10. Facilitate curriculum in which children communicate at a basic level in the four (4) art disciplines of dance, music, theater, and visual arts, including knowledge and skills in the use of basic vocabularies, materials, tools, techniques, and thinking processes of each discipline. H.five.c 1
11. Create a classroom environment with exemplary works of art from a variety of cultures and historical periods and provide opportunities for students to discuss and respond to them. H.five.d 1
12. Demonstrate an understanding of motor skill development in young children and apply knowledge of age and developmentally appropriate psychomotor and cognitive activities. H.five.e 1
13. Create and use appropriate instructional cues and prompts for motor skills, rhythms, and physical activity. H.five.f 1
14. Apply an understanding of child development knowledge coupled with child performance data to make informed instructional decisions. H.five.g 1
15. Support play in young children's learning and development from age Pre-K - grade three. I.six 1
16. Demonstrate sound knowledge and skills in using technology as a teaching and learning tool. I.seven 1
17. Demonstrate the ability to analyze and critique early childhood curriculum experiences in terms of the relationship of the experiences to the research base and professional standards. I.nine 1
18. Facilitate family involvement so that families are engaged with curriculum planning, assessing of children's learning, and planning for children's transitions to new programs. I.tweleve 1
19. Demonstrate conceptual knowledge of the principles and standards derived from 139 professional content organizations (zero to three, NAEYC, DEC) for curriculum decision making. I.thirteen 2
20. Demonstrate the use of reflective practice. I.fourteen

ECED 4310. Early Primary Field Placement 2 Credits (4P)

The field practicum is a co-requisite course with Teaching and Learning Reading and Writing; Teaching and Learning Math and Science; Teaching and Learning Social Studies, Fine Arts and Movement. The field based component will provide experiences that address curriculum content and practice teaching that is relevant for early primary children in developmentally and culturally sensitive ways. Graded: S/U Grading (S/U, Audit). Restricted to: TEP-ECED majors. May be repeated up to 2 credits.

Corequisite: ECED 4250, ECED 4260, ECED 4320.

Learning Outcomes

1. Demonstrate the ability to work collaboratively with educational assistants, volunteers, and others to individualize the curriculum and to meet program goals.
2. Demonstrate skill in collaboration with professionals from other disciplines (e.g., mental health, psychology, speech and language) when planning curriculum and teaching strategies for young children with diverse abilities.
3. Demonstrate an understanding and application of flexible teaching approaches that span a continuum from child-initiated to an adult-directed and from free exploration to scaffolded support or teacher modeling.
4. Apply an understanding of young children's need for balance, order, depth, variety, and challenge through curriculum planning, routines, and scheduling (e.g., daily, weekly, and longer-term).
5. Link child characteristics, needs, and interests with informal opportunities to build children's language, concept development, and skills.
6. Apply knowledge to create environments that enrich and extent children's play including intervention strategies (i.e., questioning), respect of cultural diversity and gender equity. Support play in young children's learning and development from age Pre-K - grade three.
7. Demonstrate the ability to promote positive social interactions and engage children in learning activities while actively working to increase social and emotional competence of all children.
8. Demonstrate the ability to analyze and critique early childhood curriculum experiences in terms of the relationship of the experiences to the research base and professional standards.
9. Facilitate family involvement so that families are engaged with curriculum planning, assessing of children's learning, and planning for children's transitions to new programs. 1
10. Demonstrate conceptual knowledge of the principles and standards derived from professional content organizations (zero to three, NAEYC, DEC) for curriculum-decision making. Demonstrate the use of reflective practice.

ECED 4320. Teaching and Learning Reading and Writing 3 Credits (3)

The foundation of this course is on understanding the reading process including the relationship between reading, writing, listening, and speaking; individual needs and abilities in reading instruction; and how to organize classrooms and select materials to support literacy development. Concepts of phonemic awareness, phonic instruction, vocabulary development, fluency and comprehension are integrated with the developmentally appropriate use of authentic assessment techniques, language/literacy immersion, and multicultural children's literature. Restricted to: TEP-ECED majors. May be repeated up to 3 credits.

Prerequisite: ECED 2115.

Corequisite: ECED 4310, ECED 4250, ECED 4260.

Learning Outcomes

1. This course will focus on the following New Mexico early childhood teacher education competencies and New Mexico State University's conceptual framework for teacher preparation.
2. Articulate an understanding of developmental theories and processes and their implications for appropriate methods of teaching reading in the K-third grade classroom.
3. Demonstrate knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework.
4. Provide and use anti-bias literacy materials and experiences, including primary language materials.
5. Plan appropriate whole group, small group, and individual activities that include appropriate accommodations for working with children with special needs.
6. Understand and articulate the concept of emergent literacy and the processes toward becoming an authentic reader and writer.
7. Understand the role of family in literacy development.
8. Respect and promote the use of the child's home language for learning.
9. Demonstrate knowledge of, and use effectively, a wide range of literacy assessment strategies and instruments to determine a child's strengths and areas of need. 1
10. Engage in reflection on current theoretical perspectives on the reading process and the role of print literacy in schools and our society. Our focus will be on rigorous inquiry about literacy education in U.S. schools and methods of literacy instruction. We will be examining how invisible cultural, historical, political, and social contexts have influenced and continue to influence teachers and schools. In your observations of reading and literacy education in your field experience it is critical that you become aware of these subtle but pervasive influences. To achieve this, we will focus our inquiry this semester on the following questions: What is literacy in early childhood education? ; Is that different from literacy outside of school?; How do young children use and pursue literacy? How do I promote literacy for all the children with whom I work?

**ECED 4810. Student Teaching/Seminar Early Childhood
3 Credits (3)**

Discussion of early childhood school issues related to student teaching. May be repeated up to 3 credits.

Learning Outcomes

1. Synthesis of knowledge and skills appropriate to teaching in PreK - 3rd grade educational settings.

**ECED 4996. Topics
3 Credits (3)**

Offered under various subtitles which indicate the subject matter to be covered. May be repeated up to 9 credits.

Learning Outcomes

1. Engage in the study of an ECED topic.

**ECED 4998. Field Experience (Infants Pre-K)
1 Credit (1)**

Supervised field experiences in early childhood settings: infants, toddlers, and pre-K programs. May be repeated up to 1 credit.

Learning Outcomes

1. Engage in an ECED field experience.

**ECED 5110. Working with Young Children with Special Needs, Ages 3-8
3 Credits (3)**

Addresses competencies for working with young children with exceptionalities, ages three eight, and their families. Public school, private school, Head Start and other models are included. Taught with ECED 4110 with differentiated assignments for graduate students. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate knowledge of the significance of individual differences in development and learning.
2. Demonstrate knowledge of how certain differences may be associated with rate of development and developmental patterns associated with developmental delays or specific disabilities. A.three
3. Demonstrate knowledge of the similarities between children who are developing typically and those with diverse disabilities. A.four
4. Demonstrate knowledge of how children acquire and use verbal, non-verbal, and alternative means of communication. A.nine
5. Demonstrate understanding of the importance of families as the primary educator of their child. C.six
6. Demonstrate the ability to incorporate the families' desires and goals for their children into classroom or intervention strategies. C.seven
7. Demonstrate ability to communicate to families the program's policies, procedures, and those procedural safeguards that are mandated by state and federal regulations. C.eleven
8. Apply knowledge of family theory and research to understand family and community characteristics including socioeconomic conditions, family structures, relationships, stressors, and supports (including the impact of having a child with divers abilities), home language, and ethnicity. C.twelve
9. Adapt content to meet the needs of each child, including the development of individualized family service programs (IFSP) or individualized education programs (IEP) for children with diverse abilities through the team process with families and other team members. D.six 1
10. Create environments that encourage active involvement, initiative, responsibility, and a growing sense of autonomy through the selection and use of materials and equipment that are suitable to individual learning, developmental levels, diverse abilities, and the language and cultures in New Mexico. E.two 1
11. Create and manage inclusive learning environments that provide individual and cooperative opportunities for children to construct their own knowledge through various strategies that include decision-making, problem solving, and inquiry experiences. E.four 1
12. Demonstrate knowledge of developmentally appropriate uses of technology, including assistive technology. E.twelve 1
13. Demonstrate knowledge of maintaining appropriate records of children's development and behavior that safeguards confidentiality and privacy. F.two 1

14. Demonstrate knowledge of the educator's role as a participating member of the assessment process as described and mandated by state and federal regulations for individual family service programs (IFSP) and individual service programs (IEP). F.three 1
15. Articulate an understanding that responsible assessment is legally and ethically grounded and guided by sound professional standards. It is collaborative and open with the goal of supporting diverse children and families. F.eight 1
16. Demonstrate knowledge of a variety of techniques and procedures to evaluate and modify program goals for young children and their families. F.ten 1
17. Demonstrate ability to work collaboratively as an advocate with families and IFSP and IEP team members to provide developmentally supportive environments. H.three 1
18. Demonstrate content knowledge (e.g., art, music, movement, science, math, literacy, social studies, and technology) and familiarity with a wide variety of resources in academic disciplines and apply that knowledge in the development, implementation, and evaluation of curriculum. I.one
3. Develop a personal and social astuteness to the characteristics of culturally, linguistically, and ethnically distinct students while keeping in mind the uniqueness of their persona within a contextually rich school and community milieu.
4. Explore multicultural education strategies that will enhance one's future pedagogical repertoire.
5. Provide learning opportunities to develop multicultural and cross-cultural perspectives for application into future learning environments.
6. Develop an active sense of commitment to collaborative efforts in order to best meet our goals as committed learners and educators who will teach with and facilitate multicultural curriculum in a variety of pluralistic settings.
7. Develop an array of perspective skills in order to accommodate the dynamics of culture change, pluralism, cultural sensitivity, and cultural democracy that occur within classrooms.
8. Demonstrate growth in the dispositions identified in the "Teacher Candidate Disposition" document.

ECED 5120. Assessment of Young Children, Birth Eight 3 Credits (3)

Covers instruments and procedures for assessing young children and their families in order to determine atypical development. Screening, diagnosis, program planning, placement and evaluation issues are covered. Same as ECED 4120. May be repeated up to 3 credits.

Prerequisite: ECED 5110 or consent of instructor.

Learning Outcomes

1. UNDERSTAND THE TECHNICAL ASPECTS OF EARLY CHILDHOOD ASSESSMENTS -Define and understand the benefits and concerns of assessment, types of assessment, and best practices for early childhood assessments and their targeted populations.
2. CONDUCT AND UTILIZE ASSESSMENTS- Demonstrate proficiency in using a variety of assessment tools to: screen children; assess current skill levels; determine strengths and weaknesses; supplement assessments when warranted; and incorporate data for instructional plans.
3. COLLABORATE WITH OTHER PROFESSIONALS – Utilize transdisciplinary practices with all vested participants when conducting screenings, evaluations, and making recommendations.
4. COLLABORATE WITH FAMILIES- Demonstrate proficiency in obtaining information from parents about their expectations, needs, and priorities when assessing and making early childhood instructional recommendations.
5. EVALUATE PROGRAMS- Implement best practices in program design, advocate for children's services, and articulate/safeguard student IFSP/IEPs according to each child's developmental needs.

ECED 5130. Working with Parents of Young Children 3 Credits (3)

Techniques for setting up home and classroom visitations, communicating with parents, and establishing special programs. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate a deep understanding of the theory, philosophy and goals of multicultural education
2. Develop a knowledge base of the essential concepts to address language, culture, class, gender, and exceptionalities within the theoretical constructs of multicultural education.

ECED 5210. Leadership and Advocacy in Early Childhood 3 Credits (3)

The course explores a multidisciplinary approach to early childhood educational leadership, advocacy and change. The course focuses on leadership in its many forms: in teaching, administration, policy, research, and ethics. In addition, we will examine the theory and practice of change to gain an understanding of what contributes to advocating for policy and community change. Students will gain a deeper understanding of themselves as leaders, and ways to improve early education to promote social justice in programs and systems serving families and young children. May be repeated up to 3 credits.

Learning Outcomes

1. Examine and evaluate a multidisciplinary approach to early childhood educational leadership.
2. Examine leadership in its many forms: in teaching, administration, policy, research, and ethics.
3. Utilize theory and practice of advocacy leadership for policy and community change.
4. Develop a statement of leadership philosophy.

ECED 5220. Play in the Early Childhood Curriculum 3 Credits (3)

Advanced exploration of the development of curriculum based on children's play. A means of exploring and learning the patterns of human living, communications, and experiences congruous with developing interests and capacities. Restricted to majors. May be repeated up to 3 credits.

Learning Outcomes

1. Incorporate understanding of play stages, development, and theories of play in early childhood education into developmentally appropriate practice. (I.A)
2. Demonstrate knowledge of the different types of play (sociodramatic, constructive, rough tumble, games with rule) and their uses in classrooms to promote learning. (I.B)
3. Demonstrate knowledge of the significance of guiding young children's play to enhance learning in early childhood classrooms. (I.C)
4. Demonstrate knowledge of social influences on play and young children's development of gender identity. Provide and use anti-bias materials and experiences in all areas of the curriculum. (I.D)

5. Provide a variety of play activities that facilitate development of the whole child in all areas, physical/motor, social/emotional, language/cognitive and adaptive/living skills. (I.E)
6. Apply knowledge of cultural and play diversity and the significance of socio-cultural political contexts for development and learning and recognize that children are best understood in the contexts of family, culture, and society. (I.F)
7. Demonstrate knowledge of the many functions play serves in the cognitive, social, and emotional aspects of development in the formative years.
8. Develop and demonstrate skills in selecting quality play activities for young children. (I.G)
9. Demonstrate knowledge of the developmental sequences of play development, including the influence of culture and home factors. (I.H) 1
10. Demonstrate knowledge of how young children acquire and use technology play to promote learning. (I.I) 1
11. Demonstrate knowledge of how play is used to support standards and assessment in early childhood education. (I.J)

ECED 5230. Curriculum in Early Childhood Education
3 Credits (3)

Development and implementation of curriculum and materials for teaching young children. May be repeated up to 3 credits.

Learning Outcomes

1. Understand and implement appropriate ECED curriculum.

ECED 5310. Issues in Early Childhood Education
3 Credits (3)

Examines current trends and problems through readings of theoretical, empirical, and applied literature. May be repeated up to 3 credits.

Learning Outcomes

1. Examine the foundations of literacy development in early childhood.
2. Analyze sociocultural and critical perspectives in early literacy research, theory, and practice.
3. Apply grounded perspectives on topical issues in literacy development in early childhood.
4. Evaluate the literacies embedded in your own teaching/learning and the ones embedded in the communities in which they work.
5. Create sound theoretical and methodological frameworks in an early literacy project. Identify and use various genres in children's literature.

ECED 5410. Seminar on Child Development, Assessment and Well-being of Young Children
3 Credits (3)

This course will reintroduce you to the world of young children in a variety of early childhood settings. It focuses on early childhood development, observation of young children and evaluation of classrooms, child well-being, and the many ways in young children learn. Sessions will bridge theory to practice as we explore your internship experiences and gain deeper understanding of your role as an early care and education professional. May be repeated up to 3 credits.

Learning Outcomes

1. Incorporate understanding of developmental stages, process, and theories of growth, development, and learning into developmentally appropriate practice.
2. Demonstrate knowledge of the interaction between maturation and environmental factors that influence physical, social, emotional,

cognitive, and cultural domains in the healthy development of each child.

3. Demonstrate knowledge of the similarities between children who are developing typically and those with special needs.
4. Provide a variety of activities that facilitate development of the whole child in the following areas: physical/motor, social/emotional, language/cognitive, and adaptive/living skills. (I.E)
5. Demonstrate knowledge of the many functions that language serves in the cognitive, social, and emotional aspects of development in the formative years. (I.G)
6. Demonstrate knowledge of the developmental sequence of language and literacy, including the influence of culture and home factors. (I.H)
7. Recognize signs of emotional distress, child abuse, and neglect in young children and use procedures appropriate to the situation, such as initiating discussions with families, referring to appropriate professionals, and, in cases of suspected abuse or neglect, reporting to designated authorities. B.four
8. Demonstrate ability to adhere to early childhood education professional codes of ethical conduct and issues of confidentiality. G.one
9. Demonstrate awareness of federal, state, and local regulations, and public policies regarding programs and services for children birth through eight years of age. G.two 1
10. Demonstrate critical reflection of one's own professional and educational practices from community, state, national, and global perspectives. G.four 1
11. Demonstrate knowledge in technology resources to engage in ongoing professional development. G.seven 1
12. Articulate an understanding of indoor and outdoor learning environments that provide opportunities for children to put into practice healthy behaviors (physically, socially, and emotionally). B.two 1
13. Use appropriate health appraisal and management procedures and make referrals when necessary. B.three 1
14. Establish an environment that provides opportunities and reinforcement for children's practice of healthy behaviors that promote appropriate nutrition and physical and psychological well-being. B.five 1
15. Implement health care and educational activities for children and families based on health and nutritional information that is responsive to diverse cultures. B.seven

ECED 5420. Science/Math Curriculum
3 Credits (2+2P)

Methods and materials for developmentally appropriate practices in teaching science and math for young children. May be repeated up to 3 credits.

Learning Outcomes

1. Synthesis of knowledge and skills appropriate to teaching in PreK - third grade educational settings.

ECED 5510. Advanced Teaching and Learning of Literacy
3 Credits (3)

This advanced graduate early literacy course reviews the reading process including the relationship between reading, writing, listening, and speaking; individual needs and abilities in reading instruction; and how to organize classrooms and select materials to support literacy development. Concepts of phonemic awareness, phonic instruction, vocabulary development, fluency and comprehension are integrated with the developmentally appropriate use of authentic assessment

techniques, language/literacy immersion, and multicultural children's literature.

Learning Outcomes

1. This course will focus on the following New Mexico early childhood teacher education competencies and New Mexico State University's conceptual framework for teacher preparation.
2. Articulate an understanding of developmental theories and processes and their implications for appropriate methods of teaching reading in the K-third grade classroom.
3. Demonstrate knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework.
4. Provide and use anti-bias literacy materials and experiences, including primary language materials.
5. Plan appropriate whole group, small group, and individual activities that include appropriate accommodations for working with children with special needs.
6. Understand and articulate the concept of emergent literacy and the processes toward becoming an authentic reader and writer.
7. Understand the role of family in literacy development.
8. Respect and promote the use of the child's home language for learning.
9. Demonstrate knowledge of, and use effectively, a wide range of literacy assessment strategies and instruments to determine a child's strengths and areas of need. 1
10. Engage in reflection on current theoretical perspectives on the reading process and the role of print literacy in schools and our society. Our focus will be on rigorous inquiry about literacy education in U.S. schools and methods of literacy instruction. We will be examining how invisible cultural, historical, political, and social contexts have influenced and continue to influence teachers and schools. In your observations of reading and literacy education in your field experience it is critical that you become aware of these subtle but pervasive influences. To achieve this, we will focus our inquiry this semester on the following questions: What is literacy in early childhood education? Is that different from literacy outside of school? How do young children use and pursue literacy? How do I promote literacy for all the children with whom I work?

ECED 5520. Literacy Development in Early Childhood

3 Credits (3)

Advanced theory, research, and practice relating to early childhood reading. May be repeated up to 3 credits.

Learning Outcomes

1. This course will focus on the following New Mexico early childhood teacher education competencies and New Mexico State University's conceptual framework for teacher preparation.
2. Articulate an understanding of developmental theories and processes and their implications for appropriate methods of teaching reading in the K-third grade classroom.
3. Demonstrate knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework.
4. Provide and use anti-bias literacy materials and experiences, including primary language materials.
5. Plan appropriate whole group, small group, and individual activities that include appropriate accommodations for working with children with special needs.

6. Understand and articulate the concept of emergent literacy and the processes toward becoming an authentic reader and writer.
7. Understand the role of family in literacy development.
8. Respect and promote the use of the child's home language for learning.
9. Demonstrate knowledge of, and use effectively, a wide range of literacy assessment strategies and instruments to determine a child's strengths and areas of need. 1
10. Engage in reflection on current theoretical perspectives on the reading process and the role of print literacy in schools and our society. Our focus will be on rigorous inquiry about literacy education in U.S. schools and methods of literacy instruction. We will be examining how invisible cultural, historical, political, and social contexts have influenced and continue to influence teachers and schools. In your observations of reading and literacy education in your field experience it is critical that you become aware of these subtle but pervasive influences. To achieve this, we will focus our inquiry this semester on the following questions: What is literacy in early childhood education? Is that different from literacy outside of school? How do young children use and pursue literacy? How do I promote literacy for all the children with whom I work?

ECED 5810. Student Teaching/Seminar

3 Credits (3)

Provides student teaching experience in a variety of settings with young children ages birth 8. Restricted to: TEP-ECED majors. Students must be Admitted into student teaching to enroll. May be repeated up to 3 credits.

Learning Outcomes

1. Our mission is to serve the people of New Mexico through education, research, extension education, and public service with specific emphasis on innovative practices, overcoming barriers to learning, international activities, technology, and literacy for the diverse populations of New Mexico, surrounding states and border communities.

ECED 6110. History and Philosophy of Early Childhood Education

3 Credits (3)

Critical analysis of the historical development and philosophical underpinnings of the field of early childhood education as it relates to current practice. Restricted to doctoral-level students of any major. May be repeated up to 3 credits.

Learning Outcomes

1. Examine the historical figures in early childhood education that have influenced current practices and discourses.
2. Identify theoretical, scientific, and philosophical foundations in early childhood education that have defined childhood learning and development.
3. Critically examine the history of institutions and federal policies of early childhood education within the context of multiculturalism

ECED 6996. Selected Topics in Early Childhood Education

1-6 Credits (1-6)

Offered under various subtitles. May be repeated up to 6 credits.

Learning Outcomes

1. Engage in the study of an ECED topic.

ECON-ECONOMICS

ECON 1110G. Survey of Economics

3 Credits (3)

This course will develop students' economics literacy and teaches students how economics relates to the everyday life of individuals, businesses and society in general. The course will also introduce students to the roles different levels of governments play in influencing the economy. At the conclusion of the course, students will be able to identify economic causes for various political and social problems at national and international levels, and have a better understanding of everyday economic issues that are reported in media and public forums.

Learning Outcomes

1. Gain and demonstrate a contextual understanding of economic terms and concepts.
2. Recognize and analyze common economic issues which relate to individual markets and the aggregate economy.
3. Learn basic economic principles that influence global trading and challenges relating to globalization.
4. Outline the implications of various economic policies on individuals and on economies.
5. Demonstrate ability to use diagrams and graphs to explain economic principles, policies and their applications.
6. Appreciate and understand how individual decisions and actions, as a member of society, affect economies locally, nationally and internationally.
7. Explain the roles of governments in influencing buyer and seller behavior in the market and how government failure occurs when intervention fails to improve or actually worsens economic outcomes.
8. Be able to apply course concepts to interpret, evaluate and think critically about economic events and policies, especially as regularly reported in the media and other public forums.

ECON 2110G. Macroeconomic Principles

3 Credits (3)

Macroeconomics is the study of national and global economies. Topics include output, unemployment and inflation; and how they are affected by financial systems, fiscal and monetary policies.

Learning Outcomes

1. Explain the concepts of opportunity cost, comparative advantage and exchange.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium and use supply and demand curves to analyze responses of markets to external events.
3. Explain the circular flow model and use the concepts of aggregate demand and aggregate supply to analyze the response of the economy to disturbances.
4. Explain the concepts of gross domestic product, inflation and unemployment and how they are measured.
5. Describe the determinants of the demand for money, the supply of money and interest rates and the role of financial institutions in the economy.
6. Define fiscal policy and monetary policies and how these affect the economy.
7. Students will be able to identify the causes of prosperity, growth, and economic change over time and explain the mechanisms through which these causes operate in the economy.

ECON 2120G. Microeconomics Principles

3 Credits (3)

This course will provide a broad overview of microeconomics. Microeconomics is the study of issues specific to households, firms, or industries with an emphasis on the role of markets. Topics discussed

will include household and firm behavior, demand and supply, government intervention, market structures, and the efficient allocation of resources.

Learning Outcomes

1. Explain the concept of opportunity cost.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium.
3. Use supply and demand curves to analyze responses of markets to external events.
4. Use supply and demand analysis to examine the impact of government intervention.
5. Explain and calculate price elasticity of demand and other elasticities.
6. Demonstrate an understanding of producer choice, including cost and break-even analysis.
7. Compare and contrast the following market structures: perfect competition, monopoly, monopolistic competition, and oligopoly.

ECON 2120H. Principles of Microeconomics Honors

3 Credits (3)

Microeconomic theory and public policy: supply and demand, theory of the firm, market allocation of resources, income distribution, competition and monopoly, governmental regulation of businesses and unions. Must be a Crimson Scholar.

Prerequisite(s): MATH 1220G.

Learning Outcomes

1. Explain the concept of opportunity cost.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium.
3. Use supply and demand curves to analyze responses of markets to external events.
4. Use supply and demand analysis to examine the impact of government intervention.
5. Explain and calculate price elasticity of demand and other elasticities.
6. Demonstrate an understanding of producer choice, including cost and break-even analysis.
7. Compare and contrast the following market structures: perfect competition, monopoly, monopolistic competition, and oligopoly.

ECON 304. Money and Banking

3 Credits (3)

Income measurement and determination, monetary and fiscal policies.

Prerequisite(s): ECON 2110G or ECON 2110H or equivalent.

ECON 311. Intermediate Macroeconomic Theory

3 Credits (3)

Analysis of gross domestic product, the Classical, Keynesian, and Neo-Keynesian theories of income, employment, inflation and growth.

Prerequisite: ECON 2110G or ECON 2110H.

Learning Outcomes

1. Learn the uses and abuses of macroeconomic data
2. Learn the role of economic theory in understanding economic issues and forecasting economic behavior
3. Learn the causes and consequences of short-run economic fluctuations and long-run economic growth
4. Learn the role of government in the macroeconomy
5. By the end of the class, you should be able to describe the state of the macroeconomy and analyze the consequences of economic policy actions from several perspectives

ECON 312. Intermediate Microeconomic Theory**3 Credits (3)**

Contemporary economic theory with emphasis upon value and distribution.

Prerequisite: ECON 2120G or ECON 2120H or equivalent.

Learning Outcomes

1. Gain an understanding of the language of Intermediate Microeconomics.
2. Know the underlying structure of economic models such as supply and demand, consumer theory, producer theory and market structure.
3. Understand the assumptions of economic models.
4. Be able to solve a supply and demand model.
5. Demonstrate critical thinking skills by applying economic models to a wide variety of policy questions.

ECON 324V. Developing Nations**3 Credits (3)**

Economic analysis of problems related to development of developing nations. Issues such as growth, industrialization, poverty, population, international trade, foreign debt, and international economic relations.

ECON 325V. Economic Development of Latin America**3 Credits (3)**

Economic analysis of problems related to development in Latin America, including the agrarian problem, debt and austerity programs, industrialization, inflation and unemployment, the drug trade, U.S.-Latin American relations, development strategies. Also individual countries problems. May be repeated up to 3 credits.

Learning Outcomes

1. Identify the basic components of economic growth and development
2. Understand how Latin America fell behind other regions in terms of economic development
3. Compare various policies implemented to support economic development in Latin America, as well as the successes and failures of these policies
4. Gain a basic understanding of how to conduct independent research to be demonstrated by the completion of a term paper addressing an issue related to economic development in a nation or region of Latin America

ECON 332. Public Finance**3 Credits (3)**

This course will examine the roles of government in modern, market-oriented, mixed economies. It will examine justifications for government participation in resource allocation, income distribution, and economic stabilization focusing primarily on the fiscal functions of government, taxation and public expenditure. Students will apply basic microeconomic analysis to analyze the impacts of public taxation and expenditures on economic decisions made elsewhere in the economy. In this course the emphasis will be on understanding the workings of public finance in fiscal federalist systems like the United States, but the principles taught will be applicable across other economic systems. Prerequisites: ECON 2120G or ECON 2120H

ECON 335V. Business and Government**3 Credits (3)**

Relation of government to business through regulation; political, legal, and social implications. Crosslisted with: MGMT 335G

ECON 337V. Natural Resource Economics**3 Credits (3)**

Gain insight into important natural resource problems of our time. Apply economic principles to problems in the preservation, use, and

development of agricultural, range, mineral, water, forestry, fishery, and environmental resources. Understand the use of cost-benefit analysis for government natural-resource projects, policies, and programs. Same as AECC 337V.

Prerequisite: ECON 1110G or ECON 2120G or ECON 2120H.

ECON 345. Energy Economics**3 Credits (3)**

Examines the economics of energy production including oil, coal, natural gas, renewables, and conservation as a substitute for energy production. Emphasis is on federal and state regulatory framework, and resulting public policy issues from a regional and national perspective.

Prerequisite(s): (ECON 2110G or ECON 2110H), (ECON 2120G or ECON 2120H).

ECON 384V. Water Resource Economics**3 Credits (3)**

Use of economic principles to evaluate current and emerging issues in water resources. Applications focus on use of economic methods of analysis to current policy decisions surrounding agricultural, municipal, industrial, and environmental uses of water. Same as AECC 384V.

Prerequisite: AECC 1110 or ECON 2120G or ECON 2120H.

ECON 405. Introductory Econometrics**3 Credits (3)**

Multiple regression and correlation applied to economics and business; inference techniques; significance tests; simultaneous equations, estimation, and problems.

Prerequisite: MATH 1350G or A ST 311 (or equivalent).

Learning Outcomes

1. Demonstrate knowledge of probability and statistics and basic expected value theory.
2. Define the relationship between population statistics and sample statistics.
3. Explain the method of ordinary least squares.
4. Understand multiple regression, correlation, inference techniques, and significance tests.
5. Interpret basic econometric results.

ECON 445. Oil and Natural Gas Economics**3 Credits (3)**

Examines the economics of oil and gas production. Topics covered include transportation, refining, federal and state regulatory framework, and resulting public policy issues from a regional and national perspective.

Prerequisite: (ECON 2110G or ECON 2110H), (ECON 2120G or ECON 2120H).

Learning Outcomes

1. Oil and Natural Gas Production
2. Oil and Natural Gas Transportation and Storage
3. Advanced oil and gas market analysis
4. Economic analysis of government energy policy and regulation

ECON 449. Open Economy Macroeconomics**3 Credits (3)**

This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: I B 449.

Prerequisite(s): BFIN 341 OR ECON 311.

ECON 450. International Economics

3 Credits (3)

Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: I B 450

Prerequisite(s): ECON 2110G or ECON 2110H and ECON 2120G or ECON 2120H.

ECON 457. Mathematical Economics

3 Credits (3)

Application of mathematical tools, especially the calculus, to economic theory.

Prerequisite(s): MATH 1430G or equivalent.

ECON 471. Electricity Economics

3 Credits (3)

Regulatory policy and economic analysis related to the Electric Industry. Topics include characteristics of a utility and legal justification for regulation; characteristics and functions of a regulatory commission; history and structure of the industry; technology and network design; revenue requirements; cost allocation; and basic retail rate design. Crosslisted with: ECON 571.

Prerequisite(s): ECON 345.

ECON 489. Senior Economics Seminar

3 Credits (3)

Seminar primarily for economics majors in their final semester. Provides an opportunity to apply economic theory to a broad variety of topics.

Prerequisite(s): ECON 311 or ECON 312.

ECON 490. Selected Topics

1-3 Credits

Current topics in economics. Subject matter to be designated for each semester.

ECON 498. Independent Study

1-3 Credits

Individual studies directed by consenting faculty with the prior approval of the department head. May be repeated for a maximum of 3 credits.

Prerequisite: junior or above standing and consent of instructor.

ECON 503. Managerial Economics

3 Credits (3)

Theory and application of microeconomics to the management of organizations.

Prerequisite(s): MATH 1350G or A ST 311 or equivalent with B or better.

ECON 545. Econometrics II

3 Credits (3)

Application of statistical techniques to estimation of economic relationships: demand functions, production and cost functions, and macroeconomic equations.

Prerequisite(s): ECON 457 and AEEC 540.

ECON 550. Special Topics

1-3 Credits

Seminars in selected current topics in the various areas of economics. Prerequisites vary according to the topic being offered.

ECON 571. Regulatory Policy and Industry Analysis: Electricity I

3 Credits (3)

Regulatory policy and economic analysis related to the Electric Industry. Topics include: characteristics of a utility and legal justification for regulation; characteristics and functions of a regulatory commission; history and structure of the industry; technology and network design; revenue requirements; cost allocation; and basic retail rate design.

ECON 572. Regulatory Policy and Industrial Analysis: Water and Natural Gas

3 Credits (3)

Regulatory policy and economic analysis related to the Natural Gas and Water industries. Topics include: history and structure of the industry; technology and network design; revenue requirements; cost allocation; and retail rate design.

ECON 573. Regulatory Policy and Industry Analysis: Electricity II

3 Credits (3)

Regulatory policy and economic analysis related to the Electric industry. Topics include: optimal generation mix; ancillary services; environmental policies; rate case procedures and strategies for effective testimony; advanced retail rate design; wholesale exchanges; unbundled transmission tariffs; market institutions and how different markets function; state and federal deregulation policies; Federal Energy Regulatory Commission orders and policies; demand-side management; and regulatory treatment of non-traditional retail services. Consent of instructor required.

Prerequisite(s): ECON 571 or consent of instructor.

ECON 574. Advanced Seminar Regulatory Policy and Industry Analysis

3 Credits (3)

Advanced seminar and writing course specializing in regulatory policy and regulatory casework. Topics Include: special policy & regulatory issues in telecommunications, electricity, natural gas, and water; preparation of written testimony; expert witness effectiveness including cross-examination; and contested case management. This course involves extensive reading and writing assignments. Consent of instructor required.

Prerequisite(s): ECON 571 or consent of instructor.

ECON 596. Independent Study

3 Credits (3)

Individual study program. Each offering will cover a subtitle. Maximum of 3 credits in a semester and 6 credits in a program. Consent of instructor required.

EDLT-EDUCATIONAL TECHNOLOGY

EDLT 2110. Integrating Technology with Teaching

3 Credits (3)

Considers impact of technology on communication and knowledge development; engages students in the design of technology-integrated lessons with a constructivist approach.

Prerequisite: ENGL 1110G.

Learning Outcomes

1. Students will demonstrate a sound understanding of technology operations and concepts.
2. Students will plan and design effective learning environments and experiences supported by technology.
3. Students will implement curriculum plans that include methods and strategies for applying technology to maximize learning.
4. Students will apply technology to facilitate a variety of effective assessment and evaluation strategies.
5. Students will use technology to enhance their productivity and professional practice.
6. Students will better understand the social, ethical, legal, and human issues surrounding the use of technology on PreK-12 schools and apply that knowledge into future practice.

EDLT 3110. Integrating Technology with Teaching

3 Credits (3)

Considers impact of technology on communication and knowledge development; engages students in the design of technology-integrated lessons with a constructivist approach. May be repeated up to 3 credits.

Learning Outcomes

1. Students will demonstrate a sound understanding of technology operations and concepts.
2. Students will plan and design effective learning environments and experiences supported by technology.
3. Students will implement curriculum plans that include methods and strategies for applying technology to maximize learning.
4. Students will apply technology to facilitate a variety of effective assessment and evaluation strategies.
5. Students will use technology to enhance their productivity and professional practice.
6. Students will better understand the social, ethical, legal, and human issues surrounding the use of technology on PreK-Tweleve schools and apply that knowledge into future practice.

EDLT 5110. Foundations of Learning Design & Technology

3 Credits (3)

This course covers how to access, use, design, and evaluate instructional resources on the Internet, for blended and online learning environments. May be repeated up to 3 credits.

Learning Outcomes

1. Provide a rationale for using a systematic approach to learning design. Identify and summarize the major elements commonly included in instructional development models.
2. Define terms used to describe the phases and strategies of the learning design process. Conduct a needs assessment.
3. Demonstrate the following competency in the completion of an instructional development project: a) identify an instructional problem, b) analyze learners and learning contexts, c) plan and implement a goal analysis, d) specify terminal and enabling learning objectives, e) design criterion measures, f) prepare appropriate testing instruments and procedures, g) select appropriate instructional strategies, h) select appropriate instructional media (delivery systems), i) construct a prototype product, j) plan and conduct formative evaluations, and k) specify revisions resulting from formative evaluation.
4. Compare and contrast various instructional design perspectives and philosophies. Develop effective and efficient instructional products.

EDLT 5120. Critical Digital Literacy

3 Credits (3)

Explore, evaluate and use a variety of multimedia authoring tools including website, video, audio, image editing and apps (iOS/Android) for educational applications. May be repeated up to 3 credits.

Learning Outcomes

1. Considers impact of technology on communication and knowledge development; engages students in the design of technology-integrated lessons with a constructivist approach.

EDLT 5130. Technology and Language Learning

3 Credits (3)

Use of technology to enhance second language and dual language programs. Organized around technology enhanced communicative and interactive language learning environments. May be repeated up to 3 credits.

Learning Outcomes

1. Considers use of technology to enhance second language and dual language programs. Organized around technology enhanced communicative and interactive language learning environments

EDLT 5140. Fostering Online Learning Communities

3 Credits (3)

Examines theoretical and practical aspects of communication and collaboration and their impact on the formation of online learning communities for those teaching adults in higher education, business, or government settings. May be repeated up to 3 credits.

Learning Outcomes

1. Examine theoretical and practical aspects of communication and collaboration and their impact on the formation of online learning communities for those teaching adults in higher education, business, or government settings.

EDLT 5210. Social Media in Blended and Online Learning Environments

3 Credits (3)

This course will explore the role of social media in online and blended learning environments through practical hands-on activities, critical dialogue, and collaborative projects which will prepare you to utilize social media personally and pedagogically. May be repeated up to 3 credits.

Learning Outcomes

1. Describe and give examples of social media for use in your blended and online learning environments.
2. Actively engage, communicate and collaborate using social media, both inside the classroom and in appropriate social media-based learning environments.
3. Evaluate, analyze, and synthesize readings, research, and other information about social media in education.
4. Access, utilize, design, evaluate, and assess learning activities using social media.

EDLT 5220. Culturally Responsive Teaching with Technology

3 Credits (3)

Use of inquiry and problem-based learning supported by computer-based applications. Critical analysis of multiple forms of electronic media. May be repeated up to 3 credits.

Learning Outcomes

1. Engage in culturally responsive teaching with technology.

EDLT 5230. Designing and Organizing Online Learning Environments

3 Credits (3)

Explores the theories, models, approaches, technologies, and methods of online teaching and adult learning. Provides a foundation for examining the roles and characteristics of the online teacher and learner for those teaching adults in higher education, business, or government settings. May be repeated up to 3 credits.

Learning Outcomes

1. Design and organize effective online learning.

EDLT 5240. Online Teaching and Learning

3 Credits (3)

This course provides a survey of theories, models and methods used to design and deliver online education through the use of technologies in K-12, higher education, business/industry, and continuing education. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate an awareness of equity social justice issues related to online education.

- Critique and reflect upon diverse design frameworks,
- Develop online resources for use in your professional and personal educational pursuits,
- Explore and participate in the use of emerging technologies for online education.
- Identify and discuss the impact of different technological innovations on society with particular emphasis on education,
- Analyze and evaluate the use of technologies for teaching and learning in culturally relevant and responsive ways.

EDLT 5250. Tools and Techniques for Online Teaching
3 Credits (3)

Examines the theoretical and practical implications of various asynchronous and synchronous tools and their impact on teaching and learning through research and hands-on experience. May be repeated up to 3 credits.

Learning Outcomes

- Implement effective online teaching.

EDLT 5310. Design and Delivery of Webconferences and Webinars
3 Credits (3)

This course provides hands-on experiences with web conferencing and examines the theory and research of webconferencing's impact on teaching and learning. May be repeated up to 3 credits.

Learning Outcomes

- Demonstrate the skillful use of the technology tools for a synchronous webconferencing system.
- Evaluate best practices of interaction and engagement in the design and delivery webconferencing events.
- Develop a variety of webconferencing strategies to engage and manage webconferencing attendees.
- Design, develop, and implement the delivery of a web conference, first with a partner or team and individually by the end of the course.
- Use self- and peer-evaluation for continuous improvement of web conferencing sessions.

EDLT 5320. Universal Design in Online Course Design
3 Credits (3)

Examines theory, practical application of strategies, and global and policy implications of universal design (UD) in online learning environments. May be repeated up to 3 credits.

Learning Outcomes

- Understand and implement universal design.

EDLT 5330. Emerging Technology Tools and Techniques
3 Credits (3)

This course examines the theory, research, and practice of emerging technologies for educational practice and their impact on online teaching and learning. May be repeated up to 3 credits.

Learning Outcomes

- Implement effective techniques.

EDLT 5992. Directed Study
3 Credits (3)

Supervised academic work. Consent of Instructor required. May be repeated up to 3 credits.

Learning Outcomes

- Engage in the study of an EDLT topic.

EDLT 5999. Capstone
3 Credits (3)

The capstone course provides an opportunity to demonstrate teaching and learning in blended and fully online environments. Demonstrate competencies with best practices in culturally responsive teaching, learning/educational technology, online pedagogy, portfolio creation, and curriculum development for blended and online delivery using emerging technologies. May be repeated up to 3 credits.

Learning Outcomes

- Apply teaching and learning standards to review blended or online courses for learning environments.
- Demonstrate proficiency using the tools of learning management systems.
- Apply best practices in instructional design for blended/online courses
- Explain how research and practice inform your course instructional design decisions.
- Create a blended or online learning course that meets online teaching standards
- Demonstrate participation in an online learning community.

EDLT 6110. Foundations of Learning Design & Technology
3 Credits (3)

This course covers how to access, use, design, and evaluate instructional resources on the Internet, for blended and online learning environments. Includes a theoretical and research component for doctoral students. May be repeated up to 3 credits.

Learning Outcomes

- Provide a rationale for using a systematic approach to learning design. Identify and summarize the major elements commonly included in instructional development models.
- Define terms used to describe the phases and strategies of the learning design process. Conduct a needs assessment.
- Demonstrate the following competency in the completion of an instructional development project: a) identify an instructional problem, b) analyze learners and learning contexts, c) plan and implement a goal analysis, d) specify terminal and enabling learning objectives, e) design criterion measures, f) prepare appropriate testing instruments and procedures, g) select appropriate instructional strategies, h) select appropriate instructional media (delivery systems), i) construct a prototype product, j) plan and conduct formative evaluations, and k) specify revisions resulting from formative evaluation.
- Compare and contrast various instructional design perspectives and philosophies. Develop effective and efficient instructional products.

EDLT 6120. Emerging Models for Learning Design & Technology
3 Credits (3)

Integration of technology into content areas. May be repeated up to 3 credits.

Learning Outcomes

- Understand emerging EDLT models.

EDLT 6210. Current Research in Learning and Technology
3 Credits (3)

Explores models and methods for examining and researching the impact of technology on learning and education. May be repeated up to 3 credits.

Learning Outcomes

- Understand current technology research.

EDLT 6220. Multimedia, Authoring and Curriculum Design
3 Credits (3)

Explore, evaluate and use a variety of multimedia authoring tools including website, video, audio, image editing and apps (iOS/Android) for educational applications. Includes additional theoretical research component for doctoral students. May be repeated up to 3 credits.

Learning Outcomes

1. Facilitate effective technology learning environments.

EDLT 6230. Technology, Society, and Education

3 Credits (3)

Investigates models of the change process, examines speculations related to the directions and dynamics of change in an era of electronic technologies, explores shifts in the cultural and personal activities and relations of humans, and speculates on concomitant educational implications. May be repeated up to 3 credits.

Learning Outcomes

1. Understand technology and pedagogy.

EDLT 6240. Online Teaching and Learning

3 Credits (3)

This course provides a survey of theories; models and methods used to design and deliver online education through the use of technologies in K-12, higher education, business/industry, and continuing education. Topics covered include accreditation, assessment, culturally responsive course design, current trends and best practices, hybrid and blended learning, learning management systems, online support services, social justice issues in online education, learner engagement, and retention.

Learning Outcomes

1. Implement effective digital pedagogy.

EDLT 6998. Advanced Fieldwork

3 Credits (3)

Fieldwork in learning technologies provides opportunities to integrate theory and practice through research, teaching and/or development. May be repeated up to 3 credits.

Learning Outcomes

1. Examine the historical figures in early childhood education that have influenced current practices and discourses. Identify theoretical, scientific, and philosophical foundations in early childhood education that have defined childhood learning and development. Critically examine the history of institutions and federal policies of early childhood education within the context of multiculturalism

EDUC-EDUCATION

EDUC 1110. Freshman Orientation

1 Credit (1)

Introduction to the university and to the College of Education. Discussion of planning for individualized education program and field experience. Restricted to Las Cruces campus only. May be repeated up to 1 credit.

Learning Outcomes

1. Demonstrates knowledge of and uses theories, approaches, methods, and techniques for teaching, reading, writing, and other academic skills in English and the native language.
2. Demonstrates knowledge of and applies management techniques appropriate to classrooms containing students who have varying levels of proficiency and academic experience in both languages.
3. Community/Family Involvement- The bilingual teacher: (a) Recognizes the importance of parental and community involvement for facilitating the learner's successful integration to his/her school environment. (b) Demonstrates knowledge of the teaching and learning patterns of the students' home environment and incorporates these into the instructional areas of program.

4. Assessment- The bilingual teacher: (a) Assesses oral and written language proficiency in academic areas in both languages utilizing the results for instructional placement, prescription, and evaluation. (b) Evaluates the growth of the learner's native and second language in the context of the curriculum. (c) Continuously assesses and adjusts her or his own language use in the classroom in order to maximize learner comprehension and verbal participation

EDUC 1120. Introduction to Education

2 Credits (2)

Introduction to the historical, philosophical, sociological foundations of education, current trends, and issues in education; especially as it relates to a multicultural environment. Students will use those foundations to develop effective strategies related to problems, issues and responsibilities in the field of education. Restricted to Las Cruces campus only. May be repeated up to 2 credits.

Learning Outcomes

1. Describe the teaching and learning of various American education settings including early childhood, elementary, middle school, high school, and special education.
2. Describe how teachers use educational theory and the results of research of students' learning.
3. Explain the techniques for establishing a positive and supportive environment in the classroom
4. Identify and describe instructional strategies supported by current research to promote thinking skills of all learners.
5. Recognize the teachers' role and responsibilities in an increasingly diverse, multicultural society.

EDUC 1140. Math for Paraprofessionals

3 Credits (3)

Applied math skills for paraprofessionals working with children. May be repeated up to 3 credits.

Prerequisite: CCDM 103 N.

Learning Outcomes

1. Students will plan developmentally appropriate math activities for young children.
2. Students will plan adaptations to math activities for children with diverse abilities.
3. Students will demonstrate understanding of recent research in methods of teaching mathematics.
4. Students will demonstrate understanding of early childhood theories as they relate to the teaching of mathematics.
5. Students will demonstrate understanding of unique needs of children from diverse economic or cultural backgrounds.

EDUC 1150. Math for Paraprofessionals II

3 Credits (3)

Applied math skills for paraprofessionals working under the direction of a teacher. May be repeated up to 3 credits.

Prerequisite: EDUC 1140.

Learning Outcomes

1. Students will plan developmentally appropriate math activities for young children.
2. Students will plan adaptations to math activities for children with diverse abilities.
3. Students will demonstrate understanding of recent research in methods of teaching mathematics.
4. Students will demonstrate understanding of early childhood theories as they relate to the teaching of mathematics.

- Students will demonstrate understanding of unique needs of children from diverse economic or cultural backgrounds.

EDUC 1185. Introduction to Secondary Education and Youth

3 Credits (3)

Introductory course for students considering a career in secondary education. Includes historical, philosophical, and sociological foundations, program organization, critical dispositions, and understanding the context of schools and youth. Practicum required. Restricted to: Secondary Ed majors. Traditional Grading with RR.

Learning Outcomes

- Articulate the attributes of an education professional entering the field.
- Differentiate and summarize the major educational philosophies and historical events that have influenced the progression of educational practice.
- Describe the role of law in education with emphasis on the rights and responsibilities of teachers and learners.
- Develop a preliminary personal philosophy of teaching and learning.
- Discuss the characteristics and roles of the teacher, the student, and the school in today's education.
- Identify effective teaching methods, instructional strategies and learning styles.
- Evaluate the Lesson Planning Process using various lesson planning templates, formats, and rubrics.
- Explain classroom management techniques.
- Identify different types of diversity in the classroom environment, particularly in high-needs schools. 1
- Describe how learning differences are manifested in schools, particularly in high-needs schools. 1
- Describe how teachers use multiple methods of assessment to engage learners in their own growth, to monitor learner progress. 1
- Describe how teachers use multiple methods of assessment to modify instruction and inform decision making. 1
- Identify the role of Standards and High Stakes Testing in the life of an educational professional. 1
- Complete 24 hours internship in a classroom, preferably a bilingual classroom in a high-needs school. 1
- Document and reflect on your observations throughout your internship. 1
- Construct an individualized map to teacher licensure in the State of New Mexico.

EDUC 1995. Field Experience I

1 Credit (1)

Introduction to public school teaching, school visits, classroom observations and discussion seminar. May be repeated up to 1 credit.

Learning Outcomes

- Demonstrate an understanding of personal attitudes and motivations for entering the field of education.
- Identify effective teaching strategies that enhance student learning outcomes.
- Identify classroom management techniques and learning styles.
- Develop observational skills and reflective thinking skills.
- Evaluate instructional methods that enhance upper level thinking skills in children.

EDUC 1996. Special Topics in Education

1 Credit (1)

Supervised study in a specific area of interest. Each course shall be designated by a qualifying subtitle. May be repeated up to 9 credits.

Learning Outcomes

- Varies

EDUC 1998. Internship I

3 Credits (3)

Supervised experience in elementary education settings. May be repeated up to 3 credits.

