (3)
Computer programming to analyze high-throughput molecular biology data including genomic sequences, bulk and single-cell transcriptome, epigenome, and other omics data. Quality control, library size normalization, confounding effect removal, clustering, statistical modeling, trajectory inference, and visualization. Taught with C S 489. Requires more advanced graduate work than C S 489.

Learning Outcomes
1. Write R scripts and functions to manipulate biological sequences, genome annotation, and gene expression data Perform high-throughput data analysis with established R packages Detect differential gene expression on RNA sequencing data Perform single-cell RNA sequencing data analysis (quality control, library size normalization, confounding effect removal, modeling) Assess statistical significance of analytical results Create automatic data analysis pipeline to link multiple software packages

C S 510. Automata, Languages, Computability
3 Credits (3)
Regular and context-free languages, pushdown and finite-state automata, Turing machines, models of computation, halting problems. Students are expected to have knowledge of compilers design and algorithms equivalent to C S 370 and C S 372.

Learning Outcomes
1. Describe the language accepted by an automaton or generated by a regular expression or a context-free grammar Design automata, regular expressions and context-free grammars accepting or generating a certain language Prove properties of languages, grammars, and automata with formal mathematical methods Convert between equivalent deterministic and non-deterministic finite automata, and regular expressions Convert between equivalent context-free grammars and pushdown automata Define Turing machines performing simple tasks

C S 513. Computer Security
3 Credits (3)
Introduction to the art and science of computer security. Fundamentals of computer security including elementary cryptography, authentication and access control, security threats, attacks, detection and prevention in application software, operating systems, networks and databases. Taught with C S 578. Requires more advanced graduate work than C S 578. Recommended knowledge of materials in C S 272 and C S 273.

Prerequisite: At least a C in C S 273 or consent of instructor.

Learning Outcomes
1. Describe fundamental concepts in security and privacy
2. Understand requirements of security in different contexts
3. Describe practical implementation challenges in security/privacy system design
4. Explain at a high-level symmetric and public key cryptography
5. Explain various access control mechanisms such as authentication, authorization
6. Understand aspects of secure system design that a computer programmer/engineer needs to account for

C S 514. Introduction to Smart Grids
3 Credits (3)
This course is an introduction to the technologies and design strategies associated with the Smart Grid. The emphasis will be on the development of communications, energy delivery, coordination mechanisms, and management tools to monitor transmission and distribution networks. Topics include: Smart grid introduction and evolution; Power systems; Networking and transport control; Artificial intelligence & agent coordination; Data mining for smart grids. Taught with C S 494. Requires more advanced work than C S 494.

Prerequisite: At least a C- in C S 272 and a C- in E E 230; or Consent of instructor.

Learning Outcomes
1. Get basic understanding of how conventional power system is operated and protected
2. Understand and use basic knowledge of communication techniques in smart grids
3. Understand and use basic knowledge for the coordination of the different units in smart grids
4. Understand and apply data mining techniques for protecting smart grids
CS 515. Human-Centered Computing
3 Credits (3)
Covers iterative, human-centered interface design, including prototyping and evaluation. Basics of graphic design and visualization. Taught with C S 488. Requires more advanced graduate work than C S 486 with an emphasis on studying recent research in human-computer interaction. Students are expected to have knowledge of software engineering equivalent to C S 371.
Learning Outcomes
1. Describe, analyze, and/or critique a device interface using a design vocabulary
2. Enact a human-centered process of interaction design: gather data; develop a data-driven design; iterate design through testing; and evaluate results
3. Conduct human-computer interaction research by proposing, developing, and conducting experiments; analyzing data; and developing synthesized results
4. Communicate design and evaluation with presentations, demos, and reports
5. Implement a variety of interaction techniques

CS 516. Bioinformatics
3 Credits (3)
Introduction to bioinformatics and computational biology. Computational approaches to sequences analysis, protein structure prediction and analysis, and selected topics from current advances in bioinformatics; taught with C S 486; requires more advanced graduate work than C S 486. Students are expected to have a knowledge of algorithms and data structures equivalent to C S 372 or exposure to Biology (equivalent to BIOL 2310 or BIOL 311).
Learning Outcomes
1. Explain the biology motivation of a bioinformatics question
2. Formulate a computational problem and its solution to address a molecular biology question
3. Implement basic bioinformatics algorithms such as sequence alignment, pattern matching, and genome assembly
4. Evaluate the performance of a bioinformatics algorithm on real data sets
5. Argue the correctness of a bioinformatics algorithm
6. Analyze the complexity of a bioinformatics algorithm

