ACADEMIC CATALOG
2024-2025

BE BOLD. Shape the Future.®
New Mexico State University

TABLE OF CONTENTS

Las Cruces Academic Catalog	13	Business Administration - Master of Business Administration	110
University Leadership	13	Business Administration (Agribusiness) - Master of Business Administration	112
The History of the University	14	Business Administration (Finance) - Master of Business Administration	114
Programs A-Z	14	Business Administration (Health Services Management) - Master of Business Administration	115
Catalog Glossary	22	Business Administration (Information Systems) - Master of Business Administration	117
The NMSU System Academic Regulations	31	Business Administration (Public Utility Regulations) - Master of Business Administration	118
Areas of Interest	55	Chemical Engineering - Master of Engineering in Chemical Engineering	120
Applied and Clinical Health Sciences	55	Chemical Engineering - Master of Science in Chemical Engineering	120
Applied Social and Behavioral Sciences	55	Chemistry - Master of Science	121
Business	55	Civil Engineering - Master of Engineering in Civil Engineering	121
Communication, Media Study, and Creative Arts	56	Civil Engineering - Master of Science in Civil Engineering	123
Humanities and Social Sciences	56	Clinical Mental Health Counseling - Master of Arts	126
Life Sciences	56	Communication Disorders - Master of Arts	126
Physical Sciences and Engineering	57	Communication Studies - Master of Arts	127
Teacher Education	57	Computer Science - Master of Science	128
Undergraduate Admissions and Orientation	58	Counseling and Guidance (Educational Diagnostics) - Master of Arts	129
Transfer Students	60	Creative Writing - Master of Fine Arts	129
Military and Veterans Programs (MVP)	61	Criminal Justice - Master of Criminal Justice	130
International Students	67	Data Analytics - Master of Data Analytics	130
Tuition, Fees & Other Expenses	69	Economics - Master of Arts	132
Financial Aid & Scholarship Services	71	Economics (Econometrics) - Master of Arts	132
The Graduate School	73	Economics (Public Policy) - Master of Arts	133
Accounting - Master of Accountancy	91	Economics (Public Utility Policy and Regulation) - Master of Arts	133
Aerospace Engineering - Master of Engineering in Aerospace Engineering	92	Education (Curriculum & Instruction) - Master of Arts	134
Aerospace Engineering - Master of Science	93	Education (Early Childhood Education Plus Licensure) - Masters of Arts	134
Agriculture (Agribusiness) - Master of Agriculture	93	Education (Elementary Licensure Prep) - Master of Arts	134
Agriculture (Domestic Animal Biology) - Master of Agriculture	94	Education (Elementary Mathematics and Science) - Master of Arts	136
Agricultural and Extension Education - Master of Arts	95	Education (Secondary Licensure Prep) - Master of Arts	136
Agricultural Biology - Master of Science	96	Educational Leadership & Administration (Higher Education Administration) - Master of Arts	137
Agricultural Economics - Master of Science	97	Educational Leadership & Administration (Pk-12 Administration) - Master of Arts	138
Athletic Training - Master of Science	97	Electrical Engineering - Master of Engineering in Electrical Engineering	139
Animal Science - Master of Science	99		
Anthropology - Master of Arts	99		
Applied Statistics - Master of Science	103		
Art - Master of Arts	104		
Astronomy - Master of Science	104		
Bioinformatics - Master of Science	107		
Biology - Master of Science	109		

Electrical Engineering - Master of Science in Electrical Engineering	141	Public History and Public Administration - Dual M.A. Degree	166
English - Master of Arts	143	Range Science - Master of Science	166
Environmental Engineering - Master of Science in Environmental Engineering	145	Social Work - Master of Social Work (Full-Time)	166
Experimental Psychology - Master of Arts	146	Social Work - Master of Social Work (Full-Time Advanced)	167
Family and Consumer Sciences (Food Science and Technology) - Master of Science	146	Social Work - Master of Social Work (Part-Time)	168
Family and Consumer Sciences (Couples, Marriage and Family Therapy) - Master of Science	147	Sociology - Master of Arts	168
Family and Consumer Sciences (Hotel, Restaurant and Tourism Management) - Master of Science	147	Spanish - Master of Arts	170
Family and Consumer Sciences (Human Nutrition & Dietetic Sciences) - Master of Science	149	Special Education - Master of Arts	171
Fine Arts - Master of Fine Arts	149	Water Science and Management - Master of Science	172
Fish, Wildlife and Conservation Ecology - Master of Science	150	Water Science and Management (Agricultural Water Resources) - Master of Science	173
Geography - Master of Applied Geography	151	Water Science and Management (International Water Resilience) - Master of Science	174
Geology - Master of Science	152	Water Science and Management (Water Economics and Policy) - Master of Science	174
History - Master of Arts	153	Water Science and Management (Water Informatics) - Master of Science	175
History (Public History) - Master of Arts	153	Water Science and Management (Water Quality and Treatment) - Master of Science	175
Horticulture - Master of Science	154	Water Science and Management (Watersheds and Aquatic/Riparian Wetlands) - Master of Science	176
Industrial Engineering - Master of Engineering in Industrial Engineering	154	Aerospace Engineering - Doctor of Philosophy	177
Industrial Engineering - Master of Science in Industrial Engineering	155	Animal Science - Doctor of Philosophy	178
Mathematics - Master of Science	157	Applied Statistics - Doctor of Philosophy	179
Mechanical Engineering - Master of Engineering in Mechanical Engineering	158	Astronomy - Doctor of Philosophy	180
Mechanical Engineering - Master of Science in Mechanical Engineering	159	Biology - Doctor of Philosophy	183
Molecular Biology - Master of Science	159	Business Administration (Management) - Doctor of Philosophy	184
MPA-MCJ Program - Dual Degree	160	Business Administration (Marketing) - Doctor of Philosophy	184
Music (Conducting) - Master of Music	160	Chemistry - Doctor of Philosophy	184
Music (Music Education) - Master of Music	160	Computer Science - Doctor of Philosophy	185
Music (Performance) - Master of Music	161	Counseling Psychology - Doctor of Philosophy	186
Physics - Master of Science	161	Curriculum and Instruction - Doctor of Philosophy	186
Physics (Space Physics) - Master of Science	161	Economic Development - Doctor of Economic Development	187
Plant and Environmental Science - Master of Science	161	Educational Leadership & Administration (Higher Education Administration) - Doctor of Education	188
Political Science - Master of Arts	162	Educational Leadership & Administration (Higher Education) - Doctor of Philosophy	189
Public Administration - Master of Public Administration	162	Educational Leadership & Administration (Pk-12 Administration) - Doctor of Education	190
Public Health (Health Behavior and Health Promotion) - Master of Public Health	163	Educational Leadership & Administration (Pk-12 Education) - Doctor of Philosophy	191
Public Health (Health Management, Administration & Policy) - Master of Public Health	164		

Engineering (Chemical Engineering) - Doctor of Philosophy	192	Museum Studies - Graduate Certificate	215
Engineering (Civil Engineering) - Doctor of Philosophy	193	Principal Licensure - Graduate Certificate	216
Engineering (Electrical Engineering) - Doctor of Philosophy	194	Public Health - Graduate Certificate	216
Engineering (Industrial Engineering) - Doctor of Philosophy	196	Public Utility Regulation and Economics - Graduate Certificate	217
Engineering (Mechanical Engineering) - Doctor of Philosophy	197	Secondary Education Alternative Licensure - Graduate Certificate	217
Experimental Psychology - Doctor of Philosophy	197	Sustainability - Graduate Certificate	218
Geography - Doctor of Philosophy	198	Systems Engineering - Graduate Certificate	218
Health Equity Sciences - Doctor of Philosophy	199	Advanced Manufacturing - Graduate Minor	219
Kinesiology - Doctor of Philosophy	200	Agricultural and Extension Education - Graduate Minor	219
Mathematics - Doctor of Philosophy	200	Animal Science - Graduate Minor	219
Molecular Biology - Doctor of Philosophy	201	Anthropology - Graduate Minor	219
Nursing Practice (Nurse Anesthesiology) - Doctor of Nursing Practice	202	Applied Statistics - Graduate Minor	219
Physics - Doctor of Philosophy	203	Archaeology - Graduate Minor	219
Plant and Environmental Science - Doctor of Philosophy	204	Bioinformatics (with Computer Science) - Graduate Minor	220
Range Science - Doctor of Philosophy	204	Communication Studies - Graduate Minor	220
Rhetoric and Professional Communication - Doctor of Philosophy	205	Computer Science - Graduate Minor	220
School Psychology - Doctor of Philosophy	205	Economics - Graduate Minor	220
Transborder and Global Human Dynamics - Doctor of Philosophy	206	Educational Administration (Doctoral) - Graduate Minor	220
Water Science and Management - Doctor of Philosophy	208	Educational Administration (Higher Ed.) - Graduate Minor	220
Water Science and Management (Agricultural Water Resources) - Doctor of Philosophy	209	Educational Administration (Pk-12) - Graduate Minor	221
Water Science and Management (International Water Resilience) - Doctor of Philosophy	209	Fish, Wildlife and Conservation Ecology - Graduate Minor	221
Water Science and Management (Water Economics and Policy) - Doctor of Philosophy	210	Food Studies - Graduate Minor	221
Water Science and Management (Water Informatics) - Doctor of Philosophy	210	Gender and Sexuality Studies - Graduate Minor	221
Water Science and Management (Water Quality Treatments) - Doctor of Philosophy	211	Geographic Information Systems - Graduate Minor	222
Water Science and Management (Watershed and Aquatic/Riparian Wetlands) - Doctor of Philosophy	211	Gerontology - Graduate Minor	222
Reading - Specialist in Education	212	History - Graduate Minor	222
School Psychology - Specialist in Education	212	Information Systems - Graduate Minor	222
Autism and Spectrum Disorders - Graduate Certificate	213	Integrated Behavioral Health Care - Graduate Minor	223
Borderlands and Ethnic Studies - Graduate Certificate	213	Materials Engineering - Graduate Minor	224
Cultural Resource Management - Graduate Certificate	214	Molecular Biology - Graduate Minor	224
Elementary Education Alternative Licensure - Graduate Certificate	214	Native American Studies - Graduate Minor	224
Finance - Graduate Certificate	215	Physics - Graduate Minor	225
		Psychology - Graduate Minor	225
		Range Science - Graduate Minor	225
		Security Studies - Graduate Minor	225
		Sociology - Graduate Minor	225
		Spanish Counseling - Graduate Minor	225
		Special Education - Graduate Minor	227
		U.S.-Mexico Border Health Issues - Graduate Minor	227
		General Education & Viewing a Wider World Courses	227

Common Course Numbering Crosswalk	233	General Agriculture - Bachelor of Science in Agriculture	338
College of Agricultural, Consumer, and Environmental Sciences	280	Entomology - Undergraduate Minor	340
Agricultural and Extension Education	283	Pest Management - Undergraduate Minor	340
Agricultural and Extension Education (Agricultural Communications) - Bachelor of Science in Agriculture ...	291	Plant Pathology - Undergraduate Minor	340
Agricultural and Extension Education (Agricultural Education Teaching) - Bachelor of Science in Agriculture	293	Weed Science - Undergraduate Minor	340
Agricultural and Extension Education (Agricultural Extension/Development) - Bachelor of Science in Agriculture	295	Family and Consumer Sciences	341
Agricultural and Extension Education - Undergraduate Minor	296	Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences	359
Agricultural Communications - Undergraduate Minor	296	Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences	361
Leadership in Agricultural Communications - Undergraduate Minor	296	Food Science and Technology (Culinary Science) - Bachelor of Science in Food Science and Technology	363
Agricultural Economics and Agricultural Business	297	Food Science and Technology (Meat Science) - Bachelor of Science in Food Science and Technology	364
Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture	305	Food Science and Technology (Science, Technology and Engineering) - Bachelor of Science in Food Science and Technology	366
Natural Resource Economics and Policy - Bachelor of Science in Agriculture	307	Human Development & Family Science - Bachelor of Science	368
Agricultural Business Management- Undergraduate Minor	309	Human Nutrition and Dietetic Science (Nutrition Education) - Bachelor of Science in Family and Consumer Sciences	370
Natural Resource Economics - Undergraduate Minor	310	Human Nutrition and Dietetic Science (Pre-Dietetics/ Dietetics) - Bachelor of Science in Family and Consumer Sciences	372
Animal and Range Sciences	310	Culinary Science - Undergraduate Minor	375
Animal Science (Animal Industry) - Bachelor of Science in Agriculture	319	Fashion Merchandising & Design - Undergraduate Minor	375
Animal Science (Science) - Bachelor of Science in Agriculture	321	Food Science - Undergraduate Minor	375
Range Science - Bachelor of Science in Agriculture	323	Human Development and Family Science - Undergraduate Minor	375
Dairy Science - Undergraduate Minor	326	Nutrition - Undergraduate Minor	375
Horse Management - Undergraduate Minor	326	Fish, Wildlife and Conservation Ecology	376
Human Animal Interaction - Undergraduate Minor	326	Conservation Ecology - Bachelor of Science in Conservation Ecology	380
Livestock Production - Undergraduate Minor	326	Fisheries and Wildlife Science (Aquatic Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology	381
Ranch Management - Undergraduate Minor	326	Fisheries and Wildlife Science (Wildlife Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology	384
Range Science - Undergraduate Minor	327	Conservation Ecology - Undergraduate Minor	387
Entomology, Plant Pathology and Weed Science	327	Wildlife Science - Undergraduate Minor	387
Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture	330	Plant and Environmental Sciences	387
Agricultural Biology (Applied Microbiology) - Bachelor of Science in Agriculture	332	Agronomy - Bachelor of Science in Agriculture	398
Agricultural Biology (Entomology) - Bachelor of Science in Agriculture	333	Environmental Science - Bachelor of Science in Environmental Science	399
Agricultural Biology (Environmental Biology) - Bachelor of Science in Agriculture	334		
Agricultural Biology (Invasive Pest Biology and Management) - Bachelor of Science in Agriculture	336		

Genetics and Biotechnology - Bachelor of Science in Genetics	401	Biology	490
Horticulture - Bachelor of Science in Agriculture	404	Biology - Bachelor of Arts	502
Horticulture (Turfgrass Science and Management) - Bachelor of Science in Agriculture	406	Biology - Bachelor of Science	504
Soil Science (Environment and Resource Management) - Bachelor of Science in Agriculture	409	Conservation Ecology - Bachelor in Conservation Ecology	507
Soil Science (Soil and Water Science) - Bachelor of Science in Agriculture	411	Genetics and Biotechnology - Bachelor of Science in Genetics	508
Soil Science (Soils) - Bachelor of Science in Agriculture	413	Microbiology - Bachelor of Science	510
Agronomy - Undergraduate Minor	415	Biology - Undergraduate Minor	513
Environmental Science - Undergraduate Minor	415	Conservation Ecology - Undergraduate Minor	513
Genetics and Biotechnology - Undergraduate Minor	415	Genetics and Biotechnology - Undergraduate Minor	513
Horticulture - Undergraduate Minor	416	Human Biology - Undergraduate Minor	513
Soil Science - Undergraduate Minor	416	Microbiology - Undergraduate Minor	514
School of Hotel, Restaurant and Tourism Management	416	Chemistry and Biochemistry	514
Hotel, Restaurant and Tourism Management - Bachelor of Science	427	Biochemistry - Bachelor of Science	525
Hotel, Restaurant and Tourism Management - Undergraduate Minor	429	Chemistry - Bachelor of Arts	527
Water Science and Management	430	Chemistry (Pre-Med) - Bachelor of Arts	529
College of Arts and Sciences	433	Chemistry (Secondary Education) - Bachelor of Arts	532
Aerospace Studies	438	Chemistry - Bachelor of Science	534
Aerospace Studies - Undergraduate Minor	439	Chemistry (Secondary Education) - Bachelor of Science	536
Anthropology	439	Biochemistry - Undergraduate Minor	538
Anthropology - Bachelor of Arts	455	Chemistry - Undergraduate Minor	538
Anthropology (Culture & Language) - Bachelor of Arts	458	Communication Studies	538
Anthropology - Undergraduate Minor	460	Communication Studies - Bachelor of Arts	545
Archaeology - Undergraduate Minor	461	Communication Studies - Undergraduate Minor	547
Medical Anthropology - Undergraduate Minor	461	Computer Science	548
Sustainability- Undergraduate Minor	462	Computer Science - Bachelor of Arts	564
Religious Studies - Undergraduate Minor	462	Computer Science - Bachelor of Science	566
Applied Studies - Bachelor of Applied Studies	463	Computer Science (Algorithm Theory) - Bachelor of Science	569
Art	463	Computer Science (Artificial Intelligence) - Bachelor of Science	571
Art (Art History) - Bachelor of Arts	477	Computer Science (Big Data and Data Science) - Bachelor of Science	574
Art (Studio Art) - Bachelor of Arts	478	Computer Science (Computer Networking) - Bachelor of Science	576
Art (Museum Conservation) - Bachelor of Fine Arts	480	Computer Science (Cybersecurity) - Bachelor of Science	579
Art (Studio Art) - Bachelor of Fine Arts	482	Computer Science (Human Computer Interaction) - Bachelor of Science	581
Art - Undergraduate Minor	484	Computer Science (Secondary Education) - Bachelor of Arts	584
Art History - Undergraduate Minor	484	Computer Science (Software Development) - Bachelor of Science	586
Museum Conservation - Undergraduate Minor	484		
Astronomy	485		
Astronomy - Undergraduate Minor	489		

Cybersecurity - Bachelor of Science	589	Geological Sciences	663
Computer Science - Bachelor of Science/Master of Science	590	Geology (Earth and Environmental Sciences) - Bachelor of Science	667
Algorithm Theory - Undergraduate Minor	591	Geology (Earth Science Education) - Bachelor of Science	670
Bioinformatics - Undergraduate Minor	591	Geology (Geological Sciences) - Bachelor of Science	672
Computer Systems - Undergraduate Minor	592	Geology - Undergraduate Minor	675
Software Development - Undergraduate Minor	592	Government	676
Creative Media	592	Political Science - Bachelor of Arts	685
Animation and Visual Effects - Bachelor of Creative Media	600	American Government and Politics - Undergraduate Minor	686
Digital Film Making - Bachelor of Creative Media	603	Comparative Politics - Undergraduate Minor	687
Animation and Visual Effects - Undergraduate Minor	604	International Relations - Undergraduate Minor	687
Creative Writing - Undergraduate Minor	604	Political Science - Undergraduate Minor	687
Digital Film Making - Undergraduate Minor	605	Political Theory - Undergraduate Minor	687
Criminal Justice	605	Public Administration - Undergraduate Minor	687
Criminal Justice - Bachelor of Criminal Justice	611	Public Law - Undergraduate Minor	688
Forensic Science - Undergraduate Minor	614	Law and Society - Supplemental Major	688
Law and Society - Undergraduate Supplemental Major	615	History	688
Economics, Applied Statistics, and International Business	615	History - Bachelor of Arts	698
Economics - Bachelor of Arts	618	History - Undergraduate Minor	700
Economics - Undergraduate Minor	620	Individualized Studies - Bachelor of Individualized Studies ...	700
English	620	Individualized Studies (Pre-Pharmacy) - Bachelor of Individualized Studies	701
English (Creative Writing) - Bachelor of Arts	635	Journalism and Media Studies	702
English - Bachelor of Arts	637	Journalism and Media Studies - Bachelor of Arts	708
English (Literature, Language and Culture) - Bachelor of Arts	639	Journalism and Media Studies - Undergraduate Minor ...	713
English (Rhetoric, Digital Media and Professional Communication) - Bachelor of Arts	641	Social Media Management - Undergraduate Minor	713
Gender and Sexuality Studies - Bachelor of Arts	643	Strategic Communications - Undergraduate Minor	713
English - Undergraduate Minor	645	Languages and Linguistics	713
Gender & Sexuality Studies - Undergraduate Minor	645	Foreign Languages (French) - Bachelor of Arts	733
Literature - Undergraduate Minor	646	Foreign Languages (German) - Bachelor of Arts	735
Medieval and Early Modern Studies - Undergraduate Minor	646	Foreign Languages (Spanish) - Bachelor of Arts	738
Rhetoric and Professional Communication - Undergraduate Minor	647	Linguistics - Bachelor of Arts	740
Geography	647	East Asian Studies - Undergraduate Minor	743
Geography (Environmental Studies) - Bachelor of Science	657	French - Undergraduate Minor	744
Geography (Geographic Information Science & Tech) - Bachelor of Science	660	German - Undergraduate Minor	744
Geographic Information Systems - Undergraduate Minor	662	International Studies - Undergraduate Minor	744
Geography - Undergraduate Minor	663	Linguistics - Undergraduate Minor	745
		Spanish - Undergraduate Minor	745
		Latin American Studies - Supplemental Major	745
		Chicano Studies - Supplemental Major	746
		Linguistics - Supplemental Major	746

Mathematical Sciences	747	Psychology	829
Mathematics (Actuarial Science and Insurance) - Bachelor of Science	761	Psychology - Bachelor of Arts	834
Mathematics (Applied Mathematics) - Bachelor of Science	763	Psychology - Undergraduate Minor	837
Mathematics (Foundations) - Bachelor of Science	765	Theatre Arts	837
Mathematics (General Mathematics) - Bachelor of Science	767	Theatre Arts - Bachelor of Arts	842
Mathematics (Probability and Statistics) - Bachelor of Science	768	Theatre Arts (Musical Theatre) - Bachelor of Arts	843
Mathematics (Secondary Mathematics Education) - Bachelor of Science	770	Theatre Arts - Undergraduate Minor	845
Applied Mathematics - Supplemental Major	772	College of Business	845
Mathematics - Undergraduate Minor	773	Prebusiness - Associate in Prebusiness	849
Military Science	773	Business Administration - Undergraduate Minor	849
Military Science - Undergraduate Minor	775	Accounting and Information Systems	850
Molecular Biology & Interdisciplinary Life Sciences	775	Accounting - Bachelor of Accountancy	854
Molecular Biology- Undergraduate Minor	777	Information Systems - Bachelor of Business Administration	856
Music	778	Accounting - Undergraduate Minor	859
Music - Bachelor of Arts	790	Enterprise Systems - Undergraduate Minor	859
Music (Pre-Music Therapy) - Bachelor of Arts	791	Information Systems - Undergraduate Minor	859
Music (Pre-Speech Language Pathology) - Bachelor of Arts	793	Business Administration	859
Music (Theatre) - Bachelor of Arts	795	Economics, Applied Statistics, and International Business	861
Music (Instrumental Performance) - Bachelor of Music	796	Economics - Bachelor of Arts in Economics	869
Music (Piano Performance) - Bachelor of Music	798	Economics - Bachelor of Business Administration	871
Music (Vocal Performance) - Bachelor of Music	800	Economics (Energy Economics) - Bachelor of Business Administration	873
Music Education (K12 Instrumental) - Bachelor of Music Education	802	International Business - Bachelor of Business Administration	875
Music Education (K12 Vocal) - Bachelor of Music Education	804	Economics - Undergraduate Minor	878
Music - Undergraduate Minor	806	International Business - Undergraduate Minor	878
Philosophy	806	Finance	878
Justice, Political Philosophy, and Law - Bachelor of Arts	809	Finance - Bachelor of Business Administration	882
Philosophy - Bachelor of Arts	810	Finance (Banking and Financial Planning) - Bachelor of Business Administration	884
Ethics - Undergraduate Minor	812	Finance (Entrepreneurial Finance) - Bachelor of Business Administration	885
Justice, Political Philosophy, and Law - Undergraduate Minor	812	Finance (Financial Analyst) - Bachelor of Business Administration	886
Philosophy - Undergraduate Minor	813	Finance (Risk Management and Insurance) - Bachelor of Business Administration	888
Physics	813	Business Law - Undergraduate Minor	889
Physics - Bachelor of Arts	824	Entrepreneurship and Innovation (Business Cluster) - Undergraduate Minor	890
Physics - Bachelor of Science	826	Finance - Undergraduate Minor	890
Physics - Undergraduate Minor	829	Risk Management and Insurance - Undergraduate Minor	890
		Management	890

General Business - Bachelor of Business Administration	894	Computer Engineering - Bachelor of Science in Computer Engineering	966
General Business (Entrepreneurship) - Bachelor of Business Administration	895	Electrical Engineering - Bachelor of Science in Electrical Engineering	968
Management (Human Resource Management) - Bachelor of Business Administration	897	Electrical Engineering (Artificial Intelligence, Machine Learning, & Data Science) - Bachelor of Science in Electrical Engineering	971
Management (Project & Supply Chain Management) - Bachelor of Business Administration	899	Electrical Engineering (Communications and Signal Processing) - Bachelor of Science in Electrical Engineering	973
Management (Small Business Management & Entrepreneurship) - Bachelor of Business Administration	901	Electrical Engineering (Computers and Microelectronics) - Bachelor of Science in Electrical Engineering	975
Management - Undergraduate Minor	903	Electrical Engineering (Controls & Robotics) - Bachelor of Science in Electrical Engineering	978
Marketing	903	Electrical Engineering (Electromagnetics and Photonics) - Bachelor of Science in Electrical Engineering	980
Marketing (Advertising) - Bachelor of Business Administration	910	Electrical Engineering (Power) - Bachelor of Science in Electrical Engineering	982
Marketing (PGA Golf Management) - Bachelor of Business Administration	912	Electrical Engineering (Space Systems) - Bachelor of Science in Electrical Engineering	985
Marketing (Professional Selling) - Bachelor of Business Administration	914	Computer Engineering - Undergraduate Minor	987
Marketing (Strategic Marketing) - Bachelor of Business Administration	916	Electrical Engineering - Undergraduate Minor	987
Advertising - Undergraduate Minor	918	Engineering Physics	988
Marketing - Undergraduate Minor	918	Engineering Physics (Aerospace) - Bachelor of Science in Engineering Physics	998
Professional Selling - Undergraduate Minor	918	Engineering Physics (Chemical) - Bachelor of Science in Engineering Physics	1000
College of Engineering	918	Engineering Physics (Electrical) - Bachelor of Science in Engineering Physics	1002
Chemical & Materials Engineering	924	Engineering Physics (Mechanical) - Bachelor of Science in Engineering Physics	1003
Chemical Engineering - Bachelor of Science in Chemical Engineering	934	Engineering Technology and Surveying Engineering	1005
Biomedical Engineering - Undergraduate Minor	936	Civil Engineering Technology - Bachelor of Science in Engineering Technology	1027
Brewery Engineering- Undergraduate Minor	936	Civil Engineering Technology (Renewable Energy Technologies) - Bachelor of Science in Engineering Technology	1029
Computational Engineering- Undergraduate Minor	937	Civil Engineering Technology (Transportation Technology) - Bachelor of Science in Engineering Technology	1031
Materials Engineering - Undergraduate Minor	937	Electronics and Computer Engineering Technology - Bachelor of Science in Engineering Technology	1032
Nuclear Chemical Engineering - Undergraduate Minor	937	Geomatics - Bachelor of Science in Geomatics	1034
Pre-Law in Intellectual Property - Undergraduate Minor	937	Information and Communication Technology - Bachelor of Information and Communication Technology	1036
Pre-Medicine Studies- Undergraduate Minor	937	Information and Communication Technology (Cyber Defense) - Bachelor of Information and Communication Technology	1040
Civil Engineering	938	Information and Communication Technology (Network Technologies) - Bachelor of Information Communication Technology	1043
Civil Engineering - Bachelor of Science in Civil Engineering	947		
Agricultural Engineering - Undergraduate Minor	949		
Environmental Engineering - Undergraduate Minor	949		
Geotechnical Engineering - Undergraduate Minor	949		
Structural Engineering - Undergraduate Minor	950		
Water Resource Engineering - Undergraduate Minor	950		
Electrical and Computer Engineering	951		

Information and Communication Technology (Software Development) - Bachelor of Information and Communication Technology	1046	Dance (Contemporary Dance) - Bachelor of Arts in Dance	1141
Mechanical Engineering Technology - Bachelor of Science in Engineering Technology	1049	Kinesiology (Exercise Science) - Bachelor of Science in Kinesiology	1144
Digital Electronic Applications - Undergraduate Minor ..	1052	Kinesiology (Performance Psychology) - Bachelor of Science in Kinestiology	1146
Digital Forensics - Undergraduate Minor	1052	Kinesiology (Physical Education) - Bachelor of Science in Kinestiology	1149
Geomatics - Undergraduate Minor	1052	Dance - Undergraduate Minor	1151
Information Security Technology - Undergraduate Minor	1052	Exercise Science - Undergraduate Minor	1151
Manufacturing - Undergraduate Minor	1053	Nursing	1152
Renewable Energy Technologies - Undergraduate Minor	1053	Nursing - Bachelor of Science in Nursing	1180
Master Degree(s)	1053	Public Health Sciences	1182
Industrial Engineering	1053	Public Health - Bachelor of Public Health	1189
Industrial Engineering - Bachelor of Science in Industrial Engineering	1059	Gerontology - Undergraduate Minor	1191
Entrepreneurship - Undergraduate Minor	1060	Public Health - Undergraduate Minor	1191
Lean Manufacturing and Analytics - Undergraduate Minor	1060	U.S.-Mexico Border Health Issues - Undergraduate Minor	1191
Supply Chain and Operations Research Analytics - Undergraduate Minor	1061	School of Teacher Preparation, Administration and Leadership (TPAL)	1191
Systems Engineering - Undergraduate Minor	1062	Applied Studies (Zero-to-Four (Early Childhood)) - Bachelor of Applied Studies	1245
Mechanical Engineering and Aerospace Engineering	1062	Early Childhood Education - Bachelor of Science in Education	1247
Aerospace Engineering - Bachelor of Science in Aerospace Engineering	1070	Educational Leadership - Bachelor of Science	1249
Mechanical Engineering - Bachelor of Science in Mechanical Engineering	1072	Elementary Education (Language Arts K-8) - Bachelor of Science in Education	1250
Aerospace Engineering - Undergraduate Minor	1073	Elementary Education (Math K-8) - Bachelor of Science in Education	1253
Mechanical Engineering - Undergraduate Minor	1074	Elementary Education (Science K-8) - Bachelor of Science in Education	1254
College of Health, Education and Social Transformation	1074	Elementary Education (Social Studies K-8) - Bachelor of Science in Education	1256
Pre-Health - Undergraduate Minor	1078	Secondary Education (Secondary Education General Science) - Bachelor of Science in Education	1257
Borderlands and Ethnic Studies	1079	Secondary Education (Secondary Education Language Arts) - Bachelor of Science in Education	1259
Borderland and Ethnic Studies - Undergraduate Minor ..	1086	Secondary Education (Secondary Education Math) - Bachelor of Science in Education	1262
Chicana/o Studies - Undergraduate Minor	1086	Secondary Education (Secondary Education Social Studies) - Bachelor of Science in Education	1264
Native American Studies - Undergraduate Minor	1087	Special Education (Elementary Education) - Bachelor of Science in Education	1266
Counseling and Education Psychology	1087	Special Education (Secondary Education) - Bachelor of Science in Education	1268
Counseling and Community Psychology - Bachelor of Science	1107	Africana Studies - Undergraduate Minor	1277
Counseling and Education Psychology - Undergraduate Minor	1110	Early Childhood Education - Undergraduate Minor	1277
Communication Disorders	1110		
Communication Disorders - Bachelor of Science in Communication Disorders	1117		
Kinesiology	1119		

Educational Leadership and Administration - Undergraduate Minor	1277	BLAW-BUSINESS LAW	1407
Secondary Education - Undergraduate Minor	1278	BLED-BILINGUAL EDUCATION	1409
Social Work	1278	BMGT-BUSINESS MANAGEMENT	1413
Social Work - Bachelor of Social Work	1287	BUSA-BUSINESS ADMINISTRATION	1415
Sociology	1289	C E-CIVIL ENGINEERING	1415
Sociology - Bachelor of Arts	1299	C S-COMPUTER SCIENCE	1421
Sociology - Undergraduate Minor	1301	CCDE-DEVELOPMENTAL ENGLISH	1436
NMSU - Online	1301	CCDM-DEVELOPMENTAL MATHEMATICS	1436
William Conroy Honors College (Undergraduate)	1301	CCDR-DEVELOPMENTAL READING	1436
Student Resources	1304	CCDS-DEVELOPMENTAL SKILLS	1436
The NMSU Community Colleges	1311	CCST-CHICANA/O STUDIES	1437

LAS CRUCES ACADEMIC CATALOG

This catalog is the student's guidebook to earning a degree or other academic credential. The catalog contains three important parts: (1) the official listing of NMSU's academic programs and their requirements, (2) a listing of the courses offered at NMSU with descriptions and prerequisites, and (3) other information essential for student success including many of the rules and regulations that govern the student's academic journey at NMSU.

As with any other journey, advance planning is essential. To avoid wrong turns and lost time, each student must chart their own path, with the help of their academic advisors and this guidebook. Each student is responsible for planning an academic program of study in compliance with university, community college, college and departmental requirements as set forth in the Catalog. In addition, each student is obligated to abide by the Academic Rules and Regulations as set forth in the Catalog, as well as the Student Social Code of Conduct, as set forth in the Student Handbook (available through the Dean of Students website).

Upon proper application and payment of fees, students will be awarded academic degrees and designations when the completion of the academic program requirements is verified by the relevant NMSU academic unit. Degrees and designations may be awarded under any catalog in effect on the date of degree or designation completion, provided that the catalog year is the same or subsequent to the year in which the student was first enrolled.

The academic program requirements of each catalog are effective for a period of eight academic years. This 2024-2025 Catalog is effective summer 2024 through spring semester 2032. All other catalog content, including rules, regulations, course descriptions and prerequisites are effective only for the catalog's denoted academic year. While content changes are typically implemented between Catalog years, the catalog does not represent a contract and NMSU reserves the right to make modifications to the catalog at any time.

Academic programs at the New Mexico State University System are available to all students without regard to age, ancestry, color, disability, gender, national origin, race, religion, sexual orientation or veteran status.

Associate Registrar: Gabrielle Martinez
Graduation & Curriculum Data Specialist: Daniela Lucero

University Leadership

NEW MEXICO STATE UNIVERSITY

President

Monica F. Torres, Interim President, Chancellor, CC System

Board of Regents

Michelle Lujan Grisham, Governor of New Mexico, Ex Officio Regent from Santa Fe.

Ammu Devasthali, Appointed Regent from Las Cruces, NM for term December 31, 2028.

Deborah Romero, Appointed Regent from Santa Fe, NM for term December 31, 2026.

Christopher Saucedo, Appointed Regent from Albuquerque, NM for term expiring December 31, 2026.

Dina Chacón-Reitzel, Appointed Regent from Albuquerque, NM for term expiring December 31, 2024.

Garrett Moseley, Appointed Student Regent for term expiring December 31, 2024.

Provost/Academic

Lakshmi Reddi, Interim Chief Academic Officer & Provost

James McAteer, Sr. Associate Provost for Academic Affairs

Tara Gray, Associate Provost for Faculty Development

To be Announced, Associate Provost for Institutional Effectiveness

Chancellor

Sherry Kollmann, Chancellor, Global

Vice Presidents/Provosts

Luis Cifuentes, VP for Research, Creativity & Economic Development

Renay Scott, VP Student Success

Seth Miner, VC of Strategic Enrollment Management, Global

Sylvia Acosta, Chief Executive Officer, Foundation

Teresa Maria Scholz, VP for Equity, Inclusion & Diversity

Deans

Bryan Ashenbaum, Dean, Business College

Enrico Pontelli, Dean, Arts and Sciences College

Kevin Comerford, Dean, Library

David Jauregui, Interim Dean, Engineering College

Phame Camarena, Dean, Honors College and Undergraduate Research

Ranjit Koodali, , Dean, Graduate School

Rolando Flores Galarza, Dean, Agricultural, Consumer and Environmental Sciences College

Yoshitaka Iwasaki, Dean, Health, Education and Social Transformation College

COMMUNITY COLLEGES ADMINISTRATION

Alamogordo

Mark P. Cal, VP Academic Affairs

Jessica Morales, VP Student Success

Antonio A. Salinas, VP Business & Finance

Dona Ana

Kelly Brooks, VP Business & Finance

Jesse Haas, VP Academic Affairs

Amadeo "Ike" Ledesma, VP Student Services

Grants

Marlene Chavez-Toivanen, VP Academic Affairs

Patrick Clingman, VP Student Services

The History of the University

New Mexico State University (NMSU) was founded in 1888 as the state's land-grant university. Through serving the educational needs of New Mexico's diverse population, NMSU has provided comprehensive programs of education, research, extension education and public service. Upon its founding, NMSU was known as Las Cruces College and later renamed New Mexico College of Agriculture and Mechanic Arts. In 1960, the constitution of New Mexico formally recognized the institution as NMSU. Today, NMSU is a major institution of higher education. Throughout its history, the university has preserved many traditions of its land-grant origin while also increasing emphasis on the fine arts, humanities, social and natural sciences.

For more history, points of pride, and the ranking of New Mexico State University please visit the About NMSU (<https://nmsu.edu/about/>) page of the university website.

Mission

The mission of the New Mexico State University system is to serve the diverse needs of the state through comprehensive programs of education, research, extension and outreach, and public service. As the state's land-grant and space-grant university, and as a Hispanic Serving Institution, NMSU fosters learning, inquiry, diversity and inclusion, social mobility, and service to the broader community.

Vision

By 2025, the NMSU system will excel in promoting social mobility for our diverse student populations, achieve the highest Carnegie research status (R1), and maintain our Carnegie Community Engagement classification.

Values

- **Leadership:** Promoting and creating the ability for Aggies to shape the future
- **Excellence:** Providing the highest level of education, research, outreach, and service
- **Access:** Welcoming diverse populations to higher education and to the NMSU community
- **Diversity & Inclusion:** Embracing our differences as an asset and actively seeking to include wide-ranging perspectives
- **Student-Centered:** Supporting the education of our students through every aspect of our university, every day

These values are encapsulated as: BE BOLD. Shape the future.

Accreditation

New Mexico State University has been accredited by The Higher Learning Commission (HLC) since 1926. The HLC may be contacted at:

The Higher Learning Commission
230 North LaSalle St.
Suite 7-500
Chicago, IL 60604-1411
Phone: (800) 621-7440

In addition, the university maintains various specialized and professional accreditations, as listed at the beginning of each college section in the catalog, and as found at <https://accreditation.nmsu.edu/Accreditation%20at%20NMSU/Specialized%20Accreditation/index1.html>.

NMSU Graduation and Retention Rates

These rates may be found on the NMSU Institutional Research web site at: <https://oia.nmsu.edu/>.

Programs A-Z

Academic Programs

Associate Degree Programs

NMSU awards both designated and undesignated associate degrees following completion of at least 60 semester credits (excluding "N" suffix courses). Please see the NMSU System Academic Regulations & Policies (p. 31) section of the catalog for specific information about Associate Degree Program graduation requirements. (Service personnel enrolled under the two-year Servicemembers Opportunity College Program may be exempt from this requirement.)

The designation Meritorious Graduate is awarded to the top 15 percent of the students receiving associate degrees within each college in any one academic year; the students must have completed 45 or more credits with computable grades at NMSU.

Las Cruces Campus

Detailed information on admission requirements, curricula, and associate degree or certificate requirements will be found in the section of this catalog devoted to the administering department/college.

- **Associate of Arts**
Administered by the Community Colleges
- **Associate of Fine Arts**
Administered by the Community Colleges
- **Associate of Science**
Administered by the Community Colleges
- **Associate of Science in Engineering Technology**
Administered by the College of Engineering

Designated Associate Degrees

The following designated associate degrees are granted to students completing the specified requirements of the degree.

- **Associate in Art and Graphic Design**
Administered by the Community Colleges
- **Associate in Criminal Justice**

Administered by the Community Colleges

- **Associate in Education**

Administered by the Community Colleges

- **Associate in Pre-business**

Administered by the College of Business

- **Associate of Arts in Heritage Interpretation**

Administered by the Community Colleges

- Major Title (Animation and Visual Effects), will appear on diplomas and transcripts
- Degree Title (Bachelor of Creative Media), will appear on diplomas and transcripts
- Online denotes that these programs are a part of NMSU Global Campus

**Note: that some degrees will have emphasis, options, pathways, etc. appear on the degree page, but these items will not appear on transcripts.*

- **Brewery Engineering - Undergraduate Minor**

- Minor Title (Brewery Engineering), will appear on transcripts
- Minor Level (Undergraduate Minor), corresponds with the level for the coursework required and what level a student must be in to declare the minor

Community Colleges

Many of the associate degrees offered on Las Cruces campus, as well as other programs, are available at NMSU's three community college campuses. For more information on community college campus offerings, refer to the "Community Colleges (p. 1311)" chapter in this catalog and to their respective catalogs or admissions offices.

Please see the Community College Catalogs for more information about the Associate Degree Programs.

- Alamogordo Catalog (<https://catalogs.nmsu.edu/alamogordo/>)
- Dona Ana Catalog (<https://catalogs.nmsu.edu/dona-ana/>)
- Grants Catalog (<https://catalogs.nmsu.edu/grants/>)

Undergraduate Programs

For a full listing of all Undergraduate Programs offered at New Mexico State University, please see the Undergraduate Admissions webpage <http://admissions.nmsu.edu/academics/>.

Graduate Degree Programs

For a full listing of the Graduate Programs offered at New Mexico State University, please see the Graduate Admissions webpage (<https://gradschool.nmsu.edu/future-students/>)

Academic Minors

Students seeking a degree may elect to complete one or more minors from those available, and the minor will be designated on their transcripts. Minors cannot be earned after the degree has been conferred. The minor may be in a single department or may be interdepartmental. Specific requirements for these minors are available in printed form in departmental and deans' offices. See the College sections for a each Colleges complete list of the minors they offer.

Programs offered at New Mexico State University

Program are titled in the following styles:

- **Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture**

- Major Title (Agricultural Biology), will appear on diplomas and transcripts
- Concentration Title (Applied Biology), will appear on diplomas and transcripts
- Degree Title (Bachelor of Science in Agriculture), will appear on diplomas and transcripts

- **Animation and Visual Effects - Bachelor of Creative Media***

- Major Title (Animation and Visual Effects), will appear on diplomas and transcripts
- Degree Title (Bachelor of Creative Media), will appear on diplomas and transcripts

- **Sociology - Bachelor of Arts (Online)**

- Educational Administration (Doctoral) - Graduate Minor (p. 220)
- Educational Administration (Higher Ed.) - Graduate Minor (p. 220)
- Educational Administration (Pk-12) - Graduate Minor (p. 221)
- Educational Leadership & Administration (Higher Education Administration) - Doctor of Education (p. 188)
- Educational Leadership & Administration (Higher Education Administration) - Master of Arts (p. 137)
- Educational Leadership & Administration (Higher Education) - Doctor of Philosophy (p. 189)

- Educational Leadership & Administration (Pk-12 Administration) - Doctor of Education (p. 190)
 - Educational Leadership & Administration (Pk-12 Administration) - Master of Arts (p. 138)
 - Educational Leadership & Administration (Pk-12 Education) - Doctor of Philosophy (p. 191)
 - Educational Leadership - Bachelor of Science (p. 1249)
 - Educational Leadership and Administration - Undergraduate Minor (p. 1277)
 - Electric Energy Systems - Graduate Certificate (<https://catalogs.nmsu.edu/nmsu/graduate-school/electric-energy-systems-graduate-certificate/>)
 - Electrical Engineering (Artificial Intelligence, Machine Learning, & Data Science) - Bachelor of Science in Electrical Engineering (p. 971)
 - Electrical Engineering (Communications and Signal Processing) - Bachelor of Science in Electrical Engineering (p. 973)
 - Electrical Engineering (Computers and Microelectronics) - Bachelor of Science in Electrical Engineering (p. 975)
 - Electrical Engineering (Controls & Robotics) - Bachelor of Science in Electrical Engineering (p. 978)
 - Electrical Engineering (Electromagnetics and Photonics) - Bachelor of Science in Electrical Engineering (p. 980)
 - Electrical Engineering (Power) - Bachelor of Science in Electrical Engineering (p. 982)
 - Electrical Engineering (Space Systems Engineering) - Bachelor of Science in Electrical Engineering (p. 985)
 - Electrical Engineering - Bachelor of Science in Electrical Engineering (p. 968)
 - Electrical Engineering - Master of Engineering in Electrical Engineering (p. 139)
 - Electrical Engineering - Master of Science in Electrical Engineering (p. 141)
 - Electrical Engineering - Undergraduate Minor (p. 987)
 - Electronics and Computer Engineering Technology - Bachelor of Science in Engineering Technology (p. 1032)
 - Elementary Education (Language Arts K-8) - Bachelor of Science in Education (p. 1250)
 - Elementary Education (Math K-8) - Bachelor of Science in Education (p. 1253)
 - Elementary Education (Science K-8) - Bachelor of Science in Education (p. 1254)
 - Elementary Education (Social Studies K-8) - Bachelor of Science in Education (p. 1256)
 - Elementary Education Alternative Licensure - Graduate Certificate (p. 214)
 - Engineering (Chemical Engineering) - Doctor of Philosophy (p. 192)
 - Engineering (Civil Engineering) - Doctor of Philosophy (p. 193)
 - Engineering (Electrical Engineering) - Doctor of Philosophy (p. 194)
 - Engineering (Industrial Engineering) - Doctor of Philosophy (p. 196)
 - Engineering (Mechanical Engineering) - Doctor of Philosophy (p. 197)
 - Engineering Physics (Aerospace Engineering) - Bachelor of Science in Engineering Physics (p. 998)
 - Engineering Physics (Chemical Engineering) - Bachelor of Science in Engineering Physics (p. 1000)
 - Engineering Physics (Electrical Engineering) - Bachelor of Science in Engineering Physics (p. 1002)
 - Engineering Physics (Mechanical Engineering) - Bachelor of Science in Engineering Physics (p. 1003)
 - English (Creative Writing) - Bachelor of Arts (p. 635)
 - English (Literature, Language and Culture) - Bachelor of Arts (p. 639)
 - English (Rhetoric, Digital Media and Professional Communication) - Bachelor of Arts (p. 641)
 - English - Bachelor of Arts (p. 637)
 - English - Master of Arts (p. 143)
 - English - Undergraduate Minor (p. 645)
 - Enterprise Systems - Undergraduate Minor (p. 859)
 - Entomology - Undergraduate Minor (p. 340)
 - Entrepreneurship - Undergraduate Minor (p. 1060)
 - Entrepreneurship and Innovation (Business Cluster) - Undergraduate Minor (p. 890)
 - Environmental Engineering - Master of Science in Environmental Engineering (p. 145)
 - Environmental Engineering - Undergraduate Minor (p. 949)
 - Environmental Science - Bachelor of Science in Environmental Science (p. 399)
 - Environmental Science - Undergraduate Minor (p. 415)
 - Ethics - Undergraduate Minor (p. 812)
 - Exercise Science - Undergraduate Minor (p. 1151)
 - Experimental Psychology - Doctor of Philosophy (p. 197)
 - Experimental Psychology - Master of Arts (p. 146)
- ## F
- Family and Consumer Sciences (Couples, Marriage and Family Therapy) - Master of Science (p. 147)
 - Family and Consumer Sciences (Food Science and Technology) - Master of Science (p. 146)
 - Family and Consumer Sciences (Hotel, Restaurant and Tourism Management) - Master of Science (p. 147)
 - Family and Consumer Sciences (Human Nutrition & Dietetic Sciences) - Master of Science (p. 149)
 - Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences (p. 359)
 - Fashion Merchandising & Design - Undergraduate Minor (p. 375)
 - Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences (p. 361)
 - Finance (Banking and Financial Planning) - Bachelor of Business Administration (p. 884)
 - Finance (Entrepreneurial Finance) - Bachelor of Business Administration (p. 885)
 - Finance (Financial Analyst) - Bachelor of Business Administration (p. 886)
 - Finance (Risk Management and Insurance) - Bachelor of Business Administration (p. 888)
 - Finance - Bachelor of Business Administration (p. 882)
 - Finance - Graduate Certificate (p. 215)
 - Finance - Undergraduate Minor (p. 890)
 - Fine Arts - Master of Fine Arts (p. 149)
 - Fish, Wildlife and Conservation Ecology - Graduate Minor (p. 221)

- Fish, Wildlife and Conservation Ecology - Master of Science (p. 150)
- Fisheries and Wildlife Science (Aquatic Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 381)
- Fisheries and Wildlife Science (Wildlife Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 384)
- Food Science - Undergraduate Minor (p. 375)
- Food Science and Technology (Culinary Science) - Bachelor of Science in Food Science and Technology (p. 363)
- Food Science and Technology (Meat Science) - Bachelor of Science in Food Science and Technology (p. 364)
- Food Science and Technology (Science, Technology and Engineering) - Bachelor of Science in Food Science and Technology (p. 366)
- Food Studies - Graduate Minor (p. 221)
- Foreign Languages (French) - Bachelor of Arts (p. 733)
- Foreign Languages (German) - Bachelor of Arts (p. 735)
- Foreign Languages (Spanish) - Bachelor of Arts (p. 738)
- Forensic Science - Undergraduate Minor (p. 614)
- French - Undergraduate Minor (p. 744)

G

- Gender & Sexuality Studies - Undergraduate Minor (p. 645)
- Gender and Sexuality Studies - Bachelor of Arts (p. 643)
- Gender and Sexuality Studies - Graduate Minor (p. 221)
- General Agriculture - Bachelor of Science in Agriculture (p. 338)
- General Business (Entrepreneurship) - Bachelor of Business Administration (p. 895)
- General Business - Bachelor of Business Administration (p. 894)
- Genetics and Biotechnology - Bachelor of Science in Genetics (p. 401)
- Genetics and Biotechnology - Bachelor of Science in Genetics (p. 508)
- Genetics and Biotechnology - Undergraduate Minor (p. 415)
- Genetics and Biotechnology - Undergraduate Minor (p. 513)
- Geographic Information Systems - Graduate Minor (p. 222)
- Geographic Information Systems - Undergraduate Minor (p. 662)
- Geography (Environmental Studies) - Bachelor of Science (p. 657)
- Geography (Geographic Information Science & Tech) - Bachelor of Science (p. 660)
- Geography - Doctor of Philosophy (p. 198)
- Geography - Master of Applied Geography (p. 151)
- Geography - Undergraduate Minor (p. 663)
- Geology (Earth and Environmental Sciences) - Bachelor of Science (p. 667)
- Geology (Earth Science Education) - Bachelor of Science (p. 670)
- Geology (Geological Sciences) - Bachelor of Science (p. 672)
- Geology - Master of Science (p. 152)
- Geology - Undergraduate Minor (p. 675)
- Geomatics - Bachelor of Science in Geomatics (p. 1034)
- Geomatics - Undergraduate Minor (p. 1052)
- Geotechnical Engineering - Undergraduate Minor (p. 949)
- German - Undergraduate Minor (p. 744)

- Gerontology - Graduate Minor (p. 222)
- Gerontology - Undergraduate Minor (p. 1191)

H

- Health Equity Sciences - Doctor of Philosophy (p. 199)
- History (Public History) - Master of Arts (p. 153)
- History - Bachelor of Arts (p. 698)
- History - Graduate Minor (p. 222)
- History - Master of Arts (p. 153)
- History - Undergraduate Minor (p. 700)
- Horse Management - Undergraduate Minor (p. 326)
- Horticulture (Turfgrass Science and Management) - Bachelor of Science in Agriculture (p. 406)
- Horticulture - Bachelor of Science in Agriculture (p. 404)
- Horticulture - Master of Science (p. 154)
- Horticulture - Undergraduate Minor (p. 416)
- Hotel, Restaurant and Tourism Management - Bachelor of Science (p. 427)
- Hotel, Restaurant and Tourism Management - Undergraduate Minor (p. 429)
- Human Animal Interaction - Undergraduate Minor (p. 326)
- Human Biology - Undergraduate Minor (p. 513)
- Human Development & Family Science - Bachelor of Science (p. 368)
- Human Development and Family Science - Undergraduate Minor (p. 375)
- Human Nutrition and Dietetic Science (Nutrition Education) - Bachelor of Science in Family and Consumer Sciences (p. 370)
- Human Nutrition and Dietetic Science (Pre-Dietetics/Dietetics) - Bachelor of Science in Family and Consumer Sciences (p. 372)

I

- Individualized Studies (Pre-Pharmacy) - Bachelor of Individualized Studies (p. 701)
- Individualized Studies - Bachelor of Individualized Studies (p. 700)
- Industrial Engineering - Bachelor of Science in Industrial Engineering (p. 1059)
- Industrial Engineering - Master of Engineering in Industrial Engineering (p. 154)
- Industrial Engineering - Master of Science in Industrial Engineering (p. 155)
- Information and Communication Technology (Cyber Defense) - Bachelor of Information and Communication Technology (p. 1040)
- Information and Communication Technology (Network Technologies) - Bachelor of Information and Communication Technology (p. 1043)
- Information and Communication Technology (Software Development) - Bachelor of Information and Communication Technology (p. 1046)
- Information and Communication Technology - Bachelor of Information and Communication Technology (p. 1036)
- Information Security Technology - Undergraduate Minor (p. 1052)
- Information Systems - Bachelor of Business Administration (p. 856)
- Information Systems - Graduate Minor (p. 222)
- Information Systems - Undergraduate Minor (p. 859)
- Integrated Behavioral Health Care - Graduate Minor (p. 223)

- International Business - Bachelor of Business Administration (p. 875)
- International Business - Undergraduate Minor (p. 878)
- International Relations - Undergraduate Minor (p. 687)
- International Studies - Undergraduate Minor (p. 744)

J

- Journalism and Media Studies - Bachelor of Arts (p. 708)
- Journalism and Media Studies - Undergraduate Minor (p. 713)
- Justice, Political Philosophy, and Law - Bachelor of Arts (p. 809)
- Justice, Political Philosophy, and Law - Undergraduate Minor (p. 812)

K

- Kinesiology (Exercise Science) - Bachelor of Science in Kinesiology (p. 1144)
- Kinesiology (Performance Psychology) - Bachelor of Science in Kinesiology (p. 1146)
- Kinesiology (Physical Education) - Bachelor of Science in Kinesiology (p. 1149)
- Kinesiology - Doctor of Philosophy (p. 200)

L

- Latin American Studies - Supplemental Major (p. 745)
- Law and Society - Supplemental Major (p. 688)
- Law and Society - Undergraduate Supplemental Major (p. 615)
- Leadership in Agricultural Communications - Undergraduate Minor (p. 296)
- Lean Manufacturing and Analytics - Undergraduate Minor (p. 1060)
- Linguistics - Bachelor of Arts (p. 740)
- Linguistics - Supplemental Major (p. 746)
- Linguistics - Undergraduate Minor (p. 745)
- Literature - Undergraduate Minor (p. 646)
- Livestock Production - Undergraduate Minor (p. 326)

M

- Management (Human Resource Management) - Bachelor of Business Administration (p. 897)
- Management (Project & Supply Chain Management) - Bachelor of Business Administration (p. 899)
- Management (Small Business Management & Entrepreneurship) - Bachelor of Business Administration (p. 901)
- Management - Undergraduate Minor (p. 903)
- Manufacturing - Undergraduate Minor (p. 1053)
- Marketing (Advertising) - Bachelor of Business Administration (p. 910)
- Marketing (PGA Golf Management) - Bachelor of Business Administration (p. 912)
- Marketing (Professional Selling) - Bachelor of Business Administration (p. 914)
- Marketing (Strategic Marketing) - Bachelor of Business Administration (p. 916)
- Marketing - Undergraduate Minor (p. 918)

- Master of Public Health/Master of Social Work - Dual Degree (<https://catalogs.nmsu.edu/nmsu/graduate-school/master-public-health-master-social-work-dual-degree/>)
- Materials Engineering - Graduate Minor (p. 224)
- Materials Engineering - Undergraduate Minor (p. 937)
- Mathematics (Actuarial Science and Insurance) - Bachelor of Science (p. 761)
- Mathematics (Applied Mathematics) - Bachelor of Science (p. 763)
- Mathematics (Foundations) - Bachelor of Science (p. 765)
- Mathematics (General Mathematics) - Bachelor of Science (p. 767)
- Mathematics (Probability and Statistics) - Bachelor of Science (p. 768)
- Mathematics (Secondary Mathematics Education) - Bachelor of Science (p. 770)
- Mathematics - Doctor of Philosophy (p. 200)
- Mathematics - Master of Science (p. 157)
- Mathematics - Undergraduate Minor (p. 773)
- Mechanical Engineering - Bachelor of Science in Mechanical Engineering (p. 1072)
- Mechanical Engineering - Master of Engineering in Mechanical Engineering (p. 158)
- Mechanical Engineering - Master of Science in Mechanical Engineering (p. 159)
- Mechanical Engineering - Undergraduate Minor (p. 1074)
- Mechanical Engineering Technology - Bachelor of Science in Engineering Technology (p. 1049)
- Medical Anthropology - Undergraduate Minor (p. 461)
- Medieval and Early Modern Studies - Undergraduate Minor (p. 646)
- Microbiology - Bachelor of Science (p. 510)
- Microbiology - Undergraduate Minor (p. 514)
- Military Science - Undergraduate Minor (p. 775)
- Molecular Biology - Doctor of Philosophy (p. 201)
- Molecular Biology - Graduate Minor (p. 224)
- Molecular Biology - Master of Science (p. 159)
- Molecular Biology - Undergraduate Minor (p. 777)
- MPA-MCJ Program - Dual Degree (p. 160)
- Museum Conservation - Undergraduate Minor (p. 484)
- Museum Studies - Graduate Certificate (p. 215)
- Music (Conducting) - Master of Music (p. 160)
- Music (Instrumental Performance) - Bachelor of Music (p. 796)
- Music (Music Education) - Master of Music (p. 160)
- Music (Performance) - Master of Music (p. 161)
- Music (Piano Performance) - Bachelor of Music (p. 798)
- Music (Pre-Music Therapy) - Bachelor of Arts (p. 791)
- Music (Pre-Speech Language Pathology) - Bachelor of Arts (p. 793)
- Music (Theatre) - Bachelor of Arts (p. 795)
- Music (Vocal Performance) - Bachelor of Music (p. 800)
- Music - Bachelor of Arts (p. 790)
- Music - Undergraduate Minor (p. 806)
- Music Education (K12 Instrumental) - Bachelor of Music Education (p. 802)
- Music Education (K12 Vocal) - Bachelor of Music Education (p. 804)

N

- Native American Studies - Graduate Minor (p. 224)
- Native American Studies - Undergraduate Minor (p. 1087)
- Natural Resource Economics - Undergraduate Minor (p. 310)
- Natural Resource Economics and Policy - Bachelor of Science in Agriculture (p. 307)
- Nuclear Chemical Engineering - Undergraduate Minor (p. 937)
- Nursing - Bachelor of Science in Nursing (p. 1180)
- Nursing Practice (Nurse Anesthesiology) - Doctor of Nursing Practice (p. 202)
- Nutrition - Undergraduate Minor (p. 375)

P

- Pest Management - Undergraduate Minor (p. 340)
- Philosophy - Bachelor of Arts (p. 810)
- Philosophy - Undergraduate Minor (p. 813)
- Physics (Space Physics) - Master of Science (p. 161)
- Physics - Bachelor of Arts (p. 824)
- Physics - Bachelor of Science (p. 826)
- Physics - Doctor of Philosophy (p. 203)
- Physics - Graduate Minor (p. 225)
- Physics - Master of Science (p. 161)
- Physics - Undergraduate Minor (p. 829)
- Plant and Environmental Science - Doctor of Philosophy (p. 204)
- Plant and Environmental Science - Master of Science (p. 161)
- Plant Pathology - Undergraduate Minor (p. 340)
- Political Science - Bachelor of Arts (p. 685)
- Political Science - Master of Arts (p. 162)
- Political Science - Undergraduate Minor (p. 687)
- Political Theory - Undergraduate Minor (p. 687)
- Pre-Health - Undergraduate Minor (p. 1078)
- Pre-Law in Intellectual Property - Undergraduate Minor (p. 937)
- Pre-Medicine Studies- Undergraduate Minor (p. 937)
- Prebusiness - Associate in Prebusiness (p. 849)
- Principal Licensure - Graduate Certificate (p. 216)
- Professional Selling - Undergraduate Minor (p. 918)
- Psychology - Bachelor of Arts (p. 834)
- Psychology - Graduate Minor (p. 225)
- Psychology - Undergraduate Minor (p. 837)
- Public Administration - Master of Public Administration (p. 162)
- Public Administration - Undergraduate Minor (p. 687)
- Public Health (Health Behavior and Health Promotion) - Master of Public Health (p. 163)
- Public Health (Health Management, Administration & Policy) - Master of Public Health (p. 164)
- Public Health - Bachelor of Public Health (p. 1189)
- Public Health - Graduate Certificate (p. 216)
- Public Health - Undergraduate Minor (p. 1191)
- Public History and Public Administration - Dual M.A. Degree (p. 166)
- Public Law - Undergraduate Minor (p. 688)
- Public Utility Regulation and Economics - Graduate Certificate (p. 217)

R

- Ranch Management - Undergraduate Minor (p. 326)
- Range Science - Bachelor of Science in Agriculture (p. 323)
- Range Science - Doctor of Philosophy (p. 204)
- Range Science - Graduate Minor (p. 225)
- Range Science - Master of Science (p. 166)
- Range Science - Undergraduate Minor (p. 327)
- Reading - Specialist in Education (p. 212)
- Religious Studies - Undergraduate Minor (p. 462)
- Renewable Energy Technologies - Undergraduate Minor (p. 1053)
- Rhetoric and Professional Communication - Doctor of Philosophy (p. 205)
- Rhetoric and Professional Communication - Undergraduate Minor (p. 647)
- Risk Management and Insurance - Undergraduate Minor (p. 890)

S

- School Psychology - Doctor of Philosophy (p. 205)
- School Psychology - Specialist in Education (p. 212)
- Secondary Education (Secondary Education General Science) - Bachelor of Science in Education (p. 1257)
- Secondary Education (Secondary Education Language Arts) - Bachelor of Science in Education (p. 1259)
- Secondary Education (Secondary Education Math) - Bachelor of Science in Education (p. 1262)
- Secondary Education (Secondary Education Social Studies) - Bachelor of Science in Education (p. 1264)
- Secondary Education - Undergraduate Minor (p. 1278)
- Secondary Education Alternative Licensure - Graduate Certificate (p. 217)
- Security Studies - Graduate Minor (p. 225)
- Social Media Management - Undergraduate Minor (p. 713)
- Social Work - Bachelor of Social Work (p. 1287)
- Social Work - Master of Social Work (Full-Time Advanced) (p. 167)
- Social Work - Master of Social Work (Full-Time) (p. 166)
- Social Work - Master of Social Work (Part-Time) (p. 168)
- Sociology - Bachelor of Arts (p. 1299)
- Sociology - Graduate Minor (p. 225)
- Sociology - Master of Arts (p. 168)
- Sociology - Undergraduate Minor (p. 1301)
- Software Development - Undergraduate Minor (p. 592)
- Soil Science (Environment and Resource Management) - Bachelor of Science in Agriculture (p. 409)
- Soil Science (Soil and Water Science) - Bachelor of Science in Agriculture (p. 411)
- Soil Science (Soils) - Bachelor of Science in Agriculture (p. 413)
- Soil Science - Undergraduate Minor (p. 416)
- Spanish - Master of Arts (p. 170)
- Spanish - Undergraduate Minor (p. 745)
- Spanish Counseling - Graduate Minor (p. 225)
- Special Education (Elementary Education) - Bachelor of Science in Education (p. 1266)

- Special Education (Secondary Education) - Bachelor of Science in Education (p. 1268)
- Special Education - Graduate Minor (p. 227)
- Special Education - Master of Arts (p. 171)
- Special Education Alternative Licensure - Graduate Certificate (<https://catalogs.nmsu.edu/nmsu/graduate-school/special-education-alternative-licensure-graduate-certificiate/>)
- Strategic Communications - Undergraduate Minor (p. 713)
- Structural Engineering - Undergraduate Minor (p. 950)
- Supply Chain and Operations Research Analytics - Undergraduate Minor (p. 1061)
- Sustainability - Graduate Certificate (p. 218)
- Sustainability- Undergraduate Minor (p. 462)
- Systems Engineering - Graduate Certificate (p. 218)
- Systems Engineering - Undergraduate Minor (p. 1062)

T

- Telemetry - Graduate Certificate (<https://catalogs.nmsu.edu/nmsu/graduate-school/telemetry-graduate-certificiate/>)
- Theatre Arts (Musical Theatre) - Bachelor of Arts (p. 843)
- Theatre Arts - Bachelor of Arts (p. 842)
- Theatre Arts - Undergraduate Minor (p. 845)
- Transborder and Global Human Dynamics - Doctor of Philosophy (p. 206)

U

- U.S.-Mexico Border Health Issues - Graduate Minor (p. 227)
- U.S.-Mexico Border Health Issues - Undergraduate Minor (p. 1191)

W

- Water Resource Engineering - Undergraduate Minor (p. 950)
- Water Science and Management (Agricultural Water Resources) - Doctor of Philosophy (p. 209)
- Water Science and Management (Agricultural Water Resources) - Master of Science (p. 173)
- Water Science and Management (International Water Resilience) - Doctor of Philosophy (p. 209)
- Water Science and Management (International Water Resilience) - Master of Science (p. 174)
- Water Science and Management (Water Economics and Policy) - Doctor of Philosophy (p. 210)
- Water Science and Management (Water Economics and Policy) - Master of Science (p. 174)
- Water Science and Management (Water Informatics) - Doctor of Philosophy (p. 210)
- Water Science and Management (Water Informatics) - Master of Science (p. 175)
- Water Science and Management (Water Quality and Treatment) - Master of Science (p. 175)
- Water Science and Management (Water Quality Treatments) - Doctor of Philosophy (p. 211)
- Water Science and Management (Watershed and Aquatic/Riparian Wetlands) - Doctor of Philosophy (p. 211)
- Water Science and Management (Watersheds and Aquatic/Riparian Wetlands) - Master of Science (p. 176)

- Water Science and Management - Doctor of Philosophy (p. 208)
- Water Science and Management - Master of Science (p. 172)
- Weed Science - Undergraduate Minor (p. 340)
- Wildlife Science - Undergraduate Minor (p. 387)

Catalog Glossary

A

Academic Calendar

A calendar designating important dates from the start of the fall semester and continuing through the completion of the following summer session.

Academic College:

A degree granting academic unit, generally organized around subject matter, which house related academic Departments and degree programs.

Academic Course:

Courses that count as credit toward a degree, or other academic credential such as a certificate, concentration or minor.

Academic Department:

An academic unit, generally organized around subject matter, which house related degree programs and report to an Academic College.

Academic Integrity:

Behavior that supports and affirms the fundamental values of honor, integrity and ethics.

Academic Probation I:

Registration restrictions of no more than 13 credit hours applied when:

- An Undergraduate student on Academic Warning with a semester GPA less than 2.0, and the cumulative GPA remains below 2.0 at the conclusion of the semester or if the student maintains a semester GPA greater than 2.0 while on Academic Probation I but the cumulative GPA is still less than 2.0. Academic Probation I will also occur if a student falls below a 2.0 cumulative GPA from Good Academic Standing if Academic Warning already occurred in a previous term.
- A graduate student's semester GPA is above a 3.0 and the cumulative GPA drops below 3.0; or when the semester and cumulative GPA's drop below 3.0 and the previous academic standing is Graduate Academic Good Standing.

Academic Probation II:

Registration restrictions of no more than 7 credit hours applied when:

- An undergraduate student falls below a semester 2.0 GPA and the cumulative GPA remains below a 2.0 while on Academic Probation I, or maintains a semester GPA greater than 2.0 while on Academic Probation II but the cumulative GPA is still less than 2.0.
- A graduate student's semester GPA and the cumulative GPA drops below as 3.0 and the previous academic standing is one of Graduate Academic Probation I or Graduate Re-admit on Probation I.

Academic Standing:

Academic standing is defined by a student's grade point average (GPA). Academic standings at NMSU are:

- Good standing
- Warning
- Probation I
- Probation II
- Suspension

Academic Suspension:

Registration restriction barring students from enrolling in courses at NMSU for, at least, one semester when:

- An undergraduate student does not achieve a semester 2.0 GPA or higher, and the cumulative remains below a 2.0 while under Academic Probation II. Undergraduate students on Academic Suspension must sit out a minimum of 1 semester and apply for re-admission.
- A graduate student is unable to maintain a semester GPA of 3.0 or higher and the cumulative remains below 3.0 GPA while under Graduate Academic Probation II.

Academic Warning (Undergraduate Only):

Notification to an undergraduate student, after final grades are processed, that their cumulative grade point average is below the 2.0 minimum requirement to continue enrollment at NMSU. Issued only once, the first time an undergraduate student's cumulative GPA falls below 2.0 while in good academic standing.

Academic Year

A period of time from the start of the fall semester and continuing through the completion of the following summer session.

Accreditation / Accredited:

Formal recognition of an educational entity that maintains standards qualifying its graduates for further study or professional practice. A university, college or program can be certified as fulfilling certain standards of national and/or regional professional associations.

Admission:

The process of applying and meeting a set of requirements, established by the University, College, and/or degree program, that enable the student to be accepted.

Adjusted Credit Option (ACO):

A policy that allows students who had previously experienced academic difficulty to make a fresh start. The adjusted credit option provides eligible undergraduate students who earned a low grade-point average (less than 2.0 cumulative) during their first few semesters to reset their GPA calculation. This option may be used only once and is not reversible. This option must be approved by the Director of the Center for Academic Advising and Student Support or the Associate Dean/VP for Academics at the student's academic college.

Administrative Withdrawal:

In the event that a student has stopped either attending class or stopped using the online Learning Management System, without formally withdrawing, the University reserves the right to remove the student from the class by means of an administrative withdrawal.

Advanced Placement (AP):

A group of standardized tests assessing college-level knowledge. At NMSU, AP scores may be evaluated for academic transfer credit in accordance with State of NM Higher Education Department guidance.

Advising Document:

An unofficial document of a student's academic record, including courses taken and grades earned from time of admission to end of the last semester attended.

Advisor:

A University employee who helps students make informed and responsible decisions in the pursuit of their academic goals.

Articulation:

The process of evaluating courses to determine whether coursework completed at one college will meet the requirements for admission, transfer credit, general education, or major preparation at another college.

Articulation Agreement:

Agreements between community and four-year colleges which indicate the acceptability of courses in transfer toward meeting specific degree requirements. See <https://miniapps.nmsu.edu/transfer/>.

Associate Degree (AA/AS/AAS):

A degree, usually, granted by a community college to students who complete a specified program of study totaling a minimum of 60 credit hours of coursework. Academic associate degrees are awarded in arts or science and are designed to prepare a student to transfer to a baccalaureate program and generally cover the first two years of a four-year degree. Applied associate degrees are professional programs designed to prepare students to enter the workforce in a specific field. Associate degrees are sometimes called *two-year degrees*, in contrast to a *four-year or bachelor's degree* awarded by a university.

Asynchronous Class (WB):

A class that is taught fully online, with no requirement for attendance at a specific day/time.

Audit:

A grade mode and enrollment status that carries no course credit. Auditing a class indicates a student is attending for the purpose of reviewing the information. No grades or credits are earned and audited courses cannot be used to meet pre- or co-requisite requirements or count in enrollment verification. Full tuition is charged.

B

Bachelor's (Baccalaureate) Degree (BA/BS):

A level of education marked by the completion of the equivalent of four or more years of full-time education (at least 120 credit hours of coursework) designed to provide the student with a broad educational base as well as knowledge in a specific field. The baccalaureate degree requires coursework to satisfy the New Mexico General Education requirements, New Mexico State University's Viewing a Wider World requirements, and the requirements of the major field of study. Bachelor of Arts (BA), Bachelor of Science (BS), and other named bachelor degrees are offered by NMSU and many other four-year universities.

Basic Skills:

All undergraduate students must demonstrate Basic Academic Skills in both English and mathematics before enrolling in any upper-division course (numbered 300 or higher). These requirements ensure that each student in the upper-division courses has the ability to succeed without compromising the learning experience of other students.

C**Career Technical Courses (CTE):**

Courses that provide students with relevant technical knowledge and skills through applied learning toward the completion of a certificate or applied associates degree.

Catalog:

A student's official guide to programs, courses and policies.

Catalog Year:

The degree requirements for each program are updated and published annually, by academic year. Students must meet the degree requirements in the Catalog that was published the year they were first admitted, or any year thereafter until they graduate. Catalogs expire eight (8) academic years after the year of initial publication.

Canvas (Learning Management System):

A web-based learning management system (LMS) used by NMSU faculty and students to access and manage online course learning materials and communicate about skill development and learning achievement.

CCN (State of NM Common Course Number):

Common numbering system used to identify courses which are often required as lower division preparation for majors. The courses are taught at many colleges and universities in the State of NM. The CCN system allows counselors and students to determine equivalent courses offered at different colleges by referring to the common number.

Certificate:

An award granted upon completion of a prescribed series of courses preparing students for employment in selected occupation/vocational fields which require training beyond high school. A certificate indicates skill competency in a technical career area and may be earned while progressing toward degree.

- **Certificate of Achievement (1 – 15 credit hours):**
 - A program of study less than 16 credits and is not eligible for Federal financial aid. It must provide employment related and/or career enhancing skills necessary to succeed in a job or a chosen field of study. These courses can be a subset of those required for a corresponding Certificate of Completion or Applied Associates Degree. These certificates are recorded on the student's transcript.
- **Certificate of Completion (16+ credit hours):**
 - A program of study of 16 or more credits that may be eligible for Federal financial aid and has been approved through the University academic review process. These courses can be a subset of those required for a corresponding Applied Associates Degree. These certificates are recorded on the student's transcript.

Challenge Exam:

Any enrolled student with a cumulative GPA of at least 2.0 currently attending classes may, with permission of the appropriate department, challenge by examination any undergraduate course in which credit has not been previously earned except an independent study, research or reading course, or any foreign language course that precedes the final course in the lower-division sequence. The fee for challenging a course is the same as the approved tuition rate. Courses may not be challenged under the S/U option.

Class:

A scheduled section of a course offered for student enrollment during a particular semester.

Class Delivery Modes:

Classes at NMSU are delivered in a variety of modalities.

- **CL (Classroom/Lecture):** traditional in-person class meetings that occur on specified days and times in a specified location.
- **LB (Lab):** traditional in-person lab meetings that occur on specified days and times in a specified location.
- **HY (Online with In Person Meetings):** hybrid delivery that is offered both online and with required in-person class meetings that occur on specified days and times in a specified location.
- **ONL (Online with Synchronous Meetings):** online class meetings that require all students to meet virtually on specified days and times
- **WB (Online with no Synchronous Meeting):** online class meetings that do not require students to meet virtually
- **IND (Independent Meeting):** students and instructors schedule meetings on an as needed basis to discuss course content and student progress
- **TD (Thesis/Dissertation):** thesis/dissertation with implied meetings on an as needed basis to discuss course content and student progress
- **PC (Practicum):** practicum/clinical with implied meetings on an as needed basis to discuss course content and student progress

Classification:

Student levels are determined by the number of undergraduate credit hours completed, or by the graduate level degree program to which a student is admitted:

- Freshman (1 – 28 credit hours)
- Sophomore (29 – 59 credit hours)
- Junior (60 – 89 credit hours)
- Senior (90+ credit hours)
- Masters (Master level degree program)
- Doctoral (Doctoral level degree program)
- Non-degree seeking
- Dual credit (concurrent high school enrollment)

Clinical:

A temporary, hands-on work experience course specifically in clinical settings that allow students to practice skills learned in healthcare

related areas of student in a real world environment under direct supervision of a qualified clinical professional.

Cohort:

A group of students that start and complete a degree or certificate program together.

College:

See "Academic College"

College Level Examination Program (CLEP):

A group of standardized tests assessing college-level knowledge. At NMSU, CLEP scores may be evaluated for academic transfer credit.

Commencement:

The ceremonial celebration for students who have completed their program of study at the end of the semester. Commencement and graduation are not the same thing (see "Graduation").

Community College:

Postsecondary educational institution that typically offer college preparatory, workforce development, and adult education coursework.

Completion Rate:

Ratio of courses completed versus attempted.

Concentration:

An area of emphasis or specialization within a program or study (major). A minimum of 12 credits within the concentration are required, although some majors may require more. At the baccalaureate level, at least 9 of these 12 credits must be numbered 300 or above; at the graduate level at least 9 of these 12 credits must be numbered 500 or above. A concentration will be indicated on the student's transcript.

Consent of Instructor:

Student must receive consent of the class instructor prior to being allowed to register for the class / course section.

Corequisite:

Courses that students must register for at the same time.

Course:

See "Academic Course"

Course Exception:

An exemption from a required course because competencies and/or learning objectives of the course have been, demonstrably, attained. An exception removes the course, and its associated credits, from a student's degree program requirements. All substitutions must be approved the Academic Associate Dean of the College awarding the degree.

Course Substitution:

The replacement of a required course in a student's program with another course that meets the expected outcomes, has common general content, and is similarly aligned to the required course. All substitutions must be approved the Academic Associate Dean of the College awarding the degree.

Credit Hour:

A measure of credit earned for course completion. A unit is based on the number of hours of instruction per week required in the classroom and/or lab or in independent study. A course earning three semester units will usually meet for three lecture hours a week. One credit hour is equal to 750 hours of instruction time per semester.

Credit for Prior Learning (CPL):

Competency-based education that grants academic credit to students for pre-defined documented life experiences that indicate mastered competencies in an area of study, such as state licensures.

CRN (Course Reference Number):

A five digit number identifying a particular class being offered for student registration.

D**Dean / Associate Dean (Academic):**

The title of an administrative position in charge of an Academic College.

Dean of Students:

An administrative position, and office, that oversees the majority of student related experiences outside the college classroom, and can assist with classroom/academic related issues, as well.

Dean's List:

A published list of students, who were enrolled in 12 or more credit hours and earned a GPA in the top 15% of their Academic College each semester.

Degree:

Recognition of completion of program of study. A diploma is issued and notation posted on the transcript.

Degree Audit (DARS / STAR):

A system that produces individualized reports reflecting a student's academic progress toward a specific degree or credential. The degree audit is a tool for use throughout the academic career of student; from advising to graduation.

Department:

See "Academic Department"

Department Head / Department Chair:

The title of an administrative position in charge of an Academic Department.

Developmental Courses:

Courses that prepare students to complete required college level coursework in Math (CCDM), English (CCDE) and Writing (CCDW).

Diploma:

An official document issued by an educational institution signifying the recipient has successfully completed a particular program of study.

Dropping/Withdrawing from Courses:

Officially withdrawing from a class through the online registration system, or in person with an academic advisor or at the Student Records Office. Classes may be dropped/cancelled according to the registration

deadlines posted at <https://records.nmsu.edu/students/important-dates.html>.

Doctoral Degree:

A degree requiring significant scholarly study beyond the master's. The individualized program of study is designed to meet the campus residency requirement and includes a minimum of 30 graduate course credits beyond the master's. If the Doctoral degree requires a dissertation, at least 18-credits of dissertation work must be included. The professional doctoral degree includes a practicum or special project that culminates in a written report which demonstrates a command of the relevant scholarly literature and links it to the specific clinical or practical experience.

Dual Credit:

Students who are simultaneously enrolled in both high school and NMSU. Dual credit courses and grades appear on both the high school and college transcripts.

E

Elective:

Courses that are not used to meet a specific major, general education, or graduation requirements, but can be used to complete the total number of credit hours required for a degree.

Enrollment:

Process by which students formally select classes each term.

Exception:

College determination to allow a student to graduate without completing a degree requirement.

Experiential Learning:

A method of learning from experience that encourages reflection on the development of new skills and knowledge. Examples include internships, co-ops, study abroad, student exchange, practicums, clinicals, and field experience.

F

Faculty (Instructor):

Any employee who teaches classes at an educational institution.

Fees:

Costs, not included in tuition, to cover the cost of materials, equipment and services. Fees may be charged at the institutional level, College level, Department level, Degree/program level, and/or course level.

FERPA (Family Educational Rights and Privacy Act):

A Federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education.

Financial Aid:

Federal and State funding to assist students with the cost of their college education.

A Department at each NMSU campus that coordinates and administers this funding.

FAFSA (Free Application for Federal Student Aid):

Universal application for federal financial aid, typically required before consideration for any need based assistance is awarded.

Fractional Grading:

Plus and minus designations added to traditional letter grades (A-, B+/B-, C+) used in calculating the grade point average.

Freshman:

A student classification for undergraduate students who have completed less than 28 college credits, including transfer credits.

Full-time:

A schedule of 12 or more credit hours per semester for undergraduate students, and 9 or more credit hours per semester for graduate students.

G

General Education (GE):

A program of courses that provides students with a broad educational experience. Courses are typically introductory in nature and provide students with fundamental skills and knowledge in mathematics, English, arts, humanities, and physical, biological, and social sciences. Transfer students often take these classes while attending a community college. Completion of a general education program is required for the baccalaureate degree.

General Education (GE) Certification:

An official transcript notation verifying that a student has completed courses satisfying all or a portion of the lower division General Education (GE) requirements.

Grade Appeals:

It is the student's responsibility to communicate concerns they may have about any grade in a class to the instructor of the class. If the issue is not resolved, the student may formally appeal a final grade for the following reasons:

- Inconsistency between what is written in the syllabus and what is practiced.
- Grade miscalculation or other grading errors that cause a change to the final course grade.

Students may not appeal disagreements with teaching methodologies, instructor specific policies, specific course assignments, grade weighting methods, or attendance policies.

Grade Mode:

A method of scoring academic achievement. Grade modes include, but are not limited to, traditional letter grades, S/U grades (satisfactory/unsatisfactory), and audit.

Grade Point Average (GPA):

The average of all grades received. Also called GPA. Term GPA is the average of the grades received in a single semester/term. Cumulative GPA is the average of all the grades earned over the course of a student's academic career at NMSU. Transfer grades are not included in the NMSU term and cumulative GPA calculations.

Grading System:

Final grades are submitted at the end of each semester, by instructors, and processed by the University Student Records Office. Final grades are recorded on the students' transcripts and are available to students through the online student portal. Academic standing and GPA calculations are updated at the end of each term and, thereafter, as corrections are submitted by College Academic Associate Deans/ Campus VPs for Academic Affairs.

Graduate Certificate:

Graduate certificate programs require 12-18 credit hours of course work that is interrelated and designed to develop a focused skill or area of expertise but do not culminate in awarding of a degree. Courses that comprise the graduate certificate must be regular approved courses offered by the University and must be numbered 450 or above. A graduate certificate is indicated on the student's transcript.

Graduate level:

Courses offered beyond the bachelor's degree level (course numbers range between 450/4500 and 699/6999). Also, students who have received a bachelor's degree and who are enrolled in post-baccalaureate instruction.

Graduation:

Official confirmation that the requirements for degree were successfully completed, in accordance with the published catalog. Final degree certification is completed within the Academic College under which the degree program is offered. Then the University Student Records Office orders a diploma sent to the student and adds the degree information to the student's transcript.

Graduation with Honors:

Formal recognition accorded students with a cumulative GPA in the top 15% of the graduating class in their Academic College.

Graduation with High Honors:

Formal recognition accorded students with a cumulative GPA in the top 1.5% of the graduating class in their Academic College.

Graduation with Highest Honors:

Formal recognition accorded one student in each Academic College, with the highest cumulative GPA and greatest number of credits earned at NMSU of the graduating class.

H

Hybrid class:

Class delivery method that incorporates more than one modality, e.g., face-to-face **and** remote synchronous or asynchronous delivery. Face-to-face attendance is limited and may include alternating in-person and online synchronous or asynchronous attendance; may also provide recordings of lectures or experiential components for later reference to supplement concurrent transmission of lectures or experiential components. All students participate in all delivery modalities.

I

Incomplete (I) Grade:

A grade that can be issued, as agreed upon by the instructor and the student, when circumstances prevent a student from completing the coursework by the end of the enrolled term. Coursework must be

completed within one year of the assignment of the I grade. If an "I" grade is not removed by the established deadline, it will either become permanent or changed to a D/F, depending on the terms stated on the "I" Grade Information Form.

Independent Study:

Individualized learning, which allows student to work independently under the supervision of an assigned instructor on specific topics directly related to a course or program of study. The meeting time is arranged between the student and instructor.

Instructor (Faculty):

Any employees who teaches classes at an educational institution.

Internship / Co-op:

A for credit temporary student learning hands-on work experience course with an industry partner that is directly related to the student's program of study. The experience must meet pre-determined learning objectives and focus on providing practical work experience, while developing professional skills. Internships are typically unpaid, while co-op experiences tend to be paid experiences and vary in required work hours. Both types of experiences are generally completed within one semester.

J

Junior:

A student classification for undergraduate students who have completed 60 to 89 college credits, including transfer credits.

L

Lab:

A course, or portion of a course, focused on the application of an instructional strategy that allows students to interact directly with the material, models, and tools and collect data.

Late Registration Fee:

A fee charged to students who register for classes after the second day of the term.

Lecture (Class):

A course in which content is primarily delivered through presentation of facts, principles, context, and/or interpretation. Instruction takes place in a traditional classroom setting and/or online format.

Lower Division:

Courses, usually, offered for freshmen/sophomore level credit (designated by course numbers between 100-299 and 1000-2999). Usually completed the first two years of college.

M

Master's Accelerated Program (MAP):

An opportunity for select undergraduate students to take graduate level courses that will apply to their future graduate degree at NMSU.

Master's Degree:

A degree beyond the bachelor's, also called a graduate degree. A minimum of 30 semester graduate course credits are required for the master's degree. Master's programs involving a thesis include no more than six and no fewer than four credits of thesis. At least 15 credits for

the master's degree must be for work in courses in the department in which the student was admitted. Master of Arts and Master of Science degrees are most common, but there are also professional master's degrees, such as the MFA (Master of Fine Arts) or the MBA (Master of Business Administration). Usually takes two years of full-time enrollment to complete.

Major:

A program of study comprising a specific group of courses compiled to provide the expected education or training in a specialized field. The subject area in which a student pursuing a college degree develops the greatest depth of knowledge.

Maximum Time Frame:

Calculation of maximum allowable hours related to limited financial aid eligibility. In general, the maximum is 150% of the required credit hours for the declared major/degree. This calculation includes all attempted hours, including repeated courses, ineligible courses, and transfer credits. Only developmental/remedial hours are excluded from the calculation.

Military Duty:

Active or reserve duty students in the military who receive orders that will prohibit continued enrollment.

Minor:

No less than eighteen (18) undergraduate credits or nine (9) graduate credits in an area outside a student's major department.

my.NMSU:

NMSU's online student information portal that houses all online services, including registration, grades, financial aid, Canvas, MS Office 365, email, etc.

N

New Mexico State University Global Campus (UO)

Fully online degree programs and support services for online learners seeking bachelor, master, doctorate degrees, as well as certificates and microlearning courses, 100% online.

New Mexico State University System:

The University campus and three community college campuses (Alamogordo, Doña Ana, and Grants) governed by the NMSU Board of Regents.

Non-Degree Status:

Students who do not intend to earn a degree or certificate at NMSU, or who have not yet been accepted to a graduate program.

No Release of Information:

Students can request that their public directory information not be released to any public entity or being by completing the "No Release of Information" form found at <https://records.nmsu.edu/forms/inventory.html>.

O

Official Transcript:

An official document of a student's academic record, including courses taken and grades earned from time of admission to end of the last semester attended. Official transcripts are printed on special paper

and include a signature of the Registrar verifying the authenticity and accuracy of the document.

P

Part-time:

A schedule of less than 12 credit hours per semester for undergraduate students, and less than 9 credit hours per semester for graduate students.

Placement Exams:

Subject exams, administered to determine eligibility for waiver of prerequisites for specific courses. Placement exams do not award credit. Subject areas include, but are not limited to, Math, English, and Computer Science.

Practicum:

A temporary, hands-on work experience course integrated with academic instruction that prepares a student for specific pre-professional training in occupational fields such as education, healthcare, and the arts.

Prerequisite:

Course, test score, and/or grade level that must be completed before taking a specific course.

Prior Learning Assessment (PLA):

See "Credit for Prior Learning (CPL)".

Priority Registration Dates:

One

Probation:

See "Academic Probation I" "Academic Probation II" and "Student Code of Conduct".

Program of Study:

See "Major".

Public Directory Information:

Student information that can be released to the public without students' approval. Students can request to withhold their directory information by completing and submitting a "No Release of Information" form found at <https://records.nmsu.edu/forms/inventory.html>. NMSU has defined public directory information as:

- Name
- Aggie ID number
- Class (i.e. Freshman, Sophomore, Junior, Senior)
- College and major
- Dates of attendance
- Degree(s) earned
- Honors and awards received, including selection to the dean's or chancellor's list, honorary organization, or the GPA range for the selection
- Address

- Telephone number
- NMSU e-mail address
- Most recent previous educational institution attended
- Participation in officially recognized activities and sports
- The weight and height and age of members of athletic teams

Q R

Readmission

When a student does not enroll for three consecutive terms, they must submit another application for admission and get accepted again.

Registration:

Process by which students formally select classes and creates a financial obligation to pay tuition and fees.

Repeating a Course for Credit:

When an undergraduate student has enrolled in a course more than once, each enrollment and all grades will appear on the student's transcript. Once a student receives a grade of C- or higher (or CR for transfer credits), they will not be allowed to repeat the course for credit again. A student may obtain special permission, from the advisor, to repeat a course they have already received a grade of C- or better, but the grade earned will not be included in the GPA calculation. This policy does not apply to courses that can be repeated for credit, up to a maximum number of credits, such as special topics, internships, cooperative education and thesis/dissertation.

When a graduate student has enrolled in a course more than once, each enrollment and all grades will appear on the student's transcript. Every grade earned will be included in the GPA calculation.

Restriction (Registration):

Conditions that apply to courses, at the class/section level, to limit registration. Common restrictions include: department approval, instructor approval, major, program, student level, student classification, campus.

Residency for Tuition Purposes:

Status used in calculating tuition. Students are either a resident or non-resident of the State of NM. Students are also coded as in-district or out-of-district based on County. Community Colleges, within the NMSU system, assess tuition differently depending on whether students who contribute to the local property and/or income tax base. Learn more at <https://records.nmsu.edu/students/residency.html>.

Residency Requirement:

The minimum number of program credit hours a student is required to earn for coursework taken at NMSU to earn a degree from NMSU.

S

Satisfactory Academic Progress (SAP):

Federal regulations require all students receiving financial aid to meet Satisfactory Academic Progress in order to maintain eligibility for financial aid. Undergraduate students must maintain a 2.0 cumulative GPA or greater on all hours attempted at NMSU. Graduate students

must maintain a 3.0 cumulative GPA or greater. Undergraduate and Graduate students are required to pass and complete 70% of all hours attempted. Students receiving financial aid must complete their program of study within a reasonable timeframe. The maximum timeframe is 150% of the published length of the academic program or certificate

Schedule of Classes:

An online list of classes/sections offered in a term. The schedule includes class information such as course number, section number, meeting day(s)/time, the CRN (course reference number), instructor, course delivery mode, and notes.

Second Degree:

Enrollment classification for students who have earned one or more bachelor's degrees.

Section:

An individual course offering, distinguished from other sections by various attributes, such as meeting day, time, location, instructor, etc.

Semester:

A term, within an academic year, marking the beginning and end of classes. At NMSU, each semester is fifteen (15) weeks in length and there are two semesters (fall and spring) in an academic year.

Senior:

A student classification for undergraduate students who have completed 90 or more college credits, including transfer credits.

Social Security Number (SSN):

A 9-digit federal identification number required for specified college purposes and taxation reporting, but subject to privacy and nondisclosure protections.

Sophomore:

A student classification for undergraduate students who have completed 29 to 59 college credits, including transfer credits.

Student Code of Conduct (Student Handbook):

The rights and responsibilities of NMSU students outlining the standards for social and academic conduct and providing the types of interim measures and sanctions which may be imposed for violation.

Student Concerns Process:

Visit <https://report.nmsu.edu/>.

Summer Session:

An academic term that is held between the end of spring and fall semesters.

S/U Grade Mode (Satisfactory/Unsatisfactory):

A grade mode that allows the student to attempt to earn course credit without having a course grade included in their grade point average calculations. Under S/U grading, the instructor assigns an S grade for satisfactory achievement of the course learning objectives (normally equivalent to the letter grade of C- or higher) and a U grade for unsatisfactory performance in the class.

Undergraduate limitations: Other than honors courses and courses officially designed as S/U, the following limitations apply to courses in which the S/U option is elected.

- No more than 7 credits per semester or 4 credits per summer session.
- Not to exceed a total of 21 credits towards a degree.
- Not a required course for the student's major.

Graduate limitations: With an approval from their advisor and department head, graduate students in good academic standing may elect the S/U option, at the time of registration, for courses taken outside the major department, subject to the regulations stated below:

- No more than a total of 6 credits of elected S/U courses are permitted in the master's degree.
- Doctoral candidates may take an additional 6 credits under the S/U option after application to candidacy.

Substitution:

An approved exchange of course and credit where the faculty determine competencies and/or learning objectives of one course are comparable, but not equivalent, to those of the required course.

Suspension:

Status whereby a student is ineligible for enrollment at NMSU due to poor academic performance or disciplinary reasons.

Syllabus:

A course summary or outline distributed by an instructor, normally including topics to be covered, meeting and instructor information, assignment and deadlines, grading standards, attendance and other policies, and resources available to students.

Synchronous Class (ONL):

A class that is taught fully online, with a requirement for attendance at a specific day/time.

T

TBD:

Abbreviation for To Be Determined. When found in the Schedule of Classes, relates to class information that has not yet been determined, such as room or instructor.

Term:

A portion of an academic year. NMSU has three standard terms in an academic year: fall, spring and summer, and many abbreviated parts of term: MS1, MS2, SU1, SU2, etc.

Teaching Credential:

A basic multiple or single-subject teaching credential obtained upon completion of a bachelor's degree and prescribed professional education requirements in four or more years of college.

TOEFL (Test of English as a Foreign Language):

An English exam for foreign students used for admission purposes and for placement in college English classes.

Traditional Grading:

Letter grade (A, B, C, D or F) used in calculating the grade point average and recommended for courses required to meet degree requirements.

Transcript:

A student's academic record, including courses taken and grades earned from time of admission to end of the last semester attended. May be official or unofficial, depending on the purpose for which the student is using the document.

Transfer Courses (Transfer Credits):

Earned credits at one institution of higher education counting toward the academic record of a student at another institution of higher education. Grades are not transferred. Transfer coursework is articulated as CR (credit) for passing grades, NC (no credit) for non-passing grades, and CD (credit but repeatable) for passing with a grade of D.

Tuition:

The cost a student is expected to pay for receiving instructional services at a school, college, or university. The charge is based on course type, credit hour and student's residence classification.

U

Upper Division Courses:

Courses, usually, offered for junior/senior level credit (designated by course numbers between 300-499 and 3000-4999). Usually completed the second two years of a four-year degree. These courses are not offered by community colleges and they often require completion of prerequisite courses. Also refers to junior and senior students.

Undergraduate:

Courses offered at the bachelor's degree level (course numbers range between 100/1000 and 499/4999). Also, an enrolled student who has not completed a baccalaureate degree.

Unofficial Transcript (Advising Document):

An unofficial document of a student's academic record, including courses taken and grades earned from time of admission to end of the last semester attended. Unofficial transcripts are NOT printed on special paper and DO NOT include a signature of the Registrar verifying the authenticity and accuracy of the document.

W

Wait List:

An automated function that enables students to indicate their interest in registering for a particular class/section that is already at full capacity. Students are notified, by email to their NMSU email address, when a spot opens and only have 24 hours from the receipt of the email to add themselves to the class. If the student does not add themselves to the class/section during that 24 hour window, the system automatically notifies the next student on the waitlist.

Warning:

Notification to a student, after final grades are processed, that their cumulative grade point average is below the requirement to continue enrollment at NMSU (2.0 for undergraduate students, 3.0 for graduate students).

Withdraw from a Course (Drop):

Officially withdrawing from a class/section through the online registration system, or in person with an academic advisor or at the Student Records Office. Classes may be dropped/cancelled according to the registration deadlines posted at <https://records.nmsu.edu/students/important-dates.html>.

Withdraw from the University:

Officially dropping all courses and ceasing to be a student at any campus in the NMSU system.

Work Study:

State and federally funded programs that make part-time jobs available to students with financial need.

The NMSU System Academic Regulations

The following regulations are effective with the publication of all the NMSU system catalogs, this includes the Las Cruces-Academic Catalog, NMSU Global, Alamogordo Community College, Dona Ana Community College, and the Grants Community College catalogs. All regulations in this section of the catalog pertain to all the campuses housed within the NMSU System. This means that information for students pursuing Associate Degrees/Certificates, Bachelor's degrees, and Graduate Degrees/Certificates is in this catalog section.

The regulations section is broken down into different areas:

- Academic Programs of Study
- Registration
- Academic Performance and Progress
- Grading
- Withdrawals
- Degree Applications, Graduation and Commencement
- Academic Standing and Probation
- Academic Misconduct and Grievances
- The University Student Records Office

Academic Programs of Study

NMSU offers Associate, Baccalaureate, Master's and Doctoral degrees. NMSU also offers Certificates at the associate and graduate levels. Requirements for specific degrees and other designations are set forth by this catalog for the NMSU-Las Cruces (main) campus and the corresponding catalogs for the NMSU Community Colleges (Alamogordo, Dona Ana, and Grants).

Additional Degree Designations

As part of a degree program, students may also earn additional degree designations indicating fields of study such as majors, minors or concentrations. A major is defined as a recognized area of study in which there is an extensive and well-developed curriculum offered at the university, as well as adequate library resources and support services. A minor is based on courses that encompass a recognized supplementary field of study outside the student's major. A concentration is based on a collection of coursework in an area that is part of a major program of study. Degrees and additional designations awarded, limited to majors, minors, and concentrations, will be noted on the student's transcript.

Catalog Effective Period

The annual catalog edition is effective Summer Session I through Spring Semester and is considered active for eight years for all campuses. Curricular requirements (course requirements and the number of credits required) for a specific degree or other designation may be met by completing all of the course requirements as set forth by the catalog in effect at first matriculation, or any subsequent catalog, provided the selected catalog is considered active when the requirements for graduation are met. For all other matters, the current catalog is controlling. NMSU reserves the right to withdraw courses at any time, change fees, rules, calendar, curriculum, degree programs, degree requirements, graduation procedures and any other requirements affecting students. Except as otherwise stated here, changes will become effective whenever the proper authorities so determine and will apply to both prospective students and those already enrolled.

Application for Degree/Graduation or Certificate

Upon completion of all requirements for degrees and certificates, students will not receive their degrees automatically. In order to receive the degree or certificate, students must submit an application and pay the required fee in the semester in which the student expects to graduate or complete the degree or certificate requirements. Specified in the academic calendar for each semester is the deadline for all applications. The application must indicate/ note all designations earned. After awarding of the degree, you cannot add any additional designations.

Students who will be completing two degrees/certificates in the same semester must apply for graduation and pay the fee for each degree separately. Students applying for graduate degrees or certificates must satisfy requirements as described in the Master's, Certificates, and Doctoral Degree sections below.

Students who do not meet requirements or elect not to graduate after filing an application need to re-apply in a subsequent semester and pay another fee.

Multiple Degrees and Designations

A student may earn more than one degree or multiple degree designations by completing all of the requirements in an appropriate catalog for each degree or designation. Students meeting requirements for more than one degree must apply for and pay the application fee for each degree to be awarded. Upon completion of all requirements, multiple majors for a single degree (e.g., B.A., Major in Art; Major in Anthropology) and multiple bachelor's degrees (e.g., B.A. and B.S.) will be noted on the student's academic record/transcript and may also be granted at one commencement.

Degree Revocation

The Board of Regents reserves the right to revoke a degree should it be determined upon investigation that the degree requirements were not adequately met. A degree revocation must be in accordance with NMSU policy and related rules.

Honorary Degrees

Ceremonial Honorary Degrees may be awarded in accordance with NMSU policy and rules as outlined in the NMSU Regents Policy Manual and the related Administrative Rules and Procedures.

Community College Certificate

A Community College may offer two types of certificates, the Certificate of Achievement and/or the Certificate of Completion. Certificates may be awarded independently from any degree program.

Certificate of Achievement

The Certificate of Achievement is a program of study less than 16 credits and is not eligible for Federal financial aid. This Certificate provides employment-related and/or career-enhancing skills necessary to succeed in a job or a chosen field of study. These courses can be a subset of those required for a corresponding Certificate of Completion or Applied Associates Degree. These certificates are recorded on the student's transcript. The following requirements apply to all certificates of achievements:

1. **Minimum Credit Hours:** The number of credit hours varies from certificate to certificate but must be fewer than 16 credits. Students must successfully complete the total number of credit hours outlined in the respective catalogs and sections describing these certificates.
2. **GPA requirement:** Students must successfully complete all courses for the certificate as outlined in the catalog and have a cumulative GPA of 2.0 or greater in all courses required for the certificate, but may have a cumulative GPA of less than 2.0 for courses taken outside of the certificate.
3. **Residency:** A minimum of 6 credits earned toward the certificate must be completed at NMSU or one of its community colleges. If the certificate requires fewer than 6 credits, all credits must be completed at NMSU or one of its community colleges. Individual academic programs may have additional requirements.

Certificate of Completion

The Certificate of Completion requires a minimum of 16 credits (other Title IV requirements must be met to be eligible for financial aid) and has been approved through the academic review process. These courses can be a subset of those required for a corresponding Applied Associates Degree. These certificates are recorded on the student's transcript.

Requirements for certificates are found in the respective catalogs and sections concerning these programs. The following requirements apply to all certificates.

1. **Minimum Credit Hours:** The number of credit hours varies from certificate to certificate. Students must complete the total number of credit hours outlined in the respective catalogs and sections describing these certificates.
2. **GPA requirement:** Students must successfully complete all courses for the certificate as outlined in the catalog. In addition, students must have a cumulative GPA of 2.0 or better in all courses taken at NMSU or one of its community colleges.
3. **Residency:** A minimum of 6 credits earned toward the certificate must be completed at NMSU or one of its community colleges.

Associate's Degree

Associate's degrees are of two types. The academic associate's degree prepares students to transfer to a baccalaureate program and generally includes credits toward the first two years of a four-year degree. Academic associate's degrees include the Associate of Arts, the Associate of Science, and other named degrees that link to a specific major (the Associate of Education, for example). Other associate degrees, typically called Associate of Applied Science, prepare students for entry into the workforce. Credits for these programs may or may not apply

toward a four-year degree. Associate degree-seeking students who are interested in a dual degree should consult with their academic advisor. The Associate of Arts and the Associate of Science degrees cannot be earned together.

Students interested in transferring to NMSU or another four-year institution should check the appropriate sections of the university catalog for more information.

Requirements for the two-year associate degrees are found in the respective catalogs and sections concerning these degrees. The following requirements apply to all associate degrees:

1. **Minimum Credit Hours:** a minimum of 60 credits (excluding "N" suffix courses). Some programs of study require coursework in excess of the 60 credit-hour minimum.
2. **New Mexico General Education-** state mandated general education courses (as specified in General Education section); such courses are designed with a "G"
 - a. For Associates Degrees: 32-35 credits
 - b. For Applied Associates Degrees: 15-18 credits
3. **GPA requirement:** Students must have a cumulative GPA of 2.0 or better in all courses taken at NMSU or one of its community colleges.
 - a. For Associates Degrees: students must earn a C- or better in classes they take to meet the Basic Skills requirement (ENGL 1110G and one of several math course options).
 - b. For Applied Associate Degrees: Basic Skills requirements do not apply, but if the student plans to pursue a Bachelor's degree at any point in the future it would be highly recommended.
4. **Residency** - A minimum of 15 of the 60 credits for the associate's degree must be completed at NMSU or one of its community colleges. Individual academic programs may have additional requirements.
5. **Major:** All requirements for at least one major field of study as specified in the college and departmental sections of the respective catalog.

Associate Major

An associate major, consisting of at least 18 credits, may include courses from more than one department. Requirements for the Associate Majors are specified in the respective Community College Catalogs.

Baccalaureate Degree (Bachelor's Degree)

A baccalaureate or bachelor's degree provides students with a broad educational base and knowledge in a specific major field. Each college has unique degree requirements that are listed in the college's designated section of this catalog. In addition to the College and Department requirements, students must complete each of the following degree requirements for every Bachelor's Degree awarded by NMSU:

1. **Minimum Credit Hours:** a minimum of 120 credits (excluding "N" suffix courses)
2. **GPA requirement-** a minimum cumulative GPA of 2.0 in all courses taken at NMSU
3. **New Mexico General Education-** 32-35 credits of state-mandated general education courses (as specified in the General Education section); such courses are designed with a "G"
4. **New Mexico State University's Viewing a Wider World-** 6 credits of Viewing a Wider World courses; such courses are designated with a "V", or alternatives as specified in the Viewing a Wider World section

5. **Upper Division Courses**- a minimum of 48 credits in courses numbered 300-499/3000-4999.
6. **Residency** – Of the last 36 credits earned toward award of the degree:
 - a. 30 credits must be completed at NMSU
 - b. 21 credits must be upper-division (300/3000 or above) and
 - c. 12 of the 21 upper-division credits must be within the student's major.
NOTE: colleges or departments may require that more than 12 upper-division credits be within the major and they may direct that a certain number of these credits be course specific.
7. **Major** – all requirements for at least one undergraduate major field of study, other than a supplemental major, as specified in the college and departmental sections of the catalog. As an undergraduate student seeking a baccalaureate degree you are expected to declare a major before earning 45 credit hours toward your degree. You should complete your general education requirements within your first 90 credit hours earned.

Second Baccalaureate Degree (Bachelor's Degree)

Students seeking a second bachelor's degree must complete all college, department, and major requirements for the second bachelor's degree including residency. General Education requirements, including Viewer a Wider World, are waived for a second bachelor's degree because those requirements are considered completed within the first bachelor's degree earned. Credits earned toward a previous degree may be used to complete those requirements subject to any college and department-specific limitations as described in the catalog.

Bachelor's Degree Designations

Undergraduate Major

An undergraduate major consists of 24 or more credits within the major field, of which 18 credits must be upper-division courses, and may include courses from more than one department. Additional major requirements are specified in the college and department's designated sections of this catalog.

Supplemental Major

A supplemental major consists of 24 or more credits of interdisciplinary coursework, of which at least 18 credits must be upper-division (300/3000-499/4999), and no more than 9 credits may be from the student's major course of study. Additional requirements for supplemental majors are specified in the catalog listing of the departmental/college sections.

Undergraduate Minor

An undergraduate minor consists of 18 credits of course work, of which 9 credits must be upper-division (300/3000-499/4999). A minor encompasses courses that may be in a single department or interdisciplinary and are in a recognized field of study outside the student's declared major. At least 9 upper-division credits of a minor must be completed at NMSU. Additional requirements for minors are specified in the college and department's designated sections of this catalog. Minors cannot be earned after the degree has been conferred.

Undergraduate Concentration

A concentration consists of 12 or more credits of coursework in a specialty area that is related to a specific major field of study. At least 9 of the 12 credits must be upper-division (300/3000-499/4999), and at least 9 credits must be completed at NMSU. Additional requirements for

concentrations are specified in the college and department's designated sections of this catalog.

Distance Education Bachelor's Degree Completion Program

A Bachelor Degree Completion Program allows students who have met the lower division requirements (100/1000 and 200/2000 level) of an undergraduate degree program to complete the remaining upper-division credits (300/3000 and 400/4000 level) through distance delivery courses offered by NMSU Las Cruces. Only selected degrees are available as degree completion programs. Students must complete all required lower-division (100/1000 and 200/2000 level) credits before they can be admitted to the Bachelor's Degree Completion Programs. The program(s) normally require two years of upper-division (300/3000 and 400/4000 level) coursework.

Graduating with Honors

For information about graduating with Honors, please refer to the Recognition of Academic Achievement section of this catalog.

Graduate Degrees

All graduate degrees are subject to the rules and regulations of the Graduate School. Degrees will be certified by the Graduate School only upon the complete review and clearance of the candidate's program of study.

Graduate Degree Designations

Graduate Major

A graduate major may include courses from more than one department, but at minimum, it must consist of at least 30 graduate credits. Additional requirements may be imposed by the State of New Mexico and New Mexico State University as specified in this Catalog.

Graduate Minor

A graduate minor is based on at least 9 graduate credits in courses encompassing a recognized field of study outside the student's major. Departments may require certain courses to be a part of a minor and may exclude other courses. Minors cannot be earned after the degree has been conferred.

Graduate Concentrations

A concentration is a collection of coursework in a specific area that is part of a degree program of study at NMSU. At the graduate level at least 9 of these 12 credits must be numbered 500/5000 or above. Only approved concentrations within a student's department or program may be noted on a transcript.

Concentrations will not be added to a transcript after a degree is awarded. In order for the approved concentration to be noted on the student's transcript, the following conditions must be met:

1. Request the concentration at the time they file their official program of study.
2. Identify the concentration on their official Application for Degree.

Graduate Certificates

A Graduate Certificate program requires 12-18 credits of course work that is interrelated and designed to develop a focused skill or area of expertise but does not culminate in the awarding of a degree. Courses that comprise a graduate certificate must be regular approved courses

offered by the University and must be numbered 450/4500 or above. A graduate certificate is indicated on the student's transcript.

Master's Degree

New Mexico State University offers both academic and professional master's degrees. A link to the list of all master's degrees is provided in the Graduate School section of this catalog. (<https://catalogs.nmsu.edu/nmsu/graduate-school/>)

Underprepared students may be required to take additional general or discipline-specific undergraduate or graduate courses to prepare them for the advanced academic work necessary for success in graduate-level courses in their chosen field. This may result in an extended graduation date.

Admissions to the Master's Degree

The admission of a student into the Graduate School does not imply admission to candidacy for an advanced degree. The major department in which the student intends to become a candidate for a master's degree must determine the student's ability to pursue studies at the graduate level. Please see the Department(s) for specific requirements.

Program of Study

In the absence of a degree audit at the completion of one year of enrollment, each new graduate student should prepare a complete program of study in consultation with the student's advisor for programs. Students should check with their Program Director prior to completing either, the Graduate School only needs to receive one or the other.

Application to Candidacy

The program of study will formally list the curriculum requirements for degree completion and is required for application to candidacy. The program of study must be approved by the advisor, department, and academic dean and submitted to the Graduate School. The Program of study may specify the Catalog at the time of graduation, as long as the catalog is considered active. Otherwise, the current Catalog will be listed.

An Application for Admission to Candidacy must be filed with the Graduate School. This must be done before the completion of 12 credits of graduate coursework. The student must have a minimum cumulative GPA of 3.0 at the time the application is submitted. The application may specify the Catalog at the time of graduation, as long as the catalog is considered active. Otherwise, the current Catalog will be listed.

The student's program of study must:

1. Meet the requirements of the chosen catalog, including the regulations of the Graduate School and of the major department.
2. Be signed by the student, the student's advisor, department head, minor faculty if applicable, and academic dean.
3. List each course prefix/number, short title, credit hours and grades if available.

If the program of study does not comply with the departmental requirements or the potential degree audit, the program of study must be approved by the Dean of the Graduate School. The Program of Study is not required for master's programs if defined within the Star Degree Audit.

Credit Hour Requirement

A minimum of 30 credits is required for the master's degree. Most master's degrees require at least 15 credits in courses numbered 500/5000 or above. This includes thesis credits for any master's programs that include a thesis option. Master's programs involving a

thesis, must include, either a minimum of 4 credits or a maximum of 6 credits of thesis. Please see the "Thesis" section for more information.

At least 15 credits for the master's degree must be for work in courses within the student's department. Additional credits may be selected from other fields to fit into a logical and justifiable program. However, courses that are used to remove deficiencies or satisfy prerequisites cannot be counted as requirements for a master's degree.

Coursework Requirement

Students must take coursework from a variety of faculty. Students may not take more than half of the minimum credits required for a master's degree with the same professor, excluding thesis credits.

All graduate students must register for a minimum of 1 credit of graduate coursework in their final semester. Please see the Tuition, Fees and Other Expenses section for more information.

A student taking an oral examination must enroll for at least one credit for that term (fall, spring, or summer terms).

Thesis Option

A thesis in the major field is recommended and may be required at the discretion of the department. A minimum of 4 credits and a maximum of 6 credits may be counted toward the requirements for a master's degree. The final examination shall consist of an oral defense of the student's thesis as well as a general examination of the candidate's field of study.

- *Continuous Enrollment*- once registered, a student must continue to register for a minimum of 1 credit in thesis or graduate coursework each regular semester until the thesis is approved by the Graduate School and submitting electronically into ProQuest.

Graduate Committee for Thesis Option

The graduate committee for the master's degree consists of a minimum of three faculty members who hold, at least, a master's degree and meet the following criteria:

1. **Committee chair:**
 - a. Must be from the student's home department
 - b. Must be a graduate faculty member
2. **Committee member(s):**
 - a. May be from outside the student's home department
 - b. Students with a declared minor- may have the representative from a related area or be appointed by the Dean of the Graduate School.
 - c. Must be a graduate faculty member
3. **Dean's Representative:**
 - a. Must be a representative from a related area or appointed by the Dean of the Graduate School
 - b. Must be a graduate faculty member

Finalizing the Master's Thesis

After successful completion of the final examination, electronic submission of the approved thesis must be submitted to ProQuest ETD, no later than the deadline posted to the Graduate School website. The form and style of the thesis must comply with the guidelines provided in preparing your manuscript for submission, located here (<https://gradschool.nmsu.edu/Current%20Students/thesis-and-dissertation.html>). The guidelines also contain detailed information on the thesis submission and approval process. The thesis is not complete until the Graduate School has accepted it electronically.

Professional Degree and Non-Thesis Final Examination

Each candidate will be given a final examination conducted by their graduate committee in accordance with the schedule provided by the Graduate School. The department is responsible for ensuring that the Report of Results for the Master's Professional or Non-Thesis Final Exam form is submitted to the Graduate School no later than ten working days after the exam.

The final examination format for the professional degrees and non-thesis option will be determined by the department, with the approval of the Dean of the Graduate School. If a department does not specify an examination format, the final examination will consist of an oral defense of the candidate's field of study.

At the time of the final examination, a graduate student must have a cumulative GPA of at least a 3.0 and must be enrolled for a minimum of one credit hour in the final semester; or if the student is writing a thesis, he or she must have completed all course work for the master's degree.

NOTE: the cumulative GPA, will be calculated from NMSU graduate coursework only.

Any candidate who fails the final examination may either:

1. Be granted a second examination, written or oral, after a lapse of at least one semester, only with a recommendation from the student's advisor and approval from the Dean of the Graduate School.
2. Be excluded from further candidacy for the degree.
3. Failure in the second examination disqualifies a candidate from obtaining the degree.

Students in professional or non-thesis options may be required to pay a special exam fee in lieu of registering for 1 credit of graduate coursework. Please see the Tuition, Fees and Other Expenses section for more information.

Time Limit

Students must complete the master's degree program within seven years (or eight successive summers) of the start of the degree, including completion of the master's thesis or final project. Inclusion of any coursework over seven years old at the time of the final examination will be at the department's discretion.

Master's Accelerated Program (MAP)

The master's accelerated program allows for academically qualified undergraduate students to begin working on a master's degree during their junior and senior years while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete and a master's degree requires two more years. The master's accelerated programs allow students to complete a graduate program in an accelerated manner.

Undergraduate students may apply for acceptance to a Master's Accelerated Program available at New Mexico State University after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at New Mexico State University and apply towards the undergraduate major. The grade point average must be a minimum of 2.75; departments participating in the master's accelerated program may have requirements that exceed these minimum requirements. **It is the student's responsibility to meet with their financial aid advisor. Awards may be adjusted to reflect enrollment in an undergraduate/graduate program.**

Graduate departments within the colleges may allow academically qualified undergraduate students to substitute up to 50% of their graduate course credits (i.e., 15 of 30, etc.) but no more than 18 credit hours for elective or required courses in an undergraduate degree program. Graduate programs can use up to 50% of NMSU coursework (450/4500 level or higher) that can logically be applied toward completing a master's program of study (at least 50% of the credits allocated for the master's degree – usually 15 of 30 – must be for courses designed for graduate work.). Students must consult with participating MAP departments to determine program-specific guidelines on the allowable credits toward the undergraduate and graduate degree. A grade of 3.0/4.0 or higher in each course will be required.

Program Participation Requirements:

1. Students must obtain prior approval by the graduate program
2. Student's course work must be general or discipline electives in the student's undergraduate course of study.
3. Students will enroll in approved graduate-level courses. If the course(s) requires instructor approval, it is the students responsibility to obtain the necessary approval
4. Students participating in MAP are required to submit a completed Master's Accelerated Program Referral Form to the Graduate School by the first Friday of classes, with all required signatures.
5. Students participate in the Developing New Scholars Program (DNSP) through the Graduate School. The DNSP program provides formal mentoring supporting the application process to Graduate School. Upon awarding of the Bachelor's degree and formal admissions into a master's/graduate program at NMSU, the approved credits (up to 12) will be recorded on both the undergraduate and the graduate transcript.

Interdisciplinary Master's Degree

Interdisciplinary studies, at New Mexico State University, are intended for individuals specializing in programs that require integrating more than one discipline to fully engage in the field of study. The programs provide a mechanism to address emerging scholarship, innovation, research, and allow graduate students to engage in emerging technologies that optimize their education outside the traditional disciplinary boundaries. An Interdisciplinary study takes advantage of traditional academic training within specific departments and also allows students to customize their own career preparation. In these programs, a coherent common core is expected to combine existing courses across disciplines to meet unique objectives.

The interdisciplinary studies option should not be used in cases where the applicants' objectives can be realized by admission to a specific department with a degree program, and inclusion of up to two minor areas in the program of study.

Admission

Students interested in pursuing an Interdisciplinary Master's Degree (IMAS) degree must meet with the Graduate School for advisement. The advisement session will include information on completing the IMAS admission application:

1. Develop a proposal for interdisciplinary studies
2. Create the IMAS graduate committee
3. Once the student's graduate committee is designated, the committee can require additional materials such as a statement of interest, letters of recommendation, GRE or GMAT scores and a personal interview.

4. Complete the IMAS referral form and procure committee members IMAS program approval.
5. Procure academic department head IMAS referral form approval.
6. Submit IMAS referral form and proposal for interdisciplinary studies to Graduate School for admissions.

Degree(s) Awarded

Students receive a Master of Arts (MA) or a Master of Science (MS) and a concentration in the designated interdisciplinary study area.

Other conditions for being awarded a degree within the interdisciplinary studies program are:

1. The student must present a written description of the program concept consisting of the following, as well as, the designated degree being sought and a name of the interdisciplinary area:
 - a. The objective of the program of study should include, proposed areas of skill development and proposed courses in more than one graduate degree granting department at NMSU.
 - b. A justification for not using an existing degree program.
2. The student's program of study must include a minimum of 30 graduate-level credits and a maximum of 36 graduate-level credits. Students may take six credits in departments that do not grant a graduate degree, but the courses must be numbered 450/4500 or above and be pertinent to the program of study.
3. The majority of the departments involved in the student's program will be master's degree granting departments. The student is expected to take at least 15 credits in the primary area of study within one department. The department selected by the student will receive a copy of the student's application for admissions to the Graduate School. In addition, the student is required to select a minor area of study in another department that consists of at least 9 graduate credit hours.
4. The student will form a committee composed of members of the graduate faculty and select an advisor who will chair the committee. The chair must be from the primary department where the student has taken at least 15 credit hours listed in the proposal submitted. The other committee member must be from the department in which the student has selected a minor area of study from the approved list.
5. The student will be required to submit the Candidacy Form after they have satisfactorily completed 12 credits.
6. The program will meet all requirements of a master's degree, with the interpretation, that "major field" includes courses from two or more departments and in the designated interdisciplinary study area.
7. The program of study will include the completion of a research thesis or project. The work may be submitted in the form of a publishable manuscript, technical report, thesis or creative option.
8. The student may enroll on a part-time basis keeping in mind that coursework cannot be more than seven years old at the time of the final examination.
9. The student will be administered a final comprehensive exam that is consistent with the department selected for the primary area of study. For example, if a department requires a written exam, the student in the interdisciplinary masters will also be required to take a written exam.
10. The final oral comprehensive exam will consist of questions pertinent to the area of study and the defense of the research thesis or project.

In both cases, an integrated approach to the areas of study chosen should be followed.

11. All other rules for graduate study at NMSU must be followed.

Thesis/Non-thesis Option

As with any graduate student, the student in interdisciplinary studies can select to follow a thesis or non-thesis option. Students enrolled in the thesis option register for six thesis credits. Students not wishing to follow the thesis option will be required to complete a project report. The project must reflect the interdisciplinary nature of the program which the student is pursuing.

Comprehensive Exam

Students in interdisciplinary studies take a comprehensive exam composed of questions designed by the student's committee. The committee consists of two individuals in the area of study, the dean's representative who must be outside of the department/program/interdisciplinary study option, and a committee chair.

Second Master's Degree

A student who has earned one master's degree at NMSU may be allowed to count a maximum of six semester credits earned on the first degree toward a second master's degree, if those credits fit into a logical graduate program. The number of shared credits may be increased for joint degree programs.

Teacher Licensure

Students wishing to take graduate courses for licensure, renewal of licensure, or for personal enrichment must be fully admitted to a department to do so. Undeclared students may not register for teacher licensure classes.

Endorsement is available at both the elementary and secondary levels in bilingual education, TESOL (Teaching of English as a Second Language), reading, and special education. Endorsement is also available in early childhood education at the elementary level. Contact curric-instr@nmsu.edu for more information.

Specialist in Education

The specialist in education degree is available for experienced members of the education profession who have maintained a 3.3 grade-point average while pursuing this degree or its equivalent. Programs are available in curriculum and instruction, as well as, school psychology. Emphasis is placed on the development of the competencies needed for professional specialization in a given field. Students must complete the general application for the Graduate School and they should also check with the admitting department for specific departmental requirements.

Residency and Credit Requirements

The specialist in education degree requires a minimum of 30 credits including research, intern experiences and graduate courses. Twenty-four of these credits must be completed at NMSU to meet the campus residency requirements.

Students must maintain a 3.0 GPA, no more than 6 credits of C level work are allowed for this program.

Program of Study

After the completion of one year of enrollment, each beginning graduate student should prepare a complete program of study with the student's advisor. The program of study can be tentative, should be kept in the

student's file within the department, and is not considered an "Application for Admission to Candidacy."

Major Field

All course work taken for the degree should apply directly, through a logical program of study, to the specialty which candidate has selected. Each department is responsible for defining the required sequence of courses.

Candidacy

Following the successful completion of 12 credits the student is eligible for admission to candidacy. With the achievement of candidacy, a committee is appointed to work with the candidate on the remainder of the program. The committee consists of three members of the graduate faculty in the College of Education.

Internship

Each candidate will earn from three to six semester credits in an internship. This experience will consist of supervised performance of duties related to the candidate's specialty. The student's department will determine the structure of the internship and a research project will be conducted in conjunction with the internship.

Oral Examination

The oral examination committee will consist of the student's committee and a dean's representative appointed from the graduate faculty by the dean of the Graduate School. This committee will conduct an oral examination at the conclusion of the research project and no earlier than the candidate's last semester of enrollment.

The examination will consist of a defense of the project along with general questions on subject matter related to the candidate's field of study. Any candidate who fails the oral examination may upon the advisor's recommendation and with the graduate dean's approval, be granted a second examination after a lapse of at least one semester. Failure in the second examination disqualifies the candidate from obtaining the degree.

Time Limit

The specialist in education degree must be completed within seven years following admission to the program. Inclusion of any coursework over seven years old at the time of the final examination will be at the department's discretion.

Doctoral Degrees

The doctoral degree requires significant scholarly study beyond the master's program.

Prospective candidates are expected to hold bachelor's or master's degrees from accredited institutions, based on curricula that include the prerequisites for graduate study in the department of their subject. To be considered for admission to a doctoral program, the applicant must have a grade-point average of at least 3.0. Prospective candidates are urged to consult the department in which they wish to study for information concerning specific requirements.

Professional Doctoral Degrees

Doctor of Economic Development (DED)

Students enrolled in the Doctor of Economic Development are required to complete and pass a comprehensive examination. Since a dissertation is not required, students are expected to complete an internship experience and a project paper as defined by their program. They can embark on the project paper once they have completed and passed their comprehensive examination. Students are not required to take 700/7000

level dissertation hours. However, they are expected to complete at least 12 credits at the 600/6000 level including ECDV 694 Internship and ECDV 699 Doctoral Project.

Doctor of Education (Ed.D)

The degree of Doctor of Education demonstrates proficiency in a program of graduate study in which the emphasis is in preparation for performance in professional education. This program is intended primarily for students pursuing careers in which teaching, administration or school services are predominant rather than those in research. The Ed.D. Degree in curriculum and instruction is offered in the Department of Curriculum and Instruction; the degree in educational administration is offered in the Department of Educational Leadership and Administration.

The requirements for doctoral degrees in the two departments of the College of Education have the following distinguishing elements:

1. The qualifying examination consists of a written and an oral section, both of which are administered prior to admission to the program. Acceptance for doctoral admission is equivalent to the successful completion of the qualifying examination. Residency of at least two consecutive semesters cannot commence until the semester after the qualifying examination is successfully completed.
2. Comprehensive examinations usually are administered three times annually. The written examination tests the major and related areas of concentration and is administered after successful completion of the orals within two weeks' time. A student who fails any part of the comprehensive examination may present him or herself for re-examination of the failed part of the exam before moving on to the next part.
3. The major area of study must be within the College of Education

A minimum of nine credits constitutes the related area. The courses can be taken in any department of the university with the approval of the student's committee. The related area must be specifically planned with the major and minor departments in order for the doctoral fields to be mutually supportive. Any transfer credit or predoctoral course work to be included in the related field must have the approval of both the major and minor department at the outset. Specified course work in both research and statistics is required for this degree. Other requirements are described in the departmental sections of this catalog.

Doctor of Nursing Practice (DNP)

Students holding a Bachelor's degree in Nursing are required to complete and pass all required course work for the DNP program, as well as, complete and pass their comprehensive examination. Since a dissertation is not required, they are expected to complete an internship experience and a project paper as defined by their program. They can embark on the project paper once they have completed and passed their comprehensive examination. They are not required to take 700/7000 level dissertation hours. However, they are expected to complete at least 12 credits at the 600/6000 level including NURS 6990 Advanced Practice Nursing Immersion credits sufficient to complete the DNP Final Project.

Students who hold a Master's of Science in Nursing are required to complete the following:

1. All course work requirements
2. Their comprehensive exam (with passing marks)
3. The DNP Project.

Post- MSN DNP students must complete at least 6 credits at the 600/6000 level, including NURS 6990 Advanced Practice Nursing

Immersion credits sufficient to finish the DNP Project. Finalized projects must be uploaded to a national DNP Project repository approved by the Graduate Faculty of the School of Nursing in order to achieve the DNP degree.

Doctor of Philosophy (Ph.D.)

The Doctor of Philosophy degree requires distinguished attainment in both scholarship and original research. The doctoral degree requires significant scholarly study beyond the master's that is tailored to the needs and interests of the student. The degree is granted in recognition of the candidate's high attainments and ability in the special field, shown by work on the required examinations covering both the general and the special fields. The individualized program of study is designed to meet the campus residency requirement, includes a minimum of 30 graduate credits, and includes the preparation of a dissertation. A candidate for the Ph.D. degree is expected to maintain a higher level of work than the grade-point average of 3.0, plus at least 18 credits of dissertation work (700/7000-level courses).

Interdisciplinary Doctorate

Students interested in pursuing an Interdisciplinary Doctorate (IDOC) degree program must meet with the Graduate School for advisement. The advisement session will include information on completing the IDOC admission application.

The following requirements for admission to the interdisciplinary doctorate degree program are:

1. Students wishing to study in the interdisciplinary doctoral degree program must apply and be accepted into a doctorate-granting department.
2. A master's degree or equivalent program of study that includes at least 30 credits of graduate course work with a minimum cumulative GPA of 3.0.
3. Twelve credits of graduate course work must be completed at NMSU in order to apply for admission into the interdisciplinary doctorate degree program. Additional course work is required for degree completion.
4. Evidence of outstanding academic achievement in graduate school.
5. A written description of the program concept prepared by the student consisting of:
 - a. Areas in which competency is required
 - b. Purposed readings and course work and how these relate to required competencies
 - c. Objectives and an outline for thesis research
 - d. Justification for not using an existing departmental degree program
6. Student must select an advisor from his/her department to help structure and chair a committee consisting of at least five faculty members from the graduate faculty list who are willing to work on the interdisciplinary degree program. The committee must include at least two members from each of the two doctorate-granting departments. The committee chair will convene a meeting to review and approve the proposed program.
7. The Graduate School will send an Admission Referral document, signed by all the committee members, to the heads of all the departments from which the student proposes to use more than 8 credits of course work, or from the department which the faculty are requested to serve on the proposed committee.
8. Once the Admission Referral document has been approved by all departments, the committee chair will convene a meeting of the committee to review the student's program and make changes as necessary. In addition, the committee will set the format and date for the qualifying exam. An effort should be made to incorporate the interdisciplinary nature of the program into the qualifying exam.
9. Students have satisfied the requirements for admission to the program once the qualifying exam has been passed and the respective department heads approve the Admission Referral memorandum. Formal acceptance into a doctoral program may be required in order to receive financial assistance.
10. The number of courses required for degree completion will vary depending on the student's program of study, please see the department for more specific requirements. However, Interdisciplinary doctorate degree students must meet the requirements for residency, registration, the comprehensive examination, the Final Examination, the dissertation and the declaration of approved minor.
11. The dissertation work shall include at least 18 credits of a 700/7000-level course.

Completing your Doctoral Degree Program

Any student who fails to abide by the regulations in this section will be considered withdrawn from the university. In order to resume their studies, the student must formally apply for readmission to the Graduate School and satisfy any requirements that are in effect at the time of reapplication. Readmission information can be located here (<https://apply.nmsu.edu/apply/?id=1c3c41ea-b5f9-48ef-83c3-b085794ba277>).

Declaration of Approved Minor

Any doctoral applicant for candidacy may declare up to two approved minors in addition to the major area of study. Demonstration of competency in the minor area will be required at both comprehensive and final examinations.

Qualifying Examination

Doctoral students must pass a qualifying examination that is scheduled by the student's advisor and is administered by the major department. Its purpose is to determine the areas in which the student shows strength or weakness, as well as the ability to assimilate subject matter presented at the graduate level. A student may not register for dissertation credits prior to the successful completion of the qualifying examination.

The following conditions apply to students who wish to take the qualifying examination:

1. For students who enter the Graduate School with little or no previous graduate experience but wish to proceed directly to the doctorate, the qualifying examination should be taken after 12 credits of graduate work
2. For students who enter with a master's degree or equivalent from another university, or another department, the qualifying examination should be taken before completing one semester of graduate work.
3. For students who earn their master's degree at New Mexico State University and will continue in the same department, the department may allow the master's final examination to serve as the doctoral qualifying examination or may require a separate examination.

Based on the result of the qualifying examination, the department will take one or more of the following actions:

1. Admit the student to further work toward the doctorate
2. Recommend that the program be limited to the master's degree

3. Recommend a re-evaluation of the student's progress after the lapse of one semester
4. Recommend discontinuation of graduate work

In all cases, the Graduate School shall be notified by the department of the results of the qualifying examination.

Students will be admitted to the doctoral program once the qualifying examination is passed. The student's advisor and department head will then appoint the doctoral committee to prepare the student's preliminary doctorate program of study. The student must submit the program of study to the Graduate School immediately following admission into the doctoral program and before registering for additional coursework.

Doctoral Graduate Committee

The doctoral committee will comprise at least four graduate faculty members who hold doctoral degrees. The following rules apply to the composition of the committee:

- The committee chair must be from a discipline within the student's major area.
- At least one additional member of the committee must also be from a discipline within the student's major area.
- If an approved minor is declared, at least one (but no more than two) members of the committee must be from the minor area.
- At least three committee members must be members of the graduate faculty and be from a doctorate-granting department
- Only one member may be outside of the student's department.
- One member of the committee must serve as the dean's representative. In programs where more than one department participates, the dean's representative may not be from any of those departments. The dean's representative may be one of the following
 - the member from the related area
 - a member from the minor area
 - An independent member, not from the student's department, that is appointed by the Dean of the Graduate School.

Departments may structure committees that include more than the minimum number of members, as long as the following conditions are satisfied. No changes can be made to the doctoral committee membership without prior approval from the Dean of the Graduate School.

Additional voting and nonvoting members may be any person approved or appointed by the Dean of the Graduate School

All members of the committee will attend the comprehensive oral and final defense for the student's dissertation.

Program of Study

Students should file the Program of Study Form once they have:

- Completed 1 year of enrollment while at NMSU that are beyond the master's degree
- Successfully completed the qualifying examination

The Program of Study Form should be completed and submitted to the Graduate School before registering for any additional courses. The individualized program of study is designed to meet the campus residency requirement and includes a minimum of 30 graduate credits beyond the masters.

If the Doctoral degree requires a dissertation, at least 18 credits of dissertation work must be included. The professional doctoral degree includes a practicum or special project that culminates in a written report which demonstrates a command of the relevant scholarly literature and links it to the specific clinical or practical experience.

Comprehensive Examination

The Graduate School should receive the Program of Study and the Committee for Doctoral Students Form and the Doctoral Qualifying Examination Form.

Students will be admitted to the comprehensive examination only after the following conditions are met

1. Completion of adequate course work, to the satisfaction of the major department and the Graduate School
2. The graduate committee determines the student is adequately prepared for the examination
3. Successful completion of all language requirements (where applicable)

Students must be registered for 3 credits of graduate course work during the semester in which they take the comprehensive examination. A student taking an oral examination must enroll for at least one credit for that term (fall, spring, or summer terms).

The Doctorate of Philosophy Examination or Professional Doctorate Examination Form must be on file at the Graduate School at least ten working days prior to the proposed date for the examination. The examination must be part written and part oral. The oral examination results will be reported to the Graduate School by the Dean's Representative of the committee.

Any student who fails the comprehensive examination may either be terminated from the doctoral program or upon recommendation of the committee and approval of the Dean of the Graduate School, be granted a second examination after a lapse of at least one semester.

NOTE: Generally, there should be a time-lapse of at least one year between the comprehensive and final oral examination. However, due to the type of research required and the method of administering the written comprehensive in some departments, such a time lapse is not always practical. In all cases there must be one semester between the comprehensive and the final oral examinations.

Time Limit for the Comprehensive Examination

If more than five years have passed since the date of the comprehensive examination, the candidate will be required to take another comprehensive examination before admission to the final examination.

Advancement to Candidacy

Advancement to Candidacy recognizes that the student has demonstrated the ability to sustain a level of scholarly competency commensurate with the successful completion of degree requirements. Upon advancement to candidacy, the student is cleared for the final stages of the graduate program which may include a dissertation, project or written examination.

For advancement to candidacy the following criteria must be met

1. Successful completion of the comprehensive examination
2. Recommendation of the graduate committee
3. Approval of the Dean of the Graduate School

Upon receiving advancement to candidacy, students must establish residency and follow the Dissertation Registration Requirements (see Residency Requirements below).

Residency Requirements

The minimum campus residency requirements for the doctoral degree include enrollment in a minimum of 9 credit hours of program course work, including a minimum of 3 credit hours of dissertation, in at least two semesters of classes taught at NMSU. In some cases the minimum credit hour enrollment for the two semesters required to establish residency may vary based on the instructional delivery of the program, and must have prior approval from the Dean of the Graduate School.

Dissertation Registration during Fall/Spring Sessions

After becoming a candidate, students must continue to register for at least 3 credits of dissertation or graduate course work, each spring/ fall semester until the dissertation is approved by the Graduate School and the dissertation format review has been completed. The total number of dissertation hours must be 18 credits. The doctoral committee can impose additional requirements for courses numbered 700/7000.

A student who fails to abide by these regulations will be considered withdrawn from the university and in order to resume studies, must formally apply for readmission and satisfy the requirements in effect at the time of reapplication.

Dissertation Registration during Summer Sessions

If the final examination is to be held during the summer or the dissertation is to be completed during the summer, students must register for one credit during the summer session in which the final examination will be held or the dissertation will be completed.

Dissertation Leave of Absence

Students may seek a leave of absence from their dissertation. A leave of absence requires that a student must get prior approval from the Dean of the Graduate School, which means the student must receive permission for the leave of absence before discontinuing their formal studies.

Final Examination

NOTE: If more than five years have elapsed since the student passed the comprehensive examination, the candidate will be required to take another comprehensive examination before admission to the final examination.

Every student working toward the doctoral degree will submit a dissertation embodying the results of original research. The dissertation is expected to demonstrate the student's ability in independent investigation and to be a contribution to human knowledge. The dissertation shall display a mastery of the literature of the subject field, present an organized and coherent development of ideas with a clear exposition of results, and provide a critique of the limits and validity of the student's conclusions.

When a complete draft of the dissertation has been prepared, the student's doctoral committee (appointed after the qualifying examination) will conduct the final examination. The final examination is concerned primarily with the research work of the student as embodied in the dissertation, but it may be much broader and extend over the candidate's entire field of study. The intention of the final examination is to verify that the candidate has a satisfactory grasp of the major subject as a whole and has a general acquaintance with the fields of knowledge represented by the course of study. The final examination is oral and is open to the public.

Every student meeting the final examination qualifications must be enrolled in a minimum of 1 credit hour in order to defend. The final examination must be completed in accordance with the schedule provided in the academic calendar. Ten working days before the examination is taken the department must submit the form requesting this examination to the Graduate School. This form may be found by visiting the Graduate School website (<https://gradschool.nmsu.edu/Current%20Students/Graduate%20Forms.html>) and departmental offices.

Students must ensure that each member of the examining committee receives a copy of the dissertation, no later than seven working days before the date of the final examination.

Any candidate who fails the final oral examination may either be terminated from the doctoral program or upon recommendation of the committee and approval of the Dean of the Graduate School, be granted a second examination after a lapse of at least one semester. Failure in the second examination disqualifies the candidate from obtaining the degree.

Finalizing the Doctoral Dissertation

After successful completion of the final examination, electronic submission of the approved dissertation must be submitted to ProQuest ETD, no later than the deadline posted to the Graduate School website. The format review of dissertation will be performed electronically by the Graduate School. The form and style of the dissertation must comply with the regulations given in Preparing your manuscript for submission located on the Graduate School's website (<https://gradschool.nmsu.edu/Current%20Students/thesis-and-dissertation.html>). The dissertation is not complete until the required forms are received at the Graduate School. Required forms may be found here (<https://gradschool.nmsu.edu/Current%20Students/Graduate%20Forms.html>).

Registration

Registration at NMSU is a process that includes: (1) academic advising, (2) registering for classes, online or with your academic advisor, and (3) payment of tuition and fees. For first time freshman and transfer undergraduate students (at the Las Cruces campus), the registration process occurs during Aggie Welcome/Transfer Student Orientations. For currently enrolled Undergraduate students and all Graduate students registration occurs in collaboration with your advisor or online through the myNMSU portal. For detailed instructions and questions about registration which are not addressed on the website, please contact the University Student Records Office (USRO) (<https://records.nmsu.edu>).

Admission Requirement

No person will be allowed to register for courses until formally admitted to NMSU through the Community College, International Programs, Undergraduate or Graduate Admissions processes.

Class Schedule

Each semester and summer session, the University Student Records Office provides an online schedule of classes which can be accessed through myNMSU or the NMSU website. Note that not all courses listed in this catalog are offered every semester.

Registration Schedule by Classification

Several groups of students (e.g. Crimson Scholars, Students with Disabilities, Veterans) receive priority dates for course registration. For other students, registration dates are determined by the student's current classification at the time of registration. A student's classification is

determined by the number of credits completed, and does not include courses in progress. A student's classification depends upon the number of credits completed toward graduation. Sophomore classification is achieved with successful completion of 28 credits; Junior classification, 60 credits; Senior classification, 90 credits.

University Credits

The unit of university credit is the semester hour, which is based upon one hour of lecture class or a minimum of two hours of practice/lab per week during one semester, and assumes a minimum of two hours additional, by the student, outside of class. The number of credits associated with each course is indicated in the course schedule.