Learning Outcomes

- Varies

EDUC 2710. Pre-Teacher Preparation

3 Credits (3)

Assists students in developing the necessary competencies needed for acceptance to the Teacher Education Program. Course content includes basic skill development, test taking skills, and completion of teacher preparation packet. May be repeated up to 6 credits.

Learning Outcomes

- Investigate the process and requirements of the Teacher Education Program
- Read critically about teacher's experiences and write brief reactions
- Discuss philosophies of education and draft a written personal philosophy of education
- Discuss the nature of education for students with diverse languages, cultures and abilities
- Draft personal position statements concerning education for students with disabilities and diverse cultures

EDUC 2998. Internship II

3 Credits (3)

Supervised experience in junior high settings. May be repeated up to 3 credits.

Prerequisite: must be a co-op student.

Learning Outcomes

- Varies

EDUC 3110V. Multicultural Issues in Society

3 Credits (3)

Conceptual manifestations of culture, race, ethnicity, class, gender, exceptionalities, language, and bilingualism within and across society. May be repeated up to 3 credits.

Learning Outcomes

- Understand what is meant by "multicultural education" and respond to the issues and challenges involved as learners, educators, and education stakeholders;
- Reflect on definitions of power and privilege, critique understandings of difference, and examine the multi-faceted ways in which multicultural education can be enacted in pedagogy, curriculum, and educational organizations;
- Examine the intersections between race, class, gender, sexuality, language, and citizenship status and try to assess their impact on teaching and learning;
- Evaluate their own identities, biases, and position in the curricula and schooling experience.

EDUC 3120. Multicultural Education

3 Credits (2+2P)

The conceptual manifestations of culture, race and ethnicity, class, gender, sexual orientation, exceptionalities, language, bilingualism, and

global citizenship within the schooling process. May be repeated up to 3 credits.

Learning Outcomes

1. Understand what is meant by “multicultural education” and respond to the issues and challenges involved as learners, educators, and education stakeholders;
2. Reflect on definitions of power and privilege, critique understandings of difference, and examine the multi-faceted ways in which multicultural education can be enacted in pedagogy, curriculum, and educational organizations;
3. Examine the intersections between race, class, gender, sexuality, language, and citizenship status and try to assess their impact on teaching and learning;
4. Evaluate their own identities, biases, and position in the curricula and schooling experience.

EDUC 3210. Sheltered English Instruction for the ESL Classroom 3 Credits (3)

Addresses the acquisition of English proficiency by speakers of other languages. May be repeated up to 3 credits.

EDUC 3220. Language, Literacy, and Culture in the ESL Classrooms 3 Credits (3)

Framework and strategies for developing the written abilities of second language learners. May be repeated up to 3 credits.

EDUC 3996. Special Topics in Education 1-3 Credits (1-3)

Offered under various subtitles in the Schedule of Classes. May be taken for a maximum of 3 cr. per semester and a total of 6 credits overall. May be repeated up to 6 credits.

Learning Outcomes

1. Engage in the study of a specific education topic.

EDUC 3997. Secondary Field Experience 3 Credits (2+2P)

Develop professional skills, dispositions, and understanding of secondary bilingual youth, content, and pedagogy through discussion seminar and interactions with public education mentor teachers. Focused observations, study of classroom language and culture, introduction to lesson planning and student assessment. Requires 32 hours of practicum field experience. Taught with: BLED 3110. May be repeated up to 3 credits.

Learning Outcomes

1. Understand and implement effective practices in secondary education.

EDUC 4310. Methods of Teaching Elementary School Science 3 Credits (2+2P)

Methods and materials for teaching elementary school science. Includes components of lessons and the use of multimedia. Students must complete 9 hours of science from biology, chemistry, physics, and earth sciences, with no more than 3 hours from any one department. Restricted to: TEP-EED majors. May be repeated up to 3 credits.

Learning Outcomes

1. Create, teach, and assess research based, hands-on, elementary science lessons;
2. Create, teach, and assess research based, hands-on, elementary science lessons that meet the diverse needs of all learners in all aspects of science instruction;
3. Develop assessment tools to evaluate learner's science knowledge;

4. Identify and use appropriate NMSTEM Ready!State science standards for lesson planning;
5. Integrate science with all subjects;
6. Discuss the advantages and the importance of membership in national/international professional organizations(e.g. NSTA) as well as subscribing to professional journals;
7. Identify science educational resources available using a variety of technological tools to enhance learning;
8. Demonstrate competence and confidence in teaching science;
9. Demonstrate basic classroom management skills.

EDUC 4320. Methods of Teaching Elementary School Mathematics 3 Credits (3)

Content, theories of cognition, and instructional approaches for the teaching of mathematics in the elementary grades.

Prerequisite: MATH 1134.

Learning Outcomes

1. Identify what makes a ‘good mathematical task’, and how a good task can support students’ learning;
2. Understand how children make sense of key mathematics concepts;
3. Understand how tools (including manipulatives, calculators, and other technology) assist children in their thinking and problem solving;
4. Identify your role as a teacher in a math classroom;
5. Practice teaching elementary mathematics activities using a constructivist approach and reflect upon your teaching;
6. Adjust lessons and instruction based on students’ needs;
7. Develop a stance of inquiry, explore habits of mind, examine and your own mathematical knowledge and develop the mathematical knowledge needed for effective teaching;
8. Experience mathematics through thinking, reasoning, discourse/communicating, and developing math ideas with understanding so that as teachers you can facilitate learning as you work with students in this process;
9. Begin to develop your knowledge and skills to effectively support ALL learners; in particular students with special needs and bilingual/English Language Learners in mathematics

EDUC 4330. Methods of Teaching Elementary School Social Studies 3 Credits (2+2P)

Focus on social studies curriculum and instruction including student-centered approaches, active learning, educational technology, nontextual curriculum, integration, multicultural education, authentic assessment, and practical applications. May be repeated up to 3 credits.

Learning Outcomes

1. Understanding of equity and social justice through Social Studies education;
2. Navigating the public-schools and how to integrate Social Studies lessons;
3. Lesson planning and delivering Social Studies instruction;
4. How to evaluate information found online for quality and truth; and
5. Critiquing instructional materials and resources.

EDUC 4410. Teaching Science at the Middle and High School Level 3 Credits (2+2P)

Integrating content knowledge and pedagogy for the middle and high school teacher in science. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of science for students in grades 6-12. Practicum required. Taught with EDUC 5410. May be repeated up to 3 credits.

Learning Outcomes

1. Understand and implement effective practices for teaching and learning in the secondary science classroom.

**EDUC 4420. Teaching Mathematics at the Middle and High School Level
3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in mathematics. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of mathematics. Practicum required. Taught with EDUC 5420. May be repeated up to 3 credits.

Learning Outcomes

1. Understand and implement effective practices for teaching and learning in the secondary mathematics classroom.

**EDUC 4430. Teaching Social Studies at the Middle and High School Level
3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in social studies. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of social studies. Practicum required. Taught with EDUC 5430. May be repeated up to 3 credits.

Learning Outcomes

1. Understand and implement effective practices for teaching and learning in the secondary social studies classroom.

**EDUC 4440. Teaching Language Arts at the Middle and High School Level
3 Credits (2+2P)**

Implications of cognition and language development for appropriate secondary instructional practices. Focus on construction of meaning, student-centered response to literature, writing process, print and oral language development, based on socio-psycholinguistic research and theory. Practicum required. Taught with EDUC 5440. May be repeated up to 3 credits.

Learning Outcomes

1. Students will evaluate ELA and SS resources and synthesize important domains of education, including history, seminal texts, current events/trends, and formative learning theories such as global learning.
2. Students will summarize classroom literacy, language, and culture of ELA/SS classrooms.
3. Students will identify authentic assessment and effective instructional strategies and materials that can be used to deliver engaging lessons in ELA/SS reading, writing, and literature study.
4. Students will justify their personal teaching philosophy in relation to the study of the history of ELA/SS education, literacy learning theories, teaching pedagogy, and field experiences.
5. Students will assemble a professional, culminating reflective portfolio that demonstrates the ability to self-assess strengths and needs based on the NM-Teach standards.

**EDUC 4510. Data Literacy and Assessment
3 Credits (3)**

Methods for selecting, constructing, and using multiple methods of assessment to monitor learner progress and improve student learning. Students will learn to analyze and use classroom and standardized assessment data to understand patterns and gaps in learning, to guide planning and instruction, and employ technology to support practice. May be repeated up to 6 credits.

Learning Outcomes

1. Understand and implement effective data literacy and assessment procedures.

**EDUC 4520. Contemporary Issues in Education
3 Credits (2+2P)**

Discussion of contemporary issues including: classroom management, motivation, conferences, professional organizations, professional ethics, community influences, cultural pluralism, reform movements, instructional influences, and educational technology. Requires field experience component in a school or community setting. May be repeated up to 3 credits.

Learning Outcomes

1. Understand important issues and practices in contemporary education.

**EDUC 4530. Science for Educators
3 Credits (3)**

This course will focus on the exploration of key central science concepts and how to connect learners to resources, tools of inquiry, and collaborative problem solving related to authentic local and global issues in classroom, lab, and digital science environments. Topics include: The nature of science, Physical Science, Life Science, Earth and Space Science.

Learning Outcomes

1. Understand primary science content and knowledge for K-12 classrooms.

**EDUC 4540. Teaching History
3 Credits (3)**

Philosophical and practical issues of teaching history and social studies are explored. Designed to help prospective teachers at all levels clarify their views about studying history and social studies. A variety of pedagogical strategies for teaching history and social studies are explored. This course offers a review of the New Mexico Social Studies Standards for teaching.

Learning Outcomes

1. Rethink and teach students to rethink history through multiple perspectives.
2. Utilize Bloom's Taxonomy and level of questioning.
3. Build essential questioning versus comprehensive questioning.
4. Utilize Webb's Depth of Knowledge.
5. Develop strong objectives for teaching and learning.
6. Initiate discussion in a classroom setting.
7. Build a Google classroom.
8. Create unit-based assigned on a topic in history (lesson and assessment development).
9. Utilize web resources that will include Open Education Resources or OER's. 1
10. Appraise the NM standards for Social Studies to develop lessons that actualize the standards.

**EDUC 4810. Elementary Student Teaching
9 Credits (9)**

Synthesis of knowledge and skills appropriate to teaching in elementary schools. May be repeated up to 9 credits.

Learning Outcomes

1. Synthesis of knowledge and skills appropriate to teaching in PreK - 3rd grade educational settings.

EDUC 4811. Elementary Student Teaching Seminar**3 Credits (3)**

Discussion of elementary school issues related to student teaching. Taken concurrently with EDUC 4810. May be repeated up to 3 credits.

Learning Outcomes

1. Candidates demonstrate an understanding of the critical concepts and principles in their discipline and of the pedagogical content knowledge necessary to engage students' learning of concepts and principles in the discipline;
2. Candidates create and implement learning experiences that motivate K-8 students, establish a positive learning environment, and support K-8 students' understanding of the central concepts and principles in the content discipline;
3. Candidates design, adapt, and select a variety of valid and reliable assessments and employ analytical skills necessary to inform ongoing planning and instruction, as well as to understand, and help students understand their own, progress and growth;
4. Candidates engage students in reasoning and collaborative problem solving related authentic local, state, national, and global issues, incorporating new technologies and instructional tools appropriate to such tasks. Candidates use research and evidence to continually evaluate and improve their practice, particularly the effects of their choices and actions on others, and they adapt their teaching to meet the needs of each learner;
5. Candidates design and implement appropriate and challenging learning experiences, based on an understanding of how children learn and develop. They ensure inclusive learning environments that encourage and help all K-8 students reach their full potential across a range of learner goals;
6. Candidates work with K-8 students and families to create classroom cultures that support individual and collaborative learning and encourage positive social interaction, engagement in learning, and independence;
7. Candidates build strong relationships with students, families, colleagues, other professionals, and community members, so that all are communicating effectively and collaborating for student growth, development, and well-being;
8. Candidates reflect on their personal biases and access resources that deepen their own understanding of cultural, ethnic, gender, sexual orientation, language, and learning differences to build stronger relationships and to adapt practice to meet the needs of each learner.

EDUC 4820. Secondary Student Teaching**9 Credits (9)**

Synthesis of knowledge and skills appropriate to teaching in secondary schools. May be repeated up to 9 credits.

Learning Outcomes

1. Carry out effective student teaching in a secondary classroom.

EDUC 4821. Middle and High School Student Teaching Seminar**3 Credits (3)**

Discussion of secondary school issues related to student teaching. Taken concurrently with EDUC 4820. May be repeated up to 3 credits.

Learning Outcomes

1. Carry out effective student teaching in a secondary classroom.

EDUC 4992. Directed Study Courses in Education**1-3 Credits (1-3)**

Each course shall be identified by a qualifying subtitle. Maximum of 3 credits in any one semester and a grand total of 6 credits. May be repeated up to 6 credits.

Learning Outcomes

1. Engage in the study of a specific education topic.

EDUC 4996. Topics**1-3 Credits (1-3)**

Offered under various subtitles which indicate the subject matter to be covered. A maximum of 3 credits in any one semester and a grand total of 3 credits. May be repeated up to 3 credits.

Learning Outcomes

1. Engage in the study of a specific education topic.

EDUC 5110. Exploration in Education**3 Credits (3+3P)**

Overview of elementary and secondary schooling. Includes opportunities to gain teaching experience in diverse settings.

Learning Outcomes

1. Explore important concepts and knowledge necessary to carry out effective practices in K-12 classroom settings.

EDUC 5120. Multicultural Education**3 Credits (2+2P)**

Conceptual manifestations of culture, race, and ethnicity, class, gender, exceptionalities, language and bilingualism within the schooling process. Taught with EDUC 3120 with differentiated assignments for graduate students. May be repeated up to 3 credits.

Learning Outcomes

1. Analyze the influence on learning of such social identities as race, class, sexual orientation, language, and gender.
2. Deconstruct tacit knowledges about learners and the learning process.
3. Distinguish among the structural and discursive forces that hamper particular students' educational attainment.
4. Evaluate one's own personal response to oppression in educational settings.
5. Support a pedagogical perspective and school level strategies targeted towards a more just and equitable education in your classroom.

EDUC 5130. Technology and Pedagogy**3 Credits (3)**

Critical analysis, design, and evaluation of computer-based technologies in teaching and learning for diverse communities. Students must be in Graduate standing. May be repeated up to 3 credits.

Learning Outcomes

1. Understand the relationship between curriculum and pedagogy.

EDUC 5140. Research in Curriculum and Pedagogy**3 Credits (3)**

An introduction to qualitative and quantitative designs for research in curriculum and instruction, with emphasis on action research. May be repeated up to 3 credits.

Learning Outcomes

1. Locate metrics useful for evaluating the quality of published research;
2. Identify the claims and supportive evidence presented in published empirical research;
3. Weigh the evidence presented in published empirical research;
4. Analyze the alignment of methods used in published empirical research with associated frameworks and research questions;
5. Synthesize a narrow body of literature in their field of interest.

EDUC 5150. Classroom Management**3 Credits (3)**

Strategies for managing classroom settings and determining appropriate modification of instructional approaches to meet changing classroom situations. May be repeated up to 3 credits.

Learning Outcomes

1. Understand effective practices in K-12 classroom management.

EDUC 5160. Curriculum and Pedagogy**3 Credits (3)**

Introduction, reconstruction, and other connections among historical, philosophical, sociocultural, psychological, and theoretical foundations of curriculum and pedagogy and their application to culturally and linguistically diverse teaching and learning settings. May be repeated up to 3 credits.

Learning Outcomes

1. Describe the historical development of standards, curriculum, and assessment in the USA;
2. Critically analyze the major influences on the historical development of standards, curriculum, and assessment;
3. Explain the positive and negative impacts these major influences have had on current standards, curriculum, and assessment;
4. Students will be able to express attainable planned actions to advocate for socially just and equitable systems within their school, district, community, and profession;
5. Construct a coherent pedagogical perspective that draws on the theories and perspectives discussed throughout the course;
6. Create a plan for a lesson that puts into action the curricular and pedagogical perspectives that place value in, and make space for, the diversity of individual social development within and between cultures.

EDUC 5170. Action Research Projects**3 Credits (3)**

Deeper explorations and connections among foundations of curriculum and pedagogy and their application to culturally and linguistically diverse teaching and learning settings through action research projects, approaches to assessment, and agency. May be repeated up to 3 credits.

Prerequisite: EDUC 5120, EDUC 5140.

Learning Outcomes

1. Understanding of Action Research
2. Develop an Action Research plan: Question Development; Data collection plan; Analysis
3. Analysis to Action for teaching: Applying data results to planning; Decision-making for changes in teaching
4. Presentation of Research: Research writing process

EDUC 5210. Sheltered English Instruction for the ESL Classroom**3 Credits (3)**

Addresses the acquisition of English proficiency via the SIOP (Sheltered Instruction Observational Protocol) a research validated model for lesson planning and implementation that provides English learners with access to grade-level standards.

EDUC 5220. Language, Literacy and Culture in the ESL Classrooms**3 Credits (3)**

Framework and strategies for developing the written abilities of second language learners. Explore different theories of language, culture and literacy by analyzing the interconnections between language, culture and literacy.

EDUC 5310. Methods of Teaching Elementary School Science**3 Credits (2+2P)**

Methods and materials for teaching elementary school science. Includes components of lessons, planning and teaching lessons in schools, and multimedia. Students should have 9 hours of science from biology, chemistry, physics, and earth science with no more than 3 hours from any one department to enroll in this course. Taught with EDUC 4310 with differentiated assignments for graduate students. May be repeated up to 3 credits.

Corequisite: ECED 5810; EDUC 5320; READ 5310.

Learning Outcomes

1. Create, teach, and assess research based, hands-on, elementary science lessons;
2. Create, teach, and assess research based, hands-on, elementary science lessons that meet the diverse needs of all learners in all aspects of science instruction;
3. Develop assessment tools to evaluate learner's science knowledge;
4. Identify and use appropriate NMSTEM Ready!State science standards for lesson planning;
5. Integrate science with all subjects;
6. Discuss the advantages and the importance of membership in national/international professional organizations(e.g. NSTA) as well as subscribing to professional journals;
7. Identify science educational resources available using a variety of technological tools to enhance learning;
8. Demonstrate competence and confidence in teaching science;
9. Demonstrate basic classroom management skills.

EDUC 5320. Methods of Teaching Elementary School Mathematics**3 Credits (2+2P)**

Content, theories of cognition, and instructional approaches for the teaching of mathematics in the elementary grades. Taught with EDUC 4320 with differentiated assignments for graduate students. May be repeated up to 3 credits.

Prerequisite: MATH 1134.

Corequisite: ECED 5810; EDUC 5310; READ 5310.

Learning Outcomes

1. Identify what makes a 'good mathematical task', and how a good task can support students' learning;
2. Understand how children make sense of key mathematics concepts;
3. Understand how tools (including manipulatives, calculators, and other technology) assist children in their thinking and problem solving;
4. Identify your role as a teacher in a math classroom;
5. Practice teaching elementary mathematics activities using a constructivist approach and reflect upon your teaching;
6. Adjust lessons and instruction based on students' needs;
7. Develop a stance of inquiry, explore habits of mind, examine and your own mathematical knowledge and develop the mathematical knowledge needed for effective teaching;
8. Experience mathematics through thinking, reasoning, discourse/communicating, and developing math ideas with understanding so that as teachers you can facilitate learning as you work with students in this process;
9. Begin to develop your knowledge and skills to effectively support ALL learners; in particular students with special needs and bilingual/English Language Learners in mathematics

EDUC 5330. Methods of Teaching Elementary School Social Studies**3 Credits (2+2P)**

Focus on social studies curriculum and instruction including student-centered approaches, active learning, educational technology, nontextual curriculum, integration, multicultural education, authentic assessment, and practical applications. Taught with EDUC 4330 with differentiated assignments for graduate students. May be repeated up to 3 credits.

Corequisite: READ 5320.

Learning Outcomes

1. Understanding of equity and social justice through Social Studies education;
2. Navigating the public-schools and how to integrate Social Studies lessons;
3. Lesson planning and delivering Social Studies instruction;
4. How to evaluate information found online for quality and truth; and
5. Critiquing instructional materials and resources.

**EDUC 5410. Teaching Science at the Middle and High School Level
3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in science. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of science for student in grades 6-12. Practicum required. Same as EDUC 463 with differentiated assignments for graduate students. TEP required May be repeated up to 3 credits.

Prerequisite: EDUC 5120 & EDUC 5110.

Learning Outcomes

1. Understand and implement effective practices for teaching and learning in the secondary science classroom.

**EDUC 5420. Teaching Mathematics at the Middle and High School Level
3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in mathematics. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of students in 6-12 setting settings for mathematics. Same as EDUC 4420 with differentiated assignments for graduate students. TEP required May be repeated up to 3 credits.

Prerequisite: EDUC 5120 & EDUC 5110.

Learning Outcomes

1. Understand and implement effective practices for teaching and learning in the secondary mathematics classroom.

**EDUC 5430. Teaching Social Studies at the Middle and High School Level
3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in social studies. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of social studies for student in grades 6-12. Practicum required. Same as EDUC 4430 with differentiated assignments for graduate students. TEP required May be repeated up to 3 credits.

Prerequisite: EDUC 5120 & EDUC 5110.

Learning Outcomes

1. Understand and implement effective practices for teaching and learning in the secondary social studies classroom.

**EDUC 5440. Teaching Language Arts at the Middle and High School Level
3 Credits (2+2P)**

Implications of cognition and language development for appropriate secondary instructional practices. Focus on construction of meaning, student-centered response to literature, writing process, print and oral language development, based on socio-psycholinguistic research and theory. Practicum required. Same as EDUC 4440 with differentiated

assignments for graduate students. TEP required. May be repeated up to 3 credits.

Prerequisite: EDUC 5120 & EDUC 5110.

Learning Outcomes

1. Students will evaluate ELA and SS resources and synthesize important domains of education, including history, seminal texts, current events/trends, and formative learning theories such as global learning.
2. Students will summarize classroom literacy, language, and culture of ELA/SS classrooms.
3. Students will identify authentic assessment and effective instructional strategies and materials that can be used to deliver engaging lessons in ELA/SS reading, writing, and literature study.
4. Students will justify their personal teaching philosophy in relation to the study of the history of ELA/SS education, literacy learning theories, teaching pedagogy, and field experiences.
5. Students will assemble a professional, culminating reflective portfolio that demonstrates the ability to self-assess strengths and needs based on the NM-Teach standards.

EDUC 5510. Elementary Science Development

3 Credits (3)

Understanding of the research on elementary development of science and its application in the classroom. Focus on how elementary students come to understand topics in the physical sciences, life sciences, and earth and space sciences. Includes applications to engineering and technology. Course assignments require working with elementary students. Consent of Instructor required. Restricted to: Master of Arts in Education: Elementary Mathematics and Science majors.

Learning Outcomes

1. To put current research on elementary students' development of science into practice.
2. To analyze student thinking to construct models of cognitive structures.
3. To select, sequence, and administer tasks to test models of students' cognitive structures.
4. To develop and facilitate a classroom lesson plan to build on models of students' cognitive structures.
5. To reflect on observations of student learning in relation to current research on elementary students' development of science.

EDUC 5520. Elementary Mathematics Development I

3 Credits (3)

Understanding of the research on elementary development of mathematics and its application in the classroom. Focus on how elementary students come to understand counting, the base 10 number system, and connections between early number understanding, geometric representations, fractions, and operations in later grades. Course assignments require working with elementary students. Consent of Instructor required. Restricted to: Master of Arts in Education: Elementary Mathematics and Science majors.

Learning Outcomes

1. To put current research on elementary students' development of mathematics into practice.
2. To analyze student thinking to construct models of cognitive structures.
3. To select, sequence, and administer tasks to test models of students' cognitive structures.
4. To develop and facilitate a classroom lesson plan to build on models of students' cognitive structures.

- To reflect on observations of student learning in relation to current research on elementary students' development of mathematics.

EDUC 5530. Elementary Mathematics Development 2

3 Credits (3)

Understanding of the research on elementary development of mathematics and its application in the classroom. Focus on how elementary students develop multiplicative reasoning from a foundation of additive reasoning, connections to geometric representations, and how multiplicative reasoning supports development of understanding of fractions, ratios, and rate—which leads to proportional reasoning. Course assignments require working with elementary students. Consent of Instructor required. Restricted to: Master of Arts in Education: Elementary Mathematics and Science majors.

Learning Outcomes

- To put current research on elementary students' development of science into practice.
- To analyze student thinking to construct models of cognitive structures.
- To select, sequence, and administer tasks to test models of students' cognitive structures.
- To develop and facilitate a classroom lesson plan to build on models of students' cognitive structures.
- To reflect on observations of student learning in relation to current research on elementary students' development of science.

EDUC 5540. Leadership Advocacy in Elementary Mathematics and Science

3 Credits (3)

This course focuses on development of elementary mathematics and science specialists' leadership qualities necessary to promote and advocate for positive change through active participation with other professionals and in their own professional growth that draws upon current research in their respective fields, development of professional development programs, evaluation of educational structures that impact equitable access to high quality instruction, and communication with stakeholders directly and indirectly associated with education institutions. Consent of Instructor required. Restricted to: Master of Arts in Education: Elementary Mathematics and Science majors.

Learning Outcomes

- To leverage current research on elementary students' development of mathematics science to enact change in teaching practice and education policy.
- To make use of leadership skills to facilitate discussion with education stakeholders, school and district administrators, and teaching professionals.
- To make use of leadership skills to collaborate with education stakeholders, school and district administrators, and teaching professionals.
- To examine current mathematics and science teaching practice within a school or district and create a professional development plan that aligns with current research on best practices.
- To examine current mathematics and science teaching practice within a school or district and create a professional development plan that aligns with district and/or school mission and vision.

EDUC 5810. Student Teaching

6 Credits (6)

Integrated with EDUC 5811. Student is assigned to an elementary or secondary classroom for 14-16 weeks. Elementary or secondary.

Corequisite: EDUC 5811.

Learning Outcomes

- The teacher candidate seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.
- The teacher candidate uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
- The teacher candidate works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.
- The teacher candidate understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make these aspects of the discipline accessible and meaningful for learners to assure mastery of the content.
- The teacher candidate understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
- The teacher candidate understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues
- The teacher candidate understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.
- The teacher candidate plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.
- The teacher candidate understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways. 1
- The teacher candidate engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

EDUC 5811. Teaching Methods Laboratory

3 Credits (3)

Practical application of previously learned content. Students must have a Bachelors degree and admission to the Graduate School and departmental special program. May be repeated up to 3 credits.

Learning Outcomes

- Candidates demonstrate an understanding of the critical concepts and principles in their discipline and of the pedagogical content knowledge necessary to engage students' learning of concepts and principles in the discipline;
- Candidates create and implement learning experiences that motivate K-8 students, establish a positive learning environment, and support K-8 students' understanding of the central concepts and principles in the content discipline;

3. Candidates design, adapt, and select a variety of valid and reliable assessments and employ analytical skills necessary to inform ongoing planning and instruction, as well as to understand, and help students understand their own, progress and growth;
4. Candidates engage students in reasoning and collaborative problem solving related authentic local, state, national, and global issues, incorporating new technologies and instructional tools appropriate to such tasks. Candidates use research and evidence to continually evaluate and improve their practice, particularly the effects of their choices and actions on others, and they adapt their teaching to meet the needs of each learner;
5. Candidates design and implement appropriate and challenging learning experiences, based on an understanding of how children learn and develop. They ensure inclusive learning environments that encourage and help all K-8 students reach their full potential across a range of learner goals;
6. Candidates work with K-8 students and families to create classroom cultures that support individual and collaborative learning and encourage positive social interaction, engagement in learning, and independence;
7. Candidates build strong relationships with students, families, colleagues, other professionals, and community members, so that all are communicating effectively and collaborating for student growth, development, and well-being;
8. Candidates reflect on their personal biases and access resources that deepen their own understanding of cultural, ethnic, gender, sexual orientation, language, and learning differences to build stronger relationships and to adapt practice to meet the needs of each learner.

EDUC 5990. Master's Thesis**1-6 Credits (1-6)**

Thesis. A minimum of four credits and a maximum of six credits (thesis hours) can be counted toward the MA degree. The thesis hours require the permission of the course instructor. May be repeated up to 15 credits. May be repeated up to 15 credits.

Learning Outcomes

1. Graduate students at the Master of Arts level pursuing a research focus degree learn how to prepare for basic research study.
2. Graduate students at the Master of Arts level pursuing a research focus degree learn how to submit IRB for a research study.
3. Graduate students at the Master of Arts level pursuing a research focus degree learn how to conduct a comprehensive study.
4. Graduate students at the Master of Arts level pursuing a research focus degree learn how to summarize the research and write the results in a thesis.
5. Graduate students at the Master of Arts level pursuing a research focus degree learn how to present results from research and defend the results.

EDUC 5991. Special Research Programs**1-3 Credits (1-3)**

Individual investigations either analytical or experimental. Maximum of 3 credits per semester and a total of 6 credits overall. May be repeated up to 6 credits.

Learning Outcomes

1. Engage in a specific research topic.

EDUC 5992. Directed Study Courses in Education**1-3 Credits (1-3)**

Each course will be identified by a qualifying subtitle. Maximum of 3 credits in any one semester and a total of 6 credits overall. May be repeated up to 6 credits.

Learning Outcomes

1. Engage in a specific education topic.

EDUC 5996. Special Topics**1-3 Credits (1-3)**

Course subtitled in the Schedule of Classes. A maximum of 3 credits per semester and a total of 6 credits overall. May be repeated up to 6 credits.

Learning Outcomes

1. Engage in the study of a specific education topic.

EDUC 5997. Capstone Research Project**1-3 Credits (1-3)**

Capstone project. Maximum of 3 credits per semester and a total of 6 credits overall. Consent of Instructor required. Restricted to: Admittance into the Master of Arts in Education: Elementary Mathematics and Science program.

Learning Outcomes

1. To investigate a problem or issue in education.
2. To communicate results of the investigation in a scholarly manner.

EDUC 5998. Social Studies/Language Arts Methods Internship**3 Credits (3)**

Elementary alternative licensure process course designed to introduce intern licensed teachers to methods of instruction of social studies and language arts. University supervision provided simultaneously with EDUC 5998. Restricted to CI and HSS non-degree students. May be repeated up to 3 credits.

Learning Outcomes

1. Carry out a successful intership in social studies and language arts teaching methods.

EDUC 6110. Curriculum for a Diverse Society**3 Credits (3)**

Builds upon knowledge of the foundations of curriculum and professional experience in an educational setting. Focus on the role of the curriculum leader in understanding curriculum theory, designing curriculum, and implementing curriculum in various settings. May be repeated up to 3 credits.

Learning Outcomes

1. Reflect on the significance of the teachers' professional role in schools;
2. Analyze the notion of curriculum in a broader sense along with the concepts of culture and diversity;
3. Develop understanding of the fundamental theoretical constructs in organizing the way we interact and live in our society;
4. Assume the commitment to challenge the taken for granted assumptions that have led schools to be places where inequities have been perpetuated;
5. Take on the challenge of transforming schools into public social spheres where hope is promoted, looked for, and risks are taken and faced.

EDUC 6120. Pedagogy of Learning in a Diverse Society**3 Credits (3)**

Builds upon knowledge of the foundations of instruction and professional experience in teaching and learning. Focus on diverse theories of instruction with relevant practices in pluralistic settings and multicultural interactions of teaching and learning. May be repeated up to 3 credits.

Learning Outcomes

1. Instill a personal discipline that will establish clarity into your plan of studies to operationalize the direction of your research project;
2. Develop a deeper and thicker knowledge base, language facility, and chronological understanding that impact contemporary theoretical/philosophical paradigms;
3. Create a critical reflection on many of the contemporary issues/findings of recent brain research, its implications for pedagogy and andragogy and central to teaching and learning;
4. Articulate several of the diverse historical forces that legitimate certain teaching and learning practices, theories/issues in contemporary schooling life, and delegitimize other theories/issues just as easily;
5. Create a sense of collegiality and community with your seminar colleagues inside and outside of this course

**EDUC 6210. Curricular Mediation for Democratic Communities
3 Credits (3)**

Problematization of the various relationships, roles, and leadership considerations which emerge within educational institutions, their structures, and their culturally democratic practices in the classroom, community, and society. Restricted to doctoral-level students of any major. Same as BLED 6210. May be repeated up to 3 credits.

**EDUC 6220. Praxis and Reflexivity
3 Credits (3)**

The cyclical research processes of continuous self and systemic (re)evaluation vis-a-vis classroom, community, and society with an eye toward reflection, growth, change, and larger forms of social agency. Restricted to doctoral-level students of any major. Same as BLED 6220, READ 6220. May be repeated up to 3 credits.

Learning Outcomes

1. Students develop a more sound understanding of their research agenda.
2. Students will gain a better understanding of research in society, generally, and in education, specifically.
3. Students will work as a community of learners that struggles to understand our influence on educational policy and practice.
4. Students will synthesize reading material and create discussion opportunities for the entire class.
5. Students will complete writing assignments the social, ethical, legal, and human issues surrounding the use of technology uses, data literacy, and PreK-12 schools and apply that knowledge into future research.

**EDUC 6230. Research in Praxis: Qualitative Research II
3 Credits (3)**

This course offers a more in-depth view of research and research paradigms, theories, methods, approaches, and tools and is a sequential next step beyond Qualitative Research I. Concepts are developed to encourage research from problem formulation to interpretation of results as reflected by students' own scholarly engagements. Course activities can include alternative community-or-school-based research aimed at investigating and transforming educational realities with the participants for their own scholarly growth and development. Students will experience the dynamic between research theory and practice in education.

Learning Outcomes

1. Develop processes required for research problems within educational settings, design relevant qualitative research strategies.

2. Examine research problems, determine relevant sources, practice data collection/analysis methods, and assess the results of such efforts.

**EDUC 6310. Critical Theory and Pedagogy
3 Credits (3)**

Covers the various schools of thought on pedagogy, the historical and philosophical foundations embedded in these schools, and their impact on educational settings. Restricted to doctoral-level students of any major. Same as BLED 6310. May be repeated up to 3 credits.

**EDUC 6320. Social Justice Issues in Education
3 Credits (3)**

Covers the systems of oppression located within the constructs of power and hegemony and their impact on schooling. Restricted to doctoral-level students of any major. Same as BLED 6320. May be repeated up to 3 credits.

**EDUC 6330. Critical Race Theory & Storytelling in Educational Spaces
3 Credits (3)**

An upper-level doctoral course focusing on the philosophical, theoretical, and methodological origins and practices of CRT and the sister frameworks that emerged from CRT, i.e., AsianCrit, BlackCrit, FemCrit, LatCrit, QueerCrit, TribalCrit, and WhiteCrit within educational spaces. May be repeated up to 3 credits.

Learning Outcomes

1. Articulate the major tenets and assumptions of critical race theory (CRT);
2. Evaluate CRT's usefulness in educational research and what makes a CRT analysis unique or different from other analyses;
3. Synthesize research conducted by CRT scholars and the effect of racial injustice on students of color;
4. Analyze and disrupt majoritarian narratives (stories) that perpetuate racial injustice in the U.S., with a focus on institutions that intersect with educational systems.

**EDUC 6340. Theoretical Frameworks and Research Design Topics
3 Credits (3)**

This course offers an in-depth view of research and research paradigms, theories, methods, approaches, and tools. This course strives to encourage development of a research paradigm from problem formulation to interpretation of results. May be repeated up to 3 credits.

Learning Outcomes

1. Identify frameworks of research including affordances and challenges based on research goals.
2. Develop concepts related to previous explorations of research paradigms, approaches, methods, and tools reflect on your own research activity.
3. Conceptualize the tasks and processes of research problems within educational settings, design relevant research strategies.
4. Examine problems via heuristics to consider select pertinent data sources, data collection methods, and data analysis methods.

**EDUC 6410. Current Research in Educational Practice
3 Credits (3)**

A seminar for doctoral and education specialist students emphasizing current research and educational practices. May be repeated up to 3 credits.

Learning Outcomes

1. Engage in the study of a specific education research topic.

**EDUC 6420. Evaluation of Quantitative Research in Education
3 Credits (3)**

A doctoral-level exploration of a broad range of quantitative research designs and methodologies for collection and analysis of data as applied to critical review of the literature. May be repeated up to 3 credits.

Learning Outcomes

1. Identify the tasks and processes required to formulate appropriate research problems within educational settings, design relevant qualitative research strategies; for examining such problems, select pertinent data sources, data collection methods, and data analysis methods, and assess the results of such efforts.

EDUC 6430. Advanced Statistics

3 Credits (3)

An intermediate course focusing on more advanced theories and techniques of inferential statistics as applied to education and psychology. Includes ANOVA, planned contrasts, ANCOVA, simple regression, and non-parametrics. A computer package will be the primary tool for data analysis.

Prerequisite: EDUC 6420 or equivalent course work.

Learning Outcomes

1. Demonstrates knowledge of and uses theories, approaches, methods, and techniques for research in education.
2. Demonstrates knowledge of and applies research techniques appropriate to a research problem.

EDUC 6440. Qualitative Research I

3 Credits (3)

This course offers an examination of qualitative research approaches used in educational and social settings, with a focus upon research design, field relations, data collection and analysis, and writing from a qualitative perspective. May be repeated up to 3 credits.

Learning Outcomes

1. Identify the tasks and processes required to formulate appropriate research problems within educational settings, design relevant qualitative research strategies; for examining such problems, select pertinent data sources, data collection methods, and data analysis methods, and assess the results of such efforts.

EDUC 6910. Dissertation Seminar

3 Credits (3)

Dissertation seminar course for doctoral students utilizing a qualitative research design. May be repeated up to 3 credits.

Learning Outcomes

1. To investigate a problem or issue in education.
2. Prepare the first three chapters of a dissertation.

EDUC 6990. Practicum

2-6 Credits (2-6)

Provision for field inquiries and experiences designed to prepare the doctoral student for assuming responsibilities in the areas of curriculum and instruction. Students must be in post-master's standing. May be repeated up to 6 credits.

Learning Outcomes

1. Plan course of study with with faculty advisor or instructor.
2. Set practicum expectations for semester.

EDUC 6991. Doctoral Research

1-15 Credits (1-15)

Research. May be repeated up to 88 credits.

Learning Outcomes

1. Engage in a specific research topic.

EDUC 6996. Selected Topics

1-6 Credits (1-6)

Offered under various subtitles which indicate the subject matter to be covered. A maximum of 6 credits per semester and a total of 6 credits overall. May be repeated up to 6 credits.

Learning Outcomes

1. Engage in the study of an ECED topic.

EDUC 6997. Independent Study Topics

1-3 Credits (1-3)

A problem and seminar course for those pursuing an advanced graduate degree. Course subtitled in the Schedule of Classes. May be repeated up to 99 credits.

Learning Outcomes

1. Plan course of study with with faculty advisor or instructor
2. Set course expectations.

EDUC 6998. Internship in Curriculum and Instruction

3-6 Credits (3-6)

For those pursuing an advanced graduate degree to meet the requirement for field work. Each course to bear an appropriate subtitle. May be repeated up to 6 credits.

Learning Outcomes

1. Complete an educational internship.

EDUC 6999. Ed.S. Thesis

1-15 Credits (1-15)

Offered primarily for those pursuing the research requirements for the Ed.S. degree. Course may be repeated up to a maximum allowed for this degree. Each research project will be designated by a qualifying subtitle. May be repeated up to 88 credits.

Learning Outcomes

1. To investigate a problem or issue in education.
2. Prepare the a complete doctoral project.

EDUC 7000. Doctoral Dissertation

1-15 Credits (1-15)

Dissertation. May be repeated up to 88 credits.

Learning Outcomes

1. Complete all phases of dissertation.
2. Defend dissertation

ELAD-EDUCATIONAL LEADERSHIP ADMINISTRATION

ELAD 2210. Leadership and Change in Education

3 Credits (3)

This course will introduce students to the challenges and key strategies in initiating, implementing, and sustaining educational change and reform. In the first part of the course, participants will learn about the challenges of educational change in the United States and the role that they as school leaders play in facilitating change and reform. The course continues with an examination of how culture, micro-politics, and power structures support or impede national and global change initiatives. The last part of the course offers suggestions for change agents including community organizing, culture building, and embracing sustainable leadership practices. Participants will learn how to apply the change theories and concepts introduced in the course to practice through course readings, online discussions with the instructor and colleagues, group work, active examination of daily practice in schools, and personal reflection. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to communicate in clear manners that articulate, convey and deepen the understandings others have of issues affecting their communities.
2. Students will be able to collaborate on democratic processes.
3. Students will be able to communicate engage in critical social analysis and how the status quo fits into a larger movement for social change.

**ELAD 2340. Multicultural Leadership in Education
3 Credits (3)**

Introduction to the social and cultural constructions of gender, class, and race. Students will critically apply theoretical constructs to everyday life and discuss the intersection of gender and race with class inequality in national and global contexts. Using a social justice framework, readings, and assignments integrate a variety of racial/ethnic groups while considering the effects of historically uneven resource distribution, unearned privilege, forms of domination and subordination, immigration status, and cultural representation and ideologies. Participants will learn how to apply the change theories and concepts introduced in the course to practice through course readings, online discussions with the instructor and colleagues, group work, active examination of daily practice in schools, and personal reflection. May be repeated up to 3 credits.

Learning Outcomes

1. Students will develop awareness of their own social identities.
2. Students will recognize differences among various communities, perspectives, and world-views.
3. Students will describe how privilege and biases impact our communities and systems.
4. Students will create meaningful peer-to-peer relationships.
5. Students will understand the impact of their actions on community members.
6. Students will identify their leadership skills to shape social change on and off campus.
7. Students will act on opportunities to promote social change.
8. Students will use academic resources including advising, computers, printing, library, and space.

**ELAD 2996. Special Topics in Educational Leadership
1-3 Credits (1-3)**

Special topics course in education for undergraduate students. Course will be identified by a subtitle. May be repeated up to 12 credits.

Learning Outcomes

1. Students will be able to engage in systems thinking which aids in seeing how individual situations are shaped by a broader contexts
2. Students will be able to understand how to apply theoretical frameworks for understanding social problems.
3. Students will be able to help develop leadership capacity in others.
4. Students will be able to gain an understanding of cultural competence, which recognizes that diverse perspectives strengthen the dialogue and approaches to solving social problems.

**ELAD 3110V. Introduction to Educational Leadership in a Global Society
3 Credits (3)**

Multinational educational systems covered through knowledge of the U.S. system of education promoting critical leadership roles every citizen plays in the success of educational systems. May be repeated up to 3 credits.

Learning Outcomes

1. Students will share reflections on issues of national and global importance in the field of educational leadership.

**ELAD 3210. Current Issues In Educational Leadership
3 Credits (3)**

This course addresses issues such as the rise in international education, education's costs, social media's role and influence, changes in state and national funding trends, student and faculty/staff diversity, among others. The focus of this course is centered on the actions and responses of administrators to the current issues they are facing. May be repeated up to 3 credits.

Learning Outcomes

1. Students will identify the overarching issues that leaders in educational institutions are or will be facing;
2. Students will articulate a more multicultural perspective through which to view the possible impact of these current issues on both those within the institution and those who are impacted by these institutions;
3. Students will reconstruct their perspective to allow for a greater awareness of the how these current issues might differentially impact culturally, linguistically, and socio-economically diverse populations;
4. Students will criticize inequitable examples of unfair educational policy and explore ways in which to develop culturally responsive practices when addressing current issues

**ELAD 3996. Special Topics in Education
1-3 Credits (1-3)**

Special topics course in education for undergraduate students. Course will be identified by a subtitle. May be repeated up to 12 credits.

Learning Outcomes

1. Objectives change based on course content.

**ELAD 4110. Management of Student Services
3 Credits (3)**

History and overview of student services (e.g., admissions, counseling, registration, financial aid, housing, food services, student organizations) for early entry level positions. This course will provide students with an examination of foundations and principals of student services. Important theories and essential competencies needed in order to be successful will be explored through a social justice perspective of leadership. May be repeated up to 3 credits.

Learning Outcomes

1. Explain the origins of student services concerning social and historical events programs.
2. Describe the theoretical foundations and development of student services.
3. Evaluate the organizational and administrative models for the delivery of student services
4. Critique inequity issues in student services as they relate to institutions of higher education and how social justice action might improve or eliminate such inequities.
5. Explain the primary legal foundations, ethical standards, and daily operation of student services programs.

**ELAD 4120. Principles of Education Law and Policy
3 Credits (3)**

Overview of the use of law and policy in schools and higher education. May be repeated up to 3 credits.

Learning Outcomes

1. Analyze the options on policy issues using the statutes, cases, regulations, and legislative history as their tools.
2. Evaluate legal developments in higher education.
3. Synthesis legal trends in their particular area of professional interest.
4. Compare and contrast how higher education law differs between private and public higher education.

ELAD 4130. Principles of Education Budgeting and Finance**3 Credits (3)**

Analysis of budget and finance practices in education. Restricted to: E AD majors. May be repeated up to 3 credits.

Learning Outcomes

1. Identify opportunities to use research and individual projects to explore issues related to topics of interest to them
2. Describe ways in which budget and finance skills are important to administrators in college and university settings
3. Distinguish how financial and budgetary issues vary with respect to state, private, and various funding sources within higher education

ELAD 4410. Foundation for School Library Specialists**3 Credits (3)**

Elements of librarianship. Introduction to the history, purpose, and role of the school library. Overview of current issues and legislation affecting school libraries. Taught with ELAD 5410. May be repeated up to 3 credits.

Learning Outcomes

1. Understand basic competencies for library specialists.

ELAD 4420. Administration of the School Library**3 Credits (3)**

Principles and practices related to the function, structure, and management of school libraries. May be repeated up to 3 credits.

Learning Outcomes

1. Understand basic competencies for library administration.

ELAD 4510. Elements of Research**3 Credits (3)**

This course provides students with a foundation for understanding educational research. The course will also provide grounding in proper writing format for use in the education profession. Students will be introduced to various research paradigms and the symbiosis of theory and practice. Besides introducing students to the symbiosis of theory and practice, students will complete assignments and activities that demonstrate the use of that symbiosis. Ultimately, students will be able to use the knowledge they gain through the course to be able to critique educational research. May be repeated up to 3 credits.

Learning Outcomes

1. Define what good research entails
2. Critique journal articles dealing with educational leadership
3. Use proper APA format in writing papers and written discussion
4. Use ethical standards for decision making in research

ELAD 4998. Internship**3 Credits (3)**

The undergraduate Educational Leadership major requires that students complete two internships. Internships provide students with either experience working in an area of administration that is different from the student's regular job or experience conducting research for a program or project. Each internship placement site and scope of work is determined through consultation with the course instructor. Students must complete 120 hours of work with the selected internship site. Student must be an E

AD major and be within (at least) one year of graduation. May be repeated up to 6 credits.

Learning Outcomes

1. Students will gain experience in a work/administrative setting under the supervision of a experienced administrator.

ELAD 5110. The Principalship**3 Credits (3)**

Key issues surrounding the role of school-site leaders. The course must be passed with a grade of "B" or higher. Consent of Instructor required.

Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or better; .

Learning Outcomes

1. Students will examine the complexities of school leadership.
2. Students will create a school culture representative of their own core values.
3. Students will assess the role and importance of the principal in facilitating change, managing conflict, promoting an active anti-racist environment, celebrating diversity, and establishing accountability for all students' learning.

ELAD 5120. Leadership and Administration of Bilingual Education**3 Credits (3)**

Concepts and practical approaches to improving the education of English languages learners through higher education. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or higher; .

Learning Outcomes

1. Examine the complexity and overarching issues encompassing the role of the school leader as it pertains to the broader and narrower goals of bilingual education
2. Develop critical understandings of educating equitably, involving the development and sustainability of bilingual education programs which focus on making schooling meaningful and comprehensible for the millions of children whose home languages are different from the dominant language of school and society

ELAD 5130. Basing Decision on Data: Pk-12**3 Credits (3)**

Analysis of accountability data and other evidence to support educational decision making. Disaggregating and interpreting assessment data to guide improvement of instruction. Moving from evidence to plans for action. The course must be passed with a grade of "B" or higher. Consent of instructor is required. Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Identify various types of data and their uses in decision-making
2. Identify federal and state assessment programs, as well as local assessment requirements, and the policies that drive them
3. Explain how data from multiple sources is used to inform decision making about student achievement

ELAD 5140. Educational Financial Management**3 Credits (3)**

Educational finance and business applications. The course must be passed with a grade of "B" or higher. Consent of Instructor required.

Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or better; .

Learning Outcomes

1. Understand and be able to use and explain to lay people the technical language used to discuss education finance issues.
2. Analyze, interpret, and present financial data, trends, and issues to various publics served by the schools and outline possible actions and their implications

ELAD 5150. Public School Law**3 Credits (3)**

Legal processes of education, major court decisions, and the legislative process will be studied. The course must be passed with a grade of "B" or better. Consent of Instructor required. Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or better; .

Learning Outcomes

1. Understand the critical issues involved in applying the law fairly and justly
2. Understand the complex nature of the federal, state, and local authority levels as they relate to applying statutory and constitutional law

ELAD 5160. Management of Educational Change: Public Schools**3 Credits (3)**

Leadership in implementing innovations in education. The course must be passed with a grade of "B" or higher. Consent of instructor required. Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Students will gain insight into how the structure of schools in the United States impacts the success of failure of educational change and reform.
2. Students will understand the role of implementing or resisting educational change efforts

ELAD 5170. Special Education Administration**3 Credits (3)**

Competencies for the administration of special education programs with an emphasis upon New Mexico public school standards. The course must be passed with a grade of "B" or better. Consent of Instructor required. Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Knowledge of interactive systems and sub-systems and the influence of internal and external environments on the supervisory and improvement processes.
2. Understanding of research and effective professional development practices tied to curriculum, improvement of instructional delivery and student achievement.