CS 517. Digital Game Design
3 Credits (3)
An introduction to digital game design. Topics include design, development, and playtesting of games. The course is structured to use team-based learning. Taught with C S 477. Requires more advanced graduate work than C S 477 with deeper attention to a team game project.
Learning Outcomes
1. Describe, analyze, and/or critique games with a consistent vocabulary
2. Design, develop, and playtest games
3. Understand the formal systems of games
4. Communicate game designs through demonstrations and presentations

CS 518. Visual Programming
3 Credits (3)
Design and implementation of programs using visual (i.e. dataflow or diagrammatic) programming techniques, with an emphasis on real-time data processing. Students will learn how to design visual programs, including how to handle cycles and state maintenance, and will learn to process audio, video, and other data using visual programs. Students must be in graduate standing to enroll. Taught with C S 481. Requires more advanced graduate work than C S 481.
Learning Outcomes
1. Develop software in graph-based visual environments
2. Understand flows of control in visual programming environments
3. Use signals, digital and analog, to drive software
4. Communicate software design and evaluation with presentations, demos, and reports

CS 519. Applied Machine Learning I
3 Credits (3)
An introductory course on practical machine learning. An overview of concepts for both unsupervised and supervised learning. Topics include classification, regression, clustering, and dimension reduction. Classical methods and algorithms such as linear regression, neural networks, support vector machines, and ensemble approaches. Recent techniques such as deep learning. Focused on applying of machine learning techniques in application domains. Taught with: C S 487. Requires more advanced graduate work than C S 487.
Learning Outcomes
1. Implement and utilize different data processing techniques
2. Differentiate and assess several dimension reduction techniques
3. Utilize several classifiers (SVM, Decision tree, k-Nearest Neighbor, and logistic regression) and differentiate their advantages and disadvantages
4. Explain and demonstrate regression analysis
5. Describe and illustrate clustering approaches
6. Apply ensemble learning approaches
7. Implement several neural network classifiers, including deep learning models

CS 521. Parallel Programming
3 Credits (3)
Programming of shared memory and distributed memory machines; tools and languages for parallel programming; parallelizing compilers; parallel programming environments; taught with C S 491; requires more advanced graduate work than C S 491. Students are expected to have knowledge of programming and machine organization equivalent to C S 271 and C S 273.
Learning Outcomes
1. Describe existing parallel architectures including shared memory versus distributed memory platforms
2. Apply basic techniques for organizing parallel computations
3. Apply basic techniques for performance measurement and theoretical limitations of parallelism
4. Explain alternative parallel techniques and hardware
5. Perform performance Analysis of different parallel programming techniques
6. Program shared memory machines using threads, processes, and the OpenMP library
7. Program using a message passing paradigm and obtain working knowledge of the Message Passing Interface (MPI)
C S 522. Cloud and Edge Computing
3 Credits (3)
The course presents a top-down view of cloud computing, from applications and administration to programming and infrastructure. Its main focus is on the concepts of networking and parallel programming for cloud computing and large scale distributed systems which form the cloud infrastructure. The topics include: overview of cloud computing, cloud systems, parallel processing in the cloud, distributed storage systems, virtualization, security in the cloud, and multicore operating systems. Students will study state-of-the-art approaches to cloud computing followed by large cloud corporations, namely Google, Amazon, Microsoft, and Yahoo. Students will also apply what they learn through project developments using Amazon Web Services. Might have additional requirements for graduate students. To enroll in this course a background in C S 484/C S 504 is preferred or have consent of the instructor. Taught with: C S 496. Requires more advanced graduate work than C S 496.

Learning Outcomes
1. The emphasis of the course will be on understanding the concepts and the engineering trade-offs involved in the design of cloud computing systems
2. Cloud deployment models, cloud service models (software-as-a-service, infrastructure-as-a-service, protocol-as-a-service), cloud architecture, cloud-edge security, service level agreements, and load balancing in cloud and datacenters
3. Learn about cloud computing, especially what are their fundamental components, how these components interact, and how the technology is evolving for the future (edge computing, cloudlets, mobile edge computing, etc.).

C S 525. Introduction to Cryptography
3 Credits (3)
The course covers basic cryptographic primitives, such as symmetric, public-key ciphers, digital signature schemes, and hash functions, and their mathematical underpinnings. Course helps students understand basic notions of security in a cryptographic sense: chosen plaintext and chosen ciphertext attacks, games, and reductions. Course also covers computational number theory relevant to cryptography. Consent of Instructor required. Taught with: C S 380. Requires more advanced graduate work than C S 380.

Prerequisite: C S 278 (or equivalent) with a C or better.