Course Load for Undergraduate Students

The full-time course load in a regular semester (fall or spring) for a main campus undergraduate students is 12-18 credits. A full-time course load for a summer term is 9-12 credits, with a maximum of 6 credits per session. Some scholarships have a 15 credit course load eligibility requirement. Each student is responsible for meeting their own scholarship eligibility requirements.

An overload is classified as more than 18 credits for a regular semester and more than 12 credits for the summer term. A one-credit course in physical education or supplemental instruction will not create an overload. Registration for a course overload requires written permission from an Associate Director of the Center for Academic Advising and Student Support (CAASS) or the Associate Dean for Academics in the student's academic college. A "Change of Schedule (https://records.nmsu.edu/_files/sro-forms/Change%20of%20Schedule%20Form.pdf)" form is required and available on the University Student Records Office website (<https://records.nmsu.edu>). Freshmen and students with a grade of D or F, or a cumulative grade-point average of less than 2.5, in either of the last two semesters, are not eligible for overloads. Concurrent enrollment in non-NMSU courses at other post-secondary institutions requires prior approval from the Associate Dean for Academics in the student's college, and these courses are counted as part of a student's class load.

Course Load for Graduate Students

A full-time course load in a regular semester (fall or spring) is 9 credits, with a maximum of 15 graded credits. A full-time course load for a summer term is 6 credits with a maximum of 9 credits.

Course Numbering

The course numbering system at NMSU indicated the levels as follows:

- 100-299/1000-2999 – Lower Division (Las Cruces and Community College Campuses)
- 300-499/3000-4999 – Upper Division (Las Cruces Campus)
- 450-499/4500-4999 – Senior and graduate courses (Las Cruces Campus)
- 500-799/5000-7999 – Graduate courses (Las Cruces Campus)

All undergraduate students must demonstrate Basic Academic Skills in both English and mathematics before enrolling in any upper-division course (numbered 300/3000 or higher). These requirements ensure that each student in the upper-division courses has the ability to succeed without compromising the learning experience of other students.

Class Delivery

Classes at NMSU are delivered in a variety of modalities. Students may see any of the following schedule types when viewing the class schedule through myNMSU or the NMSU website.

- **CL (Classroom/Lecture):** traditional in-person class meetings that occur on specified days and times in a specified location.
- **LB (Lab):** traditional in-person lab meetings that occur on specified days and times in a specified location.
- **HY (Online with In Person Meetings):** hybrid delivery that is offered both online and with required in-person class meetings that occur on specified days and times in a specified location.
- **ONL (Online with Synchronous Meetings):** online class meetings that require all students to meet virtually on specified days and times
- **WB (Online with no Synchronous Meeting):** online class meetings that do not require students to meet virtually
- **IND (Independent Meeting):** students and instructors schedule meetings on an as needed basis to discuss course content and student progress
- **TD (Thesis/Dissertation):** thesis/dissertation with implied meetings on an as needed basis to discuss course content and student progress
- **PC (Practicum):** practicum/clinical with implied meetings on an as needed basis to discuss course content and student progress

Prerequisites and Corequisites

Some courses require advance or concurrently acquired specific knowledge and skills. Prerequisite(s) and corequisite(s) for each courses are indicated in the course description section of this catalog. Students must have completed (or be presently enrolled in the prerequisite(s)) courses in order to register for a course with prerequisites. Where a student was allowed to register for a course while completing the prerequisite(s), and then subsequently fails to successfully complete a prerequisite course, the student shall be dis-enrolled from the course requiring the prerequisite. In the case of a corequisite, a student must enroll in the courses during the same semester. In some instances, where a course has an enforced "pre/corequisite" the student can elect to either take the requirement before registering for the course, or take the courses at the same time.

Registration Changes

Subject to any registration "holds" and any applicable deadlines, students may change their course registration online. Caution should be exercised as registration changes may negatively impact eligibility for scholarships, financial aid or athletic participation, the student's ability to progress through their degree program in a timely manner, and the student's obligations with respect to tuition and fees.

The University Student Records Office publishes an online schedule of "Important Dates for Students (<https://records.nmsu.edu/students/important-dates.html>)" for each semester. The student is responsible for reviewing and adhering to the Important Dates, including the deadlines to add, drop or withdraw from course(s) for the relevant semester.

Adding Courses: There are two different types of deadlines for adding courses:

1. **Last day to add a class without instructor's signature** - during this period courses may be added online through myNMSU, or through your academic advisor (if necessary).

2. **Last day to add a class with instructor's signature** - during this period courses may only be added with either the "Change of Schedule (https://records.nmsu.edu/_files/sro-forms/Change%20of%20Schedule%20Form.pdf)" form signed by the instructor (available online on the University Student Records Office website (<https://records.nmsu.edu>)). Or students taking classes online and who do not live in the Las Cruces Area must email the instructor, using the NMSU email, in order to get permission to be added to the course. If the instructor approves the addition, the approved response must be sent to either the student's academic advisor or to record_grade@nmsu.edu with the student's name, ID number and course CRN number they are wanting to add.

Withdrawing from Courses: There are two different types of deadlines for withdrawing from courses:

1. **Last day to drop without a "W" grade** – during this period, the student can drop the course and not have it appear on their official transcript in any form, and the student will have no financial obligation related to the course (students will receive a 100% refund if tuition has been paid for the course).
2. **Last day to drop with a "W" grade** – during this period, the student can withdraw from the course, but the course will appear on their official transcript with the withdrawal (W) designation as the grade, and the student will be responsible for the full tuition and fees related to that course.

Students are responsible for initiating official withdrawal from any course(s) they do not intend to complete. Students who experience extraordinary circumstances that prevent timely registration changes should consult with their Academic Associate Dean or the Registrar. For more information about the process for adding or withdrawing from a course(s), please speak with your academic advisor or contact the University Student Records Office.

Any student attending under Veteran Educational Assistance must notify the Military and Veteran's Programs office before processing registration changes to determine if changes will affect their enrollment status or benefits.

A student found insufficiently prepared for a course they are enrolled in may be transferred to a more elementary course in the same subject any day before the last day to withdraw from an individual course.

Waitlisting

Waitlisting is available for all courses across the NMSU system, except for labs that are linked to a specific lecture class. Waitlisting is an electronic list of students who are waiting to register for a filled course. Once students are put onto the waitlist, the process to get into that course is as follows:

1. A currently enrolled student must drop the course for a seat to become available.
2. The first student on the waitlist is notified through their NMSU email.
3. The notified student has 24 hours to log in to their myNMSU and register themselves for the class.
4. If the first student fails to register within their allotted 24 hours, then the first student is dropped from the waitlist and the next student on the waitlist is notified. This continues until the empty seat is filled.

A student who fails to register for the class during their allotted 24 hours is automatically dropped from the waitlist and can add themselves back onto the bottom of the waitlist for that course.

Students cannot be added to the waitlist after the first day of classes. Instructor overrides can only be made after the second day of class, at which point the instructor's signature is required on either the "Change of Schedule (https://records.nmsu.edu/_files/sro-forms/Change%20of%20Schedule%20Form.pdf)" form to add a course.

Graduate Registration Requirements for Summer

Students who have scheduled their final examination, or who are completing their thesis during a summer session, must be registered for one credit hour during the same summer session. In order to graduate during a summer session, the student must have filed the Application for Degree by the deadline posted on the Academic Calendar.

Repeating Courses for A Change in Grade

See the Grading portion of the Academic Regulations section of this catalog.

Substitutions and Waivers

Students registering for their final semester must have all course substitutions and/or waivers of degree requirements approved before two weeks after the last date of registration for full or summer terms.

Auditing a Course (No Credit)

An audited course is one in which the student registers for the learning experience but does not seek to earn academic credit for the course. A student seeking to audit a course must register and pay tuition and fees for the course and have the consent of the instructor to take the class in audit form. A student who has registered to audit a course may be dis-enrolled from the course at any time before the registration deadline expires if necessary to accommodate a student taking the course for credit. After the last day to register, the student cannot change the course option from audit course to a for credit bearing course.

Audited courses are not used in determining a maximum class load (overload) for undergraduate students in good academic standing, however, the audited course will be counted as part of the maximum allowable course load for graduate students and undergraduate students who are on academic probation.

Academic Performance and Progress Attendance and Student Performance

Academic success is closely correlated to student participation and attendance. Accordingly, students are expected to attend all their classes regularly. Each course instructor will establish the specific attendance and course requirements via the course syllabus. Only students who are currently enrolled in a course for either credit or audit are permitted to attend the classes officially. However, individual instructors may allow an occasional visitor and may allow a student who formally withdrew from the course to continue to participate for the remainder of the semester.

Absences from Class and Failure to Complete Assignments

Students who must miss class due to accident, illness, or other circumstances beyond their control should consult the course syllabus and the instructor for guidance. Students may be administratively withdrawn from a course due to excessive absences (consecutive absences in excess of the number of class meetings held within a week or any number of absences, including failing to use the online Learning Management System, which are impairing the student's performance), or for persistent failure to complete assignments. In such cases, the Instructor may recommend administrative withdrawal by providing the Academic Associate Dean a completed "Student Absence/Lack of Progress Report" form. If the Academic Associate Dean agrees with the recommendation of the course instructor, the student will be administratively withdrawn from the course. To appeal the decision, see the Administrative Withdrawal (p. 48) section.

Any absences due to the student's participation in a university-sponsored event (e.g. ASNMSU president representing NMSU at legislative session, student-athletes competing in NMSU scheduled athletic events, or students attending educational field trips and conferences) will be excused and deemed an "Authorized Absence". Authorized absences do not relieve the student of the course assignments or responsibilities and instructors may require students to complete course work before the absence. Before the student's absence, the student will provide the instructor(s) with written notice of the dates of expected absence.

Classroom Conduct

Each instructor has the authority to establish and enforce reasonable rules of conduct in their courses. A student who engages in behavior that interferes with the educational environment of the class may be administratively dis-enrolled with the approval of the academic Department Head and Academic Associate Dean for the course, and with notification to the Provost. Any student who has been administratively dis-enrolled from a class may appeal that decision to the Dean of the College where the course was offered within ten days after notification of the dis-enrollment.

Student Performance Assessment

Individual student performance and learning outcomes in a course are measured and evaluated by the course instructor and reported to the student in the form of grades. Each instructor has the authority to establish assignments and other assessments (such as exams and quizzes) and assign grades based on the student's performance. The instructor determines the final grades for the course and reports to the University Registrar as described in the grading section of this catalog. Any student who believes that their academic performance has been evaluated unfairly may appeal the grade through the University's Academic Appeals process (<https://report.nmsu.edu/decision-tree/>) as provided in this Catalog.

Academic Program Assessment

New Mexico State University is committed to providing its students with a quality education and a supportive learning environment. Academic Program Assessment is a continuous improvement process achieved by identifying a program's desired learning outcomes, evaluating the extent to which students in the program collectively achieve those outcomes, and then implementing changes to enhance and improve the collective

program outcomes. For assessment to be effective, students must be actively aware of and engaged in assessment activities.

Academic Program Assessment requires participation of students who are expected to provide feedback on personal, professional and academic development and to participate in a variety of assessment exercises. Assessment activities may be a part of regular graded course assignments, or may require students to engage in other activities as outlined in the course syllabus. Assessments may include course projects, exams, exit interviews, standardized tests, surveys, focus groups, etc. Data gathered through these assessments is published only in aggregate form. Learn more about NMSU's Academic Program Assessment at <https://assessment.nmsu.edu/>

Exam Week and Final Examinations

NMSU designates the last week of each semester as "Exam Week" during which each course has only a single 2 hour meeting time for a mandatory culminating activity which may be a final examination or some other course-related activity. The University Student Records Office (USRO) establishes the Final Examination Schedule (<https://records.nmsu.edu/students/final-examination-schedule.html>) for each semester. Examinations are typically held in the course's standard lecture/lab room. Some departments hold Departmental Exams where all students for all sections of a particular course must take the final examination simultaneously. The Final Examination Schedule indicates the Department Exam dates, times, and location. For courses not scheduled to meet at the specific times listed under "Regular Class Time" on the USRO's Final Examination Schedule, the instructor and course department coordinate examination dates, times and locations with NMSU's Academic Scheduling office (575) 646-4790. Final exams for weekend courses are held during the regular class period on the last day of class.

The final exam or culminating activity must not be rescheduled for a different date, time or location, except with the department head's permission and the enrolled students' unanimous consents. During the week before Exam Week, instructors cannot hold examinations lasting more than one class period.

Any student having more than three examinations scheduled in any one day may, no later than the week before exam week, notify the instructor of the examination scheduled latest in the day to obtain an alternative date for that examination. (If the fourth exam is a departmental exam, the instructor of the third exam will make alternate arrangements for that exam upon request.)

Students who believe that their instructor(s) have not honored Exam Week requirements may appeal to the instructor's department head.

Developmental Evaluation

The academic skill level of all entering first-time students at the time of registration is evaluated based on ACT scores, SAT scores, and/or alternative placement assessments. The student's eligibility to enroll in university-level English and Mathematics courses depends on this evaluation. Students without adequate preparation for university-level courses must take developmental courses. Developmental courses are included on the transcript and will be included in the calculation of the GPA, but the developmental course credits do not count towards a degree.

Basic Academic Skills

All undergraduate students must demonstrate Basic Academic Skills in both English and mathematics before enrolling in any upper-division course (numbered 300/3000 or higher). These requirements ensure that each student in the upper-division courses has the ability to succeed without compromising the learning experience of other students. The completion of the Basic Academic Skills requirements **does not necessarily result in the award of academic credit nor satisfaction of university general education requirements** in English and mathematics. (Students should consult the General Education Courses and Requirements section in this chapter for these requirements.)

Transfer students with 45 or more credits are allowed to enroll in upper-division courses for only one semester before satisfying the Basic Academic Skills requirements. The Basic Academic Skills requirements may be satisfied in a variety of different ways as listed below:

English Basic Skill Demonstration Options (achieve one of the following):

- ACT English Score of 30
- Coursework - ENGL 1110G, or equivalent, completed with a grade of C- or higher.

Equivalents: the following are deemed equivalents to ENGL 1110G for the purpose of satisfying Basic Academic Skills in English:

- ENGL 1110H – completed with a grade of C- or higher
- ENGL 1110M - required for International students who took the TOEFL examination
- CLEP Exam score of 57 or higher in freshman college composition
- English Advanced Placement (AP) Exam score of 3, 4, or 5
- English Composition Transfer Credits - 3 or more credits with a grade of C- or above, transferred from accredited post-secondary institutions (International students may be required to take ENGL 1110M Composition I Multilingual as noted above.)

Credits from Non-accredited Institutions - As a general rule, NMSU does not accept credits from non-accredited institutions. Students with 3 or more credits of college-level English composition with a grade of C- or higher from a non-accredited institution may, however, challenge the Basic Academic Skills requirement in English and ENGL 1110G Composition I course requirement by submitting a theme paper written under the supervision of, and demonstrating achievement of ENGL 1110G Composition I learning outcomes as determined by, the Department of English.

Mathematics Basic Skill Demonstration Options (achieve one of the following):

- ACT Mathematics Score of 23
- Coursework – any one of the following courses or course combinations completed with a grade of C- or higher in each course:
 - MATH 1130G Survey of Mathematics
 - MATH 1215 Intermediate Algebra
 - MATH 1220G College Algebra
 - Any mathematics course numbered 1250G or above (prefix MATH) excluding MATH 1996 Topics in Mathematics and MATH 2992 Directed Study

- Basic Skills Exam Passing Score - offered twice a semester by the Department of Mathematical Sciences
- Calculus AB, Calculus BC or Statistics Advanced Placement (AP) Exam score of 3, 4, or 5

IMPORTANT NOTE: Basic Academic Skills Demonstration fulfillment options may not appear on the transcript, result in the award of academic credit, or satisfy general education requirements. The Basic Academic Skills requirements are used solely to determine eligibility for enrollment in upper-division courses. All students should seek to complete the Basic Academic Skills requirements as early in their academic program as possible. Students who postpone completing Basic Academic Skills may be unable to progress toward degree completion in a timely manner.

Independent Study and Directed Reading Courses

Independent study courses and directed reading (other than those designated in the catalog with a subtitle), are for students capable of and sufficiently motivated to undertake self-directed study with limited oversight of a faculty member. Only students who have completed at least 28 credits at NMSU under traditional grading, with a cumulative GPA of 2.5 or better, can enroll in independent study courses. No student is entitled to enroll in independent study and enrollment requires the consent of an instructor who agrees to supervise and evaluate the student's learning activities in the course. Students seeking registration in an independent study course should prepare an independent study proposal to present to the individual faculty member(s) in the relevant discipline for consideration. At a minimum, the proposal should include the topic of study, a brief survey of the literature or other resources on the subject, and a description of the proposed written product or another tangible outcome of the independent study. The relevant academic department for the discipline may have additional requirements. Each college determines the maximum number of credits that may be earned in independent study courses.

Adjusted Credit Option

The adjusted credit option provides eligible undergraduate students who earned a low grade-point average (less than 2.0 cumulative) during their first few semesters to reset their GPA calculation. This option may be used only once and is not reversible. These are the consequences of exercising the Adjusted Credit Option:

1. All of the student's academic history pre-dating the request, including all NMSU course credits previously attempted or completed, transfer coursework, CLEP, ACT, advanced placement, special examination, and/or military service are included in the adjustment and designated as "ADJUSTED CREDITS" on the transcript. These credits are no longer included in the cumulative grade point average calculation.
2. Courses carrying an academic grade of S, CR, C- or better, earned prior to the grading period in which the student requested this option, are treated as earned academic credit and need not be repeated, except where a higher grade is required in the student's academic program.
3. Courses carrying an academic grade of U, CD, D or F, earned prior to the grading period in which the student requested this option, remain on the student's transcript, but no academic credit is provided for these courses. The student must repeat these courses to obtain academic credit.
4. The student's academic transcripts will continue to reflect all coursework, including courses falling under the adjusted credit

option. In no circumstances will a transcript be issued that does not include all courses attempted at this university.

5. The student's current academic status, eligibility for employment, and financial aid may be impacted. Probationary status and eligibility for on-campus employment are not affected by the exercise of the adjusted credit option.
6. The repeat rule for courses starts anew.
7. The student will not be eligible for the award of an associate degree until earning thirty (30) or more additional credits after exercise of the Option.
8. The student is eligible for University honors at graduation upon completing a minimum of 60 academic credits at NMSU, after the adjusted credit option is exercised, with a resulting grade point average that satisfies University regulations for honors.

After carefully considering the consequences indicated above, eligible students may exercise the Adjusted Credit Option by paying a fee of \$10 and submitting an adjusted credit option application to the University Student Records Office. Application forms are available on the University Student Records Office website and can be approved by the Director of the Center for Academic Advising and Student Support or the Associate Dean for Academics in the student's college or the Academic Vice President at the Community Colleges. Only students meeting the following criteria are eligible to exercise the Option:

1. No awarded baccalaureate degree
2. Enrolled as a degree-seeking or non-degree undergraduate student
3. A cumulative grade-point average of less than 2.0 at NMSU
4. Fewer than 60 credits accumulated (including both transfer and NMSU credits)

Credit by College Level Examination Program (CLEP)

Before or during a student's enrollment at NMSU, credits may be earned through the College Level Examination Program (CLEP) of the College Entrance Examination Board. CLEP is a national program of credit by examination that offers the opportunity to earn credits for college-level achievement wherever or however the student learned. Earned CLEP credit will be treated as transfer credit without a grade, will count toward graduation, and may be used in fulfilling specific curriculum requirements. A current NMSU CLEP policy and test schedule information is available through Testing Services DACC East Mesa, RM 210. Testing Services may be reached at: (575) 528-7294.

Credit by Examination

Any enrolled student with a cumulative GPA of at least 2.0 currently attending classes may, with permission of the appropriate department, challenge by examination any undergraduate course in which credit has not been previously earned except an independent study, research or reading course, or any foreign language course that precedes the final course in the lower-division sequence. The department in which the course is being challenged shall determine the manner of administering the examination and granting permission. Students may not enroll in a single course, challenge it by examination, and drop it during the drop/add period, unless they enroll in an additional course. In exceptional cases in which a student demonstrates outstanding ability in a course in which they are already registered, they may be permitted to challenge the course. A student desiring to apply for special examination may obtain the necessary forms from the University Student Records Office. The fee

for challenging a course is the same as the approved tuition rate. Courses may not be challenged under the S/U option. The special examination privilege is based on the principle that the student, exclusively, has the responsibility for preparing for a special examination.

Credit for Military Service

New Mexico State University will award academic credit to United States military personnel for courses and Military Occupational Specialties (MOS), based on the American Council of Education Guide (ACE) as well as through national standardized tests, such as CLEP, AP, PEP and DANTES. Credit for military training is in accordance with NMSU Faculty Senate Legislation Proposition 24-07/08, which was passed in May 2008. Military Training and Military Occupational Specialties (MOS) must have a recommendation evaluation by ACE (in the ACE Guide) for credit to be awarded. Courses accepted for transfer credit become part of the student's official NMSU transcript and academic record. If a student wishes to appeal a decision regarding the acceptance of military training/education and/or MOS for academic credit, the student must submit a written statement of appeal to the Dean of the College to which the student has applied. The Dean will review the merits of the appeal and render a decision. The decision of the Dean is final.

Only Primary MOS (s) are eligible for academic credit in the initial review and evaluation. Credit for Duty and/or Secondary MOS may qualify for academic credit if the student petitions the college's Academic Dean. Primary MOS is the primary specialty of a soldier and reflects the broadest and most in-depth scope of military experience. Veterans, active-duty personnel, National Guard and Reservists who are current students or students applying for admission to New Mexico State University may be granted academic credit on a case-by-case basis upon evaluation of military transcripts - the Joint Service Transcript (jst.doded.mil) and the Community College of the Air Force transcripts. Course equivalencies and credit hours awarded for a particular NMSU degree are determined by colleges and/or academic departments. Credit hours may be awarded for specific courses toward degree requirement, or as elective credit. The number of credit hours awarded will be determined by the college and/or academic department.

NOTE: Students submitting military transcripts for credit evaluation must keep in mind the Maximum Time Frame policy. See Financial Aid (p. 71) Section.

Graduate Course Deficiencies

Students admitted with departmental deficiencies may be required to take diagnostics tests and additional qualifying examinations. They must complete satisfactorily, in a manner specified by the major department, all undergraduate course deficiencies as prescribed by the department responsible for the graduate program. Courses taken to satisfy deficiencies will be listed on the undergraduate transcript; however, these course grades will not be calculated in the student's graduate GPA or graduate hours. With the permission of the student's advisor and the head of the department, courses to meet undergraduate deficiencies may be taken under a S/U option (with S being a grade satisfactory to the professor), and such courses will not affect the maximum number of S/U graduate credits permitted.

Short Courses for Graduate Students

Short course(s) that are numbered 450/4500 and above have been approved to carry graduate credit. Graduate students must be registered for the short course(s) to receive graduate credit. Concurrent enrollment of graduate students in regular and short courses for the fall/spring

semesters is allowed, provided the combined total credits does not exceed 15. All short courses carrying one-semester credit will be graded on a S/U basis, and these credits will be counted toward the student's limit of S/U credits.

Challenging Graduate Courses

A graduate student may challenge a graduate course by examination, please see the Graduate School for more information.

Grading University Grading System

Each course department or instructor establishes the system for assessing student performance in achieving course learning objectives. Students should consult the course syllabus for a description of the grading system used in each course. At the conclusion of each course, instructors are required to report a final grade reflecting the instructor's assessment of each student's performance. Shortly after the end of the term, students can access their grades through the MyNMSU portal. No other grade notification will be issued. The final grade is reported on the student transcript. Instructors may elect whether to use fractional grading (the use of the plus and minus) in assigning final letter grades.

The NMSU system for final grades is expressed in letters, which carry grade points that are used in calculating the cumulative grade-point average, as shown in this table:

Letter Grade	Grade Points per Unit of Credit
A+	4.0
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	2.0
D+, D, D-	1.0
F	0
W- Withdrawal	0
N- Grade not submitted	0
CR- Credit authorized, but not letter grade	0
IP- In progress	0
RR- Progress in undergraduate course	0
PR- Progress in graduate thesis	0
S- Satisfactory work ¹	0
U- Unsatisfactory work	0
I- Incomplete work	0
AU- Audit	0

¹ S grades are grades that are satisfactory to the professor and are normally equivalent to the letter grade of C- or higher.

Any courses for which only CR, S or PR is awarded, but no traditional letter grade is given, will be included in the total number of earned hours

but is not computed in the grade-point average. Traditional letter grades are those which are used in the grade point average determination: A+, A, A-, B+, B, B-, C+, C, C-, D+, D, D- and F. In computing the overall grade-point-average, the total credits in which grades of A+ through F have been assigned is divided into the total number of grade points earned.

Midterm and Six-Week Early Performance Grades

A Six-Week Early Performance Grade (sometimes referred to as Midterm Grade) for courses numbered 100/1000-299/2999 will be posted and available to students through the MyNMSU portal. The purpose of the early grade posting is to ensure that students have an opportunity to address any performance issues. Students should be mindful that the Six-Week Early Performance Grade reflects a students' performance on only that portion of the total coursework that has been graded at that time. Any student who is doing poorly, or not as well as they would like, should meet with the instructor to discuss how they can improve. Students who have concerns about their progress in multiple courses or who are considering withdrawal from course(s) must meet with their academic advisor.

In courses numbered 300/3000 or higher, the posting of Early Performance Grades is optional and may occur through the online course management system rather than the MyNMSU portal. However, prior to the last day to withdraw from a course, upon request, instructors will provide information to students about their progress in the course.

Retention of Grading Records

Individual assignments and exams that are not returned to students should be retained by the instructor or department through the end of the subsequent regular semester. The records used to compute individual final grades should be retained for two years after the completion of a course. If a final grade is appealed, these records are kept for at least two years after the completion of the appeal. Departments, colleges, or the library may require that records be kept for longer periods.

Minimum Grade Requirement for Undergraduate Students

Undergraduate degrees require a cumulative GPA of 2.0 or higher for degree completion. Although D+, D, or D- can be considered passing, some departments have higher grade requirements for the courses within their program and/or their program as a whole. Students should check with their departments regarding specific course grading requirements for their particular degree program.

Minimum Grade Requirement for Graduate Students

Graduate degrees require a cumulative graduate G.P.A. of 3.0 or higher. Although B- and C grades (including C+ and C-) earned at NMSU may be counted toward the requirements for a graduate degree in some programs, this grade does not reflect acceptable graduate-level performance and may cause the cumulative G.P.A. to fall below the 3.0 required for graduate students. Some departments have higher grading requirements for courses in their programs. Students should check with their departments regarding specific course grading requirements for their particular degree program.

Courses in which a student earns a D or F grade do not ever satisfy graduate degree requirements; however, these grades will be calculated

in determining the students' cumulative grade-point average. To obtain academic credit, students must retake courses in which a grade of D or F was earned.

S/U Grading

S/U grading allows the student to attempt to earn course credit without having a course grade included in their grade point average calculations. Under S/U grading, the instructor assigns an S grade for satisfactory achievement of the course learning objectives (normally equivalent to the letter grade of C- or higher) and a U grade for unsatisfactory performance in the class.

Designated S/U Courses

Each academic college may designate courses in which the grading will be on the basis of S or U for all students enrolled in the courses. Credits in designated S/U courses are not included in the limitations on the number of S/U credits a student may take and are not subject to the student eligibility requirements described below.

Election of the S/U Grading Option - Undergraduate Students

In courses other than those designated as S/U for all students, eligible individual students may elect the S/U Grading Option, subject to the regulations stated below. To be eligible for the S/U (satisfactory/unsatisfactory) Grading Option, undergraduate students must meet the eligibility requirements and obtain the approval of an academic advisor. Eligibility requires the completion of 28 credits at NMSU under traditional grading, with an overall average of 2.5 or better. (Upon approval of the adjusted credit option, students must re-establish eligibility.) Non-degree seeking students may take courses under the S/U option without regard to eligibility requirements. However, these courses may not be subsequently applied toward an undergraduate degree at NMSU.

The S/U option must be elected as part of the course registration and may not be added once the course registration period closes. Other than honors courses and courses officially designed as S/U, the following limitations apply to courses in which the S/U option is elected:

1. No more than 7 credits per semester or 4 credits per summer session.
2. Not to exceed a total of 21 credits towards a degree.
3. Not a required course for the student's major.

Students electing the S/U option should be mindful that upon a change of majors, the new major department may require a traditional grade for a course within that major that was previously completed with an S grade. In such cases, the student may request that the original instructor process a change of grade form to apply a traditional grade, however, if more than 2 years have elapsed or if the instructor is no longer at NMSU, such a change will not be possible and the student may be required to retake the course or obtain a traditional grade through a course challenge.

Election of the S/U Grading Option Election - Graduate Students

With approval from their advisor and department head, graduate students in good academic standing may elect the S/U option, at the time of registration, for courses taken outside the major department, subject to the regulations stated below:

1. No more than a total of 6 credits of elected S/U courses are permitted in the master's degree.
2. Doctoral candidates may take an additional 6 credits under the S/U option after application to candidacy.

I Grade Designation

The letter grade of I (incomplete) is given for passable work that could not be completed due to circumstances beyond the student's control that develop after the last day to withdraw from the course. In no case is an I grade to be used to avoid assigning D, F, U or RR grades for marginal or failing work. Examples of appropriate circumstances include documented illness, documented death or crisis in the student's immediate family, unexpected military deployment and similar circumstances. Other job-related circumstances are generally not appropriate grounds for assigning an I grade. Students requesting an I grade are responsible for providing satisfactory evidence of such circumstances. (In the case of medical records, instructors should review the information provided, note that adequate medical documentation was provided for review, and return the documentation to the student. Under no circumstances should the instructor retain any medical records or indicate the specifics of any medical condition in the academic records.) The refusal to grant an I grade may be appealed in the same manner as any other final grade.

To assign an I grade, the instructor must complete the "I grade Information Form (https://records.nmsu.edu/_files/sro-forms/I%20Grade%20Information%20Form.pdf)" by the deadline for final grade submission in the semester the student was enrolled in the course, and have the form delivered to the associate dean of the course college. The instructor must indicate on the form whether the student will be given the option to complete the remaining coursework and have the I grade changed to the earned letter grade. If so, the instructor should indicate the steps necessary to complete the remaining coursework. The I grade form should either be signed by the student in person or digitally, or the associate dean must send a copy of the document to the student's official permanent address or university email address, as recorded in the University Student Records Office, with a notation on the form that the student was not available for signature.

The I grade will be permanent in instances where (1) the instructor did not provide an option to complete the coursework, (2) the instructor left NMSU before completion of the coursework and grade change, or (3) the student failed to complete the coursework by the relevant deadline, and the instructor did not indicate that the I grade would be changed to the earned grade upon failure to complete. In such instances, the student will be required to re-enroll in the course to receive credit (in which case the permanent I grade and the subsequently earned letter grade will both appear on the transcript).

The student is entitled to have the I grade removed from the transcript only if, within 12 months or any earlier deadline established by the instructor on the "I Grade Information Form" and before graduation, the student completes the remaining coursework, as specified on the I Grade Form, in a manner satisfactory to the instructor. If the student fails to complete the coursework, the instructor may change the I grade to any appropriate grade (including D, F, or U) only if the instructor stated that this would occur on the "I Grade Information Form." The instructor should assign whatever grade was earned for the entire course.

To change the I grade, the instructor must complete a "Change of Grade Form," obtain the signature of the associate dean for the course, and submit the form to the University Student Records Office.

RR Grade

The RR grade may be assigned only in undergraduate developmental courses (CCDE, CCDL, CCDM & CCCR) and indicates that the student has made substantial progress toward completing the requirements of the

course. It carries neither penalty nor credit, so a student must re-enroll and successfully complete the course in order to earn credit. The grade of RR may be received only once in any given course, and is a permanent notation on the student's transcript.

W Grade Designation

The W grade is assigned only in courses when the student withdraws or is administratively dis-enrolled from the course after the last day to drop the course. The W grade is permanent.

Effect of Change of Grade

The effect of a change of grade on a student's academic standing (academic warning, probation or suspension) depends on the date the transaction is officially recorded on the student's academic record. If the transaction is recorded before the student begins another semester, the grade change (such as replacing the I grade with an earned grade) is included in the grade-point average calculation to establish the student's academic standing. If the transaction is recorded after the student begins another semester, for the purpose of calculating academic standing, the new grade is included with any other grades earned for the semester in which the grade change is processed.

Repeating Courses for a Change in Grade

Undergraduate students: may repeat courses, for a change in grade, when the original grade earned was a D or F. Las Cruces Main Campus students are not allowed to count repeated courses towards the minimum 15 credits required to retain merit-based institutional scholarship. Once a grade of C- or better is earned, the course will then be substituted in the calculation of the grade-point-average and students will no longer be able to repeat that course for change of grade purposes. Student transcripts will continue to show the grade awarded for each course attempt. If the student's original grade was a D and he/she repeats the course, but receives a F, the second grade will not be substituted for the original.

Graduate students: may repeat courses to achieve a higher grade, but the grade assigned for each attempt will remain on the transcript and will be counted in the grade point average calculation.

Grade Point Average

Grade point average (GPA) calculations are based solely on courses taken at NMSU or under an approved National Student Exchange.

Grading in Graduate Research

In grading both master's and doctoral research, thesis and dissertation work in progress, the instructor reports for each enrollment period the grade PR (progress) or U (unsatisfactory) rather than a traditional letter grade. These assigned grades are permanent notations on the student's transcript. Only those credits graded PR (Progress) accumulate toward the minimum number of research credits required.

PR indicates that the student has devoted an adequate amount of time to the work scheduled but does not indicate the quality. U indicates that the student has stopped work or is doing work of unacceptable quality.

At the conclusion of the final oral examination, or when the thesis/dissertation is submitted for the final signature of the graduate dean, the instructor will report the final S or U grade for that semester. If the thesis/dissertation and the performance in the final oral examination are found to be acceptable, the instructor will report an S (satisfactory) grade. If the thesis/dissertation or the performance in the final oral examination is

found to be unacceptable, the instructor will report an U (unsatisfactory) grade.

If a student accumulates a total of two U (unsatisfactory) grades in courses numbered either 599/5999, 600/6991, 700/7000, or any other graduate level project/research type courses with S/U grading, the student will be placed on provisional status. If three U (unsatisfactory) grades are reported for these courses, the student will be dismissed from the Graduate School.

Withdrawals

For more information regarding how withdrawals impact tuition refunds, please see the Tuition, Fees & Other Expenses (p. 70) section of the catalog.

Withdrawal from a Single Course

Any student wishing to formally withdraw from a single course, after the last day to drop has passed, can do so through their Academic Advisor or the University Student Records Office. All such withdrawals will be registered on the student's transcript with the "W" grade indication.

For students wishing to withdraw from all courses, please see the section on Withdrawal from NMSU.

Leave of Absence from the Graduate School

Students working on advanced degrees and planning to have an interruption in studies for a calendar year should request a leave of absence through their department head. The student must submit a formal letter through their department head to the Dean of the Graduate School, an email will not be accepted. The request should include the beginning date and the anticipated ending date for the period of absence.

A graduate student on leave of absence will be expected not to use university facilities and place no demands upon the university faculty and staff, and, therefore will pay no fees. Time spent in the "leave-of-absence" status will not be counted toward the advanced degree time limits.

A graduate student who fails to register for one calendar year without obtaining a leave of absence from the Graduate School will be considered withdrawn from the university, by the Graduate School. In order to resume their studies after such absences, the student must go through the formal readmission process.

Administrative Withdrawals

If a student has stopped attending class without formally withdrawing, stopped using the online Learning Management System, or has a history of persistent unexcused absences or failures to complete assignments, the University reserves the right to remove the student from the class by means of an administrative withdrawal. An administrative withdrawal may be requested under the following circumstances, excluding absences through University policy:

1. At the beginning of the semester, if a student misses the first two (2) class meetings or online activities.
2. At any point in the semester, if a student misses four (4) consecutive class meetings or online activities.
3. If over the course of the semester, the student persistently fails to attend class or fails to complete assignments.

Except in documented cases of persistent unexcused absence/nonparticipation, administrative withdrawals will not be used to avoid the assigning of D, F, U or RR grades for marginal or failing work. Administrative withdrawals are subject to the same refund rules as student-initiated withdrawals (100% refund prior to census and no refund after census).

To request consideration for an administrative withdrawal, the instructor must complete the Student Absence/Lack of Progress Report (https://records.nmsu.edu/_files/sro-forms/Student%20Absence%20or%20Lack%20of%20Progress%20Report%20-%20Administrative%20Withdrawal.pdf), found on the forms page of the University Student Records Office webpage, and route for approvals as soon as a pattern of non-attendance/non-participation is established. The University Student Records is ultimately responsible for processing the administrative withdrawal. The form is to be submitted as soon as the pattern of persistent absence/nonparticipation is established. Normally it will be submitted no later than one week after the deadline for a student to withdraw themselves from the course.

Upon receipt of a fully approved Student Absence/Lack of Progress Report, from the Dean's Office, the Student Records staff will notify the student that they will be withdrawn from the class within 48 hours unless they appeal the action. This notification will be sent to the student's official NMSU email address. Students wishing to appeal the administrative withdrawal, should reply to the Student Records' notification email, with a valid reason for non-attendance / non-completion of coursework, within 48 hours of the email delivery time stamp.

If the appeal circumstances are determined reasonable and accepted, the student will not be withdrawn from the class and will be expected to actively participate in all future meetings and coursework. The Student Records Office will notify the instructor, Department Head and Associate Dean of the determination, via official NMSU email.

When an administrative withdrawal is initiated for a student who is representing the university at an official out-of-town event any administrative withdrawals will become effective upon the student's return from the event or five days after the drop slip fully approved form is submitted to the Student Records Office.

Military Withdrawal

New Mexico State University understands that our military students may be called to active duty, specialized training, or disaster relief efforts with little notice. U.S. active duty military students wishing to withdraw from all their classes must present their orders and their request for full withdrawal, as indicated below. However, the below policy does not pertain to a student's basic and/or annual training. A student who has an order for training is encouraged to formally request, through the proper military chain of command, a postponement of their orders until the summer or the end of the semester they are currently enrolled in. If a student's request for postponement is denied, the student may then follow the steps below but must provide documentation that their postponement request was formally denied.

All NMSU students that have been called for active duty must take the following steps to withdraw from all their classes:

1. **Military and Veterans Programs (MVP):** TA/VA students ordered to Active Duty must provide a copy of orders to the MVP office, in Corbett Center Student Union, Room 244, or by email mvp@nmsu.edu. To assist in reporting accurate information to their

military service or the VA Regional Office, the student should also provide, in writing, the last day of class attendance.

2. **NMSU University Student Records:** All students presenting their orders to the University Student Records Office, (575) 646-3411, or records@nmsu.edu, will receive a military withdrawal from classes and full tuition and fees refund for that semester.
3. **Bookstore:** Students who still have their receipts for textbooks purchased the semester in which they are called to active duty will be given a full refund for these textbook purchases when they present their orders. Please contact the bookstore for assistance at (575) 646-4431 or nmsu@bkstr.com.

Military Readmission Policy

New Mexico State University (NMSU) acknowledges that students may be temporarily unable to attend classes or be required to suspend their studies in order to perform military service. NMSU encourages such students to resume their education once a military service obligation has ended and adopts this policy to ensure the timely readmission of such students.

In accordance with federal regulations, 34 C.F.R. § 668.18 and the Department of Defense (DoD) Voluntary Education Partnership Memorandum of Understanding (MOU), the university will promptly readmit service members who seek readmission to a program that was interrupted due to a uniformed service obligation.

Eligibility

This policy shall apply to (1) service members who are unable to attend classes for more than 30 consecutive days, and (2) service members who are unable to attend classes for less than 30 days when such an absence would result in a withdrawal from NMSU.

A student is eligible for readmission under this policy if, during an absence, the student performs uniformed service, voluntary or involuntary, in the Armed Forces, including the National Guard or Reserve, active duty, active duty for training, or full-time National Guard (under federal authority). The cumulative length of all absences for uniformed service (service time only) must not exceed five years.

Notification of Military Service

The student (or an appropriate officer of the armed forces or official of the Department of Defense) must give written notice of such service to the school as far in advance as is reasonable under the circumstances. Such notice does not need to indicate when the student will return to NMSU.

Notification of Intent to Return

The student must also give written notice of Intent to Return and supporting official military obligation documentation to University Student Records within three years after the completion of the period of service.

Tuition and Fees

If the student is readmitted to the same program, NMSU will assess the tuition and fee charges that would have been assessed for the academic year during which the student left (first academic year only). However, if veterans education benefits or other service member education benefits will pay the higher tuition and fee charges that other students in the program are paying for the year, NMSU will assess those charges to the student.

Readmission Requirements

A returning student will be permitted to reenroll in the next class(es) scheduled in the same academic program unless the student requests a later date of re-enrollment or agrees to a different program. A returning student will be readmitted into the same academic program the student was enrolled in prior to the military service obligation. If the exact program no longer exists, the student must be admitted to the program that is most similar, unless the student requests or agrees to admission to a different program. Returning students will be reenrolled with the same enrollment status, number of completed credit hours, and academic standing as the last academic year of attendance.

If NMSU determines that a returning student is not prepared to resume the program with the same academic status or is unable to complete the degree, NMSU will make reasonable efforts to enable the student to resume or complete the program at no additional cost to the student.

NMSU is not required to readmit the student if it determines:

- that there are no reasonable efforts it can take to prepare the student to resume the program at the point where they left off or to enable them to complete the program, or
- that after it makes reasonable efforts (those that do not place an undue hardship on the institution), the student is not prepared to resume or complete the program.

“Undue hardship” means an action requiring significant difficulty or expense considering the overall financial resources of NMSU and the impact of such action on its operation. NMSU has the burden to prove by a preponderance of the evidence that the student is not prepared to resume the program with the same academic status at the point where they left off or that they will not be able to complete the program.

In accordance with federal regulations, returning students who receive a dishonorable or bad conduct discharge, general court-martial, or federal or state prison sentence from the Armed Forces (including the National Guard and Reserves) are not eligible for readmission under this policy.

Students are encouraged to speak with Military and Veterans Programs regarding any absence due to military service. For more information, please contact mvp@nmsu.edu.

Military Experience Waiver

Prior to graduating, during the student's junior and/or senior year, NMSU students are required to take two 3-credit Viewing a Wider World (VWW) upper-division (300-400 level) courses. These courses strongly emphasize the international character and multicultural influences in the fields of study and strengthen information retrieval skills. There are two options that NMSU allows for replacing one of the two courses (3 credits) of VWW requirement with another form of educational experience, these are: (Study Abroad Experience or Military Experience for students who have served at least four weeks of U.S. Military Foreign/Sea Service in a foreign country.

Steps needed to request a Military Experience Waiver (replacing 3 credits of VWW):

1. Obtain a copy of your DD-214 or Memo from your Commanding Officer proving your 4-week deployment
2. Provide the above copy to your college academic advisor to request a waiver
3. Wait for your college to approve and confirm

Note: Credits are not being waived, only one of the two courses is being waived within the requirement. You may still need to complete three credits in consultation with your academic advisor. Please contact the MVP or your academic advisor for questions and concerns.

Student Medical Withdrawal

A student medical withdrawal applies to a student who becomes seriously ill, injured or hospitalized and is therefore unable to complete an academic term for which they are enrolled. This action applies to all courses a student is registered for in the affected semester(s). The student cannot select which courses they want to withdraw from and which they want to remain registered for when exercising this option. The students' attending physician must provide a letter, on official letterhead with an original signature, stating the date(s) within the semester that the student was under medical care and must withdraw because of that medical condition. This letter must be submitted within the semester or no later than one academic year after the end of the term for which the withdrawal is being requested.

Once the information is reviewed a final determination will be made if the student is eligible for the consideration of tuition or other refunds (students receiving funds awarded by the University Financial Aid and Scholarship Services should be aware of policies regarding withdrawal from the University). At the Las Cruces campus, medical withdrawal begins and ends at the University Student Records Office. At all other campuses, medical withdrawal begins at the Student Services Office but is ultimately finalized with the University Student Records Office on the Las Cruces campus.

Medical Conditions of a Family Member Withdrawal

A student who is withdrawing because of a medical condition of an immediate family member must submit a letter from the family member's attending physician. This action applies to all courses a student is registered for in the affected semester(s). The student cannot select which courses they want to withdraw from and which they want to remain registered for when exercising this option. It must be on official letterhead with an original signature, stating the date(s) within the semester that the student's immediate family member was under medical care and that the student must withdraw to attend to the immediate family member's medical condition. This letter must be submitted within the semester or no later than one academic year at the end of the term for which the withdrawal is being requested.

Immediate family member, in this instance, includes a spouse; a domestic partner, as defined in the NMSU Policy Manual 7.04; a child, parent or legal guardian; a sister or brother and a grandparent or a grandchild. Familial relationships that are created by law are also included (i.e. mother/father in law; half or step siblings); any other relationships can be considered on a case-by-case basis.

Once the information is reviewed a final determination will be made if the student is eligible for consideration of tuition or other refunds (Students receiving funds awarded by the University Financial Aid and Scholarship Services should be aware of policies regarding withdrawal from the University.) At the Las Cruces campus, medical withdrawal begins at the University Student Records Office. At all other campuses, medical withdrawal begins at the Student Services Office.

Withdrawal from NMSU

Withdrawal from any NMSU campus is an official procedure that must be:

1. Initiated by the student (using the Withdrawal form)
2. Have all necessary signatures (as indicated on the form)
3. Be approved and processed through the University Student Records Office

Students who withdraw from all courses for the semester should do through the University Student Records Office. However, students who are unable to come in person may submit an e-mail using their NMSU e-mail account to records@nmsu.edu. Students who leave without following the official procedure are graded appropriately by the instructor.

Applicable dates for the last day to withdrawal are published on the approved university academic calendar or under important dates at: <http://registration.nmsu.edu> (<https://records.nmsu.edu/faculty-and-staff/academic-calendar.html>).

A student who withdraws from all classes for the semester will retain access to their NMSU account per current policy but will lose access to other services and privileges available to enrolled students.

Financial information concerning drops and withdrawals can be found at <https://uar.nmsu.edu/refunds/withdrawals.html>. Financial Aid Recipients should contact University Financial Aid and Scholarship Services before withdrawing. Students receiving funds awarded by the University Financial Aid and Scholarship Services should be aware of policies regarding withdrawal from the University.

The Federal Higher Education Act requires the University to calculate a Return of Federal Student Aid Funds for students who withdraw (officially or unofficially) from all classes on or before the 60 percent attendance point in the semester. Using a pro-rata schedule, the percentage of the semester attended is used to calculate the amount of the student's earned versus unearned Federal student aid funds. The unearned portion of Federal student aid funds will be returned to the appropriate aid program(s). Students withdrawing from classes are responsible for payment of any balance due after the required return of Federal student aid funds.

Graduation and Commencement

Graduation Requirements

For specific graduation requirements for any degree offered at NMSU please see the Degrees, Majors, Minors and Other Academic Programs of Study (p. 31) section, as well as the departmental sections for those requirements. These requirements will include the minimum GPA, total credits and specific course requirements for graduation.

Applying for a Degree

Any students that are in their final semester of classes are considered degree candidates and are required to submit an "Application for Degree" as well as pay graduation fees for each degree being sought. The application for Degree form is available online through the myNMSU website. It must be completed and submitted by the designated deadline for that semester. The fees for the Las Cruces campus are all listed in the Tuition, Fees and other Expenses (p. 69) section of the catalog. Once a student submits the application, the fee will be included in the total cost for the semester or session in which the candidate anticipates completing their degree requirements.

If degree requirements are not completed during the semester/ session the student originally applied for, the student must then reapply and pay the appropriate fees. A \$50 late fee applies to applications received after the application deadline, and no applications will be accepted after the posted deadline date.

A student must specify which catalog they are using for their degree requirements in order for the university to determine if the requirements are met and if a degree can be certified. The latest date for substitution or waiver of required courses for degree candidates is two weeks after the last date of registration for full or summer terms.

Attendance at the Commencement Ceremony

Commencement is a symbolic ceremony, that students can elect to participate in after they have applied for their degree (<https://commencement.nmsu.edu/apply-to-graduate/>). Participation in commencement does not, in itself, mean that a student is considered an NMSU graduate. In order to be awarded a degree, a student must fulfill university requirements as determined by academic colleges. The degree will reflect the graduation date from the application for degree in which all degree requirements were determined by the academic colleges.

The academic colleges will confirm students' eligibility to participate in the commencement ceremony that is held at the end of the fall and spring semesters. Eligible candidates who are in the process of completing their final degree requirements and degree recipients from the previous summer session will participate in the fall ceremony. Students who are in the process of completing their final degree requirements in the spring can participate in the spring ceremony. However, degree candidates who wish to participate in a spring commencement, prior to completing degree requirements in summer school may do so if they meet the following conditions:

1. Receive permission from the Academic Dean of their college
2. Show a minimum cumulative grade-point average of 2.0
3. Only need 12 or fewer credit hours to complete their degree requirements
4. These remaining credit hours are being offered in the upcoming summer schedule of classes
5. Submit a degree application and approved petition form (available in the Dean's office of the student's primary major) by the late application deadline to apply for a degree in the spring semester.

Academic Regalia

Each college may approve distinctive symbols to be worn by the top 10 percent of its graduates at commencement. Only one symbol may be worn by each graduate. In addition, the student with the highest honors in each college may wear a crimson-colored gown. No other symbolic additions to academic regalia are allowed without the approval of the Academic Deans Council.

Diploma

All fees and bills owed the university must be paid in full before a student may receive a diploma or official transcripts. The degree title and major(s) will be printed on the diplomas, in accordance to the degree application award, determined by the academic colleges. Academic honors will also be printed on the diplomas below the degree and major(s). The name on

the diploma will reflect the student's current official NMSU records. Name changes are only processed for currently admitted students.

Diplomas will be mailed to graduates approximately eight weeks after the individual colleges certify the degree requirements and the final grades have been processed by the University Student Records Office. The diploma will be mailed to the address specified on the degree application, unless an address change was requested before the last day of the semester.

Academic Standing, Probation and Suspension

Undergraduate Academic Standing

When a student does not maintain adequate academic standing, he/she is placed in Academic Warning. If the student's academic standing does not improve, the placement progresses to Academic Probation I. Continued unimproved academic standing moves a student into Academic Probation II, then finally, Academic Suspension. Each stage imposes more structure and limitations on the student in order to help them return to normal academic standing. The intent is not to punish, but to help the student return to normal academic standing and success. Since some of these limitations involve limitations on the number of credit hours, students on Probation or Suspension may be subject to loss of financial aid. It is the student's responsibility to determine the impact of their changed academic standing on their financial aid. Notification to students of academic warning, probation, or suspension appears on the student's grade report at the end of each grading period.

Undergraduate Academic Warning

Issued only once, the first time a student's cumulative GPA falls below a 2.0 while in good academic standing. The University Student Records Office will notify the student of the consequences should the cumulative grade point remain below a 2.0 at the conclusion of the semester. A student on Academic Warning remains eligible for all extracurricular activities as governed by the rules of the specific activity.

While under Academic Warning the following restrictions may apply:

1. The student cannot enroll in more than 15 hours of coursework during the semester.
2. The student may be required to enroll in a 3-credit hour special study skills/time management course specifically designed for students on Academic Warning, or an equivalent course approved by the appropriate associate dean or CAO of their campus.
3. Students may be required to enter into a contract with their advisor, approved by their department head that places further stipulations on Academic Warning. The contract may include, but is not limited to the following:
4. The student may be required to take at least one repeat course to try to improve their GPA.
5. Except for the special study skills/time management course, the student's coursework may be restricted to their major.
6. The student may be required to get tutoring help.
7. The student may be required to see an academic counselor on a specified time schedule.
8. The number of credit hours a student may register for may be restricted (due to extenuating circumstances such as the student's workload commitments).

The associate dean or CAO may place the student on Academic Probation I should the student not adhere to the stipulations of the contract.

If the student's semester GPA is less than 2.0, and the cumulative GPA remains below 2.0 at the end of the semester on Academic Warning, the student is placed on Academic Probation I. If the semester GPA is greater than 2.0 but the cumulative GPA is still less than 2.0, the student will remain on Academic Warning. If the cumulative GPA is greater than a 2.0 at the end of the semester then the student is returned to good academic standing.

Undergraduate Academic Probation I

This occurs when a student under Academic Warning has a semester GPA less than 2.0, and the cumulative GPA remains below 2.0 at the conclusion of the semester or if the student maintains a semester GPA greater than 2.0 while on Academic Probation I but the cumulative GPA is still less than 2.0. Academic Probation I will also occur if a student falls below a 2.0 cumulative GPA from Good Academic Standing if Academic Warning already occurred in a previous term.

Under Academic Probation I the following conditions apply:

1. The student cannot enroll in more than 13 hours of coursework during the semester. *Note: Students falling below 12 credits in any one semester will jeopardize their financial aid.* Should this occur, students should see the associate dean in their college as soon as possible to try to implement corrective measures.
2. The student may enter into a contract or individualized education plan with their advisor and be approved by the associate dean or CAO that place further stipulations on Academic Probation I. The associate dean or CAO may place the student on Academic Probation II or Academic Suspension should the student not adhere to the contract stipulations.
3. Students on Academic Probation receiving educational benefits from the Veterans' Administration must obtain counseling from the Military & Veterans Programs Office.
4. Students admitted under special provisions whose transcripts indicate less than a 2.0 GPA are admitted on Academic Probation I.

The student must maintain a semester GPA equal to or greater than 2.0 until such time that the cumulative GPA is greater than 2.0 at which time the student goes back to good academic standing. Until the transition happens the student remains on Academic Probation I. The student will be placed on Academic Probation II if they cannot maintain a 2.0 semester GPA, and the cumulative remains below a 2.0 GPA, while under Academic Probation I. A student on Academic Probation I remains eligible for all extracurricular activities as governed by the rules of the specific activity.

Undergraduate Academic Probation II

Academic Probation II is issued in two ways.

- The first is when a student falls below a semester 2.0 GPA and the cumulative GPA remains below a 2.0 while on Academic Probation I.
- The second is when a student maintains a semester GPA greater than 2.0 while on Academic Probation II, but the cumulative GPA is still less than 2.0.

The following restrictions are in place for student's in Academic Probation II:

1. The student cannot enroll in more than 7 credit hours of coursework during the semester.
2. As with rule 2 under Academic Warning and Academic Probation I and at the discretion of the associate dean or CAO, the student will be required to enter into a contract with their advisor, approved by the associate dean or CAO, to place further stipulations on Academic Probation II.

The associate dean or CAO may place the student on Academic Suspension should the student not adhere to the stipulations of the contract.

The student must maintain a semester 2.0 GPA or higher until the cumulative GPA reaches a 2.0 or higher, at which time they are placed on good academic standing. A student unable to maintain a semester GPA of 2.0 or higher, and the cumulative remains below 2.0 GPA, while under Probation II will be placed on Academic Suspension. A student on Academic Probation II remains eligible for all extracurricular activities as governed by the rules of the specific activity.

Continuing in Probationary Status

Students may continue to enroll while on Academic Probation I or II provided they maintain a semester GPA of 2.0 or higher. If they withdraw from the university while on Academic Probation, they continue on that same level of Academic Probation.

Removal of Academic Probation

Such academic standing is removed when the cumulative GPA is raised to 2.0 or higher, with the following exceptions:

1. a transfer student may not remove probation by summer work alone;
2. If an I grade is removed after the student has enrolled, the new grade's effect on academic standing is based on its inclusion with grades for the term for which the student is enrolled;
3. exercise of the Adjusted Credit Option does not change academic status until subsequent grades are earned.

Academic Suspension

When a student does not achieve a semester 2.0 GPA or higher, and the cumulative remains below a 2.0 while under Academic Probation II, the student is placed on Academic Suspension. Students under Academic Suspension are not allowed to take NMSU courses while under suspension. Students on Academic Suspension must sit out a minimum of 1 semester and apply for re-admission.

Under certain conditions, a student may be re-admitted at NMSU under regular status while under Academic Suspension when satisfactory progress has been demonstrated at another college or university (see Readmission- Degree Seeking). Credits earned at another university or college while under Academic Suspension from NMSU or another university or college will be accepted at NMSU only after the student demonstrates satisfactory progress over a period of two semesters after being re-admitted or admitted to NMSU. Acceptance of transfer credits that count toward degree requirements is still governed by the rules established by the student's respective college or campus.

Summer Attendance Impact on Academic Standing

A student may use summer classes to get a warning or probationary status removed. Students suspended at the close of the spring semester may have their Academic Suspension rescinded if they attend a summer session at NMSU or one of its Community College campuses. Such

attendance must raise the combined spring semester and summer GPA to 2.0 or better. Under no circumstances may a student on Academic Warning or Academic Probation be allowed to register for an overload. The current academic status is continued if the student withdraws from the university and the probation or suspension status applies to all subsequent enrollments until the cumulative GPA is 2.0 or higher.

Graduate Academic Probation and Suspension

Graduate Academic Standing is based on the student's semester GPA and cumulative GPA. The student must maintain a cumulative GPA of 3.0 or higher to remain on Graduate Academic Good Standing. A student may not remain eligible for all extracurricular activities or Graduate Assistantship as governed by the rules of the specific activity.

Graduate Academic Probation I: A graduate student is placed on Graduate Academic Probation I when the student's cumulative GPA drops below 3.0 and the previous academic standing is Graduate Academic Good Standing. If a student on Probation I earns a semester GPA above 3.0 but the cumulative GPA remains below 3.0, the student continues on Graduate Academic Probation I

Graduate Academic Probation II: If the semester GPA of a continuing or re-admitted graduate student on Graduate Academic Probation I drops below 3.0 then the student is placed on Graduate Academic Probation II

Graduate Academic Suspension: If the graduate student cannot maintain a semester GPA of 3.0 or higher and the cumulative remains below 3.0 GPA while under Graduate Academic Probation II, the student will then be placed on Graduate Academic Suspension.

Students on Graduate Academic Suspension are barred from enrolling in graduate-level courses at NMSU while on suspension. Graduate students on Graduate Academic Suspension must sit out a minimum of one semester. Graduate students on suspension who wish to continue Graduate School after suspension must re-apply to the department and Graduate School. The student must also petition College Academic Dean or the Graduate School Dean, based on the major and degree the student is pursuing to be removed from Graduate Academic Suspension. At this time the graduate academic suspension status will be evaluated for possible readmission to the department. Should the suspension be lifted, the graduate student is placed on Graduate Academic Probation II or Graduate Re-admit on Probation II until such time that the graduate cumulative GPA equals or exceeds 3.0.

If you have questions about your academic standing, please contact your department academic advisor or Graduate Dean's office.

Academic Misconduct and Grievances Student Academic Code of Conduct

The Student Academic Code of Conduct (SACC), applicable to both undergraduate and graduate students, provides procedures for reviewing and resolving of alleged or suspected academic misconduct within a reasonably prompt time frame. The full SACC is found in the university's published Administrative Rules and Procedures (ARP), specifically ARP 5.10 and ARP 5.11.

While it is essential to refer to the detailed governing rules in the ARP, the process is summarized as follows: An institution-wide Academic Conduct Officer is responsible for processing each case of alleged academic misconduct. The accused student is provided notice of the

allegation and has the right to participate during the fact-finding process. The student may contest the investigative findings or sanction in a formal review before a university Hearing Panel. Either party to the matter has the right to a final appeal of the results or a Level II sanction to the Office of the Provost.

The SACC distinguishes between Level I Sanctions and Level II sanctions, depending upon the severity of the offense and other factors. The Level I sanction includes a formal warning. Graduate students' offenses and repeat undergraduate offenses are subject to a Level II sanction, even if less severe. Level II sanctions consist of a notation of academic misconduct on the student's academic transcript.

The full policy, examples of academic misconduct, report form and a flowchart of the procedures for resolving alleged student academic misconduct is available at:

University Student Records Office Privacy Rights

The following information has been designated as directory information and is subject to release to the public under the Buckley Amendment (PL 98-380), "The Family Educational Rights and Privacy Act of 1974:" student's name, class level, college and major, dates of attendance, degree(s) earned, honors and awards, address, telephone number, NMSU email address, Aggie ID number, most recent previous educational institution attended, place of birth, and some information about students involved in recognized activities and sports.

Other information regarding disclosure of student data is posted on the University Student Records website (<https://records.nmsu.edu>) and in the University Student Records (USR), in compliance with the Act.

Requests for withholding directory information must be filed in writing with the USR. A student may choose to hide his/her address and phone number from the campus phonebook through the myNMSU portal. This will only hide the information from the public but the records will still be officially kept within the USR.

Social Security Numbers in Student Records

As required by law, social security numbers are collected from prospective and current students who are either applying for admission to the university or plan to seek employment on campus. The social security number is a confidential record and is maintained as such by the

university in accordance with the Family Educational Rights and Privacy Act.

In addition, the university is mandated by federal tax regulations to provide tuition and fee payment information to the student and the Internal Revenue Service so that applicable educational tax credits may be computed. The social security number is required for tax reporting purposes.

Change in Demographic Information

Students wishing to make a legal name change, citizenship change, social security number update or a gender update can do so through the University Student Records (USR). All students will need to fill out the "Demographic Change form" located at <https://records.nmsu.edu/forms/inventory.html> and provide one of the following documents to the USR. Legal name changes will only be processed for students currently enrolled at NMSU or any of its Community Colleges.

1. **Legal name change:** students will need one legal documentation with the new name on it. This can be a Government Issued ID (drivers license, state card or valid passport), a Birth Certificate, a Court Order, a Marriage Certificate/Divorce Decree or a Certificate of Naturalization/I551 Card. *Note: Documentation is not required to add/delete hyphen, space, apostrophe, or to abbreviate a middle name to initial.*
2. **Citizenship change:** Certificate of Naturalization or I551 card.
3. **Social Security Number Update:** students will need to provide an original signed Social Security Card. Unsigned cards will not be accepted.
4. **Gender Update:** students will need to bring a Government Issued ID (drivers license, state ID card or valid passport) and a Revised Birth Certificate

Students may update their "preferred name", which is the name used in lieu of a student's legal name, on certain documents, such as, the email display name, learning management system, the phonebook, class rosters and advisee lists. This can be done by the student through the myNMSU portal and does not need to be done at the USR.

For more information about the specific documents that are needed please contact the University Student Records at (575) 646-3411.

Changes in Residency Status for Tuition Purposes

The University Student Records (USR) does not determine the laws and rulings for determining Residency, these are state laws that the USR simply administers. An individual must establish legal residency in New Mexico before he or she is entitled to pay in-state tuition rates.

The student's initial residency status is determined at the time of admission, any changes to this status must be initiated by the student through the USR. A continuing student, classified as a non-resident, who has satisfied the requirements to establish residency may submit a Petition for In-State Residency Tuition Classification along with the required supporting documentation to the USR. Petitions must be filed on or before the third Friday of the semester for which the student is requesting resident tuition.

For specific information about the process of petitioning for In-State Residency or for information about who is eligible for residency for tuition purposes please visit the <https://records.nmsu.edu/students/>

residency.html website or the University Student Records on the Las Cruces campus.

Official Transcripts

An official transcript is the University's certified statement of your complete NMSU academic record in chronological order by semester and year. It includes the student's coursework, grades and any degrees that were awarded. Any credit hours earned through transfer work are listed as the equivalent course at NMSU. Grades are not transferred, nor are they used to calculate the NMSU grade point averages. Official transcripts will not be released if the student is in debt to the university.

Transcripts can either be ordered in person at the University Student Records or online at <https://records.nmsu.edu/forms/transcripts.html>, there will be a fee for these that may vary depending on the total number of transcripts ordered and the type of delivery method that is selected. A student can request two types of transcripts an electronic one, which is sent as a secured PDF or a printed hard copy that can be delivered in a sealed envelope.

The name that will appear on the student's transcript will match the name on the student's official NMSU record. Name changes will only be processed for students currently enrolled at NMSU or any of its Community Colleges.

Purging of Student Files

All academic files for students who attend NMSU are kept for five (5) years following the student's final term enrolled. Only archival documentation will be retained. The files of students who do not enroll within one year after being admitted are destroyed.

Areas of Interest

What Are Meta-Majors?

Meta-majors at NMSU are two-semester academic maps designed as planning tools for students who have not yet decided on a program of study. Each meta-major represents a broad cluster of degree programs. The meta-major academic maps include courses (such as English and Math) that lay the academic foundation for all of the degree programs represented by the specific meta-major as well as course options that facilitate exploration of the various disciplines represented.

Meta-majors share a common early pathway toward a degree, diverging as a student becomes more focused on an individual major. By identifying a limited number of meta-majors that encompass all the majors at NMSU, and helping students who are unsure about a major choose a meta-major consistent with their interests, we can help ensure that courses taken early in a collegiate career will count toward a degree, thereby lessening the academic wandering that can impede student success.

Students will be directed to a meta major only if they are uncertain what they want to study. Students who are certain of their major will be advised into courses that are in that major's degree plan.

Undergraduate Admissions and Orientation

Contact Information

Undergraduate Admissions
MSC 3A
New Mexico State University
P.O. Box 30001
Las Cruces, NM 88003-8001
(575) 646-3121
<https://admissions.nmsu.edu/>

Under the policies and conditions set forth below, a student may be accepted for undergraduate admission to NMSU as either:

- A degree-seeking student or
- A nondegree student

Degree-Seeking Students

How to Apply as a First-Time Student

Requirements for admission as a degree-seeking student:

- Application for admission, accompanied by a one-time \$25 nonrefundable application fee
- Students are required to self-report their high school GPA in the application. Students can also provide an unofficial high school transcript.
- ACT and/or SAT scores are optional for admission. However, the scores provided will be used for scholarship consideration and **for Math and English placement.**

All applicants with tentative admission must submit a final, official high school transcript showing a graduate date before a final admission decision is granted. If the student also attended a non-NMSU system

post-secondary institution during high school, official transcripts from each institution will also be needed. If the high school attended was outside of the United States, a professional foreign credential evaluation from a NACES company will also be required.

Freshman Admission Requirements

Students who meet the minimum high school course requirements of the state from which they receive their high school diploma must meet one of the following criteria in order to be admitted:

- Cumulative high school GPA of 2.75, or
- ACT composite score of 21 or SAT score of 1060, or
- Ranked in the top 20 percent of their high school graduating class or
- A GED cumulative score of 480 or HiSET cumulative score of 45

Applicants who meet at least one of the above criteria will be admitted to NMSU. An applicant who does not meet admission requirements may be admitted if a review of additional academic information indicates that the student would be successful at NMSU. When reviewing the admissibility of students, Undergraduate Admission considers many factors, including high school GPA, test scores, dual-credit coursework, leadership experience, community involvement, and other accomplishments. Applicants may be asked for additional information, including a personal statement, to support their application.

Note for students about scholarships: Although home school students only need to submit a high school transcript for admission to NMSU, a New Mexico GED or HiSET may be required to be eligible for state-funded scholarships. Similarly, the ACT or SAT scores may be needed for out-of-state students for competitive scholarships.

More information about scholarships is available at <https://fa.nmsu.edu/scholarships>

Aggie Pathway

In the Aggie Pathway program, the NMSU system works together to assist students who do not meet the admission requirements to the university or who choose to start at one of the system's community colleges. Aggie Pathway students begin at one of NMSU's community college campuses. They may transition to the university campus upon meeting the following requirements:

- Successful completion of 24 credits, in addition to any required developmental courses
- 2.0 cumulative college GPA

Students enrolling through NMSU Doña Ana Community College campus also have access to on-campus housing and dining.

More information about Aggie Pathway is available at <https://aggiepathway.nmsu.edu/>.

Aggie Welcome and Orientation

Orientation for all new first-time and transfer students is mandatory. At NMSU's Aggie Welcome and Orientation (AWO) programs, students will attend information sessions, learn about campus resources and college life, meet with an academic advisor, and register for classes.

If students have taken an ACT or SAT, they must submit official scores before attending an AWO program, as these scores are used to place students into courses during academic advising. If test scores are

unavailable, students may be asked to take the Math Placement Exam and English Placement Questionnaire before orientation.

More information about Aggie Welcome and Orientation is available at <https://awo.nmsu.edu/>.

Nondegree- Seeking Students

How to Apply as a Nondegree Seeking Student

Non-degree admission is designed to meet the needs of students who do not wish to pursue a degree at NMSU. Courses taken in this status may not be used to meet university admission requirements. Students interested in using non-degree credit for initial teacher certification or certification in a new field must contact the College of Health, Education, and Social Transformation.

Non-degree students are ineligible to:

- Receive financial aid or student employment
- Participate in student government or intercollegiate athletics
- Receive benefits from any veterans' program

Transcripts from the last post-secondary institution or high school may be required to assure readiness for university-level courses. A \$25 one-time, nonrefundable application fee is required.

Non-degree students are subject to the same university regulations as degree-seeking students.

Changing from Nondegree Status

A non-degree student in good academic standing at NMSU must submit a written request for a change of status from non-degree to degree-seeking. Requirements for regular admission must be met. Non-degree students may not transfer more than 30 credits from this status to any undergraduate degree program except for students participating in a high school concurrent enrollment program. If a student has graduated from NMSU, they will automatically be switched to a non-degree status. If that student wants another degree from NMSU, they will need to re-apply as a degree-seeking student.

How to Apply For Readmission

Former students of the NMSU system, who have been out of school for more than two consecutive semesters, are required to apply for readmission. Applications should be submitted to Undergraduate Admissions before the start date of the semester for which the student plans to enroll.

A student who has attended other post-secondary institutions during an absence must have official transcripts from those other post-secondary institutions sent directly to Undergraduate Admissions. They must be eligible to return to the institution they last attended. Transcripts must be received before the date of registration. Academic standing at the time of readmission will generally be determined by previous NMSU academic standing. However, academic performance at other institutions attended during the applicant's absence from NMSU may be considered when determining the student's admission status.

Opportunities for High Schools Students

Dual Credit for High School Students

The Dual Credit program is designed to give high school students an opportunity to enroll at NMSU before high school graduation. A student must be either a junior or senior in high school and be enrolled at least

half-time in high school courses. Under a Statewide Dual Credit Master Agreement between NMSU and the school district, students enrolled in approved dual credit courses are eligible to have the total cost of tuition and general fees waived.

Eligibility Requirements

- High school junior or senior
- High school grade point average (GPA) of 3.0 or higher
- ACT composite of 21 or SAT score of 1060
- For those students who have not had the opportunity to take the ACT or SAT, a PSAT score of 860 or above will be required
- Approval from a high school counselor
- Approval from a parent or guardian
- Meet with an NMSU Dual Credit Academic Advisor
- Completion of all required documentation:
 - Application for Admission
 - State Dual Credit Request Form
 - Student Acknowledgement and Parent Certification Form
 - High School Transcript and Test Scores

Out-of-State Students and Legal Jurisdiction

By applying for admission/enrollment, both the student and parents agree that New Mexico law prevails and all litigation will be in federal or state court in New Mexico.

Applying for Admission

Application Materials

All documents submitted as part of the official admissions process become the property of NMSU and will not be returned to the student. However, application materials are retained for one calendar year for students who apply but do not attend.

Application Deadlines

NMSU's priority deadline for completing the entire admission process is the Friday before the first day of class each semester. Completing the admission process includes, but is not limited to:

- Completing an admission application
- Submitting all official documents
- Receiving an admission decision
- Completing orientation (if required)
- Taking placement exams
- Enrolling in courses

Completing all the above steps requires multiple business days; NMSU encourages all interested students to plan accordingly. In addition, international applicants have additional steps to complete and earlier deadlines related to visa timelines. Moreover, some academic programs have specific application deadlines that students must met.

The deadline to apply for NMSU's Nursing program is February 1st for the fall semester and September 1st for the spring semester.

Transfer Students

NMSU evaluates eligible courses for NMSU transfer equivalency from postsecondary institutions that are regionally accredited or are candidates for regional accreditation. Credits from non-accredited institutions may be evaluated, by the student's academic college, after the student has shown acceptable performance at NMSU for two semesters of full-time enrollment. Academic colleges, within NMSU, may have additional requirements for course transfer. Please contact the College Dean's Office for more information.

Transfer students are subject to the same graduation requirements as all NMSU baccalaureate-degree (bachelor's) seeking students. Thirty (30) of the last 36 credit hours for every degree to be awarded from NMSU must be earned at NMSU.

Community/Junior College Transfers

Community/Junior college transfer students may be admitted and classified on the basis of acceptable credits earned at a two-year institution. However, transfer students are subject to the same graduation requirements as all NMSU-Las Cruces campus baccalaureate-seeking students. This includes the required minimum number of 48 upper division credits from courses numbered 300 or above and the requirement that the last 30 credits must be earned through this university.

NOTE: Students currently enrolled at an NMSU Community College (Alamogordo, Dona Ana or Grants) are not considered transfer students. If a student wants to change campuses they must submit a Change of Campus (<https://admissions.nmsu.edu/change-of-campus-request/>) form.

Transfer Students- Admission Requirements

1. Transfer students must provide official transcripts from each institution attended. For college transcripts to be considered official, they must be sent directly from the institution's student records office to NMSU Undergraduate Admissions or delivered in person only if in a sealed envelope from the granting institution and with the current issue date. Official transcripts must be received before the date of registration. Applications for admission that include the transfer of credits earned at a non-U.S. university must include a professional foreign credit evaluation report from a member institution of the National Association of Credential Evaluation Services (NACES) (<http://www.naces.org/members.html>) for every transcript
2. Students who have not earned credit for the first semester of college English or Math may submit official ACT or SAT scores directly to NMSU Undergraduate Admissions. If ACT or SAT scores are not available, students can take the English Placement Questionnaire and Math Placement Exam provided by NMSU.
3. Students with 24* or more completed college credit hours must have a cumulative grade point average (GPA) of at least 2.0.
4. Students with fewer than 24 completed college credit hours must fulfill the transfer and first-year admission requirements.
5. Students must be eligible to return to their last college or university.
6. Any student who conceals the fact that they attended another college or university and has not submitted a transcript for each institution, whether or not credit was earned, will be subject to immediate suspension.
7. NMSU will uphold academic and judicial suspensions from other colleges and universities.

8. * The types of credits listed below are not counted toward the 24 completed credit hour requirement:

9. Courses taken for college credit while in high school
10. Credits by examination (i.e. CLEP, IB, AP, etc.)
11. Credits from a non-regionally accredited institution
12. Credits from institutions that do not provide grades
13. Credits from experience such as a Joint Services Transcript

Transfer of International Credit

Applications for admission that include the transfer of credits earned at a non-U.S. university must include a professional foreign credit evaluation report from a member institution of the National Association of Credential Evaluation Services (NACES) (<http://www.naces.org/members.html>) for every transcript from a foreign secondary school and/or university attended.

General Requirements for Transfer Credits

Credit will be awarded for transfer courses as follows:

1. Grades earned in courses taken at other institutions are not included in the calculation of the NMSU GPA, except for grades earned by approved National Student Exchange students.
2. A grade of D or better is required to grant NMSU credit for courses identified as having an NMSU equivalent.
3. Colleges or departments may require a grade of C- or higher for courses required in their programs.
4. Each college determines which transferred courses are applicable toward a degree or a minor.
5. Transcripts may need to be reevaluated when students transfer from one NMSU campus or College to another.
6. Currently enrolled students must obtain prior approval from their academic department head and dean before courses taken at another institution will be applied toward meeting NMSU graduation requirements.

Student Responsibility

Planning for effective transfer with maximum efficiency is ultimately the student's responsibility. Responsible transfer planning includes early and regular consultation with the intended degree-granting institution to assure that all pre-transfer coursework will meet the requirements of the desired degree.

NMSU maintains a database (<http://nmsudirect.nmsu.edu/>) of commonly transferred courses from numerous institutions. Courses included in the database at the time the student is admitted to NMSU will automatically transfer to NMSU, provided the student follows all guidelines (see Currently Enrolled NMSU Students below). If a transferred course does not exist in the database, it is the student's responsibility to provide the departmental faculty with sufficient materials (e.g. catalog description, syllabi, etc.) to determine if any of the department's courses may be equivalent to the credits being transferred.

Currently Enrolled NMSU Students

Currently, enrolled students must obtain prior approval from their academic department head and dean before courses taken at another institution will be applied toward meeting NMSU graduation requirements.

Religious Center Courses in Religion

Courses in religion, offered by the various religious centers through higher educational institutions with which they are affiliated, are open to all students and these or similar courses from other colleges/universities may be transferred for elective credit ("E") to NMSU. Registration for these courses is separate from the NMSU System's registration and is conducted by the religious center offering the course.

No more than 6 credits in such courses may be transferred to NMSU. To transfer earned credits to NMSU, the student must do the following:

1. Obtain written approval from the student's department head and academic dean prior to registration for the course
2. Count the credit in the course as part of the total semester load
3. Upon completion of the course, request that the institution granting the credit send a transcript of the credit to the Undergraduate Admissions Office at the NMSU-Las Cruces.

Graduate Transfer Credits

For more information about transferring graduate credits please visit the Graduate School (p. 76) section of this catalog.

Evaluation of Transfer Credits

NMSU has 3 levels of course credit transfer. Once a student has been admitted to NMSU, they are awarded credit for equivalent courses accordingly. Following award of credit as described in Levels 1 and 2 (below), application of any additional credit transfer via specific Program Articulation agreements will be approved by the student's academic department and dean, including additional courses in the major that may count toward a degree or a minor but, are not included in a Program Articulation.

Level 1

Automatic course-to-course equivalency credit transfer from colleges/universities in the state of New Mexico, per the New Mexico Higher Education Department (NM HED) articulation modules. Eligible credits for Level 1 transfers will be automatically applied to the student's transcript, provided minimal grade requirements are met. Level 1 equivalency includes

1. New Mexico State Common Core general education courses
2. New Mexico State articulated academic programs (e.g. Business, Early Childhood Education, and NM Nursing Education Curriculum).

Level 2

Faculty established NMSU course-to-course equivalency transfer

1. Equivalency is determined by the designated departmental faculty in the department/program in which the equivalent course is offered, and may include a review of course description, syllabus and/or interaction with the other institution. If a course equivalency does not exist in the database, it is the student's responsibility to provide departmental faculty with sufficient materials to determine if any of the department's courses may be equivalent to the credits being transferred.
2. Credit for courses transcribed with NMSU equivalency may/will count toward the degree/major.
3. Credit for courses with no NMSU equivalence will be transcribed as 100E (lower level) or 300E (upper level) and may or may not count as credit toward a specific degree. Departmental faculty may accept the

"E" course as elective credit toward the degree, or as a substitute for a course not applied universally.

Level 3

Specific Program Articulation between an NMSU program/department and a program/department at another institution.

1. Program Articulation with other institutions is monitored at the department/program level in accordance with articulation agreements and may include credit transfers that are applicable only to the specific degree articulated (i.e. credit for courses may change depending on degree student declares).
2. Because Level 3 transfer credit is degree specific, transcripts must be re-evaluated when a student changes their major or college- Level 3 transfer credits are not applied universally.

National Student Exchange (NSE)

Courses transferred back to the NMSU System by students participating in the National Student Exchange (NSE) Program will be evaluated as NMSU (system) courses and recorded on the student's academic record. All computable grades earned will be included in calculating the student's cumulative grade point average.

Transfer Credit Appeal Process

All New Mexico public post-secondary institutions are required to establish policies and practices for receiving and resolving complaints from students or from other complainants regarding the transfer of coursework from other public institutions in the state. A copy of NMSU's transfer credit policy may be obtained from the University Student Records Office or from the Deputy Secretary for Academic Affairs, Higher Education Department, 2048 Galisteo St., Santa Fe, New Mexico 87505-2100.

Military and Veterans Programs (MVP)

About MVP

New Mexico State University (NMSU) is a military and veteran-friendly university that strives to provide the best possible service for our military, veteran, and their dependents as they pursue their educational goals. NMSU Military and Veterans Programs promotes lifelong learning and professional development by offering:

- In-state tuition rates for active-duty military and their dependents stationed at regional military installations (including Ft. Bliss); or those eligible for U.S. Department of Defense (DoD) Tuition Assistance (TA) or U.S. Department of Veterans Affairs (VA) education benefits
- Transferable military credits that count toward degrees at NMSU
- Facilitation of MyCAA military spouse benefits and DoD TA
- Advocacy from admission to graduation
- Student Veteran Housing for student veterans and their families
- Priority registration for military and veteran students
- Aggie Green Zone Training, educating faculty and staff about our military and veteran students and the unique value they bring to campus
- SALUTE National Honor Society for student veterans
- Connection with the Student Veterans Organization (SVO) of NMSU
- Scholarships and Internship opportunities

- Veteran Mentorship Program, helping first-year student veterans transition to an academic setting successfully
- Processing of TA and VA education benefits
- Student Computer Lab and Lounge

NMSU degree programs are approved by the State Approving Agency (SAA) at the New Mexico Higher Education Department. Eligible students may receive education benefits from the U.S. Department of Defense or the U.S. Department of Veterans Affairs.

For further information contact:

Military and Veterans Programs
MSC 4740, PO Box 30001
Las Cruces, NM 88003-8001
(575) 646-4524
<http://mvp.nmsu.edu>

MVP Student Computer Lab and Lounge

The MVP Computer Lab is available to military, veteran, and dependent students. The lab has six computers with several common access card (CAC) readers. A CAC reader enables students to access military websites in order to complete their TA requests. The Computer Lab is open Monday through Friday from 8 am - 5 pm. We offer free efax, copy, and printing services to further accommodate our students. The MVP Student Lounge is equipped with comfortable furniture, a coffee station, a kitchen (microwave/refrigerator) area, and a place to study and relax between classes. Students enjoy a free cup of coffee while doing their homework and network with like-minded students.

Costs

Active-Duty

Active-duty military personnel (U.S. Armed Forces) stationed in New Mexico or at Fort Bliss, Texas may complete a "Resident Tuition Application for Active Military, Veterans and Dependents of the U.S. Armed Forces (https://mvp.nmsu.edu/_assets/images/MVP_Waiver-2.pdf)" waiver to qualify for in-state tuition. Spouses and children of active-duty personnel stationed in New Mexico and Fort Bliss, Texas who are not otherwise entitled to claim in-state residency, may apply for in-state tuition by submitting a "Resident Tuition Application for Active Military, Veterans and Dependents of the U.S. Armed Forces (https://mvp.nmsu.edu/_assets/images/MVP_Waiver-2.pdf)" waiver to the Military and Veterans Programs. Applications are available at the Military and Veterans Programs at <http://mvp.nmsu.edu>, (under the Forms tab) or through the University Student Records Office. Please contact MVP for the required documents needed to complete the waiver application.

NMSU Global Campus

NMSU Global Campus (<https://global.nmsu.edu>) includes 100% online bachelor's, master's, graduate certificate, and doctoral programs within the NMSU system. NMSU Global Campus programs are designed to serve students who may not be able to pursue an education through traditional means. Active Duty students who are admitted to NMSU Global Campus must provide Military and Veterans Programs with supporting documentation to be assessed the Active Military \$250 per credit hour cost fixed rate. Please visit the Military Active-Duty Rate (<https://mvp.nmsu.edu/military-members/military-active-duty-rate.html>) page from MVP or contact NMSU Global Campus at globaladmissions@nmsu.edu or 800.662.6678 for more information.

Dependents Receiving VA Educational Benefits

Per NM 2015 HB 427:

A spouse or child of a veteran of the armed forces is entitled to pay tuition and fees at the rate provided for New Mexico residents; provided that the spouse or child is eligible for benefits pursuant to the federal Post-9/11 Veterans Educational Assistance Act of 2008 or any other federal law authorizing educational benefits for a veteran and the dependents of a veteran. Students may complete a "Resident Tuition Application for Active Military, Veterans and Dependents of the U.S. Armed Forces (https://mvp.nmsu.edu/_assets/images/MVP_Waiver-2.pdf)" waiver to qualify for in-state tuition. Applications are available at the Military and Veterans Programs, at <http://mvp.nmsu.edu> (under the Forms tab) or through the University Student Records Office. Please contact MVP on the required documents needed to complete the waiver application.

Veterans

Veterans receiving U.S. Department of Veterans Affairs education benefits are eligible for in-state tuition through the Veterans In-State Tuition Act by submitting a "Resident Tuition Application for Active Military, Veterans and Dependents of the U.S. Armed Forces (https://mvp.nmsu.edu/_assets/images/MVP_Waiver-2.pdf)" waiver to the Military and Veterans Programs. Applications are available at the Military and Veterans Programs at <http://mvp.nmsu.edu> (under the Forms tab) or through the University Student Records Office. For further information concerning approved programs and application process, eligible persons should contact Military and Veterans Programs.

Veteran students enrolled under the following programs are responsible for their tuition and fees in the same manner as a nonveteran student:

- Montgomery GI Bill®-Active Duty (CH 30)
- Survivors' and Dependents' Educational Assistance (CH 35)
- Montgomery GI Bill®-Selected Reserve (CH 1606)

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill>. (<https://nam01.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbenefits.va.gov%2Fgibill%2Findex.asp&data=01%7C01%7Cemz0724%40nmsu.edu%7C5845cd850ebe483b899f08d833db4ce9%7Ca3ec87a89fb84158ba8ff11bace1eb%7C1&sdata=dodHbJeg6EwzrzZbjmlbt%2BB6bAsHp8eFnUZyFpUNZPQ%3D&reserved=0>)

Allowing Veterans to Attend or Participate in Courses Pending VA Payment

Background

Section 103 of Public Law (PL) 115-407, 'Veterans Benefits and Transition Act of 2018,' amends Title 38 US Code 3679 by adding a new subsection (e) that requires disapproval of courses of education, beginning August 1, 2019, at any educational institution that does not have a policy in place that will allow an individual to attend or participate in a course of education, pending VA payment, providing the individual submits a certificate of eligibility for entitlement to educational assistance under Chapter 31 or 33.

Pending Payment Compliance

In accordance with Title 38 US Code 3679(e), New Mexico State University adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post-9/11 G.I. Bill® (Ch. 33) or Veteran Readiness and Employment (Ch. 31) benefits, while payment to the institution is pending from VA. New Mexico State University will not:

- Prevent the student's enrollment;
- Assess a late penalty fee to the student;
- Require the student to secure alternative or additional funding;
- Deny the student access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Produce the VA Certificate of Eligibility (COE) by the first day of class;
- Provide a written request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill>.

Responsibility of Students Receiving VA Education Benefits

Students must pursue a degree in a specific program to be eligible for VA education benefits. Students must submit their degree plans or Student Academic Requirements (STAR) Degree Audit Report and Student Schedule to Military and Veterans Programs in order to be certified. Students must submit their degree plans or STAR Degree Audit Report and Student Schedule to MVP every semester they plan to use VA education benefits for continued certification.

Students using VA Education Benefits must notify MVP when any of the following occur:

- Dropping or adding course(s)
- Withdrawing from course(s)
- Withdrawing from the University
- Discontinuing regular class attendance
- Changing programs (academic majors/minors)

VA education benefits are payable for regular attendance in courses that are required by the student's program (major/minor) curriculum. VA education benefits are not payable for:

- Classes not attended regularly
- Repeating a course for which a passing grade meets degree requirements
- Classes for which credit is received through successful completion of a proficiency test or grade by examination
- Classes are taken on an audit basis
- Classes that are dropped or withdrawn from
- Classes are taken that are not required by the student's program (major/minor) curriculum

Tuition Assistance

Federal Tuition Assistance

Federal Tuition Assistance (TA) is a benefit paid to eligible members of the Army, Marines Corps, Navy, Air Force, Coast Guard, and Space Force. The Department of Defense (DoD) has given each service the ability to pay up to \$250 per semester credit hour of the actual cost of tuition (no fees are payable by Federal TA) during the fiscal year (Oct. 1 - Sept. 30). TA must be requested and approved before the start date of the course. Refer to your service portal for specific TA deadlines and procedures. TA is paid directly to the school by the individual military services.

Service members must first be admitted to NMSU before they may enroll in any classes at NMSU. Prior to applying, speak with your military service or Educational Services Officer to know your education options and make an informed decision. Please be aware of the following NMSU admission and registration process:

1. Service members must apply online to be admitted,
2. Login to my.NMSU.edu (<http://my.NMSU.edu>) to register for classes, and
3. Request TA through your service online portal. Each service has its own criteria for eligibility, application process, and restrictions. Refer to our website for service login information: <https://mvp.nmsu.edu/military-members/federal-tuition-assistance.html>

It is important to request TA for the same class and section number as enrolled in NMSU for tuition and grading purposes. Only enrollments requested and approved through their service online portal will be eligible for TA. Refer to our website for further information or contact the Military and Veterans Programs for assistance.

State Tuition Assistance

New Mexico National Guard Tuition Scholarship Program (NMGTSPP) also referred to as State Tuition Assistance (STA). The scholarship provides eligible members of the New Mexico National Guard an opportunity to complete up to a bachelor's degree. Air National Guard yearly cap is \$8,000. Army National Guard yearly cap is \$4,000. STA fiscal year is from July 1 – June 30. STA is paid directly to the school and is invoiced after the term's Last Day to Drop a Course without a "W" (100% refund). Refer to our website for STA deadlines and procedures at <https://mvp.nmsu.edu/military-members/state-tuition-assistance.html> or contact the Military Veterans Programs for assistance.

MyCAA Spouse Scholarship

The My Career Advancement Account (MyCAA) Scholarship Program is a career development and employment assistance program. MyCAA is a program that provides financial assistance for military spouses that would like to pursue a license, certification, or up to an associate degree (excluding Associate Degrees in General Studies, Liberal Studies, and Interdisciplinary Studies that do not have a concentration). MyCAA provides a maximum education benefit of up to \$4,000 with an annual fiscal year (Oct. 1 – Sept. 30) cap of \$2,000 to assist eligible military spouses. Refer to our website for MyCAA eligibility and procedures at <https://mvp.nmsu.edu/military-members/mycaa-spouse-scholarship.html> or contact Military and Veterans Programs for assistance.

Regulations

Note: These regulations apply to all campuses of NMSU and are effective with the publication of this catalog. Tuition amounts, fees, and similar items subject to annual review and change are all effective with the current catalog.

Credit for Military Service

New Mexico State University will award academic credit to United States military personnel for courses and Military Occupational Specialties (MOS), based on the American Council of Education Guide (ACE) as well as through national standardized tests, such as CLEP, AP, PEP, and DANTES. Credit for military-training is in accordance with NMSU Faculty Senate Legislation Proposition 24-07/08, which was passed in May 2008. Military Training and Military Occupational Specialties (MOS) must have a recommendation evaluation by ACE (in the ACE Guide) for credit to be awarded. Courses accepted for transfer credit become part of the student's official NMSU transcript and academic record. If a student wishes to appeal a decision regarding the acceptance of military training/education and/or MOS for academic credit, the student must submit a written statement of appeal to the Dean of the College to which the student has applied. The Dean will review the merits of the appeal and render a decision. The decision of the Dean is final.

Only Primary MOS (s) are eligible for academic credit in the initial review and evaluation. Credit for Duty and/or Secondary MOS may be eligible for academic credit if the student petitions the college's Associate Dean. Primary MOS is the primary specialty of a soldier and reflects the broadest and most in-depth scope of military experience. Veterans, active-duty personnel, National Guard, and Reservists who are current students or students applying for admission to New Mexico State University may be granted academic credit on a case-by-case basis upon evaluation of military transcripts - the Joint Service Transcript (<https://jst.doded.mil/jst>) and the Community College of the Air Force transcripts. Course equivalencies and credit hours awarded for a particular NMSU degree are determined by colleges and/or academic departments. Credit hours may be awarded for specific courses toward degree requirement, or as elective credit. The number of credit hours awarded will be determined by the college and/or academic department.

Note: Students submitting military transcripts for credit evaluation must keep in mind the Maximum Time Frame policy, see the Financial Aid Section (<https://fa.nmsu.edu/satisfactory-academic-progress/>) for more information.

Graduate Student Status (Training Time)

VA education benefits are determined by the number of graduate credits of enrollment for a given semester or summer session. Listed below are the credit hours that determine student status (training time) for graduate students.

Fall and Spring semester, for 16-week terms, full-time enrollment includes 9 or more credit hours. Students are considered three-fourths time if they are enrolled in 7 to 8 credit hours. Half-time enrollment is 5 to 6 credit hours. Students enrolled in less than 5 credit hours are reimbursed for tuition and allowable fees only. For 8-week terms, full-time enrollment includes 5 or more credit hours. Students are considered three-fourth time if they are enrolled in 4 credit hours. Half-time enrollment is 3 credit hours. Students enrolled in less than 1-2 credit hours are reimbursed for tuition and allowable fees only.

There are several sessions within the summer term. For the 10-week summer session, full-time enrollment is 6 or more credit hours. Students

are considered three-fourths time if they are enrolled in 4 to 5 credit hours. Half-time enrollment is 3 credit hours. Students enrolled in less than 1-2 credits hours are reimbursed for tuition and allowable fees only. For the 8-week summer session, full-time enrollment is 5 or more credit hours. Students are considered three-fourths time if they are enrolled in 4 credit hours. Half-time enrollment is 3 credit hours. Students enrolled in less than 1-2 credits hours are reimbursed for tuition and allowable fees only. For the 5-week summer session, full-time enrollment is 4 or more credit hours. Students are considered three-fourths time if they are enrolled in 3 credit hours. Half-time enrollment is 2 credit hours. Students enrolled in 1 credit hour are reimbursed for tuition and allowable fees only.

Veterans' Attendance and Satisfactory Progress

The U.S. Department of Veterans Affairs requires all veterans receiving VA education benefits to make satisfactory progress and systematic advancement toward an educational objective or be liable for over-payments. Satisfactory progress and regular class attendance are expected of such students.

If a veteran receiving benefits is suspended for academic reasons, benefits are terminated and will be restored only after readmission to NMSU.

If the university has liability claims filed against it as a result of a veteran failing to meet compliance requirements of the U.S. Department of Veterans Affairs, the university will not release any academic records (transcripts) on the veteran until the veteran has reimbursed the federal government for funds drawn in violation of those requirements.

A student receiving VA education benefits who is pursuing a degree program offered by New Mexico State University should adhere to the curriculum of that program. Failure to do so will result in the student being certified for less than full-time status or becoming liable for an overpayment.

Military Withdrawal

New Mexico State University understands that our military students may be called to active duty, specialized training, or disaster relief efforts with little notice. U.S. active duty military students wishing to withdraw from all their classes must present their orders and their request for full withdrawal, as indicated below. However, the below policy does not pertain to a student's basic and/or annual training. A student who has an order for training is encouraged to formally request, through the proper military chain of command, a postponement of their orders until the summer or the end of the semester they are currently enrolled in. If a student's request for postponement is denied, the student may then follow the steps below but must provide documentation that their postponement request was formally denied.

All NMSU students that have been called for active duty must take the following steps to withdraw from all their classes:

1. **Military and Veterans Programs (MVP):** TA/VA students ordered to Active Duty must provide a copy of orders to the MVP office, in Corbett Center Student Union, Room 244, or by email mvp@nmsu.edu. To assist in reporting accurate information to their military service or the VA Regional Office, the student should also provide, in writing, the last day of class attendance.

2. **NMSU University Student Records:** All students presenting their orders to the University Student Records Office, (575) 646-3411, or records@nmsu.edu, will receive a military withdrawal from classes and full tuition and fees refund for that semester.
3. **Bookstore:** Students who still have their receipts for textbooks purchased the semester in which they are called to active duty will be given a full refund for these textbook purchases when they present their orders. Please contact the bookstore for assistance at (575) 646-4431 or nmsu@bkstr.com.

Military Readmission Policy

New Mexico State University (NMSU) acknowledges that students may be temporarily unable to attend classes or be required to suspend their studies in order to perform military service. NMSU encourages such students to resume their education once a military service obligation has ended and adopts this policy to ensure the timely readmission of such students.

In accordance with federal regulations, 34 C.F.R. § 668.18 and the Department of Defense (DoD) Voluntary Education Partnership Memorandum of Understanding (MOU), the university will promptly readmit service members who seek readmission to a program that was interrupted due to a uniformed service obligation.

Eligibility

This policy shall apply to (1) service members who are unable to attend classes for more than 30 consecutive days, and (2) service members who are unable to attend classes for less than 30 days when such an absence would result in a withdrawal from NMSU.

A student is eligible for readmission under this policy if, during an absence, the student performs uniformed service, voluntary or involuntary, in the Armed Forces, including the National Guard or Reserve, active duty, active duty for training, or full-time National Guard (under federal authority). The cumulative length of all absences for uniformed service (service time only) must not exceed five years.

Notification of Military Service

The student (or an appropriate officer of the armed forces or official of the Department of Defense) must give written notice of such service to the school as far in advance as is reasonable under the circumstances. Such notice does not need to indicate when the student will return to NMSU.

Notification of Intent to Return

The student must also give written notice of Intent to Return and supporting official military obligation documentation to University Student Records within three years after the completion of the period of service.

Tuition and Fees

If the student is readmitted to the same program, NMSU will assess the tuition and fee charges that would have been assessed for the academic year during which the student left (first academic year only). However, if veterans education benefits or other service member education benefits will pay the higher tuition and fee charges that other students in the program are paying for the year, NMSU will assess those charges to the student.

Readmission Requirements

A returning student will be permitted to reenroll in the next class(es) scheduled in the same academic program unless the student requests a later date of re-enrollment or agrees to a different program. A returning

student will be readmitted into the same academic program the student was enrolled in prior to the military service obligation. If the exact program no longer exists, the student must be admitted to the program that is most similar, unless the student requests or agrees to admission to a different program. Returning students will be reenrolled with the same enrollment status, number of completed credit hours, and academic standing as the last academic year of attendance.

If NMSU determines that a returning student is not prepared to resume the program with the same academic status or is unable to complete the degree, NMSU will make reasonable efforts to enable the student to resume or complete the program at no additional cost to the student.

NMSU is not required to readmit the student if it determines:

- that there are no reasonable efforts it can take to prepare the student to resume the program at the point where they left off or to enable them to complete the program, or
- that after it makes reasonable efforts (those that do not place an undue hardship on the institution), the student is not prepared to resume or complete the program.

“Undue hardship” means an action requiring significant difficulty or expense considering the overall financial resources of NMSU and the impact of such action on its operation. NMSU has the burden to prove by a preponderance of the evidence that the student is not prepared to resume the program with the same academic status at the point where they left off or that they will not be able to complete the program.

In accordance with federal regulations, returning students who receive a dishonorable or bad conduct discharge, general court-martial, or federal or state prison sentence from the Armed Forces (including the National Guard and Reserves) are not eligible for readmission under this policy.

Students are encouraged to speak with Military and Veterans Programs regarding any absence due to military service. For more information, please contact mvp@nmsu.edu.

Military Experience Waiver

Prior to graduating, during the student's junior and/or senior year, NMSU students are required to take two 3-credit Viewing a Wider World (VWW) upper-division (300-400 level) courses. These courses strongly emphasize the international character and multicultural influences in the fields of study and strengthen information retrieval skills. There are two options that NMSU allows for replacing one of the two courses (3 credits) of VWW requirement with another form of educational experience, these are: (Study Abroad Experience or Military Experience for students who have served at least four weeks of U.S. Military Foreign/Sea Service in a foreign country.

Steps needed to request a Military Experience Waiver (replacing 3 credits of VWW):

1. Obtain a copy of your DD-214 or Memo from your Commanding Officer proving your 4-week deployment
2. Provide the above copy to your college academic advisor to request a waiver
3. Wait for your college to approve and confirm

Note: Credits are not being waived, only one of the two courses is being waived within the requirement. You may still need to complete three credits

in consultation with your academic advisor. Please contact the MVP or your academic advisor for questions and concerns.

Resources for Students

Veteran Mentorship Program

Many students who make the transition from the Military to Higher Education, suddenly experience a shift in lifestyles and cultures. This culture shift during their first-year is a crucial time in their lives, and the NMSU Veteran Mentorship Program will help foster a smooth transition.

Vision: The NMSU Veteran Mentorship Program will help our first-year student veterans make a smooth transition and succeed academically.

Goals:

- Help first-year student veterans successfully transition to an academic setting.
- Help first-year student veterans be aware of various financing options.
- Help first-year student veterans understand the process needed to receive VA education benefits.
- Help first-year student veterans be aware of various resources at NMSU and in the community.

For more information on the Veteran Mentorship Program, or to speak with our Mentor, please visit: <https://mvp.nmsu.edu/veteran-mentorship-program.html>

Military and Veteran Housing

New Mexico State University is one of the first in the nation to offer on-campus housing specifically designated for student veterans and their families transitioning out of the military and into student life. The Department of Housing & Residential Life has worked in conjunction with the Student Veterans Organization of NMSU to offer affordable housing on campus to student veterans attending the university.

For more information, please contact Housing and Residential Life: (575) 646-3202, housing@nmsu.edu, <http://housing.nmsu.edu>.

Service Members Opportunity Consortium (SOC)

The NMSU system has been designated a Servicemembers Opportunity Colleges (SOC) Consortium university. As a member of SOC, NMSU has committed itself to fully supporting and complying with SOC principles and criteria, ensuring that service members and their families share in the postsecondary educational opportunities available to other citizens. Those eligible are provided with appropriately accredited educational programs, courses, and services. The flexibility of programs and procedures particularly in admissions, counseling, credit transfer, course articulation, recognition of other applicable learning experiences, including those gained in the military, scheduling, course format, and residency requirements are provided to enhance access of service members and their families to undergraduate education programs. All SOC rules and regulations apply, including:

- Credit for military training and experience – NMSU recognizes and uses ACE Guide in evaluating military training experiences
- Reduced academic residency requirements – 25% maximum for most programs; 30% for 100% online programs
- No final year or semester requirement

- Credit for nationally-recognized testing programs such as CLEP (General and Subject exams), DSST (DANTES Standardized Subject Tests)

For further assistance contact:

Military and Veterans Programs
MSC 4740, PO Box 30001
Las Cruces, NM 88003-8001
(575) 646-4524
<http://mvp.nmsu.edu>

Reserve Officer Training Corps (ROTC)

The Reserve Officer Training Corps is a commissioning program designed to attract, motivate and train qualified students for military service as officers. The ROTC program is represented on the NMSU campus by the Department of Military Science (U.S. Army) and the Department of Aerospace Studies (U.S. Air Force).

Curricula in the Departments of Military Science and Aerospace Studies are divided into basic and advanced courses of two years each. Enrollment in the basic course is voluntary and involves no obligation. Participation in the advanced courses is on a contractual basis and leads to military service as a commissioned officer. Elective academic credit is granted by the University for ROTC classes.

Students with prior military service or Junior ROTC experience may receive credit, although not academic credit, for all or portions of the basic courses.

All qualified cadets enrolled in ROTC receive a stipend that varies dependent upon the year the cadet is in the program. Scholarships, which pay full college tuition as well as various laboratory, textbook, and incidental fees, are available on a competitive basis.

For more detailed information about the ROTC programs, see the College of Arts and Sciences departments of Aerospace Studies (<https://catalogs.nmsu.edu/nmsu/arts-sciences/aerospace-studies/>) and Military Science (<https://catalogs.nmsu.edu/nmsu/arts-sciences/military-science/>) in this catalog. Additional information may be obtained by contacting the departments directly at:

(575) 646-4030 (Army)
(575) 646-2136 (Air Force)

Aggies Green Zone

Green Zone is defined as a military zone that has been secured as a "safe" place for military personnel. Military and Veterans Programs created the Aggies Green Zone to help foster a safe and supportive environment where students feel welcomed and trusted during their transition from the military and throughout their educational journey. The Aggies Green Zone training program aims to help faculty and staff understand the needs, experiences, and cultural issues affecting military and veteran students.

Aggies Green Zone Allies

Aggies Green Zone Allies are sympathetic faculty and staff members that military, veteran, and dependent students can reach out for support. Allies are not expected to be experts in military and veteran matters, but they can make a positive impact by lending a sympathetic ear and connecting students with appropriate resources.

Faculty and Staff receive an Allies designation after participating in the Aggies Green Zone online and workshop training programs, and their contact information are listed on the MVP website. For more information,

please visit: <https://mvp.nmsu.edu/aggies-green-zone/green-zone-allies.html>

International Students

International students are an essential and valuable part of the NMSU community. International students enjoy all the rights, privileges, and protections of domestic students. They are subject to all the same responsibilities and regulations as their fellow domestic students. However, some special policies apply only to international students. The Office of International Student and Scholar Services (ISSS) ensures these requirements are met and works with international students to maintain their immigration status. Some students not seeking degrees, such as international exchange students, may work directly with the Office of Education Abroad.

Federal Regulations

An international student is any individual attending NMSU while present in the United States on a non-immigrant student visa (F-1, F-2, J-1, J-2, H-4, NATO visas, and possibly others such as students in temporary protected status).

Lawful permanent residents (green card holders) should present documentation of their status to University Student Records and go through the same admission process as U.S. citizens.

The United States Department of Homeland Security has established rules for students in non-immigrant status, such as those with F-1 or J-1 visa types. Some of these rules include the following:

1. For immigration purposes, each student must maintain full-time student status
 - a. Full-time status for fall and spring semesters is defined as 12 or more credits for undergraduates (only three online credits can apply to the full-time requirement).
 - b. Full-time status for summer is defined according to NMSU requirements. Exceptions possible for final semester. Consult ISSS officials for more details.
2. International students may not work off campus without authorization. On-campus employment may be authorized under certain conditions.
3. All international students must maintain an up-to-date record in the ISSS Office. This record must indicate the student's current living address, phone number, and email address.
4. Before admission, a prospective international student must demonstrate the following:
5. Academic ability to succeed in the chosen course of study.
6. Adequate financial support to complete the chosen course of study.
7. English language proficiency as defined by the university.

University Procedures for International Students

Regular Undergraduate Admission (Degree Seeking)

International students are subject to the same admissions standards as all other NMSU students, but some additional requirements apply.

This section addresses those additional requirements. Visit <https://issn.nmsu.edu/> for more information.

Applications for admission that include the transfer of credits earned at a non-U.S. university must include a professional Foreign Credential Evaluation (FCE) report from a member institution of the National Association of Credential Evaluation Services (NACES) (<http://www.naces.org/members.html>) for every transcript from a foreign secondary school and/or university attended. The ISSS department highly recommends that applicants consider using SpanTran for their FCE. NMSU has worked with SpanTran to provide applicants with clear understanding of which evaluation is needed. SpanTran provides an applicant portal to track and access evaluations. SpanTran is a long-standing member of NACES. For more information please visit <https://spantran.com/web/>

English Language Proficiency Requirements

For full undergraduate admission to the university, NMSU requires a score of 520 (paper-based) or 68 (internet-based) or better on the Test of English as a Foreign Language (TOEFL) or a score of 6.0 on the International English Language Testing System (IELTS), or a score of 95 on the Duolingo English test for all international students both non-degree and degree seeking.

A waiver of the TOEFL/IELTS requirement may be considered for:

1. Students who are native speakers of English.
2. Students from the following countries will be exempt from providing a TOEFL score for admission purposes. NMSU requires all admitted international students to take the English Language Placement Test for placement purposes.
 - a. Anguilla, Antigua, Australia, Bahamas, Barbados, Barbuda, Belize, Bermuda, Botswana, Caicos Islands, Cameroon (Anglophone), Canada (except Quebec), Cayman Islands, Christmas Islands, Cook Island, Dominica, England, Eritrea, Fiji, Gambia, Ghana, Grand Cayman Islands, Grenada, Grenada and the Grenadines, Guernsey, Guyana, Ireland, Israel, Jamaica, Jersey, Kenya, Kiribati Islands, Lesotho, Liberia, Malawi, Malta, Mauritius, Micronesia (Federated States of), Montserrat, Namibia, Nauru, New Zealand, Nigeria, Norfolk Island, Papua New Guinea, Philippines, Scotland, Sierra Leone, Singapore, Solomon Islands, South Africa, St. Christopher, St. Helena, St. Kitts and Nevis, St. Lucia, St. Vincent & Grenadines, Swaziland, Tanzania, Trinidad & Tobago, Tristan da Cunha Island, Turks & Caicos Islands, Uganda, Virgin Islands, Wales, Zambia, Zimbabwe
3. Students completing high school in the United States who (a) have attended the high school for at least two full years and (b) have scored in at least the 75th percentile in English on the ACT.
4. Students transferring from a two-year college, community college, or university in the United States who have earned a minimum of 30 acceptable semester credits (45 acceptable quarter credits) with a GPA of 2.0 or better (acceptable credit means classes that require a high proficiency in both written and oral English).
5. Students scoring a 70%–(3) or better in English with the International Baccalaureate.

The university reserves the right to require any prospective international student to meet the TOEFL or IELTS requirement.

English Language Placement Test

Placement in writing classes for international students is determined by the results of the English Language Placement Test (ELPT).

Based on the results of the ELPT, the student is either assigned to **ENGL 1105M** (a bridge course designed to ensure success in **ENGL 1110M**) or is allowed to enroll directly in ENGL 1110M (for multilingual students). Please note that these classes are only available on NMSU's Las Cruces Campus. International students excused from ENGL 1105M will be required to take ENGL 1110M. The student may then be required to complete one or more regular English classes as required for a particular degree. Completing basic English courses at other U.S. institutions does not automatically satisfy the ENGL 1110M requirement. Equivalencies for ENGL 1105M and equivalencies for ENGL 1110M or ENGL 1110G are determined by the University Student Records Office, who may refer exceptional cases to the English Department in the College of Arts and Sciences.

In cases of dramatic discrepancies between TOEFL/ IELTS scores and the ELPT, the ELPT results shall determine placement.

Proof of Financial Support

The university reserves the right to require advance deposit of funds for any period deemed reasonable before granting admission. Each prospective international student must submit a current financial support document with their application. This document must show that:

1. The person providing the financial support has the necessary funds.
2. The funds can be transferred from the student's home country to the United States.
3. Proof of adequate financial support should be sent directly to ISSS.

Admission Restrictions

International student admission may be prohibited if, Sufficient classroom-based courses are not available to maintain visa status (e.g. courses are online).

All application material, transcripts, national examination scores, transcripts from colleges or universities (with an English translation), and test scores (including the TOEFL or IELTS) should be sent directly to the NMSU Undergraduate Admissions at admissions@nmsu.edu. Please note that transcripts, test scores, and foreign credential evaluations sent directly from an applicant/student to NMSU will be considered unofficial. To be considered official, transcripts, test scores and foreign credential evaluations must come directly from the school, testing agency, or evaluation agency. All documents should be emailed to admissions@nmsu.edu.

SEVIS Check-In Course & Document Upload Portal

The SEVIS Check-In Course & Document Upload Portal is a mandatory online course for new undergraduate and graduate international students to NMSU. The SEVIS Check-In & Document Upload Portal is a Canvas Course. Students will receive an email invitation to the course once they have set up their NMSU email address. The course consists of 7 modules, and each module must be completed before proceeding to the next module. The Check-In Course covers important legal rules and requirements students must follow to maintain their F-1 status, as well as information about acclimating to New Mexico State University and the Las Cruces community. During the Check-In Course, new international students are required to submit specific documentation and physically check in with the International Student and Scholar Services office.

New international students should activate their NMSU email address <https://myaccount.nmsu.edu/activation> and reach out to the ISSS office at iss@nmsu.edu to be enrolled in the SEVIS Check-In

Course. In addition, the NMSU ISSS office will facilitate 3 Mandatory In-person SEVIS Check-In Session. The dates for these sessions will be found in the final module of the SEVIS Check-In Course.

For full consideration for undergraduate admission, applicants are subject to the following deadlines:

July 1 (application initiated)	Fall Semester
July 15th (all documents submitted)	Fall Semester
October 1st* (Study Abroad)	Spring Semester
November 15th (application initiated)	Spring Semester
December 1st (all documents submitted)	Spring Semester

**Admissions to summer terms is not available to new undergraduate international students due to the limited number of face to face course offerings.*

**New international graduate students seeking admission to summer terms are encouraged to work closely with their department and The Graduate School to assure that the student is enrolled in a schedule that meets federal enrollment guidelines*

** Contact the Office of Education Abroad for exchange program admission deadlines.*

Graduate International Students

For more information on graduate international student procedures, please visit the Graduate School (p. 76) section of this catalog.

Miscellaneous Regulations

Health Insurance

New Mexico State University (NMSU) requires all F-1 international students studying at NMSU to have health insurance coverage. It is the student's responsibility to purchase and maintain health insurance coverage while enrolled at NMSU. The health insurance coverage must cover the student while they are physically present in the U.S. including summer and winter breaks. NMSU will provide an educative role whereby NMSU will inform international graduate students with their options for obtaining health insurance along with the advantages and disadvantages of each option and allow the students to make an informed decision on their own.

- Canvas Health Insurance Course - All new international students at NMSU are required to complete the Canvas Health Insurance Course. Students will be sent a link to the course after they have enrolled in classes and activated their NMSU email address. Participation in the course is mandatory. Completion of the course acknowledges that you have been provided with the information necessary to make an informed decision regarding the purchase of your health insurance coverage. It acknowledges that you understand the pros and cons of the plan you selected, including **taxes and potential complications during subsequent change of status procedures.**

1. New international students are not permitted to enroll in classes until all ISSS requirements are met, including attending Aggie Welcome and Orientation, the Mandatory SEVIS Check-in Session, and taking the English Language Placement Test (when applicable, see English Language Proficiency Requirements section). All international students, are required to the campus to which they were admitted. The following are the offices that a student may need to report to:

- a. Las Cruces campus: International Student & Scholar Services, Suite 101 of the Educational Services Building (575) 646-2834, iss@nmsu.edu. (Note: Exchange students need to report to the Office of Study Abroad in 132 Garcia Center.)
 - b. Doña Ana Community College: International Student & Scholar Services, Sufficient classroom-based courses are not available to maintain visa status (e.g., courses are online).
 - c. Alamogordo Community College: Office of Student Services, Student Services Building, second floor
 - d. Grants Community College: Office of Student Services, Walter Martinez Building, Main Office Complex
2. Students in non-degree exchange J-1 visa status must be engaged full time in a prescribed course of study. Consult the Education Abroad Office for more details.
 3. All international students are required to register at the Aggie Health and Wellness Center within a week of arriving to undergo a TB test or submit results of a current TB test done in the home country within a week of arriving. Guidelines will be provided by the Aggie Health and Wellness Center.

TB test done in the home country within a week of arriving. Guidelines will be provided by the Aggie Health and Wellness Center.

International Exchange Students

An Exchange Student is defined as a visiting student who is coming to NMSU for one semester to one Academic Year but is not seeking a degree. An Exchange Student typically comes to NMSU from one of NMSU's partner universities or one of NMSU's partner consortiums.

All international exchange students are required to be enrolled in NMSU-approved health insurance. Office of Education Abroad will enroll the students and bill the insurance amount to the student's account.

Exchange Students are required to attend a mandatory Orientation before courses begin. Orientation will be scheduled and facilitated by the Office of Education Abroad, abiding by guidelines set forth by the US government per J-1 visa requirements.

Exchange students are subject to the same English Language Proficiency policies outlined in the section on University Procedures for International Students.

Application Process for International Exchange Students

Prior to admission to NMSU, a prospective international exchange student must be nominated from their home university, complete an application with the Office of Education Abroad (OEA) and submit their required documents. The process is as follows:

1. Nomination for exchange must be submitted by the Home University to the Incoming Exchange Coordinator by March 15 for Fall semester and September 15 for Spring semester. Please see your home university exchange coordinator for more information and to complete the nomination process.
2. Once a nomination is received, students will be directed to make an account at the OEA website: <https://iss.nmsu.edu/>
3. The student is then required to complete the Exchange Student Nomination Form Questionnaire and upload the following documents:

- a. Passport
 - b. Transcripts (in English)
 - c. Financial document showing proof of \$5,000 per semester attended. **ISEP students do not have to provide the financial documents**
 - d. Current TOEFL scores (2 years or less). See below for acceptable scores.
4. All international students, regardless of status, must apply for Admissions to NMSU <https://iss.nmsu.edu/future-students/undergraduate-admissions/step-1.html>. Once the Student's OEA application has been approved, **OEA Staff will submit the documents listed above to Admissions on behalf of the student.**

Academic Restrictions

The majority of the NMSU catalog applies to Exchange Students, with the following exceptions:

- Exchange students must take the English Language Placement Test.
- Courses must be taken at Main Campus only. Community college courses, including DACC, are not available to Exchange Students.
- The Nursing Department is the only department strictly off limits to exchange students, with case-by-case exception by the department and this would have to be approved well in advance of the student being nominated.
- Exchange students are required to abide by all pre-requisite requirements and class size restrictions (i.e., if a course is closed when the student goes to register, an exception cannot be made).
- Online courses are restricted due to visa requirements (no more than three credits can be taken online. Additional fees will apply).

Tuition, Fees & Other Expenses

All costs are given for one term/semester. The university reserves the right to change any of the charges without notice.

Campus Tuition Rates

For a full listing of all tuition rates from the NMSU System please see the University Accounts Receivable (https://uar.nmsu.edu/tuition_fees/) website.

Additional Fees

Undergraduate admission application fee	\$25.00
New student orientation fee - virtual session	\$99.00
New student orientation fee - in-person session	\$165.00
International student admission application fee	\$50.00
International student orientation fee	\$50.00
Academic Services Fee (per credit)	\$20.00
Course Delivery Fee (per credit)– (Grants Only)	\$25.00
ASNMSU Fee (Fall/Spring 1-11 credit enrollment)	\$33.50
ASNMSU Fee (Summer 1-8 credit enrollment)	\$12.40

Graduate Wellness/Fitness fee— (Fall/Spring 9+ credits)	\$159.30
Graduate Wellness/Fitness fee— (Summer 6+ credits)	\$141.60
Certificate degree fee	\$10.00
Bachelor or Associate degree fee	\$35.00
Master or Doctorate degree fee	\$45.00
Degree application late filing fee	\$50.00
Late Registration Fee Base Cost	\$25.00
Engineering Technology Fee	\$36.00-145.00

Course Fees (Fees Assessed Per Course)

See the Course Fee (https://uar.nmsu.edu/tuition_fees/) page for a list of courses with additional fees.

Applied Music courses - see Music (p. 778) section of catalog

Mandatory International Student Fees

International Student Health Insurance

New Mexico State University (NMSU) requires all F-1 international students studying at NMSU to have health insurance coverage. It is the student's responsibility to purchase and maintain health insurance coverage while enrolled at NMSU. The health insurance coverage must cover the student while they are physically present in the U.S. including summer and winter breaks. NMSU will provide an educative role whereby NMSU will inform international graduate students with their options for obtaining health insurance along with the advantages and disadvantages of each option and allow the students to make an informed decision on their own.

- Canvas Health Insurance Course - All new international students at NMSU are required to complete the Canvas Health Insurance Course. Students will be sent a link to the course after they have enrolled in classes and activated their NMSU email address. Participation in the course is mandatory. Completion of the course acknowledges that you have been provided with the information necessary to make an informed decision regarding the purchase of your health insurance coverage. It acknowledges that you understand the pros and cons of the plan you selected, including **taxes and potential complications during subsequent change of status procedures.**

Optional Fees

Wellness/Fitness Fee

The Wellness/Fitness fee is included in tuition for full-time students at the Las Cruces Campus. Options for part-time students enrolled at Las Cruces Campus include:

	Wellness	Fitness
Term pass for student enrolled in 6-11 credits	\$79.00	\$40.00
Term pass for student enrolled in 1-5 credits	\$105.00	\$53.00
Single visit for student enrolled in 1-11 credits	\$35.00	N/A
Tuition, Fees, and Other Expenses		

The Wellness fee grants access to the Student Health Center with charges accruing for medications, lab work, testing or procedures. The Fitness fee grants access to the Student Activity Center.

Health Insurance

Students who have access to the Campus Health Center may choose to purchase a commercial insurance policy offered through the Health Insurance Marketplaces established by the Affordable Care Act (ACA). These exchanges are intended to provide consumers with a new way to shop for, compare costs and coverage benefits, and enroll in insurance coverage. For more information visit: www.healthcare.gov (<https://www.healthcare.gov>) or www.bewellnm.com (<http://www.bewellnm.com>)

Housing Services

See the Students Resources (p. 1304) section for room descriptions, accommodations, application process, deposit requirement, regulations and eligibility.

For current rate information, please visit our website at: <http://housing.nmsu.edu/> (<http://housing.nmsu.edu>).

Dining Services

See the Dining Services (<https://dining.nmsu.edu/>) section for meal plan descriptions & pricing, application process, deposit requirement, regulations and eligibility. Freshmen living on campus must choose between Aggie Unlimited and Aggie Choice Plans.

Late Registration Fee

A late registration fee of \$25 is imposed if registration has not been completed before the late-registration period begins. Failure to make scheduled payments with the University Accounts Receivable on due dates will result in additional liability.

Payment of Charges

By enrolling in classes at NMSU, a student makes a financial commitment to pay the tuition and fee charges associated with his/her enrollment. The enrollment action constitutes a financial obligation between the student and NMSU and that all proceeds of this agreement will be used for education purposes and constitute an education loan pursuant to 11 U.S.C 523(a) (8). Terms and Conditions of Course Registration are posted on the University Accounts Receivable (UAR) website and available at time of Registration. Payments can be made by mail, web, telephone, or in person at University Accounts Receivable. Cash, checks, money orders and limited types of credit cards are accepted. All financial aid received must be paid towards balances owed. Additional penalty charges will be assessed for failure to make payments when due. The University reserves the right to cancel registration of any student who fails to pay, when due, any indebtedness to the institution if not completed by the deadlines as outlined on the UAR website under important dates related to your Student Account. Students are prohibited from registering for a term/semester until all previous debts due to the University are paid in full.

Payment Plan

For current information, please visit the Payment Plan website at <https://student-accounts.nmsu.edu> (<https://student-accounts.nmsu.edu/>)

Tuition Adjustments, Refunds and Forfeitures

Students officially withdrawing from all courses or dropping a course(s) during a semester or term are eligible for a 100-percent refund of tuition and fees through the deadlines listed online as outlined on the University Student Records website under Important Dates for Students for each term. Students withdrawing from a course(s) after that deadline will not be eligible for a refund and will remain liable for payment of full tuition and fee charges. Non-attendance does not constitute an official course drop or withdrawal. It is the student's responsibility to withdraw from the university and/or drop a course if he/she decides to not attend once enrollment has taken place. All charges due to NMSU must be paid before refunds or adjustments will be permitted.

In cases of academic or disciplinary suspension, eligibility for tuition refunds and adjustments will depend on the conditions of the suspension and will be entirely at the option of the institution. Should unforeseen circumstances beyond the reasonable control of New Mexico State University result in curtailing classes, closing residence facilities, or otherwise withdrawing services that are a normal function of the institution, refunds of any nature will be at the discretion of the college/university administration.

Residence hall rentals and dining hall charges may be refunded in accordance with schedules adopted by these departments.

Delinquent and Prior-Term Balances

NMSU reserves the right to cancel the registration of any student who fails to pay, when due, any indebtedness to the institution.

Dishonored Financial Transactions - Checks, Credit Cards, ACH Transactions

The University charges a penalty on all dishonored cash instruments. Personal checks will not be accepted from students who have had previously dishonored checks.

Estimating Other Expenses

In addition to the direct costs stated above, other expenses per semester may include such items as textbooks and supplies and personal expenses.

Cooperative Education

Students participating in the Cooperative Education Program who receive academic credit pay the same tuition and fees as regularly enrolled students. Work phase students who are assigned to campus or a nearby off-campus workstation may pay for the student wellness/fitness as if they were a part-time student enrolled in 1-5 credits.

Ways to Qualify for Lower Tuition Rates

Resident or nonresident status is determined in accordance to a uniform definition established for all New Mexico institutions by the Higher Education Department, State of New Mexico, NM Administrative Code (NMAC) 5.7.18. The University Student Records Office administers residency. Information on the following programs and offices that administer the reduced rate program may be obtained from the University Admissions, the University Financial Aid and Scholarship Services.

- American Indian Agreement
- Athletic Grant
- Colorado-Arizona Reciprocal Agreement
- Dual Credit
- Fire Fighter and Peace Officer Survivor Scholarship
- Foreign Military Dependent
- Foreign Military Spouse
- Foreign Military Stationed in New Mexico
- Foster Care
- Graduate Assistantship
- Immigrant Student (NM HS GRAD)
- Military Dependent
- Military Spouse
- Military Stationed in New Mexico
- NM Competitive Scholarship
- Part-time Students
- Senior Citizen Waiver
- Summer Session
- Texas 135
- Veteran Waiver
- WRGP
- Western Undergraduate Exchange

WUE states include Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington, Wyoming and the Commonwealth of the Northern Mariana Islands. For more information about any of the above ways to qualify for lower tuition rates please contact the University Accounts Receivable Office or the University Student Records Office.

Contact Information

Financial Aid & Scholarship Services

University Financial Aid and Scholarship Services administers a broad spectrum of grants, scholarships, work-study funds, and loans in an attempt to meet the financial need of NMSU students.

Students applying for financial aid must complete the Free Application for Federal Student Aid (FAFSA). Students must submit the FAFSA every year. The information reported on the FAFSA calculates the Student Aid Index (SAI). The SAI is an eligibility index number used to determine your eligibility for federal financial aid. The formula that establishes the SAI is instituted by law and is a result of the information provided on the FAFSA.

NMSU uses the SAI to determine your financial aid award. Some college scholarships also require an SAI. All information provided to the University Financial Aid and Scholarship Services is confidential.

Students can begin applying for financial aid by submitting a FAFSA through studentaid.gov (<https://studentaid.gov/>). Please refer to the

NMSU-Las Cruces, Financial Aid and Scholarship Services web site for more information on awards and policies at fa.nmsu.edu.

General Eligibility Requirements

To receive financial aid you must be admitted to NMSU as a degree-seeking student in an eligible degree or certificate program and demonstrate that you are qualified to obtain an education by:

- Having a high school diploma or recognized equivalent such as a General Education Development (GED) certificate or
- Completing a high school education in a home-school setting approved under state law or
- Achieving a passing score on an independently administered ATB test approved by the Education Department as a student who first enrolled in an eligible program of study *prior* to July 1, 2012 without a high school diploma, recognized equivalent, or did not complete home schooling, and could continue to qualify based on completing 6 credit hours from that eligible program.
- Being a U.S. citizen or eligible noncitizen (state funded scholarships are available to undocumented students).
- Having a valid Social Security number. If you do not have a Social Security number, you can find out more about applying for one at ssa.gov (<http://www.ssa.gov/>).
- Meeting satisfactory academic progress (SAP).
- Signing a statement on the FAFSA certifying that you will use Federal student aid only for educational purposes.
- Certifying that you are not in default on a loan under any title IV or HEA loan program, and have not exceeded annual or aggregate loan limits, and you are not liable for grant overpayment.

Financial Aid Awards

All financial aid awards are based on information provided by the student and/or parents, availability of funds, and eligibility requirements. Any award may be revised based on changes in enrollment, cost of attendance, application for graduation, family contribution or satisfactory academic progress. Withdrawals or reductions in enrollment may affect an award or any future awards. Financial Aid will not pay for audited courses or some repeats.

Grants

The Federal Pell Grant is a federal grant available to undergraduate students with documented financial need. If the Pell Grant is insufficient to pay educational expenses, the student may be eligible to receive other types of aid, including a Federal Supplemental Educational Opportunity Grant (SEOG) or Leveraging Education Assistance Partnership Program Grant (LEAP), and/or other miscellaneous grants. These grants are offered to undergraduate students who demonstrate exceptional financial need. Funds are limited and are awarded based on need and the priority date. For more information, contact University Financial Aid and Scholarship Services or visit the university's financial aid website at: fa.nmsu.edu/. (<http://fa.nmsu.edu/>) Generally, grants do not have to be repaid.

Work-Study Programs

Work-study is a federal or state-funded financial aid program that provides funds for part-time employment to students. Students earn their semester work-study award through hourly pay within on-campus or academic-related jobs. These awards are based on early

FAFSA submission, financial need as determined by FAFSA, and funding availability, so students are encouraged to apply before the March 1st priority deadline. Work-study jobs are a great opportunity for students to earn income and work within a professional career-oriented position. Students can apply for work-study positions using the NMSU Handshake application at nmsu.joinhandshake.com/. For more information on the U.S. Department of Education student aid programs, go to studentaid.gov or visit the NMSU Financial Aid web site at fa.nmsu.edu.

Scholarships and Other Aid

Many students finance part of their education with scholarships, which may be awarded for academic achievement, special skills, talent and/or based on the applicant's calculated financial need.

The NMSU System offers a variety of scholarships to incoming freshman, transfer, continuing and graduate students. State, institutional and private scholarships may also be available but amounts, deadlines and eligibility requirements vary. For more information, contact University Financial Aid and Scholarship Services or visit the university's scholarship web site at fa.nmsu.edu/scholarships (<http://fa.nmsu.edu/scholarships/>)

To be considered for most scholarships through the NMSU System you are required to apply online through Scholar Dollar\$, at scholarships.nmsu.edu (<https://scholarships.nmsu.edu/>) each academic year. One scholarship application serves all students in the NMSU system, regardless of campus.

Federal Direct Subsidized Loans

This is a loan program for eligible undergraduate students who demonstrate financial need. The U.S. Department of Education pays the interest on a Direct Subsidized Loan while the student is enrolled in school at least half-time (six-credit hours).

All undergraduate students who borrow for the first time after July 1, 2013 are subject to a maximum-time period to receive Federal Direct Subsidized Loans. Students may not receive Federal Direct Subsidized Loans for more than 150% of the published length of their academic program (measured in academic years). A complete explanation of Subsidized Loan usage limits is available at: fa.nmsu.edu/loans/federal-direct-loans. (<https://fa.nmsu.edu/loans/>)

Federal Direct Unsubsidized Loans

Loans that are not need-based and offered to eligible undergraduate and graduate students. Unlike other federal loans, interest accrues while the student is attending school.

Federal Direct Loan Requirements

Students receiving a subsidized or unsubsidized Federal Direct Loan, must complete an online Entrance Counseling session and a Master Promissory Note (MPN) before NMSU will issue the funds. In addition, students are required to complete the Student Loan Acknowledgment every academic year. Once Federal Loan Borrowers graduate, or withdraw from the institution, they must complete the Exit Counseling to avoid delays in receiving their transcripts or diplomas. Students may complete all these requirements at studentaid.gov (<https://studentaid.gov>).

Repayment of a Federal Direct loan begins six months after graduation or six months after enrollment drops below half time (less than six credits for undergraduate students and less than 5 credits for graduate students).

Withdrawals

Recipients of financial aid grants and loans who stop attending class, drop credit hours, or withdraw may be required to return all or a portion of awarded Title IV funds. Further information regarding the Return of Title IV funds is available on the NMSU-Las Cruces web site at fa.nmsu.edu/return-of-title-iv-funds (<https://fa.nmsu.edu/title-iv/>).

Financial Aid Satisfactory Academic Progress

Federal regulations require that financial aid recipients meet certain academic standards to be eligible for federal aid. The NMSU Office of Financial Aid will review the Satisfactory Academic Progress of financial aid recipients at the end of each payment term/semester to ensure continued eligibility. When evaluating SAP, all enrollment periods are considered regardless of whether the student received financial aid during those terms. For transfer students, credits accepted for their NMSU-degree program are counted toward Maximum Timeframe, but the transfer GPA is not calculated in the cumulative GPA for the Completion Rate. The Financial Aid SAP standards are not the same as the NMSU System's Academic Standards of Progress criteria. Students may learn more by visiting fa.nmsu.edu/sap.

Elements of Financial Aid Satisfactory Academic Progress

- Federal regulations require all students receiving financial aid to meet minimum qualitative and quantitative standards in order to maintain their eligibility for aid. Below are the minimum standards for SAP. The qualitative component of SAP measures a student's academic achievement by their cumulative GPA. The quantitative component is comprised of two parts: Completion Rate and Maximum Timeframe. Below are the descriptions of each SAP standard:

Grade Point Average (GPA)

- Undergraduate students must maintain a 2.0 cumulative GPA or greater on all hours attempted at NMSU. This is equivalent to an average letter grade of "C" or better.
- Graduate students must maintain a 3.0 cumulative GPA or greater. This is equivalent to an average letter grade of "B" or better.
- **Completion Rate: Pace of Progression**
 - All students, both undergraduate and graduate are required to pass and complete 70% of all classes attempted.
 - Grades of F, W, U, I or RR will be considered hours attempted but not completed.
- **Maximum Time Frame: Pace of Progression**
 - Students must attain their degree within 150% of the published credits required for a degree program.
 - Transfer-credit hours counted towards the student's degree program will be included in the maximum timeframe.
 - Limited developmental coursework will not count in the maximum timeframe.

Financial Aid Warning

"Warning" is a status assigned to a student who fails to meet satisfactory academic progress at the end of the payment term/semester. A student on Financial Aid warning may continue to receive financial aid for one payment term while in this status. If the student has not returned to satisfactory standing after this additional semester, they will be

suspended from further financial assistance until the satisfactory progress standards are met.

Financial Aid Suspension

Students who do not meet the SAP standards will be placed on Financial Aid Suspension. Students who have their financial aid revoked due to the failure to meet the SAP standards are ineligible to receive financial aid and are responsible for payment of their own tuition and fees. Students will remain on financial aid suspension until they are able to meet both the quantitative and qualitative SAP standards, or have an appeal approved by the campus' Financial Aid Office.

The Appeal Process

Students suspended from financial aid may appeal the suspension if there are extenuating circumstances affecting their progress. Students who would like to appeal the suspension must submit an appeal form, available at: fa.nmsu.edu (<http://fa.nmsu.edu>). They must also submit all supporting documentation to University Financial Aid and Scholarship Services.

A committee will review the appeal and may grant reinstatement of financial aid based on the extenuating circumstances that directly contributed to the deficient academic performance. To receive timely decisions from the committee, students are encouraged to submit appeals and supporting documentation by the priority date found at fa.nmsu.edu/sap (<https://fa.nmsu.edu/sap/>).

The Graduate School

New Mexico State University (NMSU) has a long history of providing formal graduate study. The first master's degree from NMSU was awarded in 1896. In 1921, the NMSU president appointed a committee to oversee graduate study. The Graduate School was formally established in 1956 with a full-time dean, and in the same year, 57 master's degrees were awarded.

The Graduate School mission is to provide affordable access to high-quality educational experiences, new modes of graduate education, and works with dedicated faculty to help students from diverse cultural and economic backgrounds reach graduate school success. Our vision is to empower students to succeed and excel while pursuing a meaningful education. In doing so, we cultivate the collaboration of academic, professional and personal skills while helping students graduate in a timely manner.

Diversity and inclusion statement

The Graduate School promotes a high-quality learning environment that embraces diversity and inclusion of every background, race, ethnicity, and

life experience. NMSU believes that a diverse student body is essential for learning, and NMSU is proud to be one of the few high-research universities that reflects Hispanic, Native American, other American cultures, as well as cultures from around the world. Our rich and diverse community includes international students from Africa, Asia, Central/South American, and Europe. The goal of NMSU and the Graduate School is to be fully inclusive in all forms of diversity, and to provide an environment where all are welcomed and empowered to be themselves and thrive.

Policies

Since graduate degrees are awarded for attainment in scholarship, the requirements stated in this catalog are to be considered as minimal. The major department or the dean of the graduate school may make additional requirements as deemed necessary for each candidate. Responsibility for securing approval of the proposed program of study rest with the student and is subject to the approval of the respective department head or program director. Frequent consultation with the advisor is essential to satisfactory progress toward degree completion.

Graduate Degree Programs

For a full listing of the Graduate Programs offered at New Mexico State University; please visit the future students page of our website: <https://gradschool.nmsu.edu/future-students/index.html> (<https://gradschool.nmsu.edu/future-students/>)

Admission for Graduate Students

A student seeking admission to graduate school at NMSU must hold a minimum of a bachelor's degree or an advanced degree from an institutional accrediting entity. The academic program of the completed degree should be equivalent to a comparable NMSU degree's requirements.

Application materials:

- Students must submit a complete Application for Admission.
- Other supplemental documents required by the academic department, may include but are not limited to, unofficial college transcripts, test scores (i.e., TOEFL, IELTS, Duolingo, GRE, GMAT), statement of purpose, writing samples, and letters of recommendation.
- Student must send official transcripts from their prior colleges or universities directly to the Graduate School.

Formal application is required of all prospective students, including graduates of NMSU, who seek admission to a graduate program. If a student is recommended for admission by the academic department, the student must submit all required application materials directly to the Graduate School.

No student is officially admitted into a graduate program until a Certificate of Admission has been issued by the Graduate School. The Graduate School considers the Certificate of Admissions valid for a one-year period. Some academic departments may require re-application if the applicant does not enroll in the semester noted in the certificate

Categories of Graduate Students

A student seeking admission to a graduate program is assigned one of the following categories based upon previous academic performance. Click here (<https://catalogs.nmsu.edu/nmsu/regulations->

[policies/#academicprogramsofstudytext](#)) for complete regulatory information within the different programs of study:

Doctoral Regular

To be considered for admission to a doctoral program, an applicant must have a minimum grade-point average of 3.0. Some doctoral degree programs also require a master's degree or its equivalent. NMSU does not admit a doctoral student on a provisional basis.

Master's Regular

An applicant whose scholastic record is satisfactory will be admitted as a regular student. This classification includes:

1. An applicant whose grade-point average is greater than or equal to 3.0, or a grade-point average greater than or equal to 3.0 in the last half of undergraduate work,
2. An international applicant whose grade-point average (or its equivalent) is greater than or equal to 3.0., from a four-year bachelor's degree or its equivalent.
3. A continuing graduate student whose grade-point average is greater than or equal to 3.0.
4. A student with prior graduate work at another institution whose minimum grade-point average is 3.0.

Master's Provisional

An applicant whose scholastic record does not meet the Master's Regular standards can be admitted provisionally. Students admitted as a Master's Provisional include:

1. A transferring graduate student whose cumulative grade-point average is less than a 3.0.
2. Students whose grade-point average the last half of undergraduate work is less than a 3.0 but has a minimum grade-point average of 2.5.

A student admitted provisionally must complete their first three courses, a total of 9 credits of graduate work, with a minimum grade-point average of a 3.0. A provisional student who does not meet the 3.0 grade-point average after 9 graduate credits hours is subject to dismissal.

A student admitted on a provisional basis is prohibited from working as a teaching assistant. However, they may work as a research assistant or a grader for one semester. To hire a provisional student, departments must submit an official letter to the Graduate School requesting permission.

Master's Undeclared

An applicant that has not decided on a specific graduate degree program and has an undergraduate minimum grade-point average of 2.5 may be considered for admission as an undeclared master student. International students with an F-1 visa are not eligible for undeclared master status.

Undeclared Student Enrollment Restrictions

- Undeclared students are restricted to enrolling in a maximum of 9 graduate credit hours. To continue enrollment the student must apply and be admitted into a degree-seeking program.
- Course restrictions placed by the graduate department may constrain enrollment by an undeclared student.
- An undeclared master's student is restricted to transferring 9 graduate credit hours to a degree program.
- Undeclared students are not eligible to receive a graduate assistantship.
- Only undeclared regular status students who meet all Title IV eligibility requirements are eligible to receive federal financial aid

for one consecutive 12-month period beginning the first term of enrollment. For questions about financial aid, undeclared master's student should contact Financial Aid and Scholarship Services.

Transfers from Undeclared to a Degree Program

Students transferring from an undeclared master's to a degree program require a new Application for Admission.

- If the student has 9 completed graduate credit hours, the cumulative minimum grade-point average must be 3.0 for the request to be considered.
- If the student transferring to a degree program has fewer than 9 completed graduate credit hours their admission is based on their undergraduate GPA (between 2.5 to 2.9 is Master's provisional; 3.0 or greater is Master's regular).

Graduate Certificate Program Students

Graduate certificate programs are designed to develop specific skill training and enhance a student's expertise to meet employment needs locally, regionally, nationally, and globally. A graduate certificate is a focused collection of courses, consisting of 12-18 credits, in a given discipline or a set of related disciplines.

A graduate certificate is not an official graduate degree of NMSU. A student that successfully completes a certificate program at the graduate level will receive a certificate of completion statement on their official transcript and a formal certificate from the Graduate School. A student has three years to complete a graduate certificate program.

The graduate certificate program is offered to both currently enrolled, degree-seeking students and students who enroll solely to obtain a certificate. Students currently enrolled in degree programs must apply separately to the graduate certificate program. Students wishing to enroll only in a graduate certificate program must meet all admissions criteria. Successful completion of a certificate program does not guarantee admission into a graduate degree program. A student enrolled in a certificate program must apply and be accepted into a graduate degree program.