ELAD 5180. Internship Public Schools Part I**3 Credits (3)**

First half of a practical internship in Pk-12 schools under supervision of school administrator. The course must be passed with a grade of "B" or higher. Consent of Instructor required. 3 years of Pk-12 teaching experience required. Restricted to: E AD majors. . May be repeated up to 3 credits.

Prerequisite: 18 cr. of ELAD course work; 3.0 GPA or better.

Learning Outcomes

1. A clear understanding of the roles and responsibilities of the school leader in an adaptive, culturally diverse and changing environment
2. Provide a platform for prospective leaders to analytically reflect on the complexity of ethical cases in which the school administrator

is likely to confront in the scope of his/her administrative career in public education

ELAD 5185. Internship: Public Schools Part II**3 Credits (3)**

Second half of a practical internship in Pk-12 administrative setting under supervision of experienced higher education administrator. Internship site determined by class instructor and graduate student. The class must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to: E AD majors. May be repeated up to 3 credits.

Prerequisite: ELAD 5180; 3.0 GPA or better.

Learning Outcomes

1. A understanding of the roles and responsibilities of the school leader in an adaptive, culturally diverse and changing environment.
2. Provide a platform for prospective leaders to analytically reflect on the complexity of ethical cases in which the school administrator is likely to confront in the scope of his/her administrative career in public education.

ELAD 5210. Community College Administration**3 Credits (3)**

An overview of the history, role, objectives and patterns governing the effectiveness of the community college. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or better; .

Learning Outcomes

1. Understand the purpose of higher education and how this purpose has changed and affected various types of community colleges and universities and groups of people;
2. Consider how organization, governance, and finance in higher education vary by institutional type, control, and mission;

ELAD 5215. Higher Education Administration**3 Credits (3)**

This course provides an overview of higher education in the United States including history, mission, and governance, in the context of organizational theory. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Understand the purpose of higher education and how this purpose has changed and affected various types of community colleges and universities and groups of people
2. Consider how organization, governance, and finance in higher education vary by institutional type, control and mission
3. Gain familiarity with major issues facing U.S. higher education

ELAD 5220. Management of Educational Change: Higher Education**3 Credits (3)**

Leadership in implementing innovations in education in higher education. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to: E AD majors.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Student will gain the insight into how the structure of schools in the United States impacts the success or failure of educational change.
2. Student will understand the role of implementing or resisting educational change efforts

ELAD 5230. Higher Education Finance and Funding**3 Credits (3)**

This course examines the impact and process of financing and funding higher education. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Identify opportunities to use research and individual projects to explore issues related to issues of topics of interest
2. Describe the ways in which budget and finance skills are important to administrators in college and university settings
3. Distinguish how financial and budgetary issues vary with respect to state, private, and various funding sources within higher education

ELAD 5240. Management of Student Services in Higher Education**3 Credits (3)**

History and overview of student services (e.g., admissions, counseling, registration, financial aid, housing, food services, student organizations) and a review of management components used in student services.

The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Explain the origins of student services in relationship to social and historical events
2. Describe the theoretical foundations and development of student services.
3. Evaluate the organizational and administrative models for the delivery of student services programs.

ELAD 5250. Higher Education Law**3 Credits (3)**

This course is designed to review the impact of the legal process and the judiciary on higher education. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors.

May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Analyze the options on policy issues using the statues, cases, regulations, and legislative history as their tool.
2. Evaluate legal developments in higher education.
3. Synthesis legal trends in their particular area of professional interest.

ELAD 5260. Administration of Adult and Continuing Education**3 Credits (3)**

Administration of programs in public schools, higher education, community and nontraditional educational settings. The class must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or higher; .

Learning Outcomes

1. Analyze adult education theory and the intersection of social justice to inform adult education program planning.
2. Assess the needs of specific populations for adult education programming

ELAD 5270. Basing Decision on Data: Higher Education.**3 Credits (3)**

Analysis of accountability data and other evidence to support educational decision making. Disaggregating and interpreting assessment data to guide improvement of instruction. Moving from evidence to plans for action. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or higher; .

Learning Outcomes

1. Participants will understand the importance of using assessment data in decision-making and identify reasons why these skills are important to educational leaders in college and university settings.
2. Participants will evaluate the assessment structure of one institution or department in higher education, using a criteria-based measurement tool (rubric).
3. Participants will reflect on possibilities of using assessment data to further social justice outcomes in higher education.

ELAD 5280. Internship: Higher Education Part I**3 Credits (3)**

First half of practical internship in administrative setting under supervision of experienced higher education administrator. Internship site determined by class instructor and graduate student. The course must be passed with a grade of "B" or higher. Restricted to: E AD majors. May be repeated up to 3 credits.

Prerequisite: 15 credits of ELAD coursework and consent of instructor; .

Learning Outcomes

1. Understand the roles and responsibilities of the school leader in an adaptive, culturally diverse and changing environment
2. Will provide a platform for leaders to analytically reflect on the complexity of ethical cases in which the administrator will confront in the scope of administrative role

ELAD 5285. Internship: Higher Education Part II**3 Credits (3)**

Second half of a practical internship in an administrative setting under supervision of an experienced higher education administrator. Internship placement determined by class instructor and graduate student.

The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to: E AD majors. May be repeated up to 3 credits.

Prerequisite: ELAD 5280; 3.0 GPA or better; .

Learning Outcomes

1. Enhance knowledge and practice of higher education administration, keeping in mind that experiences should provide opportunities for thoughtful examination of the diversity of the ways and manners in which office supervisors and staff conduct their work.
2. Provide practical experience and opportunity to examine and apply learned theoretical concepts within a supportive, supervised environment.
3. Develop skills related to higher education management and leadership.

ELAD 5310. Leadership for Social Justice and Equity**3 Credits (3)**

Examine cultural diversity and how appropriate understanding, leadership and instructional strategies can be used to reach all learners. Enhances understanding of what it means to be an educator in culturally diverse contexts. The course must be passed with a grade of "B" or higher.

Consent of instructor required. Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or better, .

Learning Outcomes

1. Acquired knowledge of multicultural issues as they relate to race, ethnicity, class, and gender and how these factors intersect with current educational leadership trends;
2. Developed a more multicultural perspective which will lead to greater awareness of the needs of culturally, linguistically, and socio-economically diverse students and an ability to develop/enhance an educational leadership lens designed to promote equity and access for all students;

**ELAD 5320. Educational Leadership, Supervision, and Evaluation
3 Credits (3)**

Leadership, supervision, and evaluation in Pk-12 and post secondary education. The course must be passed with a grade of "B" or better. Consent of Instructor required. Restricted to E AD majors May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or higher; .

Learning Outcomes

1. To acquire a basic knowledge of the processes, persons, and practices of educational leadership and supervision.
2. To develop personalized understandings of leadership and supervisory roles.
3. To relate leadership and supervision theory to practice.
4. To develop a concept of good administrative/supervisory practice.
5. To develop a diverse awareness of leadership and supervisory issues and techniques.

**ELAD 5410. Foundation for School Library Specialists
3 Credits (3)**

Elements of librarianship. Introduction to the history, purpose, and role of the school library. Overview of current issues and legislation affecting school libraries. Same as ELAD 4410. May be repeated up to 3 credits.

Learning Outcomes

1. Understand basic competencies for library specialists.

**ELAD 5510. Elements of Research
3 Credits (3)**

Survey and analysis of research methods and designs focusing on sound educational research and its presentation. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors. May be repeated up to 3 credits.

Prerequisite: 3.0 GPA or better; .

Learning Outcomes

1. Explain the purpose of research
2. Analyze the need for research by practicing educational administrators
3. Describe the differences between qualitative research and quantitative research

**ELAD 5992. Special Problems.
1-3 Credits (1-3)**

Offered under various subtitles which indicate the subject matter covered. May be taken for a maximum of 3 credits per semester and a total of 6 credits overall. May be repeated up to 6 credits.

Learning Outcomes

1. Objectives will vary based on course content.

**ELAD 5996. Special Topics
1-6 Credits (1-6)**

Offered under various subtitles which indicate the subject matter covered. May be taken for a maximum of 6 credits. May be repeated up to 6 credits.

Learning Outcomes

1. Objectives change based on course content.

ELAD 5997. Independent Studies**1-3 Credits (1-3)**

Individual investigation in special topic areas. Requires prior approval of project advisor. May be repeated up to 9 credits.

Learning Outcomes

1. Objectives change based on course content.

ELAD 6110. Organizational Theory**3 Credits (3)**

The overarching objectives of this class is to prepare educational leaders who comprehend the complexities of educational organizations, especially those with significant underrepresented populations; to initiate or maintain leaders' commitment to educational programs that embrace all learners; and to promote within leaders an understanding of the necessity of upholding social justice, primarily as it applies to issues, such as race, ethnicity, class, ability, religion, and gender. Consent of Instructor required. Restricted to: E AD majors.

Learning Outcomes

1. Understand and implement organizational theory.

ELAD 6120. Elements of Research**3 Credits (3)**

Advanced survey and analysis of research methods and designs focusing on sound educational research and its presentation. Consent of Instructor required. May be repeated up to 3 credits.

Learning Outcomes

1. Evaluate self within educational research, Analyze what good research entails
2. Use proper APA (7th ed.) format in writing papers and in written discussions
3. Synthesize scholarly literature, Understand social justice in research and practice
4. Work on small pieces of active research to gain an understanding of what it entails

ELAD 6210. Quantitative Research I**3 Credits (3)**

Explores quantitative research methods, the rationale and assumptions that guide statistical decisions, beginning level statistical analyses, and how all of these are applied in the field of educational leadership. May be repeated up to 3 credits.

Learning Outcomes

1. Identify the tasks and processes required to formulate appropriate research problems within educational settings, design relevant qualitative research strategies; for examining such problems, select pertinent data sources, data collection methods, and data analysis methods, and assess the results of such efforts.

ELAD 6220. Qualitative Research I**3 Credits (3)**

Explores qualitative research methods and models and their application in the field of educational leadership. May be repeated up to 3 credits.

Learning Outcomes

1. Identify the tasks and processes required to formulate appropriate research problems within educational settings, design relevant qualitative research strategies; for examining such problems, select

pertinent data sources, data collection methods, and data analysis methods, and assess the results of such efforts.

ELAD 6310. Concepts of Leadership in Education

3 Credits (3)

Survey of concepts of leadership in general and educational leadership in particular. Consideration of implications for practice. May be repeated up to 3 credits.

Learning Outcomes

1. Understand and implement important concepts central to effective educational leadership

ELAD 6320. Foundations of Educational Administration

3 Credits (3)

Advanced course about the political, economic, and social forces on policy making and governance of Pk-12 and postsecondary education. May be repeated up to 3 credits.

Learning Outcomes

1. Students will gain an understanding of the concepts of school leadership, and the political, social and economic contexts that impact schools.

ELAD 6410. Quantitative Research II

3 Credits (3)

Intermediate quantitative methods of research, statistical analyses, and their application in the field of educational leadership. Restricted to Doctoral students only. May be repeated up to 3 credits.

Prerequisite: ELAD 6210.

Learning Outcomes

1. Identify the tasks and processes required to formulate appropriate research problems within educational settings, design relevant qualitative research strategies; for examining such problems, select pertinent data sources, data collection methods, and data analysis methods, and assess the results of such efforts in more detail than in Qualitative Research I.
2. Students will conduct a mini study to prepare for dissertation seminar.

ELAD 6510. Qualitative Research II

3 Credits (3)

Advanced qualitative methods of research and implementation in the field of educational leadership. May be repeated up to 3 credits.

Prerequisite: ELAD 6220.

Learning Outcomes

1. Identify the tasks and processes required to formulate appropriate research problems within educational settings, design relevant qualitative research strategies; for examining such problems, select pertinent data sources, data collection methods, and data analysis methods, and assess the results of such efforts in more detail than in Qualitative Research I.
2. Students will conduct a mini study to prepare for dissertation seminar.

ELAD 6520. Public School Law

3 Credits (3)

Advanced course in which the legal processes of education, major court decisions, and the legislative process will be studied. Consent of Instructor required. May be repeated up to 3 credits.

Learning Outcomes

1. The student will articulate an understanding of basic legal concepts through examination and discussion of relevant court cases.

ELAD 6525. Higher Education Law

3 Credits (3)

This advanced course is designed to review the impact of the judiciary on higher education. The legal standing of institutions of higher education on issues of staff rights, student rights, and tort liability will be addressed. In addition, the impact of local ordinances, state and federal laws and regulations will be examined. Consent of Instructor required. May be repeated up to 3 credits.

Learning Outcomes

1. Consider CRT's usefulness in educational research and what makes a CRT analysis unique or different from other analyses.

ELAD 6610. Scholarly Writing and the Southwest Border

3 Credits (3)

This course is designed to provide doctoral-level students with an opportunity to engage with scholarly and academic writing in a meaningful manner. Scholarly writing and academic writing are often used interchangeably. They will be used in that manner for this course. Generally defined, academic writing refers to a particular style of expression that researchers use to define the intellectual boundaries of their disciplines and their areas of expertise. Scholarly writing is the specific genre of writing that is used in all academic fields. For this course, the scholarly writing is contained to the context of the Southwest Border and Borderland issues. This is designed in consideration of and relates to the Department and Program's mission, which takes into account social justice and border education issues. Additionally, the course will cover topics associated with scholarly writing that include, but not limited to: formal language, tone, precision, clarity, word choice, and assumptive statements versus research-supported rationale. Consent of Instructor required. Restricted to: E AD majors.

Learning Outcomes

1. Understand and implement place-based writing through and about the Southwest Border.

ELAD 6620. Evaluation Design in Education

3 Credits (3)

Advanced course that focuses on evaluation and accountability models; application to educational programs. Consent of Instructor required. May be repeated up to 3 credits.

Learning Outcomes

1. Objectives change based on course content.

ELAD 6630. Educational Financial Management

3 Credits (3)

This advanced course offers an overview of economic and financial concerns relating to the public school system of the United States. Consent of Instructor required. May be repeated up to 3 credits.

Learning Outcomes

1. Students will gain an understanding of the basic concepts of school budgeting and finance practices.

ELAD 6635. Higher Education Finance and Funding

3 Credits (3)

This advanced course examines the impact and process of financing and funding higher education. The course is an examination of higher education finance as it relates to operational budgets, capital budgets, and policy issues which impact the financing of higher education. Consent of Instructor required. May be repeated up to 3 credits.

Learning Outcomes

1. Students will study the impact of the higher education budget on various departments and services at the university level.

ELAD 6710. The Professoriate**3 Credits (3)**

The purpose of this course is to explore the body of scholarly knowledge and research appropriate for the study of American higher education, the context in which teaching and learning occurs, and faculty's roles in the process. We will discuss the number, variety, and purpose of the various types of institutions; the different roles that faculty members play within these institutions; how faculty work is assessed and valued within the outside of the university; administrative regulations related to faculty work; current issues related to the general state of the professoriate; as well as how does one prepare to enter the professoriate.

ELAD 6910. Dissertation Seminar**3 Credits (3)**

Same as CEPY 6450. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Consent of Instructor required. May be repeated up to 3 credits.

Learning Outcomes

1. Formulate a research purpose and driving question about a specific topic.

ELAD 6991. Doctoral Research**1-15 Credits (1-15)**

Research. Consent of Instructor required. Thesis/Dissertation Grading. May be repeated up to 88 credits.

Learning Outcomes

1. Objectives for this course include submitting a pre-proposal, proposal, and final copy of the dissertation for committee consideration.

ELAD 6996. Selected Topics**1-6 Credits (1-6)**

Offered under various subtitles which indicate the subject matter covered. May be repeated up to 6 credits.

Learning Outcomes

1. Objectives change based on course content.

ELAD 6998. Advanced Internship**1-6 Credits (1-6)**

For those pursuing an advanced degree to meet the field work requirement. To bear an appropriate subtitle. May be repeated up to 6 credits.

Learning Outcomes

1. Students will gain experience in a work/administrative setting under the supervision of a experienced administrator.

ELAD 7000. Doctoral Dissertation**1-9 Credits (1-9)**

Dissertation. Minimum of 3 credits per regular semester. May be taken for a maximum of 36 credits. Consent of instructor required. May be repeated up to 36 credits.

Learning Outcomes

1. Objectives for this course include submitting a pre-proposal, proposal, and final copy of the dissertation for committee consideration.

ELT - ELECTRONICS TECHNOLOGY

ELT 103. Math Study Skills for Electronics**1 Credit (1)**

Covers specific math study skills and critical thinking processes to reinforce practical applications of math and its use with electronics. The student will be introduced to electronic mathematical formulas during the

problem-solving steps required for circuit analysis. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): E T 183 OR E T 184. Restricted to Community Colleges only.

ELT 105. Basic Electricity and Electronics**3 Credits (2+2P)**

Fundamentals of electricity and electronics, basic circuit devices, meters, transistors, integrated circuits and other solid state devices, computers, fiber optics, and industrial application topics. Minimum math proficiency of CCDM 103 or CCDM 104 required or math placement into CCDM 114 or higher. Restricted to: Community Colleges only. Crosslisted with: AERT 111

ELT 110. Electronics I**4 Credits (3+3P)**

Fundamentals of electronics including: components, schematics, Ohm's law, Thevenin's and Norton's theorems, and series/parallel circuits incorporating passive, active and magnetic elements. Introduction to AC circuits. Crosslisted with: AERT123. Restricted to: Community Colleges only.

ELT 120. Mathematics for Electronics**4 Credits (4)**

Includes fundamental mathematics, algebra, sine, cosine, and other elementary functions as they specifically apply to the operation, manipulation, and evaluation of direct current (DC) and alternating current (AC) circuits. Minimum math proficiency of CCDM 114 required or math placement into MATH 1215 or higher. Restricted to: Community Colleges only. Crosslisted with: AERT 124

ELT 135. Electronics II**4 Credits (3+3P)**

Analysis of AC circuits, filters, and resonance. Introduction to solid state fundamentals including diodes and rectifier circuits, voltage regulators, various transistors and transistor characteristics, amplification and amplifiers, photoelectric effects, gates and timing circuits. Restricted to Community Colleges campuses only.

Prerequisite(s): ELT 110 and ELT 120.

ELT 155. Electronics CAD and PCB Design**3 Credits (2+2P)**

Introduction to and the use of commercially available CAD software covering schematic representation of electronic components and circuits. Printed circuit board layout techniques including proper schematic capture, netlist generation, design rule checking and manual routing covered.

ELT 160. Digital Electronics I**4 Credits (3+3P)**

Number systems, codes, Boolean algebra, logic gates, Karnaugh maps, combination circuits, flip-flops, and digital troubleshooting techniques. Restricted to: Community Colleges only.

Prerequisite(s): ELT 110 and (ELT 120 or MATH 1215).

ELT 175. Soldering Practices**3 Credits (2+2P)**

Methods and techniques of hand soldering in the production of high quality and reliable soldering connections. Restricted to: Community Colleges only.

ELT 205. Semiconductor Devices**4 Credits (3+3P)**

Analysis and trouble shooting of linear electronic circuits including amplifiers, op-amps, power supplies, and oscillators. Restricted to: Community Colleges only.

Prerequisite(s): ELT 110 and ELT 135.

ELT 215. Microprocessor Applications I

4 Credits (3+2P)

Fundamentals of microprocessor architecture and assembly language with an emphasis on hardware interfacing applications.

Prerequisite(s)/Corequisite(s): ELT 235. Prerequisite(s): ELT 160.

Restricted to: Community Colleges only.

ELT 220. Electronic Communication Systems

4 Credits (3+2P)

Principles and applications of circuits and devices used in the transmission, reception, and processing of RF, microwave, digital and telecommunications systems.

Prerequisite(s)/Corequisite(s): ELT 205. Prerequisite(s): ELT 135.

Restricted to: Community Colleges only.

ELT 221. Cooperative Experience I

1-6 Credits

Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor. Student will meet in a weekly class. Graded S/U.

Prerequisite: consent of instructor.

ELT 222. Cooperative Experience II

1-6 Credits

Continuation of ELT 221. Maximum of 6 credits. Graded S/U.

Prerequisite: consent of instructor.

ELT 225. Computer Applications for Technicians

3 Credits (2+2P)

An overview of computer hardware, software applications, operating systems, high level programming languages and networking systems.

ELT 230. Microprocessor Applications II

4 Credits (3+2P)

Advanced microprocessor interfacing techniques. Topics in A/D and D/A conversion, I/O port address decoding, direct memory accessing, and peripheral device interfacing applications.

Prerequisite: ELT 215.

ELT 235. Digital Electronics II

3 Credits (2+2P)

Sequential logic circuits, latches, counters, shift-registers, fault analysis and troubleshooting of digital IC s, multiplexers, timers, encoders/decoders, arithmetic circuits, pulse shaping, and memory devices.

Restricted to: Community Colleges only.

Prerequisite(s): ELT 160.

ELT 240. Introduction to Photonics

4 Credits (3+2P)

Nature of light, light emitters, lasers, detectors, fiber optics communications systems, and other applications of light to electronics.

Prerequisite: ELT 135 or consent of instructor.

ELT 245. Radar: Principles and Applications

3 Credits (3)

Explores the principles of operation for microwave radar applications and supporting subsystems.

Prerequisite: E T 246.

Learning Outcomes

1. Students will analyze the various factors that comprise the Radar Equation and apply the equation in calculations for various scenarios.
2. Students will explain the principles of Moving Target Indication, Pulse Doppler, Phased Array, and Synthetic Aperture Radars, and their advantages and disadvantages.

3. Students will analyze and calculate the effects of clutter and environmental noise, earth surface scattering, and atmospheric attenuation, diffraction, and refraction on radar propagation.
4. Students will analyze the performance of supporting radar subsystems, including transmitters, receivers, antennas, tracking servos, and signal processing.
5. Students will explain the kinds of information that can be obtained from radar signals and perform calculations associated with range determination, target motion resolution, and error.
6. Students will explain the use of telemetry, and correlate test radar and telemetry measurements.
7. Students will explain and compare radar countermeasures and analyze their effect on radar return cross-sections.

ELT 250. Electronics Systems Analysis

2 Credits (1+3P)

Capstone course emphasizing a systems approach to troubleshooting and maintaining complex electronics systems. Includes program review in preparation for technician certification.

Prerequisite: consent of instructor.

ELT 260. Instrumentation Control and Signal Conditioning

4 Credits (3+2P)

Introduction to sensors and transducers, signal conditioning and transmission for measuring and process control systems. Includes AD, DA converter, small servos and actuators. Prerequisite:ELT 205.

ELT 265. Special Topics

1-6 Credits

Topic to be announced in the Schedule of Classes.

ELT 270. Biomedical Equipment Instrumentation

4 Credits (3+2P)

Principles and applications of electronic circuits and devices used in biomedical equipment. Skills taught to include evaluating, troubleshooting and repairing various types of medical equipment.

Prerequisite(s)/Corequisite(s): ELT 260. Prerequisite(s): ELT 205.

Restricted to: Community Colleges only.

ELWK-ELECTRICAL LINEWORKER

ELWK 130. Introduction to Electrical Power Systems

2 Credits (2)

An overview of electrical power systems, equipment, safety practices, first aid and CPR. Students must be accepted into the electrical lineworker program before enrolling in this course. Restricted to: OEET majors. Restricted to Community Colleges campuses only.

Corequisite: OEET 110,OEET 131.

Learning Outcomes

1. Professionally communicate in oral and written forms.
2. Work effectively in a team-based environment.
3. Accurately perform electrical related calculations and interpret results for the purpose of repair or installation of electrical power systems.
4. Demonstrate the use of current industry techniques and equipment to diagnose electrical power systems and perform appropriate repairs.
5. Demonstrate the use of current industry techniques and equipment to perform the service and maintenance of electrical power and systems.
6. Demonstrate the use of current industry techniques and equipment in the installation of electrical power lines and associated equipment.

7. Demonstrate understanding of basic electrical principals as they relate to the installation and maintenance of electrical power systems.
8. Determine the appropriate ethical action that should occur in a given circumstance.
9. Demonstrate the ability to perform lineworker duties in a safe manner.

ELWK 131. Electrical Lineworker Lab I

6 Credits (12P)

Climbing and work on utility poles using ropes and rigging, pole setting and an introduction to transmission and distribution line construction. Maintenance and troubleshooting to include the use of hot sticks. Students must be accepted into the electrical lineworker program before enrolling in this course. Restricted to: OEET majors. Restricted to Community Colleges campuses only.

Corequisite: OEET 110,OEET 130.

Learning Outcomes

1. Professionally communicate in oral and written forms.
2. Work effectively in a team-based environment.
3. Accurately perform electrical related calculations and interpret results for the purpose of repair or installation of electrical power systems.
4. Demonstrate the use of current industry techniques and equipment to diagnose electrical power systems and perform appropriate repairs.
5. Demonstrate the use of current industry techniques and equipment to perform the service and maintenance of electrical power and systems.
6. Demonstrate the use of current industry techniques and equipment in the installation of electrical power lines and associated equipment.
7. Demonstrate understanding of basic electrical principals as they relate to the installation and maintenance of electrical power systems.
8. Determine the appropriate ethical action that should occur in a given circumstance.
9. Demonstrate the ability to perform lineworker duties in a safe manner.

ELWK 140. Electrical Power Systems II

3 Credits (2+2P)

Theory of power generation and distribution with emphasis on three phase systems to include transformers, voltage regulators, surge arrestors. Includes troubleshooting. Students must be accepted into the electrical lineworker program before enrolling in this course. Restricted to: OEET majors. Restricted to Community Colleges campuses only.

Corequisite: OEET 141.

Learning Outcomes

1. Professionally communicate in oral and written forms.
2. Work effectively in a team-based environment.
3. Accurately perform electrical related calculations and interpret results for the purpose of repair or installation of electrical power systems.
4. Demonstrate the use of current industry techniques and equipment to diagnose electrical systems and perform appropriate repairs.
5. Demonstrate the use of current industry techniques and equipment to perform the service and maintenance of electrical power and systems.
6. Demonstrate the use of current industry techniques and equipment in the installation of electrical power lines and associated equipment.

7. Demonstrate understanding of basic electrical principals as they relate to the installation and maintenance of electrical power systems.
8. Determine the appropriate ethical action that should occur in a given circumstance.
9. Demonstrate the ability to perform lineworker duties in a safe manner.

ELWK 141. Electrical Lineworker II

6 Credits (12P)

Practice in the installation of electrical power lines including transformers, voltage regulators, and surge arrestors. Also advanced hot sticking procedures, troubleshooting, underground systems procedures, and pole-top rescue. Students must be accepted into the electrical lineworker program before enrolling in this course. Restricted to: OEET majors. Restricted to Community Colleges campuses only.

Corequisite: OEET 140.

Learning Outcomes

1. Professionally communicate in oral and written forms.
2. Work effectively in a team-based environment.
3. Accurately perform electrical related calculations and interpret results for the purpose of repair or installation of electrical power systems.
4. Demonstrate the use of current industry techniques and equipment to diagnose electrical power systems and perform appropriate repairs.
5. Demonstrate the use of current industry techniques and equipment to perform the service and maintenance of electrical power and systems.
6. Demonstrate the use of current industry techniques and equipment in the installation of electrical power lines and associated equipment.
7. Demonstrate understanding of basic electrical principals as they relate to the installation and maintenance of electrical power systems.
8. Determine the appropriate ethical action that should occur in a given circumstance.
9. Demonstrate the ability to perform lineworker duties in a safe manner.

ELWK 221. Cooperative Experience I

1-4 Credits (1-4)

Supervised cooperative work program. Student is employed in an approved occupation and is supervised and rated by the employer and instructor. Student will meet in a weekly class. May be repeated up to 4 credits. Consent of Instructor required. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

Prerequisite(s): Consent of instructor.

ENGL-ENGLISH

ENGL 1105M. Introduction to Academic Writing for Multilingual Students **3 Credits (3)**

This course is offered to international and domestic multilingual students. The purpose of this course is to provide students with review and practice opportunities to develop writing fluency and coherence, grammar awareness, and academic vocabulary necessary to be successful in ENGL 1110M and/or ENGL 471M.

Prerequisite: Placement in ENGL 1105M through NMSU's English Language Placement Test (ELPT), or an ACT score of 13-15, or #placement with an academic advisor using the English Self-Placement Canvas#Course, or #consent of instructor.

Learning Outcomes

1. Create well-organized, coherent paragraphs alone or in essay format.
2. Integrate a variety of sentence structures in connected discourse.
3. Portray, with general mastery, basic grammatical forms with very few errors.
4. Summarize or paraphrase information from source readings correctly.
5. Analyze readings for meaning and main ideas through annotation.
6. Integrate APA style format for in-text citations and references into their writing.

ENGL 1110G. Composition I**4 Credits (4)**

In this course, students will read, write, and think about a variety of issues and texts. They will develop reading and writing skills that will help with the writing required in their fields of study and other personal and professional contexts. Students will learn to analyze rhetorical situations in terms of audience, contexts, purpose, mediums, and technologies and apply this knowledge to their reading and writing. They will also gain an understanding of how writing and other modes of communication work together for rhetorical purposes. Students will learn to analyze the rhetorical context of any writing task and compose with purpose, audience, and genre in mind. Students will reflect on their own writing processes, learn to workshop drafts with other writers, and practice techniques for writing, revising, and editing. May be repeated up to 4 credits.

Prerequisite: ACT standard score in English of 16 or higher, or an Accuplacer score 250 or higher, or an SAT score of 400 or higher or a C- or higher in either CCDE 110N or CCDS 119N.

Learning Outcomes

1. Analyze communication through reading and writing skills.
2. Employ writing processes such as planning, organizing, composing, and revising.
3. Express a primary purpose and organize supporting points logically.
4. Use and document research evidence appropriate for college-level writing.
5. Employ academic writing styles appropriate for different genres and audiences.
6. Identify and correct grammatical and mechanical errors in their writing.

ENGL 1110H. Composition I Honors**4 Credits (4)**

In this course, students will read, write, and think about a variety of issues and texts. They will develop reading and writing skills that will help with the writing required in their fields of study and other personal and professional contexts. Students will learn to analyze rhetorical situations in terms of audience, contexts, purpose, mediums, and technologies and apply this knowledge to their reading and writing. They will also gain an understanding of how writing and other modes of communication work together for rhetorical purposes. Students will learn to analyze the rhetorical context of any writing task and compose with purpose, audience, and genre in mind. Students will reflect on their own writing processes, learn to workshop drafts with other writers, and practice techniques for writing, revising, and editing. May be repeated up to 4 credits.

Prerequisite: ACT standard score in English of 16 or higher, or an Accuplacer score 250 or higher, or an SAT score of 400 or higher or CCDE 1110 N.

Learning Outcomes

1. Analyze communication through reading and writing skills.
2. Employ writing processes such as planning, organizing, composing, and revising.
3. Express a primary purpose and organize supporting points logically.
4. Use and document research evidence appropriate for college-level writing.
5. Employ academic writing styles appropriate for different genres and audiences.
6. Identify and correct grammatical and mechanical errors in their writing.

ENGL 1110M. Composition I Multilingual**4 Credits (4)**

In this course, students will read, write, and think about a variety of issues and texts. They will develop reading and writing skills that will help with the writing required in their fields of study and other personal and professional contexts. Students will learn to analyze rhetorical situations in terms of audience, contexts, purpose, mediums, and technologies and apply this knowledge to their reading and writing. They will also gain an understanding of how writing and other modes of communication work together for rhetorical purposes. Students will learn to analyze the rhetorical context of any writing task and compose with purpose, audience, and genre in mind. Students will reflect on their own writing processes, learn to workshop drafts with other writers, and practice techniques for writing, revising, and editing. May be repeated up to 4 credits.

Prerequisite: ACT standard score in English of 16 or higher, or an Accuplacer score 250 or higher, or an SAT score of 400 or higher or CCDE 1110 N.

Learning Outcomes

1. Analyze communication through reading and writing skills.
2. Employ writing processes such as planning, organizing, composing, and revising.
3. Express a primary purpose and organize supporting points logically.
4. Use and document research evidence appropriate for college-level writing.
5. Employ academic writing styles appropriate for different genres and audiences.
6. Identify and correct grammatical and mechanical errors in their writing.

ENGL 1120. Composition II**2 Credits (2)**

In this course, students will explore argument in multiple genres. Research and writing practices emphasize summary, analysis, evaluation, and integration of secondary sources. Students will analyze rhetorical situations in terms of audience, contexts, purpose, mediums, and technologies and apply this knowledge to their reading, writing, and research. Students will sharpen their understanding of how writing and other modes of communication work together for rhetorical purposes. The emphasis of this course will be on research methods.

Prerequisite: successful completion of ENGL 1110G or ENGL 1110H or ENGL 1110M.

Learning Outcomes

1. Analyze the rhetorical situation for purpose, main ideas, support, audience, and organizational strategies in a variety of genres.
2. Employ writing processes such as planning, organizing, composing, and revising.

3. Use a variety of research methods to gather appropriate, credible information.
4. Evaluate sources, claims, and evidence for their relevance, credibility, and purpose.
5. Quote, paraphrase, and summarize sources ethically, citing and documenting them appropriately.
6. Integrate information from sources to effectively support claims as well as other purposes (to provide background information, evidence/examples, illustrate an alternative view, etc.).
7. Use an appropriate voice (including syntax and word choice).

ENGL 1410G. Introduction to Literature**3 Credits (3)**

In this course, students will examine a variety of literary genres, including fiction, poetry, and drama. Students will identify common literary elements in each genre, understanding how specific elements influence meaning.

Learning Outcomes

1. Identify, define, and understand basic literary conventions and themes in fiction, poetry and drama.
2. Write reasonable, well-supported analyses of literature that ethically integrate evidence from texts

ENGL 2130G. Advanced Composition**3 Credits (3)**

This course is for students who are striving for fluency, maturity, clarity and significance in their writing. It is an intermediate writing course that builds on and refines writing skills acquired in previous courses.

It focuses on non-fiction writing for the professions, business, science, technical fields, academe and/or the popular press. Short works of master writers are studied for ideas, style and structure.

Learning Outcomes

1. Students will examine and apply different writing styles and modes used by masters of personal essay and keep a reading response journal of assigned readings as demonstrated by scoring a 70% in faculty designed assignments.
2. Students will develop a sense of audience by discussing their papers with each other in small groups during class or by reading each other's papers and participating in positive, helpful peer reviews as demonstrated by scoring a 70% in faculty designed assignments.

ENGL 2210G. Professional & Technical Communication**3 Credits (3)**

Professional and Technical Communication will introduce students to the different types of documents and correspondence that they will create in their professional careers. This course emphasizes the importance of audience, document design, and the use of technology in designing, developing, and delivering documents. This course will provide students with experience in professional correspondence and communicating technical information to a non-technical audience.

Prerequisite(s): Grade of C- or better in ENGL 1110G or ENGL 1110H or ENGL 1110M.

Learning Outcomes

1. Choose professional communication appropriate for audiences and situations.
2. Write in different genres of professional communication.
3. Identify the purpose of a work-related communication and assess the audiences' informational needs and organizational constraints.
4. Employ appropriate design/visuals to support and enhance various texts.

5. Demonstrate effective collaboration and presentation skills.
6. Integrate research and information from credible sources into professional communication

ENGL 2210H. Professional and Technical Communication Honors**3 Credits (3)**

Professional and Technical Communication writing for Crimson Scholars/Honors students will introduce students to the different types of documents and correspondence that they will create in their professional careers. This course emphasizes the importance of audience, document design, and the use of technology in designing, developing, and delivering documents. This course will provide students with experience in professional correspondence and communicating technical information to a non-technical audience. 3.5 GPA is also required. Restricted to Las Cruces campus only.

Prerequisite(s): grade of C- or better in ENGL 1110G or the equivalent; approval of the honors college.

Learning Outcomes

1. Choose professional communication appropriate for audiences and situations.
2. Write in different genres of professional communication.
3. Identify the purpose of a work-related communication and assess the audiences' informational needs and organizational constraints.
4. Employ appropriate design/visuals to support and enhance various texts.
5. Demonstrate effective collaboration and presentation skills.
6. Integrate research and information from credible sources into professional communication.

ENGL 2210M. Professional and Technical Communication for Multilingual Students**3 Credits (3)**

Professional and Technical Communication will introduce students to the different types of documents and correspondence that they will create in their professional careers. This course emphasizes the importance of audience, document design, and the use of technology in designing, developing, and delivering documents. This course will provide students with experience in professional correspondence and communicating technical information to a non-technical audience. NMSU specific description: In this course, students will explore the unique advantages and challenges of being multilingual writers. This course is designed for international and domestic multilingual students.

Prerequisite: Grade of C- or better in ENGL 1110G or ENGL 1110H or ENGL 1110M.

Learning Outcomes

1. Choose professional communication appropriate for audiences and situations.
2. Write in different genres of professional communication.
3. Identify the purpose of a work-related communication and assess the audiences' informational needs and organizational constraints.
4. Employ appropriate design/visuals to support and enhance various texts.
5. Demonstrate effective collaboration and presentation skills.
6. Integrate research and information from credible sources into professional communication.

ENGL 2215G. Advanced Technical and Professional Communication**3 Credits (3)**

Theory and practice of writing in technical and professional fields, individualized to each student's field. Emphasizes efficient writing

processes and effective written products. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Prerequisite(s): Junior or above standing, or consent of instructor.

Learning Outcomes

1. To complicate the definition of "technical and scientific communication" and its relationship(s) to studying and practicing "rhetoric."
2. To complicate our relationship to concepts like "science", "knowledge, "objectivity," neutrality, "clarity," etc.
3. To use a community-based approach to study and practice technical and scientific documents within various discourse communities.
4. To study and practice different genres (i.e. memos, letters, e-mails, reports, proposals, and instruction sets) attending to issues of audience and purpose within discourse communities.
5. To practice some mindful reading strategies that allow you to attend to the use of language and its material and discursive effects in different situations.
6. To examine the material effects of producing, circulating, and consuming technical and scientific texts on the bodies of people within different contexts.
7. To complicate our understanding of "ethics," "responsibility," and "accountability" toward ourselves and others.
8. To work collaboratively and individually to research, to analyze, and to write about public debates regarding the conduct of science and technology.
9. To understand and use basic principles of document design attending to issues of usability and accessibility. 1
10. To articulate the relationship between technical and scientific communication and issues of inclusion and social justice in the world.

ENGL 2221G. Writing in the Humanities and Social Science

3 Credits (3)

Theory and practice in interpreting texts from various disciplines in the humanities and social sciences. Strategies for researching, evaluating, constructing, and writing researched arguments. Course subtitled in the Schedule of Classes. May be repeated up to 3 credits.

Prerequisite(s): Grade of C- or better in ENGL 1110G or ENGL 1110H, or ENGL 1110M.

Learning Outcomes

1. Develop the ability to interpret and respond to humanities and social sciences texts
2. Analyze and evaluate cultural artifacts such as texts, images, and practices as a means of academic inquiry
3. Critique arguments offered in the readings to determine the underlying methodology as well as underlying values
4. Construct a rhetorical argument with evidence appropriate for an explicit audience and purpose
5. Use written, visual, or oral strategies to persuade, inform, or engage, considering situation, audience, purpose, aesthetics, and diverse points of view
6. Practice effective research strategies, and integrate research correctly and ethically from credible sources
7. Understand and apply components of the writing process such as planning, collaborating, organizing, composing, revising, and editing

ENGL 2280. History of Argument

3 Credits (3)

Investigates the major figures and movements in rhetoric from the classical period to modern rhetorical theory, examining relations between rhetorical teaching and practice, culture, epistemology, and ideology. Main campus only. Prerequisite(s): ENGL 1110G, or ENGL 1110GH, or ENGL 1110M

Learning Outcomes

1. Understand how rhetoric, argument, and persuasion work. Become familiar with the key terms and various contexts in which rhetoric, argument, and persuasion function and the contingencies that influence their use and effectiveness;
2. be familiar with the broad history and major figures of western rhetoric;
3. apply a number of approaches used to analyze and construct/ deconstruct rhetorical arguments, including (but not limited to) Aristotelian appeals and commonplaces, stasis theory, toulmin analysis, pentadic/dramatistic analysis, fallacy analysis, and rogerian analysis;
4. complete an analysis as well as design and present a project regarding a contemporary issue or concern about which you feel deep passion and commitment; and
5. Improve general critical thinking and communication skills, both oral and written.

ENGL 2310G. Introduction to Creative Writing

3 Credits (3)

This course will introduce students to the basic elements of creative writing, including short fiction, poetry, and creative nonfiction. Students will read and study published works as models, but the focus of this "workshop" course is on students revising and reflecting on their own writing. Throughout this course, students will be expected to read poetry, fiction, and nonfiction closely, and analyze the craft features employed. They will be expected to write frequently in each of these genres.

Prerequisite(s): ENGL 1110G or ENGL 1110H or ENGL 1110M.

Learning Outcomes

1. Participate in a constructive conversation and community about creative writing.
2. Read and critically engage with a variety of texts.
3. Compose creative works in various genres of creative writing.
4. Provide respectful, honest, and critical feedback to peers about their work.
5. Revise creative work based on peer feedback and critique.
6. Develop thoughtful workshop reflection on students' own writing and writing process.
7. Evaluate and engage with publication process.

ENGL 2381. Script Development and Storyboarding

3 Credits (3)

Examines effective writing principles for creating storyboards that communicate the overall picture of a project, timing, scene complexity, emotion and resource requirements. Crosslisted with: FDMA 2381.

Learning Outcomes

1. develop a story idea into a complete storyboard
2. describe and visualize the creative aspects of a media project from conception to completion
3. write a scene in the professional script format
4. deliver a professional verbal and visual presentation of a story idea to an audience
5. the ability to conceive, illustrate and plan a visual project

6. proficiency in oral, written, and visual communication via storyboarding, script writing and verbal presentations

ENGL 2382. Narrative: Principles of Story Across the Media

3 Credits (3)

Examines the various strategies of written and visual storytelling, narrative structure and its principal components (plot, theme, character, imagery, symbolism, point of view) with an attempt to connect them to elements of contemporary forms of media expression, including screenwriting, playwriting, writing for documentaries and animation, etc. Crosslisted with: FDMA 2382

Learning Outcomes

1. Identify use the building blocks of storytelling: plot, theme, character, imagery,
2. Symbolism and point of view
3. Develop these building blocks into a cohesive narrative within a written document
4. Effectively communicate in different written formats
5. Create design documents for varied genres of media: narrative short, documentary, 6 Animation, commercial/industrial video, computer game
6. Describe how a written narrative can be translated into a visual medium

ENGL 2520G. Film as Literature

3 Credits (3+3P)

The purpose of this course is to teach students how to analyze film as a visual text. Students will learn to analyze films, film techniques, eras, and genres. Students will also identify significant trends and developments in film-making, examining the ways in which film reflects and creates cultural trends and values.

Learning Outcomes

1. Develop an understanding of the cultural, historical, and technical contexts for various films.
2. Identify, define, and analyze basic film techniques used in different genres and time periods.
3. Analyze how film uses literature by studying different sources of adaptation.
4. Demonstrate an understanding of film in its various aspects by writing film analysis, reviews, and/or other projects.

ENGL 2521. The Bible as Literature

3 Credits (3)

Develops informed readings of Hebrew and Christian scriptures. Emphasizes understanding Biblical literary forms, techniques, themes; historical, cultural contexts for interpretation; authorship, composition, audience for individual books; development of Biblical canon.

Learning Outcomes

1. Develop and articulate historically informed and textually supported arguments regarding the form and meaning of biblical texts
2. Express arguments and explication in clear, organized,
3. Understand the Jewish and Christian scriptures as cultural artifacts, using some fundamental techniques of literary analysis and interpretation, especially: thematic interpretation, stylistic analysis, narrative analysis, poetics, and the rhetorical analysis of figurative language.
4. Use socio-historically informed interpretive methods focused on these fundamental contextual questions : 1) who probably wrote and edited these texts, 2) why and how they most likely did so, 3) how their earliest audiences probably responded to them, and 4) why

and how they were later combined to form the canonical Jewish and Christian bibles read today.

5. Know in detail substantial selections of representative, influential, and historically informative biblical texts
6. Distinguish literary critical and historical analysis of the Bible from those based on faith, tradition, authority, and theology
7. Recognize, understand, and analyze the forms, genres, and techniques used by biblical authors
8. Become familiar with and be able to use essential knowledge of the historical, cultural, and geographical contexts of Biblical writing
9. Learn how evaluate texts as historical documents, as well as how doing so relates to and differs from literary critical analysis and interpretation 1
10. Become familiar with common and influential scholarly, critical, and aesthetic ways of reading Biblical texts from a contemporary perspective 1
11. Understand the cultural influence of the Bible and its relevance for other areas of scholarly and artistic work

ENGL 2610. American Literature I

3 Credits (3)

This course surveys American literature from the colonial period to the mid-nineteenth century. This course provides students with the contexts and documents necessary to understand the origins of American Literature and the aesthetic, cultural, and ideological debates central to early American culture.

Learning Outcomes

1. Recognize the traditions of American literature and their connection to issues of culture, race, class, and gender.
2. Demonstrate familiarity with a variety of major works by American authors.
3. Explore the various influences and sources of American literature.
4. Apply effective analytic and interpretive strategies to American literary works using academic conventions of citation and style.

ENGL 2620. American Literature II

3 Credits (3)

This course surveys American literature from the mid-nineteenth-century to the contemporary period. This course provides students with the contexts and documents necessary to understand American literature and the aesthetic, cultural, and ideological debates central to American culture.

Learning Outcomes

1. Recognize the traditions of American literature and their connection to issues of culture, race, class, and gender.
2. Demonstrate familiarity with a variety of major works by American authors.
3. Explore the various influences and sources of American literature.
4. Apply effective analytic and interpretive strategies to American literary works using academic conventions of citation and style.

ENGL 2630. British Literature I

3 Credits (3)

This course offers a study of British literature from its origins in Old English to the 18th century. This survey covers specific literary works--essays, short stories, novels, poems, and plays--as well as the social, cultural, and intellectual currents that influenced the literature.

Learning Outcomes

1. Read and discuss representative works of British writers from its origins in Old English to the 18th century to understand cultural and historical movements which influenced those writers and their works.
2. Identify the characteristics of various British literary genres, such as the essay, novel, short story, poetry, and dramatic literature.
3. Apply effective analytic and interpretive strategies to British literary works using academic conventions of citation and style.

ENGL 2640. British Literature II**3 Credits (3)**

This course offers a study of British literature from the 18th century to the present. This survey covers specific literary works—essays, short stories, novels, poems, and plays—as well as the social, cultural, and intellectual currents that influenced the literature.

Learning Outcomes

1. Read and discuss representative works of British writers from the 18th century to the present to understand cultural and historical movements, which influenced those writers, and their works.
2. Identify the characteristics of various British literary genres, such as the essay, novel, short story, poetry, and dramatic literature.
3. Apply effective analytic and interpretive strategies to British literary works using academic conventions of citation and style.

ENGL 2650G. World Literature I**3 Credits (3)**

In this course, students will read representative world masterpieces from ancient, medieval and Renaissance literature. Students will broaden their understanding of literature and their knowledge of other cultures through exploration of how literature represents individuals, ideas and customs of the world cultures. The course focuses strongly on examining the ways literature and culture intersect and define each other.

Learning Outcomes

1. Identify and comprehend key authors and literary works from ancient periods to the Enlightenment.
2. Understand each text's historical and cultural context.
3. Identify and analyze a variety of literary forms, including poetry, plays, and philosophical and religious texts.
4. Compare works from different cultures and historical periods examining genre, style, and content or theme.
5. Analyze how literary works reflect historical, national, cultural, and ethnic differences.

ENGL 2675. Transatlantic Literatures**3 Credits (3)**

This course tracks the production, circulation, and reception of literary works in transatlantic contexts over at least 150 years. Students examine a variety of documents to map transformations in form, genre, and medium across historical and geographic contexts. Students consider how colonization, exile, displacement, and migration have track the production, circulation, and reception of literary works in transatlantic contexts over at least 150 years reinforced or contested national literary traditions.

Learning Outcomes

1. Track the production, circulation, and reception of literary works in transatlantic contexts over at least 150 years
2. Identify and analyze a variety of documents to map transformations in form, genre, and medium across historical and geographic contexts
3. Explain how colonization, exile, displacement, and migration have reinforced or contested national literary traditions.

ENGL 2996. Special Topics**1-3 Credits**

Emphasis on a literary and/or writing subject chosen for the semester. Repeatable for a unlimited credit under different subtitles.

Learning Outcomes

1. Varies

ENGL 301. Theory and Criticism: Rhetoric and Culture**3 Credits (3)**

Introduction to rhetorical criticism with an emphasis on understanding the theoretical and cultural underpinnings for the rhetorical analyses of texts.

ENGL 302. Theory and Criticism: Literature and Culture**3 Credits (3)**

Introduction to literary criticism, from its classical beginnings through contemporary critical approaches.

ENGL 303. Theory and Criticism: Film, Media and Culture**3 Credits (3)**

Surveys classical and contemporary film theory. Explores the relationship of theory to textual analysis and filmmaking practices. Includes auteurism semiotics, psychoanalysis, and other theories, as well as theories of other media.

ENGL 304. Creative Writing: Prose**3 Credits (3)**

Imaginative writing, chiefly prose narrative. Repeatable for a maximum of 9 credits.

ENGL 306. Creative Writing: Poetry**3 Credits (3)**

Introduction to the writing of poetry. Repeatable for a total of 9 credits.

ENGL 307. Creative Writing: Creative Nonfiction**3 Credits (3)**

Introduction to creative nonfiction. Skills emphasized will include the personal voice, powers of observation and reflection, advocacy, argument, and a creative, powerful use of language. Repeatable for a maximum of 9 credits.