Learning Outcomes
1. Describe basic cryptographic primitives, including symmetric ciphers, asymmetric ciphers, digital signatures, message authentication codes, and hash functions. Understand the mathematical, fundamental underpinnings of cryptography, and how to reason about the security of crypto primitives: indistinguishability (IND) properties of ciphertexts, CPA/CCA games, and reductions to fundamental math assumptions; Be able to discuss number theory/algebra underpinning the design of cryptographic primitives, in some depth.

C S 531. Principles of Virtual Reality
3 Credits (3)
This course is an introduction to building systems and doing research in / on virtual reality. We cover system design, development, and evaluation, with an emphasis on recent research in the space. We cover a range of methods, qualitative and quantitative, in order to develop insights into effective VR designs. Students in this class will develop a foundation in VR development; learn about current topics in VR; and design, develop, evaluate, and report on a VR system. Consent of Instructor required. Crosslisted with: C S 381.

Prerequisite(s): CS 485 (or equivalent).

Learning Outcomes
1. Design and develop systems in virtual reality.
2. Understand the variety of development techniques in VR.
3. Understand the state-of-the-art in VR systems.
4. Communicate understanding of people, designs, and evaluations through presentations, demos, and/or reports.

C S 532. Modern Web Technologies
3 Credits (3)
In this course, we will take a full-stack approach to modern web application design. We will start with the fundamentals including HTML5, CSS3, Javascript, JSON, and the underlying networking concepts and protocols driving the modern web. We will then move on to more advanced topics including javascript backend development with Node.js, NoSQL database design with MongoDB, cloud computing, and responsive web design. Finally, we cover advanced topics including the design and implementation of browser extensions and real-time web technologies like WebRTC and WebSockets. Consent of Instructor required. Taught with: C S 382. Requires more advanced graduate work than C S 382.

Learning Outcomes
1. Understand the fundamental technologies and operation of the web. Design and develop responsive interactive web sites. Deploy web applications on Cloud Computing Platforms. Leverage modern tools and packages to develop full stack web applications. Be fluent in the application of emerging web technologies like browser extensions, WebSockets, and WebRTC. Use existing materials and references on the web to learn new skills.

C S 570. Analysis of Algorithms
3 Credits (3)
Techniques for design and analysis of algorithms; time and space complexity; proving correctness of programs. Particular algorithms such as sorting, searching, dynamic programming. NP complete problems. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372.

Learning Outcomes
1. Prove algorithm correctness by loop-invariant Prove an algorithm to be incorrect by counterexamples Develop efficient divide-and-conquer algorithms Design and analyze binary search tree algorithms Construct dynamic programming solutions Prove the correctness of dynamic programming solutions by contraposition Traverse graphs efficiently Find paths in graphs efficiently Determine if a problem is NP-Complete or NP-Hard 1Basic concepts of quantum computing
C S 571. Programming Language Structure II
3 Credits (3)
Formal semantics of programming languages. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372, and knowledge of principles of programming languages equivalent to C S 471.

Learning Outcomes
1. Apply formal methods to semantics of a variety of programming language constructs
2. Use structural operational semantics as a way to formalize the intended execution and implementation of languages
3. Survey axiomatic semantics, which is useful in developing as well as verifying programs
4. Learn simply-typed lambda calculus
5. Explore more advanced programming language notions, such as types for imperative features and exceptions, parametric polymorphism, existential types for use in abstraction and module systems, and dependent types
6. Become acquainted with recent research in topics such as concurrency, fault localization, or program repair

C S 573. Architectural Concepts II
3 Credits (3)
Advanced topics related to computer architecture, guided by the current literature. Students are expected to have knowledge of computer architectures equivalent to C S 473 and of operating systems equivalent to C S 474. Crosslisted with: E E 564.

Learning Outcomes
1. Be able to explain the features in a modern multicore CPU architecture
2. Be able to utilize hardware counter features of a CPU in performance evaluation
3. Be able to explain the architecture of GPUs and their capabilities and drawbacks
4. Be able to evaluate novel cutting-edge architectural features and designs
5. Be able to present a research paper to an advanced audience

C S 574. Operating Systems II
3 Credits (3)
Advanced topics related to operating system principles, guided by the current literature. Students are expected to have knowledge of computer architectures and operating systems equivalent to C S 473 and C S 474.

Learning Outcomes
1. Further an understanding of the principles of operating systems.
2. Develop insight into process management and scheduling issues.
3. Understand memory management operation.
4. Develop an understanding of file system implementation and of multiple levels of hardware support and management.
5. Develop a deep understanding of the concepts of cooperating processes, including communication, synchronization, and deadlock (detection and avoidance).
6. Be able to evaluate operating system features.
7. Develop an understanding of the distributed operating system environment.