A student enrolled in a graduate certificate program cannot transfer credits from another institution towards the completion of the certificate. However, transfer credits taken in a graduate certificate program may be applied towards an NMSU graduate degree program in the same focus area. The number of transfer credits will be determined by the program (program of study or degree audit). The time limit on transfer credits is 5 years after the completion of the certificate.

Students enrolled in a graduate certificate program *only* are not eligible for a graduate assistantship.

Master's Accelerated Program (MAP)

Master's accelerated programs (MAP) provide the opportunity for academically qualified undergraduate students to begin working on a master's degree during their junior and senior years of undergraduate study. A graduate program has the discretion to use up to 12 credits of NMSU coursework (450 level or higher) towards the completion of a master's degree. To be eligible for MAP, students must have a minimum GPA of 2.75 (Departments can require a higher GPA). MAP students must complete 60 credit hours of undergraduate work of which 25 credit hours must be completed at NMSU. To receive graduate credit for the 12 credit hours, students must receive a grade of B or higher. You can find more details about the MAP Policy and MAP form

here (<https://gradschool.nmsu.edu/Current%20Students/Graduate%20Forms.html#MAP1>).

Application Dates and Deadlines

Contact the graduate degree program for published application deadlines. If the graduate program does not publish a deadline, the Graduate School encourages the applicant to apply by March 15th for fall enrollment and by October 15th for spring enrollment to be considered for financial support. The Graduate School will continue to accept applications 30 days before the first day of classes. No application materials will be returned to the applicant.

Transcripts

An applicant is required to have one official transcript from each institution attended sent directly to the Graduate School.

If the applicant's undergraduate coursework is not complete at the time of application, they must submit an official transcript showing the completion of the course work directly after the degree has been granted.

Standardized Tests

Certain graduate programs may require standardized test scores for admission. An applicant may be required to take one or more of the following examinations as determined by the academic department: Graduate Record Examination, the Miller Analogies Test, the Graduate Management Admission Test.

See academic department program description for required testing.

Readmission

An NMSU student who has been out of school for more than two consecutive terms is required to submit a formal application for readmission to NMSU. The application will be reviewed by the Graduate School and academic department. The application should be submitted at least 30 days before the start of the semester.

A student who has attended other institutions during their absence is required to submit official transcripts to the Graduate School before the date of registration and be eligible to return to the college or university last attended. Student's readmission status and academic standing will be determined by previous NMSU academic standing, taking into consideration their academic performance at other institutions during the applicant's absence from NMSU.

Renewal of Application for Admission

The admission credentials for an applicant who does not register for the semester admitted are retained at the Graduate School for a period of one calendar year from the date of application. At the end of this period, credentials are discarded. A student wishing to renew their application after the one-year lapse must submit a new application.

Denied Admission

The Graduate School or the department may deny admission if the scholastic record or prior program of study is judged inadequate. If denied admission by a specific academic department, the applicant may be eligible to seek undeclared status as described in Categories of Graduate Students. If denied by the department, the student may wish to contact the department for additional information.

Admission may be denied to an otherwise qualified applicant when the desired program lacks resources to accommodate additional enrollment.

A student who is denied admission to one program and wishes to be considered for another program must complete a new application for the second program.

Application documents are retained by the Graduate School for one calendar year.

Non-Degree Admission

Non-degree admission is designed to meet the needs of an applicant who does not wish to pursue a degree or who has not yet completed the application process to a specific department. No more than 9 graduate credits earned in non-degree status may be transferred to a graduate degree program. Academic advising for non-degree students is obtained from the academic department. NMSU only recognizes graduate credit transfers for non-degree work from the University of New Mexico (UNM). Transfer credit is restricted to 6 credits with the approval of the appropriate department, the college dean, and the graduate dean.

A student classified as non-degree is not eligible to receive financial aid, student employment, or institutional tuition waivers; to participate in student government or intercollegiate athletics; and to receive benefits from veterans' programs.

Visiting Student

A visiting student is a student taking graduate credit to transfer to his or her home institution. An Application for Admission to the Graduate School must be submitted 30 days before registration. The student is required to submit unofficial transcripts. The academic department admits a visiting student. Visiting students are not eligible for undeclared status or for graduate assistantships.

Out-of-State Students and Legal Jurisdiction

By applying for admission/enrollment, both the student and parents agree that New Mexico law prevails and all litigation will be held in New Mexico federal court or state court in Dona Ana County, New Mexico.

Contact Information

For more information, contact:

Graduate School, MSC 3-GS
New Mexico State University
PO Box 30001
Las Cruces, NM 88003-8001
Phone: (575) 646-5746
<http://gradschool.nmsu.edu/> (<http://gradschool.nmsu.edu/>)

International Graduate Students

A graduate international student must hold at minimum a four-year bachelor's degree or its equivalent and is able to demonstrate English proficiency, both written and oral by submitting an official Duolingo, IELTS or TOEFL score report.

English Proficiency for Admission

Doctoral students must provide official proof of an English Proficiency minimum score as follows:

- TOEFL 79 IBT; 550 PBT
- IELTS 6.5
- Duolingo 105

International students can be admitted into a master's degree program with lower English Proficiency scores, as follows:

- TOEFL 68 to 78 IBT; 549 PBT
- IELTS 6.0
- Duolingo 95 to 104

Students with scores in this range are required to sit for the English Placement Exam prior to beginning academic coursework. (The International Student and Scholar Services Office will arrange this test upon arrival). If the results of the English Placement Exam do not meet the requirements for academic coursework, the student may be required to take additional academic English classes as part of the degree requirements (ENGL 1105M (<https://catalogs.nmsu.edu/search/?P=ENGL%201105M>) Intermediate ESL Composition and Grammar Review and/or ENGL 471 M (<https://catalogs.nmsu.edu/search/?P=ENGL%20471%20M>) Scholarly Writing for International Graduate Students).

The university reserves the right to require any prospective international student to meet the TOEFL or IELTS requirement.

Enrollment

All international graduate students on F-1 or J-1 visas are required to comply with Department of Homeland Security regulations governing maintenance of status related to full-time enrollment and making normal progress toward completing a degree. Therefore, all international graduate students are required to enroll in 9 or more credits (exclusive of audited work) during fall and spring semesters.

Transfer of Graduate Credits into a Degree Program

Graduate credits taken at NMSU as undergraduate electives may be transferred to the student's graduate program at NMSU. Graduate credits from another university may be transferred to NMSU, provided the credits were earned on the campus of an accredited institution. Transferred course work (credit and hours) is maintained separately from NMSU course work. Transfer credits must meet the same time-limit requirements (seven years) as master's level graduate classes at NMSU.

Immediately after initial enrollment in a graduate programs, students must submit a Transfer of Credit request form (<https://eltnmsu.sharepoint.com/sites/GraduateSchool/Forms/Forms/AllItems.aspx?id=%2Fsites%2FGraduateSchool%2FForms%2FGeneral%20Graduate%20Forms%2FGeneral%20Graduate%20Forms%2Ftransfer%5Fof%5Fcredit%5Fform1%2Epdf&parent=%2Fsites%2FGraduateSchool%2FForms%2FGeneral%20Graduate%20Forms%2FGeneral%20Graduate%20Forms>) to obtain formal permission from their advisor, department head, and the Graduate School dean to transfer graduate-level course work. The department has the responsibility to accept or reject transferred credits depending on various conditions, such as the course credit fits logically into an NMSU degree program, accreditation requirements, level of course work, grades, and other conditions deemed relevant by the department. The department may also require work to be validated by examination or until the work done at another institution is proven by satisfactory work in residence.

Special conditions:

- Master's degree - To meet residency requirements, students must take at least 50 percent of their required coursework at NMSU.
- Master of Fine Arts - Before consideration for candidacy, the department head and the graduate advisor will determine the number of transferable credits from a previous graduate program.
- Specialist in Education Degree - A maximum of 6 graduate credits earned at another approved institution may apply to the Specialist in Education degree. Transfer credits must have been earned during the five-year period prior to completion of the specialist in education degree.
- Graduate Certificates - Students enrolled in certificate programs may not transfer credits from another institution towards the completion of the certificate program offered by NMSU.
- Doctoral degree – students may transfer course work that the departments deem as logically fits into the program of study.

Graduate Certificates

Students enrolled in certificate programs may not transfer credits from another institution towards the completion of the certificate program offered by NMSU. However, they can transfer credits taken in a graduate certificate program at NMSU into a graduate degree program at NMSU, provided that the courses will lead towards a graduate degree in the focused area of the certificate program. The number of transfer credits will be determined by the program of study. The time limit on course transfer is five years after the completion of the certificate.

Master's Level

In order to meet residency requirements at the master's degree level, students must take at least 50 percent of their required coursework at NMSU.

Masters of Fine Arts

Before consideration for candidacy, the department head and the graduate advisor will determine the number of transferable credits from a previous graduate program.

Specialist in Education Degree

A maximum of 6 graduate credits earned at another approved institution may apply to the Specialist in Education degree. Transfer credits must have been earned during the five-year period prior to completion of the specialist in education degree.

Doctorate Level

At the doctoral level, students may transfer course work that logically fits into the program of study.

Funding Opportunities for Graduate Students

The Graduate School offers awards, assistantships, and fellowships to qualified graduate students. All awards require faculty nominations. Continuing and newly admitted students can request either a faculty member or the department head to nominate them for the Graduate School awards. The student must be admitted to the Graduate School before a request for an assistantship or fellowship will be considered by the department or the Graduate School.

In selecting individuals for any assistantship or fellowship and in the administration of appointments, New Mexico State University does not discriminate on grounds of age, ancestry, color, disability, gender identity, genetic information, national origin, race, religion, retaliation, serious medical condition, sex (including pregnancy), sexual orientation, spousal affiliation, or veteran status. The University limits the number of years a student may be supported on funds from the state of New Mexico. Departments may place additional limitations on the years of support. For detailed information, application process and deadlines please consult [https://gradschool.nmsu.edu/future-students/How To Apply](https://gradschool.nmsu.edu/future-students/How-To-Apply). A student should check **Graduate Assistant Employment Guidelines of the Graduate School**.

Assistantships

Graduate assistantships, including teaching and research, offered by New Mexico State University are awarded primarily by the students' academic department. Employment guidelines may be found at: Graduate Assistant Employment Guidelines of the Graduate School (https://gradschool.nmsu.edu/ga-and-union/grad-assistant-forms/Guidelines_on_Employment_of_Graduate_Assistants%20Jan%202023.pdf)

Students with assistantships must maintain full-time status by enrolling in and successfully completing 9 credit hours each semester. Students must also maintain a 3.0 grade-point-average. Courses taken for audit do not count in the minimum graduate assistant course load requirement. Graduate assistants should take no more than 15 course credits per semester. During their first semester at NMSU, if course deficiencies are identified, the student can register for 3 undergraduate credits and a minimum of 6 graded graduate credits to be eligible for a graduate assistantship. The graduate assistantship duties typically require students to work 20 hours per week (full-time, fall and spring).

Teaching Assistantships

A student seeking appointment as a teaching assistant will be required to demonstrate proficiency in communication skills necessary for satisfactory service in the classroom. All graduate students awarded an assistantship must complete the online mandatory orientation offered by the Graduate School. Departments may require students to complete workshops or orientations to qualify for assistantships.

Eligibility for teaching assistantships includes:

- Acceptance by and subsequent registration in the Graduate School and academic department
- Classification as a "regular" graduate student
- All international students seeking a teaching assistantship must demonstrate proficiency in English and competency in Pedagogy.

Teaching Assistantships for International Students

All international students seeking a teaching assistantship must demonstrate proficiency in English and competency in pedagogy. Prior to their first semester as a teaching assistantship, international students must undergo the NMSU International Teaching Assistant screening (ITAS) administered by the NMSU English Department on behalf of the Graduate School. International graduate students wishing to hold a teaching assistantship should check with their department to determine when they should arrive on campus to meet the screening requirement. The ITAS can be waived for international students who hold a degree from an accredited university in the United States, or a country where English is the official language of instruction. Departments also have the discretion to allow waivers for special circumstances.

The ITAS requires that a teaching assistant candidate deliver a short, ten-minute teaching demonstration of an introductory undergraduate level course in a topic relevant to their area of studies. The demonstration is observed by English Department faculty and an actual undergraduate student. Based on the results of the screening, the English Department observers present a report of findings to the department head where the graduate student will be a teaching assistant. Students who pass the screening exam are immediately eligible for assignment to a teaching assistantship.

Students who do not pass the screening exam must enroll in and satisfactorily complete **COMM 485, "International Teaching Assistant Development"** course before being eligible for a teaching assistantship. International students who don't pass the screening exam may be eligible to serve as graders for their academic departments. The academic departments must receive approval from the Graduate School to hire these students.

Assistantships for Provisional Graduate Students

Graduate students accepted on a provisional basis cannot serve as teaching assistants. However, they can serve as research assistants. Eligibility includes:

- Acceptance by and subsequent registration in the Graduate School and academic department
- Classification as a "provisional" graduate student
- Enrolling in and successfully complete 9 graded credits with a minimum of 3.0 GPA.
- Funded on research projects of the faculty of NMSU

Provisional students can also be hired as graders for one semester. The department must hire the student as a Graduate other at the time of completing the hiring path, so that the student be allowed to work as a grader.

Diversity Graduate Assistantships

The diversity awards are awarded thru the nominations process and allocated to departments on a competitive basis to help increase the diversity and quality of the student body. Departments will commit matching funds to support these awards for the student. The diversity award can be used to recruit domestic students. Please note that the award is for an academic year. Departments will need to commit funds to the selected student for at least one additional semester or preferably a year. The selected student must be admitted to the department prior to being nominated for the diversity award.

Fellowships

The Graduate School maintains a Fellowship and Grant Information webpage (<https://gradschool.nmsu.edu/scholarships-and-tuition/internal-funding-and-financial-aid.html>) providing a database of grants, fellowships and assistantships for graduate students. The university offers a number of fellowships available to both new and continuing students.

Graduate Assistant Tuition Fellowships

As an opportunity for departments to recruit and nominate outstanding graduate students to their programs, the Graduate School awards tuition fellowships to graduate assistants. Master's degree students will receive up to two years of support and doctoral degree students will receive up to three years of support. In order for students to qualify for a second and third year of support, they must maintain their status as graduate assistants for the duration of the tuition fellowship period. These awards

are for students receiving 10 hour or 20 hour graduate assistantships. Students must be enrolled in and successfully complete 9 graded credits with a minimum of 3.0 GPA. The tuition fellowships are paid for fall or spring semesters only and do not include fees.

McNair Graduate Assistantships

The Graduate School wishes to support and recognize the success of the McNair program by offering several McNair Graduate Assistantships for one academic year with a match of one year from a department. Students must be nominated by the department for this award.

Merit-Based Enhancement Fellowships for Current Graduate Assistants

To help departments reward outstanding graduate assistants, the Graduate School offers Merit-Based Enhancement Fellowships to graduate assistants who are engaged in the teaching or research mission of New Mexico State University. The amount of the award is \$4,000 for an academic year. Nominations must come from faculty.

Outstanding Graduate Assistantship Award

We also offer Outstanding Graduate Assistant awards of \$6,250 to recognize the contributions of eight (8) graduate assistants to the teaching and research mission of New Mexico State University. The awards allow faculty to show appreciation for the excellent work of graduate assistants. Current graduate assistants must be nominated by their faculty to be considered for the awards.

State of New Mexico Department of Higher Education (NMHED) Graduate Scholarship Programs

The purpose of the NMHED fellowships/assistantships is to "increase graduate enrollment in the state's public universities of students from groups underrepresented in graduate education" (Title 5 Post-Secondary Education, 5.7.15 NM Administrative Code). Underrepresented groups include women, minorities, the visually handicapped, the physically disabled and other groups that have are underrepresented in their field of study. Applicants must be U.S. citizens or permanent U.S. residents. Priority is given to New Mexico students from those groups with the most severe under-representation and students with the greatest financial need" (5.7.15.NMAC).

NMHED fellowships carry stipends of \$7,200 per annum and matched with half-time (10 hours per week) teaching assistantship provided by the student's department for a total award of \$15,800.

Eligibility:

- Fellowships are available for two years for master's students and four years for doctoral students.
- One of the NMHED fellowships is, when possible, designated for a McNair Scholar.
- Departments are required to: a) use their graduate assistantship budget to bring the amount of the award up to the current salary of a graduate assistant that is working 20 hours per week, and b) provide a 20-hour graduate assistantship to the student while they receive the NM Higher Education Department award.
- Eligible according to a standard needs analysis or financial aid officer's professional judgement.

For the student to establish financial need, students must complete a Free Application for Federal Student Aid (FAFSA) form available online in the Financial Aid and Scholarship Services Office. This form is not to be returned to the Graduate School. The results will be sent to the student

and the Financial Aid and Scholarship Services Office. **Students must have a complete file and have been approved for financial aid to be considered for this fellowship.** Preference will be given to those students that have a current FAFSA form on file at the NMSU Financial Aid office.

Click here (<https://gradschool.nmsu.edu/Current%20Students/Graduate%20Forms.html>) for the nomination process details.

Graduate Assistants Salaries and Tax Withholding Guidelines

Internal Revenue Service tax withholding guidelines require graduate students employed through NMSU to maintain at least 6 credits of course work during the fall and spring semesters and 3 credits of course work for summer sessions to be eligible for the student FICA tax exemption. Student employees who do not meet this requirement during any given pay period will be subject to Social Security taxes and Medicare taxes. Salaries for the three salary levels of graduate can be found here. (<https://hr.nmsu.edu/general-resources/toolkits1/grad-assistant.html>)

Level I (G1) - Applies to regularly enrolled students pursuing a master's degree. This level is also for a first year student seeking a doctoral degree who does not currently hold a master's degree. Once the doctoral student becomes a second year student and passes their qualifying exam, they can obtain support as a Level II (G2) student.

Level II (G2) - Applies to students pursuing the Education Specialist or Doctoral degree who have passed the qualifying exam or who have a master's degree in the same or cognate field and the recommendation of the head of their major department.

Level III (G3) - Applies to a doctoral student who has passed the comprehensive examination and has advanced to candidacy.

Graduate assistants employed at least ten hours per week will be given in-state tuition during the first 12 months of tenure if the Graduate School approves of the hiring process prior to census date (stated by the University Student Records Office as the third Friday of the semester each spring and fall semester).

If New Mexico resident status has not been established by the time of any reappointment, the graduate assistant may be subject to non-resident tuition rates.

Applications for state residency may be obtained in the University Student Records Office located in the Educational Services building.

Social Security Numbers in Student Records

As required by law, social security numbers are collected from prospective and current students who

1. Plan to seek employment on campus or
2. Wish to receive financial aid.
3. In addition, the university is mandated by federal tax regulations to provide tuition and fee payment information to the student and the Internal Revenue Service, so that applicable educational tax credits may be computed. The social security number will be necessary to submit this tax reporting. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

In order to be employed by New Mexico State University all students must have obtained a social security number within eight weeks of being hired or risk losing their assistantship.

When an official social security number is issued to an international student, it is the student's responsibility to inform Human Resources or the University Student Records Office as soon as possible.

Hourly Work

Eligibility for student payroll requires that a graduate student

1. Be admitted to the Graduate School as well as to a department,
2. Maintain a minimum cumulative GPA of 3.0, and
3. Be enrolled for at least 9 graded credits.
4. A student may not work more than 20 hours per week during the academic year. Students looking for current job postings should check with Student Success Center, Career Services, Hardman and Jacobs Undergraduate Learning Center 128 or visit <https://ssc.nmsu.edu/services/career-development.html>.

Students not classified as residents of New Mexico but working at an hourly rate are not eligible to receive in-state tuition.

Contact Information

For more information, contact:

Graduate School, MSC 3-GS
New Mexico State University
PO Box 30001
Las Cruces, NM 88003-8001
Phone: (575) 646-5746
<http://gradschool.nmsu.edu/> (<http://gradschool.nmsu.edu/>)

Postdoctoral Fellowships

Those individuals who are exemplary scholars, who have recently been awarded a doctoral degree, but who wish to continue their education and research experience under the direction of a professor at New Mexico State University are classified as postdoctoral fellows. The postdoctoral fellowship is a regular professional appointment normally for one or two years. Under no circumstances will an individual remain in this classification for more than three years.

Postdoctoral fellowships are advertised and applications are submitted to the hiring department in compliance with the guidelines for hiring professional staff, but without the requirement for a position description questionnaire. An "E-Hire" staffing authorization request must be submitted to the office of Human Resources by the hiring department. No offer of employment may be made until approval has been given by Human Resources. Persons classified as postdoctoral fellows pay Social Security and New Mexico State Educational Retirement.

A postdoctoral fellow has the following privileges:

- May take 6 credits in spring and fall semesters, 4 credits per summer session without tuition
- Is eligible to purchase an employee parking permit
- Is eligible for other employee benefits available to regular employees, including annual and sick leave, as well as health, dental, and life insurances
- May purchase athletic tickets, activity tickets, and gymnasium privileges
- Is eligible for library privileges

The University recognizes and supports the concept of off-campus study and research as a valuable experience for graduate students.

These experiences may take the form of internships, intensive study of specialized techniques with personnel at other institutions, and conducting research at specialized research facilities. Arrangements for such off-campus activities should be made with the student's committee and the graduate dean and should represent opportunities not normally available at this university. When the bulk of a student's research is to be conducted off-campus, both on- and off-campus advisors should be appointed and periodic meetings with the student's committee held to ensure timely progress. Such opportunities offer students considerable flexibility in their training and promote valuable contacts between the student, the university, industry, and research institutions. Students are encouraged to pursue these opportunities with their advisors and the graduate dean.

Agricultural Experiment Station

The Agricultural Experiment Station is the research division of the College of Agricultural, Consumer and Environmental Sciences. Faculty, professional personnel, and graduate students conduct basic and applied research concerned with biological, physical, and economic phases of food and fiber production, processing, and distribution; consumer health and nutrition; and the social and economic aspects of rural living. Energy, environmental, and natural resource conservation aspects of these broad disciplines offer many opportunities for the graduate student to undertake meaningful research investigations in both the laboratory and the field.

There are eight departments on the main campus with excellent laboratory facilities for research. In addition, the station maintains 13 field research centers including eight agricultural science centers, a forestry research center, a livestock research center, an animal insect lab, and two research ranches.

The station provides financial support to graduate research assistants and cooperates with research institutes at the university and with various state and federal agencies in providing opportunities for graduate research programs covering a wide scope of student interests. For further information, contact aesdean@nmsu.edu or visit <http://aces.nmsu.edu/aes/>.

Apache Point Observatory (APO-ARC)

Apache Point Observatory (APO) is located in the mountains of south-central New Mexico and is operated by New Mexico State University. The observatory is a major astronomical research facility that is home to four telescopes. The largest is a fully equipped 3.5-meter telescope that can be used for optical and infrared imaging, photometry, and spectroscopy. Apache Point Observatory is also the site of the Sloan Digital Sky Survey 2.5-meter telescope, which is running several different wide-field surveys touching on many facets of astronomy. NMSU owns and operates a 1-meter telescope at APO for wide field imaging. There is also a 0.5-meter telescope at the site.

Apache Point Observatory is owned by the Astrophysical Research Consortium (ARC). The consortium members include: New Mexico State University, the University of Colorado, the University of Virginia, the University of Washington, Georgia State University and Johns Hopkins University. NMSU manages and operates the observatory for the ARC consortium. Astronomy faculty and graduate students use the facility for various research projects. For further information, e-mail astro@nmsu.edu.

Arts and Sciences Research Center

The research center is the coordinating office for all scholarly activities within the College of Arts and Sciences. The primary functions are service to departments and faculty members, and the administration of grants and contracts. The center encourages and stimulates individual research and creative efforts in all areas of the college, and it facilitates the development of potential research programs within the college, and with other colleges, institutes, the Physical Science Laboratory, and external organizations. The center assists individual faculty members by providing small grants of "seed" money. Typically, support services fall within, but are not limited to, the following areas:

- Location of funding sources
- Administration of grants and contracts
- Financial management of grants and contracts
- Liaison with the Office of the Vice President for Research

Contact: Lorenza Sanchez at lorenzsa@nmsu.edu
<https://artsci.nmsu.edu/research/contact-research-center.html>

Bioinformatics Research Lab

The bioinformatics research lab develops efficient computational and statistical methods to model mechanisms of complex biological systems. The lab's work rigorously evaluates both the theoretical and practical effectiveness of computational methods for characterizing molecular interactions from high-throughput measurements such as next generation sequencing data. The lab's long term goal is to invent advanced computational technology to expedite quantitative understanding of the complexity of life processes.

Director: Joe Song
<https://www.cs.nmsu.edu/~joemsong/group.shtml>

Biology Research Facilities

The Department of Biology houses multiple core facilities and individually faculty-maintained research laboratories that have been successful in the acquisition of millions of dollars in research grants from the NIH, NSF, and other agencies. The facilities and equipment include cell culture facilities, insect and invertebrate rearing and microbiology culturing facilities, next generation DNA sequencing instruments, wide-field and confocal microscopes as well as a well-maintained herbarium and vertebrate museum holding more than 100,000 specimens from our region and beyond. Individual research laboratories are equipped to employ a diverse array of molecular, physiologic, behavioral and computational tools to address research questions related to: organismal and microbial evolutionary mechanisms and physiology; vaccine development; host-symbiont interactions; cell and developmental biology; neuronal and muscular tissues; animal vocalization and behavior; computational modeling of biological phenomena; and molecular systematics.

Contact: Dr. Charles Shuster (cshuster@nmsu.edu)

Bureau of Business Research and Services

Founded in 1969, the bureau has two basic objectives. The first is to provide business and economic research services to both public and private sectors of the state, the region and the nation. Research capabilities in the behavioral and managerial sciences, business systems, economic and social sciences, marketing, statistical design and analysis

and regional planning can be applied to problems relating to economic growth, business development and community needs in New Mexico.

The second objective of the bureau is to provide management training services to business organizations and associations, to government agencies, and to the public as well. Management development seminars, training programs, and analytical services are designed to meet specific organizational needs.

The Bureau of Business Research and Services is a member of the Association for University Business and Economic Research.

Carlsbad Environmental Monitoring and Research Center

Created in 1991 with a grant from the U.S. Department of Energy, the Carlsbad Environmental Monitoring & Research Center (CEMRC), a department of the College of Engineering, conducts environmental research, provides special analytical services, assists with technology development, and disseminates information for federal, state, and private sponsors. CEMRC is housed at Light Hall, a 26,000-square-foot facility located in Carlsbad, in southeast New Mexico. The facility's laboratories include radiochemistry and associated nuclear spectroscopy, environmental organic and inorganic chemistry, in vivo bioassay, and field sampling. A primary activity of CEMRC is long-term environmental monitoring for contaminants in the region of the Waste Isolation Pilot Plant (WIPP), located near Carlsbad. The data produced from this project are summarized in periodic reports and are presented on the CEMRC web site at www.cemrc.org. Primary research areas of the CEMRC include studies of atmospheric dust and inorganic contaminants, human and ecological risk assessment, and development of radioanalytical and spectroscopic methods for measurement of naturally occurring and human-produced radioactive elements. Results of CEMRC research projects appear in peer-reviewed scientific journals and are presented at national and international meetings.

Contact: Punam Thakur at 575-234-5531, pthakur@cemrc.org

The Center for Animal Health and Food Safety

The Center was founded in 2007 and is comprised of three primary functional research units:

1. Chemical Analysis and Instrumentation Laboratory maintains high-end analytical instrumentation which is available to support collaborative research within NMSU, the State of New Mexico and other educational or industrial partners.
2. Food Safety Microbiology Laboratory specializes in research and development of foodborne pathogen detection and control; food product testing, including microbiological analyses, pH, aw; process evaluation of acidified foods, inoculation studies, shelf-life testing, and contracting to establish food safety plans (e.g. HACCP plans, *Listeria* control programs).
3. Veterinary Entomology Research Laboratory provides a state-of-the-art large animal research facility located on 45 acres, with a 5000 sq. ft. large animal laboratory, capable of housing 24 animals individually in environmentally controlled rooms. The laboratory maintains multiple insect rearing facilities for major ectoparasites including: house flies, stable flies, horn flies, face flies, mosquitoes, lice, mites

and ticks. The facility has outdoor housing for 60 large animals in covered, individual outdoor stanchions, in addition to housing for wildlife species including: deer, elk, bighorn sheep and rabbits.

Director: **Dr. Brandon G. Smythe** (bsmythe@nmsu.edu) (575-646-1111)

Center for Latin American and Border Studies

The Center for Latin American and Border Studies (CLABS) was established in 1979 by the College of Arts and Sciences and is located at the Nason House. CLABS supports Frontera NorteSur, an on-line journal about the U.S.-Mexico border. In addition, CLABS supports the collection at the NMSU library, travel for faculty to conferences, language training in Spanish and Portuguese, lectures by visiting speakers, curriculum development for teachers, the student Latin American organization, and other outreach activities. It has a faculty governance organization and helps administer the Nason foundation fund. In recent years the center has pursued an active program of research on U.S.-Mexico border policy issues, in cooperation with several universities in the United States and Mexico.

Contact: Center for Latin American and Border Studies: <https://clabs.nmsu.edu> (<https://clabs.nmsu.edu/>)

Chemistry and Biochemistry Research Facilities

The Department of Chemistry and Biochemistry has a comprehensive equipment base that supports research in nearly all phases of chemistry. It also has instrumentation dedicated to the department's teaching mission. Major instruments supporting both missions include five nuclear magnetic resonance (NMR) spectrometers ranging from low field (200 MHz) to high field (500MHz), two atomic absorption spectrometers, several UV-Vis spectrometers, two mass spectrometers (LC/MS) and four gas chromatograph instruments. Details about all instruments located in the department's facilities can be accessed at <https://chemistry.nmsu.edu/research/research-facilities.html>

Contact Instrumentation Facilities: chembche@nmsu.edu ()

Cooperative Extension Service

As a land-grant institution, New Mexico State University has a tripartite mission—instruction, research, and extension. The three parts of this mission are closely interrelated and mutually reinforcing. New Mexico State University's Cooperative Extension Service serves a unique role in New Mexico. As the state's land-grant university, and as mandated by its charter, it is the "leading object" for agriculture, home economics, engineering, business, health sciences, as well as educational programs in the liberal arts and natural sciences. NMSU's uniqueness arises from its vision of teaching/learning, research, and extension/outreach functions—interdependent, mutually supportive and central to its land-grant mission.

The extension aspect of the university's mission is the process of extending the intellectual expertise and resources of the university through teaching and applied research to address the social, civic, economic and environmental challenges and opportunities facing our state, region, nation, and global community. Extension entails an organized and planned program of activities; these activities bring the resources of the university to bear in a coherent and strategic fashion for the benefit of the citizens of New Mexico and the nation. Many faculty

have split appointments with the Agricultural Experiment Station and serve as graduate advisors for students interested in extension as a career. For more information see <http://extension.nmsu.edu/>.

Core University Research Resources Laboratory

The Core University Research Resources Laboratory (CURRL) is a campus-wide, core facility providing all levels of technical support and consultation for investigators needing analytical and routine transmission, scanning electron microscopy, and light microscopy services. The integrated imaging facility is administered through the Office of the Vice President for Research and is considered a core research facility. The facility was established to furnish state-of-the-art microscopy instrumentation and techniques to investigators and their students for research and training.

Director: Dr. Tanner Schaub (tschaub@nmsu.edu)

<https://research.nmsu.edu/RCP.html>

DISSECT Laboratory

DISSECT (Discovering Science through Computational Thinking) is a laboratory established by a joint team of researchers from the Department of Computer Science and the College of Education. The lab is housed in Computer Science on the second floor of the Science Hall. DISSECT provides physical space and facilities to nurture interactions between computational scientists and educational researchers in order to develop innovative technologies that will expose K-12 students to fundamental principles of computing. The laboratory provides workspaces and high-performance workstations for graduate students as well as a dedicated network and offices for researchers and visitors.

Program Coordinator: Raena Cota gk12@cs.nmsu.edu

Engineering Research Center

The mission of the College of Engineering's Engineering Research Center (ERC) is to support the faculty and staff of the college in building research programs of nationally and internationally recognized excellence. The ERC assist faculty and staff in their pursuit of research funding, management of their research, and in ensuring research activities are in compliance with all relevant laws and regulations.

The ERC disseminates information to the college regarding state, national and international research trends, programs and policies. The ERC identifies potential funding opportunities and calls for proposals that may be a fit for college faculty and staff. The ERC works with the Office of the Vice President for Research and the other NMSU colleges to bring together multi-disciplinary teams.

Engineering Research Center for Bio-Mediated and Bio-Inspired Geotechnics (CBBG), Engineering Research Center for Re-inventing the Nation's Urban Water Infrastructure (ReNUWIt), Tran-Set: Transportation Consortium of South-Central States, and iCREDITS: Interdisciplinary Center of Research Excellence in Design of Intelligent Technologies for Smart Grids.

For proposal preparation, the ERC pre-award team assists the faculty with interpretation of sponsor guidelines, development of the proposal budget, completion of standardized forms, review of the proposal for adherence to sponsor requirements, and submission to the NMSU

Office of Grants and Contracts for their review and final submission. The post-award staff assist the faculty and staff with award management, including working with the NMSU Sponsored Projects Accounting office. The ERC is responsible for financial management of college grants and contracts.

Freeport-McMoran Copper & Gold Water Quality Laboratory

The Water Quality Laboratory in the College of Engineering was established by a gift from Freeport-McMoRan. It is located in ECIII rooms 106 and 110. Current capabilities of the lab include:

- Dionex ICS-2100 Ion Chromatographic System (ICS) with an AS-DV autosampler, the ICS-2100 is configurable for either anions or cations;
- PerkinElmer Elan DRC-e Inductively Coupled Plasma for Mass Spectrometry (ICP/MS) with dynamic reaction cell (DRC) capability;
- Perkin Elmer Series 200 High-Performance Liquid Chromatography (HPLC) with UV/Vis Detection;
- Gas Chromatography (Agilent model 7890) using a mass spectrometer detector (Agilent model 5975C) (GC/MS) using an Agilent 7693 autosampler;
- A 16-vessel Multiwave 3000 Microwave Reaction System by Anton Paar;
- Micromeritics ASAP 2050 High Pressure Sorption Analyser that uses a dewar with liquid nitrogen or antifreeze for temperature control. The antifreeze temperature is controlled from -20° to +75° Celsius using a PolyScience PD15R-30 recirculator bath;
- Shimadzu TOC-Vcsh Total Organic Carbon Analyser (TOC) with a Total Nitrogen Measurement Unit (TNM-1) option;
- Malvern Zetasizer Nano ZS for zeta potential and size measurement of suspended particles;
- Anton Paar Surpass for zeta potential measurement of membranes, granules, or fiber particles; and
- A Millipore Direct Q3 water purification system.

Analyses may be performed by a researcher after receiving training on the device.

Geochemistry Research Laboratory

The Department of Geological Sciences houses a number of analytical instruments, all of which are available for use by graduate students, undergraduate researchers, and faculty. The department houses a Laser-Ablation Multi-Collector Inductively Coupled Plasma Mass Spectrometer (LA-MC-ICPMS) for analysis of isotopic ratios of microsamples, an X-ray fluorescence spectrometer for geochemical analysis of rocks and other solid materials, a thermal ionization mass spectrometer for analysis of isotopic ratios of solids and liquids, and a laser-induced breakdown spectrometer for the analysis of solid materials. Sample preparation equipment is available to support research on these instruments. In addition, mineral separation equipment including a jaw crusher, Gemini

shaker table, Franz magnetic separator, and heavy liquids, is available for geochronologic or other mineralogic research projects.

Contact: Dr. Nancy McMillan (nmcmilla@nmsu.edu)

ICredits: Interdisciplinary Center of Research Excellence in Design of Intelligent Smartgrids Technologies

The Center, funded through a grant from the National Science Foundation, is focused on the development of novel hardware/software technologies and methodologies to enable the design, development, deployment and evaluation of microgrids and smartgrids. The Center is housed in Science Hall; it supports research activities at the boundaries between power systems and computer science. The Center also promotes the development of educational and outreach activities aimed at enhancing the awareness and training in all areas relevant to the smartgrids vision.

Contact: Dr. Enrico Pontelli (epontell@nmsu.edu)

Institute for Energy and the Environment

The Institute for Energy & the Environment (IEE) is a unit within the Engineering Research Center IEE's programmatic efforts focus on interdisciplinary research, education, and outreach to develop comprehensive solutions for environmental, energy and water challenges in the southwestern United States and worldwide. IEE offers opportunity for conducting research to the graduate and undergraduate students at NMSU. IEE's major objectives include renewable energy, biofuel, advanced water treatment and desalination, and advancing education, training and outreach in areas of environment, energy and water.

Director: Dr. Phillip DeLeon (pdeleon@nmsu.edu)

Knowledge Discovery and Data Mining (KDD) Research Lab

The Knowledge Discovery and Data Mining (KDD) research lab aims at advancing techniques for the effective management and analysis of complex data (e.g., sequence data, graph data, semi-structured data). The laboratory conducts research in modeling, storing, querying, and mining large amount of complex data at both theory and application levels. The laboratory keeps active collaborations with scientists from other Computer Science areas and scientific disciplines to broaden the usage of data management and data mining techniques. The laboratory is located in Science Hall, Rm. 153.

Director: Huiping Cao

Knowledge Representation, Logic and Advanced Programming Laboratory (KLAP)

The KLAP lab was established in 1994 through an RIMI grant from the National Science Foundation and has developed into a focal research laboratory of international reputation. It is housed in the Department of Computer Science. KLAP's research focus is to advance state-of-the-art knowledge in Artificial Intelligence and High Performance Computing and its application in diverse interdisciplinary domains such as bioinformatics and assistive technologies.

The lab provides a full meeting space (with multimedia projection capabilities), access to eight high performance work stations, a dedicated

high performance computing server and a 40-core Infiniband Beowulf cluster. The lab has hosted international researchers and has graduated approximately 100 graduate students with MS and Ph.D. degrees. It has attracted almost \$10,000,000 in external funding.

Director: Dr. Enrico Pontelli (epontell@cs.nmsu.edu)

Networks and Systems Optimization Lab (NSOL)

The Networks and Systems Optimization Laboratory (NSOL) supports research in networking and communication including, but not limited to: wireless networks, the Internet, supercomputing networks, and online social networks. This research includes optimization problems, protocol design and development, hardware design and development, and mechanisms for improving security and privacy of communications (including cybersecurity). The lab has a 24 core blade server (RAID-10) that is used for extended simulations and back-up, five desktops, five laptops, and four smartphones, which form a networking testbed.

Director: Satyajayant "Jay" Misra

<https://computerscience.nmsu.edu/research/groups-labs.html>

New Mexico Department of Agriculture

The New Mexico Department of Agriculture (NMDA), under the control of the NMSU Board of Regents, is responsible for administering laws and regulations that daily affect the lives of every citizen of the state. These laws and regulations (concerning the production, preparation, processing, sale, and use of agricultural products; weights and measures; and petroleum products) are designed to assist producers, processors, and consumers. NMDA's marketing program provides guidance to commodity groups in the promotion of agricultural products. A broad consumer service in many areas other than agriculture is provided by the department. NMDA's director is New Mexico's secretary of agriculture and serves on the governor's cabinet as a liaison between state government and the agricultural industry. For further information, e-mail: pio@nmda.nmsu.edu. NMDA's web site is at <http://www.nmda.nmsu.edu>

New Mexico State University Library

The New Mexico State University Library is a Destination for Discovery that offers access to rich content and research-level collections in two library facilities located in the heart of the campus. Zuhl and Branson libraries house over 1.8 million items and provide electronic access to scholarly journals and databases for both general academic and discipline-specific research. View the large geological collection and artworks on display at Zuhl Library and explore historical collections within the Archives and Special Collections Department at Branson Library. Reference assistance and research support are provided by a team of faculty and staff dedicated to student learning and success. There are a variety of study areas available including quiet and group spaces, some of which can be reserved. Over 100 PCs, scanners, laptops, and other resources are available for students to use. More detailed information may be found at <http://lib.nmsu.edu>.

New Mexico Water Resources Research Institute

The New Mexico Water Resources Research Institute (WRRI) at NMSU, established in 1963, was one of the first of 54 water institutes in the United States. The WRRI program encompasses all state universities

in New Mexico and public agencies sponsoring water research. The institute serves as a coordinator, assisting researchers in obtaining funds, working with granting agencies, and serving as the administrator for projects. The annual budget of approximately \$1.5 million is made available from federal, state, and/or private sources through a variety of grants and contracts. All research projects administered by the institute encourage graduate student participation. As a result, about 30 students a year receive scientific training through institute-sponsored projects. WRRRI also sponsors the Annual New Mexico Water Conference, which has provided a public forum for state water issues since 1956. Public participation helps the institute focus its research program on areas of greatest need. The WRRRI publishes research results of every project it administers and other miscellaneous reports. The WRRRI also maintains a water resources reference room with 2,000 books and documents and the ability to link to 10,000 water-related documents on water issues facing the state and the nation. E-mail may be sent to nmwrrri@nmsu.edu. The WRRRI's homepage address is <http://nmwrrri.nmsu.edu/>.

Oak Ridge Associated Universities Program (ORAU)

Since 1991, students and faculty of New Mexico State University benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 98 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOA facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at <http://www.oraug.org>.

ORAU's Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU's members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact:

Dr. Luis Cifuentes - Vice President for Research (575) 646-2481

ORAU Corporate Secretary (865) 576-3306; or Visit the ORAU Home Page (<http://www.oraug.org>)

Physics Research Facilities

The Department of Physics operates a PANalytical Empyrean x-ray diffractometer for low-resolution powder diffraction, high-resolution diffraction, reciprocal space mapping with a triple-axis crystal, and x-ray reflectance. It also operates a J.A. Woollam variable angle of incidence ellipsometer (VASE) with a computer-controlled Berek waveplate compensator for measurements from 190 to 2500 nm, at room temperature and from 80 to 800 K. Both instruments are integrated into CURRL and available to the campus community and off-campus users for a fee. See <https://phys.nmsu.edu/research/research-programs.html> for more information.

Contact Dr. Stefan Zollner (zollner@nmsu.edu).

Play and Interactive Experiences for Learning Lab (PIxL)

The Play and Interactive Experiences for Learning (PIxL) Lab works at the intersection of games, human-computer interaction, and mixed reality, developing game experiences that educate and function as scientific experiments in HCI. Projects center around the best means of interfacing with games, including keyboard and mouse and controllers all the way to gesture-based input, wearable systems and mixed reality. Prior research has investigated the use of games for training firefighters, and ongoing research applies this to disaster response in general and military projects. The lab provides space for students, as well as access to workstations, a modular wearable computer, tracking sensors and games.

Director: Zachary O. Toups (ztoups@nmsu.edu)

Programming Languages Environments and Software Engineering (PLEASE) Laboratory

The PLEASE lab pursues research in the practical aspects of software development, including programming languages, programming environments, and software engineering. The lab is housed in Science Hall 167 and includes workstations and work space for graduate students pursuing research in relevant areas.

Director: Jonathan Cook
<http://www.cs.nmsu.edu/please>

Psychology Research Facilities

The Department of Psychology emphasizes research in social psychology, engineering psychology, and cognitive psychology. Faculty investigate such issues as mother-infant interactions and the impact of cortisol responses to stress upon development; visual search; human factors research; auditory perception; prospective memory; emotion and social decision-making; evolutionary psychology; skill acquisition; social cognition; perception and action; embodied cognition; cognitive neuroscience (control of attention, neural dynamics; and brain-computer interfaces); and research and statistical analysis methods.

All faculty have designated labs with a large central area and 3-4 smaller adjacent rooms. This facilitates data collection from small groups or individuals. Research using the department's subject pool is managed with an online system.

The department has specialist facilities that include an EyeLink 1000 eye tracking system with experiment builder software; two 128 channel Biosemi ActiView-2 EEG systems and two shielded rooms; eight analysis workstations; and a Neuroconn DC Stimulator Plus tDCS stimulator. The lab collaborates with the Mind Research Network that has access to a Siemens 3T Trio research MR scanner, a Magvis 132 channel MEG system, and Biosemi and Geodysics EEG systems. The Auditory Perception Lab has a remote-controlled robot with binocular vision and stereo audition that is used to assess auditory performances in applied settings; another remote controlled robot to test perceptual interfaces for remotely-operated vehicles; a 30-element speaker array to simulate real-world auditory environments; and two portable eye trackers housed in the PACMANE (Perception, Action and Cognition in Mediated, Artificial and Naturalistic Environments) lab.

For more information: <https://psychology.nmsu.edu/>

Research Initiatives in the College of Health, Education and Social Transformation

The College of Education has research initiatives and labs in the following areas:

- The Kinesiology and Dance Department offers lab space for the study of biomechanics, sport psychology & motor learning, applied and basic physiology, healthy aging, physical education curriculum and kinesthetic learning.
- The Speech and Hearing Center's Benfer for voice and speech science research.
- The Special Education/Communication Disorders Department's Autism Research Initiative.
- Alliance for the Advancement of Teaching and Learning in collaboration with the Southwest Regional Educational Lab REL (Institute for Educational Services, IES) provides research for partner school district practitioners on accountability, special education/response to intervention, literacy, leadership development, math and science achievement, and program evaluation.
- The Institute for Mathematics and Science Education oversees multiple mathematics and science grants as well as serving as the STEM Outreach Center for K-12 education.
- The Counseling and School Psychology Training and Research Center provides counseling services for students, training for graduate students in counseling, school psychology and counseling psychology, and conducts research on counseling outcomes and processes.
- A Reading Research Center is housed in the NMSU Children's Village and provides reading diagnostic services including analysis of reading using eye-tracking software.

Southwest Institute for Health Disparities Research

To address the substantial health disparities that exist in Southern New Mexico and the U.S./Mexican Border Region, New Mexico State University has recently established the Southwest Institute for Health Disparities Research within the College of Health and Social Services. The purpose of the Institute is to assist faculty to secure external funding and conduct research which has the potential to reduce health disparities and improve minority health, provide health related community outreach programming, provide training for researchers, lay groundwork for

additional funded research, and attract highly qualified minority faculty and graduate students to NMSU.

Dr. Jill McDonald (jillmcd@nmsu.edu)

<https://swihdr.nmsu.edu> (<https://swihdr.nmsu.edu/>)

Southwest Technology Development Institute (SWTDI)

SWTDI, formally the Southwest Regional Experimental Station or SWRES, was established in 1977 under DOE funding as a Photovoltaic research center. Over the last 30 years SWTDI has conducted extensive long term panel, inverter, and systems testing providing significant contribution to the field. One substantial consequence of the system testing has been the accumulation of knowledge related to the safety, installation methodology, design, and development industry standards in PV. Today SWTDI continues to be a leader in education and development of article 690 of the National Electric Code (NEC), Solar Photovoltaic Systems and continues its research in long term panel and inverter testing. However, in 2012 SWTDI integrated with the Electrical and Computer Engineering Department of NMSU to broaden the research focus and has developed a microgrid for expanded research into renewable integration into the electric grid and demonstration of ongoing collaborative research with the ECE department on industry partners.

<https://ece.nmsu.edu> (<https://ece.nmsu.edu/>)

Spatial Applications and Research Center (SpARC)

The SpARC laboratory was established in 1982 as an applied contract research laboratory for the NMSU Geography Department. SpARC provides a variety of services including planning and research, GIS, image processing, modeling and training. The original purpose of the laboratory was to undertake externally funded projects under the direction of geography faculty and employ students within the department. Thirty-four years later, the laboratory continues to do project related work. It has employed more than 150 students and provided assistance to more than 35 faculty members inside and outside Geography. The primary clients of the lab have been federal state and local government agencies, with an emphasis on applied transportation, water resource, and environmental research projects. The lab houses 11 high performance workstations, a range of mapping grade GPS units, and a large scanner/plotter. Software available for use includes database software, ENVI image processing software, TransCAD, and the entire suite of Esri GIS software. http://smiley.nmsu.edu/SparcWebsite/BGIS2Index_2012.html

Director: Dr. Christopher Brown (brownchr@nmsu.edu); (575) 646-1892

Crimson Research

Crimson Research is designed to assist researchers, agency directors, business leaders, and policy makers in all aspects of survey research and program evaluation. Housed in the College of Health, Education and Social Transformation, the Center has state-of-the-art hardware and software for conducting phone and internet surveys of any type and length as well as facilities for conducting face-to-face interviews and focus groups. Crimson Research provides a wide array of services: questionnaire design, sampling, data collection, and statistical analysis for telephone, mail, and internet surveys. Center staff are also able to assist and conduct all forms of program evaluation from formative to summative approaches, including process, outcome and impact

evaluations. Bilingual (Spanish/English) questionnaire translation and interviewing are also available.

Director: Dr. Joe Tomaka (tomaka@nmsu.edu; (575) 646-3525)

https://publichealth.nmsu.edu/research_and_outreach/crimson_research.html

University Museum

Established in 1959, the New Mexico State University Museum has provided 50 years of service to the university and community. The University Museum assists NMSU in providing quality education, advancing knowledge through research, and celebrating the culture and history of the southwest and the University. The Museum serves the community as a repository and exhibitor of local and regional history and culture. Through its care and maintenance of donated ethnographic, historic and prehistoric objects, it preserves an important part of Southwestern and Border region culture and history. The Museum encourages faculty and student research using our diverse cultural materials.

The Museum's collections are primarily anthropological (archaeological and ethnographic) with secondary collections in history and the natural sciences. Anthropological collections document the cultural diversity of the border in the Greater Southwest and northern Mexico. The Museum preserves and catalogs collections to promote research and access to cultural materials. Exhibits are developed by students and staff as well as brought in from other institutions.

Director: Dr. Fumi Arakawa (farakawa@nmsu.edu)

Curator: Dr. Kristin Otto, krotto@nmsu.edu

Advanced Manufacturing - Concentration

The graduate concentration in advanced manufacturing educates students and creates a skilled workforce for the growing needs of new technologies and advanced products in the 21st century. The program provides hands-on experience on designing, adapting, and building parts using advanced materials by including new processes, changing the supply chain, and adapting business models. It also includes the design optimization, materials selection and characterization, process parameter mapping, data analytics, software development, and final part inspection among other concepts. This concentration is maintained by the College of Engineering but is open to any Master's level major/degree.

Prefix	Title	Credits
Required Courses		
I E 575	Advanced Manufacturing Processes	3
I E 571	Advanced Quality Control	3
C E 510	Introduction to Nondestructive Testing	3
CHME 564	Polymer Science & Engineering	3
CHME 491/AGRO 450	Undergraduate Special Topics (AGRO 450 CHME 491 Development of Agricultural Technologies)	3
Electives		
5 Electives (Select 500 Level Courses from EE, CHME, IE, CE, or MAE) ¹		15
Total Credits		30

¹ With Approval of the advisor and instructor

Selection of Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester, but they must select a degree option and permanent advisor before registering for the second semester.

In considering a decision about option and advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of study to discuss specific educational objectives. The student can use these meetings to become familiar with faculty interests and research projects currently in progress. The faculty member must agree (in writing) to serve as the student's advisor.

Although there is no oral exam, students will be required to complete an exit-interview with one of Advanced Manufacturing concentration and one graduate faculty member from the master of engineering they select to study.

Doctoral Degrees

A

- Aerospace Engineering - Doctor of Philosophy (p. 177)
- Animal Science - Doctor of Philosophy (p. 178)
- Applied Statistics - Doctor of Philosophy (p. 179)
- Astronomy - Doctor of Philosophy (p. 180)

Accounting - Master of Accountancy

The Master of Accountancy program (MAcc) is recommended for students wishing to fulfill the Certified Public Accountant (CPA) 150-hour education requirement which most states, including New Mexico, have adopted.

Admission Requirements

Admission requirements of the NMSU Graduate School must be met before the applicant may be admitted to the MAcc program.

Consideration for admission to the MAcc program is dependent on an applicant's undergraduate record. The Graduate Management Admissions Test (GMAT) is also required, unless the student meets one of the GMAT waiver conditions listed below:

1. The student graduated with an undergraduate degree in accounting from a US AACSB accredited business school with at least a 3.25 GPA overall and a 3.25 GPA in their upper division accounting courses; or
2. The student is a graduate of NMSU's undergraduate accounting program with at least a 3.25 GPA overall and a 3.0 GPA in core upper division accounting classes; or
3. The student holds a recognized professional accounting credential (such as a CPA, CMA, CIA, CFE); or
4. The student holds a post baccalaureate degree (such as an MBA, MS, MA, JD) from an approved, US AACSB-accredited university with a minimum 3.0 GPA in graduate course work.

In addition to the aforementioned entrance requirements, an applicant's GPA in accounting prerequisites must be at least 3.0. For those students not receiving their undergraduate accounting degree at NMSU, it is expected that substantially all of the accounting prerequisite classes be from a **US AACSB accredited business school** or the application will need to be approved by the MAcc Admissions Committee. In this case the Admissions Committee may require that some of these prerequisite courses be retaken at an US AACSB institution such as NMSU.

Accounting Prerequisites (18 Credits)

Each applicant must complete, at a minimum, the following 18 credits of accounting courses from a US AACSB accredited business school prior to being considered as a candidate for the Master of Accountancy degree:

Prefix	Title	Credits
ACCT 2110	Principles of Accounting I	3
ACCT 2120	Principles of Accounting II	3
ACCT 301	Financial Accounting I	3
ACCT 302	Financial Accounting II	3
ACCT 403	Federal Taxation I	3
ACCT 451	Auditing Theory and Practices	3
Total Credits		18

No coursework applied toward the MAcc degree, including the prerequisite requirements, may be taken on an S/U basis.

Master of Accountancy Requirements

Candidates with an undergraduate degree in accounting must successfully complete a minimum of 30 graduate credits. Candidates with an undergraduate degree in a field other than accounting must complete additional prerequisites upon previous courses taken.

Prefix	Title	Credits
<i>Required Courses (9 credits)</i>		
ACCT 555 or ACCT 564	Federal Tax Research ¹ Financial Accounting Research	3
ACCT 559	Ethics and Professionalism in Accounting	3
ACCT 510	Technical and Professional Communication for Accountants	3
<i>Electives in ACCT from the following for a total of 5 courses (1 course may be from upper division Accounting courses numbered 450-498) (15 credits)</i>		
ACCT 530	Advanced Accounting	3
ACCT 544	Financial Statement Analysis and Valuation	3
ACCT 551	Advanced Auditing Theory and Practice	3
ACCT 560	Taxation of Corporations and Shareholders Advanced	3
ACCT 580	Professional Accountancy	3

Other Courses for a total of 2 courses (6 credits approved by MAcc Program Director)

Elective 1	3
Elective 2	3
Total Credits	30

¹ If an accounting research course is not used to fulfill the research requirement, a student may take the course to fulfill an elective requirement.

MAcc Courses

Each student must complete 21 credits in accounting courses numbered above 520. These courses must include a research class (either ACCT 555 Federal Tax Research or ACCT 564 Financial Accounting Research) and Ethics in Accounting (ACCT 559 Ethics and Professionalism in Accounting). In addition, three of the credits may be in upper division undergraduate elective accounting courses numbered 450 or higher. Other specific courses to be completed by each candidate will be determined in the advisement process.

Other Courses

All students must also complete a total of 9 credits in other courses. Three of the credits must be ACCT 510 Technical and Professional Communication for Accountants, and the rest must be approved electives. Neither ACCT 503 Accounting for Managers nor any course fulfilling the foundation requirement may be included. Any student wishing to be waived from any of the above requirements may submit a petition in writing to the MAcc Director. Each request will be considered individually by the MAcc Committee.

Comprehensive Examination

There is no comprehensive examination requirement. However, satisfactory performance on a graduate portfolio assignment is a requirement for completing the MAcc degree.

Thesis: No thesis is required; however, under special approval, a candidate may elect to write a thesis under ACCT 599 Master's Thesis. Up to 6 credits may be earned for the thesis.

General

Graduate degrees require a cumulative graduate GPA of 3.0 or higher. The Department of Accounting and Information Systems requires, in addition, that every candidate for the MAcc degree maintain at least a 3.0 grade-point average in all accounting courses used to satisfy the core and elective course requirement. MAcc students may not retake 500-level accounting courses for which they have previously received a grade without the approval of the MAcc Admissions Committee.

Aerospace Engineering - Master of Engineering in Aerospace Engineering

Coursework Option

Prefix	Title	Credits
Requirements		
M E 570	Engineering Analysis I	3
Core Courses		
Select one course from each of the following 4 topic areas: ¹		12

Aerodynamics

Select one from the following:	
M E 530	Intermediate Fluid Mechanics
A E 533	Numerical Methods for Fluid Mechanics and Heat Transfer

Structural Dynamics and Control

Select one from the following:	
M E 512	Vibrations
A E 527	Linear Systems Theory

Mechanics

Select one from the following:	
M E 502	Elasticity I
M E 504	Continuum Mechanics

Engineering Analysis

Select one from the following:	
M E 518	Applied Finite Elements

Thermal Science

Select one from the following:	
M E 503	Thermodynamics
M E 540	Intermediate Heat Transfer

Additional Requirements

Select three courses (500 level or above) from any departments and two courses (500 level or above) from any college: ² 15

Total Credits 30

¹ Graduate M E courses may be substituted for A E courses with the approval of the Graduate Program Coordinator.

² If course is not in A E or M E program, approval of the Graduate Program Coordinator is required.

Academic Advisor and Final Exit Survey

Newly admitted Aerospace Engineering Masters of Engineering students will be assigned the Graduate Program Coordinator as an academic advisor.

All students must take Professional Master's Degree Exit Survey to graduate, which will be conducted by the Graduate Program Coordinator and will be taken after completing all coursework.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to an MAE faculty advisor about your MAP plan and develop a course plan in consultation with the advisor. The faculty advisor should preferably be from the MAE area of your interest.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.

- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
A E 451	Aircraft Design	3
A E 452	Control System Design	3
A E 464	Advanced Flight Dynamics and Controls	3
M E 502	Elasticity I	3
M E 503	Thermodynamics	3
M E 504	Continuum Mechanics	3

Aerospace Engineering - Master of Science

Thesis Option

Prefix	Title	Credits
Requirements		
M E 570	Engineering Analysis I	3
Select at least 18 credits of A E graduate courses ¹		18
Master's Thesis (at least 6 credits)		6
A E 599	Master's Thesis	
Select one or both from the following:		3
A E 509	Individualized Study	
A E 598	Special Research Programs	
Total Credits		30

¹ Up to 6 credits of M E graduate courses may be substituted with the approval of the Graduate Coordinator. All courses must be 500 level or above. The program of study may include up to 6 credits of A E 510 (Special Topics courses offered formally on a one-time basis) with the approval of the Graduate Coordinator. A E 509 (M E 509) or A E 598 (M E 598) cannot be counted towards these 18 credits of AE (ME) graduate courses.

Publication Requirement

A refereed conference paper accepted or a refereed journal article in review or accepted by graduation. The M.S. thesis can be a reformatted version of this paper. Exceptions may be made on a case by case basis by the department head.

Selection of Permanent Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester, but they must select a degree option and permanent advisor before registering for the second semester.

In considering a decision about option and advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of study to discuss specific educational objectives. The student can use these meetings to become familiar with faculty interests and research projects currently in progress. The faculty member must agree (in writing) to serve as the student's advisor.

All students must pass a final examination. The final examination is to be conducted by the student's advisory committee and is taken after completing all coursework and thesis work.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. Agriculture (Agribusiness) - Master of Agriculture

The Master's of Agriculture with Concentration in Agribusiness degree provides students with the skills and knowledge necessary to successfully manage modern businesses operating in the food and

fiber supply chain. The program curriculum has been developed with an emphasis on providing economic and business analytical knowledge and skills for students and industry professionals with a broad range of disciplinary backgrounds.

Candidates for the Master of Agriculture (MAG) with a concentration in Agribusiness must successfully complete a minimum of 33 graduate credits.

All students in the MAG program must successfully complete the following:

Prefix	Title	Credits
Required Courses		
AEEC 5110	Introduction to Quantitative Methods	3
AEEC 5150	Economic and Financial Analysis of Agribusiness	3
AEEC 5220	Financial Derivative Markets	3
or BFIN 511	Financial Derivative Markets	
AEEC 5140	Agricultural Policy	3
AEEC 5320	Microcomputer Applications in Agriculture	3
AEEC 5330	Agribusiness Marketing	3
AEEC 5340	Agribusiness Management	3
AEEC 5996	Special Topics (Global Food Supply Chain Management)	3
Technical Courses (6) ¹		6
	Technical Course 1	
	Technical Course 2	
Creative Component or Thesis (3-6 hrs) ²		3-6
AEEC 5994	Creative Component Project	
AEEC 5999	Master's Thesis	
Total Credits		33-36

¹ Students in consultation with their Graduate Committee Chair and with the approval of the Department Graduate Committee Chair, select two technical agriculture courses. These courses may come from another discipline or college or maybe taught within the Department of Agricultural Economics and Agricultural Business.

² In lieu of AEEC 5994 Creative Component Project or AEEC 5999 Master's Thesis, students can take 2 additional courses approved by their committee chair and the Department's Graduate Committee chairperson.

A thesis (AEEC 5999 Master's Thesis, 4-6 credits) is not required but can replace the creative component. The course AEEC 5997 Individual Study can be included as one of the 3-4 elective choices for 3 credits with any additional credits in AEEC 5997 Individual Study having approval of the student's graduate chair. An oral defense must be scheduled and completed as prescribed by the Graduate School. The defense must be preceded by a seminar to present major findings of the creative component or thesis research to faculty, fellow students, and the interested public.

Agriculture (Domestic Animal Biology) - Master of Agriculture

The Department of Animal and Range Sciences at New Mexico State University offers a non thesis coursework Master of Agriculture degree with a Concentration in Domestic Animal Biology (MAG-DAB) which provides students with graduate training in animal nutrition and physiology. The degree is earned after satisfactory completion of 32 credit hours of upper division and graduate-level courses. The curriculum is completed in two or three academic semesters and includes a creative component which can be met in several ways.

Students having an undergraduate degree in an area of agriculture or a related field may consider the MAG-DAB as an alternative to a Master of Science which traditionally involves preparation of a thesis. Students who may benefit from this program include those in need of additional advanced science-based coursework in preparation for applying to a professional program in veterinary medicine. Other individuals may be interested in careers in the cooperative extension service, education, or the feed and pharmaceutical industries where an advanced degree may be of benefit to advancement. The curriculum outlined below will assist students in preparing for a number of career opportunities.

Admission to the Program

The MAG-DAB program is administered through the Department of Animal and Range Sciences and is coordinated by the Animal Science Graduate Committee. Admission to the program requires acceptance by the NMSU Graduate School as well as the Department of Animal and Range Sciences. Basic requirements include an undergraduate degree in an agricultural or a related major from an accredited college or university and an undergraduate GPA of 3.0.

Depending on undergraduate training, some individuals may need to complete deficiency classes. In addition, the graduate school may require international students to complete one or more English language courses. Applications to the Department should include three letters of

reference, a resume, and a statement of interest in advanced graduate training.

Once admitted to the program, each student will work with an advisor to develop a course work plan of study. The advisor and the student will also select an advisory committee consisting of two departmental faculty members and a third member from outside the department who will normally serve as the Dean’s representative to the committee.

Inquiries about the MAG-DAB Program should be directed to the Chair of the Animal Science Graduate Committee.

For the Master of Agriculture with a concentration in Domestic Animal Biology, students must complete 32 credit hours of graduate courses which include 2 credits of ANSC 598 Special Research Programs for the creative component.

Prefix	Title	Credits
All students in the MAG-DAB Program will complete the following classes:		
ANSC 484	Ruminant Nutrition	3
ANSC 501	Advanced Animal Nutrition (so)	3
ANSC 509	Endocrinology of Domestic Animals (f)	3
ANSC 512	Research Methods in Animal Science (s)	4
ANSC 515	Graduate Seminar ¹	1
ANSC 580	Environmental Physiology of Domestic Animals	3

Elective Courses
 In consultation with their graduate advisor, students choose at least 12 credits from the following list of core courses (other classes may be considered on an individual basis):

ANSC 462	Parasitology	12
ANSC 507	Laboratory Techniques in Nutrition (f)	
ANSC 520	Advanced Nutritional Management I: Feedlot (se)	
ANSC 521	Advanced Nutritional Management II: Cow Calf/Stocker (so)	
ANSC 560	Rumen Microbiology (so)	
ANSC 602	Advanced Reproductive Physiology (fo)	
ANSC 604	Hypothalamo-Hypophyseal-Pineal Endocrinology (fe)	
ANSC 605	Gonadal and Uterine Endocrinology (fe)	
ANSC 606	Endocrinology of Pregnancy, Parturition, and Lactation (fe)	
ANSC 621	Metabolic Functions and Dysfunctions (fe)	

¹ must take two semesters of seminar

Creative Component

The creative component of the program involves completing at least two credits of ANSC 598 Special Research Programs. This requirement can be met in one of two ways. In consultation with the advisor, the student can select a topic of importance in domestic animal biology and prepare a comprehensive literature review covering that topic. An alternative way to meet this requirement is for the student, in consultation with the advisor, to conduct a research project and prepare a written manuscript for evaluation by the advisory committee. In either case, the student will present results of the project in the graduate Seminar (ANSC 515) and then be examined by the advisory committee.

In certain cases, the student may request approval from the Advisory Committee to complete two additional graduate courses (at least six credits) in lieu of one of the reports described above. If this approach is approved, the oral examination at the end of the program will cover all the courses completed during the MAG-DAB Program. Students pursuing this option must also prepare and present a topical seminar in ANSC 515 at some time during the program.

Agricultural and Extension Education - Master of Arts

Thesis Option

Prefix	Title	Credits
AXED 5110	Management of Change, Diffusion, and Adoption of Innovations	3

New Mexico State University master’s accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master’s degree **during their junior and senior years** while completing a bachelor’s degree. Typically, a bachelor’s degree requires four years to complete, and a master’s degree requires an additional two years. The master’s accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. Students can take up to 12 credits of AXED graduate courses and get dual course credit that can be applied to both an undergraduate and master’s degree.

You can also check the NMSU catalog for additional information about our programs.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

AXED Courses Eligible for MAPS:

Upon approved enrollment to the AXED MAP Program, the following courses may be taken in the undergraduate program of study.

Prefix	Title	Credits
AXED 5110	Management of Change, Diffusion, and Adoption of Innovations	3
AXED 5155	Youth Program Development and Management	3
AXED 5150	Strategic Communications Campaigns and Evaluation	3
AXED 5320	Risk and Crisis Communications in Agricultural, Consumer, and Environmental Sciences	3
AXED 5165	History and Philosophy of Agricultural and Extension Education	3
AXED 5510	Research Methods	3

Agricultural Biology - Master of Science

There is currently a strong need for M.S. graduates trained in these areas, and the demand is expected to increase dramatically.

Students are prepared for careers in research, extension, teaching, private consulting, industry, and government or to continue in a broad range of Ph.D. programs. Specific career opportunities include positions as agricultural consultants, technical and sales representatives for industry, state departments of agriculture and USDA specialists, agricultural extension agents, industry research and environmental technicians.

The Master of Science degree program in Agricultural Biology is designed to produce graduates with the academic and research background needed to facilitate effective, innovative, and environmentally sound protection of plants and animals from a wide and varied spectrum of pests.

Prefix	Title	Credits
Program Requirements		
EPWS 590	Graduate Seminar ¹	1
<i>Electives</i> ²		12
<i>Experimental Statistics</i> ³		3
<i>Courses within EPPWS</i>		13

EPWS 462	Parasitology
EPWS 471	Plant Mineral Nutrition
EPWS 486	Plant Virology

EPWS 551	Special Topics ⁴
EPWS 560	Ecology and Management of Invasive Plant Species
EPWS 573	Fungal Biology
EPWS 599	Master's Thesis
Total Credits	30

- ¹ All graduate students are required to enroll in two (2) credits of Entomology, Plant Pathology and Weed Science seminars. Typically, a student will take one seminar credit during the first semester of graduate school and present their thesis proposal plan. Each student will take the second seminar credit in their last semester and present a public exit seminar just prior to the defense of their thesis work
- ² *Outlines for M.S. degree plans are generated by the student in consultation with the major professor and with input from the student's assigned graduate committee.*
- ³ Exact course is selected with professor and/ or committee based off previous statistics experience.
- ⁴ Maximum of 4 credits per semester. No more than 9 credits toward a degree.

Additional Requirements- Outlines for M.S. degree plans are generated by the student in consultation with the major professor and with input from the student's assigned graduate committee.

- A minimum of 30 credit hours of graduate work is required of which:
 - a. At least 15 credits must be in courses numbered 500 or above.
 - b. At least 15 credits must be in EPWS courses.
 - c. At least half of the credits (exclusive of thesis) must be taken with other than a single professor.
- Designated hours to be completed:
 1. Students must take at least four but not more than six credits in EPWS 599 Master's Thesis. Students enrolled in EPWS 599 may be asked to present progress updates.
 2. At least three credit hours in graduate-level Experimental Statistics

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to a faculty advisor about your MAP plan and develop a course plan in consultation with the advisor.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
EPWS 511	Introduction to Weed Science (f)	4
EPWS 514	Plant Physiology	3
EPWS 520	Environmental Behavior of Pesticides (so)	3
EPWS 505	Advanced Integrated Pest Management	3
EPWS 573	Fungal Biology	3

Agricultural Economics - Master of Science

Students entering the MS program are required to have completed

- intermediate microeconomics and intermediate macroeconomics (completed with a B grade or better),
- a college-level calculus class, and
- a course in statistics that included linear regression analysis.

Students that have not completed these courses may be admitted with the requirement that they take them as deficiencies at the beginning of their graduate program. Prospective graduate students must have at least a 3.0 undergraduate GPA. Students with a GPA less than 3.25 must complete the GRE or the GMAT exam.

Completion of the Master of Science degree in agricultural economics requires completion of a minimum of 33 graduate credit hours. Twenty-one of the credits must have one of the following three prefixes: AECC, ECON, or ECDV. Twenty-four of the credits must be associated with course numbers greater than 500/5000. All students in the MS program must successfully complete the following core courses:

Prefix	Title	Credits
M.S. CORE (16-18 credits)		
AECC 5120	Microeconomic Theory	3
AECC 5130	Macroeconomic Theory	3
AECC 5240	Econometrics	3
AECC 5360	Production Economics	3
AECC 5999	Master's Thesis ¹	6

Choose 3 Classes from AEAB Block (9 hrs) ²		9
AECC 5220	Financial Derivative Markets	
or BFIN 511	Financial Derivative Markets	
AECC 5210	International Agricultural Trade Theory and Policy	
AECC 5320	Microcomputer Applications in Agriculture	
AECC 5330	Agribusiness Marketing	
AECC 5340	Agribusiness Management	
AECC 5140	Agricultural Policy ²	
AECC 5350	Economics of Water Resource Management and Policy	
AECC 5996	Special Topics	
AECC 5997	Individual Study	
Additional Graduate Courses (~6 hrs) ³		6
Total Credits		33

¹ AECC 5999 minimum hours required by the Graduate School are 4 with a maximum of 6 toward the degree. If a student elects to complete the minimum of 4 hours, they will need to take an additional course to meet the 33 hours required for the degree.

² AECC 5140 must be taken as part of this AEAB Block if not previously completed as an undergraduate under AECC 3140V.

³ One of these two choices may include three (3) additional hours of AECC 5997. In lieu of these 2 additional graduate courses, a student may select a justifiable minor (9+ hours) per Graduate School policy and only 2 courses (6 hours) from the AEAB Block.

MS students are generally required to write a thesis (AECC 5999 Master's Thesis (4-6 credits). Non-thesis options that include a non-thesis research project (AECC 5991 Non-Thesis Research Project, 3 credits) or an internship (AECC 5998 Internship, 3 credits) must have approval from the student's committee and the graduate chairman. Students pursuing the MS degree may not complete the graduate program with more than one C grade in the core courses. If a student receives C grades in two of these core classes one of the classes must be repeated with a grade of at least B. In addition to core courses, nine additional credits must be completed from an agricultural economics and agricultural business (AEAB) course block. AECC 5140 Agricultural Policy must be taken in the graduate program if an agricultural policy course was not taken as an undergraduate. Individual study (AECC 5997 Individual Study) is limited to 6 credits hours toward a the degree. An oral defense is required of all master's candidates and will be scheduled and completed according to the guidelines of the Graduate School. The oral defense must be preceded by an open seminar to present major research findings to faculty, fellow students and the interested public.

Athletic Training - Master of Science

The Master of Science in Athletic Training (MSAT) program at NMSU comprises 60 credit hours of coursework through traditional and hybrid courses. The MSAT is a 2-year (24-month) professional degree program that starts in June and prepares students to sit for the Board of Certification (BOC) exam leading to the ATC credential. NMSU is currently seeking accreditation for the program through the Commission on Accreditation of Athletic Training Education. Admissions are competitive, and applications are managed via the ATCAS (<https://nam10.safelinks.protection.outlook.com?url=https%3A%2F%2Fatcas.liaisoncas.com%2Fapplicant-ux%2F%23%2Flogin&data=05%7C01%7Ckbrock%40nmsu.edu%7Cd228741566ea4134dc0908daeea5592d>)

%7Ca3ec87a89fb84158ba8ff11bace1ebaa
 %7C1%7C0%7C638084691182801088%7CUnknown
 %7CTWFpbGZsb3d8eyJWljoImC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6Ikl1he
 %7C3000%7C%7C%7C&sdata=gp8M
 %2FW6I6ReVZ7tC5gGCAXuCWXmpwHa7TeZY%2Bd0WMLE
 %3D&reserved=0) central application system. The application deadline is
 April 15th. Interested students can contact the Athletic Training Program
 Director, Kim O'Connell (kbrock@nmsu.edu) (575-646-5744), for further
 information.

The MSAT program at NMSU will consist of a minimum of 60 credit hours
 of coursework to be completed in the home department of Kinesiology at
 NMSU through both traditional and hybrid courses. The program provides
 a two-year (24-month) comprehensive exposure to Athletic Training
 designed to prepare individuals to become competent, independent
 clinicians who will enhance the quality of patient health care and advance
 the profession of athletic training through the application of evidence-
 based practice and translational research.

Theoretical coursework in the areas of injury prevention and care,
 injury evaluation and treatment, and therapeutic interventions of
 athletic injuries are included, as are clinical components that provide
 a progressive approach with observation, integrative and immersive
 experiences in clinical settings both on and off-campus.

Upon completion of the MSAT, students will be eligible to sit for the
 national Board of Certification (BOC) exam required to practice as an
 athletic trainer, leading to the ATC credential.

Enrollment in graduate courses in Athletic Training is limited to students
 who have been accepted into the MSAT program. To complete this
 course of study, each student is expected to meet the program's
 academic and clinical competency criteria, which are aligned with CAATE
 accreditation standards.

Instructions on application procedures for the MSAT can be found on
 the Kinesiology Department webpage. Questions may be directed to Kim
 O'Connell (kbrock@nmsu.edu) the Program Director for Athletic Training.

Prefix	Title	Credits

A Suggested Plan of Study:

The program follows a cohort model, with students progressing through
 the required
 coursework in a specific sequence. Below is a proposed plan of study for
 the MSAT:

First Year		Credits
Semester 1		
SUMMER		
SPMD 4805	Emergency Response	2
SPMD 5005	Foundations of Athletic Training	3
SPMD 5010	Clinical & Functional Anatomy in Athletic Training	2
Credits		7

Semester 2		
FALL		
SPMD 5050	Clinical Education I	3
SPMD 5120	Lower Extremity Injury Evaluation + Lab	4
SPMD 5180	Therapeutic Interventions I	4
Credits		11

Semester 3		
SPRING		
SPMD 5150	Clinical Education II	3
SPMD 5220	Upper Extremity Injury Evaluation + Lab	4
SPMD 5280	Therapeutic Interventions II	4
SPMD 5510	Psychology of Sport	3
Credits		14

Second Year		Credits
Semester 1		
SUMMER		
SPMD 6010	Organization and Administration in Athletic Training	2
SPMD 5205	Evidence Based Practice	2
SPMD 5250	Immersive Clinical Experience	3
**SPMD 5250 Immersive Clinical Experience may be taken in any semester of the 2nd year following approval from the coordinator of clinical education		
Credits		7

Semester 2		
FALL		
SPMD 6050	Clinical Education III	3
SPMD 6280	General Medical Conditions & Therapeutic Medications	4
SPMD 6020	Evaluation of the Head, Neck, Spine and Torso	3
SPMD 6005	Athletic Training Research I	2
Credits		12

Semester 3

SPMD 6150	Clinical Education IV	3
SPMD 6110	Professional Preparation	3
SPMD 6999	Capstone Project I	3
Credits		9
Total Credits		60

Animal Science - Master of Science

General Requirements

Graduate students must maintain at least a 3.0 grade point average. A minimum of 30 credit hours of graduate work if required, the following parameters must be met within those credits but can overlap.

1. At least 15 credits must be in courses numbered 500 or above
2. At least 15 credits must be in Animal Science courses
3. At least 15 credits (exclusive of ANSC 598) must be taken with other than a single professor

Prefix	Title	Credits
Required Courses		
ANSC 599	Master's Thesis	6
ANSC 515	Graduate Seminar	2
ANSC 512	Research Methods in Animal Science (s)	3-4
or A ST 512	Quantitative Analysis for Business Decisions	
Choose 18-19 credits from the following, ensuring the above parameters are met:		18-19
ANSC 480	Environmental Physiology of Domestic Animals	
ANSC 484	Ruminant Nutrition	
ANSC 501	Advanced Animal Nutrition (so)	
ANSC 507	Laboratory Techniques in Nutrition (f)	
ANSC 509	Endocrinology of Domestic Animals (f)	
ANSC 510	Range Nutrition Techniques (se)	
ANSC 512	Research Methods in Animal Science (s)	
ANSC 515	Graduate Seminar	
ANSC 520	Advanced Nutritional Management I: Feedlot (se)	
ANSC 521	Advanced Nutritional Management II: Cow Calf/Stocker (so)	
ANSC 522	Animal Nutrition (f)	
ANSC 560	Rumen Microbiology (so)	
ANSC 580	Environmental Physiology of Domestic Animals	
ANSC 602	Advanced Reproductive Physiology (fo)	
ANSC 604	Hypothalamo-Hypophyseal-Pineal Endocrinology (fe)	
ANSC 605	Gonadal and Uterine Endocrinology (fe)	
ANSC 606	Endocrinology of Pregnancy, Parturition, and Lactation (fe)	
ANSC 621	Metabolic Functions and Dysfunctions (fe)	
ANSC 625	Nutrient Metabolism I: Mineral, Vitamin, and Nitrogen Metabolism (fo)	
ANSC 626	Nutrient Metabolism II: Carbohydrates, Lipids, and Energetics (se)	
Total Credits		30

Graduate Assistants

1. All graduate assistants must enroll as full-time students taking at least 9 graded graduate credits (courses numbered 450 and above). No audits can be taken as part of the 9 minimum credits. Only 3 of the 9 credits may be taken as an S/U option.
2. A graduate assistant may not enroll for more than 15 credits each semester.
3. If a student needs to take deficiency courses as part of the 9 credits, then a memo from the advisor or department head should be submitted to the Graduate School. If approved, the student can register for 3 undergraduate credits and a minimum of 6 graded graduate credits during their first semester at New Mexico State University.
4. Enrollment during summer sessions is not required.

Additional Requirements

1. A maximum of six credits in S/U courses may be taken during a Master's program
2. A maximum of six credits (four in a single semester) in ANSC 598 (Special Research Programs) may be taken during a Master's program.
3. If a minor is declared, a minimum of eight credits in this discipline must be completed and approved by that department.
4. In certain instances, deficiency courses may be required.
5. Attendance at graduate seminars is urged.
6. Graduate students are encouraged to adapt their thesis data for submission as a scientific journal article, an Experiment Station Bulletin, or research report.

The Masters Committee

The Masters Committee is appointed by the student's advisor with the approval of the Department Head and consists of four members including three from the animal science area and one representative from the Graduate School.

The Masters Final Examination

The Masters Final Oral Examination is primarily concerned with the thesis research conducted by the student but it may also extend over the entire discipline. Candidates for a Masters Degree are expected to demonstrate a thorough understanding of their research topic including how it was conducted, the results that were found, and what the results mean. They should also demonstrate knowledge of the general discipline of Animal Science.

Anthropology - Master of Arts

The Anthropology M.A. program is designed for students who are interested in the traditional sub-disciplines of anthropology, as well as such related fields as cultural resource management, food studies, medical anthropology, and museum studies. The program is directed to both students planning to complete a professional M.A. degree and students planning to enter a Ph.D. program. In addition to the M.A. in Anthropology, our program offers graduate minors in anthropology, archaeology, and food studies, as well as Graduate Certificates in cultural resource management and museum studies. The faculty encourage all graduate students to develop graduate minors and certificates, enhancing their specialized training in anthropology.

Program Outcomes:

1. Develop and execute a problem-oriented anthropological study using appropriate theoretical and methodological perspectives in at least one sub-field of anthropology. The study may focus on applied/practicing work or standard academic research, and will report the results in the form of a master's thesis, professional internship report, or professional research project report. The final thesis or report must show substantive data analysis by the student, directed toward an explicit anthropological research question.
2. Demonstrate effective written and verbal communication skills in professional settings.
3. Demonstrate professional engagement with peers, faculty, staff, researchers, and other professionals in anthropology.

An undergraduate anthropology degree is not required for entry into the M.A. program. Applicants who lack the equivalent of ANTH 301, ANTH 315, and ANTH 355 may be required to take these courses or corresponding sections of ANTH 502. ANTH 350 or the equivalent is recommended. Applicants without an undergraduate degree in anthropology are encouraged to contact the Graduate Advisor before applying to the M.A. program in anthropology.

The M.A. Program in Anthropology at NMSU is enrolled as an eligible graduate program under the Western Regional Graduate Program (<https://www.wiche.edu/tuition-savings/wrgp/>) (WRGP). WRGP allows master's, graduate certificate, and doctoral students who are residents of Western Interstate Commission for Higher Education (WICHE) member states to enroll in graduate programs outside of their home state and pay in-state resident tuition. Residents of the following states and territories are eligible to attend the M.A. Program in Anthropology at NMSU for in-state tuition rates: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, U.S. Pacific Territories and Freely Associate States, Utah, Washington, and Wyoming. Interested graduate applicants should apply directly to the NMSU Graduate School and *identify themselves as WICHE WRGP applicants*. WRGP applicants must meet NMSU's WRGP admission requirements and deadlines. If you have further questions about the WRGP program and your eligibility, please contact Kelly Jenks at kljenks@nmsu.edu (Istanfor@nmsu.edu).

Admission Requirements

To apply to the Anthropology Masters Degree program the following materials are required:

- Graduate School application form and fees
- Official undergraduate and graduate transcripts from all colleges and universities attended, with a 3.0 GPA minimum.
- A letter from the candidate addressing his or her interests and graduate school objectives
- Letters of recommendation from three persons familiar with the candidate's academic record

All the above items should be submitted through the Graduate School's central admission system at: <https://gradschool.nmsu.edu/>

NOTE: The GRE is not required.

NOTE: In addition to the above, **international applicants** also need to view the requirements of admission to the university and provide additional documentation online, at this page: <https://isss.nmsu.edu/index-2/> (<https://isss.nmsu.edu/>)

NOTE: students may matriculate in either August or January. If a student wishes to be considered for a Graduate Assistantship, the application must be completed by **February 15** for admission in the fall semester. Assistantships are not usually offered for students matriculating in January, but they may be considered in subsequent semesters for an award.

For more information about the Anthropology Graduate Program contact:

Dr. Kelly Jenks, Anthropology Graduate Advisor at: kljenks@nmsu.edu

Dr. Rani Alexander, Anthropology Department Head at: raalexan@nmsu.edu

The Anthropology M.A. program is designed for students who are interested in the traditional sub-disciplines of anthropology, as well as such related fields as cultural resource management, food studies, medical anthropology, and museum studies. The program is directed to both students planning to complete a professional M.A. degree and students planning to enter a Ph.D. program. In addition to the M.A. in Anthropology, our program offers graduate minors in anthropology, archaeology, food studies, and Native American Studies, as well as Graduate Certificates in cultural resource management and museum studies. The faculty encourage all graduate students to develop graduate minors and certificates, enhancing their specialized training in anthropology.

An undergraduate anthropology degree is not required for entry into the M.A. program. Applicants who lack the equivalent of ANTH 301, ANTH 315, and ANTH 355 may be required to take these courses or corresponding sections of ANTH 502. ANTH 350 or the equivalent is recommended. Applicants without an undergraduate degree in anthropology are encouraged to contact the Graduate Advisor before applying to the M.A. program in anthropology.

Program Requirements

Students selecting the thesis option must complete 33 hours of basic course work, as described below, plus 6 hours of thesis credit. Students selecting the non-thesis option must complete 39 hours of course work including an internship or special research project for 6 credits.

The 33 hours of basic course work for students selecting either the thesis or non-thesis options are distributed as follows:

Prefix	Title	Credits
Core Graduate Courses ¹		6
ANTH 503	Anthropological Theory (Fall only)	
ANTH 505	Issues in Anthropological Practice (Spring only)	
Additional Courses		27
Select additional topical, methodological, and area courses in anthropology ¹		
Students may count six credits from any discipline outside of Anthropology toward the total 27 credits of additional courses		
Thesis or Non-Thesis Options		
Select either a Thesis or Non-Thesis Track:		6
<i>Thesis</i>		
ANTH 599	Master's Thesis	
<i>Non-Thesis</i>		
ANTH 597	Internship	

or ANTH 598	Special Research Problems	
Total Credits		39

¹ earning a grade of B or better

A Suggested Plan of Study

The Roadmap for the Master of Arts in Anthropology assumes each student will create a customized plan and selection of topical/methodological courses in consultation with their graduate faculty committee.

Non-Curricular Requirements and Expectations

Form graduate committee, consisting of two faculty members from the Department of Anthropology and one external faculty member outside the department.

Clarify your academic and professional goals and align curricular path with MA Anthropology to achieve program outcomes:

Program Outcomes:

1. Develop and execute a problem-oriented anthropological study using appropriate theoretical and methodological perspectives in at least one sub-field of anthropology. The study may focus on applied/practicing work or standard academic research, and will report the results in the form of a master's thesis, professional internship report, or professional research project report. The final thesis or report must show substantive data analysis by the student, directed toward an explicit anthropological research question.
2. Demonstrate effective written and verbal communication skills in professional settings.
3. Demonstrate professional engagement with peers, faculty, staff, researchers, and other professionals in anthropology.

Formulate topic with graduate committee chair for thesis or non-thesis internship/research project.

Discuss whether specific graduate minors or the graduate certificates in cultural resource management or museum studies will enhance career development. Discuss which Topical/Methodological courses will build your knowledge, skills, and abilities and best support your academic and professional development.

Engage with the Anthropology Graduate Student Organization and discuss opportunities for professional engagement with your committee. Look for opportunities to attend professional conferences, internships, or other professional workshops.

First Year		
Fall		Credits
ANTH 503	Anthropological Theory	3
Choose two from the fall schedule of classes, must be numbered 500 and above.		6
	Topical/Methodological Course ¹	
	Topical/Methodological Course ²	
Credits		9
Total Credits		9

Non-Curricular Requirements and Expectations

Students continue to work with faculty committee to develop a proposal for your thesis, internship, or special research project.

Finalize your choice of thesis/non-thesis option.

Proposal hearing by committee in May after completion of ANTH 505 Issues in Anthropological Practice, advancement to candidacy.

Approved NMSU IRB proposal for Human Subjects Research, as necessary.

Preparation of proposals for external funding and support.

Attendance of professional conferences and workshops, as recommended by committee.

Plan for summer fieldwork or internship experiences.

First Year		
Spring		Credits
ANTH 505	Issues in Anthropological Practice	3
Choose two from the spring schedule of classes, must be numbered 500 and above:		6
	Topical/Methodological Course ²	
	Topical/Methodological Course ²	
Credits		9
Total Credits		9

Non-Curricular Requirements and Expectations

With the advice and approval of your graduate committee, begin data collection, laboratory work, or field work needed to advance your thesis or non-thesis research/internship/special research project.

Make revisions to project proposal as recommended by faculty committee chair in preparation for proposal hearing.

Students are expected to hold a proposal hearing in September of their second year at the latest.

First Year		
Summer		Credits
	Topical/Methodological Course or corresponding Thesis/Non-Thesis course ³	3-6
Credits		3-6
Total Credits		3-6

Non-Curricular Requirements and Expectations

Advancement to Candidacy:

For advancement to candidacy the following criteria must be met:

- Successful completion of ANTH 503 Anthropological Theory and ANTH 505 Issues in Anthropological Practice and completion of two semesters of graduate course requirements.
- Proposal Hearing

Finalize Program of Study with faculty committee with timeline to final oral examination (defense) and graduation

Discuss professional engagement opportunities and presentation of research at appropriate professional conference venues and workshops.

Second Year

Fall		Credits
Topical/Methodological Courses ⁴		3
Topical/Methodological courses ²		3
Choose one of the following:		3
ANTH 597	Internship	
ANTH 598	Special Research Problems	
ANTH 599	Master's Thesis	
Credits		9
Total Credits		9

Non-Curricular Requirements and Expectations

Consult your committee chair about final timeline to final oral examination and apply for degree.

Check all NMSU Graduate School deadlines.

Final Oral Examination (Defense)

Second Year

Spring		Credits
Topical/Methodological Course ⁴		3
Topical/Methodological Course ²		3
Choose one of the following:		3
ANTH 597	Internship	
ANTH 598	Special Research Problems	
ANTH 599	Master's Thesis	
Credits		9
Total Credits		9

¹ Choose from the schedule of courses in consultation with committee chair and graduate advisor. If you are pursuing a graduate certificate, choose one certificate core course.

² Choose from schedule of classes in consultation with committee chair and graduate advisor.

³ Field Work, Archival Work, Internship, Community Consultation: ANTH 522 Archaeological Field School, ANTH 597 Internship, ANTH 598 Special Research Problems.

⁴ Choose from the schedule of courses in consultation with committee chair.

If you are pursuing a graduate certificate or graduate minor choose controlled electives in ANTH or interdisciplinary fields to meet requirements.

The MAP program encourages qualified undergraduate students to consider taking graduate-level courses in their junior or senior years. It is a dual credit program whereby eligible students can "double count" up to 9 graduate-level credits by applying them to their BA degree as well as to the graduate degree if they are later admitted to the MA in Anthropology or another Graduate degree program.

Students may not attempt more than 3 credits of graduate coursework in one semester. Students must earn a grade of B or higher to have graduate credits count under the MAP program. Graduate courses completed with a B- or lower are not eligible for MAP credit.

Students are not guaranteed admission to a graduate program by participating in the MAP program (it is a dual credit program, **not** a dual degree program). They still need to apply to the MA program in Anthropology or to their chosen NMSU graduate program and submit

an application for admission if they wish to complete a Master of Arts, graduate minor, or graduate certificate in the Department of Anthropology. Students may be able to transfer graduate credits to programs at other universities, but the program directors and Graduate Schools of those universities will have their own rules and policies regarding transfer credit and may not accept graduate credits earned at NMSU.

Honors Credit Undergraduate students who obtain a grade of B or higher in graduate level classes can count their credits as Honors credits.

Undergraduate students who earn a grade of B or higher in two 3-credit graduate classes will automatically graduate with an Honors Certificate.

MAP Requirements

- Undergraduate students must be juniors or seniors and have completed 60 credit hours of coursework towards an undergraduate degree.
- If the student intends to apply for the MA in Anthropology, completion of the undergraduate core courses, ANTH 301 Cultural Anthropology, ANTH 315 Introduction to Archaeology, ANTH 355 Biological Anthropology, and ANTH 350 Anthropological Theory is strongly preferred.
- Preferred 3.5 GPA or above.
- Undergraduate students must have an assigned faculty advisor within the Department of Anthropology and must meet with their advisor at least once per semester before registration.
- Students must speak to their financial aid advisor before being approved for MAPS.
- Students accepted into the master's accelerated program, must participate in the Online Developing New Scholars Program (DNSP), offered by the Graduate School. The purpose of DNSP is to create access for success in graduate education by providing formal mentoring.
- Students may not have previously earned a Bachelor's Degree.
- Students have removed any Incomplete grades or holds at the time that they request admission to a graduate-level class.

Additional Program Guidelines:

Faculty can invite eligible students to consider taking graduate-level coursework. Students can also ask faculty for permission to take a graduate class. In all cases, students should speak with their advisors to make sure that the chosen classes are suitable for their planned program of study.

In most cases, the student should be enrolled in a total of only 15 credit hours per semester. Overloads of 18 or more credits are **not** advisable.

Registration in graduate classes must be approved by the course instructor and the student's MAP faculty advisor, with notification and approval of the Anthropology Department Head and the NMSU Graduate School.

A student may withdraw their participation at any point from an approved Master's Accelerated Program by informing, in writing, the respective department-head with a copy sent to the Dean of the Graduate School.

The student's MAP form must be fully approved by the Department and NMSU Graduate School **before** the student may register for a graduate level course. In no instances can a graduate course 'count' towards the student's graduate degree retroactively under MAPS.

Accepted MAP Courses:

Upon approved enrollment to the Anthropology MAP Program, the following courses may be taken as electives in the undergraduate program of study. They count as graduate electives in topical, methodological, and area courses in the student's graduate program of study. Additional course offerings may be approved for Anthropology MAP with permission of the Department Head and the student's MAP advisor.

Prefix	Title	Credits
ANTH 515	Applied Anthropology	3
ANTH 516	Advanced Archaeology of the American Southwest	3
ANTH 520	Ethnographic Field Methods	3
ANTH 529	Advanced Evolutionary Medicine	3
ANTH 535	Adv. Human Health and Biological Variation	3
ANTH 540	Cultural Resource Management	3
ANTH 533	Advanced Issues in Sex, Gender, and Culture	3
ANTH 545	Advanced Museology	3

Please note that the graduate core classes ANTH 503 Anthropological Theory and ANTH 505 Issues in Anthropological Practice are **excluded** from the MAP eligible course list.

Individualized study courses such as ANTH 596 Readings, ANTH 597 Internship, ANTH 599 Master's Thesis are **excluded** from the MAP eligible course list.

Applied Statistics - Master of Science

The Department of Economics, Applied Statistics and International Business offers the Master of Science (MS) degree in applied statistics. The applied statistics program produces graduates proficient in the practice of statistics and prepared to enter directly into positions in government or industry. Students in the program receive instruction in both the theory and the application of statistics, with an emphasis on experimental design and modeling. Statistical software packages, which are necessary for modern data analysis, are used throughout the curriculum. The program culminates in a capstone course in which students gain experience in analyzing real-world data.

Students from a variety of disciplines, including mathematics, psychology, engineering, and the natural sciences, have successfully completed the MS in applied statistics.

Admission

Requirements for regular admission to the MS in applied statistics include the following:

- A minimum 3.0-grade point average overall or in the last two years of study. Complete graduate and undergraduate transcripts must be supplied.
- Three semesters of calculus, equivalent to NMSU courses MATH 1511G Calculus and Analytic Geometry I MATH 1521G Calculus and Analytic Geometry II, and MATH 2530G Calculus III, completed with grades of B or better.
- Three letters of reference from former professors or others able to evaluate the student's academic potential.

- A one- to two-page typewritten letter of application, discussing academic objectives, professional plans, and specific reasons for selecting statistics as a field for advanced study.

In addition to the formal requirements above, some experience in computer programming is strongly recommended.

Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). Fluency in written and spoken English is essential to successful completion of the program. Further information regarding the TOEFL can be obtained from <https://iss.nmsu.edu/>.

Students must choose one of two options to complete the course requirements: the research option or the coursework-only option.

Research Option

Under the research option, the combined research (A ST 598 or A ST 599) and elective credits must equal nine. The number of research credits may vary from four to six, with the remaining credits fulfilled with electives.

Prefix	Title	Credits
Theory		
A ST 565	Statistical Analysis I	3
A ST 566	Statistical Analysis II	3
Methods		
A ST 503	SAS Basics	3
A ST 505	Statistical Inference I	4
A ST 506	Statistical Inference II	3
A ST 507	Advanced Regression	3
A ST 509	Statistical Models for Complex Data Structures	3
Research		
A ST 598	Special Research Problems	4-6
or A ST 599	Master's Thesis	
Electives		
Electives sufficient to bring total credits to 34		5-3
Capstone		
A ST 554	Practicum in Statistics	3

Art - Master of Arts

Emphasis: Art History

An emphasis in art history requires a minimum of 33 credits of art history courses, 6 of which must be thesis credits. Additionally, 3 credits of related courses outside the Art Department must be taken with the approval of the department head and the student's major advisor.

Reading proficiency in a foreign language is also required and should be acquired prior to the beginning of thesis research for which it will be employed. A reading proficiency exam will be arranged in conjunction with the major advisor. Admission to the MA program with an emphasis in art history is based on an accredited BA or BS degree (or equivalent), including at least 18 credits in art history, museum studies, visual studies, or related disciplines. Undergraduate deficiencies must be completed before advancement to candidacy.

Prefix	Title	Credits
ARTH 579	Methodologies and Historiography of Art History and Art Theory	3
ARTH 599	Art History Thesis	6
Six 500-level ARTH Courses ¹		24
One 450 and above level course outside of the Department of Art		3
Total Credits		36

¹ ARTS 576 Museum/Gallery Research Internship may also be used once to fulfill this requirement

Candidacy and Thesis Committee Selection

Upon satisfactory completion of all required course work (except thesis credits) and foreign language requirement, the student will prepare a thesis proposal under the direction of the major professor. The student will then select the second member of his or her thesis committee and submit the proposal to this committee member for approval. With the backing of these two advisors, the student must then present the proposal to the department faculty. After a successful presentation, the student will advance to candidacy and select the third committee member, who may be from outside the art department.

Astronomy - Master of Science

The Astronomy Department at NMSU offers programs leading to the Master of Science and the Doctor of Philosophy degrees. Graduate courses (http://astronomy.nmsu.edu/?page_id=2503) cover topics in astrophysics, stellar atmospheres, observational techniques, the interstellar medium, galactic structure, star formation and evolution, extragalactic objects, cosmology, and solar system studies. Students also take courses in other relevant fields to broaden their knowledge and capabilities.

Upon successful completion of the written and oral portions of the PhD comprehensive exam, it is the intention of the department that a student be awarded an M.S. degree in Astronomy. Other students may elect to pursue a Terminal Master's degree rather than a Ph.D. upon the advice of their committee.

Terminal Masters: Thesis track

The rules for a Terminal M.S.: Thesis track are outlined below.

For the Terminal M.S. degree in Astronomy, the student must satisfy the requirements of the Department as well as those established by the Graduate School. The Department requires a minimum of 33 credits of which six are generally for Master's Thesis research.

The MINIMUM course requirements for a Thesis MS will include

Prefix	Title	Credits
ASTR 500	Seminar (3 credits (1 per semester)) ⁵	3
Choose five courses from the following ASTR courses ⁶		15
ASTR 503	Fundamentals of Astrophysics	
ASTR 506	Dynamics and Hydrodynamics	
ASTR 530	Gas and Radiative Processes	
ASTR 535	Observational Techniques	
ASTR 545	Stellar Spectroscopy	
ASTR 555	Galaxies I	
ASTR 565	Stellar Interiors	
ASTR 605	Interstellar Medium	
ASTR 616	Galaxies II	
ASTR 620	Planetary Processes	
ASTR 621	Planetary System Formation	
ASTR 630	Advanced Methods in Astrophysics	
ASTR 670	Heliophysics, Space Plasmas, and Space Weather	
ASTR 698	Special Topics.	
Select additional two courses from ASTR courses above, OR from the courses below ⁷		6
PHYS 462	Intermediate Electricity and Magnetism II	
PHYS 511	Mathematical Methods of Physics I	
PHYS 554	Quantum Mechanics I	
PHYS 562	Electromagnetic Theory II	
PHYS 571	Advanced Experimental Optics	
PHYS 576	Advanced Computational Physics I	
E E 528	Fundamentals of Photonics	
E E 577	Fourier Methods in Electro-Optics	
C S 579	Special Topics	
<i>Special Research Programs</i> ⁴		
ASTR 598	Special Research Programs	3
<i>Masters Research</i>		
ASTR 599	Master's Thesis	6
Total Credits		33

⁴ ASTR 598 Special Research Programs is generally taken in the student's 2nd year (fall or spring) and is intended to provide a semi-formal introduction to doing a research project. It may involve research that subsequently develops into a thesis project.

⁵ ASTR 500 Seminar is 1-credit course. It should be taken each semester, for 3 total credits over this track

⁶ Any 15 credits (5 courses) selected from these. Each course may only be taken for 3 credits.

⁷ In addition to 5 courses from above, students should select another 2 courses (3 credits each, 6 credits total). This can be either another two astronomy graduate classes from above (which will make 7 total different astronomy courses) OR student may opt to take up to 2 out-of-department classes to fulfill the overall credit requirements if these classes are deemed by the student's committee to be appropriate to the student's program-of-study.

A maximum of one 3-credit course numbered between 450 and 499 can be applied to the out-of-department course/credit-hour requirement,

and only with the approval of the student's Committee. Otherwise, out of department classes must be at the 500 or greater level.

If more than 6 credits of out-of-department classes are taken, they may potentially count toward the required total courses/credit hours, but only with the approval of the student's Committee. Traditionally, these have been in the area of PHYS, E E and C S, as listed. Other Physics courses, or courses offered by other departments such as Engineering, Geology, or Math, are also viable as out-of-department courses. Additionally, for those students intending to specialize in planetary science, courses taught in the Geology department and Geophysics courses taught in the Physics department should be considered.

Terminal Masters: Coursework-only track

The rules for a Terminal M.S.: Coursework-only track are outlined below.

A thesis is nearly always required for a Terminal M.S. degree. However, under some exceptional circumstances, the thesis requirement may be waived, in which case the credit requirements must be satisfied in formal course work. Such a waiver requires agreement by both the student's committee and the Department Head. In all cases, the student seeking a Terminal M.S. degree must pass a final oral examination covering course and any relevant research work. Any regular Terminal M.S. degree program will require a thesis.

For a student who has decided and been approved to pursue a Coursework only MS Astronomy degree, the MINIMUM course requirements are:

Prefix	Title	Credits
ASTR 500	Seminar (3 credits (1 per semester)) ⁵	3
Choose seven courses from the following ASTR courses ⁸		21
ASTR 503	Fundamentals of Astrophysics	
ASTR 506	Dynamics and Hydrodynamics	
ASTR 530	Gas and Radiative Processes	
ASTR 535	Observational Techniques	
ASTR 545	Stellar Spectroscopy	
ASTR 555	Galaxies I	
ASTR 565	Stellar Interiors	
ASTR 605	Interstellar Medium	
ASTR 616	Galaxies II	
ASTR 620	Planetary Processes	
ASTR 621	Planetary System Formation	
ASTR 630	Advanced Methods in Astrophysics	
ASTR 670	Heliophysics, Space Plasmas, and Space Weather	
ASTR 698	Special Topics.	
Select additional two courses from ASTR courses above, OR from the courses below ⁹		6
PHYS 462	Intermediate Electricity and Magnetism II	
PHYS 511	Mathematical Methods of Physics I	
PHYS 554	Quantum Mechanics I	
PHYS 562	Electromagnetic Theory II	
PHYS 571	Advanced Experimental Optics	
PHYS 576	Advanced Computational Physics I	
E E 528	Fundamentals of Photonics	
E E 577	Fourier Methods in Electro-Optics	
C S 579	Special Topics	

*Special Research Programs*⁴

ASTR 598	Special Research Programs	3
Total Credits		33

⁵ ASTR 500 Seminar is 1-credit course. It should be taken each semester, for 3 total credits over this track

⁸ Any 21 credits (7 courses) selected from these. Each course may only be taken for 3 credits.

⁹ In addition to 7 courses from above, students should select another 2 courses (3 credits each, 6 credits total). This can be either another two astronomy graduate classes from above (which will make 9 total different astronomy courses) OR student may opt to take up to 2 out-of-department classes to fulfill the overall credit requirements if these classes are deemed by the student's committee to be appropriate to the student's program-of-study.

A maximum of one 3-credit course numbered between 450 and 499 can be applied to the out-of-department course/credit-hour requirement, and only with the approval of the student's Committee. Otherwise, out of department classes must be at the 500 or greater level.

If more than 6 credits of out-of-department classes are taken, they may potentially count toward the required total courses/credit hours, but only with the approval of the student's Committee.

Traditionally, these have been in the area of PHYS, E E and C S, as listed. Other Physics courses, or courses offered by other departments such as Engineering, Geology, or Math, are also viable as out-of-department courses. Additionally, for those students intending to specialize in planetary science, courses taught in the Geology department and Geophysics courses taught in the Physics department should be considered.

⁴ ASTR 598 Special Research Programs is generally taken in the student's 2nd year (fall or spring) and is intended to provide a semi-formal introduction to doing a research project. It may involve research that subsequently develops into a thesis project.

Masters degree: Upon completion of PhD comprehensive exam track

The requirements for the Masters track are for the student to have completed their PhD comprehensive exam, and the following credits:

Prefix	Title	Credits
ASTR 500	Seminar (4 credits (1 per semester)) ¹	4
Choose nine courses from the following ASTR courses ²		27
ASTR 503	Fundamentals of Astrophysics	
ASTR 506	Dynamics and Hydrodynamics	
ASTR 530	Gas and Radiative Processes	
ASTR 535	Observational Techniques	
ASTR 545	Stellar Spectroscopy

Total Credits		46

¹ ASTR 500 Seminar is 1-credit course. It should be taken each semester, for 4 total credits over the program

² Any 27 credits (9 courses) selected from these. Each course may only be taken for 3 credits.

³ In addition to 9 courses from above, students should select another 2 courses (3 credits each, 6 credits total). This can be either another two astronomy graduate classes from above (which will make 7 total different astronomy courses) OR student may opt to take up to 2 out-of-department classes to fulfill the overall credit requirements if these classes are deemed by the student's committee to be appropriate to the student's program-of-study.

A maximum of one 3-credit course numbered between 450 and 499 can be applied to the out-of-department course/credit-hour requirement, and only with the approval of the student's Committee. Otherwise, out of department classes must be at the 500 or greater level.

If more than 6 credits of out-of-department classes are taken, they may potentially count toward the required total courses/credit hours, but only with the approval of the student's Committee.

Traditionally, these have been in the area of PHYS, E E and C S, as listed. Other Physics courses, or courses offered by other departments such as Engineering, Geology, or Math, are also viable as out-of-department courses. Additionally, for those students intending to specialize in planetary science, courses taught in the Geology department and Geophysics courses taught in the Physics department should be considered.

⁴ ASTR 598 Special Research Programs is generally taken in the student's 2nd year (fall or spring) and is intended to provide a semi-formal introduction to doing a research project. It may involve research that subsequently develops into a thesis project.

Year A

A Suggested Plan of Study For Students

A typical roadmap for the Masters Thesis track program, including course and credit-hour minimum requirements, is summarized in the following table. Note there is some flexibility for each of these components, so students should confirm all their selections directly with their advisor. Most regular graduate courses (501-597, 601-699) are offered on a 2 year rotation. So specific courses will depend on whether a student is on a year A or Year B cycle. ASTR 503 Fundamentals of Astrophysics is offered each fall and should be taken by all students in their first year only. Students may opt for up to 2 courses (6 credits) from outside the department (See Course Requirements). ASTR 598 Special Research Programs and ASTR 599 Master's Thesis are offered every semester, as one-on-one research credits with an advisor.

For a student on wishing to pursue a Master Coursework-only track, they may substitute the 6 credits of 599 credits for any of the regular Yr A or Yr B courses

First Year		
Fall		Credits
ASTR 500	Seminar ¹	1
ASTR 503	Fundamentals of Astrophysics	3
Choose two courses from the following:		6
ASTR 535	Observational Techniques	
ASTR 565	Stellar Interiors	
ASTR 605	Interstellar Medium	
Credits		10

Spring		
ASTR 500	Seminar ¹	1
Choose three courses from the following		9
ASTR 621	Planetary System Formation	
ASTR 630	Advanced Methods in Astrophysics	
ASTR 670	Heliophysics, Space Plasmas, and Space Weather	
Credits		10

Second Year		
Fall		
ASTR 500	Seminar ¹	1
Choose one from the following: ²		3
ASTR 555	Galaxies I	
ASTR 620	Planetary Processes	
ASTR 698	Special Topics.

ASTR 598	Special Research Programs ²	
ASTR 599	Master's Thesis ^{3,4}	3
Credits		7-10

Spring		
ASTR 599	Master's Thesis ^{3,4}	3-9
Choose one from the following:		3
ASTR 506	Dynamics and Hydrodynamics	
ASTR 545	Stellar Spectroscopy	
ASTR 616	Galaxies II	
Research Programs Course ²		0-3
ASTR 598	Special Research Programs ²	
Credits		6-15
Total Credits		33-45

¹ Students **must** take ASTR 500 Seminar as 1-credit in each of their first 3 semesters, for a total of 3 credits over 2 years

² Students **must** take ASTR 598 Special Research Programs for 3 credits during fall of Yr2 or spring of Yr2.

³ Students on a Thesis track **must** take 6 total credits of ASTR 599 Master's Thesis in Yr 2. Students on a coursework-only track may substitute any 6 credits of regular Yr2 course in place of 599 credits

⁴ Students on a Thesis track who have completed 10 credits in each of their first 3 semesters, including 3 ASTR 598 Special Research Programs and 3 ASTR 599 Master's Thesis in fall of Yr2 only require 3 credits of ASTR 599 in spring of Yr2 in order to meet minimum requirements as detailed in Course Requirements above. Students on a Coursework-only track who have completed 10 credits in each of their first 3 semester, including 3 ASTR 598, only require 3 more regular course credits in spring of Yr2. However graduate students must

enroll in 9 credits each semester in order to remain full time and retain eligibility for an GA. For students in their final semester of dissertation writing, it is possible to petition the Graduate School for permission to enroll in fewer credits, for that one semester only, to reduce tuition expenses. For students who do not complete their Masters in 2 years, they should continue to enroll in ASTR 599 in future semesters.

Research Programs Course ²		0-3
ASTR 598	Special Research Programs	
Credits		6-9
Total Credits		33-39

- ¹ Students **must** take ASTR 500 Seminar as 1-credit in each of their first 3 semesters, for a total of 3 credits over 2 years
- ² Students **must** take ASTR 598 Special Research Programs for 3 credits during fall of Yr2 or spring of Yr2.
- ³ Students on a Thesis track **must** take 6 total credits of ASTR 599 Master's Thesis in Yr 2. Students on a coursework-only track may substitute any 6 credits of regular Yr2 course in place of 599 credits

For students who do not complete their Masters in 2 years, they should continue to enroll in ASTR 599 in future semesters.

Year B

A Suggested Plan of Study For Students

A typical roadmap for the Masters Thesis track program, including course and credit-hour minimum requirements, is summarized in the following table. Note there is some flexibility for each of these components, so students should confirm all their selections directly with their advisor. Most regular graduate courses (501-597, 601-699) are offered on a 2 year rotation. So specific courses will depend on whether a student is on a year A or Year B cycle. ASTR 503 Fundamentals of Astrophysics is offered each fall and should be taken by all students in their first year only. Students may opt for up to 2 courses (6 credits) from outside the department (See Course Requirements). ASTR 598 Special Research Programs and ASTR 599 Master's Thesis are offered every semester, as one-on-one research credits with an advisor.

For a student on wishing to pursue a Master Coursework-only track, they may substitute the 6 credits of 599 credits for any of the regular Yr A or Yr B courses

First Year

Fall		Credits
ASTR 500	Seminar ¹	1
ASTR 503	Fundamentals of Astrophysics	3
Choose two courses from the following:		6
ASTR 555	Galaxies I	
ASTR 620	Planetary Processes	
ASTR 698	Special Topics.	
Credits		10

Spring		Credits
ASTR 500	Seminar ¹	1
Choose three from the following:		9
ASTR 506	Dynamics and Hydrodynamics	
ASTR 545	Stellar Spectroscopy	
ASTR 616	Galaxies II	
Credits		10

Second Year

Fall		Credits
ASTR 500	Seminar ¹	1
Choose one from the following: ²		3
ASTR 535	Observational Techniques	
ASTR 565	Stellar Interiors	
ASTR 605	Interstellar Medium	
Research Programs Course ²		0-3
ASTR 598	Special Research Programs	
ASTR 599	Master's Thesis ^{3,4}	3
Credits		7-10

Spring		Credits
ASTR 599	Master's Thesis ^{3,4}	3
Choose one from the following:		3
ASTR 621	Planetary System Formation	
ASTR 630	Advanced Methods in Astrophysics	

Bioinformatics - Master of Science

The degree requirements include 30-31 graduate credit hours. The degree has **two tracks**, one for students with non-computing background and another for students with Computer Science background. The requirements for each track are structured as follows.

Track: Non-Computing Background

Prefix	Title	Credits
Required Courses		
<i>Core Courses</i>		
BIOL 550	Special Topics (Command Line Bioinformatics)	3
A ST 505	Statistical Inference I	4
C S 453	Python Programming I	3
BIOL 550	Special Topics (R for ecological sciences)	3
or C S 458	R Programming I	
C S 509	Bioinformatics Programming	3
C S 508	Introduction to Data Mining	3
or C S 519	Applied Machine Learning I	
<i>Elective Courses (2 from the following list)</i>		
C S 462	Object Oriented Programming Transition	
C S 516	Bioinformatics	
C S 586	Algorithms in Systems Biology	
GENE 452	Applied Bioinformatics	
or BIOL 566	Advanced Bioinformatics and NCBI Database	
A ST 550	Special Topics (Statistical bioinformatics course)	
A ST 550	Special Topics (Current topics in bioinformatics - open issues)	
<i>Master's Project/Thesis/Internship ¹</i>		6
C S 598	Master's Project	

or C S 599 Master's Thesis

Total Credits 31

¹ A student can write a thesis (C S 599 Master's Thesis), undertake a research project (C S 598 Master's Project), or participate in an internship related to the degree. In each case, six graduate credits are required and a written approval from the student's advisor must be obtained before the student undertakes this part of the study. For students with thesis or project, the students are required to sustain a final exam, covering the thesis/research project.

² One course to cover prerequisites to enter GENE 315 Molecular Genetics and BCHE 341 Survey of Biochemistry is required.

Track: Computer Science Background

Prefix	Title	Credits
Required Courses ²		
C S 508	Introduction to Data Mining	3
C S 509	Bioinformatics Programming	3
C S 570	Analysis of Algorithms	3
C S 586	Algorithms in Systems Biology	3
C S 581	Advanced Software Engineering	3
Select one from the following:		3
C S 516	Bioinformatics	
GENE 452	Applied Bioinformatics	
BIOL 566	Advanced Bioinformatics and NCBI Database	
<i>Elective Courses (2 from the following list)</i> 6		
A ST 505	Statistical Inference I	
A ST 506	Statistical Inference II	
BCHE 546	Biochemistry II	
BCHE 649	Topics in Biochemistry	
BIOL 474	Immunology	
BIOL 475	Virology	
BIOL 478	Molecular Biology of Microorganisms	
BIOL 490	Neurobiology	
BIOL 520	Molecular Cell Biology	
BIOL 566	Advanced Bioinformatics and NCBI Database	
C S 502	Database Management Systems I	
C S 505	Artificial Intelligence I	
C S 516	Bioinformatics	
C S 521	Parallel Programming	
C S 575	Artificial Intelligence II	
C S 582	Database Management Systems II	
GENE 452	Applied Bioinformatics	
GENE 486	Genes and Genomes	
MOLB 542	Biochemistry I	
MOLB 546	Biochemistry II	
MOLB 590	Discussions in Molecular Biology	
<i>Master Thesis/Project/Internship</i> ¹ 6		
C S 599	Master's Thesis	
or C S 598	Master's Project	
Total Credits		30

¹ A student can write a thesis (C S 599 Master's Thesis), undertake a research project (C S 598 Master's Project), or participate in an internship related to the degree. In each case, six graduate credits

are required and a written approval from the student's advisor must be obtained before the student undertakes this part of the study. For students with thesis or project, the students are required to sustain a final exam, covering the thesis/research project.

² One course to cover prerequisites to enter GENE 315 Molecular Genetics and BCHE 341 Survey of Biochemistry is required.

Degree Road Map

- **For students with non-computing background**
 - Semester 1: Command Line bioinformatics, C S 458 R Programming I, A ST 505 Statistical Inference I
 - Semester 2: C S 453 Python Programming I, one elective course, C S 509 Bioinformatics Programming
 - Semester 3: C S 508 Introduction to Data Mining, Master's project/thesis/internship (3 credits), one elective
 - Semester 4: Master's project/thesis/internship (3 credits)
- **For students with Computer Science background**
 - Semester 1: The course to cover the prerequisites to enter GENE 315 Molecular Genetics and BCHE 341 Survey of Biochemistry, A ST 505 Statistical Inference I, C S 508 Introduction to Data Mining
 - Semester 2: C S 509 Bioinformatics Programming, GENE 315 Molecular Genetics, BCHE 341 Survey of Biochemistry
 - Semester 3: Master's project/thesis/internship (3 credits), two electives
 - Semester 4: Master's project/thesis/internship (3 credits)

A Suggested Plan of Study for Students (with non-computing background)

It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Semester 1	Credits
C S 458 R Programming I	3
A ST 505 Statistical Inference I	4
Command Line Bioinformatics	3
Credits	10
Semester 2	Credits
C S 453 Python Programming I	3
C S 509 Bioinformatics Programming	3

Total Credits		33

Biology - Master of Science

The Master of Science degree can be obtained through either a thesis option or a non-thesis option. Both options require 30 credits of course work. The non-thesis option can be completed as an accelerated (one-year) program concentrating in biotechnology or through an individual degree plan in consultation with the student's Master of Science committee.

Master of Science Non-Thesis Option.

There are two formal course requirements for the MS non-thesis option as listed below.

Prefix	Title	Credits
Course Requirements		
BIOL 510	Current Topics in Biology	3
BIOL 540	Science and Ethics	1-3
Elective courses - courses with level from 450 - 598		24-26
At least 15 of the 30 credits should come from BIOL courses numbered 450 and above.		
Total Credits		30

Biotechnology Program

This is an accelerated (one year) non-thesis Master of Science degree in Biology that focuses on biotechnology. The program requires 30 hours of course work. The courses in this program are designed to prepare students for biotechnology-related careers in basic and applied research; in product development and testing; and in policy-making, regulation and law enforcement. The program of study includes practical training in molecular biology, genomics and bioinformatics, statistical analysis, business, bioethics and professional development skills. Additional

graduate course work will provide students with further expertise in their individual areas of interest, including cell, molecular, and microbial biology; environmental, ecological and evolutionary biology; and general and integrative biology. Students who complete this training will be prepared for successful employment in academic, corporate, and government settings.

Prefix	Title	Credits
BIOL 510	Current Topics in Biology	3
BIOL 540	Science and Ethics	1-3
BIOL 541	Professional Development Seminar	1-3
MGMT 503	Organizational Behavior and Management Processes	3
A ST 505	Statistical Inference I	3-4
or BIOL 455	Biometry	
BIOL 509	Guided Biological Research Lab	3
or BIOL 550 Special Topics - Molecular Biology Techniques Lab		
BIOL 566	Advanced Bioinformatics and NCBI Database	3
or GENE 452	Applied Bioinformatics	
or BIOL 562	Advanced Genomics Technology	
Biological Knowledge Electives		8-13
At least 15 of the 30 credits should come from BIOL courses numbered 450 and above.		
Optional Internship ¹		
Total Credits		30

Master of Science - Thesis Option. There are three formal course requirements for the MS thesis option as listed below

Prefix	Title	Credits
BIOL 510	Current Topics in Biology	3
BIOL 540	Science and Ethics	1-3
Master's Thesis (4-6 Hours)		4-6
BIOL 599	Master's Thesis	
Elective courses - courses with level 450-598		18-22
At least 15 of the 30 credits should come from BIOL courses numbered 450 and above.		
Total Credits		30

For research toward the Master of Science degree, students can choose among the Department's three areas of emphasis:

1. Behavioral, Ecological and Evolutionary Biology

The Behavioral, Ecological and Evolutionary Biology program is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that encompass the behavior, ecology, and evolution of living and extinct taxa.

2. Cell and Organismal Biology

The Cell and Organismal Biology program is appropriate for all Graduate students who wish to emphasize those areas of biology that integrate function and structure in cells, tissues, and organisms. This emphasis focuses in faculty areas of expertise in cell and molecular biology, neurobiology, developmental biology, and physiology.

3. Microbiology

The Microbiology curriculum is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that occur in microbes (bacteria, viruses, fungi, and

protists) such as their physiology, ecology, development or evolution.

All graduate students should develop their curriculum plan in consultation with the faculty advisor and graduate committee. Details of sample course sequences within the different emphases are described in the Biology Graduate Handbook available for download from the Graduate Student section of the Biology website <https://bio.nmsu.edu/students/grads.html>.

Graduate students may also earn a minor in other graduate departments and programs.

¹ This may include a research internship in a biotechnology company or in a biological research laboratory at NMSU or other research institutions. From 1 to 6 credits earned as BIOL 598 during an internship may count towards the required elective credits.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to a faculty advisor about your MAP plan and develop a course plan in consultation with the advisor. The faculty advisor should preferably be from the area of your interest.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
BIOL 450	Special Topics	1-3
BIOL 455	Biometry	3
BIOL 459	Darwinism Versus Creationism	3
BIOL 467	Evolution	3
BIOL 474	Immunology	3
BIOL 475	Virology	3

BIOL 479	Medical Microbiology	3
BIOL 490	Neurobiology	3

Business Administration - Master of Business Administration

The Master of Business Administration (MBA) program is a professional program designed to provide students with a solid background in business practices and the problem-solving and people skills needed to become successful leaders in the global business environment. Program graduates are prepared for administrative or managerial positions in a wide variety of organizations, both private and governmental. The business and accounting programs at NMSU, including the MBA program, are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The MBA program is offered in a traditional classroom with some online delivery and in a cohort-based distance program with a synchronous online component.

Details are available at <http://business.nmsu.edu/mba> (<https://business.nmsu.edu/mba/>).

Admissions

Applicants must meet the basic admission requirements of the Graduate School before they are considered for admission to the MBA program. To be considered for admission to the MBA program, applicants must meet one of the following criteria:

1. Have an undergraduate degree with a GPA of at least 3.0 from a regionally accredited U.S. College or University; or
2. Have achieved a minimum Graduate Management Admission Test (GMAT) score of 400 and a combined GMAT score and undergraduate GPA such that $(\text{GPA} \times 200) + \text{GMAT}$ is greater than or equal to 1050; or
3. Have a graduate degree from a regionally accredited U.S. college or university; or
4. Have a Professional Certification in one of the following: Certified Public Accountant (CPA); Certified Management Account (CMA), Chartered Financial Analyst (CFA), Certified Financial Planner (CFP), or Project Management Professional (PMP) with an official copy of the certificate; or
5. Have completed at least five years of relevant, full-time, post-degree, professional work experience with an undergraduate GPA of at least 2.50 from a regionally accredited U.S. college or university.

As an alternative to the GMAT, students may submit a GRE score which can be converted to the equivalent GMAT score. (Information about the GMAT can be found at www.mba.com.) If a GMAT score is required, the official score must be submitted to the MBA Program Office at least one month prior to initial enrollment in the program. GRE scores are sent directly to the NMSU Graduate School.

A maximum of 9 credit hours of the required MBA courses may be completed prior to the student's acceptance into the MBA degree program.

Note: Regardless of the pathway to admission, all students must have an undergraduate degree and complete the Background Knowledge courses with a grade of "B" or better in each course.

Background Knowledge

Although the MBA program is designed to encourage participation by students with a variety of educational backgrounds, the curriculum is fast paced. As a consequence, a minimum level of background knowledge is expected of all entering students, and those who lack the necessary background in any of the knowledge areas will be required to make up their deficiencies early in the program. Students may complete no more than 9 credits of required MBA courses prior to completion of the background knowledge courses.

Background knowledge may be demonstrated by successful completion (with a grade of A or B) of undergraduate courses in managerial accounting, financial accounting, macroeconomics, finance, statistics and calculus. At NMSU, the relevant courses are

Prefix	Title	Credits
ACCT 2110	Principles of Accounting I	3
ACCT 2120	Principles of Accounting II	3
ECON 2110G	Macroeconomic Principles	3
BFIN 341	Financial Analysis and Markets	3
MATH 1430G	Applications of Calculus I	3
Choose one from the following:		3
MATH 1350G	Introduction to Statistics	
A ST 311	Statistical Applications	

As an alternative to the three-credit courses above, students may take one-credit courses in the summer to satisfy the background knowledge requirements. These courses are ACCT 500 Concepts in Accounting, B A 500 Macroeconomic Essentials, B A 501 Quantitative Tools for the MBA, and BFIN 500 Concepts in Finance. For more information on these intensive summer courses contact the MBA Office.

Program Requirements (36 credits)

The MBA program consists of twelve courses beyond the background knowledge requirements. Eleven are required courses:

Prefix	Title	Credits
Required Courses		
ACCT 503	Accounting for Managers	3
BCIS 502	Business Information Systems	3
BLAW 502	Legal Environment of Business	3
ECON 503	Managerial Economics	3
BFIN 503	Financial Management	3
MGMT 502	Operations Management	3
MGMT 503	Organizational Behavior and Management Processes	3
MGMT 512	Quantitative Analysis for Business Decisions	3
MGMT 590	Strategic Management	3
MKTG 503	Marketing Management	3
B A 590	Professional Paper/Presentation	3
Elective course ¹		3
Total Credits		36

¹ This elective must be selected from the approved course list on the MBA web page.

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for

the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses required for the General MBA degree.

The following course sequencing requirements must be satisfied:

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student's program and is only open to students who have been accepted into the MBA degree program. ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, BFIN 503 Financial Management and MKTG 503 Marketing Management must be completed prior to enrollment in B A 590 Professional Paper/Presentation.
2. MGMT 590 Strategic Management must be completed at the end of the student's program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree:

A student may satisfy the Graduate School's requirement for a final exam by completing the General MBA Degree's necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

(1) The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

(2) The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School's requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (<https://catalogs.nmsu.edu/search/?P=B%20A%20599>) Master's Thesis in lieu of B A 590 (<https://catalogs.nmsu.edu/search/?P=B%20A%20590>) Professional Paper/Presentation.

Concentrations: Students in the on-campus MBA program may elect to pursue one of several MBA concentrations:

- Agribusiness (p. 112)
- Finance (p. 114)
- Health Services Management (p. 115)
- Information Systems (p. 117)
- Public Utility Regulation (p. 118)

Master's Accelerated Program Information

The Master's Accelerated Program allows qualifying NMSU business students to complete four MBA courses while still an undergraduate and may count those courses toward both their undergraduate degree and the Master of Business Administration (MBA).

Up to 12 hours of course work can be applied toward the completion of the master's degree. To receive graduate credit for the 12 credit hours, students must receive a grade of B or higher. MAP courses completed with a grade of B- or lower are not eligible for graduate credit.

Student Qualifications

- The student must be classified as a Junior or Senior and may not have previously earned a Bachelor's Degree.
- The cumulative grade point average (GPA) must be a minimum of **3.75** to participate in the **Junior Year**.
- The cumulative grade point average (GPA) must be a minimum of **3.50** to participate in the **Senior Year**.
- Students may participate in this program if they have complete the background knowledge prerequisite courses with grades of **B or higher**: ACCT 2110 Principles of Accounting I, ACCT 2120 Principles of Accounting II, ECON 2110G Macroeconomic Principles, BFIN 341 Financial Analysis and Markets, MATH 1430G Applications of Calculus I, MATH 1350G Introduction to Statistics.

Accepted MAP Courses

Students may take any four of the following courses to count for both the MBA degree and as the required courses to meet their upper division business course and MBA course. Any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
ACCT 503	Accounting for Managers	3
BCIS 502	Business Information Systems	3
ECON 503	Managerial Economics	3
BLAW 502	Legal Environment of Business	3
BFIN 503	Financial Management	3
MGMT 502	Operations Management	3
MGMT 503	Organizational Behavior and Management Processes	3

MKTG 503	Marketing Management	3
Please see the MBA webpage for a list of approved electives. ¹		

¹ Courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Interested students may complete the required application for the program by contacting the MBA advisor at mbaprogram@nmsu.edu or 575-646-8003.

Business Administration (Agribusiness) - Master of Business Administration

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student's program and is only open to students who have been accepted into the MBA degree program. ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, BFIN 503 Financial Management and MKTG 503 Marketing Management must be completed prior to enrollment in B A 590 Professional Paper/Presentation.
2. MGMT 590 Strategic Management must be completed at the end of the student's program of study and is only open to students who have been accepted into the MBA degree program. All MBA

coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree:

A student may satisfy the Graduate School's requirement for a final exam by completing the General MBA Degree's necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

(1) The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

(2) The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School's requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (<https://catalogs.nmsu.edu/search/?P=B%20A%20599>) Master's Thesis in lieu of B A 590 (<https://catalogs.nmsu.edu/search/?P=B%20A%20590>) Professional Paper/Presentation.

Students in the on-campus MBA program may elect to pursue a concentration in Agribusiness and must take the following set of five AEEC courses in substitution of four courses included in the above list of required MBA courses.

Prefix	Title	Credits
AEEC 5220	Financial Derivative Markets	3
AEEC 5210	International Agricultural Trade Theory and Policy	3

AEEC 5996	Special Topics (Global Food Supply Chain Management)	3
AEEC 5330	Agribusiness Marketing	3
AEEC 5340	Agribusiness Management	3
Total Credits		15

The five AEEC courses collectively substitute for the following five required MBA courses:

Prefix	Title	Credits
ECON 503	Managerial Economics	3
MGMT 502	Operations Management	3
MGMT 512	Quantitative Analysis for Business Decisions	3
MKTG 503	Marketing Management	3
Elective course (from the approved list)		3
Total Credits		15

Students in the concentration in Agribusiness who have not previously taken a course in Agricultural Policy will be required to take AEEC 5140 Agricultural Policy prior to taking the five concentration courses.

Master's Accelerated Program Information

The Master's Accelerated Program allows qualifying NMSU business students to complete four MBA courses while still an undergraduate and may count those courses toward both their undergraduate degree and the Master of Business Administration (MBA).

Up to 12 hours of course work can be applied toward the completion of the master's degree. To receive graduate credit for the 12 credit hours, students must receive a grade of B or higher. MAP courses completed with a grade of B- or lower are not eligible for graduate credit.

Student Qualifications

- The student must be classified as a Junior or Senior and may not have previously earned a Bachelor's Degree.
- The cumulative grade point average (GPA) must be a minimum of **3.75** to participate in the **Junior Year**.
- The cumulative grade point average (GPA) must be a minimum of **3.50** to participate in the **Senior Year**.
- Students may participate in this program if they have complete the background knowledge prerequisite courses with grades of **B or higher**: ACCT 2110 Principles of Accounting I, ACCT 2120 Principles of Accounting II, ECON 2110G Macroeconomic Principles, BFIN 341 Financial Analysis and Markets, MATH 1430G Applications of Calculus I, MATH 1350G Introduction to Statistics.

Accepted MAP Courses

Students may take any four of the following courses to count for both the MBA degree and as the required courses to meet their upper division business course and MBA course. Any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
ACCT 503	Accounting for Managers	3
BCIS 502	Business Information Systems	3
ECON 503	Managerial Economics	3
BLAW 502	Legal Environment of Business	3

BFIN 503	Financial Management	3
MGMT 502	Operations Management	3
MGMT 503	Organizational Behavior and Management Processes	3
MKTG 503	Marketing Management	3

Please see the MBA webpage for a list of approved electives.¹

¹ Courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Interested students may complete the required application for the program by contacting the MBA advisor at mbaprogram@nmsu.edu or 575-646-8003.

Business Administration (Finance) - Master of Business Administration Program Requirements (36 credits)

The MBA program consists of twelve courses beyond the background knowledge requirements (p. 110). Eleven are required courses:

Prefix	Title	Credits
Required Courses		
ACCT 503	Accounting for Managers	3
BCIS 502	Business Information Systems	3
BLAW 502	Legal Environment of Business	3
ECON 503	Managerial Economics	3
BFIN 503	Financial Management	3
MGMT 502	Operations Management	3
MGMT 503	Organizational Behavior and Management Processes	3
MGMT 512	Quantitative Analysis for Business Decisions	3
MGMT 590	Strategic Management	3
MKTG 503	Marketing Management	3
B A 590	Professional Paper/Presentation	3
Elective course ¹		3
Total Credits		36

¹ This elective must be selected from the approved course list on the MBA web page.

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses required for the General MBA degree.

The following course sequencing requirements must be satisfied:

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student's program and is only open to students who have been accepted into the MBA degree program. ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, BFIN 503 Financial Management and MKTG 503 Marketing Management must be completed prior to enrollment in B A 590 Professional Paper/Presentation.

2. MGMT 590 Strategic Management must be completed at the end of the student's program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

All MBA coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree:

A student may satisfy the Graduate School's requirement for a final exam by completing the General MBA Degree's necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

(1) The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

(2) The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School's requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (<https://catalogs.nmsu.edu/search/?P=B%20A%20599>) Master's Thesis in lieu of B A 590 (<https://catalogs.nmsu.edu/search/?P=B%20A%20590>) Professional Paper/Presentation.

Students in the on-campus MBA program may elect to pursue a concentration in Public Utility Regulation and must take the following courses. One of these courses will serve as the elective in the MBA program and two of the courses will substitute for courses MGMT 512 (<https://catalogs.nmsu.edu/search/?P=MGMT%20512>) and B A 590 (<https://catalogs.nmsu.edu/search/?P=B%20A%20590>) in the standard MBA program (because the learning objectives of the utility regulation courses meet the learning objectives of the two basic MBA courses).

Prefix	Title	Credits
Required Courses		
ECON 571	Regulatory Policy and Industry Analysis: Electricity I	3

ECON 572	Regulatory Policy and Industrial Analysis: Water and Natural Gas	3
ECON 573	Regulatory Policy and Industry Analysis: Electricity II	3
ECON 574	Advanced Seminar Regulatory Policy and Industry Analysis	3
Total Credits		12

Master's Accelerated Program Information

The Master's Accelerated Program allows qualifying NMSU business students to complete four MBA courses while still an undergraduate and may count those courses toward both their undergraduate degree and the Master of Business Administration (MBA).

Up to 12 hours of course work can be applied toward the completion of the master's degree. To receive graduate credit for the 12 credit hours, students must receive a grade of B or higher. MAP courses completed with a grade of B- or lower are not eligible for graduate credit.

Student Qualifications

- The student must be classified as a Junior or Senior and may not have previously earned a Bachelor's Degree.
- The cumulative grade point average (GPA) must be a minimum of **3.75** to participate in the **Junior Year**.
- The cumulative grade point average (GPA) must be a minimum of **3.50** to participate in the **Senior Year**.
- Students may participate in this program if they have complete the background knowledge prerequisite courses with grades of **B or higher**: ACCT 2110 Principles of Accounting I, ACCT 2120 Principles of Accounting II, ECON 2110G Macroeconomic Principles, BFIN 341 Financial Analysis and Markets, MATH 1430G Applications of Calculus I, MATH 1350G Introduction to Statistics.

Accepted MAP Courses

Students may take any four of the following courses to count for both the MBA degree and as the required courses to meet their upper division business course and MBA course. Any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
ACCT 503	Accounting for Managers	3
BCIS 502	Business Information Systems	3
ECON 503	Managerial Economics	3
BLAW 502	Legal Environment of Business	3
BFIN 503	Financial Management	3
MGMT 502	Operations Management	3
MGMT 503	Organizational Behavior and Management Processes	3
MKTG 503	Marketing Management	3

Please see the MBA webpage for a list of approved electives.¹

¹ Courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Interested students may complete the required application for the program by contacting the MBA advisor at mbaprogram@nmsu.edu or 575-646-8003.

Chemical Engineering - Master of Engineering in Chemical Engineering

The ME is a 30 credit hour coursework and/or project-based degree with flexibility of program design for professionals seeking advanced coursework in chemical engineering. Individual degree plans are based on consultation between the student and their advisor. ME requirements are as follows:

Prefix	Title	Credits
CHME Coursework		
A minimum of 15 credits of CHME 500+ courses (courses 450+ may also count up to 12 credits):		15
Open Electives		
Students are expected to take an additional minimum of 15 credits of electives from any areas such as chemical engineering, other engineering, business, economics, fundamental sciences, environmental sciences, etc., to be consistent with their personal ME theme or emphasis.		15
Optional Engineering Project Sequence or CHME Coursework¹		
CHME 595	Chemical Process Design and Business Analysis	
CHME 596	Chemical Process Industries Research	
CHME 597	Advanced Chemical Process Industry Analysis	
Total Credits		30

¹ Students will define and execute an engineering project through their employer while taking the following 3-semester course sequence. This may replace 6 credit hours of CHME coursework.

First Year		Credits
Fall		
CHME Elective		3
CHME Elective		3
CHME Elective		3
Credits		9
Spring		
CHME Elective		3
CHME Elective		3
Open Elective ¹		3

Credits		3
Total Credits		30

¹ Students are expected to take a minimum of 15 credits of open electives from any areas such as chemical engineering, other

engineering, business, economics, fundamental sciences, environmental sciences, etc., to be consistent with their personal ME theme or emphasis.

² Students interested in a Chemical Process Industries emphasis may replace 6 credits of courses with the following sequence: CHME 595 Chemical Process Design and Business Analysis, CHME 596 Chemical Process Industries Research, CHME 597 Advanced Chemical Process Industry Analysis.

Chemical Engineering - Master of Science in Chemical Engineering

The program of study leading to the MS consists of 32 credits which includes:

- required CHME core graduate courses (14 credits);
- CHME elective courses numbered 455-589 (3 credits);
- other graduate elective courses (9 credits); and
- thesis as CHME 599 Master's Thesis (6 credits).

Prefix	Title	Credits
Required Core Courses		
CHME 501	Graduate Thermodynamics for Chemical Engineers	3
CHME 506	Graduate Transport Phenomena(s) (Spring semester course)	3
CHME 516	Graduate Numerical Methods in Chemical Engineering	3
CHME 542	Graduate Reactor Analysis and Design (s) (Spring semester course)	3

Chemistry - Master of Science

The Master of Science in Chemistry is offered in the major emphasis areas of analytical, inorganic, organic, and physical chemistry, and biochemistry. The M.S. degree can be obtained through either a [thesis option](#) or a [non-thesis option](#). Both options require at least 30 credits of course work. The thesis option program is designed to teach students modern approaches to chemistry and biochemistry (courses), experimental methods to problem-solving (research), and communication skills in the discipline (seminars and colloquia). All M.S. candidates are required to complete the courses below. Thesis-option students must also pass a qualifying exam at the end of the first year and a final comprehensive examination which includes a written thesis. Non-thesis option students must pass a final exam, the format and content of which will be decided by a departmental committee.

Prefix	Title	Credits
Required Courses		
CHEM 475	Central Concepts in Chemistry - Safety	1
CHEM 476	Central Concepts in Chemistry - Research Ethics	1
CHEM 477	Central Concepts in Chemistry - Professional Development (Required Courses)	1
CHEM 501	Central Concepts in Chemistry - Energy	3
CHEM 502	Central Concepts in Chemistry - Structure	3
CHEM 503	Central Concepts in Chemistry - Dynamics	3
CHEM 504	Central Concepts in Chemistry - Measurements	3
CHEM 510	Graduate Student Seminar ¹	3
CHEM 600	Research ²	9
<i>Additional Graduate-level courses³</i>		3-12
Total Credits		30-39

¹ Only 3 credits of CHEM 510 will count toward the M.S. degree. For the thesis option, at least one credit of CHEM 510 must be taken for a letter grade of B- or better. The remaining CHEM 510 credits for the thesis option and all credits for the non-thesis option may be taken as S/U.

² Required only for thesis-option.

³ Additional courses are chosen based on major emphasis area, through consultation with the thesis committee or an advisor and can include research credits.

Civil Engineering - Master of Engineering in Civil Engineering

The Master of Engineering degree in Civil Engineering (M.E. in CE) is a coursework only degree and several courses are offered online. The M.E. in CE degree requires a total of 30-31 credit hours consisting of one general elective course (3 credit hours); seven technical electives in Civil, Environmental, and/or Agricultural Engineering (21-22 credit hours); and two electives from engineering disciplines outside the department and/or other areas of interest outside the college (6 credit hours).