ENGL 308. Creative Writing: Playwriting**3 Credits (3)**

Technique of one-act playwriting, and analysis of dramatic structure. Crosslisted with: THEA 308

ENGL 309. Screenwriting I**3 Credits (3)**

Writing intensive. Students learn the craft of screenwriting, honing skills in writing dialogue and visual narrative, crafting dynamic characters and dramatic action. Original student scripts will be performed and discussed in class. Consent of instructor required. Crosslisted with: CMI 309 and THTR 306

Prerequisite(s): ENGL 235 or CMI 235.

ENGL 310. Critical Writing**3 Credits (3)**

A course in critical reading, writing, and research designed to prepare English majors for upper-division courses.

ENGL 312. Digital & Visual Rhetoric**3 Credits (3)**

Includes discussion of how digital and visual media shape our everyday lives. Prepares students to analyze media ecologies - moving from messages embedded in individual photographs to the physical infrastructures that make the internet work - and engage with media ethics.

Learning Outcomes

1. Conceptualize and articulate roles digital and visual media play in production of culture.
2. Describe media representation of individuals and communities in multiple, complex ways.
3. Demonstrate familiarity with public and academic conversations surrounding media ethics.
4. Discuss how technical limitations and media histories shape representational practices.
5. Use terms and ideas from course reading to engage media objects in day-to-day life.

ENGL 313. Media Literacy & Social Justice**3 Credits (3)**

Examines how information and misinformation spread through the media, while considering how this affects current social justice movements.

Learning Outcomes

1. Develop the ability to interpret and respond to current media texts as well as humanities and social sciences texts.
2. Analyze and evaluate cultural artifacts such as texts, images, and practices as a means of academic inquiry.
3. Critique arguments offered in the readings to determine the underlying methodology as well as underlying values.
4. Construct rhetorical arguments with evidence appropriate for an explicit audience and purpose.
5. Use written, visual, or oral strategies to persuade, inform, or engage, considering situation, audience, purpose, aesthetics, and diverse points of view.
6. Practice effective research strategies, and integrate research correctly and ethically from credible sources.
7. Understand and apply components of the writing process such as planning, collaborating, organizing, composing, revising, and editing.

ENGL 314. Public Writing and Rhetorics**3 Credits (3)**

Invites students to study and practice writing for public audiences, considering its ethical, political, and technological contexts and consequences.

Learning Outcomes

1. Conceptualize and articulate the complex relationship(s) between writing and publics.
2. Propose, develop, and produce a defined, purpose-based and public-facing text.
3. Identify and integrate research in support of writing project.
4. Use relevant genre, media, and technological conventions in support of writing project.

ENGL 315. Writing for the Web**3 Credits (3)**

Introduction to writing for the World Wide Web through practical application and analysis on both theory and research. Allows hands-on learning in a computer classroom.

ENGL 323. American Drama**3 Credits (3)**

Masterworks of American drama by noted American playwrights. Crosslisted with: THEA 323

ENGL 326. Cultural Identity and Representation Across the Media**3 Credits (3)**

Considers complex relationships between representation and culture including how images and language shape racial, ethnic, gender, sexual, and class identities. Examines theories from several disciplines. Includes lecture, discussion and production exercises.

ENGL 327V. Shakespeare around the Globe**3 Credits (3)**

Introduction to multicultural issues in Shakespeare's plays and to adaptations of Shakespeare's plays in other cultures.

ENGL 328V. Literature of Science Fiction and Fantasy**3 Credits (3)**

Survey and critical examination of the development of science fiction and fantasy as literature genres through selected authors and texts.

ENGL 339V. Chicana/o Literature**3 Credits (3)**

Introduction to Chicano novels, short stories and selected creative nonfiction.

ENGL 354. Form and Technique in Fiction**3 Credits (3)**

Literature course designed for fiction writers, especially those English majors in the Creative Writing emphasis. The course combines the study of published fiction with the study of craft. Some of the assignments will require the student to write original fiction based on exercises provided by the instructor. Repeatable for up to 9 credits.

ENGL 356. Form and Technique in Poetry**3 Credits (3)**

Literature course designed for poets, especially those English majors in the Creative Writing emphasis. The course combines the study of published poetry with the study of craft. Some of the assignments will require the student to write original poems based on exercises provided by the instructor. Repeatable for up to 9 credits.

ENGL 363. Literature for Children and Young Adults**3 Credits (3)**

A comparative, historical survey of literature for young (K to 12th grade) readers. Emphasis on critical evaluation.

Prerequisite: junior or above standing.

ENGL 380V. Women Writers**3 Credits (3)**

Introduction to multicultural women's traditions through intensive study of works by women writers. Crosslisted with: GNDR 380V.

ENGL 392V. Mythology**3 Credits (3)**

Greek and Roman mythology and its impact on European and English literature. Readings in myths, classical plays, and other literature with mythological interest, including nonclassical myths.

ENGL 394V. Southwestern Literature**3 Credits (3)**

Introduction to multicultural literature of the Southwest: oral folk literature, literary fiction (classic and contemporary), nonfiction and poetry.

ENGL 399. Special Topics**3 Credits (3)**

Emphasis on a theme, genre, figure, or technique chosen for study during the semester. Repeatable under different subtitles.

ENGL 400. Independent Study: Upper Division**1-3 Credits**

For students with demonstrated aptitude for independent work. Approval of instructor required before registration. Repeatable under different subtitles.

ENGL 403. Web Design and Development

3 Credits (3)

Combines study and practice of web design and development as rhetoric, technical, processual, and collaborative.

Learning Outcomes

1. Read and write HTML without the use of an editor
2. Design and format web pages via CSS
3. Understand what JavaScript is and how it's used
4. Understand the methods for accessibility
5. Create usable, aesthetically pleasing, and functional websites

ENGL 404. User Experience and Assistance

3 Credits (3)

Includes theories and discussions of users, usability, accessibility, disability, design, embodiment, and ethics to prepare students to understand, write for, and collaborate with users and audiences in technical and professional communication contexts.

Learning Outcomes

1. Understand histories and politics that inform contemporary best practices and ethics conversations associated with the development of user-oriented documentation
2. Develop a robust vocabulary that permits engagement in both academic and industry-based conversations about users, access, and documentation
3. Discuss pros, cons, and nuances of multiple user-centered research methods
4. Produce professional user-assistance documents and discuss the ethics of design decisions.

ENGL 405. Chaucer

3 Credits (3)

Principal works, with emphasis on *The Canterbury Tales*.

ENGL 407. Milton

3 Credits (3)

Studies in Milton's works, including *Paradise Lost*.

Learning Outcomes

1. Analyze Milton's poetry using the methods of close reading;
2. Demonstrate ability to read and develop persuasive literary-critical interpretations of Milton's poetry and prose;
3. Demonstrate ability to locate Milton's writings in historical and cultural context;
4. Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a Working Bibliography and Research Paper on a topic related to our course material.

ENGL 408. Shakespeare I

3 Credits (3)

Study in Shakespeare's early poems and plays. Repeatable for up to six credits under different subtitles.

Learning Outcomes

1. Analyze Shakespeare's poetry using the methods of close reading
2. Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays;

3. Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material;

4. Work effectively in small groups to interpret a scene through performance

ENGL 409. Shakespeare II

3 Credits (3)

Study in Shakespeare's later plays. ENGL 408 is not a prerequisite.

Repeatable for up to six credits under different subtitles. Crosslisted with THEA 409.

Learning Outcomes

1. Analyze Shakespeare's poetry using the methods of close reading;
2. Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays;
3. Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material;
4. Work effectively in small groups to interpret a scene through performance.

ENGL 412. Writing in the Workplace

3 Credits (3)

Study of workplace writing practices, including a focus on research-based, theoretical, and pedagogical approaches to professional communication.

ENGL 413. Advanced Creative Writing: Prose Workshop

3 Credits (3)

Imaginative writing, chiefly the narrative. May be repeated up to 12 credits.

Prerequisite(s): ENGL 304 or consent of instructor.

ENGL 414. Advanced Creative Writing: Poetry Workshop

3 Credits (3)

For advanced writers of poetry. Repeatable for a total of 12 credits.

Prerequisite(s): ENGL 306 or consent of instructor.

ENGL 416. Approaches to Literature

3 Credits (3)

Understanding, appreciation, techniques of instruction in the high school.

Prerequisite: at least 6 credits in upper-division English courses.

ENGL 417. Advanced Study in Critical Theory

3 Credits (3)

Advanced study of one or more major trends in theoretical inquiry within English studies. Some prior study of theory, such as English 301-303, strongly recommended. Repeatable under different subtitles.

ENGL 419. Modern Rhetorical Theory

3 Credits (3)

Major figures in rhetorical theory, with particular emphasis on developments in rhetorical theory in the twentieth century.

ENGL 422. Advanced Study in a Literary Form or Genre

3 Credits (3)

Close study of a topic in a particular literary form or genre. May be repeated under different subtitles.

ENGL 423. Advanced Study in a Major Author

3 Credits (3)

Close study of selected works by a major author. May be repeated under different subtitles.

ENGL 430. Online Publishing

3 Credits (3)

This three-credit course provides a theoretical background for online publishing and design as well as hands on experience publishing an online arts magazine.

ENGL 431. Technical Editing
3 Credits (3)

Uses workshops, readings, hands-on projects, and discussion to improve skills in gathering, writing, designing, and editing technical information. For students interested in technical communication as well as students interested in developing strengths in communicating in scientific and technical fields.

ENGL 433. Victorian Literature
3 Credits (3)

Intensive study of major writers and critical topics from the Victorian period. Repeatable under different subtitles.

ENGL 442. Modern and Contemporary American Poetry
3 Credits (3)

Studies the development of American poetry from World War I to the present. Repeatable under a different subtitle. May be repeated up to 6 credits.

ENGL 445. Postmodern Fiction
3 Credits (3)

Study of the various forms of formally innovative experimental fiction produced since 1945, with a focus on the relationship between literary history and its sociohistorical contexts. Some texts will be read in translation. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 446. Advanced Creative Writing: Nonfiction Prose
3 Credits (3)

This workshop-format class for advanced writers will examine the many varieties of Creative Nonfiction. Students should be prepared for a rigorous reading load of published nonfiction and student submissions. Because of the workshop format, every student is expected to contribute extensively to every class, both in printed form and oral comments. Taught with ENGL 546. May be repeated up to 12 credits.

Prerequisite(s): ENGL 307 or consent of instructor.

ENGL 449. Advanced Study in Writing
3 Credits (3)

Close study of a topic in composition, rhetoric and/or technical and professional communication. Repeatable for a maximum of 6 credits with permission of department.

ENGL 453. World Literatures
3 Credits (3)

Study of one or more literary traditions exclusive of those originating in Europe and the United States. Readings will include texts in translation. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 458. Latino/a Literature and Culture
3 Credits (3)

Focuses on established and emergent Latino/a literary and cultural production. Incorporates both literary and sociocultural readings of texts. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 460. Proposal Writing
3 Credits (3)

Developing proposals and grants in a workshop setting.

ENGL 469. Advanced Study in American Literature
3 Credits (3)

Covers selected works for a particular period of American literary history. Repeatable under different subtitles.

ENGL 470. Approaches to Composition
3 Credits (3)

Theory and practice of teaching writing. Discussion and application of classroom practices, definition of standards, and evaluation of student writing.

ENGL 471 M. Scholarly Writing for International Graduate Students
3 Credits (3)

This course is designed for international graduate students with an emphasis on strengthening academic writing skills, analyzing scholarly articles, writing research papers and reports, reviewing English grammar, and citing in APA style. Graded: S/U grading. May be repeated up to 3 credits. Graded: S/U grading.

Prerequisite: Placement in ENGL 471 M through NMSU's English Language Placement Test (ELPT), or#successful completion of#ENGL 1105M, or consent of instructor.

Learning Outcomes

1. Differentiate between genres in the discourses of their chosen disciplines.
2. Write part-genres (problem-solutions and Methods and Discussion sections) and genres (book/article reviews and research papers).
3. Analyze writing conventions in peer-reviewed, scholarly articles in their chosen disciplines.
4. Develop academic research abilities.
5. Apply analytical skills to the discourses of their chosen disciplines to explore how effective academic writing is achieved.
6. Incorporate APA style format for in-text citations and references into their writing.

ENGL 478. Document Design
3 Credits (3)

Advanced study in writing, with an emphasis on the computer as a tool for designing visually informative text. Includes theory and research in document design and the use of page composition and graphics software.

ENGL 479. Computers and Writing
3 Credits (3)

This course will trace the history of computers and composition as a field by looking at the work of important scholars including Selfe, Hawisher, Johnson-Eilola, and Wysocki. We will then focus on specific ways new media might be integrated into composition classrooms. The course will include discussions, student facilitations, and experimentation with technologies.

ENGL 481. Women's Literature
3 Credits (3)

Intensive study of literature by women, in particular historical, aesthetic, cultural, or intellectual contexts. Repeatable under different subtitles.

ENGL 485 M. International Teaching Assistant Development
3 Credits (3)

Prepares international graduate students for teaching assignments in their field of study and work at NMSU. Assists international/multilingual graduate students in developing communication and teaching studies necessary to fulfill duties their duties as teaching assistants at NMSU.

Learning Outcomes

1. Demonstrate effective communication strategies as an instructor
2. Apply a variety of teaching strategies to present and explain content in your academic field

3. Demonstrate understanding of different aspects of undergraduate education in the United States
4. Demonstrate understanding of diverse student populations at NMSU

ENGL 489. Cultural Studies: Literature and Theory

3 Credits (3)

Examines the theory and practice of cultural studies in relation to the variety of discourse describable as literary, including autobiography, avant-garde writing, nonfiction prose, the essay, online writing, folklore, and popular genre fiction (such as mystery, romance, thriller, or horror). Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 497. Internship

3-6 Credits (3-6)

Supervised technical and professional communication internship in business, industry, government, or the university. Repeatable for a total of 6 credits. Consent of instructor required.

ENGL 500. Supervised Study

1-3 Credits

To prepare the student for the master's degree examinations by special studies in fields not covered in routine course work.

Prerequisite: consent of instructor.

ENGL 501. Online Publishing

3 Credits (3)

This three-credit course provides a theoretical background for online publishing and design as well as hands-on experience publishing an online arts magazine. Taught with ENGL 430.

ENGL 502. Critical Conversations in Technical and Professional Communication

3 Credits (3)

Introduces students to critical histories, theories, and key concepts in technical and professional communication across academic and industry boundaries.

Learning Outcomes

1. Understand the histories and politics of emergence of technical and professional communication as a field of study and expertise;
2. Identify and track key concepts, terms, and conversations that give shape to technical and professional communication;
3. Draw on a range of theories and methodologies to articulate and critique the function and effects of technical and professional communication;
4. Participate in disciplinary conversations through research and writing.

ENGL 503. Web Design and Development

3 Credits (3)

Combines study and practice of web design and development as rhetorical, technical, processual, and collaborative.

Learning Outcomes

1. Read and write HTML without the use of an editor
2. Design and format web pages via CSS
3. Understand what JavaScript is and how it's used
4. Understand the methods for accessibility

ENGL 504. User Experience and Assistance

3 Credits (3)

Includes theories and discussions of users, usability, accessibility, disability, design, embodiment, and ethics to prepare students to understand, write for, and collaborate with users and audiences in technical and professional communication contexts.

Learning Outcomes

1. Understand histories and politics that inform contemporary best practices and ethics conversations associated with the development of user-oriented documentation
2. Develop a robust vocabulary that permits engagement in both academic and industry-based conversations about users, access, and documentation
3. Discuss pros, cons, and nuances of multiple user-centered research methods
4. Produce professional user-assistance documents and discuss the ethics of design decisions

ENGL 505. Graduate Study in Chaucer

3 Credits (3)

Principal works, with emphasis on the Canterbury Tales. Requirements include independent directed research. May be repeated up to 3 credits.

ENGL 507. Special Topics in Rhetoric and Technical and Professional Communication

3 Credits (3)

Seminar course centered on contemporary issues in rhetoric and technical and professional communication. Repeatable under different subtitles, for up to 6 credits.

Learning Outcomes

1. Use rhetoric inquiry and theory to contextualize and study technical and professional communication.
2. Understand the disciplinary overlaps, tensions, and possibilities among rhetoric and technical and professional communication.
3. Track a contemporary thematic trend, issue, or question through rhetoric and technical and professional communication.

ENGL 508. Graduate Study in Shakespeare I

3 Credits (3)

Graduate study in Shakespeare's early poems and plays. Requirements include independent directed research. Repeatable for up to six credits under different subtitles.

Learning Outcomes

1. Analyze Shakespeare's poetry using the methods of close reading
2. Demonstrate graduate-level ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays
3. Demonstrate graduate-level skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material;
4. Work effectively in small groups to interpret a scene through performance

ENGL 509. Graduate Study in Shakespeare II

3 Credits (3)

Study in Shakespeare's late poems and plays. Requirements include independent directed research. Repeatable for up to six credits under different subtitles.

Learning Outcomes

1. Analyze Shakespeare's poetry using the methods of close reading
2. Demonstrate graduate-level ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays;
3. Demonstrate graduate-level skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material;
4. Work effectively in small groups to interpret a scene through performance

**ENGL 510. Proseminar in Rhetoric and Professional Communication
3 Credits (3)**

Introduction to research in rhetoric and professional communication. Taught with ENGL 610.

**ENGL 512. Graduate Study in Writing in the Workplace
3 Credits (3)**

Study of workplace writing practices, including a focus on research-based, theoretical, and pedagogical approaches to professional communication.

**ENGL 513. Creative Writing Workshop: Fiction
3 Credits (3)**

Advanced creative writing prose workshop. Imaginative writing, chiefly the narrative. Graduate level workshop for students who are not in the English Department MFA program. May be repeated for a maximum of 12 credits. Taught with ENGL 413 with additional work required at the graduate level.

**ENGL 514. Creative Writing Workshop: Poetry
3 Credits (3)**

Creative writing poetry workshop for advanced writers of poetry. Graduate level works for students who are not in the English Department MFA program. Repeatable for a maximum of 12 credits. Taught with ENGL 414 with additional work required at the graduate level.

**ENGL 516. Graduate Study in Approaches to Literature
3 Credits (3)**

Understanding, appreciation, techniques of instruction in the high school. Requirements include independent directed research.
Prerequisite: at least 6 credits in upper-division English courses.

**ENGL 517. Graduate Study in Critical Theory
3 Credits (3)**

Advanced study of one or more major trends in theoretical inquiry within English studies. Some prior study of theory, such as English 301, 302, or 303, strongly recommended. Repeatable under different subtitles.

**ENGL 518. History of Rhetoric
3 Credits (3)**

An investigation of the crucial writings that have shaped Western attitudes towards and practice of rhetoric. Course will examine key texts from the Greeks through the Enlightenment, especially as they have influenced contemporary rhetorical theory.

**ENGL 519. Graduate Study in Modern Rhetorical Theory
3 Credits (3)**

Major figures in rhetorical theory, with particular emphasis on developments in rhetorical theory in the 20th century. Students will be responsible for all requirements of ENGL 419 and will in addition undertake independent directed research.

**ENGL 521. Graduate Study in a Literary Period or Movement
3 Credits (3)**

Close study of a topic in a particular literary period or movement. Requirements include independent directed research. Repeatable under different subtitles.

**ENGL 522. Graduate Study in a Literary Form or Genre
3 Credits (3)**

Close study of a topic in a particular literary form or genre. Requirements include independent directed research. Repeatable under different subtitles.

**ENGL 523. Graduate Study of a Major Author
3 Credits (3)**

Close study of selected works of a major author. Requirements include independent directed research. Repeatable under different subtitles.

**ENGL 524. Graduate Study in a Major Text
3 Credits (3)**

Close study of a major text. Requirements include independent directed research. Repeatable under different subtitles.

**ENGL 525. Graduate Study in Comparative Literature
3 Credits (3)**

Close study of a selection on non-English literary works read in translation. English-language works from a similar literary period or genre may also be read. Requirements include independent directed research. Repeatable under different subtitles.

Prerequisite: graduate standing or consent of instructor.

**ENGL 526. Special Topics in Critical Theory
3 Credits (3)**

Study of a specific historical or theoretical topic, trend, or movement in Critical Theory. Repeatable under different subtitles.

**ENGL 527. Graduate Study in Film and Digital Media
3 Credits (3)**

Offers close graduate study of a form or genre, a major figure or style, a historical period or movement, or a major theme or text. Topics vary from semester to semester.

**ENGL 531. Technical Editing
3 Credits (3)**

Uses workshops, readings, hands-on projects, and discussion to improve skills in gathering, writing, designing, and editing technical information. For students interested in technical communication as well as students interested in developing strengths in communicating in scientific and technical fields.

**ENGL 533. Victorian Literature
3 Credits (3)**

Intensive study of major writers and critical topics from the Victorian period. Repeatable under different subtitles.

**ENGL 534. Graduate Study: Form and Technique in Fiction
3 Credits (3)**

Advanced study of issues in form and technique in fiction, including point of view, scene and dialogue, and story structure. Repeatable for a maximum of 6 credits.

**ENGL 535. Graduate Study: Form and Technique in Poetry
3 Credits (3)**

Advanced study of issues in form and technique in poetry, including voice, tone, syntax, and structure. Repeatable for a maximum of 12 credits.

**ENGL 536. The Borderlands Writing Project
3-6 Credits (3-6)**

Intensive month-long seminar for practicing teachers and educators designed to improve the teaching of writing and the writing process and literacy and reading in schools and other educational contexts. Reading, discussing, and writing about current professional literature; completing teacher inquiry; and planning action research. Participants complete personal and professional writing, as well as additional professional development activities. By invitation only. Affiliated with the National Writing Project. Consent of instructor required. Crosslisted with: RDG 536

**ENGL 542. Modern and Contemporary American Poetry
3 Credits (3)**

Studies the development of American poetry from World War I to the present. Repeatable under different subtitles. May be repeated up to 6 credits.

**ENGL 543. Multimedia Theory and Production
3 Credits (3)**

Issues, theories, and production practices underlying design of multimedia, including rhetorical choices, aesthetic approaches, usability concerns, and diverse academic and popular discourses contributing to continued development of digital texts. Taught with ENGL 643.

ENGL 544. Modern British Fiction

3 Credits (3)

Study of the fiction produced in the British Isles in the 20th and 21st centuries. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 545. Postmodern Fiction

3 Credits (3)

Study of the various forms of formally innovative experimental fiction produced since 1945, with a focus on the relationship between literary history and its sociohistorical contexts. Some texts will be read in translation. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 546. Advanced Creative Writing: Nonfiction Prose

3 Credits (3)

This graduate-level workshop will examine the many varieties of Creative Nonfiction. Students should be prepared for a rigorous reading load of published nonfiction and student submissions. Because of the workshop format, every student is expected to contribute extensively to every class, both in printed form and oral comments. Taught with ENGL 446 with additional work required at the graduate level. Consent of Instructor required. Crosslisted with: ENGL 446.

ENGL 548. Graduate Study in Empirical Research

3 Credits (3)

Introduction to empirical research methods in composition, professional communication, and rhetoric.

ENGL 549. Graduate Study in Writing

3 Credits (3)

Close study of a topic in composition, rhetoric, and/or technical and professional communication. Topics vary. Repeatable for a maximum of 6 credits.

ENGL 550. Graduate Study in Literacy

3 Credits (3)

Studies in literacy theory and literacy research. Topics may vary. Taught with ENGL 650.

ENGL 552. Graduate Study in History of the English Language

3 Credits (3)

This course examines the history of the English language from its Indo-European origins through its development into an international language. The aim is to describe the English language formally and to trace linguistic change over time. Samples of written English will illustrate various stages in the development of English. Also considered are contemporary social and political issues related to language, including the problem of 'standard English' and the uses of language in advertising, the media, and politics.

ENGL 553. World Literatures

3 Credits (3)

Study of one or more literary traditions exclusive of those originating in Europe and the United States. Readings will include texts in translation. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 555. Graduate Study in Rhetoric of Scientific Literature

3 Credits (3)

Intensive study of the rhetoric of selected works of scientific literature.

ENGL 558. Latino/a Literature and Culture

3 Credits (3)

Focuses on established and emergent Latino/a literary and cultural production. Incorporates both literary and sociocultural readings of texts. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 560. Proposal and Grant Writing

3 Credits (3)

Developing proposals and grants in a workshop setting.

ENGL 561. Topics in Writing Program Administration

3 Credits (3)

Explores issues, theories, and research underlying the design of writing programs and the administration of writing centers. Repeatable for a maximum of 6 credits. Taught with ENGL 661.

ENGL 563. Graduate Study in English Literature

3 Credits (3)

Covers selected works for a particular period of English literary history. Repeatable under different subtitles.

ENGL 564. History and Theory of Composition Studies

3 Credits (3)

Studies in the history and theory of composition as a discipline. Taught with ENGL 664.

ENGL 565. Intercultural Rhetoric and Professional Communication

3 Credits (3)

Examines rhetorical traditions in intercultural professional, technical, academic, and governmental contexts. Taught with ENGL 665.

ENGL 567. Documentary Film Theory and Criticism

3 Credits (3+3P)

Course offers critical survey of documentary film theory and criticism including considerations of the epistemological assumptions, rhetorical choices, aesthetic approaches, political circumstances of historical and contemporary documentary film.

ENGL 568. Rhetoric and Cultural Studies

3 Credits (3)

Explores intersections between rhetoric and cultural studies. Examines theories and practices of texts and discourses in political and cultural contexts. Taught with ENGL 668.

ENGL 569. Graduate in American Literature

3 Credits (3)

A group of works from a particular period of American literary history. Repeatable under different subtitles.

ENGL 570. Graduate Study in Approaches to Composition

3 Credits (3)

Theory and practice of teaching writing, including classroom practices, definition of standards, and evaluation of student writing. Requirements include independent directed research.

ENGL 571. Composition Pedagogy and Practicum

3 Credits (3)

Examines the pedagogical implications of contemporary composition theory and research. Focuses on teaching composition at the college level. Consent of instructor required.

ENGL 572. Technical-Professional Communication Pedagogies

3 Credits (3)

Combines theoretical and practical attention to the pedagogies that underwrite the teaching of technical and professional communication; culminates in the development of a TPC course proposal, syllabus, and rationale. For Graduate students only.

Learning Outcomes

1. Engage with research and scholarship that reflects a range of approaches to conceptualize the purposes and goals of technical and professional communication courses;

2. Articulate a range of possibilities for and responsibilities of technical and professional communication pedagogy;
3. Compose and substantiate a teaching philosophy and course plan for teaching technical and professional communication.

ENGL 574. Workshop: Advanced Writing Prose
3 Credits (3)

Intensive practice in prose writing, primarily fiction, in a workshop environment with peer criticism. Repeatable for a total of 15 credits. Consent of instructor required.

ENGL 575. Workshop: Advanced Writing Poetry
3 Credits (3)

Intensive practice in poetry writing in a workshop environment with peer criticism. Repeatable for a total of 15 credits. Consent of instructor required.

ENGL 576. Workshop: Advanced Writing Playwriting
3 Credits (3)

Intensive practice in dramatic writing in a workshop environment with peer criticism. Repeatable for a total of 9 credits. Consent of instructor required.

ENGL 577. Workshop: Advanced Technical and Professional Writing
3 Credits (3)

Intensive practice in technical and professional writing and editing in a workshop environment. May be repeated for a total of 6 credits. Consent of instructor required.

ENGL 578. Topics in Rhetoric and Technology
3 Credits (3)

Explores intersections between rhetoric and technology, approaches may highlight theory, media production, and/or research. Repeatable for a maximum of 6 credits. Taught with ENGL 678.

ENGL 579. Computers and Writing
3 Credits (3)

This course will trace the history of computers and composition as a field by looking at the work of important scholars including Selfe, Hawisher, Johnson-Eilola, and Wysocki. We will then focus on specific ways new media might be integrated into composition classrooms. The course will include discussions, student facilitations, and experimentation with technologies.

ENGL 580. Graduate Problems in Creative Writing
3 Credits (3)

Independent study in creative writing. Consent of instructor required. Repeatable for a total of 9 credits.

ENGL 581. Women's Literature
3 Credits (3)

Intensive study of literature by women, in particular historical, aesthetic, cultural, or intellectual contexts. Repeatable under different subtitles.

ENGL 582. Gender and Popular Culture
3 Credits (3)

Intensive study of the representations of gender in popular culture. Examines the historical, aesthetic, and cultural contexts of these representation and the various critical and theoretical lenses we use to understand them. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 583. Critical Writing Studies
3 Credits (3)

Overview of current and historical approaches to the critical study of gender and language: how gender theoretically manifests in linguistic, social, cultural, academic, and professional contexts.

ENGL 584. Workshop: Advanced Academic Writing for International Students
3 Credits (3)

This workshop-based course is for graduate-level multilingual writers from all disciplines who want to improve their English academic writing in an intensive and collaborative environment. Students will propose a major writing project to workshop throughout the semester, such as dissertation, thesis, comprehensive exams, etc. Some of the topics covered will be academic language, cohesion/coherence, organization, and supporting academic arguments. Other topics to be determined by needs of the class.) 4.Consent of instructor.

Prerequisite(s): 1.Be classified as a graduate student by the Graduate School 2.Be classified as an international student whose first language is not English 3.Have a major writing project in progress (comprehensive exams, thesis, dissertation, conference paper, etc.

ENGL 585. Advanced Writing Workshop: RPC Capstone
3 Credits (3)

Students work to develop and revise their chosen Master's program Capstone Project (a portfolio, thesis or master essay) in consultation with instructor and classmates. Students provide and receive feedback on their work-in-progress. Consent of Instructor required.

ENGL 589. Cultural Studies: Literature and Theory
3 Credits (3)

Examines the theory and practice of cultural studies in relation to the variety of discourse describable as literary, including autobiography, avant-garde writing, nonfiction prose, the essay, online writing, folklore, and popular genre fiction (such as mystery, romance, thriller, or horror). Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 590. Master's Seminar in Rhetoric
3 Credits (3)

Studies in theories of and issues in rhetoric. Topics may vary from year to year. Repeatable for a total of 9 credits.

ENGL 592. Master's Theory, Practice, and Profession
3 Credits (3)

Students will study major poetics/narratology pieces in the field and other related professional topics such as literary citizenship, publishing, and job seeking skills. Students will also propose and develop a year-long project in one of the above categories, such as a community reading or workshop, a conference panel proposal, a paper presentation, a chapbook press launch, writing/placing literary book reviews, or work on an outreach project. Must be taken in each of the last two semesters of the MFA and currently with ENGL 594 (Master's Workshop). Restricted to MFA-Creative Writing students, or by consent of instructor.

Learning Outcomes

1. Understand, analyze, and effectively use the critical discourse of poetics/narratology/craft in the field of creative writing
2. Design and execute an outreach or professional project that contributes to a creative writing community
3. Explore applications of their training in professional contexts.
4. Analyze how students' own reading, writing, and research respond to existing leadership in professional creative writing communities, help provide new leadership, and answer community needs.

ENGL 594. Master's Workshop
3 Credits (3)

Students will submit a draft of their thesis project, in their major genre, for workshop critique. Revision of the thesis draft will be submitted to the instructor. Restricted to MFA Creative Writing students, or by consent of instructor. Must be taken in each of the last two semesters of the

MFA, and concurrently with ENGL 592 (Master's Theory, Practice, and Profession).

Learning Outcomes

1. Understand, analyze, and effectively use the critical discourse of the field of creative writing to discuss a thesis.
2. Examine how their thesis operates with the genre and within the context of contemporary literature.
3. Critically contextualize their thesis and those of their peers
4. Apply various revision strategies across a thesis-length manuscript, responding to the critiques of the instructor and their peers
5. Achieve the standards of publication of the University's thesis editor and learn those of the publishing environment in their genre.

ENGL 595. Master's Workshop: Poetry

3-6 Credits (3-6)

Students will submit a draft of thesis project for workshop critique. Revision of the thesis draft submitted to the instructor. Restricted to MFA CW majors.

Prerequisite(s): Enrolled in MFA penultimate semester.

ENGL 596. Master's Workshop: Fiction

3-6 Credits (3)

Students will submit a draft of thesis project for workshop critique. Revision of the thesis draft submitted to the instructor. Restricted to MFA CW majors.

Prerequisite(s): Enrolled in MFA penultimate semester.

ENGL 597. Internship in Technical and Professional Communication

3-6 Credits (3-6)

Supervised technical and professional communication in business, industry, government, or the university. May be repeated for a total of 6 credits. Consent of instructor required.

ENGL 598. Master's Essay

3 Credits (3)

Students electing the master essay option complete revision of a scholarly essay of 25-30 pages, the approximate length of a journal article, and reformulation of this essay to the 7-8 pages appropriate for presentation at a conference. This option also requires research of appropriate publication venues and a final oral defense of the project. A supervising faculty member will approve the selected essay, guide revision, and help students form an examining committee, which consists of at least two members of the graduate English faculty and one member of the graduate faculty from outside the department. Students are encouraged to undertake the Master Essay process in the first half of their third semester of full time graduate work, or soon after completing 18 hours of course work. This option is the preferred exam option, particularly for those students who intend to pursue Ph.D. study. Consent of instructor required.

ENGL 599. Master's Thesis

1-15 Credits

Thesis.

ENGL 600. Doctoral Research

1-15 Credits

Assigns credit for research performed prior to the doctoral comprehensive examination.

ENGL 601. Qualitative Research

3 Credits (3)

Theory and practice of designing research studies and of collecting and analyzing data. Emphasis on qualitative methods of research in composition, professional communication, and rhetoric.

ENGL 604. Digital Research Methods

3 Credits (3)

This course will serve as one of the core methods courses in the RPC PhD program, focusing on "digital" methods in rhetorical studies. As such, the aim of this class is to help you begin to gain confidence in conducting research in rhetoric, professional communication, and composition using digital methods. In this course we will assume that digital methods in rhetoric take broadly two forms: first, digital methods of acquisition, processing, and presentation of research data. And second, digital methods of production and circulation of rhetorical objects. The former closely resembles the methods of "digital humanities" while the latter will be closer to media archaeology and "critical making" practices. In all cases, we will relate these tools and methods to key questions and theories in our field, asking how and why we might apply digital methods in rhetorical scholarship.

Prerequisite(s): graduate standing.

ENGL 610. Proseminar in Rhetoric and Professional Communication

3 Credits (3)

Introduction to research in rhetoric and professional communication. Required of and limited to students enrolled in the Ph.D. program in Rhetoric and Professional Communication.

ENGL 643. Multimedia Theory and Production

3 Credits (3)

Issues, theories, and production practices underlying design of multimedia, including rhetorical choices, aesthetic approaches, usability concerns, and diverse academic and popular discourses contributing to continued development of digital texts. Taught with ENGL 543.

ENGL 649. Graduate Study in Writing

3 Credits (3)

Close study of a topic in composition, rhetoric, and/or technical and profession communication. Repeatable for a total of 6 credits.

ENGL 650. Graduate Study in Literacy

3 Credits (3)

Studies in literacy theory and literacy research. Topics may vary. Taught with ENGL 550.

ENGL 661. Topics in Writing Program Administration

3 Credits (3)

Explores issues, theories, and research underlying writing programs and the administration of writing centers. Repeatable for a maximum of 6 credits. Taught with ENGL 561.

ENGL 664. History and Theory of Composition Studies

3 Credits (3)

Studies in the history and theory of composition as a discipline. Taught with ENGL 564.

ENGL 665. Intercultural Rhetoric and Professional Communication

3 Credits (3)

Examines rhetorical traditions in intercultural professional, technical, academic, and governmental contexts. Taught with ENGL 565.

ENGL 668. Rhetoric and Cultural Studies

3 Credits (3)

Explores intersections between rhetoric and cultural studies. Examines theories and practices of texts and discourses in political and cultural contexts. Taught with ENGL 568.

ENGL 678. Topics in Rhetoric and Technology

3 Credits (3)

Explores intersections between rhetoric and technology, approaches may highlight theory, media production, and/or research. Repeatable for a maximum of 6 credits. Taught with ENGL 578.

ENGL 683. Critical Writing Studies**3 Credits (3)**

This course investigates the field of Writing Studies as a distinct field of study, related to but not synonymous with Composition Studies. While debates surrounding the relationships among Writing Studies and Composition Studies flourish, this course centers on the former—investigating writing as a practice, process, and object that merits attention in its own right. Such attention will be grounded in contemporary critical and cultural theory that contests writing as a positive or neutral sign (i.e. activity theory, posthumanism, ecocriticism, new materialism, new media studies; feminist, queer, critical race or decolonial theory). Crosslisted with: ENGL 583.

Prerequisite(s): graduate standing.

ENGL 690. Doctoral Seminar in Rhetoric**3 Credits (3)**

Studies in theories of and issues in rhetoric. Topics may vary from year to year. Repeatable for a maximum of 9 credits.

ENGL 700. Doctoral Dissertation**1-15 Credits**

Dissertation.

ENGR-ENGINEERING

ENGR 100G. Introduction to Engineering**3 Credits (2+3P)**

An introduction to the various engineering disciplines, the engineering approach to problem solving, and the design process. Projects emphasize the importance of teamwork, written & oral communication skills, as well as ethical responsibilities. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 1220G or above.

Learning Outcomes

1. Analyze the engineering road maps and have a solid curriculum plan for each semester including summers.
2. Discuss the importance of information on engineering student organizations.
3. Demonstrate an understanding of the design process from initial conception to final solution through the application of critical thinking while learning important team building skills approaches to problem solving.
4. Identify the different engineering fields, the engineering profession, career paths open to engineers, and the process to professional licensure.
5. Apply clear communication and critical thinking skills by collecting, organizing, and analyzing data in a complete, clearly written, and oral presentation of their work.
6. Make use of basic knowledge and skills in Microsoft Excel to complete engineering assignments.
7. Identify, compute, and apply how dimensions, length, time, mass, force, temperature, electric current, energy and power, and related parameters are related to the different fields of engineering.
8. recognize ethical and professional responsibilities in engineering situations and make informed judgements.

ENGR 100GH. Introduction to Engineering Honors**3 Credits (2+3P)**

An introduction to the various engineering disciplines, the engineering approach to problem solving, and the design process. Projects emphasize the importance of teamwork, written & oral communication skills, as well as ethical responsibilities. May be repeated up to 3 credits. Crosslisted with: ENGR 100.

Prerequisite(s)/Corequisite(s): MATH 1220G or above.

Learning Outcomes

1. Analyze the engineering road maps and have a solid curriculum plan for each semester including summers.
2. Discuss the importance of information on engineering student organizations.
3. Demonstrate an understanding of the design process from initial conception to final solution through the application of critical thinking while learning important team building skills approaches to problem solving.
4. Identify the different engineering fields, the engineering profession, career paths open to engineers, and the process to professional licensure.
5. Apply clear communication and critical thinking skills by collecting, organizing, and analyzing data in a complete, clearly written, and oral presentation of their work.
6. Make use of basic knowledge and skills in Microsoft Excel to complete engineering assignments.
7. Identify, compute, and apply how dimensions, length, time, mass, force, temperature, electric current, energy and power, and related parameters are related to the different fields of engineering.
8. recognize ethical and professional responsibilities in engineering situations and make informed judgements.

ENGR 110. Introduction to Engineering Design**3 Credits (2+3P)**

Sketching and orthographic projection. Covers detail and assembly working drawings, dimensioning, tolerance specification, and design project

Learning Outcomes

1. Students will learn the fundamentals of part modeling and assemblies using modeling techniques in the SolidWorks solid modeling software.
2. They will learn how to put these parts and assemblies into production drawings using proper Geometric Dimensioning.

ENGR 111. Mathematics for Engineering Applications**3 Credits (3)**

An introduction to engineering mathematics and basic programming skills needed to perform elementary data manipulation and analysis. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): MATH 1250G. Prerequisite(s): MATH 1220G.

ENGR 120. DC Circuit Analysis**4 Credits (3+3P)**

An introduction to DC circuit analysis using Ohm's law, Kirchoff's laws, and Thevenin's and Norton's theorems.

Prerequisite/Corequisite: MATH 1250G.

Learning Outcomes

1. Analyze and design DC circuits, including ideal op-amps, using concepts of voltage, current, power, Kirchoff's laws, and network theorems.
2. Design simple systems involving dc circuits
3. Work and learn in teams.

ENGR 130. Digital Logic**4 Credits (3+3P)**

An introduction to logic design and the basic building blocks of digital systems. Topics include numbering systems, Boolean algebra, digital logic theory, combinational logic, sequential logic, and applications such

as adders, multiplexers, encoders, counters, and registers. Includes hands-on laboratory.

Prerequisite: A grade of C- or better in MATH 1220G or higher.

Learning Outcomes

1. Demonstrate ability to convert numerical values to the commonly used digital representations and their use for arithmetic and logical functions.
2. Formulate and solve problems related to Boolean logic functions and truth tables and using them to simplify logic expressions.
3. Formulate and solve problems related to sequential logic functions, and the ability to integrate with combinational logic to produce a simple state machine.
4. Formulate and solve problems related to common integrated circuit issues, such as logic voltage levels, propagation delay, and fan-out.

ENGR 140. Introduction to Programming and Embedded Systems

4 Credits (3+3P)

An introduction to programming and to the field of embedded systems. Starting from the basic concepts of programming, this course uses microcontrollers, sensors, motors, and other peripheral devices to support the learning and application of the problem-solving process through embedded systems. This course focuses on reading, writing, debugging, testing, and documenting computer programs.

Prerequisite/Corequisite: E T 182 or ENGR 130.

Learning Outcomes

1. Set up and use a rich programming environment for programming
2. Employ effective use of the problem-solving process
3. Analyze existing code
4. Write, debug and test code given software requirements
5. Apply testing and documentation best practices
6. Transfer and apply programming knowledge to an Arduino-based environment

ENGR 190. Introduction to Engineering Mathematics

4 Credits (4)

Engineering applications involving involved Math topics most heavily used in first and second-year engineering courses. Topics include engineering applications of algebra, trigonometry, vectors, complex numbers, sinusoids and signals, systems of equations and matrices, derivatives, integrals and differential equations.

Prerequisite: A grade of C- or better in MATH 1250G or higher.

Learning Outcomes

1. Ability to solve systems of linear equations by use of matrices
2. Ability to use complex numbers and periodic function to solve engineering problems
3. Ability to solve problems using various coordinate system
4. Write and Solve problems with 2-D 3D vectors
5. Write and Solve problems with derivatives
6. Write and solve problems with integrals

ENGR 198. Special Topics in Engineering

1-3 Credits

Directed individual study of topics in engineering. Written reports covering work required. May be repeated for a maximum of 6 credits. Restricted to engineering majors. Graded S/U.

Prerequisite: consent of academic dean.

ENGR 217. Manufacturing Processes

3 Credits (3)

An introduction to modern manufacturing processes and their application. Students will be introduced to manufacturing concepts

such as traditional and non-traditional machining operations, tooling, material selection, thermal joining, geometric dimensioning & tolerancing, metrology, additive manufacturing, assembly and inspection, g-code, and automated manufacturing using CAM packages.

Prerequisite: A grade of C- or better in both, ENGR 110 and (MATH 1220G or higher).

Learning Outcomes

1. Identify the different manufacturing processes and their applications
2. Use, set up, and calibrate measuring tools.
3. Apply geometric tolerances to engineering drawings
4. Demonstrate basic knowledge of materials and material properties
5. Demonstrate basic knowledge of GM codes and their application
6. Proficiently use CAM packages such as SolidWorks CAM
7. Identify different tooling, their use, and manufacturing application

ENGR 217 L. Manufacturing Processes Lab

1 Credit (3P)

A hands-on application of the concepts introduced in ENGR 217. This lab will expose the students to hands-on exercises and manufacturing methods used in industry.

Corequisite: ENGR 217.

Learning Outcomes

1. Understand how a product goes from design to being manufactured
2. Gain knowledge of industry tools and technology
3. Learn how to design for manufacturing
4. Engage students in critical thinking and the design process
5. Gain an appreciation for, and skills for effective communication, teamwork, ethics
6. Increase student knowledge of Geometric Dimensioning and Tolerancing (GDT)
7. Use of other tools such as drawing software, mathematics, economics, etc. knowledge of dimensions, length, time, mass, force, temperature, electric current, energy and power, and related parameters in engineering
8. Understand industry and NMSU safety practices and apply them whenever applicable.

ENGR 230. AC Circuit Analysis

4 Credits (3+3P)

An introduction to AC circuit analysis techniques, RC/RL and RLC transients, phasors, complex power, filter response, and operational amplifiers.

Prerequisite: A grade of C- or better in both, ENGR 120 and (MATH 1440 or MATH 1521G or higher) or ENGR 190)).

Learning Outcomes

1. Analyze and design AC circuits, including ideal op-amps, using concepts of voltage, current, power, Kirchhoff's laws, and network theorems.
2. Design simple systems involving ac circuits
3. Work and learn in teams.

ENGR 233. Engineering Mechanics I

3 Credits (3)

Engineering mechanics using vector methods. Force systems, resultants, equilibrium, distributed forces, area moments, and friction.

Prerequisite: A grade of C- or better in ENGR 190 or MATH 1440 or MATH 1521G.

Prerequisite/Corequisite: PHYS 1310G or PHYS 1230G.

Learning Outcomes

1. Have an understanding of the force systems, resultants, equilibrium, distributed forces, area moments, and friction;
2. Be able to apply the acquired knowledge to formulate, solve and interpret solutions of engineering mechanics problems

ENGR 234. Engineering Mechanics II**3 Credits (3)**

Kinetics of particles, kinematics and kinetics rigid bodies, systems of particles, energy and momentum principles, and kinetics of rigid bodies in three dimensions.

Prerequisite: A grade of C- or better in M E 236 or C E 233 or ENGR 233.

Learning Outcomes

1. Have a good understanding of the kinetics of particles, kinematics and kinetics rigid bodies, energy and momentum principles, and kinetics of rigid bodies.
2. Be able to apply the acquired knowledge to formulate, solve and interpret solutions of engineering mechanics problems

ENGR 398. Engineering Leadership Seminar**3 Credits (3)**

This course introduces students to concepts and skills related to leadership positions held at the University in the College of Engineering. The course will provide theory and practice in leadership; provide skills in effective oral communications and presentation, team building skills, and general knowledge of NMSU and the College of Engineering. May be repeated up to 18 credits. Consent of Instructor required.

ENGR 400. Special Topics**1-3 Credits (1-3)**

Directed study or project. Students must be in Junior/Senior level standing to enroll. May be repeated up to 6 credits.

Learning Outcomes

1. The Learning goals will be dependent on the what subject matter taught under the ENGR 400 course.

ENGR 401. Engineering Capstone I**3 Credits (1+6P)**

Seniors will work in teams to apply a systematic design process to real world multidisciplinary problems. Problems selected from a broad spectrum of interest areas. Students will utilize the knowledge and skills acquired in earlier course work, and incorporate appropriate engineering standards and multiple realistic constraints. Emphasis is placed on the design process, the technical aspects of the design, and the development of a prototype that meets design objectives. 1st of 2 course sequence.

Prerequisite: Grade of C- or better in (I E 316, I E 365, and I E 351) or a grade of C- or better in E E 300 or a grade of C- or better in M E 326 or a grade of C- or better in PHYS 395.

Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

ENGR 402. Engineering Capstone II**3 Credits (1+6P)**

Seniors will work in teams to apply a systematic design process to real world multidisciplinary problems. Problems are selected from a broad spectrum of interest areas. Students will utilize the knowledge and skills acquired in earlier course work, and incorporate appropriate engineering standards and multiple realistic constraints. Emphasis is placed on the design process, the technical aspects of the design, and the development of a prototype that meets design objectives. Students must be a Senior to enroll in this course.

Prerequisite: A grade of C- or better in ENGR 401.

Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

ENTR-ENTREPRENEURSHIP AND INNOVATION

ENTR 1110. Entrepreneurship**3 Credits (3)**

Introduces students to the concept of entrepreneurship and to the process of business startups. May be repeated up to 3 credits.

Prerequisite: BUSA 1110.

Learning Outcomes

1. Identify the unique characteristics of an entrepreneur.
2. Identify opportunities and conduct needs analysis.
3. Develop value proposition/market fit for proposed products and services.
4. Develop an appropriate business model.
5. Identify availability of necessary resources.

ENTR 331. Business Creation and Valuation**3 Credits (3)**

The course is designed to provide a first look at the entrepreneurship process by focusing how the firm will/does create value in the marketplace. As such, it is designed to integrate knowledge of business functions and apply business analysis techniques to the valuation of new ventures/entrepreneurial firms.

ENVE-ENVIRONMENTAL ENGINEERING

ENVE 450. Aquatic Chemistry**3 Credits (3)**

Theoretical aspects of physical chemistry applied to the solution of environmental engineering problems. Emphasis on acid-base reactions, precipitation-dissolution reactions, complexation, and redox reactions. Same as ENVE 550.

Prerequisite: C- or better grade in C E 256.

Learning Outcomes

1. Students will be able to use fundamental principles of physical chemistry as applied to acid-base, precipitation-dissolution, complexation, and redox reactions to determine the composition of waters, including natural waters and waters encountered in water and wastewater treatment processes.

ENVE 451. Unit Processes/Operation of Water Treatment**3 Credits (3)**

Theory and applications of unit processes in environmental engineering. Physical and chemical water treatment methods are emphasized. Crosslisted with: ENVE 551.

Prerequisite: C- or better grade in C E 356.

Learning Outcomes

1. Students will be able to use fundamental reactor design principles to design unit operations for water treatment, including sedimentation, coagulation, flocculation, filtration, and disinfection.

ENVE 452. Unit Processes/Operation of Wastewater Treatment**3 Credits (3)**

Theory and applications of unit processes in environmental engineering. Biological wastewater treatment methods are emphasized. Crosslisted with: ENVE 552.