C S 575. Artificial Intelligence II
3 Credits (3)
Covers advanced theory and application of artificial intelligence.

Learning Outcomes
1. Apply selected planning algorithms in solving problems
2. Identify problems where knowledge representation and reasoning techniques are applicable
3. Be able to apply answer set programming in problem solving
4. Be aware of various advanced research topics in Artificial Intelligence

C S 579. Special Topics
1-6 Credits
Topic announced in the Schedule of Classes.

C S 581. Advanced Software Engineering
3 Credits (3)
Advanced tools and methods for developing large software systems. Topics include object-oriented modeling and design, component architectures, templates and generic programming, software configuration and revision control, static and dynamic analysis tools, model, checking, advanced testing, and verification. Students are expected to have knowledge of software engineering equivalent to C S 371.

Learning Outcomes
1. Be able to explain modern software development process ideas
2. Be able to apply agile software development techniques in a project
3. Be able to specify, design, and develop a complex software system in a team
4. Be able to properly utilize both black box and white box testing techniques
5. Be able to explain how unsound and incomplete formal methods can aid in system verification and validation
6. Be able to utilize sound and complete formal methods to prove properties of a system

C S 582. Database Management Systems II
3 Credits (3)
Advanced data models and abstractions, dependencies, implementations, languages, database machines, and other advanced topics. Students are expected to have knowledge of data base management systems equivalent to C S 482.

Learning Outcomes
1. Analyze storage and file structures of an RDBMS
2. Analyze and apply indexing techniques of an RDBMS
3. Analyze the mechanisms of transaction management in an RDBMS
Learning Outcomes

1. Understand advanced crypto primitives such as zero-knowledge proofs, fair exchange, verifiable encryption, k-of-n secret sharing, etc., and their security properties. Understand the theoretical underpinnings of protocols such as attribute-based encryption/signatures, two-party/multi-party secure computation. Given a real-world situation, be able to think of what protocols are best applicable in the scenario, and be able to reason about their security.

C S 584. Computer Networks II
3 Credits (3)
Advanced topics in computer networks. Covers advanced topics in networking, with emphasis on wireless, and IP networks. Students are expected to have knowledge of computer networks equivalent to C S 484, and of statistics equivalent to MATH 371 or MATH 470.

Learning Outcomes
1. Understand design of link layer protocols. Understand challenges and implementations for multimedia streaming. Be able to use basic security constructs in the networking context. Understand the concepts of edge and cloud computing. Understand the concepts and challenges of Internet of Things. Learn concepts of distributed networking. Learn and evaluate future internet architectures.

C S 586. Algorithms in Systems Biology
3 Credits (3)
The course will introduce important algorithms and computational models used in systems biology to study molecular mechanisms for cellular dynamics, processes, and systems. Cellular processes, such as metabolism and signal transduction, are studied as systems and networks quantitatively from high throughput molecular measurements. The topics include molecular biological systems, network alignment, model simulation, network inference, model optimization, and hybrid models. Students will be able to construct models and analyze their properties in the context of molecular biological systems. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372.

Learning Outcomes
1. Create mathematical representation of biological systems. Infer biological network topology from observed omics data set. Simulate the behavior of a biological system using a mathematical model. Characterize behaviors of biological systems. Estimate parameters in a biological system model. Validate a model's statistical relevance given observed data.

C S 587. Advanced Human-Centered Computing
3 Credits (3)
Covers a range of methods available for performing research in the field of human-computer interaction in order to develop insights into effective human-centered designs of computing systems. Students will develop insights into how humans live, play, and work and best practices in system design.

Prerequisite: Consent of instructor or at least a C- in one of the following: C S 485/C S 515, SOCI 352, PSYC 430/PSYC 530, or ANTH 520.

Learning Outcomes
1. Describe, compare, and identify the relative and relevant merits of research methods for understanding people and/or evaluating research products. Use a variety of methods to enact human-centered computing research by proposing, developing, and conducting studies; analyzing data; and synthesizing results. Communicate understanding of people, designs, and evaluations through presentations, demos, and/or reports.

C S 589. Special Research Problems
1-6 Credits
Faculty-supervised investigation, to culminate in a written report. May be repeated; maximum of 6 credits may be applied toward M.S. degree. Restricted to majors.

Prerequisite: written agreement with faculty supervisor.

C S 598. Master's Project
1-6 Credits
Project-oriented capstone course to be completed by M.S. students under supervision of their advisor. Maximum of 6 credits may be applied toward M.S. degree. Restricted to C S majors.