Prefix	Title	Credits
General elective course		3
C E 490	Introduction to Artificial Intelligence for Civil Engineers ¹	
C E 510	Introduction to Nondestructive Testing ¹	
C E 514	Numerical Methods in Civil Engineering ¹	
C E 535	Technical Communication for Engineers ¹	
CE, ENVE, and A EN elective courses²		21-22
Seven courses to be selected from the following list of courses (numbered 450-599) ³		
<i>Environmental Engineering</i>		
ENVE 456	Environmental Engineering Design	
ENVE 459	Environmental Microbiology ¹	
ENVE 487	Air Pollution Control Systems Design ¹	
ENVE 550	Aquatic Chemistry ¹	
ENVE 551	Unit Processes/Operation of Water Treatment ¹	
ENVE 552	Unit Processes/Operation of Wastewater Treatment ¹	
ENVE 557	Surface Water Quality Modeling ¹	
<i>Geotechnical Engineering</i>		
C E 457	Foundation Design	
C E 460	Site Investigation	
C E 470	Design of Municipal and Hazardous Waste Landfills	
C E 479	Pavement Analysis and Design ¹	
C E 485	Design of Earth Dams	
C E 507	Design of Earth Retaining Structures ¹	
C E 508	Advanced Soil Behavior	
C E 509	Deep Foundations ¹	
C E 579	Ground Improvement ¹	
C E 585	Slope Stability Analysis and Design	
<i>Structural Engineering</i>		
C E 469	Structural Systems	
C E 501	Advanced Mechanics of Materials ¹	
C E 502	Advanced Mechanics of Steel Structures ¹	
C E 515	Finite Element Methods ¹	
C E 544	Advanced Design of Steel Structures ¹	
C E 545	Advanced Concrete Design ¹	
C E 554	Wood Design ¹	
C E 555	Masonry Design	
C E 547	Bridge Engineering	
C E 571	Structural Dynamics ¹	
<i>Water Resources and Agricultural Engineering</i>		
C E 452	Geohydrology ¹	
C E 482	Hydraulic Structures	
C E 483	Surface Water Hydrology	

C E 531	Open Channel Hydraulics
C E 557	Water Resources Development ¹
C E 581	Ground Water Hydrology ¹
C E 582	Statistical Hydrology
A EN 459	Groundwater, Wells & Pumps
A EN 478	Irrigation and Drainage Engineering
<i>Transportation and Construction</i>	
C E 471	Transportation Engineering ¹
C E 477	Engineering Economics and Construction Management ¹
MECE elective courses ⁴	6
Two courses to be selected from the following list of courses (numbered 450-599) ³	
<i>Chemical and Materials Engineering</i>	
CHME 479	Corrosion and Degradation of Materials
CHME 567	Nanoscience and Nanotechnology ¹
<i>Engineering Technology</i>	
E T 455	Cost Estimating and Scheduling
E T 472	Intelligent Transportation Systems (ITS) ¹
E T 480	Innovation and Product Development
SUR 451	Spatial Data Adjustment II
SUR 452	Surveying Practicum
SUR 461	GNSS Positioning
SUR 464	Legal Principles and Boundary Law II
SUR 485	Emerging Techniques in Geospatial Technologies
<i>Industrial Engineering</i>	
I E 459	Systems Thinking and Decision Making ¹
I E 515	Stochastic Processes Modeling ¹
I E 523	Advanced Engineering Economy ¹
I E 533	Linear Programming ¹
I E 534	Nonlinear Programming ¹
I E 535	Discrete Optimization ¹
I E 537	Large Scale Systems Engineering ¹
I E 561	Advanced Safety Engineering ¹
I E 563	Topics in Engineering Administration ¹
<i>Mechanical Engineering</i>	
M E 456	Experimental Modal Analysis
M E 502	Elasticity I ¹
M E 504	Continuum Mechanics ¹
M E 530	Intermediate Fluid Mechanics
M E 533	Numerical Methods for Fluid Mechanics and Heat Transfer
M E 557	Engineering Failure Analysis ¹
M E 570	Engineering Analysis I ¹
Total Credits	30-31

¹ Course offered online in the Fall, Spring, or Summer semester

² Electives should be chosen from at least 2 different areas (e.g., geotechnical and structural, environmental and water resources/ agricultural)

³ Up to 12 credit hours of undergraduate courses numbered 450-499 may be applied towards the M.E. in CE degree (excess of this limit requires approval of department head)

⁴ Courses listed represent only a partial list of engineering electives that may be taken outside the department; courses in other areas of interest outside the college may be taken including, but not limited to, environmental science, mathematics, statistics, geography, soil

science, geology, business, economics, and management (all M.E. in CE electives must be approved by graduate advisor and department head)

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to an CE faculty advisor about your MAP plan and develop a course plan in consultation with the advisor. The faculty advisor should preferably be from the CE area of your interest.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
For students completing their BSCE degree under the Geotechnical option:		
C E 457	Foundation Design	3
C E 470	Design of Municipal and Hazardous Waste Landfills	3
C E 471	Transportation Engineering	3
C E 477	Engineering Economics and Construction Management	3
C E 479	Pavement Analysis and Design	3
C E 485	Design of Earth Dams	3
C E 507	Design of Earth Retaining Structures	3
C E 508	Advanced Soil Behavior	3
For students completing their BSCE degree under the Structural option:		
C E 457	Foundation Design	3
C E 469	Structural Systems	3
C E 471	Transportation Engineering	3
C E 477	Engineering Economics and Construction Management	3
C E 501	Advanced Mechanics of Materials	3
C E 510	Introduction to Nondestructive Testing	3

C E 554	Wood Design	3
C E 555	Masonry Design	3

For students completing their BSCE degree under the Environmental option:

C E 457	Foundation Design	3
C E 470	Design of Municipal and Hazardous Waste Landfills	3
C E 477	Engineering Economics and Construction Management	3
ENVE 456	Environmental Engineering Design	3
ENVE 459	Environmental Microbiology	3
ENVE 487	Air Pollution Control Systems Design	3
ENVE 550	Aquatic Chemistry	3
ENVE 551	Unit Processes/Operation of Water Treatment	3
ENVE 552	Unit Processes/Operation of Wastewater Treatment	3

For students completing their BSCE degree under the Water Resources option:

A EN 459	Groundwater, Wells & Pumps	3
A EN 478	Irrigation and Drainage Engineering	3
C E 452	Geohydrology	3-4
C E 457	Foundation Design	3
C E 477	Engineering Economics and Construction Management	3
C E 482	Hydraulic Structures	3
C E 483	Surface Water Hydrology	3
C E 531	Open Channel Hydraulics	3
C E 557	Water Resources Development	3

NOTE: No more than 4 courses from any of the lists above can be applied in the MAP for the Master of Engineering in Civil Engineering (MECE) degree.

Civil Engineering - Master of Science in Civil Engineering

In support of the mission and vision statements for the graduate program, the department adopts the following goals for the Master of Science (M.S.) in Civil Engineering degree:

1. Prepare students to fulfill the academic prerequisites specified by the Americans Society of Civil Engineers (ASCE) for Licensure and Professional Practice in Civil Engineering.
2. Prepare students to attain the Body of Knowledge specified by ASCE necessary for entry into the practice of civil engineering at the professional level.
3. Prepare students in conducting applied research in areas relevant to the practice of civil engineering.
4. Prepare students for advanced graduate studies towards a terminal degree.

Students may choose from the geotechnical, structural, or water resources engineering options following the Thesis or Non-Thesis track, requirements of which are specified below. Exceptions to these requirements must be approved by the head of the department. Further information related to the M.S. degree may be found under the Academic Programs of Study (p. 31) section of the catalog.

Option: Geotechnical Engineering Thesis Track

Prefix	Title	Credits
Background Courses ⁴		
C E 357	Soil Mechanics	
C E 457	Foundation Design	
GEOL 1110G	Physical Geology (or higher-level courses)	
C E 445	Reinforced Concrete Design (or higher-level courses based on ACI)	
Core Courses ¹		9
Select three from the following:		
C E 508	Advanced Soil Behavior	
C E 509	Deep Foundations	
C E 579	Ground Improvement	
Optional Courses		12-13
Select four from the following:		
C E 452	Geohydrology	
C E 460	Site Investigation	
C E 470	Design of Municipal and Hazardous Waste Landfills	
C E 479	Pavement Analysis and Design	
C E 485	Design of Earth Dams	
C E 507	Design of Earth Retaining Structures	
C E 585	Slope Stability Analysis and Design	
Select 3 credits from courses outside the area or department (450 or higher) ²		3
Research Credits		6
C E 599	Master's Thesis ³	
Total Credits		30-31

- ¹ A course listed as core may be taken as one of the four optional courses if it is not counted already as one of the three core courses.
- ² The selected course outside the area or department must be previously approved by the academic advisor or student's Graduate Committee.
- ³ A maximum of 6 credits are counted toward the Master's Degree program.
- ⁴ A course listed as background provides fundamental knowledge to pursue graduate studies in geotechnical engineering but does not satisfy the course requirements for the MS degree (exception: CE 457).

Total credits needed for the Thesis Track are 24 credits of coursework and 6 credits of C E 599 Master's Thesis research.

Non-Thesis Track

The background and core courses for the Non-Thesis Track in Geotechnical Engineering are the same as those listed under the Thesis Track. Under optional courses, Non-Thesis students must select one additional course (i.e., total of five optional courses) from the list provided for the Thesis Track. In addition, Non-Thesis students must complete 3 credits of CE 598 - Special Research Programs in place of 6 credits of CE 599 and pass a final exit exam covering coursework and their research project.

Total credits needed for the Non-Thesis Track are 27 credits of coursework and 3 credits of C E 598 Special Research Programs.

Option: Structural Engineering Thesis Track

Prefix	Title	Credits
Background Courses ²		
C E 315	Structural Analysis	
C E 444	Elements of Steel Design (based on AISC)	
C E 445	Reinforced Concrete Design (based on ACI)	
Core Courses		15
C E 501	Advanced Mechanics of Materials	
C E 515	Finite Element Methods	
C E 544	Advanced Design of Steel Structures	
C E 545	Advanced Concrete Design	
C E 571	Structural Dynamics	
Optional Courses ³		9
Select three from the following:		
C E 490	Introduction to Artificial Intelligence for Civil Engineers	
C E 502	Advanced Mechanics of Steel Structures

C E 507	Design of Earth Retaining Structures	
C E 509	Deep Foundations	
C E 510	Introduction to Nondestructive Testing	
C E 547	Bridge Engineering	
C E 554	Wood Design	
C E 555	Masonry Design	
C E 590	Advanced Artificial Intelligence for Civil Engineers	
Research Credits		6
C E 599	Master's Thesis ¹	
Total Credits		30

¹ A maximum of 6 credits are counted toward the Master's Degree program.

² A course listed as background provides fundamental knowledge to pursue graduate studies in structural engineering but does not satisfy the course requirements for the MS degree.

³ A course listed as optional may replace one of the five core courses if it is not counted already as one of the three optional courses (requires department head approval)

Total credits needed for the Thesis Track are 24 credits of coursework and 6 credits of C E 599 Master's Thesis research.

Non-Thesis Track

The background and core courses for the Non-Thesis Track in Structural Engineering are the same as those listed under the Thesis Track. Under optional courses, Non-Thesis students must select one additional course (i.e., total of four optional courses) from the list provided for the Thesis Track. In addition, Non-Thesis students must complete 3 credits of CE 598 - Special Research Programs in place of 6 credits of CE 599 and pass a final exit exam covering coursework and their research project.

Total credits needed for the Non-Thesis Track are 27 credits of coursework and 3 credits of C E 598 Special Research Programs.

I E 535	Discrete Optimization	

Electives outside College of Engineering: A ST, AEEC, GEOG, GEOL, MATH, STAT, and SOIL (must be approved by the Advisor and Committee Members).

Notes:

1. International students must be registered at least 9 credits per semester.
2. International students may be required to take English language courses to show proficiency in English.
3. At least half of the credits of the Master's Degree program must be 500 level or higher.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to an CE faculty advisor about your MAP plan and develop a course plan in consultation with the advisor. The faculty advisor should preferably be from the CE area of your interest.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the

additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
For students completing their BSCE degree under the Geotechnical option:		
C E 457	Foundation Design	3
C E 470	Design of Municipal and Hazardous Waste Landfills	3
C E 471	Transportation Engineering	3
C E 477	Engineering Economics and Construction Management	3

C E 485	Design of Earth Dams	3
C E 507	Design of Earth Retaining Structures	3
C E 508	Advanced Soil Behavior	3
For students completing their BSCE degree under the Structural option:		
C E 457	Foundation Design	3
C E 469	Structural Systems	3
C E 471	Transportation Engineering	3
C E 477	Engineering Economics and Construction Management	3
C E 501	Advanced Mechanics of Materials	3
C E 510	Introduction to Nondestructive Testing	3
C E 554	Wood Design	3
C E 555	Masonry Design	3
For students completing their BSCE degree under the Environmental option:		
C E 457	Foundation Design	3
C E 470	Design of Municipal and Hazardous Waste Landfills	3
C E 477	Engineering Economics and Construction Management	3
ENVE 456	Environmental Engineering Design	3
ENVE 459	Environmental Microbiology	3
ENVE 487	Air Pollution Control Systems Design	3
ENVE 550	Aquatic Chemistry	3
ENVE 551	Unit Processes/Operation of Water Treatment	3
ENVE 552	Unit Processes/Operation of Wastewater Treatment	3
For students completing their BSCE degree under the Water Resources option:		
A EN 459	Groundwater, Wells & Pumps	3
A EN 478	Irrigation and Drainage Engineering	3
C E 452	Geohydrology	3-4
C E 457	Foundation Design	3
C E 477	Engineering Economics and Construction Management	3
C E 482	Hydraulic Structures	3
C E 483	Surface Water Hydrology	3
C E 531	Open Channel Hydraulics	3
C E 557	Water Resources Development	3

NOTE: No more than 2 courses from any of the lists above can be applied in the MAP for the Master of Science in Civil Engineering (MSCE) degree.

Clinical Mental Health Counseling - Master of Arts

The CEP department offers a Clinical Mental Health Counseling program which leads to a Masters of Arts degree (M.A.). The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). It prepares professional counselors to perform mental health counseling in agencies, hospitals, and private practice. Successful completion of the Clinical Mental Health Counseling program qualifies students to pursue licensure as clinical mental health counselors with the New Mexico Counseling and Therapy Practice Board.

Annual application deadline: February 1

For more information on program application requirements and process, see Clinical Mental Health Counseling, M.A., program website (<https://cep.nmsu.edu/academic-programs/counseling-guidance-m-a.html>).

Requirements

The 60-credit counseling curriculum requires two years full-time study or three years part time study on campus, and covers the following areas:

human development, appraisal; diagnosis and treatment planning; individual, family and group counseling; consultation; career/life planning; research; and professional issues. Specialized training and supervised experience is offered in mental health agencies, hospitals, and in schools.

Program of Study

Prefix	Title	Credits
CEPY 5120	Human Development	3
CEPY 5130	Multicultural Counseling	3
CEPY 5170	Professional Issues in Mental Health Counseling	3

Elective Classes		6
CEPY 5280	Primary Care Psychology	3
Total Credits		60

Communication Disorders - Master of Arts

Students entering the graduate program with an undergraduate major in Communication Disorders can expect to complete the program in two years if they enroll full-time or in three years if they enroll part-time and be awarded a Masters of Arts in Communication Disorders with a specialization in Speech-Language Pathology. The graduate program for

students without a Communication Disorders background is generally one year longer because one year of leveling is required. Enrollment in graduate courses in Communication Disorders is limited to students who have been accepted into the graduate program in Communication Disorders. To complete this course of study, each student is expected to meet the program's academic and clinical competency criteria which are aligned with the requirements of state and national certifying bodies for licensure and clinical certification. Details regarding certification are available from the American Speech-Language-Hearing Association (<http://www.asha.org/certification/>) (ASHA), and the New Mexico Regulations & Licensing Department (http://www.rld.state.nm.us/boards/speech_language_pathology_audiology_and_hearing_aid_dispensing_practices.aspx).

The residential Master of Arts education program in speech-language pathology at New Mexico State University is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association (ASHA), 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.

Program Requirements

The traditional Master's degree plan requires a minimum of 62 graduate credit hours and the completion of at least 400 clinical hours.

Prefix	Title	Credits
<i>Required Courses</i>		
SPHS 5110	Research Methods	3
SPHS 5120	Assessment of Communication Disorders	3
SPHS 5130	Pediatric Language and Disorders	3
SPHS 5210	School Age Language and Disorders	3
SPHS 5140	Speech Sound Disorders	3
SPHS 5220	Adult Neurogenic Language Disorders	3

SPHS 5988	Clinical Education	2
SPHS 5990	Practicum in Speech-Language Pathology	13
SPHS 5989	Externship in Communication Disorders	9
Elective Courses - Choose 6 credits from the following:		6
HEST 5110	Interprofessional Education and Learning: Foundations of Collaborative Practice	
SPHS 5320	Cognitive Communication Disorders	
SPHS 5335	Swallowing and its Disorders in the Pediatric Population	
SPHS 5310	Introduction to Augmentative and Alternative Communication	
SPHS 5360	Communication Disorders in Neurodiverse Populations	
SPHS 5520	Best Practices in Bilingual/Multicultural Assessment for Practitioners	
SPHS 5996	Special Topics	
Total Credits		63

Leveling Program

The Leveling Program is designed for students with an undergraduate degree other than Communication Disorders. The courses to be taken

during the leveling year are listed below. In addition to these courses, students who did not complete at least one 3-credit hour course in all of the following subjects: Biology, Physics or Chemistry, and Statistics before starting the leveling program should also plan on completing these courses.

Prefix	Title	Credits
SPHS 4710	Speech Disorders Across the Lifespan	3
SPHS 4520	Audiology	3
SPHS 4720	Anatomy and Physiology of Speech Mechanisms	3
SPHS 4810	Clinical Methods and Procedures	3
SPHS 4820	Neural Bases of Communication Disorders	3
SPHS 4830	Aural Rehabilitation	3
SPHS 4620	Speech and Hearing Science	3
SPHS 4610	Language Acquisition	3
SPHS 4715	Language Disorders Across the Life Span	3
SPHS 4510	Phonetics	3
Total Credits		30

Communication Studies - Master of Arts

The department offers thesis, comprehensive exam, and applied project options in its Masters of Arts program. All options require a minimum of 36 credits, which includes not only Communication Studies courses but at least one course from outside the department. The thesis option requires at least 30 credits of coursework, 6 credits of thesis hours (COMM 5999 Master's Thesis), and an oral defense of the thesis and coursework. The comprehensive exam option requires 36 credits of coursework, plus six hours of written examination, followed by an oral defense. The applied project option requires at least 30 credits of coursework, 6 credits of project hours (**COMM 5994 MA Project**) and an oral defense of the project and coursework. All options require a minimum of 30 credit hours of Communication Studies courses.

Select 15 credits from Communication Studies electives for the thesis option. Take 15 credits plus at least 3 credits from related disciplines for the comprehensive exam option. Two courses (6 credits) for courses that have numbers 450+ can be counted. For all options, a total of 36 credits is required, 30 credits of COMM, a B- or better in all courses, and a minimum 3.0 GPA to graduate.

An M.A. Tracking Form for thesis, comprehensive exam, and applied project options are found on the department website (<https://comm.nmsu.edu/about-comm-studies/>).

Graduate course rotation:

Fall

COMM 5210 Political Communication

COMM 5510 Organizational Communication

COMM 5110 Theories of Communication

Spring

COMM 5130 Quantitative Research Methods/COMM 5140 Qualitative Research Methods in Communication

COMM 5710 Communication and Culture

COMM 5610 Interpersonal Communication

Thesis Option:

Prefix	Title	Credits
Degree Requirements		
COMM 5130	Quantitative Research Methods	
COMM 5110	Theories of Communication	
Select three courses from the following:		9
COMM 5210	Political Communication	
COMM 5510	Organizational Communication	
COMM 5710	Communication and Culture	
COMM 5610	Interpersonal Communication	
Electives ²		
Select 9-12 credits of COMM Electives		9-12
Select 3-6 credits must be from courses in Related Fields (outside of COMM courses and must be numbered 4220+)		3-6
Thesis		
COMM 5999	Master's Thesis	1-15
Total Credits		25-39

¹ Students must receive a minimum grade of a B or better in the methods course for which they wish to apply to their thesis work. Approval of the students thesis advisor may also be required.

² In order to graduate, students will need a total of 36 credits, of which 30 credits must be from COMM coursework. Please consult your advisor about your specific requirements and how to complete them in order to graduate.

Comprehensive Exam Option:

COMM 5110	Theories of Communication	
Select three courses from the following:		9
COMM 5210	Political Communication	
COMM 5510	Organizational Communication	
COMM 5710	Communication and Culture	
COMM 5610	Interpersonal Communication	
Electives ¹		
Select 15-18 credits from COMM Electives		15-18
Select 3-6 credits must be from courses in Related Fields (outside of COMM courses and must be numbered 4220+)		3-6
Total Credits		30

¹ In order to graduate, students will need a total of 36 credits, of which 30 credits must be from COMM coursework. Please consult your advisor about your specific requirements and how to complete them in order to graduate.

Applied Project Option:

Prefix	Title	Credits
Degree Requirements		
COMM 5130	Quantitative Research Methods	3
COMM 5110	Theories of Communication	3

Select three courses from the following:	9
COMM 5210 Political Communication	
COMM 5510 Organizational Communication	
COMM 5710 Communication and Culture	
COMM 5610 Interpersonal Communication	
Electives ¹	
Select 9-12 credits from Electives in Related Fields, 3-6 credits from (graduate levels; numbered 4220+).	9-12
Select 3-6 credits must be from courses in Related Fields (outside of COMM courses and must be numbered 450+)	3-6
Project Option	
COMM 5994 MA Project	1-6
Total Credits	31-36

¹ In order to graduate, students will need a total of 36 credits, of which 30 credits must be from COMM coursework. Please consult your advisor about your specific requirements and how to complete them in order to graduate.

Entrance Requirements for Graduate Study in Communication Studies

Students wishing to enroll in the Master program in Communication Studies must meet the following criteria:

1. Hold a BA or BS degree, from an accredited institution of higher learning; Social Science disciplines are preferred
2. Hold a minimum grade point average of 3.00

**The Graduate Record Exam (GRE) General Test is not required for admission; however, existing GRE scores that are high will strengthen a candidate's application and are highly regarded in the awarding of Graduate Assistantships.*

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs. The MAP program allows undergraduate students to take graduate courses and count up to twelve credits toward both undergraduate and graduate degrees in COMM.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same courses as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 3.25.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
COMM 5220	Communication Technologies	3
COMM 5230	Strategic Communication	3
COMM 5310	Sports Communication	3
COMM 5630	Family Communication	3
COMM 5640	Nonverbal Communication	3
COMM 5998	Communication Internship for Graduate Students	3

Enrollment in graduate courses requires the approval of the Department Chair and a completed MAP form before the first semester to take MAP courses for dual credit. Please meet with Dr. Armfield for more information.

Computer Science - Master of Science

The Master of Computer Science degree has two tracks, one with thesis or project track and a course-work only track. For all master's students, the following apply:

- Each master's student must complete 12 credits of the basic requirements (p. 129)(see table below).
- Each master's student is expected to register for C S classes numbered 500 or above, except for C S 469 Data Structure and Algorithms Transition or deficiencies which are 46x courses (Transition Courses) or C S 471 Programming Language Structure I or C S 474 Operating Systems I.
- Courses not in Computer Science can be included in the student's program of study only if prior written approval has been obtained from the student's advisor and the departmental Graduate Committee. Further details can be found in the on-line Graduate Handbook (<https://computerscience.nmsu.edu/>).
- **For Thesis/Project track's students:** each student following this track needs to complete the following three requirements:
 - **Courses:** each student *needs to take*, in addition to the basic requirement, **15 credits** of Computer Science graduate courses (courses numbered > 500) with the following restrictions:
 - One course can only be used to satisfy one requirement (e.g., if C S 510 Automata, Languages, Computability is used to satisfy the requirement for the **Theories** category, it cannot be counted towards satisfying the requirements on **Courses**).
 - At most 6 credits of C S 579 Special Topics with different topics (i.e., with different subtitles) can be counted towards the degree program of the student.
 - At most 6 credits of C S 589 Special Research Problems can be counted towards the degree program of the student.
 - No credit of course numbered > 599 can be counted towards the degree program.
 - **Thesis/Project:** each student *must write a thesis* (C S 599 Master's Thesis) or *undertake a research project* (C S 598 Master's Project) for **6 credits**.

- **Master Final Exam:** each student is required to sustain a final exam, covering the thesis/research project and the graduate course-work. The two parts of the exam bring equal weight.
- **For Course-Work Only track's students:** Each student following this track needs to take, in addition to the basic requirement, **24 credits** of Computer Science graduate courses (courses numbered > 500) with the following restrictions:
 - One course can only be used to satisfy one requirement (e.g., if C S 510 Automata, Languages, Computability is used to satisfy the requirement for the **Theories** category, it cannot be counted towards satisfying the requirements on **Courses**).
 - At most 6 credits of C S 579 Special Topics with different topics (i.e., with different subtitles) can be counted towards the degree program of the student.
 - No credit of course numbered > 588 can be counted towards the degree program.

Basic Requirements

Prefix	Title	Credits

Total Credits		12

Counseling and Guidance (Educational Diagnostics) - Master of Arts

The CEP Department offers an MA in Counseling and Guidance specializing in Educational Diagnostics. Candidates admitted to the Specialist in Education (Ed.S.) or Ph.D. School Psychology Programs will have an opportunity to complete this MA degree before the completion of the Ed.S. or Ph.D. degree. Please note that this is not a stand-alone program, only students admitted to the programs mentioned above are considered for this degree. Please refer to the Catalog or the CEP department's website (<http://cep.nmsu.edu/>) for admissions and application requirements.

Candidates admitted to the Specialist in Education (Ed.S.) or Ph.D. School Psychology Programs can complete this MA degree prior to the completion of the Ed.S. or Ph.D. degree. This program is only open to students in the Specialist in Education (Ed.S.) or Ph.D. School Psychology Programs.

Prefix	Title	Credits
Required Coursework		
<i>Core Courses</i>		
CEPY 6130	Psychology of Multiculturalism	3
CEPY 6140	Cognitive & Affective Basis of Behavior	3
CEPY 6265	Diagnostic Class	3
CEPY 6120	Human Development	3
SPED 6170	School Intervention and Organization in a Diverse Society	3
<i>Concentration Coursework</i>		
CEPY 5310	Appraisal of Psychoeducational Achievement in a Diverse Society	3
CEPY 6330	Academic & Behavioral Assessment & Intervention	3
CEPY 6340	Appraisal of Cognitive Functioning	3
CEPY 6510	Practicum in School Psychology: Psychoeducational	3
CEPY 6520	Field Experience in Educational Diagnostics	3
Total Credits		30

Creative Writing - Master of Fine Arts

Students pursuing the MFA in Creative Writing devote themselves to concentrated study and development of a chosen genre: poetry or fiction. Students

- complete 54 hours of graduate-level coursework,
- present a book-length thesis of original work with an introduction or afterward,
- perform a public reading from the thesis, and
- pass an oral examination in the final semester.

A maximum of 12 credits in Form and Technique count for the degree.

Prefix	Title	Credits
Required Coursework ¹		
MFA workshop in the major genre (poetry, fiction)		12
Form and Technique courses in major genre		6
Workshop in a second genre		3

Graduate literature courses (may include 2 Form & Technique)	12
ENGL 592 Master's Theory, Practice, and Profession ²	6
ENGL 594 Master's Workshop ²	6
ENGL 599 Master's Thesis ³	6
Elective Courses	3-12
Total Credits	54-63

¹ Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

² 3 hours of ENGL 592 Master's Theory, Practice, and Profession must be taken concurrently with 3 hours of ENGL 594 Master's Workshop in each of the final two semesters of the program.

³ 3 hours of ENGL 599 Master's Thesis must be taken in the final semester.

Criminal Justice - Master of Criminal Justice

All candidates, regardless of chosen degree option, must complete a final examination. Examination requirements vary by degree option. Please contact the director of the MCJ program or consult the Department of Criminal Justice website (<http://crimjust.nmsu.edu/criminal-justice-graduat/>) for details.

Thesis Option (33 Credits)

Thesis students must submit a thesis proposal to their faculty committee for approval and subsequently complete the approved thesis project. An approved thesis proposal is one wherein the thesis committee determines the student demonstrates a comprehensive understanding of the nexus of theory, method, and policy as it applies to the proposed thesis project. At the discretion of the thesis committee the proposal may be considered inadequate and the student is required to revise and resubmit the thesis proposal until the committee determines the proposal is satisfactory. The final examination minimally includes a defense of the completed thesis, but may also include a general examination based upon the candidate's program of study. The minimum coursework requirements are displayed below.

Prefix	Title	Credits
Required Courses		15
CJUS 501	Research Methods in Criminal Justice	
CJUS 502	Statistics in Criminal Justice	
CJUS 511	Nature of Crime	
CJUS 514	Advanced Race, Crime, and Justice	
CJUS 525	Issues in Ethics, Law, and Criminal Justice	
Master's Thesis Credits		
CJUS 599	Master's Thesis	6
General Electives		
Select 12 credits from General Electives. ¹		12
Total Credits		33

¹ Students may not count CJUS 593 Internship or CJUS 592 Independent Research credit toward their elective requirement. No more than three total credits of CJUS 591 Directed Readings in Criminal Justice coursework may be used as electives; a minimum of 3 of the 12 credit general elective requirement must come from the Department of Criminal Justice.

A minor is optional (contact the director of the MCJ program or consult the Department of Criminal Justice web site, <https://crimjust.nmsu.edu/>, for details) and may result in more than 33 total credits for the degree.

Focused Coursework Option (36 Credits)

Focused coursework students must pass a written comprehensive examination following completion of the required courses. Students not passing the examination will be required to wait until the following semester to retake the examination. The minimum course requirements are displayed below.

Prefix	Title	Credits
Required Courses		15
CJUS 501	Research Methods in Criminal Justice	
CJUS 502	Statistics in Criminal Justice	
CJUS 511	Nature of Crime	
CJUS 514	Advanced Race, Crime, and Justice	
CJUS 525	Issues in Ethics, Law, and Criminal Justice	
CJus Electives		
Select 12 credits from electives from courses offered by the Department of Criminal Justice, to be selected in consultation with a student's advisor. ¹		12
General Electives/Minor		
An additional 9 credits of electives, to be selected in consultation with a student's advisor. ²		9
Total Credits		36

¹ No more than three total credits of CJUS 593 Internship or CJUS 591 Directed Readings in Criminal Justice courses may be used as Criminal Justice electives. CJUS 592 Independent Research may not be used as Criminal Justice Electives for this option.

² No more than three credits of C J 593 Internship or C J 591 Directed Readings may be used to fulfill the general elective requirement. C J 592 Independent Research may not be used as Criminal Justice Elective for this option.

A minor is optional (contact the director of the MCJ program or consult the Department of Criminal Justice web site, <https://crimjust.nmsu.edu/>, for details) and may result in more than 36 total credits for the degree.

Minimum Grade Requirement

Students must earn a minimum B- grade in all required core courses, excluding elective credits. This applies to both options: Thesis and Focused Coursework as well as to both programs: On-Campus (traditional) and Online.

Data Analytics - Master of Data Analytics

Data analytics is an inherently interdisciplinary discipline, dealing with methods and systems to synthesize knowledge or insights from large quantities of data collected from heterogeneous sources and diverse spatial and time scales. Data analytics employs theories, methodologies, and tools drawn from many fields, within the broad areas of mathematics, statistics, and computer and information sciences, and applies them to a diversity of data-rich domains, such as life sciences, medicine, physical sciences, social sciences, engineering, business, and education.

The PMS in Data Analytics will provide students with a strong foundation in data management and analysis, the computational and statistical thinking, and understanding of computer systems. After completing this program, students will have gained the skills and ability to:

- Analyze real-life data from diverse sources and domains
- Effectively apply analytics tools to large data sets
- Apply mathematical and statistical models to data analysis problems
- Apply computational thinking to develop effective data analytics solutions
- Apply programming and debugging skills to problem solving
- Understand and use computer technology and software in solving real-life data analysis problems
- Understand and address unfamiliar problems related to data analytics
- Develop effective instrument to communicate solutions to diverse audiences

Program

The professional focus of the degree will prepare students for success in the workplace, with an emphasis on enriching the preparation of students who are already in the workplace and are seeking technical skills to advance their careers in the data analytics domain.

Program Features

- Degree granted from New Mexico State University
- Asynchronous courses delivery to accommodate student schedules & needs
- 30 credits [3 semesters and a summer, 9 credits/semester; students may enroll part time]
- In person courses are permissible
- Industry experience encouraged

Affiliated Faculty (Non-Computer Science Faculty)

- Laura Boucheron, PhD, University of California Santa Barbara; Image processing, machine learning and deep learning applied to image analysis, interdisciplinary applications including astronomy and biomedical; Klipsch School of Electrical & Computer Engineering
- Hansuk Sohn, PhD, University of Iowa; Mathematical Programming (Linear, Integer, and Stochastic) and Dynamic Programming, Algorithm development (Optimization, Heuristic, and Hybrid algorithms), Statistical Data Analysis and Data Mining; Industrial Engineering
- Charlotte Gard, PhD, University of Washington; Biostatistics; Department of Economics, Applied Statistics, and International Business
- Clint Loest, PhD, Kansas State University; Ruminant Nutrition, Animal Nutrition; Animal and Range Sciences
- Carlo A. Mora-Monge, PhD, The University of Toledo; Business Analytics, Supply Chain Analytics, E-commerce Use; Management Department
- Marshall A. Taylor, PhD, University of Notre Dame; Computational Social Science, Cultural Sociology, Cognitive Sociology; Department of Sociology

Curriculum

The curriculum for the degree program is composed of 30 graduate credits.

Economics - Master of Arts

Economics - Master of Arts (no Concentration)

Candidates for the Master of Arts in economics must successfully complete a minimum of 30 graduate credits (concentrations may require more than 30 graduate credits). At least 12 credits beyond the core courses (AEEC 5120 Microeconomic Theory, AEEC 5130 Macroeconomic Theory, AEEC 5240 Econometrics) must be earned by taking courses taught by economics faculty members in the Department of Economics, Applied Statistics and International Business. At least two of the three core courses must be completed at NMSU. Twenty-one of the credits must have one of the four following prefixes: AEEC, ECON, ECDV, or AG E. At least twenty-four of the credits must be associated with courses numbered 500/5000 or above. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. Students preparing to enter the program are encouraged to complete the following:

1. one course in intermediate microeconomic theory and one course in macroeconomic theory with minimum grades of B;
2. one course in college-level calculus; and
3. one course in statistics, including simple regression.

Those students not having completed these courses may be admitted with the requirement that the deficiencies be completed at the beginning of the graduate program.

The Master of Arts in Economics (regulatory economics) may be completed either face-to-face or online

All students in the program must successfully complete a minimum of 30 credits including the following:

Prefix	Title	Credits
Required Courses		
AEEC 5120	Microeconomic Theory	3
AEEC 5130	Macroeconomic Theory	3
AEEC 5240	Econometrics	3
Electives, subject to the restrictions above.		21
Total Credits		30

Notes:

1. No more than one course with a grade less than B can be used to fulfill the requirements for the MA Econ degree.
2. ECON 503 Managerial Economics cannot be counted toward the major in Economics.
3. A maximum of nine hours of approved transfer credit (with minimum grades of A) may be applied toward the degree.

Teaching and research assistantships are available to qualified applicants; however, admission to the program does not imply or guarantee an assistantship. It is not necessary to have an undergraduate degree in economics to enter the graduate program or to receive financial assistance.

The Masters of Arts in Economics (no concentration) may be completed either face-to-face or online.

Economics (Econometrics) - Master of Arts

Candidates for the Master of Arts in economics must successfully complete a minimum of 30 graduate credits (concentrations may require more than 30 graduate credits). At least 12 credits beyond the core courses (AEEC 5120 Microeconomic Theory, AEEC 5130 Macroeconomic Theory, AEEC 5240 Econometrics) must be earned by taking courses taught by economics faculty members in the Department of Economics, Applied Statistics and International Business. At least two of the three core courses must be completed at NMSU. Twenty-one of the credits must have one of the four following prefixes: AEEC, ECON, ECDV, or AG E. At least twenty-four of the credits must be associated with courses numbered 500/5000 or above. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. Students preparing to enter the program are encouraged to complete the following:

1. one course in intermediate microeconomic theory and one course in macroeconomic theory with minimum grades of B;
2. one course in college-level calculus; and
3. one course in statistics, including simple regression.

Those students not having completed these courses may be admitted with the requirement that the deficiencies be completed at the beginning of the graduate program. Those students interested in the concentration in regulatory economics are advised to complete two courses in college-level statistics.

Teaching and research assistantships are available to qualified applicants; however, admission to the program does not imply or guarantee an assistantship. It is not necessary to have an undergraduate degree in economics to enter the graduate program nor to receive financial assistance.

All students in the program must successfully complete a minimum of 30 credits including the following:

Prefix	Title	Credits
Required Courses		
AEEC 5120	Microeconomic Theory	3
AEEC 5130	Macroeconomic Theory	3
AEEC 5240	Econometrics	3

EDUC 6330	Critical Race Theory & Storytelling in Educational Spaces	
ELAD 5310	Leadership for Social Justice and Equity	
<i>Students select a minor in Native American Studies (9 cr), Gender and Sexuality Studies (9-12 cr), or 9 credits of electives in Criminal Justice</i>		9-12
Total Credits		30-33

¹ This course is the final course that students are required to take after all other courses are completed.

Education (Early Childhood Education Plus Licensure) - Masters of Arts Concentration: Early Childhood Education (plus licensure)

The College of Education's School of Teacher Preparation, Administration and Leadership at New Mexico State University offers a 42 credit Master of Arts in Education Plus Licensure in Early Childhood Education for individuals who have completed a bachelor's degree. The program is

designed to meet the professional education course requirements for teacher licensure as a part of a Master of Arts in Education degree program. A full-time student in this program typically completes in 2 years.

Eligible Participants must:

- Completed a bachelor's degree in a closely related field with a cumulative GPA of 2.75 or higher.
- Prerequisites may be required depending on BA degree coursework.
- Be admitted to the NMSU Graduate School
- Be admitted to the College of Education's School of Teacher Preparation, Administration and Leadership

¹ Prerequisites to TEP Methods Courses; TEP portfolio can be submitted during the semester in which you are finishing the Core courses.

Education (Elementary Licensure Prep) - Master of Arts

Elementary Licensure Prep

The School of Teacher Education & Educational Leadership at New Mexico State University offers an Elementary Teacher Education Program for individuals who have completed a bachelor's degree. The program is designed to meet the professional education course requirements for teacher licensure as a part of a Master of Arts in Education degree program.

All students wishing to complete a degree in Elementary Education must apply to the Teacher Education Program. Additional information on the application process can be obtained from the College of Education Educational Support and Resource Center or on the departmental website (<https://tpal.nmsu.edu/degree-programs/undergraduate-programs/ug-ecce.html>). A 2.75 minimum GPA is required for admission to the Teacher Education Program, and a 2.75 minimum GPA must be maintained for graduation. *Students must earn a "C-" or better in all education, TEP prerequisite, endorsement, and teaching field courses.*

Program Completion Requirements:

1. Apply through NMSU Graduate School main webpage (<https://gradschool.nmsu.edu/>). Select Intended major "Education (Elementary Licensure Prep)" as this is the concentration you will pursue
2. After you receive an acceptance letter from the Department of Curriculum & Instruction, contact your faculty advisor within the first semester of enrollment
3. Complete the MATH 5110 Fundamentals of Elementary Mathematics I prerequisite course
4. Complete the Core Courses listed below, before admission into the Teaching Education Program

Admission to the Teacher Education Program (TEP):

1. Obtain application information at <https://tpal.nmsu.edu/admissions/tep-admission/> (<https://tpal.nmsu.edu/admissions/tep-admission.html>)
2. Make an appointment with the program director for a program of study before TEP portfolio
3. Pass Praxis Core Academic Exams: Reading, Writing, and Math. Information can be found at <https://www.ets.org/praxis/nm> (<https://www.ets.org/praxis/nm/>)
4. Submit TEP portfolio to the College of Education Advising Center no later than 12:00 pm (MST) on the 3rd Friday in February for Spring, the 3rd Friday in September for Fall, or the 3rd Friday in July for Summer. TEP portfolio must be successfully reviewed before enrolling in Teaching Methods Courses.

Completing Teaching Methods Block Courses:

1. Fall Block (see below)
2. Spring Block (see below)
3. Pass Praxis Elementary Education: Curriculum, Instruction, and Assessment before or during Block B <https://www.ets.org/praxis/nm> (<https://www.ets.org/praxis/nm/>)
4. Earn a grade of B or better in all courses

Student Teaching Entry Portfolio (STEP)

1. Obtain application information at <https://tpal.nmsu.edu/degree-programs/undergraduate-programs/stia.html>
2. Make an appointment with the Program Director for a program of study
3. Before student teaching is approved, the Candidate must include passing scores for Praxis Elementary Education: Curriculum, Instruction, and Assessment.
4. Submit Student Teaching Packet (STEP) on the 1st Friday in March for Spring and the 1st Friday in October in Fall.

Student Teaching- must be completed during the final semester

1. Take EDUC 5811 and EDUC 5810 concurrently during student teaching (16-week Student Teaching Internship and Seminar)
2. Pass Praxis Principles of Learning and Teaching: Grade K-6 and Teaching Reading: Elementary exams during student teaching semester <https://www.ets.org/praxis/nm> (<https://www.ets.org/praxis/nm/>)
3. Defend Evidence of Student Learning project during student teaching semester in EDUC 5811

EDUC 5810	Student Teaching	6
Credits		9
Total Credits		42

Education (Elementary Mathematics and Science) - Master of Arts

The College of Education's School of Teacher Preparation, Administration and Leadership at New Mexico State University offers a 34 credit Master of Arts in Education in Elementary

Mathematics and Science for individuals who have completed a Bachelor's degree and already licensed teachers. The program is designed to prepare teachers to be specialists in mathematics and science teaching and learning, and to prepare them to be leaders.

A part-time student enrolling in 6 credit hours per semester, including the summer, will complete this program in 2 years. The program follows a cohort model.

Eligible Participants must:

- Have completed a bachelor's degree in a closely related field with a cumulative GPA of 2.80 or higher
- Be admitted to the NMSU Graduate School
- Be admitted to Curriculum & Instruction

Program Delivery: Main Campus; Face-to-face

Prefix	Title	Credits
Program Requirements

EDUC 5999	Capstone Research Project	1
Total Credits		34

Observations of teaching, technology, and multicultural education are integrated into all coursework.

Education (Secondary Licensure Prep) - Master of Arts

Secondary Licensure Prep

The School of Teacher Preparation, Administration and Leadership (TPAL) at New Mexico State University offers a Secondary Teacher Education Program for individuals who have completed a bachelor's degree. This program meets the professional education course requirements for initial teacher licensure as part of the Master of Arts in Education degree program. All coursework must be completed before the final student teaching semester.

Secondary teaching fields can be selected from English Language Arts, Social Studies, Mathematics, and General Science.

Program Completion Requirements:

1. Apply through NMSU Graduate School's main webpage (<https://gradschool.nmsu.edu/>). Select the intended major "Education (Secondary Licensure Prep)" as this is the concentration you will pursue
2. After you receive an acceptance letter from the School of Teacher Preparation, Administration and Leadership, contact your faculty advisor within the first semester of enrollment
3. Complete the Core Course Requirements listed below before admission to the Teacher Education Program

Admission to the Teacher Education Program (TEP):

1. Obtain application information at <https://tpal.nmsu.edu/admissions/tep-admission/> (<https://tpal.nmsu.edu/admissions/tep-admission.html>)
2. Make an appointment with the program director for a program of study before submitting the TEP portfolio.
3. Submit the TEP portfolio no later than 12:00 pm (MST) on the 3rd Friday in February for Spring and the 3rd Friday in September for Fall. TEP portfolio must be successfully reviewed before enrolling in Teaching Methods Courses.

Teaching Field & Other Course Completion Requirements:

1. Complete all the requirements for a teaching field in Secondary Education (English Language Arts, Mathematics, Science, Social Studies) before student teaching.
2. Transcripts will be evaluated for any teaching field deficiencies at the request of your Program Director.
3. Complete all remaining coursework (see below) before the Student Teaching courses.

Student Teaching Entry Portfolio (STEP)- one semester before student teaching

1. Obtain application information at <https://tpal.nmsu.edu/degree-programs/undergraduate-programs/stia.html>
2. Make an appointment with the Program Director for an updated program of study before submitting the STEP application.
3. Submit Student Teaching Packet (STEP) on the 1st Friday in March for Fall and the 1st Friday in October for Spring.

Student Teaching- must be completed during the final semester

1. Take EDUC 5811 and EDUC 5810 concurrently during student teaching (16-week Student Teaching Internship and Seminar).

2. Complete all remaining coursework (see below) and all teaching field deficiencies before the Student Teaching courses.

Educational Leadership & Administration (Higher Education Administration) - Master of Arts Prerequisite

Students interested in higher education administration must have a bachelor's degree.

Application Deadline

This program begins in the spring semester only. All materials for this program must be received by the deadline specified on the School of TPAL website. Admission requirements are available from the School of TPAL, or on the website at <http://ela.nmsu.edu/index/academics/mainhied/> (<https://ela.nmsu.edu/academic-programs/ma-higher-ed/admission-require.html>). Students will be informed upon their formal acceptance into the program.

Program Delivery

There is a mandatory face-to-face orientation in Las Cruces prior to the start of the spring semester, January. All other classes are 100% online, distance delivery.

Educational Leadership & Administration (Pk-12 Administration) - Master of Arts

The program of study for Pk-12 school administration includes all coursework and internships required by the New Mexico Public Education Department for Administrative Licensure. Students must earn a minimum of a "B-" grade in all required coursework. Students who receive a grade of "C+" or below will be required to retake the course. In addition, students must successfully complete a final department examination, generally

done during the final semester of coursework. The department does not offer the thesis option.

Prerequisites

Students interested in the Pk-12 school administration must have a current U.S. teaching license and three years of full-time teaching experience in the Pk-12 sector.

Application Deadline

This program begins in the spring semester only. All materials for this program must be received by the deadline specified on the ELA website. Admission requirements are available from the School of TPAL or on the website at <https://ela.nmsu.edu/academic-programs/pk-12-ma/pk-12-admissions.html>. Students will be informed upon their formal acceptance into the program.

Program Delivery

The department uses a hybrid distance education program combining both asynchronous and synchronous delivery technologies. The internships require attendance at monthly seminars that are held face-to-face on the Las Cruces campus. There is a mandatory face-to-face orientation in Las Cruces prior to the start of the spring semester, January. All other coursework in online.

Electrical Engineering - Master of Engineering in Electrical Engineering Requirements and Options for the MEEE Degree

The Program Educational Objectives for the Master of Engineering Program in Electrical Engineering are:

1. That graduates successfully apply advanced skills and techniques in one or more areas of emphasis.
2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

The MEEE is a coursework-only option for obtaining a master's degree. The requirement is a total of 30 credits of graduate course work, including passing with a grade of B or better six Graduate Expanded Core Courses from at least three different areas of emphasis. No oral exam is required for the MEEE.

Prefix	Title	Credits
Graduate Expanded Core Courses: choose 6 from at least 3 different areas¹		18-21
<i>Electromagnetics</i>		
E E 515	Electromagnetic Theory I ²	
E E 521	Microwave Engineering

Graduate Electives: choose 3 to 4 courses⁴		12-9
Total Credits		30

¹ The graduate expanded core courses must be passed with a grade of B or better. Note—a grade of B- (or lower) in a graduate expanded core course will not satisfy completion of that course for the MEEE.

² This course is one of the MSEE Graduate Core Courses. Students pursuing the MEEE who wish to pursue the Ph.D. in the future are encouraged to select three courses from this subset of courses to satisfy one of the requirements for the Ph.D. Qualifying exam (see <https://ece.nmsu.edu/grad-study/phd-qualifying.html>) for more information.

³ This course is included in multiple areas of emphasis. Students may use this course to satisfy **one** area of emphasis.

⁴ E E courses must be numbered 500 or higher. Non-E E courses must be numbered 450 or higher. Credits of E E 590 Selected Topics which are not subtitled are limited to a total of 6.

Other limitations and requirements that apply to all master's degrees are described elsewhere in this catalog.

Included Prefixes

Graduate course work credits from the following prefixes are permitted for the MEEE degree. If a graduate course outside this list of prefixes logically fits into the MEEE program, see your graduate advisor about requesting an exception.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. Students can take up to 12 credits of E E graduate courses and get dual course credit that can be applied to both an undergraduate and master's degree.

You can also check NMSU's catalog for additional information about our programs.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an

undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.

- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program.

Any other E E 500+ course that is taught concurrently with an E E 400+ course may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees. E E 450+ courses are not eligible for MAP credit nor are E E 500+ courses that are not taught concurrently with an E E 400+ course. The following course list specifies which undergraduate BSEE concentration electives may count toward the MAP. Courses are listed according to the most relevant BSEE concentration, but some courses may count toward multiple concentrations; please refer to the corresponding BSEE concentrations in the NMSU catalog for more details on concentration courses.

Electrical Engineering - Master of Science in Electrical Engineering

Requirements and Options for the MSEE degree

The Program Educational Objectives for the Master of Science in Electrical Engineering are:

1. That graduates successfully apply advanced skills and techniques in one or more areas of emphasis.
2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

Note—the following degree requirement tables outline the **minimum** requirements for an MSEE. As many students must register for a minimum of 9 credits each semester to remain full time, a student will often take more than the minimum of 6 credits of E E 599 Master's Thesis or 3 credits of E E 598 Master's Technical Report to complete their degree.

Thesis Option:

English - Master of Arts

New Mexico State University offers MA programs in four areas of emphasis; each one requires 33 hours of graduate-level work.

Emphasis: Creative Writing

Students electing this emphasis:

- complete 33 hours of graduate-level course work including creative writing and literature;
- submit a creative writing portfolio (totaling 20-50 pages), depending on genre choices, that includes original creative work in more than one genre and either an essay describing the writer's personal poetics or a critical piece of writing relevant to the portfolio; and
- pass an oral examination.

Prefix	Title	Credits
Required Coursework ¹		
Workshop courses in at least two genres		12
Graduate form and technique courses		6
Graduate literature courses in the Department of English		9
Elective courses		6
In the final term, take one of the following:		
ENGL 574	Workshop: Advanced Writing Prose	
ENGL 575	Workshop: Advanced Writing Poetry	
ENGL 576	Workshop: Advanced Writing Playwriting	
Total Credits		33

¹ Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

Emphasis: English Studies for Teachers

Students take 33 hours of graduate coursework, including core courses in creative writing, film, literature and rhetoric and professional communication, as well as additional courses in an area of specialization approved by an advisor. Students in the program develop individualized plans of study in consultation with an advisor. They conclude their program by developing a master's portfolio or other approved capstone project and passing an oral examination. This portfolio may provide material for public schools' Professional Development Dossier. With advisor approval, students may take up to two related courses (six credit hours) in other departments, such as Communication Studies, Education, Journalism, and Theatre, and may also develop an alternative capstone experience and enroll for appropriate credits (such as independent study).

Prefix	Title	Credits
Required Coursework		
Core class in Composition, Rhetoric, and Professional Communication		3
Core class in Creative Writing		3
Core class in Literature		3
Core class in Film		3
Courses in core area of specialization		18-21
Courses typically meeting capstone requirement:		3-6
ENGL 577	Workshop: Advanced Technical and Professional Writing	
Or Portfolio		
Total Credits		33-39

Emphasis: Literature

Students electing this emphasis can choose to work in various areas of literature, criticism and film. Students are required to

- complete 33 hours of coursework while satisfying area requirements (in early and modern literatures, in British and American Literatures, and in critical theory) with advisor-approved courses;
- demonstrate competency in a foreign language;
- deliver a public presentation on their research;
- write a master essay or thesis; and
- complete their program by passing an oral examination.

See advisor for list of courses satisfying theory and distribution requirements.

Prefix	Title	Credits
Required Coursework ¹		
Graduate course in critical theory		3
Literature courses, including "early" and "late" periods, English and American		18
Elective courses in English Department		9-12
Master's Thesis or Master Essay		
ENGL 599	Master's Thesis ²	3-6
or ENGL 598	Master's Essay	
Total Credits		33-39

¹ Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

² Students must take 6 credits of ENGL 599 Master's Thesis to complete this requirement.

Emphasis: Rhetoric and Professional Communication

Students electing this emphasis take core courses across a wide range of topics within rhetoric and professional communication and choose from one of four areas of specialization:

- Composition,
- Critical/Cultural Studies,
- Rhetoric and
- Professional and Technical Communication.

Students conclude their program by writing a thesis, composing a portfolio of work completed in the program, or writing a master essay and by passing an oral examination. Students develop individualized plans of study in consultation with an advisor.

Prefix	Title	Credits
Required Coursework		
Methods Course		
Select one from the following:		3
ENGL 548	Graduate Study in Empirical Research	
ENGL 601	Qualitative Research	
ENGL 604	Digital Research Methods	
Elective Courses		
Select one from the following:		3-6
Advisor-approved electives in English and/or related fields		
ENGL 597	Internship in Technical and Professional Communication	
Capstone Course		
Select one from the following: ²		3-6
ENGL 585	Advanced Writing Workshop: RPC Capstone	
ENGL 598	Master's Essay	
ENGL 599	Master's Thesis ¹	
Core Courses		
Select two core courses from area of specialization.		6
Select two core courses from any of the other three core areas:		6
<i>Core Composition Courses</i>		
ENGL 564	History and Theory of Composition Studies	
ENGL 570	Graduate Study in Approaches to Composition ³	
ENGL 571	Composition Pedagogy and Practicum ³	
ENGL 583	Critical Writing Studies	
<i>Core Critical/Cultural Studies Courses</i>		
ENGL 517	Graduate Study in Critical Theory	
ENGL 568	Rhetoric and Cultural Studies	
ENGL 583	Critical Writing Studies	
<i>Core Professional and Technical Communication Courses</i>		
ENGL 502	Critical Conversations in Technical and Professional Communication	
ENGL 512	Graduate Study in Writing in the Workplace	
ENGL 543	Multimedia Theory and Production	
ENGL 572	Technical-Professional Communication Pedagogies	
<i>Core Rhetoric Courses</i>		
ENGL 518	History of Rhetoric	
ENGL 519	Graduate Study in Modern Rhetorical Theory	
ENGL 568	Rhetoric and Cultural Studies	
Specialized Courses		

Select four additional courses in area of specialization determined in consultation with an advisor.⁴ 12

Composition Courses

ENGL 549	Graduate Study in Writing
ENGL 550	Graduate Study in Literacy
ENGL 561	Topics in Writing Program Administration

Critical/Cultural Studies Courses

ENGL 549	Graduate Study in Writing
ENGL 550	Graduate Study in Literacy
ENGL 555	Graduate Study in Rhetoric of Scientific Literature
ENGL 590	Master's Seminar in Rhetoric

Professional and Technical Communication Courses

ENGL 478	Document Design
ENGL 503	Web Design and Development
ENGL 504	User Experience and Assistance
ENGL 531	Technical Editing
ENGL 543	Multimedia Theory and Production
ENGL 549	Graduate Study in Writing
ENGL 560	Proposal and Grant Writing
ENGL 565	Intercultural Rhetoric and Professional Communication
ENGL 577	Workshop: Advanced Technical and Professional Writing
ENGL 578	Topics in Rhetoric and Technology

Rhetoric Courses

ENGL 549	Graduate Study in Writing
ENGL 555	Graduate Study in Rhetoric of Scientific Literature
ENGL 590	Master's Seminar in Rhetoric

Total Credits 33-39

¹ Students must take 6 credits of ENGL 599 Master's Thesis to complete this requirement. ENGL 599 Master's Thesis: in lieu of portfolio or master essay.

² Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

³ Students may take either ENGL 570 Graduate Study in Approaches to Composition or ENGL 571 Composition Pedagogy and Practicum as a core course. Taking a second course will count under the area of specialization.

⁴ Students are encouraged to take ENGL 510 Proseminar in Rhetoric and Professional Communication, early in their time as a graduate student. This course is appropriate for all areas of specialization. Appropriate courses for each specialization are suggested, though the lists are not inclusive of all options (for example, students may take additional core courses as part of their specialization).

Master's Accelerated Program in English with an Emphasis in Literature

The Master's Accelerated Program is an opportunity for qualified, advanced undergraduate students to begin graduate study while still enrolled as an undergraduate student. Students accepted into the program will be able to take up to 12 credits that can be applied to a Master's degree in English at New Mexico State University (just over one third of the required credits to obtain a graduate degree in English at NMSU).

Student Qualifications

Potential MAP students must meet the minimum qualifications for the program as outlined in the Graduate School policy concerning MAP programs.

In addition to these qualifications, students must meet the following requirements in order to be eligible for application to the MAP program.

- Must have a GPA of 3.0 or higher
- Must apply to the program with sufficient time to take the 12 credit hours that will be applied toward the overall program of study. Students will not be able to retroactively apply credits to MAP program.
- Must participate in the Developing New Scholars Program (DSNP), offered by the Graduate School and Honor's College.
- Consult with the Director of Undergraduate Studies on courses eligible and complete the Graduate School MAP form.
- Meet with their financial aid advisor, if they receive financial aid, as financial aid awards may have to be adjusted based on course registration.
- Completed 60 credits, including at least one (1) 400-level literature class and one (1) of the following courses ENGL 301 Theory and Criticism: Rhetoric and Culture, ENGL 302 Theory and Criticism: Literature and Culture, ENGL 303 Theory and Criticism: Film, Media and Culture, or ENGL 310 Critical Writing.

Applying for the MAP

To apply for the MAP fill out the the English Application to the Master's Accelerated Program and a scholarly writing sample (a course paper that showcases your skills in literary analysis). Send these materials to the Director of Undergraduate Studies, Dr. Tyson Stolte, at tmstolte@nmsu.edu. Applicants will also need to fill out the Graduate School's MAP form.

Approved MAP Courses:

The courses below can count toward the 12 credits toward an MA degree available to MAP students.

Prefix	Title	Credits
ENGL 453	World Literatures	3
ENGL 469	Advanced Study in American Literature	3
ENGL 505	Graduate Study in Chaucer	3
ENGL 508	Graduate Study in Shakespeare I	3
ENGL 509	Graduate Study in Shakespeare II	3
ENGL 533	Victorian Literature	3

Environmental Engineering - Master of Science in Environmental Engineering

Environmental engineering at New Mexico State University provides unique educational and research opportunities at the graduate level in the fields of water quality, aquatic chemistry, environmental microbiology, water treatment, water pollution control, wastewater treatment reclamation and reuse, desalination, membrane processes, industrial, hazardous, and solid waste management, groundwater remediation, contaminant fate and transport, resource recovery from waste streams, air pollution control, and nanotechnologies in environmental applications. Therefore, course offerings emphasize basic engineering and scientific

principles, as well as the design and application of environmental engineering unit operations and processes. Special topics and thesis research are closely matched with faculty expertise and the professional goals of graduate students. The programs of study are specifically designed for individual students, taking advantage of not only the program capabilities, but also of the complementary activities of the university as a whole as well as the student's professional experience and work environment.

Graduate students satisfy degree requirements in environmental engineering by completing specific core course work. Course work in the graduate program includes the following:

- water and wastewater treatment
- solid and hazardous waste systems design
- environmental chemistry
- environmental microbiology
- environmental contaminant analysis
- industrial pollution control
- fate and transport of pollutants in engineered and natural systems
- water quality in surface water and groundwater systems
- advanced water treatment

Additional topics of interest to the students are offered through special topics classes and by courses taught outside of the College of Engineering.

The Master of Science (M.S.) program in Environmental Engineering requires either a thesis or non-thesis practice-oriented experience. The thesis track consists of a minimum of 30 semester credit hours, including 6 credit hours of thesis. The non-thesis track is designed primarily for students who are working full-time in engineering practice, but is also available to students working part-time. This track consists of 30 semester credit hours, including 6 credit hours of an engineering practicum (ENVE 598 Special Research Programs) of which up to 3 credit hours can be earned for a professional engineering design experience. Transfer credit for courses taken elsewhere is evaluated on an individual basis. Up to 6 semester hours of graduate level courses may be used to satisfy M.S. degree requirements provided that the credits were not used towards another degree.

Required Curriculum

The graduate environmental engineering program of the Civil Engineering Department expects all M.S. students to meet certain requirements in pursuit of an advanced degree. Some of these requirements are related to the quantity, level, and quality of coursework. This Graduate Catalog details what is expected as a minimum for graduation, but it is up to the student and his/her advisor and graduate committee to determine the program of study for the student. The student and his/her advisor will create this program of study in the first semester of graduate work.

Students desiring to work toward an advanced degree in environmental engineering must have completed undergraduate preparation similar to that required for a Bachelor of Science degree in an ABET accredited engineering program or must have adequate background, as determined by the graduate faculty of the program. The background courses listed below may be required if the student did not take a similar course at the undergraduate level, as determined by the graduate faculty of the program.

Environmental engineering faculty will form a committee for every entering student. The faculty will evaluate the student's record and determine which deficiencies or core courses, if any, are needed by the student. The required curriculum consists of 12 credit hours of core courses, 6 credit hours of Master's Thesis (thesis track) or Special Research Programs (non-thesis track), and 12 credit hours of elective courses. For all professional non-thesis programs, the department head will review the committee's decision.

Prefix	Title	Credits
Background Courses		
C E 356	Fundamentals of Environmental Engineering	
C E 382	Hydraulic and Hydrologic Engineering	
ENVE 456	Environmental Engineering Design	
Core Courses		12
ENVE 550	Aquatic Chemistry	
ENVE 551	Unit Processes/Operation of Water Treatment	
ENVE 552	Unit Processes/Operation of Wastewater Treatment	
ENVE 557	Surface Water Quality Modeling	
Thesis or Professional Experience ¹		6
ENVE 598	Special Research Programs	
or ENVE 599	Master's Thesis	
Elective Courses ²		12
Total Credits		30

¹ ENVE 598 Special Research Programs: practicum for students pursuing the non-thesis track. ENVE 599 Master's Thesis: required for students pursuing the thesis track.

² Elective courses may be taken from any department and must be approved by the student's advisor and graduate committee.

Professional Development Electives for the Non-Thesis Track (outside the College of Engineering)

For students pursuing the non-thesis track, a minimum of 6 credit hours in graduate-level communications, management, economics, or other relevant disciplines are required as part of the 12 elective credit hour requirement. These courses will be selected by the student and must be approved by the student's advisor and graduate committee.

Experimental Psychology - Master of Arts

The department offers an MA degree in general experimental psychology. The program provides students with sufficient electives to emphasize a particular sub-area of experimental psychology. The program is designed to provide graduates with the tools and knowledge necessary for further training at the doctoral level or for employment in industry or government.

MA students are required to complete:

Prefix	Title	Credits
First Year Research Project		4-6
PSYC 598	Special Research Programs	
Core Course (corresponding to the student's area of study):		3
PSYC 524	Cognitive Psychology	

PSYC 527	Social Psychology	
PSYC 547	Engineering Psychology	
Two other Content Courses:		6
PSYC 520	Learning	
PSYC 522	Sensation and Perception	
PSYC 540	History and Systems of Psychology	
The Quantitative/Computer Methods Sequence:		9
PSYC 507	Quantitative Methods in Psychology I	3
PSYC 508	Quantitative Methods in Psychology II	3
PSYC 510	Computer Methodology	3
Research Thesis:		
PSYC 599	Master's Thesis	6

¹ Students are also encouraged to register for one credit of PSYC 590 Research Seminar in Psychology each semester.

When offered, PSYC 570 Special Topics may be considered content, quantitative methods, or experimental methods, depending on the specific course content.

Family and Consumer Sciences (Food Science and Technology) - Master of Science

The Department of Family and Consumer Sciences offers a Master of Science degree with a concentration in Food Science and Technology. The degree is earned after satisfactory completion of 30 credit hours of upper division and graduate-level courses. The curriculum is completed in four academic semesters and includes a creative component. Once admitted to the program, each student will work with an advisor to develop an academic plan of study. The major advisor and the student will also select an advisory committee consisting of an additional departmental faculty member and a third member from outside the department.

Prefix	Title	Credits
Require Core Courses		
Statistics	¹	3
Research Methods	²	3
FCSC 5999	Master's Thesis (Creative Component) ³	6
Choose 18 credits from the following (in consultation with advisor):		18
FSTE 4150	Food Safety	
FSTE 4997	Special Problems	
FSTE 5110	Food Microbiology	
FSTE 5120	Food Chemistry	
FSTE 5230	Food Processing Technologies	
FSTE 5250	Sensory Evaluation of Foods	
FSTE 5140	Food Analysis	
FSTE 5130	Food Preservation	
FSTE 5997	Special Research Programs	
FCSC 5996	Special Topics	
Total Credits		30

¹ Any statistics course that is approved by major advisor

² Any research methods course that is approved by major advisor

³ The creative component of the program involves completing at least 6 credits of FCSC 5999 Master's Thesis. This requires the student, in consultation with the advisory committee, to conduct a research

project and prepare a written manuscript. The student will present results of the project in the graduate seminar and then be examined by the advisory committee.

Family and Consumer Sciences (Couples, Marriage and Family Therapy) - Master of Science

Family and Consumer Sciences (Hotel, Restaurant and Tourism Management) - Master of Science

The concentration in Hotel, Restaurant and Tourism Management combines both coursework and research to expand the student's knowledge, abilities, and problem-solving skills. Students begin the program by learning about the current trends in a wide range of hotel, restaurant and tourism academic research areas. Students also take graduate classes that apply to their chosen area of specialization. Some students focus on general hospitality management. However, most choose an area of interest such as tourism, foodservice, hotel operations, culinary arts, destination management, revenue management, sales and marketing, hospitality or culinary education, beverage management, vacation ownership, hospitality information systems, or human resource management/training.

New Mexico State University master's accelerated program provides the **opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to your HRTM Faculty Mentor about your MAP plan and develop a course plan in consultation with the advisor.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 3.00.

- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
HRTM Required and Elective Classes Taken At Graduate Level ¹		
HRTM 4991	Special Problems	1-4
HRTM 5310	Beverage Management	3
HRTM 5410	Hospitality Cost Control	3
HRTM 5240	Sustainability in the Hospitality Industry	3
HRTM 5140	Hotel Revenue and Sales Management	3
HRTM 5145	Resort Management	3

¹ Other courses may be used for the MAP requirements with the consent of instructor, including HRTM 5210 The Hospitality Industry and Sustainable Competitive Strategy, HRTM 5220 Contemporary Global Issues in Hospitality, and HRTM 5991 Special Research Programs but will require a degree audit exception through the department/graduate school.

For additional information, please see MAP requirements at:

<https://honors.nmsu.edu/for-students/masters-accelerated-program-map.html>

Fine Arts - Master of Fine Arts

Emphasis: Studio Art

Art requirements for an MFA degree with an emphasis in studio art include a minimum of 60 credits of academic work, usually completed in three years. Of those 60 credits,

- 9 must be taken in art history,
- 6 in non-art courses numbered 450 or above,
- 6 in ARTS 598 Studio Thesis
- 3 in ARTH 579 Methodologies and Historiography of Art History and Art Theory
- 12 in ARTS 596 Graduate Studio Seminar.

In order to remain in good standing in the MFA program, a student must maintain an average GPA of 3.0. Any grade lower than B- in an Art Department graduate course is considered failing. In the event that a student fails a required course, they must repeat the class in order to get credit for it. If a student is awarded a graduate assistantship, he or she must maintain an average GPA of 3.0.

Prefix	Title	Credits
Program Requirements		
ARTH 579	Methodologies and Historiography of Art History and Art Theory	3
Seminar		
ARTS 596	Graduate Studio Seminar	12
ARTS 598	Studio Thesis	6
ARTS Electives (ARTS 500 level)		
Non-ARTS/Non-ARTH 450 level or higher courses		
ARTS courses (500 level)		
Two additional courses, either ARTS 596 or 500-level ARTS Elective		
Total Credits		60

Semester Reviews

At the end of the first two semesters, each graduate student's creative production will be reviewed by the assembled faculty. Participation in

semester reviews are required for successful completion of graduate level studio courses.

Candidacy

Candidacy occurs during the third semester of study in residency. Candidacy consists of a formal review of the student's work by the assembled graduate faculty. The graduate faculty advances the student to his or her final 3 semesters of study by a majority vote. If the faculty does not advance the student, candidacy may be repeated one additional time at the end of the next consecutive semester. The final three semesters of thesis work will commence from that point. Students who are not successful in their second candidacy attempt will be dis-enrolled from the MFA program.

Thesis Committee

At the end of the third semester and after a successful candidacy the student will propose his or her thesis committee, consisting of two department of art graduate faculty members, and one graduate faculty member from outside the department.

Thesis Exhibition

The studio thesis will culminate in an exhibition of the candidate's creative works and a written thesis statement. A successful oral examination and defense of the thesis and exhibition is required for graduation. Two copies of the thesis and a photographic record of the final exhibition are required; other requirements may be determined by the graduate faculty. Students who do not satisfactorily complete their oral examination may not participate in the thesis exhibition.

Thesis exhibitions for the MFA degree will be held in the spring semester in the University Art Museum. Students who wish to graduate at mid-year are obligated to find an exhibition space other than the NMSU Art Museum that meets with the approval of the graduate committee. In this case the student is responsible for making all arrangements for the thesis exhibition.

Fish, Wildlife and Conservation Ecology - Master of Science

The Department of Fish, Wildlife and Conservation Ecology (FWCE) offers graduate work leading to the Master of Science degree with a major in Fish, Wildlife and Conservation Ecology. Faculty members in the department also may advise Ph.D. candidates through the graduate program in the Department of Biology, Department of Animal and Range Sciences, Department of Plant and Environmental Sciences, as well as other Ph.D. granting departments. For additional information, please see the graduate catalog entries for the respective departments.

For the Master of Science degree, a minimum of 30 semester credits of graduate work in the major and related subjects is required, together with a thesis for most students. Of these credits, at least 15 must be in courses numbered 500 or above, and at least 15 must be for courses with the FWCE prefix. Students electing a minor in FWCE are required to take at least 9 credits in the minor field. A nonthesis option is available to some students, depending on prior training and experience, and subject to approval by the advisor and department head.

All students in the program must complete the following requirements:

- A minimum of 6 credits of Quantitative Foundations (eligible courses listed below),

- A minimum of 3 courses (9-12 credits) from Ecological Concepts, Organismal Biology, Ecological Techniques (eligible courses listed below),
 - In addition, courses taught as special topics (FWCE 535 Special Topics) may apply to the Quantitative Foundations or Ecological Concepts, Organismal Biology, Ecological Techniques with approval from the supervisory committee and Department Head.
- 4 to 12 credits from the Independent Study category (eligible courses listed below).
 - Programs involving a thesis should include 4 to 6 credits of (FWCE 599 Master's Thesis). A maximum of 6 credits of (FWCE 599 Master's Thesis) will count towards the 30 credit hour requirement.

The lists below show typical courses that meet minimum Departmental and Graduate School course requirements for the Master's degree, as determined by the faculty and Department Head. Graduate-level courses other than those listed below may be used to fulfill course requirements with permission from the supervisory committee and Department Head.

Prefix	Title	Credits
Quantitative Foundations: Eligible Courses ¹		
Select minimum of 6 credits from the following:		6
A ST 503	SAS Basics	
A ST 505	Statistical Inference I (or equivalent)	
A ST 506	Statistical Inference II	
A ST 507	Advanced Regression	
A ST 509	Statistical Models for Complex Data Structures	
A ST 540	Predictive Analytics	
A ST 555	Applied Multivariate Analysis	
A ST 568	Applied Linear Models II	
A ST 550	Special Topics	
BIOL 455	Biometry	
FWCE 457	Ecological Biometry	
FWCE 509	Population Ecology (s)	
GEOG 585	Spatial Analysis and Modeling	
**Other courses may be eligible to fulfill course requirements with consent of the advisory committee and department head		
Ecological Concepts, Organismal Biology, Ecological Techniques: Eligible courses		
Select a minimum of 3 courses (9-12 credits) from the following:		9
BIOL 467	Evolution	
BIOL 484	Animal Communication	
BIOL 488	Principles of Conservation Genetics	
BIOL 568	Communities and Ecosystems	
BIOL 587	Behavioral and Evolutionary Ecology	
FWCE 464	Management of Aquatic and Terrestrial Ecosystems	
FWCE 530	Large Mammal Ecology, Conservation and Management	
FWCE 535	Special Topics	
FWCE 537	Wildlife Damage Management	
FWCE 540	Wildlife Habitat Relationships	
FWCE 559	Aquatic Ecology	
FWCE 567	Herpetology	
FWCE 571	GIS for Natural Resource Scientists	
FWCE 582	Ichthyology	
GEOG 557	Biogeography	

RGSC 452	Vegetation Measurements for Rangeland Assessment
RGSC 585	Land Cover Analysis for Natural Resources
RGSC 518	Watershed Methods and Management

**Other courses may be eligible to fulfill course requirements with consent of the advisory committee and department head.

Independent Study: Eligible courses	
Select 4-12 credits from the following:	4
FWCE 548	Graduate Problems
FWCE 598	Special Research Programs
FWCE 599	Master's Thesis

**Other courses may be eligible to fulfill course requirements with consent of the advisory committee and department head

To meet the 30 credit hour requirements of the MS program, completion of further course work in addition to the requirements described above will be necessary. The additional course(s) must be approved by the graduate student's supervisory committee.

Total Credits 30

¹ Other courses, particularly in Applied Statistics, may be eligible with consent of the advisory committee.

Graduate work in the department is intended to prepare students for careers in research, teaching, extension and management. Facilities available to graduate students include two ranches of approximately 90,000 acres, a large suite of shared laboratories, and a large fish-culture facility. We actively cooperate with state and federal natural resource management agencies, and graduate students have access to national forests and extensive public lands, as well as the Jornada Basin Long-Term Ecological Research site and associated databases. Additional research opportunities for graduate students are available in the New Mexico Cooperative Fish and Wildlife Research Unit, located in the department since 1988.

Additional information on the graduate program and faculty is available at <http://aces.nmsu.edu/academics/fws>. (<http://aces.nmsu.edu/academics/fws/>)

Geography - Master of Applied Geography

General Information

The Department of Geography and Environmental Studies (GES) at NMSU offers students two options for earning a Master of Applied Geography (MAG): a thesis option and a non-thesis option. The thesis option (30 credits) represents the traditional path for earning a MAG degree and entails the completion of coursework and the writing and defense of a master's thesis. The master's thesis is a piece of original scholarship developed under the direction of an advisor and typically two thesis committee members. The non-thesis option (30 credits) is an alternative path for earning a MAG degree and requires the completion of coursework, the writing of a residency report, and the passing of a final exam. The residency report is a document developed during an internship or residency under the direction of a field supervisor at an agency or firm.

Undergraduate Preparation

An undergraduate geography degree is not required for entry into the MAG program. However, applicants who lack the equivalent of GEOG 1110G Physical Geography, GEOG 1130G Human Geography, and/or GEOG 2130 Map Use and Analysis may be required to take these or

similar courses to prepare for the graduate-level work in geography. Applicants without an undergraduate geography degree are strongly encouraged to contact the GES Graduate Program Director and their Graduate Advisor to identify optimal strategies for satisfying basic course requirements.

Prefix	Title	Credits
GEOG 1110G	Physical Geography	4
GEOG 1130G	Human Geography	3
GEOG 2130	Map Use and Analysis	3

Credit, Course, and Grade Requirements

The MAG program aims at offering students flexibility in designing their desired course of graduate study while at the same time ensuring that all students have graduate-level core competencies in geographic concepts and methods. To that end, all students pursuing the MAG degree are required to complete a minimum of 30 graduate credits, including 9 core course credits, 6 thesis credits (thesis option) or 6 residency credits (non-thesis option), and 15 elective credits. Of the 30 graduate credits, at least 15 credits must be in geography and at least 15 credits must be at the 500-level or above. All MAG students must earn a grade of B- or better in the 3 core courses (GEOG 501 Introduction to Geographic Theory and Application, GEOG 502 Integrative Research Design, and GEOG 584 Critical Methodologies or GEOG 585 Spatial Analysis and Modeling). All candidates are moreover required to maintain an overall GPA of 3.00 or higher.

Prefix	Title	Credits
Core Geography Courses ¹		9
GEOG 501	Introduction to Geographic Theory and Application	3
GEOG 502	Integrative Research Design	3
GEOG 584	Critical Methodologies	3
or GEOG 585	Spatial Analysis and Modeling	
Elective Courses ²		15
Select additional courses in geography and/or other disciplines.		
At least 6 of the elective credits must be in geography.		
At least 6 of the elective credits must be at the 500-level or above.		
Thesis / Residency Credits ³		6
GEOG 599	Master's Thesis	6
or GEOG 596	Residency	

¹ Students must earn a grade of B- or better in all 3 core courses.

² Students may be required to take additional courses that their committee deems necessary for the successful completion of the thesis research.

³ For more information regarding the master's thesis requirement, please visit **this GES website**.

A Suggested Plan of Study

The following road map is a guide for full-time students (9 credits/semester for graduate assistants and/or graduate students receiving financial aid) to earn the Master of Applied Geography (MAG) degree and achieve the following MAG program learning outcomes:

1. Think spatially, geographically, and geospatially.
2. Identify and describe geographic epistemologies, ontologies, and methodologies, and evaluate their suitability for answering different research questions.

3. Analyze and interpret the social and biophysical processes that produce human-environment interactions, and make reasonable predictions about the impacts of changes in socio-ecological system components across space and through time.
4. Solve real-world problems by acquiring, analyzing, interpreting, evaluating, and visualizing geographic data.
5. Conduct all stages of an independent research project, including conceptualization, planning, implementation, management, and communication through a thesis or residency report.

The road map assumes that each student will create a customized plan for degree completion in consultation with their graduate faculty committee. We realize that students may deviate from the road map for various reasons but expect that they diligently attempt to meet the milestones outlined below.

First Year, Fall Semester

First Year		Credits
Fall		
GEOG 501	Introduction to Geographic Theory and Application	3
GEOG 584	Critical Methodologies or GEOG TBD Elective Course	3
Elective Course		3
Credits		9
Total Credits		9

Non- Curricular Recommendations

- Select your Graduate Faculty Advisor.
- Clarify your academic and professional goals and align your curricular path with the MAG program learning outcomes noted above.
- Establish a preliminary thesis / residency topic.
- Identify extracurricular service and outreach opportunities such as leadership in student organizations, community engagement, or peer mentoring.
- Identify professional development opportunities such as conference attendance, workshop participation, or internships.

First Year, Spring Semester

First Year		Credits
Spring		
GEOG 502	Integrative Research Design	3
GEOG 585	Spatial Analysis and Modeling or GEOG TBD Elective Course	3
Elective Course		3
Credits		9
Total Credits		9

Non- Curricular Recommendations

- Finalize your Graduate Faculty Committee and file the Graduate Research Committee form.
- Propose your thesis / residency project to the Graduate Faculty Committee.
- File the "Thesis / Residency Proposal Form."
- File the "Program of Study for Masters Students Form."
- Discuss opportunities for disseminating your scholarly and creative activities via presentations, publications, and other strategies.
- Engage in extracurricular service and outreach activities.

- Take advantage of professional development opportunities.
- Plan for fieldwork, internships, or other activities during the summer.

First Year, Summer Semester

Non- Curricular Recommendations

- Conduct field, archive, and other data collection work for your thesis or residency.
- Conduct data analyses for your thesis or residency.
- Begin writing your thesis or residency report.

Second Year, Fall Semester

Second Year		Credits
Fall		
Elective Course		3
Elective Course		3
GEOG 599 or GEOG 596	Master's Thesis or Residency	3
Credits		9
Total Credits		9

Non- Curricular Recommendations

- Finish your data collection and analysis.
- Continue writing your thesis or residency report.
- Disseminate your scholarly and creative activities via presentations, publications, and other strategies.
- Engage in extracurricular service and outreach activities.
- Take advantage of professional development opportunities.

Second Year, Spring Semester

Second Year		Credits
Spring		
Elective Course		3
Elective Course		3
GEOG 599 or GEOG 596	Master's Thesis or Residency	3
Credits		9
Total Credits		9

Non- Curricular Recommendations

- Finish writing your thesis or residency report.
- Study the NMSU Graduate School webpages and make sure you meet all deadlines for degree application, form submissions, etc..
- Schedule and hold your thesis defense or oral exam.
- Share your final thesis or residency report as well as all thesis / residency data and metadata with your Graduate Faculty Advisor.
- Disseminate your scholarly and creative activities via presentations, publications, and other strategies.
- Engage in extracurricular service and outreach activities.
- Take advantage of professional development opportunities.

Geology - Master of Science

A candidate for a master's degree must:

- Complete a minimum of 30 graduate credits, including a minimum of 6 credits for thesis (GEOG 599 Master's Thesis).

- No more than 5 thesis credits may be taken in any one semester. Early selection of a research advisor is encouraged.
- A thesis proposal must be approved by the advisor and the candidate's committee before registering for thesis credits.
- At least 15 credits must be earned in courses numbered 500 or above, and at least 15 credits must be earned in geology.
- Students are expected to participate in the department's colloquium each semester.

The department offers excellent laboratory facilities for research in mineralogy, igneous petrology, geochemistry, stratigraphy, geochronology, and sedimentology. Available are a large, fully equipped rock preparation laboratory, mineral separation laboratory, plus computer, geochemical and petrographic labs. Major equipment includes a Gemini heavy mineral separation table, X-Ray Fluorescence Spectrometry (XRF), Laser-Induced Breakdown Spectroscopy (LIBS), a class 1000 clean lab, Thermal Ionization Mass Spectrometry (TIMS) and Laser-Ablation Multi-Collector Inductively Coupled Plasma Mass Spectrometry (LA-MC-ICP-MS). The department maintains its own fleet of field vehicles. Also available are computing facilities that include an HP color plotter and GIS system. Financial support is available to graduate students in geology through teaching and research assistantships and scholarships. Inquiries regarding financial aid should be directed to the graduate advisor.

History - Master of Arts

Thesis Program

Thirty-six credits (27 of which must be at the 500 level) are required for the thesis program:

Prefix	Title	Credits
Select at least 3 credits from Public History courses above the 500 level		3
Select four History Graduate Seminars including the following:		
HIST 598	Craft of History	3
Select two from the following:		6
HIST 590	Reading Seminar: Borders, Boundaries and Frontiers	
HIST 591	Reading Seminar: Modernity and its Discontents	
HIST 592	Reading Seminar: Nature and Society	
HIST 593	Reading Seminar: History, Myth and Memory	
HIST 596	Research Seminar	3
Select a maximum of 6 credits in related fields outside the Department of History ¹		6
Select 9 credits at the 500-level or above in the Department of History		9
HIST 599	Master's Thesis	6
Total Credits		36

¹ With permission of the graduate advisor, a maximum of 6 credits may be taken in related fields from courses numbered 450 and above outside the Department of History.

A student choosing the thesis program must receive permission for his/her thesis by passing a thesis proposal defense after earning 12 graduate credits in History. The department will provide guidelines for the thesis defense. Students who choose the thesis program must pass a final oral examination over their graduate course work and their thesis. All

graduate students will be required to present a research paper in a public forum approved by the department's Graduate Director.

Dual Track M.A. (Public History and Thesis)

Students choosing to pursue both the thesis track and Public History concentration must complete the course hours required for the public history concentration, perform an internship, and defend the proposed thesis before undertaking it using guidelines provided by the department, present the public history portfolio at a public presentation, complete the thesis, and defend their course work, thesis and public history portfolio at a final oral examination. In order to satisfactorily complete both programs, such students would complete 39 credits, including three hours of internship credit and six hours of thesis work.

Prefix	Title	Credits
Select four History Graduate Seminars including the following:		
HIST 594	Public History	3
HIST 598	Craft of History	3
HIST 596	Research Seminar	3
Select one from the following:		3
HIST 590	Reading Seminar: Borders, Boundaries and Frontiers	
HIST 591	Reading Seminar: Modernity and its Discontents	
HIST 592	Reading Seminar: Nature and Society	
HIST 593	Reading Seminar: History, Myth and Memory	
HIST 585	Public History Internship	3
Select a maximum of 9 credits (450-and above) outside the Department of History ²		9
Preparation of an article of scholarly quality		3
Select 3 credits at the 500 level from courses in the Department of History		3
HIST 599	Master's Thesis	6
Total Credits		36

History (Public History) - Master of Arts

Thirty-six credits (27 of which must be at the 500 level) are required for the Public History concentration:

Prefix	Title	Credits
Select four History Graduate Seminars including the following:		
HIST 594	Public History	3
HIST 598	Craft of History	3
HIST 596	Research Seminar	3
Select one from the following:		3
HIST 590	Reading Seminar: Borders, Boundaries and Frontiers	
HIST 591	Reading Seminar: Modernity and its Discontents	
HIST 592	Reading Seminar: Nature and Society	
HIST 593	Reading Seminar: History, Myth and Memory	
HIST 585	Public History Internship	3
Select a maximum of 9 credits (numbered 450 and above) outside the Department of History ¹		9
Preparation of an article of scholarly quality		3

Select 9 credits from courses numbered 500 and above in the Department of History	9
Total Credits	36

¹ Requires the permission of the Director of the Public History Program

Students in the Public History concentration must collectively pass 18 credits of nonpublic history courses, including the nonpublic history seminars noted above. They must collectively pass 18 credits in public history, which must include the public history seminar, the internship, and the article. The scholarly article is developed through work in the internship and will be of peer reviewed journal quality. The public history credits may include a maximum of 9 graduate level (450 -and-above) credits outside the Department of History with permission of the Director of the Public History Program. A student choosing the Public History concentration must pass an article proposal defense about the proposed scholarly article during the first semester after completion of the internship. The department will provide guidelines for the article defense. A student choosing the Public History specialization must give a public presentation of a portfolio that includes his/her work and the scholarly article, and must pass an oral examination over graduate course work, the internship, and the article. Students who receive a Master's degree in this track will have a specialization in Public History added to their transcripts.

Horticulture - Master of Science

This degree emphasizes the creative use of plants by humans, and studies on the technical advancements in the husbandry of economic commodity groups of fruits, vegetables, or ornamentals, and turfgrass management. Emphasis may be in breeding and genetics of chile or onions, plant growth and development, nutrition, plant stress response, fruit and vegetable physiology, forestry, and turfgrass. Students will be prepared for successful employment in diverse horticulture private industries, educational institutions, and government agencies. Candidates for this degree must successfully conduct original research in one of the above areas and complete a minimum of 30 graduate credits based on a program of study approved by the student's graduate committee.

The Master of Science degree can be obtained through either a thesis option (recommended) or a non-thesis option. Prerequisite to major graduate work is completion of a curriculum essentially equivalent to that required by the department for the BS degree at New Mexico State University. Qualifications for admission will be reviewed by the departmental graduate faculty.

Minimum Grade Point Average and Credit Hour Requirements: Your Master's degree requires a minimum of 30 completed degree hours and a minimum cumulative GPA of 3.00 in all course work.

Degree residency requirement: 15 credits must be completed at NMSU.

Thesis Option

Prefix	Title	Credits
Departmental Requirements		
<i>Selection of courses should be based on consultation with the student's graduate committee</i>		
AGRO/HORT/SOIL 590	Graduate Seminar (taken final semester)	1

Complete sufficient credits numbered 450 or above, including at least 15 credits at the 500-level or above, to bring total graduate credits to 30		23-25
AGRO/HORT/ENVS 599	Master's Thesis (taken during final year)	4-6
Complete a final oral defense of the written thesis and a general examination of the student's field of study		
Total Credits		30

See the PES Graduate Handbook (https://pes.nmsu.edu/documents/NMSU_PES_GraduateStudiesHandbook_final83020221.pdf) for additional details.

Non-Thesis Option

Prefix	Title	Credits
Departmental Requirements		
<i>Selection of courses should be based on consultation with the student's graduate committee</i>		
AGRO/HORT/SOIL 590	Graduate Seminar (taken final semester)	1
Complete sufficient credits numbered 450 or above, including at least 15 credits at the 500-level or above, to bring total graduate credits to 30		29
Complete a written research report on an area of investigation conducted by the student.		
Complete a final oral defense of the written report and a general examination of the student's field of study		
Total Credits		30

Industrial Engineering - Master of Engineering in Industrial Engineering

The Department of Industrial Engineering offers the Master of Engineering (M.E. in IE) as the coursework-only degree. It is a Professional Master's degree targeting a working professional who wants to pursue a Master's degree in Industrial Engineering at New Mexico State University.

The program of study leading to the M.E. in IE degree consists of 30 credits. At least 50% of the course work must be taken from the Approved IE Department Course List. This means that students can take up to five electives from engineering disciplines outside the department and/or other areas of interest outside the college.

The M.E in IE degree is also offered by distance education for qualified applicants. The courses with section numbers M70 - M79 are designated as online.

Although there is no oral exam, students will be required to complete an exit interview with an IE faculty member.

Note that NMSU reserves the right to change the program requirements without prior notice. Information in the NMSU Graduate Catalog takes precedence over any other information.

Selection of Advisor

During the first 12 credit hours in the Industrial Engineering Graduate Program, all master's degree students must select a permanent advisor. This must be done prior to registration for the fifth course the student takes. In selecting an advisor, the student should communicate with several members of our graduate faculty to discuss specific program objectives. The student should also use these contacts to become

familiar with faculty research projects that are currently in progress. The faculty member must consent to serve as the student's advisor in writing. A list of the graduate faculty of the department with their areas of interest is found on the IE web page at <https://ie.nmsu.edu/>.

Submission of Programs

After completing 12 credits of graduate coursework, a permanent "Program of Study for Masters Students" form must be submitted to the Graduate School. Acceptance of this program admits the student to candidacy for the degree.

Prefix	Title	Credits
Approved IE Department Course List (Note that courses are listed under their area of primary focus but may address other areas. See course descriptions for more details.)		
<i>Operations Research</i>		
IE 515	Stochastic Processes Modeling	3
IE 522	Queuing Systems	3
IE 525	Systems Synthesis and Design	3
IE 533	Linear Programming	3
IE 534	Nonlinear Programming	3
IE 535	Discrete Optimization	3
IE 567	Design and Implementation of Discrete-Event Simulation	3
<i>Applied Statistics</i>		
IE 460	Evaluation of Engineering Data	3
IE 466	Reliability	3
IE 545	Characterizing Time-Dependent Engineering Data	3
<i>Design and Manufacturing</i>		
IE 478	Facilities Planning and Design	3
IE 524	Advanced Production and Inventory Control	3
IE 571	Advanced Quality Control	3
IE 575	Advanced Manufacturing Processes	3
<i>Engineering Management</i>		
IE 523	Advanced Engineering Economy	3
IE 530	Environmental Management Seminar	1
IE 537	Large Scale Systems Engineering	3
IE 561	Advanced Safety Engineering	3
IE 563	Topics in Engineering Administration	3
<i>Depending on contents, the following course is applicable to any of the above four areas:</i>		
IE 590	Selected Topics	1-3
Optional Electives ¹		
E E 500-level (With approval of advisor and instructor)		
M E 500-level (With approval of advisor and instructor)		
C E 500-level (With approval of advisor and instructor)		
ACCT 500-level (With approval of advisor and instructor)		
BCIS 500-level (With approval of advisor and instructor)		
BFIN 500-level (With approval of advisor and instructor)		
MGMT 500-level (With approval of advisor and instructor)		
ECON 500-level (With approval of advisor and instructor)		
C S 500-level (With approval of advisor and instructor)		
MATH 500-level (With approval of advisor and instructor)		
STAT 500-level (With approval of advisor and instructor)		
A ST 500-level (With approval of advisor and instructor)		

¹ The optional courses outside the department and/or the college should be previously approved by the academic advisor. See your advisor for more detailed information about selecting elective courses.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. Students can take up to 12 credits of approved I E courses and get dual course credit that can be applied to both an undergraduate and master's degree. You can also check NMSU's catalog for additional information about our programs.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same courses as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other I E 500+ courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
IE 451	Engineering Economy	3
IE 460	Evaluation of Engineering Data	3
IE 467	Discrete-Event Simulation Modeling	3
IE 478	Facilities Planning and Design	3
IE 490	Selected Topics	3
IE 590	Selected Topics	3

Industrial Engineering - Master of Science in Industrial Engineering

The Department of Industrial Engineering offers the Master of Science (M.S.) in Industrial Engineering with focus areas of manufacturing, operations research, and engineering management. Students may choose one of two options for completing their M.S. degree and the requirements for each option are listed below:

- **Thesis option:** 24 credits of course work plus 6 credits of I E 599 Master's Thesis.

- **Project Option:** 27 credits of course work plus 3 credits of IE 598 Special Research Programs.

Whether students write a thesis or complete a project, the program of study leading to the M.S. degree consists of 30 credits. At least 50% of the course work must be taken from the Approved IE Department Course List. This means that students can take up to five electives from engineering disciplines outside the department and/or other areas of interest outside the college.

Note that NMSU reserves the right to change the program requirements without prior notice. Information in the NMSU Graduate Catalog takes precedence over any other information.

Selection of Advisor

During the first 12 credit hours in the Industrial Engineering Graduate Program, all master's degree students must select a permanent advisor. This must be done prior to registration for the fifth course that the student takes. In selecting an advisor, the student should communicate with several members of the IE graduate faculty to discuss specific program objectives. The student should also use these contacts to become familiar with faculty research projects that are currently in progress. The faculty member must consent to serve as the student's advisor in writing. A list of the department graduate faculty along with their areas of interest is found on the IE web page (<https://ie.nmsu.edu/>).

Submission of Programs

After completing 12 credits of graduate coursework, a permanent "Program of Study" form must be submitted to the Graduate School. Acceptance of this program admits the student to candidacy for the degree.

Prefix	Title	Credits
Master's Thesis		6
IE 599	Master's Thesis	
Master's Project		3
IE 598	Special Research Programs

ECON 500-level (With approval of advisor and instructor)
CS 500-level (With approval of advisor and instructor)
MATH 500-level (With approval of advisor and instructor)
STAT 500-level (With approval of advisor and instructor)
A ST 500-level (With approval of advisor and instructor)

¹ The optional courses outside the department and/or the college should be previously approved by the academic advisor. See your advisor for more detailed information about selecting elective courses.

Requirements for Graduation

It is the responsibility of the student to complete all forms before submitting them to the IE department. Blank forms will not be accepted.

1. **Application for Diploma (Degree)** At the start of the semester in which you are to graduate you must file an Application for Diploma (Degree) and fee with the NMSU Registrar Office. To find the application as well as deadlines, log onto MyNMSU (<https://my.nmsu.edu/>) and click on the Student and Financial Aid tab, then under QuickLinks select Student Records. Filing dates are on the Graduate School Calendar that is maintained on the Graduate School website.
2. **Program of Study** – After you have completed 12 NMSU credits, you are required to complete a form entitled Program of Study for Masters Students. This form is found on the NMSU Graduate School (<https://gradschool.nmsu.edu/>) web page: Under the "Current Students" pull-down menu at the top, choose "Graduate Forms"
3. **Schedule Your Master's Exam** – Whether you write a thesis, complete a project or take all course work, you must schedule a final examination during the last semester of your course work/research. Examination committee rules are in the Graduate Catalog: You should plan to have your adviser, a second IE graduate faculty member, and an external (outside the IE department) faculty member. The external member will also serve as the Dean of the Graduate School's Representative. To ensure that a Faculty Member is currently a member of the Graduate Faculty and their appointment expiration date please visit Graduate Faculty & Staff Directory on the Graduate School (<https://gradschool.nmsu.edu/>) web page: Under the "Faculty and Staff" pull-down menu at the top, choose "Graduate Faculty & Staff Directory". The schedule dates are found on the Graduate School (<https://gradschool.nmsu.edu/>) web page: Under the "Current Students" pull-down menu at the top, choose "Graduate School Calendar".

4. **Other Forms** – Additional forms can be found on the Graduate School website (<http://gradschool.nmsu.edu/>).

To schedule and take your exam:

- Schedule a 2-hour time block that is convenient for you and your selected faculty committee. **Students are responsible for contacting and scheduling their committee members.**
- Schedule use of the IE Conference Room, Room 279 EC III, with the Industrial Engineering Secretary. At that time, if you are presenting a project or thesis, schedule the use of any equipment you may require such as the In Focus projector, laptop, etc.
- Complete the [Masters Final Examination Form](#). The exam form is also available on the Graduate School (<https://gradschool.nmsu.edu/>) website. You must schedule your exam a minimum of 10 working days in advance. This means your form must be at the Graduate School at that time.
- Consult with your adviser to discuss your examination. This can be by phone or e-mail.
- Be on time for your examination. If you're using equipment for presenting research, you should arrive early to set up.

Please plan to attend, with your family and friends, the College of Engineering's Sociedad de Ingenieros ceremony that is held to recognize our engineering graduates. This ceremony is held the Friday evening before Graduation.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. Students can take up to 12 credits of approved I E courses and get dual course credit that can be applied to both an undergraduate and master's degree. You can also check NMSU's catalog for additional information about our programs.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same courses as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other I E 500+ courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
I E 451	Engineering Economy	3
I E 460	Evaluation of Engineering Data	3
I E 467	Discrete-Event Simulation Modeling	3
I E 478	Facilities Planning and Design	3
I E 490	Selected Topics	3
I E 590	Selected Topics	3

Mathematics - Master of Science

The Master's degree is designed to increase one's knowledge and understanding of mathematics beyond the Bachelor's degree level. It also prepares a student for future graduate work.

A candidate for a master's degree may select up to two minors in addition to the major. A minimum of 8 credits of graduate work is necessary for a minor.

Minimum Requirements for the Master's Degree

1. In fulfillment of the Graduate School requirement of a minimum of 30 semester credits of course work, the student must take at least 24 credits of mathematics or statistics from the courses listed below.
2. The student's program of study must be approved by the departmental Graduate Studies Committee.
3. The student must successfully complete a master's written examination and final master's oral examination.

Prefix	Title	Credits
Minimum Requirements		
<i>Complete each of the following (12 credits):</i>		
MATH 5350	Advanced Linear Algebra	3
MATH 5340	Abstract Algebra I: Groups and Rings	3
MATH 5360	Introduction to Real Analysis I	3
MATH 5365	Introduction to Real Analysis II	3
<i>Complete two of the following:</i>		
MATH 5310	Introduction to Topology	6
MATH 5320	Logic and Set Theory	
MATH 5410	Complex Analysis	
STAT 5210	Probability: Theory and Applications	
STAT 5220	Statistics: Theory and Applications	
STAT 5230	Elementary Stochastic Processes	
<i>Complete two of the following</i>		
MATH 5420	Topology I	6
MATH 5425	Topology II	
MATH 5430	Mathematical Structures in Logic	
MATH 5435	Universal Algebra and Model Theory	
MATH 5440	Partial Differential Equations I	
MATH 5445	Partial Differential Equations II	
MATH 5450	Abstract Algebra II: Fields, Rings and Modules	
MATH 5453	Module Theory and Homological Algebra	
MATH 5450	Abstract Algebra II: Fields, Rings and Modules	
MATH 5455	Introduction to Commutative Algebra and Algebraic Geometry	
MATH 5460	Measure and Integration	
MATH 5463	Real Analysis	
MATH 5465	Introduction to Functional Analysis	
STAT 5310	Foundations of Probability	

STAT 5330	Continuous Multivariate Analysis
STAT 5335	Linear Models
STAT 5340	Advanced Theory of Statistics I
STAT 5345	Advanced Theory of Statistics II
Total Credits	24

The Master's Written Examination

Candidates for the Master's in Mathematics must pass a written exam, offered at the end of the Fall and Spring semesters, based on the content of MATH 5350 and MATH 5360. Full-time students need to pass the written Master's exam no later than the Summer following their completion of MATH 5350 and MATH 5360, or the start of their fourth semester in the program, whichever comes first. Graduate assistants must adhere to this timetable. Any second try must be passed within one semester of the first.

The Master's Final Examination

The Master's final examination is an oral examination administered by the student's committee. The exam consists of a short presentation made by the student on a topic covered in the student's coursework, followed by an examination by the committee based on the presentation and related coursework in the student's program of study. When a Master's thesis has been written, the presentation and examination is based on the student's thesis. The student's committee consists of at least three departmental members and a Graduate faculty member from another department who serves as the Dean's representative. The oral exam must be completed at least 10 days prior to the end of the semester in which the candidate wishes to receive the degree.

Mechanical Engineering - Master of Engineering in Mechanical Engineering

The Mechanical Engineering Masters of Engineering degree is a coursework-based graduate degree that requires neither a thesis nor a project.

(30 credits)

Additional Requirements	
Select three courses (500 level or above) from any departments and two courses (500 level or above) from any college: ²	15
Total Credits	30

¹ Graduate A E courses may be substituted for M E courses with the approval of the Graduate Program Coordinator.

² If course is not in A E or M E program, approval of the Graduate Program Coordinator is required.

Academic Advisor and Final Exit Survey

Newly admitted Mechanical Engineering Masters of Engineering students will be assigned the Graduate Program Coordinator as an academic advisor.

All students must take Professional Master's Degree Exit Survey to graduate, which will be conducted by the Graduate Program Coordinator and will be taken after completing all coursework.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to an MAE faculty advisor about your MAP plan and develop a course plan in consultation with the advisor. The faculty advisor should preferably be from the MAE area of your interest.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the

additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
M E 452	Control System Design	3
M E 456	Experimental Modal Analysis	3
M E 460	Applied Finite Elements	3
M E 502	Elasticity I	3
M E 503	Thermodynamics	3
M E 504	Continuum Mechanics	3

Mechanical Engineering - Master of Science in Mechanical Engineering Thesis Option (30 credits)

Prefix	Title	Credits
Requirements		
M E 570	Engineering Analysis I	3
Select at least 18 credits of M E graduate courses ¹		18
Master's Thesis (6 credits)		6
M E 599	Master's Thesis	
Select one or both from the following:		3
M E 509	Individualized Study	
M E 598	Special Research Programs	
Total Credits		30

¹ Up to 6 credits of A E graduate courses may be substituted with the approval of the Graduate Coordinator. All course must be 500 level or above. The program of study may include up to 6 credits of M E 510 (special topics courses offered formally on a one-time basis) with the approval of the Graduate Coordinator. M E 509 (A E 509) or M E 598 (A E 598) cannot be counted towards these 18 credits of ME graduate courses.

Publication Requirement

A refereed conference paper accepted or a refereed journal article in review or accepted by graduation. The M.S. thesis can be a reformatted version of this paper. Exceptions may be made on a case by case basis by the department head.

Selection of Permanent Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester, but they must select a degree option and a permanent advisor before registering for the second semester.

When considering a decision about a degree option and an advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of study to discuss specific educational objectives. The student can use these meetings to become familiar with faculty interests and research projects currently in progress. The faculty member must agree (in writing) to serve as the student's advisor.

All students must pass a final examination. The final examination is to be conducted by the student's advisory committee and is taken after completing all thesis work.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while

completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to an MAE faculty advisor about your MAP plan and develop a course plan in consultation with the advisor. The faculty advisor should preferably be from the MAE area of your interest.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
M E 452	Control System Design	3
M E 456	Experimental Modal Analysis	3
M E 460	Applied Finite Elements	3
M E 502	Elasticity I	3
M E 503	Thermodynamics	3
M E 504	Continuum Mechanics	3

Molecular Biology - Master of Science

The MB program offers curricula leading to the MS and Ph.D. degrees in the areas of biochemistry, molecular genetics, molecular biology, cell biology, bioinformatics, and microbiology. Admission to the MB Program without deficiency is based on an undergraduate program essentially equivalent to that pursued by an undergraduate major in chemistry, biology, agronomy, horticulture, biochemistry, or microbiology at this university. An entering student is required to complete the Graduate Record Examination (General Aptitude). Undergraduate deficiency courses must be passed with a minimum grade of B.

Applicants are strongly encouraged to contact at least three individual program faculty before applying to identify a prospective advisor and laboratory in which to pursue graduate research. Previous course records and GPA standings (typically minimum of 3.3/4.0), GRE scores (typically minimum of 300 combined verbal and quantitative), TOEFL scores of foreign applicants (typically minimum of 550 on the paper-based or 213 on the computer-based), a letter of interest from the applicant that identified

faculty laboratories of interest, and three letters of reference regarding research performance or potential are weighted heavily during the selection process.

Students with a BS degree in one of the disciplines listed above can expect to earn the MS degree in about 30 credits, including at least 6 credits of thesis research. Because research is central in both the MS and Ph.D. curricula, early selection of a research advisor is required. The master's committee is organized to assist in planning a program appropriate to the background and goals of the student. A final, formal presentation and oral defense of the original research documented in the MS thesis completes the degree requirements.

MS candidates must enroll in MOLB 599 Master's Thesis for 6 credits. May register for additional credits to maintain full-time status.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs. The MAP program allows undergraduate students to take graduate courses and count up to twelve credits toward both undergraduate and graduate degrees in COMM.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same courses as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 3.25.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

Undergraduate students majoring in Genetics, Biochemistry, and Biology would be the most qualified to enter the Masters Accelerated Program. The courses that can be taken during the student's last two years of their BS degree program prior to graduation, and as a full graduate student are listed below. Students may only take a maximum of 12 credit hours towards their MAP.

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
BIOL 470	Developmental Biology	

Students may count a maximum of two of the following 450-499 level courses towards their MAP

BIOL 474	Immunology
BIOL 475	Virology
BIOL 478	Molecular Biology of Microorganisms
EPWS 486	Plant Virology
GENE 486	Genes and Genomes
Courses 500-599 level that may be taken for MAP	
BIOL 540	Science and Ethics
MOLB 542	Biochemistry I
MOLB 520	Molecular Cell Biology
MOLB 550	Topics in Molecular Biology

Qualifications for students entering the MAP program include all NMSU guidelines including a GPA of 3.2. Students who complete MAP in Molecular Biology will be expected to meet all of the requirements of the program for entry into the Molecular Biology and Interdisciplinary Program Graduate Program to complete their graduate degree. (GRE score will be waived for MAP) These requirements can be found at <https://molb.nmsu.edu/how-to-apply/>. The MOLB-ILS program does not have a non-thesis option so all MS students in the program perform research that culminates to a published thesis.

MPA-MCJ Program - Dual Degree

The MPA-MCJ joint degree option requires completion of a minimum of 57 credits of approved course work from the Departments of Government and Criminal Justice. Students interested in this option should meet with the MPA director or criminal justice graduate advisor for additional information.

Music (Conducting) - Master of Music

Prefix	Title	Credits
Required Courses		
MUSC 471	Graduate Theory Review ¹	3
MUSC 477	Graduate Music History Review ¹	3
MUSC 578	Advanced Choral Literature	2
or MUSC 579	Advanced Instrumental Literature	
	Music Theory	3
	Music History and Literature	3
	Conducting	9
MUSC 450	Research Methods	3
MUSC 580	Ensemble Performance	1
MUSC 540	Graduate Recital/Analytical Paper	4
Total Credits		31

¹ Students must make a B or better before taking additional music theory/music history courses.

Music (Music Education) - Master of Music

Requirements

Students must make the grade of B or better in a course for it to count toward degree completion.

Prefix	Title	Credits
Required Courses		
MUSC 471	Graduate Theory Review ¹	3

MUSC 477	Graduate Music History Review ¹	3
Music Theory		3
Music History and Literature		3
Music Education		9
Approved Elective		3
MUSC 450	Research Methods	3
MUSC 598	Special Research Programs	4
or MUSC 599	Master's Thesis	
Total Credits		31

¹ Students must make a B or better before taking additional music theory/music history courses.

Music (Performance) - Master of Music

Prefix	Title	Credits
Requirements

Total Credits		32

¹ Students must make a B or better before taking additional music theory/music history courses.

Physics - Master of Science

The Master's degree requires that students either pass the qualifying examination at the Master's level or identify a research advisor during the first semester of study, form a Graduate Committee, and write a thesis. For the master's degree, students must also successfully complete or transfer at least 30 course credits and pass a final oral examination or the doctoral comprehensive examination. Of these 30 credits, at least 21 must be in physics/geophysics, at most 3 may be for individual study or other informal courses, at most 6 may be for a thesis, and at most 9 may be numbered between 450 and 499. Students must successfully complete

Prefix	Title	Credits
PHYS 576	Advanced Computational Physics I	3
or PHYS 476	Computational Physics	
Select 3 credits from the following:		3
PHYS 571	Advanced Experimental Optics	
PHYS 575	Advanced Physics Laboratory	
PHYS 593	Advanced Experimental Nuclear Physics	

A Master's thesis is optional for students who have passed the qualifying examination. PHYS 599 Master's Thesis credits will not count toward the 21 credits in physics/geophysics and can only be counted toward the 30 credits for a Master's degree if a student selects the thesis option and

successfully defends a Master's thesis. PHYS 700 Doctoral Dissertation credits can be used as a substitute for PHYS 599 Master's Thesis credits.

Physics (Space Physics) - Master of Science

Requirements

For the master's degree with a concentration in Space Physics, students must successfully complete the following physics core and specialized courses:

Prefix	Title	Credits
Physics Core		
PHYS 551	Classical Mechanics	3
PHYS 593	Advanced Experimental Nuclear Physics	3
PHYS 511	Mathematical Methods of Physics I	3
or PHYS 495	Mathematical Methods of Physics I	
PHYS 597	Space Plasma Physics	3
PHYS 554	Quantum Mechanics I	3
or PHYS 454	Intermediate Modern Physics I	
PHYS 561	Electromagnetic Theory I	3
or PHYS 461	Intermediate Electricity and Magnetism I	
PHYS 584	Statistical Mechanics	3
or PHYS 480	Thermodynamics	
Specialization Electives		
Select a minimum of three from the following:		9
ASTR 535	Observational Techniques	
ASTR 620	Planetary Processes	
ASTR 698	Special Topics.	
E E 460	Space System Mission Design and Analysis	
M E 533	Numerical Methods for Fluid Mechanics and Heat Transfer	
PHYS 576	Advanced Computational Physics I	
or PHYS 476	Computational Physics	
PHYS 591	Advanced High-Energy Physics I	
Total Credits		30

Plant and Environmental Science - Master of Science

This degree is designed to train students in sustainable crop production, plant breeding and genetics, soil science, and sustainability of diverse environmental systems. Students will be prepared for successful employment in commercial companies, educational institutions, governmental agencies, and private production enterprises that are engaged in agronomy, environmental science, soil science, water management, and natural resources management. Candidates for this degree must successfully conduct original research in one of the above areas and complete a minimum of 30 graduate credits based on a program of study approved by the student's graduate committee.

The Master of Science degree can be obtained through either a thesis option (recommended) or a non-thesis option. Prerequisite to major graduate work is completion of a curriculum essentially equivalent to that required by the department for the BS degree at New Mexico State University. Qualifications for admission will be reviewed by the departmental graduate faculty.

Minimum Grade Point Average and Credit Hour Requirements: Your Master's degree requires a minimum of 30 completed degree hours and a minimum cumulative GPA of 3.00 in all course work.

Degree residency requirement: 15 credits must be completed at NMSU.

Thesis Option

Prefix	Title	Credits
Departmental Requirements		
<i>Selection of courses should be based on consultation with the student's graduate committee</i>		
AGRO/HORT/SOIL 590	Graduate Seminar (taken in final semester)	1
Complete sufficient credits numbered 450 or above, including at least 15 credits at the 500-level or above, to bring total graduate credits to 30		23-25
AGRO/HORT/ENVS 599	Master's Thesis (taken in final year)	4-6
Complete a written thesis		
Complete a final oral defense of the written thesis and a general examination of the student's field of study		
Total Credits		30

See the PES Graduate Handbook (https://pes.nmsu.edu/documents/NMSU_PES_GraduateStudiesHandbook_final83020221.pdf) for additional details.

Non-Thesis Option

AGRO/HORT/SOIL 590	Graduate Seminar (taken in final semester)	1
Complete sufficient credits numbered 450 or above, including at least 15 credits at the 500-level or above, to bring total graduate credits to 30		29
Complete a written research report on an area of investigation conducted by the student.		
Complete a final oral defense of the research report and a general examination of the student's field of study.		
Total Credits		30

See the PES Graduate Handbook (<https://aces.nmsu.edu/academics/pes/pes-graduate-handbook.html>) for additional details.

Political Science - Master of Arts

The MA program provides general course work in each of the major fields of political science. Students may choose either the thesis option, under which they complete 30 credits of course work plus 6 thesis credits (POLS 599 Master's Thesis), or the nonthesis option, with 30 credits of course work plus 6 hours of special research credit (POLS 598 Special Research Programs) or 6 hours of approved internship credit (POLS 510 Internship). Both the thesis and nonthesis options require a final oral examination; the non thesis option requires a written examination as well. The program provides a broad-based foundation in political science while allowing students to pursue specific areas of interest.

Requirements

Flexibility in planning a program of study is permitted to meet the educational needs of a diverse student population. Structured areas of

emphasis are available in several topical areas, including Latin American and international affairs. Students may also take a graduate minor in Security Studies. Information on these areas and the graduate minor may be obtained from the Department of Government. No more than 9 credits taken outside the department will be counted toward the degree.

Prefix	Title	Credits
Requirements		
POLS 502 or POLS 503	Research Methods in Government Qualitative Research Methods	3
Select three from the following:		9
POLS 530	Seminar in Public Policy	
POLS 550	Seminar in American Politics	
POLS 560	Seminar in International Relations Theory	
POLS 570	Seminar in Comparative Politics	
POLS 580	Seminar in Political Theory	
Additional credits subject to advisor approval ¹		18
Thesis/Non-Thesis		
Select one from the following:		6
POLS 599	Master's Thesis	
POLS 598 or POLS 510	Special Research Programs Internship	
Total Credits		36

¹ The remaining credits required for the degree are selected subject to advisor approval to satisfy particular academic interests or career goals.

Public Administration - Master of Public Administration

The MPA program is accredited by NASPAA. The MPA is designed to provide students with the managerial and analytical skills, in addition to ethical and professional values, necessary to meet the increased demand for skilled public administrators. Candidates who follow this professional program must complete a minimum of 42 credits, consisting of core courses, electives and either an internship or a thesis.

Requirements

Because students have divergent career goals, a thesis or internship option is offered. The thesis option requires an additional 18 credits of course work, 6 credits of thesis (POLS 599 Master's Thesis), and a written examination covering the thesis and course work. The internship option also requires an additional 18 credits of course work, 3 credits of internship (POLS 510 Internship), and a written examination covering the internship and course work. Students who fail their written examination must take an oral exam. As part of the course work, students selecting the internship option must take POLS 519 Proseminar in Public Administration (3 credits that count toward the 42 total) during the latter part of their studies, and are required to earn a B- grade or higher in that course.

With approval, students may include up to 12 credits of relevant course work from other departments to be counted toward the total credits required for the MPA. These credits may be selected to form a graduate minor in another academic discipline.

Prefix	Title	Credits
Core Courses		
POLS 502	Research Methods in Government	3
POLS 541	Public Budgeting	3
POLS 542	Public Sector Human Resources Management	3
POLS 544	Public Policy Analysis	3
POLS 547	Government Organizations	3
POLS 549	Ethics in Government	3
Thesis Option		
Select one from the following:		24
<i>Thesis</i>		
POLS 599	Master's Thesis	
Select 18 credits of additional course work		
<i>Internship and Capstone Option 2</i>		
POLS 510	Internship	
Select 18 credits of additional course work		
POLS 519	Proseminar in Public Administration	
Total Credits		42

Candidates with inadequate preparation for graduate study in public administration may be required to take appropriate undergraduate and graduate courses as part of, or in addition to, a regular program of study. Applicants to the MPA program will be advised of any such requirements at the time of admission.

Public Health (Health Behavior and Health Promotion) - Master of Public Health

Students completing the Health Behavior & Health Promotion concentration are eligible to sit for the Certified Health Education Specialist (CHES) examination and/or for the Certified Public Health (CPH) examination.

Thesis Option

Credits		3
Total Credits		42

¹ PHLS 5210 Foundations & Techniques of Public Health Education is a pre-requisite for PHLS 5250 Evaluative Approaches in Public Health for HBHP students, but not for HMAP students. The student will need a prerequisite hold released for registration.

New Mexico State University's master's accelerated program allows **academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years.

The master's accelerated programs allow students to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to the PHS Graduate Coordinator about your MAP plan and develop a course plan in consultation with that person.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same courses as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework, of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 3.00.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a B- or lower grade is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the PHS MAP program; other courses may be considered after consultation with the Graduate Coordinator. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees. Other Cultural Foundation courses (PHLS 5600-5699) may be substituted when offered.

Prefix	Title	Credits
PHLS 5110	Community and Psychosocial Aspects of Public Health	3
PHLS 5120	Biostatistical Applications in Public Health	3
PHLS 5150	Environmental Public Health Issues	3
PHLS 5210	Foundations & Techniques of Public Health Education	3
PHLS 5610	Health Disparities: Determinants and Interventions	3
PHLS 5620	Cross-Cultural Aspects of Health	3

Public History and Public Administration - Dual M.A. Degree

The Department of History and the Department of Government offer a dual degree in which students who are accepted into both of these programs may simultaneously earn both a Master of Arts in History degree with the Public History specialization, and a Master of Public Administration degree. The dual degree requires 57 total credits, while students who pursued both degrees as separate degrees would need to pass at least 72 credits. Students earning the dual degrees must pass a joint oral examination after passing required courses and completing internship credits in both programs. Students interested in the dual degree program should consult with the Director of the Public History Program and the Director of the Master of Public Administration Program.

Range Science - Master of Science

A GPA of 3.0 or higher is required for admission. GRE exam is not required. Prerequisite for admission as a regular graduate student in the department is the completion of a curriculum substantially equivalent to that required of undergraduate students. Therefore, deficiency courses may be required after admission to the program, as determined by the admissions committee and the student's graduate committee and advisor.

Graduate Program with the Thesis (Research) Option

A minimum of 30 credits of graduate work is required to graduate. At least one advanced statistics course or equivalent is required, as determined by the student's graduate committee. The thesis research project must be approved by the student's graduate committee. Every effort should be made to publish the thesis as a scientific journal article or Experiment Station publication.

Graduate Program with the Non-Thesis Option

A minimum of 32 credits of graduate work is required to graduate. A final written report is required.

The report will be on a topic approved by the student's graduate committee. Research for the report may involve field work and data gathering, but should also be strongly library- and literature-based.

The report should be of graduate quality and content, and should follow graduate school thesis format or the format of an acceptable scholarly journal. Final approval and acceptance of the report will be by the student's graduate committee. Every effort should be made to publish the report in an appropriate outlet (journal article, Experiment Station bulletin or report, Extension bulletin, etc.)

Social Work - Master of Social Work (Full-Time)

The requirements for the Master of Social Work degree include 60 credits of designated graduate courses; a cumulative grade-point average of at least 3.0 on a 4.0 scale in all courses and practicums.

Note that all social work courses must be taken in sequence. Successful completion of course work for each semester is a prerequisite for the course work of the following semester.

An integral part of a graduate social work program is completing practicums. For those enrolled in the two-year and three-year programs, two practicum placements totaling 950 hours will be required. For those students entering the program with advanced standing, one practicum placement is required, totaling 500 hours in the field. Students are offered a wide range of practicum sites from which to choose. Students should be prepared to travel some distance and be responsible for their own transportation costs.

Application Deadlines

The priority deadline for completed applications is January 15 for fall admission. Applications received after January 15 will only be reviewed on a space-available basis. Please apply by January 15 for full consideration.

MSW elective courses not listed above: Sociology, Anthropology, Education, Special Education, Psychology, Health Science, Family and Consumer Science, Counseling and Education Psychology, Economics, Management, Government, Statistics, Women's Studies, and Criminal Justice.

Sociology - Master of Arts

Thesis Program Requirements

In addition to the successful completion of an acceptable master's thesis, students who choose this option will take a minimum of 30 credit hours of graduate work distributed as follows:

Prefix	Title	Credits
Required Courses:		6
SOCI 5110	Perspectives on Sociology ¹	
SOCI 5163	Issues in Advanced Quantitative Analysis ¹	
Choose one methods course from the following:		3
SOCI 5150	Seminar in Social Networks ¹	
SOCI 5153	Seminar in Sociological Research ¹	
SOCI 5155	Seminar in Text Analysis for the Social Sciences ¹	
SOCI 5157	Seminar in Qualitative Research Methods ¹	

SOCI 5158	Seminar in Visual Ethnographic Methodology ¹	
Choose one social theory course from the following:		3
SOCI 5165	Foundations of Social Theory ¹	
SOCI 5166	Seminar in Contemporary Theory ¹	
Masters Thesis Credits:		6
SOCI 5999	Master's Thesis	
Select an additional 12 credits from 5000 level Sociology course work to be taken in consultation with the sociology graduate student's advisor.		12
Final master's oral examination covering all general coursework and the thesis.		
Total Credits		30

¹ To be taken within the first 27 hours of graduate credit. A grade of B- or better is required to receive credit for each of these core courses.

Non-Thesis Program Requirements: Coursework Only

Students who choose this option will take a minimum of 30 credit hours of graduate work distributed as follows:

Prefix	Title	Credits
Required courses		6
SOCI 5110	Perspectives on Sociology ¹	
SOCI 5163	Issues in Advanced Quantitative Analysis ¹	
Choose one methods course from the following:		3
SOCI 5150	Seminar in Social Networks ¹	
SOCI 5153	Seminar in Sociological Research ¹	
SOCI 5155	Seminar in Text Analysis for the Social Sciences ¹	
SOCI 5157	Seminar in Qualitative Research Methods ¹	
SOCI 5158	Seminar in Visual Ethnographic Methodology ¹	
Choose one social theory course from the following:		3
SOCI 5165	Foundations of Social Theory ¹	
SOCI 5166	Seminar in Contemporary Theory ¹	
Select an additional 18 credits from 5000 level Sociology course work to be taken in consultation with the sociology graduate student's advisor.		18
Final master's written examination covering all general coursework.		
Total Credits		30

¹ To be taken within the first 27 hours of graduate credit. A grade of B- or better is required to receive credit for each of these core courses.

Admission Requirements

To apply for admission to the Sociology MA Program and the Graduate School, applicants must meet the following criteria and submit the following through <https://apply.nmsu.edu/apply/>

- Application form and fees
- An undergraduate cumulative GPA of at least 3.0 on a 4.0 scale.
- A record of professional, ethical, and collegial behavior.
- Official undergraduate and graduate transcripts from all colleges and universities attended.
- A well written statement of purpose from the candidate addressing graduate school objectives and interests.

Failure to meet any of the above criteria may result in the student not being accepted into our program. However, in cases when an otherwise outstanding student does not meet the GPA requirements, the student may be accepted provisionally into the program.

The GRE is not required for admission. Students may be required to take prerequisites prior to gaining admission.

The department admits students on a rolling basis. For graduate assistantship consideration, the priority deadline for application is February 1st for Fall admission.

Master's Accelerated Program (MAP) Guidelines

The Masters Accelerated Program allows academically qualified undergraduate students to complete up to 12 credit hours towards a master's degree during their junior and/or senior years while still completing the bachelor's degree. The courses only apply to classes they would take within the Master of Arts program in Sociology.

NMSU GENERAL ELIGIBILITY

- Must have completed 60 hours of undergraduate coursework (minimum 25 hours at NMSU)
- GPA larger or equal to 3.00
- Complete MAP Referral Form

NMSU MAP REGULATIONS/STIPULATIONS

- Courses will count toward both degrees; they will show on undergraduate and graduate transcripts and count towards both GPAs.
- Graduate level courses included in the master's accelerated program are those courses numbered 5000 and above *or those chosen by the graduate academic departments.*
- Students must receive a grade of B- or higher in all MAP coursework to be counted as graduate credit.
- Students apply for the graduate program in their final semester or second to last semester of their undergraduate degree. Depending upon the deadlines set forth by the Department of Sociology.
- Acceptance of MAP credits does not imply acceptance into the Department of Sociology master's program.

Final admissions and acceptance into the graduate program are based on academic performance at the undergraduate level and completion of the eligible undergraduate degree.

- Tuition is based on the level of the student, not the course
- Students may become ineligible for MAP if their undergraduate or graduate GPA drops below 3.0
- Students accepted into the master's accelerated program must participate in the Developing New Scholars Program (DNSP), offered by the Graduate School.
- Students must be advised each semester for the MAP program by their potential graduate program and cleared for registration in graduate courses by the Graduate School.

How to Apply to the MAP Program:

1. A student may apply, or the department may invite students to participate in MAP.
2. *Departments accept students based on the Master's Accelerated Program requirements as set by the department.*

3. A Sociology graduate faculty member, Graduate Coordinator, or Department Head will forward the Master's Accelerated Program Referral Form to the graduate school.
4. Graduate School will hold the referral form until the student has completed their undergraduate degree.
5. The referral form will be used as part of the graduate school's final admissions into the master's program.
6. The following courses are eligible for the Sociology MAP Program:

MAP Courses

In accordance with the Higher Learning Commission (HLC), CRRT.B.10.020.B1c, an institution may allow well-prepared advanced students to substitute its graduate courses for required or elective courses in an undergraduate degree program *and then subsequently count those same courses as fulfilling graduate requirements in a related graduate program that the institution offers*. A graduate program has the discretion to use up to 12 credits of NMSU Sociology coursework (5000 level or higher) that can be applied towards the completion of the master's program of study. Students must receive a grade of B- or higher in this coursework to be counted for graduate credit.

Accepted MAP Courses

The following courses are accepted for use in the Sociology MAP program; other courses may be considered after consultation with the Graduate Coordinator. An exception will need to be made to the degree audit for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
SOCI 5110	Perspectives on Sociology	3
SOCI 5153	Seminar in Sociological Research	3
SOCI 5157	Seminar in Qualitative Research Methods	3
SOCI 5163	Issues in Advanced Quantitative Analysis	3
SOCI 5165	Foundations of Social Theory	3

Spanish - Master of Arts

The degree plan requires a minimum of 36 credits in Spanish, of which at least 30 must be earned at the 500 level, and the remainder above the 450 level. The courses should be concentrated in the student's chosen area of study (linguistics or literature) as each student will be tested on a reading list that corresponds to each area study. A thesis is optional. Students authorized to complete a thesis may count a maximum of 6 credits of thesis work toward the degree. At the present time, the thesis option is not available for online-only students. There are no required core courses at this time and a student should work closely with his/her advisor and the Graduate Director to establish an appropriate individual degree plan.

All students in either the on-campus or online program may complete a minor at the master's level by taking 9 credits (3 courses) at the 500 level or above, in another area (department) of study, or within the department itself. For instance, a student studying linguistics may wish to obtain a minor in literature or a student studying literature may wish to obtain a minor in linguistics. In either case, the minor credits count as part of the 36 total credits required for the degree. In all cases, the student should work closely with the Graduate Director to ensure his/her particular plan of study is acceptable to the program.

Area of Study: Linguistics

Prefix	Title	Credits
Select 12 courses from the following:		36
SPAN 507	Technology Enhanced Language Learning	
SPAN 508	Teaching Literature with Technology	
SPAN 509	Teaching Culture with Technology	
SPAN 510	Assessing the National Standards	
SPAN 540	Introduccion a la Linguistica	
SPAN 545	Advanced Dialectos del Espanol	
SPAN 558	Bilinguismo	
SPAN 561	Advanced Spanish Phonetics	
SPAN 562	Advanced Spanish Phonology	
SPAN 570	Advanced Study in Technical Translation	
SPAN 580	Research Methodology in Spanish Linguistics	
SPAN 584	Spanish Morphosyntax	
SPAN 589	Spanish Sociolinguistics	
SPAN 591	Advanced Study in History of the Spanish Language	
SPAN 592	Advanced Structure of Spanish	
SPAN 594	Theory and Methodology of Spanish Pedagogy	
SPAN 597	Advanced Strategies for Teaching Spanish for Heritage/Native Speakers	
Total Credits		36

Area of Study: Literature

Prefix	Title	Credits
Select 12 courses from the following:		36
SPAN 500	Methods of Research and Literary Criticism	
SPAN 512	Contemporary Spanish-American Poetry	
SPAN 520	Adv. The Art of Storytelling	
SPAN 521	Advanced Culture and Literature of New Mexico	
SPAN 528	Advanced U.S. Latino Culture and Literature	
SPAN 547	Advanced Hispanic Film	
SPAN 548	Advanced U.S.-Hispanic Film	
SPAN 563	Advanced Study in Mexican Literature	
SPAN 564	Advanced Post-Modern Hispanic Literature	
SPAN 566	Contemporary Spanish-American Novel	
SPAN 567	Advanced Study in Chicano Literature	
SPAN 573	Advanced Study in Creative Writing	
SPAN 583	Advanced Study in Spanish-American Women Writers	
SPAN 586	Contemporary Spanish-American Essay	
SPAN 587	Contemporary Spanish-American Short Story	
SPAN 588	Contemporary Spanish-American Drama	
Total Credits		36

Courses that may apply to either area include SPAN 590 Advanced Special Topics (see subtitles in schedule of courses to confirm subject of the course) SPAN 598 Independent Reading, Research, and/or Creative Writing, SPAN 599 Master's Thesis (both courses require a course proposal and prior approval).

Additional Language Requirement

For both the on-campus and online degrees, the department requires that students fulfill a second language requirement (in addition to English and Spanish) by following an approved course of study. Typically, this

is completed by taking a four-semester course of study, but may vary according to the languages available.

Options for completing this requirement include taking classes at a local Community College or University, or online. Some students have met this requirement by studying abroad through NMSU. Students should consult the Graduate Director to establish a plan and discuss how this requirement will be met. *Note: evidence of fulfilling the second language requirement must be provided to the Graduate Director BEFORE taking final examinations.*

English Language Requirement

International students are required to demonstrate proficiency in English and meet all international admissions requirements prior to beginning their program of study. Please see the section of the Graduate Catalog on international admissions requirements and scores required for either the TOEFL or IELTS exam. *Note: evidence of fulfilling the English Language Requirement must be provided to the Graduate Director AND the Graduate School BEFORE taking final examinations.*

Final Examinations

Students must successfully complete a final department examination (generally during the final semester of coursework) that is partially written and partially oral. Please consult the Graduate Director for specific information on dates and format for these exams. Final examinations are only available during the Fall and Spring semesters.

Areas of Interest/Reading List

As stated previously, each student needs to select an area of interest: Linguistics or Literature. At the end of the student's degree, the final examinations (written and oral) will be based on the readings from the readings list in the student's selected area of study. For example, a student that has opted to specialize in literature is responsible for reading all the materials on the Literature Reading List. Likewise, a student that has opted to specialize in linguistics is responsible for reading all the materials on the Linguistics Reading List. The student is responsible for the reading list that was in place the year he or she started the program.

Each student is responsible for covering the reading materials listed. Please contact the Graduate Director for a detailed reading. Note that the list is dated, so make sure to refer to the correct list that covers the year/semester the student started the program. The student is responsible for covering ALL the readings even if the student did not cover them as part of work done in class.

Graduate Assistantships

For the on-campus program only, the department awards graduate assistantships to qualified students. For this financial assistance, the student works up to 20 hours a week in departmental programs, chiefly in the teaching of elementary and intermediate Spanish courses in either the Heritage Language sequence or Spanish as a second Language sequence. Students interested in being considered for an assistantship should clearly state this interest in their introduction letter during the application process. The department offers a limited number of assistantships, and students should remember that not everyone that applies for this award receives one. Maintaining the award depends on the student's successful performance both academically and in the classes he/she teaches and is evaluated on a semester-by-semester basis. Students who receive an assistantship are required to take SPAN 594 Theory and Methodology of Spanish Pedagogy (see course

description) as part of their degree plan in order to help them prepare for teaching classes at NMSU.

Special Education - Master of Arts

Enrollment in graduate licensure program courses with field experiences in Special Education is limited to persons who have been accepted into the graduate program in Special Education. For other special education graduate courses, enrollment of students outside of the special education program is contingent upon meeting prerequisites and availability after enrollment of Special Education graduate students. To complete a course of study, each student must meet the program's academic and field based competency criteria, including a grade of B or higher in each course in the program of study, satisfactory evaluation in field experiences for those seeking licensure, and a passing score on the MA Comprehensive Exam. The Master of Arts in Special Education has five pathways to meet the varied needs of students pursuing graduate education and can be completed in two years for full-time students.

MA in Special Education Pathways

Admission The Special Education Program has a "rolling admissions" procedure for MA programs. Applications are reviewed upon submission to determine if candidates meet admission requirements. Application requirements follow: 1. A completed Graduate School admission application. 2. A letter of interest explaining the applicant's goals in pursuing an MA in Special Education. 3. Complete transcripts of all college work, including notation of a BA or BS Degree and a cumulative GPA of a 3.0 or higher. 4. A curriculum vitae or resume. 5. Email addresses to contact three individuals who can provide a professional recommendation, such as professors, employers, or others qualified to evaluate potential for graduate work. 6. For alternative licensure, a letter from a school district indicating consideration for a position. 7. For international students with English language testing requirements, TOEFL test results of at least 79 iBT; 550 paper, or IELTS results of at least 6.5. MA in Special Education Pathways

MA in Special Education (Initial License)

This route is 42 credits including student teaching and provides preparation for the New Mexico pre-K-12 Special Education license. Candidates must be admitted to the Teacher Education Program before completing practicum and student teaching experiences.

There are two course prerequisites that may be required, SPED 5105 Introduction to Special Education in a Diverse Society and SPED 5230 Advanced Curriculum for Diverse Exceptional Learners. If these are required they must be taken in the first semester they are offered.

Prefix	Title	Credits
Course Requirements		
SPED 5210	Introduction to Assessment of Diverse Exceptional Learners	3
SPED 5120	High Incidence Disabilities in a Diverse Society	3
SPED 5110	Low Incidence Disabilities in a Diverse Society	3
SPED 5130	Reading for Elementary Exceptional Learners in a Diverse Society, K-6	3
SPED 5860	Current Issues in Special Education for Teaching in Culturally Responsive Society	3
SPED 5140	Reading for Secondary Exceptional Learners in a Diverse Society, 7-12	3
SPED 5850	Current Research in Special Education	3

Prefix	Title	Credits
SPED 5160	Technology and Exceptionality in a Diverse Society	3
SPED 5811	Field Experience in Education, Equity & Cultural Diversity	3
SPED 5220	Classroom Management for Diverse Learners	3
SPED 5810	Student Teaching SPED	6
Total Credits		36

¹ Admittance to TEP is required before registering for SPED 5811 Field Experience in Education, Equity & Cultural Diversity, which must be taken the semester before student teaching.

² Admittance to STEP is required before registering for SPED 5810 Student Teaching SPED, which is the culminating course.

MA in Special Education (Prior General Ed. Licensure)

This route requires 30 credits of special education coursework and provides preparation for a second license, in Special Education, for students who already have an initial license in another area such as Early Childhood, Elementary, or Secondary Education.

There are two course prerequisites that may be required, SPED 5105 Introduction to Special Education in a Diverse Society and SPED 5230 Advanced Curriculum for Diverse Exceptional Learners. If these are required they must be taken in the first semester they are offered.

Prefix	Title	Credits
Course Requirements		
SPED 5210	Introduction to Assessment of Diverse Exceptional Learners	3

¹ SPED 5811 Field Experience in Education, Equity & Cultural Diversity is taken during the final semester of coursework

MA in Special Education (Alternative Licensure)

This route includes 39 credits. It begins with completion of alternative licensure components, which includes 21 credits of state-approved coursework and two semesters of university supervision while concurrently employed as the special education teacher of record in a classroom. After completion of the alternative components, students complete the remaining coursework (18 credits) and degree requirements.

Note: Alternative Licensure requires concurrent employment as a special education teacher.

Total Credits		39

MA in Special Education (Scholarly Route)

This route requires 30 credits of special education coursework and is for students who are not seeking licensure or who already have a license and are seeking additional depth of knowledge.

There are two course prerequisites that may be required, SPED 5105 Introduction to Special Education in a Diverse Society and SPED 5230 Advanced Curriculum for Diverse Exceptional Learners. If these are required they must be taken in the first semester they are offered.

Prefix	Title	Credits
Course Required		
SPED 5850	Current Research in Special Education	3
SPED 5860	Current Issues in Special Education for Teaching in Culturally Responsive Society	3
SPED Elective Courses ¹		24
Total Credits		30

¹ Electives are selected in consultation with an advisor, who will make recommendations based on prior coursework and individual student interests.

MA in Special Education (emphasis in Visual Impairment)

This route requires 30-36 credit hours in visual impairment and special education coursework and prepares for licensure in teaching school-aged children/infants/toddlers and/or orientation and mobility. Students who meet qualifications and are interested in visual impairment may elect to pursue licensure only, rather than a master's degree, with 15-27 credits leading to a Blind and Visually Impaired Teaching License or National Certification in Orientation and Mobility.

Water Science and Management - Master of Science

This degree is designed primarily for students who wish to complement their primary discipline by obtaining scientific, technical, and managerial expertise in water. The Master's degree can be earned with 26 credits of

formal course work, plus 6 additional thesis research credits, as detailed below. The degree also has five available concentrations.

Prefix	Title	Credits
Core Courses		
AEEC 5350	Economics of Water Resource Management and Policy	3
RGSC 518 or SOIL 456	Watershed Methods and Management Irrigation and Drainage	3
Select one from the following: ¹		3-4
A ST 505	Statistical Inference I	
C E 582	Statistical Hydrology	
GEOG 585	Spatial Analysis and Modeling	
Seminar Credit OR Select one from the following: ²		1
WSAM 605	Arid Land Water Resources	
WSAM 610	Water and Sustainable Economic Development	
GEOG 501	Introduction to Geographic Theory and Application	
Electives chosen in consultation with the student's committee (enough to meet the required minimum of 32 credits)		16
Thesis		
WSAM 599	Masters Thesis	6

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Aerospace Engineering - Doctor of Philosophy

Requirements for Ph.D. Degree

The student's academic program is not judged satisfactory unless it prepares the student to contribute to the advancement of knowledge in the field of Aerospace Engineering. The degree of Doctor of Philosophy is indicative of distinguished achievement in the areas of scholarship and original research. Therefore, a dissertation of high quality is required of all doctoral students in Aerospace Engineering. Students must follow the degree requirements listed below to complete the Ph.D. course of study.

The Ph.D. program is open to students with a master's degree. Exceptionally well qualified students may petition for direct entry to the Ph.D. program without first obtaining a master's degree.

A student is required to have one refereed journal paper accepted and a second one accepted or in review by graduation. The Ph.D. dissertation can be a compilation and reformatted version of these published or accepted journal papers. Exceptions may be made on case-by-case basis by the Department Head.

Prefix	Title	Credits
Pass Qualifying Exam ¹		
Graduate Coursework (Credits beyond the Bachelor's Degree) ²		36
Pass Comprehensive Exam ³		
Doctoral Dissertation ⁴		
A E 700	Doctoral Dissertation	24
Complete and Defend Doctoral Dissertation		
Total Credits		60

- ¹ It is expected that students will take the qualifying exam within one year of entering the Ph.D. program.
- ² At least 18 of graduate coursework must support the student's research. The program of study may include up to 6 credits of M E 510 or A E 510 (special topics courses offered formally on a one-time basis) with the approval of the Graduate Coordinator.
- ³ The candidate must pass a comprehensive examination after the completion of adequate coursework and demonstration of satisfactory progress toward the doctoral dissertation. The specific format of the exam is at the discretion of the examination committee. The candidate may submit the proposal for the dissertation research that includes the candidate's current research, planned research directions, and a reasonable timeline for completing the candidate's proposed research if the committee requires.
- ⁴ This may include a maximum of 6 credit hours of A E 600 (<https://catalogs.nmsu.edu/search/?P=M%20E%20600>) Doctoral Research. A E 600 (<https://catalogs.nmsu.edu/search/?P=M%20E%20600>) Doctoral Research is intended for those students who have not completed the qualification examination, a prerequisite for A E 700 (<https://catalogs.nmsu.edu/search/?P=M%20E%20700>) Doctoral Dissertation.