Prerequisite: C- or better grade in C E 356.

Learning Outcomes

1. Students will be able to use fundamental reactor design principles to design unit operations for wastewater treatment, including sedimentation, aerobic and anaerobic microbial treatment, and disinfection.

ENVE 456. Environmental Engineering Design**3 Credits (3)**

Design of chemical, physical, and biological operations and processes involved in water and wastewater treatment. Student can also be a graduate student to enroll if they have not completed C E 356.

Prerequisite: C- or better grade in C E 356.

Learning Outcomes

1. Students will be able to incorporate knowledge from previously taken engineering design and economics courses to complete an environmental design and solve a real world problem.
2. Students will be able to communicate and explain their solution approach to a variety of audiences using different communication methods.

ENVE 459. Environmental Microbiology**3 Credits (3)**

An introduction to the diverse roles of microorganisms in natural and engineered environments. The topics include cellular architecture, energetics, and growth; population and community dynamics; water and soil microbiology; biogeochemical cycling; and microorganisms in biodegradation and bioremediation of contaminants. Students must be a Senior or in Graduate Standing to enroll.

Learning Outcomes

1. Students will be able to demonstrate the significance of microbial processes in natural and engineered processes.

ENVE 487. Air Pollution Control Systems Design**3 Credits (3)**

An introduction to sources and nature of air pollution, regulations, and risk analysis. Detailed study of air pollution control technologies and design of air pollution control equipment. Students must be a Senior or in graduate standing to enroll.

Learning Outcomes

1. Students will be able to explain the source and nature of air pollution.
2. Students will be able to relate air pollution to regulations using a risk analysis approach.
3. Students will be able to design air pollution control systems.

ENVE 504. Advanced Environmental Engineering Design**3 Credits (3)**

Advanced engineering design covering the subject matter of the Environmental Engineering capstone undergraduate design course plus an additional report or project. May be subtitled. Consent of instructor required.

Learning Outcomes

1. Students will be able to incorporate knowledge from previously taken engineering design and economics courses to complete an environmental design and solve a real world problem.
2. Students will be able to communicate and explain their solution approach to a variety of audiences using different communication methods.

ENVE 550. Aquatic Chemistry**3 Credits (3)**

Theoretical aspects of physical chemistry applied to the solution of environmental engineering problems. Emphasis on carbonate equilibria solubility, buffering and redox conditions. May be repeated up to 3 credits. Consent of Instructor required. Crosslisted with: ENVE 450.

Prerequisite(s): C E 256.

ENVE 551. Unit Processes/Operation of Water Treatment**3 Credits (3)**

Theory and applications with unit processes in environmental engineering. Physical / chemical treatment methods emphasized. May be repeated up to 3 credits. Crosslisted with: ENVE 451.

Prerequisite(s): C E 356.

ENVE 552. Unit Processes/Operation of Wastewater Treatment**3 Credits (3)**

Theory and applications with unit processes in environmental engineering. Biological treatment methods emphasized. May be repeated up to 3 credits. Crosslisted with: ENVE 452.

Prerequisite(s): Consent of instructor.

ENVE 556. Advanced Water Treatment and Reuse**3 Credits (3)**

Overview of both the theoretical and practical aspects of advanced water treatment technologies and water reuse applications. Basic design

features of the processes are presented, with emphasis on the underlying principles, including why and how a process works, what the significant variables are, and what the limitations of the process are. Problem solving skills and technical communication skills are emphasized.

Prerequisite: ENVE 551.

Learning Outcomes

1. Students will be able to design advanced water treatment processes, including membrane filtration, electrodialysis, ion exchange, advanced oxidation, photolysis, and distillation.
2. Students will gain knowledge in water reuse applications including water quality criteria, regulations, and implementation issues.

ENVE 557. Surface Water Quality Modeling

3 Credits (3)

Modeling the impacts of waste disposal practices on surface waters. Emphasis on fate and transport of bacteria, dissolved oxygen, nutrients, and toxicants in rivers, lakes, and tidal waters. Students must be in Graduate standing to enroll.

Learning Outcomes

1. The students will be able to use mathematical models to model the transport of constituents important for water quality, such as bacteria, viruses, nutrients, contaminants, and oxygen, in aqueous environments.

ENVE 598. Special Research Programs

1-3 Credits

Individual investigations either analytical or experimental. May be repeated up to 6 credits.

ENVE 599. Master's Thesis

15 Credits

Thesis. May be repeated for a maximum of 6 credits.

ENVE 630. Fate and Transport of Environmental Contaminants

3 Credits (3)

Modeling of transport phenomena in natural and engineered systems for predicting the fate of contaminants in the air, soil, sediment, and water compartments of the ecosystem.

Prerequisite: ENVE 557.

Learning Outcomes

1. The students will be able to use mathematical models to model the transport of contaminants in gas, aqueous, and soil environments.

ENV5-ENVIRONMENTAL SCIENCE

ENVS 1110G. Environmental Science I

4 Credits (3+2P)

Introduction to environmental science as related to the protection, remediation, and sustainability of land, air, water, and food resources. Emphasis on the use of the scientific method and critical thinking skills in understanding environmental issues.

Learning Outcomes

1. Students will learn to critically analyze cause-and-effect relationships in the environment
2. Students will integrate and synthesize knowledge and draw appropriate conclusions based on the scientific method

ENVS 2111. Environmental Engineering and Science

3 Credits (3)

Principles in environmental engineering and science: physical chemical systems and biological processes as applied to pollution control.

Crosslisted with: C E 256

Prerequisite: CHEM 1215G and MATH 1511G or ENGR 190.

Learning Outcomes

1. To understand the nature of water quality parameters in the context of Civil Engineering and Environmental Science (Water Treatment/Wastewater Treatment/Environmental Science)
2. To learn to apply engineering and scientific solutions to water quality problems
3. To understand environmental regulations and their consequences on the design of pollution control systems

ENVS 2111L. Environmental Science Laboratory

1 Credit (1)

Laboratory experiments associated with the material presented in ENVS 2111. Same as C E 256 L.

Corequisite(s): ENVS 2111.

Learning Outcomes

1. List typical analyses commonly performed to evaluate physical, chemical, and microbiological parameters used to describe water quality.
2. Follow experimental procedures listed in the class laboratory manual, or other publications such as Standards Methods, to perform common water quality analyses.
3. Evaluate, analyze, and discuss experimental results and present the conclusions in the form of a professional report

ENVS 300. Special Topics

1-4 Credits

Special subjects and credits to be announced in the Schedule of Classes. Consent of instructor required. Maximum of 4 credits per semester. Restricted to majors.

ENVS 301. Principles of Ecology

3 Credits (3)

A survey of ecology including general theory, the adaptations of organisms, population dynamics, species interactions, and the structure and function of natural communities and ecosystems. Crosslisted with: BIOL 301

Prerequisite(s): BIOL 2610G, A ST 311, and grade of C or better in MATH 1511G or Math Placement Exam score adequate to enroll in mathematics courses beyond MATH 1511G.

ENVS 312. Emergency Response to Hazardous Material Incidents

2 Credits (2)

EPA approved Environmental Response Training Program Course 165.15. In compliance with OSHA 29 CFR 1910.120. Normally taken during last year of study. Same as E T 312 and WERC 312.

Prerequisite: consent of instructor.

ENVS 361. Basic Toxicology

3 Credits (3)

Introduction to the principles of toxicology, discussion of toxic agents, environmental problems, testing procedures, and regulations. Prior course work in biology and chemistry recommended. Crosslisted with: TOX 361. May be repeated up to 3 credits.

Prerequisite: CHEM 1120G or CHEM 1225G and BIOL 2610G or BIOL 2110G.

Learning Outcomes

1. Learn how toxins are absorbed, distributed, metabolized, and excreted from living systems.
2. Demonstrate how metabolism can appreciably alter the toxicity of compounds as well as dictate the resultant toxicity with an emphasis on target organ(s).
3. Explain the specific mechanism(s) of actions of toxins targeting the liver, lung, kidney, and nervous systems.

4. Delineate how certain toxins induce cancer and/or promote the development of cancer.
5. Understand how and why certain plants and animals are poisonous and venomous, specifically linking discreet chemicals or complex mixtures to the resultant toxic manifestation.

ENVS 370. Environmental Soil Science**3 Credits (3)**

Continuation of SOIL 2110 that emphasizes soil properties and processes that directly relate to environmental pollution problems. Same as SOIL 370.

Prerequisite: SOIL 2110.

ENVS 391. Internship**3 Credits (3)**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. Maximum of 3 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/U, Audit).

ENVS 422. Environmental Chemistry**3 Credits (3)**

Chemistry of organic and metal ion pollutants in the environment and principles important to their remediation including bioremediation.

Restricted to: Main campus only. Crosslisted with: CHEM 422

Prerequisite(s): CHEM 1225G and either CHEM 2120 or CHEM 313.

Learning Outcomes

1. Describe and explain the solid, liquid, and gas phases of the environment and how they interact.
2. Understand the chemical reactions and processes that occur between various phases of the environment.
3. Learn how the chemical processes can be managed to promote environmental remediation, including the techniques and calculations used.

ENVS 447. Seminar**1 Credit (1)**

Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, HORT 447 and SOIL 447.

ENVS 449. Special Problems**1-3 Credits**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and 6 credits toward a degree. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: E S majors.

ENVS 451. Special Topics**1-4 Credits (1-4)**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

ENVS 452. Geohydrology**4 Credits (3+2P)**

Origin, occurrence, and movement of fluids in porous media and assessment of aquifer characteristics. Development and conservation of ground water resources, design of well fields. Crosslisted with: C E 452 and GEOL 452.

ENVS 457. Water Measurement**3 Credits (3)**

The fundamentals of measuring water will be covered. Participants will learn about measurement techniques that are used to estimate

evapotranspiration as well as commonly used water measurement structures to estimate water use. The benefits and problems that are associated with using each measurement will be discussed. Students will also learn about the principles of how to use water measurement as a management tool.

Prerequisite(s): MATH 1215 or higher, or consent of Instructor.

ENVS 460. Introduction to Air Pollution**3 Credits (3)**

An introduction to the physics and chemistry of tropospheric air pollution including sources of air pollution, local and long-range transport, instrumentation, regulatory requirements, control technology.

Prerequisite(s): PHYS 1310G, CHEM 1225G, MATH 1511G.

ENVS 462. Sampling and Analysis of Environmental Contaminants**3 Credits (1+6P)**

Theory, application, methodology, and instrumentation used in the sampling and analysis of environmental contaminants. Same as ENVE 462.

Prerequisites: ENVS 2111.

ENVS 470. Environmental Impacts of Land Use and Contaminant Remediation**3 Credits (3)**

The course will cover the integrated assessment of soil erosion, contaminant transport in soil and water, and contaminant remediation from site scale to watershed scales. Understanding of the controlling factors for each type land use impact will be gained through the use of risk assessment, case studies, and computer modeling. Case studies will illustrate the processes under various environmental applications. This course will also cover the application of solute transport principles and methods for the remediation of contaminated soil and groundwater. It will also discuss the contaminated site characterization, monitoring, and remediation design. Discussions of innovative methodologies will be supported with case studies. May be repeated up to 3 credits. Crosslisted with: WSAM 470.

Prerequisite(s): ENVS 2111, ENVS 370, ENVS 452, ENVS 462.

ENVS 505. Research Orientation**4 Credits (4)**

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: AGRO 505, HORT 505 and SOIL 505.

ENVS 596. Masters Proposal**1 Credit (1)**

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, GENE 596, HORT 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.

Prerequisite(s): Master level graduate students.

ENVS 599. Master's Thesis**1-15 Credits**

Thesis Graded: Thesis/Disertation.

EPWS-ETMLGY/PLNT PTHLGY/WD SCI

EPWS 1110G. Applied Biology**3 Credits (3)**

Introduction to applied biology and ecology focusing on insects, plants and pathogens in natural areas, crops and urban settings. EPWS 1110L is strongly recommended to take in the same semester. May be repeated up to 3 credits.

Learning Outcomes

1. Students will learn about the Department of Entomology Plant Pathology and Weed Science and will have the opportunity to meet the Las Cruces-based faculty in the department.
2. By the end of this course students will have gained a broad understanding of the pests in a wide range of systems, their interactions with other organisms, and the methods available to minimize the influence of pests on target commodities.

EPWS 1110L. Applied Biology Lab**1 Credit (1)**

Study of applied biology and ecology of insects, plants and pathogens in natural areas, crops, and urban settings. EPWS 1110 strongly recommended to take in the same semester. May be repeated up to 1 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Students will learn about the Department of Entomology Plant Pathology and Weed Science and will have the opportunity to meet the Las Cruces-based faculty in the department.
2. By the end of this course students will have gained a broad understanding of the pests in a wide range of systems, their interactions with other organisms, and the methods available to minimize the influence of pests on target commodities.

EPWS 2996. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Learning Outcomes

1. Varies

EPWS 300. Special Topics**1-4 Credits**

Specific topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

EPWS 301. Agricultural Biotechnology**3 Credits (2+2P)**

The principles of molecular biology will be introduced and used to explore the past, present, and future applications of biotechnology in agriculture. Specific topics include methodologies for making transgenic plants with increased pest resistance, the use of biotechnology in pest detection, and improving nutritional value. The laboratory will provide students with hands-on experience with equipment used for biotechnology research.

Prerequisites: CHEM 1225G, BIOL 2610G, or BIOL 2110G.

EPWS 302. General Entomology**4 Credits (4)**

An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insect orders and families. Laboratory focuses on identification of insect orders and families.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 302 H. General Entomology Honors**4 Credits (4)**

An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insects orders and families. Laboratory focuses on identification of insect orders and families. Students in the Honors section will be given the opportunity to enhance their understanding of entomology with a more detailed examination into the lives of these fascinating organisms.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 303. Economic Entomology**3 Credits (3+2P)**

Identification and life cycles of insects of economic significance, their relationship to humans and agriculture including biological interactions and controls. May be repeated up to 3 credits.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 310. Plant Pathology**4 Credits (3+2P)**

Causes and methods of prevention and treatment of diseases in plants.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 310 H. Plant Pathology Honors**4 Credits (4)**

Cause and methods of prevention and treatment of diseases in plants. Students with an Honors designation will have additional project and report assignments.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 311. Introduction to Weed Science**4 Credits (3+2P)**

Principles of weed science, with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Identification of local weeds. Crosslisted with: AGRO 311.

Prerequisite(s): CHEM 1215G, and BIOL 2110G.

EPWS 314. Plant Physiology**3 Credits (3)**

Overview of photosynthesis, respiration, water relations of plants, minerals and organic nutrition, growth and development. Same as BIOL 314.

Prerequisites: BIOL 2110G, CHEM 1225G.

EPWS 325V. Insects, Humans, and the Environment**3 Credits (3)**

Overview of the interactions of the world's largest group of organisms with humans. Emphasizing the role of insects in the development of human cultures, including health, food and fiber production, art, music, and environmental issues; with discussions of historic, present day, and future impacts in underdeveloped, developing, and developed civilizations.

EPWS 373. Fungal Biology**3 Credits (2+2P)**

Introduction to the taxonomy, morphology, physiology, and ecology of fungi. Same as BIOL 373.

Prerequisites: EPWS 310 or BIOL 311, or consent of instructor.

EPWS 380V. Science & Society**3 Credits (3)**

Analysis and evaluation of how human activities affect the earth's environment or ecosystems. Several examples, from global issues to local issues will be studied in detail. Current science and the intersection of science and public policy will be discussed in relation to problems like world population, agricultural productivity, deforestation, medical advances, and future prospects for the environment. May be repeated up to 3 credits.

EPWS 390. Internship**1-3 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. Maximum of 3 credits. Graded S/U.

Prerequisite: consent of instructor.

EPWS 420. Environmental Behavior of Pesticides**3 Credits (3)**

Behavior of pesticide compounds in the environment, their function toward target and non target pest organisms including humans, effect of environmental conditions on pesticide function, ecology of organisms involved in pesticides degradation, overview of environmental regulation. CHEM 2115 recommended prior to course. May be repeated up to 3 credits.

EPWS 447. Seminar**1 Credit (1)**

Organization and techniques for the oral presentation of research information. Restricted to: Main campus only.

EPWS 447 H. Seminar Honors**1 Credit (1)**

Organization and techniques for the oral presentation of research information. Students taking EPWS 447 H will have the additional assignment of making a poster on either scientific research or a scientific topic.

Prerequisite(s): Honors eligibility requirements.

EPWS 449. Special Problems**1-3 Credits**

Individual investigation in specific areas of entomology, plant pathology or plant physiology. Maximum of 3 credits per semester and a grand total of 6 credits.

EPWS 451. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Prerequisite: consent of instructor.

EPWS 455. Advanced Integrated Pest Management**3 Credits (3)**

Examination of factors affecting the biology and ecology, population evaluations, and control of insect, disease, and weed pests with an emphasis on integrating management practices. Credit cannot be given for both EPWS 455 and EPWS 505. Crosslisted with: EPWS 505.

Prerequisite(s): Either EPWS 303 or EPWS 310 or EPWS 311, or consent of instructor.

EPWS 456. Biological Control**3 Credits (3)**

Principles of plant and animal suppression using living organisms. Interaction of biological control organisms with biotic and abiotic factors will be stressed. Credit cannot be given for both EPWS 456 and EPWS 506. Students should complete an introductory course in entomology prior to enrollment. May be repeated up to 3 credits.

EPWS 462. Parasitology**3 Credits (3)**

Introduction to classification, biology, ecology and management of the major parasites of human, domestic animals and wildlife.

EPWS 471. Plant Mineral Nutrition**3 Credits (3)**

Same as HORT 471 and AGRO 471.

EPWS 486. Plant Virology**3 Credits (3)**

An overview of viral pathogens associated with infectious plant disease. Includes pathogens, replication, genetics, transmission, and movement of plant viruses.

EPWS 492. Diagnosing Plant Disorders**3 Credits (2+3P)**

Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as AGRO 492 and HORT 492.

Prerequisites: EPWS 303, EPWS 310.

EPWS 502. General Entomology**4 Credits (4)**

An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insect orders and families. Laboratory focuses on identification of insect orders and families.

Prerequisite(s): Either BIOL 2610G or BIOL 2110G.

EPWS 505. Advanced Integrated Pest Management**3 Credits (3)**

Examination of the factors affecting the biology and ecology, population evaluations, and control of insect, disease, and weed pests, with an emphasis on integrating management practices. Crosslisted with: EPWS 455.

Prerequisite(s): EPWS 303 or EPWS 310 or EPWS 311 or consent of instructor.

EPWS 506. Biological Control**3 Credits (3)**

Principles of plant and animal pest suppression using living organisms. Interaction of biological control organisms with biotic and abiotic factors will be stressed. Individual paper or project required. An introductory course in entomology should be completed before enrollment. Credit cannot be given for both EPWS 456 and EPWS 506. May be repeated up to 3 credits.

EPWS 511. Introduction to Weed Science (f)**4 Credits (3+2P)**

Covers the principles of weed science with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Includes identification of local weeds. Research paper required for graduate credit. Crosslisted with: AGRO 511.

Prerequisite(s): CHEM 1215G and BIOL 2110G.

EPWS 514. Plant Physiology**3 Credits (3)**

Overview of photosynthesis, respiration, water relations of plants, minerals and organic nutrition, growth and development.

Prerequisite(s): BIOL 2110G, CHEM 1225G.

EPWS 520. Environmental Behavior of Pesticides (so)**3 Credits (3)**

Behavior of these compounds in the environment, their function toward target and non target pest organisms including humans, effect of environmental conditions on pesticide function, ecology of organisms involved in pesticides degradation, overview of environmental regulation. CHEM 2115 recommended prior to course. May be repeated up to 3 credits.

EPWS 525. Scientific Writing- How to be a Productive and Effective Writing**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: AGRO 525, HORT 525 and SOIL 525.

EPWS 549. Special Problems**1-4 Credits**

Individual investigation in specific areas of entomology, plant pathology, and weed science. Maximum of 4 credits per semester and a total of 6 credits.

EPWS 551. Special Topics

1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

EPWS 560. Ecology and Management of Invasive Plant Species

3 Credits (3)

An overview of the causes and consequences of plant invasions and invasive plant management, with a focus on critical examination of current literature and paradigms.

Learning Outcomes

1. Students will gain practical and theoretical knowledge to facilitate improved vegetation management by engaging in critical thinking and discussion on a wide variety of topics related to invasive plants.
2. Students will understand why plants invade and how to facilitate prevention of invasion in natural and rangeland areas
3. Further, students will gain knowledge of the tools and practices of invasive plant management.

EPWS 573. Fungal Biology

3 Credits (2+2P)

Introduction to the taxonomy, morphology, physiology, and ecology of fungi. Same as BIOL 573.

Prerequisite: EPWS 310 or consent of instructor.

EPWS 590. Graduate Seminar

1 Credit (1)

Review of current scientific literature in entomology, plant pathology, and weed science, and verbal presentation of information. No more than 2 credits toward a degree.

EPWS 598. Graduate Internship

1-6 Credits

Supervised professional on-the-job learning experience. Limited to Master of Agriculture candidates. Not more than 6 credits toward the degree.

EPWS 599. Master's Thesis

15 Credits

Thesis.

FCSC-FAMILY & CONSUMER SCI

FCSC 2250. Overview of Family and Consumer Sciences Teaching

3 Credits (3)

Overview of planning and teaching skills. Supervised experiences in observing and directing the learning of secondary family and consumer sciences students. Philosophy and history of the profession.

Learning Outcomes

1. Explain the foci of FCS—past, present and future.
2. Begin to develop a professional role in FCS.
3. Formulate a personal philosophy of FCS, and of teaching.
4. Explain the teaching process.
5. Give examples of roles, responsibilities and qualities of effective and ethical teachers.
6. Assess the characteristics, backgrounds, and needs of learner audiences.
7. Explain various learning theories/principles.
8. Illustrate how various input factors influence teaching decisions.

9. Plan a researched based student-centered lesson with a learning activity in a FCS content area. 1
10. Give examples of ways to evaluate learner growth. 1
11. Present a FCS content-based lesson effectively to learners using PowerPoint presentation software and a selected teaching method. 1
12. Evaluate one's own teaching and the teaching of others. 1
13. Exhibit increased confidence in one's abilities as a teacher/educator. 1
14. Exhibit excitement about assuming the teacher/educator role.

FCSC 2330. Housing and Interior Design

3 Credits (3)

Investigation of types of housing and factors impacting housing decisions for families. Selection, planning, and arrangement of interior components of homes to meet the needs of the family. Restricted to Las Cruces campus only.

Learning Outcomes

1. Differentiate between different architectural designs (i.e., Cape Cod, contemporary, craftsman, ranch, southern colonial, Spanish, Victorian, pueblo, New Mexican territorial, and territorial revival) and be able to identify historical, cultural, demographic, geographical, and environmental influences on style and aesthetics.
2. Analyze the fundamentals of housing for all families and cultures and understand the role housing plays in the ecological model of human ecology.
3. Define elements of design as related to housing and interiors (i.e., color, form, line, space texture).
4. Define principles of design as related to housing and interiors (i.e., balance emphasis, harmony, proportion, unity).
5. Compare and contrast the different periods of interior design from the 20th century to the present.
6. Analyze the influence of historical and cultural factors in the development of current interior trends.
7. Select and arrange interiors that are functional and aesthetically pleasing to designated interior design situations.
8. Identify, describe and make application of textiles as related to various furniture and interior design styles.
9. Design a three-dimensional tiny house or an interior space, using all concepts learned.

FCSC 3110. Management Concepts in Family and Consumer Sciences Teaching

3 Credits (3)

Incorporation and application of management concepts in family and consumer sciences subject matter. Practical experience teaching management and ways to use management skills to plan, implement, and evaluate the teaching-learning transaction. May be repeated up to 3 credits.

FCSC 4110. Teaching in Informal Family and Consumer Sciences Settings

3 Credits (3)

Learning principles and theories with application in informal family and consumer sciences education situations. Includes supervised experience in use of teaching strategies. May be repeated up to 3 credits.

Prerequisite: overall GPA of at least 2.5 or consent of instructor.

FCSC 4120. Career and Technical Education Programs

3 Credits (3)

History and development of career and technical programs. Ancillary functions of family and consumer sciences teachers, including student evaluation and leadership development for students. Experiences

in extension programs and teaching. Ethical issues and concerns of educators are introduced. Lifelong leadership development and evaluation tools for educators are explored. May be repeated up to 3 credits.

**FCSC 4510. Teaching Methods I for Family and Consumer Sciences
3 Credits (3)**

Methods and strategies for teaching Family & Consumer Sciences content in middle and secondary schools. Organization and development of curriculum. May be repeated up to 3 credits.

Prerequisite: FCSC 2250 and FCSC 3110 and an overall GPA of 2.75, admitted to FCSE program; completion of NES Essential Basic Skills Tests I, II, & III.

Corequisite: FCSC 4120.

**FCSC 4520. Teaching Methods II for Family and Consumer Sciences
3 Credits (3)**

Planning, preparation, and strategies for teaching family and consumer sciences in middle and secondary schools. Preparation for employment. May be repeated up to 3 credits. Restricted to: FCSE majors.

Prerequisite: FCSC 4510; overall GPA of 2.75, admitted to program.

**FCSC 4810. Supervised Teaching in Family and Consumer Sciences
12 Credits (12)**

Seventy (70) days of full-time supervised teaching in selected middle or secondary schools. May be repeated up to 12 credits. Restricted to: FCSE majors.

Prerequisite: FCSC 4510, an overall GPA of 2.75, and admitted to FCSE Program.

Corequisite: FCSC 4520.

**FCSC 4815. Research Methods in Family and Consumer Sciences
3 Credits (3)**

Introduction to research design and methodology in Family and Consumer Sciences. Overview of common research designs and data collection strategies. Prepares students to critique published research and perform basic skills including hypotheses development and conducting a literature search. May be repeated up to 3 credits.

FCSC 492. Special Problems

1-4 Credits

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and 6 credits toward degree.

FCSC 4997. Special Problems

1-4 Credits

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and 6 credits toward degree.

**FCSC 500. Research Methods
3 Credits (3)**

This course covers the critical evaluation of research literature, development of research proposals and principles of program evaluation. Students will be introduced to the application of qualitative or quantitative methods. Students will be expected to develop research questions and test hypotheses using statistical analysis and a variety of methodologies.

**FCSC 547. Graduate Study in Teaching Methods II
3 Credits (3)**

Planning, preparation, and strategies for teaching family and consumer sciences in the secondary schools. Additional assignments beyond FCSC 447 required for students registering in FCSC 547.

FCSC 548. Graduate Study in Supervised Teaching in Family and Consumer Sciences

12 Credits (70P)

Seventy of full-time, supervised teaching in selected schools. Additional assignments beyond FCSC 448 required for students registering in FCSC 548. Consent of Instructor required.

Prerequisite(s): FCSC 446 or FCSC 546, and consent of instructor.

**FCSC 5815. Research Methods
3 Credits (3)**

This course covers the critical evaluation of research literature, development of research proposals and principles of program evaluation. Students will be introduced to the application of qualitative or quantitative methods. Students will be expected to develop research questions and test hypotheses using statistical analysis and a variety of methodologies.

FCSC 590. Special Topics

1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits toward a degree, 4 credits per semester.

FCSC 5991. Special Research Programs

1-4 Credits

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree. May be repeated up to 4 credits.

FCSC 5996. Special Topics

1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits toward a degree, 4 credits per semester.

FCSC 5999. Master's Thesis

1-15 Credits

May be repeated up to 88 credits.

FCST-FAMILY AND CHILD STUDIES

FCST 1130. Interpersonal Skills in Intimate Relationships

3 Credits (3)

Developing social skills within friendships, dating relationships, marriage, parenting, and families.

Learning Outcomes

1. To understand several theories that explain why some people have healthy interpersonal relationships while others do not.
2. To gain insight about one's self.
3. To learn and improve upon selected relationship skills that improve quality of life.
4. To learn skills that improve interpersonal relationships

FCST 2110. Infancy Through Middle Childhood in the Family

3 Credits (3)

This course discusses research and theory relevant to prenatal development and the physical, mental, and socio-emotional development of the child from birth through age 12. This developmental period will be examined across different cultures and in real world contexts. Attitudes, knowledge, and skills needed for working with young children and their families will be introduced. Restricted to Las Cruces campus only.

Learning Outcomes

1. Evaluate how genes and the environment interact to impact human development from prenatal stages through age twelve.

2. Assess the effects of environmental influences on the developing fetus.
3. Discuss the capacities of newborn development through age twelve.
4. Evaluate how individuals and couples change during the transition to parenthood.
5. Analyze the physical, cognitive, and social-emotional development of the child from birth through age twelve.

FCST 2135. Adolescent Development and the Family
3 Credits (3)

Research and theory relevant to the physical, mental, social, and emotional development of the children ages 12 to 18. Attitudes, knowledge, and skills related to working with adolescents in the family system. Observation in a variety of settings may be required. Restricted to Las Cruces campus only.

Learning Outcomes

1. Compare adolescents of today with adolescents of the past.
2. Describe the physical, cognitive, and psychosocial development of the adolescent in the family system and evaluate individual differences in development.
3. Compare and contrast ways in which culture impacts adolescent development.
4. Assess effective parenting strategies with adolescents.
5. Analyze the influence of family, peers, school, and work on adolescent development.

FCST 2140. Adult Development and Aging
3 Credits (3)

Research and theory related to the physical, mental, social, and emotional development of older adults. Attitudes, knowledge, and skills related to working with older adults in the family system, including normative, and nonnormative transitions. Restricted to Las Cruces campus only.

Learning Outcomes

1. Compare and contrast theories of adult development and aging and apply theories to adult behavior.
2. Distinguish the similarities and differences of physical, emotional, cognitive, and psychosocial aspects of adult development.
3. Describe multicultural factors that impact attitudes toward aging and coping with aging family members.
4. Evaluate ways in which special issues (including but limited to Alzheimer's Disease, heart disease, end of life issues) impact aging.
5. Devise a conceptualization of one's own perspective in dealing with aging and aging family members.

FCST 3110V. Introduction to Child Advocacy
3 Credits (3)

Historical review and evolution of child welfare policies, initiatives and factors that influence child welfare service. Child welfare policies and services specific to the state of New Mexico are infused throughout the course. May be repeated up to 3 credits.

Learning Outcomes

1. To understand how to apply a model of critical thinking/analysis to child maltreatment issues using a systems framework.
2. Compare and contrast historical trends in child maltreatment and child advocacy.
3. Analyze individual, family and community risk factors for maltreatment.
4. Explain cultural issues related to assessing and working with diverse families.

FCST 3120V. Family Ethnicities and Subcultures
3 Credits (3)

Comparative study of American family subsystems with respect to selected social, economic, and cultural backgrounds. Interaction of these subsystems in American society. Differentiated assignments for graduate students. May be repeated up to 3 credits.

FCST 3210. Family Resource Management
3 Credits (3)

This course provides an understanding of the decision-making process of families concerning the utilization of financial, personal, environmental, and social resources. In particular, the class will focus on how families develop, exchange, and allocate resources throughout the lifespan with the expectation that the most effective resource management decisions are made from positions of knowledge and understanding. May be repeated up to 3 credits.

FCST 3220. Family Dynamics
3 Credits (3)

The dynamics of family relationships and changes influencing contemporary families. Interaction between the family and other social systems will be examined. Open to nonmajors. May be repeated up to 3 credits.

FCST 3230. Parenting and Child Guidance
3 Credits (3)

Theories, principles, and skills essential for parents and professionals in guiding children within the family system. Problem prevention techniques are stressed. May be repeated up to 3 credits.

FCST 4310. Community Programs in Family Life
3 Credits (3)

The purpose of this course is for students to learn through class lectures, readings, and community based activities, about issues related to the formulation, delivery, and evaluation of family life education programs in the local community and through virtual delivery. Students will also learn about conducting needs assessments in the community, and evaluating programs after their implementation in preparation for jobs in the field of Family Science.

Learning Outcomes

1. Identify conceptual frameworks suitable in the development of family life programs.
2. Demonstrate knowledge and understanding of techniques and strategies useful in the delivery of family life education programs.
3. Conduct needs assessments and critiques of existing family life/parent education programs and methods of delivering information to parents and families.
4. Apply evaluation strategies for analyzing program effectiveness.
5. Demonstrate knowledge of the legal, moral, and ethical dimensions of family life education and certification standards.

FCST 4997. Special Problems
1-4 Credits

Individual research in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 6 credits. May be repeated up to 6 credits.

FCST 4998. Field Experience: Issues and Ethics
3 Credits (3)

Supervised work experience in community agencies providing services to family systems. Discussion of professional issues and ethical dilemmas. A total of 6 credits must be taken. Restricted to: FCS majors. Students must be in junior standing to enroll. May be repeated up to 6 credits.

Prerequisite: FCST 3220 or equivalent, and an overall GPA of at least 2.5.

Learning Outcomes

1. Upon completion of this course students will be able to integrate learning into applied settings.

FCST 5120. Family Ethnicities and Subcultures**3 Credits (3)**

Comparative study of American family subsystems with respect to selected social, economic and cultural backgrounds. Interaction of these subsystems in American society. Students responsible for all requirements for FCST 449V plus additional work. May be repeated up to 3 credits.

FCST 5140. Adult Development and Aging**3 Credits (3)**

Advanced study in research and theory related to the physical, mental, social, and emotional development of older adults. Attitudes, knowledge, and skills related to working with older adults in the family system, including normative and non-normative role transitions. May be repeated up to 3 credits.

FCST 5210. Family Law and Ethics**3 Credits (3)**

Study of selected aspects of federal and state laws and ethical issues as they relate to the family system.

FCST 5220. The Business and Practice of Marriage and Family Therapy**1 Credit (1)**

This seminar course will provide students with an overview of the business and practice of Marriage and Family Therapy to the end that they will understand how to develop and maintain a private practice in the field of MFT. Restricted to: FCS (MFT) majors. Graded: S/U Grading (S/U, Audit).

FCST 5230. Parenting and Child Guidance**3 Credits (3)**

Theories, principles, and skills essential for parents and professionals in guiding children within the family system. Problem prevention techniques are stressed.

FCST 524. Supervised Practicum**1-9 Credits**

Supervised experience in organizations providing services to families and children. Course subtitled in the Schedule of Classes. May be repeated for a maximum of 9 credits. Graded S/U.

Prerequisite: consent of instructor.

FCST 525. Supervised Clinical Practice**1-9 Credits (2-18P)**

Supervised clinical experience in Marriage and Family Therapy. Includes reviews of audio, video, and/or live sessions and case presentations. Maximum of 9 credits toward a degree. May be repeated up to 20 credits.

FCST 5310. Family Dysfunction and Diagnosis**3 Credits (3)**

A study of the development of abnormal behavior patterns and characteristics to include the major mental and personality disorders and how these can influence and impact family systems. Emphasis is on the symptomology and/or life circumstances and events described in the various diagnostic categories.

Prerequisite(s): Students must be enrolled in a clinical program (i.e MFT, CEP, MSW).

FCST 5320. Theories of Marriage and Family Therapy**3 Credits (3)**

A balanced study of major theories, research, applications and principles of marriage and family therapy. This course will examine major therapy models and the theories they are derived from as well as the

effectiveness of specific therapy models for specific mental health disorders through research.

FCST 5330. Strategies in Family Therapy**3 Credits (3)**

Effective intervention strategies in family therapy practice. Live and taped role plays of interventions for various family problems required. Constructive approaches for working with family systems and third-party payers.

FCST 5340. The Family System**3 Credits (3)**

Contemporary family interaction: concepts, composition, resource and environment.

FCST 5410. Sexuality and Family Dynamics**3 Credits (3)**

Psychosocial and physiological aspects of human sexuality from a life span and family systems perspective.

FCST 5420. Contemporary Marriage and Family Issues**3 Credits (3)**

Investigation of one of the following topics each semester: dual career marriages, nontraditional relationships, aged in marriage.

FCST 5430. Family Crises and Rehabilitation**3 Credits (3)**

Examination of the major crises experienced by families. Emphasis on family system functioning rather than individual functioning. Preventative measures, positive coping strategies, and therapeutic intervention approaches examined.

FCST 548. Adult Development and Aging**3 Credits (3)**

Advanced study in research and theory related to the physical, mental, social, and emotional development of older adults. Attitudes, knowledge, and skills related to working with older adults in the family system, including normative and non-normative role transitions. May be repeated up to 3 credits.

FCST 549. Family Ethnicities and Subcultures**3 Credits (3)**

Comparative study of American family subsystems with respect to selected social, economic and cultural backgrounds. Interaction of these subsystems in American society. Students responsible for all requirements for FCST 449V plus additional work. May be repeated up to 3 credits.

FCST 562. The Business and Practice of Marriage and Family Therapy**1 Credit (1)**

This seminar course will provide students with an overview of the business and practice of Marriage and Family Therapy to the end that they will understand how to develop and maintain a private practice in the field of MFT. Restricted to: FCS (MFT) majors. Graded: S/U Grading (S/U, Audit).

FCST 572. Family Dysfunction and Diagnosis**3 Credits (3)**

A study of the development of abnormal behavior patterns and characteristics to include the major mental and personality disorders and how these can influence and impact family systems. Emphasis is on the symptomology and/or life circumstances and events described in the various diagnostic categories.

Prerequisite(s): Students must be enrolled in a clinical program (i.e MFT, CEP, MSW).

FCST 582. Theories of Marriage and Family Therapy**3 Credits (3)**

A balanced study of major theories, research, applications and principles of marriage and family therapy. This course will examine major therapy models and the theories they are derived from as well as the effectiveness of specific therapy models for specific mental health disorders through research.

FCST 583. Parenting and Child Guidance
3 Credits (3)

Theories, principles, and skills essential for parents and professionals in guiding children within the family system. Problem prevention techniques are stressed.

FCST 584. Family Law and Ethics
3 Credits (3)

Study of selected aspects of federal and state laws and ethical issues as they relate to the family system.

FCST 585. The Family System
3 Credits (3)

Contemporary family interaction: concepts, composition, resource and environment.

FCST 586. Sexuality and Family Dynamics
3 Credits (3)

Psychosocial and physiological aspects of human sexuality from a life span and family systems perspective.

FCST 587. Contemporary Marriage and Family Issues
3 Credits (3)

Investigation of one of the following topics each semester: dual career marriages, nontraditional relationships, aged in marriage.

FCST 589. Family Crises and Rehabilitation
3 Credits (3)

Examination of the major crises experienced by families. Emphasis on family system functioning rather than individual functioning. Preventative measures, positive coping strategies, and therapeutic intervention approaches examined.

FCST 590. Special Topics
1-4 Credits

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree.

FCST 592. Strategies in Family Therapy
3 Credits (3)

Effective intervention strategies in family therapy practice. Live and taped role plays of interventions for various family problems required. Constructive approaches for working with family systems and third-party payers.

FCST 598. Special Research Programs
1-4 Credits

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

FCST 599. Master's Thesis
15 Credits

Thesis

FCST 5990. Supervised Clinical Practice
1-9 Credits (2-18P)

Supervised clinical experience in Marriage and Family Therapy. Includes reviews of audio, video, and/or live sessions and case presentations. Maximum of 9 credits toward a degree. May be repeated up to 20 credits.

FCST 5991. Special Research Programs
1-4 Credits

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

FCST 5996. Special Topics
1-4 Credits

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree.

FCST 5998. Supervised Practicum
1-9 Credits

Supervised experience in organizations providing services to families and children. Course subtitled in the Schedule of Classes. May be repeated for a maximum of 9 credits. Graded S/U.

Prerequisite: consent of instructor.

FCST 5999. Master's Thesis
15 Credits

Thesis

FDMA-FILM & DIGITAL MEDIA ARTS

FDMA 1120. Desktop Publishing
3 Credits (2+2P)

This course is designed to teach introductory skills for designing and creating publications and presentations with layout software. The course will focus on graphics and typographic design, fonts, and other skills for print and web publishing.

Learning Outcomes

1. Demonstrate knowledge of fundamental features and navigation of desktop publishing software.
2. Combine text and images for effective communication.
3. Develop a balanced composition through use of color, contrast, and alignment.
4. Place images within a composition and wrap around text.
5. Produce documents with professional layout and typography skills.
6. Create attractive and effective designs.
7. Combine knowledge of typography, images, and design principles to produce professional print and web media.
8. Create or add to a professional design portfolio for future use.

FDMA 1210. Digital Video Production I
3 Credits (2+4P)

An introduction to digital video production. Students learn camera operation, lights and audio equipment. Hands-on production is completed in the studio and on location.

Learning Outcomes

1. Plan and produce a digital video project
2. Apply post-production workflow
3. Work in team and as individual to complete digital video projects.

FDMA 1220. Introduction to Digital Video Editing
3 Credits (3)

In this course, students learn the basics of the post-production process for non-linear video editing. Students work with multiple video formats and create short movies for multiple distribution platforms. Skills include media management and professional terminology. Sections on the Main Campus will be restricted to CMI students.

Learning Outcomes

1. Define concepts related to digital video editing.
2. Use non-linear video editing software for editing a short film

3. Enhance storytelling through the use of continuity, timing, cutaways, intercutting, compositing, transitioning, jump cutting, montaging and animating.
4. Use text, titles, transitions, video effects, sound effects, dialogue, and visual assets for digital video editing.

FDMA 1360. Web Design I

3 Credits (2+2P)

This course provides an introduction to web development techniques, theory, and design. Students will learn HTML, CSS application, and strategies for effective site navigation and design, along with industry standard web editing software to develop various websites. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): ARTS 1520 OR FDMA 1515.

Learning Outcomes

1. Acquire and utilize web design terminology.
2. Create basic web pages using HTML.
3. Demonstrate how to use industry-standard, web editing software.
4. Design professional pages that are easy to navigate and quick to load.
5. Develop a basic comprehension of CSS
6. Prepare and export a variety of graphics to be used online.
7. Compare and contrast designing for web media vs. print media.
8. Analyze the importance of web presence in today's business/social climate

FDMA 1410. Audio Production I

3 Credits (2+2P)

Students will learn about and apply essential tools and techniques in analog and digital audio production. Topics include acoustic science, microphones, recording and mixing techniques, analog and digital audio hardware and software, including, multi-track, computer-based recording and editing systems. Restricted to: Community Colleges only. May be repeated up to 3 credits.

Learning Outcomes

1. Apply tools and techniques in analog and digital audio production
2. Illustrate the fundamentals of acoustic science.
3. Model professional behavior used in audio recording.

FDMA 1415. Principles of Sound

3 Credits (2+2P)

The creation of a professional quality original media soundtrack is possible for relatively low production/post production cost. This class is designed to give the student an overview of creating sound for a variety of digital media. Topics include acoustic principles, sound design, audio hardware, recording techniques; and editing, processing, and multi-track mixing, using software applications. Restricted to: Community Colleges only.

Prerequisite(s)/Corequisite(s): FDMA 1220.

Learning Outcomes

1. Record and edit wild sound effects and synced dialogue
2. Discover, upload, and edit on-line music, ambience and sound effect loops
3. Implement audio design theories
4. Create an aesthetic soundtrack which incorporates multiple elements and dimensions
5. Design, edit, process, mix and master a synced multi-track soundtrack

6. Demonstrate capable use of digital audio production and post-production workflow
7. Produce short audio projects which meet media industry technical standards

FDMA 1510. Introduction to 3D Animation

3 Credits (3)

This course provides an overview of 3D animation production processes. Students will be introduced to basic story development and the creation of computer-generated assets and cinematic sequences. The course will survey specialty areas of digital animation and various software and techniques applied in entertainment and information media. Students will review and critique other's animation, as well as plan and produce original animation for review by classmates and as part of a CGI demo reel.

Prerequisite(s): FDMA 2382 or FDMA 2381 or consent of instructor.

Learning Outcomes

1. Demonstrate a fundamental understanding of 3D animation history and principles.
2. Analyze animation work of other artists.
3. Appropriately utilize the various media technologies for digital 3D animation.
4. Demonstrate and apply basic techniques of digital 3D animation.
5. Demonstrate and apply basic processes of creating CGI for a narrative. 6. Apply some basic strategies for developing and creating a story visually, and create original animations.
6. Present original animations to instructor and classmates for critique.
7. Create a CGI demo reel of work completed during the course.

FDMA 1515. Introduction to Digital Image Editing - Photoshop

3 Credits (2+2P)

In this course, students will learn how to use the tools in Adobe Photoshop to create new images and edit existing images. Tools used will include selections, layers, and adjustments, among other pixel editing tools. Basic composition and output will be emphasized in all projects. May be repeated for a maximum of 6 credits.

Learning Outcomes

1. Make and refine selections
2. Adjust color and tone in an image
3. Eliminate unwanted objects in an image
4. Apply layers to organize and create effects
5. Create brushes, styles and vector shapes
6. Prepare image for print and screen output
7. Apply masking and layers to non-destructively edit an image
8. Effectively utilize blending modes and layer styles 1
9. Apply adjustment layers 1
10. Apply design principles including typography

FDMA 1531. Evolution of Electronic Games

3 Credits (2+2P)

Focus on the evolution of video games and how they have shaped mainstream entertainment. May be repeated up to 6 credits.

FDMA 1535. Introduction to Illustrator

3 Credits (2+2P)

Students receive instruction on vector graphics creation using vector illustration software. The students will create professional-quality artwork for print publishing and multimedia graphics. Instruction includes creating and manipulating basic shapes, drawing with the pen tool, using various brushes, working with type and preparing graphics for web, print, and digital publication. May be repeated for a maximum of 6 credits.

Learning Outcomes

1. Apply a variety of shape blending options
2. Create and apply new gradients
3. Apply Gradient Meshes and Envelopes
4. Create symbols, brushes and vector shapes
5. Apply Pathfinder and other effects
6. Effectively utilize the pen tool to draw and edit shapes
7. Effectively utilize Vector tools
8. Prepare image for print and screen output
9. Apply clipping masks 1
10. Prepare image for use in another program 1
11. Apply design principles including typography

FDMA 1536. Advanced Computer Illustration**3 Credits (2+2P)**

Advanced techniques in 2D vector drawing and fundamentals of 3D illustration for use in print, web, and multimedia applications. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): FDMA 1535.

Learning Outcomes

1. Demonstrate proficiency in using advanced features of Illustrator.
2. Identify and create different illustrator/art styles using advanced techniques for shading, perspective, light, reflection.
3. Produce high quality digital imagery incorporating basic principles of composition.
4. Create a series of illustrations demonstrating a design competency in layout foundation and illustrative moods or client/project based solutions.
5. Create high quality portfolio pieces that demonstrate an advanced knowledge of design, composition and Illustrator techniques.
6. The students will produce finished printed portfolio pieces demonstrating a comprehensive knowledge of typographical, design, illustrative and layout skills

FDMA 1545. Introduction to Photography & Digital Imaging**3 Credits (2+2P)**

This course is a study of the principles and techniques of photography using digital equipment, and discusses how digital cameras, imaging editing, and technology have changed the world of photography. Students will learn about studies in resolution, lighting, software, editing, printing, and web applications. They will gain fundamental knowledge in the rapidly expanding technology of photography and imaging, and be able to incorporate the knowledge into all areas of digital graphics.

Learning Outcomes

1. Exhibit proper usage of the principles and techniques of photography using digital equipment.
2. Utilize features and techniques of a digital camera with proper use of lenses, settings, and flashes.
3. Create photo collections that represent proper use of technical skills.
4. Demonstrate proficiency in planning, lighting, capturing, and distributing photographic projects which show ability to create photographs artistically and to tell a story or express an idea.
5. Utilize appropriate software to create original projects.
6. Demonstrate knowledge in post-production of photos as to sizing, sampling, resolution, and exporting.

7. Produce original projects which respect intellectual property of others.
8. Create a digital portfolio of work completed during the course.

FDMA 1555. Introduction to the Creative Media Industry**3 Credits (3)**

This class is an introductory course for students who are beginning their understanding of Media and how it affects them and our society. It offers a broad-stroked view of the entire industry including Marketing, Production, History, Jobs, Design, Architecture, New Media Literacy, and industry standards. Students will listen to experts in the field, get involved in open discussions about the industry and use new information to complete hands-on individual & group assignments.

Learning Outcomes

1. The basic philosophies and methods that guide people working in the Creative Media industry.
2. Knowledge of a wide variety of different jobs, qualifications and paradigms used in the industry.
3. Marketing, Production, Budgets, History, New Media, Inspiration and other aspects of the industry.
4. An accurate view of the Creative Media field.

FDMA 1630. Principles of Design**3 Credits (2+2P)**

This course will explore how we see and use visuals to communicate information. Students will develop critical thinking skills in applying concepts of basic design principles. Students will apply the concepts with hands-on and analysis assignments. These concepts will then be applied to design for advertising, print, digital media, and web design. The business of design will also be covered with emphasis on client relations and networking Restricted to: Community Colleges only. Prerequisite(s): FDMA 1535

Learning Outcomes

1. Practice Creativity
2. Plan a Design project
3. Demonstrate the effective use of Emphasis Contrast
4. Demonstrate the effective use of Balance and Alignment
5. Demonstrate the effective use of Harmony and Repetition
6. Demonstrate the effective use of Flow, Movement, and Rhythm
7. Demonstrate the effective use of Simplicity and Economy
8. Effectively apply basic color theory
9. Demonstrate the effective use of Typography principles 1
10. Apply design principles to Screen Print Projects 1
11. Develop client relations

FDMA 1710. 2D Animation**3 Credits (2+2P)**

Concepts and techniques in storyboarding and creating interactive 2D animations for web, multimedia and video.

Prerequisite(s): FDMA 1535.

Learning Outcomes

1. Be able to correctly storyboard an animation scene
2. Define and demonstrate basic animation terminology and principles.
3. Produce a complete hand drawn animation using industry standard software and processes.