Prerequisite: written agreement with instructor.

C S 599. Master's Thesis
1-6 Credits (1-6)
Thesis to be developed by M.S. Students under supervision of their advisor. May be repeated for a maximum of 6 credits. Restricted to majors.

Prerequisite: consent of instructor.

C S 600. Pre-dissertation Research
1-15 Credits
Pre-dissertation research.

C S 700. Doctoral Dissertation
1-15 Credits
Dissertation.

Office Location: Science Hall 123
Phone: (575) 646-3723
Website: www.cs.nmsu.edu

Computer Science - Bachelor of Arts

The Bachelor of Arts in Computer Science is an open, flexible degree plan that offers the student both a rigorous undergraduate degree program in Computer Science and an extensive open credit hour allotment to pursue knowledge in other domains. It is an excellent choice to combine into a double major program, and is an option for the student who has an interest in learning both domain knowledge in some areas outside of Computer Science, and in acquiring a Computer Science background sufficient to pursue a strong technology career.

Students planning to undertake graduate work in Computer Science are encouraged to pursue the Bachelor of Science degree rather than
the Bachelor of Arts degree. Students interested in graduate work should consult with their advisor regarding the possibility of taking other computer science electives to satisfy their departmental requirements.

**General Requirements Exception**

A grade of a least C must be earned in each of the courses taken to satisfy the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and a non-departmental requirement. No course taken to satisfy either a departmental or a non-departmental requirement may be taken S/U.

**Requirements**

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Non-departmental Requirements (in addition to Gen.Ed/VWW)**

Select two upper-division courses in any one department except Computer Science | 6-8 |

Choose one from the following: | 3 |
| MATH 1350G | Introduction to Statistics (can count towards General Education Elective requirement) | |
| MATH 2350G | Statistical Methods (can count towards General Education Elective requirement) | |
| STAT 371 | Statistics for Engineers and Scientists I | |
| STAT 470 | Probability: Theory and Applications | |
| A ST 311 | Statistical Applications | |

**Second Language Requirement: (not required)**
Electives, to bring the total credits to 120 7

| Total Credits | 120 |

1. Students with Area I transfer credits may sometimes complete this requirement with 9 credits.

2. See the General Education (p. 54) section of the catalog for a full list of courses.

3. Either MATH 1430G Applications of Calculus I or MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter either first. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

4. A course can satisfy only one requirement.

5. Must be taken for 3 credits to count as one course.

6. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Students who plan to seek employment at the bachelor level are advised to take one of the concentrations curricula in addition to the general and departmental requirements. The program of study should be chosen by the student in consultation with an advisor. The list of possible focuses can be found on the Bachelor of Sciences in Computer Science link.

**Second Language Requirement**

For the Bachelor of Arts with a major in Computer Science, there is no second language requirement for the degree.

**A Suggested Plan of Study For Students**

This roadmap assumes student placement in MATH 1220G and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

This roadmap adds the MATH 1511G prerequisites into the plan. MATH 1220G and MATH 1250G will not appear on the requirements tab. Any students who test into MATH 1511G can supplement MATH 1220G and MATH 1250G will electve credits.

**Freshman**

**Credits**

| Total Credits | 120-134 |

1. Required for students who do not pass MATH 1215 Intermediate Algebra or do not pass the CS placement exam and is not counted towards graduation.

2. Either MATH 1511G Calculus and Analytic Geometry I is the starting requirement for this degree but students may need to take MATH 1220G College Algebra and MATH 1511G Calculus and Analytic Geometry I before enrolling in it. If a student tests into MATH 1511G Calculus and Analytic Geometry I then elective credits can replace MATH 1220G College Algebra/MATH 1250G Trigonometry & Pre-Calculus in the roadmap.

See the General Education (p. 54) section of the catalog for a full list of courses.
4 Any course offered by the university. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

5 For electives see List 1 or List 2 of Computer Science electives (p. 383) in Degree Requirement Section.

6 See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

**Computer Science - Bachelor of Science**

The Bachelor of Science in Computer Science is the traditional undergraduate degree in Computer Science. It is rigorously focused on educating the student in the fundamental disciplines of Computer Science. It prepares the student for any technological field in industry, and also provides the preparation for graduate studies in Computer Science. It is the main undergraduate degree in the Computer Science department, and should be the choice of a single-major Computer Science student. This degree is accredited by the ABET Computing Accreditation Commission (CAC) under the General and Computer Science Program Criteria (through 9/30/2022).