Admission Requirements

For PhD Program, the Mechanical and Aerospace Engineering department asks for the following documents: Transcript, Three Recommendation Letters, Statement of Purpose, Resume, Writing Sample, and GRE. Also NMSU requires English Proficiency Tests such as TOEFL, IELTS, or Duolingo English Test for international students.

Ph.D. Program Transfer Credits

A student who has completed a Master of Science degree in M E, A E, or a closely related field may transfer up to 24 credits of graduate coursework, approved by the student's advisor, into a Ph.D. program of study.

Selection of Permanent Ph.D. Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester. The student must select a permanent advisor before registering for the second semester. In selecting a permanent advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of enrollment to discuss specific objectives. The student should use these meetings to become familiar with faculty research interests and research projects currently in

progress. The faculty member must consent (in writing) to serve as the student's advisor.

Policies governing the Ph.D. written qualifying examination, the Ph.D. written and oral comprehensive examination, the student's Ph.D. committee, and the Ph.D. dissertation are contained in the department's Graduate Program website.

Additional Requirements

Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Animal Science - Doctor of Philosophy

Requirements for Ph.D. Degree in Animal Science

Admission

1. GPA of 3.0 or greater.
2. Three letters of recommendation.
3. Completion of the form, "Application for Graduate Admission in Animal Science" including a brief letter (personal statement) outlining the student's background, career goals, and research interest.
4. Resume
5. Favorable evaluation for admission will be by consensus of the Animal Science Graduate Committee and will be contingent on availability of an advisor and research funding.
6. A requirement for admission as a doctoral graduate student in the department is completion of a curriculum substantially equivalent to that required of undergraduate students. Therefore, deficiency courses may be required after admission to the program, as determined initially by the Animal Science Graduate Committee.
7. Non- thesis MS degrees are not acceptable although some of the courses may be transferred if deemed appropriate by the student's Doctoral Committee.

General Requirements

1. Graduate students must maintain at least a 3.0 grade point average.
2. A minimum of 90 credit hours of graduate work is required of which:
 - a. At least 30 credits must be in courses numbered 600 or above.
 - b. At least 18 credits must be in ANSC 700 (Doctoral Dissertation).
3. All graduate assistants must enroll as full-time students taking at least 9 graded graduate credits (courses numbered 450 and above). No audits can be taken as part of the 9 minimum credits. Only 3 of the 9 credits may be taken as an S/U option.

- a. A graduate assistant may not enroll for more than 15 credits each semester.
 - b. If a student needs to take deficiency courses as part of the 9 credits, then a memo from the advisor or department head should be submitted to the Graduate School. If approved, the student can register for 3 undergraduate credits and a minimum of 6 graded graduate credits during their first semester at New Mexico State University.
 - c. Enrollment during summer sessions is not required.
4. Students admitted to the Doctoral program (passed qualifying exam) must continue to enroll in three credits of graduate work each semester (exclusive of summer sessions) until the dissertation is approved by the Graduate School.
 5. In certain instances, deficiency courses may be required.
 6. Two semesters of ANSC 515(Graduate Seminar) are required and students are urged to attend seminar every semester that they are in residence.
 7. No more than 6 credits of ANSC 698 may apply toward graduation.
 8. The "Program of Study and Committee for Doctoral Students" form listing the graduate committee and courses to be taken, should be filed with the Graduate School after completion of 12 credits and after the qualifying exam, and before registering for additional courses.

Qualifying Examination

1. The Animal and Range Sciences Department may allow the M.S. Final examination to serve as a Ph.D. qualifying exam for students receiving an M.S. in Animal Science at NMSU. See "Guidelines for Graduate Studies" for further details.
2. Doctoral students must take a qualifying exam before completion of one semester of graduate work. The exam is scheduled by the student's advisor and administered by a provisional committee of at least 3 regular Animal Science faculty members in the student's area of concentration (reproductive physiology or ruminant nutrition). Its purpose is to evaluate the student's strengths and weaknesses, determine deficiency courses, and discuss a possible program of study (coursework).
3. After successful completion of this exam, a Doctoral Committee is appointed.

Doctoral Committee

1. The student's Doctoral Committee is selected by the student and the student's advisor, with approval of the Department Head and the Graduate Dean. The committee will consist of five or more members, as follows:
 - a. The committee chair (advisor) and at least two other members must be from the regular Animal Science faculty in the student's concentration area (reproductive physiology or ruminant nutrition).
 - b. One member must be from the Related Area.
 - c. One member from the Research Tool Area.
 - d. The member from the Related or Research Tool Area may serve as the Representative of the Graduate Dean.
2. Duties of the Doctoral Committee
 - a. Prepare and file a preliminary program of study with the Graduate Dean
 - b. Provide counsel for the student during the program
 - c. Attend the comprehensive oral examination and the final dissertation defense.

NOTE: Changes in committee membership must be approved by the Graduate Dean.

Applied Statistics - Doctor of Philosophy

The Applied Statistics doctoral program provides graduates with the knowledge of a range of applied statistical methods, both basic and advanced, sufficient to independently solve complex data problems in a collaborative research environment, to teach these methods at the undergraduate level, and to contribute substantively to the development of grant proposals and applied research publications.

Additional information regarding the Applied Statistics doctoral program is available at <https://business.nmsu.edu/academic-departments/easib/>.

Students entering the program with a bachelor's degree, or a master's degree in a field other than statistics, will need to complete a total of 70 credit hours – 52 credit hours of coursework and 18 credit hours of dissertation research.

As part of the required 52 credit hours of coursework, students must complete 12 credit hours of A ST electives at the 500 level or higher. Students may concentrate on a substantive area in economics, marketing, finance, or information systems by choosing quantitative electives from that area. The student's committee will determine whether these courses are acceptable substitutes for A ST electives.

Students must complete at least 18 credit hours of dissertation research. The dissertation is expected to consist of three chapters that are standalone manuscripts that may be submitted to applied journals. Additional chapters in the dissertation may provide background of the problem, literature review, and simulations to support the main topic of research. Deviation from this format will be allowed at the discretion of the student's advisor.

Students entering the program with a master's degree in statistics or biostatistics will need to complete a minimum of 36 credit hours – 18 credit hours of coursework (including 12 credits at the 600 level or higher) and 18 credit hours of dissertation research. Additional coursework may be necessary to make up for deficiencies in the student's prior master's degree.

Students will be required to pass a written qualifying exam after completing at least 12 credit hours of A ST courses at the 500 level or above, typically at the end of their first year in the doctoral program. Students who enter with a master's degree in statistics or biostatistics may elect to take the qualifying exam earlier. The exam will cover the first year of required theory and methods coursework. The exam will be assigned one of three grades: PhD pass, which enables the student to continue in the second year of the doctoral program; Master's pass, indicating that the student has the requisite knowledge for the master's degree in Applied Statistics but has deficiencies that prevent them from continuing in the doctoral program; and fail. Doctoral students who fail the exam or receive a Master's pass on their first attempt will be allowed one opportunity to re-take the exam. Upon completion of their coursework (typically at the end of their third year), students in the doctoral program will be required to pass a comprehensive exam that has both oral and written components. Students who do not pass the comprehensive exam on their first attempt will be allowed a second opportunity to take the exam after a lapse of at least one semester.

Astronomy - Doctor of Philosophy

The Astronomy Department at NMSU offers programs leading to the Master of Science and the Doctor of Philosophy degrees. Graduate courses (http://astronomy.nmsu.edu/?page_id=2503) cover topics across all of astrophysics, including stellar atmospheres, observational techniques, the interstellar medium, galactic structure, extragalactic objects, cosmology, the Sun, and planets. Students may also take courses in other relevant fields to broaden their knowledge and capabilities. NOTE: This table is only a minimum. As students must register for minimum 9 credits per semester to remain full time, a student will usually obtain more than the minimum 6 credits of ASTR600 and 18 credits of ASTR700 in order to complete their thesis.

Requirements

In order to complete the comprehensive exam by preparing a PhD proposal.

The student will normally submit their proposed thesis title, and then complete their written and oral thesis proposal, as the final part of their comprehensive exam in Year 3. The following table can be used to run a Degree Audit at this stage. Student must have already completed the written coursework comprehensive and oral coursework comprehensive components. After the completion of their comprehensive through passing the PhD proposal, the student will normally apply for and obtain a masters and continue with their progress on the PhD track.

Total Credits		46
----------------------	--	-----------

1

ASTR 500 Seminar is 1-credit course. It should be taken each of the first 4 semesters, for 4 total credits over the program

2

Any 27 credits (9 courses) selected from these. Each course may only be taken for 3 credits.

3

In addition to 9 courses from above, students should select another 2 courses (3 credits each, 6 credits total). This can be either another two astronomy graduate classes from above (which will make 11 total different astronomy courses) OR student may opt to take up to 2 out-of-department classes to fulfill the overall credit requirements if these classes are deemed by the student's committee to be appropriate to the student's program-of-study.

A maximum of one 3-credit course numbered between 450 and 499 can be applied to the out-of-department course/credit-hour requirement, and only with the approval of the student's Committee. Otherwise, out of department classes must be at the 500 or greater level.

If more than 6 credits of out-of-department classes are taken, they may potentially count toward the required total courses/credit hours, but only with the approval of the student's Committee.

Traditionally, these have been in the area of PHYS, E E and C S, as listed. Other Physics courses, or courses offered by other departments such as Engineering, Geology, or Math, are also viable as out-of-department courses. Additionally, for those students intending to specialize in planetary science, courses taught in the Geology department and Geophysics courses taught in the Physics department should be considered.

4

ASTR 598 Special Research Programs is generally taken in the student's 2nd year (fall or spring) and is intended to provide a semi-formal introduction to doing a research project. It may involve research that subsequently develops into a thesis project.

5

Generally, ASTR 600 Pre-dissertation Research credits are prior to completion of the thesis proposal. A student may take anywhere from 1-9 credits of these in a semester. Students typically take 9 credits of this course each semester until they have completed their thesis proposal. However, only a minimum of 6 are actually required over the program. ASTR600 credits may be in progress.

In order to complete a PhD thesis defense

The MINIMUM course and credit-hour requirements of the NMSU Department of Astronomy toward completion of the Ph.D. program are

⁴ ASTR 598 Special Research Programs is generally taken in the student's 2nd year (fall or spring) and is intended to provide a semi-formal introduction to doing a research project. It may involve research that subsequently develops into a thesis project.

⁵ Generally, ASTR 600 Pre-dissertation Research credits are prior to completion of the thesis proposal. A student may take anywhere from 1-9 credits of these in a semester. Students typically take 9 credits of this course each semester until they have completed their thesis proposal. However, only a minimum of 6 are actually required over the program.

⁶ Generally, ASTR 700 Doctoral Dissertation credits are taken after the thesis proposal is done. A student may take anywhere from 1-9 credits of these in a semester. Typically a student will do 9 credits of this per semester while completing their thesis research, in order to remain full time. However a student may register for fewer in their final semester of completing their thesis, after confirming with their advisor as to how that affects their eligibility at the graduate school. A minimum of 18 credits are required over the program

Year A A Suggested Plan of Study For Students

A typical roadmap for the PhD program, including course and credit-hour minimum requirements, towards completion of the Ph.D. program are summarized in the following table. Note there is some flexibility for each of these components, so students should confirm all their selections directly with their advisor. Most regular graduate courses (501-597, 601-699) are offered on a 2 year rotation. So specific courses will depend on whether a student is on a year A or Year B cycle. ASTR 503 Fundamentals of Astrophysics is offered each fall and should be taken by all students in their first year only. Students may opt for up to 2 courses (6 credits) from outside the department (See Course Requirements). ASTR 598 Special Research Programs, ASTR 600 Pre-dissertation Research and ASTR 700 Doctoral Dissertation are offered every semester, as one-on-one research credits with an advisor

Biology - Doctor of Philosophy

The Department of Biology offers graduate study leading to the Doctor of Philosophy degree. Our goal is to prepare students for careers in the various fields in biology through formal coursework and research experiences as well as through seminars and discussion groups.

There are three formal course requirements for Biology PhD students. These core courses are:

Prefix	Title	Credits
Course Requirements		
BIOL 510	Current Topics in Biology	3
BIOL 540	Science and Ethics	1-3
Dissertation		18
BIOL 700	Doctoral Dissertation	
Elective courses - courses with level from 450-600		24-26
At least 15 of the 48 credits should come from BIOL courses numbered 450 and above.		
Total Credits		48

Doctor of Philosophy students can choose among the Department's three areas of emphasis:

1. Behavioral, Ecological and Evolutionary Biology

The Behavioral, Ecological and Evolutionary Biology program is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that encompass the behavior, ecology, and evolution of living and extinct taxa.

2. Cell and Organismal Biology

The Cell and Organismal Biology program is appropriate for all Graduate students who wish to emphasize those areas of biology that integrate function and structure in cells, tissues, and organisms. This emphasis focuses in faculty areas of expertise in cell and molecular biology, neurobiology, developmental biology, and physiology.

3. Microbiology

The Microbiology curriculum is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that occur in microbes (bacteria, viruses, fungi, and protists) such as their physiology, ecology, development or evolution.

All graduate students should develop their curriculum plan in consultation with their faculty advisor and graduate committee. Details of sample course sequences within the different emphases are described in the Biology Graduate Handbook available for download from the Graduate Student section of the Biology website (<https://bio.nmsu.edu/students/grads.html>): <https://bio.nmsu.edu/students/grads.html>.

Graduate students may also earn a minor in other graduate departments and programs.

Business Administration (Management) - Doctor of Philosophy

Phone: (575) 646-1201

<http://business.nmsu.edu/academics/graduate-programs/mgt-phd/>
(<https://business.nmsu.edu/phd-management/>)

The College of Business offers a program leading to a PhD in Business Administration with a concentration in Management. Our program meets the requirements of AACSB international by providing students with advanced management-related theoretical, research and applied knowledge and skills. We are committed to educating researchers, teachers, and scholars who will lead and shape business and organizational life in the decades to come. We prepare you to understand the complexities of business and its social and international contexts while you develop a specialized area of expertise. Our program is flexible in order to align programs of study with job opportunities and students' interest areas. Research skills are developed through course work and mentoring relationships, as you will work with faculty to pursue joint research according to your interest and faculty members' expertise. Our faculty prepare students for academic research and teaching careers in managerial and organizational sciences; consulting careers with industrial, governmental, health, or educational institutions; or leadership careers in organizational management and administration.

Business Administration (Marketing) - Doctor of Philosophy

Phone: (575) 646-3341

<https://business.nmsu.edu/phd-marketing> (<https://business.nmsu.edu/phd-marketing/>)

The College offers a program leading to a Ph.D. degree. The faculty of the PhD Program in Business Administration is committed to training researchers and educators who will shape business scholarship, practice and pedagogy. The program emphasizes preparing candidates to understand the complexities of modern business while they develop a specialized area of expertise in marketing or management. The PhD in Business Administration provides graduates with the opportunity to pursue a variety of career paths within academia and within industry. Currently concentrations are offered in management and marketing, and each admits students independently.

Program Requirements

- demonstrate competency in statistics and research methods;
- complete studies in a major field of concentration chosen from the departments of management or marketing in the College of Business;
- complete studies in a minor field of concentration or interest area that supports the student's research, teaching and/or career goals;
- pass qualifying exams consisting of a First-Year Paper and a Second-Year Paper, and pass the comprehensive exam; and
- complete and successfully defend a doctoral dissertation.

Required Courses

Prefix	Title	Credits
Marketing Courses		
MKTG 601	Marketing Management	3
MKTG 620	Contemporary Marketing Readings	3
MKTG 625	Consumer Behavior	3
MKTG 640	Measurement and Structural Equation Modeling	3
MKTG 670	Marketing Theory	3
Management Courses		
Six (6) credits from the following:		6
MGMT 650	Seminar in Organizational Behavior	
MGMT 660	Research Design and Methodology	
MGMT 661	Qualitative Research Methods	
MGMT 670	Seminar in Operations Management	
MGMT 675	Seminar in Strategic Management (Seminar in Strategic Management)	
Research Methods Courses		
Choose one from the following:		3-4
A ST 505	Statistical Inference I (Recommended.)	
PSYC 507	Quantitative Methods in Psychology I (Requires Marketing Department approval.)	
A ST 506	Statistical Inference II (May be replaced by PSYC 508 with Marketing Department approval.)	3
A ST 507	Advanced Regression (May be replaced by PSYC 509 with Marketing Department approval.)	3
A ST 555	Applied Multivariate Analysis	3
PSYC 529	Methods in Social Psychology (May be replaced by a 500+ level course in research methods with Marketing Department approval.)	3
Dissertation Work		18
MKTG 700	Doctoral Dissertation	
Total Credits		54-55

Chemistry - Doctor of Philosophy

The Ph.D. in chemistry is offered in the major emphasis areas of analytical, inorganic, organic, and physical chemistry and biochemistry. The graduate program is designed to teach students modern approaches to chemistry and biochemistry (courses), experimental methods to problem-solving (research), and communication skills in the discipline (seminars and colloquia). Ph.D. candidates are required to complete the courses below, pass a qualifying exam after the first year, pass both a written and oral comprehensive exam before the fourth year, and prepare a written thesis and pass a final oral examination.

Prefix	Title	Credits
CHEM 475	Central Concepts in Chemistry - Safety	1
CHEM 476	Central Concepts in Chemistry - Research Ethics	1
CHEM 477	Central Concepts in Chemistry - Professional Development	1
CHEM 501	Central Concepts in Chemistry - Energy	3

Graduate student seminars		6-12
CHEM 510	Graduate Student Seminar ¹	
CHEM 520	Comprehensive Literature Review Seminar for Graduate Students ²	
Additional Required Courses ³		6-12
Research Credits ⁴		24-54
Total Credits		51-93

¹ Beginning in the second semester, all Ph.D. students must enroll in 1 credit of CHEM 510 Graduate Student Seminar, attending each semester. At least two credits of CHEM 510 must be taken for a letter grade of B- or better. The remaining CHEM 510 credits may be taken as S/U.

² CHEM 520 Comprehensive Literature Review Seminar for Graduate Students is given on a topic of the student's choice as part of the Comprehensive Exam and will be assigned a letter grade. A grade of C+ or lower will require the student to repeat the course a maximum of once.

³ Additional courses in subsequent years are chosen based on major emphasis area, through consultation with the thesis committee.

⁴ At least 18 credits must be either CHEM 700 Doctoral Dissertation or BCHE 700 Doctoral Dissertation. 700-level research credits are taken after the completion of the comprehensive exam. Remaining credits can be CHEM 600 Research or BCHE 600 Research.

Computer Science - Doctor of Philosophy

Doctoral students may specialize in any of the areas in which computer science faculty members have active research interests. Through interdisciplinary arrangements with other doctoral departments at New Mexico State University, doctoral students may also specialize in such areas as computational biology, computer networks and architectures and cognitive science.

Doctoral students are expected to join the program with a preparation equivalent to that required for the Master's degree in computer science at New Mexico State University. The requirements for the degree are as specified in the NMSU graduate catalog, with the following additional considerations:

- Take and pass the Ph.D. Qualifying Exam. It is expected that students will take the qualifying exam within one year of entering the Ph.D. program or one year after finishing their deficiencies. In the qualifying exam, a student is expected to present a written and oral synthesis of a topical literature review. For more details on the qualifying exam, see the departmental document.
- Students who are enrolled in the Computer Science MS program and complete a Master's thesis can use a successful thesis defense as

the qualification exam if the Master's thesis advisor is willing to take the student as a PhD student.

- The comprehensive examination evaluates depth of knowledge in the specific research area selected by the candidate with the consent of their graduate committee. It includes: a written part, in the form of an extensive survey paper; an annotated bibliography; and an oral examination.
- The student is required to submit and defend a prospectus, at the same time or after completing the comprehensive examination. The prospectus describes and motivates the specific research problem to be addressed in the doctoral dissertation.
- A PhD student is required to take at least one course each in the following three areas (theories, systems, and applications)

Graduation Requirements

Prefix	Title	Credits
Theories		
Select at least one from the following:		3
C S 510	Automata, Languages, Computability	
C S 570	Analysis of Algorithms	
C S 586	Algorithms in Systems Biology	
Systems		
Select at least one from the following:		3
C S 574	Operating Systems II	
C S 584	Computer Networks II	
C S 582	Database Management Systems II	
Applications		
Select at least one from the following:		3
C S 506	Computer Graphics I	
C S 508	Introduction to Data Mining	
C S 509	Bioinformatics Programming	
C S 513	Computer Security	
C S 514	Introduction to Smart Grids	
C S 515	Human-Centered Computing

C S 522	Cloud and Edge Computing	
C S 525	Introduction to Cryptography	
C S 532	Modern Web Technologies	
C S 533	Introduction to Deep Learning	
C S 534	Graph Data Mining	
C S 575	Artificial Intelligence II	
C S 581	Advanced Software Engineering	
Other		
Other graduate credit to meet NMSU requirements		21
Dissertation		18
C S 700	Doctoral Dissertation	
Total Credits		48

Only courses from the MS CS program from NMSU can be used to waive this requirement.

Students should contact the department for information on additional graduation requirements, or visit the on-line Graduate Handbook (<https://computerscience.nmsu.edu/>).

Counseling Psychology - Doctor of Philosophy

The CEP Department offers a doctoral program that leads to a Ph.D. in Counseling Psychology. The program is accredited by the American Psychological Association. For more information on this accreditation contact

The Office of Program Consultation and Accreditation
American Psychological Association
750 1st Street, NE
Washington, DC 20002
Phone: (202) 336-5979.

The program is based on the scientist-practitioner model through which both research and service delivery skills are acquired. Graduates of the program are prepared to conduct research, provide service, teach, and supervise. The program prepares students for licensure as psychologists (<http://psybook.asppb.org/>). The two aims of the program are:

1. To prepare entry-level counseling psychologists who are self-reflective and competent in both the practice and science of the profession.
2. To prepare counseling psychologists who think critically about the socio-cultural context of their work and promote social justice

Annual application deadline: December 15

For more information on program application requirements and process, see Counseling Psychology, Ph.D., program website (<https://cep.nmsu.edu/academic-programs/counseling-psych-phd/counseling-psychology-phd.html>).

Program Requirements

CEP faculty conduct periodic reviews of students' progress in the programs, including their academic performance, counseling and psycho-educational skills, professionalism and ethics. Deficits identified through faculty reviews may result in recommendations that students engage in remedial work or that they pursue alternative career goals.

Curriculum and Instruction - Doctor of Philosophy

The Doctorate of Philosophy (PhD) are rigorous degrees requiring an intellectual and personal commitment. The academic course of study for both degrees is the same. The PhD doctoral program requires students to demonstrate competency in the computer tools or second language sequence. (See below in program descriptions). For the PhD program 66 credit hours is only the minimum and students may be asked to complete additional hours as per their advisor and committee recommendations.

The degree require a dissertation based on original research, inextricably grounded with an array of primary and secondary sources. The degree has required courses of study, but are additionally individualized based on those scholarly and academic expectations set by the doctoral student in collaboration with their Dissertation Committee.

Options and Concentration

Currently there are four Options and one concentration for the Doctoral Program of the Department of Curriculum & Instruction. These are:

Options:

1. Bilingual/TESOL
2. Critical Pedagogies
3. Early Childhood Education
4. Language, Literacy & Culture

Concentration:

1. Educational Learning Technologies

To Apply

- Apply to the NMSU Graduate School (<https://tpal.nmsu.edu/degree-programs/doctoral-programs/ci-doctoral-program.html>) (Select Intended major "Curriculum and Instruction" and then concentration you will pursue);
- Apply to C&I by submitting your Application Portfolio by December 15th (via the Graduate School Application portal)
 - See the sections, "Applying to the Doctoral Program," "Doctoral Intake Application Instructions" and the "C&I Doctoral Student Checklist" in the Doctoral Handbook (https://tpal.nmsu.edu/_files/documents/CI_Doc_Handbook_Campus_22.pdf).
 - NMSU Doc Portfolio Example – C&I (https://tpal.nmsu.edu/student-forms-handbooks%20students_forms_and_handbook.html) (If the Sample portfolio does not open automatically, try a different browser or try saving the portfolio to your desktop before opening it.)

NOTE: Potential students who have written successful portfolios will be invited to interview with the Doctoral Qualifying Committee (a committee of C&I faculty)

Once Applicants Are Accepted

- Attend the applicable Doctoral Orientation Meeting your first semester of classes
- Meet with your Interim Advisor during your first semester of classes
- Get to know our faculty (<https://tpal.nmsu.edu/faculty-directory/>)
- Read the Doctoral Handbook (https://tpal.nmsu.edu/_files/documents/CI_Doc_Handbook_Campus_22.pdf) and the sections of the NMSU Graduate Catalog that apply to you (this is your responsibility)
- Follow the Doctoral Program Checklist from the C&I Doctoral Handbook (https://tpal.nmsu.edu/_files/documents/CI_Doc_Handbook_Campus_22.pdf)

Economic Development - Doctor of Economic Development

The Doctor of Economic Development (DED) is a professional doctorate designed to provide advanced training for economic development professionals.

The Doctor of Economic Development (DED) is designed to prepare students to be professionals in the area of economic development. To receive a DED, students must successfully complete 42 ECDV credits. Successfully passing 2 comprehensive exams (offered twice each summer) is required to register for ECDV courses. The five courses covered by the two exams represent 15 credit hours of course work, which the student may complete at another program or at NMSU.

DED minimum admission requirements:

All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy, and in addition the following:

- Bachelor's degree or equivalent
- Minimum undergraduate GPA: 3.0/4.0
- GRE or GMAT score is recommended (not required)
- Completion of one undergraduate courses in intermediate microeconomic (ECON 311 Intermediate Macroeconomic Theory or equivalent) and intermediate macroeconomic (ECON 312

Intermediate Microeconomic Theory or equivalent) both with grades of B or better

- Completion of one course in college-level calculus (MATH 1430G Applications of Calculus I or equivalent) and one course in statistics including regression analysis (ECON 405 Introductory Econometrics or equivalent), with grades of B or better in both courses
- Additional coursework in matrix algebra is recommended
- One course in mathematical economics ECON 457 Mathematical Economics or equivalent), with a grade of B or better
- International students must meet graduate school admission requirements for English proficiency

In addition, all applicants must successfully pass Comprehensive Exams covering the "Microeconomic Core" and the "Macroeconomic and Econometric Core" before taking upper level ECDV courses. The Microeconomic Core exam covers advanced microeconomic theory (AEEC 5120 Microeconomic Theory and AEEC 5997 Individual Study). The Macroeconomic and Econometric Core covers advanced macroeconomic theory (AEEC 5130 Macroeconomic Theory), and econometrics (AEEC 5240 Econometrics and ECON 545 Econometrics II). Students who have not passed all of these "core" courses with a grade of B or better, or feel the need to study the material further, may take the courses, along with ECON 457 Mathematical Economics during the fall and spring semesters of their first year in the program.

- Comprehensive Exam I covers the "Microeconomics Core": AEEC 5120, AEEC 5997
- Comprehensive Exam II covers the "Macroeconomics and Econometrics Core": AEEC 5130 Macroeconomic Theory, AEEC 5240 Econometrics and ECON 545 Econometrics II)
- Students who fail a comprehensive exam may apply to take the exam a second time. Only under special circumstances are students allowed to take a comprehensive exam a third time

Prefix	Title	Credits
All students in the DED program must successfully complete the following:		42
ECDV 550	Introduction to Local and Regional Development	
ECDV 661	Regional Economic Modeling	
ECDV 664	Population Economics	
ECDV 668	Economic Development Finance	
ECDV 671	Sustainable Economic Development	
ECDV 681	Urban Economic Development	
ECDV 682	Rural Development	
ECDV 683	Seminar in National Economic Development	
ECDV 692	Seminar in Economic Development	
ECDV 694	Internship	
ECDV 699	Doctoral Project	
Total Credits		42

Teaching and research assistantships are available to qualified applicants, however, admission to the program does not imply or guarantee funding.

Detailed and updated information is available at <https://business.nmsu.edu/ded> (<https://business.nmsu.edu/ded/>).

Suggested Plan of Study

This plan of study includes the "core" courses a student has not already completed these with a B or better.

First Year		Credits
Fall		
ECON 457	Mathematical Economics	3
AEEC 5120	Microeconomic Theory	3
AEEC 5240	Econometrics	3
Credits		9
Spring		
AEEC 5130	Macroeconomic Theory	3

Educational Leadership & Administration (Higher Education Administration) - Doctor of Education Educational Leadership Doctoral Program (ELDP)

The Doctor of Education is geared toward those students wishing to pursue a degree which will help them in their profession. Coursework, internships, and research are constructed to develop individuals for administrative position in Pk-12 schools in post secondary institutions.

For More Information

Please do not hesitate to contact the School of TPAL if you have any questions related to ELDP. Feel free to send an e-mail to eldpquestions@nmsu.edu

Engineering (Chemical Engineering) - Doctor of Philosophy

The program of study leading to the Ph.D. is available to students who have either a BS or MS in chemical engineering. Students with a BS must

complete 30 course credits and 24 dissertation credits, for a total of 54 credits, including:

- required core CHME courses (14 credits);
- graduate elective courses (12 credits);
- CHME elective courses (3 credits);
- independent research as CHME 698 Ph.D. Research prior to completion of the comprehensive exam (6 credits);
- dissertation as CHME 700 after completion of the comprehensive exam (18 credits); and
- graduate seminar as CHME 690 Graduate Seminar (1 credit).

Ph.D. students must pass:

1. a qualifying examination within 24 months of starting their Ph.D. studies;
2. a comprehensive examination completed a minimum of nine months prior to the dissertation defense; and
3. an oral defense of the written dissertation before the dissertation committee.
4. PhD candidates in the College of Engineering, who have successfully completed their PhD Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Prefix	Title	Credits
Required Core Courses		
CHME 501	Graduate Thermodynamics for Chemical Engineers	3
CHME 506	Graduate Transport Phenomena(s)	3
CHME 516	Graduate Numerical Methods in Chemical Engineering	3
CHME 542	Graduate Reactor Analysis and Design (s)	3
CHME 594	Professional Communication in Chemical Engineering	2

Engineering (Civil Engineering) - Doctor of Philosophy

In support of the mission and vision statements for the graduate program, the Civil Engineering Department adopts the following goals for the Doctor of Philosophy (Ph.D.) degree:

1. Prepare students to develop and conduct fundamental and applied research to generate innovative and original solutions for civil engineering problems.
2. Prepare students for research-based professional careers or academic careers in the civil engineering discipline.
3. Develop a culture of research/teaching scholarship among students.

Students may specialize in environmental, geotechnical, structural, transportation, or water resources engineering. Further information related to the Ph.D. degree may be found under the Academic Programs of Study (p. 31) section of the catalog.

Requirements

The Ph.D. program in Civil Engineering is open to students with a master's degree. Exceptionally well qualified students may petition for direct entry to the Ph.D. program without first obtaining a master's degree. The program of study requires a minimum of 36 graduate credits beyond the master's, including at least 18 credits of dissertation work.

Option 1 - Ph.D. with Completed Master's Degree

If the student has both bachelor's and master's degrees in fields that are not closely related to Civil Engineering, they must complete any undergraduate and graduate coursework deficiencies identified by the faculty in their area of specialization. Deficiencies may be identified upon admission, based on the student's performance on the qualifying exam, or both. Beyond completion of any deficiency coursework, the following requirements must be met:

Prefix	Title	Credits
	Pass Qualifying Exam	
	Graduate Electives (beyond master's degree, or equivalent thereof) ¹	18
	Pass Comprehensive Exam	
C E 700	Doctoral Dissertation	18
	Complete and Defend Doctoral Dissertation	

¹ Graduate course work credits from the following prefixes are permitted for the Ph.D. degree. If a graduate course outside this list of prefixes logically fits into the Ph.D. program, see your graduate advisor about requesting an exception.

Prefixes: ENVS, GENE, SOIL, BIOL, CS, CHEM, GEOG, GEOL, GPHY, MATH, MOLB, PHYS, STAT, A E, CE, CHME, EE, IE, ME

Option 2 - Direct Ph.D. with BSCE or Equivalent, but no Master's Degree

If the student has the equivalent of a BSCE degree, but no master's degree, they must fulfil the following requirements:

Prefix	Title	Credits
	Area of Specialization (beyond the bachelor's degree, 450 or higher) ¹	18
	Pass Qualifying Exam	
	Graduate Electives (beyond master's degree, or equivalent thereof) ²	18
	Pass Comprehensive Exam	
C E 700	Doctoral Dissertation	18
	Complete and Defend Doctoral Dissertation	

¹ **Specialization Courses:**

Environmental: ENVE 456 Environmental Engineering Design, ENVE 550 Aquatic Chemistry, ENVE 551 Unit Processes/Operation of Water Treatment, ENVE 552 Unit Processes/Operation of Wastewater Treatment, ENVE 557 Surface Water Quality Modeling, ENVE 598 Special Research Programs

Geotechnical: C E 452 Geohydrology, C E 470 Design of Municipal and Hazardous Waste Landfills, C E 479 Pavement Analysis and Design, C E 485 Design of Earth Dams, C E 507 Design of Earth Retaining Structures, C E 508 Advanced Soil Behavior, C E 509 Deep Foundations, C E 579 Ground Improvement, C E 585 Slope Stability Analysis and Design

Structural: C E 454 Wood Design, C E 455 Masonry Design, C E 501 Advanced Mechanics of Materials, C E 510 Introduction to Nondestructive Testing, C E 515 Finite Element Methods, C E 544 Advanced Design of Steel Structures, C E 545 Advanced Concrete Design, C E 554 Wood Design, C E 555 Masonry Design, C E 571 Structural Dynamics

Transportation: C E 479 Pavement Analysis and Design C E 482 Hydraulic Structures, C E 501 Advanced Mechanics of Materials, C E 507 Design of Earth Retaining Structures, C E 509 Deep Foundations, C E 510 Introduction to Nondestructive Testing, C E 515 Finite Element Methods, C E 531 Open Channel Hydraulics, C E 544 Advanced Design of Steel Structures, C E 545 Advanced Concrete Design, C E 547 Bridge Engineering

Water Resources: A EN 459 Groundwater, Wells & Pumps, A EN 478 Irrigation and Drainage Engineering, C E 452 Geohydrology, C E 482 Hydraulic Structures, C E 483 Surface Water Hydrology, C E 485 Design of Earth Dams, C E 682 Topics in Hydrodynamics II, ENVE 557 Surface Water Quality Modeling, ENVE 630 Fate and Transport of Environmental Contaminants, GEOG 581 GIS Design, SOIL 652 Advanced Soil Physics

² **Included Prefixes:** Graduate course work credits from the following prefixes are permitted for the Ph.D. degree. If a graduate course outside this list of prefixes logically fits into the Ph.D. program, see your graduate advisor about requesting an exception. **Prefixes:** ENVS, GENE, SOIL, BIOL, CS, CHEM, GEOG, GEOL, GPHY, MATH, MOLB, PHYS, STAT, A E, CE, CHME, EE, IE, ME

Additional Requirements

Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Engineering (Electrical Engineering) - Doctor of Philosophy

Requirements for Ph.D. Degree

The Program Educational Objectives for the Doctorate in Electrical Engineering are:

1. That graduates obtain relevant, productive employment performing research in academia, government or industry, and/or are teaching at institutions of higher education.

2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

The Ph.D. program is open to students with a master's degree. Exceptionally well qualified students may petition for direct entry to the Ph.D. program without first obtaining a master's degree.

At the discretion of the advisor, students may complete some or all degree requirements remotely, e.g., by registering in the online sections for courses.

Note—the following degree requirement tables outline the **minimum** requirements for a Ph.D. in Electrical Engineering. As many students must register for a minimum of 9 credits each semester to remain full time, a student will often take more than the minimum of 18 credits of E E 700 Doctoral Dissertation to complete their degree. Furthermore, as students are not eligible for enrollment in E E 700 until they have passed the Ph.D. Qualifying Exam, a student will often take more than the maximum of 6 or 9 hours of E E 600 Doctoral Research.

Option 1 - Ph.D. with Completed Master's Degree

If the student has both master's and bachelor's degrees in fields other than electrical engineering, they must complete undergraduate deficiency coursework, consisting of completion of the BSEE core courses. If the student has a master's degree in a field other than electrical engineering, they must complete graduate deficiency coursework, which consists of three graduate core courses from three different areas of emphasis (see MSEE program of study for more details).

Prefix	Title	Credits
Pass Qualifying Exam ^{1,2}		
Graduate Electives (credits beyond the master's degree) ³		18
Pass Comprehensive Exam ⁴		
Doctoral Dissertation		
E E 700	Doctoral Dissertation ²	
Complete and defend doctoral dissertation ⁵		
Total Credits		32

¹ It is expected that students will take the qualifying exam within one year of their master's or entering the Ph.D. program. The qualifying exam consists of two components: completing the graduate core (see MSEE program of study for details) with a grade of B or better and presenting a written and oral summary of a topical literature review.

For more details on the qualifying exam, see <https://ece.nmsu.edu/grad-study/phd-qualifying.html>.

² A student may not enroll in E E 700 Doctoral Dissertation until they have passed the qualifying exam.

³ E E courses must be numbered 500 or higher. Non-E E courses must be numbered 450 or higher. At least 9 credits must be taken in E E. At most 6 credits may be E E 600 Doctoral Research. At most 6 credits may be E E 590 Selected Topics courses that are not subtitled. Exclude credits of E E 700 Doctoral Dissertation. Exclude credits for graduate deficiency coursework if master's degree is not E E. Exclude coursework used to satisfy the master's degree requirements. Courses excluded from the MSEE and MEEE degrees are also excluded from the Ph.D. degree.

⁴ The candidate must pass a comprehensive examination after the completion of adequate coursework and demonstration of satisfactory progress toward the doctoral dissertation. The examination must be part written and part oral. The specific format of the exam is at the discretion of the examination committee. The written part must

include a proposal for the dissertation research, and if the committee requires, it may also include a separate written exam. The written report on the proposal for the dissertation research must include the candidate's current research, planned research directions, and a reasonable timeline for completing the candidate's proposed research. The oral part may also include questions on completed coursework.

⁵ The dissertation must be completed and orally defended. Additionally, evidence must be submitted for a minimum of two publications related to the dissertation research, including one of which is submitted to an internationally recognized journal, such as IEEE Transactions, and the second of which may be with a professional conference, such as an IEEE conference. Submissions must be completed prior to the final oral exam. For more details on the publication requirement, see <https://ece.nmsu.edu/grad-study/phd-requirements.html>.

Other limitations and requirements that apply to all Ph.D. degrees are described elsewhere in this catalog.

Option 2 - Direct Ph.D. with BSEE or Equivalent, but no Master's Degree

Engineering (Industrial Engineering) - Doctor of Philosophy

The Department of Industrial Engineering offers a Doctor of Philosophy (Ph.D.) in Engineering with a specialization in Industrial Engineering.

The program of study leading to the Ph.D. degree must include a minimum of 30 graduate credits (credits beyond plus 18 dissertation (I E 700) credits). Your program must also include 12 credits in related areas at the 500 level that are appropriate to your research. Typical areas include statistics, electrical engineering, mathematics, or mechanical engineering. You may not transfer in credits from your master's degree to meet this requirement. Refer to <http://ie.nmsu.edu> for a program description and current research areas.

Time Line for a Ph.D. Program

Individual programs vary, however, you can expect to spend three to five years (mostly full-time) earning your degree. Below are the key milestones of every program:

Admittance to the program and begin coursework: In coordination with your academic advisor, select 500-level courses to help you prepare for the Qualifying Exam. This would include IE topics on the general part of the exam, as well as topics related to your intended research.

Pass the qualifying examination: It is expected that students will take the qualifying examination within one year of their entering the Ph.D. program. Details regarding the examination may be obtained from the department office. If you do not pass the examination on your first attempt, you may be allowed, based on the recommendation of the faculty, to take the exam again the next time it is offered. If you do not pass the examination on your second attempt, you will be dropped from the Ph.D. program.

Form your committee and prepare a research proposal: During this time, you are expected to be a full-time student. The Graduate School requires at least one academic year of residency as defined in the Graduate Catalog. You should take at least six credits of I E 600-level courses. At this time, you should expect to file your *Program of Study* with the Graduate School.

Pass the comprehensive examination: The comprehensive examination consists of two parts: a written and oral presentation of your research proposal. You must pass the examination within 24 months of passing the qualifying examination. You may not take 700-level courses until you have passed both parts of your comprehensive examination.

Conduct research, write the dissertation, and pass the final examination: During this time your advisor and committee guide your work. During this time, you are enrolled in I E 700 courses. Your program must include a minimum of 18 credits of I E 700 Doctoral Dissertation. There is a minimum time span of one year between the comprehensive examination and the final oral examination (e.g., the dissertation defense). If more than five years have passed since you passed the

comprehensive examination, you may be required to pass another comprehensive examination.

Prefix	Title	Credits
Pass Qualifying Exam		
Graduate Electives (credits beyond the master's degree)		30
Pass Comprehensive Exam

Defend doctoral dissertation		
Total Credits		48

Ph.D. Qualifying Exam

1. Format

- Exam offered in two parts:
 - Foundations of IE, all day Thursday
 - IE Specific area exam: all day Friday.

2. Content

- IE Foundation Portion of the Exam** (all students will take an identical exam for the foundation portion). The Foundation portion consists of four areas:
 - Operations Research Deterministic and Stochastic
 - Probability and Statistics
 - Industrial Engineering Theory
 - Combination of questions from one or all of these four areas. Selection of Manufacturing, Engineering Economy, Process Improvement, Methods.
- IE Research Topics Portion of the Exam** (Each student taking the qualifier must select two of the topics listed below for testing at least 6 weeks before the exam is offered. The student will work with his or her advisor on selecting the topics. The advisor must submit the two selected areas to the Chair of the Examining Committee at least one month before the exam is offered.)
 - Manufacturing
 - Computer/Simulation Modeling
 - Stochastic Operations Research
 - Queuing Theory
 - Design Optimization (product, facility, process, etc.)
 - Algorithmic Optimization (Dynamic cases)
 - Quality Control
 - Systems Integration and Control
 - Facility Design and Layout
 - Reliability

Additional Requirements

Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifying Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for

the Web of Science. Alternatively, one conference paper accepted or published in national or international conference proceedings.

Engineering (Mechanical Engineering) - Doctor of Philosophy

Requirements for Ph.D. Degree

The student's academic program is not judged satisfactory unless it prepares the student to contribute to the advancement of knowledge in the field of Mechanical Engineering. The Degree of Doctor of Philosophy is indicative of distinguished achievement in the areas of scholarship and original research. Therefore, a dissertation of high quality is required of all doctoral students in Mechanical Engineering.

The Ph.D. program is open to students with a master's degree. Exceptionally well qualified students may petition for direct entry to the Ph.D. program without first obtaining a master's degree.

A student is required to have one refereed journal paper accepted and a second one accepted or in review by graduation. The Ph.D. dissertation can be a compilation and reformatted version of these published or accepted journal papers. Exceptions may be made on case by case basis by the Department Head.

Prefix	Title	Credits
	Pass Qualifying Exam ¹	
	Graduate Coursework (Credits beyond the Bachelor's Degree) ²	36
	Pass Comprehensive Exam ³	
	Doctoral Dissertation ⁴	24
M E 700	Doctoral Dissertation	
	Complete and Defend Doctoral Dissertation	
Total Credits		60

¹ It is expected that students will take the qualifying exam within one year of entering the Ph.D. program.

² At least 18 of graduate coursework must support the student's research. The program of study may include up to 6 credits of M E 510 (special topics courses offered formally on a one-time basis) with the approval of the Graduate Coordinator.

³ The candidate must pass a comprehensive examination after the completion of adequate coursework and demonstration of satisfactory progress toward the doctoral dissertation. The specific format of the exam is at the discretion of the examination committee. The candidate may submit the proposal for the dissertation research that includes the candidate's current research, planned research directions, and a reasonable timeline for completing the candidate's proposed research if the committee requires.

⁴ This may include a maximum of 6 credit hours of M E 600 (<https://catalogs.nmsu.edu/search/?P=M%20E%20600>) Doctoral Research. M E 600 (<https://catalogs.nmsu.edu/search/?P=M%20E%20600>) Doctoral Research is intended for those students who have not completed the qualification examination, a prerequisite for M E 700 (<https://catalogs.nmsu.edu/search/?P=M%20E%20700>) Doctoral Dissertation.

Admission Requirements

For PhD Program, the Mechanical and Aerospace Engineering department asks for the following documents: Transcript, Three Recommendation Letters, Statement of Purpose, Resume, Writing Sample, and GRE.

Also NMSU requires English Proficiency Tests such as TOEFL, IELTS, or Duolingo English Test for international students.

Ph.D. Program Transfer Credits

A student who has completed a Master of Science degree in M E, A E, or a closely related field may transfer up to 24 credits of graduate coursework, approved by the student's advisor, into a Ph.D. program of study.

Selection of Permanent Ph.D. Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester. The student must select a permanent advisor before registering for the second semester. In selecting a permanent advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of enrollment to discuss specific objectives. The student should use these meetings to become familiar with faculty research interests and research projects currently in progress. The faculty member must consent (in writing) to serve as the student's advisor.

Policies governing the Ph.D. written Qualifying Examination, the Ph.D. written and oral comprehensive examination, the student's Ph.D. committee, and the Ph.D. dissertation are contained in the department's Graduate Program website.

Additional Requirements

Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifying Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Experimental Psychology - Doctor of Philosophy

The Ph.D. in psychology is offered in the major areas of cognitive, engineering and social psychology. Ph.D. candidates are required to complete the following coursework and tasks:

Prefix	Title	Credits
Core Course: (corresponding to the student's area of study)		3
PSYC 524	Cognitive Psychology	
PSYC 527	Social Psychology	
PSYC 547	Engineering Psychology	
Quantitative/Computer Methods Sequence:		9
PSYC 507	Quantitative Methods in Psychology I	
PSYC 508	Quantitative Methods in Psychology II	
PSYC 510	Computer Methodology	
Content Courses:		9
PSYC 520	Learning	
PSYC 522	Sensation and Perception	
PSYC 540	History and Systems of Psychology	

Experimental Methods:

PSYC 523	Methods in Cognitive Psychology	6
PSYC 529	Methods in Social Psychology	
PSYC 550	Teaching of Psychology	
Comprehensive Examination: ¹		
Work related training requirement: ²		
Final Oral Examination: ³		
Dissertation:		18+
PSYC 700	Doctoral Dissertation	

¹ Pass written and oral components of the comprehensive exam

² Complete a work-related training requirement (i.e. complete an internship of at least 10 weeks duration, or teach at least one 3-credit undergraduate course independently. pre-teaching requirements listed here)

³ Pass a final oral examination that consists primarily of an evaluation of the dissertation and the candidate's defense of it, but may extend over the entire field of the candidate's study,

Students are encouraged to register for one credit of PSYC 590 Research Seminar in Psychology each semester.

Students should also enroll in at least one credit of the appropriate supervised research course each semester (i.e., PSYC 600 Doctoral Research, PSYC 698 Special Research Programs, or PSYC 700 Doctoral Dissertation.

When offered, PSYC 570 Special Topics may be considered content, quantitative methods, or experimental methods, depending on the specific course content.

Geography - Doctor of Philosophy

The New Mexico Doctoral Program in Geography is administered and delivered collaboratively by the Geography faculty at both New Mexico State University and The University of New Mexico. This program brings together two outstanding institutions and offers a unique opportunity for doctoral study in New Mexico's diverse and distinctive landscapes. The program offers advantages for students by merging two departments across the state and allowing students to have access to faculty and institutional resources on both campuses. The program is designed to build both theoretical and applied knowledge in geography, which enables students to pursue a wide range of career pathways.

The New Mexico Doctoral Program in Geography builds upon the strengths of the two departments by providing the education, training, and experience necessary for professional careers in higher education, private industry, and government. The program offers a rigorous, research-based degree that is focused on environmental change, dryland resource management, complex cultural landscapes, and the methods needed to understand them. During the program, students will learn qualitative and quantitative research methods, and how to use them in combination to create a mixed-methods approach to geographic research. Expertise in multiple methodologies requires intensive study, and applicants should carefully consider their preparation to enter a program that requires both qualitative and quantitative research proficiency.

Both campuses offer state-of-the-art technical facilities, and easy access to distinctive geographic features ranging from wilderness areas to urban centers, and the Rocky Mountains to the Chihuahuan Desert. Students reside in either Las Cruces (for NMSU) or Albuquerque (for UNM) -

depending on which institution is selected as the "home" university—but students will take classes on either campus, whether remotely or in-person.

On both campuses, graduate study in Geography has been characterized by a close, collegial working relationship between students and faculty and this singular program is delivered jointly at the two campuses, with collaborative participation from both faculties.

Students will travel to both campuses and experience field trips to other locations during the first-year sequence of core courses, thus gaining familiarity with two distinct communities and environments. Each student develops an individualized program of study in consultation with their dissertation committee. Individual requirements for each student are based on existing expertise and future career goals. Students will work with faculty advisors to develop a dissertation research project within the program's three specialty areas, using appropriate research methodologies. Being a joint doctoral program, all students must have faculty from both campuses on their dissertation committee.

The program builds on existing resources and strengths at the two universities, and the curriculum will evolve to adapt to ever-changing human-environment interactions and career needs within professional geography. The program's main regional foci are New Mexico and the broader Southwest region, the Mexico-U.S. borderlands, and Latin America.

The two geography departments have complementary strengths. Students will be based at the institution where the faculty can best support their research interests. The NMSU faculty specializes in applied geographic research and teaching, particularly in the fields of geographic information science, physical geography, cultural geography, and natural resource management. The UNM department specializes in basic research, and its faculty have particular expertise in geographic information science, political ecology, historical geography, health geography, and data science. To better understand research strengths within the program, please visit the admissions pages for the Ph.D. program and review the faculty pages in the department websites at:

- **NMSU** <https://geography.nmsu.edu/about-us/faculty.html>
- **UNM** <https://geography.unm.edu/people/faculty/index.html> (<https://geography.unm.edu/people/faculty/>).

The New Mexico Doctoral Program in Geography (NMDPG) is designed to train students in both basic and applied geographic research, with a topical focus on human-environment interactions.

This program is unique because it is a consortium between two universities. This means that policies of UNM'S Office of Graduate Studies and NMSU's Graduate School together establish the general requirements for the NMDPG, which also has program-specific requirements for all students.

There are three formal course requirements for all NMDPG students. These core courses are Geog 601, GEOG 602 and GEOG 603.

All students must complete:

- at least 48 credit hours of graduate coursework.
- at least 18 credit hours of graduate coursework after completion of the Master's degree.
- at least 24 credit hours of graduate coursework at the home university.

- at least 18 credit hours of graduate coursework in UNM or NMSU courses numbered 500 or above.
- at least 18 hours of dissertation credits, which are in addition to other coursework requirements (GEOG/GESP 699 at UNM, or GEOG/GESP 700 at NMSU).
- at least three hours of graduate credit in the semester in which the comprehensive examination is taken.
- at least one hour of graduate credit in the semester in which they complete degree requirements.

Health Equity Sciences - Doctor of Philosophy

Program Description

The doctoral program in Health Equity Sciences (HES) focuses on health disparities and equity from public health, population health, and community health perspectives. Underserved and marginalized groups experience health disparities attributable to economic, social, cultural, and environmental disadvantages at higher rates than other groups. The HES program provides advanced training to prepare graduates to become health equity researchers and to assume leadership positions in governmental (local, state, federal) and non-governmental agencies, public health and social justice organizations, health care organizations, and institutions of higher learning. Graduates will have the ability to conduct original research that addresses complex health problems, develop culturally competent community-based programs, and design and conduct program evaluations. They will be able to apply their expertise in research methodology, statistical analysis, and health communication in many settings, including rural, tribal, border, and other underserved communities. The focus of the program will be on research to address existing and emerging health disparities and health equity. Through a cooperative agreement with the University of New Mexico, students are provided with advanced comprehensive training to prepare them for positions of leadership in state, federal, and global governmental and non-governmental agencies, public health and social justice organizations, health care provider organizations, and institutions of higher learning.

Program Curriculum

NOTE: Students will participate in a mix of program-specific courses using the HES (i.e., Health Equity Sciences) prefix and graduate-level courses from across the NMSU campus and from UNM by cooperative arrangement/MOU. All HES courses will be at the doctoral level (6000 or 7000), including content offerings and research/dissertation hours; courses from across the NMSU campus will be graduate-level (5000 or higher).

Prefix	Title	Credits
Core courses (24 Credits)		
HESC 6110	Doctoral Seminar in Health Equity	3
HESC 6120	Quantitative Research Methods in Health Equity Sciences	3
HESC 6130	Seminar in Behavioral and Social Change for the Promotion of Health Equity	3
HESC 6250	Design and Evaluation of Programs to Promote Health Equity	3
	Qualitative Research Elective	3

CEPY 6410 Introduction to Qualitative Research ANTH 579 Qualitative Data Analysis and Interpretation SOCI 5157 Seminar in Qualitative Research Methods COMM 5140 Qualitative Research Methods in Communication		
HESC 6210	Advanced Multiple Regression for Health Equity Sciences	3
HESC 6220	Regression-Based Structural Equation Modeling for Health Equity Sciences	3
Statistics/Methods Elective (3 SCH; from a menu of HES and existing NMSU courses)		3
Tracks (12 hours)		
Select one four-course track: 1. Environmental & Occupational Health 2. Socio-Cultural & Behavioral Sciences 3. Health Across the Lifespan 4. Health Administration & Policy 5. Applied Biostatistics (shared NMSU & UNM)		
Track Elective Courses ¹		12
Completion of Preliminary Paper/Comprehensive Exam ²		
Research and dissertation courses (18 hours)		18
HESC 6991	Doctoral Research	
HESC 6997	Independent Study	
HESC 7000	Doctoral Dissertation	
Completion of Written dissertation and oral defense ³		
Total Credits		54

- ¹ Track Elective courses will be determined with the consultation of the student's advisor.
- ² Pass written and oral components of the preliminary paper/comprehensive exam
- ³ Pass written and oral components of the dissertation

Kinesiology - Doctor of Philosophy Coursework

The Ph.D. in Kinesiology requires a minimum of 36 credit hours of formal coursework (beyond a masters degree) and an expected 24 credit hours of research and dissertation work. Thus, the minimum expected credit hour accumulation is 61 credit hours.

At least 12 credit hours must come from graduate courses in the department of Kinesiology. NMSU's department of Kinesiology offers courses across a range of foundational knowledge areas in Kinesiology, including:

1. Relationships among physical activity, health, and quality of life
2. Scientific foundations for the study of physical activity and human movement
3. The social, cultural, and historical context of the study of physical activity
4. The practice of physical activity

A minimum of 12 credit hours must be taken in research methodologies, at least 3 credits of which must be in experimental statistics and at least 3 credits from a qualitative methods course(s). There are many options for these courses on the NMSU campus that will permit the student to meet this requirement.

The remaining 12 credit hours are taken at the direction of the student's advisor and committee and agreed upon at the time of the student's qualifying exam (see below).

Examinations

Students seeking the Doctor of Philosophy degree in Kinesiology must pass a (1) Qualifying Examination that must be completed before accumulating more than 24 credit hours towards their degree, a (2) Comprehensive Exam including written and/or oral elements that must be completed before beginning a final dissertation project, and a (3) Final Exam that includes the defense of their final dissertation study.

Dissertation

The candidate for the degree of Doctor in Philosophy in Kinesiology must complete a dissertation in a focused area of study. The student and their committee must agree upon the dissertation topic, and approval

of the dissertation requires the consent of the plurality of the student's committee members. The student must complete a minimum of 18 dissertation credit hours.

Graduate courses currently offered in the department of Kinesiology

Prefix	Title	Credits
SPMD 5310	Inferential Statistics in Sports and Exercise Science	3
SPMD 5350	Principles of Strength and Conditioning	3
SPMD 5410	Biomechanics	3
SPMD 5450	Exercise for Special Populations	3
SPMD 5510	Psychology of Sport	3
SPMD 5550	Skill Acquisition and Performance	3
SPMD 5575	Advanced Motor Development	3
SPMD 6310	The Social Construction of the Body	3
SPMD 6350	Advanced Exercise Physiology	3
SPMD 6410	Cardiovascular Physiology	3
SPMD 6450	Skeletal Muscle: Structure and Function	3
SPMD 6510	Designing Resistance Training Program	3
SPMD 6996	Special Topics	1-3
Research and Dissertation		24
SPMD 4997	Problems	
SPMD 6710	Project	
SPMD 6750	Kinesiology Research	
SPMD 7000	Doctoral Dissertation	
Total Credits		61-63

Mathematics - Doctor of Philosophy

Candidates for the Ph.D. degree in the Department of Mathematical Sciences must pass

- a qualifying examination,
- a basic comprehensive written examination,
- an advanced comprehensive examination with written and oral components, and
- a final oral doctoral thesis examination.

These are briefly described below. For more information, see the Graduate School requirements in this catalog.

Course Requirements

Prefix	Title	Credits
Core Requirements		
MATH 5450	Abstract Algebra II: Fields, Rings and Modules	3
MATH 5460	Measure and Integration	3
MATH 5463	Real Analysis	3
MATH 5465	Introduction to Functional Analysis	3

In addition to the core requirements, each student must complete one of the following two options.

Prefix	Title	Credits
Option 1		
Choose three course sequences from Group A, as described below.		
Option 2		
Choose two course sequences from Group B and one from Group A, as described below.		

Course Sequences

Group A

Prefix	Title	Credits
--------	-------	---------

Algebra: Choose two of the following.

MATH 5453	Module Theory and Homological Algebra	
MATH 5455	Introduction to Commutative Algebra and Algebraic Geometry	
MATH 5458	Topics in Algebra	

Foundations: Choose two of the following.

MATH 5430	Mathematical Structures in Logic	
MATH 5435	Universal Algebra and Model Theory	
MATH 5438	Topics in Foundations	

Topology: Choose two of the following.

MATH 5420	Topology I	
MATH 5425	Topology II	
MATH 5428	Topics in Topology	

Group B

Prefix	Title	Credits
--------	-------	---------

Differential Equations: Choose two of the following.

MATH 5440	Partial Differential Equations I	
MATH 5440	Partial Differential Equations I	
MATH 5468	Topics in Analysis	

Probability: Choose two from the following.

STAT 5310	Foundations of Probability	
STAT 5320	Advanced Topics in Stochastic Processes	
STAT 5348	Topics in Probability and Statistics	

Statistics: Choose two of the following.

STAT 5330	Continuous Multivariate Analysis	
STAT 5335	Linear Models	
STAT 5340	Advanced Theory of Statistics I	
STAT 5345	Advanced Theory of Statistics II	
STAT 5348	Topics in Probability and Statistics	

Additional Course Requirements

A full time graduate student is required to register each semester for at least two Math/Stat graduate courses. With the exception of the final semester, of these two, only one may be MATH 6991 Doctoral Research or MATH 7000 Doctoral Dissertation. Moreover, these two courses **must not** include:

Prefix	Title	Credits
MATH 5210	Complex Variables	3
MATH 5220	Fourier Series and Boundary Value Problems	3
MATH 5997	Directed Reading	1-6
MATH 5120	History and Theories of Mathematics Education	3
MATH 5130	Algebra with Connections	3
MATH 5140	From Number to Algebra	3
MATH 5150	Data Analysis with Applications	3
MATH 5160	From Measurement to Geometry	3
MATH 5170	Using Number Throughout the Curriculum	3
MATH 5180	Geometry with Connections	3
MATH 5999	Master's Thesis	1-15

Qualifying Examination

Every student admitted to the Ph.D. program must pass a written qualifying examination. Students who complete their mathematics

Master's degree at NMSU may request that the Master's written examination also fulfill the Ph.D. qualifying examination requirement. In all other cases, the student takes a written Ph.D. qualifying exam. This exam is identical to the Master's written exam (based on the courses 5350/5360) and is administered and graded at the same time, but a higher passing score is required than for a Master's student. Ph.D. candidates need to pass the exam within their first year.

Basic Comprehensive Examinations

Every Ph.D. student must pass a Basic Comprehensive Exam, either in Algebra or in Analysis. The Algebra exam is based on the courses MATH 5340 Abstract Algebra I: Groups and Rings and MATH 5450 Abstract Algebra II: Fields, Rings and Modules and the Analysis exam is based on the courses MATH 5365 Introduction to Real Analysis II and MATH 5460 Measure and Integration.

These exams are offered every August and January. A student choosing to take the exam in Algebra must pass the exam within fourteen months of completing Math 581; similarly, a student taking the exam in Analysis must pass the exam within fourteen months of completing MATH 5460. Students failing to pass the exams within this period of time may be removed from the program. Students will normally not be given more than two attempts at any one exam.

Advanced Comprehensive Examinations

Candidates for the Ph.D. must pass an advanced comprehensive examination in their chosen research area. The examination has a written and an oral component. The written exam, which is written and administered by the student's committee, is based on two of the student's courses, normally among those listed in Options 1-2, chosen by the student in consultation with his/her committee and approved by the Graduate Studies Committee. Full-time students should complete the written component of the Advanced Comprehensive Exam after passing the Basic Comprehensive Exam and in the first two years. Those who have not made substantial progress towards completion of their written exams at the start of the fifth semester may be removed from the program. Students who have not completed the written exams by the start of the sixth semester will normally have any departmental funding revoked. The student must take the oral part of the exam at the end of the semester after completing the advanced written comprehensive exam. For the oral exam, the student should present a proposed direction for thesis work.

Final Oral Exam

This is an exam over the student's thesis. It is administered by the student's thesis committee.

Molecular Biology - Doctor of Philosophy

MOLB 597	Laboratory Rotations/Research Discussions	1-3
Dissertation		18
MOLB 700	Doctoral Dissertation Research	
Total Credits		46-50

¹ PhD candidates must enroll for 18 credits MOLB 700 Doctoral Dissertation Research. May register for additional credits to maintain full-time status.

The Molecular Biology program also offers formal minors in molecular biology or bioinformatics.

Nursing Practice (Nurse Anesthesiology) - Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) degree concentration in Nurse Anesthesiology focuses on rural health and health disparities. Graduates will be qualified to take the national certification exam administered by the National Boards of Certification and Recertification of Nurse Anesthetists to become a certified registered nurse anesthetists (CRNA). In addition to the DNP core courses and nurse anesthesiology didactic course, CRNAs complete over 2000 hours of supervised clinical training. New Mexico's hospitals have a critical need for anesthesia providers throughout the state due to nation-wide shortages and difficulty recruiting providers, especially to rural healthcare centers. Without anesthesia providers, surgeries and some medical procedures cannot take place. And in all of the rural hospitals in new Mexico, CRNAs are the only anesthesia providers.

The Nurse Anesthesiology program has been developed to address this critical workforce need in the state. Qualified New Mexico applicants will be prioritized for admission.

For application information, visit the School of Nursing website (<https://schoolofnursing.nmsu.edu/>) or contact the Nursing Graduate Advisor for more information about application and admission requirements at (575) 646-7770.

Physics - Doctor of Philosophy

For the Ph.D. degree, students must also pass the doctoral comprehensive examination, carry out original research, complete a dissertation, and pass a final oral examination. They must also pass or transfer at least 36 credits in formal courses numbered above 500 in physics/geophysics, including 24 credits of core graduate courses, and complete at least 6 credits of formal courses numbered above 600. The total number of credits, including formal and informal course credits and a minimum of 18 dissertation credits, must be at least 72. Financial support is available to graduate students in physics through teaching and research assistantships and fellowships. Inquiries about these opportunities should be directed to the graduate program director.

Plant and Environmental Science - Doctor of Philosophy

This degree is designed to provide students with a comprehensive knowledge of agronomy, horticulture, environmental science, or soil science, and training in methods of research affiliated with these disciplines. Emphases in agronomy and horticulture include sustainable crop production, plant breeding and genetics (alfalfa, chile, cotton, onion, peanut), forestry, turf grass management, plant-pest/disease/weed interactions, soil-water-plant relations, plant growth/development/physiology. Emphasis in environmental and soil science include environmental quality and ecosystem services, bioremediation, recycling of organic wastes and wastewater, water-use efficiency, soil-plant relations, soil-geomorphology and desert ecology, and fertility, chemistry, physics, and microbiology of soils. Students will be well-prepared to succeed as lead scientists in commercial companies, educational institutions, governmental agencies, and private production enterprises. Candidates for this degree must successfully conduct original publishable research in one of the above areas. They must also complete a minimum of 30 graduate credits beyond the Master's Degree, or 60 credits beyond the Bachelor of Science degree, based on a program of study approved by the student's graduate committee.

Candidates for a Ph.D. degree in Plant and Environmental Sciences are expected to demonstrate (via course work and independent study) a thorough understanding and proficiency in their chosen major, and if applicable, a minor area. Courses numbered 450-499 are designed for senior undergraduates and graduate students; 500-599 are for graduate students working on a master's or doctoral degree; 6000-7000 are principally for students working on a doctoral degree. Qualifications for admission will be reviewed by the departmental graduate faculty.

Minimum Grade Point Average and Credit Hour Requirements: Your Doctorate degree requires a minimum of 30 completed degree hours beyond the Master's degree, or 60 degree hours beyond the Bachelor's degree, and a minimum GPA of 3.00 in all course work.

Degree residency requirement: 24 credits must be completed at NMSU.

Departmental Requirements: Selection of courses should be based on consultation with the student's graduate committee.

- Complete 2 credits of PLEN Seminar coursework: one credit each of AGRO 590 Graduate Seminar/HORT 590 Graduate Seminar/SOIL 590 Graduate Seminar and PLEN 6910 Doctoral Seminar.
- Complete 9 credits of course work numbered above 600: **exclusive** of PLEN 6991 Doctoral Research and PLEN 7000 Doctoral Dissertation credit.
- Complete at least 18 credits in PLEN 7000 Doctoral Dissertation after passing the comprehensive exam. A student may initially enroll in PLEN 7000 Doctoral Dissertation credits during the same semester that they take their comprehensive exam. However, this option is not recommended because if the student does not pass the exam, the 700-level credits will not count. Consequently, enrollment status,

assistantship eligibility, and resident tuition rate eligibility could be jeopardized.

- Complete sufficient credits numbered 450 or above to bring total graduate credits to a minimum of 30 beyond the Master's degree, or a minimum of 60 credits beyond the Bachelor's degree.
- Complete a Qualifying Examination during the first (recommended) or second semester of study.
- Complete a written and oral Comprehensive Examination of the student's field of study.
- Complete a written Doctoral Dissertation.
- Complete a final oral defense of the Doctoral Dissertation.
- Complete one of the following requirements, as approved by the doctoral committee:
 - A thorough knowledge of a language other than English
 - A reading ability in two foreign languages
 - Reading ability in one foreign language and proficiency with a research tool
 - Reading ability in one foreign language and one semester of supervised teaching experience
 - Proficiency with a research tool and one semester of supervised teaching
 - Two semesters of supervised teaching

Range Science - Doctor of Philosophy

A GPA of 3.0 or higher is required for admission. GRE exam is required. Prerequisite for admission as a regular graduate student in the department is the completion of a curriculum substantially equivalent to that required of undergraduate students. Therefore, deficiency courses may be required after admission to the program, as determined by the admissions committee and the student's graduate committee and advisor.

A minimum of 30 credits of graduate work plus 18 credits of dissertation (RGSC 700) are required to graduate. The Qualifying Exam will take place during the first semester of graduate work. Its purpose is to evaluate the student's strengths and weaknesses, determine deficiency courses, and discuss a possible program of study (coursework). The "Program of Study and Committee for Doctoral Students" form, listing the graduate committee and courses to be taken, should be filed with the Graduate School after completion of 12 credits and after the qualifying exam, and before registering for additional courses. The Comprehensive Exam is intended to test the knowledge of the major and minor fields of study. The student will be admitted to the exam after fulfilling the language/research tool requirement, after completion of adequate coursework (as determined by the department and the Graduate School), and when considered by the student's graduate committee to be adequately prepared. The exam is part written and part oral. The student is formally considered a candidate for the Ph.D. only after the successful completion of the comprehensive exam, the recommendation of the committee, and the approval of the graduate dean.

The research project must be approved by the student's graduate committee. The dissertation is expected to demonstrate the student's ability in independent investigation and to be a contribution to human knowledge. It shall display a mastery of the literature, present an organized, coherent development of ideas with a clear exposition of results, and provide a critical discussion of the student's conclusions.

Every effort should be made to publish the dissertation as scientific journal articles. Final Exam is concerned primarily with the research work of the student as embodied in the dissertation, but it may also extend over the entire field of study. It is entirely oral. The final exam will be advertised to the public one week prior to the exam.

Rhetoric and Professional Communication - Doctor of Philosophy

An MA is required for admission to the PhD program. Students in the doctoral program will develop individualized plans of study in consultation with advisors. Students are required to take

- 60 hours of graduate-level coursework including the doctoral proseminar in the first semester;
- courses in research methods;
- core courses in composition, professional and technical communication, and rhetoric;
- additional coursework in an area of specialization determined in consultation with an advisor;
- an internship; and
- a dissertation.

The Ph.D. also requires a qualifying portfolio, a comprehensive examination and an oral examination. The dissertation must be completed and approved within 5 years after the comprehensive exam. Consult the department for additional instructions regarding the internship, qualifying comprehensive examinations, portfolio and dissertation.

Prefix	Title	Credits
Program Requirements		
ENGL 610	Proseminar in Rhetoric and Professional Communication	3
ENGL 597	Internship in Technical and Professional Communication	3
ENGL 600	Doctoral Research	3-15
ENGL 700	Doctoral Dissertation	15
Methods Courses		
Select one from the following		
ENGL 548	Graduate Study in Empirical Research	
ENGL 601	Qualitative Research	
ENGL 604	Digital Research Methods	
Core Courses		
Select four from the following core courses:		
<i>Core Composition Courses (select one)</i>		
ENGL 664	History and Theory of Composition Studies	
ENGL 683	Critical Writing Studies	
<i>Core Professional and Technical Communication Courses (select one)</i>		
ENGL 502	Critical Conversations in Technical and Professional Communication	
ENGL 572	Technical-Professional Communication Pedagogies	
ENGL 643	Multimedia Theory and Production	
<i>Core Rhetoric Courses (select two)</i>		
ENGL 518	History of Rhetoric	

ENGL 519	Graduate Study in Modern Rhetorical Theory	
ENGL 668	Rhetoric and Cultural Studies	
Specialized Courses		
Select 21 credits in specialized area determined in consultation with an advisor. ²		21
Transfer Credits (18 credits)		18
Total Credits		78-90

¹ Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

² Students define their specialized area, a coherent set of related courses drawn from both inside and outside the Department of English, in consultation with their doctoral committee. Possible specializations include Border Rhetorics and Cultures; Writing Program Administration/Writing Center Administration; Assessment; Pedagogy; Literacy Studies; Identity and Political and Social Rhetoric; New Media Rhetoric and Design; Intercultural Rhetorics; Writing Across the Curriculum; Workplace Communication; and the Rhetoric of Science. Up to 6 hours may be taken outside of English.

Transfer Courses (18 credits)

In consultation with an advisor and the Doctoral Committee, courses taken at the Master's level can be used to waive specific area requirements in the PhD, but this will not reduce the minimum number of credits required.

Financial Support

Students are eligible for teaching assistantships and a variety of positions that involve writing around campus and the community. Because many students work full time, many courses are offered in the late afternoon and evening to accommodate various schedules.

Application Information

Please refer to the online application process described on the NMSU Admissions website for specific instructions for each program.

School Psychology - Doctor of Philosophy

The mission of the School Psychology doctoral program is to prepare school psychologists as scientists, practitioners and advocates for mental health and social justice in health service psychology settings, including public schools. The program addresses state and national shortages of personnel fully credentialed to serve the needs of children with disabilities. The primary goal of the school psychology program is to prepare scholars to become problem-solvers with the essential entry-level competencies to serve in the schools and agencies that serve school-age populations.

The program develops three major components: 1) *Knowledge of psychological and educational foundations*; 2) *Skills in data-based decision-making, assessment, consultation, intervention, and research*; and 3) *The capacity to apply knowledge and skills to promote mental health and development and prevent school failure and other disabling conditions*. Specifically, the program will accomplish the following goals.

1. Prepare and graduate highly qualified school psychologists to meet the academic and psychological needs of infants, toddlers, children,

youth, and their families from diverse backgrounds (i.e., high-need children with disabilities).

2. Increase the number of personnel who demonstrate the competencies needed to provide high-quality instruction, evidence-based interventions, and services for children with disabilities.
3. Retain scholars in a high quality-training program to increase the numbers of school psychologists including scholars from bilingual and traditionally underrepresented backgrounds.

Annual Application Deadline: January 15

For more information on program application requirements and process, see School Psychology, Ph.D. program website: <https://cep.nmsu.edu/academic-programs/school-psychology-phd.html>

Curriculum

Preparation occurs from a developmental sequence of courses that follow scientifically based research and empirically validated strategies. The school psychology program at NMSU adheres to the scientist-practitioner model. This integrated approach to scholarship and practice promotes development of interlocking skills fostering a career-long process of psychological investigation, assessment, and intervention. Throughout the curriculum, the importance of knowledge and experience with a wide range of individual differences including, but not limited to ethnicity, gender, disability, age, culture, sexual orientation, religion, and race are emphasized. Ethical and legal issues, which guide service delivery, are also stressed throughout the curriculum. The American Psychological Association (APA) and National Association of School Psychologists (NASP) Standards and competencies provide the foundation for the program's conceptual framework. Candidates will complete 81 credits of coursework, at least 450 clock-hours of practicum (9 total credits) and an 1800 clock-hour doctoral internship. Of the 1800 clock-hour internship, 750 will be expected to be in a school setting.

Program of Study

Prefix	Title	Credits
CEPY 5310	Appraisal of Psychoeducational Achievement in a Diverse Society	3

Transborder and Global Human Dynamics - Doctor of Philosophy

The Ph.D. program in Transborder and Global Human Dynamics is designed to provide doctoral students with a rigorous program of cultural, anthropological, political, historical, artistic, literary, and linguistic subject matter in the social sciences and humanities. At the heart of the endeavor is a program that fosters the study of the cultural pluralism and social, economic, political, linguistic, and creative interactions that emerge from and shape the diverse practices, interpretations, and reproduction of transnational borders. Such a program is ideally suited to forge new interpretations, solutions, and understandings of relevant issues for scholars and students living and studying in the US-Mexico transborder region, with implications not only for our border region, but also for other border communities around the world.

The program is based on the Cambridge-Oxford collaborative research and instruction model. The program curriculum closely follows the NMSU Graduate School's requirements and timelines for admission, doctoral committee formation, and comprehensive and qualifying examinations. The program has limited residency requirements, since doctoral students will perform research in the field, but come together to participate in colloquia at NMSU. The program centers on a set of common courses and colloquia exploring theory, methods, and mixed methods of quantitative and qualitative analysis, and six interdisciplinary research concentrations. Credits for fieldwork, archival work, and community engagement may involve transborder internships and experiences at universities, policy institutes, archives, and think tanks supervised by the student's committee.

Interdisciplinary Focus Areas:

- Cultural and linguistic translation, interpretation, literature, and heritage
- Refugees, asylum-seekers and migration
- Transnational public policy and human rights
- Environmental justice, landscape, archaeology, and heritage management

- Food security, water and energy security, human health, and sustainability
- Power, inequality, and racial justice

Sponsoring departments include Anthropology, Government, and Languages and Linguistics. Related, affiliated, and sponsoring departments and programs also include English, Gender and Sexuality Studies, Geography and Environmental Studies, History, Borderlands and Ethnic Studies, and Sociology.

Prefix	Title	Credits
<i>Core Requirements (With colloquium)</i>		6
TBGD 5110	Introduction to Transborder and Global Human Dynamics (co-taught modules)	
TBGD 6991	Research Design in Transborder and Global Human Dynamics (Individualized study with committee and colloquium)	
<i>Methods: select two courses (with colloquium)²</i>		6
ANTH 520	Ethnographic Field Methods	
ANTH 522	Archaeological Field School	
BEST 511	Decolonial Research Methodologies I ⁵	
GEOG 583	Field Explorations in Geography	
GEOG 602	Integrative Research Design	
GNDR 555	Advanced Feminist Research Methodologies	
HIST 598	Craft of History: Historical Theories, Methods, and Criticism (f)	
POLS 502	Research Methods in Government	
SPAN 500	Methods of Research and Literary Criticism	
SPAN 580	Research Methodology in Spanish Linguistics	
<i>Analysis: select two courses (with colloquium)</i>		6-7
ANTH 512	Quantitative Analytical Methods in Anthropology	
ANTH 579	Qualitative Data Analysis and Interpretation	
GEOG 578	Fundamentals of GIS	
GEOG 585	Spatial Analysis and Modeling	
POLS 503	Qualitative Research Methods	
POLS 544	Public Policy Analysis	
SPAN 590	Advanced Special Topics (La Nueva Frontera: Critical Analysis of Border Theory & Cultural Identities)	
SPAN 595	Advanced Topics in Applied Spanish Linguistics (Strategies for Teaching Spanish for Heritage/ Native Speakers)	
<i>Field work and data collection: Select 6 credits in consultation with committee, with colloquium)</i>		6
TBGD 6998	Fieldwork and Community Engagement in Transborder and Global Human Dynamics ³	
Focus Areas: Select 12 credits each from at least two areas⁴		24
<i>Cultural and linguistic translation, interpretation, literature and heritage</i>		
ANTH 544	Native American Visual Culture	
ENGL 536	The Borderlands Writing Project	
ENGL 589	Cultural Studies: Literature and Theory (Borderlands Representations)	
GNDR/ENGL 582	Gender and Popular Culture	
HIST 511	Making the American West	
SPAN 521	Advanced Culture and Literature of New Mexico	
SPAN 551	Advanced Hispanic Cultures	
SPAN 558	Bilingualism	
<i>Refugess, asylum seekers, and migration</i>		

GNDR 554	Advanced Issues in Women Crossing Borders	
POLS 563	Issues in International Relations	
POLS 578	Seminar in the U.S.-Mexican Border	
SOCI 5430	Seminar in International Migration	
<i>Transnational public policy and human rights</i>		
GNDR 502	Advanced Transnational Feminisms	
HIST 590	Reading Seminar: Borders, Boundaries and Frontiers	
POLS 536	Public Policy and Indigenous Communities	
POLS 579	Seminar in Mexican Politics	
SOCI 5440	Seminar in Sociological Perspectives on the U.S.-Mexico Border	
<i>Environmental justice, landscape, archaeology, and heritage management</i>		
ANTH 516	Advanced Archaeology of Ancient Southwest	
ANTH 518	Advanced Historical Archaeology	
ANTH 540	Cultural Resource Management	
ANTH 545	Advanced Museology	
GEOG 555	Southwest Environments	
GEOG 598	Selected Topics (Geohumanities)	
HIST 583	Advanced Historic Preservation	
HIST 586	Interpreting Historic Places for the Public	
<i>Food security, water security, human health, and sustainability</i>		
ANTH 586	Advanced Community Engagement and Service Learning	
ANTH 546	Advanced Contemporary Medical Anthropology	
ANTH 538	Plants, Culture, and Sustainable Development	
ANTH 535	Adv. Human Health and Biological Variation	
<i>Power, inequality, and racial justice</i>		
ANTH 541/ BEST 511	Advanced Indigenizing Methodologies in Native American Studies	
ANTH 553	Native American Women	
BEST 510	Foundations in Borderlands & Ethnic Studies ⁵	
BEST 512	Theories in Borderlands and Ethnic Studies ⁵	
BEST 513	Capstone in Borderlands and Ethnic Studies ⁵	
CJUS 514	Advanced Race, Crime, and Justice	
CJUS 528	Advanced Mexican-Americans and Issues of Social Justice	
<i>Dissertation (18 credits)</i>		18
TBGD 7000	Dissertation	
Total Credits		66-67

¹ Student must satisfy all other requirements for the PhD as laid out in the Academic Regulations (<https://catalogs.nmsu.edu/nmsu/regulations-policies/#academicprogramsstudytext>) section of the NMSU catalog

² Two separate methods courses are recommended, if a student elects to take GEOG 578 Fundamentals of GIS for 6 credits they should consult with their advisor first.

³ TBGD 6998 Fieldwork and Community Engagement in Transborder and Global Human Dynamics may be substituted by field work, archival work, community consultation, or internship under an affiliated prefix, numbered 500 or above, approved by the student's committee

⁴ Courses listed are representative for each focus area. Other courses may be used to satisfy a focus area as approved by the student's committee.

⁵ This course supports the Borderlands and Ethnic Studies graduate certificate

This roadmap assumes prospective students have entered the PhD program with 30 credits from a completed Master's program (Years 1 and 2) that may be used to satisfy different requirements, and that graduate students pursue the degree full time, taking 9 credit hours per semester. Each student will work out a plan of study with their committee during the first semester in the program.

First Year		Credits
Master's degree credit transfer courses ¹		18
Credits		18
Second Year		
Master's degree credit transfer courses ¹		3-4
Credits		3-4
Third Year		
Fall		
TBGD 5110	Introduction to Transborder and Global Human Dynamics	3
Methods Course ²		3
Choose one from the following:		3
Analysis Course ³		
Focus Area Course ⁴		
Required Benchmarks ⁵		
Credits		9
Spring		
TBGD 6991	Research Design in Transborder and Global Human Dynamics	3
Methods Course ²		3
Choose one from the following:		3
Analysis Course ³		
Focus Area Course ⁴		
Required Benchmarks ⁶		
Credits		9
Fourth Year		
Fall and Spring Terms		
Choose one from the following:		3
TBGD 6998	Fieldwork and Community Engagement in Transborder and Global Human Dynamics	
or		
Additional course for 3 credits (recommended by committee)		
Focus Area Course ⁴		3
Focus Area Course ⁴		3
Required Benchmarks ⁷		
Credits		9
Fifth Year		
Fall and Spring		
TBGD 7000	Dissertation (9 credit per semester)	18
Required Benchmarks ⁸		
Credits		18
Total Credits		66-67

¹ The assumption for Year 1 and Year 2 of the road map is that students can transfer a max of 18-30 credits. It is not required that students transfer 30 credits (however they must have completed a master's degree to be eligible for admission), and if they do not have between 18-30 relevant credits to transfer, the first two years will be used to complete the additional credits to reach the required total of 72. In this example, the student transfers 21-22 credits from the Master's. The eligibility of transfer credits are determined by their committee.

² **Methods Courses:** (students must take two different ones with colloquium. Refer to list under course requirements)

³ **Analysis Courses:** students must take two different ones with colloquium. Refer to list under course requirements.

⁴ **Focus Areas:** Select at least 12 credits (24 credits total) from at least two areas. Courses for each focus area are listed under course requirements.

⁵ **Required Benchmarks First Term**

- Form graduate committee, select two area concentrations, and curriculum plan.
- Pass qualifying doctoral examination scheduled by the student's graduate committee chair and the Transborder and Global Human Dynamics Executive Committee.
 - For students who enter with a master's degree or equivalent from another university, or another department, the qualifying examination should be taken before the completion of one semester of graduate work.
 - For students who earn their master's degree at New Mexico State University and will continue in the Transborder and Global Human Dynamics doctoral program, the department may allow the master's final examination to serve as the doctoral qualifying examination or may require a separate examination.

⁶ **Required Benchmarks Term 2:**

- Required benchmarks: Proposal hearing by committee. Approved NMSU IRB proposal for Human Subjects Research, as necessary. Preparation of proposals for external funding

⁷ **Required Benchmarks Year 4:**

1. Preparation of proposals for external funding.
2. Comprehensive Examination
 - Completion of adequate course work, to the satisfaction of the graduate committee, the Transborder and Global Human Dynamics Executive Committee, and the Graduate School
 - The graduate committee determines the student is adequately prepared for the examination
 - Successful completion of language requirement.

3. Advancement to Candidacy: For advancement to candidacy the following criteria must be met

- Successful completion of the comprehensive examination
- Recommendation of the graduate committee
- Approval of the Dean of the Graduate School Upon receiving advancement to candidacy, students must establish residency and follow the Dissertation Registration Requirements

⁸ **Required Benchmarks Year 5:**

- Final Oral Examination (Defense)

Water Science and Management - Doctor of Philosophy

This degree is designed to give students a thorough and comprehensive knowledge of water science and hydrology and training in methods of research. The Ph.D. degree can be earned in about 33-35 credits of formal course work beyond the Masters Degree, plus 18 additional dissertation research credits, for a minimum total of 75 credits beyond the BS degree, as detailed below. This degree has five available concentrations.

Prefix	Title	Credits
Core Courses		
AEEC 5350	Economics of Water Resource Management and Policy	3
RGSC 518 or SOIL 456	Watershed Methods and Management Irrigation and Drainage	3
C E 557	Water Resources Development	3
Select one from the following:		3-4
GEOG 578	Fundamentals of GIS	
GEOG 588	GIS and Water Resources	
Select one from the following: ¹		3-4
A ST 505	Statistical Inference I	
C E 582	Statistical Hydrology	
GEOG 585	Spatial Analysis and Modeling	
Seminar Credits OR Select one from the following: ²		2
WSAM 605	Arid Land Water Resources	
WSAM 610	Water and Sustainable Economic Development	
GEOG 501	Introduction to Geographic Theory and Application	
Electives/transfer credits chosen in consultation with the student's committee (enough to meet the required minimum of 75 credits)		40
Dissertation		18
WSAM 700	Doctoral Dissertation	
Total Credits		75-77

¹ With the consent of the instructor and the approval of the student's advisor, C E 582 Statistical Hydrology or GEOG 585 Spatial Analysis and Modeling may be used as a substitute.

² Seminar may be substituted by WSAM 605 Arid Land Water Resources, or WSAM 610 Water and Sustainable Economic Development, or GEOG 501 Introduction to Geographic Theory and Application.

Students are expected to have a basic foundation in Geographic Information System (GIS) within a classroom, research experience, or professional experience. Students without this background are required to take an appropriate GIS class as advised by their advisor such as: GEOG 578 Fundamentals of GIS, or FWCE 535 Special Topics.

Water Science and Management (Agricultural Water Resources) - Doctor of Philosophy

This degree is designed to give students a thorough and comprehensive knowledge of water science and hydrology and training in methods of research. The Ph.D. degree can be earned in about 33-35 credits of formal course work beyond the Masters Degree, plus 18 additional dissertation research credits, for a minimum total of 75 credits beyond the BS degree, as detailed below. This degree has five available concentrations.

Prefix	Title	Credits
Core Courses		
AEEC 5350	Economics of Water Resource Management and Policy	3
RGSC 518 or SOIL 456	Watershed Methods and Management Irrigation and Drainage	3
C E 557	Water Resources Development	3
Select one from the following:		3-4
GEOG 578	Fundamentals of GIS	

GEOG 588	GIS and Water Resources	
Select one from the following: ¹		3-4
A ST 505	Statistical Inference I	
C E 582	Statistical Hydrology	
GEOG 585	Spatial Analysis and Modeling	
Seminar Credits OR Select one from the following: ²		2-3
WSAM 605	Arid Land Water Resources	
WSAM 610	Water and Sustainable Economic Development	
GEOG 501	Introduction to Geographic Theory and Application	
Concentration Electives		
Students must work with their committee to select 12 credits of elective courses that would meet the Agricultural Water Resources concentration		12
Electives chosen in consultation with the student's committee (enough to meet the required minimum of 75 credits)		28
Dissertation		
WSAM 700	Doctoral Dissertation	
Total Credits		75-78

¹ With the consent of the instructor and the approval of the student's advisor, C E 582 Statistical Hydrology or GEOG 585 Spatial Analysis and Modeling may be used as a substitute.

² Seminar may be substituted by WSAM 605 Arid Land Water Resources, or WSAM 610 Water and Sustainable Economic Development, or GEOG 501 Introduction to Geographic Theory and Application.

Students are expected to have a basic foundation in Geographic Information System (GIS) within a classroom, research experience, or professional experience. Students without this background are required to take an appropriate GIS class as advised by their advisor such as: GEOG 578 Fundamentals of GIS, or FWCE 535 Special Topics.

Water Science and Management (International Water Resilience) - Doctor of Philosophy

Prefix	Title	Credits
WSAM 590	System Dynamics	3

Students without this background are required to take an appropriate GIS class as advised by their advisor such as: GEOG 578 Fundamentals of GIS, or FWCE 535 Special Topics.

Water Science and Management (Watershed and Aquatic/Riparian Wetlands) - Doctor of Philosophy

This degree is designed to give students a thorough and comprehensive knowledge of water science and hydrology and training in methods of research. The Ph.D. degree can be earned in about 33-35 credits of formal course work beyond the Masters Degree, plus 18 additional dissertation research credits, for a minimum total of 75 credits beyond the BS degree, as detailed below.

Prefix	Title	Credits
Core Courses		
AEEC 5350	Economics of Water Resource Management and Policy	3
RGSC 518	Watershed Methods and Management	3
or SOIL 456	Irrigation and Drainage	
C E 557	Water Resources Development	3
Select one from the following:		3-4
GEOG 578	Fundamentals of GIS	
GEOG 588	GIS and Water Resources	
Select one from the following: ¹		3-4
A ST 505	Statistical Inference I	
C E 582	Statistical Hydrology	
GEOG 585	Spatial Analysis and Modeling	
Seminar Credits OR Select one from the following: ²		2
WSAM 605	Arid Land Water Resources	
WSAM 610	Water and Sustainable Economic Development	
GEOG 501	Introduction to Geographic Theory and Application	

Concentration Electives		
Students must work with their committee to select 12 credits of elective courses that would meet the Watersheds and Aquatic/Riparian Wetlands concentration		12
Electives chosen in consultation with the student's committee (enough to meet the required minimum of 75 credits)		28
Dissertation		18

WSAM 700	Doctoral Dissertation
Total Credits	75-77

¹ With the consent of the instructor and the approval of the student's advisor, C E 582 Statistical Hydrology or GEOG 585 Spatial Analysis and Modeling may be used as a substitute.

² Seminar may be substituted by WSAM 605 Arid Land Water Resources, or WSAM 610 Water and Sustainable Economic Development, or GEOG 501 Introduction to Geographic Theory and Application.

Students are expected to have a basic foundation in Geographic Information System (GIS) within a classroom, research experience, or professional experience. Students without this background are required to take an appropriate GIS class as advised by their advisor such as: GEOG 578 Fundamentals of GIS, or FWCE 535 Special Topics.

Reading - Specialist in Education

The Reading Specialist in Education is for educators who are interested in becoming a reading specialist, literacy director, school district administrator in curriculum and instruction, or engage in leadership at the district and state levels. The program can be completed in two forms (1) solely as a Specialist in Education; (2) simultaneously with the Master of Arts in Education with a Concentration in Language, Literacy & Culture.

Reading Specialist in Education

For students wishing to only receive the Specialist in Education for Reading the following coursework will need to be completed.

Prefix	Title	Credits
Required Coursework		
<i>Reading Specialist Coursework</i>		
READ 5330	Content Area Literacy	3
READ 6110	Critical Issues in Literacy Education	3
READ 6120	Multiple Critical Literacies	3
READ 6130	Multiculturalism, Literature, and Inquiry	3
READ 6210	Ethnography of Reading and Writing	3
READ 6320	Praxis and Reflexivity	3
READ 5990	Practicum in Literacy Education	6
READ 6999	Research Project	9
Total Credits		33

Reading Specialist with the M.A. in Education (LLC)

For students who have already pursued a master's degree in reading/literacy (LLC) and are eligible to apply for the PED Reading Endorsement, the specialist can be added to their current curriculum the following coursework will need to be completed.

Prefix	Title	Credits
Required Coursework		
<i>Language, Literacy and Culture Coursework</i>		
EDUC 5120	Multicultural Education	3
EDUC 5140	Research in Curriculum and Pedagogy	3
EDUC 5160	Curriculum and Pedagogy	3
EDUC 5170	Action Research Projects	3
READ 5210	Language and Literacy Acquisition	3
READ 5220	Sociopsycholinguistics of Reading	3

READ 5340	Literacy Assessment and Evaluation	3
READ 5350	Adult and Family Literacy	3
READ 5360	Digital Literacies	3
READ 5410	Theory and Pedagogy of Literature for Children and Adolescents	3
READ 5420	Theory and Pedagogy of Writing	3
<i>Reading Specialist Coursework</i>		
READ 5330	Content Area Literacy	3
READ 6110	Critical Issues in Literacy Education	3

READ 6210	Ethnography of Reading and Writing	3
READ 6320	Praxis and Reflexivity	3
READ 5990	Practicum in Literacy Education	6
READ 6999	Research Project	9
Total Credits		66

School Psychology - Specialist in Education

The CEP Department offers a School Psychology program that leads to a Specialist in Education (Ed. S.) degree. The National Association of School Psychologists accredits the program. The program provides additional education beyond the M.A. degree to prepare professionals for licensure as school psychologists in New Mexico and throughout the United States. The School Psychology program prepares its candidates to work with preschoolers, children, adolescents, and families. The various settings where School Psychologists are employed include public schools and other organizations that require advanced assessment, counseling, consultation, and other interventions. The program trains its candidates to serve students from various backgrounds with diverse educational, psychological, and emotional needs. Such training also includes working with all school personnel to help make education a positive and rewarding student experience.

Annual application deadline: January 15

For more information on program application requirements and process, see School Psychology, Ed.S., program website:

<https://cep.nmsu.edu/academic-programs/school-psychology.html>

Total Credits		12

Borderlands and Ethnic Studies - Graduate Certificate

Borderlands and Ethnic Studies (BEST) is a multidisciplinary program that critically explores the social, historical, cultural, and legal ways communities experience and navigate social constructs such as race, gender, and sexual orientation. These constructs permeate life, are entrenched in social structures and institutions, and shift and mutate over place and time in ways that reproduce existing power relations. The program outlines and analyzes the history, cultural production, politics and consequences of racialization and identity formation from an Indigenous, Diasporic and Transnational/Transborder, Decolonizing approach that remains rooted in a place-based, Borderlands imperative.

The graduate certificate advances an understanding of human relationships informed by unequal power and resource distribution to prepare students for service in various fields such as: education, government, law enforcement, health, environmental justice, sustainable agriculture, communications, social work, law and policy, public history, business and social entrepreneurship, and others. The certificate addresses a growing need for knowledge and skills in the areas of cultural competency, equity and inclusion, critical thinking and conscientious problem solving, and effectively working with diverse populations.

Within the field of education, currently employed teachers and future teachers will be trained in historical and contemporary knowledge of Borderlands and ethnic Studies through a locally-relevant approach. nationally, Ethnic Studies is part of a burgeoning K-12 and higher education focus because of its potential for creating stronger and healthier communities. This certificate serves a growing cadre of

educators as well as others pursuing careers in the public services sector. The certificate is comprised of 15 credits of graduate level work.

The certificate serves:

- Current NMSU degree seeking graduate students who wish to expand their primary area of study to include a specialization in Borderlands and Ethnic Studies.
- Non-degree seeking professionals who have completed an undergraduate degree in any major and who wish to invite, refresh, update and extend their knowledge and skill sets in Borderlands and Ethnic Studies.

Overview

The Graduate Certificate in Borderlands and Ethnic Studies is offered in the traditional classroom format as well as on-line. The program is designed to be completed in 4 semesters, with a requirement to successfully culminate in completion of BEST 513 Capstone in Borderlands and Ethnic Studies - which will be tailored to the students' trajectory. Students must earn a minimum 3.0 in all 5 courses, including the Elective.

The certificate may be completed as a stand-alone certification or in conjunction with a graduate degree in another field.

If you wish to complete a graduate certificate, you must apply for admission to this program. Even if you already enrolled in a graduate program at NMSU, you will need to complete a separate application to be admitted to the certificate program. Once you have been admitted to the program and have completed all of the necessary coursework, you will need to file a Completion of Graduate Certificate form to be awarded the certificate.

Please contact the Borderlands and Ethnic Studies Advisor to further assist in completion of the application.

Cultural Resource Management - Graduate Certificate

The Graduate Certificate in Cultural Resource Management provides specialized archaeological training that enables students to pursue careers cultural resource management, heritage, and historic preservation in the public or private sectors. The curriculum includes cultural resource management and historic preservation laws and regulations, area classes in prehistoric and historical archaeology, field classes, and laboratory methods courses in archaeology, history, and geography. Students take courses in traditional classroom and laboratory formats, as well as in the field. The core requirements (ANTH 540 Cultural Resource Management and ANTH 542 Cultural Resource Management II) are offered during the fall (ANTH 540) and spring (ANTH 542) semesters *every other year*. If you enroll in a year when these courses are not being offered, it will take you at least two years to complete your certificate.

The Certificate may be completed as a stand alone certification or in conjunction with the M.A. degree in Anthropology or any other related field.

If you wish to complete a graduate certificate, you must apply (<https://gradschool.nmsu.edu/>) for admission to this non-degree program. Even if you already enrolled in a graduate program at NMSU, you will need to complete a separate application to be admitted to the certificate program. Once you have been admitted to the program and have completed all of the necessary coursework, you will need to apply to be awarded the certificate through your myNMSU account.

Please contact the Anthropology Graduate Advisor, Dr. Kelly Jenks kljenks@nmsu.edu (istanfor@nmsu.edu) for information about how to complete the application.

The Graduate Certificate in Cultural Resource Management requires 18 credits of coursework and must be completed within 3 years. The certificate requires six credits from two required courses and 12 credits from a comprehensive list of electives in anthropology and cognate fields. Students are required to take at least one course in History or Geography. All these courses are designed to promote expertise in cultural resource management. The core requirements (ANTH 540 Cultural Resource Management and ANTH 542 Cultural Resource Management II) are offered during the fall (ANTH 540) and spring (ANTH 542) semesters *every other year*. If you enroll in a year when these courses are not being offered, it will take you at least two years to complete your certificate.

HIST 586	Interpreting Historic Places for the Public
HIST 583	Advanced Historic Preservation
HIST 594	Public History Seminar
Total Credits	18

¹ Some of these courses have prerequisites, consult the graduate catalog for details.

² Other classes maybe included in the list of elective courses at the discretion of the Department and with approval of the Anthropology Department Head.

Elementary Education Alternative Licensure - Graduate Certificate

The NMSU Elementary Alternative Licensure Certificate aims to recruit highly qualified individuals who have earned at least a bachelor's degree in a related field and are eligible for a temporary two-year alternative license in the State of New Mexico. We seek individuals who will have positive impact on the social, cultural, emotional, and intellectual growth of youth with whom they will work throughout their career.

In order to qualify to enter the Elementary Education Alternative Licensure Certificate program, applicants must meet the following minimum requirements and submit the required documentation for consideration:

- Meet minimum state requirements of *at least* a bachelor's degree and course requirements of 30 undergraduate credit hours (6.60.3.7 NMAC) in the teaching field with a minimum 2.75 cumulative undergraduate GPA.
- Passing scores for all *Praxis*[®] Core Academic Skills for Educators (Core): <https://www.ets.org/praxis/nm> (<https://www.ets.org/praxis/nm/>)
- Be hired and submit a copy of a current teaching contract from a school district in New Mexico that indicates the candidate is the teacher of record in an elementary classroom for each year of employment.
- Admission to the School of Teacher Preparation, Administration, and Leadership in the College of Education.

- Admission to the NMSU Graduate School (<https://gradschool.nmsu.edu/>)

Prefix	Title	Credits
Required Courses		
EDUC 5120	Multicultural Education	3

BFIN 545	Fixed Income Markets, Instruments and Derivatives	3
BFIN 555	Derivative Markets and Securities	3
BFIN 575	International Managerial Finance	3
BFIN 581	Management of Financial Institutions	3
Total Credits		12

Museum Studies - Graduate Certificate

The Graduate Certificate in Museum Studies provides specialized interdisciplinary training that enables students to pursue careers in museums in the public or private sectors. The curriculum includes museology, methods, exhibit development, collections management, conservation, curation, and practice in Museum Studies. The core requirements for Anth 545 Advanced Museology and Hist 594 Public History Seminar alternate on rotation with controlled electives *every other year*. If you enroll in a year when these courses are not being offered, it will take you at least two years to complete your certificate.

The Certificate may be completed as a stand alone certification or in conjunction with the M.A. degree in Anthropology, History, Art, and related fields.

If you wish to complete a graduate certificate, you must apply (<https://gradschool.nmsu.edu/>) for admission to this non-degree program. Even if you already enrolled in a graduate program at NMSU, you will need to complete a separate application to be admitted to the certificate program. Once you have been admitted to the program and have completed all of the necessary coursework, you will need to apply to be awarded the certificate through your myNMSU account.

Please contact the Anthropology Graduate Advisor (kljenks@nmsu.edu) for information about how to complete the application.

The Certificate in Museum Studies is a 3 semester (or one year and one summer) program designed for individuals who want to enhance their understanding of museum work. It may be completed as a stand alone certification or in conjunction with a Master's degree in Public History, History, Art History, Anthropology, Studio Art or other disciplines.

Prefix	Title	Credits
Core Curriculum		
ANTH 545	Advanced Museology	3

ARTH 579	Methodologies and Historiography of Art History and Art Theory
HIST 579	Oral History
HIST 583	Advanced Historic Preservation
HIST 586	Interpreting Historic Places for the Public
Total Credits	18

¹ This list is regularly modified as new courses are added to the catalog, or old ones are phased out. Eligible courses are determined by a committee with at least one representative from Art, Anthropology and History. Substitutions may be approved with the advice of Museum Studies Faculty in Art, History, and Anthropology by the Department Head of Anthropology.

Principal Licensure - Graduate Certificate

Students seeking to complete the Principal Licensure Graduate Certificate program for the purpose of obtaining administrative licensure must already hold an MA or MS and New Mexico Level III teacher licensure. Students must complete the required 24 credit hours of coursework, which includes six credit hours of a university-supervised administrative internship (over the course of two semesters). Students must earn a final grade of B- or better in all classes. Courses in which a student earns a "C" grade or below will need to be repeated and not count towards graduation. Important information about the Educational Leadership & Administration Programs can be found here (<https://ela.nmsu.edu/>).

Public Health - Graduate Certificate

The graduate certificate program in public health is not an official graduate degree offered by NMSU but rather a focused collection of courses that enrolled students complete in public health. These courses are designed to provide and/or enhance students' knowledge of and skills in public health practice. Those students who successfully complete the previously listed courses receive a certificate of completion statement on their official transcript and a formal certificate from the university.

Prefix	Title	Credits

¹ **Other potential courses** may be available in the catalog. Discuss with your Sustainability Advisor whether the course would be suitable. Substitutions and exceptions can be made with the approval of the Sustainability faculty advisor and Department Head of Plant & Environmental Sciences Department.

Systems Engineering - Graduate Certificate

Program Availability

This distance education program is available to working professionals who have undergraduate degrees in engineering, engineering technology, and related fields. It is also an option for persons with graduate degrees who seek career renewal. Systems engineering provides a unique opportunity for working professionals to integrate their work experience with advanced coursework.

Program Objectives

The objectives of this program are:

- To provide technical professionals an opportunity to advance their careers through advanced education in systems engineering.
- To develop and improve relationships with the College of Engineering's constituencies by offering a program that addresses a known need for professional graduate-level development.
- To provide an opportunity for non-traditional students to consider advancing their education in areas that will foster their career development.
- To enable program students to become aware of current faculty research in systems engineering areas.

Requirements

A 3.0 minimum cumulative GPA in four courses as described below will be required for award of the Systems Engineering Graduate Certificate Program.

Admission to the NMSU Graduate School

Students must apply and be admitted to NMSU as a non-degree student to take classes. For more information, contact:

NMSU Graduate School
Box 30001, MSC 3G
Las Cruces, NM 88003
(575) 646-2736
<http://gradschool.nmsu.edu/> (<http://gradschool.nmsu.edu/>)

To complete the Certificate Program, students must be admitted to the Graduate School as certificate students. If you are considering pursuing a degree in electrical or industrial engineering, you should contact that department for admissions requirements and advising.

Academic Content

Prefix	Title	Credits
Required Courses		6
I E 537	Large Scale Systems Engineering	
I E 590	Selected Topics (Systems Engineering)	
Electives (six credits from the following):		6
<i>Track 1 - Modeling, Simulation & Decisions</i>		
I E 490	Selected Topics	
I E 533	Linear Programming	
I E 535	Discrete Optimization	
I E 545	Characterizing Time-Dependent Engineering Data	

I E 567	Design and Implementation of Discrete-Event Simulation
<i>Track 2 - Applications</i>	
E E 460	Space System Mission Design and Analysis
I E 525	Systems Synthesis and Design
E E 590	Selected Topics
<i>Track 3 - Systems Analysis</i>	
I E 466	Reliability
I E 515	Stochastic Processes Modeling
I E 522	Queuing Systems
I E 571	Advanced Quality Control

Total Credits 12

Other courses may be substituted by the approval of your advisor and the program director.

Advanced Manufacturing - Graduate Minor

The Advanced Manufacturing graduate minor is restricted to students currently enrolled in any of the Master of Engineering programs.

Prefix	Title	Credits
Required Courses		
C E 510	Introduction to Nondestructive Testing	3
CHME 491	Undergraduate Special Topics (Development of Agricultural Technologies)	3
I E 490	Selected Topics (Introduction to Advanced Manufacturing)	3
500 Level Approved Department Course List		3
Total Credits		12

First Year

Prefix	Title	Credits
Fall		
I E 590	Selected Topics	3
500 level Course (approved from the Department Course List)		3
Credits		6

Spring

C E 510	Introduction to Nondestructive Testing	3
CHME 491	Undergraduate Special Topics (Development of Agricultural Technologies)	3
Credits		6
Total Credits		12

Agricultural and Extension Education - Graduate Minor

A graduate student who wishes to minor in AXED, while majoring in another academic program, should select an advisor from the AXED Graduate Faculty. A student minoring in AXED must complete at least nine credit hours of approved courses in the AXED department. A copy of the minor program must be approved by the AXED department head. Contact an advisor in AXED.

Animal Science - Graduate Minor

A minimum of 9 credit hours in graduate level classes with the ANSC prefix are required to obtain a graduate minor in Animal Science. Approval by the Animal and Range Sciences Department Head is required.

Anthropology - Graduate Minor

For the minor in anthropology, students are required to complete at least 9 credits (3 courses) of graduate-level anthropology coursework at the level of 500 or above. A minor in anthropology provides a useful concentration for students developing professional careers in teaching, environmental sciences, international business, community development, social work, art, and historic preservation. We recommend that students consult the anthropology graduate advisor and focus their coursework in the appropriate subfield.

To include a minor on a student's transcript, the minor must be listed on the NMSU Graduate Program of Study, and this form must be signed by the anthropology graduate advisor. Graduate students majoring in anthropology may **not** also earn a minor in the same field.

Applied Statistics - Graduate Minor

The minor in applied statistics is designed for graduate students majoring in other fields. It provides credentials that the student is capable of conducting statistical analyses in their area of specialization.

Master's level students wishing to minor in applied statistics at the master's level must have at least 10 credits of 500-level applied statistics courses. In accordance with Graduate School requirements, doctoral students must have at least 12 credits of 500-level applied statistics courses for a minor.

Students who wish to focus on experimental statistics typically complete A ST 503 SAS Basics, A ST 504 Statistical Software Applications, A ST 505 Statistical Inference I, A ST 506 Statistical Inference II. A typical course sequence for students interested in data analytics consists of A ST 505 Statistical Inference I, A ST 507 Advanced Regression, A ST 515 Statistical Analysis with R, and A ST 540 Predictive Analytics.

Students wishing to obtain the minor in applied statistics should contact an applied statistics faculty member to recommend appropriate applied statistics course work to be included in the plan of study and to serve as the graduate committee representative from the minor area.

Archaeology - Graduate Minor

The graduate minor in archaeology allows students in other programs to develop a specialization in archaeology. A minor in archaeology provides a useful concentration for students developing professional careers in cultural resource management, public lands management, environmental sciences, public history, geography, or teaching.

In order to complete the minor requirements, students are required to complete 9 credit hours (3 classes) of graduate level courses. The core courses for the minor are:

Prefix	Title	Credits
Course Requirements		
Select 9 credits from the following:		9
ANTH 514	Advanced Archaeology of Magic, Witchcraft, and Religion	

ANTH 516	Advanced Archaeology of Ancient Southwest
ANTH 518	Advanced Historical Archaeology
ANTH 522	Archaeological Field School
ANTH 523	Archaeological Mapping
ANTH 540	Cultural Resource Management
ANTH 564	Advanced Curation Crisis in Archaeology
ANTH 542	Cultural Resource Management II
ANTH 575	Advanced Pottery Analysis in Archaeology
ANTH 576	Lithic Technology Organization
ANTH 577	Advanced Zooarchaeology
ANTH 578	Advanced Lab Methods in Archaeology

Total Credits

9

Students should choose among these core offerings with the advice of their MA thesis chair and minor area committee member. The minor in archaeology is not available to graduate anthropology majors. Substitutions for special topics courses available by permission of Anthropology Department Head.

Bioinformatics (with Computer Science) - Graduate Minor

The Bioinformatics minor is jointly offered with the Department of Computer Science and consists of 9 credit hours for Master's students and 12 credit hours for Ph.D. students, including BIOL 550 Special Topics/GENE 452 Applied Bioinformatics, and additional courses selected from those listed at <http://research.nmsu.edu/molbio/> (<https://molb.nmsu.edu/curriculum/under-graduate-minor-in-bioinformatics.html>). The courses selected will depend on whether the student is majoring in a biological or non-biological science and include courses from the graduate Computer Science and Molecular Biology curricula. Please inquire with the Molecular Biology Program office for the most recent requirements for the bioinformatics minor.

Communication Studies - Graduate Minor

Students who wish to take a minor in Communication Studies will need to accumulate a minimum of 9 graduate credits in Communication Studies courses. Students are encouraged to contact the Communication Studies Department Head for direction in the selection of courses.

Computer Science - Graduate Minor

Students who wish to take a minor in Computer Science will need to accumulate a minimum of 9 graduate credits not including the C S 460 Computer Science I Transition Computer Science course. Students are encouraged to contact the Computer Science Graduate Committee Chair for directions in the selection of courses.

Economics - Graduate Minor

The graduate minor in economics is appropriate for those who seek a better understanding of how micro- and macro- economic forces influence individuals, business and government decision making. Students interested in public utility regulation, banking and finance, government service, or law will find the minor especially interesting.

Graduate students wishing to earn a minor in economics must complete 12 semester credit hours, including:

Prefix	Title	Credits
Select at least two from the following:		
AEEC 5120	Microeconomic Theory	6
AEEC 5130	Macroeconomic Theory	
AEEC 5240	Econometrics	
ECON or AEEC 500 or higher courses (excluding ECON 503) ¹		6
Total Credits		12

¹ ECON 503 Managerial Economics cannot be counted toward the minor.

Students pursuing the economics minor must fulfill the course prerequisites before enrolling in the graduate courses.

Educational Administration (Doctoral) - Graduate Minor

Doctoral Graduate Minor

Doctoral students who wish to earn a minor in Educational Leadership and Administration should meet with an ELA faculty member to discuss program and/or courses. NOTE: Faculty will prescribe a plan of study for the minor that takes into consideration the career aspirations and goals of the student.

Students must earn a minimum of a "B" grade in all minor coursework.

Students who receive a grade of "B-" or below will be required to retake the course.

Educational Administration (Higher Ed.) - Graduate Minor

Master's students may earn a minor in educational administration, with a focus in Higher Education Administration, by passing **three** of the listed classes below.

How to Apply

Students wishing to obtain the minor should contact ELA Doctoral Programs Coordinator at edmandev@nmsu.edu.

Minimum Grade Requirement

Students must earn a minimum "B-" grade in all required coursework.

Students who receive a grade of "C+" or below will be required to retake the course.

Prefix	Title	Credits
ELAD 5215	Higher Education Administration	3
or ELAD 5210	Community College Administration	
ELAD 5250	Higher Education Law	3
ELAD 5230	Higher Education Finance and Funding	3
ELAD 5240	Management of Student Services in Higher Education	3
Total Credits		12

Educational Administration (Pk-12) - Graduate Minor

Master’s level students wishing to earn a minor in educational administration, with a focus in Pk-12 Educational Administration, must pass **three** of the listed classes below.

How to Apply

Students wishing to obtain the minor should contact ELA Doctoral Programs Coordinator at edmandev@nmsu.edu.

Minimum Grade Requirement

Students must earn a minimum "B-" grade in all required coursework. Students who receive a grade of "C+" or below will be required to retake the course.

Prefix	Title	Credits
ELAD 5110	The Principalship	3
ELAD 5140	Educational Financial Management	3
ELAD 5150	Public School Law	3
ELAD 5320	Educational Leadership, Supervision, and Evaluation	3
Total Credits		12

Fish, Wildlife and Conservation Ecology - Graduate Minor

A minor in Fish, Wildlife, and Conservation Ecology requires 9 credits of graduate coursework that carries the FWCE prefix. Official minor documentation must be completed with the Department of Fish, Wildlife and Conservation Ecology. Students wishing to obtain to obtain a graduate minor in Fish, Wildlife and Conservation Ecology (FWCE) must: 1) obtain approval from the Department Head of the Department of Fish, Wildlife and Conservation Ecology Department Head; 2) have a FWCE faculty member as part of their graduate advisory committee; FWCE faculty member needs to approve the proposed program of study for the minor; 3) complete a minimum of 9 credit hours in graduate level (500) classes with the FWCE prefix. FWCE 509 Population Ecology (s) (3 s.h.) is required, plus an additional 6 credit hours.

Prefix	Title	Credits
The graduate minor in FWCE would require nine credit hours in FWCE graduate-level courses and would include the following:		
<i>Required course</i>		3
FWCE 509	Population Ecology (s)	
<i>Required elective (at least 3-4 credits from one of the following)</i>		3-4
FWCE 459	Aquatic Ecology	
FWCE 547	Wildlife Law and Policy	
<i>Elective</i>		3
Three credits from any of the remaining graduate courses in Wildlife Science		
Total Credits		9-10

Food Studies - Graduate Minor

The purpose of the Food Studies Graduate Minor is to:

1. Enable students to develop a specialization in food studies within their respective graduate program

2. Develop specialized knowledge of the complex and dynamic relationship between food and culture
3. Explore the role of culture in food production, distribution and consumption across different cultures
4. Apply ideas and knowledge from graduate seminars to fieldwork for MA thesis or internship in a food studies topic

Program Requirements

Prefix	Title	Credits
Core Curriculum		
Select three from the following: ¹		9
ANTH 520	Ethnographic Field Methods	
ANTH 531	Issues in Nutritional Anthropology	
ANTH 538	Plants, Culture, and Sustainable Development	
ANTH 539	Culture and Foodways	
ANTH 515	Applied Anthropology ²	
ANTH 535	Adv. Human Health and Biological Variation ²	
Total Credits		9

¹ Alternative classes may be substituted for one of the core classes with the approval of the Anthropology Department Head.

² In these cases, the student’s class research project should focus on a food studies theme.

Students are expected to conduct a food studies thesis, applying anthropological theoretical frameworks and ethnographic methodologies to the study of a food-related topic. Non-thesis students may select a food studies internship. Possible topics include sustainable development, alternative food movements, community food security, community health, nutrition, food safety, globalization of food, indigenous knowledge systems, food self-sufficiency, among others.

Gender and Sexuality Studies - Graduate Minor

The graduate minor in Gender and Sexuality Studies specializes in the examination of gender; gender identity; queer and transgender studies; feminisms; and social justice from interdisciplinary perspectives. Students develop a strong understanding of how interconnected social formations such as race, class, age, nation, citizenship, ability, and other categories of difference are constructed and intersect with gender and sexuality. The graduate minor in Gender and Sexuality Studies offers students a documented emphasis in their academic training in the field of Gender and Sexuality Studies. The graduate minor allows students to acquire specialized knowledge through the interdisciplinary curriculum offered by Gender and Sexuality Studies and to integrate theoretical perspectives and methodologies from Gender and Sexuality Studies into diverse academic fields. Our courses equip students with analytical skills and knowledge to engage power structures critically and transform lives and communities.

We offer a plan of study that integrates humanities and social sciences methods and objects of study, including areas of concentration such as human rights and transnational migration; socially engaged literature, film, and other creative media; and transnational and decolonial methodologies. The graduate minor in Gender and Sexuality Studies complements many advanced degree programs at NMSU including Anthropology, Art, Biology, Business Administration, Chemistry, Clinical and Mental Health Counseling, Communication Studies, Creative Writing,

Criminal Justice, Curriculum and Instruction, Economics, Education, English, Government, History, Psychology, Public Health Sciences, Social Work, Sociology, Spanish, and others.

Gender and Sexuality Studies students prepare for careers in such fields as advocacy and social organizing, community development, creative writing, criminal justice, education, filmmaking and video production, health care, human resources, journalism, law, music production, social services, and visual arts. Many students declare a graduate minor in Gender and Sexuality Studies to enhance career opportunities and learning.

Courses are offered both online and on campus. In addition to the graduate minor, Gender and Sexuality Studies offers a B.A. and undergraduate minor.

Master's and Doctoral minor candidates:

Prefix	Title	Credits
Required Core Course		
GNDR 571	Advanced Seminar in Feminist and Queer Theories	3

For a Master's Degree minor candidate:

6 additional credit hours from upper level Gender & Sexuality Studies courses or courses cross-listed with Women's Studies and other departments/programs are required. (9 credit hours total)

For a Doctoral Degree minor candidate:

9 additional credit hours from upper level Gender & Sexuality Studies courses or courses cross-listed with Women's Studies and other departments/programs are required. (12 credit hours total)

Geographic Information Systems - Graduate Minor

The Department of Geography offers a minor in Geographic Information Systems, and this minor is available for all graduate students. To earn a minor in GIS, the following courses are required, combining for a total of 14 credits. Students may not take any of these courses S/U, and students must earn a grade of at least B- in all of these classes.

Prefix	Title	Credits
Requirements		
GEOG 573	Introduction to Remote Sensing	4
GEOG 578	Fundamentals of GIS	4
Select 6 credits from the following:		6
GEOG 571	Cartography and GIS	
GEOG 572	Geodatabase Design	
GEOG 581	GIS Design	
GEOG 582	Advanced Remote Sensing	
GEOG 588	GIS and Water Resources	
GEOG 598	Selected Topics	
Total Credits		14

Gerontology - Graduate Minor

A grade of B or higher is required in all coursework for the Graduate Minor in Gerontology.

Prefix	Title	Credits
Required Courses		
Select four courses from the list below (12 credits)		12
PHLS 4740	Aging and Public Policy	
PHLS 5650	Coping with Loss and Grief: A Cross-Cultural Perspective	
PHLS 5710	Introduction to Gerontology	
PHLS 5720	Health Promotion for the Older Adult	
PHLS 5730	Adulthood and Aging	
PHLS 5996	Special Topics (Aging in a Multicultural Society)	
Total Credits		12

History - Graduate Minor

Students may earn a graduate minor in History by passing the following courses:

Prefix	Title	Credits
Craft of History		
		3
Select one from the following:		3
HIST 590	Reading Seminar: Borders, Boundaries and Frontiers	
HIST 591	Reading Seminar: Modernity and its Discontents	
HIST 592	Reading Seminar: Nature and Society	
HIST 593	Reading Seminar: History, Myth and Memory	
Select two additional 3-credit 500-level and above courses		6
Total Credits		12

Graduate students in History must maintain a 3.0 grade point average in their History courses. A graduate student earning a C or lower grade in one History course will receive a letter of warning. A graduate student earning two or more C or lower grades in History courses or whose History grade point average falls below 3.0 will be removed from the History graduate program. Students must earn at least one B or higher grade in a seminar during their first year in the graduate program, and must take at least one seminar during each year in which they are enrolled in the program. If a graduate student receives one U (Unsatisfactory) grade on his/her thesis or internship, the student will receive a written warning, and if a student received two or more U grades on his/her thesis or internship, the student will be removed from the program.

Information Systems - Graduate Minor

This minor is for master's-level students who are not in the Masters of Business Administration (MBA) program. Students in the MBA program may choose a concentration in Information Systems (see the Business Administration (p. 859) section).

To obtain a graduate minor in Information Systems (IS) students must satisfy the requirements as stated below for a minor at the master's level. For it to appear on the transcript, the student must list the minor on the Program of Study and Committee for Master's Student (Application for Admission to Candidacy) and have it signed by the head of the department offering the minor.

Requirements

The minor requires a minimum of 9 credits of graduate work.

Prefix	Title	Credits
Requirements		
BCIS 550	Information Systems Analysis and Design	3
BCIS 575	Database Management Systems	3
Select 3 credits from the following:		3
BCIS 561	Business Analytics I	
BCIS 566	Business Analytics II	
BCIS 580	Introduction to Cybersecurity: Exploring Computer, Network, and Data Security Principles	
BCIS 582	Management of Information Security	
BCIS 590	Special Topics	
Total Credits		9

Integrated Behavioral Health Care - Graduate Minor

The Minor in Integrated Behavioral Health Care, offered through the Counseling and Educational Psychology (CEP) department, is open to graduate students enrolled in CEP programs Clinical Mental Health Counseling, School Psychology, Counseling Psychology and to graduate students who are enrolled in Social Work, Public Health, Nursing and Marriage and Family Therapy programs.

It was established in the interest of meeting the needs of graduate students in the health professions who are receiving or seeking training in interdisciplinary or interprofessional collaborations with other healthcare disciplines. The provision of integrated behavioral health services fits within the university's broader goal of meeting the needs of the citizens of New Mexico and the department's commitment to graduating competent service providers who can be effective members of a healthcare team.

Students will complete 9 credits of coursework specific to this program of study in order to obtain a Minor in Integrated Behavioral Health Care. For application and coursework details, please get in touch with the CEP department office or visit the departmental website: <https://cep.nmsu.edu>

Through the courses in this minor students develop knowledge and skills in the following areas:

1. Apply the biopsychosocial model of health and illness with primary care patients,
2. Apply knowledge regarding the mind-body connection to address such issues as stress management, emotion regulation and sleep medicine,
3. Apply culturally responsive behavioral assessment/interventions,
4. Demonstrate behavioral health consultation skills with other health care providers, and
5. Develop interprofessional collaboration skills that include understanding the roles of all healthcare professionals and learning how to communicate effectively in order to engage in service delivery as a team.

Prerequisites

In order to begin the Minor courses, students **must currently be enrolled in a Behavioral Health program**. There are no other prerequisites.

How to Apply

If you are interested in pursuing a minor in Integrated Behavioral Healthcare, you should complete the attached application and return it to the IBH Minor coordinator, Eve Adams (eadams@nmsu.edu). It is best to meet with the program coordinator before enrolling in relevant coursework, but it is possible to obtain the minor after taking one of the courses in the program of study. The application form allows the CEP department to keep track of potential minors in order to determine what courses need to be offered at any given time. To declare the Minor with the Graduate School, the student should list all relevant completed coursework on the Program of Study form that is submitted to the Graduate School prior to graduating. This form must be signed by Dr. Adams. A IBH Minor faculty member is also required to sit on the student's graduate committees, including the comprehensive exam and the dissertation proposal and defense exams.

Application: Integrated Behavioral Healthcare Minor Form and Description (<https://cep.nmsu.edu/academic-programs/Integrated-Behavioral-Healthcare-Minor-form-description.docx>)

Program of Study

Students will successfully complete 9 credits of work from the courses listed below in order to obtain a Minor in Integrated Behavioral Health Care.

Prefix	Title	Credits
Core Courses		
Choose 9 credits from the following:		9
CEPY 5150	The Art & Science of Mindfulness for Helping Professionals	
CEPY 5280	Primary Care Psychology	
CEPY 5997	Special Research Programs	
or CEPY 6996	Selected Topics	
CEPY 6590	Behavioral Health Practicum	
Total Credits		9

CEPY 5150 The Art & Science of Mindfulness for Helping Professionals (1-3 s.h.) In this course, students learn about contemplative practices by learning about and participating in various mindfulness practices. This course engages students in a practice or experience that leads to reflection and, thus, acquired knowledge about themselves, others, and group functioning. The students learn how to increase well-being through mind-body integration, and they learn how to teach others mindfulness techniques. Students are required to explore the research on mindfulness for some medical condition or for its use with a specific population. This course has been taught in the spring semester, for five years, to CEP, MSW, MPH, and FCS students.

CEPY 5280 Primary Care Psychology (3 s.h.) Didactic and experiential learning in primary care psychology issues. Through this course students will learn about the cultural necessity of the integration of mental and physical health issues and multidisciplinary collaboration. Activities include 1) guest speakers on American Indian Health, the Mexican Healthcare System, and Integrated Care in primary care settings; 2) visits to 2 interdisciplinary, integrative, border community health centers; 3)

shadowing residents at the Family Medicine Center and observing the integration of psychological and medical aspects of the cases observed; and 4) exposure to the interventions of Motivational Interviewing and Mindfulness-Based Stress Reduction. CEP, MSW, and MPH trainees have enrolled in this course, taught during the fall semester, over the last 11 years.

CEPY 5997 Special Research Programs (1-6 s.h.)/CEPY 6996 Selected Topics (1-6 s.h.). This course will require students to spend a minimum of 6 hours per week at a primary care site, providing counseling, assessment, supervision, or psychoeducational services. The Minor coordinator must approve all placements. CEP students have enrolled in this course over the last 4 years. This course is available fall, spring and summer. During the summer, a special section of this course is subtitled, "Interprofessional Immersion" as CEP, DNP, and Family Medicine and PharmD residents learn interprofessional competencies related to providing geriatric care. This special section has been offered for two summers.

CEPY 6590 Behavioral Health Practicum (1-6 s.h.). An intensive supervised experience in providing behavioral health services at an on or off campus interdisciplinary health setting. This course will provide students the opportunity to participate in a supervised service-learning experience within community-based, interdisciplinary, primary care settings that serve medically underserved and high-risk groups. Students write and present a case study utilizing the biopsychosocial model of health. MSW and CEP students are placed in community-based organizations with Family Medicine residents or other medical personnel in order to provide integrated care. This course has been offered in the spring semester for the last 11 years.

Materials Engineering - Graduate Minor

The Materials Engineering minor at New Mexico State University is part of a materials education program that addresses the growing demand for engineers and scientists with understanding of the wide range of materials, their properties and means of characterization. A student must pass 18 credits of courses with a grade C or better. The minor includes one required course (CHME 361 Engineering Materials), and the balance elective courses chosen from menus available on the Chemical and Materials Engineering website (<http://chme.nmsu.edu/academics/minors/materials-engineering/> (<https://chme.nmsu.edu/academics/minors/materials-engineering/>)). No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

Prefix	Title	Credits
Required Courses		
CHME 361	Engineering Materials	3
Electives		15
Total Credits		18

Molecular Biology - Graduate Minor

The Molecular Biology Minor consists of 10 credit hours including MOLB 545; either MOLB 520 or MOLB 542; any of the tier II courses; and one MOLB 590 seminar.

Prefix	Title	Credits
Required Courses		
MOLB 545	Molecular and Biochemical Genetics	3
MOLB 520	Molecular Cell Biology	3
or MOLB 542	Biochemistry I	
MOLB 590	Discussions in Molecular Biology	1
Molecular Biology Tier II Courses		
Select one from the following:		
AGRO 516	Molecular Analysis of Complex Traits	
ANSC 602	Advanced Reproductive Physiology (fo)	
ANSC 621	Metabolic Functions and Dysfunctions (fe)	
BCHE 546	Biochemistry II	
BCHE 647	Physical Biochemistry	
BIOL 451	Physiology of Microorganisms	
BIOL 470	Developmental Biology	
BIOL 474	Immunology	
BIOL 475	Virology	
BIOL 477	Applied and Environmental Microbiology	
BIOL 478	Molecular Biology of Microorganisms	
BIOL 490	Neurobiology	
BIOL 541	Professional Development Seminar	
BIOL 550	Special Topics	
BIOL 577	Advanced Topics in Environmental Microbiology	
BIOL 590	Neuroscience	
BIOL 698	Selected Topics	
EPWS 486	Plant Virology	
MOLB 546	Biochemistry II	
MOLB 650	Advanced Topics in Molecular Biology	
TOX 461	Toxicology I	
GENE 486	Genes and Genomes	
Total Credits		10

Native American Studies - Graduate Minor

The purpose of the Native American Studies Graduate Minor are to:

- Provide an opportunity for all students to learn about Native American cultures and societies.
- Facilitate research and other creative activities that concern Native American peoples and that have potential benefit for them.
- Serve the University and State of New Mexico in ways that support and illuminate the rich heritage of Native American peoples.

The Graduate minor in Native American Studies focuses on Native American cultures and societies, deals with contemporary and historical experiences of American Indians, and examines the contributions of Indigenous peoples to life in the United States and other American nations. This specialization has developed in reaction to Western academic views of Native Americans and to the frequently restrictive, assimilationist approach within universities to issues concerning Native peoples. NAS contributes to a new understanding of Native American cultures and societies from contemporary and historical perspectives.

To qualify for a graduate minor in Native American Studies, students are required to complete 9 credit hours of graduate level courses. Two core requirements are NATV 5110 and NATV 4130. The third course is an elective from the remaining listed courses. To record a minor on a

student's transcript, the minor must be listed on the Graduate School's Program of Study form, and the Native American Studies advisor in the Department of Borderlands and Ethnic Studies must sign this form.

Prefix	Title	Credits
Required Courses		
NATV 5110	Advanced Indigenizing Methodologies in Native American Studies	3
NATV 4130	Indigenous Ways of Knowing	3
<i>Choose one course from the following:</i>		
NATV 4220	Federal Indian Policy (Choose one course from the following:)	3
NATV 5210	Advanced Native American Education	
PHLS 5996	Special Topics (American Indian Health)	
NATV 5520	Advanced Native American Women	
Total Credits		9

¹ Alternative classes may be substituted with the approval of the student's MA chair and the Director for the Graduate Minor in Native American Studies, Dr. Georgina Badoni (gbadoni@nmsu.edu).

Physics - Graduate Minor

Eligibility

This minor is available to graduate students not majoring in Physics or Geophysics.

Requirements

A student must satisfy the following requirements to earn a graduate minor in Physics:

- Successfully complete 12 credit hours of courses in Physics or Geophysics numbered above 500. Of these, not more than 3 credit hours can be for research, independent study, or other informal courses.
- Pass one of the four sections of the Physics Department's Qualifying Exam at the Ph.D. level.
- A member of the Physics faculty must be a member of the student's graduate committee.

Psychology - Graduate Minor

Any master's or doctoral student can declare a minor in Psychology in addition to their major area of study.

Students may earn a minor in psychology at the M.A. or Ph.D. level by completing nine credits of any 500-level and above coursework in psychology EXCEPT the following courses (PSYC 507, PSYC 508, PSYC 590, PSYC 598, PSYC 599, PSYC 600, or PSYC 700).

All minors must be approved by the minor department head and dean of the Graduate School. Students must declare the Psychology minor on a Program of Study and Committee Form for the Master's and doctoral level. Demonstration of competency in the minor area will be required at both comprehensive and final examinations. Students must also include a representative from the Psychology department on their thesis, comprehensive, and/or dissertation committees. The representative from the minor department can also serve as the Dean's Representative on the committee.

Range Science - Graduate Minor

A minimum of 9 credit hours in graduate level classes with the RGSC prefix are required to obtain a graduate minor in Range Science. Approval by the Animal and Range Sciences Department head is required.

Security Studies - Graduate Minor

Additional Courses

Other graduate courses may become available during the year which may be substituted for the above listed courses. Consideration may be made on a case-by-case basis.

Prefix	Title	Credits
Requirements		
Select three from the following:		9
POLS 549	Ethics in Government	
POLS 560	Seminar in International Relations Theory	
POLS 564	Advanced National Security Policy	
POLS 569	Advanced Issues in Globalization	
POLS 574	Contemporary Comparative Studies	
POLS 596	International Law	
Total Credits		9

Sociology - Graduate Minor

The Department of Sociology offers a Graduate Minor in Sociology to graduate students in other departments on campus at NMSU. For the minor in Sociology, students are required to complete 9 credits (3 courses) of graduate-level Sociology coursework. One course must be a core graduate Sociology course (SOCL 5153 Seminar in Sociological Research, SOCL 5157 Seminar in Qualitative Research Methods, SOCL 5163 Issues in Advanced Quantitative Analysis, and SOCL 5165 Foundations of Social Theory), and the remaining two courses must be elective Sociology courses. An elective Sociology course is any other non-core SOCL 5000+ course except for: SOCL 5110 Perspectives on Sociology, SOCL 5998 Internship and SOCL 5999 Master's Thesis.

Prefix	Title	Credits
Complete one course (3 credits) from the following:		3
SOCL 5153	Seminar in Sociological Research	
SOCL 5157	Seminar in Qualitative Research Methods	
SOCL 5163	Issues in Advanced Quantitative Analysis	
SOCL 5165	Foundations of Social Theory	
Complete two courses (6 credits) from any other SOCL 5000+ courses with the exception of SOCL 5110, 5998, 5999.		6
Total Credits		9

Spanish Counseling - Graduate Minor

The Minor in Spanish Counseling, offered through the Counseling and Educational Psychology department is open to graduate students who are enrolled in CEP's Counseling, School Psychology, and Counseling Psychology programs, and to graduate students who are enrolled in Social Work and Marriage and Family Therapy programs. It was established in the interest of meeting the needs of bilingual counseling students who seek training in the provision of Spanish language mental health services.

In order to begin the Minor courses, students **must currently be enrolled in a Mental Health program** as described above. They must **demonstrate intermediate level Spanish language skills** as evidenced by the Spanish Placement Exam and an oral interview with the program coordinator. Advanced level in Spanish counseling skills is required for the completion of the Minor. If a student feels that he/she needs to improve his/her level of academic Spanish prior to completing the required course work, or if the program coordinator determines that it is necessary, the student has the option of taking additional Spanish courses through the Languages and Linguistics department. Students will be required to take Spanish language courses until they have satisfied this requirement. Please note that online courses will not fulfill this requirement.

Prerequisites

In order to begin the Minor courses, students **must currently be enrolled in a Mental Health program** as described above. They must **demonstrate intermediate level Spanish language skills** as evidenced by the Spanish Placement Exam and an oral interview with the program coordinator. Advanced level in Spanish counseling skills is required for the completion of the Minor. If a student feels that he/she needs to improve his/her level of academic Spanish prior to completing the required course work, or if the program coordinator determines that it is necessary, the student has the option of taking additional Spanish courses through the Languages and Linguistics department. Students will be required to take Spanish language courses until they have satisfied this requirement. Please note that online courses will not fulfill this requirement.

How to Apply

If you are interested in pursuing a minor in Spanish Counseling and, you should complete the attached application and return it to the program coordinator. You are advised to meet with the program coordinator before enrolling in relevant coursework. This form apprizes the CEP department of your intention to pursue the Minor. To declare the Minor with the Graduate School, the student should list all relevant completed coursework on the Program of Study form that is submitted to the Graduate School prior to graduating. The form needs to be signed by the student's Academic Advisor, Dept. Head, Minor Faculty and Academic College Dean before submitting to the Graduate School. A Minor Faculty member is also required to sit on the committee for the student's Final Exam. For Doctoral students, this includes orals, dissertation proposal and defense exams.

Application: Spanish Counseling Minor Application Form (<https://cep.nmsu.edu/academic-programs/Spanish-Counseling-Minor-Application-Form.pdf>)

Program of Study

Students will successfully complete 9 credits of coursework specific to this program of study in order to obtain a Minor in Spanish Counseling. Courses will be taught by culturally competent faculty, adjunct professors, or community mental health professionals in the aforementioned disciplines. Students will choose one course from each of the following components: 1) Counseling language development, 2) Clinical experience, and 3) Sociocultural experiences.

Prefix	Title	Credits
Course Requirements		
<i>Counseling Language Development (Component #1)</i>		
Choose one from the following:		3
CEPY 6220	Spanish for Mental Health Professionals	

CEPY 5230	Counseling Theory and Technique	
<i>Clinical Experience (Component #2)</i>		
Choose one from the following:		3
CEPY 5997	Special Research Programs	
or CEPY 6996	Selected Topics	
CEPY 6590	Behavioral Health Practicum	
SOWK 5996	Special Topics	
FCST 5990	Supervised Clinical Practice	
<i>Sociocultural Experiences (Component #3)</i>		
Choose one from the following:		3
SPAN 547	Advanced Hispanic Film	
or SPAN 548	Advanced U.S.-Hispanic Film	
SPAN 567	Advanced Study in Chicano Literature	
Total Credits		9

Component #1: Counseling Language Development

CEPY 6220 Spanish for Mental Health Professionals This course will help students acquire the necessary Spanish language skills needed to function as Spanish-speaking mental health professionals. The course will cover psychological terminology, concepts, and theories in Spanish. Examination of the professional roles of bilingual mental health professionals and their roles within Latina/o and underserved communities will also be addressed in this course.

CEPY 5230 Counseling Theory and Technique This course will assist students in learning and practicing basic, culturally-appropriate micro counseling skills in Spanish through individual, dyad, and small group participation.

Component #2: Clinical Experience

CEPY 5997 Special Research Programs/ CEPY 6996 Selected Topics This course will require students to spend a minimum of 6 hours per week at a bilingual site, providing counseling, assessment, or supervision services within a variety of clinical settings that serve Spanish-speaking populations. The Minor coordinator must approve all placements. This course will also integrate a Spanish-speaking student process group for bilingual counseling students. In this group, students will have the opportunity to develop bilingual multicultural counseling competencies. Students may also present clinical cases, theoretical perspectives, interventions or techniques in Spanish and receive feedback and support from other bilingual members. A summer semester immersion experience in providing counseling services in Spanish in a Latin American and/or primarily Spanish-speaking country may be substituted for this experience.

Students have the option of completing their clinical hours for this course over **2 semesters** if so desired. The course requires an additional 6 clinical hours/week (if taken in one semester) or 3 clinical hours/week (if class is taken over the course of two semesters).

Note: This course is not to replace required practicum or internship experiences necessary for degree completion. Students are allowed to count hours they are accruing for their internship and/or practicum as long as they are (1) enrolled in both courses [598/698 and either 578/675 or 580/684] (2) are meeting the requirements for the 598/698 course [i.e. attending class meetings, etc.] and (3) a separate log is kept documenting work with Spanish speaking clients; this log also has to be signed by both 598/698 instructor and site supervisor

CEPY 6590 Behavioral Health Practicum This course will provide students the opportunity to participate in a supervised service-learning experience within community-based, interdisciplinary, primary care settings that serve medically underserved and high-risk groups. Students will each write and present a case study in Spanish regarding a Spanish-speaking client. Students will receive bilingual supervision regarding various topics such as training in Motivational Interviewing and discussion of Spanish-speaking clients from their practicum experience.

SOWK 5996 Special Topics This course will allow students to develop and practice skills in Spanish relevant to working with children and families in the child welfare system with a focus on the child protection process.

FCST 5990 Supervised Clinical Practice This course offers supervised clinical experience in Marriage and Family Therapy.

Component #3: Sociocultural Experiences

SPAN 547 Advanced Hispanic Film/SPAN 548 Advanced U.S.-Hispanic Film Advanced study of major films from Spain and Spanish-America and/or by Hispanics of the U.S.

SPAN 567 Advanced Study in Chicano Literature Study of all genres of Chicano literature.

*All courses outlined in the Program of Study have to be taken face-to-face. However, Spanish Counseling Minor Committee will review individual requests for any exceptions to this requirement.

Special Education - Graduate Minor

A minor in special education requires 9 credits of graduate coursework that carries the SPED prefix. Official minor documentation must be completed with the School of TPAL.

U.S.-Mexico Border Health Issues - Graduate Minor

A grade of B or higher is required for all requirements for this graduate minor.

Prefix	Title	Credits
Select four courses from the following:		
PHLS 5610	Health Disparities: Determinants and Interventions	12
PHLS 5620	Cross-Cultural Aspects of Health	
PHLS 5630	International Health Problems	
PHLS 5640	Rural Health Issues

General Education & Viewing a Wider World Courses

Associates/Bachelor's General Education The New Mexico General Education Requirements

General Education at NMSU provides all students with a broad foundation and common framework upon which to develop knowledge and skills,

social consciousness and respect for self and others, thus enabling them to function responsibly and effectively now and in the future. General education courses at NMSU can be identified by the G suffix.

In accordance to state law (Post-Secondary Education Articulation Act) (<https://www.srca.nm.gov/parts/title05/05.055.0006.html>), the New Mexico Higher Education Department has established a state-wide model for General Education. Within the General Education model, is nine credits of electives that will be determined at an institutional level. The current approved NMSU General Education courses are listed below under each of the six general education areas.