FDMA 1715. 2-D Compositing & FX**3 Credits (3)**

This course will familiarize students with the process of compositing and creating special effects for animation using industry standard software. Students will learn how to assemble an animated scene and use advanced 3D lighting, spacing, and digital effects to achieve a dynamic, professionally rendered look.

Prerequisite: FDMA 2710.

Learning Outcomes

1. The goal of this class is for students to learn how to use advanced compositing and effects tools in order to achieve a more dynamic and professional visual look for their animations or motion graphics.
2. By the end of the class, you should be proficient animation compositors that can assemble and synthesize a basic animation into a rendered, visually sophisticated piece.
3. Students who pass this class will have a basic to intermediate knowledge of Adobe After Effects

FDMA 1720. 3-D Character Design

3 Credits (2+4P)

Focus on designing a character and then taking that design and building it in 3D using intermediate modeling techniques. May be repeated for a maximum of 6 credits.

Prerequisite(s): FDMA 1510 or FDMA 2530.

Learning Outcomes

1. Translate concept art into a low and high resolution 3D model using proper modeling techniques
2. Use Polygon modeling techniques to create a 3D character
3. Layout UVs and utilize Adobe Photoshop to texture a model.

FDMA 1996. Selected Topics

1-4 Credits (1-4)

Specific titles to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Varies

FDMA 2120. Film Crew I/ Introduction to Film and Media Workflow **9 Credits (9)**

An introduction to the film industry. This class teaches film production processes, film crew hierarchy, film production set-safety and etiquette and provides hands-on training in industry standard film production equipment. Students complete the semester by participating as a below-the-line crew member on a short film. Restricted to: Community Colleges only.

Learning Outcomes

1. Explain film production processes; Interpret call sheets and deal memos, model basic on-set protocols and professional behavior
2. Assist producers and directors in completing a professional film project
3. Work effectively in production crew positions in a group environment.
4. Recognize and articulate specific film production structure, from original concept to final release

FDMA 2125. Film Crew II

9 Credits (9)

The second course designed to train students to become working members of film crews. It will be taught by working film professionals. Content will be lecture and hands-on. Students complete the semester by working as part of an actual film crew as below-the-line and above-the-line crew members. Restricted to: Community Colleges only.

Prerequisite(s): FDMA 2120.

Learning Outcomes

1. Understand film production processes used to produce a film
2. Manage craft area job functions
3. Model on-set protocols and professional behaviors
4. Assist producers and directors in completing a professional film project

FDMA 2144. Pre-production Management

3 Credits (2+2P)

Pre-production planning paperwork breakdowns, budgeting, and scheduling; taking a project from start to finish from a producers standpoint.

Prerequisite(s): FDMA 1210.

Learning Outcomes

1. Demonstrate proficiency in various areas of pre-production
2. Create a script breakdown, budget, production and post-production schedule, and management plan and timeline that are technically sound.
3. Use features of pre-production and project management software, to foresee and plan the pre-production, production, and post-production stages of a project
4. Demonstrate understanding of the processes of supporting and managing a project, through the pre-production, production, and post-production stages to completion
5. Work collaboratively and communicate effectively with the pre-production and management teams to produce the desired finished project.

FDMA 2150. Desktop Publishing II

3 Credits (2+2P)

This class will enhance and build upon student layout/design skills developed in the Introduction to Desktop Publishing course, incorporating intermediate to advanced concepts in typography and layout design. Upon completion of this course, students will be able to use page layout software to prepare a variety of documents for presentation and critique, including newsletters, instructional flyers, and other complex design/typographic pieces May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): FDMA 1120.

Learning Outcomes

1. Build upon knowledge of design and design terminology.
2. Exhibit intermediate to advanced design principles using type, layout, and color.
3. Demonstrate skill in intermediate to advanced concepts and features of page layout software.
4. Exhibit knowledge of styles, tables, images and clipping paths and interactive documents as well as printing preparations and procedures.
5. Create layouts for print, web, and other media that demonstrate an intermediate to advanced knowledge in typography and layout design.
6. Format and produce newsletters and instructional flyers, as well as larger, complex projects such as packaging mechanicals, multiple master page documents, and books.
7. Assess works of graphic design for quality and effectiveness.
8. Utilize produced material to create or add to a design portfolio for future use.

FDMA 2210. Digital Video Production II

3 Credits (2+2P)

Advanced techniques of the tools and application of professional film making. May be repeated for a maximum of 6 credits.

Prerequisite: FDMA 1210.

Learning Outcomes

1. Demonstrate the ability to produce and manage a video project: Produce a script, storyboard, and production schedule for a video project designed for a specific audience.
2. Demonstrate proficiency in producing quality digital video footage and audio tracks: Shoot to the script and storyboard using a variety of camera and lighting techniques; Produce a finished complex sound track including narration, music, and sound effect.
3. Demonstrate ability to produce and edit a professional quality video project: Integrate all production aspects of the project including video, audio, graphics, titles, transitions, and effects. Guide the project through the final production stages.
4. Develop competency in digital video distribution using various formats and techniques: Distribute project in various formats which could include DVD and web posting.

FDMA 2241. Advanced Camera Techniques

3 Credits (2+2P)

Professional camera techniques and training for electronic news gathering and studio filmmaking. Utilizes high-end handheld shooting techniques, cranes, dollies, and steadicam training. May be repeated for a maximum of 6 credits.

Prerequisite(s): FDMA 1210.

Learning Outcomes

1. Students knowledge of high-end video camera operation and features.
2. Students must know all the working features of the video production equipment being used during the course in order to achieve the desired footage as required by the instructor.
3. Demonstrate proficiency in producing quality digital video footage.
4. Individuals must acquire the knowledge of different shooting styles in different productions situations and use those acquired skills to produce the appropriate video footage.
5. Using the proper lighting in different on location shooting styles.
6. Skill of each individual utilizing the usage of high-end camera equipment such as dollies, cranes and Steadicam.
7. Each individual must work as a team player to create professional style video footage.

FDMA 2285. Digital Video Production and Editing II

3 Credits (2+2P)

Advanced features of digital video, audio/music, and titling production software. Included are color correction, vector scopes, motion effects, and advanced editing techniques used by filmmakers. Restricted to Community Colleges campuses only. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): FDMA 1220.

Learning Outcomes

1. intermediate to advanced video editing create short films and training videos, create TV quality commercials, direct a news broadcast, and work as a mentor to students on digital media equipment

FDMA 2287. Digital Design Studio

1-3 Credits

A design studio environment in which students obtain real-world experience while providing service to college and non-profit associations with faculty supervision using a variety of media. Can be used with

permission to fulfill cooperative requirement. May be repeated for a maximum of 6 credits.

Prerequisite(s): FDMA 1630 or ARTS 1712.

Learning Outcomes

1. Demonstrate competency in the use of InDesign software.
2. Create appropriate visual solutions based on target marketing information.
3. Demonstrate competency in the design and production of advertising and promotional materials.
4. Present ideas and concepts effectively and competently.
5. Visually demonstrate design solutions to be used in a portfolio.

FDMA 2310. History of Cinema I

3 Credits (3)

This course surveys the history of cinema - investigating the process by which the original "cinema of attractions" evolved into a globally dominant form of visual storytelling. We will explore the development of cinema both as an art form and as an industry, and consider the technological, economic, cultural factors, as well as many key international movements that helped shape it. Restricted to: G-CMI, DFM, ANVE majors.

Learning Outcomes

1. Gain a greater appreciation for the history of cinema
2. Develop knowledge of the key eras in the history of U.S. cinema
3. Learn the characteristics of major movements in international cinema
4. Understand the various elements that go into telling a story in cinema: screenplay, narrative devices, director, producer, talent, production design, cinematography, editing, sound design
5. Learn how major genres in U.S. cinema have evolved in the past 100+ years
6. Gain a basic understanding of the operations and organization of the Hollywood film industry, from the studio system until today
7. Gain an awareness of the shifts in the film industry that present new opportunities for independent filmmakers
8. Understand the importance of learning about the history of cinema to the process of becoming a filmmaker
9. Strengthen public speaking skills

FDMA 2311. History of Animation

3 Credits (3)

Explores the history of Animation as an art form and industry through readings, screenings, lecture and periodic guest speakers. Restricted to: G-CMI, ANVE, DFM majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. To expand your knowledge of the history of animation and its evolution to the modern day.
2. To expand your ability to view animation critically and to understand its early connections to cartooning as well as its ongoing cultural presence and relevance.
3. To expand your comfort with accessing information and completing assignments both online and independently. Canvas will be utilized for many of our readings and for some response assignments.

FDMA 2312. History of Media Design

3 Credits (3)

An introduction to the principles of design history and theory within a chronological framework of historical and emerging media.

Learning Outcomes

1. Introduction to visual communication: Defines design media; Discuss universal design principles and strengthen student basic design skills.
2. Historical technological development and design: Prehistoric communication; Beginnings of alphabet and written language; Movable type and the printing press; Industrial revolution; Digital Age; Designers and Trends; Personalities and their influence and contributions
3. Identify design styles and discuss the relevance of how design influences: Idea generation; Trend sources; Influences or appropriation; Propaganda and advertising.

FDMA 2325. Advanced Photoshop**3 Credits (2+2P)**

This course expands on the Photoshop skill set to develop proficiency with selections, masking, channels, filters, color correction, painting tools, vector integration, video, special effects, and compositing techniques. The focus is on the core image-editing tools of Photoshop that can be universally applied to photography, print, film or the web. The material is covered in production-oriented projects and students develop work suitable for portfolios. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): FDMA 1515.

Learning Outcomes

1. Create effects using advanced blending techniques
2. Effectively utilize advanced masking techniques
3. Refine Selections with advanced techniques
4. Assess Adjust color in an image
5. Utilize advanced photo enhancement techniques
6. Alter images using Photoshop painting techniques
7. Create brush presets
8. Create vector elements with paths
9. Add manipulate type on a path 1
10. Create advanced special effects 1
11. Apply vanishing point warping 1
12. Create a video clip 1
13. Apply color adjustments to video

FDMA 2326. Digital Photography and Imaging II**3 Credits (2+2P)**

Provide understanding and skills needed for advanced digital capture, editing, optimizing and manipulating photographic images for print, web and multimedia applications. The course will prepare students to make more advanced technical and more refined aesthetic decisions relative to specific photographic applications. Restricted to: Alamogordo campus, Carlsbad campus, Dona Ana campus.

Prerequisite(s): FDMA 1545.

Learning Outcomes

1. Apply proper exposure techniques.
2. Practice effective composition techniques.
3. Demonstrate knowledge of working with Camera RAW files.
4. Demonstrate proper image adjustment and correction techniques.
5. Successfully apply the basics of HDR digital photography.
6. Apply techniques for modifying light.

FDMA 2360. Web Design II**3 Credits (2+2P)**

In this course, students will refine their skills in coding and web graphic design as well as be introduced to methods in constructing sites that adhere to the standards of responsive web design. Students will expand their knowledge of HTML and CSS using a code editor, and they will both analyze existing websites and also construct an interactive website. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): FDMA 1360.

Learning Outcomes

1. Plan and produce web design mockups.
2. Demonstrate a proficiency in HTML/CSS coding.
3. Utilize basic web scripts.
4. Integrate animation into web design.
5. Create fully functional websites using one or more web editors.
6. Make a website "live."
7. Evaluate web designs for aesthetics and functionality.
8. Demonstrate the utilization of responsive design.

FDMA 2365. Web Design for Small Business**3 Credits (2+2P)**

Technology and techniques for designing and building a web presence for small business. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): FDMA 1360.

Learning Outcomes

1. Learning advanced tools and techniques for creating and maintaining complex Business web sites. We will be using CSS, PHP, HTML, Photoshop, and Wordpress.
2. design a complete and fully functional online web business.
3. understand and develop a plan to better manage a web store/business.
4. review basic design guidelines in preparing a variety of web applications for business.
5. develop technical skills in using various web based solutions.
6. reinforce your knowledge of web design software.
7. introduce alternate sources of data, communication and financial solutions.

FDMA 2381. Storyboarding**3 Credits (3)**

Examines effective writing principles to create storyboards that communicate the overall picture of a project, timing, scene complexity, emotion and resource requirements. Further, the purpose of this course is to introduce students to the principles of visual storytelling—in film—through the use of the storyboard. In other words, to show how storyboards are critical "architectural component" of the filmmaking process, used as a blueprint (or guide) to communicate the complex elements of a film story. Crosslisted with: ENGL 2381. Restricted to: DFM, ANVE, G-CMI majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. Learn to conceive and draw original images.
2. Learn to use images to tell a story.
3. Design, develop, and order images (shots) into storyboarded scenes.
4. Understand how storyboarded sequences are a tool in the process of filmmaking.
5. Understand how the storyboard image is translated from the written page.
6. Build scenes from the scripted sequences into a storyboard.

FDMA 2382. Principles of Story Across the Media**3 Credits (3)**

The purpose of this course is to help students understand the basic elements of narrative structure (e.g. character, dramatic conflict, theme, etc.) and how these elements may be used effectively in media expression. Crosslisted with: ENGL 2382. Restricted to: G-CMI, DFM, ANVE majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. Identify the elements of storytelling in scripted text or improvised performance
2. Understand how these elements work together across different media
3. Apply these elements of storytelling in original work
4. Appreciate and master these elements for independent or collaborative work

FDMA 2410. Audio Production II**3 Credits (2+2P)**

Students will use skills developed in the Audio Production I course to produce audio projects utilizing a variety of analog and digital audio hardware and software, including continued use of multi-track, computer-based recording and editing systems, as well as exploring more advanced audio techniques and concepts. Restricted to: Community Colleges only. May be repeated up to 6 credits.

Prerequisite: FDMA 1410.

Learning Outcomes

1. Apply analog and digital audio hardware and software in audio recording.
2. Apply common professional set-up practices of audio production facilities.
3. Produce audio projects, sync sound recordings, and audio dialogue replacement (ADR) demonstrating technical expertise.
4. Perform an audio mix and master for a final professional product.
5. Analyze and compare existing audio productions for quality.

FDMA 2510. Introduction to Sound Design for Film**3 Credits (3)**

This course is an introduction to the principles, techniques and applications of sound design and film scoring. Students learn how sound affects storytelling in a film, examine the role of sound from the script to screen, and the professional process of creating a soundtrack. Students learn how to use sound equipment in a production environment and execute basic techniques used to develop a soundtrack. Crosslisted with: FDMA 1415.

Prerequisite(s)/Corequisite(s): FDMA 2382. Restricted to: DFM, ANVE majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. Compare the properties and propagation of sound and importance of sound to the storytelling aspect of filmmaking
2. Learn the process of designing a soundtrack for film and recording live audio dialogue for use in post-production editing.
3. Learn methods of capturing sound including live audio recording, dialogue recording, foley, orchestration and audio dialogue replacement
4. Design a soundtrack for motion media project.

FDMA 2520. Introduction to Cinematography**3 Credits (3)**

The Director of Photography (or Cinematographer), in close collaboration with the Director and Production Designer, helps determine the look of a film. This course is designed to introduce students to the technical and

aesthetic fundamentals of creating, developing, and collaborating on the visual elements of storytelling, using camera framing, lensing, and lighting fundamentals such as shadows, light and color. May be repeated up to 6 credits. only. Prerequisite(s)/Corequisite(s): FDMA 2382 (Las Cruces Campus) or FDMA 1210 (Community College Campus(es))

Learning Outcomes

1. Define and explain the fundamental concepts of cinematography, such as exposure, lighting solutions, and color temperature.
2. Understand how cinematography brings the Director's vision to reality.
3. Demonstrate proficiency in plotting and executing interior and exterior lighting solutions.

FDMA 2530. Introduction to 3D Modeling**3 Credits (3)**

This course will introduce 3D modeling methods and current practices. Students will learn preliminary and detailed modeling techniques using industry standard software. Methods will emphasize formal and functional aspects of modeling as they apply to mechanical, organic, and sculpted topology for application in animation, games, and information media. May be repeated for a maximum of 6 credits.

Learning Outcomes

1. Identify the role of a 3D modeler in a production pipeline within various fields of digital animation.
2. Apply techniques in modeling mechanical and organic objects.
3. Utilize tools available in professional 3D modeling software.
4. Create simple animations and renders.
5. Present original animations to instructor and classmates for critique.
6. Create a demo reel of work completed during the course.

FDMA 2535. Digital Illustration Techniques**3 Credits (3)**

Introductory course examining traditional artistic expressions and translating visual art experiences into a digital art medium to enhance visual storytelling. Students acquire basic principles of drawing and painting through hands-on experience manipulating tonal value, composition, form development, light and shadow, color theory, rendering realism, and graphic design. Restricted to: DFM, ANVE majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. Be familiar with the CMI computer system, facilities, equipment and policies.
2. Appropriately utilize the various media technologies available at CMI for digital illustration.
3. Understand the different roles and areas of digital illustration.
4. Understand and apply some basic techniques of digital illustration.
5. Understand and apply some basic processes of creating pleasing images based on knowledge of traditional art principles.
6. Begin to apply some basic strategies for developing and creating aesthetically pleasing images.

FDMA 2570. Creative Media Studio**3 Credits (2+2P)**

A studio environment where students specialize in creating film-festival quality and portfolio-ready projects under the supervision of faculty. May be repeated for a maximum of 6 credits.

Prerequisite(s): FDMA 1210 and FDMA 1220 or FDMA 2530.

Learning Outcomes

1. Students will work together to create portfolio-quality work in a studio environment.

- Through classroom discussion and reporting the students will collaborate to produce a professional quality "vertical slice" game concept within a defined timeline and financial budget

FDMA 2710. Beginning 2-D Animation

3 Credits (3)

Students will learn the basics of digital 2D animation by working through a variety of exercises, creating an original storyboard, and animating five or more shots utilizing industry standard software. Restricted to: DFM, ANVE majors. Restricted to Las Cruces campus only.

Learning Outcomes

- The student will demonstrate an overall knowledge of computers as a tool of the animation artist and be able to produce simple animations using the techniques learned in class.
- Use major software tools with ease
- Manage time lines through key frames
- Build storyboards
- Demonstrate knowledge of 2-D and animation terminology
- Produce actions, set environments and constraints for 2-D animation
- Render full animation.

FDMA 2715. Special Effects

3 Credits (2+4P)

Creating advanced virtual special effects for both rigid and soft bodies. Using MEL, dynamic principles, mixing nodes, and advanced particle systems. How to drive particles over surfaces, add texture to flow, create surface tensions, and use collision events to drive texture. Study of integrating computer-generated images with real-life video and audio.

Prerequisite(s): FDMA 2530 or FDMA 2765.

FDMA 2720. 3D Animation

3 Credits (3)

Overview of the essentials and principles of 3D animation; creative methods for using industry standard tools to produce the illusion of movement for storytelling and creating 3D effects. Topics include, keyframe and curve animation, kinematics, cycle animation, camera animation, deformers, dynamics and constraints.

Prerequisite: FDMA 1510, FDMA 2710 or consent of instructor.

Learning Outcomes

- Clearly describe the role of an animator in cinema, gaming and related fields.
- Recognize leading animators and their methods.
- Demonstrate knowledge of advances in contemporary animation.
- Utilize current industry standard animation tools.
- Apply fundamental animation processes and techniques

FDMA 2725. Rigging for 3D Animation

3 Credits (3)

This course will introduce principles and practices of current 3D animation rigging. Students will develop fundamental methods necessary to create character rigs. Students will learn aesthetic, technical, and optimization concepts as they apply to organic and mechanical designs. Topics will include: hierarchies, constraints, deformation rigging, skeleton creation, skinning, forward and inverse kinematics, controls, body and facial rigging. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 1510.

Learning Outcomes

- Understand what Rigging is and the role it plays in the world of cinema and video games.
- Be familiar with industry professionals and their techniques and approaches to rigging.

- Understand and be able to apply the fundamentals of rigging to industry standard applications.
- Demonstrate ability to rig basic to intermediate machines, bipeds and quadrupeds

FDMA 2730. Advanced Character Animation

3 Credits (2+2P)

Focus on complex rigging techniques as well as utilizing advanced animation functions to blend multiple animations into complex animations. May be repeated for a maximum of 6 credits. Restricted to: Community Colleges only.

Prerequisite(s): FDMA 2530.

Learning Outcomes

- Create skeletal riggings for use with a 3D model
- Attach riggings to a 3D model using Smooth and rigid binding and refine the bindings so that they are properly weighted
- Animate a 3D model using skeletal and vertex animation techniques

FDMA 2745. Light, Shade, Render

3 Credits (3)

This course will explore the theory and practice of 3D lighting and rendering methodologies. Techniques covered will implement cameras, lighting sources, textures, surface-mapping and algorithmic rendering to produce stylized and photo realistic images. Topics covered will include direct and indirect lighting, shaders that simulate physical substances and effects, rendering multiple passes and simulating physical lens effects. Restricted to: DFM, ANVE majors. Restricted to Las Cruces campus only.

Prerequisite: FDMA 1510 OR FDMA 2530, or Consent of Instructor.

Learning Outcomes

- Understand the role of lighting and surfacing to tell a story.
- Be familiar with leading lighting artist and their approaches.
- Utilize the software implemented in the entertainment industry.
- Understand and apply fundamental lighting and rendering techniques.
- Demonstrate ability to create successfully rendered scenes from concept through production.

FDMA 2750. Digital Sculpting

3 Credits (3)

Introduce students to the 3D Sculpting programs which are the industry standard sculpting programs. Students will learn how to create complex high polygon sculpts and normal maps and transfer the models into 3D studio Max and Autodesk Maya. May be repeated up to 6 credits. Restricted to: Community Colleges only.

Prerequisite(s): FDMA 2530.

Learning Outcomes

- Demonstrate communication skills through written critiques and explanations
- Students will demonstrate visual communication skills through critiques, written explanations, and storyboarding
- Demonstrate a working knowledge of Zbrush's interface
- Demonstrate a working knowledge of Zpheres and how they are best used to create sculpts
- Demonstrate a working knowledge of painting a mesh using Spotlight
- Demonstrate a working knowledge of retopologizing and exporting the mesh
- Demonstrate a working knowledge of integrating the full Zbrush pipeline into Unity and Unreal

FDMA 2755. Drawing for Animation**3 Credits (3)**

Introductory study of the human and animal form in relation to animation. Students learn fundamentals and exaggeration of the figure, as related to proportion, rhythm, mechanics, and motion. Areas of focus are: basic form, proportion, shape, contour, gesture, anatomy, portraiture, perspective, clothing effects and drawing from observation. Restricted to: CMT,DFM,ANVE majors.

Learning Outcomes

1. Students will have an opportunity to gain hands on experience using industry standard state of the art animation software.
2. Understand what the basics of drawing the human form.
3. Have a general understanding of human anatomy as needed for the artist.
4. Be able to design the human form from imagination.

FDMA 2770. Critical Game Studies**3 Credits (2+2P)**

Focus on creating a complete design document utilizing techniques and standards used in the industry today. May be repeated for up to 6 credits. Restricted to: Community Colleges only.

FDMA 2775. Game Tools and Techniques**3 Credits (2+2P)**

Focus on the different engines and gaming technologies that power the games of today. May be repeated for a maximum of 6 credits.

Prerequisite(s): FDMA 2770.

Learning Outcomes

1. Students will develop rapid prototyping techniques.
2. Through classroom exercises the students will gain competency in industry-standard game creation engines and tools, and learn to work together in groups to create rapid prototypes.
3. This includes creating art, sound and music, and creating basic scripts within an engine.

FDMA 2785. Level Design Concepts**3 Credits (2+2P)**

Focus on the design and creation of video game levels. Dealing with the challenges and pitfalls of different video game genres. May be repeated for a maximum of 6 credits. **Prerequisite(s):** FDMA 2770

Learning Outcomes

1. Students will develop level design skills.
2. Through classroom exercises the students will gain a comfortable competency with designing levels both on paper and digitally.
3. This includes creating first person shooter levels, third person levels, multiplayer level design, and more.

FDMA 2993. Workshops (Advanced Photography)**1 Credit (1)**

This is a series of 1-credit workshops offering specialized and intense advanced skill training and upgrading applications of photography for commercial purposes and training in photographic skills and styles presented by a variety of professional lecturers. May be repeated up to 7 credits. Restricted to Community Colleges only.

Prerequisite(s): FDMA 1545.

Learning Outcomes

1. Varies

FDMA 2994. Portfolio Design & Development**1-3 Credits**

Personalized design and creation of the student's professional portfolio including hard-copy, demo reel, and online. May be repeated up to 6

credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Varies

FDMA 2995. Film Crew Cooperative Experience**3-6 Credits (3-6)**

Industry production experience in specific craft areas for film crew technicians who have successfully completed two semesters of FTTP. Restricted to: Dona Ana campus, Carlsbad campus.

Prerequisite(s): FDMA 2125.

Learning Outcomes

1. Varies

FDMA 2996. Special Topics**1-4 Credits**

Specific topics to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits.

Learning Outcomes

1. Varies

FDMA 2997. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval of department head. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): Minimum GPA of 3.0 and sophomore standing.

Learning Outcomes

1. Varies

FDMA 2998. Internship**1-3 Credits**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. May be repeated up to 9 credits. Consent of Instructor required. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only. Consent of instructor required.

Learning Outcomes

1. Varies

FDMA 301. Sound Design II**3 Credits (3)**

Mixing and balancing dialogue, sound effects and music in postproduction. Study the role of sound effects, foley, soundtrack choices, and music supervision. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 2510.

FDMA 303. Cinema Review and Critique**3 Credits (3)**

This course is for the student who wants to learn to be a more active, intelligent film viewer. It encourages critical thinking about films and educates students on how to write a film review. Students will meet in the movie theater to watch essential films that serious movie watchers should see from classic motion pictures, to current release major motion pictures, independent films and world cinema features. The course will serve as a guide to the illuminating process of evaluating, analyzing, and reviewing movies. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 2382.

FDMA 304. Independent Filmmaking**3 Credits (3)**

This course is designed to enhance student knowledge about independent film in the U.S. Through a series of screenings, readings and lectures, students will learn how to take an idea, obtain the script, create a budget, finance the project, direct the shoot, edit the film, attend festivals, secure an agent, and then market, sell and distribute around the world. Students will gain an appreciation of the history of American independent filmmaking. Students will apply this knowledge in their written assignments, and a critical comparative essay. Restricted to ANVE, DFM Majors.

Learning Outcomes

1. Students will acquire greater proficiency in independent filmmaking and planning.
2. Students will gain an understanding of the history of independent filmmaking and where the industry stands today.
3. Students will improve their ability to write about film in an organized, articulate, and effective manner.
4. Students will hone critical thinking skills by engaging in comparative analysis of independent films.

FDMA 305. Business of Filmmaking/Animation

3 Credits (3)

Explores the roles of unions, basic contracts, legal arrangements, and the economics of the production process, distribution, and financing. Consent of Instructor required.

Prerequisite(s): FDMA 2382.

FDMA 307. Writing for Television

3 Credits (3)

Students will examine and apply various strategies of storytelling, narrative structure and its principle components as they relate to a wide cross-section of television platforms, genres and formats. Restricted to ANVE, DFM Majors.

Prerequisite: FDMA 2382.

Learning Outcomes

1. By the end of this course, students should be able to identify the building blocks of storytelling, including conflict, structure, plot, theme, character, and point of view.
2. By the end of this course, students should be able to understand how these building blocks work together to effectively communicate in all types of scripted television, including streaming platforms such as Amazon and Netflix.
3. By the end of this course, students should be able to have a better understanding and mastery of writing mechanics.
4. By the end of this course, students should be able to present a verbal and written pitch for an original TV series and one cold open.

FDMA 308. Writing for Animation

3 Credits (3)

This class explores methods for, and approaches to, writing for animation. Students study and produce scripts for a range of animation outlets while engaging in writing exercises based on character and story development.

Prerequisite(s): FDMA 2382 or consent of instructor.

FDMA 309. Screenwriting I

3 Credits (3)

Writing intensive. Students learn the craft of screenwriting, honing skills in writing dialogue and visual narrative, crafting dynamic characters and dramatic action. Original student scripts will be performed and discussed in class. Crosslisted with: ENGL 309 and THEA 306.

Prerequisite(s): ENGL 2382/FDMA 2382 or consent of instructor.

FDMA 310. Cinematography II

3 Credits (3)

Advanced tools of the cinematographer, lighting and composition techniques. Artistic and technological elements of cinematography. Restricted to: DFM,ANVE majors.

Prerequisite(s): FDMA 2520.

FDMA 311. Editing II

3 Credits (3)

Advanced techniques in digital films using professional non-linear editing systems. Restricted to: DFM,ANVE majors.

Prerequisite(s): FDMA 1220.

FDMA 312. Post Production Color Grading

3 Credits (3)

Color grading is an important part of the overall look of a film. It used to be a craft that only a small number of people knew how to do. However, due to advances in technology and business models, more and more people are diving into color grading. This class is an introductory look into the art and techniques of color grading. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 1220.

FDMA 314. Acting for Film

3 Credits (3)

Techniques for film and television acting. In-depth analysis of film performance creation among actor, director, writer, cinematographer, and editor. Restricted to: THTR,DFM majors.

Prerequisite(s): FDMA 2382.

FDMA 318. Documentary Production

3 Credits (3)

Survey of theory and history of documentary film making including viewings and discussions of notable films and directors. Class works with actual documentary project. May be repeated up to 6 credits. Restricted to: ANVE, DFM majors.

Prerequisite(s): FDMA 1220, FDMA 2520.

FDMA 320. Race and Gender in Film

3 Credits (3)

In this course students will analyze film as an art form as well as be exposed to Race and Gender Feminist Film Theory. We will consider the role of film in our understandings of sex, gender and sexuality. Through discussions and writing we will work to discern relevant social, political, ideological, and aesthetic concepts in the media we examine. Crosslisted with: ENGL 399, GNDR 450 and GNDR 550.

FDMA 325. Film Festival Production

3 Credits (3)

A course for students interested in learning about the processes of orchestrating an independent film festival. Students will engage in a professional environment with other film students and filmmakers, as well as learn about film event administration and organization. May be repeated up to 6 credits. Restricted to: DFM, ANVE majors.

FDMA 327. 2D Rigging

3 Credits (3)

This course will introduce industry-standard 2D rigging principles and practices. Using node-based technology, students will learn aesthetic and technical concepts of 2D rigging to build a variety of fully functional, 360-degree 2D rigs of their own designs. Topics include: vector-based art, node structures and groups, articulation points, deformations, drawing substitutions, and master controllers for efficient animation. Restricted to ANVE Majors.

Prerequisite: FDMA 2710.

Prerequisite/Corequisite: FDMA 2755.

Learning Outcomes

1. Students will learn how to use drawing and rigging tools in Toon Boom Harmony Premium to create strong character designs and functional 2D rigs.
2. By the end of the class, students should be proficient rigging artists who can design a character and assemble a 2D rig for that character, as well as animate the character rig.

FDMA 328. Producing**3 Credits (3)**

Examines the role of the Producer, essential to every film production. The course will revolve around the best practices in organizational design, the production process, the budgeting process, financial controls, scheduling, insurance and distribution.

Prerequisite(s)/Corequisite(s): FDMA 2510, FDMA 1220, FDMA 2382.

Restricted to: ANVE,DFM majors.

FDMA 332. 3D Character Animation**3 Credits (3)**

Essentials and principles of 3D character animation. Techniques and craft of breathing life into characters through movement, including dynamic poses, blocking action, run and walk cycles, lip syncing and realism. Students will plan and produce original animation for review by classmates and as part of a CGI demo reel. THEA 1221, Acting and FDMA 2510, Sound Design are recommended. Restricted to: DFM,ANVE majors.

Prerequisite: THEA 1210 (or FDMA 314 or FDMA 348), FDMA 1510 and FDMA 2720 or consent of instructor.

Learning Outcomes

1. Understand the character animation pipeline.
2. Understand basic body mechanics and how to represent them with a 3D character
3. Understand the twelve principles of animation on a deeper level and be able to apply them in individual work
4. Developing a vocabulary and critical eye in order to critique each other's work.

FDMA 341. Visual Effects I**3 Credits (3)**

This course will educate students on the fundamental principles, skills, and artistry needed to successfully integrate live action footage and computer generated imagery into technically correct and narrative engaging cinematic shots. Topics include: Cinematography for visual effects; Green screen setup/lighting/keying; Intermediate compositing techniques; Editing, color correction and grading. Restricted to ANVE, DFM Majors. May be repeated up to 3 credits.

Prerequisite: FDMA 1510, FDMA 2530, FDMA 2745 (or consent of instructor).

Learning Outcomes

1. At the end of this class, students will produce (alone or in a group), an engaging, well-thought out and professionally executed visual story from scratch - using a combination of live action plates, green screen elements and seamlessly integrated CGI elements.
2. Students will become fluent in setting up and operating a professional camera proper cinematography techniques.
3. Students will shoot green screen elements/plate using proper cinematography techniques.
4. Students will become fluent in editing software to edit an engaging narrative.

5. Students will become fluent in node-based compositing software to produce seamless, photoreal integrations of CGI elements and green screen mattes in live action plates.
6. Students will use color-correction and color grading techniques and use color as a narrative element.
7. Students will correctly adhere to established production standards and protocols.

FDMA 348. Acting for Animation**3 Credits (3)**

This course explores performance techniques relevant to animators including 2D and 3D animation and motion capture. Students learn to create dynamic, dramatic performances and believable character interactions for animation based reference. Students learn to analyze scripts, sound, acting, action and performance for production. Topics include: acting theory, emotional/mental states, character movement and style, dynamic facial expression, scene construction, posing, layering and rhythm, simplification and exaggeration, and lip sync. Restricted to: ANVE,DFM majors. May be repeated up to 3 credits.

Learning Outcomes

1. Understand the different roles and character mindsets of digital animation in cinema.
2. Understand and apply some basic acting skills into animation reference.
3. Understand and apply some basic processes of creating reference for a narrative.
4. Begin to apply some basic strategies for developing and creating a story visually.

FDMA 350. Intermediate 2D Animation**3 Credits (3)**

Students will begin to refine their animation skills by animating more complex characters utilizing the Principles of Animation. They will practice these advanced drawing and motion techniques in a variety of exercises and projects using industry standard software. Areas of focus include: squash and stretch, cloth simulation, the successive breaking of joints, and biped walk cycles. May be repeated up to 3 credits.

Prerequisite: FDMA 2710.

Learning Outcomes

1. Students will refine foundational animation skills.
2. Students will learn and show proficiency in related industry-standard software.
3. Students will apply skills to more advanced projects than in previous 2D courses

FDMA 360. Previsualization**3 Credits (3)**

Implements 3D animation tools in preproduction shot and sequence design for motion picture and broadcast industries; including 3D storyboarding, technical planning and editing basics. LC Campus Only. Restricted to ANVE, DFM majors.

Prerequisite(s): FDMA 1510, FDMA 2530, and FDMA 2720 or consent of instructor.

FDMA 362. Motion Graphics**3 Credits (3)**

Students will learn the industry standard motion graphics techniques through a variety of exercises and projects that combine animation, text, visual effects, and sound. Restricted to: ANVE, DFM majors.

Prerequisite: FDMA 1715.

Learning Outcomes

1. Understand the context for and learn to create, combine, and animate text with graphics.
2. Explore various applications of creative techniques, including motion graphic design for commercials, logos, informative videos, UI design, and basic character rigging.
3. Learn to use industry-standard motion graphic softwares.

FDMA 365. Character Design and Development**3 Credits (3)**

Digital character design for the entertainment industry. Provides insight into the process of creating iconic characters. Traditional and contemporary character designers are explored. Industry workflow is introduced and necessary skills are developed to design detailed 3D characters from concept through production. Restricted to ANVE, DFM majors. May be repeated up to 3 credits.

Prerequisite: FDMA 1510, FDMA 2530 and FDMA 2535, or consent of instructor.

Learning Outcomes

1. Understand the role of a character in cinema and gaming.
2. Become familiar with leading character designers and their approach.
3. Utilize current industry standard methods.
4. Understand and apply fundamental character design techniques.
5. Demonstrate a strong ability to design and create characters from concept through production.

FDMA 395. Directing I**3 Credits (3)**

Study and application through short scene work of the basic tools of a director and relationships with actors, designers, playwright, and stage managers. Interpreting as well as organizing. May be repeated up to 3 credits. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 2510, AND FDMA 2520, AND FDMA 1220.

FDMA 396. Directing II**3 Credits (3)**

Addresses pre-production concerns including script breakdown, casting ground plans and coverage. The criteria employed when selecting the creative team including a director of photography, art director, light, sound and wardrobe designers. Introduction to budgeting, scheduling, and script breakdowns. Prerequisite: FDMA 395

FDMA 397. Practicum**1-3 Credits (1-3)**

Practical application of the student's field of study in a project environment. May be repeated up to 9 credits. Consent of Instructor required.

FDMA 398. Special Topics**3 Credits (3)**

This course addresses specific subjects and issues as identified by the department. Topics and credits to be announced in the Schedule of classes. May be repeated up to 12 credits.

FDMA 400. Directed Studies**1-6 Credits (1-6)**

Directed study course in CMI under the supervision of a CMI faculty member. May be repeated up to 9 credits.

FDMA 401. Motion Capture Techniques**3 Credits (3)**

Students will implement industry standard motion capture techniques and essential skills to capture and integrate performance for movie making, 3D animation and game production. Students will learn how

to use the motion capture system, equipment and workflow, and polish performances using industry standard software. Concepts covered will consist of exploring motion capture setup, shooting, data tracking, and animation correction and enhancement. Restricted to ANVE, DFM majors. May be repeated up to 3 credits.

Prerequisite: FDMA 1510, FDMA 2720 and FDMA 2725 (or consent of instructor).

Learning Outcomes

1. Understand and demonstrate basic approaches to integrating live actors with computer generated imagery.
2. Understand the role of motion capture in cinema, advertising and related fields.
3. Build familiarity with leading motion capture companies and their approaches.
4. Become knowledgeable of the history of motion capture.
5. Become knowledgeable of current advances in motion capture.
6. Learn to utilize industry standard motion capture software.
7. Demonstrate a strong ability to produce believable imagery from concept through final production.

FDMA 410. Cinematography III**3 Credits (3)**

This class is geared towards those who want to learn more about cinematography, color grading, and digital technology as it pertains to cinematography. Shooting high-end codecs (ProRes/DNxHD) or RAW are becoming more and more popular in filmmaking as camera manufactures and computer processing get better. This class will be a mix of production and post-production as learning how to shoot these higher end codecs do not end with the camera. Focus will be on techniques of shooting raw, understanding how to operate a camera capable of high end image acquisition, properly building up the camera rig and accessories, managing data and the post-production workflow. Consent of Instructor required. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 310.

FDMA 422. Environmental Filmmaking**3 Credits (3)**

As a documentary workshop in social-impact filmmaking, this course focuses on the transformative power of visual storytelling to address the pressing environmental issues of our times. Students will watch a variety of environmental films, and make their own short documentary and media projects, telling solutions-oriented stories about environmental issues. This course is designed to give students the opportunity to collaborate with environmental NGOs, foundations, and NMSU faculty and students in other departments working on environmental issues in the Southwest and Borderlands region. By harnessing the power of visual storytelling to address the pressing challenges of our times, students will be empowered to become content creators and change makers having impact in the world. Restricted to DFM majors. May be repeated up to 3 credits.

Prerequisite: FDMA 1220, FDMA 2510, FDMA 2520.

Learning Outcomes

1. To understand the basic elements of the climate crisis.
2. To explore the power of visual storytelling to address pressing environmental issues.
3. To learn basic strategies used by filmmakers to create social impact films, including calls to action.
4. To study effective case-studies of impact documentaries exploring climate issues, oceans/ivers, energy policy and the extinction crisis.
5. To give comparative presentations that connect films screened outside of the class with films watched in class.

- To explore the ethics of documentary filmmaking.
- To identify and build relationships with local non-profits and researchers working on environmental issues in the region.
- To learn industry-standard documentary research and interview skills.
- To produce, film and edit (in teams) a short impact documentary about selected subjects.

FDMA 433. Sets and Environments**3 Credits (3)**

Digital environment design and creation for movies and games from concept to production; including illustration, modeling, matte painting, texturing, lighting, rendering, integration, and camera projection. Restricted to ANVE, DFM majors. May be repeated up to 3 credits.

Prerequisite: FDMA 1510, FDMA 2530, and FDMA 2535 or consent of instructor.

Learning Outcomes

- Understand the role of digital production design in cinema.
- Become familiar with the work of leading digital artists involved in production design for the entertainment and gaming industries.
- Utilize the software implemented in the entertainment industry.
- Understand and apply fundamental digital set design techniques.
- Demonstrate a strong ability to design and create digital set and environments from concept through production.

FDMA 450. Advanced 2D Animation**3 Credits (3)**

This course will cover the more advanced aspects of 2D Animation. Students will demonstrate their mastery of the principles of animation through a variety of exercises and projects focusing on: automated and manual lip sync, full motion character animation, acting, smears, and quadruped animation. Restricted to ANVE, DFM majors. May be repeated up to 3 credits.

Prerequisite: FDMA 350.

Learning Outcomes

- Students will gain experience mastering Disney's Principles of animation.
- Students will complete exercises to animate both humans and animals.
- Students will gain proficiency in lip syncing and acting using industry standard software.

FDMA 451. Dynamics and Effects**3 Credits (3)**

This course educates students in photoreal 3D simulation techniques focusing on particle simulations, rigid body dynamics and fluid simulations. Students will complete several professional grade VFX shots involving explosions, fire, destruction, dust and debris.

Prerequisite: FDMA 1510.

Learning Outcomes

- Students will exhibit high level competency in critical thinking and independent problem solving.
- Students will understand and apply procedural methodologies; and complete several professional quality, portfolio-ready simulation shots using industry-standard techniques.
- Students will produce work at a pace to meet with the production schedule.
- Students will implement critiques on their work-in-progress to iteratively improve production quality.

FDMA 480. Screenwriting II**3 Credits (3)**

Students will write 2 short scripts, 10-15 pages each throughout the semester. Focus will be on learning how to take notes and rewrite. Script analysis will be in a workshop format. Scripts will be read and discussed, scenes performed and reactions analyzed to consider effect of dialogue, character development, etc. Restricted to ENGL, DFM, ANVE majors.

Crosslisted with: ENGL 480

Prerequisite(s): ENGL 309 or FDMA 309 or THEA 306 or consent of instructor.

FDMA 490. Advanced Screenwriting**3 Credits (3)**

Students will prepare a 30-60 page screenplay. Script analysis will be in an advanced workshop format. Scripts will be read and discussed, scenes performed and reactions analyzed to consider effect of dialogue, character development, etc. This course is aimed at preparing writers for the professional market. Consent of instructor required. May be repeated up to 6 credits.

FDMA 491. 3D Production Studio I**6 Credits (6)**

The course is the first semester of a year-long effort to complete a culminating project that is a story-driven short film, which can be either full CGI, or live action with visual effects. In Production Studio I the emphasis will be on the pre-production phase, including analysis and critique, pipeline organization and project management. Pre-production consists of: Pitch, Script, Visual and sound references, Storyboards, 3D Previsualization, Scheduling/Project Management. Restricted to ANVE majors.

Prerequisite: FDMA 308 or FDMA 309, FDMA 341.

Prerequisite/Corequisite: FDMA 332, FDMA 360, FDMA 365, FDMA 433.

Learning Outcomes

- Demonstrate an ability to create a transformational story.
- Exhibit proficiency in visual storytelling, structure, and character development.
- Develop a story appropriate to the chosen production approach.
- Create storyboards/animatics to direct the cinematic aspects of the story.
- Design the production visually in terms of characters and environment.
- Learn to implement critiques of work to improve production quality.

FDMA 492. 2D Production Studio I**6 Credits (6)**

Students will work through the pre-production process on short animated films. They will write a script, create a storyboard, and record voice over/ dialogue to create an animatic. Additional exercises will then be assigned to augment the skill set of the student according to the needs of each student. Restricted to ANVE majors.

Prerequisite: FDMA 1715 and FDMA 450.

Learning Outcomes

- Students will synthesize animation techniques to produce a completed animatic.
- Students will show proficiency in storytelling towards the development of a short script for production.
- Students will demonstrate proficiency in industry standard animation softwares and production practices.

FDMA 493. 3D Production Studio II**6 Credits (6)**

The course is the final semester of a year-long concentration on a culminating project. Emphasis will be on the production, post-production, and distribution of the work created during 3D Production Studio I. Students will produce a professional quality and industry-standard visual story that will help them gain entry into professional employment. The overall objective is for students to execute their artistic vision with exceptional creative and technical proficiency - resulting in a story-driven and captivating cinematic experience. Restricted to ANVE majors.

Prerequisite: FDMA 491.

Learning Outcomes

1. Students will complete the process of transforming their story from script to screen.
2. Students will demonstrate mastery of craft as a digital artist.
3. Students will learn to direct the cinematic aspects of the story.
4. Students will show proficiency in the production workflow, and complete a deliverable short film by the end of the production schedule.

FDMA 494. 2D Production Studio II

6 Credits (6)

Students will produce the short animated films they developed in 2D Production Studio I. They will animate, composite, and edit their shorts into a final piece for presentation in a showcase. Restricted to ANVE majors.

Prerequisite: FDMA 492.

Learning Outcomes

1. To complete a final project (either short film or demo reel) that demonstrates synthesis of animation techniques taught in earlier classes.
2. To translate animatics from 2D Production Studio I into keyframes and then in-between their keyframes to get clean, smooth animations.

FDMA 495. Internship

1-12 Credits (1-12)

Placement in a production facility and supervised experience required. With CMI advisor approval only. May be repeated up to 18 credits. Consent of Instructor required. Restricted to: DFM,ANVE majors.

FDMA 497. Portfolio Design and Development

3 Credits (3)

Advanced graphic design projects with an emphasis on conceptual development, portfolio preparation, and professional practices. Refine general marketing strategies, personal portfolio, and resumes. Define, target, and penetrate personal target markets. Students develop individual promotional/demo packages. Restricted to: DFM,ANVE majors.

FDMA 500. Graduate Problems in Creative Media

1-3 Credits (1-3)

Independent study in an area of Creative Media. The curriculum will be designed by the student taking the course with consultation from the assigned instructor. Consent of instructor required. May be repeated up to 9 credits.

Learning Outcomes

1. Student will outline an idea for a project or research study, including a timeline for various milestone completion.
2. Student will work with a faculty member to determine the final deliverable outcome, adjusting the timeline and finalized expectations as needed throughout the semester.

FDMA 501. Special Topics

3 Credits (3)

This course is a graduate-level course that addresses specific subjects and issues as identified by the department. Topics and credits to be

announced in the Schedule of classes. This class may be cross listed with FDMA 398 Special Topics, or another FDMA course, and if so, graduate students will be expected to perform extra work or complete longer assignments. May be repeated up to 9 credits.

Learning Outcomes

1. The learning objectives will depend on the subject matter being covered in the special topics class, and may include completion of a creative work or research in an area of creative media.

FDMA 550. MFA Form & Technique

3 Credits (3)

Advanced study of issues in form and technique in creative writing, including point of view, scene and dialogue, and story structure. May be repeated up to 6 credits.

Learning Outcomes

1. By the end of this course, students will have completed advanced study of issues in form and technique in their major genre.
2. Students will finish the course with a greater understanding of point of view, scene and dialogue, and story structure, among other creative writing concerns.

FDMA 570. MFA Workshop

3 Credits (3)

Intensive practice in creative writing in a workshop environment with peer criticism. May be repeated up to 15 credits.

Learning Outcomes

1. Provide a workshop environment for graduate students taking creative writing classes as part of the MFA in Creative Writing.

FDMA 592. MFA Theory, Practice and Professionalism

1-2 Credits (1-2)

Students will study major poetics/narratology pieces in the field and other related professional topics such as literary citizenship, publishing, and job seeking skills. Students will also propose and develop a semester-long project in one of the categories, such as a community reading or workshop, a conference panel proposal, a paper presentation, a chapbook press launch, writing/placing literary book reviews, or work on an outreach project. Must be taken in one of the last two semesters of the MFA and currently with FDMA 594 MFA Thesis Workshop. Restricted to MFA-Creative Writing students, or by consent of instructor. May be repeated up to 4 credits.

Corequisite: FDMA 594.

Learning Outcomes

1. By the end of this course, students will understand, analyze, and effectively use the critical discourse of poetics/narratology/craft in the field of creative writing.
2. Design and execute an outreach or professional project that contributes to a creative writing community.
3. Explore applications of their training in professional contexts.
4. Analyze how students' own reading, writing, and research respond to existing leadership in professional creative writing communities, help provide new leadership, and answer community needs.

FDMA 594. MFA Thesis Workshop

3 Credits (3)

Students will submit a draft of their thesis project, in their major genre, for workshop critique. Revision of the thesis draft will be submitted to the instructor. Restricted to MFA Creative Writing students, or by consent of instructor. Must be taken in each of the last two semesters of the MFA, and concurrently with FDMA 592 MFA Theory, Practice and Profession). May be repeated up to 6 credits.

Corequisite: FDMA 592.

Learning Outcomes

1. Understand, analyze, and effectively use the critical discourse of the field of creative writing to discuss a thesis.
2. Examine how their thesis operates with the genre and within the context of contemporary literature.
3. Critically contextualize their thesis and those of their peers.
4. Apply various revision strategies across a thesis-length manuscript, responding to the critiques of the instructor and their peers.
5. Achieve the standards of publication of the University's thesis editor and learn those of the publishing environment in their genre.

FDMA 595. Master of Fine Arts Graduate Internship**1-12 Credits (1-12)**

Internship credit is dependent upon placement in a supervised professional environment. Consent of instructor required. May be repeated up to 12 credits.