**General Requirements Exception**

A grade of at least C- must be earned in each of the courses taken to satisfy the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and a non-departmental requirement. No course taken to satisfy either a departmental or a non-departmental requirement may be taken S/U.

**Requirements**

Students who plan to seek employment at the bachelor level are advised to take one of the concentration area curricula in addition to the general and departmental requirements. An elective course cannot be used for more than two focuses. A course that is required for one concentration cannot be used as an elective course of another one.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

### Second Language Requirements: (not required)

- Electives, to bring the total credits to 120

---

**Students who plan to seek employment at the bachelor level are advised to use their elective credits to complete concentration coursework.**

**Second Language Requirement**

For the Bachelor of Science with a major in Computer Science (including all Concentration Areas), there is no second language requirement for the degree.

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Credits

| Total Credits | 120-123 |

---

1. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.
2. See the General Education (p. 54) section of the catalog for a full list of courses.
3. Students who plan to graduate with a concentration need to complete the specific requirements for the chosen concentration. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
4. See list of Computer Science electives (p. 386) in Degree Requirement Section.

1. Students with Area I transfer credits may sometimes complete this requirement with 9 credits
2. See the General Education (p. 54) section of the catalog for a full list of courses
3. MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are required for the degree but students may need to take any prerequisites needed to enter MATH 1511G or MATH 1521G first.
4. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.
5. A course can satisfy only one requirement.
6. Must be taken for 3 credits to count as a course.
7. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Students who plan to graduate with a concentration need to complete the specific requirements for the chosen concentration. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Students who plan to graduate with a concentration need to complete the specific requirements for the chosen concentration. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

See list of Computer Science electives (p. 388) in Degree Requirement Section.
Math Electives:
- MATH 331 Introduction to Modern Algebra
- MATH 332 Introduction to Analysis
- MATH 377 Introduction to Numerical Methods
- MATH 392 Introduction to Ordinary Differential Equations
- MATH 454 Logic and Set Theory
- MATH 455 Elementary Number Theory

See list of Lab Science (p. 388) courses in the Degree Requirement Section.

See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

Students planning to undertake graduate work in computer science are encouraged to consult with their advisor regarding the possibility of taking other computer science electives to satisfy their departmental requirements.

Computer Science (Artificial Intelligence) - Bachelor of Science

The Bachelor of Science in Computer Science is the traditional undergraduate degree in Computer Science. It is rigorously focused on educating the student in the fundamental disciplines of Computer Science. It prepares the student for any technological field in industry, and also provides the preparation for graduate studies in Computer Science. It is the main undergraduate degree in the Computer Science department, and should be the choice of a single-major Computer Science student. This degree is accredited by the ABET Computing Accreditation Commission (CAC) under the General and Computer Science Program Criteria (through 9/30/2022).

General Requirements Exception

A grade of at least C- must be earned in each of the courses taken to satisfy the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and a non-departmental requirement. No course taken to satisfy either a departmental or a non-departmental requirement may be taken S/U.

Requirements

Students who plan to seek employment at the bachelor level are advised to take one of the concentration area curricula in addition to the general and departmental requirements. An elective course cannot be used for more than two focuses. A course that is required for one concentration cannot be used as an elective course of another one.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Select 6 credits from the following.

Lab Science (p. 388)

Viewing a Wider World (p. 58)

Area I: Communications

Area II: Mathematics

MATH 1511G Calculus and Analytic Geometry I 3

Area III/IV: Laboratory Sciences and Social/Behavioral Sciences

Area III: Laboratory Sciences

Choose two different courses from the following:

ASTR 1115G Introduction to Astronomy Lecture & Laboratory
BIOL 2610G Principles of Biology: Biodiversity, Ecology, and Evolution
& BIOL 2610L and Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory

BIOL 2110G Principles of Biology: Cellular and Molecular Biology
& BIOL 2110L and Principles of Biology: Cellular and Molecular Biology Laboratory

CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors
CHEM 1225G General Chemistry II Lecture and Laboratory for STEM Majors

GEOL 1110G Physical Geography
GEOL 1110G Physical Geology
HNRS 2116G Earth, Time and Life

PHYS 1230G Algebra-Based Physics I
& PHYS 1230L and Algebra-Based Physics I Lab
PHYS 1240G Algebra-Based Physics II
& PHYS 1240L and Algebra-Based Physics II Lab

PHYS 1310G Calculus-Based Physics I
& PHYS 1310L and Calculus-Based Physics I Lab
PHYS 1320G Calculus-Based Physics II
& PHYS 1320L and Calculus-Based Physics II Lab

Area IV: Social/Behavioral Sciences (3 credits)