Prefix	Title	Credits
Area I: Communications		10
Select one course from each sub group:		
<i>English Composition-Level 1</i>

General Education Elective 3-4

This requirement can be met with any "G" course in any area, excluding Area I: Communications and any crosslisted courses, that exceeds the minimum requirement.

or

ENGR 100G	Introduction to Engineering
or ENGR 100GH	Introduction to Engineering Honors

Total Credits 32-35

¹ For Area III: Laboratory Sciences and Area IV: Social/Behavioral Sciences, students **must** take one course from each for a total of 7 credits.

Students will then take an additional course in either Area III or Area IV for 3-4 credits depending on the students selection (i.e. Area III is 4 credits, Area IV is 3 credits).

Alternatives for Meeting General Education Requirements (9 credit hour rule)

Students taking nine or more credits in a specific subject area, even though the courses are not designated as General Education courses, will have met the general education requirements for that subject area. The courses can meet both major and general education requirements for the degree. For example, a student may complete ARTS 2610 Drawing II, ARTS 1240 Design I and ARTS 1250 Design II (9 hours) and thereby satisfy one course from the Area VI: Creative and Fine Arts category even though none of those courses carries a G suffix. Please check with the Center for Academic Advising and Student Support.

NMSU Viewing a Wider World Requirements

The Viewing a Wider World (VWW) requirement fosters intelligent inquiry, abstract logical thinking, critical analysis, as well as the integration and synthesis of knowledge. The program strives for literacy in writing, reading, speaking and listening. It teaches mathematical structures, acquainting students with precise abstract thought about numbers and space. The program also encourages an understanding of science and scientific inquiry, as it provides a historical consciousness, including an understanding of one's own heritage as well as respect for other peoples and cultures. To achieve its goals, the program includes an examination of values and stresses the importance of a carefully considered values system as it fosters an appreciation of the arts and general education. It provides the breadth necessary to have a familiarity with the various branches of human understanding. All VWW courses can be identified by the "V" suffix.

Prior to graduating, NMSU students are required to take two courses from separate colleges from the Viewing a Wider World list in the Catalog. These courses are upper-division (300-400 level) Viewing a Wider World courses and should be taken in a student's junior and/or senior year. One

of the two courses must be in a college other than their own. The other course may be taken within their home college, but this course:

1. must be in a different department from their major department;
2. must not be cross-listed with a course in their home department;
3. cannot be counted as one of the requirements for the student's major.

These courses strongly emphasize the international character and multicultural influences in the fields of study and strengthen information retrieval skills. There are two options that NMSU allows for replacing 3 credits of VWW requirement with another form of educational experience, these are:

1. **Study Abroad Experience-** consisting of at least four weeks of a Study Abroad program or university coursework in a foreign country earning 3 credits.
2. **Military Experience-** for students who have served at least four weeks of military service in a foreign country.

The Military and Veterans Programs Office website (<https://mvp.nmsu.edu/military-members/military-experience-waiver.html>) provides the instructions on how to request the waiver for Military Experience replacing 3 credits of VWW.

NOTE: This list is under continuous revision. Please check with the office of the college associate dean or with college advisors for additional eligible courses. Honors courses have a specific college designation based on course content. These are listed near the end of this section.

Alternatives for Meeting Viewing a Wider World Requirements

Students taking nine or more credits in a specific subject area, even though the courses are not designated as Viewing a Wider World courses, will have met the VWW requirements for that subject area.

The 9 credit hours must be in 300- to 400-level courses in one prefix area. For example, 9 upper-division ECON credits would fulfill one VWW area for students majoring in programs other than Economics.

Common Course Numbering Crosswalk

The Post-secondary Education Articulation Act (https://hed.state.nm.us/resources-for-schools/public_schools/nm-course-numbering-system/) charges the New Mexico Higher Education Department with establishing and maintaining a common course numbering system, in consultation with faculty. To this end, the common course numbering system includes both equivalent (Common) and unique courses.

- **Common Course:** is any course that is offered at multiple institutions throughout the state, has the same prefix/number combination, the same title, the same description, and at least 80% of the learning outcomes for the course are the same.
- **Unique Course:** is any course that is unique to the institution (the NMSU system), has a prefix/number combination, title, description and learning outcomes that are unique to the institution (the NMSU System).

The table below shows the previous NMSU System-wide course prefix/number combination, the future Common Course Numbering prefix/number combination, and an indicator of whether the course is deemed Common or Unique throughout the state.

Current Course	Past Course	Course Type Indicator

College of Agricultural, Consumer, and Environmental Sciences

Dean and Chief Administrative Officer- *Rolando A. Flores*

Associate Dean and Director of Academic Programs - *Donald Conner*

Associate Dean and Director of the Cooperative Extension Service - *Jon C. Boren*

Associate Dean and Director of the Agricultural Experiment Station - *Leslie D. Edgar*

Scholarship Coordinator - *Ashley Lama-Mendoza*

The College of Agricultural, Consumer and Environmental Sciences is comprised of eight departments:

- Agricultural and Extension Education (p. 283)
- Agricultural Economics and Agricultural Business (p. 297)
- Animal and Range Sciences (p. 310)
- Entomology, Plant Pathology and Weed Science (p. 327)
- Family and Consumer Sciences (p. 341)
- Fish, Wildlife and Conservation Ecology (p. 376)
- Plant and Environmental Sciences (p. 387)
- School of Hotel, Restaurant and Tourism Management (p. 416)

College Undergraduate Degree Requirements

1. Complete general education common core requirements.
2. Complete course requirements for the major.
3. Earn a minimum of 120 semester credits. Of this total at least 48 semester credits must be in upper-division courses (numbered 300 or above).
4. Earn a cumulative grade-point average of no less than 2.0.

Preprofessional Programs

NMSU offers a number of programs designed for transfer to professional schools through its undergraduate colleges. The program that is administered by the College of Agricultural, Consumer and Environmental Sciences is Preveterinary Medicine. Several majors are aligned for students to apply for the New Mexico State University Osteopathic Medicine Pathway Program to Burrell College of Osteopathic Medicine.

Veterinary Medicine (Preprofessional Training Only, Non-Degree)

The Doctor of Veterinary Medicine (D.V.M.) degree is a professional degree that is not offered by any college or university in New Mexico; however, you may complete the preparatory program required for admittance to the professional colleges of veterinary medicine at New Mexico State University.

The D.V.M. degree normally requires four years of training in a professional college subsequent to completion of a preveterinary program that requires at least three years of college-level instruction. In most instances a baccalaureate degree is a distinct advantage to the applicant.

Curriculum requirements are determined by the particular school or college of veterinary medicine. The Department of Animal and Range Sciences maintains current requirements for Colorado State University, Washington State, Oregon State and Texas A&M. You should check with an advisor for specific course requirements. As a student from New Mexico, you may be eligible for financial assistance under the program of the Western Interstate Commission for Higher Education (WICHE). See the section on WICHE in the General Information chapter under Resources for Students for more information.

Bachelor Degrees

A

- Agricultural and Extension Education (Agricultural Communications) - Bachelor of Science in Agriculture (p. 291)
- Agricultural and Extension Education (Agricultural Education Teaching) - Bachelor of Science in Agriculture (p. 293)
- Agricultural and Extension Education (Agricultural Extension/Development) - Bachelor of Science in Agriculture (p. 295)
- Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture (p. 330)
- Agricultural Biology (Applied Microbiology) - Bachelor of Science in Agriculture (p. 332)
- Agricultural Biology (Entomology) - Bachelor of Science in Agriculture (p. 333)
- Agricultural Biology (Environmental Biology) - Bachelor of Science in Agriculture (p. 334)
- Agricultural Biology (Invasive Pest Biology and Management) - Bachelor of Science in Agriculture (p. 336)
- Agricultural Communications - Undergraduate Minor (p. 296)
- Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture (p. 305)

- Agronomy - Bachelor of Science in Agriculture (p. 398)
- Animal Science (Animal Industry) - Bachelor of Science in Agriculture (p. 319)
- Animal Science (Science) - Bachelor of Science in Agriculture (p. 321)

C

- Conservation Ecology - Bachelor of Science in Conservation Ecology (p. 380)

E

- Environmental Science - Bachelor of Science in Environmental Science (p. 399)

F

- Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences (p. 359)
- Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences (p. 361)
- Fisheries and Wildlife Science (Aquatic Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 381)
- Fisheries and Wildlife Science (Wildlife Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 384)
- Food Science and Technology (Culinary Science) - Bachelor of Science in Food Science and Technology (p. 363)
- Food Science and Technology (Meat Science) - Bachelor of Science in Food Science and Technology (p. 364)
- Food Science and Technology (Science, Technology and Engineering) - Bachelor of Science in Food Science and Technology (p. 366)

G

- General Agriculture - Bachelor of Science in Agriculture (p. 338)
- Genetics and Biotechnology - Bachelor of Science in Genetics (p. 401)

H

- Horticulture (Turfgrass Science and Management) - Bachelor of Science in Agriculture (p. 406)
- Horticulture - Bachelor of Science in Agriculture (p. 404)
- Hotel, Restaurant and Tourism Management - Bachelor of Science (p. 427)
- Hotel, Restaurant and Tourism Management - Bachelor of Science (Online) (<https://catalogs.nmsu.edu/global/nmsu-global/hotel-restaurant-tourism-mgt-bs-online/>)
- Human Development & Family Science - Bachelor of Science (p. 368)

- Natural Resource Economics and Policy - Bachelor of Science in Agriculture (p. 307)

R

- Range Science - Bachelor of Science in Agriculture (p. 323)

S

- Soil Science (Environment and Resource Management) - Bachelor of Science in Agriculture (p. 409)
- Soil Science (Soil and Water Science) - Bachelor of Science in Agriculture (p. 411)
- Soil Science (Soils) - Bachelor of Science in Agriculture (p. 413)

Masters Degrees

A

- Agricultural and Extension Education (Agricultural Strategic Communications) - Master of Arts (Online) (<https://catalogs.nmsu.edu/global/nmsu-global/agricultural-extension-education-agricultural-strategic-comm-ma-online/>)
- Agricultural and Extension Education - Master of Arts (p. 95)
- Agricultural and Extension Education - Master of Arts (Online) (<https://catalogs.nmsu.edu/global/nmsu-global/agricultural-extension-education-ma-online/>)
- Agricultural Biology - Master of Science (p. 96)
- Agricultural Economics - Master of Science (p. 97)
- Agriculture (Agribusiness) - Master of Agriculture (p. 93)
- Agriculture (Agribusiness) - Master of Agriculture (Online) (<https://catalogs.nmsu.edu/global/nmsu-global/agriculture-agribusiness-mag-online/>)
- Agriculture (Domestic Animal Biology) - Master of Agriculture (p. 94)
- Agriculture (Domestic Animal Biology) - Master of Agriculture (Online) (<https://catalogs.nmsu.edu/global/nmsu-global/agriculture-domestic-animal-biology-master-agriculture-online/>)
- Animal Science - Master of Science (p. 99)

F

- Family and Consumer Sciences (Couples, Marriage and Family Therapy) - Master of Science (p. 147)
- Family and Consumer Sciences (Food Science and Technology) - Master of Science (p. 146)
- Family and Consumer Sciences (Hotel, Restaurant and Tourism Management) - Master of Science (p. 147)
- Family and Consumer Sciences (Human Nutrition & Dietetic Sciences) - Master of Science (p. 149)
- Fish, Wildlife and Conservation Ecology - Master of Science (p. 150)

H

- Horticulture - Master of Science (p. 154)

P

- Plant and Environmental Science - Master of Science (p. 161)

R

- Range Science - Master of Science (p. 166)

W

- Water Science and Management (Agricultural Water Resources) - Master of Science (p. 173)
- Water Science and Management (International Water Resilience) - Master of Science (p. 174)
- Water Science and Management (Water Economics and Policy) - Master of Science (p. 174)
- Water Science and Management (Water Informatics) - Master of Science (p. 175)
- Water Science and Management (Water Quality and Treatment) - Master of Science (p. 175)
- Water Science and Management (Watersheds and Aquatic/Riparian Wetlands) - Master of Science (p. 176)
- Water Science and Management - Master of Science (p. 172)

Doctoral Degrees**A**

- Animal Science - Doctor of Philosophy (p. 178)

M

- Molecular Biology - Doctor of Philosophy (p. 201)

P

- Plant and Environmental Science - Doctor of Philosophy (p. 204)

R

- Range Science - Doctor of Philosophy (p. 204)

T

- Transborder and Global Human Dynamics - Doctor of Philosophy (p. 206)

W

- Water Science and Management (Agricultural Water Resources) - Doctor of Philosophy (p. 209)
- Water Science and Management (International Water Resilience) - Doctor of Philosophy (p. 209)
- Water Science and Management (Water Economics and Policy) - Doctor of Philosophy (p. 210)
- Water Science and Management (Water Informatics) - Doctor of Philosophy (p. 210)
- Water Science and Management (Water Quality Treatments) - Doctor of Philosophy (p. 211)
- Water Science and Management (Watershed and Aquatic/Riparian Wetlands) - Doctor of Philosophy (p. 211)
- Water Science and Management - Doctor of Philosophy (p. 208)

Undergraduate Minors**A**

- Agricultural and Extension Education - Undergraduate Minor (p. 296)
- Agricultural Business Management - Undergraduate Minor (p. 309)
- Agricultural Communications - Undergraduate Minor (p. 296)
- Agronomy - Undergraduate Minor (p. 415)

C

- Conservation Ecology - Undergraduate Minor (p. 387)
- Culinary Science - Undergraduate Minor (p. 375)

D

- Dairy Science - Undergraduate Minor (p. 326)

E

- Entomology - Undergraduate Minor (p. 340)
- Environmental Science - Undergraduate Minor (p. 415)

F

- Fashion Merchandising & Design - Undergraduate Minor (p. 375)
- Food Science - Undergraduate Minor (p. 375)

G

- Genetics and Biotechnology - Undergraduate Minor (p. 415)

H

- Horse Management - Undergraduate Minor (p. 326)
- Horticulture - Undergraduate Minor (p. 416)
- Hotel, Restaurant and Tourism Management - Undergraduate Minor (p. 429)
- Human Animal Interaction - Undergraduate Minor (p. 326)
- Human Development and Family Science - Undergraduate Minor (p. 375)

L

- Leadership in Agricultural Communications - Undergraduate Minor (p. 296)
- Livestock Production - Undergraduate Minor (p. 326)

N

- Natural Resource Economics - Undergraduate Minor (p. 310)
- Nutrition - Undergraduate Minor (p. 375)

P

- Pest Management - Undergraduate Minor (p. 340)
- Plant Pathology - Undergraduate Minor (p. 340)

R

- Ranch Management - Undergraduate Minor (p. 326)
- Range Science - Undergraduate Minor (p. 327)

S

- Soil Science - Undergraduate Minor (p. 416)

W

- Weed Science - Undergraduate Minor (p. 340)
- Wildlife Science - Undergraduate Minor (p. 387)

Graduate Minors

A

- Agricultural and Extension Education - Graduate Minor (p. 219)
- Animal Science - Graduate Minor (p. 219)

F

- Fish, Wildlife and Conservation Ecology - Graduate Minor (p. 221)
- Food Studies - Graduate Minor (p. 221)

M

- Molecular Biology - Graduate Minor (p. 224)

R

- Range Science - Graduate Minor (p. 225)

Accreditation

The Agricultural Education Teaching program in the Department of Agricultural and Extension Education is accredited by the Council for the Accreditation of Educator Preparation (formerly NCATE) and the State Public Education Department of New Mexico. It is critical that students consult their academic advisor prior to selection of courses for the agriculture, secondary science and teaching endorsements.

The Family and Consumer Sciences Education major in the Department of Family and Consumer Sciences is accredited by the Council for the Accreditation of Educator Preparation (formerly NCATE) and the State Public Education Department of New Mexico, and meets the teacher licensure requirements for the State of New Mexico. Course selection is restricted to meet accreditation requirements, so students should consult their academic advisor prior to selection of courses for the Family and Consumer Sciences Education program.

The Human Nutrition & Dietetic Science (HNDS) major, Dietetics option, is a Didactic Program in Dietetics (DPD) accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). The program meets national requirements to prepare students for a Dietetic Internship. Course selection is restricted to meet accreditation requirements. Students should consult their academic advisor prior to selection of courses for the HNDS Dietetics program.

Agricultural and Extension Education Undergraduate Program Information

The department offers a broad-based curriculum with majors, options and minors that prepare students for many careers as professional educators, communicators and leaders in agricultural, natural resource, technology and related disciplines. Some example occupations that the department prepares its students to enter are agriculture teacher, media specialist, technology teacher, Extension agent, NMDA or USDA

professional, industry educational specialist, and development specialist. Graduates work in domestic and/or international settings.

General Undergraduate Degree Requirements

You must meet the general education and departmental requirements for the degree and the major, option or minor chosen. You must establish a cumulative grade-point average of not less than 2.5 before you are admitted into the student teaching or other internship program. You need a minimum of 48 hours in technical agriculture for the secondary teaching certificate program in agriculture.

You may select technical courses required for completion of the majors and options from the following areas:

- agricultural economics (p. 297);
- agricultural mechanics;
- animal and range sciences (p. 310);
- entomology, plant pathology and weed science (p. 327);
- fish, wildlife and conservation ecology (p. 376);
- plant and environmental sciences (p. 387).

Graduate Program Information

The Department of Agricultural and Extension Education requires the following items be sent directly to the department for admission:

- **Three letters of recommendation** - Applicants should request letters of recommendation from individuals who know them well enough to comment on their professional skills and abilities, and on their ability to complete graduate-level work.
- **Career statement** - The two-page letter of application should clearly identify applicant's professional and career goals as well as reasons for pursuing the degree.
- **Personal Interview** - Upon receipt of all application materials, a personal interview may be required at the discretion of the Departmental Graduate Committee.

***Do not send the above items to the Graduate School as this will cause a delay on your admission status.**

General Graduate Degree Requirements

The major requires courses in research methods, teaching methods and data collection and analysis; a graduate seminar; and a thesis or creative component. The department also have two 9 credit minors which are available to students completing major work in other departments.

Thesis plan: Requires a minimum of 30 semester credits which includes 4-6 credits of thesis. *(Both plans require a final oral examination).*

Non-Thesis plan: Requires 32 semester credits of course work which includes a focused creative component. *(Both plans require a final oral examination).*

Flexibility in each program allows students to pursue professional interests and to develop specialized competencies in agricultural and extension education, technology education, and in technical and scientific areas. The department delivers courses in evening, weekend and distance formats (go to <https://global.nmsu.edu/> and click on degree programs, and then Agricultural and Extension Education) to accommodate student needs. Previous experience in teaching, extension and/or other professional education positions is highly recommended to be considered for a graduate teaching assistantship.

The department offers major work for a Master of Arts in Agricultural and Extension Education. The degree can be obtained with emphasis in

- Agricultural Teacher Education,
- Extension Education,
- Strategic Communications

Degrees for the Department

Bachelor's Degree(s)

- Agricultural and Extension Education (Agricultural Communications) - Bachelor of Science in Agriculture (p. 291)
- Agricultural and Extension Education (Agricultural Education Teaching) - Bachelor of Science in Agriculture (p. 293)
- Agricultural and Extension Education (Agricultural Extension/Development) - Bachelor of Science in Agriculture (p. 295)

Master's Degrees

- Agricultural and Extension Education - Master of Arts (p. 95)

Minors for the Department

- Agricultural and Extension Education - Graduate Minor (p. 219)
- Agricultural and Extension Education - Undergraduate Minor (p. 296)
- Agricultural Communications - Undergraduate Minor (p. 296)
- Leadership in Agricultural Communications - Undergraduate Minor (p. 296)

Professor Steve Fraze, Department Head

Professors Edgar, Fraze, VanLeeuwen; **Assistant Professors** Roberts-Hill, Norris-Parrish, Spears, Norris

D. Edgar, Ph.D. (Texas A&M)– agricultural education, agricultural mechanization, methods of instruction, curriculum design and evaluation; S. Fraze, Ph.D. (Texas A&M)–agricultural communications, agricultural education, agricultural extension; W. Norris, Ph.D. (Mississippi State)– youth development, youth leadership, youth program development; L Roberts-Hill, Ph.D. (Texas Tech) - visual and science communication, community networks, public opinion, and the scholarship of teaching and learning; S Norris, Ph.D. (Texas A&M) - agricultural communications, agricultural literacy, science communication, national security, education, youth development; L Spears, Ph.D. (Iowa State University) - agricultural education and studies, curriculum and instructional technology; D. VanLeeuwen, Ph.D. (Oregon State)– statistics and research design

Agricultural Extension Education Courses

AXED 1110. Introduction to Agricultural, Extension, and Technology Education

3 Credits (3)

Orientation to programs, philosophies, competencies and leadership skills needed by professionals in agricultural and technology education, extension education, agricultural communications, and related career opportunities in industry, governmental agencies, and international organizations.

Learning Outcomes

1. Orient student to the AXED Department and their role as students.
2. Explore career opportunities (and the related skill sets needed for success) in public schools, career and technical institutions, the cooperative extension service, community, and international

development, agricultural communications, agricultural industry associations and public service (e.g., NMDA and USDA).

3. Develop an understanding of the self-leadership skills needed to be effective in a variety of professional and personal environments.
4. Familiarize students with the aspects included within a total program in agricultural or technology education.
5. Strengthen skills in oral and written communications.

AXED 1130. Techniques in Agricultural Mechanization

3 Credits (2+2P)

Development of competencies in agricultural mechanics including safety, tool identification, operation and maintenance of hand and power tools, cold metal, drafting, and plumbing procedures. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry.

Learning Outcomes

1. To understand basic drafting language used in orthographic and isometric drawings.
2. To develop an understanding of the proper use and safety of basic hand and power tools.
3. To develop skills needed to operate basic hand and power tools correctly.
4. To develop an understanding of surveying methods and building layout for construction.
5. To develop an adequate level of competence in workshop techniques.
6. To prepare students to properly teach and demonstrate these techniques to others who may use them as a means of earning a living.

AXED 2110. Metal Fabrication

3 Credits (2+4P)

Instruction and skill development in process and procedures of metal fusion, including gas and electric welding techniques, safety, and oxy-acetylene cutting and welding. Designed to improve mechanical skills needed in agriculturally related occupations in education and industry.

Learning Outcomes

1. To develop students understanding and appreciation for metal fabrication, design and teaching.
2. To develop in the student an adequate level of competence in shop work techniques, so that the student may be able to properly teach and demonstrate multiple metal fabrication techniques to others who may use them as a mean of earning a living.
3. To develop the student's fundamental techniques in shielded metal arc welding, oxy-acetylene welding and cutting operations, metal inert gas welding (MIG), and gas tungsten-arc welding as needed in repair and construction of agricultural equipment.
4. Student will understand appropriate shop management techniques and have an appreciation for mechanized agriculture.
5. To assist the student in developing an understanding and comprehension of the fundamental principles that apply to the area of basic shop work included in this course; such as proper selection of electrodes, oxy-acetylene filler rods, welding processes best suited for given welding conditions, the proper tool for the job, etc.
6. To develop in the student comprehension of safety practices that apply to the areas of basic shop work, tools, and equipment required in the course.

AXED 2130. Early Field-Based Experience

2 Credits (2)

First Hand view of the roles of professional educators through field experiences with Cooperative Extension or other government agencies. Includes 4 weeks of classroom instruction and 30 hours of observation in a work setting. Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes

1. Identify successful characteristics, tips and strategies that an agricultural education professional may use as part of their program.
2. Identify key components of an agricultural education program
3. Actively observe a local agricultural education program.
4. Identify ways that your agency program networks and interacts with clientele and community

AXED 2996. Special Topics

1-4 Credits (1-4)

Specific subjects and credits to be announced in the Schedule of Classes. Student can only take up to 6 credits per semester, and will not be able to have more than 12 credits count towards their degree. May be repeated up to 12 credits.

Learning Outcomes

1. Varies

AXED 3115. Small Engine Technology

3 Credits (2+2P)

Development of competencies in small gasoline engines; theory, operation, design, maintenance and safety. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry. May be repeated up to 3 credits.

AXED 3120. Agricultural Structures

3 Credits (2+3P)

Selection and use of agricultural building materials. Design, construction, and maintenance of agricultural structures. Development of competencies in carpentry, concrete, electricity, masonry, and safety. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry. May be repeated up to 3 credits.

AXED 3130. Advanced Technology in the Agricultural Mechanization

3 Credits (2+3P)

Students will construct a project in the area of agricultural mechanization under the direction of instructor. Project must be completed within a semester and of sufficient complexity for 3 credits.

Prerequisite: AXED 1130 and AXED 2110 or consent of instructor.

AXED 3150. Philosophy and Methods of Contests

3 Credits (3)

Covers the roles that career development events (contests) play in agricultural and technology education and in extension programs. Topics include competition and cooperation, winning and losing, ethics, use of community resources, and academic and employability skills taught through contests. Coaching as a teaching method is introduced and expanded. Students will assist with the coordination of various career development events. May be repeated up to 3 credits.

AXED 3210V. John Muir. Lessons in Sustainability

3 Credits (3)

This course examines the life of John Muir in the context of sustainability. Muir was a farmer, inventor, explorer, botanist, glaciologist, conservationist, and noted nature author. He was influential in the National Parks movement and in starting the Sierra Club. Living in the natural world influenced his faith and philosophy. By examining his life and the themes that shaped it, students will develop an understanding of

what it means to live sustainably and to contribute beyond their personal lives to a sustainable future. May be repeated up to 3 credits.

AXED 3996. Special Topics

1-4 Credits (1-4)

Course addresses specific subjects and issues as identified by department. Topics and credits to be announced in the Schedule of Classes. Students can only take up to 4 credits per semester and no more than 6 credits of the course may be applied to a degree. May be repeated up to 12 credits.

Learning Outcomes

1. Various

AXED 4110. Management of Change, Diffusion, and Adoption of Innovations

3 Credits (3)

Factors that influence the rates of diffusion and adoption of innovations. Consequences of adopting or rejecting innovations. Processes by which change agents influence introduction and adoption of innovations. Taught with AXED 5110. May be repeated up to 3 credits.

Learning Outcomes

1. Critically examine the adoption-diffusion model. Included are issues such as social class differentials in the dissemination of ideas and technology, non-adoption as a form of behavior, social and economic constraints on adoption behavior, and the consequences of adoption at both the individual and social levels.
2. Demonstrate understanding of how the rapid pace of change in technology and applied science may have good and bad outcomes.
3. Discuss the dissemination of new ideas and technology within various social units.
4. Discuss the applications of the adoption-diffusion model from the perspective of the change agent.
5. Enhance the development of leadership skills required to work with people in times of change.

AXED 4210. Curriculum Development and Assessment in Agricultural Education

3 Credits (3)

This course prepares students to develop curriculum, design lessons, and prepare appropriate assessments in an agricultural education setting. An emphasis will be placed on the developing curriculum using the currently established resources that are available to agriculture teachers.

Prerequisite: 2.5 GPA.

AXED 4215. Developing Excellent Programs in Career and Technical Education

3 Credits (3)

Students learn to develop excellence in the three components of a successful secondary school program in career and technical education: classroom and laboratory instruction, career and technical student organizations, and career development activities. Community-based program planning, utilizing partners, program marketing, and professional development are addressed as strategies for achieving excellence.

Methods of obtaining financing and maintaining accountability for the program are discussed. May be repeated up to 3 credits.

AXED 4220. Methods for Teaching Agricultural and Technology Education

3 Credits (3)

Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences. May be repeated up to 3 credits.

Prerequisite: GPA of 2.5 or above.

**AXED 4230. Directed Teaching in Agricultural or Technology Education
15 Credits (15)**

Semester-long off-campus professional experience in directed teaching and observation provided in selected centers under secondary agricultural or technology education supervising teachers. Consent of Instructor required.

Prerequisite: AXED 4215, AXED 4220 and consent of instructor.

**AXED 4235. Directed Teaching in Extension Education
3-12 Credits (3-12)**

Four-to-fourteen-week, professional experiences in directed teaching and observation provided in cooperative extension at the county, regional, or state level. Consent of instructor required. May be repeated up to 12 credits.

**AXED 4510. Introduction to Research Methods
3 Credits (3)**

Introduction to research design and methodology in education and behavioral sciences. Overview of common research designs and data collection strategies. Prepares students to critique published research and understand basic skills including hypothesis development and conducting a literature search. Students must be in junior standing to enroll. May be repeated up to 3 credits.

**AXED 4520. Methods in Career and Technical Laboratory Instruction
2 Credits (2)**

For students planning to teach agricultural or technology education at a secondary or postsecondary level. Focus on planning, delivering, and evaluating instruction in laboratories; and on CPR, first aid, and NCCER certifications. Laboratory safety and tool, equipment, and laboratory management systems are also emphasized. Restricted to AXED Majors. May be repeated up to 2 credits.

**AXED 4610. Leadership On Agricultural and Natural Resource Issues
3 Credits (3)**

Investigates leadership concepts and group dynamics as they relate to a changing world and complex agricultural and natural resource issues. Topics include emotional intelligence, leading change, political leadership, facilitating agreement, team building, and managing conflict in agricultural and natural resource settings. May be repeated up to 3 credits.

**AXED 4620. Methods of Teaching Biological, Earth and Physical Sciences in Agriculture
3 Credits (3)**

Students learn to set up and teach in a modular agriscience laboratory, utilizing a variety of technologies. Modules covered focus on incorporating biological, earth and physical sciences into agricultural instruction and may include: Tissue culture, animal anatomy, hydroponics microscopy, electrophoresis, microbiology, soils and plant nutrients, water quality, water systems, entomology, integrated pest management, and renewable energy applications. Students develop their own modules and/or experiments.

**AXED 4710. 4-H Youth Development
1 Credit (1)**

On-line course explores 4-H Youth Development as an integral part of the Cooperative Extension Service. Topics to be addressed include mission, philosophy, delivery modes, audiences and partnerships. Course is relevant for anyone interested in pursuing a career in Cooperative Extension. May be repeated up to 1 credit.

**AXED 4715. The FFA Organization: An Overview
1 Credit (1)**

Online course addressing the history, mission, philosophy and structure of the New Mexico and National FFA Organizations and their relationship

to supervised agriculture experiences and the agricultural education curriculum. Course is relevant for anyone interested in pursuing a career in agricultural education. May be repeated up to 1 credit.

**AXED 4991. Undergraduate Research
1-4 Credits (1-4)**

Research experience in agricultural, extension, and technology education with applications to selected issues and problems. May be repeated up to 4 credits.

**AXED 4997. Independent Study in Agricultural, Extension, or Technology Education
1-3 Credits (1-3)**

Specific subjects are agreed upon by the student and instructor. Students must be juniors or seniors to enroll. May be repeated up to 6 credits.

**AXED 5110. Management of Change, Diffusion, and Adoption of Innovations
3 Credits (3)**

Factors that influence rates of diffusion and adoption of innovations. Consequences of adopting or rejecting innovations. Processes by which change agents influence introduction and adoption of innovations. Taught with AXED 4110 with differential assignments for graduate students. May be repeated up to 3 credits.

Learning Outcomes

1. Critically examine the adoption-diffusion model. Included are issues such as social class differentials in the dissemination of ideas and technology, non-adoption as a form of behavior, social and economic constraints on adoption behavior, and the consequences of adoption at both the individual and social levels.
2. Demonstrate understanding of how the rapid pace of change in technology and applied science may have good and bad outcomes.
3. Discuss the dissemination of new ideas and technology within various social units.
4. Discuss the applications of the adoption-diffusion model from the perspective of the change agent.
5. Enhance the development of leadership skills required to work with people in times of change.

**AXED 5130. Advanced Agricultural Mechanization
3 Credits (3)**

This course provides an overview of advanced agriculture mechanization techniques and concepts. Precision farming tools and applications will be introduced, and hands-on activities will be utilized. A discussion about applications and benefits will frame the course lectures.

Learning Outcomes

1. Describe and classify various precision agriculture software/hardware technologies
2. Demonstrate usage of various precision agriculture technologies
3. Understand decision making processes associated with implementation of precision agriculture technologies
4. Analyze the costs, time, and application of precision agriculture technologies

**AXED 5150. Strategic Communications Campaigns and Evaluation
3 Credits (3)**

Client-based marketing and communication needs for stakeholders in agricultural and life sciences. Students will learn brand awareness for agricultural stakeholders by developing a campaign of communications and marketing materials using multiple channels (e.g., written, visual, social). Students will also evaluate the materials for their audience reach, visibility, and effectiveness. Strategic communications involve planning, prioritizing, and evaluating. Students will gain experience implementing

these needs with a real-world client to keep materials relevant to industry demands. May be repeated up to 3 credits.

Learning Outcomes

1. Identify communications-related needs with a client or stakeholder in the food, agricultural, natural resources, and human (FANH) sciences.
2. Define priority communications areas to address client or stakeholder needs.
3. Direct a communications plan with channels, tactics, steps, and timelines.
4. Develop a campaign of communications materials (e.g., written, visual, social) around a client's needs.
5. Evaluate the reach, visibility, and effectiveness of the communications materials.
6. Manage a client's brand with desired audiences through establishing, promoting, and reinforcing messages.
7. Publish portfolio materials showcasing the client's brand.

AXED 5155. Youth Program Development and Management 3 Credits (3)

Designed for professionals involved in youth group activities. Basic concepts in planning, conducting, and managing educational youth programs in a variety of organizations. Taught with AXED 415 with differentiated assignments for graduate students. May be repeated up to 3 credits.

AXED 5160. Teaching Adults in Nonformal Settings 3 Credits (3)

The adult and postsecondary learner; adult learning styles and principles; use of community resources and problem-solving techniques; and learning strategies for adults in formal and nonformal education. Taught with AXED 430 with differentiated assignments for graduate students. May be repeated up to 3 credits.

AXED 5165. History and Philosophy of Agricultural and Extension Education 3 Credits (3)

History and Philosophy of Agricultural and Extension Education serves as a foundational core of graduate studies in Agricultural and Extension Education. The design of the course is to acquaint the student with a broad perspective of cultural and historical conditions that have shaped both education and agricultural education as we know it today. The primary purpose of this course is to explore the nature of selected philosophical concepts and philosophers and to evaluate their influence upon education and agricultural/extension education in the United States. In addition to philosophical influences, students will examine the historical events and governmental laws and policies that have evolved and developed our educational system of today.

Learning Outcomes

1. Understand the principles of philosophy in education and agricultural and extension education.
2. Recognize the influence of philosophers and philosophical documents upon education and agricultural and extension education.
3. Analyze the historical foundations that have established our modern educational system.
4. Develop a personal philosophy regarding education and agricultural education.

AXED 5170. Keys for Agricultural and Rural Development 3 Credits (3)

Introduction to concepts of development, the process of change, key factors that contribute to agricultural and rural development in a community, and strategies employed to effect change with implications

for international students or domestic students planning to work internationally. May be repeated up to 3 credits.

AXED 5210. Curriculum Development and Assessment in Agricultural Education 3 Credits (3)

This course prepares students to develop curriculum, design lessons, and prepare appropriate assessments in an agricultural education setting. An emphasis will be placed on the developing curriculum using the currently established resources that are available to agriculture teachers.

Prerequisite: 2.5 GPA.

AXED 5215. Developing Excellent Programs in Career and Technical Education 3 Credits (3)

Students learn to develop excellence in the three components of a successful secondary school program in career and technical education: classroom and laboratory instruction, career and technical student organizations, and career development activities. Community-based program planning, utilizing partners, program marketing, and professional development are addressed as strategies for achieving excellence. Methods of obtaining financing and maintaining accountability of the program are discussed. Taught with AXED 445 with differentiated assignments for graduate students. May be repeated up to 3 credits.

AXED 5220. Methods for Teaching Agricultural and Technology Education 3 Credits (3)

Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences. Taught with AXED 446. May be repeated up to 3 credits.

Prerequisite: GPA of 3.0 or above.

AXED 5230. Directed Teaching in Agricultural or Technology Education 4-9 Credits (4-9)

Semester-long off-campus professional experience in directed teaching and observation provided in selected centers under secondary agricultural and technology supervising teachers. Students need to have completed a teaching methods class prior to enrolling in this course. Consent of Instructor required.

AXED 5235. Directed Teaching in Extension Education 4-9 Credits (4-9)

Four- to fourteen-week professional experiences in directed teaching and observation provided in cooperative extension at the county, regional, or state level. Taught with AXED 448 with reduced credit hours for graduate students. Restricted to AXED majors. May be repeated up to 9 credits.

AXED 5310. New Mexico Water Issues 3 Credits (3)

Designed for agricultural and natural resource professionals who must educate others or provide leadership on complex water issues in New Mexico. Students will travel to four distinct geographic and cultural regions of the state and study water policies, issues, and delivery technologies in each region. Specific areas covered will be determined by resource professionals who will present past, current and future issues involved in the distribution of water. Urban impacts on water use will also be investigated. May be repeated up to 3 credits.

AXED 5320. Risk and Crisis Communications in Agricultural, Consumer, and Environmental Sciences 3 Credits (3)

The purpose of this course is to introduce risk and crisis as interdisciplinary concepts, reviewing theoretical frameworks from a variety of fields and perspectives, such as communication, social psychology and public relations. Students will develop a theoretical

understanding of all aspects of strategic communication pertaining risks. Using readings and reflective writings, you will understand how individuals cognitively process risks and how to leverage trust and knowledge to facilitate public understanding. In addition, you will learn crisis communication and management from an organizational perspective. Using case studies and discussions, students will be able to recommend strategies for managing crises occurred to agricultural and natural resource industries.

Learning Outcomes

1. Develop a critical understanding of theoretical and conceptual frameworks related to risk and crisis communications
2. Use an integrated framework to analyze the communication strategies used by the agricultural and natural resource industries
3. Recommend effective and ethical strategies for managing actual and potential crises

AXED 5510. Research Methods

3 Credits (3)

Students learn the research process as it is applied to solving problems in the behavioral sciences. Prepares students to conduct and critique research and to diffuse research findings. Implications, applications, and ethics of research also stressed. Students develop a research proposal for a problem of their choice. May be repeated up to 3 credits.

AXED 5515. Data Collection and Analysis

3 Credits (3)

Introduction to basic concepts of data collection and analysis. Interpretations from observational studies and controlled experiments. Roles of descriptive and inferential statistics in a complete data analysis. Mean, median, standard deviation, and graphical summaries of data. Correlation and simple regression. One- and two-sample tests and confidence intervals. Chi-square tests and basic analysis of variance. Competency in arithmetic and algebra required. An undergraduate statistics course recommended. May be repeated up to 3 credits.

AXED 5610. Leadership on Agricultural and Natural Resource Issues

3 Credits (3)

Investigates leadership concepts and group dynamics as they relate to a changing world and complex agricultural and natural resource issues. Topics include emotional intelligence, leading change, political leadership, facilitating agreement, team building, and managing conflict in agricultural and natural resource settings. Taught with AXED 475 with differential assignments for graduate students. May be repeated up to 3 credits.

AXED 5615. Effective Management of Volunteer Programs

3 Credits (3)

For individuals currently involved in, or interested in being involved in, the management and supervision of volunteer programs. Emphasis on practical application, utilizing a research and academic base. Explores the roles, functions, and tasks of volunteers and managers of volunteers including recruitment, orientation and training, supervision, evaluation, recognition and retention. May be repeated up to 3 credits.

AXED 5993. Workshops in Agricultural, Extension, and Technology Education

1-3 Credits (1-3)

Workshop procedures applied to current trends in agricultural, extension, and technology education. A maximum of seven credits will count towards a degree. May be repeated up to 7 credits.

AXED 5994. Creative Component

1-4 Credits (1-4)

For nonthesis program. Individual investigations or projects, either qualitative or quantitative studies. A maximum of six credits will count towards a degree. May be repeated up to 88 credits.

AXED 5996. Special Topics

1-4 Credits (1-4)

Specific subjects and credits to be announced in the Schedule of Classes. Students can take only a maximum of four credits per semester and no more than six credits will count towards a degree. May be repeated up to 6 credits.

AXED 5998. Internship/Cooperative Experience

1-6 Credits (1-6)

Supervised professional on-the-job learning experience. May be repeated up to 6 credits.

AXED 5999. Master's Thesis

1-6 Credits (1-6)

Thesis. May be repeated up to 88 credits.

AXED 7000. Doctoral Dissertation

1-9 Credits (1-9)

Independent research planned, conducted and reported in consultation with and the direction of a major professor. Open only to students pursuing graduate study beyond the master's degree level. Offered for variable credit, 1-18 credit hours, maximum of 18 credit hours. May be repeated up to 18 credits.

Prerequisite: Graduate Advisor Approval.

Learning Outcomes

1. Identify/define problems pertinent to the discipline.
2. Generate questions and/or a hypothesis to provide a solution to the problem.
3. Review and summarize the literature relative to the problem.
4. Apply appropriate research methods and collect data systematically.
5. Conduct research responsibly and ethically.
6. Evaluate, interpret, and analyze a body of empirical data and evidence.
7. Discuss findings in the broader context of the field.
8. Develop and sustain an evidence-based argument.
9. Write and speak critically and coherently.
10. Produce publishable results.

Agricultural Communication Courses

ACOM 1110. Introduction to Agricultural Communication

3 Credits (3)

Students will learn about the history and theories of agricultural communications, be introduced to the degree program, explore careers in the field, and examine the role of media in agricultural communications. May be repeated up to 3 credits.

Learning Outcomes

1. Identify classes needed in the degree program and relevant clubs.
2. Recall important times in history of agricultural communication and journalism.
3. Comprehend the communication process and identify its components.
4. Identify effective and efficient media for agricultural communication.
5. Analyze the various roles and uses of media in agriculture communication.
6. Apply theories of communication and journalism to class assignments.

ACOM 1120. Introduction to Graphic Design in Agriculture**3 Credits (3)**

This course focuses on introducing students to creating and critiquing visual communication materials in agricultural communications by developing understanding of visual communications, graphic design and branding principles as well as basic skills in using Adobe Illustrator and Photoshop software.

Learning Outcomes

1. Understand and demonstrate the correct use of formats, modes, and resolutions when creating or using graphics for various mediums and audiences.
2. Critique and evaluate graphic and photographic design elements in agricultural communications pieces.
3. Demonstrate a working knowledge of the Adobe Illustrator and Photoshop software and their uses for implementing principles of graphic design and branding.

ACOM 1130G. Effective Leadership and Communication in Agriculture**3 Credits (2+2P)**

Theory and practice in leadership and communication for professionals who must work effectively in leadership and supervisory roles with people in agricultural business, industry, government agencies, and education. Course focuses on contemporary leadership theories.

Oral communication skills in informative and persuasive speaking, parliamentary procedure, and for small groups are developed. May be repeated up to 3 credits.

Learning Outcomes

1. Understanding Leadership: Definitions of Leadership; Agricultural Education, FFA , Leadership; Leadership Categories; Democratic, Authorization, and Situational Leadership; Personality and Leadership Relations; Developing Leaders; Personal Leadership Development; Ability, Experience, and the Opportunity to Lead; Leadership in the Workplace; Human Relations, Technical, and Conceptual Skills
2. Communication Skills: Communication and Leadership; The Purpose of Communication; Forms of Communication; Communication Barriers and Styles; Verbal and Nonverbal Communication; Feedback; Self Communication and Interpersonal Communication
3. Leading Individuals and Groups: Group Dynamics and Team Building; Democratic Group Leadership; Importance of Groups; Types of Groups; Organizing Groups; Group Dynamics, Development, and Discussion
4. Conducting Successful Meetings: Skills Developed by Bring an Officer; Basic Meeting Functions; Characteristics of a Good Meetings; Planning and Preparing for Meetings; The Meeting Room; Committees; Informative and Motivational Meetings; Group Member Involvement; Officer and Member Responsibilities; Developing a Program of Activities

ACOM 2120. Photography in Agriculture**3 Credits (1+2P)**

This is a field-based course focused on how to students use the camera as a tool to make the rules of photography and design work for the student's style, creativity, and goals pertaining to application of photography in agricultural communications. Students develop and disseminate a photography portfolio through a variety of communications channels.

Learning Outcomes

1. Utilize a DSLR or mirrorless camera to analyze scenarios to effectively curate a body of work that compliments agricultural communications practice

2. Demonstrate working knowledge of camera equipment and photography principles to create visual stories
3. Evaluate and critique imagery for use of photography skills and principles

ACOM 2998. Early Field- Based Experience in Agricultural Communications**1-4 Credits (1-4)**

This course is designed to help you understand people and how to communicate with people. The key to all journalism or communications-related courses is to understand the audience well enough to know how to speak like them, to them, and to your stakeholders. The most successful communicators exhibit greatness in themselves and in their peers. Communicators cannot do their job if they do not show up with their best attitude and work ethic. Don't let your audience down, and we will make sure you are equipped to do so. May be repeated up to 6 credits.

Learning Outcomes

1. Explain the role of communications in the agricultural or science industries.
2. Develop a communication campaign for an agriculturally related client.
3. Identify key principles of communication channels including newswriting, radio production, and communication plans.
4. Create effective internship application materials to meet needs in the industry.
5. Design a job portfolio that includes examples of communications experience.

ACOM 3110. Agricultural Communications**3 Credits (3)**

Principles and practical experience in news writing, radio production, newsletter design, public meeting presentations, video productions, graphics, and public relations activities, especially as related to the fields of agriculture and family and consumer sciences.

ACOM 3115. Global Issues in Agricultural Communications and Marketing**3 Credits (3)**

Global perspectives related to international agricultural communications and marketing. The course will provide real-world settings for students to advance their awareness of international issues influencing marketing and trade in the United States and abroad. The course will expose students to high-impact learning, research skill development, communication skill development with a global mindset, and international travel. May be repeated up to 6 credits.

Learning Outcomes

1. Explain the role of communications and marketing in international agriculture.
2. Develop an awareness of global agricultural issues and how they impact domestic and international trade.
3. Increase awareness of global perspectives in agriculture.
4. Discover cultural similarities and differences within the U.S. and the selected country.
5. Investigate agricultural communications and marketing issues using an applied perspective.
6. Communicate course experiences through reflective analyses, photojournalism blog entries, social media campaigns, and presentations.

ACOM 3125. Website User Experience Design in Agriculture**3 Credits (3)**

The purpose of this course is for students acquire user experience development, coding and web design skills in order to create a live personal portfolio website that demonstrates their professional skills and experiences in agriculture.

Learning Outcomes

1. Evaluate websites based on user experience principles
2. Use the fundamentals of HTML and CSS to edit code
3. Implement user experience principles in website design
4. Develop a website using WordPress
5. Explain and justify web design decisions

ACOM 3150. Communications Campaigns in Agriculture**3 Credits (3)**

Client-based marketing and communication needs for stakeholders in agricultural and life sciences. Students will learn brand awareness for agricultural stakeholders by developing a campaign of communications and marketing materials using multiple modes (e.g., written, visual, social). Students in this course will gain an overall understanding of the agricultural communications industry by developing portfolio materials, prepare for the job and internship search process, and identify the skills necessary to grow in and contribute to a communications profession.

Learning Outcomes

1. Students will be able to identify communications-related needs with a client or stakeholder in the food, fiber, and natural resources industries.
2. Direct a communications plan with channels, tactics, steps, and timelines for a client.
3. Develop a campaign of communications materials (e.g., written, visual, social) around a client's needs.
4. Manage a client's brand with desired audiences through establishing, promoting, and reinforcing messages.

ACOM 3160V. Communicating Agriculture & Science to the Public**3 Credits (3)**

Principles and practical experience in general communications channels (i.e., news writing, radio production, newsletter design, public meeting presentations, video productions, graphics, and public relations activities) related to the fields of agricultural, consumer, or environmental sciences. Students in this course will gain an overall understanding of the agricultural communications industry and identify the skills necessary to grow in and contribute to a communications profession.

Learning Outcomes

1. Explain the role of communications in the agricultural, consumer, or environmental science industries.
2. Develop a communication campaign for an agricultural, consumer, or environmental science related client.
3. Identify key principles of communication channels including news writing, radio production, and communication plans.
4. Design a social media campaign including Instagram, Facebook, Twitter, and/or other emerging platforms.
5. Develop skills in media communications including public relations, conducting radio and television interviews, developing interview skills and identifying the needs of an audience.
6. Create effective internship application materials to meet needs in the industry.
7. Design a job portfolio that includes examples of communications experience.

8. Examine social, ethical, and legal issues related to communicating components related to the agricultural, consumer, and environmental science industries.

9. Conduct an audience analysis of key issue related to the agricultural, consumer, and environmental science industries by analyzing demographics, psychographics, sociographics, and geographics of affiliated audience personas.

ACOM 4115. Agricultural and Scientific Publications**3 Credits (3)**

Learn and gain experience with the principles and concepts of designing, writing, editing, producing and distributing a student insert to the ACES Magazine, including practical applications of writing feature articles, magazine design, layout and graphics.

Learning Outcomes

1. Execute the steps necessary to be a freelance writer.
2. Identify feature story ideas, contact sources and develop publishable stories.
3. Compare and contrast the varying types of publication materials (connection/spotlights, feature stories, social media sprints, etc.).
4. Comprehend publication design principles and current practices used in print communication industries.
5. Create, produce, publish and publicize a print magazine.
6. Connect with an audience through soft news.

ACOM 4120. Advanced Graphic Design and Layout in Agriculture**3 Credits (3)**

This class provides an in-depth examination of visual communication principles and theories, design applications, and design topics relevant to the agricultural industry. Students will learn how to more deeply evaluate designs and layouts, create effective design pieces for targeted agricultural audiences, and further utilize the Adobe Creative Cloud software.

Learning Outcomes

1. Analyze and apply the principles underlying effective graphic design and layout
2. Recognize and discuss communication and visual theories for developing effective designs and layouts for intended purposes and audiences
3. Demonstrate an extensive working knowledge of Adobe Illustrator, Photoshop, and InDesign to create effective designs for both print and digital platforms

ACOM 4130. Strategic Brand Identity & Design in Agriculture**3 Credits (3)**

The purpose of this course is for students to develop extensive understanding of strategic and visual theory and principles specific to branding as a critical aspect of business development in all aspects of agriculture and natural resources. Students will utilize research and Adobe Creative Cloud to design targeted brand strategy, client brief, and design strategy to effectively build a client pitch.

Prerequisite: ACOM 1120.

Learning Outcomes

1. Articulate the significance of utilizing brand identity for differentiation
2. Apply extensive knowledge of visual and brand theory, principles, strategy and application to various contexts in agriculture and natural resources
3. Research, design and pitch a brand strategy, client brief and design strategy

ACOM 4998. Internship in Agricultural Communications**3-12 Credits (3-12)**

The experiential learning experience selected by students and approved by their academic advisor will form the basis of this course. Students will apply problem-solving skills, communication skills, and disciplinary knowledge through an internship related to agricultural communications. During the internship, students will gain real-world experience in their specific field of interest within the discipline. May be repeated up to 12 credits.

Learning Outcomes

1. Synthesize discipline-specific knowledge and its application to real-world contexts
2. Design and implement solutions to meet project-related tasks
3. Produce professional-quality deliverables for the employer and for the course
4. Handle a high level of responsibility with professionalism and care in preparation and presentation

ACOM 5115. Global Issues in Agricultural Communications and Marketing**3 Credits (3)**

Graduate-level course broadening global perspectives related to international agricultural communications and marketing. The course will provide real-world settings for students to advance their awareness of international issues influencing marketing and trade in the United States and abroad. The course will expose students to high-impact learning, research skill development, communication skill development with a global mindset, and international travel. May be repeated up to 6 credits.

Learning Outcomes

1. Explain the role of communications and marketing in international agriculture.
2. Develop an awareness of global agricultural issues and how they impact domestic and international trade.
3. Increase awareness of global perspectives in agriculture.
4. Discover cultural similarities and differences within the U.S. and the selected country.
5. Investigate communications and marketing issues using an applied perspective.
6. Communicate course experiences through reflective analyses, photojournalism blog entries, social media campaigns, and presentations.
7. Research and dissemination information regarding international issues in agriculture using critical thinking skills.

Name: Dr. Steve Fraze, Department Head

Office Location: Gerald Thomas Hall, Room 111

Phone: (575) 646-4511

Agricultural and Extension Education (Agricultural Communications) - Bachelor of Science in Agriculture

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48

credits in courses numbered 300/3000 or above. At least 19–22 hours must be in Agricultural, Consumer, and Environmental Sciences (ACES) (*in addition to the courses listed for the ACES minor*). At least 18 hours for the Journalism/Media Studies Minor. At least 18 hours for Agricultural, Consumer, and Environmental Sciences (ACES) Minor

Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

See your academic advisor for more information.

- ¹ Students need to understand and complete any prerequisites prior to enrolling into this course.
- ² See the General Education (p. 227) section of this catalog for a full list of courses

Agricultural and Extension Education (Agricultural Extension/Development) - Bachelor of Science in Agriculture

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Agricultural and Extension Education - Undergraduate Minor

The department offers a minor in agricultural and extension education, which may be earned by completion of 18 credits in the department. The minor must include 9 credits of upper-division courses.

Agricultural Communications - Undergraduate Minor

Prefix	Title	Credits
Required Courses		
ACOM 1110	Introduction to Agricultural Communication	3
ACOM 1120	Introduction to Graphic Design in Agriculture	3
ACOM 3150	Communications Campaigns in Agriculture	3
Select 9 credits (3 courses) from the following courses, only one 2000-level course can be used:		9
ACOM 2120	Photography in Agriculture	
ACOM 2998	Early Field- Based Experience in Agricultural Communications	
ACOM 3115	Global Issues in Agricultural Communications and Marketing	
ACOM 3125	Website User Experience Design in Agriculture	
ACOM 3160V	Communicating Agriculture & Science to the Public	
ACOM 4115	Agricultural and Scientific Publications	
ACOM 4120	Advanced Graphic Design and Layout in Agriculture	
ACOM 4130	Strategic Brand Identity & Design in Agriculture	
Total Credits		18

Leadership in Agricultural Communications - Undergraduate Minor

The department offers a minor in Leadership in Agricultural Communications, which may be earned by completing the following coursework.

Prefix	Title	Credits
Required Courses		
Agricultural Leadership or Communication Courses in the Department of Agricultural and Extension Education ¹		12
Leadership Related Course from Outside the Department of Agricultural and Extension Education		3
Agricultural or Natural Resource Policy Course		3
Total Credits		18

¹ Student must get approval from Agricultural and Extension Education (AXED) Faculty

Minor must include 9 credits of upper division courses.

Agricultural Economics and Agricultural Business

Undergraduate Program Information

The Department of Agriculture Economics and Agricultural Business offers two Bachelor of Science in Agriculture degrees. A Bachelor of Science in Agriculture with a major in Agricultural Economics and Agricultural Business (AEAB) and a Bachelor of Science in Agriculture with a major in Natural Resource Economics and Policy (NREP).

Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture

The AEAB degree prepares students for supervisory and management positions with companies that operate in the food and fiber supply chain. Positions may focus on areas of agribusiness management, agricultural production, financing, marketing, and economics. Recent AEAB graduates have accepted positions with national and international companies, non-profits, and government agencies.

In this program, faculty, students, and industry stakeholders work together to provide students with real-world examples and opportunities to apply their skills and knowledge through departmental course offerings. The curriculum is designed to educate students as business professionals with the necessary skills to succeed in professional positions. Depending on their interest, students can customize their path of study to include additional courses in marketing, finance, or natural resource management.

Natural Resource Economics and Policy - Bachelor of Science in Agriculture

The Department of Agriculture Economics and Agricultural Business offers the Bachelor of Science in Natural Resource Economics and Policy (NREP); an undergraduate degree that trains students on the socio-economic and bio-physical aspects of environmental and natural resource management and policy. With increasing competition for limited land, water, and other natural resources in the U.S. and throughout the world, as well as growing concern about environmental degradation, there is a growing need for professionals who can assist in the process of balancing economic and environmental tradeoffs. The NREP major provides students with knowledge and skills to articulate and apply economic principles to a range of public and private sector issues such as land use, energy, wildlife, climate and air resources, and water. This major prepares students for private and public sector positions in resource assessment, management, or administration.

Graduate Program Information

The Department of Agricultural Economics and Agricultural Business supports five graduate programs. Several of these programs are offered with cooperation from other departments on campus. The five degrees supported by AEAB include:

- Masters of Science in Agricultural Economics;
- Masters of Agriculture with a concentration in agribusiness;
- Masters of Business Administration with a concentration in agribusiness;
- Doctorate of Economic Development; and
- MS & Ph.D. in Water Science Management.

Masters of Science in Agricultural Economics

Master of Science (MS) in Agricultural Economics program provides rigorous training in economic theory, applied economic analysis, and quantitative methods. The degree and curriculum are designed to prepare students for professional careers in business, government, research, and for continued education in pursuit of a Ph.D. The program requires students to complete a Master's thesis working closely with a faculty committee.

Masters of Agriculture with a concentration in Agribusiness

Master of Agriculture (MAG-AB) with a concentration in Agribusiness provides students with backgrounds or interests in agriculture with graduate-level training in agribusiness and applied economics. Students are able to develop knowledge and skills related to applied economics, finance, marketing, management, and quantitative methods and skills commonly used in managing businesses operating within the food and fiber value chain. The degree offers an alternative for individuals holding undergraduate degrees in various agricultural and food science fields to learn and develop skills needed to start or manage an agricultural business. The program requires students to complete a creative component or thesis working closely with a faculty committee. Courses are offered in a hybrid format allowing students not living in or near Las Cruces to participate in the program.

Masters of Business Administration with a concentration in Agribusiness

Master of Business Administration with a concentration in Agribusiness (MBA-AB) prepares students for business and public sector careers in agriculture and the food and fiber industry. Graduates from this program are knowledgeable about the U.S. and international food and fiber sectors and hold an AACSB International accredited MBA degree.

Doctor of Economic Development

Doctor of Economic Development (DED) is a professional doctorate designed to provide advanced training for economic development professionals. It is not designed to prepare graduates for academic careers.

Interdisciplinary Masters in Water Science and Management and Ph.D. in Water Science and Management

The Water Science program is an interdisciplinary program supported by AEAB faculty that provides graduate education for the next generation of water resources researchers, educators, and managers. The program provides knowledge and tools that can be used to address state, national, and international water challenges including water quality, quantity, timing/availability, and location of water resources.

Degrees for the Department

Bachelor Degree(s)

- Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture (p. 305)
- Natural Resource Economics and Policy - Bachelor of Science in Agriculture (p. 307)

Master Degree(s)

- Agricultural Economics - Master of Science (p. 97)
- Agriculture (Agribusiness) - Master of Agriculture (p. 93)

- Agriculture (Agribusiness) - Master of Agriculture (Online) (<https://catalogs.nmsu.edu/global/nmsu-global/agriculture-agribusiness-mag-online/>)

Doctoral Degree(s)

- Economic Development - Doctor of Economic Development (p. 187)

Minors for the Department

- Agricultural Business Management- Undergraduate Minor (p. 309)
- Natural Resource Economics - Undergraduate Minor (p. 310)

Professor, Carlos E. Carpio, Department Head

Professors Hurd, Lillywhite, Ward

Associate Professors Acharya, Patrick

Assistant Professors Boufous, Dsouza, Miller, Regmi, Robinson, Torell

College Professors Townsend

Department of Agricultural Economics and Agricultural Business:

*C.E. Carpio, Department Head, Ph.D. (North Carolina State University)– food and agricultural economics, applied econometrics/statistics; **Professors** B. H. Hurd, Ph.D. (California-Davis)– water and natural resource economics; J. Lillywhite, Ph.D. (Purdue)– food and agribusiness management and marketing; F. A. Ward, Ph.D. (Colorado State)– resource economics, welfare economics; **Associate Professors** R.N. Acharya, Ph.D. (Auburn)– food safety, logistics management, technology adoption, and marketing; M. Patrick, Ph.D. (Michigan State University)– Economic Development; **Assistant Professors** S. Boufous, Ph.D. (Texas Tech University)- sustainability, production economics, consumer demand analysis, and non-market valuation; A. Dsouza, Ph.D. (Arizona State University)- production economics, food supply chain management, and marketing; F. Miller, Ph.D. (University of Texas-Dallas)- agricultural economics, policy, dairy, range livestock; M. Regmi, Ph.D. (Kansas State University)- agricultural finance, risk management, production economics; C. Robinson, Ph.D. (New Mexico State)- consumer behavior, agricultural production, marketing sales; G. Torell, Ph.D. (University of Wyoming)- agricultural economics, natural resources, environmental economics; **College Professors** J. Townsend, Ph.D. (Oklahoma State University) commodity risk management, agricultural marketing; **Affiliated Faculty** D. Blayney, Ph.D. (Washington State University) agricultural supply chain; dairy production; **Emeritus Faculty** V. Bullock M.S. (Emeritus) (New Mexico State University) real estate, real estate appraisal; P. Gutierrez, Ph.D. (Emeritus) (Oklahoma State)– extension, ranch economics, economic development; J. D. Libbin, Ph.D. (Emeritus) (Iowa State)– farm management, production economics; R. Skaggs, Ph.D. (Emeritus) (Utah State)– agriculture and natural resource policy*

Department of Economics, Applied Statistics and International Business:

*Y. F. Lee, Ph.D. (Southern Illinois-Carbondale)-international finance and trade, international monetary system, economic development; **Professors** L. Blank, Ph.D. (Tennessee, Knoxville)- microeconomic theory, managerial economics, and regulatory economics; C. Erickson, Ph.D. (Arizona State)- regional (Latin American) economic growth and development; money and banking; R. L. Steiner, Ph.D. (Oklahoma State)-likelihood methods, discrete distributions, and exact tests; B. Widner, Ph.D. (Colorado State)-urban/ regional development, managerial economics, and public finance; D. M. VanLeeuwen, Ph.D. (Oregon State)-statistics; **Associate Professors** J. Caldwell Ph.D. (Illinois)-energy economics, utility rate design, climate policy; C. Gard, Ph.D. (Washington)-biostatistics, and breast cancer risk prediction; L. LaPlue (Tennessee)-international and environmental economics; M. Li, Ph.D.(Pennsylvania State)-labor, urban, and agricultural economics; J.*

*Mamkhezri, Ph.D. (New Mexico)-energy, natural resources, environmental and health economics; C. Sroka (Ohio State)-count data models, and health economics; **Assistant Professors** J. Dawson Ph.D. (UW-Madison)–statistics, biostatistics; S. Jeon Ph.D. (North Carolina)-environmental statistics, extreme value analysis, and spatio-temporal modeling; **College Assistant, Associate, and Full Professors:** (College Associate Prof.) B. Bai, MS (New Mexico State)- applied statistics, behavioral science; (College Assistant Prof.) C. Blume, Master of Accountancy (New Mexico State); (College Full Prof.) M. Downes, Ph.D. (New Mexico)–environmental and natural resources economics, econometrics and quantitative economics; (College Associate Prof.) F. Pallares, DED (New Mexico State)–economic development; (College Full Prof.) L. Vargas, DED (New Mexico State)-international development, institutional economics, and border economics; **Emeritus Faculty** R. V. Adkisson, Ph.D. (Nebraska)-international, public finance, economic development; K. Brook, Ph.D. (Texas-Austin)-macroeconomic theory, monetary policy; D.L. Clason, Ph.D. (Kansas State); D. L. Daniel, Ph.D. (Southern Methodist)-nonparametric, statistical computing, and environmental research; C. Enomoto, Ph.D. (Texas A&M)-econometrics, economic theory; M. Ellis, Ph.D. (California-Riverside)-economic development; D. A. Gegax, Ph.D. (Wyoming)-public utility economics, industrial organization; W. R. Gould, Ph.D. (North Carolina State)-biological sampling, wildlife and fisheries estimation. B. N. Matta, Ph.D. (Texas-Austin); J. T. McGuckin, Ph.D. (Wisconsin-Madison); J. T. Peach, Ph.D. (Texas-Austin)-quantitative economics, border studies, economic development; A.V. Popp, Ph.D., (Northern Illinois); D.B. Smith, Ph.D., E. S. Willman, Ph.D. (Indiana).*

Agricultural Economics Courses

AEEC 1110. Introduction to Agricultural Economics and Business 3 Credits (3)

This course is an orientation to agricultural economics and business through the discovery process for the consumer in the food, fiber, and natural resource sectors of the global economy. The course discusses the application of micro-and macro-economic principles as they relate to agricultural economics and business. May be repeated up to 3 credits.

Learning Outcomes

1. Gain a broad understanding of the role of the consumer in the marketplace for agricultural commodities, producers, agencies and the global market structure.
2. Apply introductory economic principles to applied global situations.
3. Employ economic concepts in the application of production level decision making.
4. Employ economic principles to the basic and global agricultural community.
5. Understand relationships that exist between producers and consumers.

AEEC 1120. Careers in Food and Agribusiness 1 Credit (1)

This course provides an orientation to careers in agricultural economics and agricultural business. Students will learn about the agricultural supply chain in New Mexico, the United States, and the world. Students will be introduced to faculty and staff within the department, learn about career opportunities available to AEAB graduates, and develop a greater appreciation of current agricultural issues. Freshman status or consent of instructor required. May be repeated up to 1 credit.

Learning Outcomes

1. Become familiar with career opportunities in agricultural economics and agricultural business
2. Understand knowledge and skills desired by employers

3. Become acquainted with faculty and staff in the Department of Agricultural Economics and Agricultural Economics and resources available to students within the Department
4. Refine written and verbal communication skills

AEEC 2110. Principles of Food and Agribusiness Management
3 Credits (3)

This course introduces business management theory and application of theory related to businesses within the food and fiber supply chain. Topics include management and financial principles, market planning, and organization theory. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate, refine and expand written and oral communication skills
2. Develop an understanding of basic financial statements, their use and analysis
3. Understand the roles management and management styles play in modern agribusiness
4. Learn about the history of agribusiness domestically and internationally
5. Integrate the role of technology into modern agribusiness management

AEEC 2120. Introduction to Food and Agribusiness Accounting
3 Credits (3)

This course outlines the purpose and methods of keeping and analyzing farm and ranch records. Course topics include financial statements, efficiency measures, analysis of the business, and tax computations.

Learning Outcomes

1. Understand the terminology and principles used in modern farm and ranch financial management statements.
2. Evaluate capital investments, analyze farm business performance, and develop tools for financial planning and analysis
3. Evaluate farm and ranch cash flows

AEEC 2130G. Survey of Food and Agricultural Issues
3 Credits (3)

Survey of food and agricultural issues, including: geography of food production and consumption; human-agricultural-natural resource relations; agriculture in the United States and abroad; modern agribusiness; food safety; food, agriculture, and natural resources policy; ethical questions; role and impact of technology. Crosslisted with: FSTE 2130G.

Learning Outcomes

1. Understand of global agriculture including production techniques used in various geographical regions, consumption trends, and political and social constraints.
2. Synthesis information about agricultural issues and make informed arguments
3. Articulate modern issues in agriculture
4. Write coherent arguments relative to personal beliefs regarding agricultural issues

AEEC 2140. Technology and Communication for Business Management
3 Credits (2+2P)

This course helps students improve their skills related to data analysis, information management, and communication. Drawing examples from a variety of management, business, technological and research situations, students discover the versatility and functionality of modern computer software. The course emphasizes a 'hands-on' approach. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate an understanding terms used to describe common techniques and concepts in business information systems.
2. Demonstrate mastery of spreadsheet design and use.

AEEC 2996. Special Topics
1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. Consent of instructor required.

Learning Outcomes

1. Varies

AEEC 3110V. World Agriculture and Food Problems
3 Credits (3)

This course examines key concepts and issues relevant to the world's food production systems. Topical highlights include the causes and consequences of hunger, agriculture's economic and environmental significance, sustainable development, biotechnology, and globalization of agricultural markets. As students learn about these issues from both local and global perspectives they are engaged in the development of both their literacy of economic concepts and their core research and communication skills. We do this through a combination of relevant course readings, in-class discussion exercises, and focused writing assignments on current issues of relevance. Same as GEOG 315V. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate conceptual and systems thinking and design
2. Assess the nutrition and healthfulness of food choices
3. Describe the structure and function of food and agricultural systems
4. Analyze roles of and relationships between food producers, consumers, and policymakers
5. Apply basic economic concepts to describe and interpret food and agricultural issues
6. Explain the environmental context and role of agriculture
7. Articulate key arguments that favor and oppose food biotechnology
8. Recognize several of the benefits and barriers in international trade of food and agricultural products

AEEC 3120V. Natural Resource Economics
3 Credits (3)

This course helps students gain insight into important natural resource problems of our time. Apply economic principles to problems in the preservation, use, and development of agricultural, range, mineral, water, forestry, fishery, and environmental resources. Understand the use of cost-benefit analysis for government natural-resource projects, policies, and programs. Same as ECON 337V. May be repeated up to 3 credits.

Prerequisite: ECON 1110G or ECON 2120G or ECON 2120H.

Learning Outcomes

1. Demonstrate knowledge of economic principles to better understand natural resource issues
2. Document understanding of current and emerging natural resource issues
3. Apply economic principles to guide selected natural resource policy debates
4. Demonstrate the application of economic principles to inform policy debates addressing current water resources issues

AEEC 3130V. Water Resource Economics
3 Credits (3)

This course uses economic principles to evaluate current and emerging issues in water resources. Applications focus on the use of economic methods of analysis to current policy decisions surrounding agricultural, municipal, industrial, and environmental uses of water. Same as ECON 384V. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate knowledge of economic principles to better understand water resource issues
2. Show understanding of current and emerging water issues
3. Apply economic principles to guide selected water resource policy debates
4. Demonstrate the application of economic principles to inform policy debates addressing current water resources issues

AEEC 3140V. Agricultural Policy

3 Credits (3)

This course provides a historical and cultural background of food and agricultural policy in the United States. Analysis of food and agricultural problems, policy-making, and implementation. Economic evaluation of specific U.S. food and agricultural policy instruments, their domestic and international impacts.

Learning Outcomes

1. Apply economic concepts to deepen understanding of agricultural policy, particularly with regard to macroeconomic importance to agriculture
2. Describe inherent tradeoffs and opportunity costs in policy
3. Identify the global impacts of U.S. agricultural policy
4. Explain and describe important agricultural policy issues for a lay audience

AEEC 3210. Marketing and Food Agricultural Products

3 Credits (3)

This course provides a review of marketing principles and techniques used throughout the food and fiber supply chain. The course introduces a broad variety of marketing topics including marketing strategy, consumer behavior, market segmentation, market research, competitive analysis, and the marketing mix. The course serves as a foundation for advanced courses in agricultural marketing. May be repeated up to 3 credits.

Prerequisite: ECON 1110G or ECON 2120G.

Learning Outcomes

1. Articulate how agricultural commodities move through the food and fiber supply chain.
2. Understand the importance of strategic marketing and how organizations within the food and fiber supply chain identify consumers and their preferences
3. Understand key marketing concepts used by agribusiness marketers, including SWOT analysis, the marketing mix, advertising and public relations
4. Know the basic outline and components of a marketing plan

AEEC 3220. Financial Derivative Markets

3 Credits (3)

This course explores the role of financial derivatives in modern business, including income generation, risk management, and price discovery. Derivatives markets covered in the course include futures, options, and swaps. Course content focuses on the fundamentals of trading and hedging in a wide variety of markets, e.g., agriculture, interest rates, exchange rates. Students participate in simulated futures and options trading. Same as AEEC 5220/BFIN 511 with additional coursework required at the graduate level. Cannot receive credit for both AEEC 3220/BFIN 311 and AEEC 5220/BFIN 511. Same as BFIN 311.

Learning Outcomes

1. Understand and explain the concept of risk, list various sources of risks observed in businesses, and identify common methods used to manage risk
2. Demonstrate an understanding of the vocabulary associated with derivatives and derivative markets
3. Articulate the role that derivative markets play in reducing risk and illustrate how they can be used in practice to reduce risk
4. Illustrate how derivative markets can be used to generate income and manage risk through hedging

AEEC 3230. Food and Agricultural Sales

3 Credits (3)

This course reviews the techniques of salesmanship. Course topics include identification and classification of buyer type and different approaches to sales based on client base. Improving oral communication skills through individual and/or group sales presentations. Students must be in Junior or above standing to enroll. May be repeated up to 3 credits.

Learning Outcomes

1. Analyze sales situations and effectively identify pathways to closing the sale.
2. Demonstrate execution of the sales process – prepare, learn, communicate, evaluate.
3. Conduct product and customer analysis to build a sales strategy.
4. Exhibit enhanced relationship management and communication skills.

AEEC 3240. Agricultural and Natural Resource Law

3 Credits (3)

This course discusses the relationship of common-law principles, statutory law and regulatory law to problems involving agriculture with an emphasis on New Mexico issues. Legal problems relevant to agribusiness, torts, fencing laws, liability for agricultural pollution, irrigation water rights, corporations and partnerships, land tenure, farm and ranch tenancy, agricultural labor, farm and ranch management, and taxation. May be repeated up to 3 credits.

Learning Outcomes

1. Understand the complexity of law as it relates to agriculture and natural resources
2. Develop a basic understanding of the legal system in the U.S. including the role of federal and state agencies responsible for agricultural and natural resource regulation
3. Articulate at a layperson's level, the roles of the legislative, judicial, and executive branches of the government as they relate to agriculture and natural resources.

AEEC 3250. Economics of Food and Agricultural Markets

3 Credits (3)

This course focuses on the analysis of supply and demand characteristics of commodities with particular attention to agricultural products. Pays special attention to empirical analysis. Includes institutional aspects of pricing, temporal and spatial price relationships, price forecasting, and the economic consequences of pricing decisions. May be repeated up to 3 credits.

Prerequisite: ECON 2120G, MATH 1430G, and A ST 311 or MATH 1350G.

Learning Outcomes

1. Become familiar with commonly used data analysis methods and tools.
2. Develop an understanding of the factors that influence agricultural prices.

- Use data to analyze and solve real-world problems related to agricultural prices.

AEEC 3260. Economic Analysis of Food and Agribusiness
3 Credits (3)

This course uses economic and business theory to analyze business decision making. The course includes a discussion of economic, managerial, and financial considerations relevant to modern agribusinesses. May be repeated up to 3 credits.

Prerequisite: ECON 2110G, ECON 2120G.

Learning Outcomes

- Understand the role of managers within the food and fiber supply chain.
- Develop an understanding of the applications of managerial economics as they related to businesses within the food and fiber supply chain.
- Analyze market conditions and assess the position of a business within the market.
- Identify and articulate optimal business decisions by analyzing economic and business information.

AEEC 3270. Spreadsheet Applications in Food and Agriculture
3 Credits (2+2P)

This course is an advanced course in electronic spreadsheets. Concepts and tools of data analysis and database management within a spreadsheet, emphasizing agricultural applications, are presented. May be repeated up to 3 credits.

Prerequisite: AEEC 2140 or consent of instructor.

Learning Outcomes

- Ability to effectively utilize some of the advanced features in Microsoft Excel by course end.
- Transforming agricultural and agribusiness problems into spreadsheet models for analysis.
- Increase critical thinking capacity with respect to solving problems/tasks.
- Develop creativity in solving problems/tasks.

AEEC 3280. Applied Production Economics
3 Credits (3)

This course introduces students to fundamental economic theories and analytical tools required for managing an agricultural operation. In particular, the principles of microeconomics will be reviewed and applied to the problems faced by farms and ranches. The course focuses only on economic making at the farm or ranch level. May be repeated up to 3 credits.

Prerequisite: (ECON 2120G or ECON 2120H) and (MATH 1430G) and (A ST 311 or MATH 1350G).

Learning Outcomes

- Analyze production function and calculate the total, average, and marginal products
- Derive profit-maximizing input and output combinations
- Evaluate the relationship between production, revenue, and profit functions
- Analyze crop budgets and determine optimal acreage allocation
- Measure the impact of risk and uncertainty on agricultural production

AEEC 3998. Internship
1-4 Credits (1-4)

Professional work experience under the supervision of a faculty member. May be repeated up to 6 credits.

Prerequisite: Consent of instructor.

AEEC 4110. Food and Agribusiness Financial Management
3 Credits (3)

This course provides a description and application of techniques and principles of financial management to problem situations faced by agricultural businesses, including financial statement development and analysis, capital budgeting, sources and costs of capital. May be repeated up to 3 credits.

Prerequisite: ECON 2120G or ECON 2120H and ACCT 2110.

Learning Outcomes

- Understand the time value of money and perform capital investment analysis for agricultural firms
- Interpret financial statements used by agricultural firms
- Comprehend farm financial risks and returns
- Discuss financing options for U.S. farm businesses

AEEC 4410. Senior Seminar
1 Credit (1)

This course focuses on current topics and cases in the agribusiness literature stressing rigorous qualitative analysis of current problems and policy issues. During the course, students provide feedback about their experience within the Department and help identify ways in which the Department can improve. Restricted to: AEAB; NREP majors. Must be Senior standing to enroll. May be repeated up to 1 credit.

Learning Outcomes

- Illustrate an understanding of economic and business concepts as illustrated and applied in case analyses.
- Articulate ways in which the Department can improve academically.
- Prepare future steps in careers, e.g., resumes, cover letters, mock interviews.
- Develop interpersonal communication skills.

AEEC 451. Food and Agribusiness Market Assessment
3 Credits (3)

This course is an application course in which self-managed teams develop and present marketing plans for agribusiness firms. Emphasis on integrating the marketing mix, particularly promotional elements. May be repeated up to 3 credits. Crosslisted with: AEEC 4510.

Prerequisite(s): AEEC 3210 or MKTG 305 or consent of instructor.

Learning Outcomes

- Identify, organize and conduct market research specific to the project
- Develop an understanding of primary and secondary research collection and analysis
- Exhibit enhanced relationship management, communication skills, and team building
- Develop written communication with final deliverable for implementation into the business world

AEEC 4510. Food and Agribusiness Market Assessment
3 Credits (3)

This course is an application course in which self-managed teams develop and present marketing plans for agribusiness firms. Emphasis on integrating the marketing mix, particularly promotional elements. May be repeated up to 3 credits. Crosslisted with: MKTG 451.

Prerequisite(s): AEEC 3210 or MKTG 305 or consent of instructor.

Learning Outcomes

- Identify, organize and conduct market research specific to the project.
- Develop an understanding of primary and secondary research collection and analysis.

3. Exhibit enhanced relationship management, communication skills, and team building.
4. Develop written communication with final deliverable for implementation into the business world.

AEEC 4520. Food and Agribusiness Marketing Plan Development
3 Credits (3)

This course focuses on learning marketing research methods applicable to developing new food and agricultural products and repositioning existing products for new markets. Students will be required to prepare precise written and oral marketing plans to industry standards and will have opportunities to present written and oral plans at national competitions. May be repeated up to 3 credits.

Learning Outcomes

1. Illustrate abilities to make decisions based on market research and analysis, including financial analysis, analysis of consumer trends, and the business environment.
2. Create professional marketing and business presentation.
3. Build effective teams to analyze and present real-world marketing opportunities.
4. Practice business decision making founded on evidence from market research.

AEEC 4530. Case Studies in Food and Agribusiness Management
3 Credits (3)

This course integrates production, marketing, accounting, finance, agricultural policy, human behavior, and business environment concepts in the management of agricultural businesses using a decision case approach. May be repeated up to 3 credits.

Learning Outcomes

1. Exhibit an ability to understand complex and varying business and resource issues, including financial analysis, natural resource issues, and business operations.
2. Provide reasoning and rationale for decision making, identifying the best options from many potential decisions.
3. Practice business writing and communication skills.

AEEC 4540. Economics of Making and Marketing Wine
3 Credits (3)

This course is designed to provide a basic knowledge of the principles of winemaking with emphases on wine production and economics for small wineries and home winemaking. The course also focuses on the investment costs of starting small wineries and the costs of making wine and successful market strategies for small wineries. The class includes a hands-on lab that includes selecting, crushing, fermenting grapes, and all the steps required through bottling the wine. Students must be 21 to enroll in the class. Consent of instructor required. May be repeated up to 3 credits.

Learning Outcomes

1. Identify and evaluate production costs, economics, and marketing strategies for small wineries.
2. Identify current technologies used in the production of wine for home and in a small winery.
3. Identify the processes required to make high-quality wine using hands-on winemaking techniques, sensory analysis, and testing.
4. Learn the basics of Viticulture (wine grape growing) practices.

AEEC 4550. Real Estate Appraisal
3 Credits (2+2P)

This course addresses issues influencing the value of real estate with some emphasis upon rural properties. Topics include courthouse records,

property taxes, appraisal methodology, expert courtroom testimony, condemnation, and legal issues. Students will take field trips and write appraisals. Course material is relevant to students in Finance, Accounting, and Pre-Law, as well as Agriculture. Accredited for hours to apply to both pre-licensing and continuing education requirements of the New Mexico Real Estate Commission for both Appraisers and Real Estate Brokers. May be repeated up to 3 credits.

Learning Outcomes

1. Distinguish between the Income Approach, Cost Approach, and Sales Comparison Approach.
2. Identify market abstracted influences on value.
3. Apply proper appraisal methodology.
4. Demonstrate appraisal knowledge by writing a residential appraisal and a farm appraisal.

AEEC 4997. Special Problems

1-3 Credits

Special problems in agricultural economics or agricultural business of particular interest to the individual student. Maximum of 3 credits per semester. No more than 6 credits toward degree. Consent of instructor required. May be repeated up to 6 credits.

AEEC 4999. Senior Thesis

3 Credits (3)

Develop a thesis project with a faculty advisor. The senior thesis requires students to work creatively to apply business and economic principles to address a problem of concern. May be repeated up to 3 credits. Restricted to AEAB majors.

Prerequisite: consent of department head and have senior standing.

AEEC 5110. Introduction to Quantitative Methods

3 Credits (3)

Introduce students to quantitative tools widely used in applied economic analysis such as regression analysis, statistical tests, and mathematical programming. Restricted to: Agricultural Economics and Business (Masters) majors.

Learning Outcomes

1. Course objectives for the statistics module include helping students master basic statistical tests/methods commonly used in research and business analysis. Specific methods / tests include: One-sample mean hypothesis tests, Two-sample mean hypothesis tests, Analysis of Variance (mean tests for three or more samples), and Nonparametric methods to test proportions.
2. Course objectives for the econometrics/regression module include introducing students to the field of econometrics and helping them master a basic understanding of econometrics and its use in agricultural economics and business. Specific topics that will be covered include: Correlation analysis, Simple least squares regression; and Multiple regression analysis.
3. Course objectives for the math programming module including helping students formulate, specify, build and interpret linear programming models using Microsoft Excel's Solver feature and the specialized software package, GAMS.

AEEC 5120. Microeconomic Theory

3 Credits (3)

A rigorous re-examination of the pricing mechanism in the goods and factor markets. Development of theoretical tools of general applicability. May be repeated up to 3 credits.

Prerequisite: ECON 371 and ECON 457, or consent of instructor.

Learning Outcomes

1. A rigorous re#examination of the structure and function of the price mechanism to guide resource allocation and policy analysis in the goods and factor markets.
2. Introduce the models that economists use to explain the behavior of consumers, firms, and markets.
3. Development of theoretical tools used for economic analysis.

AEEC 5130. Macroeconomic Theory**3 Credits (3)**

This course provides contemporary aggregative theory regarding the interrelationships among national income, employment, the price level, money supply and interest rates, and implications of this theory for public policy in a mixed economy. May be repeated up to 3 credits.

Learning Outcomes

1. Develop an in-depth understanding of the IS/LM model.
2. Understand how fiscal and monetary policy affect output, employment, interest rates and prices.
3. Develop and use mathematical models of the economy.
4. Derive the effect of a change in tax rates, government spending, or a change in the money supply, on the nation's output through expenditure multipliers.
5. Understand how fiscal and monetary policy work in an Open economy.
6. Understand the basics of Exogenous and Endogenous Growth Theory.

AEEC 5140. Agricultural Policy**3 Credits (3)**

Historical and cultural background of food and agricultural policy in the United States. Analysis of food and agricultural problems, policy-making and implementation. Economic evaluation of specific U.S. food and agricultural policy instruments, their domestic and international impacts. Same as AEEC 3130V with additional work required at the graduate level. Cannot receive credit for both AEEC 3130V and AEEC 5140. May be repeated up to 3 credits.

Prerequisite: Consent of instructor.

Learning Outcomes

1. Apply economic concepts to deepen understanding of agricultural policy, particularly regarding the macroeconomic importance to agriculture.
2. Be able to describe inherent tradeoffs and opportunity costs in policy.
3. Acquire an international perspective with respect to food and agricultural policy.
4. Develop an appreciation for history and trajectory of agricultural policy.

AEEC 5150. Economic and Financial Analysis of Agribusiness**3 Credits (3)**

This course focuses on common analytical tools used to evaluate the economic and financial performance of businesses operating in the food and fiber supply chain. The course uses a combination of course discussions, assignments, and case studies to present the material critical to the successful management of agribusinesses. Topics include financial statements and analysis, financial planning/modeling, financial risk and risk management, the time value of money, and capital budgeting methods used in agribusiness.

Learning Outcomes

1. Read, understand, and create financial statements used in agribusiness, including income statements, balance sheets, cash flow statements, and owner's equity statements.

2. Describe and conduct financial analysis including comparative analysis, change analysis, and common-size analysis, and ratio analysis.
3. Describe and understand credit in agricultural production and agribusiness.
4. Understand the importance of capital budgeting within agribusiness and be able to conduct capital budgeting.
5. Describe, calculate, and use standard measures of investment return including net present value, internal rate of return, discounted payback period, and simple payback period.

AEEC 5210. International Agricultural Trade Theory and Policy**3 Credits (3)**

This course provides a review and analysis of international trade models. Analysis of the effects of trade instruments such as tariffs, quotas, and subsidies on welfare and income distribution. Analysis of bilateral, regional, and multilateral trade agreements and their effect on the agricultural sector from both country-specific and global perspectives. May be repeated up to 3 credits.

Learning Outcomes

1. Understand and be able to describe the importance of international trade to U.S. agriculture.
2. Familiar with commonly used trade models to describe impacts of trade barriers, for example tariffs, quotas, and subsidies.
3. Analyze trade agreements and their impact on economies of different trade partners.

AEEC 5220. Financial Derivative Markets**3 Credits (3)**

This course examines advanced futures and options strategies for income generation and risk management. Coverage includes a variety of markets, e.g., interest rates, stock indexes, metals, currencies, livestock, and grains. Both technical and fundamental trading strategies are identified and discussed. Same as AEEC 3220/BFIN 311 with additional coursework required at the graduate level. Cannot receive credit for both AEEC 3220/BFIN 311 and AEEC 3220/BFIN 311. Taught with BFIN 511. May be repeated up to 3 credits.

Learning Outcomes

1. Define risk and identify methods of managing risk.
2. Demonstrate understanding of vocabulary associated with derivatives and derivative markets.
3. Identify the role that derivative markets play in reducing risk.
4. Demonstrate a basic understanding of derivative markets including their use in risk management and income generation.

AEEC 5230. Public Sector Economics**3 Credits (3)**

Introduction to the economic rationale for government intervention in the economy and the effects of that intervention on economic agents and the economy in general. Emphasis on the expenditure side of government policies. Same as POLS 522. May be repeated up to 3 credits.

Learning Outcomes

1. The focus of Public Sector Economics I, which draws on microeconomic theory, concentrates on the development of analytical tools and their application to key issues relating to the spending activities of government.
2. This course aims to provide students with a solid grounding in the analytical methods that are important for studying the role of government in society.

- Moreover, it will provide students with an economics perspective of that role and when it is appropriate for governments to intervene in an economy.
- Once established, students will have a practical way to examine a modern government's programs such as social Security and other welfare programs.

AEEC 5240. Econometrics
3 Credits (3)

An integration of quantitative and statistical techniques for research and management in economics and business. May be repeated up to 3 credits.

Prerequisite: ECON 457 and ECON 405 or A ST 505.

Learning Outcomes

- This course will cover simple linear regression on cross-sectional data; multiple-regression, data with limited dependent variables (including binary, truncated/censored, and count data); and if time permits, time series econometrics.
- After this course, you will understand the theories behind these methods, know when to use them, and be able to carry them out in Stata®, a popular commercial software for applied econometricians.

AEEC 5320. Microcomputer Applications in Agriculture
3 Credits (2+2P)

An advanced course in electronic spreadsheets and the concepts and tools of database management emphasizing agricultural applications. May be repeated up to 3 credits.

Prerequisite: AEEC 2140G or consent of instructor.

Learning Outcomes

- Understand and apply descriptive, predictive, and prescriptive analysis to solve business problems.
- Use Excel spreadsheet formula in modeling agribusiness problems/solutions.
- Use basic spreadsheet skills to conduct simple business feasibility analyses.
- Conceptualize and solve a research problem.

AEEC 5330. Agribusiness Marketing
3 Credits (3)

Applications course in which self-managed teams apply marketing theory in the development and presentation of marketing plans for food and agribusiness firms. Course includes analysis of marketing problems with emphasis on strategic marketing issues changing trade policies, and global competitiveness. May be repeated up to 3 credits.

Learning Outcomes

- Estimate consumer demand and supply functions using regression analysis.
- Measure consumer willingness to pay for food products using conjoint analysis.
- Evaluate the value of new product attributes using contingent valuation.
- Conduct market research and present results.

AEEC 5340. Agribusiness Management
3 Credits (3)

Integration of production, marketing, accounting, finance, agricultural policy, human behavior, and business environment concepts in management of agricultural businesses using a decision case approach. May be repeated up to 3 credits.

Learning Outcomes

- To provide an integrated approach to marketing, financial, and strategic management problems of agribusiness and commercial farm and ranch businesses.
- To develop a deeper understanding of the agribusiness system through the investigation of selected U.S. agribusinesses.

AEEC 5350. Economics of Water Resource Management and Policy
3 Credits (3)

Focuses on issues, approaches and methods used in the assessment of water resource management and policy problems. Extends and further develops student understanding and comprehension of specific economic concepts and methods that are useful in the assessment and management of water resources, including cost-benefit analysis, welfare economics, non-market valuation, watershed management, and consideration of equity and ethical concerns. Students will develop critical reasoning, communication and analytic skills through active class discussions and assignments that emphasize both quantitative and written products.

Learning Outcomes

- Describe the major categories of water use and explain their role, function, and economic value of water within natural and human systems.
- Apply basic economic concepts to the assessment of water quantity and quality issues.
- Analyze impacts of water management and policy decisions on competing water resource users, public interests, and address their potential for conflict.
- Demonstrate conceptual and systems thinking applied to water resource problems.
- Apply quantitative and qualitative reasoning, modeling, and decision-support methods to water resource problems, including Integrated Water Resources Management (IWRM), Cost-Benefit Analysis (CBA), and Economic and Environmental Impact Assessment.
- Compare analytic methods for watershed assessment, including statistical, optimization, and simulation methods applied to watershed assessment.

AEEC 5360. Production Economics
3 Credits (3)

Application of microeconomic theory to problems and decisions of food and agricultural firms. The theoretical foundation of production economics and the theory of the firm are developed. May be repeated up to 3 credits.

Prerequisite: MATH 1430G, ECON 312, and ECON 457.

Learning Outcomes

- Students should be able demonstrate an understanding of the microeconomic underpinnings of production economics, as well as how theoretical assumptions are made regarding physical production of agricultural products.
- Students should be able to examine production decisions by agricultural firms, and determine economically optimal decisions, including under cases of risk and uncertainty.

AEEC 590. Special Topics
3 Credits (3)

Seminars in selected current topics in the various areas of agricultural economics and economics. Offerings will carry a subtitle.

Prerequisite: consent of instructor.

AEEC 593. Internship
1-6 Credits

Supervised professional on-the-job training experience in policy analysis.

AEEC 594. Internship

1-6 Credits

One semester to six months internship with a regulated firm or public utility commission. A faculty member will direct and evaluate the internship. For AEEC regulatory option students only.

AEEC 595. Internship

3 Credits (3)

Supervised professional on-the-job learning experience.

Prerequisite(s): Consent of instructor.

AEEC 596. Individual Study

1-3 Credits

Individual study programs. Each offering will carry a subtitle. Maximum of 3 credits in a semester and 6 credits in a program.

Prerequisite: consent of instructor.

AEEC 599. Master's Thesis

1-15 Credits

Thesis.

AEEC 5991. Non-Thesis Research Project

1-3 Credits (1-3)

Individual investigations, either analytical or experimental. Maximum of 3 credits per semester. No more than 3 credits toward a degree. May be repeated up to 3 credits.

AEEC 5994. Creative Component Project

3-6 Credits (3-6)

Individual investigations, either analytical or experimental. A minimum of 3 to 6 credits per semester. No more than 6 credits toward degree. Consent of instructor required. May be repeated up to 6 credits.

Prerequisite: Consent of Instructor.

AEEC 5996. Special Topics

3 Credits (3)

Seminars in selected current topics in the various areas of agricultural economics and economics. Offerings will carry a subtitle.

Prerequisite: consent of instructor.

AEEC 5997. Individual Study

1-3 Credits

Individual study programs. Each offering will carry a subtitle. Maximum of 3 credits in a semester and 6 credits in a program.

Prerequisite: consent of instructor.

AEEC 5998. Internship

1-6 Credits

Supervised professional on-the-job training experience in policy analysis.

AEEC 5999. Master's Thesis

1-15 Credits

Thesis.

Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300/3000 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education		
<i>Area I: Communications</i>		
<i>English Composition - Level 1</i>		
ENGL 1110G	Composition I	4
<i>English Composition - Level 2</i>		
Select one from the following:		3
ENGL 2130G	Advanced Composition	
ENGL 2210G	Professional and Technical Communication Honors	
ENGL 2210H	Professional and Technical Communication Honors	
ENGL 2215G	Advanced Technical and Professional Communication	
ENGL 2221G	Writing in the Humanities and Social Science

Electives, to bring the total credits to 120 ⁶		17-18
Total Credits		120

⁴ Students who are interested in graduate degrees should consult with their academic advisor or faculty mentor early in their undergraduate program as some courses may have specific grade requirements and/or prerequisites. Our department participates in NMSU's Graduate School MAP Program where students can take graduate courses during the last part of their undergraduate degree.

⁵ Specialty Areas are Natural Resources, Finance, and Marketing. Students must complete two courses from the selected Specialty Area.

⁶ Elective credits may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with the academic advisor.

A Suggested Plan of Study for Students

A roadmap for students coming into Department of Agricultural Economics and Agricultural Business without deficiencies and without advanced coursework, e.g., AP course credit or dual credits wishing to pursue a degree in Agricultural Economics and Agricultural Business (AEAB).

This roadmap assumes student placement in MATH 1215 and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year

- See the General Education (p. 227) section the catalog for a full list of courses. It is strongly encouraged that students satisfy the Area II Laboratory Science category by enrolling in AGRO 1110G Introduction to Plant Science (Lecture & Lab).
- MATH 1430G Applications of Calculus I is required for the degree but students may need to take any prerequisites needed to enroll in MATH 1430G Applications of Calculus I first.
**MATH 1215 and MATH 1220G are prerequisites, but if they are not needed use Free Elective Courses to replace the courses in the Roadmap*
- See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses.
- Elective credits may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with the academic advisor.
- Specialty Area courses can be found on the Requirements (p. 305) tab of this degree. The areas are Natural Resources, Finance and Marketing. Students must complete two courses from the selected Specialty Area
- Students who are interested in graduate degrees should consult with their academic advisor or faculty mentor early in their undergraduate program as some courses may have specific grade requirements and/or prerequisites. Our department participates in NMSU's Graduate School MAP Program where students can take graduate courses during the last part of their undergraduate degree.
**The 4th Year Semester (Spring) shows 13 hours. Student's financial aid requirement may require them to enroll in 15 hours.*

Natural Resource Economics and Policy - Bachelor of Science in Agriculture

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300/3000 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Electives, to bring the total credits to 120 ⁴		21
Total Credits		120

- ¹ See the General Education (p. 227) section of the catalog for a full list of courses.
- ² MATH 1430G Applications of Calculus I is required for the degree but students may first need to take any prerequisites needed before taking MATH 1430G. Students who place or transfer in a higher-level course are exempt from MATH 1430G.
- ³ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses.
- ⁴ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credit and may appear in variable form base on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their academic advisor.

A Suggested Plan of Study for Students

A roadmap for students coming into the Department of Agricultural Economics and Agricultural Business without deficiencies and without advanced coursework, e.g., AP course credit or dual credits wishing to pursue the degree in Natural Economics and Policy (NREP).

This roadmap assumes student placement in MATH 1215 and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Agricultural Business Management-Undergraduate Minor

The minor in Agricultural Business Management (ABM) consists of 18 or more credit hours of approved course work from the list below. All courses must be completed with grades of "C" or better. Once courses are completed or show "IP" status, students pursuing the ABM minor need to log in to their myNMSU and print out the STAR Audit for the minor and obtain departmental approval. The course requirements for the ABM minor are as follows:

Prefix	Title	Credits
Required Core		
AEEC 2110	Principles of Food and Agribusiness Management	3
AEEC 2120	Introduction to Food and Agribusiness Accounting	3
AEEC 3210	Marketing and Food Agricultural Products	3
Agricultural Policy		
Choose one from the following		3
AEEC 3110V	World Agriculture and Food Problems	
AEEC 3120V	Natural Resource Economics	
AEEC 3130V	Water Resource Economics (Agribusiness Electives)	
AEEC 3140V	Agricultural Policy (Technical Courses (6))	
Ag Business and Ag Economics		
Choose two from the following		6
AEEC 3220	Financial Derivative Markets	
AEEC 3230	Food and Agricultural Sales	
AEEC 3240	Agricultural and Natural Resource Law	
AEEC 3250	Economics of Food and Agricultural Markets	
AEEC 3270	Spreadsheet Applications in Food and Agriculture ^{0,3}	
AEEC 3280	Applied Production Economics	

AEEC 4110	Food and Agribusiness Financial Management
AEEC 4510	Food and Agribusiness Market Assessment
AEEC 4530	Case Studies in Food and Agribusiness Management
AEEC 4540	Economics of Making and Marketing Wine
AEEC 4550	Real Estate Appraisal
Total Credits	18

Natural Resource Economics - Undergraduate Minor

The minor in Natural Resource Economics (NRE) consists of 18 or more credit hours of approved course work of which at least 9 hours must be numbered 300/3000 or above and completed with grades of "C" or better.

Once courses are completed or show "IP" status in the audit, students pursuing the NRE minor need to log in to their MyNMSU and print out the STAR Audit and obtain departmental approval. The course requirements for the NRE minor are as follows:

Prefix	Title	Credits
Required Courses		
ECON 2120G	Principles of Microeconomics	3
<i>Select one course from the following:</i>		3
AEEC 3120V or ECON 337V	Natural Resource Economics	
AEEC 3130V or ECON 384V	Water Resource Economics	
<i>Select two courses from the following</i>		6
FWCE 2110	Principles of Fish and Wildlife Management	
AEEC 3140V	Agricultural Policy	
POLS 330	Introduction to Public Administration	
<i>Select two courses from the following</i>		6
FWCE 1110G	Introduction to Natural Resources Management

GEOG 2130	Map Use and Analysis	
RGSC 2110	Introduction to Rangeland Management	
PHIL 300/3000+		
Total Credits		18

Animal and Range Sciences Undergraduate Program Information

The Department of Animal and Range Sciences provides opportunities for you to follow a variety of interests in modern scientific agriculture. The animal science curriculum provides a background for many phases of the food animal industry, from farm animal production on rangelands to management positions in the food processing industry to highly technical careers in research and companion animal management. The range science curriculum provides you with knowledge and skills necessary to sustainably manage rangelands for multiple uses. These curricula allow you to acquire the background necessary to adjust easily to variations in specific job opportunities. If you are majoring in either animal science or range science, you must meet general education requirements, have a minimum of 48 credits of upper-division courses (numbered 300 and above), and complete a minimum of 35 credits in courses in the College Agricultural, Consumer and Environmental Sciences.

Graduate Program Information

The Department of Animal and Range Sciences offers graduate work leading to the Master of Science and the Doctor of Philosophy degrees with majors in animal science and range science. The Doctor of Philosophy degree in animal science is only in the areas of reproductive physiology or ruminant nutrition.

Prerequisite for admission as a regular graduate student in the department is the completion of a curriculum, substantially equivalent to that required of undergraduate students in animal or range science at this institution, 3.0 GPA, and three letters of reference.

For the Master of Science degree, a minimum of 30 semester credits of graduate work in the major and related subjects will be required, together with a thesis for most majors. A non-thesis option is available for certain students.

For the Master of Agriculture with specialization in Domestic Animal Biology, students must complete 32 credit hours of graduate courses which include 2 credits of ANSC 598 Special Research Programs for the creative component.

The Doctor of Philosophy student must demonstrate proficiency in a foreign language or research tool, such as experimental statistics, philosophy of science, computer science, or mathematics. Choice of the research tool will remain the option of the student subject to approval by the student's graduate committee. Demonstration of proficiency may be accomplished by satisfactory completion of courses or by other suitable evidence acceptable to the student's committee. In addition, doctoral students are required to complete advanced courses in a field of study closely related to animal science or range science. The number of courses to be completed in the related area will be determined by the student's committee. Related areas of study often are biology, chemistry, or experimental statistics.

The Department of Animal and Range Sciences is a sponsoring department in the recently approved interdisciplinary graduate degree program that offers both a MS and Ph.D. degree in Water Science Management. The degree program is being handled through the College of Agricultural, Consumer and Environmental Sciences (ACES), and the program description, including application guidelines, classes involved, and topic areas being supported can be found in the catalog under the section describing ACES Programs. Interested students are encouraged to contact the Department Head of Animal and Range Sciences, Shanna Ivey at (575) 646-2515 for more information.

Graduate work in the department is designed to prepare the student for work in the fields of research, extension, teaching, production, and conservation.

Facilities available to graduate students include herds and flocks of the major livestock species, animal nutrition laboratories, physiology laboratories, meats laboratory, small animal laboratory, 25,000-specimen herbarium, two ranches of approximately 92,000 acres, and a 1,000-head experimental feedlot. Active cooperation is maintained with federal research agencies located on and off the campus.

A number of graduate assistantships will be available each year. Inquiries should be addressed to the head of the department.

Degrees for the Department

Bachelor Degree(s)

- Animal Science (Animal Industry) - Bachelor of Science in Agriculture (p. 319)
- Animal Science (Science) - Bachelor of Science in Agriculture (p. 321)
- Range Science - Bachelor of Science in Agriculture (p. 323)

Master Degree(s)

- Agriculture (Domestic Animal Biology) - Master of Agriculture (p. 94)
- Agriculture (Domestic Animal Biology) - Master of Agriculture (Online) (<https://catalogs.nmsu.edu/global/nmsu-global/agriculture-domestic-animal-biology-master-agriculture-online/>)
- Animal Science - Master of Science (p. 99)
- Range Science - Master of Science (p. 166)

Doctoral Degree(s)

- Animal Science - Doctor of Philosophy (p. 178)
- Range Science - Doctor of Philosophy (p. 204)

Minors for the Department

- Animal Science - Graduate Minor (p. 219)
- Dairy Science - Undergraduate Minor (p. 326)
- Horse Management - Undergraduate Minor (p. 326)
- Human Animal Interaction - Undergraduate Minor (p. 326)
- Livestock Production - Undergraduate Minor (p. 326)
- Ranch Management - Undergraduate Minor (p. 326)
- Range Science - Graduate Minor (p. 225)
- Range Science - Undergraduate Minor (p. 327)

Department Head Shanna L. Ivey

Professors Ashley, Duff, Fassenko, Fernald, Hernandez Gifford, Ivey, Löest, Scholljegerdes, Soto

Associate Professors Fuentes-Soriano, Geli, Utsumi

Assistant Professors Garbowksi, Messomo Giotto

College Track Associate Professors Campbell

College Track Assistant Professor Smythe

Instructors Bilovesky, Painter, Priest

Co-operators (USDA) Estell, Herrick, Peters

Emeritus Faculty Allred, Bailey, Cibils, Holechek, McDaniel, Ross, Thomas

S. L. Ivey, Department Head, Ph.D. (New Mexico State University)- ruminant nutrition/microbiology; K. W. Allred, Ph.D. (emeritus, Texas A&M University)- plant taxonomy; R.L. Ashley, Ph.D. (Colorado State University)- physiology of reproduction; D.W. Bailey, Ph.D. (emeritus, Colorado State University)- rangeland management; J.W. Campbell, Ph.D. (New Mexico State University)- reproductive physiology; A.F. Cibils, Ph.D. (emeritus, Colorado State University)- grazing management and ecology; G.C. Duff, Ph.D. (New Mexico State University)- animal nutrition; G.M. Fassenko, Ph.D. (North Carolina State University)- companion animal management; A. G. Fernald, Ph.D. (Colorado State University)- land use hydrology and water quality hydrology; S. Fuentes-Soriano, Ph.D. (University of Missouri-Saint Louis)-biology in plant

systematics and evolution; M. Garbowksi, Ph.D. (Colorado State University) - restorative ecology; H. M. E. Geli, Ph.D. (Utah State University)-landscape hydrology; J. Hernandez-Gifford, Ph.D. (Washington State University)- reproductive physiology; J. L. Holechek, Ph.D. (emeritus, Oregon State)- range ecology; C. A. Löest, Ph.D. (Kansas State University)- ruminant nutrition; K. C. McDaniel, Ph.D. (emeritus, Texas A&M University)- brush management; F. Mezzomo Giotto, Ph. D. (University of Nevada, Reno) - meat science and food safety; L. Prihodko, Ph.D. (Colorado State University)- range ecology; T. T. Ross, Ph.D. (emeritus, North Carolina State University)- physiology of reproduction and sheep production; E.J. Scholljegerdes, Ph.D. (University of Wyoming)- ruminant nutrition; B.G. Smythe, Ph.D. (New Mexico State University)- veterinary entomology; S.A. Soto-Navarro, Ph.D. (New Mexico State University)- ruminant nutrition; A.F. Summers, Ph.D. (University of Nebraska)-physiology of reproduction; J. D. Thomas, Ph.D. (emeritus, University of Missouri-Columbia)- meat science; S. Utsumi, Ph. D. (New Mexico State University) - range ecology

Adjunct faculty: C. D. Allison, Ph.D. (Texas A&M University)- range management; A. Faist, Ph. D. (University Colorado Boulder) - range ecology; K. M. Harvstad, Ph.D. (Utah State University)- range animal nutrition; J.E. Herrick, Ph.D. (Ohio State University)- soils; M.R. Levi, Ph. D. (University of Arizona)-soil morphology/classification; T.J. Nagaraja, Ph.D. (Kansas State University)-rumen microbiology; D.P. Peters, Ph.D. (Colorado State University)- landscape ecology; S. Spiegel, Ph.D. (University of California Berkeley)-range management.

Cooperative Extension Service: D. Cram, Ph.D. (New Mexico State University)- range science; R. Hagevoort, Ph. D. (Texas A&M University) - dairy science; C. Gifford, Ph. D. (University of Idaho)-animal science; R. Sallenave, Ph.D (University of Guelph)-aquatic ecology; S. Smallidge, Ph.D. (New Mexico State University) - wildlife; C. Spackman, Ph.D. (Utah State University)- range science; J. L. Turner, Ph.D. (Kansas State University)- equine immunology and physiology; M. Ward, Ph.D. (North Dakota State University)- ruminant nutrition;

Animal Science Courses

ANSC 1110. Animal Science Careers

1 Credit (1)

Introduction to scientific disciplines and career options in animal-agriculture career skill development, including resume preparation, networking, importance of internships, and leadership experiences in animal agriculture.

Learning Outcomes

1. Increasing the understanding of career opportunities in animal agriculture.
2. Gain a broad experience in the development of creative thinking about the career choices available in animal agriculture.
3. Apply the increased knowledge of career development in the career path and internship directions for each student.
4. Gain leadership experience that will be impactful for the student in their pursuit of a career in animal agriculture.

ANSC 1120. Introduction to Animal Science

3 Credits (3)

Survey of the livestock industry throughout the world. Basic management practices will be covered, including livestock selection, nutrition, reproduction, anatomy and marketing to the consumer. This course will also discuss animal behavior and welfare.

Learning Outcomes

1. Understand the role of farm animals in a global setting.
2. Describe the role of nutrition, breeding, behavior, welfare, and physiology of livestock in the world.
3. Explain the structure and organization of livestock industries.
4. Discuss concepts and terminology of the livestock industries as they relate to the global perspective.
5. Classify the overall management, care, marketing of animals, represented in the various livestock industries.

**ANSC 1120H. Introduction to Animal Science Honors
3 Credits (3)**

This course is designed to provide an introduction to nutrients and their function in livestock animals. Basic feed identification, evaluation, and diet formulation will be discussed. The anatomy of the digestive tract of animals and their ability to utilize feedstuffs is presented. Classification, digestion, absorption, transport and metabolism of major nutrients required by animals are studied. Additional course work will be required. Restricted to Las Cruces campus only.

Prerequisite(s): Eligibility for membership in honors college.

Learning Outcomes

1. Identify conventional and non-conventional feedstuffs that are fed to livestock animals.
2. Describe various methods for feed processing and storage.
3. Assess the nutritional value of a ration or feed ingredients.
4. Interpret the NRC (Nutrient Requirement Council) guidelines for feeding livestock.
5. List the basic digestive anatomy for all classes of livestock.
6. Describe nutritional deficiencies and digestive disorders common to livestock animals

**ANSC 1120L. Introduction to Animal Science Lab
1 Credit (2P)**

Students will observe and participate in activities related to farm animal management and will include areas of livestock selection, nutrition, reproductive physiology, animal ID and animal health. This lab is required for animal science majors.

Prerequisite(s)/Corequisite(s): ANSC 1120.

Learning Outcomes

1. To provide the students with an understanding of the principles, concepts and terminology of today's livestock industry

**ANSC 1125. Equestrian Team Competition
1 Credit (1)**

Basic principles of equestrian team competition, including care and management of the riding horse, equitation equipment, and development of riding skills. Emphasis will be placed competition within the Intercollegiate Horse Show Association. Consent of Instructor required. May be repeated up to 8 credits.

Learning Outcomes

1. Have a general knowledge of horses and basic horsemanship/ equitation position.
2. Explain and demonstrate basic techniques of balance, control, and safety skills while being in contact and mounted on a horse.
3. Explain and demonstrate proper handling and safety around horses and the proper care of the stable and tack.
4. Be able to ride unassisted at the walk, jog, and lope in either English or Western tack.
5. Apply general knowledge of horsemanship and equitation to competitive equine events in a safe manner including equitation

on the flat, equitation over fences, horsemanship, ranch riding and reining.

**ANSC 1130. Western Equitation I
2 Credits (4P)**

Basic principles of Western riding, including care and management of the riding horse, equitation equipment, and development of riding skills.

**ANSC 1140. Introduction to Dairy Science
3 Credits (3)**

Introduction to the basic aspects of dairy science and how to apply key concepts to the practical feeding and management of dairy cattle and production of dairy products. Students should also obtain an appreciation for the size and diversity of the dairy industry.

Prerequisite(s)/Corequisite(s): ANSC 1120. Restricted to Las Cruces campus only.

Learning Outcomes

1. Learn key concepts in dairy production and management
2. Be familiar with terms used in production of milk and milk products

**ANSC 1160. Introductory Horse Science
3 Credits (2+2P)**

The light horse industry; breeds; introduction to feeding, breeding, marketing and management; handling and selecting horses for breeding and performance.

Learning Outcomes

1. Describe and identify breeds of horses, their characteristics and their uses.
2. Demonstrate knowledge of basic physiology of horses by recalling parts of the horse, including bones, muscle, tendons and ligaments. Also, by ageing horses via teeth, body condition scoring and taking vital signs.
3. Demonstrate safe and proper handling of horses.
4. Demonstrate comprehension of basic nutrition and feedstuffs by formulating/correcting diets in clinical and non-clinical situations.
5. Recall aspects of basic reproduction by calculating a stallion book and recalling appropriate procedures for breeding.
6. Create informative articles that seek to educate the lay horse person about a topic covered in class.

**ANSC 1170. Introduction to Animal Metabolism
3 Credits (3)**

Principles underlying the mechanisms of animal metabolism as they relate to production, maintenance, and health of animals.

Prerequisite: CHEM 1215G.

Learning Outcomes

1. This course provides an introduction to the study of the physiology of life.
2. The first part of the course covers acids and bases and the chemical nature of organic compounds.
3. The second part of the course relates to the chemistry of biomolecules (nutrients) and summarizes the chemical reactions of life (metabolism).

**ANSC 1180. Companion Animal in Society
3 Credits (3)**

Examination of the historical, current, and potential future roles of companion animals in human society. Topics include animal domestication, breeds, exotic companion animals, the companion animal industry, and competitions and sports involving companion animals. Emphasis is on canine and feline species. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Discuss the theories regarding why, how, and when companion animals became domesticated.
2. Describe how selective breeding has optimized certain physiological and behavioral traits of companion animals in order to fulfill the needs of individual people and society.
3. Explain the concept of human-companion animal interaction (HAI) and the influence this bond has on human behavior, health, society, and government policy/laws.
4. Understand the breadth and economic impact of the rapidly expanding companion animal industry and the recent expenditure trends of pet owners.
5. Discuss the past and present uses of companion animals and theorize regarding the future uses of companion animals in society
6. Be effective in searching for, and critically evaluating, scientific based resources.

**ANSC 2120. Equine Management
3 Credits (3)**

Introduction and application of the business skills necessary to effectively manage the equine operation. Students will learn how to use strategic thinking and sound business management practices to succeed in the demanding equine industry.

Prerequisite: ANSC 1160.

Learning Outcomes

1. Develop a working knowledge of the business principles needed to operate a successful entrepreneurial enterprise.
2. Increase the awareness of the need for business principles in the aggregate function of an equine operation.
3. Gain a greater perspective of accounting, economic and financial principles in an equine business operation.

**ANSC 2130. Western Equitation II
2 Credits (4P)**

Intermediate principles of Western riding, including reading horse behavior, limbering-up exercises, and developing riding skills. Introduction to rollbacks, turnarounds and stops.

Prerequisite: consent of instructor.

Learning Outcomes

1. Increasing the understanding of the student relative to equitation practices
2. Increase the students' ability to apply principles of Western Equitation to applied settings across a broad spectrum of outlets
3. Prepare the student to engage equine in a professional manner

**ANSC 2140. Introduction to Companion Animal Science
3 Credits (3)**

Introduction to the care of common companion animal species. Species specific housing and nutrition are covered in the context of maximizing animal health and well-being and reducing disease. May be repeated up to 3 credits.

Learning Outcomes

1. Accurately use scientific terminology common to the companion animal discipline.
2. Compare and contrast the physiological similarities and differences between the various companion animal species studied in class.
3. Create dietary plans based on the nutritional needs of different companion animal species to optimize animal health and lifespan.
4. Identify symptoms of disease/injury at the early stages of illness in order to obtain Veterinary care and treatment as quickly as possible.

5. Design and construct species specific cages/vivariums to maximize animal well-being and health.
6. Educate others regarding providing the best possible care for a variety of companion animal species.

**ANSC 2150. Management of Equine Operations
3 Credits (3)**

Introduction and application of business skills necessary to effectively manage the equine operation. Students will learn how to use strategic thinking and sound business management practices to succeed in the demanding equine industry.

Prerequisite(s): ANSC 1160.

Learning Outcomes

1. Acquire a working knowledge of different sectors of the equine industry, including business practices, management and marketing skills.

**ANSC 2310. Introduction to Meat Science
3 Credits (2+3P)**

Fundamental aspects of the red meat industry. Lecture topics and laboratory exercises include the nutrient value of meat, meat preservation, meat safety, muscle structure and contraction, slaughter and processing of beef, lamb and pork, sausage manufacture, meat curing, meat cookery, and muscle and bone anatomy.

Learning Outcomes

1. Increasing the understanding of meat science applications across animal agriculture.
2. Increase the students' ability to apply principles of production to the industry perspective.
3. Apply the increased knowledge of meat science in a global situation.
4. Gain an understanding of the components involved in the development and processing of the red meat industry.

**ANSC 2330. Animal Production
3 Credits (2+2P)**

Production and utilization of beef cattle, sheep, and swine; emphasis on feeding, breeding, management problems and marketing; selection of animals for breeding and market

Learning Outcomes

1. Increasing the understanding of meat animal production.
2. Increase the students' ability to apply principles of production to the industry perspective.
3. Apply the increased knowledge of meat animal production to global situations.
4. Gain a broader understanding of the importance of meat animals in the global food system.

**ANSC 2340. Genetics in Animal Science
3 Credits (3)**

Introduction to genetics and inheritance relative to livestock production. Introduction to procedures for collection and use of performance information in livestock improvement programs.

Prerequisites: BIOL 2610G.

Learning Outcomes

1. Gain a broader understanding of the role genetic impacts in the livestock industry.
2. Employ an increased knowledge of impact of genetics in the food animal industry and the production and economic principles that apply.

3. Recognition of the global impacts of genetics in the food animal industry in a global setting.

ANSC 2996. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

Learning Outcomes

1. Varies

ANSC 301. Animal and Carcass Evaluation**3 Credits (2+2P)**

Determination of the market value of meat animals by relating live animal and carcass traits. Topics include the identification of economically important traits, grading, growth and development, wholesale and retail pricing, and futures and options markets.

ANSC 303. Livestock, Meat and Wool Evaluation**4 Credits (3+2P)**

Selection, classification, grading, and judging of livestock, meat, and wool.

ANSC 304. Feeds and Feeding**3 Credits (2+2P)**

Digestibility of feeds, their nutritive values, grades, and classes, principles of ration formulation and computer ration formulations, and practical feeding of farm animals. Prerequisite(s): CHEM 1215G

ANSC 305. Principles of Genetics**3 Credits (3)**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. May be repeated up to 3 credits.

Prerequisite: (BIOL 2610G and BIOL 2110G, or BIOL 2110G and BCHE 140, and either CHEM 1215G or CHEM 1216).

Learning Outcomes

1. To provide an introduction to the basic concepts, methods, and terminology of genetics. Introduction to genomics and bioinformatics.
2. To develop a working understanding of genetics and heredity
3. To understand in some depth, the mechanism of DNA replication, transcription and protein synthesis. To understand the regulation of gene expression.
4. To examine the impact of genetics on both basic and applied aspects of the biological sciences, as well as its effects on our everyday lives.

ANSC 308. Horse Evaluation**4 Credits (2+4P)**

Students will acquire a working knowledge of selection and classification of horses, learn criteria for evaluation and selection of breeding and show animals, gain a broad understanding of judging conformation and performance in the horse, and learn effective oral and written communication skills through defense of class placings. This course is considered an introduction to the NMSU Horse Judging Team.

ANSC 310. Exhibiting Livestock**3 Credits (1+4P)**

Fitting and showing beef cattle, dairy cattle, sheep and swine.

ANSC 312V. Companion Animals and the Human- Animal Interaction**3 Credits (3)**

The science behind human-animal interactions (HAI). An examination of the interactions between humans and companion animals and the effects on human and animal health and wellness. Cultural differences in HAI will be explored. Topics will include Animal Assisted Activity (AAA), Animal

Assisted Therapy (AAT), and service animals. Emerging and future uses of companion animals in HAI will be discussed.

ANSC 320. Equine Behavior and Training**3 Credits (6P)**

Basic principles, methods and philosophies of handling, breaking and training the two-year-old Western horse. May be repeated up to 6 credits.

Prerequisite(s): ANSC 2130 or consent of instructor.

ANSC 321. Advanced Equine Behavior and Training**3 Credits (6P)**

Continuation of ANSC 320. Further development of skills required to advance the training of the two-year-old Western horse. Emphasis will be placed on lateral work, lead changes, turn-arounds, obstacles, and making the horse accustomed to ranch and trail riding situations.

Prerequisite(s): ANSC 320 or consent of instructor.

ANSC 350. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

ANSC 351V. Agricultural Animals of the World**3 Credits (3)**

Global study of the development and use of animals for production of food and nonfood products. Climatic, cultural, and economic influences on systems of livestock production and species and breeds of livestock utilized will be evaluated.

ANSC 370. Anatomy and Physiology of Farm Animals**4 Credits (3+2P)**

Structure and function of the animal body. Includes studies of the horse, cow, sheep, pig, and comparisons with the human body.

Prerequisite(s): CHEM 1215G and BIOL 2610G or BIOL 2110G.

ANSC 383. Equine Reproductive Management**3 Credits (1+4P)**

Anatomy, physiology, and endocrinology of reproduction of the mare and stallion; training in modern reproductive techniques employed in the horse industry.

Prerequisites: ANSC 1160, ANSC 2150, and ANSC 370.

ANSC 390. Internship**1-3 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Graded S/U.

Prerequisite: consent of instructor.

ANSC 391. Undergraduate Research Experience**1-3 Credits (1-3)**

Formal laboratory, library, or field study of problems related to animal sciences, emphasizing hypothesis development, testing, and reporting results. Projects are preplanned, reviewed, and approved. Students submit periodic written reports and final written and oral reports. May be repeated for a maximum of three credits. Consent of Instructor required.

ANSC 392. Animal Sciences Teaching/Extension Experience**1-3 Credits (1-3)**

: Formal teaching experience related to animal sciences supervised by a faculty member. May involve classroom instruction, educational material development, and/or student evaluation and assessment. Students may also be involved in development, implementation, or assessment of adult or youth educational programs related to animal sciences, supervised by a faculty member. Students submit periodic written reports and a final

written and oral report. May be repeated for a maximum of three credits. Consent of Instructor required.

ANSC 402. Animal Science Seminar

1 Credit (1)

A seminar course designed to inform students of the career opportunities, develop their interviewing and other interpersonal skills may also include reading, discussions, written reports, and seminar presentations of current relevant literature.

ANSC 402 H. Animal Science Seminar

1 Credit (1)

Taught with ANSC 402 with additional work.

Prerequisite(s): Meets Honors eligibility and/or Crimson Scholar status.

ANSC 411. Canine and Feline Behavior and Training

3 Credits (3)

The influence of domestication, breeds, genetics, and physiology on the behavior of canine and feline species. Training methods and modification of problem behaviors are examined. The impact of the pet parent on their animal's behavior is addressed. May be repeated up to 3 credits.

Prerequisite(s): Junior or Senior status or consent of the instructor.

ANSC 412. Canine and Feline Health and Diseases

3 Credits (3)

A review of common infectious and non-infectious diseases and the basics of the immune response. Pathophysiology and treatment of these diseases and the role the pet parent plays in pre-disposing their animals to disease. May be repeated up to 3 credits.

Prerequisite(s): ANSC 2140 or consent of instructor.

ANSC 421. Physiology of Reproduction

4 Credits (3+2P)

Fertility and the role of hormones, nutrition, selection, management and environment in the maintenance of high reproductive rate.

Prerequisite(s): ANSC 370.

ANSC 422. Animal Nutrition

3 Credits (3)

Nutrient utilization and measurement and nutrient requirements for the various body functions. May be repeated up to 3 credits.

Prerequisite: CHEM 313 or ANSC 1170.

Learning Outcomes

1. Compare digestion, absorption and metabolism of nutrients between ruminants and non-ruminants.
2. Demonstrate how animal physiology drives nutrient usage in the body.
3. Integrate animal nutrition concepts to better understand efficient animal production and health.

ANSC 423. Animal Breeding

3 Credits (2+2P)

Mating systems, and selection procedures; calculation of inbreeding coefficients, genetic relationships, and gene frequency.

Prerequisite(s): ANSC 2340 or 305.

ANSC 424. Swine Production

3 Credits (2+2P)

Breeding, feeding, and care of swine.

Prerequisite(s): ANSC 304.

ANSC 425. Horse Science and Management

3 Credits (2+2P)

Senior level course requiring students to apply basic knowledge acquired in the previous courses to solve typical problems encountered in the horse industry. Specific topics include genetics and animal breeding,

business and legal issues, reproduction, health, nutrition and exercise physiology.

Prerequisite(s): ANSC 304 and ANSC 370 or concurrent registration.

ANSC 426. Beef Production: Cow-Calf Management

3 Credits (2+2P)

Senior level course examining management practices for the cow-calf producers. Specifically focusing on nutrition, reproduction, genetics, marketing, and health. May be repeated up to 3 credits.

Prerequisite(s): ANSC 304 and (ANSC 2340 or ANSC 305) or concurrent registration.

ANSC 427. Dairy Production

3 Credits (2+2P)

Breeding, nutrition, physiology and management of dairy cattle.

Prerequisite(s): ANSC 304 and (ANSC 2340 or ANSC 305) or concurrent registration.

ANSC 428. Sheep and Wool Production

3 Credits (2+2P)

Genetics, nutrition, physiology and management of sheep. Wool grading, shearing, and disease control. May be repeated up to 3 credits.

Prerequisite: ANSC 304, ANSC 370.

Learning Outcomes

1. Enhance knowledge and understanding of the different systems utilized to produce a sheep and wool. Topics discussed will include breeding, nutrition, reproduction, management and marketing strategies

ANSC 429. Beef Production: Feedlot Management

3 Credits (2P)

Senior level course in feedlot management of beef cattle. Topics of interest include cattle handling and processing, health and nutrition, intake management, and growth. Feed mill operation, marketing strategies, and regulatory concerns associated with finishing cattle production may also be discussed.

Prerequisite(s): ANSC 304 or Consent of Instructor.

ANSC 448. Problems

1-4 Credits

Individual investigation in a specific area of animal science. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 458. Livestock Behavior, Welfare and Handling

3 Credits (2+3P)

Principles of animal behavior and evaluation of management practices on animal welfare in confined and rangeland livestock operations. Low stress livestock handling techniques. Design of livestock handling facilities. Crosslisted with: RGSC 458

Prerequisite(s): RGSC 2110 or ANSC 1120.

ANSC 462. Parasitology

3 Credits (3)

Same as EPWS 462.

ANSC 468. Advanced Dairy Herd Management

3 Credits (3)

The course is offered through the Southern Great Plains Dairy Consortium in Clovis, NM, and will include breeding, nutrition, physiology, health and management of large herd dairies of the Southwest. Students must apply for the course through the Consortium, and can take it more than once, as topics vary. Consent of instructor required.

Prerequisite(s): ANSC 304.

ANSC 480. Environmental Physiology of Domestic Animals

3 Credits (3)

Influence of environmental factors on physiological processes of domestic animals.

Prerequisite: ANSC 370.

ANSC 484. Ruminant Nutrition

3 Credits (3)

Energy, nitrogen, and mineral nutrition of ruminants with special emphasis on digestive physiology and metabolism of nonprotein nitrogen compounds.

Prerequisite: ANSC 422.

ANSC 501. Advanced Animal Nutrition (so)

3 Credits (3)

Emphasis on digestive physiology and metabolism. Basic mechanisms involved in the intake, digestion, and absorption of nutrients studied. May be repeated up to 3 credits.

ANSC 507. Laboratory Techniques in Nutrition (f)

4 Credits (2+6P)

Methodology and experimental procedures in measuring nutrient requirements and value of diets.

Prerequisites: ANSC 422 or consent of instructor.

ANSC 509. Endocrinology of Domestic Animals (f)

3 Credits (3)

The role of hormones in growth, development, metabolism, temperature regulation, lactation, and reproduction of domestic animals, including commercial applications.

ANSC 510. Range Nutrition Techniques (se)

3 Credits (3)

Animal and plant methods of determining quantity and quality of range forage. Same as RGSC 510.

Prerequisite: ANSC 484 or consent of instructor.

ANSC 512. Research Methods in Animal Science (s)

4 Credits (3+2P)

Procedures used in animal science research, including planning and conduct of investigations and interpretation of results.

ANSC 515. Graduate Seminar

1 Credit (1)

Current topics.

ANSC 520. Advanced Nutritional Management I: Feedlot (se)

3 Credits (3)

Emphasis on feeding systems for beef cattle from weaning to slaughter. Primary focus on feedlot nutrition and management.

Prerequisite: ANSC 484 or consent of instructor.

ANSC 521. Advanced Nutritional Management II: Cow Calf/Stocker (so)

3 Credits (3)

Emphasis on nutritional management for cow-calf and stocker operations. Primary focus on applications to range animal nutrition and management.

Prerequisite: ANSC 484 or consent of instructor.

ANSC 522. Animal Nutrition (f)

3 Credits (3)

Nutrient utilization and measurement; nutrient requirements for the various body functions. Taught with ANSC 422 with additional requirements for graduate students. Recommended for nonmajors. May be repeated up to 3 credits.

Learning Outcomes

1. Compare digestion, absorption and metabolism of nutrients between ruminants and non-ruminants.
2. Demonstrate how animal physiology drives nutrient usage in the body.

3. Integrate animal nutrition concepts to better understand efficient animal production and health.

ANSC 560. Rumen Microbiology (so)

3 Credits (3)

Issues in ruminal and gastrointestinal microbiology. Includes physiological and genetic mechanisms in carbohydrate and nitrogen utilization. Same as FSTE 560.

Prerequisites: ANSC 501.

ANSC 580. Environmental Physiology of Domestic Animals

3 Credits (3)

Influence of environmental factors on physiological processes of domestic animals. Specific focus on fetal and developmental programming, heat and cold stress.

ANSC 598. Special Research Programs

1-4 Credits (1-4)

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 599. Master's Thesis

1-15 Credits (1-15)

Thesis. Consent of Instructor required. Thesis/Dissertation Grading. May be repeated up to 88 credits.

Learning Outcomes

1. Various

ANSC 600. Research

1-15 Credits

This course is for Ph.D. students before they have completed qualifiers. Consent of Instructor required. Thesis/Dissertation Grading.

Prerequisite(s): ANSC 421 or consent of instructor.

ANSC 602. Advanced Reproductive Physiology (fo)

3 Credits (3)

Mechanisms of reproductive function; research methodology.

Prerequisite(s): ANSC 421 or consent of instructor.

ANSC 604. Hypothalamo-Hypophyseal-Pineal Endocrinology (fe)

1 Credit (1)

Hormones and other neurochemicals synthesized and secreted by the hypothalamus, pituitary, and pineal glands. Neuroendocrinology of the hypothalamo-hypophyseal axis.

Prerequisite: ANSC 509.

ANSC 605. Gonadal and Uterine Endocrinology (fe)

1 Credit (1)

Endocrinology of mammalian ovaries, testes, and uteri including developing trophoblasts.

Prerequisite: ANSC 509.

ANSC 606. Endocrinology of Pregnancy, Parturition, and Lactation (fe)

1 Credit (1)

Hormones and other chemical messengers involved in maintenance of pregnancy, control of parturition, and initiation and maintenance of lactation in farm animals.

Prerequisite: ANSC 509.

ANSC 621. Metabolic Functions and Dysfunctions (fe)

3 Credits (3)

Physiological chemistry of ruminants and other domestic animals, with attention to metabolic dysfunctions and nutritional toxicology.

Prerequisites: CHEM 345 and ANSC 501.

ANSC 625. Nutrient Metabolism I: Mineral, Vitamin, and Nitrogen Metabolism (fo)**4 Credits (4)**

Cellular metabolism, physiological function(s), toxicities, and deficiencies of minerals, vitamins and nitrogen in ruminants and nonruminants.

Prerequisite: ANSC 501.

ANSC 626. Nutrient Metabolism II: Carbohydrates, Lipids, and Energetics (se)**4 Credits (4)**

Basic principles of carbohydrate, lipid, and energy metabolism; integration of metabolism with emphasis on nutritional and biochemical processes related to efficiency of nutrient use.

Prerequisite: ANSC 501.

ANSC 698. Special Research Programs**1-4 Credits**

Advanced individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 700. Doctoral Dissertation**15 Credits**

Dissertation. Consent of Instructor required. Thesis/Dissertation Grading.

Range Science Courses

RGSC 1110. The Range Science Profession**1 Credit (1)**

Introduction to scientific disciplines and career opportunities in rangeland science and management.

Learning Outcomes

1. To introduce students to the Range Science program and to a variety of career opportunities in Range Science.
2. To develop an individualized course curriculum that prepares the student to achieve their career goals.
3. To examine opportunities to gain practical work experience through internships and cooperative employment.

RGSC 2110. Introduction to Rangeland Management**3 Credits (3)**

This course covers the principles of managing and understanding pasture and rangelands. Plant physiology and ecology, plant communities and rangeland sustainability and how they relate to livestock production and wildlife management will be discussed. Restricted to: Main campus only.

Learning Outcomes

1. Understand rangeland management operations.
2. Identify rangeland plants.
3. Gain a perspective of watershed management.
4. Discuss the management of rangeland resources.
5. Understand the process of rangeland evaluation through a broad understanding of monitoring and production of these rangelands.
6. Gain a perspective of the correlation of rangelands and the economic principles guiding resource management.
7. Understand the process of rangeland condition.
8. Understand the concepts of stocking rates and usage of rangelands.
9. Gain a broad perspective of different classes of land ownership; Tribal, federal, private and state. 1
10. Recognize vegetative communities, ecological sites, plant physiology and application to rangeland management considerations.

RGSC 2996. Special Topics**1-4 Credits**

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Learning Outcomes

1. Varies

RGSC 302V. Forestry and Society**3 Credits (3)**

Global study of the development and use of forest resources for production of wood, fuel, fiber, and food products. Climatic, edaphic, cultural, and economic influences on forests of the world evaluated. Same as HORT 302V.

RGSC 316. Rangeland Plants**3 Credits (2+3P)**

Identification, classification, cultural uses, and economic importance of native and introduced rangeland plants.

RGSC 317. Rangeland Communities**3 Credits (3)**

Rangeland associations and communities, their plant species composition, and ecological factors affecting management of communities.

RGSC 318. Watershed Management**3 Credits (2+2P)**

Management of rangeland and forest watersheds with emphasis on hydrologic cycle and land use effects on runoff and water quality.

RGSC 325. Rangeland Restoration Ecology**3 Credits (3)**

Principles and practices of vegetation management and ecological restoration. Course emphasizes problems associated with rangeland degradation, and implementation of rangeland restoration and improvements.

Prerequisite(s): Sophomore standing or consent of instructor.

RGSC 350. Special Topics**1-4 Credits**

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

RGSC 357. Grass Taxonomy and Identification**3 Credits (1+4P)**

Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Students must be Junior standing to enroll in this course.

RGSC 390. Internship**1-3 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Graded S/U.

Prerequisite: consent of instructor.

RGSC 402. Seminar**1 Credit (1)**

A seminar course designed to inform students of the career opportunities, develop their interviewing and other interpersonal skills may also include reading, discussions, written reports, and seminar presentations of current relevant literature.

Prerequisite(s): Senior standing.

RGSC 402 H. Range Science Seminar**1 Credit (1)**

Taught with RGSC 402 with additional work.

Prerequisite(s): Meets Honors eligibility and/or Crimson Scholar status and senior standing.

RGSC 440. Rangeland Resource Ecology

3 Credits (3)

Plant adaptations to arid environments. Life histories of arid land plants. Biotic interactions among rangeland organisms. Arid land plant communities: their physiognomy, diversity, productivity, and response to disturbance. Arid land ecosystem dynamics.

Prerequisite(s): Senior standing.

RGSC 440 L. Rangeland Resource Ecology Lab

1 Credit (2P)

Living and nonliving factors of the range environment, the life forms and role of range plants and animals on succession and interactions in range ecosystems. Corerequisite(s): RGSC 440.

RGSC 448. Problems

1-4 Credits (1-4)

Individual investigation in a specific area of range science. Maximum of 4 credits per semester and a grand total of 6 credits. Consent of Instructor required.

RGSC 452. Vegetation Measurements for Rangeland Assessment

4 Credits (2+4P)

Sampling principles, sampling design, and measurement methods used to quantify vegetation attributes and to assess the structure and function of rangeland ecosystems. Laboratory emphasizes practical field techniques, quantitative analysis, and interpretation of results.

Prerequisite(s): RGSC 294 and A ST 311.

RGSC 458. Livestock Behavior, Welfare and Handling

3 Credits (2+3P)

Principles of animal behavior and evaluation of management practices on animal welfare in confined and rangeland livestock operations. Low stress livestock handling techniques. Design of livestock handling facilities. Crosslisted with: ANSC 458

Prerequisite(s): RGSC 2110 or ANSC 1120.

RGSC 460. Rangeland and Natural Resource Planning and Management

4 Credits (3+3P)

Planning and problem solving in rangeland and natural resource management. Public land planning and policy. Application of land management principles to resolve rangeland, riparian and habitat issues.

Prerequisite(s): Senior or graduate student standing.

RGSC 485. Land Cover Analysis for Natural Resources

3 Credits (3)

This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis.

RGSC 509. Approaches to Rangeland Research

3 Credits (3)

Experimental design and statistical analysis of experimental results.

Prerequisite(s): A ST 505 or consent of instructor.

RGSC 513. Advanced Rangeland Ecology

3 Credits (3)

Overview of the current state of knowledge in selected areas of rangeland ecology, with emphasis on currently developing ideas and issues relevant to rangeland management.

Prerequisite(s): RGSC 440 or equivalent.

RGSC 515. Graduate Seminar

1 Credit (1)

Current topics. Graded S/U.

RGSC 516. Arid Land Management

3 Credits (3)

Survey of seminal and current literature dealing with management of arid and semiarid lands including soil-plant-animal interactions, plant community ecology, arid land assessment methods, and arid land hydrology.

RGSC 518. Watershed Methods and Management

3 Credits (3)

Management of rangeland and forest watersheds with emphasis on the hydrologic cycle and land use effects on runoff and water quality. Hydrologic monitoring methods problem sets required for graduate credit.

RGSC 520. Arid Land Plant Herbivore Interactions

3 Credits (3)

Survey of seminal and current literature dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.

RGSC 525. Advanced Rangeland Restoration Ecology

3 Credits (3)

Theory and application of restoration ecology and the principles and practices of ecological restoration. Course emphasizes problems associated with rangeland degradation and highlights current restoration management actions. May be repeated up to 3 credits.

RGSC 550. Special Topics

1-4 Credits

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

RGSC 551. Earth Data Retrieval

3 Credits (3)

This course covers topics related to identifying sources, preprocessing, utilizing earth data that can be used to monitor some hydrological and water related variables, vegetation growth and related biophysical properties. The course focuses on developing students' skills on how to handle and analyze high-level large amounts of research data in different formats (i.e. .hdf). The course highlights the use of remote sensing and land surface models-based (NLDAS) earth observation datasets (e.g. NDVI, LST, Ta, and ET). The course uses some open-source tools including Python, API as well as MATLAB. Crosslisted with: WSAM 551.

RGSC 557. Advanced Grass Taxonomy and Identification

3 Credits (1+4P)

Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Additional writing and grass identification assignments are required for graduate credit.

RGSC 575. Climate Studies, Water and Society

3 Credits (3)

The course provides a brief description of the Earth's climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water

availability) vulnerability of human systems (e.g. agriculture) to climate change, and mitigation and adaptation strategies. Crosslisted with: WSAM 575.

RGSC 585. Land Cover Analysis for Natural Resources
3 Credits (3)

This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis. Crosslisted with: WSAM 585.

RGSC 589. Landscape Hydrology Modeling
3 Credits (3)

The course "Landscape Hydrology Modeling" offers topics related to the physical hydrological processes that occur at different spatial and temporal scales in terms of understanding, quantitative evaluation, modeling, and visualization. It addresses precipitation, runoff, infiltration, and evaporation, as well as understanding impact of land use change on these processes. The course highlights and provide training on the use of hydrological modeling tools including WMS software, HydroVIS and ArcGIS software to help students understand, model, manipulate, and visualize hydrological data processes. The course offers hands-on learning experience on the use of these tools. Consent of Instructor required. Crosslisted with: WSAM 589.

RGSC 598. Special Research Program
1-4 Credits

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

RGSC 599. Master's Thesis
15 Credits

Thesis. Consent of Instructor required. Thesis/Dissertation Grading.

RGSC 600. Doctoral Research
1-15 Credits

Research. Consent of Instructor required. Thesis/Dissertation Grading.

RGSC 616. Advanced Arid Land Management
3 Credits (3)

In depth discussion of seminal and current literature dealing with management of arid and semiarid lands including land tenure systems, soil-plant-animal interactions (emphasis on livestock grazing), plant community ecology and assessment methods, and arid land hydrology.

RGSC 620. Advanced Arid Land Plant-Herbivore Interactions
3 Credits (3)

In depth discussion of seminal work dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.

RGSC 698. Special Research Programs
1-4 Credits (1-4)

Advanced individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

RGSC 700. Doctoral Dissertation
15 Credits

Dissertation. Consent of Instructor required. Thesis/Dissertation Grading.