Learning Outcomes

1. Students will gain professional experiences that will add to their resumes and benefit their professional goals and development.

FDMA 599. MFA Thesis**3 Credits (3)**

Students pursuing the MFA in Creative Writing are required to complete 6 credits of MFA Thesis. May be repeated up to 6 credits.

Learning Outcomes

1. Students will use these hours to work on a creative thesis as part of the MFA Creative Writing program.

FIRE-FIRE INVESTIGATION

FIRE 102. Fire Fighter I and II**12 Credits (12)**

This course will train the student as outlined in NFPA 1001, Fire Fighter Professional Qualifications. Firefighter I & II Certification issued through the New Mexico Firefighter's Training Academy (NMFTA) upon successful completion [International Fire Service Accreditation Congress (IFSAC) & Pro Board accredited]. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): FIRE 115, FIRE 252, OEEM 103. Restricted to Dona Ana campus only.

FIRE 112. Principles of Emergency Services**3 Credits (3)**

This course provides an overview to fire protection and emergency services including career opportunities in fire protection and related fields. The organization and function of public and private fire protection services is studied including how fire departments fit as part of local government. An overview of laws and regulations affecting the fire service is explored along with specific fire protection functions and responsibilities including basic fire chemistry and physics, introduction to fire strategy and tactics and life safety initiatives. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

FIRE 114. Fire Behavior and Combustion**3 Credits (3)**

This course explores the theories and fundamentals of how and why fires start, spread, and are controlled. Restricted to: Community colleges only.

FIRE 115. Hazardous Materials Awareness and Operations**3 Credits (3)**

This course will train the student to the Hazardous Materials Awareness and Operations level as outlined in NFPA 472, Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents and OSHA 29 CFR 1910.120. Hazardous Materials Awareness

and Operations certification issued through the New Mexico Firefighter's Training Academy upon successful completion (IFSAC accredited). May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

FIRE 120. Fire Protection Hydraulics and Water Supply**3 Credits (3)**

This course will train students on skill requirements for becoming a safe and effective fire apparatus driver/operator. The focus will be on pump operation, construction, testing, and mathematical calculation required for effective pump operation and fire control. Responsibilities of the driver/operator will be taught and assessed consistent with applicable NFPA standards and the New Mexico Firefighters' Training Academy (NMFTA) guidelines. Students who meet all course requirements will be eligible for International Fire Service Accreditation Congress (IFSAC) certification through the NMFTA. Consent of Instructor required. Restricted to Community Colleges campuses

Prerequisite(s)/Corequisite(s): FIRE 128.

FIRE 126. Fire Prevention**3 Credits (3)**

This course will educate students about the principles and techniques of fire prevention and life-safety inspection and code compliance in accordance to NFPA 1031, Standard for Professional Qualifications for Fire Inspector and Plan Examiner, Level I. Students who meet all course requirements will be eligible for International Fire Service Accreditation Congress (IFSAC) certification through the New Mexico Firefighters' Training Academy (NMFTA). Restricted to Community Colleges campuses only.

FIRE 128. Apparatus and Equipment**2 Credits (2)**

The course will train students on attitude and skill requirements for becoming a safe and effective fire apparatus driver/operator. The focus will be on apparatus inspection, operation, maintenance, and specification. Responsibilities of the driver/operator will be taught and assessed consistent with applicable NFPA standards and the New Mexico Firefighters' Training Academy (NMFTA) guidelines. Students pursuing certification must possess a current and valid New Mexico driver's license. Students who meet all course requirements will be eligible for International Fire Service Accreditation Congress (IFSAC) certification through the NMFTA. Restricted to Community Colleges campuses only.

FIRE 130. Principles of Fire and Emergency Services Safety and Survival**3 Credits (3)**

This course introduces the basic principles and history related to the national firefighter life safety initiatives, focusing on the need for cultural and behavior change throughout the emergency services. Consent of instructor required. Restricted to: Community colleges only.

FIRE 200. Special Topics**1-12 Credits (1-12)**

Specific subjects to be announced in the Schedule of Classes. Course may be repeated for credit as topics change. May be repeated up to 12 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

FIRE 201. Independent Study**1-3 Credits**

Research on an approved topic to meet graduation requirements. Meets or exceeds NFPA standards. May be repeated for total of 9 credits.

Prerequisite: consent of instructor.

FIRE 203. Fire and Emergency Services Administration**3 Credits (3)**

This course will provide students entry-level training in company operations and administration at the first-line supervisory level. The student will learn how to effectively manage human resources and community/public relations. Students will learn about fire department organization and administration; including budgets, reports, and planning. Students will learn the process involved in fire inspection, investigation, public education, emergency service delivery, and safety, per NFPA Standard 1021, Fire Officer Professional Qualifications. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

FIRE 210. Building Construction for Fire Protection
3 Credits (3)

This course provides the components of building construction related to firefighter and life safety. The elements of construction and design of structures are shown to be key factors when inspecting buildings, preplanning fire operations, and operating at emergencies. Restricted to: Community colleges only.

FIRE 214. Hazardous Materials Technician
3 Credits (3)

Knowledge and skills about hazardous materials mitigation needed to certify as a Hazardous Materials Technician Level III. Meets or exceeds NFPA 471, 472, 473 standards, and OSHA 1910.102 part Q, and New Mexico HMER plan. May be repeated up to 3 credits. Restricted to: Community Colleges only.

Prerequisite: FIRE 115.

Learning Outcomes

1. Acquire the skills and knowledge required to perform the functions of a firefighter.
2. Apply the appropriate critical thinking skills necessary to develop an incident action plan using appropriate strategies and tactics to safely manage incidents.

FIRE 216. Hazardous Materials Chemistry
3 Credits (3)

This course provides basic chemistry relating to the categories of hazardous materials including recognition, identification, reactivity, and health hazards encountered by emergency services. Restricted to: Community colleges only. May be repeated up to 3 credits.

Learning Outcomes

1. Acquire the skills and knowledge required to perform the functions of a firefighter.

FIRE 220. Cooperative Experience I
1-3 Credits

Supervised cooperative work program. Student is employed in an approved occupation and rated by the employer and instructor. May be repeated for a maximum of 6 credits. Graded S/U.

Prerequisite: consent of instructor.

FIRE 221. Cooperative Experience II
3 Credits (3)

Apply advanced firefighting knowledge and skills while working with fire protection agencies. Meets or exceeds NFPA standards. Consent of instructor required. Graded: S/U. Restricted to: Community Colleges only.

Prerequisite(s): FIRE 220.

FIRE 223. Fire Investigations I
3 Credits (3)

This course meets the requirements set forth in NFPA 1033 Professional Qualifications for Fire Investigator. This course will give a comprehensive understanding of the principles of fire investigation, scene examination, documentation, evidence collection/preservation, interview techniques,

and post-incident investigations. Student who meet all course requirements are eligible for International Fire Service Accreditation Congress (IFSAC) certification through New Mexico Firefighters' Training Academy (NMFTA). Restricted to Community Colleges campuses only.

FIRE 224. Strategy and Tactics
3 Credits (3)

Provides an in-depth analysis of the principles of fire control through utilization of personnel, equipment and extinguishing agents on the fire ground. Covers the development of systematic action plans for emergency situations. Includes recognizing and prioritizing emergency scene needs and developing related strategies, tactics and contingencies. Educates students on how resources should be deployed to implement those plans. Restricted to Community Colleges campuses only.

FIRE 225. Fire Protection Systems
3 Credits (3)

This course provides information relating to the features and design and operation of fire alarm systems, water-based fire suppression systems, special hazard fire suppression systems, water supply for fire protection and portable fire extinguishers. Restricted to: Community colleges only.

FIRE 230. Fire Service Instructor
3 Credits (3)

Provides the instructor candidate with methods and techniques of instruction including oral communications, preparing lesson plans, writing performance objectives, use of audio and other training aids, and the selection, evaluation and preparation of performance tests. Meets and exceeds NFPA 1041 Level I standards. Restricted to: Community Colleges only.

FIRE 232. Firefighter Internship
3 Credits (3)

Application of knowledge, skills and abilities in a fire service department, as a firefighter intern and integrated member of a fire affiliated agency. Restricted to majors.

Prerequisites: FIRE 101, FIRE 102, FIRE 115, FIRE 202 and EMT-B and consent of instructor.

FIRE 252. Vehicle Extrication
2 Credits (1+2P)

This course will train the student to the Vehicle & Machinery Extrication level I as outlined in NFPA 1006, Standard for Technical Rescuer Professional Qualifications. Vehicle & Machinery Extrication certification issued through the New Mexico Firefighter's Training Academy upon successful completion (IFSAC accredited). May be repeated up to 2 credits. Restricted to Community Colleges campuses only.

FREN-FRENCH

FREN 1110. French I
4 Credits (4)

Intended for students with no previous exposure to French, this course develops basic listening, speaking, reading, and writing skills aiming toward the ACTFL novice-high level. This is an introductory course designed to teach the student to communicate in French in everyday situations and to develop an understanding of French and Francophone cultures through the identification of cultural products and practices, of cultural perspectives, and the ability to function at a survival level in an authentic cultural content. This course will also develop the student's sense of personal and social responsibility through the identification of social issues.

Learning Outcomes

1. Students can communicate and exchange information about familiar topics using phrases and simple sentences, sometimes supported by memorized language.
2. Students can usually handle short social interactions in everyday situations by asking and answering simple questions
3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.
8. Students can identify beliefs, behaviors and cultural artifacts of the French-speaking world.
9. In English, students will engage with social issues confronting the French-speaking world to develop their sense of personal and social responsibility.

FREN 1120. French II**4 Credits (4)**

A continuation of French I, students will develop a broader foundation in skills gained during the first semester, including understanding, speaking, reading and writing French aiming toward the ACTFL intermediate-low level. This course is designed to increase student fluency in French as applied to everyday situations. Students will also learn to recognize and understand various French and Francophone products, practices, and perspectives, identifying common cultural patterns, describing basic cultural viewpoints, and further developing their sense of personal and social responsibility through the investigation of cultural issues. May be repeated up to 4 credits.

Learning Outcomes

1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write briefly about most familiar topics and present information using a series of simple sentences.
4. Students can understand the main idea in short, simple messages and presentations on familiar topics.
5. Students can understand the main idea of simple conversations that they overhear.
6. Students can understand the main idea of short and simple texts when the topic is familiar.
7. Students can describe and make comparisons between decisions about beliefs, behaviors and cultural artifacts of the French-speaking world.
8. Students will engage with social issues confronting the French-speaking world to continue to develop their sense of personal and social responsibility

FREN 2110. French III**3 Credits (3)**

In this third semester course, students will continue to develop a broader foundation in skills gained during the first year, including understanding, speaking, reading and writing French aiming toward

the ACTFL intermediate-mid level. This course is designed to teach the student to communicate in a more sustained way in areas of personal interest and in everyday situations. Students will engage in and analyze various French and Francophone products, practices, and perspectives, as well as continue to develop their sense of personal and social responsibility through comparison and contrast of cultural perspectives. May be repeated up to 3 credits.

Learning Outcomes

1. Students can participate in conversations on familiar topics using sentences and series of sentences.
2. Students can engage in short social interactions in everyday situations by asking and answering a variety of questions. Students can usually say what they want to say about themselves and their everyday life.
3. Students can write on a wide variety of familiar topics using connected sentences.
4. Students can understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
5. Students can understand the main idea of conversations that they overhear.
6. Students can understand the main idea of texts related to everyday life and personal interests or studies.
7. Students can analyze beliefs, behaviors and cultural artifacts of the French-speaking world, and discuss the nature and value of French and Francophone products, practices, and perspectives.
8. Students will engage with social issues confronting the French-speaking world to continue to develop their sense of personal and social responsibility

FREN 2120G. French IV**3 Credits (3)**

In this fourth semester course, students will continue to broaden and refine skills gained during previous semesters, including understanding, speaking, reading and writing French aiming at the ACTFL intermediate-high level. This course is designed to teach the student to communicate in a more sustained way in situations that go beyond the everyday. Students will evaluate various French and Francophone products, practices, and create ways to demonstrate their sense of personal and social responsibility through participation in cultural interaction. May be repeated up to 3 credits.

Learning Outcomes

1. Students can participate with ease and confidence in conversations on familiar topics. They can usually describe people, places, and things. They can usually talk about events and experiences in various time frames.
2. Students can handle social interactions in everyday situations, sometimes even when there is an unexpected complication.
3. Students can write about topics related to school, work, and community in a generally organized way. They can write some simple paragraphs about events and experiences in various time frames.
4. Students can easily understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
5. Students can usually understand a few details of what I overhear in conversations, even when something unexpected is expressed. The student can sometimes follow what they hear about events and experiences in various time frames.
6. Students can understand the main idea of texts with topics related to everyday life, personal interests, and studies, as well as sometimes

follow stories and descriptions about events and experiences in various time frames.

- Students can analyze beliefs, behaviors and cultural artifacts of the French-speaking world, and recognize and discuss the representations and controversies of French and Francophone products, practices, and perspectives.
- Students demonstrate the essential skills of Critical Thinking, Personal and Social Responsibility, and Information and Digital Literacy, as per the New Mexico General Education Curriculum

FREN 2135G. Frontiers and Border Crossings in the French-Speaking World

3 Credits (3)

An exploration of frontiers and borders in the French-speaking world: geographical, linguistic, cultural, and symbolic

Learning Outcomes

- Articulate the diversity of boundaries (geographical, literal, gender, cultural, symbolic) and the role they play in negotiating cultural identities in the Francophone world.
- Critically analyze and communicate orally and in writing the nuances of frontiers, border crossings, and their expressions in the course texts.
- Describe, through the study of French and Francophone borders and frontiers, how cultural contexts and human practices influence individuals and societies.
- Apply the knowledge and skills gained through the study of boundaries in the francophone world to analogous settings and to students' personal academic goals.
- Demonstrate information literacy and technological skills in researching and presenting themes related to the readings and to the films screened
- Reflect on the effects of geographical, social, linguistic, and symbolic boundaries and crossings as expressed in the course content on individuals.

FREN 306. Topics in French Culture and Civilization

1-3 Credits (1-3)

Selected topics focusing on French culture and civilization. This course is linked to FLIP (Faculty-Led International Programs) when applicable. May be repeated up to 4 credits.

Learning Outcomes

- Recognize the arrondissements of Paris and describe their identifying characteristics.
- Navigate through Paris effectively and knowingly.
- Communicate effectively with native speakers of the language.
- Exemplify qualities of a good guest in a francophone culture.
- Talk knowledgeably about a topic related to Paris and Parisians.

FREN 315. French Grammar

3 Credits (3)

A thorough review of French grammar through the study of grammatical elements and the use of grammatical exercises. May be repeated up to 3 credits.

Learning Outcomes

- By the end of the course, students should be familiar with a review of grammar for all tenses, pronouns, adverbs, adjectives.
- Students should attain the intermediate high level in all areas (Listening, Speaking, Reading, Writing, Attitudinal / Cultural) on the American Council on the Teaching of Foreign Languages (ACTFL) scale.

- By the end of the course, students should be familiar with spoken speech at paragraph level.
- By the end of the course, students should be familiar with writing a narrative in the past and future tenses.

FREN 316. Writing for Expression and Communication

3 Credits (3)

Examination of writing in French for various purposes and development of interpersonal, presentational, and interpretative skills of written communication. May be repeated up to 6 credits.

Prerequisite: FREN 2120G or permission of the instructor.

Learning Outcomes

- To assimilate strategies to develop the discipline of writing.
- To develop critical thinking to self-correct and to refine one's skills.
- To develop familiarity with tools (dictionaries, style manuals, grammars) needed to improve one's writing.
- To develop awareness of grammatical and syntactical accuracy.
- To develop confidence in one's writing so to acquire professional skills.

FREN 325. Intermediate Conversation

3 Credits (3)

French conversation through intensive oral practice with emphasis on vocabulary acquisition and pronunciation. May be repeated up to 3 credits.

Learning Outcomes

- To enhance active vocabulary acquisition.
- To provide opportunities for the learner's speech to progress from short utterances to more connected, sustained speech.
- To address pronunciation issues.
- To enhance presentation skills.
- To improve auditory proficiency.
- Based on the scale established by the American Council on the Teaching of Foreign Languages (ACTFL), the performance goals for the course are: (A) Listening Intermediate High, (B) Speaking Intermediate High, (C) Reading Advanced Low, (D) Writing Intermediate High.

FREN 330. Business French

3 Credits (3)

An introduction to standard language within the corporate world in French-speaking countries. Students practice reading, writing, listening, speaking and expanding their vocabulary in professional fields related to business.

Learning Outcomes

- Use business and legal vocabulary.
- Demonstrate basic competency in French corporate etiquette.
- Interact in a culturally appropriate manner in common business situations, including meetings, sales calls, business letters, and e-mails.
- Demonstrate familiarity in using French in business-related situations.

FREN 352. French Phonetics

3 Credits (3)

Systematic description of modern French pronunciation. Corrective exercises for foreign learners. Formal study of spelling/pronunciation relationships. May be repeated up to 6 credits.

Learning Outcomes

1. By the end of the semester, students will have acquired a systematic, comprehensive review and enhancement of French pronunciation, and an elevated aural comprehension. Non-native speakers of French will be able to participate more easily in verbal communication; and the intermediate high level in all areas (Listening, Speaking, Reading, Writing, Attitudinal / Cultural) on the American Council on the Teaching of Foreign Languages (ACTFL) scale.
2. Students will be able to pronounce words, using the International Phonetic alphabet.
3. Students will be able to read short texts and be understood by non-sympathetic speakers of French.
4. Students will sharpen their aural skills in language recognition.

FREN 362. Contemporary French Culture**3 Credits (3)**

Institutions, lifestyles and popular attitudes in modern France.

Prerequisite: FREN 2120 or consent of instructor.

FREN 365V. Perspectives in French Culture**3 Credits (3)**

Examines components of French culture through literature, films and other sources. Taught in English. Does not satisfy Arts and Sciences second language requirement. Does not satisfy French major or minor requirements.

FREN 378. Studies in Francophone Cultures**3 Credits (3)**

Studies of representative Francophone cultures through their history, literature, music and films.

Prerequisite: FREN 2120 or consent of instructor.

FREN 380. Readings in French Literature**3 Credits (3)**

Selected readings in the literature of France, from the Middle Ages to the twentieth century. May be repeated up to 6 credits.

Prerequisite: FREN 2120G or permission of the instructor.

Learning Outcomes

1. To introduce students to readings from a variety of genres, from the Middle Ages to the twentieth century.
2. To teach students to make the transition from intermediate language courses to upper-level literature courses, not only by historical overview, but by offering reading strategies, including pre-reading and post-reading exercises.
3. To afford students plenty of opportunity to improve reading skills.
4. To enhance speaking and listening skills necessary for more in-depth study of literature.
5. To increase general literary, culture and attitudinal expertise for those intending to major/minor in French.

FREN 381. Survey of French Literature I**3 Credits (3)**

Literary movements, authors and selected texts of the Middle Ages through the eighteenth century.

Prerequisite: FREN 2120 or consent of instructor.

FREN 382. Survey of French Literature II**3 Credits (3)**

Literary movements, authors and selected texts of the nineteenth and twentieth centuries.

Prerequisite: FREN 2120 or consent of instructor.

FREN 386. Contemporary Women Writers in French**3 Credits (3)**

Exploration of literary texts by contemporary women writers in France and the Francophone world; emphasizes the cultural contexts that have defined women's relationship to writing. Selections will vary from year to year.

Prerequisite: FREN 2120 or consent of instructor.

FREN 410. Paris: History and Cultures**3 Credits (3)**

An in-depth look at history and culture of Paris from its origins to the present.

Prerequisite(s): FREN 212 or consent of instructor.

FREN 425. Advanced French Conversation**3 Credits (3)**

Mastery of spoken French language through discussion of personal readings and group work to develop vocabulary, syntactical and conversational skills. The class is conducted entirely in French.

Prerequisite(s): FREN 325 or consent of instructor.

FREN 449. French for Specific Purposes**3 Credits (3)**

Directed reading for students to satisfy language requirement for master's or doctoral programs. May be repeated up to 6 credits.

FREN 451. Special Topics in French**1-3 Credits**

Selected topics relating to the cultures or literatures of the countries where French is spoken will be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

FREN 453. Independent Studies in French**1-3 Credits**

Individualized, self-paced projects for advanced students. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

FREN 478. Studies in Francophone Cultures Around the World**3 Credits (3)**

Advanced studies of representative Francophone cultures through their history, literature, music and films.

Prerequisite: FREN 2120 or consent of instructor.

FREN 486. Advanced Contemporary Women Writers in French**3 Credits (3)**

Advanced study of literary texts by contemporary women writers in France and the Francophone world; emphasizes the cultural contexts that have defined women's relationship to writing. Selections will vary from year to year.

Prerequisite: FREN 2120 or consent of instructor.

FREN 649. Readings in Transborder and Global Human Dynamics**3 Credits (3)**

Individualized study of selected readings and topics in French and francophone transborder and global human dynamics. Admission to the PhD program in Transborder and Global Human Dynamics required for enrollment. May be repeated up to 9 credits.

Learning Outcomes

1. Identification of a topic for further study, involving French or francophone-related transborder issues.
2. Compilation of a biography to comprise the readings.
3. Demonstration of knowledge of contexts and issues raised by the readings.
4. Articulation of pertinence of readings to course of study.

FSTE-FOOD SCIENCE & TECHNOLOGY

FSTE 1120. ACES in the Hole Foods I

4 Credits (4)

Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products Restricted to Las Cruces campus only. Students enrolled in this class must possess A Food Handler Card

Learning Outcomes

1. Apply basic scientific principles, procedures, techniques and standards in the production of food products.
2. Apply principles of sanitation and safety to the production of food products.
3. Assist in the development and evaluation of new and/or existing food products made for human consumption.
4. Prepare a resume and portfolio

FSTE 2110G. Food Science I

4 Credits (3+2P)

The scientific study of the principles involved in the preparation and evaluation of foods. May be repeated up to 4 credits.

Learning Outcomes

1. Explain basic scientific principles involved in the preparation of high quality food products.
2. Utilize scientific inquiry in the experimental investigation of factors influencing the chemical, physical and sensory properties of food products.
3. Apply basic scientific principles, procedures, techniques and standards in the preparation of all types of high quality food products.
4. Use basic methods of quantitative analysis to critically evaluate quality characteristics of food.
5. Use sensory science techniques and terminology to critically evaluate acceptability and quality characteristics of food.
6. Describe high quality characteristics of a variety of food products using appropriate terminology.
7. Apply principles of sanitation and safety to food preparation.

FSTE 2120. ACES in the Hole Foods II

4 Credits (8P)

Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. Student must also have a Food Handler Card to enroll in this course.

Prerequisite(s): FSTE 1120.

Learning Outcomes

1. Apply basic scientific principles, procedures, techniques and standards in the production of food products.
2. Apply principles of sanitation and safety to the production of food products.
3. Assist in the development and evaluation of new and/or existing food products made for human consumption.
4. Prepare a resume and portfolio

FSTE 2130G. Survey of Food and Agricultural Issues

3 Credits (3)

Survey of food and agricultural issues, including: geography of food production and consumption; human-agricultural-natural resource

relations; agriculture in the United States and abroad; modern agribusiness; food safety; food, agriculture, and natural resources policy; ethical questions; role and impact of technology. Crosslisted with AEEC 2130G.

Learning Outcomes

1. Understand of global agriculture including production techniques used in various geographical regions, consumption trends, and political and social constraints.
2. Synthesis information about agricultural issues and make informed arguments
3. Articulate modern issues in agriculture
4. Write coherent arguments relative to personal beliefs regarding agricultural issues

FSTE 2996. Special Topics

1-4 Credits

Specific topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Learning Outcomes

1. Varies

FSTE 3110. Professional Development in Food Science

1 Credit (1)

Covers essential elements of career management including preparation for a successful internship. Students must have a Food Handler Card.

Restricted to: FSTE majors. Graded S/U.

Prerequisite: FSTE 2120.

Learning Outcomes

1. Describe their Jung Type.
2. Articulate their personal mission.
3. Identify their personal strengths and weaknesses.
4. Establish short and long term career goals.
5. Prepare an effective cover letter.
6. Develop a professional resume.
7. Understand the dos and don't's of interviewing.
8. Properly dress for interviewing.
9. Understand the factors to consider when deciding what job offer to accept. 1
10. Understand the objectives and requirements of the Food Science internship program.

FSTE 320. Food Microbiology

4 Credits (3+2P)

Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. May be repeated up to 4 credits. Prerequisite(s): (BIOL 2610G and BIOL 2610L), or (BIOL 2110G and BIOL 2110L)

FSTE 325. Food Analysis

3 Credits (2+2P)

Basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. May be repeated up to 3 credits.

Prerequisite(s): CHEM 1215G or consent of instructor.

FSTE 331. Food Preservation

3 Credits (2+2P)

Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. May be repeated up to 3 credits.

Prerequisite(s): FSTE 2110G.

FSTE 340. Cereal Technology**3 Credits (2+2P)**

This course provides students with an understanding of chemistry and technology of the cereal grains. The course is structured as a combination of theory, demonstrations, and practical laboratory exercises on the fundamentals of cereal processing. Students will learn about post-harvest processing and utilization of major cereal grains for food and feed, current industrial processes and practices, and the theoretical basis for these operations.

Learning Outcomes

1. Understand principles of cereal chemistry and processing.
2. Understand how cereal grains are produced, stored, marketed, and converted into food products.
3. Describe unit operations and procedures involved in the manufacture of cereal-based food and animal feed products.

FSTE 350. Dairy Technology**3 Credits (2+2P)**

This course provides general knowledge on dairy technology as well as on various processing technologies regarding the science behind a variety of dairy products. It is designed to give a thorough understanding of the composition and properties of milk, and of the physical and chemical changes occurring in milk during processing and storage. These products include fluid milk, fermented dairy products, concentrated and dried dairy products, butter, cream and various frozen dairy desserts. Principles and practices in assembling, receiving, processing, and packaging milk and dairy products, including beverage, frozen, cream, butter, concentrated and fractionated milks, dried milks, casein, and lactose.

Prerequisite: FSTE 2110G.

Learning Outcomes

1. To gain an understanding of dairy processing technologies, unit operation and production of dairy products and ingredients.
2. To understand the principles of processing of dairy products by integrating the concepts of chemistry, biochemistry, microbiology, nutrition, sensory properties, and engineering relevant to dairy processing operations.
3. To gain an ability to think critically on practical problems that occur in the dairy industry and to appreciate the many challenges in dairy research technology and dairy product development.
4. To engage in group discussion on current issues pertinent to culture dairy industry.

FSTE 375. Professional Development in Food Science**1 Credit (1)**

Covers essential elements of career management including preparation for a successful internship. Students must have a Food Handler Card. Restricted to: FSTE majors. Graded S/U.

Prerequisite: FSTE 2120.

Learning Outcomes

1. Describe their Jung Type.
2. Articulate their personal mission.
3. Identify their personal strengths and weaknesses.
4. Establish short and long term career goals.
5. Prepare an effective cover letter.
6. Develop a professional resume.
7. Understand the dos and don'ts of interviewing.
8. Properly dress for interviewing.
9. Understand the factors to consider when deciding what job offer to accept. 1

10. Understand the objectives and requirements of the Food Science internship program.

FSTE 4110. Food Microbiology**4 Credits (3+2P)**

Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. May be repeated up to 4 credits. Prerequisite(s): (BIOL 2610G and BIOL 2610L), or (BIOL 2110G and BIOL 2110L)

FSTE 4120. Food Chemistry**3 Credits (3)**

Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing, and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods.

Prerequisites: CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of instructor.

FSTE 4130. Food Preservation**3 Credits (2+2P)**

Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. May be repeated up to 3 credits.

Prerequisite(s): FSTE 2110G.

FSTE 4140. Food Analysis**3 Credits (2+2P)**

Basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. May be repeated up to 3 credits.

Prerequisite(s): CHEM 1215G or consent of instructor.

FSTE 4150. Food Safety**3 Credits (3)**

Provide students' knowledge on good manufacturing practices and prerequisite programs, conduct hazard analysis and determine preventive controls, define process, food allergen, sanitation and supply-chain preventive controls and discuss verification validation, recall and recordkeeping requirements with training and educational opportunities related to current best practices and guidance, and future regulatory requirements by establishing the Produce Safety Alliance. Students participate in a Mock Audit. Participants will receive an official FSPCA Preventive Controls Qualified Individual certificate issues by AFDO after attending this training program.

Prerequisite(s): FSTE 4110 or BIOL 311, or consent of instructor.

FSTE 421. Food Chemistry**3 Credits (3)**

Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing, and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods.

Prerequisites: CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of instructor.

FSTE 4210. Cereal Technology**3 Credits (2+2P)**

This course provides students with an understanding of chemistry and technology of the cereal grains. The course is structured as a combination of theory, demonstrations, and practical laboratory exercises on the fundamentals of cereal processing. Students will learn about post-harvest processing and utilization of major cereal grains for food and feed, current industrial processes and practices, and the theoretical basis for these operations.

Learning Outcomes

1. Understand principles of cereal chemistry and processing.
2. Understand how cereal grains are produced, stored, marketed, and converted into food products.
3. Describe unit operations and procedures involved in the manufacture of cereal-based food and animal feed products.

FSTE 4220. Dairy Technology**3 Credits (2+2P)**

This course provides general knowledge on dairy technology as well as on various processing technologies regarding the science behind a variety of dairy products. It is designed to give a thorough understanding of the composition and properties of milk, and of the physical and chemical changes occurring in milk during processing and storage. These products include fluid milk, fermented dairy products, concentrated and dried dairy products, butter, cream and various frozen dairy desserts. Principles and practices in assembling, receiving, processing, and packaging milk and dairy products, including beverage, frozen, cream, butter, concentrated and fractionated milks, dried milks, casein, and lactose.

Prerequisite: FSTE 2110G.

Learning Outcomes

1. To gain an understanding of dairy processing technologies, unit operation and production of dairy products and ingredients.
2. To understand the principles of processing of dairy products by integrating the concepts of chemistry, biochemistry, microbiology, nutrition, sensory properties, and engineering relevant to dairy processing operations.
3. To gain an ability to think critically on practical problems that occur in the dairy industry and to appreciate the many challenges in dairy research technology and dairy product development.
4. To engage in group discussion on current issues pertinent to culture dairy industry.

FSTE 423. Food Processing Technologies**4 Credits (3+2P)**

Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting.

Prerequisite(s): FSTE 328.

FSTE 4230. Food Processing Technologies**4 Credits (3+2P)**

Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting.

FSTE 4240. Processed Meats**3 Credits (2+2P)**

This course provides students with an understanding of physical, chemical and functional characteristics of meat raw materials. Modern meat processing industry and its use of science and technology. The fabrication, processing, preservation, sanitation, food safety, ethnic involvement, and utilization of manufactured and processed meat. Regulatory compliance and quality assurance in commercial processed meat operations.

Learning Outcomes

1. The theory and chemistry of meat processing.
2. Processing techniques and basic formulations of different categories of processed meats.
3. The effect of type and composition of raw materials and added ingredients on processed meat quality and safety.
4. To evaluate products for consumer and analytical quality and composition.
5. To evaluate and assess defective products and propose processing/ingredient solutions.

FSTE 425. Sensory Evaluation of Foods and Product Development**3 Credits (2+2P)**

Application of affective sensory tests, chemical, physical, and experimental methods to the development and evaluation of a food product. Sensory test methods and procedures used to evaluate the flavor, color and texture of foods. Relationships between sensory and instrumental measurements quality parameters. The course will present the parametric and non-parametric tests that are used in sensory evaluation. May be repeated up to 3 credits.

Prerequisite: FSTE 2110G and (A ST 311 or MATH 1350G).

Learning Outcomes

1. Describe the chemical senses and the receptors that mediate the basic taste modalities.
2. Match sensory tests to research questions and to use the suitable statistical tests.
3. Design and develop a food product and conduct a basic research project.
4. Communicate research results using written, oral, and visual communication techniques.

FSTE 4250. Sensory Evaluation of Foods and Product Development**3 Credits (2+2P)**

Application of affective sensory tests, chemical, physical, and experimental methods to the development and evaluation of a food product. Sensory test methods and procedures used to evaluate the flavor, color and texture of foods. Relationships between sensory and instrumental measurements quality parameters. The course will present the parametric and non-parametric tests that are used in sensory evaluation. May be repeated up to 3 credits.

Prerequisite: FSTE 2110G and (A ST 311 or MATH 1350G).

Learning Outcomes

1. Describe the chemical senses and the receptors that mediate the basic taste modalities.
2. Match sensory tests to research questions and to use the suitable statistical tests.
3. Design and develop a food product and conduct a basic research project.
4. Communicate research results using written, oral, and visual communication techniques.

FSTE 430. Brewing Science & Engineering**3 Credits (3)**

Details of beer production, fermentation science, brewery operation, and process design & economics. Engineering considerations including process safety, fermentation kinetics, unit operations, and economics of scale. Beer styles, recipe formulation, product quantification for tax purposes, and brew analytical methods will also be discussed. Students must be 21 years old to enroll. Crosslisted with: FSTE 430.

Learning Outcomes

1. To provide the undergraduate student with a broad perspective of beer and the brewing industry as well as technical knowledge about the brewing process.

FSTE 450. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits towards a degree. Consent of instructor required.

FSTE 475. ACES Foods at NMSU-Experiential Learning**1 Credit (2-8P)**

Professional work experience for FSTE majors only.

Prerequisite: FSTE 375.

Learning Outcomes

1. Students will collect a minimum of four hundred hours.

FSTE 476. FSTE Internship Seminar**1 Credit (1)**

A case based approach to analyzing internship experiences. Students will write case studies about specific business issues they countered during FSTE 475 (Internship) and analyze them. Restricted to Food Science Technology majors.

Prerequisite: FSTE 475.

Learning Outcomes

1. Analyze business practices as experienced during an internship.
2. Deliver a presentation effectively communicating operations of ACES Foods at NMSU.
3. Assess use of state and federal food regulation agencies within ACES Foods at NMSU.
4. Present in written form the history, business operations, job descriptions, organizational structure, and human resource policies of ACES Foods at NMSU.

FSTE 480. Food Safety**3 Credits (3)**

Provide students' knowledge on good manufacturing practices and prerequisite programs, conduct hazard analysis and determine preventive controls, define process, food allergen, sanitation and supply-chain preventive controls and discuss verification validation, recall and recordkeeping requirements with training and educational opportunities related to current best practices and guidance, and future regulatory requirements by establishing the Produce Safety Alliance. Students participate in a Mock Audit. Participants will receive an official FSPCA Preventive Controls Qualified Individual certificate issues by AFDO after attending this training program.

Prerequisite(s): FSTE 320 or BIOL 311, or consent of instructor.

FSTE 4815. FSTE Internship Seminar**1 Credit (1)**

A case based approach to analyzing internship experiences. Students will write case studies about specific business issues they countered during FSTE 4998 (Internship) and analyze them. Restricted to Food Science Technology majors.

Prerequisite: FSTE 4998.

Learning Outcomes

1. Analyze business practices as experienced during an internship.
2. Deliver a presentation effectively communicating operations of ACES Foods at NMSU.
3. Assess use of state and federal food regulation agencies within ACES Foods at NMSU.

4. Present in written form the history, business operations, job descriptions, organizational structure, and human resource policies of ACES Foods at NMSU.

FSTE 490. Processed Meats**3 Credits (2+2P)**

This course provides students with an understanding of physical, chemical and functional characteristics of meat raw materials. Modern meat processing industry and its use of science and technology. The fabrication, processing, preservation, sanitation, food safety, ethnic involvement, and utilization of manufactured and processed meat. Regulatory compliance and quality assurance in commercial processed meat operations.

Learning Outcomes

1. The theory and chemistry of meat processing.
2. Processing techniques and basic formulations of different categories of processed meats.
3. The effect of type and composition of raw materials and added ingredients on processed meat quality and safety.
4. To evaluate products for consumer and analytical quality and composition.
5. To evaluate and assess defective products and propose processing/ingredient solutions.

FSTE 492. Special Problems**1-4 Credits**

Individual research study in a selected subject of Family and Consumer Sciences. Maximum of 4 credits per semester and a grand total of 8 credits towards a degree. Consent of instructor required.

FSTE 4996. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits towards a degree. Consent of instructor required.

FSTE 4997. Special Problems**1-4 Credits**

Individual research study in a selected subject of Family and Consumer Sciences. Maximum of 4 credits per semester and a grand total of 8 credits towards a degree. Consent of instructor required.

FSTE 4998. ACES Foods at NMSU-Experiential Learning**1 Credit (2-8P)**

Professional work experience for FSTE majors only.

Prerequisite: FSTE 3110.

Learning Outcomes

1. Students will collect a minimum of four hundred hours.

FSTE 5110. Food Microbiology**3 Credits (2+3P)**

Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. Additional work required at the graduate level.

Prerequisites: BIOL 2610G/2610L, or BIOL 2110G/2110L, or consent of instructor.

FSTE 5120. Food Chemistry**3 Credits (3)**

Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing and storage of food products and basic techniques used to

evaluate chemical and physiochemical properties of foods. Additional work required at the graduate level.

Prerequisites: CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of instructor.

FSTE 5130. Food Preservation

3 Credits (3)

Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. Same as FSTE 4130 with additional work required at the graduate level.

FSTE 5140. Food Analysis

3 Credits (2+3P)

Covers basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. Additional work required at the graduate level.

Prerequisite(s): CHEM 1215G or consent of instructor.

FSTE 5150. Rumen Microbiology (so)

3 Credits (3)

Same as ANSC 560.

FSTE 520. Graduate Study in Food Microbiology

3 Credits (2+3P)

Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. Additional work required at the graduate level.

Prerequisites: BIOL 2610G/2610L, or BIOL 2110G/2110L, or consent of instructor.

FSTE 521. Graduate Study in Food Chemistry

3 Credits (3)

Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods. Additional work required at the graduate level.

Prerequisites: CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of instructor.

FSTE 5210. Cereal Technology

3 Credits (2+2P)

This course provides students with an understanding of chemistry and technology of the cereal grains. The course is structured as a combination of theory, demonstrations, and practical laboratory exercises on the fundamentals of cereal processing. Students will learn about post-harvest processing and utilization of major cereal grains for food and feed, current industrial processes and practices, and the theoretical basis for these operations.

Learning Outcomes

1. Understand principles of cereal chemistry and processing.
2. Understand how cereal grains are produced, stored, marketed, and converted into food products.
3. Describe unit operations and procedures involved in the manufacture of cereal-based food and animal feed products.

FSTE 523. Food Processing Technologies

4 Credits (3+2P)

Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control.

Application of principles to processing food in a laboratory setting.

Additional work beyond that for FSTE 423 required at the graduate level.

Prerequisite(s): FSTE 528.

FSTE 5230. Food Processing Technologies

4 Credits (3+2P)

Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting. Additional work beyond that for FSTE 4230 required at the graduate level.

FSTE 524. Sensory Evaluation of Foods

3 Credits (2+3P)

Principles and procedures involved in the sensory evaluation of foods. Physiological, psychological and environmental factors affecting the evaluation of sensory properties. Analysis and interpretation of sensory data.

Prerequisite(s): FSTE 2110G and A ST 311 or MATH 1350G.

FSTE 525. Graduate Study in Food Analysis

3 Credits (2+3P)

Covers basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. Additional work required at the graduate level.

Prerequisite(s): CHEM 1215G or consent of instructor.

FSTE 5250. Sensory Evaluation of Foods

3 Credits (2+3P)

Principles and procedures involved in the sensory evaluation of foods. Physiological, psychological and environmental factors affecting the evaluation of sensory properties. Analysis and interpretation of sensory data.

Prerequisite(s): FSTE 2110G and A ST 311 or MATH 1350G.

FSTE 531. Food Preservation

3 Credits (3)

Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. Same as FSTE 331 with additional work required at the graduate level.

FSTE 5310. Designing and Brewing Great Beers of the World

3 Credits (2+2P)

The science and technology of brewing unit operations and the ingredients used in beer brewing. That knowledge is then applied to designing and brewing classic world beer styles. Styles investigated change every semester but typically include India Pale Ale, Pale Ale, Stout, Porter, Hefeweisen, Scottish Ale, and Black IPA. Comprehensive evaluation of the product relative to style guidelines completes the design-brew-evaluate cycle. Students must be at least 21 years of age on the first day of class.

FSTE 532. Designing and Brewing Great Beers of the World

3 Credits (2+2P)

The science and technology of brewing unit operations and the ingredients used in beer brewing. That knowledge is then applied to designing and brewing classic world beer styles. Styles investigated change every semester but typically include India Pale Ale, Pale Ale, Stout, Porter, Hefeweisen, Scottish Ale, and Black IPA. Comprehensive evaluation of the product relative to style guidelines completes the design-brew-evaluate cycle. Students must be at least 21 years of age on the first day of class.

FSTE 540. Cereal Technology

3 Credits (2+2P)

This course provides students with an understanding of chemistry and technology of the cereal grains. The course is structured as a combination of theory, demonstrations, and practical laboratory exercises on the fundamentals of cereal processing. Students will learn about post-harvest processing and utilization of major cereal grains for food and feed, current industrial processes and practices, and the theoretical basis for these operations.

Learning Outcomes

1. Understand principles of cereal chemistry and processing.
2. Understand how cereal grains are produced, stored, marketed, and converted into food products.
3. Describe unit operations and procedures involved in the manufacture of cereal-based food and animal feed products.

FSTE 560. Rumen Microbiology (so) **3 Credits (3)**

Same as ANSC 560.

FSTE 598. Special Research Programs **1-4 Credits**

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits towards a degree. Consent of instructor required.

FSTE 5997. Special Research Programs **1-4 Credits**

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits towards a degree. Consent of instructor required.

FSTE 600. Special Research Program **1-6 Credits (1-6)**

Special research for doctoral students May be repeated up to 6 credits. Consent of Instructor required.
Prerequisite(s): Consent of instructor.

FSTE 601. Cooperative Extension Service Field Experience **1-3 Credits (1-3)**

This course will provide students with knowledge and experience in community outreach through the cooperative extension service. This course is required for students pursuing a Ph.D. in FSHN. Students will work collaboratively with extension faculty on applied projects. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: FSHN majors.

FSTE 605. Doctoral Seminar **1 Credit (1)**

Current topics and research in Food Science and Human Nutrition. Course will include experts from the field as guest speakers. Students will have the opportunity to present their doctoral proposals and/or research findings.

FSTE 6910. Doctoral Seminar **1 Credit (1)**

Current topics and research in Food Science and Human Nutrition. Course will include experts from the field as guest speakers. Students will have the opportunity to present their doctoral proposals and/or research findings.

FSTE 698. Doctoral Reserach **1-6 Credits (1-6)**

Research May be repeated up to 6 credits. Consent of Instructor required.

FSTE 6991. Doctoral Research **1-6 Credits (1-6)**

Research May be repeated up to 6 credits. Consent of Instructor required.

FSTE 6997. Special Research Program **1-6 Credits (1-6)**

Special research for doctoral students May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

FSTE 6998. Cooperative Extension Service Field Experience **1-3 Credits (1-3)**

This course will provide students with knowledge and experience in community outreach through the cooperative extension service. This course is required for students pursuing a Ph.D. in FSHN. Students will work collaboratively with extension faculty on applied projects. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: FSHN majors.

FSTE 700. Doctoral Dissertation **1-12 Credits (1-12)**

Dissertation May be repeated up to 18 credits. Consent of Instructor required.

Prerequisite(s): Passed the qualifying exam and comprehensive exam.

FSTE 7000. Doctoral Dissertation **1-12 Credits (1-12)**

Dissertation May be repeated up to 18 credits. Consent of Instructor required.

Prerequisite(s): Passed the qualifying exam and comprehensive exam.

FWCE-FISH,WILDLF,CONSERV ECOL

FWCE 1110G. Introduction to Natural Resources Management **4 Credits (3+2P)**

This class covers historical and current issues affecting the management of renewable natural resources with an emphasis on water, soil, rangeland, forest, fish, and wildlife resources. An emphasis is placed on the scientific method and critical thinking. In the laboratory students collect and analyze field data on topics covered above and write up each unit as a laboratory report.

Learning Outcomes

1. Students should be able to recall, describe and explain the laws, treaties and acts that have led to our current management of natural resources in the United States.
2. Students should recognize or explain what ecological processes are, the importance of ecological processes in maintaining ecosystem function and how human activities change ecological processes and the ecosystems dependent on those processes.
3. In each of the six course and lab modules (water quality, soils, forestry, rangelands, wildlife and fisheries) students should be able to recall, describe and explain basic terminology, fundamental ecological principles and management techniques and challenges.
4. Students should be able to interpret data presented graphically and in tables from class exercises and lectures.
5. Students should be able to solve problems scientifically through field data collection, laboratory analyses and the use of quantitative methods (basic statistics, tables and graphs).
6. Students should be able to communicate results from laboratory exercises (6 lab modules) orally and in writing.
7. Students will learn to apply scientific thinking to real world problems through in class discussion and short essays based on material from case studies presented in class and guest speakers.

FWCE 1120. Contemporary Issues in Wildlife and Natural Resources Management **3 Credits (3)**

Ecological, socioeconomic, and political issues surrounding the management of our natural resources with an emphasis on fish and wildlife resources.

FWCE 2110. Principles of Fish and Wildlife Management

3 Credits (3)

Basic principles of fish and wildlife management including history, ecology, economics, and policy. Emphasis on wildlife and fisheries. Uses an ecosystem approach integrating living and nonliving resources.

Prerequisite(s): FWCE 1110G.

Learning Outcomes

1. The goal of this course is to provide a firm foundation in the principles of wildlife and fisheries management.
2. Material will include a background in biological principles geared towards animal populations, characteristics and management of the habitats utilized by fish and wildlife, techniques used to study and manage animals and their habitats, and aspects of the human dimension involved in wildlife and fisheries issues.
3. This course serves as a core requirement for degrees offered in the Department of Fish, Wildlife and Conservation Ecology and as a required course for degrees in other departments such as Rangeland Resources.

FWCE 301. Wildlife Ecology

3 Credits (3)

General ecological theory with emphasis on concepts including biogeography, species interactions, population dynamics and disease ecology as they relate to the management and conservation of vertebrates. **Prerequisite(s):** BIOL 2610G

FWCE 330. Natural History of the Vertebrates

4 Credits (3+3P)

Evolution, ecology, and diversity of vertebrates. Topics include comparative anatomy and physiology, biogeography, community ecology, behavior, and conservation. Laboratory emphasizes identification of local taxa. Field trips may be required.

Prerequisite(s)/Corequisite(s): BIOL 322. **Prerequisite(s):** BIOL 2610G and BIOL 2610L.

FWCE 355. Wildlife Techniques and Analysis

4 Credits (3+2P)

FWCE 355 will provide a broad overview of basic skills and techniques that are commonly used by biologists in performing management, research, and reporting functions in natural resource fields with an emphasis on wildlife techniques, data processing and analysis.

Prerequisite(s): FWCE 301, A ST 311.

FWCE 357. Fisheries Management and Analysis

4 Credits (3+2P)

Lectures and laboratory exercises provide a broad overview of basic skills and techniques used for assessing and managing fish populations.

Prerequisite(s): FWCE 301 and A ST 311.

FWCE 391. Internship

1-3 Credits (1-3)

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): Consent of instructor.

FWCE 393. Professional Experience and Communication

3 Credits (3)

Professional work experience under the supervision of employer and/or a faculty member. Written report and presentation is required.

Prerequisite(s)/Corequisite(s): FWCE 2110.

FWCE 402. Seminar in Natural Resource Management

1 Credit (1)

Review and discussion of current topics in natural resource management.

Prerequisite(s): Senior standing or above.

FWCE 409. Introduction to Population Ecology

3 Credits (3)

Quantitative analysis of vital statistics and mechanisms affecting dynamics of wild populations. Patterns of growth, age structure, survival, and natality. Population theories and life tables.

Prerequisite(s): MATH 1430G and FWCE 2110.

FWCE 430. Avian Field Ecology

4 Credits (3+3P)

Principles of avian ecology and management with an emphasis on taxonomy, physiology, behavior and field studies. Includes weekly field trips focusing on identification and behavior of Southwest birds.

Prerequisite(s)/Corequisite(s): FWCE 330.

FWCE 431. Mammalogy

4 Credits (3+2P)

Classification, identification, anatomy, physiology, life history, and ecology of mammals. Field trips required.

Prerequisite(s): FWCE 2110 and FWCE 330.

FWCE 432. Environmental Biology of Fishes

4 Credits (3+3P)

What makes a fish, a fish? Mechanisms of circulation, gas exchange, osmotic and ionic regulation, swimming, migration, reproduction, and chemoreception will be covered in this class. Taught with FWCE 532.

Prerequisite(s): CHEM 1215G and senior standing.

FWCE 434. Aquatic Contaminants and Toxicology

4 Credits (3+3P)

Basic principles and methodologies of aquatic toxicity testing; routes of exposure and modes of action; environmental legislation and ecological risk assessment. Taught with FWCE 534. Crosslisted with: ENVS 434.

Prerequisite(s): CHEM 1215G and senior standing.

FWCE 437. Wildlife Damage Management

3 Credits (3)

Introduction to basic need and appropriate methods for resolving human-wildlife conflicts and management of animal damage. Socioeconomic, ecological, and political factors. Field trips required. Taught with FWCE 537.

Prerequisite(s): BIOL 2610G, FWCE 2110, FWCE 301, FWCE 409.

FWCE 447. Wildlife Law and Policy

3 Credits (3)

Introduction to state and federal laws and policies for wildlife and the historical context for their development. Taught with FWCE 547.

Prerequisite(s): Junior or Senior level standing.