Area V: Humanities

Area VI: Creative and Fine Arts

General Education Elective

MATH 1521G Calculus and Analytic Geometry II
or MATH 1521H Calculus and Analytic Geometry II Honors

Viewing a Wider World

Departmental/College Requirements

C S 172 Computer Science I
C S 271 Object Oriented Programming
C S 272 Introduction to Data Structures
C S 273 Machine Programming and Organization
C S 278 Discrete Mathematics for Computer Science
C S 370 Compilers and Automata Theory
C S 371 Software Development
C S 372 Data Structures and Algorithms
C S 419 Computing Ethics and Social Implications of Computing
C S 448 Senior Project
or C S 449 Senior Thesis
C S 471 Programming Language Structure I
C S 474 Operating Systems I
C S 482 Database Management Systems I

Select 6 credits from the following.

English Composition - Level 1
ENGL 2210G Professional & Technical Communication

Oral Communication

Choose one from the following:

COMM 1115G Introduction to Communication
COMM 1130G Public Speaking
HNRS 2175G Introduction to Communication Honors

New Mexico State University - Las Cruces 391
The specific requirements for the concentration in Artificial Intelligence are as follows:

Select 3-4 credits from the following:

- C S 343 Algorithm Design & Implementation
- C S 372 Data Structures and Algorithms

Select 9 credits from the following:

- C S 475 Artificial Intelligence I
- C S 483
- C S 487 Applied Machine Learning I
- C S 488 Introduction to Data Mining

**Total Credits:** 120

1. Students with Area I transfer credits may sometimes complete this requirement with 9 credits.
2. See the **General Education** (p. 54) section of the catalog for a full list of courses.
3. MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are required for the degree but students may need to take any prerequisites needed to enter MATH 1511G or MATH 1521G first.
4. See the **Viewing a Wider World** (p. 58) section of the catalog for a full list of courses.
5. A course can satisfy only one requirement.
6. Must be taken for 3 credits to count as a course.
7. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

- MATH 332 Introduction to Analysis
- MATH 377 Introduction to Numerical Methods
- MATH 392 Introduction to Ordinary Differential Equations
- MATH 454 Logic and Set Theory
- MATH 455 Elementary Number Theory

**Lab Science Electives:**

- See list of Lab Science electives (p. 393) in Degree Requirement Section.

- See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

Students planning to undertake graduate work in computer science are encouraged to consult with their advisor regarding the possibility of taking other computer science electives to satisfy their departmental requirements.
Computer Science (Computer Networking) - Bachelor of Science

The Bachelor of Science in Computer Science is the traditional undergraduate degree in Computer Science. It is rigorously focused on educating the student in the fundamental disciplines of Computer Science. It prepares the student for any technological field in industry, and also provides the preparation for graduate studies in Computer Science. It is the main undergraduate degree in the Computer Science department, and should be the choice of a single-major Computer Science student. This degree is accredited by the ABET Computing Accreditation Commission (CAC) under the General and Computer Science Program Criteria (through 9/30/2022).

General Requirements Exception

A grade of at least C- must be earned in each of the courses taken to satisfy the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and a non-departmental requirement. No course taken to satisfy either a departmental or a non-departmental requirement may be taken S/U.

Requirements

Students who plan to seek employment at the bachelor level are advised to take one of the concentration area curricula in addition to the general and departmental requirements. An elective course cannot be used for more than two focuses. A course that is required for one concentration cannot be used as an elective course of another one.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

---

3 MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are required for the degree but students may need to take any prerequisites needed to enter MATH 1511G or MATH 1521G first.

4 See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

5 A course can satisfy only one requirement.

6 Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

C S 496 Cloud and Edge Computing

MATH 2415 Introduction to Linear Algebra

or MATH 480 Applied Linear Algebra

Select one from the following:

- MATH 331 Introduction to Modern Algebra
- MATH 332 Introduction to Numerical Methods
- MATH 392 Introduction to Ordinary Differential Equations
- MATH 454 Logic and Set Theory
- MATH 455 Elementary Number Theory

Select one from the following:

- A S 311 Statistical Applications
- STAT 371 Statistics for Engineers and Scientists I
- STAT 470 Probability: Theory and Applications

Lab Science Courses

Select one from the following:

- BIOL 2610G & BIOL 2610L Principles of Biology: Biodiversity, Ecology, and Evolution
- BIOL 2110G & BIOL 2110L Principles of Biology: Cellular and Molecular Biology
- CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors
- CHEM 1225G General Chemistry II Lecture and Laboratory for STEM Majors
- PHYS 1230G & PHYS 1230L Algebra-Based Physics I and Algebra-Based Physics I Lab
- PHYS 1240G & PHYS 1240L Algebra-Based Physics II and Algebra-Based Physics II Lab
- PHYS 2110 & 2110L Mechanics and Experimental Mechanics
- PHYS 2140 & 2140L Electricity and Magnetism and Electricity & Magnetism Laboratory
- PHYS 1310G & PHYS 1310L Calculus-Based Physics I and Calculus-Based Physics I Lab
- PHYS 1320G & PHYS 1320L Calculus-Based Physics II and Calculus-Based Physics II Lab

Second Language Requirements: (not required)

Electives, to bring the total credits to 120

The specific requirements for the concentration in Computer Networking are as follows:

- C S 484 Computer Networks I (required)
- C S 496 Cloud and Edge Computing (required)
- Select 6 credits from the following:
  - C S 382 Modern Web Technologies
  - C S 473 Architectural Concepts I
  - C S 478 Computer Security
  - C S 480 Linux System Administration
  - C S 491 Parallel Programming

**Total Credits:** 120

1. Students with Area I transfer credits may sometimes complete this requirement with 9 credits
2. See the General Education (p. 54) section of the catalog for a full list of courses
3. MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are required for the degree but students may need to take any prerequisites needed to enter MATH 1511G or MATH 1521G first.
4. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.
5. A course can satisfy only one requirement.
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Credits

Total Credits: 120-123

1. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.
2. See the General Education (p. 54) section of the catalog for a full list of courses.
3. Students who plan to graduate with a concentration need to complete the specific requirements for the chosen concentration. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
4. See list of Computer Science electives (p. 398) in Degree Requirement Section.
5. Math Electives:
   - MATH 331 Introduction to Modern Algebra
   - MATH 332 Introduction to Analysis
   - MATH 377 Introduction to Numerical Methods
   - MATH 392 Introduction to Ordinary Differential Equations
   - MATH 454 Logic and Set Theory
   - MATH 455 Elementary Number Theory
5. See list of Lab Science (p. 398) courses in the Degree Requirement Section.
6. See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.

Students planning to undertake graduate work in computer science are encouraged to consult with their advisor regarding the possibility of taking other computer science electives to satisfy their departmental requirements.

## Computer Science (Human Computer Interaction) - Bachelor of Science

The Bachelor of Science in Computer Science is the traditional undergraduate degree in Computer Science. It is rigorously focused on educating the student in the fundamental disciplines of Computer Science. It prepares the student for any technological field in industry, and also provides the preparation for graduate studies in Computer Science. It is the main undergraduate degree in the Computer Science department, and should be the choice of a single-major Computer Science student. This degree is accredited by the ABET Computing Accreditation Commission (CAC) under the General and Computer Science Program Criteria (through 9/30/2022).
**General Requirements Exception**

A grade of at least C- must be earned in each of the courses taken to satisfy the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and a non-departmental requirement. No course taken to satisfy either a departmental or a non-departmental requirement may be taken S/U.

**Requirements**

Students who plan to seek employment at the bachelor level are advised to take one of the concentration area curricula in addition to the general and departmental requirements. An elective course cannot be used for more than two focuses. A course that is required for one concentration cannot be used as an elective course of another one.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

PHYS 2140 Electricity and Magnetism
& 2140L and Electricity & Magnetism Laboratory

PHYS 1310 G Calculus-Based Physics I
& PHYS 1310L Calculus-Based Physics I Lab
PHYS 1320 G Calculus-Based Physics II
& PHYS 1320L and Calculus-Based Physics II Lab

Second Language Requirements: (not required)

Electives, to bring the total credits to 120

The specific requirements for the concentration in Software Engineering are as follows:

C S 371 Software Development (required)
Select 9 credits from the following list:

C S 382 Modern Web Technologies
C S 476 Computer Graphics I
C S 478 Computer Security
C S 480 Linux System Administration
C S 484 Computer Networks I
C S 485 Human-Centered Computing
C S 491 Parallel Programming

Total Credits 120

1 Students with Area I transfer credits may sometimes complete this requirement with 9 credits
2 See the General Education (p. 54) section of the catalog for a full list of courses
3 MATH 1511G Calculus and Analytic Geometry I and MATH 1511G Calculus and Analytic Geometry I are required for the degree but students may need to take any prerequisites needed to enter MATH 1511G or MATH 1521G first.
4 See the Viewing a Wider World (p. 58) section of the catalog for a full list of courses.
5 A course can satisfy only one requirement.
6 Must be taken for 3 credits to count as a course.