Animal Science (Animal Industry) - Bachelor of Science in Agriculture

The animal industry concentration includes courses that prepare you for work in many phases of the livestock industry, such as livestock production on farms and ranches, the meat industry, the feed industry, livestock breed associations, and livestock publications.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education		
<i>Area I: Communications</i>		
	English Composition - Level 1 ¹	4
	English Composition - Level 2 ¹	3
	Oral Communication	3
<i>Area II: Mathematics</i>		
MATH 1220G	College Algebra ²	3-4
	or MATH 1511G	Calculus and Analytic Geometry I
<i>Area III/IV: Laboratory Sciences and Social/Behavioral Sciences</i>		
BIOL 2610G & BIOL 2610L	Principles of Biology: Biodiversity, Ecology, and Evolution and Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory	4
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	4
	Choose one from the following:	3
	ECON 1110G	Survey of Economics
	ECON 2110G	Macroeconomic Principles
	ECON 2120G	Principles of Microeconomics

<i>Electives</i>		
Production Electives		
Select 9 credits from production courses offered in the department		9
ANSC 424	Swine Production	
ANSC 425	Horse Science and Management	
ANSC 426	Beef Production: Cow-Calf Management	
ANSC 427	Dairy Production	
ANSC 428	Sheep and Wool Production	
ANSC 429	Beef Production: Feedlot Management	
ANSC 468	Advanced Dairy Herd Management	
Ranch Management Electives		
Select three courses from the following:		9
AEEC 2140	Technology and Communication for Business Management	
AEEC 3270	Spreadsheet Applications in Food and Agriculture	
ANSC 383	Equine Reproductive Management	
ANSC 480	Environmental Physiology of Domestic Animals	
RGSC 316	Rangeland Plants	
RGSC 318	Watershed Management	
RGSC 325	Rangeland Restoration Ecology	
RGSC 458	Livestock Behavior, Welfare and Handling	
Or any AEEC or RGSC numbered 300/3000 & above except AEEC 3210 and AEEC 4530		
Business Electives		
Select one from the following:		
AEEC 3210	Marketing and Food Agricultural Products	
AEEC 4530	Case Studies in Food and Agribusiness Management	
MGMT 361	Small Business Management	
MKTG 312	Personal Selling	

Or any BUSA, MGMT, MKTG numbered 300/3000 & above that are not VWW courses

Non-Departmental Requirements (in addition to Gen.Ed/VWW)		
A ST 311	Statistical Applications	3
Second Language: (not required)		
Electives, to bring the total to 120⁵		13-15
Total Credits		120

- ¹ See the General Education (p. 227) section of the catalog for a full list of courses.
- ² MATH 1220G College Algebra or MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G or MATH 1511G first.
- ³ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses
- ⁴ Required of Industry and Science Options
- ⁵ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		
Semester 1		Credits
ANSC 1120	Introduction to Animal Science	3
ANSC 1120L	Introduction to Animal Science Lab	1
MATH 1220G	College Algebra	3
ENGL 1110G	Composition I	4
ACES 1120	Freshman Orientation	1
Ag Elective: choose one based on interest		3

Animal Science (Science) - Bachelor of Science in Agriculture

The science concentration provides you with a strong background in technical science and prepares you for advanced studies leading to graduate or professional degrees.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Range Science - Bachelor of Science in Agriculture

The following course work prepares you for study and management of rangelands through an integrated ecological approach with special emphasis on rangeland plants, livestock, wildlife, soils and watersheds. The course work is also well designed for those who want to continue study in graduate school. Any undergraduate student majoring in Range Science must earn a grade of C- or higher in Range Science (RGSC prefix) courses to satisfy degree requirements. Students earning a D or F in a Range Science (RGSC prefix) course will be expected to repeat that course until the student earns a grade of C- or higher.

Requirements

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300/3000 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

¹ These courses have prerequisites and it is the students responsibility for checking and fulfilling all course prerequisites listed for these courses.

² See the General Education (p. 227) section of the catalog for a full list of courses.

³ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses.

Dairy Science - Undergraduate Minor

A minor in Dairy Science consists of at least 18 credits.

Prefix	Title	Credits
Core ANSC courses (all of the following are required)		12
ANSC 1120	Introduction to Animal Science	
or ANSC 1120H	Introduction to Animal Science Honors	
ANSC 1140	Introduction to Dairy Science	
ANSC 304	Feeds and Feeding	
ANSC Elective Course		
Dairy Science Electives:		6
ANSC 427	Dairy Production	
ANSC 468	Advanced Dairy Herd Management	
<i>ANSC Science Experience (no more than 3 credits; must be in field of dairy science):</i>		
ANSC 390	Internship	
ANSC 391	Undergraduate Research Experience	
ANSC 392	Animal Sciences Teaching/Extension Experience	
Total Credits		18

Horse Management - Undergraduate Minor

A minor in Horse Management consists of at least 18 credits.

Prefix	Title	Credits
Required Courses		
<i>All of the following:</i>		
ANSC 1160	Introductory Horse Science	3
ANSC 2150	Management of Equine Operations	3
ANSC 308	Horse Evaluation	4
ANSC 383	Equine Reproductive Management	3
ANSC 425	Horse Science and Management	3
Choose 3 credits of the following:		3
ANSC 2120	Equine Management	
ANSC 320	Equine Behavior and Training	
ANSC 321	Advanced Equine Behavior and Training	
ANSC 390	Internship	
ANSC 391	Undergraduate Research Experience	
ANSC 392	Animal Sciences Teaching/Extension Experience	
Total Credits		19

Human Animal Interaction - Undergraduate Minor

A minor in Human Animal Interaction consists of at least 18 credits.

Prefix	Title	Credits
Required Courses		
ANSC 1180	Companion Animal in Society	3
ANSC 2140	Introduction to Companion Animal Science	3
ANSC 312V	Companion Animals and the Human- Animal Interaction	3
ANSC 390	Internship ¹	3
ANSC 411	Canine and Feline Behavior and Training	3
ANSC 412	Canine and Feline Health and Diseases	3
Total Credits		18

¹ Must complete 3 credit hours of internship

Livestock Production - Undergraduate Minor

A minor in Livestock Production consists of at least 18 credits. Animal science majors may NOT minor in Livestock Production.

Prefix	Title	Credits
Core ANSC Courses		
All of the following		
ANSC 1120	Introduction to Animal Science	3
ANSC 304	Feeds and Feeding	3
<i>Production Electives</i>		
Choose 6 credits of the following:		6
ANSC 424	Swine Production	
ANSC 425	Horse Science and Management	
ANSC 426	Beef Production: Cow-Calf Management	
ANSC 427	Dairy Production	
ANSC 428	Sheep and Wool Production	
ANSC 429	Beef Production: Feedlot Management	
<i>ANSC Electives</i>		
Choose 6 credits of the following:		6
ANSC 301	Animal and Carcass Evaluation	
Or any ANSC course numbered 300 and above ¹		
Total Credits		18

¹ Only one ANSC VWW is eligible towards minor

Ranch Management - Undergraduate Minor

The Ranch Management minor consists of at least 18 credits. Animal science majors may NOT minor in ranch management.

Prefix	Title	Credits
Core ANSC Courses		
ANSC 1120	Introduction to Animal Science	3
ANSC 304	Feeds and Feeding	3
<i>Production Electives</i>		

Choose 2 of the following 6

ANSC 425	Horse Science and Management	
ANSC 426	Beef Production: Cow-Calf Management	
ANSC 428	Sheep and Wool Production	
ANSC 429	Beef Production: Feedlot Management	

Range Electives

RGSC 2110 Introduction to Rangeland Management 3

Choose 3 credits from the following 3

RGSC 302V	Forestry and Society	
RGSC 316	Rangeland Plants	
RGSC 317	Rangeland Communities	
RGSC 318	Watershed Management	
RGSC 440	Rangeland Resource Ecology	

Total Credits 18

Range Science - Undergraduate Minor

A minor in Range Science consists of at least 18 credits in courses with a RGSC prefix and achieve a C- or higher in all RGSC classes.

Prefix	Title	Credits
Choose 18 credits from the following courses		18
RGSC 2110	Introduction to Rangeland Management	
RGSC 302V	Forestry and Society	
RGSC 316	Rangeland Plants	
RGSC 317	Rangeland Communities	
RGSC 318	Watershed Management	
RGSC 325	Rangeland Restoration Ecology	
RGSC 357	Grass Taxonomy and Identification	
RGSC 440	Rangeland Resource Ecology	
RGSC 440 L	Rangeland Resource Ecology Lab	
RGSC 452	Vegetation Measurements for Rangeland Assessment ¹	
RGSC 458	Livestock Behavior, Welfare and Handling	
RGSC 460	Rangeland and Natural Resource Planning and Management	
Total Credits		18

¹ RGSC 2110 Introduction to Rangeland Management & A ST 311 Statistical Applications are pre-requisites for this course

Entomology, Plant Pathology and Weed Science

Undergraduate Program Information

Specific courses that meet these and the university general education requirements and additional courses in biology, chemistry, mathematics and seminar are included below in departmental requirements. A total of 120 credits are required for graduation. At least 48 credits must be 300-level courses and above. Schedules in specific semesters will be developed with the help of a student's academic advisor.

Graduate Program Information

The complexity of managing insects, plant diseases, and weeds is increasing environmental concerns, costs, and regulations requiring an

integrated approach to management strategies. Future professionals in integrated pest management will be ecologically oriented, trained to manipulate biological and cultural technologies while minimizing chemical control options. The Master of Science degree program in agricultural biology is designed to produce graduates with the academic and research background needed to facilitate effective, innovative, and environmentally sound protection of plants and animals from a wide and varied spectrum of pests. Students will be prepared for careers in research, extension, teaching, private consulting, industry, and government or to continue in a broad range of Ph.D. programs. Specific opportunities will include positions as agricultural consultants, technical and sales representatives for industry, state departments of agriculture and USDA specialists, agricultural extension agents, and industry research and environmental technicians. There is currently a strong need for MS graduates trained in these areas, and the demand is expected to increase dramatically.

Students may wish to concentrate their graduate program in entomology, plant pathology, or weed science, or conversely may wish to be broadly trained in all three pest-management disciplines. Most students will be expected to complete a thesis. A non-thesis option is available, depending on prior training and experience and subject to approval by the department head. A nonthesis research option requires completion of a research paper, suitable as judged by the student's graduate committee, for journal publication. Completion of an undergraduate degree essentially equivalent to that offered by the department is required for admission to the MS graduate program. Qualifications for admission will be reviewed by the departmental Graduate Admissions committee. Prospective graduate students must have at least a 3.0 undergraduate GPA, complete the GRE, and submit an official transcript, a letter of intent and three letters of recommendation.

Degrees for the Department

Bachelor Degree(s)

- Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture (p. 330)
- Agricultural Biology (Applied Microbiology) - Bachelor of Science in Agriculture (p. 332)
- Agricultural Biology (Entomology) - Bachelor of Science in Agriculture (p. 333)
- Agricultural Biology (Environmental Biology) - Bachelor of Science in Agriculture (p. 334)
- Agricultural Biology (Invasive Pest Biology and Management) - Bachelor of Science in Agriculture (p. 336)
- General Agriculture - Bachelor of Science in Agriculture (p. 338)

Master Degree(s)

- Agricultural Biology - Master of Science (p. 96)

Minors for the Department

- Entomology - Undergraduate Minor (p. 340)
- Pest Management - Undergraduate Minor (p. 340)
- Plant Pathology - Undergraduate Minor (p. 340)
- Weed Science - Undergraduate Minor (p. 340)

Professor, Gerald K. Sims, Department Head

Professors Creamer, Bundy, Sanogo, Thomas, Thompson; **Associate Professors** Hanson, Mesbah, Pierce, Romero, Schutte; **Assistant**

Professors Lehhoff; *Affiliated Faculty* Schroeder, Sweet, Bleiweiss; **College Assistant Professor** Lewis; **College Associate Professor** Randall; **Emeritus Professor** Arnold, Richman

G.K. Sims, *Department Head, Ph.D. (Purdue)– soil microbiology; weed science; C. S. Bundy, Ph.D. (Georgia)– entomology; R. Creamer, Ph.D. (California-Davis)– plant pathology; N.P. Goldberg, Ph.D. (Arizona)– plant pathology; S. Hanson, Ph.D. (University of Wisconsin)– molecular plant pathology; E. Lehnhoff, Ph.D. (Montana State) Ecology and Environmental Science; B. E. Lewis, M.S. (New Mexico State)– economic entomology; A.O. Mesbah, Ph.D. (University of Wyoming)– weed science; J. Breen Pierce (Rutgers)– entomology; J. Randall, Ph.D. (New Mexico State University)– plant pathology; A. Romero, Ph.D. (University of Kentucky)– Entomology; S. Sanogo, Ph.D. (Pennsylvania State)– plant pathology; B. Schutte, Ph.D. (Ohio State)– Horticulture & Crop Science; C. A. Sutherland, Ph.D. (Oregon State)– extension entomology; S. H. Thomas, Ph.D. (Iowa State)– nematology; D.C. Thompson, Ph.D. (Colorado State)– entomology.*

Entomology, Plant Pathology and Weed Science Courses

EPWS 1110G. Applied Biology 3 Credits (3)

Introduction to applied biology and ecology focusing on insects, plants and pathogens in natural areas, crops and urban settings. EPWS 1110L is strongly recommended to take in the same semester. May be repeated up to 3 credits.

Learning Outcomes

1. Students will learn about the Department of Entomology Plant Pathology and Weed Science and will have the opportunity to meet the Las Cruces-based faculty in the department.
2. By the end of this course students will have gained a broad understanding of the pests in a wide range of systems, their interactions with other organisms, and the methods available to minimize the influence of pests on target commodities.

EPWS 1110L. Applied Biology Lab 1 Credit (1)

Study of applied biology and ecology of insects, plants and pathogens in natural areas, crops, and urban settings. EPWS 1110 strongly recommended to take in the same semester. May be repeated up to 1 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Students will learn about the Department of Entomology Plant Pathology and Weed Science and will have the opportunity to meet the Las Cruces-based faculty in the department.
2. By the end of this course students will have gained a broad understanding of the pests in a wide range of systems, their interactions with other organisms, and the methods available to minimize the influence of pests on target commodities.

EPWS 2996. Special Topics 1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Learning Outcomes

1. Varies

EPWS 300. Special Topics 1-4 Credits

Specific topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

EPWS 301. Agricultural Biotechnology 3 Credits (2+2P)

The principles of molecular biology will be introduced and used to explore the past, present, and future applications of biotechnology in agriculture. Specific topics include methodologies for making transgenic plants with increased pest resistance, the use of biotechnology in pest detection, and improving nutritional value. The laboratory will provide students with hands-on experience with equipment used for biotechnology research.

Prerequisites: CHEM 1225G, BIOL 2610G, or BIOL 2110G.

EPWS 302. General Entomology 4 Credits (4)

An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insect orders and families. Laboratory focuses on identification of insect orders and families.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 302 H. General Entomology Honors 4 Credits (4)

An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insects orders and families. Laboratory focuses on identification of insect orders and families. Students in the Honors section will be given the opportunity to enhance their understanding of entomology with a more detailed examination into the lives of these fascinating organisms.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 303. Economic Entomology 3 Credits (3+2P)

Identification and life cycles of insects of economic significance, their relationship to humans and agriculture including biological interactions and controls. May be repeated up to 3 credits.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 310. Plant Pathology 4 Credits (3+2P)

Causes and methods of prevention and treatment of diseases in plants.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 310 H. Plant Pathology Honors 4 Credits (4)

Cause and methods of prevention and treatment of diseases in plants. Students with an Honors designation will have additional project and report assignments.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 311. Introduction to Weed Science 4 Credits (3+2P)

Principles of weed science, with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Identification of local weeds. Crosslisted with: AGRO 311.

Prerequisite(s): CHEM 1215G, and BIOL 2110G.

EPWS 314. Plant Physiology 3 Credits (3)

Overview of photosynthesis, respiration, water relations of plants, minerals and organic nutrition, growth and development. Same as BIOL 314.

Prerequisites: BIOL 2110G, CHEM 1225G.

EPWS 325V. Insects, Humans, and the Environment 3 Credits (3)

Overview of the interactions of the world's largest group of organisms with humans. Emphasizing the role of insects in the development of human cultures, including health, food and fiber production, art, music,

and environmental issues; with discussions of historic, present day, and future impacts in underdeveloped, developing, and developed civilizations.

EPWS 373. Fungal Biology
3 Credits (2+2P)

Introduction to the taxonomy, morphology, physiology, and ecology of fungi. Same as BIOL 373.

Prerequisites: EPWS 310 or BIOL 311, or consent of instructor.

EPWS 380V. Science & Society
3 Credits (3)

Analysis and evaluation of how human activities affect the earth's environment or ecosystems. Several examples, from global issues to local issues will be studied in detail. Current science and the intersection of science and public policy will be discussed in relation to problems like world population, agricultural productivity, deforestation, medical advances, and future prospects for the environment. May be repeated up to 3 credits.

EPWS 390. Internship
1-3 Credits

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. Maximum of 3 credits. Graded S/U.

Prerequisite: consent of instructor.

EPWS 420. Environmental Behavior of Pesticides
3 Credits (3)

Behavior of pesticide compounds in the environment, their function toward target and non target pest organisms including humans, effect of environmental conditions on pesticide function, ecology of organisms involved in pesticides degradation, overview of environmental regulation. CHEM 2115 recommended prior to course. May be repeated up to 3 credits.

EPWS 447. Seminar
1 Credit (1)

Organization and techniques for the oral presentation of research information. Restricted to: Main campus only.

EPWS 447 H. Seminar Honors
1 Credit (1)

Organization and techniques for the oral presentation of research information. Students taking EPWS 447 H will have the additional assignment of making a poster on either scientific research or a scientific topic.

Prerequisite(s): Honors eligibility requirements.

EPWS 449. Special Problems
1-3 Credits

Individual investigation in specific areas of entomology, plant pathology or plant physiology. Maximum of 3 credits per semester and a grand total of 6 credits.

EPWS 451. Special Topics
1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Prerequisite: consent of instructor.

EPWS 455. Advanced Integrated Pest Management
3 Credits (3)

Examination of factors affecting the biology and ecology, population evaluations, and control of insect, disease, and weed pests with an emphasis on integrating management practices. Credit cannot be given for both EPWS 455 and EPWS 505. Crosslisted with: EPWS 505.

Prerequisite(s): Either EPWS 303 or EPWS 310 or EPWS 311, or consent of instructor.

EPWS 456. Biological Control
3 Credits (3)

Principles of plant and animal suppression using living organisms. Interaction of biological control organisms with biotic and abiotic factors will be stressed. Credit cannot be given for both EPWS 456 and EPWS 506. Students should complete an introductory course in entomology prior to enrollment. May be repeated up to 3 credits.

EPWS 462. Parasitology
3 Credits (3)

Introduction to classification, biology, ecology and management of the major parasites of human, domestic animals and wildlife.

EPWS 471. Plant Mineral Nutrition
3 Credits (3)

Same as HORT 471 and AGRO 471.

EPWS 486. Plant Virology
3 Credits (3)

An overview of viral pathogens associated with infectious plant disease. Includes pathogens, replication, genetics, transmission, and movement of plant viruses.

EPWS 492. Diagnosing Plant Disorders
3 Credits (2+3P)

Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as AGRO 492 and HORT 492.

Prerequisites: EPWS 303, EPWS 310.

EPWS 502. General Entomology
4 Credits (4)

An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insect orders and families. Laboratory focuses on identification of insect orders and families.

Prerequisite(s): Either BIOL 2610G or BIOL 2110G.

EPWS 505. Advanced Integrated Pest Management
3 Credits (3)

Examination of the factors affecting the biology and ecology, population evaluations, and control of insect, disease, and weed pests, with an emphasis on integrating management practices. Crosslisted with: EPWS 455.

Prerequisite(s): EPWS 303 or EPWS 310 or EPWS 311 or consent of instructor.

EPWS 506. Biological Control
3 Credits (3)

Principles of plant and animal pest suppression using living organisms. Interaction of biological control organisms with biotic and abiotic factors will be stressed. Individual paper or project required. An introductory course in entomology should be completed before enrollment. Credit cannot be given for both EPWS 456 and EPWS 506. May be repeated up to 3 credits.

EPWS 511. Introduction to Weed Science (f)
4 Credits (3+2P)

Covers the principles of weed science with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Includes identification of local weeds. Research paper required for graduate credit. Crosslisted with: AGRO 511.

Prerequisite(s): CHEM 1215G and BIOL 2110G.

EPWS 514. Plant Physiology**3 Credits (3)**

Overview of photosynthesis, respiration, water relations of plants, minerals and organic nutrition, growth and development.

Prerequisite(s): BIOL 2110G, CHEM 1225G.

EPWS 520. Environmental Behavior of Pesticides (so)**3 Credits (3)**

Behavior of these compounds in the environment, their function toward target and non target pest organisms including humans, effect of environmental conditions on pesticide function, ecology of organisms involved in pesticides degradation, overview of environmental regulation. CHEM 2115 recommended prior to course. May be repeated up to 3 credits.

EPWS 525. Scientific Writing- How to be a Productive and Effective Writing**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: AGRO 525, HORT 525 and SOIL 525.

EPWS 549. Special Problems**1-4 Credits**

Individual investigation in specific areas of entomology, plant pathology, and weed science. Maximum of 4 credits per semester and a total of 6 credits.

EPWS 551. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

EPWS 560. Ecology and Management of Invasive Plant Species**3 Credits (3)**

An overview of the causes and consequences of plant invasions and invasive plant management, with a focus on critical examination of current literature and paradigms.

Learning Outcomes

1. Students will gain practical and theoretical knowledge to facilitate improved vegetation management by engaging in critical thinking and discussion on a wide variety of topics related to invasive plants.
2. Students will understand why plants invade and how to facilitate prevention of invasion in natural and rangeland areas
3. Further, students will gain knowledge of the tools and practices of invasive plant management.

EPWS 573. Fungal Biology**3 Credits (2+2P)**

Introduction to the taxonomy, morphology, physiology, and ecology of fungi. Same as BIOL 573.

Prerequisite: EPWS 310 or consent of instructor.

EPWS 590. Graduate Seminar**1 Credit (1)**

Review of current scientific literature in entomology, plant pathology, and weed science, and verbal presentation of information. No more than 2 credits toward a degree.

EPWS 598. Graduate Internship**1-6 Credits**

Supervised professional on-the-job learning experience. Limited to Master of Agriculture candidates. Not more than 6 credits toward the degree.

EPWS 599. Master's Thesis**15 Credits**

Thesis.

Name: Entomology, Plant Pathology & Weed Science Department

Office Location: Skeen Hall, Room N141

Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture

The agricultural biology course work prepares you for a variety of careers in the biological sciences and agriculture. You will develop your curriculum with an academic advisor to attain your individual goals. Many will pursue advanced degrees in the sciences or prepare for admittance to professional schools (medical, dental, etc.). A diverse program is offered with five separate concentrations that allow you to tailor your program for careers in the commercial sector, such as agricultural consulting, and pest management or for careers with county, state, or federal agencies, such as research technicians, land managers, and extension agents. A minimum of 120 credit hours is required for graduation. Any undergraduate student majoring in Agricultural Biology must earn a grade of C- or higher in core (EPWS prefix) courses to satisfy degree requirements. Students earning a D or F in a core (EPWS prefix) course will be expected to repeat that course until the student earns a grade of C- or higher. The following courses are required for a major in Agricultural Biology.

The Applied Biology concentration prepares you for professional advancement including admittance to medical, dental, veterinary and graduate schools. Students interested in the health professions must register with the Health Professional Advisory Committee no later than the sophomore year. Students should check the specific entrance requirements for the professional or graduate school of their choice prior to selecting electives within this option.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education		
<i>Area I: Communications</i>		
<i>English Composition - Level 1</i>		
ENGL 1110G	Composition I	4
<i>English Composition - Level 2</i>		
Choose one from the following:		
ENGL 2130G	Advanced Composition	3

BCHE 395	Biochemistry I	3
Total Credits		120

- ¹ MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G College Algebra first.
- ² See the General Education (p. 227) section of the catalog for a full list of courses
- ³ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses
- ⁴ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Agricultural Biology (Applied Microbiology) - Bachelor of Science in Agriculture

The agricultural biology course work prepares you for a variety of careers in the biological sciences and agriculture. You will develop your curriculum with an academic advisor to attain your individual goals. Many will pursue advanced degrees in the sciences or prepare for admittance to professional schools (medical, dental, etc.). A diverse program is offered with five separate concentrations that allow you to tailor your program for careers in the commercial sector, such as agricultural consulting, and pest management or for careers with county, state, or federal agencies, such as research technicians, land managers, and extension agents. A minimum of 120 credit hours is required for graduation. Any undergraduate student majoring in Agricultural Biology must earn a grade of C- or higher in core (EPWS prefix) courses to satisfy degree requirements. Students earning a D or F in a core (EPWS prefix) course will be expected to repeat that course until the student earns a grade of C- or higher. The following courses are required for a major in Agricultural Biology.

The Applied Microbiology biotin prepare you for professional positions in algal biofuels, environmental monitoring and improvement, industrial applications of microbiology, food sanitation, research or graduate study.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

General Agriculture - Bachelor of Science in Agriculture

The general agriculture major is designed for students searching for a well-rounded education that builds on the diversity of the other degree programs in the College of Agricultural, Consumer and Environmental Sciences (ACES). The flexibility of the general agriculture degree allows students to tailor a program to fit their individual interests and career goals. Students completing the program earn a Bachelor of Science in General Agriculture. Students choose general agriculture for a variety of reasons. Some may enter the program with a specific career goal in mind. Others may choose general agriculture to obtain a broader education that will give them more flexibility. The curriculum in General Agriculture is administered by the Department of Entomology, Plant Pathology and Weed Science.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education Requirements		
<i>Area I: Communications</i>		
<i>English Composition - Level 1</i>		
ENGL 1110G	Composition I	4
<i>English Composition - Level 2</i>		
Select one from the following:		3
ENGL 2130G	Advanced Composition	
ENGL 2210G	Professional and Technical Communication Honors	
ENGL 2210H	Professional and Technical Communication Honors	
ENGL 2215G	Advanced Technical and Professional Communication	
ENGL 2221G	Writing in the Humanities and Social Science	
<i>Oral Communication</i>		
Select one from the following:		3

ACOM 1130G	Effective Leadership and Communication in Agriculture	
COMM 1115G	Introduction to Communication	
COMM 1130G	Public Speaking	
Area II: Mathematics		
Select 3-4 credits from the following: ¹		3-4
MATH 1130G	Survey of Mathematics	
MATH 1220G	College Algebra	
MATH 1430G	Applications of Calculus I	
MATH 1250G	Trigonometry & Pre-Calculus	
MATH 1511G	Calculus and Analytic Geometry I	
Area III/IV: Laboratory Sciences and Social/Behavioral Sciences		10-11
Area III: Laboratory Sciences Course (4 credits) ²		
Area IV: Social/Behavioral Sciences Course (3 credits) ²		
Either an Area III: Laboratory Sciences Course (4 credits) or an Area IV: Social/Behavioral Sciences Course (3 credits) ²		
Area V: Humanities²		3
Area VI: Creative and Fine Arts²		3
General Education Elective²		3-4
Viewing a Wider World³		
Departmental/College Requirements		
Additional College Requirements⁴		
Select three areas of concentration from the following ACES departments: ⁵		52
Agricultural Economics and Agricultural Business		
Agricultural and Extension Education		
Animal and Range Science		
Entomology, Plant Pathology and Weed Science		
Family and Consumer Sciences		
Fish, Wildlife and Conservation Ecology		
Plant and Environmental Sciences		
Hotel, Restaurant and Tourism Management		
Second Language: (not required)		
Electives, to bring total credits to 120⁶		33-36
Total Credits		120

¹ See the General Education (p. 227) section of the catalog for a full list of courses

² A Mathematics course is required for the degree but students may need to take any prerequisites needed to enter the course first.

³ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses

⁴ Some ACES classes will meet general education requirements.

⁵ At least 18 credits must be taken from the primary department and at least 12 credits must be taken from two secondary departments. A minimum of 52 credits (20 of which need to be 300+) of the 120 required for the degree, must be completed in courses offered by the College of Agricultural, Consumer, and Environmental Sciences.

⁶ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		
Semester 1		Credits
ACES 1120	Freshman Orientation	1
ACES 1210	Financial Fitness for College Students	1
ENGL 1110G	Composition I ¹	4

EPWS 1110	Applied Biology	
EPWS 1110L	Applied Biology Lab	
BIOL 312	Plant Taxonomy	
BIOL 301	Principles of Ecology	
BIOL 313	Structure and Function of Plants	
EPWS 455	Advanced Integrated Pest Management	
Total Credits		18

Family and Consumer Sciences Undergraduate Program Information

Courses and curricula in the department are designed to educate you as an individual and as a citizen in a changing society. They also develop a scientific attitude and the ability to conduct research directed toward solutions of problems affecting the quality of life for individuals, families and communities.

You must complete general education requirements, and a sequence of specialized course work is then identified for each major.

The following prefixes are used for courses:

- CTFM - Clothing, Textiles and Fashion Merchandising
- FCSC—Family and Consumer Sciences;
- FCST—Family and Child Science;
- FSTE—Food Science and Technology;
- NUTR— Nutrition

Graduate Program Information

The candidate for the master's degree should have an undergraduate degree in a field related to the intended area of specialization. In addition to the Graduate School requirements, the admissions criteria for the Department of Family and Consumer Sciences Graduate Program include letters of reference, standardized test scores, and other materials. Suggested departmental deadlines for review of admission materials are six weeks prior to the first day of the semester of desired start. A complete description of admission requirements should be obtained from the department.

Degrees for the Department

Bachelor Degree(s)

- Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences (p. 359)
- Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences (p. 361)
- Food Science and Technology (Culinary Science) - Bachelor of Science in Food Science and Technology (p. 363)
- Food Science and Technology (Meat Science) - Bachelor of Science in Food Science and Technology (p. 364)
- Food Science and Technology (Science, Technology and Engineering) - Bachelor of Science in Food Science and Technology (p. 366)
- Human Development & Family Science - Bachelor of Science (p. 368)
- Human Development and Family Science - Bachelor of Science (Online) (<https://catalogs.nmsu.edu/global/nmsu-global/human-development-family-science-bs-online/>)
- Human Nutrition and Dietetic Science (Nutrition Education) - Bachelor of Science in Family and Consumer Sciences (p. 370)
- Human Nutrition and Dietetic Science (Pre-Dietetics/Dietetics) - Bachelor of Science in Family and Consumer Sciences (p. 372)

Master Degree(s)

- Family and Consumer Sciences (Couples, Marriage and Family Therapy) - Master of Science (p. 147)

- Family and Consumer Sciences (Food Science and Technology) - Master of Science (p. 146)
- Family and Consumer Sciences (Hotel, Restaurant and Tourism Management) - Master of Science (p. 147)
- Family and Consumer Sciences (Human Nutrition & Dietetic Sciences) - Master of Science (p. 149)

Minors for the Department

- Culinary Science - Undergraduate Minor (p. 375)
- Fashion Merchandising & Design - Undergraduate Minor (p. 375)
- Food Science - Undergraduate Minor (p. 375)
- Human Development and Family Science - Undergraduate Minor (p. 375)
- Nutrition - Undergraduate Minor (p. 375)

Merranda Marin, Department Head

Professors Marin, Montañez, Moreno, Delgado

Associate Professors Gomez, Plawecki

Assistant Professors Ahn, Martin, Martinez-Monteagudo, Sabillon Galeas

College Professor Vaillancourt, Coffeen

College Assistant Professors Azcarate, Phillips

I. Ahn, Ph.D. (Chung-Ang University, Korea)- textile and clothing; K. Coffeen, Ph.D. (New Mexico State University)- educational leadership; E. Delgado, Ph.D. (Technical University of Berlin, Germany)–food science and technology; S. Gomez, PhD (University of Illinois-Chicago) - nutritional epidemiology; S. Martin, Ph.D. (South Dakota State University)- nutrition and exercise science; M. Marin, Ph.D. (New Mexico State University)– counseling and educational psychology; M. Montanez, Ph.D. (Michigan State University)– psychology; R. Moreno, Ph.D. (Stanford University)–child development; S. Phillips, M.S. (New Mexico State University) - family and consumer sciences; L. Sabillon Galeas, Ph.D. (University of Nebraska-Lincoln)- food science and technology; K. Vaillancourt, Ph.D. (Virginia Tech University)– family studies

Cooperative Extension Service *L. Banegas-Carreón, M.P.H. (New Mexico State University)- public health; W. Fedio, Ph.D. (University of Alberta-Canada)– food microbiology; N. Flores, Ph.D. (Kansas State University)– food science; B. Jorgensen, Ph.D. (Virginia Tech University)– family studies; S. Koukel, Ph.D. (Texas Tech University)– family and consumer sciences education; K. Martinez, Ph.D. (New Mexico State University)- educational leadership and administration; L. Olivas, M.Ed. (New Mexico State University)- education/curriculum and instruction; K. Plawecki, Ph.D. (University of Illinois)- nutritional sciences; L. Sabillon Galeas, Ph.D. (University of Nebraska-Lincoln)- food science and technology; C. Vanderpool, M.S. (University of New Mexico)- nutrition*

Clothing, Textiles & Fashion Merchandising

CTFM 1110. Fundamentals of Fashion
3 Credits (3)

Survey of the fashion business from fiber to end product.

Learning Outcomes

1. Describe the roles and functions of industry jobs and sectors involved in the designing, production, marketing, and distribution of fashion brands within the global context.

- Describe the business strategies of industry sectors involved in the designing, production, marketing, and distribution of fashion brands within the global context.
- Describe the interrelationships among line planning, line development, and line presentation at manufacturing and retail levels.
- Provide examples of the fashion industry's environmental and social impact.
- Learn about all career tracks involved in the fashion industry and the global fashion supply chain.
- Synthesize industry-relevant information on current issues in the fashion industry.
- Demonstrate the understanding of, and the ability to use research and problem solving methods to develop, analyze, and present a critical incident analysis.

CTFM 2120. Fashion Illustration**3 Credits (1+4P)**

This course explores aspects of fashion illustration, from drawing basic fashion figures to producing finished professional illustrations in color. This course provides the opportunity for students to integrate their fashion design development with computer-aided systems. The emphasis is on fashion innovation and concept design exploration enhanced by computer applications. May be repeated up to 3 credits.. Prerequisites: ARTS 1145G and CTFM 1110

Learning Outcomes

- To learn Adobe Illustrator and Adobe Photoshop as drawing and design tools for electronic design and rendering.
- To understand and utilize the computer as a tool for fashion design.
- To understand methods of design input, including scanning, digitizing and resizing.
- To develop customer profiles
- To Understand Concept Style

CTFM 2130. Concepts in Apparel Construction**3 Credits (1+4P)**

Students are introduced to professional standard sewing techniques and apparel construction. The techniques learned are applied to produce finished garments. Restricted to: FCSE,CTFM majors. Restricted to Las Cruces campus only.

Learning Outcomes

- Define sewing construction terminology, equipment and sewing machine parts.
- Learn to select suitable patterns and fabrics for garments.
- Learn to alter commercial patterns for different body types.
- Identify fabric types, finishes, and labeling.
- Perform standard operating procedures on sewing machines.
- Perform clothing construction techniques for various garments.
- Apply knowledge of industry sewing methods to recognition of garment workmanship.

CTFM 2990. Fashion Practicum**1-3 Credits (1-3)**

Applied field experience in the related areas of apparel design, fashion merchandising, and textile science. May be repeated up to 3 credits. Restricted to: CTFM majors. Restricted to Las Cruces campus only.

Learning Outcomes

- Gain hands-on knowledge of the fashion industry.
- Demonstrate the ability to analyze the practices of management, as observed in the industry.
- Demonstrate an attitude that is appropriate for a prospective manager in the industry.

CTFM 300. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. Restricted to Las Cruces campus only.

Prerequisite(s): CTFM 1110; CTFM 2120.

CTFM 365. Apparel Analysis**3 Credits (3)**

An in-depth investigation of the development, production and comparison of wearing apparel. Focus on the structural, functional and decorative aspects of apparel. Emphasis on sourcing of companies and materials, costing of the product line, comparing design and manufacturing techniques that affect price, quality, and size of apparel. Restricted to: CTFM majors.

Prerequisite(s): CTFM 1110 and CTFM 2130.

CTFM 366. Historic Fashion**3 Credits (3)**

The study of clothing styles from 3500 BC through the 20th century. Restricted to: CTFM majors.

Prerequisite(s): CTFM 2120.

CTFM 371. Textile Science**3 Credits (1+4P)**

The study of fiber characteristics, fabric properties and the manufacturing processes that affect the selection, use, and care of textile goods. Restricted to: CTFM majors.

Prerequisite(s): CTFM 1110.

CTFM 372. Fashion Merchandising**3 Credits (3)**

A study of the processes required to bring consumer goods to the marketplace.

Prerequisite(s): CTFM 1110 and CTFM 2130.

CTFM 373. Advanced Apparel Construction II**3 Credits (1+4P)**

This course builds on Basics of Apparel Construction and explores the application of advanced sewing technology across a range of fashion products. Restricted to: CTFM majors.

Prerequisite(s): CTFM 2130.

CTFM 375. Fashion Buying**3 Credits (3)**

The application of planning, purchasing and controlling inventories using industry data and analytics. Includes merchandising math with an emphasis on product selection and pricing.

Prerequisite(s): ACCT 2110, CTFM 1110, and CTFM 2130.

CTFM 377. Fashion Study Tour**1-3 Credits (1-3)**

Study of international/domestic fashion, designers, manufacturers, merchandisers and/or retailers. May be repeated up to 6 credits. Consent of Instructor required.

CTFM 401. Professional Development**1 Credit (1)**

Introduction to the field experience including resume writing, interviewing skills, understanding business ethics and etiquette. Also includes a discussion of career paths and advice from industry guest speakers. Restricted to: CTFM majors.

Prerequisite(s): CTFM 372 and CTFM 375.

CTFM 402. Field Experience**1-3 Credits (1-3)**

Practical experience in fashion, clothing design, manufacturing, merchandising, or retailing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: CTFM majors.

Prerequisite(s): CTFM 401.

CTFM 403. Post-Field Experience**1 Credit (1)**

A case based approach to analyzing internship experiences. Students will share their experiences and prepare case studies about specific business issues they encountered during CTFM 402. Restricted to: CTFM majors.

Prerequisite(s): CTFM 402.

CTFM 460. Cultural Perspectives in Dress**3 Credits (3)**

Explores the social, psychological and cultural aspects of dress and appearance. Consent of Instructor required.

CTFM 473. Flat Pattern for Apparel Design**3 Credits (1+4P)**

Applied design principles to flat patterns techniques including bodies, skirts, sleeves, neckline, and bodies-sleeve combinations. Projects will require three-dimensional approaches in apparel design. Restricted to: CTFM majors.

Prerequisite(s): CTFM 2120 and CTFM 373.

CTFM 474. Fashion Promotion**3 Credits (3)**

A comprehensive examination of promotion in the merchandising environment of fashion related goods. Restricted to: CTFM majors.

Prerequisite(s): CTFM 372.

CTFM 476. Draping for Apparel Design**3 Credits (1+4P)**

Development of garment shapes using draping techniques. Emphasis placed on torso development, contouring principles and design development on the form. This course exposes the student to the design process, from initial concept and muslin sample development to final execution of the finished garments. Restricted to: CTFM majors.

Prerequisite(s): CTFM 2120 and CTFM 373.

CTFM 477. Capstone in Fashion Merchandising**3 Credits (3)**

Synthesizes previous coursework. Students apply multi-disciplinary principles to the analysis of fashion merchandising case studies and industry related challenges.

Prerequisite(s): CTFM 372, CTFM 375 and CTFM 402.

CTFM 492. Special Problems**1-4 Credits**

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 6 credits toward a degree.

CTFM 571. Textile Science**3 Credits (1+4P)**

The study of fiber characteristics, fabric properties and the manufacturing processes that affect the selection, use and care of textile goods. Students will be required to complete additional assignments beyond what is required for CTFM 371.

CTFM 598. Special Research Programs**1-4 Credits**

Individual investigations, either analytical or experimental. May be repeated for a maximum of 4 credits per semester and no more than 6 credits toward a degree.

Family and Child Studies Courses

FCST 1130. Interpersonal Skills in Intimate Relationships**3 Credits (3)**

Developing social skills within friendships, dating relationships, marriage, parenting, and families.

Learning Outcomes

1. To understand several theories that explain why some people have healthy interpersonal relationships while others do not.
2. To gain insight about one's self.
3. To learn and improve upon selected relationship skills that improve quality of life.
4. To learn skills that improve interpersonal relationships

FCST 2110. Infancy Through Middle Childhood in the Family**3 Credits (3)**

This course discusses research and theory relevant to prenatal development and the physical, mental, and socio-emotional development of the child from birth through age 12. This developmental period will be examined across different cultures and in real world contexts. Attitudes, knowledge, and skills needed for working with young children and their families will be introduced. Restricted to Las Cruces campus only.

Learning Outcomes

1. Evaluate how genes and the environment interact to impact human development from prenatal stages through age twelve.
2. Assess the effects of environmental influences on the developing fetus.
3. Discuss the capacities of newborn development through age twelve.
4. Evaluate how individuals and couples change during the transition to parenthood.
5. Analyze the physical, cognitive, and social-emotional development of the child from birth through age twelve.

FCST 2135. Adolescent Development and the Family**3 Credits (3)**

Research and theory relevant to the physical, mental, social, and emotional development of the children ages 12 to 18. Attitudes, knowledge, and skills related to working with adolescents in the family system. Observation in a variety of settings may be required. Restricted to Las Cruces campus only.

Learning Outcomes

1. Compare adolescents of today with adolescents of the past.
2. Describe the physical, cognitive, and psychosocial development of the adolescent in the family system and evaluate individual differences in development.
3. Compare and contrast ways in which culture impacts adolescent development.
4. Assess effective parenting strategies with adolescents.
5. Analyze the influence of family, peers, school, and work on adolescent development.

FCST 2140. Adult Development and Aging**3 Credits (3)**

Research and theory related to the physical, mental, social, and emotional development of older adults. Attitudes, knowledge, and skills related to working with older adults in the family system, including normative, and nonnormative transitions. Restricted to Las Cruces campus only.

Learning Outcomes

1. Compare and contrast theories of adult development and aging and apply theories to adult behavior.

2. Distinguish the similarities and differences of physical, emotional, cognitive, and psychosocial aspects of adult development.
3. Describe multicultural factors that impact attitudes toward aging and coping with aging family members.
4. Evaluate ways in which special issues (including but limited to Alzheimer's Disease, heart disease, end of life issues) impact aging.
5. Devise a conceptualization of one's own perspective in dealing with aging and aging family members.

FCST 3110V. Introduction to Child Advocacy**3 Credits (3)**

Historical review and evolution of child welfare policies, initiatives and factors that influence child welfare service. Child welfare policies and services specific to the state of New Mexico are infused throughout the course. May be repeated up to 3 credits.

Learning Outcomes

1. To understand how to apply a model of critical thinking/analysis to child maltreatment issues using a systems framework.
2. Compare and contrast historical trends in child maltreatment and child advocacy.
3. Analyze individual, family and community risk factors for maltreatment.
4. Explain cultural issues related to assessing and working with diverse families.

FCST 3120V. Family Ethnicities and Subcultures**3 Credits (3)**

Comparative study of American family subsystems with respect to selected social, economic, and cultural backgrounds. Interaction of these subsystems in American society. Differentiated assignments for graduate students. May be repeated up to 3 credits.

FCST 3210. Family Resource Management**3 Credits (3)**

This course provides an understanding of the decision-making process of families concerning the utilization of financial, personal, environmental, and social resources. In particular, the class will focus on how families develop, exchange, and allocate resources throughout the lifespan with the expectation that the most effective resource management decisions are made from positions of knowledge and understanding. May be repeated up to 3 credits.

FCST 3220. Family Dynamics**3 Credits (3)**

The dynamics of family relationships and changes influencing contemporary families. Interaction between the family and other social systems will be examined. Open to nonmajors. May be repeated up to 3 credits.

FCST 3230. Parenting and Child Guidance**3 Credits (3)**

Theories, principles, and skills essential for parents and professionals in guiding children within the family system. Problem prevention techniques are stressed. May be repeated up to 3 credits.

FCST 4310. Community Programs in Family Life**3 Credits (3)**

The purpose of this course is for students to learn through class lectures, readings, and community based activities, about issues related to the formulation, delivery, and evaluation of family life education programs in the local community and through virtual delivery. Students will also learn about conducting needs assessments in the community, and evaluating

programs after their implementation in preparation for jobs in the field of Family Science.

Learning Outcomes

1. Identify conceptual frameworks suitable in the development of family life programs.
2. Demonstrate knowledge and understanding of techniques and strategies useful in the delivery of family life education programs.
3. Conduct needs assessments and critiques of existing family life/parent education programs and methods of delivering information to parents and families.
4. Apply evaluation strategies for analyzing program effectiveness.
5. Demonstrate knowledge of the legal, moral, and ethical dimensions of family life education and certification standards.

FCST 4997. Special Problems**1-4 Credits**

Individual research in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 6 credits. May be repeated up to 6 credits.

FCST 4998. Field Experience: Issues and Ethics**3 Credits (3)**

Supervised work experience in community agencies providing services to family systems. Discussion of professional issues and ethical dilemmas. A total of 6 credits must be taken. Restricted to: FCS majors. Students must be in junior standing to enroll. May be repeated up to 6 credits.

Prerequisite: FCST 3220 or equivalent, and an overall GPA of at least 2.5.

Learning Outcomes

1. Upon completion of this course students will be able to integrate learning into applied settings.

FCST 5120. Family Ethnicities and Subcultures**3 Credits (3)**

Comparative study of American family subsystems with respect to selected social, economic and cultural backgrounds. Interaction of these subsystems in American society. Students responsible for all requirements for FCST 449V plus additional work. May be repeated up to 3 credits.

FCST 5140. Adult Development and Aging**3 Credits (3)**

Advanced study in research and theory related to the physical, mental, social, and emotional development of older adults. Attitudes, knowledge, and skills related to working with older adults in the family system, including normative and non-normative role transitions. May be repeated up to 3 credits.

FCST 5210. Family Law and Ethics**3 Credits (3)**

Study of selected aspects of federal and state laws and ethical issues as they relate to the family system.

FCST 5220. The Business and Practice of Marriage and Family Therapy**1 Credit (1)**

This seminar course will provide students with an overview of the business and practice of Marriage and Family Therapy to the end that they will understand how to develop and maintain a private practice in the field of MFT. Restricted to: FCS (MFT) majors. Graded: S/U Grading (S/U, Audit).

FCST 5230. Parenting and Child Guidance**3 Credits (3)**

Theories, principles, and skills essential for parents and professionals in guiding children within the family system. Problem prevention techniques are stressed.

FCST 524. Supervised Practicum

1-9 Credits

Supervised experience in organizations providing services to families and children. Course subtitled in the Schedule of Classes. May be repeated for a maximum of 9 credits. Graded S/U.

Prerequisite: consent of instructor.

FCST 525. Supervised Clinical Practice

1-9 Credits (2-18P)

Supervised clinical experience in Marriage and Family Therapy. Includes reviews of audio, video, and/or live sessions and case presentations. Maximum of 9 credits toward a degree. May be repeated up to 20 credits.

FCST 5310. Family Dysfunction and Diagnosis

3 Credits (3)

A study of the development of abnormal behavior patterns and characteristics to include the major mental and personality disorders and how these can influence and impact family systems. Emphasis is on the symptomology and/or life circumstances and events described in the various diagnostic categories.

Prerequisite(s): Students must be enrolled in a clinical program (i.e MFT, CEP, MSW).

FCST 5320. Theories of Marriage and Family Therapy

3 Credits (3)

A balanced study of major theories, research, applications and principles of marriage and family therapy. This course will examine major therapy models and the theories they are derived from as well as the effectiveness of specific therapy models for specific mental health disorders through research.

FCST 5330. Strategies in Family Therapy

3 Credits (3)

Effective intervention strategies in family therapy practice. Live and taped role plays of interventions for various family problems required. Constructive approaches for working with family systems and third-party payers.

FCST 5340. The Family System

3 Credits (3)

Contemporary family interaction: concepts, composition, resource and environment.

FCST 5410. Sexuality and Family Dynamics

3 Credits (3)

Psychosocial and physiological aspects of human sexuality from a life span and family systems perspective.

FCST 5420. Contemporary Marriage and Family Issues

3 Credits (3)

Investigation of one of the following topics each semester: dual career marriages, nontraditional relationships, aged in marriage.

FCST 5430. Family Crises and Rehabilitation

3 Credits (3)

Examination of the major crises experienced by families. Emphasis on family system functioning rather than individual functioning. Preventative measures, positive coping strategies, and therapeutic intervention approaches examined.

FCST 548. Adult Development and Aging

3 Credits (3)

Advanced study in research and theory related to the physical, mental, social, and emotional development of older adults. Attitudes, knowledge,

and skills related to working with older adults in the family system, including normative and non-normative role transitions. May be repeated up to 3 credits.

FCST 549. Family Ethnicities and Subcultures

3 Credits (3)

Comparative study of American family subsystems with respect to selected social, economic and cultural backgrounds. Interaction of these subsystems in American society. Students responsible for all requirements for FCST 449V plus additional work. May be repeated up to 3 credits.

FCST 562. The Business and Practice of Marriage and Family Therapy

1 Credit (1)

This seminar course will provide students with an overview of the business and practice of Marriage and Family Therapy to the end that they will understand how to develop and maintain a private practice in the field of MFT. Restricted to: FCS (MFT) majors. Graded: S/U Grading (S/U, Audit).

FCST 572. Family Dysfunction and Diagnosis

3 Credits (3)

A study of the development of abnormal behavior patterns and characteristics to include the major mental and personality disorders and how these can influence and impact family systems. Emphasis is on the symptomology and/or life circumstances and events described in the various diagnostic categories.

Prerequisite(s): Students must be enrolled in a clinical program (i.e MFT, CEP, MSW).

FCST 582. Theories of Marriage and Family Therapy

3 Credits (3)

A balanced study of major theories, research, applications and principles of marriage and family therapy. This course will examine major therapy models and the theories they are derived from as well as the effectiveness of specific therapy models for specific mental health disorders through research.

FCST 583. Parenting and Child Guidance

3 Credits (3)

Theories, principles, and skills essential for parents and professionals in guiding children within the family system. Problem prevention techniques are stressed.

FCST 584. Family Law and Ethics

3 Credits (3)

Study of selected aspects of federal and state laws and ethical issues as they relate to the family system.

FCST 585. The Family System

3 Credits (3)

Contemporary family interaction: concepts, composition, resource and environment.

FCST 586. Sexuality and Family Dynamics

3 Credits (3)

Psychosocial and physiological aspects of human sexuality from a life span and family systems perspective.

FCST 587. Contemporary Marriage and Family Issues

3 Credits (3)

Investigation of one of the following topics each semester: dual career marriages, nontraditional relationships, aged in marriage.

FCST 589. Family Crises and Rehabilitation

3 Credits (3)

Examination of the major crises experienced by families. Emphasis on family system functioning rather than individual functioning. Preventative

measures, positive coping strategies, and therapeutic intervention approaches examined.

FCST 590. Special Topics

1-4 Credits

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree.

FCST 592. Strategies in Family Therapy

3 Credits (3)

Effective intervention strategies in family therapy practice. Live and taped role plays of interventions for various family problems required. Constructive approaches for working with family systems and third-party payers.

FCST 598. Special Research Programs

1-4 Credits

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

FCST 599. Master's Thesis

15 Credits

Thesis

FCST 5990. Supervised Clinical Practice

1-9 Credits (2-18P)

Supervised clinical experience in Marriage and Family Therapy. Includes reviews of audio, video, and/or live sessions and case presentations. Maximum of 9 credits toward a degree. May be repeated up to 20 credits.

FCST 5991. Special Research Programs

1-4 Credits

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

FCST 5996. Special Topics

1-4 Credits

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree.

FCST 5998. Supervised Practicum

1-9 Credits

Supervised experience in organizations providing services to families and children. Course subtitled in the Schedule of Classes. May be repeated for a maximum of 9 credits. Graded S/U.

Prerequisite: consent of instructor.

FCST 5999. Master's Thesis

15 Credits

Thesis

Family and Consumer Science Courses

FCSC 2250. Overview of Family and Consumer Sciences Teaching

3 Credits (3)

Overview of planning and teaching skills. Supervised experiences in observing and directing the learning of secondary family and consumer sciences students. Philosophy and history of the profession.

Learning Outcomes

1. Explain the foci of FCS—past, present and future.
2. Begin to develop a professional role in FCS.
3. Formulate a personal philosophy of FCS, and of teaching.
4. Explain the teaching process.
5. Give examples of roles, responsibilities and qualities of effective and ethical teachers.
6. Assess the characteristics, backgrounds, and needs of learner audiences.

7. Explain various learning theories/principles.
8. Illustrate how various input factors influence teaching decisions.
9. Plan a researched based student-centered lesson with a learning activity in a FCS content area. 1
10. Give examples of ways to evaluate learner growth.1
11. Present a FCS content-based lesson effectively to learners using PowerPoint presentation software and a selected teaching method. 1
12. Evaluate one's own teaching and the teaching of others. 1
13. Exhibit increased confidence in one's abilities as a teacher/educator.1
14. Exhibit excitement about assuming the teacher/educator role.

FCSC 2330. Housing and Interior Design

3 Credits (3)

Investigation of types of housing and factors impacting housing decisions for families. Selection, planning, and arrangement of interior components of homes to meet the needs of the family. Restricted to Las Cruces campus only.

Learning Outcomes

1. Differentiate between different architectural designs (i.e., Cape Cod, contemporary, craftsman, ranch, southern colonial, Spanish, Victorian, pueblo, New Mexican territorial, and territorial revival) and be able to identify historical, cultural, demographic, geographical, and environmental influences on style and aesthetics.
2. Analyze the fundamentals of housing for all families and cultures and understand the role housing plays in the ecological model of human ecology.
3. Define elements of design as related to housing and interiors (i.e., color, form, line, space texture).
4. Define principles of design as related to housing and interiors (i.e., balance emphasis, harmony, proportion, unity).
5. Compare and contrast the different periods of interior design from the 20th century to the present.
6. Analyze the influence of historical and cultural factors in the development of current interior trends.
7. Select and arrange interiors that are functional and aesthetically pleasing to designated interior design situations.
8. Identify, describe and make application of textiles as related to various furniture and interior design styles.
9. Design a three-dimensional tiny house or an interior space, using all concepts learned.

FCSC 3110. Management Concepts in Family and Consumer Sciences

Teaching

3 Credits (3)

Incorporation and application of management concepts in family and consumer sciences subject matter. Practical experience teaching management and ways to use management skills to plan, implement, and evaluate the teaching-learning transaction. May be repeated up to 3 credits.

FCSC 4110. Teaching in Informal Family and Consumer Sciences

Settings

3 Credits (3)

Learning principles and theories with application in informal family and consumer sciences education situations. Includes supervised experience in use of teaching strategies. May be repeated up to 3 credits.

Prerequisite: overall GPA of at least 2.5 or consent of instructor.

FCSC 4120. Career and Technical Education Programs

3 Credits (3)

History and development of career and technical programs. Ancillary functions of family and consumer sciences teachers, including student evaluation and leadership development for students. Experiences in extension programs and teaching. Ethical issues and concerns of educators are introduced. Lifelong leadership development and evaluation tools for educators are explored. May be repeated up to 3 credits.

**FCSC 4510. Teaching Methods I for Family and Consumer Sciences
3 Credits (3)**

Methods and strategies for teaching Family & Consumer Sciences content in middle and secondary schools. Organization and development of curriculum. May be repeated up to 3 credits.

Prerequisite: FCSC 2250 and FCSC 3110 and an overall GPA of 2.75, admitted to FCSE program; completion of NES Essential Basic Skills Tests I, II, & III.

Corequisite: FCSC 4120.

**FCSC 4520. Teaching Methods II for Family and Consumer Sciences
3 Credits (3)**

Planning, preparation, and strategies for teaching family and consumer sciences in middle and secondary schools. Preparation for employment. May be repeated up to 3 credits. Restricted to: FCSE majors.

Prerequisite: FCSC 4510; overall GPA of 2.75, admitted to program.

**FCSC 4810. Supervised Teaching in Family and Consumer Sciences
12 Credits (12)**

Seventy (70) days of full-time supervised teaching in selected middle or secondary schools. May be repeated up to 12 credits. Restricted to: FCSE majors.

Prerequisite: FCSC 4510, an overall GPA of 2.75, and admitted to FCSE Program.

Corequisite: FCSC 4520.

**FCSC 4815. Research Methods in Family and Consumer Sciences
3 Credits (3)**

Introduction to research design and methodology in Family and Consumer Sciences. Overview of common research designs and data collection strategies. Prepares students to critique published research and perform basic skills including hypotheses development and conducting a literature search. May be repeated up to 3 credits.

FCSC 492. Special Problems

1-4 Credits

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and 6 credits toward degree.

FCSC 4997. Special Problems

1-4 Credits

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and 6 credits toward degree.

**FCSC 500. Research Methods
3 Credits (3)**

This course covers the critical evaluation of research literature, development of research proposals and principles of program evaluation. Students will be introduced to the application of qualitative or quantitative methods. Students will be expected to develop research questions and test hypotheses using statistical analysis and a variety of methodologies.

**FCSC 547. Graduate Study in Teaching Methods II
3 Credits (3)**

Planning, preparation, and strategies for teaching family and consumer sciences in the secondary schools. Additional assignments beyond FCSC 447 required for students registering in FCSC 547.

**FCSC 548. Graduate Study in Supervised Teaching in Family and Consumer Sciences
12 Credits (70P)**

Seventy of full-time, supervised teaching in selected schools. Additional assignments beyond FCSC 448 required for students registering in FCSC 548. Consent of Instructor required.

Prerequisite(s): FCSC 446 or FCSC 546, and consent of instructor.

**FCSC 5815. Research Methods
3 Credits (3)**

This course covers the critical evaluation of research literature, development of research proposals and principles of program evaluation. Students will be introduced to the application of qualitative or quantitative methods. Students will be expected to develop research questions and test hypotheses using statistical analysis and a variety of methodologies.

**FCSC 590. Special Topics
1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits toward a degree, 4 credits per semester.

**FCSC 5991. Special Research Programs
1-4 Credits**

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree. May be repeated up to 4 credits.

**FCSC 5996. Special Topics
1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits toward a degree, 4 credits per semester.

**FCSC 5999. Master's Thesis
1-15 Credits**

May be repeated up to 88 credits.

Food Science and Technology Courses

**FSTE 1120. ACES in the Hole Foods I
4 Credits (4)**

Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products Restricted to Las Cruces campus only. Students enrolled in this class must possess A Food Handler Card

Learning Outcomes

1. Apply basic scientific principles, procedures, techniques and standards in the production of food products.
2. Apply principles of sanitation and safety to the production of food products.
3. Assist in the development and evaluation of new and/or existing food products made for human consumption.
4. Prepare a resume and portfolio

**FSTE 2110G. Food Science I
4 Credits (3+2P)**

The scientific study of the principles involved in the preparation and evaluation of foods. May be repeated up to 4 credits.

Learning Outcomes

1. Explain basic scientific principles involved in the preparation of high quality food products.
2. Utilize scientific inquiry in the experimental investigation of factors influencing the chemical, physical and sensory properties of food products.
3. Apply basic scientific principles, procedures, techniques and standards in the preparation of all types of high quality food products.
4. Use basic methods of quantitative analysis to critically evaluate quality characteristics of food.
5. Use sensory science techniques and terminology to critically evaluate acceptability and quality characteristics of food.
6. Describe high quality characteristics of a variety of food products using appropriate terminology.
7. Apply principles of sanitation and safety to food preparation.

FSTE 2120. ACES in the Hole Foods II**4 Credits (8P)**

Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. Student must also have a Food Handler Card to enroll in this course.

Prerequisite(s): FSTE 1120.

Learning Outcomes

1. Apply basic scientific principles, procedures, techniques and standards in the production of food products.
2. Apply principles of sanitation and safety to the production of food products.
3. Assist in the development and evaluation of new and/or existing food products made for human consumption.
4. Prepare a resume and portfolio

FSTE 2130G. Survey of Food and Agricultural Issues**3 Credits (3)**

Survey of food and agricultural issues, including: geography of food production and consumption; human-agricultural-natural resource relations; agriculture in the United States and abroad; modern agribusiness; food safety; food, agriculture, and natural resources policy; ethical questions; role and impact of technology. Crosslisted with AEEC 2130G.

Learning Outcomes

1. Understand of global agriculture including production techniques used in various geographical regions, consumption trends, and political and social constraints.
2. Synthesis information about agricultural issues and make informed arguments
3. Articulate modern issues in agriculture
4. Write coherent arguments relative to personal beliefs regarding agricultural issues

FSTE 2996. Special Topics**1-4 Credits**

Specific topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Learning Outcomes

1. Varies

FSTE 3110. Professional Development in Food Science**1 Credit (1)**

Covers essential elements of career management including preparation for a successful internship. Students must have a Food Handler Card. Restricted to: FSTE majors. Graded S/U.

Prerequisite: FSTE 2120.

Learning Outcomes

1. Describe their Jung Type.
2. Articulate their personal mission.
3. Identify their personal strengths and weaknesses.
4. Establish short and long term career goals.
5. Prepare an effective cover letter.
6. Develop a professional resume.
7. Understand the dos and don'ts of interviewing.
8. Properly dress for interviewing.
9. Understand the factors to consider when deciding what job offer to accept. 1
10. Understand the objectives and requirements of the Food Science internship program.

FSTE 320. Food Microbiology**4 Credits (3+2P)**

Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. May be repeated up to 4 credits. Prerequisite(s): (BIOL 2610G and BIOL 2610L), or (BIOL 2110G and BIOL 2110L)

FSTE 325. Food Analysis**3 Credits (2+2P)**

Basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. May be repeated up to 3 credits.

Prerequisite(s): CHEM 1215G or consent of instructor.

FSTE 331. Food Preservation**3 Credits (2+2P)**

Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. May be repeated up to 3 credits.

Prerequisite(s): FSTE 2110G.

FSTE 340. Cereal Technology**3 Credits (2+2P)**

This course provides students with an understanding of chemistry and technology of the cereal grains. The course is structured as a combination of theory, demonstrations, and practical laboratory exercises on the fundamentals of cereal processing. Students will learn about post-harvest processing and utilization of major cereal grains for food and feed, current industrial processes and practices, and the theoretical basis for these operations.

Learning Outcomes

1. Understand principles of cereal chemistry and processing.
2. Understand how cereal grains are produced, stored, marketed, and converted into food products.
3. Describe unit operations and procedures involved in the manufacture of cereal-based food and animal feed products.

FSTE 350. Dairy Technology**3 Credits (2+2P)**

This course provides general knowledge on dairy technology as well as on various processing technologies regarding the science behind a variety of dairy products. It is designed to give a thorough understanding

of the composition and properties of milk, and of the physical and chemical changes occurring in milk during processing and storage. These products include fluid milk, fermented dairy products, concentrated and dried dairy products, butter, cream and various frozen dairy desserts. Principles and practices in assembling, receiving, processing, and packaging milk and dairy products, including beverage, frozen, cream, butter, concentrated and fractionated milks, dried milks, casein, and lactose.

Prerequisite: FSTE 2110G.

Learning Outcomes

1. To gain an understanding of dairy processing technologies, unit operation and production of dairy products and ingredients.
2. To understand the principles of processing of dairy products by integrating the concepts of chemistry, biochemistry, microbiology, nutrition, sensory properties, and engineering relevant to dairy processing operations.
3. To gain an ability to think critically on practical problems that occur in the dairy industry and to appreciate the many challenges in dairy research technology and dairy product development.
4. To engage in group discussion on current issues pertinent to culture dairy industry.

FSTE 375. Professional Development in Food Science

1 Credit (1)

Covers essential elements of career management including preparation for a successful internship. Students must have a Food Handler Card.

Restricted to: FSTE majors. Graded S/U.

Prerequisite: FSTE 2120.

Learning Outcomes

1. Describe their Jung Type.
2. Articulate their personal mission.
3. Identify their personal strengths and weaknesses.
4. Establish short and long term career goals.
5. Prepare an effective cover letter.
6. Develop a professional resume.
7. Understand the dos and don'ts of interviewing.
8. Properly dress for interviewing.
9. Understand the factors to consider when deciding what job offer to accept. 1
10. Understand the objectives and requirements of the Food Science internship program.

FSTE 4110. Food Microbiology

4 Credits (3+2P)

Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. May be repeated up to 4 credits. Prerequisite(s): (BIOL 2610G and BIOL 2610L), or (BIOL 2110G and BIOL 2110L)

FSTE 4120. Food Chemistry

3 Credits (3)

Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing, and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods.

Prerequisites: CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of instructor.

FSTE 4130. Food Preservation

3 Credits (2+2P)

Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. May be repeated up to 3 credits.

Prerequisite(s): FSTE 2110G.

FSTE 4140. Food Analysis

3 Credits (2+2P)

Basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. May be repeated up to 3 credits.

Prerequisite(s): CHEM 1215G or consent of instructor.

FSTE 4150. Food Safety

3 Credits (3)

Provide students' knowledge on good manufacturing practices and prerequisite programs, conduct hazard analysis and determine preventive controls, define process, food allergen, sanitation and supply-chain preventive controls and discuss verification validation, recall and recordkeeping requirements with training and educational opportunities related to current best practices and guidance, and future regulatory requirements by establishing the Produce Safety Alliance. Students participate in a Mock Audit. Participants will receive an official FSPCA Preventive Controls Qualified Individual certificate issues by AFDO after attending this training program.

Prerequisite(s): FSTE 4110 or BIOL 311, or consent of instructor.

FSTE 421. Food Chemistry

3 Credits (3)

Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing, and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods.

Prerequisites: CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of instructor.

FSTE 4210. Cereal Technology

3 Credits (2+2P)

This course provides students with an understanding of chemistry and technology of the cereal grains. The course is structured as a combination of theory, demonstrations, and practical laboratory exercises on the fundamentals of cereal processing. Students will learn about post-harvest processing and utilization of major cereal grains for food and feed, current industrial processes and practices, and the theoretical basis for these operations.

Learning Outcomes

1. Understand principles of cereal chemistry and processing.
2. Understand how cereal grains are produced, stored, marketed, and converted into food products.
3. Describe unit operations and procedures involved in the manufacture of cereal-based food and animal feed products.

FSTE 4220. Dairy Technology

3 Credits (2+2P)

This course provides general knowledge on dairy technology as well as on various processing technologies regarding the science behind a variety of dairy products. It is designed to give a thorough understanding of the composition and properties of milk, and of the physical and chemical changes occurring in milk during processing and storage. These products include fluid milk, fermented dairy products, concentrated and dried dairy products, butter, cream and various frozen dairy desserts. Principles and practices in assembling, receiving, processing, and packaging milk and dairy products, including beverage, frozen, cream, butter, concentrated and fractionated milks, dried milks, casein, and lactose.

Prerequisite: FSTE 2110G.

Learning Outcomes

1. To gain an understanding of dairy processing technologies, unit operation and production of dairy products and ingredients.
2. To understand the principles of processing of dairy products by integrating the concepts of chemistry, biochemistry, microbiology, nutrition, sensory properties, and engineering relevant to dairy processing operations.
3. To gain an ability to think critically on practical problems that occur in the dairy industry and to appreciate the many challenges in dairy research technology and dairy product development.
4. To engage in group discussion on current issues pertinent to culture dairy industry.

FSTE 423. Food Processing Technologies**4 Credits (3+2P)**

Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting.

Prerequisite(s): FSTE 328.

FSTE 4230. Food Processing Technologies**4 Credits (3+2P)**

Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting.

FSTE 4240. Processed Meats**3 Credits (2+2P)**

This course provides students with an understanding of physical, chemical and functional characteristics of meat raw materials. Modern meat processing industry and its use of science and technology. The fabrication, processing, preservation, sanitation, food safety, ethnic involvement, and utilization of manufactured and processed meat. Regulatory compliance and quality assurance in commercial processed meat operations.

Learning Outcomes

1. The theory and chemistry of meat processing.
2. Processing techniques and basic formulations of different categories of processed meats.
3. The effect of type and composition of raw materials and added ingredients on processed meat quality and safety.
4. To evaluate products for consumer and analytical quality and composition.
5. To evaluate and assess defective products and propose processing/ingredient solutions.

FSTE 425. Sensory Evaluation of Foods and Product Development**3 Credits (2+2P)**

Application of affective sensory tests, chemical, physical, and experimental methods to the development and evaluation of a food product. Sensory test methods and procedures used to evaluate the flavor, color and texture of foods. Relationships between sensory and instrumental measurements quality parameters. The course will present the parametric and non-parametric tests that are used in sensory evaluation. May be repeated up to 3 credits.

Prerequisite: FSTE 2110G and (A ST 311 or MATH 1350G).

Learning Outcomes

1. Describe the chemical senses and the receptors that mediate the basic taste modalities.
2. Match sensory tests to research questions and to use the suitable statistical tests.
3. Design and develop a food product and conduct a basic research project.
4. Communicate research results using written, oral, and visual communication techniques.

FSTE 4250. Sensory Evaluation of Foods and Product Development**3 Credits (2+2P)**

Application of affective sensory tests, chemical, physical, and experimental methods to the development and evaluation of a food product. Sensory test methods and procedures used to evaluate the flavor, color and texture of foods. Relationships between sensory and instrumental measurements quality parameters. The course will present the parametric and non-parametric tests that are used in sensory evaluation. May be repeated up to 3 credits.

Prerequisite: FSTE 2110G and (A ST 311 or MATH 1350G).

Learning Outcomes

1. Describe the chemical senses and the receptors that mediate the basic taste modalities.
2. Match sensory tests to research questions and to use the suitable statistical tests.
3. Design and develop a food product and conduct a basic research project.
4. Communicate research results using written, oral, and visual communication techniques.

FSTE 430. Brewing Science & Engineering**3 Credits (3)**

Details of beer production, fermentation science, brewery operation, and process design & economics. Engineering considerations including process safety, fermentation kinetics, unit operations, and economics of scale. Beer styles, recipe formulation, product quantification for tax purposes, and brew analytical methods will also be discussed. Students must be 21 years old to enroll. Crosslisted with: FSTE 430.

Learning Outcomes

1. To provide the undergraduate student with a broad perspective of beer and the brewing industry as well as technical knowledge about the brewing process.

FSTE 450. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits towards a degree. Consent of instructor required.

FSTE 475. ACES Foods at NMSU-Experiential Learning**1 Credit (2-8P)**

Professional work experience for FSTE majors only.

Prerequisite: FSTE 375.

Learning Outcomes

1. Students will collect a minimum of four hundred hours.

FSTE 476. FSTE Internship Seminar**1 Credit (1)**

A case based approach to analyzing internship experiences. Students will write case studies about specific business issues they countered during FSTE 475 (Internship) and analyze them. Restricted to Food Science Technology majors.

Prerequisite: FSTE 475.

Learning Outcomes

1. Analyze business practices as experienced during an internship.
2. Deliver a presentation effectively communicating operations of ACES Foods at NMSU.
3. Assess use of state and federal food regulation agencies within ACES Foods at NMSU.
4. Present in written form the history, business operations, job descriptions, organizational structure, and human resource policies of ACES Foods at NMSU.

**FSTE 480. Food Safety
3 Credits (3)**

Provide students' knowledge on good manufacturing practices and prerequisite programs, conduct hazard analysis and determine preventive controls, define process, food allergen, sanitation and supply-chain preventive controls and discuss verification validation, recall and recordkeeping requirements with training and educational opportunities related to current best practices and guidance, and future regulatory requirements by establishing the Produce Safety Alliance. Students participate in a Mock Audit. Participants will receive an official FSPCA Preventive Controls Qualified Individual certificate issues by AFDO after attending this training program.

Prerequisite(s): FSTE 320 or BIOL 311, or consent of instructor.

**FSTE 4815. FSTE Internship Seminar
1 Credit (1)**

A case based approach to analyzing internship experiences. Students will write case studies about specific business issues they countered during FSTE 4998 (Internship) and analyze them. Restricted to Food Science Technology majors.

Prerequisite: FSTE 4998.

Learning Outcomes

1. Analyze business practices as experienced during an internship.
2. Deliver a presentation effectively communicating operations of ACES Foods at NMSU.
3. Assess use of state and federal food regulation agencies within ACES Foods at NMSU.
4. Present in written form the history, business operations, job descriptions, organizational structure, and human resource policies of ACES Foods at NMSU.

**FSTE 490. Processed Meats
3 Credits (2+2P)**

This course provides students with an understanding of physical, chemical and functional characteristics of meat raw materials. Modern meat processing industry and its use of science and technology. The fabrication, processing, preservation, sanitation, food safety, ethnic involvement, and utilization of manufactured and processed meat. Regulatory compliance and quality assurance in commercial processed meat operations.

Learning Outcomes

1. The theory and chemistry of meat processing.
2. Processing techniques and basic formulations of different categories of processed meats.
3. The effect of type and composition of raw materials and added ingredients on processed meat quality and safety.
4. To evaluate products for consumer and analytical quality and composition.

5. To evaluate and assess defective products and propose processing/ingredient solutions.

**FSTE 492. Special Problems
1-4 Credits**

Individual research study in a selected subject of Family and Consumer Sciences. Maximum of 4 credits per semester and a grand total of 8 credits towards a degree. Consent of instructor required.

**FSTE 4996. Special Topics
1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits towards a degree. Consent of instructor required.

**FSTE 4997. Special Problems
1-4 Credits**

Individual research study in a selected subject of Family and Consumer Sciences. Maximum of 4 credits per semester and a grand total of 8 credits towards a degree. Consent of instructor required.

**FSTE 4998. ACES Foods at NMSU-Experiential Learning
1 Credit (2-8P)**

Professional work experience for FSTE majors only.

Prerequisite: FSTE 3110.

Learning Outcomes

1. Students will collect a minimum of four hundred hours.

**FSTE 5110. Food Microbiology
3 Credits (2+3P)**

Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. Additional work required at the graduate level.

Prerequisites: BIOL 2610G/2610L, or BIOL 2110G/2110L, or consent of instructor.

**FSTE 5120. Food Chemistry
3 Credits (3)**

Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods. Additional work required at the graduate level.

Prerequisites: CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of instructor.

**FSTE 5130. Food Preservation
3 Credits (3)**

Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. Same as FSTE 4130 with additional work required at the graduate level.

**FSTE 5140. Food Analysis
3 Credits (2+3P)**

Covers basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. Additional work required at the graduate level.

Prerequisite(s): CHEM 1215G or consent of instructor.

**FSTE 5150. Rumen Microbiology (so)
3 Credits (3)**

Same as ANSC 560.

**FSTE 520. Graduate Study in Food Microbiology
3 Credits (2+3P)**

Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. Additional work required at the graduate level.

Prerequisites: BIOL 2610G/2610L, or BIOL 2110G/2110L, or consent of instructor.

FSTE 521. Graduate Study in Food Chemistry

3 Credits (3)

Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods. Additional work required at the graduate level.

Prerequisites: CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of instructor.

FSTE 5210. Cereal Technology

3 Credits (2+2P)

This course provides students with an understanding of chemistry and technology of the cereal grains. The course is structured as a combination of theory, demonstrations, and practical laboratory exercises on the fundamentals of cereal processing. Students will learn about post-harvest processing and utilization of major cereal grains for food and feed, current industrial processes and practices, and the theoretical basis for these operations.

Learning Outcomes

1. Understand principles of cereal chemistry and processing.
2. Understand how cereal grains are produced, stored, marketed, and converted into food products.
3. Describe unit operations and procedures involved in the manufacture of cereal-based food and animal feed products.

FSTE 523. Food Processing Technologies

4 Credits (3+2P)

Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting. Additional work beyond that for FSTE 423 required at the graduate level.

Prerequisite(s): FSTE 528.

FSTE 5230. Food Processing Technologies

4 Credits (3+2P)

Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting. Additional work beyond that for FSTE 4230 required at the graduate level.

FSTE 524. Sensory Evaluation of Foods

3 Credits (2+3P)

Principles and procedures involved in the sensory evaluation of foods. Physiological, psychological and environmental factors affecting the evaluation of sensory properties. Analysis and interpretation of sensory data.

Prerequisite(s): FSTE 2110G and A ST 311 or MATH 1350G.

FSTE 525. Graduate Study in Food Analysis

3 Credits (2+3P)

Covers basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. Additional work required at the graduate level.

Prerequisite(s): CHEM 1215G or consent of instructor.

FSTE 5250. Sensory Evaluation of Foods

3 Credits (2+3P)

Principles and procedures involved in the sensory evaluation of foods. Physiological, psychological and environmental factors affecting the evaluation of sensory properties. Analysis and interpretation of sensory data.

Prerequisite(s): FSTE 2110G and A ST 311 or MATH 1350G.

FSTE 531. Food Preservation

3 Credits (3)

Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. Same as FSTE 331 with additional work required at the graduate level.

FSTE 5310. Designing and Brewing Great Beers of the World

3 Credits (2+2P)

The science and technology of brewing unit operations and the ingredients used in beer brewing. That knowledge is then applied to designing and brewing classic world beer styles. Styles investigated change every semester but typically include India Pale Ale, Pale Ale, Stout, Porter, Hefeweisen, Scottish Ale, and Black IPA. Comprehensive evaluation of the product relative to style guidelines completes the design-brew-evaluate cycle. Students must be at least 21 years of age on the first day of class.

FSTE 532. Designing and Brewing Great Beers of the World

3 Credits (2+2P)

The science and technology of brewing unit operations and the ingredients used in beer brewing. That knowledge is then applied to designing and brewing classic world beer styles. Styles investigated change every semester but typically include India Pale Ale, Pale Ale, Stout, Porter, Hefeweisen, Scottish Ale, and Black IPA. Comprehensive evaluation of the product relative to style guidelines completes the design-brew-evaluate cycle. Students must be at least 21 years of age on the first day of class.

FSTE 540. Cereal Technology

3 Credits (2+2P)

This course provides students with an understanding of chemistry and technology of the cereal grains. The course is structured as a combination of theory, demonstrations, and practical laboratory exercises on the fundamentals of cereal processing. Students will learn about post-harvest processing and utilization of major cereal grains for food and feed, current industrial processes and practices, and the theoretical basis for these operations.

Learning Outcomes

1. Understand principles of cereal chemistry and processing.
2. Understand how cereal grains are produced, stored, marketed, and converted into food products.
3. Describe unit operations and procedures involved in the manufacture of cereal-based food and animal feed products.

FSTE 560. Rumen Microbiology (so)

3 Credits (3)

Same as ANSC 560.

FSTE 598. Special Research Programs

1-4 Credits

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits towards a degree. Consent of instructor required.

FSTE 5997. Special Research Programs

1-4 Credits

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits towards a degree. Consent of instructor required.

FSTE 600. Special Research Program

1-6 Credits (1-6)

Special research for doctoral students May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

FSTE 601. Cooperative Extension Service Field Experience

1-3 Credits (1-3)

This course will provide students with knowledge and experience in community outreach through the cooperative extension service. This course is required for students pursuing a Ph.D. in FSHN. Students will work collaboratively with extension faculty on applied projects. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: FSHN majors.

FSTE 605. Doctoral Seminar

1 Credit (1)

Current topics and research in Food Science and Human Nutrition. Course will include experts from the field as guest speakers. Students will have the opportunity to present their doctoral proposals and/or research findings.

FSTE 6910. Doctoral Seminar

1 Credit (1)

Current topics and research in Food Science and Human Nutrition. Course will include experts from the field as guest speakers. Students will have the opportunity to present their doctoral proposals and/or research findings.

FSTE 698. Doctoral Research

1-6 Credits (1-6)

Research May be repeated up to 6 credits. Consent of Instructor required.

FSTE 6991. Doctoral Research

1-6 Credits (1-6)

Research May be repeated up to 6 credits. Consent of Instructor required.

FSTE 6997. Special Research Program

1-6 Credits (1-6)

Special research for doctoral students May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

FSTE 6998. Cooperative Extension Service Field Experience

1-3 Credits (1-3)

This course will provide students with knowledge and experience in community outreach through the cooperative extension service. This course is required for students pursuing a Ph.D. in FSHN. Students will work collaboratively with extension faculty on applied projects. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: FSHN majors.

FSTE 700. Doctoral Dissertation

1-12 Credits (1-12)

Dissertation May be repeated up to 18 credits. Consent of Instructor required.

Prerequisite(s): Passed the qualifying exam and comprehensive exam.

FSTE 7000. Doctoral Dissertation

1-12 Credits (1-12)

Dissertation May be repeated up to 18 credits. Consent of Instructor required.

Prerequisite(s): Passed the qualifying exam and comprehensive exam.

Nutrition Courses

NUTR 2110. Human Nutrition

3 Credits (3)

This course provides an overview of nutrients, including requirements, digestion, absorption, transport, function in the body and food sources. Dietary guidelines intended to promote long-term health are stressed.

Learning Outcomes

1. Evaluate sources of nutrition information for reliability
2. Identify elements of a nutritious diet
3. Describe the digestion, transport, and absorption of nutrients
4. Describe the importance of nutrition in weight control and health
5. Identify nutritional needs as they relate to the life cycle and performance
6. Describe behavior modification techniques that promote good health
7. Evaluate popular nutrition trends for scientific accuracy and effectiveness
8. Develop skills in the planning and assessing of healthy meal plans
9. Describe the role of food choices in the development of chronic disease 1
10. Describe the role of food in the promotion of a healthful lifestyle

NUTR 2120. Seminar I - Becoming a Nutrition Professional

1 Credit (1)

This course will introduce students to the field experience, careers, and professions in nutrition. This course is required for students pursuing a Didactic Program in Dietetics verification statement. May be repeated up to 1 credits. Consent of Instructor required. Restricted to: HNDS majors.

Learning Outcomes

1. Describe career options within the fields of Nutrition Dietetics.
2. Outline the HNDS field experience process.
3. Explain the educational pathways in HNDS.
4. List requirements for admission into the HNDS Dietetics pathway.
5. Begin an HNDS student portfolio.
6. Discuss the importance of personal responsibility accountability

NUTR 3110. Nutrition Throughout the Lifecycle

3 Credits (3)

Relationship of the stages of the human life cycle to changes in nutrient need. Consent of Instructor required.

Prerequisite(s): NUTR 2110.

Learning Outcomes

1. Understand the value of collaborative work in nutrition care of individuals.
2. Compare and contrast the physiological, behavioral, and psychosocial factors associated with each life stage that affect nutritional status.
3. For each life cycle stage, create a nutritionally adequate menu that meets key nutrient needs.
4. Culturally appropriate evidence-based interventions to address common nutrition-related conditions experienced in each lifecycle stage.
5. Utilize the Nutrition Care Process to complete a nutrition assessment.

NUTR 3710. Food Systems & Policy in Dietetics**3 Credits (3)**

This course introduces students to food and nutrition policy issues, institutions, and stakeholders and their impacts on public health, sustainability, and the practice of dietetics in the US. The course will examine policy development and the roles of federal agencies, private firms, non-governmental organizations, and the media in food and nutrition policy. It will also examine international perspectives on food and nutrition policies and programs used to support global nutrition, health promotion, and wellness.

Prerequisite(s): Junior standing, NUTR 3110, NUTR 3120.

Learning Outcomes

1. Discuss the economic, political, social, and cultural factors that influence US food and nutrition policies and impact national food systems and population health.
2. Identify the psychological, social, cultural, and environmental factors that influence food choices, eating behaviors, and nutrition-related practices.
3. Describe the processes and major players involved in US food and nutrition policy development, implementation, monitoring/evaluation, and regulation.
4. Recognize the influence of food and nutrition policy on the practice of dietetics.

NUTR 3750. Applied Nutrition Research**3 Credits (3)**

This course will introduce students to various types of nutrition research and equip them to locate and critique nutrition and dietetics research articles. Research analysis skills will then be applied to a review of the current literature on a nutrition topic and applied to dietetics practice. May be repeated up to 3 credits.

Prerequisite: MATH 1350G (OR A ST 311); NUTR 3110.

Learning Outcomes

1. Recall the various research methods, study designs, and statistical analyses used in nutrition research.
2. Compare and contrast research methods and analyses in nutrition research.
3. Analyze nutrition research for appropriateness of the methods and analyses.
4. Evaluate nutrition research to form sound, ethical conclusions and practice recommendations.

NUTR 3996. Special Topics**1-4 Credits (1-4)**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): Junior or Senior standing, consent of instructor.

Learning Outcomes

1. Develop foundational knowledge in a specialized area of dietetics practice.

NUTR 4110. Advanced Nutrition**3 Credits (3)**

Application of biochemistry and physiology to nutrition. May be repeated up to 3 credits. Prerequisite(s): BIOL 2221, (OR A ST 311); NUTR 3110

Learning Outcomes

1. Describe the processes of digestion and absorption within the human body.
2. Compare and contrast the structure and function of key nutrients.
3. Describe the metabolism of key nutrients under various conditions.

4. Apply concepts of energy and nutrient metabolism to common medical conditions and other relevant situations such as exercising or fasting.

NUTR 4205. Nutrition Communication and Education**3 Credits (3)**

In this course, HNDS students learn about the foundation, design, and delivery of nutrition communication and nutrition education. Students will learn ways to develop audience-focused communication and learning assessment. This course will cover the communication methods used in all facets of the nutrition and dietetics field including oral presentations, writing, video, food photography, and food demonstrations. Students will utilize a large variety of channels to communicate and educate different target audiences.

Prerequisite: NUTR 3110.

Learning Outcomes

1. Identify a minimum of four reliable sources of nutrition information.
2. Interpret and clearly communicate evidence-based nutrition information.
3. Evaluate the application of behavior change theories and models to nutrition communications.
4. Adapt nutrition communication and education to target specific cultural and age groups.
5. Develop a nutrition education lesson plan with SMART learning objectives, learning activities, and learning assessments.

NUTR 4207. Nutrition Services**3 Credits (3)**

In this course, HNDS Dietetic students will learn about the promotion and payment of nutrition services along with aspects related to reimbursement and partnering with allied professionals. The HNDS Dietetics students will also engage in clinical and community nutrition field experiences. This course will provide HNDS Dietetic students with the opportunity to assess their knowledge of professional competencies within the field of dietetics. Restricted to students with senior standing within the Dietetics Option of the HNDS major.

Learning Outcomes

1. Compare best practice guidelines to actual practice in the provision of nutrition services within community settings.
2. Explain at least two processes in delivering quality food and nutrition services.
3. Identify private and public healthcare funding sources.
4. Explain Medicare, Medicaid, and private payer coverage for medical nutrition therapy.
5. Discuss referrals, primary care partnership and promoting nutrition services.
6. Describe best practices, resources and guidelines related to the reimbursement for nutrition services.
7. Compare best practice guidelines to actual practice in the provision of nutrition services within clinical nutrition settings.
8. Evaluate the content of the Commission on Dietetic Registration RDN credentialing exam.

NUTR 4210. Community Nutrition**3 Credits (3)**

Overview of the practice of community nutrition. Includes program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Same as NUTR 5210.

Prerequisite: NUTR 3110, NUTR 3710.

Learning Outcomes

1. Summarize the components of current national and local community nutrition programs.
2. Explain how national or state level policy influences a community nutrition issue.
3. Write a needs assessment for a community nutrition issue using reliable sources of community nutrition information and data and relevant research.
4. Develop goals and objectives of a nutrition program that address a community nutrition issue.
5. Develop a culturally appropriate nutrition education lesson plan that addresses a specific nutrition program objective.

NUTR 4220. Food Service Organization and Management

3 Credits (3)

Personnel, financial and general management in institutional and commercial food service operations.

Prerequisite: HRTM 2120.

Learning Outcomes

1. Evaluate food products and menu plans through the application of food service management theories and principles.
2. Describe the process of and ethical considerations surrounding purchasing, receiving, storing and controlling inventory of a given food item.
3. Evaluate food system, food safety practices, and scenarios.
4. Evaluate a nutrition and foodservice budget and interpret financial data.

NUTR 4230. Medical Nutrition Therapy I

3 Credits (3)

Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics.

Learning Outcomes

1. Examine the role of medical nutritional therapy in disease processes.
2. Apply nutritional assessment techniques utilizing the Nutrition Care Process.
3. Compose nutrition care plans and utilize various styles of medical charting.
4. Describe the interdisciplinary nature of working with a health care team in the delivery of medical nutritional therapy.

NUTR 4230L. Medical Nutrition Therapy I Lab

1 Credit (1P)

Supplements NUTR 4230. Students will perform nutrition assessments, nutrition focused physical exams, apply medical nutrition therapy-based interventions and practice patient discharge education for specific disease states. Elements of pathology and biochemistry of nutrition-related conditions are integrated into course topics. Restricted to: HNDS majors.

Corequisite(s): HNDS 4230.

Learning Outcomes

NUTR 4233. Nutrition Counseling and Education

3 Credits (3)

This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education.

Prerequisite: NUTR 3110; FCSC 348.

Learning Outcomes

1. Evaluate nutrition counseling strategies tools in promoting behavior change and self-management.
2. Apply behavior change theories and models to nutrition counseling sessions.
3. Develop nutrition care plans for nutrition counseling clients.
4. Analyze professionalism and ethics within nutrition counseling and education.
5. Develop and present a nutrition education lesson based on current nutrition research.

NUTR 4235. Entering the Field of Dietetics

1 Credit (1)

Students will develop professional materials that will be used in their future careers including a personal statement, resume, and interview dialogues. Students will become familiar with career options in the field of dietetics and learn to navigate the processes of becoming a registered dietitian or dietetic technician, registered. Restricted to: HNDS majors. Students must be a Senior to enroll.

Prerequisite/Corequisite: NUTR 4210.

Learning Outcomes

1. Students will develop professional materials that will be used in their future careers including a personal statement, resume, and interview dialogues. Students will become familiar with career options in the field of dietetics and learn to navigate the processes of becoming a registered dietitian or dietetic technician, registered

NUTR 4240. Medical Nutrition Therapy II

3 Credits (3)

Continuation of NUTR 4230.

Prerequisite: NUTR 4230.

Corequisite: NUTR 4240L.

Learning Outcomes

1. Select appropriate medical nutrition therapy interventions for various disease processes.
2. Master nutrition assessment of patients/clients utilizing the Nutrition Care Process Model.
3. Interpret medical terminology in patient chart notes and medical history records.
4. Evaluate laws regulations concerning dietetics.

NUTR 4240L. Medical Nutrition Therapy II Laboratory

1 Credit (1P)

Supplements NUTR 4240. Students will apply medical nutrition therapy to specific disease states with special emphasis on writing nutrition support orders and learning to utilize nutrition support equipment. Students will learn and apply advanced nutritional therapies and patient management strategies. Restricted to: HNDS majors.

Corequisite(s): HNDS 4240.

Learning Outcomes

1. Calculate nutrition support recommendations and document orders in the patient's medical chart.
2. Demonstrate safe use of nutritional support equipment.
3. Master use of the Nutrition Care Process in case-based and simulated patient scenarios to conduct nutrition assessments and implement evidence-based interventions.
4. Critically evaluate lab values and client anthropometric data.
5. Select therapeutic diets for the treatment of medical conditions and their symptoms.

NUTR 4565. Field Experience Community Nutrition**1-8 Credits (1-8)**

Experience working with nutritional problems of individual families of all socioeconomic and age levels and with agencies concerned with community nutrition. Practical experience with supervision by resident faculty as well as supervisor at the work site. Performance at work site graded in accordance with university standards. May be repeated up to 8 credits. Consent of Instructor required.

Prerequisite(s): Senior standing, NUTR 4210, consent of instructor.

Learning Outcomes

1. Apply dietetics knowledge to practice in various community settings.
2. Develop a field experience portfolio highlighting the development of community nutrition knowledge and skills.
3. Compare and contrast the responsibilities of Registered Dietitians in various community practice organizations.

NUTR 4991. Special Problems**1-4 Credits (1-4)**

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 8 credits. May be repeated up to 8 credits. Consent of Instructor required.

Prerequisite(s): Junior or Senior standing.

Learning Outcomes

1. Develop specialized knowledge and competencies in a selected nutrition and dietetics subject area.

NUTR 5110. Graduate Studies in Advanced Nutrition**3 Credits (3)**

Covers biochemistry and physiology applied to nutrition. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4110. Crosslisted with: NUTR 4110.

Prerequisite(s)/Corequisite(s): NUTR 3110. Student must be classified as a Graduate student to enroll in this course, BIOL 2221, BCHE 341, and NUTR 2110, or consent of instructor.

Learning Outcomes

1. Describe the processes of digestion and absorption within the human body.
2. Compare and contrast the structure and function of key nutrients.
3. Describe the metabolism of key nutrients under various conditions.
4. Apply concepts of energy and nutrient metabolism to common medical conditions and other relevant situations such as exercise or fasting.

NUTR 5150. Orientation to Dietetic Internship**3 Credits (3)**

Dietetic interns prepare for supervised practice rotations. Topics include professionalism, Code of Ethics, and dietetic internship portfolios. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. Assembly of dietetic intern portfolio that will be kept throughout dietetic internship.
2. Readiness to begin supervised practice rotations.
3. Understanding of steps and processes to successfully complete requirements of dietetic internship and Masters of Science in Family Consumer Sciences.
4. Upon completion of the course, students will be able to understand the importance of evidence-based information, research ethics, the

Code of Ethics of the Profession of Dietetics, and the basic structure of an IRB proposal.

NUTR 5210. Graduate Study in Community Nutrition**3 Credits (3)**

Overview on the practice of community nutrition to include program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4110. May be repeated up to 3 credits. Crosslisted with: NUTR 4210.

Prerequisite(s): Graduate student, NUTR 3110, NUTR 3710, NUTR 3750, or consent of the instructor.

Learning Outcomes

1. Summarize the components of current national and local community nutrition programs.
2. Explain how national or state-level policy influences a community nutrition issue.
3. Write a needs assessment for a community nutrition issue using reliable sources of community nutrition information and data, and relevant research.
4. Develop goals and objectives of a nutrition program that address a community nutrition issue.
5. Develop a culturally appropriate nutrition education lesson plan that addresses a specific nutrition program objective.

NUTR 5220. Graduate Studies in Food Service Organization and Management**3 Credits (3)**

Personnel, financial and general management in institutional and commercial food service operations. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4220. May be repeated up to 3 credits.

Prerequisite(s): Graduate Students; HRTM 2120, NUTR 3120, or consent of instructor.

Learning Outcomes

1. Evaluate food products and menu plans through the application of food service management theories and principles.
2. Describe the process of and ethical considerations surrounding purchasing, receiving, storing, and controlling inventory of a given food item.
3. Evaluate food system, food safety practices, and management practices of a specific food service establishment.
4. Apply management theories and principles to quality assurance and human resource case scenarios.
5. Evaluate a nutrition and food service budget and interpret financial data.

NUTR 5230. Graduate Studies in Medical Nutrition I**3 Credits (3)**

Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics. Additional assignments beyond NUTR 4230 required. May be repeated up to 3 credits. Crosslisted with: NUTR 4230.

Prerequisite(s): Graduate student, NUTR 3110, NUTR 4110, BIOL 2225 or BIOL 2221, or consent of instructor.

Learning Outcomes

1. Examine the role of medical nutritional therapy in disease processes.
2. Apply nutritional assessment techniques utilizing the Nutrition Care Process.
3. Compose nutrition care plans and utilize various styles of medical charting.
4. Describe the interdisciplinary nature of working with a health care team in the delivery of medical nutritional therapy.

**NUTR 5233. Graduate Studies in Nutrition Counseling & Education
3 Credits (3)**

This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education. Additional assignments beyond NUTR 4233 required. May be repeated up to 3 credits. Crosslisted with: HNDS 4233.

Prerequisite(s)/Corequisite(s): NUTR 5230. Students must be classified as a Graduate student to enroll in this course, NUTR 2110, NUTR 3110, FCSC 348.

Learning Outcomes

1. Evaluate nutrition counseling strategies and tools in promoting behavior change and self-management.
2. Apply behavior change theories and models to nutrition counseling sessions.
3. Develop nutrition care plans for nutrition counseling clients.
4. Analyze professionalism and ethics within nutrition counseling and education.
5. Develop and present a nutrition education lesson based on current nutrition research.

**NUTR 5240. Graduate Studies in Medical Nutrition Therapy II
3 Credits (3)**

Continuation of HNDS 546. May be repeated up to 3 credits. Crosslisted with: NUTR 4240.

Prerequisite(s): Graduate student, NUTR 5230 and NUTR 4230L or consent of instructor.

Learning Outcomes

1. Select appropriate medical nutrition therapy interventions for various disease processes.
2. Master nutrition assessment of patients/clients utilizing the Nutrition Care Process model.
3. Interpret medical terminology in patient chart notes and medical history records.
4. Evaluate laws regulations concerning dietetics.

**NUTR 5610. Dietetic Intern Seminar
1 Credit (1)**

Portfolio development for dietetic interns during supervised practice rotations. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN
2. 2: Apply evidence-based guidelines, systematic reviews and scientific literature.
3. CRDN
4. 3: Justify programs, products, services and care using appropriate evidence or data.
5. CRDN

6. 4: Evaluate emerging research for application in nutrition and dietetics practice.
7. CRDN
8. 6: Incorporate critical-thinking skills in overall practice.
9. CRDN
10. 1: Practice in compliance with current federal regulations and state statutes and rules, as applicable and in accordance with accreditation standards and the Scope of Nutrition and Dietetics Practice and Code of Ethics for the Profession of Nutrition and Dietetics.
11. CRDN
12. 2: Demonstrate professional writing skills in preparing professional communications.

**NUTR 5620. Dietetic Internship: Supervised Practice in Community Nutrition
1-8 Credits (2-6P)**

Provides dietetic interns with a minimum of 500 clock hours of supervised practice in community nutrition to include an emphasis in Cooperative Extension Service. Dietetic interns work under the guidance of faculty and community nutrition professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN
2. 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
3. CRDN
4. 2 Apply evidence-based guidelines, systematic reviews and scientific literature.
5. CRDN
6. 4 Evaluate emerging research for application in nutrition and dietetics practice.
7. CRDN
8. 5 Conduct projects using appropriate research methods, ethical procedures and data analysis.
9. CRDN
10. 14 Demonstrate advocacy on local, state or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
11. CRDN
12. 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
13. CRDN
14. 5 Develop nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience.
15. CES
16. Consult with organizations regarding food access for target populations.
17. CES
18. Evaluate the operation of Cooperative Extension Service nutrition programs in the areas of policies and procedures. 1
19. CES
20. Develop and deliver nutrition presentations to client/consumer audiences on various topics related to client/consumer needs. 1
21. CES

22. Ensure cultural relevancy and appropriateness of nutrition education.
1
23. CES
24. Assess educational needs and provide nutrition counseling based on individual needs, knowledge, medical needs, and socioeconomic status.

NUTR 5630. Community Nutrition for Dietetic Interns
3 Credits (3)

Advanced topics in community nutrition to include conducting community nutrition needs assessments, program planning and grant writing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN
2. 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
3. CRDN
4. 2 Apply evidence-based guidelines, systematic reviews and scientific literature.
5. CRDN
6. 4 Evaluate emerging research for application in nutrition and dietetics practice.
7. CRDN
8. 5 Conduct projects using appropriate research methods, ethical procedures and data analysis.
9. CRDN
10. 14 Demonstrate advocacy on local, state or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
11. CRDN
12. 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
13. CRDN
14. 5 Develop nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience.
15. CES
16. Consult with organizations regarding food access for target populations.
17. CES
18. Ensure cultural relevancy and appropriateness of nutrition education.

NUTR 5640. DI SUP PRACT FS MGT
1-5 Credits (2-10P)

Provides dietetic interns with a minimum of 300 clock hours of supervised practice in foodservice management. Dietetic interns work under the guidance of faculty and foodservice management professionals. Students must complete a total of 4 credit hours of NUTR 5640. May be repeated up to 5 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

NUTR 5650. Foodservice Management for Dietetic Interns
3 Credits (3)

Advanced topics in foodservice systems management to include business planning and marketing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN
2. 2: Demonstrate professional writing skills in preparing professional communications.
3. CRDN
4. 15: Practice and/or role play mentoring and precepting others.
5. CRDN
6. 4: Design, implement and evaluate presentations to target audiences.
7. CRDN
8. 3: Demonstrate active participation, teamwork and contributions in group setting.
9. CRDN
10. 7: Apply leadership skills to achieve desired outcomes.
11. CRDN
12. 8: Demonstrate negotiation skills.
13. CRDN
14. 4: Apply current informatics technology to develop, store, retrieve and disseminate information and data.
15. CRDN
16. 6: Analyze quality, financial and productivity data for use in planning.
17. CRDN
18. 7: Conduct feasibility studies for products, programs, or services with consideration of costs and benefits.1
19. CRDN
20. 8: Develop a plan to provide or develop a product, program, or service that includes a budget, staffing needs, equipment and supplies.

NUTR 5660. Dietetic Internship: Supervised Practice in Clinical Dietetics
1-8 Credits (2-16P)

Provides dietetic interns with a minimum of 500 clock hours of supervised practice in clinical dietetics. Dietetic interns work under the guidance of faculty and dietetics professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN
2. 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
3. CRDN
4. 4 Function as a member of interprofessional teams.
5. CRDN
6. 11 Show cultural competence/sensitivity in interactions with clients, colleagues and staff.
7. CRDN
8. 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
9. CRDN
10. 2 Conduct nutrition focused physical exams.
11. CRDN
12. 3 Demonstrate effective communication skills for clinical and customer services in a variety of formats

NUTR 5670. Nutrition Care Process for Dietetic Interns
3 Credits (3)

Advanced topics in nutrition care process and model to include medical nutrition therapy and evidence-based research and outcomes assessment in clinical dietetics. Consent of Instructor required.

Prerequisite(s): Acceptance into Dietetic Internship. Restricted to: HNDS majors.

Learning Outcomes

1. CRDN
2. Apply evidence-based guidelines, systematic reviews and scientific literature.
3. CRDN
- 3: Justify programs, products, services and care using appropriate evidence or data.
5. CRDN
- 4: Evaluate emerging research for application in nutrition and diet.
7. CRDN
- 4 Evaluate emerging research for application in dietetics practice.
9. CRDN
- 2 Demonstrate professional writing skills in preparing professional communication. Perform the nutrition care process and use standardized nutrition language for individuals, groups, and populations of differing ages and health status, in a variety of settings.
11. CRND
- 2 Conduct nutrition focused physical exams.

NUTR 5680. Review Course for National RD Exam 3 Credits (3)

Completion of dietetic internship portfolio and preparation for the national registration examination for dietitians. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: exclude HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. Demonstrate readiness to take the National Registration Examination for Dietitians.
2. Completion of all requirements of the NMSU Dietetic Internship.
3. Completion of all requirements to receive a Master of Science in Family Consumer Sciences from New Mexico State University

NUTR 5991. Special Research Programs 1-4 Credits (1-4)

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree. May be repeated up to 6 credits.

Prerequisite(s): Graduate Student.

Learning Outcomes

1. Develop analytical or experimental research skills in the areas of human nutrition and dietetics.

NUTR 5996. Special Topics 1-4 Credits (1-4)

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): Graduate student.

Learning Outcomes

1. Evaluate issues surrounding advanced nutrition and dietetics topics.

Phone: (575) 646-3936

Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences

This major prepares you to teach in middle or high school or in other settings such as the Cooperative Extension Service or community agencies. The major is an accredited education program which meets the teacher licensure requirements for the State of New Mexico. In the spring semester of the senior year, you will apply all the principles of teaching that you have learned in a semester of student teaching in a selected school. Requirements for admission to the student teaching component of the Family and Consumer Sciences Education are

1. an overall grade-point average of 2.75 or higher, and a grade-point average of 2.75 or higher in family and consumer sciences courses;
2. evidence of passing NES Essential Academic Tests I, II, III;
3. a C or better in all departmental courses; and
4. recommendation of the advisor.

You must have passed the NES Essential Academic Tests I, II, III and you must have a GPA of 2.75 or higher before enrolling in the following FCSE courses:

Prefix	Title	Credits
FCSC 4510	Teaching Methods I for Family and Consumer Sciences	3
FCSC 4520	Teaching Methods II for Family and Consumer Sciences	3
FCSC 4810	Supervised Teaching in Family and Consumer Sciences	12

Requirements

A list of specific requirements is available in the department. Please check with your advisor.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 3000 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education		
<i>Area I: Communications</i>		
ENGL 1110G or ENGL 1110H	Composition I Composition I Honors	4

Total Credits		120

¹ Approved VWW courses are: PHLS 3110V Human Sexuality, BLAW 385V Employment and Consumer Law and MKTG 311V Consumer Behavior

² Before being admitted to the program and enrolling in 4000-level classes, students must pass the National Evaluation Series for Certification: Essential Academic Skills, Subtests I, II, and III.

³ Students must have a 2.75 GPA or higher in order to register for these courses.

Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences

The Fashion Merchandising and Design major prepares students to achieve career goals in the diverse areas of the fashion industry. Students are prepared with well-rounded coursework related to the creative, technical and business aspects of the industry. The program develops the business knowledge, design fundamentals and industry experience needed to compete in today's fashion industry. The required coursework includes completion of a minor in Marketing as well as gaining valuable

hands-on field-experience. A GPA of 2.5 or better is required to enroll in CTFM 402 Field Experience to complete the degree requirements.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Electives, to bring the total credits to 120^{8,9}		10
Total Credits		120-123

¹ See the General Education (p. 227) section of the catalog for a full list of courses

² MATH 1350G Introduction to Statistics is required for the degree but students may need to take MATH 1215 as a prerequisite. If this course is used to fulfill the Math Basic Skills requirement, a C- or better is required.

³ See the Viewing a Wider World (p. 231) Section of the catalog for a full list of courses.

⁴ Offered summers only.

⁵ A GPA of 2.5 or higher is required before enrolling in CTFM 402 Field Experience.

⁶ Should be completed last semester.

⁷ Please review prerequisites prior to enrolling.

⁸ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

⁹ ACES 1120 Freshman Orientation/ACES 1210 Financial Fitness for College Students are strongly recommended for freshmen. NOTE: This degree includes the requirements necessary to complete a minor in Marketing. The student is responsible for completing the necessary paperwork in order for the minor to be awarded.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1350G Introduction to Statistics. The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

¹ See the General Education (p. 227) Section of the catalog for a full list of courses

² Students must take one Area V: Humanities and one Area VI: Creative and Fine Arts course in order to complete the General Education requirements

³ MATH 1430G Applications of Calculus I is required for the degree but students may need to take any prerequisites needed to enter MATH 1430G first.

⁴ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

⁵ See the Viewing a Wider World (p. 231) Section of the catalog for a full list of courses

Food Science and Technology (Meat Science) - Bachelor of Science in Food Science and Technology

Food science is the science of food. Food scientists study the physical microbiological, and chemical makeup of food. Food technology is the application of food science to the selection, preservation, processing, packaging, distribution, and use of safe food. The food industry is the largest manufacturing industry in the United States. This multidisciplinary field applies scientific disciplines including chemistry, microbiology, nutrition and engineering to develop new food products as well as the processes designed to improve food safety and the quality of foods. Food scientists develop new foods, add value to raw food commodities and improve the quality and safety of foods.

Consider exploring food science through our introductory course:

FSTE 2130G Survey of Food and Agricultural Issues which fulfills the general education Area III Laboratory Science requirement. Food scientists typically work in the food and beverage industry in the areas of quality assurance, product development, product procurement, research, sensory evaluation, sales, and food safety regulations. Graduates of the program will also be prepared for postgraduate studies leading to research, production and management careers in the food and feed industries, government and academia.

A minimum grade of C- is required in all classes with CHEM, BCHE, BIOL, FSTE, or NUTR prefix.

Requirements

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Students are encouraged to use the elective hours to complete a minor in a related area such as chemistry, microbiology, and business. Consult an advisor for requirements.

Human Development & Family Science - Bachelor of Science

This major stresses the interrelationship of individuals across the life span and the impact of social and economic factors on the family system. Graduates are prepared for professional work with social and community agencies and other programs serving children and families. This degree program has been deemed a CFLE-approved academic program by the National Council on Family Relations. After successfully completing the required coursework, students are considered proficient in the ten Family Life Education Content Areas and may apply for provisional certification. Provisional CFLEs may achieve full certification as soon as they document sufficient work experience in family life education. You must work closely with an advisor. You must achieve a grade of C- or higher in your required core and minor courses, and must retake required courses with a grade lower than C-.

You must have a GPA of 2.5 or higher before enrolling in FCST 4998 Field Experience: Issues and Ethics; and FCSC 4110 Teaching in Informal Family and Consumer Sciences Settings. Students are recommended to declare a minor related to the FCST field such as CAST, CEPY, ECED, GERO, PHLS, PSYC, SOCI, SOWK and GNDR in order to solidify the minor/elective requirements below and the suggested roadmap.

General Education Requirements

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 3000 or above. Developmental coursework will not count towards the degree requirements and/or elective

credits, but may be needed in order to take the necessary English and Mathematics coursework.

⁴ FCST 2110 Infancy Through Middle Childhood in the Family, FCST 2135 Adolescent Development and the Family, FCST 2140 Adult Development and Aging and FCST 3120V Family Ethnicities and Subcultures must all be taken in order to fulfill degree requirements, however the order in which the courses are taken is up to the students.

⁵ A 2.5 GPA is required to enroll in either course and students must complete the course, that is selected, with a C- or better.

⁶ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses

Human Nutrition and Dietetic Science (Nutrition Education) - Bachelor of Science in Family and Consumer Sciences

This concentration prepares students to become nutrition educators that work within the community and public health settings. This concentration focuses on health and wellness, the association between nutrition and health, and teaching healthy living. Graduates from the Nutrition Education concentration will have learned the skills to communicate evidence-based nutrition information, provide nutrition education, and blend nutrition with other health science subjects. The job opportunities for those graduating from this program include working as a nutrition educator or nutrition assistant in county agencies, Extension Services, community nutrition programs, schools and with health organizations.

Unlike the Dietetics concentration, this concentration does **not** prepare students to pursue the credential of a Registered Dietitian.

Concentration: Nutrition Education (General)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Due to the large number of PHLS course in the Nutrition Education option, students are encouraged to pursue a Public Health minor. Please see an advisor for more information and to view a Nutrition Education & Public Health minor roadmap.

¹ MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G College Algebra first.

² Not required for the degree. Highly recommended if new to NMSU

³ AXED 4510 Introduction to Research Methods is only taught in the Fall semesters, this will require changes to year three- spring and year four- fall semesters, speak with your advisor if you'd like to take this course.

⁴ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses, cannot be offered through the College of Health and Social Services.

⁵ See the General Education (p. 227) section of the catalog for a full list of courses

Human Nutrition and Dietetic Science (Pre-Dietetics/Dietetics) - Bachelor of Science in Family and Consumer Sciences

The Dietetics option prepares students to become registered dietitians (RD) and dietetic technicians, registered (DTR). This option encompasses nutritional science, clinical dietetics, community nutrition, food science and food service management.

All students enrolled in this option begin as Pre-Dietetics students.

All Pre-Dietetics students are required to apply for admission into the Dietetics option in the fall semester of their junior year as indicated on the Pre-Dietetics/Dietetics road map. Please refer to the HNDS Undergraduate Student Handbook for information on the admissions criteria, application instructions, and the application process. Pre-Dietetic students are termed Dietetic students upon formal notification of admission into the Dietetics program.

The Dietetics option is a Didactic Program in Dietetics (DPD) that is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). This option enables graduates to continue pursuing the credentials of a registered dietitian (RD). Becoming an RD is currently a three-step process:

1. Successfully complete an ACEND-accredited DPD program (e.g. the NMSU Dietetics Option), earn a degree and a verification statement
 - a. The verification statement ensures eligibility to apply to the next step.
2. Successfully complete an ACEND-accredited Dietetic Internship (DI) program, earn another verification statement.
 - a. This 2nd verification statement ensures eligibility to begin the next step.
3. Pass the Commission on Dietetic Registration (CDR) registration exam.

To earn a Verification Statement from the NMSU DPD, students must:

1. Complete all classes outlined in the Dietetics option roadmap.
2. Attain a C or higher (on campus or transfer) in classes with CHEM, BCHE, BIOL, SPMD, AHS/CHSS/NURS, FSTE and NUTR prefixes (C- does not count toward degree).

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 121 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

¹ Pre-Dietetics courses must be completed and/or enrolled in prior to applying to the Dietetics program.

² MATH 1220G College Algebra or MATH 1430G Applications of Calculus I is required for the degree but students may need to

take any prerequisites needed to enter MATH 1220G College Algebra/MATH 1220G College Algebra or MATH 1430G Applications of Calculus I/MATH 1430G Applications of Calculus I first.

³ Courses are required for application to a dietetic internship, GPAs in the application will be calculated using these classes.

⁴ See the General Education (p. 227) section of the catalog for a full list.

⁵ CHEM 313 Organic Chemistry I, CHEM 314 Organic Chemistry II, and CHEM 315 Organic Chemistry Laboratory combination for the Organic Chemistry requirement is a total of 8 credits,

⁶ Required courses are upper-division courses that can be completed in the junior year prior to admission to the Dietetics program.

⁷ Dietetics courses can only be completed by Dietetic students who have been admitted into the Dietetics program.

⁸ See the Viewing a Wider World (p. 231) section of the catalog for a full list.

Culinary Science - Undergraduate Minor

A minor in Culinary Science is available. The minor requires a minimum of 20 credits of which a minimum of 9 hours must be at the 300 or higher level. A grade of "C-" or better is required in all classes to be counted towards the minor. Prerequisites for a given course must be completed before taking the course or consent of instructor must be obtained before enrolling in the course.

Prefix	Title	Credits
FSTE 2110G	Food Science I	4
FSTE 4110	Food Microbiology	4
HRTM 1310	Safety, Sanitation and Health in the Hospitality Industry	1
HRTM 1320	Food Production and Service Fundamentals	3
HRTM 3310	Quantity Food Production and Service	4
HRTM 4320	Restaurant Operations Management	4

Total Credits 20

Fashion Merchandising & Design - Undergraduate Minor

A minor in Fashion Merchandising and Design is available. The minor requires a minimum of 18 hours of which a minimum of 9 hours must be at the 300 or higher level. A grade of "C" or better is required in all classes to be counted towards the minor. Prerequisites for a given course must be completed before taking the course or consent of instructor must be obtained before enrolling in the course.

Prefix	Title	Credits
Course Requirements		
CTFM 1110	Fundamentals of Fashion	3
CTFM 2130	Concepts in Apparel Construction	3
CTFM 371	Textile Science	3
Choose three Upper-Division courses from the following:		9
CTFM 365	Apparel Analysis	
CTFM 366	Historic Fashion and Society	
CTFM 372	Fashion Merchandising	
CTFM 373	Advanced Apparel Construction II	
CTFM 375	Fashion Buying	
CTFM 377	Fashion Study Tour	

CTFM 460	Cultural Perspectives in Dress
CTFM 473	Flat Pattern for Apparel Design
CTFM 474	Fashion Promotion
CTFM 476	Draping for Apparel Design

Total Credits 18

Food Science - Undergraduate Minor

A minimum of 18 credits of courses with the FSTE prefix are required for a minor in Food Science and Technology. A grade of "C-" or better is required in all classes to be counted toward the minor. Prerequisites for a given course must be completed before taking the course, or consent of instructor must be obtained before enrolling in the course.

Prefix	Title	Credits
Required Courses		
FSTE 4110	Food Microbiology	4
FSTE 4250	Sensory Evaluation of Foods and Product Development	3
FSTE 4998	ACES Foods at NMSU-Experiential Learning	1
<i>Electives (select at least three courses from the following):</i>		10
FSTE 4140	Food Analysis	
FSTE 4120	Food Chemistry	
FSTE 4230	Food Processing Technologies	
FSTE 430	Brewing Science & Engineering	

Total Credits 18

Human Development and Family Science - Undergraduate Minor

A minor in Human Development and Family Science is available. The minor requires a minimum of 18 hours of which a minimum of 9 hours must be at the 300 or higher level. Specific coursework requirements may apply. See an advisor for course requirements and scheduling.

Nutrition - Undergraduate Minor

A minor in Human Nutrition is available. The minor requires a minimum of 19 hours. Specific coursework requirements may apply, including prerequisites. See an advisor for course requirements and scheduling. Students should take the following courses:

Prefix	Title	Credits
Required Courses		
NUTR 2120	Seminar I - Becoming a Nutrition Professional (only offered in Spring semesters)	1
NUTR 2110	Human Nutrition	3
NUTR 3110	Nutrition Throughout the Lifecycle (only offered in Fall semesters)	3
Choose a minimum of 12 credits from the following		12
HRTM 3310	Quantity Food Production and Service	
NUTR 3710	Food Systems & Policy in Dietetics (only offered in Spring semesters)	
NUTR 3750	Applied Nutrition Research (only offered in Spring semesters)

Fish, Wildlife and Conservation Ecology

Undergraduate Program Information

Through lecture courses, labs, hands-on field experience and internships, the Department of Fish, Wildlife and Conservation Ecology will prepare you for a career in a variety of natural resource fields related to the conservation and management of wild animal populations and the natural systems they perpetuate. Award-winning professors will guide students in the study of how to manage fish and wildlife populations, their habitats, how their populations grow and contract, how different species influence the biotic community in which they live and how natural systems are affected by human activities.

Bachelor of Science in Fish, Wildlife and Conservation Ecology.

With the continuous growth of human populations and the ever dwindling of natural resources, natural resource professionals are needed now more than ever. Learn how to sustainably manage fish and wildlife populations and the habitats they utilize to ensure their long-term successful conservation. We offer two options within this degree. The Wildlife Ecology and Management option focuses on the ecology, conservation and management of wildlife (including mammals, birds, amphibians, and reptiles) in their natural habitats. The Aquatic Ecology and Management option focuses on the ecology, conservation and management of aquatic resources and the animals and plants found in them.

The department offers a minor in Wildlife Science for students majoring in other disciplines. The minor includes a minimum of 18 credit hours.

Bachelor of Science in Conservation Ecology

New Mexico State University offers an interdisciplinary, undergraduate program in Conservation Ecology. The goal of this program is to train biologists for the current and future challenges that we face in the conservation and wise use of natural resources. An overriding principle of the program is to provide a solid foundation in basic science coupled with a practical approach towards sustainability and stewardship. The curriculum encompasses several disciplines and includes a wide variety of courses from Fish, Wildlife and Conservation Ecology, Biology, and Geography.

This educational experience will provide students with an overview of global biodiversity and an understanding of the ecological and evolutionary processes that have created and sustained it. Courses in population and community ecology coupled with population viability analysis and risk assessment will give students the necessary background to understand the theory and development of these fields as well as the tools to tackle real-world problems. Courses in basic genetics, evolution, and conservation genetics will expose students to the importance of conserving genetic variation in order to maintain adaptive potential within populations, thereby sustaining the evolutionary process. Students will also receive background on wildlife law and environmental policy, information vital for assisting governing bodies in making decisions regarding the protection and wise use of our natural resources. Skills obtained in the application of geographic information systems, molecular genetics, and professional communication can also

be acquired through various electives. If biochemistry is taken as an elective, this curriculum provides the necessary educational background for pre-vet requirements, thus preparing students for veterinary school and future jobs such as wildlife or zoo veterinarian, or conservation medicine practitioner. In sum, we seek to provide undergraduate students with an education that will allow them the opportunity to contribute to the conservation of all life on Earth.

The department offers a minor in Conservation Ecology for students majoring in other disciplines. The minor includes 20 credits.

To graduate from the Department of Fish, Wildlife and Conservation Ecology, an overall grade point average of 2.0 is required in courses taken in the major field and in all courses taken at NMSU.

Graduate Program Information

Master of Science in Fish, Wildlife and Conservation Ecology.

The Department of Fish, Wildlife and Conservation Ecology (FWCE) offers graduate work leading to the Master of Science degree with a major in Fish, Wildlife and Conservation Ecology. Faculty members in the department also may advise Ph.D. candidates through the graduate program in the Department of Biology, Department of Animal and Range Sciences, Department of Plant and Environmental Sciences, as well as other Ph.D. granting departments. For additional information please see the graduate catalog entries for the respective departments.

Minimum qualifications for admission to the graduate program include the following:

- 3.0 grade-point average in the last two years of undergraduate work
- Students who are most competitive for admission are those with a combined average GRE score greater than 70th percentile on the verbal and quantitative parts of the GRE.
- Course work in zoology, botany and animal ecology and a basic appreciation of sustainable use of natural resources, with supporting courses in mathematics, chemistry, physics and written and oral communication.

Applicants should submit a written composition of approximately 350 words that indicates the applicant's reasons for pursuing advanced study, explains personal and educational goals, and any additional experiences (e.g., military or career) or skills that might provide a foundation for graduate study. Applicants should submit three letters of recommendation (it is preferred that at least two letters come from university instructors) along with official GRE scores (use NMSU code 4531). Applicants should also contact a faculty member in the department that they would like to work with as an advisor, and that faculty member needs to agree to serve as the student's advisor. Application forms, application fee and transcripts, GRE scores, letters of recommendation and letter of application should be submitted online to the Graduate School. Successful applicants will be selected from those who meet the criteria of grade-point average, GRE scores, and educational background described above and who appear to have professional promise as indicated by personal history and written references.

For the Master of Science degree, a minimum of 30 semester credits of graduate work in the major and related subjects is required, together with a thesis for most students. Of these credits, at least 15 must be in courses numbered 500 or above, and at least 15 must be for courses with the FWCE prefix. Those programs involving a thesis or research project

include 4 to 6 credits of research (FWCE 598 Special Research Programs or FWCE 599 Master's Thesis). Students electing a minor in FWCE are required to take at least 9 credits in the minor field. A nonthesis option is available to some students, depending on prior training and experience, and subject to approval by the advisor and department head.

All students in the program must complete the following requirements:

- A ST 505 Statistical Inference I or equivalent
- One semester of Graduate Seminar (FWCE 515 Graduate Seminar - may be repeated for credit)
- A minimum of 3 additional credits from the Quantitative Methods category in addition to A ST 505 Statistical Inference I (eligible courses listed below)
- One course each from the Ecological Concepts, Organismal Biology and Ecological Techniques categories (eligible courses listed below)
- 4 to 9 credits from the Independent Study category (eligible courses listed below)

In addition, a student may petition to have up to 3 credits of special topics courses (FWCE 548 Graduate Problems) to apply to one of the three areas. Courses other than those listed may be acceptable, given permission by the student's supervisory committee

Degrees for the Department

Bachelor Degree(s)

- Conservation Ecology - Bachelor of Science in Conservation Ecology (p. 380)
- Fisheries and Wildlife Science (Aquatic Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 381)
- Fisheries and Wildlife Science (Wildlife Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 384)

Master Degree(s)

- Fish, Wildlife and Conservation Ecology - Master of Science (p. 150)

Minors for the Department

- Conservation Ecology - Undergraduate Minor (p. 387)
- Fish, Wildlife and Conservation Ecology - Graduate Minor (p. 221)
- Wildlife Science - Undergraduate Minor (p. 387)

Professor, Matt Gompper, Department Head

Professors Boeing, Cain, Desmond, Frey, Jones; **Associate**

Professor Gebreselassie; **Assistant Professors** Hernandez-Gomez, Klein, Lawson, Laverty, Pregler

M.E. Gompper – Department Head, Ph.D. (Tennessee)– mammal ecology, management and conservation; W.J. Boeing, Ph.D. (Louisiana State University)– aquatic ecology; J. W. Cain, Ph.D. (University of Arizona)– large mammal ecology, conservation and management; M.J. Desmond, Ph.D. (University of Nebraska)– avian ecology and conservation; J.K. Frey, Ph.D. (University of New Mexico)– ecology and conservation of mammals; F.A. Gebreselassie, Ph.D. (University of Bern Switzerland)- Capture-recapture models, Integrated population models; O. Hernandez-Gomez, Ph.D. (Purdue University)- disease ecology, herpetology, conservation genetics; K. Jones, Ph.D. (University of Wisconsin-Madison)- human dimensions of conservation, environmental economics, evidence-based conservation; Z. Klein, Ph.D.

(University of Idaho)-fish ecology, fisheries management, fish conservation, population ecology; A. Lawson, Ph.D. (Clemson University)- vertebrate population ecology, analytical tool development; T. Laverty, Ph.D. (Colorado State University)- applied population, community and conservation ecology; K.C. Pregler, Ph.D. (Colorado State University)- population and evolutionary ecology, conservation biology

Fish, Wildlife and Conservation Ecology Courses

FWCE 1110G. Introduction to Natural Resources Management 4 Credits (3+2P)

This class covers historical and current issues affecting the management of renewable natural resources with an emphasis on water, soil, rangeland, forest, fish, and wildlife resources. An emphasis is placed on the scientific method and critical thinking. In the laboratory students collect and analyze field data on topics covered above and write up each unit as a laboratory report.

Learning Outcomes

1. Students should be able to recall, describe and explain the laws, treaties and acts that have led to our current management of natural resources in the United States.
2. Students should recognize or explain what ecological processes are, the importance of ecological processes in maintaining ecosystem function and how human activities change ecological processes and the ecosystems dependent on those processes.
3. In each of the six course and lab modules (water quality, soils, forestry, rangelands, wildlife and fisheries) students should be able to recall, describe and explain basic terminology, fundamental ecological principles and management techniques and challenges.
4. Students should be able to interpret data presented graphically and in tables from class exercises and lectures.
5. Students should be able to solve problems scientifically through field data collection, laboratory analyses and the use of quantitative methods (basic statistics, tables and graphs).
6. Students should be able to communicate results from laboratory exercises (6 lab modules) orally and in writing.
7. Students will learn to apply scientific thinking to real world problems through in class discussion and short essays based on material from case studies presented in class and guest speakers.

FWCE 1120. Contemporary Issues in Wildlife and Natural Resources Management 3 Credits (3)

Ecological, socioeconomic, and political issues surrounding the management of our natural resources with an emphasis on fish and wildlife resources.

FWCE 2110. Principles of Fish and Wildlife Management 3 Credits (3)

Basic principles of fish and wildlife management including history, ecology, economics, and policy. Emphasis on wildlife and fisheries. Uses an ecosystem approach integrating living and nonliving resources.

Prerequisite(s): FWCE 1110G.

Learning Outcomes

1. The goal of this course is to provide a firm foundation in the principles of wildlife and fisheries management.
2. Material will include a background in biological principles geared towards animal populations, characteristics and management of the habitats utilized by fish and wildlife, techniques used to study

and manage animals and their habitats, and aspects of the human dimension involved in wildlife and fisheries issues.

3. This course serves as a core requirement for degrees offered in the Department of Fish, Wildlife and Conservation Ecology and as a required course for degrees in other departments such as Rangeland Resources.

FWCE 301. Wildlife Ecology

3 Credits (3)

General ecological theory with emphasis on concepts including biogeography, species interactions, population dynamics and disease ecology as they relate to the management and conservation of vertebrates. Prerequisite(s): BIOL 2610G

FWCE 330. Natural History of the Vertebrates

4 Credits (3+3P)

Evolution, ecology, and diversity of vertebrates. Topics include comparative anatomy and physiology, biogeography, community ecology, behavior, and conservation. Laboratory emphasizes identification of local taxa. Field trips may be required.

Prerequisite(s)/Corequisite(s): BIOL 322. Prerequisite(s): BIOL 2610G and BIOL 2610L.

FWCE 355. Wildlife Techniques and Analysis

4 Credits (3+2P)

FWCE 355 will provide a broad overview of basic skills and techniques that are commonly used by biologists in performing management, research, and reporting functions in natural resource fields with an emphasis on wildlife techniques, data processing and analysis.

Prerequisite(s): FWCE 301, A ST 311.

FWCE 357. Fisheries Management and Analysis

4 Credits (3+2P)

Lectures and laboratory exercises provide a broad overview of basic skills and techniques used for assessing and managing fish populations.

Prerequisite(s): FWCE 301 and A ST 311.

FWCE 391. Internship

1-3 Credits (1-3)

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/ U, Audit).

Prerequisite(s): Consent of instructor.

FWCE 393. Professional Experience and Communication

3 Credits (3)

Professional work experience under the supervision of employer and/or a faculty member. Written report and presentation is required.

Prerequisite(s)/Corequisite(s): FWCE 2110.

FWCE 402. Seminar in Natural Resource Management

1 Credit (1)

Review and discussion of current topics in natural resource management.

Prerequisite(s): Senior standing or above.

FWCE 409. Introduction to Population Ecology

3 Credits (3)

Quantitative analysis of vital statistics and mechanisms affecting dynamics of wild populations. Patterns of growth, age structure, survival, and natality. Population theories and life tables.

Prerequisite(s): MATH 1430G and FWCE 2110.

FWCE 430. Avian Field Ecology

4 Credits (3+3P)

Principles of avian ecology and management with an emphasis on taxonomy, physiology, behavior and field studies. Includes weekly field trips focusing on identification and behavior of Southwest birds.

Prerequisite(s)/Corequisite(s): FWCE 330.

FWCE 431. Mammalogy

4 Credits (3+2P)

Classification, identification, anatomy, physiology, life history, and ecology of mammals. Field trips required.

Prerequisite(s): FWCE 2110 and FWCE 330.

FWCE 432. Environmental Biology of Fishes

4 Credits (3+3P)

What makes a fish, a fish? Mechanisms of circulation, gas exchange, osmotic and ionic regulation, swimming, migration, reproduction, and chemoreception will be covered in this class. Taught with FWCE 532.

Prerequisite(s): CHEM 1215G and senior standing.

FWCE 434. Aquatic Contaminants and Toxicology

4 Credits (3+3P)

Basic principles and methodologies of aquatic toxicity testing; routes of exposure and modes of action; environmental legislation and ecological risk assessment. Taught with FWCE 534. Crosslisted with: ENVS 434.

Prerequisite(s): CHEM 1215G and senior standing.

FWCE 437. Wildlife Damage Management

3 Credits (3)

Introduction to basic need and appropriate methods for resolving human-wildlife conflicts and management of animal damage. Socioeconomic, ecological, and political factors. Field trips required. Taught with FWCE 537.

Prerequisite(s): BIOL 2610G, FWCE 2110, FWCE 301, FWCE 409.

FWCE 447. Wildlife Law and Policy

3 Credits (3)

Introduction to state and federal laws and policies for wildlife and the historical context for their development. Taught with FWCE 547.

Prerequisite(s): Junior or Senior level standing.

FWCE 448. Problems

1-3 Credits (1-3)

Individual investigations in fishery or wildlife science. Maximum 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): 18 credits in WLSC.

FWCE 450. Special Topics

1-4 Credits (1-4)

Specific subjects and credits as announced in the Schedule of Classes. Maximum of 4 credits per semester. May be repeated up to 9 credits. Consent of Instructor required.

FWCE 457. Ecological Biometry

3 Credits (3)

Use of ecological data to test scientific hypotheses, stochastic and statistical models for environmental data, data visualization, likelihood-based and information-based model selection. Emphasis on open-source software tools.

Prerequisite(s): MATH 1430G or MATH 1511G, A ST 311, FWCE 301.

FWCE 459. Aquatic Ecology

4 Credits (4)

Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Taught with FWCE 559.

Prerequisite(s): FWCE 301 or BIOL 301, CHEM 1225G, MATH 1430G.

FWCE 464. Management of Aquatic and Terrestrial Ecosystems
3 Credits (3)

Principles and methods for managing aquatic and terrestrial ecosystems and their fish and wildlife resources. Emphasis on quantitative techniques, data collection and analysis for management of systems at a landscape spatial scale.

Prerequisite: (BIOL 301 or FWCE 301) FWCE 330, A ST 311.

Learning Outcomes

1. Demonstrate an understanding of The North American Model and the Public Trust Doctrine.
2. Demonstrate an understanding of the funding mechanisms underlying fish and wildlife management.
3. Demonstrate an understanding of the policies and laws germane to fish and wildlife management.
4. Demonstrate an understanding of the constraints facing modern fish and wildlife management.
5. Exhibit effective written and verbal communication skills.

FWCE 467. Herpetology
4 Credits (4)

Systematics, taxonomy, ecology, behavior, and conservation of amphibians and reptiles. Field trips required. Taught with FWCE 567.

Prerequisite(s): FWCE 330.

FWCE 471. GIS for Natural Resource Scientists
4 Credits (4)

Practical GIS class for students with little or no GIS experience. Class focuses on learning to use industry-standard software and applications in natural resource management. Taught with FWCE 571.

FWCE 472. Wildlife Museum Internship
1-4 Credits (1-4)

Substantial directed work experience in various functions of the wildlife natural history museum developed by the student in consultation with the faculty curator. Internships may involve aspects of collection development and management, public education programs, or other related museum activities. Internship must be approved by the faculty curator. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): BIOL 2610G and BIOL 2610L.

FWCE 482. Ichthyology
4 Credits (3+2P)

Classification, morphology, identification, life history, and ecology of fishes.

Prerequisite(s): FWCE 330 or consent of instructor.

FWCE 509. Population Ecology (s)
3 Credits (2+2P)

Quantitative analysis of vital statistics and mechanisms promoting stability in wild populations. Theory and application of life tables and population models.

FWCE 515. Graduate Seminar
1 Credit (1)

Current topics.

FWCE 530. Large Mammal Ecology, Conservation and Management
3 Credits (3)

This course will cover aspects of large mammal ecology, management and conservation. Will include aspects of foraging ecology, resource and habitat selection, competition and resource partitioning, predation and population dynamics. Taught with FWCE 436.

FWCE 532. Environmental Biology of Fishes
4 Credits (3+3P)

What makes a fish, a fish? Mechanisms of circulation, gas exchange, osmotic and ionic regulation, swimming, migration, reproduction, and chemoreception will be covered in this class. Taught with FWCE 432; however, students are responsible for all requirements in FWCE 432, plus additional assignments.

FWCE 535. Special Topics
1-4 Credits (1-4)

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

FWCE 537. Wildlife Damage Management
3 Credits (3)

Introduction to basic need and appropriate methods for resolving human-wildlife conflicts and management of animal damage. Socioeconomic, ecological, and political factors. Field trips required. Taught with FWCE 437. Students are responsible for all requirements for FWCE 437 plus additional work. Prerequisite(s): BIOL 2610G, FWCE 2110, FWCE 301 and FWCE 409

FWCE 540. Wildlife Habitat Relationships
4 Credits (3+1P)

The study of wildlife-habitat relationships primarily seeks to describe how the distribution and abundance of resources used for food, cover and security, and constraints on the use of these resources influence the distribution of animals. This course will cover aspects of animal behavior related to how animals select habitat, theoretical models of habitat selection, the influence of inter- and intra-specific interactions on habitat selection, habitat quality, study designs for wildlife-habitat studies, modeling habitat selection and data analyses.

Learning Outcomes

1. The addition of the laboratory component to the course will provide graduate students with hands on experience implementing current statistical approaches for modeling wildlife habitat relationships including selection ratios, resource selection functions, resource utilization functions, step-selection functions and other approaches.

FWCE 547. Wildlife Law and Policy
3 Credits (3)

Introduction to state and federal laws and policies for wildlife and the historical context for their development. Taught with FWCE 447.

FWCE 548. Graduate Problems
1-3 Credits (1-3)

Individual studies in fishery and wildlife sciences. Maximum of 3 credits per semester. No more than 6 credits of this course and FWCE 598, combined, toward a degree. May be repeated up to 6 credits.

FWCE 558. Nonthesis Project
1-6 Credits (1-6)

Independent study to satisfy nonthesis project requirement. Maximum of 6 credits toward degree. Available only to nonthesis students. May be repeated up to 6 credits.

FWCE 559. Aquatic Ecology
4 Credits (4)

Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Taught with FWCE 459.

Prerequisite(s): FWCE 301 or BIOL 301, CHEM 1225G, MATH 1430G.

FWCE 567. Herpetology**4 Credits (4)**

Systematics, taxonomy, ecology, behavior and conservation of amphibians and reptiles. Field trips required. Taught with FWCE 467.

FWCE 571. GIS for Natural Resource Scientists**4 Credits (4)**

Practical GIS class for students with little or no GIS experience. Class focuses on learning to use industry-standard software and applications in natural resource management. Taught with FWCE 471.

FWCE 582. Ichthyology**4 Credits (4)**

Classification, morphology, identification, life history, and ecology of fishes. Taught with FWCE 482.

FWCE 598. Special Research Programs**1-3 Credits (1-3)**

Individual investigations, either analytical or experimental. Maximum of 3 credits per semester. No more than 6 credits of this course and FWCE 548, combined, toward a degree. Not available to students in the nonthesis program. May be repeated up to 6 credits.

FWCE 599. Master's Thesis**1-9 Credits (1-9)**

Thesis. May be repeated up to 30 credits. Thesis/Dissertation Grading.

Office Location: Knox Hall 132

Conservation Ecology - Bachelor of Science in Conservation Ecology

Co-directors of the Program:

Professor, Charles Shuster, Department Head, Biology

Professor, Matthew Gompper, Department Head, Fish, Wildlife and Conservation Ecology

Professors Bailey, Boecklen, Boeing, Caldwell, Cowley, Desmond, Gompper, Hanley, Houde, James, Milligan, Roemer, Smith, Wright; **Associate Professors** Cain, Mabry; **Assistant Professors** Orr

New Mexico State University offers an interdisciplinary, undergraduate program in Conservation Ecology. The goal of this program is to train biologists for the current and future challenges that we face in the conservation and wise use of our Earth's natural resources. An overriding principle of the program is to provide a solid foundation in basic science coupled with a practical approach towards sustainability and stewardship. The curriculum encompasses several disciplines and includes a wide variety of courses from the Biology; Fish, Wildlife and Conservation Ecology; Geography; and Range Science departments.

The educational experience will provide students with an overview of global biodiversity and an understanding of the ecological and evolutionary processes that have created and sustained it. Courses in population and community ecology coupled with population viability analysis and risk assessment will give students the necessary background to understand the theory and development of these fields as well as the tools to tackle real-world problems. Courses in basic genetics, evolution, and conservation genetics will expose students to the importance of conserving genetic variation in order to maintain

adaptive potential within populations, thereby sustaining the evolutionary process. Students will also receive background on wildlife law and environmental policy, information vital for assisting governing bodies in making decisions regarding the protection and wise use of our natural resources. Skills obtained in the application of geographic information systems, molecular genetics, and professional communication can also be acquired through various electives. In sum, we seek to provide undergraduate students with an education that will allow them the opportunity to contribute to the conservation of all life on Earth.

The requirements are listed below. In addition, each required course must be passed with a grade of C- or better.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

¹ See the General Education (p. 227) Section of the catalog for a full list of courses.

² Either MATH 1430G Applications of Calculus I or MATH 1521G Calculus and Analytic Geometry II is required for the degree but

students may need to take any prerequisites needed to enter these courses.

³ One Viewing a Wider World (p. 231) course will be satisfied using the 9-hour rule: students with Biology as home department use FWCE courses and students with Fish, Wildlife and Conservation Ecology as home department use BIOL courses.

⁴ Other related courses may include BIOL 436 Disease Vector Biology, BIOL 442 Genomics Technology, BIOL 446 Bioinformatics and NCBI Database, BIOL 469 Biology of Emerging Infectious Diseases, ECON 337V Natural Resource Economics, GEOG 381 Cartography and GIS, GEOG 481 Fundamentals of GIS, GEOL 1110G Physical Geology, GEOL 424 Soil Chemistry, POLS 378 U.S.-Mexico Border Politics, RGSC 318 Watershed Management, RGSC 325 Rangeland Restoration Ecology, RGSC 452 Vegetation Measurements for Rangeland Assessment.

⁵ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The elective credits in the requirements list is the amount needed to bring the total to 120 credits and may vary based on the degree. Students may need to complete more or less courses on a case-by-case basis and each student should discuss elective requirements with their advisor.

Second Language Requirement

For the Bachelor of Science in Conservation Ecology there is no second language requirement for the degree.

Fisheries and Wildlife Science (Aquatic Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology

The Department of Fish, Wildlife and Conservation Ecology prepares you for careers in a variety of natural resource fields related to the management of wild animal populations and the natural systems they share.

To graduate, an overall grade point average of 2.0 is required in courses taken in the major field and in all courses taken at NMSU. In addition, each required course must be passed with a grade of C- or better. The department offers a minor in Fish, Wildlife and Conservation Ecology for students majoring in other disciplines. The minor includes a minimum of 18 credit hours.

The Aquatic Ecology and Management Concentration is for students who want to focus on fish and aquatic systems.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Departmental Botany Requirements (9 credits)

BIOL 312	Plant Taxonomy	3
or RGSC 316	Rangeland Plants	
BIOL 313	Structure and Function of Plants	3
Select one from the following:		3
BIOL 314	Plant Physiology	
RGSC 325	Rangeland Restoration Ecology	
RGSC 357	Grass Taxonomy and Identification	
RGSC 440	Rangeland Resource Ecology	

Departmental Physiology Requirements (3-4 credits)

Select 3-4 credits from the following: 3-4

ANSC 370	Anatomy and Physiology of Farm Animals	
BIOL 314	Plant Physiology	
BIOL 381	Animal Physiology	
FWCE 432	Environmental Biology of Fishes	

*Concentration Coursework**Techniques*

FWCE 357	Fisheries Management and Analysis	4
----------	-----------------------------------	---

Management

Choose one from the following: 3-4

FWCE 434	Aquatic Contaminants and Toxicology	
FWCE 459	Aquatic Ecology	
RGSC 318	Watershed Management	

Organismal Biology

Choose one from the following: ⁵ 3-4

EPWS 462	Parasitology	
FWCE 467	Herpetology	
FWCE 482	Ichthyology	

Wildlife Ecology and Management Electives ⁶ 3-4**Non-Departmental Requirements (in addition to Gen.Ed/VWW)** ⁷

AGRO 305	Principles of Genetics	3
or BIOL 305	Principles of Genetics	
A ST 311	Statistical Applications	3
BIOL 322	Zoology	3
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	4
CHEM 1225G	General Chemistry II Lecture and Laboratory for STEM Majors	4

Select one from the following: 4

GEOL 1110G	Physical Geology	
SOIL 2110 & 2110L	Introduction to Soil Science and Introduction to Soil Science Laboratory	

Second Language: (not required)

Electives, to bring the total credits to 120 ⁸ 4-9

Total Credits 120

¹ MATH 1430G Applications of Calculus I or MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1430G or MATH 1511G first.

² See General Education (p. 227) section of the catalog for a full list of courses.

³ See Viewing a Wider World (p. 231) section of the catalog for a full list of courses.

Three credits can be taken inside the College of ACES, but three credits must also be taken outside the College of ACES or 9 credits can be taken within a single department (e.g. Biology) that is outside the College of Aces.

⁴ Off campus students can take FWCE 1120 Contemporary Issues in Wildlife and Natural Resources Management Distance Education.

⁵ At least one course chosen must be a vertebrate taxonomy course with FWCE prefix, i.e., one of FWCE 467 Herpetology or FWCE 482 Ichthyology.

⁶ Wildlife Concentration Electives (any course for 3-4 credits from the Techniques, Management or Organismal Biology areas):

Techniques

- FWCE 355 Wildlife Techniques and Analysis

Management

- FWCE 437 Wildlife Damage Management
- FWCE 447 Wildlife Law and Policy
- RGSC 325 Rangeland Restoration Ecology

Organismal Biology

- BIOL 484 Animal Communication
- EPWS 303 Economic Entomology
- EPWS 462 Parasitology
- FWCE 430 Avian Field Ecology
- FWCE 431 Mammalogy
- FWCE 467 Herpetology

⁷ Students intending to pursue graduate studies should also take CHEM 2115 Survey of Organic Chemistry and Laboratory.

⁸ Elective credit may vary based on General Education course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Additional Electives

Take additional credits so the total adds up to at least 120 credits including 55 credits 300- and 400-level classes.

Students are encouraged to pursue a minor course of study with a department of their choosing.

Compatible minors include, but are not limited to:

- animal science,
- biology,
- chemistry,
- environmental science,
- forensic sciences,
- geography,
- journalism,
- management,
- and range science.

Notes:

1. No more than 6 credits of Physical Education classes will count towards your degree.
2. Maximum of two grades of 'D' in FWCE classes will count towards a student's degree.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1430G Applications of Calculus I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		Credits
Semester 1		
MATH 1430G	Applications of Calculus I ¹	3
ENGL 1110G	Composition I ¹	4
FWCE 1110G	Introduction to Natural Resources Management	4

Total Credits		120-121

¹ These courses have prerequisites and it is the students responsibility for checking and fulfilling all course prerequisites listed for these courses.

² See the General Education (p. 227) section of the catalog for a full list of courses.

³ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses.

Three credits can be taken inside the College of ACES, but three credits must also be taken outside the College of ACES or 9 credits can be taken within a single department (e.g. Biology) that is outside the College of Aces.

Fisheries and Wildlife Science (Wildlife Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology

The Department of Fish, Wildlife and Conservation Ecology prepares you for careers in a variety of natural resource fields related to the management of wild animal populations and the natural systems they share.

To graduate, an overall grade point average of 2.0 is required in courses taken in the major field and in all courses taken at NMSU. In addition, each required course must be passed with a grade of C- or better. The department offers a minor in Fish, Wildlife and Conservation Ecology for students majoring in other disciplines. The minor includes a minimum of 18 credit hours.

The Wildlife Ecology and Management Concentration is for students who plan to focus on terrestrial organisms.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Non-Departmental Requirements (in addition to Gen.Ed/VWW)⁷

AGRO 305	Principles of Genetics	3
or BIOL 305	Principles of Genetics	
A ST 311	Statistical Applications	3
BIOL 322	Zoology	3

CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	4
------------	--	---

CHEM 1225G	General Chemistry II Lecture and Laboratory for STEM Majors	4
------------	---	---

Select one from the following: 4

GEOL 1110G	Physical Geology	
SOIL 2110 & 2110L	Introduction to Soil Science and Introduction to Soil Science Laboratory	

Second Language: (not required)

Electives, to bring the total credits to 120⁸ 4-9

Total Credits 120

¹ MATH 1430G Applications of Calculus I or MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1430G or MATH 1511G first.

² See General Education (p. 227) section of the catalog for a full list of courses.

³ See Viewing a Wider World (p. 231) section of the catalog for a full list of courses.

Three credits can be taken inside the College of ACES, but three credits must also be taken outside the College of ACES or 9 credits can be taken within a single department (e.g. Biology) that is outside the College of Aces.

⁴ Off campus students can take FWCE 1120 Contemporary Issues in Wildlife and Natural Resources Management Distance Education.

⁵ At least one course chosen must be a vertebrate taxonomy course with FWCE prefix, i.e., one of FWCE 467 Herpetology or FWCE 482 Ichthyology.

⁶ Aquatic Concentration Electives, at least one course chosen must be a vertebrate taxonomy course with FWCE prefix (i.e., one of FWCE 430 Avian Field Ecology, FWCE 431 Mammalogy, or FWCE 467 Herpetology)

⁷ Students intending to pursue graduate studies should also take CHEM 2115 Survey of Organic Chemistry and Laboratory.

⁸ Elective credit may vary based on General Education course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Additional Electives

Take additional credits so the total adds up to at least 120 credits including 55 credits 300- and 400-level classes.

Students are encouraged to pursue a minor course of study with a department of their choosing.

Compatible minors include, but are not limited to:

- animal science,
- biology,
- chemistry,
- environmental science,
- forensic sciences,
- geography,
- journalism,

- management,
- and range science.

Notes:

1. No more than 6 credits of Physical Education classes will count towards your degree.
2. Maximum of two grades of 'D' in FWCE classes will count towards a student's degree.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1430G Applications of Calculus I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year

³ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses.

Conservation Ecology - Undergraduate Minor

A minor in Conservation Ecology is available for students who choose to major in other areas, but wish to include Conservation Ecology in their academic training. A minor in Conservation Ecology must include a minimum of 20 credits in the discipline with 9 of these coming from upper-division courses.

Requirements

Prefix	Title	Credits
Core Curriculum		
BIOL 2610G & BIOL 2610L	Principles of Biology: Biodiversity, Ecology, and Evolution and Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory	4
BIOL 301 or FWCE 301	Principles of Ecology Wildlife Ecology	3
BIOL 462	Conservation Biology	3
FWCE 2110	Principles of Fish and Wildlife Management	3
FWCE 402	Seminar in Natural Resource Management	1
Select 6 credits from the following:		6
BIOL 312 or RGSC 316	Plant Taxonomy Rangeland Plants	
BIOL 313	Structure and Function of Plants	
BIOL 322	Zoology	
BIOL 467	Evolution	
BIOL 480	Animal Behavior	
BIOL 488	Principles of Conservation Genetics	
ECON 384V	Water Resource Economics	
ECON 337V	Natural Resource Economics

FWCE 409	Introduction to Population Ecology	
FWCE 430	Avian Field Ecology	
FWCE 431	Mammalogy	
FWCE 447	Wildlife Law and Policy	
FWCE 464	Management of Aquatic and Terrestrial Ecosystems	
FWCE 467	Herpetology	
FWCE 482	Ichthyology	
Total Credits		20

Wildlife Science - Undergraduate Minor

The Department offers a minor in Wildlife Science for students majoring in other disciplines. The minor consists of a minimum of 18 credit hours.

Prefix	Title	Credits
Required Courses		
FWCE 1110G	Introduction to Natural Resources Management	4
FWCE 2110	Principles of Fish and Wildlife Management	3
FWCE 301	Wildlife Ecology	3
FWCE 330	Natural History of the Vertebrates	4
FWCE 402	Seminar in Natural Resource Management	1
FWCE 464	Management of Aquatic and Terrestrial Ecosystems	3
Total Credits		18

Plant and Environmental Sciences Undergraduate Program Information

The undergraduate program in Plant and Environmental Science prepares you for a variety of careers in agriculture and related fields. Accordingly, a flexible curriculum has been designed that will allow specific programs to be developed in consultation with your academic advisor. Programs may also be developed if you wish to prepare for advanced studies in graduate school. In addition to the courses listed for each major, 35 credits must be taken in the College of Agricultural, Consumer and Environmental Sciences, and the university general education requirements must be met.

The minors require a minimum of 18 credits of which at least 9 hours must be at the 300 or higher level. Specific coursework requirements apply. See advisor for course requirements and scheduling.

Graduate Program Information

More than ever, we are linked in an interconnected world: both in agriculture and sustainability of environmental systems. The department has programs in

- plant sciences,
- environmental science,
- soil science,
- water management,
- natural resources management and
- turf management.

Students trained in these areas are in demand for U.S. and international positions. This demand is at all levels of training—BS, MS, and Ph.D. Therefore, the course work and original research in Plant and Environmental Sciences leading to the Master of Science and Doctor of Philosophy are designed for and have proven to be successful in preparing students for commercial companies, educational institutions, governmental agencies and private production enterprises.

The student may emphasize study in several discipline areas described in the following pages.

- The agronomy section emphasizes sustainable crop production, plant-pest/disease/weed interactions, soil-water-plant relations, crop

physiology, and breeding and genetics of cotton, alfalfa, maize and peanuts.

- The genetics section places special emphasis on genetic basis of agronomic or horticultural traits, applied bioinformatics, gene regulation and genomics.
- The environmental and soil science sections emphasize environmental quality and ecosystem services, bioremediation, recycling of organic wastes and wastewater, water use efficiency, soil-plant relations, soil-geomorphology and desert ecology, and the fertility, chemistry, physics, and microbiology of soils, including forest soils.
- The horticulture section emphasizes the creative use of plants by humans, and studies on the technical advancements in the husbandry of most economic commodity groups of fruits, vegetables, or ornamentals as well as managed turf. Emphasis may be in breeding and genetics of chile or onions, plant growth and development, nutrition, dormancy and cold hardiness, plant stress (water and/or salinity) response, fruit and vegetable physiology, forestry, and turfgrass.

Most students will be expected to complete a thesis. The research detailed in a thesis should be of a scope and quality to merit publication in a refereed journal. Depending on prior training and experience, a non-thesis option is available subject to approval by a departmental committee. The non-thesis option requires completion of a research project and paper of limited scope. In both the thesis and non-thesis options, suitability of the research project and resulting thesis or paper will be judged by the student's graduate committee. A minor is recommended and may be taken in chemistry, biology, molecular biology, environmental management, applied statistics, toxicology or other areas.

Prerequisite to major graduate work is completion of a curriculum essentially equivalent to that required by the department for the BS degree at New Mexico State University.

Degrees for the Department

Bachelor Degree(s)

- Agronomy - Bachelor of Science in Agriculture (p. 398)
- Environmental Science - Bachelor of Science in Environmental Science (p. 399)
- Genetics and Biotechnology - Bachelor of Science in Genetics (p. 401)
- Horticulture (Turfgrass Science and Management) - Bachelor of Science in Agriculture (p. 406)
- Horticulture - Bachelor of Science in Agriculture (p. 404)
- Soil Science (Environment and Resource Management) - Bachelor of Science in Agriculture (p. 409)
- Soil Science (Soil and Water Science) - Bachelor of Science in Agriculture (p. 411)
- Soil Science (Soils) - Bachelor of Science in Agriculture (p. 413)

Master Degree(s)

- Horticulture - Master of Science (p. 154)
- Plant and Environmental Science - Master of Science (p. 161)

Doctoral Degree(s)

- Plant and Environmental Science - Doctor of Philosophy (p. 204)

Certificate(s)

- Sustainability - Graduate Certificate (p. 218)

Minors for the Department

- Agronomy - Undergraduate Minor (p. 415)
- Environmental Science - Undergraduate Minor (p. 415)
- Genetics and Biotechnology - Undergraduate Minor (p. 415)
- Horticulture - Undergraduate Minor (p. 416)
- Soil Science - Undergraduate Minor (p. 416)

Anowar Islam, Department Head

Professors Angadi, Burney, Carroll, Cramer, Hanan, Heerema, Idowu, Islam, Leinauer, Lombard, Marsalis, Picchioni, Pratt, Shukla, Ulery, Walker, Yao, Zhang; **Associate Professors** Brungard, Darapuneni, Djaman, Flynn, Ghimire, Goss, Grover, Guzman, Holguin, Salmasi; **Assistant Professors** Li, Lozada, Thompson; **College Professors** Lauriault, Puppala, Stringam; **College Associate Professor** DuBois, Steele; **College Assistant Professors** Gioannini; **Research Assistant Professors** Anchang, Edwards, Kahiu, Rodriguez-Uribe; **Emeriti** Bosland, Guldán, Mexal, Monger, O'Connell, O'Neill, Ray, Sengupta-Gopalan, St. Hillaire; **Affiliate faculty** Kahn, Pietrasiak, Rucker, Schooley, Webb

A. Islam, Department Head, Ph.D. (University of Sydney, Australia)—forage agroecology; J. Anchang, Ph.D. (University of South Florida)—remote sensing and dryland ecology; S. Angadi, Ph.D. (University of Manitoba, Canada)—crop physiology; C. Brungard, Ph.D. (Utah State University, Logan)—pedology; O. Burney, Ph.D. (Purdue University, West Lafayette)—silviculture and forest biology; K.C. Carroll, Ph.D. (University of Arizona)—hydrology and water resources; C. S. Cramer, Ph.D. (North Carolina State University)—onion breeding and horticulture; M. Darapuneni, Ph.D. (Texas A&M, College Station)—Agronomy and semi-arid crop rotations; K. Djaman, Ph.D. (University of Nebraska-Lincoln)—soil & water resources and irrigation engineering; D. DuBois, Ph.D. (University of Nevada)—atmospheric science; B. Edwards, Ph.D. (Louisiana State University)—geomorphology, aeolian processes; R. Flynn, Ph.D. (Auburn University)—soil and water quality; R. Ghimire, Ph.D. (University of Wyoming, Laramie)—soil & crop management; R. Gioannini, M.S. (New Mexico State University)—ornamental horticulture, landscape design; R.M. Goss, Ph.D. (University of Nebraska, Lincoln)—turf science; K. Grover, Ph.D. (Pennsylvania State University)—agronomy; I. Guzman, Ph.D. (New Mexico State University)—horticulture; N.P. Hanan, Assistant Department Head, Ph.D. (Queen Mary College, UK)—dryland ecology; R.J. Heerema, Ph.D. (University of California, Davis)—pecans; F.O. Holguin, Ph.D. (New Mexico State University)—biochemical analysis; J. Idowu, Ph.D. (Cranfield University, United Kingdom)—agronomy and land management; M.N. Kahiu, Ph.D. (South Dakota State University)—savannah ecology and remote sensing; M. Kahn, Ph.D. (CA Institute of Technology)—molecular biology; B. Leinauer, Ph.D. (Hohenheim University, Germany)—turfgrass; X. Li, Ph.D. (Oklahoma State University)—soil microbiology, fertility, and soil health; K. Lombard, Ph.D. (New Mexico State University)—horticulture; D. Lozada Ph.D. (University of Arkansas, Fayetteville)—cell and molecular biology; M. Marsalis, Ph.D. (Texas Tech University)—forages; G.A. Picchioni, Ph.D. (Texas A&M University)—plant-mineral relations; N. Pietrasiak, Ph.D. (University of California, Riverside)—soil and water sciences; R. Pratt, Ph.D. (Purdue University)—plant breeding and genetics; N. Puppala, Ph.D. (New Mexico State University)—plant breeding and genetics; L. Rodriguez-Uribe, Ph.D. (New Mexico State University)—molecular genetics; D. Rucker, Ph.D. (University of Arizona)—hydrogeophysics; S.Z. Salmasi, Ph.D. (University of Tabriz, Iran)—sustainable crop management; R. Schooley, Ph.D. (Colorado State University)—wildlife ecology and management; M.K. Shukla, Ph.D. (University of Agricultural Sciences Vienna, Austria)—environmental soil physics; B. Stringam, Ph.D. (Utah State University)—

biological and agricultural engineering; C. Steele, Ph.D. (King's College, University of London, United Kingdom)—range soils; M. Thompson, Ph.D. (New Mexico State University)—horticulture; A.L. Ulery, Ph.D. (University of California, Riverside)—environmental soil chemistry; S. J. Walker, Ph.D. (New Mexico State University)—horticulture; N. Webb Ph.D. (University of Queensland, Australia)—aeolian process, land degradation processes and rangeland management; S. Yao, Ph.D. (Cornell University)—pomology/ horticulture; J. Zhang, Ph.D. (University of Arkansas, Fayetteville)—cotton breeding, genetics, and genomics

Emeriti

P.W. Bosland, Ph.D. (University of Wisconsin, Madison)—chile breeding and genetics; S.J. Guldán, Ph.D. (University of Minnesota)—sustainable agriculture; J.G. Mexal, Ph.D. (Colorado State University)—plant physiology; C.H. Monger, Ph.D. (New Mexico State University)—soil genesis and classification; M.A. O'Connell, Ph.D. (Cornell University)—plant biochemistry and molecular genetics; M. O'Neill, Ph.D. (University of Arizona, Tucson)—agronomy and crop physiology; I.M. Ray, Ph.D. (University of Wisconsin-Madison)—alfalfa breeding and genetics; C. Sengupta-Gopalan, Ph.D. (Ohio State University)—biochemical genetics; R. St. Hilaire, Ph.D. (Iowa State University)—plant stress physiology and landscape horticulture.

Agronomy Courses

AGRO 1110G. Introduction to Plant Science (Lecture & Lab)

4 Credits (3+2P)

This is an introductory course for understanding plant science. Basic biological, chemical, and physical principles of various plants are covered. The focus of this course is on plants/crops used in agriculture production of food and fiber as well as pasture and range plants. Plant taxonomy and soil properties will also be discussed. Same as HORT 1115G.

Learning Outcomes

1. Describe the basic structure of plants including growth and function.
2. Define photosynthesis, respiration, and translocation
3. Utilize plant taxonomy techniques to identify various plants.
4. Classify soils based on their chemical and physical properties.
5. Explain how different soil properties affect plant growth and sustainability.

AGRO 2160. Plant Propagation

3 Credits (2+2P)

Practical methods of propagating horticultural plants by seed, cuttings, layering, grafting, division and tissue culture. Examination of relevant physiological processes involved with successful plant propagation techniques. Crosslisted with HORT 2160.

Learning Outcomes

1. Practical methods of propagating plants by seed, cuttings, layering, grafting, division, and tissue culture through experiential, "hands-on" laboratories.
2. Relevant physiological principles involved in propagating horticultural plants through lecture discussions and readings.

AGRO 2996. Special Topics

1-4 Credits (1-4)

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

Learning Outcomes

1. Varies

AGRO 300. Special Topics

1-4 Credits (1-4)

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

AGRO 303V. Genetics and Society

3 Credits (3)

Relates the science of genetics with social ramifications. Ways in which genetics and evolution interact with social, political, and economic issues. Includes genetic engineering, gene therapy, DNA finger-printing, ancient DNA, plant and animal improvement, and future prospects. Students required to formulate value judgments on contemporary biological issues that will impact society. Crosslisted with: GENE 303V.

AGRO 305. Principles of Genetics

3 Credits (3)

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. May be repeated up to 3 credits.

Prerequisite: (BIOL 2610G and BIOL 2110G, or BIOL 2110G and BCHE 140, and either CHEM 1215G or CHEM 1216).

Learning Outcomes

1. To provide an introduction to the basic concepts, methods, and terminology of genetics. Introduction to genomics and bioinformatics.
2. To develop a working understanding of genetics and heredity
3. To understand in some depth, the mechanism of DNA replication, transcription and protein synthesis. To understand the regulation of gene expression.
4. To examine the impact of genetics on both basic and applied aspects of the biological sciences, as well as its effects on our everyday lives.

AGRO 311. Introduction to Weed Science

4 Credits (4)

Principles of weed science with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Identification of local weeds. Same EPWS 311.

Prerequisite: CHEM 1215G and BIOL 2110G.

AGRO 365. Principles of Crop Production

4 Credits (3+3P)

Basic principles of crop production including environmental and physiological factors limiting production, plant nutrition and soil science, soil-water management, cropping systems and management, pest management, and economic factors influencing crop production. Crosslisted with: HORT 365

Prerequisite(s): AGRO 1110G/HORT 1115G, CHEM 1215G or equivalent and MATH 1215 or equivalent.

AGRO 377. Introduction to Turfgrass Management

4 Credits (3+3P)

Establishment and maintenance of turfgrass with emphasis on seeding methods, soil and water management, mowing, disease, insects and turfgrass varieties. Consent of instructor required. Crosslisted with: HORT 377

AGRO 391. Internship

1-6 Credits

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/ U, Audit).

Prerequisite(s): Consent of instructor.

AGRO 447. Seminar

1 Credit (1)

Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: HORT 447, ENVS 447 and SOIL 447.

AGRO 449. Special Problems

1-3 Credits (1-3)

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

AGRO 450. Special Topics

1-4 Credits (1-4)

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

AGRO 462. Plant Breeding

3 Credits (3)

Principles and practices involved with the genetic improvement of plants. May be repeated up to 3 credits.

Prerequisite(s): ANSC/AGRO/BIOL/HORT/GENE 305 or GENE 315 and GENE 320.

AGRO 471. Plant Mineral Nutrition

3 Credits (3)

Basic and applied aspects of plant requirements for soil-derived minerals and the processes whereby minerals are acquired, absorbed, translocated, and utilized throughout the plant. Same as HORT 471 and EPWS 471. May be repeated up to 3 credits.

Prerequisite/Corequisite: EPWS 314/BIOL 314, or concurrent enrollment, or consent of instructor.

AGRO 483. Advanced Sustainable Crop Production

4 Credits (3+3P)

Characteristics and objectives of sustainable agricultural systems with application to the production, utilization, and improvement of agronomic and vegetable crops.

Prerequisite: AGRO 365 or HORT 365.

Learning Outcomes

1. Identify and analyze issues in agriculture and their possible causes.
2. Identify principles of sustainable agriculture and contrast with conventional agriculture.
3. Evaluate application of principles of sustainable agriculture.
4. Define clearly what sustainable agriculture is and its importance for conserving natural resources.
5. Evaluate role of different crop management practices such as GMO's or organic agriculture and make unbiased inferences based on scientific evidence.
6. Gain experience in sustainable crop production through experiential learning.
7. Observe, analyze, and critique real-world examples of sustainable agriculture and conventional agriculture models.
8. Collaborate with peers and engage in team-based learning.
9. Present and write well on topics in sustainable crops.
10. Learn about advances in agricultural technology and its role in sustainable crop production.

AGRO 492. Diagnosing Plant Disorders

3 Credits (2+3P)

Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as EPWS 492 and HORT 492.

Prerequisites: EPWS 303 and EPWS 310.

AGRO 500. Special Topics

1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

AGRO 505. Research Orientation

4 Credits (3+2P)

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: HORT 505, SOIL 505 and ENVS 505.

AGRO 511. Introduction to Weed Science (f)

4 Credits (4)

Covers the principles of weed science with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Includes identification of local weeds. Research paper required for graduate credit. Same as EPWS 511.

Prerequisites: CHEM 1215G or BIOL 2110G, or consent of instructor.

AGRO 516. Molecular Analysis of Complex Traits

3 Credits (3)

Provide a comprehensive overview of molecular genetic analysis of complex phenotypes, including case histories/experiments in plants, animals and humans. Emphasize technological developments in DNA marker technologies and their application to molecular quantitative genetics. Explore the efficient application of these technologies in the future to complex genetic systems, breeding, and other areas of life sciences. Same as HORT 516.

Prerequisite: AGRO 305 or consent of instructor.

AGRO 525. Scientific Writing- How to be a Productive and Effective Writer

1-3 Credits (1-3)

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: HORT 525, EPWS 525, SOIL 525, AGRO 625, HORT 625 and SOIL 625.

AGRO 590. Graduate Seminar

1 Credit (1)

Current research discussions presented by masters level graduate students. Not more than one credit toward the degree. Same as HORT/SOIL 590. Crosslisted with: HORT 590 and SOIL 590.

AGRO 595. Internship

1-6 Credits

Supervised professional on-the-job learning experience. Limited to Master of Agriculture candidates. Not more than 6 credits toward the degree.

AGRO 596. Masters Proposal

1 Credit (1)

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: ENVS 596, GENE 596, HORT 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.

Prerequisite(s): Master level graduate students.

AGRO 597. University Teaching Experience

1-3 Credits (1-3)

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination.

The professor in charge of the course will attend and evaluate the student's lectures.

AGRO 598. Special Research Programs

1-6 Credits

Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits towards degree. Same as SOIL 598.

AGRO 599. Master's Thesis

15 Credits

Thesis.

Environmental Science Courses

ENVS 1110G. Environmental Science I

4 Credits (3+2P)

Introduction to environmental science as related to the protection, remediation, and sustainability of land, air, water, and food resources. Emphasis on the use of the scientific method and critical thinking skills in understanding environmental issues.

Learning Outcomes

1. Students will learn to critically analyze cause-and-effect relationships in the environment
2. Students will integrate and synthesize knowledge and draw appropriate conclusions based on the scientific method

ENVS 2111. Environmental Engineering and Science

3 Credits (3)

Principles in environmental engineering and science: physical chemical systems and biological processes as applied to pollution control.

Crosslisted with: C E 256

Prerequisite: CHEM 1215G and MATH 1511G or ENGR 190.

Learning Outcomes

1. To understand the nature of water quality parameters in the context of Civil Engineering and Environmental Science (Water Treatment/Wastewater Treatment/Environmental Science)
2. To learn to apply engineering and scientific solutions to water quality problems
3. To understand environmental regulations and their consequences on the design of pollution control systems

ENVS 2111L. Environmental Science Laboratory

1 Credit (1)

Laboratory experiments associated with the material presented in ENVS 2111. Same as C E 256 L.

Corequisite(s): ENVS 2111.

Learning Outcomes

1. List typical analyses commonly performed to evaluate physical, chemical, and microbiological parameters used to describe water quality.
2. Follow experimental procedures listed in the class laboratory manual, or other publications such as Standards Methods, to perform common water quality analyses.
3. Evaluate, analyze, and discuss experimental results and present the conclusions in the form of a professional report

ENVS 300. Special Topics

1-4 Credits

Special subjects and credits to be announced in the Schedule of Classes. Consent of instructor required. Maximum of 4 credits per semester. Restricted to majors.

ENVS 301. Principles of Ecology

3 Credits (3)

A survey of ecology including general theory, the adaptations of organisms, population dynamics, species interactions, and the structure and function of natural communities and ecosystems. Crosslisted with: BIOL 301

Prerequisite(s): BIOL 2610G, A ST 311, and grade of C or better in MATH 1511G or Math Placement Exam score adequate to enroll in mathematics courses beyond MATH 1511G.

ENVS 312. Emergency Response to Hazardous Material Incidents

2 Credits (2)

EPA approved Environmental Response Training Program Course 165.15. In compliance with OSHA 29 CFR 1910.120. Normally taken during last year of study. Same as E T 312 and WERC 312.

Prerequisite: consent of instructor.

ENVS 361. Basic Toxicology

3 Credits (3)

Introduction to the principles of toxicology, discussion of toxic agents, environmental problems, testing procedures, and regulations. Prior course work in biology and chemistry recommended. Crosslisted with: TOX 361. May be repeated up to 3 credits.

Prerequisite: CHEM 1120G or CHEM 1225G and BIOL 2610G or BIOL 2110G.

Learning Outcomes

1. Learn how toxins are absorbed, distributed, metabolized, and excreted from living systems.
2. Demonstrate how metabolism can appreciably alter the toxicity of compounds as well as dictate the resultant toxicity with an emphasis on target organ(s).
3. Explain the specific mechanism(s) of actions of toxins targeting the liver, lung, kidney, and nervous systems.
4. Delineate how certain toxins induce cancer and/or promote the development of cancer.
5. Understand how and why certain plants and animals are poisonous and venomous, specifically linking discrete chemicals or complex mixtures to the resultant toxic manifestation.

ENVS 370. Environmental Soil Science

3 Credits (3)

Continuation of SOIL 2110 that emphasizes soil properties and processes that directly relate to environmental pollution problems. Same as SOIL 370.

Prerequisite: SOIL 2110.

ENVS 391. Internship

3 Credits (3)

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. Maximum of 3 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/ U, Audit).

ENVS 422. Environmental Chemistry

3 Credits (3)

Chemistry of organic and metal ion pollutants in the environment and principles important to their remediation including bioremediation.

Restricted to: Main campus only. Crosslisted with: CHEM 422

Prerequisite(s): CHEM 1225G and either CHEM 2120 or CHEM 313.

Learning Outcomes

1. Describe and explain the solid, liquid, and gas phases of the environment and how they interact.

- Understand the chemical reactions and processes that occur between various phases of the environment.
- Learn how the chemical processes can be managed to promote environmental remediation, including the techniques and calculations used.

ENVS 447. Seminar**1 Credit (1)**

Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, HORT 447 and SOIL 447.

ENVS 449. Special Problems**1-3 Credits**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and 6 credits toward a degree. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: E S majors.

ENVS 451. Special Topics**1-4 Credits (1-4)**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

ENVS 452. Geohydrology**4 Credits (3+2P)**

Origin, occurrence, and movement of fluids in porous media and assessment of aquifer characteristics. Development and conservation of ground water resources, design of well fields. Crosslisted with: C E 452 and GEOL 452.

ENVS 457. Water Measurement**3 Credits (3)**

The fundamentals of measuring water will be covered. Participants will learn about measurement techniques that are used to estimate evapotranspiration as well as commonly used water measurement structures to estimate water use. The benefits and problems that are associated with using each measurement will be discussed. Students will also learn about the principles of how to use water measurement as a management tool.

Prerequisite(s): MATH 1215 or higher, or consent of Instructor.

ENVS 460. Introduction to Air Pollution**3 Credits (3)**

An introduction to the physics and chemistry of tropospheric air pollution including sources of air pollution, local and long-range transport, instrumentation, regulatory requirements, control technology.

Prerequisite(s): PHYS 1310G, CHEM 1225G, MATH 1511G.

ENVS 462. Sampling and Analysis of Environmental Contaminants**3 Credits (1+6P)**

Theory, application, methodology, and instrumentation used in the sampling and analysis of environmental contaminants. Same as ENVE 462.

Prerequisites: ENVS 2111.

ENVS 470. Environmental Impacts of Land Use and Contaminant Remediation**3 Credits (3)**

The course will cover the integrated assessment of soil erosion, contaminant transport in soil and water, and contaminant remediation from site scale to watershed scales. Understanding of the controlling factors for each type land use impact will be gained through the use of risk assessment, case studies, and computer modeling. Case studies will illustrate the processes under various environmental applications.

This course will also cover the application of solute transport principles and methods for the remediation of contaminated soil and groundwater. It will also discuss the contaminated site characterization, monitoring, and remediation design. Discussions of innovative methodologies will be supported with case studies. May be repeated up to 3 credits. Crosslisted with: WSAM 470.

Prerequisite(s): ENVS 2111, ENVS 370, ENVS 452, ENVS 462.

ENVS 505. Research Orientation**4 Credits (4)**

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: AGRO 505, HORT 505 and SOIL 505.

ENVS 596. Masters Proposal**1 Credit (1)**

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, GENE 596, HORT 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.

Prerequisite(s): Master level graduate students.

ENVS 599. Master's Thesis**1-15 Credits**

Thesis Graded: Thesis/Disertation.

Genetics Courses

GENE 1110. Experimental Systems in Genetics**1 Credit (1)**

Survey of molecular, biochemical, organismal, and computer science based approaches to investigate how genes determine important traits. Historical development and topics of current interest will be discussed.

Learning Outcomes

- To give the students a historical perspective on the field of genetics.
- To familiarize the students to introductory concepts and vocabulary to the field of genetics.
- Introduce experimental systems within the field of genetics and to give perspective to current genetic research.
- As this course is designed for beginning students as an overview of faculty and research labs on campus. The students majoring in genetics are encouraged to meet with faculty and to explore opportunities available to them on campus

GENE 305. Principles of Genetics**3 Credits (3)**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. May be repeated up to 3 credits.

Prerequisite: (BIOL 2610G and BIOL 2110G, or BIOL 2110G and BCHE 140, and either CHEM 1215G or CHEM 1216).

Learning Outcomes

- To provide an introduction to the basic concepts, methods, and terminology of genetics. Introduction to genomics and bioinformatics.
- To develop a working understanding of genetics and heredity
- To understand in some depth, the mechanism of DNA replication, transcription and protein synthesis. To understand the regulation of gene expression.
- To examine the impact of genetics on both basic and applied aspects of the biological sciences, as well as its effects on our everyday lives.

GENE 305 L. Genetic Techniques**1 Credit (3P)**

Experimental procedures used in genetic research including: sexual transmission genetics, eukaryotic DNA isolation, DNA marker development and genotyping, polymerase chain reaction, and cytogenetics.

Prerequisite(s)/Corequisite(s): GENE 315, or AGRO/ANSC/BIOL/HORT 305.

GENE 315. Molecular Genetics

3 Credits (3)

Covers fundamental principles of DNA structure and replication, transcription, translation, gene regulation, recombinant DNA technology, and a survey of genomics and bioinformatics. Recommend CHEM 313.

Prerequisite(s): CHEM 1225G and BIOL 2110G.

GENE 320. Hereditary and Population Genetics

3 Credits (3)

Covers fundamental principles of reproduction, variation, and heredity in plants and animals including: Mendelian inheritance, mitosis, meiosis, genetic linkage, random mating, genetic drift, natural selection, inbreeding, migration, mutation, interrelationships between individuals, populations and communities and the environment.

Prerequisite(s): CHEM 1215G & BIOL 2110G.

GENE 391. Genetics Internship

1-6 Credits (1-6)

Professional work experience in genetics under the joint supervision of an employer and a faculty member. Documentation of proposed internship activities must be submitted prior to the start of the internship. A written report is required after the internship is completed. No more than 6 credits toward a degree. May be repeated up to 6 credits. Graded: S/U Grading (S/U, Audit).

GENE 440. Genetics Seminar

1 Credit (1)

Organization, preparation, and presentation of genetic studies in model microorganism, plant, or animal systems that have been used to solve problems in molecular, cellular, and developmental biology. Consent of instructor required.

Prerequisite(s): Seniors only; GENE 315 & GENE 320.

GENE 449. Special Problems

1-3 Credits (1-3)

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 3 credits toward a degree. Consent of instructor required.

GENE 450. Special Topics

1-3 Credits (1-3)

Specific subjects to be announced in the schedule of classes. Maximum of 3 credits per semester and a total of 3 credits toward a degree. Consent of instructor required.

GENE 452. Applied Bioinformatics

3 Credits (3)

Survey and application of publicly available bioinformatic tools that treat genomic DNA, cDNA, and protein sequences, RNA abundance, as well as tools that allow inference based on phylogenetic relationships.

Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315 and GENE 320, and BCHE 341, or BCHE 395.

GENE 486. Genes and Genomes

3 Credits (3)

Extensive coverage of nuclear and organelle genome structure in plants and animals, genome restructuring including duplication, aneuploidy, chromosome translocations and inversions, comparative genomics, and molecular systematics.

Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315, and GENE 320.

Horticulture Courses

HORT 1115G. Introductory Plant Science

4 Credits (3+2P)

Introduction to the physical, biological, and chemical principles underlying plant growth and development in managed ecosystems. In the laboratory portion of the class, students perform experiments demonstrating the principles covered in lecture. The course uses economic plants and agriculturally relevant ecosystems to demonstrate basic principles. Appropriate for nonscience majors. Same as AGRO 1110G.

Learning Outcomes

1. Describe the role plants play in everyday lives
2. Introduce career opportunities in plant and soil sciences, and related fields
3. Define plants through the concepts of plant structure and anatomy
4. Introduce the wide variety of plants cultivated throughout the world
5. Describe how plants work (growth, reproduction, physiology, and soil)
6. Describe how plants are manipulated to feed, clothe and entertain the world

HORT 2110. Ornamental Plants I

4 Credits (2+3P)

Covers identification, botanical characteristics, culture, and landscape uses of woody plants. Emphasis on deciduous trees, native shrubs, and evergreens.

Learning Outcomes

1. Given 35 ornamental plants selected from the course's plant list, 100% of students will be expected to correctly identify the genus, species, and common names of the plants with 70% accuracy.
2. Given plants selected from the course's plant list, 100% students will be expected to identify to landscape use of those plants with 85% accuracy.

HORT 2120. Ornamental Plants II

4 Credits (2+3P)

Identification, botanical characteristics, culture, and landscape uses of woody plants. Emphasis on flowering trees, cacti, and members of the pea and rose families.

Learning Outcomes

1. Given 35 ornamental plants selected from the course's plant list, 100% of students will be expected to correctly identify the genus, species, and common names of the plants with 70% accuracy.
2. Given plants selected from the course's plant list, 100% students will be expected to identify to landscape use of those plants with 85% accuracy.

HORT 2130. Floral Quality Evaluation and Design

2 Credits (1+2P)

Critical hands-on evaluation of the quality of cut and potted floral and tropical foliage crops, their specific merits and faults, and fundamentals of floral design.

Learning Outcomes

1. Identify common floriculture crops, or know resourcing to help identify the crop.
2. Evaluate quality (merit and fault) of common floriculture crops, based on industry standards and merit. Pi Alpha Xi and American Floral Endowment standards will be used for the purpose of this class.

3. Have a basic understanding of the floriculture industry, and identify career pathways within the industry.
4. Know, understand, creatively interpret, and execute basic principles of design in regards to floral design.
5. Use interpersonal communication, problem solving, basic math, and marketing during cash and carry "lab" time (flower sales) in developing job ready skills in floristry.
6. Layer principles of design, marketing, sales, and time management to create floral art in real-world scenarios.

HORT 2160. Plant Propagation**3 Credits (2+2P)**

Practical methods of propagating horticultural plants by seed, cuttings, layering, grafting, division and tissue culture. Examination of relevant physiological processes involved with successful plant propagation techniques. Same as AGRO 2160.

Learning Outcomes

1. Practical methods of propagating plants by seed, cuttings, layering, grafting, division, and tissue culture through experiential, "hands-on" laboratories.
2. Relevant physiological principles involved in propagating horticultural plants through lecture discussions and readings.

HORT 2990. Floriculture Field Practicum**1 Credit (1)**

Participation as team member in the National Intercollegiate Floral Quality Evaluation and Design Competition. Intensive week-long travel for competition, networking with industry, academia, and floriculture tours. May be repeated for a maximum of 3 credits.

Prerequisite(s): HORT 2130 or consent of instructor.

Learning Outcomes

1. Varies

HORT 2996. Special Topics**1-4 Credits**

Specific subjects and credits as announced. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

Learning Outcomes

1. Varies

HORT 300. Special Topics**1-4 Credits**

Specific subjects as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

HORT 302V. Forestry and Society**3 Credits (3)**

Global study of the development and use of forest resources for production of wood, fuel, fiber, and food products. Climatic, edaphic, cultural, and economic influences on forests of the world evaluated. Same as RGSC 302V.

HORT 304. Hydroponics**4 Credits (4)**

This course will introduce students to the basics of the different soil-less growing systems: hydroponics, aeroponics and aquaponics. Topics will include growing systems and environments, crop management, business aspects of hydroponic growing, integrated pest management, commercial and restaurant systems, and plant nutrition. Labs will reinforce lecture

topics and give students practical experience growing different types of crops in different types of systems.

Prerequisite: AGRO 1110G or HORT 1115G.

Learning Outcomes

1. Discuss the benefits and constraints of different hydroponic systems.
2. Evaluate different crops for each type of system.
3. Identify the components and calculate costs of different systems.
4. Demonstrate how to build and maintain each type of system.
5. Discuss how soilless growing relates to sustainability and local food production.

HORT 305. Principles of Genetics**3 Credits (3)**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. May be repeated up to 3 credits.

Prerequisite: (BIOL 2610G and BIOL 2110G, or BIOL 2110G and BCHE 140, and either CHEM 1215G or CHEM 1216).

Learning Outcomes

1. To provide an introduction to the basic concepts, methods, and terminology of genetics. Introduction to genomics and bioinformatics.
2. To develop a working understanding of genetics and heredity
3. To understand in some depth, the mechanism of DNA replication, transcription and protein synthesis. To understand the regulation of gene expression.
4. To examine the impact of genetics on both basic and applied aspects of the biological sciences, as well as its effects on our everyday lives.

HORT 307. Landscape Design**4 Credits (3+3P)**

Design elements, the design process, and contemporary planting design used in the design of residential and small commercial landscapes. Basic drafting, drawing, and landscape plan presentation techniques.

Prerequisite: HORT 2110 or HORT 2120 or consent of instructor.

Learning Outcomes

1. Access a residential site for landscape design.
2. Create a landscape plan that addresses and solves a client's needs and wishes.
3. Incorporate ideas into the landscape plan that reflects the region.
4. Incorporate sustainable ideas into a landscape plan.
5. Analyze a landscape plan for aesthetics and functionality.
6. Verbally and visually present a landscape plan in a professional manner.

HORT 310. Medicinal Herbs**3 Credits (3)**

Introduction to ethnobotany, including plant cultivation, extraction methods, and analysis of active chemistries.

HORT 318V. Urban Water Issues and Society**3 Credits (3)**

Global study of water science, development, law, and use for agriculture, manufacturing, landscaping, home use, and other urban uses. This course allows students to become familiar with important issues concerning the interaction between water use and humans. Topics include the water cycle, water chemistry, human-water relations, plant-water relations, water users, water-dependent population placement and growth, water regulation, and the future of water.

Learning Outcomes

1. Define and describe Earth's water sources and the water cycle.
2. Describe the chemical processes associated with water and analyze the composition of several water sources.
3. Summarize the interactions of water with the human body.
4. Explain the use of water in agricultural and other plants on both a regional scale and cellular level.
5. Identify, explain, and compare all water users and categorize their demand and availability for water.
6. Analyze the interconnection of the human societies and water while discussing locations of civilizations and communities.
7. Analyze, from a historical perspective, the interrelationships of all water users and all water decision makers. Describe the history of US and world water regulation and analyze its success rate.
8. Predict and recommend how water will be used and distributed in the future.

HORT 365. Principles of Crop Production**4 Credits (3+3P)**

Basic principles of crop production including environmental and physiological factors limiting production, plant nutrition and soil science, soil-water management, cropping systems and management, pest management, and economic factors influencing crop production. Crosslisted with: AGRO 365

Prerequisite(s): AGRO 1110G/HORT 1115G, CHEM 1215G or equivalent and MATH 1215 or equivalent.

HORT 377. Introduction to Turfgrass Management**4 Credits (3+3P)**

Establishment and maintenance of turfgrass with emphasis on seeding methods, soil and water management, mowing, disease insects and turfgrass varieties. Crosslisted with: AGRO 377

HORT 378. Turfgrass Science**4 Credits (3+3P)**

Introduction to the scientific fundamentals for turfgrass management cultural practices, pest management, rootzone construction and ecology.

Prerequisite(s): HORT 377 or consent of instructor.

HORT 391. Internship**1-6 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of instructor required. Graded: S/U. Crosslisted with: AGRO 391 and SOIL 391

HORT 447. Seminar**1 Credit (1)**

Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, ENVS 447 and SOIL 447.

HORT 449. Special Problems**1-3 Credits**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

HORT 450. Special Topics**1-4 Credits**

Specific subjects as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

HORT 462. Plant Breeding**3 Credits (3)**

Principles and practices involved with the genetic improvement of plants. May be repeated up to 3 credits.

Prerequisite(s): ANSC/AGRO/BIOL/HORT/GENE 305 or GENE 315 and GENE 320.

HORT 471. Plant Mineral Nutrition**3 Credits (3)**

Basic and applied aspects of plant requirements for soil-derived minerals and the processes whereby minerals are acquired, absorbed, translocated, and utilized throughout the plant. Same as AGRO/EPWS 471. May be repeated up to 3 credits.

Prerequisite/Corequisite: EPWS/BIOL 314, or concurrent enrollment, or consent of instructor.

HORT 479. Advanced Turfgrass Science**3 Credits (3)**

Extensive reviews of turfgrass sciences including ecology, physiology, entomology, pathology, weed science, and soil science.

Prerequisite: HORT 378 or consent of instructor.

HORT 483. Advanced Sustainable Crop Production**4 Credits (3+3P)**

Characteristics and objectives of sustainable agricultural systems with application to the production, utilization, and improvement of agronomic and vegetable crops.

Prerequisite: AGRO 365 or HORT 365.

Learning Outcomes

1. Identify and analyze issues in agriculture and their possible causes.
2. Identify principles of sustainable agriculture and contrast with conventional agriculture.
3. Evaluate application of principles of sustainable agriculture.
4. Define clearly what sustainable agriculture is and its importance for conserving natural resources.
5. Evaluate role of different crop management practices such as GMO's or organic agriculture and make unbiased inferences based on scientific evidence.
6. Gain experience in sustainable crop production through experiential learning.
7. Observe, analyze, and critique real-world examples of sustainable agriculture and conventional agriculture models.
8. Collaborate with peers and engage in team-based learning.
9. Present and write well on topics in sustainable crops. 1
10. Learn about advances in agricultural technology and its role in sustainable crop production.

HORT 488. Greenhouse Management**4 Credits (3+3P)**

Principles and practices involved in greenhouse structures and construction, site considerations, heating and cooling systems, greenhouse crop production techniques, sustainability practices. May be repeated up to 4 credits.

Prerequisite(s): HORT/AGRO 365 or consent of instructor.

HORT 492. Diagnosing Plant Disorders**3 Credits (2+3P)**

Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as EPWS 492 and AGRO 492.

Prerequisites: EPWS 303 and EPWS 310.

HORT 500. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

HORT 505. Research Orientation**4 Credits (3+2P)**

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: AGRO 505, SOIL 505 and ENVS 505.

HORT 525. Scientific Writing How to be a Productive and Effective Writer**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: AGRO 525, AGRO 625, EPWS 525, SOIL 625 and SOIL 525.

HORT 590. Graduate Seminar**1 Credit (1)**

Current research discussions presented by masters level graduate students. Not more than one credit toward the degree. Same as AGRO/SOIL 590. Crosslisted with: AGRO 590 and SOIL 590.

HORT 595. Internship**1-6 Credits**

Supervised professional on-the-job learning experience. Limited to Master of Horticulture or Plant & Environmental Science candidates. Not more than 6 credits toward the degree.

HORT 596. Maters Proposal**1 Credit (1)**

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, ENVS 596, GENE 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.

Prerequisite(s): Master level graduate students.

HORT 598. Special Research Programs**1-6 Credits**

Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

Prerequisite: consent of instructor.

HORT 599. Master's Thesis**15 Credits**

Thesis.

Soil Courses

SOIL 2110. Introduction to Soil Science**3 Credits (3)**

An overview of fundamental concepts in soil science and soils as a natural resource. Students will be introduced to the physical, chemical, and biological properties as it relates to soil management in environmental science, conservation, and agronomy. May be repeated up to 3 credits.

Prerequisite: (CHEM 1120G and MATH 1215 or higher) or CHEM 1215G.

Learning Outcomes

1. Understand and use the technical terminology associated with the use and management of soils.
2. Understand the classification of soils and the processes leading to their formation.
3. Identify key physical, chemical, and biological properties of soils.

4. Explain the impact of land use and management decisions as it relates to soil degradation and environmental problems.

SOIL 2110L. Introduction to Soil Science Laboratory**1 Credit (1)**

Morphological, chemical, physical and biological properties of soil in the laboratory and field.

Corequisite(s): SOIL 2110.

Learning Outcomes

1. Learn techniques for sampling and characterizing soils in the region.
2. Understand how soils are formed and the processes that occur within the soil profile.
3. Gain fundamental knowledge on soil physical, chemical, and biological properties and how each can influence the overall function of a particular soil.
4. Develop critical thinking and analytical skills within laboratory and field settings.
5. Encourage collaboration, inclusiveness and critical thinking.

SOIL 2996. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

Learning Outcomes

1. Varies

SOIL 300. Special Topics**1-4 Credits**

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

SOIL 312. Soil Management and Fertility**3 Credits (3)**

Management, conservation, and fertility of soils; physical conditions affecting growth, nutrition, and plant production.

Prerequisite(s): SOIL 2110.

Corequisite(s): SOIL 312L.

SOIL 312 L. Soil Management and Fertility Lab**1 Credit (1)**

Hands-on experience. Includes field trips, videos, calculations, visiting lecturers and other lab activities as possible.

Prerequisite(s): SOIL 2110.

Corequisite(s): SOIL 312.

SOIL 370. Environmental Soil Science**3 Credits (3)**

Continuation of SOIL 2110 that emphasizes soil properties and processes that directly relate to environmental pollution problems. Same as ENVS 370.

Prerequisite: SOIL 2110.

SOIL 391. Internship**1-6 Credits (1-6)**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/U, Audit).

SOIL 424. Soil Chemistry**3 Credits (3)**

Basic elements of soil chemistry including clay mineralogy, cation and anion exchange and the chemistry of problem (acid, saline and flooded) soils. Credit not given for both SOIL 424 and SOIL 479.

Prerequisite(s): SOIL 2110L or CHEM 1215G and CHEM 1225G.

SOIL 447. Seminar

1 Credit (1)

Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, HORT 447 and ENVS 447.

SOIL 449. Special Problems

1-3 Credits

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

SOIL 450. Special Topics

1-4 Credits

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits towards a degree. May be repeated up to 9 credits. Consent of Instructor required.

SOIL 456. Irrigation and Drainage

3 Credits (3)

Principles and practices required for irrigation to exist as a permanent economy. Equipment and methods for measurement and control of water.

SOIL 472. Soil Morphology and Classification

4 Credits (2+2P)

Same as SOIL 472. Crosslisted with: SOIL 472.

SOIL 476. Soil Microbiology

3 Credits (3)

Nature and physiology of soil microorganisms, how they affect plant growth and recycle nutrients. Land farming, bioremediation and other environmental problems as influenced by soil microorganisms. SOIL 2110 and BIOL 311 recommended. Same as BIOL 476.

SOIL 476 L. Soil Microbiology Laboratory

1 Credit (3P)

Enumeration of soil microorganisms, their activities, and transformations they mediate. May be repeated up to 1 credit.

Corequisite: SOIL 476.

Learning Outcomes

1. Collect, store, and characterize soil samples using appropriate and sterile techniques of soil microbiology.
2. Observe, describe, and recognize major groups of microbial organisms
3. Develop skills in basic microscopy, isolation and culturing of soil microbes
4. Acquire basic DNA-based molecular skills in soil microbiology.
5. Compare and evaluate soil samples from different microhabitats regarding their soil microbiota.
6. Apply the scientific method including the following steps: developing a research question, constructing a testable hypothesis, design a research study to test the hypothesis, perform the experiment and collect data, analyze the results, evaluate the results and support/reject the hypothesis, and report the results.

SOIL 477. Environmental Soil Physics

3 Credits (3)

A description of the physical characteristics of porous media including soil. Examination of processes describing the transport of water,

chemicals, heat and gases through porous media with application to environmental quality, waste management, and crop production.

SOIL 477 L. Environmental Soil Physics Laboratory

1 Credit (1)

Concurrent enrollment with SOIL 477 recommended. Hands on experience with techniques for characterizing soil physical properties such as particle size distribution, bulk density, water retention, hydraulic conductivity and solute transport. Demonstrations of field and laboratory techniques for measuring moisture content, soil water potential, gas/air flow and thermal conductivity.

Prerequisite(s): SOIL 2110.

SOIL 479. Environmental Soil Chemistry

3 Credits (3)

Basic elements of soil chemistry including discussion of clay mineralogy, cation and anion exchange and the chemistry of problem (acid, saline and flooded) soils. Credit not given for both SOIL 424 and SOIL 479.

Prerequisite(s): SOIL 2110L or CHEM 1215G and CHEM 1225G.

SOIL 500. Special Topics

1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

SOIL 505. Research Orientation

4 Credits (3+2P)

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: HORT 505, AGRO 505 and ENVS 505.

SOIL 525. Scientific Writing- How to be a Productive and Effective Writer

1-3 Credits (1-3)

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review Crosslisted with: AGRO 525, AGRO 625, HORT 525, HORT 625, SOIL 625 and EPWS 525.

SOIL 590. Graduate Seminar

1 Credit (1)

Current research discussions presented by master level graduate students. Not more than one credit toward the degree. Same as AGRO/HORT 590. Crosslisted with: AGRO 590 and HORT 590.

SOIL 596. Masters Proposal

1 Credit (1)

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, ENVS 596, GENE 596 and HORT 596. Students must be a Master level graduate student to enroll in this course. Restricted to: Masters HORT; Masters PLEN majors.

SOIL 597. University Teaching Experience

1-3 Credits (1-3)

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures.

SOIL 598. Special Research Programs

1-6 Credits

Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

SOIL 625. Scientific Writing- How to be a Productive and Effective Writer

1-3 Credits (1-3)

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive.

Agronomy - Bachelor of Science in Agriculture

Agronomy is an understanding of the principles of plant and soil science and an application of these principles in the production of crops. Commercial sector careers include positions in agricultural consulting companies, agricultural seed or chemical companies, research and development with commercial companies, as well as farm and/or ranch management. Careers in county, state or federal agencies are in the areas of USDA, Cooperative Extension Service, Natural Resources Conservation Service, Forest Service and Bureau of Land Management.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300/3000 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education		
<i>Area I: Communications</i>		10
<i>English Composition - Level 1</i> ¹		
<i>English Composition - Level 2</i>		
Choose from one of the following:		
ENGL 2210G	Professional and Technical Communication Honors	
ENGL 2210H	Professional and Technical Communication Honors	
ENGL 2215G	Advanced Technical and Professional Communication	
<i>Oral Communication</i> ¹		
<i>Area II: Mathematics</i>		
Choose from one of the following:		
MATH 1220G	College Algebra	3
MATH 1430G	Applications of Calculus I	
<i>Area III/IV: Laboratory Science and Social/Behavioral Sciences</i>		11
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	
CHEM 1225G	General Chemistry II Lecture and Laboratory for STEM Majors	
Area IV: Social & Behavioral Sciences Course (3 credits) ¹		
<i>Area V: Humanities</i> ¹		3
<i>Area VI: Creative and Fine Arts</i> ¹		3
<i>General Education Elective</i>		
AGRO 1110G	Introduction to Plant Science (Lecture & Lab)	4
or HORT 1115G	Introductory Plant Science	
Viewing A Wider World ²		6
Departmental/College Requirements		
AEEC 2140	Technology and Communication for Business Management	3

AGRO 305	Principles of Genetics (or GENE 320 AND EPWS 301)	3
AGRO 311	Introduction to Weed Science	4
AGRO 365	Principles of Crop Production	4
AGRO 447	Seminar	1

SPAN 1120	Spanish II	
SPAN 2110	Spanish III	
Non- Departmental Requirements (other than Gen.Ed/VWW)		
A ST 311	Statistical Applications	3
BIOL 2610G	Principles of Biology: Biodiversity, Ecology, and Evolution	3
BIOL 2110G	Principles of Biology: Cellular and Molecular Biology	3
BIOL 313	Structure and Function of Plants	3
CHEM 2120	Integrated Organic Chemistry and Biochemistry (CHEM 2120 must be taken with associated 1-cr CHEM lab)	3
or ANSC 1170	Introduction to Animal Metabolism	
Electives, to bring the total credits to 120 ³		6-8
Total Credits		120

¹ See the General Education (p. 227) Section of the catalog for a full list of courses

² See the Viewing a Wider World (p. 231) Section of the catalog for a full list of courses

³ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However

students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		Credits
Semester 1		
ENGL 1110G	Composition I ¹	4
MATH 1220G or MATH 1430G	College Algebra ¹ or Applications of Calculus I	3
AGRO 1110G or HORT 1115G	Introduction to Plant Science (Lecture & Lab) or Introductory Plant Science	4
Area IV: Social and Behavioral Science Course ²		3
Students who must be enrolled in 15 credits a semester for Financial Aid purposes will need to enroll in additional elective credits		
Credits		14
Semester 2		
ENGL 2210G	Professional and Technical Communication Honors ¹	3
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors ¹	4
CHEM 1121	General Supplemental Instruction I	1

- ¹ These courses have prerequisites and it is the students responsibility to check and fulfill all course prerequisites listed for these courses.
- ² See the General Education (p. 227) section of the catalog for a full list of courses.
- ³ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses.
- ⁴ Consult with your departmental advisor.

Environmental Science - Bachelor of Science in Environmental Science

The environmental science major is a multidisciplinary program based on a strong general science curriculum and an environmental curriculum that focuses on environmental problems and solutions. Although administered by the Department of Plant and Environmental Sciences, a multidisciplinary advisory committee recommends curriculum and other changes to the program. Graduates are very competitive for careers in industry and government and have excellent preparation for graduate programs in a variety of fields. A grade of C- or better must be earned in the Basic Background and Core Requirements.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48

credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

ENVS 447	Seminar	1
ENVS 452	Geohydrology	4
ENVS 460	Introduction to Air Pollution	3

ENVS 462	Sampling and Analysis of Environmental Contaminants	3
ENVS 470	Environmental Impacts of Land Use and Contaminant Remediation	3
Select from one of the following:		3-4
ENVS 457	Water Measurement	
FWCE 434	Aquatic Contaminants and Toxicology	
FWCE 459	Aquatic Ecology	
Select one of the following:		3
ENVS 422	Environmental Chemistry	
GEOL 360	General Geochemistry	
SOIL 424	Soil Chemistry	
Select one of the following:		3-4
GEOG 381	Cartography and GIS	
GEOG 481	Fundamentals of GIS (any GIS course)	
GEOG 488	GIS and Water Resources	
GEOL 444	GIS for Geology	
Second Language: (not required)		
Electives, to bring the total credits to 120 ⁵		8
Total Credits		120-123

¹ See the General Education (p. 227) Section of the catalog for a full list of courses

² MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take prerequisites first.

³ MATH 1511G, ENVS 1110G, and GEOL 1110G are all required for this major and will satisfy this category depending on which course is completed first.

⁴ See the Viewing a Wider World (p. 231) Section of the catalog for a full list of courses; one course may be in the College of ACES but cannot be taught or cross-listed with AGRO, HORT, ENVS, SOIL, or GENE.

⁵ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change. Students should meet with their advisor every semester.

First Year

Semester 1	Credits
ENVS 1110G Environmental Science I	4
ENGL 1110G Composition I ¹	4
Choose from one of the following: ²	3
Area IV: Social and Behavioral Science Course ²	
Area V: Humanities Course ²	
Area VI: Creative and Fine Arts Course ²	
Elective Course ³	3

Students who must be enrolled in 15 credits a semester for Financial Aid purposes will need to enroll in additional elective credits ³

		Credits	14
Semester 2			
Elective Course ³			3
BIOL 2610G	Principles of Biology: Biodiversity, Ecology, and Evolution (Lab not required)		3

Credits 16

Total Credits 120-121

¹ These courses have prerequisites and it is the students responsibility to check and fulfill all course prerequisites listed for these courses.

² See the General Education (p. 227) section of the catalog for a full list of courses.

³ The department recommends utilizing the following courses to fulfill the additional elective credits needed for Financial Aid requirements.

First Year - Semester 1:

- MATH 1220G College Algebra
- ACES 1120 Freshman Orientation

First Year - Semester 2:

- MATH 1250G Trigonometry & Pre-Calculus

Second Year - Semester 1:

- CHEM 1121 General Supplemental Instruction I

Second Year - Semester 2:

- CHEM 1122 General Supplemental Instruction II

⁴ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses.

Genetics and Biotechnology - Bachelor of Science in Genetics

Codirectors of the Program:

Professor, Charles Shuster, Department Head, Biology

Professor, Niall Hanan, Interim Department Head, Plant and Environmental Sciences

Professors Bailey, Cramer, Hanley, Houde, Milligan, Randall, Serrano, C. Shuster, M. Shuster, Smith, Unguez, Zhang; **Associate Professors** Curtiss, James, Xu **Assistant Professors** Lozada

Have you ever wondered why your hair or eye color, facial features, or the build of your body resembles that of your parents, grandparents, or other close relatives? What factors are responsible for generating all the variety of colors and shapes of flowers, trees, and different types of animals? If these questions have crossed your mind, then you have been thinking about Genetics; the science of heredity. Genetics is studied at the DNA/genome level (molecular genetics, biotechnology, genomics and bioinformatics), the level of organisms (classical or Mendelian genetics), and within/among populations of individuals (population and quantitative genetics).

One of the most significant scientific accomplishments in history has been the use of genomic technologies to recently identify most human genes, as well as, most genes for a number of other animals, plants, fungi, and bacteria. Geneticists now have tremendous opportunities to use molecular, biochemical, mathematical, and computer science-based (bioinformatics) approaches to investigate how these genes determine observable traits. This information can be used to significantly advance human health and well being, and to meet the food and fiber needs of the world.

A degree in Genetics can provide excellent preparation for careers in academic research and technical support, teaching, agriculture, the biotechnology industry, medicine and health sciences, forensic science, technical writing, and sales or marketing. It is also an excellent background for students wishing to enter a graduate program, medical school, and veterinary school.

Undergraduates in the Genetics program must earn a grade of C- or better to receive credit for Departmental and Non-Departmental required courses. Within the Departmental Required courses, Tier I courses must be taken by all majors, for a total of 31 credit hours*. To accommodate differing interests among students, a series of Tier II courses comprising 9-11 credits are provided. Ethical considerations of genetic based technologies will be infused throughout the curriculum, with a focused course on Science and Ethics in the Tier III portion of the core curriculum.

*Note: This includes BIOL 2610G which also counts as a General Education elective.

Requirements

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, other Non-Departmental requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

or PHYS 1230G	Algebra-Based Physics I	
PHYS 2240G	General Physics for Life Science II	3

or PHYS 1240G Algebra-Based Physics II

Electives, to bring the total credits to 120⁴ 16

Select electives to bring total to 120 credits including 48 upper division credits.

Recommended Electives

HNRS courses⁵

Total Credits 120-122

¹ See the General Education Section (p. 227) of the catalog for a full list of courses.

² MATH 1521G Calculus and Analytic Geometry II is required for the degree but students may need to take prerequisite courses before entering MATH 1521G Calculus and Analytic Geometry II.

³ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses.

⁴ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The elective credits in the requirements list is the amount needed to bring the total to 120 credits and may vary based on the degree. Students may need to complete more or less courses on a case-by-case basis and each student should discuss elective requirements with their advisor.

⁵ Students interested in graduating with University Honors should consult with an advisor to select 18 credits of relevant Honors (HNRS) courses.

Second Language Requirement

For the Bachelor of Science in Genetics with a major in Genetics and Biotechnology there is no second language requirement for the degree.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year

Horticulture - Bachelor of Science in Agriculture

Horticulture includes a wide variety of topics that relate to fruit, vegetable and ornamental crops. Careers range from production management to processing and marketing, retail and wholesale management, greenhouse and nursery production, floriculture, landscaping, turf management, research and development, various service activities and positions with local, state and federal agencies.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300/3000 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Horticulture (Turfgrass Science and Management) - Bachelor of Science in Agriculture

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300/3000 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Electives to bring the total credit to 120⁵ **4**

Total Credits **120**

¹ See the General Education (p. 227) section of the catalog for a full list of courses

² MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G first.

³ Requires a grade of C- or above in horticulture courses.

⁴ See the Viewing a Wider World (p. 231) Section of the catalog for a full list of courses.

⁵ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Soil Science (Environment and Resource Management) - Bachelor of Science in Agriculture

Soil scientists investigate the physical, chemical and biological characteristics and behavior of soils, their description and classification, and their management for both agricultural and non-agricultural uses. Career opportunities include: industry jobs; environmental consulting firms; and federal, state and local government careers working on various environmental, agricultural and ecological projects.

Soil science is integrated into the management of the environment and natural resources. Students interested in careers of conservation, environmental management, urban planning, waste disposal and related fields in government and industry may choose from a variety of course offerings. The economic and social implications as well as the technological aspects of resource management are included in the concentration courses.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework. In addition to the courses listed for each major, you must take 35 credits in the College of Agricultural, Consumer and Environmental Sciences and at least 24 credits of soil science related courses with a grade of C- or above including:

Soil Science (Soil and Water Science) - Bachelor of Science in Agriculture

Soil scientists investigate the physical, chemical and biological characteristics and behavior of soils, their description and classification, and their management for both agricultural and non-agricultural uses. Career opportunities include: industry jobs; environmental consulting firms; and federal, state and local government careers working on various environmental, agricultural and ecological projects.

The soil and water science concentration is for students interested in careers in water management and water quality. Employment opportunities exist with irrigation districts, consulting firms, and government agencies dealing with water management and quality. The optimum use of water in semi-arid areas is emphasized through selection of courses in the technical and social sciences.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework. In addition to the courses listed for each major, you must take 35 credits in the College of Agricultural, Consumer and Environmental Sciences and at least 24 credits of soil science related courses with a grade of C- or above including:

Total Credits		120-124

¹ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120

credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

² Students must take two courses from the following, to fulfill degree requirements:

- BIOL 2110G Principles of Biology: Cellular and Molecular Biology
- BIOL 2610G Principles of Biology: Biodiversity, Ecology, and Evolution
- BIOL 311 General Microbiology

³ The degree requires either MATH 1430G Applications of Calculus I or MATH 1511G Calculus and Analytic Geometry I, students who do not test into these courses will have additional MATH courses to complete in this semester and where "Elective Courses" are listed in the Roadmap.

⁴ Please see your academic advisor for a list of appropriate courses to satisfy the concentration coursework requirements.

⁵ See the General Education (p. 227) section of the catalog for a full list of courses

⁶ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses

Soil Science (Soils) - Bachelor of Science in Agriculture

Soil scientists investigate the physical, chemical and biological characteristics and behavior of soils, their description and classification, and their management for both agricultural and non-agricultural uses. Career opportunities include: industry jobs; environmental consulting firms; and federal, state and local government careers working on various environmental, agricultural and ecological projects.

Crop production and plant growth are emphasized in the soils concentration. Soil management, soil conservation, and soil reclamation are related to plant growth for those students interested in both private industry and government employment opportunities as well as farm management.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework. In addition to the courses listed for each major, you must take 35 credits in the College of Agricultural, Consumer and Environmental Sciences and at least 24 credits of soil science related courses with a grade of C- or above including:

Prefix	Title	Credits
General Education

<i>Concentration Coursework⁴</i>		
Select at least one course from each of the following four categories to bring total concentration coursework to 30 credits		30
All course selections must in addition to the courses required under the Departmental/College and Non-Departmental Requirements sections listed above		
<i>Category 1: Crop Production & Protection</i>		
Course category areas are as follows:		
Agronomy		
Entomology		
Plant Pathology		
Weed Science		
Horticulture		
<i>Category 2: Plant Biology & Ecology</i>		
Course category areas are as follows:		
Biology		
Rangeland Resources		
<i>Category 3: Soil, Water & Agricultural Business Management</i>		
Course category areas are as follows:		
Agricultural Economics		
Geography		
Economic Geology		
Range Science		
Soil		
<i>Category 4: Advanced Science, Computing & Statistics</i>		
Course category areas are as follows:		
Math		
Chemistry		
Physics		
Computer-Oriented		

Statistics or Applied Statistics		
Non-Departmental Requirements (in addition to Gen.Ed/VWW)		
CHEM 2120	Integrated Organic Chemistry and Biochemistry (CHEM 2120 must be taken with associated 1-cr CHEM lab)	3
or ANSC 1170	Introduction to Animal Metabolism	
PHYS 1230G	Algebra-Based Physics I	3
Choose two from the following (lab is NOT required for this major):		6
BIOL 2610G	Principles of Biology: Biodiversity, Ecology, and Evolution	
BIOL 311	General Microbiology	
BIOL 2110G	Principles of Biology: Cellular and Molecular Biology	
Second Language: (not required)		
Electives, to bring the total credits to 120⁵		12-14
Total Credits		120

- ¹ See the General Education (p. 227) section of the catalog for a full list of courses
- ² MATH 1430G Applications of Calculus I or MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites to enter either course first.
- ³ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses
- ⁴ Please see your academic advisor for a list of appropriate courses to satisfy the concentration coursework requirements.
- ⁵ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		
Semester 1		Credits
MATH 1220G	College Algebra ¹	3
ACOM 1130G	Effective Leadership and Communication in Agriculture	3
GEOL 1110G	Physical Geology	4
ACES 1120	Freshman Orientation	1

¹ These courses have prerequisites and it is the students responsibility for checking and fulfilling all course prerequisites listed for these courses

² See the General Education (p. 227) section of the catalog for a full list of courses.

³ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses.

Agronomy - Undergraduate Minor

Prefix	Title	Credits
Required Courses		
AGRO 1110G	Introduction to Plant Science (Lecture & Lab)	4
AGRO 365	Principles of Crop Production	4
SOIL 2110 & 2110L	Introduction to Soil Science and Introduction to Soil Science Laboratory	4
SOIL 312	Soil Management and Fertility	3
SOIL 312 L	Soil Management and Fertility Lab	1
Select 3-4 credits from the following to bring the total AGRO and SOIL credits to a minimum of 18 credits:		3-4
AGRO 2160	Plant Propagation	
AGRO 305	Principles of Genetics	
AGRO 311	Introduction to Weed Science	
AGRO 462	Plant Breeding	
AGRO 471	Plant Mineral Nutrition	
AGRO 483	Advanced Sustainable Crop Production	
SOIL 456	Irrigation and Drainage	
Total Credits		19-20

Environmental Science - Undergraduate Minor

A minor in Environmental Sciences requires the following minimum coursework. Note that the prerequisites for most of these courses include chemistry, biology, and/or calculus requirements. Grades of C or better are required in all courses applied to the minor.

Prefix	Title	Credits
ENVS 1110G	Environmental Science I	4
ENVS 2111	Environmental Engineering and Science	3
ENVS 301	Principles of Ecology	3
ENVS 422	Environmental Chemistry	3
ENVS 462	Sampling and Analysis of Environmental Contaminants	3
ENVS 470	Environmental Impacts of Land Use and Contaminant Remediation	3
Total Credits		19

Genetics and Biotechnology - Undergraduate Minor

Prefix	Title	Credits
Required Courses		
GENE 1110	Experimental Systems in Genetics	1
BIOL 2610G	Principles of Biology: Biodiversity, Ecology, and Evolution	3

BIOL 2110G & BIOL 2110L	Principles of Biology: Cellular and Molecular Biology and Principles of Biology: Cellular and Molecular Biology Laboratory	4
GENE 305 L	Genetic Techniques	1
GENE 452	Applied Bioinformatics	3
Select two from the following:		6
BIOL 305	Principles of Genetics	
GENE 315	Molecular Genetics	
GENE 320	Hereditary and Population Genetics	
Total Credits		18

Horticulture - Undergraduate Minor

Prefix	Title	Credits
Required Courses		
HORT 1115G	Introductory Plant Science	4
HORT 2160	Plant Propagation	3
SOIL 2110	Introduction to Soil Science	3
Select 9 credits from the following: ¹		9
HORT 304	Hydroponics	
HORT 305	Principles of Genetics	
HORT 307	Landscape Design	
HORT 310	Medicinal Herbs	
HORT 365	Principles of Crop Production	
HORT 377	Introduction to Turfgrass Management	
HORT 378	Turfgrass Science	
HORT 391	Internship	
HORT 462	Plant Breeding	
HORT 471	Plant Mineral Nutrition	
HORT 483	Advanced Sustainable Crop Production	
HORT 488	Greenhouse Management	
HORT 492	Diagnosing Plant Disorders	
Total Credits		19

¹ or other upper division HORT courses deemed appropriate by student's advisor

Soil Science - Undergraduate Minor

Prefix	Title	Credits
Required Courses		
SOIL 2110 & 2110L	Introduction to Soil Science and Introduction to Soil Science Laboratory	4
SOIL 312	Soil Management and Fertility	3
SOIL 312 L	Soil Management and Fertility Lab	1
SOIL 472	Soil Morphology and Classification	4
Select any SOIL course to bring the total SOIL credit hours to 18.		6
Total Credits		18

School of Hotel, Restaurant and Tourism Management

Undergraduate Program Information

The School of Hotel, Restaurant & Tourism Management is committed to the broad land-grant mission of New Mexico State University. The school's mission is to serve the needs of our constituents through

innovative teaching, research, service, professional applications and partnerships in a multi-cultural and international environment.

This bachelor degree program prepares students for supervisory and management positions in all areas of the diverse and growing hospitality and tourism industry. The full bachelor of science degree program is available through NMSU main campus as well as completely online through NMSU Online. The program also provides a foundation for continuing development to advance to more senior management or to pursue entrepreneurial opportunities. In this service-oriented, professional program, faculty, students and industry partners bring together theory and practice to forge hospitality management excellence. The curriculum is designed to educate students as individuals and professionals in a changing society. Students take a core curriculum featuring courses in a broad spectrum of skills and knowledge needed for industry and personal success. They develop an individual plan with a faculty mentor for selecting professional elective courses based on their interests. A grade of C- or better must be earned in each upper-division HRTM class to satisfy the requirement of the major.

Students are required to participate in an internship program that is offered only after completion of 400 hours of hospitality work experience. The internship sequence consists of three, one-credit courses: Professional Development, Hospitality Internship, and Internship Seminar and includes another 400 hours in the field, normally the summer between the student's junior and senior year. The Hospitality Internship course is a prerequisite for several of the student's final 400-level courses. Thus, at the end of both the work experience practicum and the internship, students will have completed a minimum of 800 hours professional work experience in the field.

Special Features of the School of Hotel, Restaurant, and Tourism Management

The School of Hotel, Restaurant and Tourism Management provides excellent opportunities for experiential learning. Students take hands-on food and beverage and meetings and events courses in the 100 West Café and Bobby Lee Lawrence Academy of Wine. The Hospitality Technology Lab seats 36 for courses using hospitality simulation and general software programs.

The School of HRTM has a special relationship with the NMSU Courtyard by Marriott hotel and Total Management Systems, Inc. to provide educational opportunities for our students. Corporate executives and property managers are frequent guest speakers in classes. Part-time jobs, internships, and management opportunities are available at the property as well as the company's other locations throughout the state. Other industry partners that are actively involved in the program and provide scholarships and other opportunities for students include the New Mexico Beef Council, New Mexico Restaurant Association, the American, Greater Albuquerque and El Paso Hotel & Lodging Associations, New Mexico Hospitality Association, New Mexico Wine Association, Latino Hotel Association and many more.

The School houses the Marriott Hospitality Futures Center. The center is funded through a grant by the J. Willard and Alice S. Marriott Foundation. Its office suite has been designated to allow the campus and surrounding community to discover the many opportunities available when exploring a career in hospitality. It hosts facilitated workshops, and has a strong dedication to outreach throughout New Mexico, El Paso, and the surrounding areas to student groups, public schools, and our industry partners. The HRTM's Annual Career Fair brings 30 - 40 companies to campus each spring semester to interview students for jobs, internships,

management training programs, and other career opportunities. Many recruiters come to campus at other times of the year as well.

Trips to major industry trade shows throughout the country and field trips to hospitality properties are only a few of the professional activities available to our students. HRTM's Faculty Led International Program (FLIP) takes students to Florence, Italy each summer. The School's National Society for Minorities in Hospitality chapter is extremely active and represents HRTM at many college, university, and national activities. Other student organizations include Eta Sigma Delta, Delta Sigma Pi, College Ambassadors, and Peer Mentors.

Graduate Program Information

Students can earn a Master of Science degree in Family and Consumer Sciences with a concentration in Hotel, Restaurant and Tourism Management (HRTM). Students can complete the program on campus or completely online through NMSU Online. The emphasis in HRTM combines both coursework and research to expand the student's knowledge, abilities, and problem-solving skills.

Students begin the program by learning about the current trends in a wide range of hotel, restaurant and tourism academic research areas. Students also take graduate classes that apply to their chosen area of specialization. Some students focus on general hospitality management. However, most choose an area of interest such as tourism, foodservice, hotel operations, culinary arts, destination management, revenue management, sales and marketing, hospitality or culinary education, beverage management, vacation ownership, hospitality information systems, or human resource management/training. Some of our students are hospitality educators who may desire to take specialization courses in online teaching or educational technology.

Students with undergraduate degrees in closely related fields (including Business, Information Technology, Food Science, Culinary Arts, and Education) are strongly encouraged to apply as are students from under-represented groups and international students. We also welcome applications from non-traditional applicants who have work experience in the hotel, restaurant and tourism business. These students bring unique views to our program and strengthen our breadth and diversity.

In addition to the Graduate School requirements, the admissions criteria for the Master of Family and Consumer Sciences, HRTM concentration include letters of reference, a statement of interest essay, and resume. Suggested departmental deadlines for review of admission materials are six weeks prior to the first day of the semester of desired start. However, international students must apply by March 1 for Fall semester admissions and October 1 for spring semester admissions.

A minimum of 30 credits (including 4-6 credits of thesis) is required under the thesis plan. A non-thesis plan is available that requires also requires a minimum of 30 credits of course work with a 3 credit written comprehensive applied management project. Both plans require a final oral examination. Students will take 3 credits of statistics and 3 credits of research methodology at the graduate level. Students with limited work experience in HRTM should complete a paid internship in their area of specialization. Prior to the completion of 12 credits, the student will form a program advisory committee and determine the appropriate courses for the degree work.

There are a limited number of graduate teaching assistant positions available for HRTM concentration students.

Please see the HRTM website at <https://hrtm.nmsu.edu/> for information about all of the School of Hotel, Restaurant and Tourism Management's programs.

Degree for the Department

Hotel, Restaurant and Tourism Management Courses

HRTM 1120G. Introduction to Tourism
3 Credits (3)

Survey of travel and tourism development and operating characteristics.

Learning Outcomes

1. Define tourism and related terms.
2. Identify and explain the role of the elements of the destination mix.
3. Identify the potential socio-cultural, economic and environmental impacts of tourism.
4. Identify and describe the role of key governmental and nongovernmental organizations in tourism.
5. Describe basic tourism planning and development principles.
6. Discuss the unique challenges of tourism marketing and standard marketing methods.
7. Describe the components of the tourism distribution system.
8. Demonstrate a basic understanding of traveler behavior including motivations and barriers to travel.
9. Identify major factors that influence traveler flows. 1
10. Describe the role of major modes of transportation in the tourism system. 1
11. Identify and describe the three pillars of sustainable tourism development. 1
12. Explain personal and social responsibility as it relates to sustainable tourism development. 1
13. Demonstrate effective communication and critical thinking skills.

HRTM 1130. Introduction to Hospitality Management
3 Credits (3)

Overview of the major segments of the hospitality industry, with a focus on basic management principles.

Learning Outcomes

1. Understand the concept of management contracts and franchising.
2. Recognize and understand needed leadership qualities to achieve organizational objectives.
3. Understand the hospitality industry within the global environment.
4. Identify company and industry trends.

5. Understand the functions of all departments in a hospitality organization (restaurant, hotel, club, etc.).
6. Apply the concepts of convention management, meeting and event planning, and casino management.
7. Understand the concepts of quick and institutional/contract foodservice management.
8. Understand the principles of bar management and compare and contrast wines, beers and distilled spirits.
9. Manage the process of service delivery. 1
10. Identify and solve managerial problems 1
11. Manage a diverse workforce and develop positive employee relations to reduce turnover.

**HRTM 1310. Safety, Sanitation and Health in the Hospitality Industry
1 Credit (1)**

Addresses public health, HACCP, and food safety responsibilities in the hospitality industry. Sanitation certification test allows students to receive national ServSafe Food Protection Manager Certification.

Learning Outcomes

1. Identify the hazards to safe food and the foods at risk in a foodservice operation.
2. Identify and discuss the Hazard Analysis Critical Control Point (HACCP) system and be able to design a HACCP flowchart.
3. Demonstrate knowledge of how to protect food during purchasing, receiving, storing, preparing, holding, and serving.
4. Discuss the procedures for ensuring sanitary equipment, facilities, and food-handling practices.
5. Explain how to set-up cleaning, safety, pest control, crisis management, and training programs.
6. Also meets KRDNs for the Accreditation Council for Education in Nutrition and Dietetics (ACEND).

**HRTM 1320. Food Production and Service Fundamentals
3 Credits (1+4P)**

Basic overview of food service systems including menu management, purchasing and production. The course includes basic principles of food fabrication and production. Topics include knife skills, culinary terminology, product identification, quality standards, nutritional cooking theory and application of food preparation techniques. The course includes laboratory aspects and demonstration of basic food production techniques, service styles, practices and procedures in food service operations including culinary math. This course provides students with an understanding of food service sanitation and culinary nutrition. Completion of a national certification examination is required. Students who have not completed HRTM 1310 before enrolling in the course must have proof of valid ServSafe Food Protection Manager certificate. May be repeated up to 3 credits.

Prerequisite: HRTM 1130 or FSTE 2110G.

Prerequisite/Corequisite: HRTM 1310.

Learning Outcomes

1. Demonstrate use of standard recipes and how to reduce and increase their yields
2. Demonstrate basic culinary knife cuts, basic fabrication and mise en place
3. Demonstrate basic cookery techniques of dry, moist and a combination of heat
4. Demonstrate the proper plating and garnishing of foods
5. Describe proper personal behaviors required for the safe handling of food

6. Identify and properly operate kitchen equipment.
7. Pass the ServSafe Exam
8. Describe the three forms of food contaminants and preventative measures.
9. Demonstrate how to properly “set” a table for service 1
10. Demonstrate how to provide dining room service with proper etiquette 1
11. Demonstrate safe work habits, identify safety hazards, and employ preventative safety measures. 1
12. Maintain positive relations with fellow students and faculty through teamwork. 1
13. Exhibit appropriate work habits and attitudes; demonstrate a willingness to compromise. 1
14. Demonstrate a positive attitude, conversation skills, personal hygiene and work attire.

**HRTM 2130. Hotel Operations I
3 Credits (3)**

Analysis of hotel operations to include: guest services, reservations, reception, guest/city ledger and the night audit. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Prerequisite(s): HRTM 1130.

Learning Outcomes

1. Outline the history, magnitude and culture of the hotel industry
2. Define and identify hotel ownership and operational structures
3. Outline the organization and structure of a hotel and resort.
4. Describe and calculate the components and processes of room reservation forecasting, pricing and revenue management.
5. Outline and explain the flow of the guest from pre-arrival through arrival, room occupancy and departure.
6. Demonstrate the procedures and processes for Guest Accounting, the City Ledger, Guest Credit and the Night Audit.
7. Discuss problem solving and guest service associated with the front office and other departments of the hotel and resort.
8. Forecast impacts of technology to the guest services and hotel operations
9. Describe the day to day activities and responsibilities of a Hotel Front Office Manager or a Hotel Assistant General Manager (AGM).

**HRTM 2996. Special Topics
1-4 Credits**

Specific subjects and credits to be assigned on a semester basis for both lecture and laboratory assignments. May be repeated for a maximum of 4 credits.

Prerequisite: consent of instructor.

Learning Outcomes

1. Varies

**HRTM 3210. Hotel, Restaurant, and Tourism Marketing
3 Credits (3)**

The development of effective marketing programs for hospitality service organizations. May be repeated up to 3 credits.

Prerequisite: HRTM 1130.

Learning Outcomes

1. Understand the unique challenges involved in marketing and managing services.
2. Describe the hospitality marketing concepts.
3. Define the characteristics of hospitality marketing.
4. Understand management strategies for service businesses.

5. Discuss the role of marketing in strategic planning.
6. Describe the marketing environment.
7. Discuss market segmentation, targeting, and positioning.
8. Identify and define pricing considerations and approaches.
9. List distribution channels for the hospitality industry. 1
10. Discuss advertising, direct marketing, and sales promotion. 1
11. Discuss the public relations process.

HRTM 3220. Hospitality and Travel Law

3 Credits (3)

Specialized applications of the law to the hospitality and tourism industry. May be repeated up to 3 credits.

Prerequisite: HRTM 1130.

Learning Outcomes

1. Understand the unique challenges involved in marketing and managing services.
2. Describe the hospitality marketing concepts.
3. Define the characteristics of hospitality marketing.
4. Understand management strategies for service businesses.
5. Discuss the role of marketing in strategic planning.
6. Describe the marketing environment.
7. Discuss market segmentation, targeting, and positioning.
8. Identify and define pricing considerations and approaches.
9. List distribution channels for the hospitality industry. 1
10. Discuss advertising, direct marketing, and sales promotion. 1
11. Discuss the public relations process.

HRTM 3230. Hospitality Leadership Management

3 Credits (3)

Examines modern leadership theory in the context of the hospitality industry. Connects contemporary leadership topics to their historical antecedents through focused reading, discussion and film. May be repeated up to 3 credits.

Prerequisite: HRTM 1130 and HRTM 1120G.

Learning Outcomes

1. Gain an understanding of the fundamental nature of leadership.
2. Understand leadership's role in continuous improvement, successful change, and management of quality.
3. Understand the stages of team development and the characteristics of effective work teams.

HRTM 3310. Quantity Food Production and Service

4 Credits (1+6P)

Covers quantity food production and service including cooking concepts, sanitation and safety, teamwork, dining room service, and management responsibilities. Students will apply this knowledge developing product for sale in a student run restaurant. Proof of current ServSafe Food Protection Manager or NM Food Handler certification required. May be repeated up to 4 credits.

Prerequisite(s): HRTM 1320.

Learning Outcomes

1. Follow, extend, and reduce a recipe.
2. Plan and produce quantity foods utilizing appropriate culinary techniques.
3. Demonstrate food service skills for table service and take-out operations while ensuring excellent guest service.
4. Determine and evaluate profit or loss of food production activities included in the laboratory component of the class.

5. Operate a foodservice establishment using proper food safety practices.
6. Demonstrate management, leadership, and teamwork in operating a foodservice establishment.
7. Plan and implement appropriate marketing techniques for a foodservice operation establishment.
8. Evaluate guest perceptions of food and service.
9. Meets KRDNs for the Accreditation Council for Education in Nutrition and Dietetics (ACEND).

HRTM 3410. Hospitality Management Accounting

3 Credits (3)

Specialized accounting for hotel revenue and expenses; accounting for inventory, property, and equipment; hospitality payroll accounting; hotel departmental financial statements; income statement, balance sheet, and statement of cash flows; the analysis of financial statements; interim and annual reports; budgeting expenses; forecasting sales; budgetary reporting and analysis; and financial decision making.

Prerequisite: ACCT 2110.

Learning Outcomes

1. Present the terminology and principles required to develop modern Hospitality Management financial statements.
2. Present the primary principles of managerial accounting and applications to modern Hospitality Management cost and profit analysis.
3. Demonstrate the concepts of financial analysis required to evaluate capital investments, analyze business performance, and to develop tools for financial planning and analysis.
4. Develop the analytical concepts required to understand and evaluate money flows over time and apply these concepts to the use of capital and credit.

HRTM 363. Quantity Food Production and Service

4 Credits (1+6P)

Covers quantity food production and service including cooking concepts, sanitation and safety, teamwork, dining room service, and management responsibilities. Students will apply this knowledge developing product for sale in a student run restaurant. Proof of current ServSafe Food Protection Manager or NM Food Handler certification required. May be repeated up to 4 credits.

Prerequisite(s): HRTM 2120.

HRTM 3910. Professional Development

1 Credit (1)

Covers essential elements of career management including preparation for a successful internship. Restricted to majors.

Learning Outcomes

1. Find an internship experience that will be worthwhile.
2. Write an effective resume in the appropriate style.
3. Recognize the importance of appropriate and effective communications with potential employers using a variety of methods including written letters of introduction, reference, follow-up and thank you, phone, fax, email, and internet.
4. Understand the general interview process and learn how to positively enhance the interactive interview experience.
5. Identify real or potential workplace challenges and develop strategies to make the internship a positive experience while gathering information that will be valuable for their careers.
6. Use this information to develop a case study and micro-theme writings in HRTM 491

HRTM 4110. Meetings, Conventions and Special Events**3 Credits (3)**

Examination of the role of the meeting/event planner, including setting objectives, site selection, negotiations, design, budgeting, marketing, registration, on-site logistics, and evaluation.

Learning Outcomes

1. Identify and differentiate between different types of meetings, conventions, and events.
2. Analyze the scope and complexity of meetings, conventions, and special events.
3. Develop realistic goals, strategic plans, action plans, production schedules, budgets, and facilities designs for meetings and special events.
4. Apply group dynamics, management, and leadership skills to accomplish organizational tasks.
5. Implement an effective communication network among different parties involved in meetings and special events.
6. Organize and facilitate contacts with hospitality industry leaders, vendors, and media personnel.
7. Evaluate the outcomes of meetings and events.
8. Develop an operations manual for meetings and special events.

HRTM 4115. Entertainment Business and Venue Management**3 Credits (3)**

This course will review and examine the principles and practices associated with managing a public assembly venue and the nature of the venue and entertainment business. This is a comprehensive course designed to cover all aspects of incorporated event practices such as marketing, production, contracts, ticketing, and security.

Learning Outcomes

1. Analyze the origin and history of public assembly venues and the role they play within the community.
2. Analyze different ownership and management structures and how governance relationships impact operational management.
3. Analyze the business and financial operations of a public assembly venue.
4. Describe the booking process, the entities involved, and the importance of relationships.
5. Analyze and create marketing and sales strategies for both a public assembly venue and an event that is booked in the venue.
6. Identify and analyze the ticket system options available to venue managers, as well as their importance in access management, financial accountability, and data collection.
7. Analyze the role and importance of ancillary revenue sources, as well as the need for creativity and entrepreneurship.
8. Describe the operational systems and processes required to maintain a venue and produce events.
9. Analyze the event planning process and how it is used to produce an event experience for guests and clients. 1
10. Analyze management's role in developing and maintaining a safe and secure public assembly venue.

HRTM 4120. An Overview of Italian Tourism focused on Food, Wine, Art and Culture**3 Credits (3)**

The course content provides a global perspective and understanding of Italian food, wine, art and culture and their integration into tourism. The content is designed to provide students an appreciation of Italian cultural

values and an overview of food, wine and art in the tourism regions of Italy.

Learning Outcomes

1. Describe and explain the basic history of the tourism regions of Italy.
2. Recognize and describe the Italian food and wine industry and its impact on tourism.
3. Detail how the Italian's integrate sustainability into tourism.
4. Recognize the impact of culture and art on tourism.
5. Explain strategies for responsible travel abroad in Italy and the European Union focused on personal and group safety.
6. Analyze and evaluate multicultural differences between Italian and American societies focused on effective personal communication practices.
7. Produce a 20 slide narrated online presentation with pictures that focused on at least two course learning objectives

HRTM 4130. Hotel Operations II**3 Credits (3)**

The duties and administration of a hotel front office, including housekeeping. Additional focus on the procedures of reservations and night audit. Students also gain exposure to property management systems.

Prerequisite: HRTM 2130.

Learning Outcomes

1. Describe day-to-day responsibilities for a hotel General Manager.
2. Explain departmental competencies for a hotel (Human Resources, Accounting, Revenue Management, Sales and Marketing, Front Office, Housekeeping, Food and Beverage, and Property Operation and Maintenance).
3. Compare and contrast management roles and responsibilities between limited service and full service hotels.
4. Describe hotel organizational, ownership, and franchising structures and their effect on hotel operations.
5. Explain the role of service throughout hotel operation departments.

HRTM 4135. Hospitality Facilities Management**3 Credits (3)**

Exploration of the engineering and maintenance requirements specific to the hospitality industry. Emphasis on environmental issues, renovation and management of the physical plant.

Prerequisite: HRTM 2130, HRTM 4998.

Learning Outcomes

1. Manage property assets using planning and budgeting strategies and the appropriate type of maintenance.
2. Explain how technology is used to make maintenance and operations more efficient and effective.
3. Devise strategies to sustainably manage operational areas and systems in a hospitality business.
4. Manage important components of, and procedures in, water, HVAC, electrical, lighting, safety and security, and waste management systems.
5. Interpret construction drawings and schematics in a basic manner.
6. Describe various kitchen hood systems and individual pieces of kitchen equipment from a mechanical, maintenance and operational perspective.
7. Design risk management strategies for a hospitality business.
8. Describe the importance of building design and engineering to guest experiences, safety, government compliance, and brand identity.

- Describe real-world facility management activities for hotels and restaurants as described by industry professionals active within their career.

HRTM 414. Wine Appreciation

3 Credits (3)

An experiential examination of wine through lectures, guest speakers and focused tasting of wine and food. Topics include viticulture, wine making varietals, terroir, wine service, tasting and evaluation techniques, and food pairings. Student must be at least 21 years old. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

HRTM 4140. Hotel Revenue and Sales Management

3 Credits (3)

Examines methods used for profitably managing capacity, including dynamic pricing and allocation of the rooms inventory across market segments to maximize revenues. Focuses on the integration of revenue management principles with information technology, management, marketing and sales concerns at the property and market level.

Prerequisite: HRTM 2130.

Learning Outcomes

- Describe and discuss the role and function of revenue management in a hotel organization.
- Evaluate pricing techniques and effects on demand.
- Determine market segmentation for a hotel.
- Demonstrate inventory management strategies.
- Discuss legal and ethical aspects of revenue management.
- Perform various analysis for a hotel as a function of revenue management.
- Evaluate distribution channels for hotels.
- Evaluate and recommend revenue management techniques.

HRTM 4145. Resort Management

3 Credits (3)

This course introduces students to the operation and management of full service resort properties, including the management of resort recreational amenities.

Prerequisite: HRTM 2130 or consent of instructor.

Learning Outcomes

- Explain differences in operations and management between resorts and hotels.
- Identify and explain concepts and terminology for various resort amenities and activities.
- Evaluate resort amenities and activities for various market segments.
- Identify and discuss trends in the resort industry.
- Describe best practices in resort management.
- Evaluate resort amenities, activities, markets and products.

HRTM 4230. Hotel, Restaurant and Tourism Industry Purchasing, Selection, and Procurement

3 Credits (3)

Purchasing methods for the hotel, restaurant and tourism industries based on standards of quality, grade, care, and storage for food and nonfood supplies. Purchasing, installation, operation, and care of large foodservice equipment.

Learning Outcomes

- Differentiate purchasing functions in different types of hotel, restaurant and tourism operations and determine how internal and external forces impact purchasing decisions.

- Outline and describe the duties and responsibilities of hotel, restaurant and tourism purchasing managers.
- Develop product recommendations for hotel, restaurant and tourism food and equipment through the use of various product evaluation methods.
- Identify examples of unethical purchasing practices throughout history, research present a code of purchasing ethics for a hotel, restaurant or tourism company.
- Analyze hotel, restaurant and tourism industry supplier selection criteria and recommend a supplier based on those criteria.
- Apply mathematical models to calculate recipe costs as well as order quantities and times. Determine how to reduce AP prices.
- Outline and describe each step of the flow of inventory and determine which controls are needed for security of inventory.
- Explain product grades and explain grading procedures and procurement criteria for meats, poultry, eggs, dairy, produce, marine products, groceries, and nonfood items.

HRTM 4235. Club Management and Marketing

3 Credits (3)

Provides an understanding of the general operational and administrative procedures practiced in private clubs from a marketing perspective with a special emphasis on managing and marketing club food and beverage operations and service. It will provide the professional golf management and hospitality students with the unique sensitivities required in managing and operating in the increasingly lucrative club management market.

Learning Outcomes

- Describe the different types of private clubs and their specific operations.
- Describe the different types of membership categories offered by private clubs.
- Describe the responsibilities of the board of directors of private clubs.
- Identify the typical organizational structure in private clubs.
- Distinguish the functions and responsibilities of a club's board of directors from those of the club's general manager and staff.
- Identify tips for long-term success to become an effective leader and communicator.
- Explain the importance of a club strategic plan and strategic implementation.
- Explain the role of marketing in a private club setting.
- Summarize the importance of training and lifelong learning to the success of private clubs. 1
- Describe the different types of food and beverage operations found in private clubs. 1
- Identify the different financial statements used by clubs. 1
- Describe the functions and ethical interdependencies among the major departments within a club. 1
- Describe a manager's operational inspection and critique of one of the major departments within a club from an overall department manager's leadership perspective. 1
- Explain the importance of facility management in clubs, particularly as it relates to members, employees and costs. 1
- Summarize the duties and responsibilities of golf professionals, greens and grounds departments, and other golf staff members. 1
- Describe a club fitness operation, and common programs of a club fitness center.

HRTM 4240V. Sustainability in the Hospitality Industry**3 Credits (3)**

This course provides a summary and definition of the concept and roots of sustainability and climate change as well as their impact and effect on the hospitality industry while providing the rationale for sustainable development for the industry. A review of environmentally sound management strategies for all operational management areas ranging from eco-design, energy, waste and water management, food security, sourcing of agricultural products leads to a detailed strategy for planning and evaluating the sustainability of a hospitality operation in terms of corporate responsibility and social entrepreneurship. The content is focused on a global perspective of sustainability in the industry.

Learning Outcomes

1. Recognize, interpret and summarize the global challenges facing the hospitality industry caused by climate change driving the need for sustainability in the industry.
2. Explain implementation strategies for responsible environmentally sound hospitality management practices for hotel, food and beverage and tourism businesses.
3. Evaluate sustainable development practices and the importance of personal and corporate social development.
4. Analyze, evaluate and communicate the sustainability practices of a hospitality operation.

HRTM 4310. Beverage Management**3 Credits (3)**

Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation.

Prerequisite: HRTM 3310.

Learning Outcomes

1. Understand basic principles that lead to success in the beverage business.
2. Understand the importance of sustainability in beverage businesses.
3. Identify concepts and principles applied in global and sustainable hospitality organizations..
4. Describe and demonstrate the fundamental principles of ethical leadership.
5. Create favorable guest experiences by applying professional service management techniques.
6. Organize, analyze and interpret information to formulate rational solutions and clear logical decisions.
7. Demonstrate effective written, visual and interpersonal communication skills.
8. Apply relevant technologies to enhance organizational performance in a competitive environment.

HRTM 4320. Restaurant Operations Management**4 Credits (1+6P)**

Provides a detailed understanding of the processes of restaurant operations management. Students are expected to increase kitchen and service technical skills, develop and cook from recipes, develop a personal leadership style, understand food and wine pairing, and supervise front and back of the house operations. Provides the opportunity to perform a detailed analysis of a food and beverage operation. Proof of valid ServSafe Food Protection Manager or NM Food Handler certification and current NM Alcohol Server certification required.

Prerequisite: HRTM 3310.

Learning Outcomes

1. Demonstrate the skill of planning, designing, pricing and evaluating menus.
2. Demonstrate servant leadership skills during fine dining meals.
3. Demonstrate cost control through budget, income and expense reports.
4. Demonstrate how to construct, portion and cost standard recipes.
5. Demonstrate how to inventory, purchase, receive and store foods for production.
6. Demonstrate back of house production, service, and management.
7. Demonstrate how to manage alcoholic beverages with emphasis on wines.
8. Demonstrate front of house service and management.
9. Demonstrate how labor costs effect menu, food production, and desired service. 1
10. Demonstrate application of revenue control in the food service facility. 1
11. Demonstrate ability to implement change within the restaurant setting.

HRTM 4330. Wine Appreciation**3 Credits (3)**

An experiential examination of wine through lectures, guest speakers and focused tasting of wine and food. Topics include viticulture, wine making varietals, terroir, wine service, tasting and evaluation techniques, and food pairings. Student must be at least 21 years old. Consent of instructor required.

Learning Outcomes

1. Discuss the historical and cultural significance of wine.
2. Compare and contrast the production processes for wines.
3. Describe and analyze the characteristics of popular wine varietals.
4. Describe how viticultural practices and geography/climate factors relate to the quality and variation in wines.
5. Perform evaluation and appraisal of wines based on quality, value, and intended use.
6. Apply knowledge of terminology related to labeling laws, practices, and geography of the major wine-growing regions of the world to the effective selection of both domestic and imported wines.
7. Pair wine with foods.
8. Examine the distribution and service systems for wine, including current issues affecting them.

HRTM 4410. Hospitality Cost Control**3 Credits (3)**

Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers.) Provides tools needed to communicate effectively about global financial issues affecting the hospitality business.

Prerequisite: HRTM 3310.

Learning Outcomes

1. Describe all aspects of the cost control planning process including financial data entry techniques and hospitality accounting practices.
2. Construct, calculate and interpret common hospitality industry financial reports.
3. Compare and contrast the roles of various stakeholders (owners, managers, employees and customers).

- Facilitate and communicate effectively with stakeholders local, national and global financial issues affecting the hospitality industry.

HRTM 4910. HRTM Internship Seminar

1 Credit (1)

A case based approach to analyzing internship experiences. Students will write case studies about specific business issues they encountered during HRTM 4998 and analyze them. Restricted to HRTM majors. May be repeated up to 1 credit.

Prerequisite: HRTM 4998.

Learning Outcomes

- Explain the strengths and weaknesses of departments and work units from the hospitality operation in which they interned.
- Compare and contrast management styles, leadership skill, and effectiveness of supervisors and managers.
- Offer solutions to problems and challenges encountered in the workplace.
- Write a comprehensive case study about their internship experiences.

HRTM 4991. Special Problems

1-4 Credits (1-4)

Individual research in a selected subject area of hospitality management. Consent of instructor required. Maximum of 4 credits per semester and a total of 6 credits toward a degree. May be repeated up to 6 credits.

Learning Outcomes

- Varies

HRTM 4996. Special Topics

1-4 Credits (1-4)

Specific subjects to be announced in the Schedule of Classes. Consent of instructor required. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits.

Learning Outcomes

- Varies.

HRTM 4998. Hospitality Internship

1 Credit (1)

Hospitality and tourism professional work experience for HRTM majors only. Consent of instructor required. May be repeated up to 1 credit.

Prerequisite: HRTM 3910.

Learning Outcomes

- Integrate knowledge and theory learned in the classroom with practical application and skills development in a professional setting.
- Gain valuable applied experience.
- Demonstrate an attitude that is appropriate for a prospective manager in the hospitality industry.
- Identify personal strengths and weaknesses using a self-evaluation tool.
- Make connections to establish useful contacts for future employment.

HRTM 4999. Senior Capstone Experience

3 Credits (3)

Synthesizes all previous work. Students apply multi-disciplinary principles to the analysis of hospitality business cases and tourism problems.

Prerequisite: HRTM 4998.

Learning Outcomes

- Apply the ethical lens framework to business decisions.
- Evaluate the importance of the effects of the Covid-19 pandemic, diversity, equity, and inclusion, the guest service experience, including

service failure, and recovery, innovation, technology, corporate social responsibility, business models, and other trends to the hospitality and tourism industry.

- Use research and the case study method to analyze hospitality business issues and trends.
- Present case and research findings in a professional manner
- Write professional reports.

HRTM 501. The Hospitality Industry and Sustainable Competitive Strategy

3 Credits (3)

An examination of the hospitality industry, and its contemporary strategic management principles and practices. Key components, industry organization, and competitive environment of the hospitality industry are analyzed. Strategic decision making principles are examined to create sustainable competitive advantages for hospitality and service industry leaders and organizations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

- Analyze key components, industry organization, and competitive environment of the hospitality industry.
- Examine strategic decision making principles to create sustainable competitive advantages for hospitality and service industry leaders and organizations

HRTM 505. Hospitality Research Methods & Analysis

3 Credits (3)

Application of appropriate statistical procedures and research methodologies within the hospitality industry. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

- Analyze hospitality operational data.
- Develop the framework for researching hospitality operations and organizations.
- Implement appropriate statistical procedures and research methodologies to hospitality operations.
- Examine problems in hospitality, formulate and clarify research topics to address these problems.

HRTM 506. Contemporary Global Issues in Hospitality

3 Credits (3)

Contemporary issues confronting the global hospitality industry. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

- Discuss contemporary issues confronting the global hospitality industry.
- Project how contemporary global issues will impact hospitality organizations.
- Evaluate new developments in hotel and restaurant management

HRTM 510. Hospitality Cost Control

3 Credits (3)

Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers). Provides tools needed to communicate effectively about global financial issues affecting the hospitality

business. Same as HRTM 410 with additional work for graduate credit. Consent of Instructor required.

HRTM 512. Beverage Management

3 Credits (3)

Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation. Same as HRTM 412 with additional work for graduate credit. Consent of Instructor required.

HRTM 5120. Hospitality Services Management

3 Credits (3)

This course explores and applies the design and management of service quality in global hospitality organizations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Investigate the design and management of service quality in global hospitality organizations to create authentic and memorable hospitality experiences.
2. Design and manage service delivery systems to create a culture of service excellence
3. Define and discuss the relationship between service and financial performance in hospitality organizations

HRTM 5130. Hotel Operations II

3 Credits (3)

The duties and administration of a hotel front office, including housekeeping. Additional focus on the procedures of reservations and night audit. Students also gain exposure to property management systems. Same as HRTM 4130 with additional work for graduate credit. Consent of Instructor required.

Learning Outcomes

1. Describe day-to-day responsibilities for a hotel General Manager.
2. Explain departmental competencies for a hotel (Human Resources, Accounting, Revenue Management, Sales and Marketing, Front Office, Housekeeping, Food and Beverage, and Property Operation and Maintenance).
3. Compare and contrast management roles and responsibilities between limited service and full service hotels.
4. Describe hotel organizational, ownership, and franchising structures and their effect on hotel operations.
5. Explain the role of service throughout hotel operation departments.

HRTM 5140. Hotel Revenue and Sales Management

3 Credits (3)

Examines methods used for profitably managing capacity, including dynamic pricing and allocation of the rooms inventory across market segments to maximize revenues. Focuses on the integration of revenue management principles with information technology, management, marketing and sales concerns at the property and market level. Same as HRTM 4140 with additional work for graduate credit. Consent of Instructor required.

Learning Outcomes

1. Describe and discuss the role and function of revenue management in a hotel organization.
2. Evaluate pricing techniques and effects on demand.
3. Determine market segmentation for a hotel.
4. Demonstrate inventory management strategies.
5. Discuss legal and ethical aspects of revenue management.
6. Perform various analysis for a hotel as a function of revenue management.

7. Evaluate distribution channels for hotels.

8. Evaluate and recommend revenue management techniques.

HRTM 5145. Resort Management

3 Credits (3)

This course introduces students to the operation and management of full service resort properties, including the management of resort recreational amenities. Consent of instructor required. Must be in Graduate Student standing to enroll. Same as HRTM 4145 with additional work for graduate credit.

Learning Outcomes

1. Explain differences in operations and management between resorts and hotels.
2. Identify and explain concepts and terminology for various resort amenities and activities.
3. Evaluate resort amenities and activities for various market segments.
4. Identify and discuss trends in the resort industry.
5. Describe best practices in resort management.
6. Evaluate resort amenities, activities, markets and products.

HRTM 515. Applied Management Project

3 Credits (3)

Students will develop a project scope based on problems presented within the hospitality industry. Projects incorporate concepts and skills developed in previous coursework. Students will take this course in their last semester of the Master of Hospitality Degree. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Develop a project scope based on problems presented within the hospitality industry.
2. Use collaborative problem solving to execute the project.
3. Define and identify a business research problem and explain its importance to study.
4. Identify sources and strategies for locating related literature.
5. Plan research regarding the business problem.
6. Write the professional paper.
7. Present the professional paper.

HRTM 516. Hotel, Restaurant and Tourism Industry Purchasing, Selection and Procurement

3 Credits (3)

Purchasing methods for the hotel, restaurant and tourism industries based on standards of quality, grade, care, and storage for food and nonfood supplies. Purchasing, installation, operation, and care of large foodservice equipment.

Learning Outcomes

1. Differentiate purchasing functions in different types of hotel, restaurant and tourism operations and determine how internal and external forces impact purchasing decisions.
2. Outline and describe the duties and responsibilities of hotel, restaurant and tourism purchasing managers.
3. Develop product recommendations for hotel, restaurant and tourism food and equipment through the use of various product evaluation methods.
4. Identify examples of unethical purchasing practices throughout history, research present a code of purchasing ethics for a hotel, restaurant or tourism company.
5. Analyze hotel, restaurant and tourism industry supplier selection criteria and recommend a supplier based on those criteria.

6. Apply mathematical models to calculate recipe costs as well as order quantities and times. Determine how to reduce AP prices.
7. Outline and describe each step of the flow of inventory and determine which controls are needed for security of inventory.
8. Explain product grades and explain grading procedures and procurement criteria for meats, poultry, eggs, dairy, produce, marine products, groceries, and nonfood items.

HRTM 5210. The Hospitality Industry and Sustainable Competitive Strategy

3 Credits (3)

An examination of the hospitality industry, and its contemporary strategic management principles and practices. Key components, industry organization, and competitive environment of the hospitality industry are analyzed. Strategic decision making principles are examined to create sustainable competitive advantages for hospitality and service industry leaders and organizations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Analyze key components, industry organization, and competitive environment of the hospitality industry.
2. Examine strategic decision making principles to create sustainable competitive advantages for hospitality and service industry leaders and organizations.

HRTM 5220. Contemporary Global Issues in Hospitality

3 Credits (3)

Contemporary issues confronting the global hospitality industry. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Discuss contemporary issues confronting the global hospitality industry.
2. Project how contemporary global issues will impact hospitality organizations.
3. Evaluate new developments in hotel and restaurant management.

HRTM 5230. Hotel, Restaurant and Tourism Industry Purchasing, Selection and Procurement

3 Credits (3)

Purchasing methods for the hotel, restaurant and tourism industries based on standards of quality, grade, care, and storage for food and nonfood supplies. Purchasing, installation, operation, and care of large foodservice equipment. Same as HRTM 4230 with additional work for graduate credit.

Learning Outcomes

1. Differentiate purchasing functions in different types of hotel, restaurant and tourism operations and determine how internal and external forces impact purchasing decisions.
2. Outline and describe the duties and responsibilities of hotel, restaurant and tourism purchasing managers.
3. Develop product recommendations for hotel, restaurant and tourism food and equipment through the use of various product evaluation methods.
4. Identify examples of unethical purchasing practices throughout history, research present a code of purchasing ethics for a hotel, restaurant or tourism company.
5. Analyze hotel, restaurant and tourism industry supplier selection criteria and recommend a supplier based on those criteria.

6. Apply mathematical models to calculate recipe costs as well as order quantities and times. Determine how to reduce AP prices.
7. Outline and describe each step of the flow of inventory and determine which controls are needed for security of inventory.
8. Explain product grades and explain grading procedures and procurement criteria for meats, poultry, eggs, dairy, produce, marine products, groceries, and nonfood items.

HRTM 5240. Sustainability in the Hospitality Industry

3 Credits (3)

This course provides a summary and definition of the concept and roots of sustainability and climate change as well as their impact and effect on the hospitality industry while providing the rationale for sustainable development for the industry. A review of environmentally sound management strategies for all operational management areas ranging from eco-design, energy, waste and water management, food security, sourcing of agricultural products leads to a detailed strategy for planning and evaluating the sustainability of a hospitality operation in terms of corporate responsibility and social entrepreneurship. The content is focused on a global perspective of sustainability in the industry. Same as HRTM 4240V with additional work for graduate credit.

Learning Outcomes

1. Recognize, interpret and summarize the global challenges facing the hospitality industry caused by climate change driving the need for sustainability in the industry.
2. Explain implementation strategies for responsible environmentally sound hospitality management practices for hotel, food and beverage and tourism businesses.
3. Evaluate sustainable development practices and the importance of personal and corporate social development.
4. Analyze, evaluate and communicate the sustainability practices of a hospitality operation.

HRTM 5310. Beverage Management

3 Credits (3)

Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation. Same as HRTM 4310 with additional work for graduate credit. Consent of Instructor required.

Learning Outcomes

1. Understand basic principles that lead to success in the beverage business.
2. Understand the importance of sustainability in beverage businesses.
3. Identify concepts and principles applied in global and sustainable hospitality organizations.
4. Describe and demonstrate the fundamental principles of ethical leadership.
5. Create favorable guest experiences by applying professional service management techniques.
6. Organize, analyze and interpret information to formulate rational solutions and clear logical decisions.
7. Demonstrate effective written, visual and interpersonal communication skills.
8. Apply relevant technologies to enhance organizational performance in a competitive environment.

HRTM 536. Sustainability in the Hospitality Industry

3 Credits (3)

This course provides a summary and definition of the concept and roots of sustainability and climate change as well as their impact and effect

on the hospitality industry while providing the rationale for sustainable development for the industry. A review of environmentally sound management strategies for all operational management areas ranging from eco-design, energy, waste and water management, food security, sourcing of agricultural products leads to a detailed strategy for planning and evaluating the sustainability of a hospitality operation in terms of corporate responsibility and social entrepreneurship. The content is focused on a global perspective of sustainability in the industry.

Learning Outcomes

1. Recognize, interpret and summarize the global challenges facing the hospitality industry caused by climate change driving the need for sustainability in the industry.
2. Explain implementation strategies for responsible environmentally sound hospitality management practices for hotel, food and beverage and tourism businesses.
3. Evaluate sustainable development practices and the importance of personal and corporate social development.
4. Analyze, evaluate and communicate the sustainability practices of a hospitality operation.

HRTM 5410. Hospitality Cost Control

3 Credits (3)

Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers). Provides tools needed to communicate effectively about global financial issues affecting the hospitality business. Same as HRTM 4410 with additional work for graduate credit. Consent of Instructor required.

Learning Outcomes

1. Describe all aspects of the cost control planning process including financial data entry techniques and hospitality accounting practices.
2. Construct, calculate and interpret common hospitality industry financial reports.
3. Compare and contrast the roles of various stakeholders (owners, managers, employees and customers).
4. Facilitate and communicate effectively with stakeholders local, national and global financial issues affecting the hospitality industry.

HRTM 5420. Hospitality Research Methods & Analysis

3 Credits (3)

Application of appropriate statistical procedures and research methodologies within the hospitality industry. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Analyze hospitality operational data.
2. Develop the framework for researching hospitality operations and organizations.
3. Implement appropriate statistical procedures and research methodologies to hospitality operations.
4. Examine problems in hospitality, formulate and clarify research topics to address these problems.

HRTM 550. The World of Hospitality Higher Education

3 Credits (3)

Survey of the history, organization, and administration of hospitality higher education programs. Explores differences between types of degree programs – associate, bachelor, graduate and sources of funding – public, private, proprietary. Investigates the role of the faculty member in non-instructional activities, such as working with administrative

and support departments, accreditation, service, community outreach, fundraising, and industry relations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Discuss the history of higher education and hospitality management programs.
2. Analyze how general higher education principles, laws, and finance apply to hospitality management programs.
3. Compare the characteristics, administration, and operations of programs based on type of degrees offered.
4. Compare the characteristics, administration, and operations of programs based on sources of funding.
5. Analyze the role of the faculty in hospitality education in collaborating with various educational departments and support services.
6. Analyze the role of the faculty in hospitality education in collaborating with external stakeholders.

HRTM 5510. The World of Hospitality Higher Education

3 Credits (3)

Survey of the history, organization, and administration of hospitality higher education programs. Explores differences between types of degree programs – associate, bachelor, graduate and sources of funding – public, private, proprietary. Investigates the role of the faculty member in non-instructional activities, such as working with administrative and support departments, accreditation, service, community outreach, fundraising, and industry relations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Discuss the history of higher education and hospitality management programs.
2. Analyze how general higher education principles, laws, and finance apply to hospitality management programs.
3. Compare the characteristics, administration, and operations of programs based on type of degrees offered.
4. Compare the characteristics, administration, and operations of programs based on sources of funding.
5. Analyze the role of the faculty in hospitality education in collaborating with various educational departments and support services.
6. Analyze the role of the faculty in hospitality education in collaborating with external stakeholders.

HRTM 598. Special Research Programs

1-4 Credits

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

Prerequisite: consent of instructor.

HRTM 5991. Special Research Programs

1-4 Credits (1-4)

Individual investigations, either analytical or experimental. Consent of instructor required. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

Learning Outcomes

1. Explain and deliver a summary and definition for planning research in hospitality and tourism.
2. Demonstrate effective academic reading skills, articulate your research goal, define parameters and organization for your literature search, appropriately document and cite sources from your search.

3. Develop a topic statement and the framework for researching specific hospitality operations and organizations.
4. Design and implement appropriate statistical procedures and research methodologies to hospitality operations.
5. Evaluate problems in hospitality, formulate and clarify research topics to address these problems.

HRTM 5992. Applied Management Project
3 Credits (3)

Students will develop a project scope based on problems presented within the hospitality industry. Projects incorporate concepts and skills developed in previous coursework. Students will take this course in their last semester of the Master of Hospitality Degree. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Develop a project scope based on problems presented within the hospitality industry.
2. Use collaborative problem solving to execute the project.
3. Define and identify a business research problem and explain its importance to study.
4. Identify sources and strategies for locating related literature.
5. Plan research regarding the business problem.
6. Write the professional paper.
7. Present the professional paper.

HRTM 5996. Special Topics
1-4 Credits (1-4)

Specific subjects and credits to be announced in the Schedule of Classes. Consent of instructor required. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits.

Learning Outcomes

1. Varies

HRTM 5998. Graduate Hospitality Internship
3 Credits (3)

Hospitality and tourism industry professional, structured and supervised work experience for HRTM graduate students only.

Learning Outcomes

1. Develop and apply interviewing and negotiating skills during the process of seeking and being hired into an internship.
2. Recall and explain the strengths and weaknesses of departments and work units from the hospitality operation in which they interned.
3. Describe and explain interactions with the hospitality operation's guests and the development of a positive service oriented attitude as well as be able to describe the service management delivery system.
4. Compare and contrast the management styles, leadership skills, and effectiveness of supervisors and managers. analyze which type of style or skill fits best with their style.
5. Analyze which styles and leadership skills best fit their personal management abilities.
6. Identify new and different experiences encountered during the internship, distinguish the positive and negative aspects of the experience, and appraise these experiences as to their value to their future hospitality management career.
7. Apply coursework related knowledge to demonstrate coursework related knowledge to the internship position.
8. Synthesize the total internship learning experience by completing a comprehensive management report.

HRTM 5999. Master's Thesis
1-6 Credits (1-6)

Thesis. Consent of instructor required. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

Hotel, Restaurant and Tourism Management - Bachelor of Science

Core Courses

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education		
<i>Area I: Communications</i>		
<i>English Composition - Level 1</i>		
Choose one from the following:		4
ENGL 1110G	Composition I	
ENGL 1110H	Composition I Honors	
ENGL 1110M	Composition I	
<i>English Composition - Level 2</i>		
Choose one from the following:		3
ENGL 2210G	Professional and Technical Communication Honors	
ENGL 2221G	Writing in the Humanities and Social Science	
ENGL 2210H	Professional and Technical Communication Honors	
ENGL 2215G	Advanced Technical and Professional Communication	
<i>Oral Communication</i>		
Choose one from the following:		3
ACOM 1130G	Effective Leadership and Communication in Agriculture	
COMM 1115G	Introduction to Communication	
COMM 1130G	Public Speaking	
HNRS 2175G	Introduction to Communication Honors	
<i>Area II: Mathematics</i>		
MATH 1350G	Introduction to Statistics ¹	3
<i>Area III/IV: Laboratory Sciences and Social/Behavioral Sciences</i>		
ECON 1110G Survey of Economics		
or ECON 2110G Macroeconomic Principles		
or ECON 2120G Principles of Microeconomics		
HRTM 1120G	Introduction to Tourism	
Area III: Laboratory Sciences Course (4 credits) ²		10

Area V: Humanities ²	3
Area VI: Creative and Fine Arts ²	3

Departmental Electives	12
Select 12 credits of Professional Departmental Electives in consultation with your HRTM Faculty Mentor ⁵	
Non- Departmental Requirements (in addition to Gen.Ed/VWW)⁶	
ACES 1120 Freshman Orientation	1
ACCT 2110 Principles of Accounting I	3
Any MKTG #300 and above	3
MGMT 309 Human Behavior in Organizations	3
MGMT 332 Human Resources Management	3
Electives, to bring the total credits to 120^{6,7}	19
Total Credits	120-121

- ¹ MATH 1350G Introduction to Statistics is required for the degree but students may need to take any prerequisites needed to enter MATH 1350G first.
- ² See the General Education (p. 227) section of the catalog for a full list of courses. Please consult your HRTM faculty mentor to select appropriate courses.
- ³ Viewing A Wider World Requirement - Two courses in two different colleges, with at least one from outside ACES. See list of approved courses in the catalog. (300+ level courses with a "V" behind them.) See the Viewing a Wider World (p. 231) section of the catalog for a full list.
- ⁴ Complete during final semester.
- ⁵ **Departmental Electives (the following are typical offerings):**
- HRTM 4310 Beverage Management
 - HRTM 4320 Restaurant Operations Management
 - HRTM 4330 Wine Appreciation
 - HRTM 4230 Hotel, Restaurant and Tourism Industry Purchasing, Selection, and Procurement
 - HRTM 4235 Club Management and Marketing
 - HRTM 4130 Hotel Operations II
 - HRTM 4140 Hotel Revenue and Sales Management
 - HRTM 4145 Resort Management
 - HRTM 4240V Sustainability in the Hospitality Industry
 - HRTM 4110 Meetings, Conventions and Special Events

- HRTM 4115 Entertainment Business and Venue Management
- HRTM 4120 An Overview of Italian Tourism focused on Food, Wine, Art and Culture
- HRTM 4996 Special Topics
- HRTM 4991 Special Problems

- ⁶ It is highly recommended that students take BFIN 341 Financial Analysis and Markets as an elective course. You will need assistance from HRTM to receive a prerequisite waiver to enroll in it.
- ⁷ It is strongly suggested that students use their elective credits to earn a minor such as Marketing, Business Administration, Food Science and Technology, Human-Animal Interaction, or a Language.
**Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.*
- ⁸ Students may waive HRTM 1310 Safety, Sanitation and Health in the Hospitality Industry if they show proof of a valid, not-expired ServSafe Food Safety Manager certificate. They will need to show continued proof of manager or food handler's certification in order to serve food to the public in HRTM 1320 Food Production and Service Fundamentals, HRTM 3310 Quantity Food Production and Service, HRTM 4320 Restaurant Operations Management and HRTM 4110 Meetings, Conventions and Special Events

A Suggested Plan of Study for Students

This roadmap assumes student placement in ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		
Fall		Credits
HRTM 1130	Introduction to Hospitality Management	3
HRTM 1310	Safety, Sanitation and Health in the Hospitality Industry	1
ACES 1120	Freshman Orientation	1
MATH 1215	Intermediate Algebra	3
Choose one from the following:		3
ACOM 1130G	Effective Leadership and Communication in Agriculture	
COMM 1115G	Introduction to Communication	
COMM 1130G	Public Speaking	
HNRS 2175G	Introduction to Communication Honors	
Choose any General Education course from Area V or VI ^{2,3}		3
Credits		14
Spring		
HRTM 1120G	Introduction to Tourism	3
ENGL 1110G	Composition I	4
ECON 1110G	Survey of Economics	3
or ECON 2110G	or Macroeconomic Principles	
or ECON 2120G	or Principles of Microeconomics	
Any General Education from Area V or Area VI ^{2,3}		3
Elective Course ⁴		3
Credits		16

Second Year

Fall		
HRTM 2130	Hotel Operations I	3
Choose one from the following:		3
ENGL 2210G	Professional and Technical Communication Honors	
ENGL 2210H	Professional and Technical Communication Honors	
ENGL 2215G	Advanced Technical and Professional Communication	
ENGL 2221G	Writing in the Humanities and Social Science	
MATH 1350G	Introduction to Statistics ¹	3
General Education Elective ²		3
Area III: Laboratory Science Course ²		4
Credits		16

Spring		
HRTM 1320	Food Production and Service Fundamentals	3
HRTM 3230	Hospitality Leadership Management	3
ACCT 2110	Principles of Accounting I	3
Any 300-level Marketing Course		3
Elective Course ⁴		3
Credits		15

Third Year

Fall		
HRTM 3210	Hotel, Restaurant, and Tourism Marketing	3
HRTM 3410	Hospitality Management Accounting	3
HRTM 3310	Quantity Food Production and Service	4
Any Viewing a Wider World course ⁵		3
Elective Course ⁴		3
Credits		16

Spring		
HRTM 3220	Hospitality and Travel Law	3
HRTM 3910	Professional Development	1
MGMT 332	Human Resources Management	3
Any HRTM Departmental Elective ⁶		3
Any Viewing a Wider World course ⁵		3
Credits		13

Summer		
HRTM 4998	Hospitality Internship	1
Credits		1

Fourth Year

Fall		
HRTM 4910	HRTM Internship Seminar	1
HRTM 4410	Hospitality Cost Control	3
HRTM 4135	Hospitality Facilities Management	3
MGMT 309	Human Behavior in Organizations	3
HRTM Departmental Elective ⁶		3
Elective Course ⁴		3
Credits		16

Spring		
HRTM 4999	Senior Capstone Experience	3
Departmental Elective Courses ⁶		6
Elective Courses (if needed to reach 120 credits) ⁴		4
Credits		13
Total Credits		120

¹ MATH 1215 Intermediate Algebra is the required prerequisite for MATH 1350G, is students place directly into MATH 1350G Introduction to Statistics then they can take an elective in it's place.

² See the General Education (p. 227) section of the catalog for a full list of courses.

³ Students must take only one Area V and one Area VI course.

⁴ It is strongly suggested that students use their elective credits to earn a minor such as Marketing, Business Administration, Food Science and Technology, Human-Animal Interaction, or a Language.

**Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.*

⁵ See the Viewing a Wider World (p. 231) section of the catalog for a full list of courses.

⁶ **Departmental Electives (the following are typical offerings):**

- HRTM 4310 Beverage Management
- HRTM 4320 Restaurant Operations Management
- HRTM 4330 Wine Appreciation
- HRTM 4230 Hotel, Restaurant and Tourism Industry Purchasing, Selection, and Procurement
- HRTM 4235 Club Management and Marketing
- HRTM 4130 Hotel Operations II
- HRTM 4140 Hotel Revenue and Sales Management
- HRTM 4145 Resort Management
- HRTM 4240V Sustainability in the Hospitality Industry
- HRTM 4110 Meetings, Conventions and Special Events
- HRTM 4115 Entertainment Business and Venue Management
- HRTM 4996 Special Topics
- HRTM 4991 Special Problems

Hotel, Restaurant and Tourism Management - Undergraduate Minor

A minor in the School of Hotel, Restaurant and Tourism Management consists of 18 or more credit hours of approved course work of which at least 12 must be numbered 300 or higher. all completed with a grade of "C-" or higher.

Please see the HRTM Director or a HRTM Faculty Mentor to approve your plan for completing the minor and approval to take specific classes. Please declare the HRTM minor in MyNMSU as soon as possible so we can track your progress toward completion

Requirements

Prefix	Title	Credits
Required Courses:		
HRTM 1130	Introduction to Hospitality Management	3
HRTM 3410	Hospitality Management Accounting	3
Choose one additional HRTM course (200-level):		3
HRTM 1120G	Introduction to Tourism	
HRTM 1320	Food Production and Service Fundamentals	
HRTM 2130	Hotel Operations I	
Choose nine credits of 300- or 400-level courses:		9

HRTM 3210	Hotel, Restaurant, and Tourism Marketing
HRTM 3220	Hospitality and Travel Law
HRTM 3230	Hospitality Leadership Management
HRTM 3310	Quantity Food Production and Service
HRTM 3910	Professional Development
HRTM 4110	Meetings, Conventions and Special Events
HRTM 4115	Entertainment Business and Venue Management
HRTM 4135	Hospitality Facilities Management
HRTM 4130	Hotel Operations II
HRTM 4140	Hotel Revenue and Sales Management
HRTM 4145	Resort Management
HRTM 4230	Hotel, Restaurant and Tourism Industry Purchasing, Selection, and Procurement
HRTM 4235	Club Management and Marketing
HRTM 4240V	Sustainability in the Hospitality Industry
HRTM 4310	Beverage Management
HRTM 4320	Restaurant Operations Management
HRTM 4330	Wine Appreciation
HRTM 4410	Hospitality Cost Control
HRTM 4910	HRTM Internship Seminar
HRTM 4996	Special Topics
HRTM 4998	Hospitality Internship
HRTM 4991	Special Problems

Total Credits **18**

Please note that ACCT 2110 Principles of Accounting I is the prerequisite for HRTM 3410 Hospitality Management Accounting but does not count toward the minor. HRTM 1310 Safety, Sanitation and Health in the Hospitality Industry or a ServSafe Food Safety Manager certificate is a prerequisite for HRTM 1320 Food Production and Service Fundamentals and HRTM 3310 Quantity Food Production and Service but does not count toward the minor. Other courses have prerequisites that you may not have taken.

Students wishing to perform a HRTM internship as part of the minor must take the full sequence of internship courses: HRTM 3910 Professional Development, HRTM 4998 Hospitality Internship, and HRTM 4910 HRTM Internship Seminar.

Water Science and Management Graduate Program Information

New Mexico faces serious challenges concerning the supply, development, quality, management and administration of water resources; responses to the challenges will have major impacts on the regional economy, environmental quality, and the quality of life of the residents of New Mexico. A major need exists to train the next generation of water resource researchers, educators, and managers to address these challenges, both inside and outside New Mexico. To help meet these needs, an interdisciplinary program in Water Science & Management (WSM) has been developed at NMSU by the departments of

- Agricultural Economics and Agricultural Business,
- Animal and Range Science,
- Civil Engineering,
- Geography, and
- Plant and Environmental Sciences.

The primary purposes of the interdisciplinary masters and doctoral degree programs in WSM are to provide graduate education for addressing state, national, and international water issues, and to train the next generation of water professionals needed to meet the challenges noted above.

Admission Requirements

Admission Requirements for the Master of Science (MS) in water science and management include all general requirements for a graduate degree as set forth in the NMSU Catalog, plus the following:

- Possession of a bachelor's degree from an accredited university grade point average of 3.5 or higher on a 4.0 scale. However, students with grade point averages between 3.0 and 3.5 will be given consideration, this degree being preparatory to the Water Science and Management degree.
- A letter of intent or statement of purpose that addresses individual professional and personal goals related to water science and management and discusses how these goals fit within the degree programs at NMSU. It is expected that the candidate will have made contact with prospective advisor(s) at NMSU and speak to how he or she would work with said advisor(s) to advance their research and study.
- Three letters of recommendation submitted directly from persons who know the applicant professionally, including a recommendation from the candidate's current employer/sponsor. These letters should provide evidence of professional ability, research experience and the potential for professional development.
- A brief resume or curriculum vitae not to exceed five pages that summarize the candidate's background and qualifications.

Admission Requirements for the Doctor of Philosophy (Ph.D.) in water science and management include all general requirements for a graduate degree as set forth in the NMSU Catalog, plus the following:

- Possession of a master's degree from an accredited university with a grade point average of 3.5 or higher on a 4.0 scale. However, students with grade point averages between 3.0 and 3.5 will be given consideration. This degree being preparatory to the Water Science and Management doctorate.
- Three letters of recommendation submitted directly from persons who know the applicant professionally, including a recommendation from the candidate's current employer/sponsor. These letters should provide evidence of professional ability, research experience, and the potential for professional development.
- In addition, applicants to the Ph.D. program should provide evidence of research experience. This could include a master's thesis, a professional paper, peer-reviewed manuscripts, consulting reports, or other evidence of experience conducting research.
- A letter of intent or statement of purpose that addresses individual professional and personal goals related to water science and management and discusses how these goals fit within the degree programs at NMSU. It is expected that the candidate will have made contact with prospective advisor(s) at NMSU and speak to how he or she would work with said advisor(s) to advance their research and study.
- A brief resume or curriculum vitae not to exceed five pages that summarize the candidate's background and qualifications.

Water Science & Management Graduate Courses

To view the list of core courses required for our Master of Science and Doctor of Philosophy degrees please see the Degrees (p. 431) tab.

Five (5) concentrations are offered in the program and are detailed on the program page:

- **Agricultural Water Resources** relates to the major use of ground and surface water in providing safe and secure food systems while ensuring ecosystem services. This field of study includes water allocation, water conservation and water management issues facing urban water supply and irrigated agriculture.
- **Watershed, Riparian and Aquatic Systems** includes the processes of organizing and guiding land and other resources used in a river basin to provide desired goods and services without adversely affecting soil and water resources. Watershed, riparian, and aquatic system management involves an array of nonstructural (vegetation management) practices, as well as an array of structural (engineering) activities, when conditions warrant.
- **Water Quality and Treatment** includes processes used to make water acceptable for desired end-uses. These can include use as drinking water, industrial processes, agricultural uses and environmental management. The goal of water treatment processes is to remove existing contaminants in the water or reduce the concentration of such contaminants so the water becomes fit for its desired end-use.
- **Water Economics and Policy** examines the demand for water by all its competing uses, including irrigated agriculture, energy, urban supply, and environmental restoration and management. Policies are examined for their influence on water supplies, water demands, and economic values of water reallocations among agricultural, environmental, energy, and urban users. It examines the role of water markets, water user decisions, institutional adjustments, and water-related policies with respect to resource costs, water quality, profitability, and environmental effects.
- **Water Informatics** is an interdisciplinary science primarily concerned with the collection, classification, manipulation, storage, retrieval and especially the dissemination of water information, including both human and machine readable documents. Examples of human readable documents include maps, field data sheets, operational schedules, and long term asset management plans with narrative text. Machine readable documents include files for geographic information systems (GIS), Global Positioning Systems (GPS), relational database management systems and emerging applications.

Degrees for the Department

Master Degree(s)

- Water Science and Management (Agricultural Water Resources) - Master of Science (p. 173)
- Water Science and Management (International Water Resilience) - Master of Science (p. 174)
- Water Science and Management (Water Economics and Policy) - Master of Science (p. 174)
- Water Science and Management (Water Informatics) - Master of Science (p. 175)
- Water Science and Management (Water Quality and Treatment) - Master of Science (p. 175)

- Water Science and Management (Watersheds and Aquatic/Riparian Wetlands) - Master of Science (p. 176)
- Water Science and Management - Master of Science (p. 172)

Doctoral Degree(s)

- Water Science and Management (Agricultural Water Resources) - Doctor of Philosophy (p. 209)
- Water Science and Management (International Water Resilience) - Doctor of Philosophy (p. 209)
- Water Science and Management (Water Economics and Policy) - Doctor of Philosophy (p. 210)
- Water Science and Management (Water Informatics) - Doctor of Philosophy (p. 210)
- Water Science and Management (Water Quality Treatments) - Doctor of Philosophy (p. 211)
- Water Science and Management (Watershed and Aquatic/Riparian Wetlands) - Doctor of Philosophy (p. 211)
- Water Science and Management - Doctor of Philosophy (p. 208)

Affiliated Faculty – S. Angadi, Ph.D. (University of Manitoba, Canada); S. Archambault, Ph.D. (UNM); A. Salim Bawazir, Ph.D. (NMSU); M.P. Bleiweiss, M.S. (California State-Los Angeles); W.Boeing, Ph.D. (Louisiana State); K. Boykin, Ph.D. (NMSU); C. E. Brewer, Ph.D. Iowa State); C. Brown, Ph.D. (San Diego State/California-Santa Barbara); S. W. Brown, Ph.D. (NMSU); M. Buenemann, Ph.D. (Oklahoma); K. C. Carroll, Ph.D. (Arizona); D. S. Cram, Ph.D. (NMSU); C. M. Downes, Ph.D. (New Mexico); D. W. DuBois, Ph.D. (Nevada); D. P. Dugas, Ph.D. (Oregon); W. M. Fedio, Ph.D. (University of Alberta, Canada); A. G. "Sam" Fernald, Ph.D. (Colorado State); R. Flores, Ph.D. (Kansas State); R. Foudazi, Ph.D. (Cape Peninsula University of Technology, South Africa); A. Ghassemi, Ph.D. (NMSU); R. M. Goss, Ph.D. (Nebraska); S. J. Guldán, Ph.D. (Minnesota); P. Gutierrez, Ph.D. (Oklahoma State University); J. Herrick, Ph.D. (Ohio State); B. H. Hurd, Ph.D. (California-Davis); M. D. Johnson, Ph.D. (NMSU); N. Khandan, Ph.D. (Drexel University); J. P. King, Ph.D. (Colorado State); S. Langarudi, Ph.D. (Worcester Polytechnic); A. S. Lara, Ph.D. (NMSU); B. Leinauer, Ph.D. (Hohenheim University, Germany); H. Luo, Ph.D. (Tulane); L. Papeis, Ph.D. (Stanford); G. A. Picchioni, Ph.D. (Texas A&M); R. C. Pratt, Ph.D. (Purdue); D. A. Rockstraw, Ph.D. (Oklahoma); R. Sallenave, Ph.D. (University of Guelph, Canada); Z. A. Samani, Ph.D. (Utah State); M. K. Shukla, Ph.D. (University of Agricultural Sciences-Vienna, Austria); G. Sims, Ph.D. (Purdue); G. B. Smith, Ph.D. (North Carolina State); R. G. Smits, Ph.D. (Purdue); S. N. Smirnov, Ph.D. (Novosibirsk University, Russia); R. St. Hilaire, Ph.D. (Iowa State); C. M. Steele, Ph.D. (King's College, University of London, UK); K. Stevens, M.S. (NMSU); B. L. Stringam, Ph.D. (Utah State); A. L. Ulery, Ph.D. (California-Riverside); J. Urquidi, Ph.D. (Texas Tech); F. A. Ward, Ph.D. (Colorado State); N. Webb, Ph.D. (University of Queensland, Australia); B. Widner, Ph.D. (Colorado State); P. Xu, Ph.D. (Ecole Nationale de Genie Rural, France)

Water Science and Management Courses

WSAM 470. Environmental Impacts of Land Use and Contaminant Remediation

3 Credits (3)

The course will cover the integrated assessment of soil erosion, contaminant transport in soil and water, and contaminant remediation from site scale to watershed scales. Understanding of the controlling factors for each type land use impact will be gained through the use of risk assessment, case studies, and computer modeling. Case studies will illustrate the processes under various environmental applications. This course will also cover the application of solute transport principles

and methods for the remediation of contaminated soil and groundwater. It will also discuss the contaminated site characterization, monitoring, and remediation design. Discussions of innovative methodologies will be supported with case studies. May be repeated up to 3 credits. Crosslisted with: ENVS 470.

WSAM 550. Special Topics

1-4 Credits (1-4)

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 9 credits.

Learning Outcomes

1. Readings, discussions, and/or field and laboratory investigation of selected problems.

WSAM 551. Earth Data Retrieval

3 Credits (3)

This course covers topics related to identifying sources, preprocessing, utilizing earth data that can be used to monitor some hydrological and water related variables, vegetation growth and related biophysical properties. The course focuses on developing students' skills on how to handle and analyze high-level large amounts of research data in different formats (i.e. .hdf). The course highlights the use of remote sensing and land surface models-based (NLDAS) earth observation datasets (e.g. NDVI, LST, Ta, and ET). The course uses some open-source tools including Python, API as well as MATLAB. Crosslisted with: RGSC 551.

WSAM 575. Climate Studies, Water and Society

3 Credits (3)

The course provides a brief description of the Earth's climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water availability) vulnerability of human systems (e.g. agriculture) to climate change, and mitigation and adaptation strategies. Crosslisted with: RGSC 575.

WSAM 585. Land Cover Analysis for Natural Resources

3 Credits (3)