FWCE 448. Problems

1-3 Credits (1-3)

Individual investigations in fishery or wildlife science. Maximum 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): 18 credits in WLSC.

FWCE 450. Special Topics

1-4 Credits (1-4)

Specific subjects and credits as announced in the Schedule of Classes. Maximum of 4 credits per semester. May be repeated up to 9 credits.

Consent of Instructor required.

FWCE 457. Ecological Biometry**3 Credits (3)**

Use of ecological data to test scientific hypotheses, stochastic and statistical models for environmental data, data visualization, likelihood-based and information-based model selection. Emphasis on open-source software tools.

Prerequisite(s): MATH 1430G or MATH 1511G, A ST 311, FWCE 301.

FWCE 459. Aquatic Ecology**4 Credits (4)**

Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Taught with FWCE 559.

Prerequisite(s): FWCE 301 or BIOL 301, CHEM 1225G, MATH 1430G.

FWCE 464. Management of Aquatic and Terrestrial Ecosystems**3 Credits (3)**

Principles and methods for managing aquatic and terrestrial ecosystems and their fish and wildlife resources. Emphasis on quantitative techniques, data collection and analysis for management of systems at a landscape spatial scale.

Prerequisite: (BIOL 301 or FWCE 301) FWCE 330, A ST 311.

Learning Outcomes

1. Demonstrate an understanding of The North American Model and the Public Trust Doctrine.
2. Demonstrate an understanding of the funding mechanisms underlying fish and wildlife management.
3. Demonstrate an understanding of the policies and laws germane to fish and wildlife management.
4. Demonstrate an understanding of the constraints facing modern fish and wildlife management.
5. Exhibit effective written and verbal communication skills.

FWCE 467. Herpetology**4 Credits (4)**

Systematics, taxonomy, ecology, behavior, and conservation of amphibians and reptiles. Field trips required. Taught with FWCE 567.

Prerequisite(s): FWCE 330.

FWCE 471. GIS for Natural Resource Scientists**4 Credits (4)**

Practical GIS class for students with little or no GIS experience. Class focuses on learning to use industry-standard software and applications in natural resource management. Taught with FWCE 571.

FWCE 472. Wildlife Museum Internship**1-4 Credits (1-4)**

Substantial directed work experience in various functions of the wildlife natural history museum developed by the student in consultation with the faculty curator. Internships may involve aspects of collection development and management, public education programs, or other related museum activities. Internship must be approved by the faculty curator. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): BIOL 2610G and BIOL 2610L.

FWCE 482. Ichthyology**4 Credits (3+2P)**

Classification, morphology, identification, life history, and ecology of fishes.

Prerequisite(s): FWCE 330 or consent of instructor.

FWCE 509. Population Ecology (s)**3 Credits (2+2P)**

Quantitative analysis of vital statistics and mechanisms promoting stability in wild populations. Theory and application of life tables and population models.

FWCE 515. Graduate Seminar**1 Credit (1)**

Current topics.

FWCE 530. Large Mammal Ecology, Conservation and Management**3 Credits (3)**

This course will cover aspects of large mammal ecology, management and conservation. Will include aspects of foraging ecology, resource and habitat selection, competition and resource partitioning, predation and population dynamics. Taught with FWCE 436.

FWCE 532. Environmental Biology of Fishes**4 Credits (3+3P)**

What makes a fish, a fish? Mechanisms of circulation, gas exchange, osmotic and ionic regulation, swimming, migration, reproduction, and chemoreception will be covered in this class. Taught with FWCE 432; however, students are responsible for all requirements in FWCE 432, plus additional assignments.

FWCE 535. Special Topics**1-4 Credits (1-4)**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

FWCE 537. Wildlife Damage Management**3 Credits (3)**

Introduction to basic need and appropriate methods for resolving human-wildlife conflicts and management of animal damage. Socioeconomic, ecological, and political factors. Field trips required. Taught with FWCE 437. Students are responsible for all requirements for FWCE 437 plus additional work. Prerequisite(s): BIOL 2610G, FWCE 2110, FWCE 301 and FWCE 409

FWCE 540. Wildlife Habitat Relationships**4 Credits (3+1P)**

The study of wildlife-habitat relationships primarily seeks to describe how the distribution and abundance of resources used for food, cover and security, and constraints on the use of these resources influence the distribution of animals. This course will cover aspects of animal behavior related to how animals select habitat, theoretical models of habitat selection, the influence of inter- and intra-specific interactions on habitat selection, habitat quality, study designs for wildlife-habitat studies, modeling habitat selection and data analyses.

Learning Outcomes

1. The addition of the laboratory component to the course will provide graduate students with hands on experience implementing current statistical approaches for modeling wildlife habitat relationships including selection ratios, resource selection functions, resource utilization functions, step-selection functions and other approaches.

FWCE 547. Wildlife Law and Policy**3 Credits (3)**

Introduction to state and federal laws and policies for wildlife and the historical context for their development. Taught with FWCE 447.

FWCE 548. Graduate Problems**1-3 Credits (1-3)**

Individual studies in fishery and wildlife sciences. Maximum of 3 credits per semester. No more than 6 credits of this course and FWCE 598, combined, toward a degree. May be repeated up to 6 credits.

FWCE 558. Nonthesis Project**1-6 Credits (1-6)**

Independent study to satisfy nonthesis project requirement. Maximum of 6 credits toward degree. Available only to nonthesis students. May be repeated up to 6 credits.

FWCE 559. Aquatic Ecology

4 Credits (4)

Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Taught with FWCE 459.

Prerequisite(s): FWCE 301 or BIOL 301, CHEM 1225G, MATH 1430G.

FWCE 567. Herpetology

4 Credits (4)

Systematics, taxonomy, ecology, behavior and conservation of amphibians and reptiles. Field trips required. Taught with FWCE 467.

FWCE 571. GIS for Natural Resource Scientists

4 Credits (4)

Practical GIS class for students with little or no GIS experience. Class focuses on learning to use industry-standard software and applications in natural resource management. Taught with FWCE 471.

FWCE 582. Ichthyology

4 Credits (4)

Classification, morphology, identification, life history, and ecology of fishes. Taught with FWCE 482.

FWCE 598. Special Research Programs

1-3 Credits (1-3)

Individual investigations, either analytical or experimental. Maximum of 3 credits per semester. No more than 6 credits of this course and FWCE 548, combined, toward a degree. Not available to students in the nonthesis program. May be repeated up to 6 credits.

FWCE 599. Master's Thesis

1-9 Credits (1-9)

Thesis. May be repeated up to 30 credits. Thesis/Dissertation Grading.

FYEX-FIRST YEAR EXPERIENCE

FYEX 1110. First-year Seminar

1-3 Credits

This course is designed to help students achieve greater success in college and in life. Students will learn many proven strategies for creating greater academic, professional, and personal success. Topics may include career exploration, time management, study and test-taking strategies to adapt to different learning environments, interpersonal relationships, wellness management, financial literacy, and campus and community resources.

Learning Outcomes

1. Recognize the ways in which s/he is responsible for her/his own experience in education.
2. Identify, locate, and utilize available campus resources essential for academic success.
3. Create long- and short-term goals associated with student success and career planning.
4. Implement time management techniques to organize the semester's workload.
5. Develop strategies to use individual strengths to succeed and reflect upon coursework and course progress in multiple classes to alter academic behaviors and create deeper meaning and learning.

6. Apply the skills essential for analyzing and solving problems in her/his academic, professional, and personal life, which may include financial literacy and wellness management.
7. Develop and apply essential skills such as reading, taking notes, studying, memorizing, taking tests, and self-management skills necessary for college success.
8. Identify and revise self-defeating patterns of behavior, thought, and emotion as well as unconscious limiting beliefs.
9. Develop supportive relationships with members of the campus community.
10. Develop essential reading, writing, and critical thinking skills used in study and in research.
11. Demonstrate understanding of how to use the computer for academic purposes, including learning management systems, email communications, research databases, degree audit, and other online resources.

FYEX 1112. The Freshman Year Experience

3 Credits (3)

An introduction to the university and its resources; emphasis on development of academic and personal skills that enable freshmen to become successful learners. Restricted to: Main campus only.

Prerequisite(s): Freshman Standing Only.

Learning Outcomes

1. Appreciate the goals, methods, and values of higher education
2. Expand intellectual development and self-direction
3. Establish a faculty mentor relationship
4. Enhance knowledge and practice of collaborative learning principles
5. Establish a familiarity with campus resources and student services
6. Develop public speaking, critical thinking, library research, and study strategies
7. Evaluate talents and interest in relation to selecting a major and career planning
8. Examine and clarify values
9. Acknowledge and enhance respect for diversity

FYEX 1116. Managing Your Money

1 Credit (1)

Principles and strategies for effective money management. Includes financial goal setting, both short and long term. Explores the relationship between career and income earning potential. Explores issues of credit and debt management and prevention of identity theft.

Learning Outcomes

1. Demonstrate understanding of the psychology of money and how it relates to personal financial decisions
2. Create realistic short- and long-term financial goals and a personal budget
3. Comprehend and manage college finances, including types of financial aid
4. Appreciate the importance of the Free Application for Federal Student Aid (FAFSA)
5. Describe the financial aspects of career development and how they apply to their own lives, including resume, taxes, salary, benefits
6. Apply principles of student loan management
7. Demonstrate use of credit reports in the prevention identity theft
8. Identify essential elements of smart spending and borrowing
9. Recognize debt and repayment costs
10. Explain the basics of saving and planning for the financial future

11. Create focused, developed, clear discussion posts and other written work for this class

FYEX 1117. Financial Literacy Money Matters

2 Credits (2)

This course will cover a variety of financial literacy topics ranging from budgeting to student loan repayment. This course is designed to assist students in becoming more financially literate. Restricted to Las Cruces campus only.

Learning Outcomes

1. Master effective strategies and other skills related to financial literacy
2. Establish a familiarity with campus resources designed to foster financial literacy and wellness
3. Exhibit intellectual development and self-direction in relation to financial literacy and wellness
4. Identify financial literacy skills which best support individual financial well-being
5. Demonstrate skills and knowledge that allows the student to make informed and effective decisions with all of their financial resources

FYEX 1131. Personal Learning Skills I

1-3 Credits

Individualized programs for self-improvement in skill areas necessary for academic success in the university environment. Each course to bear an appropriate subtitle. May be repeated up to 3 credits. Graded S/U.

Learning Outcomes

1. Synthesize the importance of critical thinking through self-reflection and self-exploration
2. Analyze and apply critical thinking skills using the eight intellectual standards
3. Describe the common barriers to critical thinking and construct problem solving strategies
4. Evaluate information and knowledge to determine misinformation and inaccuracies
5. Demonstrate information literacy by recognizing when information is needed and being able to efficiently locate, accurately evaluate, effectively use, and clearly communicate the information in various formats and mediums

FYEX 1132. Academic and Personal Effectiveness

2 Credits (2)

Learn academic self-analysis skills through the application of study and learning techniques to current course demands. Exposure to a variety of topics which enhance university and life-long learning.

Learning Outcomes

1. Students will demonstrate mastery of course objectives in time management, stress management, test taking, and other skills through completion of activities, quizzes, discussions, and more.
2. Students will be able to identify NMSU campus resources, including their services, location, and contact information.
3. Students will exhibit intellectual development and an improved self-direction through participation in the course.
4. Students will be able to identify and adopt those management skills which best support academic and career choices.

FYEX 1133. Academic Reading and Study Skills

1-4 Credits

Introduction to and practice with strategies for effective reading and studying at the college level. Provides laboratory.

Learning Outcomes

1. Use reading strategies to synthesize texts
2. Identify rhetorical elements of texts
3. Identify and apply different study methods
4. Recognize the role of student support services for student success
5. Identify and practice effective time management skills
6. Demonstrate proficient computer skills
7. Write an effective summary

FYEX 1134. Speed Reading

1 Credit (1)

Introduction to strategies and techniques for increasing reading rate and comprehension related to academic areas.

Learning Outcomes

1. Demonstrate an understanding of speed reading strategies and eye movement drills
2. Expand vocabulary and reading comprehension
3. Improve reading rates and develop reading techniques
4. Demonstrate an understanding of skimming techniques and scanning strategies

FYEX 1140. Career Exploration

1 Credit (1)

Survey of careers possible with community college associate degrees. Information on how to make a career choice.

Learning Outcomes

1. Desired career and lifestyle
2. Areas of interest
3. Skills and abilities
4. Personal values
5. DACC programs that match the student's interests, abilities, and values
6. Three careers that match the student's interests, abilities, values, and personality

FYEX 1160. Tutorial

1-3 Credits

Development of specific skills required for college courses, such as note-taking, listening, and test-taking. To be taken in conjunction with a regular designated college course.

Learning Outcomes

1. Demonstrate the ability to organize their time in order to improve study habits.
2. Apply pre-reading strategies to improve reading concentration and comprehension.
3. Demonstrate basic understanding of the systems of the body.
4. Identify techniques to improve personal concentration and comprehension skills.
5. Identify and demonstrate listening skills.
6. Identify effective study and note taking skills.
7. Identify and demonstrate effective test-taking skills.
8. Identify critical thinking skills used in nursing.
9. Demonstrate knowledge of key terms.

FYEX 1170. NMSU Gospel Choir

1 Credit (1)

Students will gain performance experience and exposure to urban contemporary gospel music. Open to all majors. May be taken for unlimited credit. Restricted to: Main campus only.

Learning Outcomes

1. Comprehended the foundation related to singing in a gospel choir setting
2. Demonstrate an understanding of the difference between the musical treble and bass clef
3. Expand vocabulary and reading comprehension of gospel music terminology.
4. Improve the speed and accuracy of music sheet and sight reading

FYEX 1996. Special Topics

1-4 Credits

Covers specific study skills and critical thinking topics. Specific sub-titles to be listed in the Schedule of Classes. May be repeated for a maximum of 8 credits.

Learning Outcomes

1. Varies

FYEX 2994. Prior Learning: Professional Portfolio

1-6 Credits

Creating a portfolio that outlines professional and educational experiences. Life skills and education learned through workplace training and non-traditional education experiences will be evaluated for consideration of awarding college credit. Students will draft a life history paper, prepare a professional resume, assemble supporting documentation and evidence in support of their petition to receive college credit for prior learning. Culminating activities will include an oral presentation of the portfolio contents. Graded S/U.

Prerequisite(s): CCDE 110 N or equivalent.

Learning Outcomes

1. produce writing that is focused on a main point
2. produce writing that is organized
3. produce writing follows task-specific conventions of paragraphing, sentence boundaries, usage, agreement, punctuation and spelling
4. deliver effective speeches
5. organize and present information with a purpose
6. apply effective communication strategies in their personal and professional lives

G S-GRADUATE STUDIES

G S 500. Masters Non-Thesis Final Exam Credit

1 Credit (1)

Course for non-thesis masters students who have completed all program requirements except the final comprehensive exam. A maximum of 12 credits may be earned. Graded S/U.

Prerequisites: advisor signature required.

G S 596. Special Topics

12 Credits (12)

Special Topics course for masters and doctoral students. Max be repeated up to 12 credits. Graded S/U.

Learning Outcomes

1. Varies

G S 600. Doctoral Research

1-15 Credits

Course number is used for assigning credit for research performed prior to successful completion of the doctoral comprehensive examination.

G S 700. Doctoral Dissertation

15 Credits

Dissertation.

GENE-GENETICS

GENE 1110. Experimental Systems in Genetics

1 Credit (1)

Survey of molecular, biochemical, organismal, and computer science based approaches to investigate how genes determine important traits. Historical development and topics of current interest will be discussed.

Learning Outcomes

1. To give the students a historical perspective on the field of genetics.
2. To familiarize the students to introductory concepts and vocabulary to the field of genetics.
3. Introduce experimental systems within the field of genetics and to give perspective to current genetic research.
4. As this course is designed for beginning students as an overview of faculty and research labs on campus. The students majoring in genetics are encouraged to meet with faculty and to explore opportunities available to them on campus

GENE 305. Principles of Genetics

3 Credits (3)

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. May be repeated up to 3 credits.

Prerequisite: (BIOL 2610G and BIOL 2110G, or BIOL 2110G and BCHE 140, and either CHEM 1215G or CHEM 1216).

Learning Outcomes

1. To provide an introduction to the basic concepts, methods, and terminology of genetics. Introduction to genomics and bioinformatics.
2. To develop a working understanding of genetics and heredity
3. To understand in some depth, the mechanism of DNA replication, transcription and protein synthesis. To understand the regulation of gene expression.
4. To examine the impact of genetics on both basic and applied aspects of the biological sciences, as well as its effects on our everyday lives.

GENE 305 L. Genetic Techniques

1 Credit (3P)

Experimental procedures used in genetic research including: sexual transmission genetics, eukaryotic DNA isolation, DNA marker development and genotyping, polymerase chain reaction, and cytogenetics.

Prerequisite(s)/Corequisite(s): GENE 315, or AGRO/ANSC/BIOL/HORT 305.

GENE 315. Molecular Genetics

3 Credits (3)

Covers fundamental principles of DNA structure and replication, transcription, translation, gene regulation, recombinant DNA technology, and a survey of genomics and bioinformatics. Recommend CHEM 313.

Prerequisite(s): CHEM 1225G and BIOL 2110G.

GENE 320. Hereditary and Population Genetics

3 Credits (3)

Covers fundamental principles of reproduction, variation, and heredity in plants and animals including: Mendelian inheritance, mitosis, meiosis, genetic linkage, random mating, genetic drift, natural selection, inbreeding, migration, mutation, interrelationships between individuals, populations and communities and the environment.

Prerequisite(s): CHEM 1215G & BIOL 2110G.

GENE 391. Genetics Internship

1-6 Credits (1-6)

Professional work experience in genetics under the joint supervision of an employer and a faculty member. Documentation of proposed internship activities must be submitted prior to the start of the internship. A written report is required after the internship is completed. No more than 6 credits toward a degree. May be repeated up to 6 credits. Graded: S/U Grading (S/U, Audit).

GENE 440. Genetics Seminar

1 Credit (1)

Organization, preparation, and presentation of genetic studies in model microorganism, plant, or animal systems that have been used to solve problems in molecular, cellular, and developmental biology. Consent of instructor required.

Prerequisite(s): Seniors only; GENE 315 & GENE 320.

GENE 449. Special Problems

1-3 Credits (1-3)

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 3 credits toward a degree. Consent of instructor required.

GENE 450. Special Topics

1-3 Credits (1-3)

Specific subjects to be announced in the schedule of classes. Maximum of 3 credits per semester and a total of 3 credits toward a degree.

Consent of instructor required.

GENE 452. Applied Bioinformatics

3 Credits (3)

Survey and application of publicly available bioinformatic tools that treat genomic DNA, cDNA, and protein sequences, RNA abundance, as well as tools that allow inference based on phylogenetic relationships.

Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315 and GENE 320, and BCHE 341, or BCHE 395.

GENE 486. Genes and Genomes

3 Credits (3)

Extensive coverage of nuclear and organelle genome structure in plants and animals, genome restructuring including duplication, aneuploidy, chromosome translocations and inversions, comparative genomics, and molecular systematics.

Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315, and GENE 320.

GEOG-GEOGRAPHY

GEOG 1110G. Physical Geography

4 Credits (3+3P)

This course introduces the physical elements of world geography through the study of climate and weather, vegetation, soils, plate tectonics, and the various types of landforms as well as the environmental cycles and the distributions of these components and their significance to humans.

Learning Outcomes

1. Define, describe, illustrate, distinguish among or explain the use of maps, map scale, globes, map projections, and remote sensing.
2. Define, describe, illustrate, distinguish among or explain the various elements of the earth's atmosphere, earth's relation to the sun, incoming solar radiation, the ozone layer, the primary temperature controls, and the unequal heating of land and water.
3. Define, describe, illustrate, distinguish among or explain the weather makers (air temperature, air pressure, humidity, clouds, precipitation,

visibility, and wind [including pressure gradient, the Coriolis force, and friction]).

4. Define, describe, illustrate, distinguish among or explain air masses, pressure systems, the various fronts and associated types of storms, weather symbols, monsoons, the various forms of precipitation, along with causes and effects of lightning.
5. Define, describe, illustrate or explain the hydrologic cycle, the characteristics and influences of the oceans and continents on the weather, the Southern Oscillation (i.e., El Nino), the effects of land/water distribution, and climates and their global distribution.
6. Define, describe, illustrate or explain the biosphere, including organisms (flora and fauna), food chains, ecosystems and relationships. Define, describe, illustrate or explain soils in terms of soil-forming processes, components, properties, and classification.
7. Define, describe, illustrate or explain the structure of the earth, the internal processes, weathering and mass wasting, fluvial processes, characteristics and processes of arid regions, processes of coastal and Karst topographical regions, the processes and characteristics of glaciation (mountainous and continental).
8. Define, describe, illustrate, distinguish among or explain specific impacts by humans on weather, climate, and on the ecosystem at large.
9. Perform tests and collect data to analyze and classify weather, climate and landforms characteristics, processes, and impacts both quantitatively and qualitatively. This includes reading and extracting basic information from maps, diagrams, remote sensing devices, graphs, and tables. 1
10. Apply critical thinking skills such as inductive, deductive, and mathematical reasoning to solve problems using the scientific method. This includes interpreting maps, graphs and photos. 1
11. Recognize and discuss the effect of human activity on climate, climate change, the greenhouse effect, and on landforms at large. 1
12. Synthesize information from external, current sources and personal observations and discuss their relationships to class material.

GEOG 1120G. World Regional Geography

3 Credits (3)

Overview of the physical geography, natural resources, cultural landscapes, and current problems of the world's major regions. Students will also examine current events at a variety of geographic scales.

Learning Outcomes

1. Identify, describe, illustrate, distinguish among or explain the basic concepts of geography, the major world regions, areal differences and similarities, the processes that shape geography natural and human, the use of maps, and the key topics of geographical interpretation (e.g., location, world importance, population, political status, resources, etc.).
2. Identify, describe, illustrate, distinguish among or explain the regional groups of Europe, its historical background, its languages and religions, major features, the diversified economy, political structures, and impact on globalization.
3. Identify, describe, illustrate, distinguish among or explain the regional groups of Russia and its satellite nations, its historical background, their languages and religions, major features, their diversified economies, political structures, current problems, and impact on globalization.
4. Identify, describe, illustrate or explain the regional nations of Middle East, their historical background, their languages and religions, the major features, the diversified economies and political structures, the current problems.

5. Identify, describe, illustrate, distinguish among or explain the regional groups of Asia, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.
6. Identify, describe, illustrate, distinguish among or explain the regional groups of the Pacific World, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.
7. Identify, describe, illustrate, distinguish among or explain the regional groups of Africa, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.
8. Identify, describe, illustrate, distinguish among or explain the regional groups of Latin America, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.
9. Identify, describe, illustrate, distinguish among or explain the regional groups of Anglo-America, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization. 1
10. Collect data to analyze or classify the region various historical developments and trends relating to globalization 1
11. Apply critical thinking skills in predicting future developments and impacts in economics, cultural diversity, and political stability globally. 1
12. Recognize and discuss current political "hot-spots," their causes, and potential results with regards to globalization. 1
13. Synthesize information the data into a comprehensive world-view.

GEOG 1130G. Human Geography

3 Credits (3)

This course serves as an introduction to the study of human geography. Human geography examines the dynamic and often complex relationships that exist between people as members of particular cultural groups and the geographical "spaces" and "places" in which they exist over time and the world today.

Learning Outcomes

1. Locate on maps, globes, and other technologies various geo-political spaces and places around the world, including in the United States.
2. Describe the primary concepts, theories, methods and terms prevalent in the field of human geography.
3. Apply core geographic concepts to the spatial patterns demonstrated in real-world scenarios.
4. Identify the relationships that influence human-environment interaction in a specific location at a specific time.
5. Define and utilize key concepts to explain human social and cultural change over time and across geographical space.
6. Explain the geographic context of a current event or conflict.
7. Identify a current event that illustrates a core cultural geographic concept.
8. Think critically, discuss, and write about the relationships of the natural world to human geography.

GEOG 2130. Map Use and Analysis

3 Credits (2+3P)

Exploration of the cartographic medium. Development of critical map analysis and interpretation skills, and map literacy. Comprised of traditional lecture, labs, and map use projects.

Learning Outcomes

1. Accurately measure bearings and distances on maps.
2. Read and interpret terrain and landform representation.
3. Utilize a magnetic compass for basic land navigation and basic map making.
4. Utilize a GPS instrument for basic land navigation.
5. Recognize and describe basic physical and cultural spatial patterns portrayed on maps.
6. Analyze and interpret the significance of spatial patterns portrayed on maps.
7. Perform elementary spatial statistical analysis on geographic data.
8. Appreciate and utilize the significance of place names and cultural patterns.
9. Critically examine maps for evidence of information misuse or propagandist motives. 1
10. Recognize and utilize appropriate map categories, symbols, projections, and coordinate systems to effectively and accurately portray, read, analyze, and interpret geographic data.

GEOG 2996. Special Topics

1-3 Credits

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Learning Outcomes

1. Varies

GEOG 315V. World Agriculture and Food Problems

3 Credits (3)

Survey of food and agricultural issues in the U.S. and other countries.

Covers: role of agriculture in economic development; trade in food and agricultural products; global food production, consumption, and marketing patterns; economics of technical change and food assistance; agriculture and the environment. Same as AEEC 315V.

GEOG 325V. New Mexico and the American West

3 Credits (3)

In this course, we will examine the human and cultural geography of New Mexico and the American West. We will explore cultural and historical patterns, economic activities, and environmental and physical characteristics of the region, as well as current challenges in the region.

Learning Outcomes

1. Explain the human and cultural geography of New Mexico and the American West.
2. Critically examine narratives of the American West and different ways of defining the region, as well as the processes that create the cultural landscapes of the West.
3. Discuss and analyze contemporary environmental and cultural challenges in the West.
4. Articulate an understanding of the landscapes of the West through critically "reading" the landscapes of the West.

GEOG 326. U.S. National Parks

3 Credits (3)

Exploration of origins, landscapes, ecosystems, management issues, and conflicts in U.S. National Parks. The regional geography of the United States as seen through the creation and protection of biologically and culturally significant lands. We discuss current park issues and ideology, beginning with the conception of the first national park, the National Park System, current administrative structure, and the goals of the "double mandate". We will explore the parks as commons wherein humans use, and have a duty to protect, these public lands for future generations.

Learning Outcomes

1. Describe the different types/categories of parks included in the National Park System (NPS).
2. Provide general statistics about the NPS and parks in the NPS.
3. Recognize influential persons and legislation for establishing of the NPS, and agency of the U.S. federal government.
4. Locate and access data about parks.
5. Search job announcements and positions with the NPS.

GEOG 328V. Environment and Society of Latin America**3 Credits (3)**

Explores Latin America from a geographical perspective, integrating environmental, cultural and socioeconomic factors in an in-depth study of the development of the region and contemporary issues and challenges facing the region. Special focus is given to examining applied problems facing Latin America at a range of scales.

Learning Outcomes

1. Apply key geographic perspectives and concepts to Latin America.
2. Discuss the basic physical and human geography of specific countries and sub-regions of Latin America.
3. Describe how the spatial processes of development and globalization occur in Latin America and how they impact the region.
4. Explore the root causes of contemporary development and environmental challenges facing Latin America.
5. Demonstrate how the geographic concepts we cover in class can be applied to these challenges to develop insights into how they may be solved.
6. Demonstrate an improved ability to engage in critical thinking and writing about the physical and human geography of the region and the challenges the region faces.

GEOG 331V. Europe**3 Credits (3)**

The purpose of this course is to introduce you to the cultural region of Europe. In this regional course, we will explore how various physical and cultural elements integrate to give a unique identity to a place or group of places such as Europe. During the semester we will study the "continent" from a variety of geographic perspectives including physical, environmental, economic, social, and political. We will discuss current issues of Europe, with a particular focus on the European Union.

Learning Outcomes

1. Critically evaluate conceptions of Europe as both a physical place and a cultural idea.
2. Locate, identify, and explain the importance of the major countries, cities, and physical features of Europe.
3. Discuss the major regional and international issues facing Europe.
4. Develop knowledge of the European Union (EU) and current challenges to the EU.
5. Demonstrate knowledge of Europe through a variety of forms, including critical discussions on contemporary issues, a writing assignment, and a plan for a detailed European trip.

GEOG 351. Biogeography**3 Credits (3)**

Exploration of life in space and time. Floristic and physiognomic characteristics of the Earth's major ecosystems and their distributions, ecosystem dynamics, evolution, and physical environment. Includes an individual research project resulting in a poster presentation. Taught with GEOG 557.

Learning Outcomes

1. Provide background information about researchers who quantify patterns of biodiversity in space and time.
2. Evaluate species and biodiversity patterns based on the abiotic template.
3. Describe global patterns in the shape and size of species geographical ranges.
4. Apply biogeographic terminology to effectively describe and explain patterns of life across Earth's surface.
5. Identify resources for an analysis of biogeographic data, including satellite imagery, aerial photography, and field survey records.
6. Document your sources by including proper citations and references in your writing.
7. Conduct original research and present research findings in written and oral formats.

GEOG 353. Geomorphology**3 Credits (2+3P)**

Examination of the principal theories and concepts of landform creation; exploration of the roles of structure, processes, climate, and time in the formation of various types of landforms. Cross-listed with GEOG 553 and GEOL 353.

Learning Outcomes

1. Outline the basic history of geomorphic theory and research methods.
2. Describe the trends and probable causes of Cenozoic climate change and its links to basic landform processes.
3. Describe the main landform processes including weathering, soil formation, hillslope evolution and associated natural hazards, fluvial processes, arid land processes, glacial/interglacial climates and processes.
4. Integrate field observations into basic landscape evolution reconstructions.
5. Design and implement a fluvial system experiment and analyze the data.

GEOG 357. Climatology**3 Credits (3)**

Elements and controls of climate. Energy and hydrologic cycles, general circulation, climate classification, distribution of climate types, microscale effects, applications.

Learning Outcomes

1. Explain the fundamental processes that create climate on Earth.
2. Discuss the physical laws that comprise the climate system.
3. Describe the trends in Earth's climate system.
4. Summarize our current knowledge of climate change.

GEOG 361V. Challenges of Globalization**3 Credits (3)**

Challenges of Globalization focuses on the spatial configuration of the global economy and its many regional variations. In doing so, the class has a special focus on exploring how the variables involved in globalization yield the geography of uneven development that exists across spatial scales, from the local to the global. We do this through a combination of relevant course readings, in class discussion exercises, and short, focused writing assignments on current issues of relevance in economic geography.

Learning Outcomes

1. Define the process of globalization, and describe the drivers and impacts involved.

2. Define the concept of uneven development and explore the regional geographies that this process yields.
3. Define the roles of The State, private sector capital, and multi-national corporations, and apply these concepts to understand the landscape of uneven development.
4. Articulate key variables in the global production networks and discuss how these processes drive the economic geographies of regions we study.
5. Explore and critique alternate models of economic geography, especially those involving free versus fair trade arguments and gender and power roles in the economy.
6. Demonstrate an improved ability to engage in critical thinking about economic geography and write coherent narratives about issues we examine.
7. Review basic geographic concepts and demonstrate a “geographic eye” in looking at issues,

GEOG 363V. Cultural Geography

3 Credits (3)

In this course, we will consider the intersections between geography and culture, and explore key cultural geographic concepts such as landscape, place, nature, and environment. We will consider multiple ways of doing cultural geography, focusing on cultural geography as both a critical and creative practice. Key topics and themes that we will focus on include the cultural geography tradition, critical cultural geographies, and cultural geography and creativity. May be repeated up to 3 credits.

Learning Outcomes

1. Describe and explain critical approaches to the cultural geographic concepts of landscape, place, space, nature, and environment.
2. Discuss contemporary cultural geographic approaches to topics such as place and capitalism, place and nature, environmental narratives, and the Anthropocene.
3. Discuss and articulate the connections between geography and artistic/literary practices.
4. Articulate and apply their own practice of cultural geography through multiple forms of output, such as essays, discussions, story maps, or visual essays.

GEOG 365V. The City

3 Credits (3)

The global historical development of urban areas, as well as the changing functions of today's cities. A comparison between the North American city system and cities in Europe, Asia, and South America, including the development of the city form, the internal spatial organization of commercial, residential, and industrial areas, and socio-economic and political factors.

Learning Outcomes

1. Define the concept of a city from various statistical and historical perspectives.
2. Analyze how the historical formation of cities affects their form and function.
3. Relate how the spatial processes of globalization, migration, transportation, informationalization, and development impact form and function of urban areas.
4. Articulate how cultural and economic landscapes of cities impact residents and their quality of life.
5. Conduct library research on key concepts from class and articulate your results through clear and concise writing.

6. Synthesize research findings to solve contemporary real-world problems in urban areas.

GEOG 373. Introduction to Remote Sensing

4 Credits (3+3P)

Introduction to the theory, techniques, and applications of remote sensing. Topics include electromagnetic radiation; remote sensing systems; remote sensing of the biosphere, hydrosphere, atmosphere, lithosphere, and cultural landscapes. Course includes lectures and also labs focused on the basic analysis and interpretation of remote sensing products. Taught with GEOG 573.

Learning Outcomes

1. Explain basic remote sensing concepts and methods.
2. Analyze remotely sensed data.
3. Interpret remotely sensed data.
4. Evaluate the quality of remote sensing products.
5. Produce information about the built and natural environments using remote sensing data and methods.

GEOG 381. Cartography and GIS

4 Credits (3+3P)

This course introduces you to the fundamental concepts and methods of cartography and geographic information systems (GIS) through both lectures and labs. In the lectures, you will learn about key principles of cartography such as map scale, projections, and symbolization. In the labs, you will apply those principles to create functional and aesthetically pleasing maps. Taught with GEOG 571.

Learning Outcomes

1. Explain key cartographic concepts and methods.
2. Analyze maps.
3. Interpret maps.
4. Evaluate the quality of maps.
5. Create functional and aesthetically pleasing maps.

GEOG 401. Internship/Co-op

1-3 Credits (1-3)

Provides an opportunity whereby students work with a local, regional, or federal agency, or private sector firm on applied geographic work, under the supervision of an agency or firm professional and a geography faculty member. Consent of instructor required.

GEOG 435. Planning a Sustainable World

3 Credits (3)

Exploration of planning tools that advance the management of land and water resources, meeting current societal needs, while also minimizing damage to nature and society. Class activities include applied exercises that explore contemporary planning issues, including land conservation, natural hazards, biophysical analysis, water resource management, Federal land issues, and remediation of Superfund sites. Taught with GEOG 535. May be repeated up to 6 credits.

Learning Outcomes

1. Describe the basic elements of traditional urban planning and articulate how traditional tools are used.
2. Unpack the many layers of sustainable development and link this to the emerging practices of environmental planning.
3. Explore current planning issues and how environmental planning ideas can inform them.
4. Through focused library research, explore and discuss current environmental planning issues that are of interest to YOU.

- Through both written article reviews and a presentation you make to the class, critically review research articles you discovered in your literature review.
- Working in teams, conduct a focused research project that explores an environmental planning scenario.

GEOG 441. GIS Design**3 Credits (3)**

This course introduces you to the diverse considerations that are necessary to develop a Geographic Information System (GIS) in a governmental or other institutional setting. Taught with GEOG 581.

Learning Outcomes

- Discuss concepts of GIS development and use.
- Explain GIS design and implementation processes.
- Apply principals of GIS design and implementation to meet local needs.

GEOG 442. Programming for GIS**3 Credits**

This course will introduce you to the fundamental concepts of programming for geographic information systems (GIS). Topics to be mastered include and are not limited to the basics of GIS software environments; the syntax and styles of various programming languages; and ways to create GIS programming applications, customizations, automations, and extensions. With this foundation in place, we will then use these tools to solve applied geographic riddles through a series of hands-on exercises.

Learning Outcomes

- Explain fundamental programming concepts for GIS applications
- Employ different programming languages to conduct spatial analyses.
- Develop an original GIS programming application, customization, automation, and/or extension.
- Implement an original GIS programming application, customization, automation, and/or extension.
- Communicate an original GIS programming application, customization, automation, and/or extension.

GEOG 452. Landscape Ecology**4 Credits (3+3P)**

Analysis of the structure, function, and change of natural and anthropogenic landscapes. Patches, corridors, matrix and network, spatial organization, landscape dynamics, and role of disturbance in overall functioning of landscapes. Role of landscape heterogeneity in landscape management.

Learning Outcomes

- Apply a vocabulary of terms and phrases employed by landscape ecologists.
- Demonstrate familiarity with articles and researchers in landscape ecology.
- Identify influences of scale and spatial configuration on ecosystem processes.
- Discuss approaches, tools, and techniques to describe, quantify, and analyze landscape characteristics.
- Demonstrate knowledge of various landscape ecology approaches by accurately applying landscape ecology terms and concepts in answers to a select group of the end-of-chapter questions as well as in discussion posts.

GEOG 455. Southwest Environments**3 Credits (3)**

This course introduces you to the U.S. Southwest, including its physical and human geography, coupled human-environment interactions, causes and consequences of environmental issues, and implications for sustainable development. Taught with GEOG 555.

Learning Outcomes

- Describe physical and human geographic patterns of the U.S. Southwest.
- Discuss coupled human-environment interactions in the U.S. Southwest.
- Explain how these interactions have produced a series of societal and/or ecological problems in the U.S. Southwest.
- Assess critically the challenges and potentials of sustainability in the U.S. Southwest.

GEOG 473. Advanced Remote Sensing**4 Credits (3+3P)**

Introduction to advanced topics in digital image processing, analysis, interpretation, and visualization. Topics include geometric and radiometric correction, image enhancement, image classification, change detection, and accuracy assessment. Lectures focus on the discussion of advanced remote sensing concepts, techniques, and applications; labs are applications-oriented. Taught with GEOG 573.

Prerequisite: C- or better in GEOG 373.

Learning Outcomes

- Explain advanced remote sensing concepts and methods.
- Acquire remote sensing images.
- Process remote sensing images to obtain spatio-temporal information about the environment.
- Evaluate remote sensing products.
- Communicate the data, methods, and findings of remote sensing investigations.

GEOG 481. Fundamentals of GIS**4 Credits (3+3P)**

This course introduces you to concepts and methods of geographic information systems (GIS) and teaches you how to use a GIS to manage, integrate, analyze, and visualize geospatial data and information. Taught with GEOG 578.

Learning Outcomes

- Explain fundamental concepts, data, methods, applications, and software used in GIS.
- Apply diverse GIS methods for analyzing and modeling spatial data.
- Interpret the results of spatial data analysis and modeling efforts.
- Evaluate the quality of spatial data analysis and modeling efforts.
- Communicate GIS analysis and modeling investigations.

GEOG 482. Geodatabase Design**3 Credits (2+3P)**

A practical introduction to designing geodatabases. The course takes you through the eleven steps of geodatabase design divided into four stages: thematic characterization; developing the database elements, relationships and properties; capture and collection; and finally, implementation and documentation. Taught with GEOG 572.

Prerequisite(s): C- or better in GEOG 481.

GEOG 483. Field Explorations in Geography**3 Credits (6P)**

A field-based class where students complete exercises in physical, human, and environmental geography in the Southwest. May be offered

as a two-week intensive class where students are away from Las Cruces and camping; or may be offered with weekend field trips depending on the instructor. A lab fee for transportation and other expenses is required. Taught with GEOG 583.

GEOG 488. GIS and Water Resources

3 Credits (3)

Explores a range of GIS tools, routines, and data structures and then applies them to a range of research questions and management issues in the area of Water Resources. The class has both a lecture and laboratory component, and students will have opportunities to explore a range of GIS tools in formal lab exercises and a project in the student area of interest. Taught with GEOG 588.

GEOG 491. Special Topics

1-3 Credits

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

GEOG 493. Special Problem Research

1-3 Credits

For advanced and exceptional students. Research, and preparation of a paper in some phase of geography. A maximum of 6 credits may be earned. Consent of instructor required.

GEOG 495. Directed Readings

1-3 Credits

Individual study through selected readings. A maximum of 6 credits may be earned. Consent of instructor required.

GEOG 501. Introduction to Geographic Theory and Application

3 Credits (3)

Overview of geographic philosophies and methodologies, with emphasis on relationship between theory and practice. Includes virtual and in-person meetings with students from both UNM and NMSU. Taught with GEOG 601.

Learning Outcomes

1. Compare, contrast, and evaluate contemporary philosophies and methodologies in major areas of geographical research.
2. Discuss diverse contemporary applications of geographic research.
3. Communicate effectively in written and oral formats.

GEOG 502. Integrative Research Design

3 Credits (3)

Introduction to research design in geography, with emphasis on integration of qualitative and quantitative methods. Includes virtual and in-person meetings with students from both UNM and NMSU. Taught with GEOG 602.

Prerequisite: GEOG 501.

Learning Outcomes

1. Design a significant and feasible research project.
2. Communicate effectively in written and oral formats.
3. Identify and engage key stakeholders to the successful execution of the proposed research project.

GEOG 505. GIS&T Capstone I - Geospatial Research Design

3 Credits

This course is designed to support the professional development of students with an interest in conducting research using Geographic Information Science and Technology (GIS&T). More specifically, the course asks you to dig into the literature in an area of geospatial research of interest to you and to develop a plan for a research project that aligns with your interests and/or professional work.

Learning Outcomes

1. Conceptualize an independent geospatial research project.
2. Plan an independent geospatial research project.
3. Propose an independent geospatial research project.

GEOG 506. GIS&T Capstone II - Geospatial Research Implementation

3 Credits

This course is designed to support the professional development of students with an interest in conducting research using Geographic Information Science and Technology (GIS&T). The course provides you an opportunity to implement the geospatial work you proposed in Capstone I. You will then then share the results of this research through oral presentations and a written document that supports your professional portfolio and work.

Prerequisite: GEOG 505.

Learning Outcomes

1. Implement an independent geospatial research project.
2. Present orally the rationale, data, methods, results, and implications of this independent geospatial research project.
3. Present in writing the rationale, data, methods, results, and implications of this independent geospatial research project.

GEOG 512. Geohumanities

3 Credits (3)

In recent years, artists, writers, and humanities scholars have increasingly engaged with geographic concerns, and geographers have incorporated humanities-based approaches to their work. Broadly known as the geohumanities, these interdisciplinary endeavors offer exciting ways to engage with key geographic concepts such as place, landscape, and nature. This graduate level seminar will examine both critical and creative approaches to the geohumanities.

Learning Outcomes

1. Articulate an understanding of the geohumanities as an interdisciplinary field, including its practices and its histories that draw on geography's intersection with multiple humanities fields.
2. Identify key texts, thinkers, and practices in the geohumanities, as well as spaces (such as both scholarly and public-facing journals and digital spaces) where geohumanities work is currently being advanced and developed.
3. Analyze, critique, and engage with current debates and directions within the geohumanities.
4. Develop and produce a creative and/or critical project that uses geohumanities approaches and advances your research/scholarly/creative interests.

GEOG 535. Planning a Sustainable World

3 Credits (3)

Exploration of planning tools that advance the management of land and water resources, meeting current societal needs, while also minimizing damage to nature and society. Class activities include applied exercises that explore contemporary planning issues, including land conservation, natural hazards, biophysical analysis, water resource management, federal land issues, and remediation of Superfund sites. Taught with GEOG 435.

Learning Outcomes

1. Describe the basic elements of traditional urban planning and articulate how traditional tools are used.
2. Unpack the many layers of sustainable development and link this to the emerging practices of environmental planning.
3. Explore current planning issues and how environmental planning ideas can inform them.

4. Through focused library research, explore and discuss current environmental planning issues that are of interest to YOU.
5. Through both written article reviews and a presentation you make to the class, critically review research articles you discovered in your literature review.
6. Working in teams, conduct a focused research project that explores an environmental planning scenario.

GEOG 542. Programming for GIS**3 Credits**

This course will introduce you to the fundamental concepts of programming for geographic information systems (GIS). Topics to be mastered include and are not limited to the basics of GIS software environments; the syntax and styles of various programming languages; and ways to create GIS programming applications, customizations, automations, and extensions. With this foundation in place, we will then use these tools to solve applied geographic riddles through a series of hands-on exercises.

Learning Outcomes

1. Explain fundamental programming concepts for GIS applications.
2. Employ different programming languages to conduct spatial analyses.
3. Develop an original GIS programming application, customization, automation, and/or extension.
4. Implement an original GIS programming application, customization, automation, and/or extension.
5. Communicate an original GIS programming application, customization, automation, and/or extension.

GEOG 544. GIS&T Professional Portfolio**1 Credit**

This course provides students with the opportunity to develop their GIS&T professional portfolio and disseminate it via multiple platforms. The portfolio will showcase students' experience, knowledge and skills, and potential for professional development and employment in the geospatial workforce.

Learning Outcomes

1. Identify content for a GIST professional portfolio.
2. Visualize the portfolio content.
3. Describe the portfolio content.
4. Reflect on the portfolio content.
5. Create a compelling static document and interactive web versions of the portfolio.

GEOG 545. Geospatial Professionalism**2 Credits**

Geospatial data, technologies, and applications are influenced by and shape our social, political, and legal environments in numerous ways. This course introduces you to these environments and provides opportunities to explore them through a series of readings, writing exercises, and class discussions. We also examine in detail the moral and ethical implications of geospatial data, technologies, and applications. With this grounding in place, we develop skills to communicate the results of our geospatial work in a professional, effective, and morally and ethically responsible manner.

Learning Outcomes

1. Discuss the moral and ethical implications of geospatial data, technologies, and applications.
2. Examine the social, political, and legal implications of geospatial data, technologies, and applications.

3. Communicate geospatial work in a professional, effective, and morally and ethically responsible manner.

GEOG 552. Landscape Ecology**4 Credits (3+3P)**

Analysis of the structure, function, and change of natural and anthropogenic landscapes. Patches, corridors, matrix and network, spatial organization, landscape dynamics, and role of disturbance in overall functioning of landscapes. Role of landscape heterogeneity in landscape management.

Learning Outcomes

1. Apply a vocabulary of terms and phrases employed by landscape ecologists.
2. Demonstrate familiarity with articles and researchers in landscape ecology.
3. Identify influences of scale and spatial configuration on ecosystem processes.
4. Discuss approaches, tools, and techniques to describe, quantify, and analyze landscape characteristics.
5. Demonstrate knowledge of various landscape ecology approaches by accurately applying landscape ecology terms and concepts in answers to a select group of the end-of-chapter questions as well as in discussion posts.

GEOG 553. Geomorphology**3 Credits (2+3P)**

Examination of the principal theories and concepts of landform creation; exploration of the roles of structure, processes, climate, and time in the formation of various types of landforms. Cross-listed with GEOG 553 and GEOL 353.

Learning Outcomes

1. Outline the basic history of geomorphic theory and research methods.
2. Describe the trends and probable causes of Cenozoic climate change and its links to basic landform processes.
3. Describe the main landform processes including weathering, soil formation, hillslope evolution and associated natural hazards, fluvial processes, arid land processes, glacial/interglacial climates and processes.
4. Integrate field observations into basic landscape evolution reconstructions.
5. Design and implement a fluvial system experiment and analyze the data.

GEOG 555. Southwest Environments**3 Credits (3)**

This course introduces you to the U.S. Southwest, including its physical and human geography, coupled human-environment interactions, causes and consequences of environmental issues, and implications for sustainable development. Taught with GEOG 455.

Learning Outcomes

1. Describe physical and human geographic patterns of the U.S. Southwest.
2. Discuss coupled human-environment interactions in the U.S. Southwest.
3. Explain how these interactions have produced a series of societal and/or ecological problems in the U.S. Southwest.
4. Assess critically the challenges and potentials of sustainability in the U.S. Southwest

GEOG 557. Biogeography**3 Credits (3)**

Exploration of life in space and time. Floristic and physiognomic characteristics of the Earth's major ecosystems and their distributions, ecosystem dynamics, evolution, and physical environment. Includes an individual research project resulting in a poster presentation. Taught with GEOG 351.

Learning Outcomes

1. Provide background information about researchers who quantify patterns of biodiversity in space and time.
2. Evaluate species and biodiversity patterns based on the abiotic template.
3. Describe global patterns in the shape and size of species geographical ranges.
4. Apply biogeographic terminology to effectively describe and explain patterns of life across Earth's surface.
5. Identify resources for an analysis of biogeographic data, including satellite imagery, aerial photography, and field survey records.
6. Document your sources by including proper citations and references in your writing.
7. Conduct original research and present research findings in written and oral formats.

GEOG 571. Cartography and GIS**4 Credits (3+3P)**

This course introduces you to the fundamental concepts and methods of cartography and geographic information systems (GIS) through both lectures and labs. In the lectures, you will learn about key principles of cartography such as map scale, projections, and symbolization. In the labs, you will apply those principles to create functional and aesthetically pleasing maps. Taught with GEOG 381.

Learning Outcomes

1. Explain key cartographic concepts and methods.
2. Analyze maps.
3. Interpret maps.
4. Evaluate the quality of maps.
5. Create functional and aesthetically pleasing maps.

GEOG 572. Geodatabase Design**3 Credits (2+3P)**

Graduate level introduction to designing geodatabases. The course takes you through the eleven steps of geodatabase design divided into four stages: thematic characterization; developing the database elements, relationships and properties; capture and collection; and finally implementation and documentation. Taught with GEOG 482.

GEOG 573. Introduction to Remote Sensing**4 Credits (3+3P)**

Graduate level introduction to the theory, techniques, and applications of remote sensing. Topics include electromagnetic radiation; remote sensing systems; remote sensing of the biosphere, hydrosphere, atmosphere, lithosphere, and cultural landscapes. Course includes lectures and also labs focused on the basic analysis and interpretation of remote sensing product. Taught with GEOG 373.

Learning Outcomes

1. Explain basic remote sensing concepts and methods.
2. Analyze remotely sensed data.
3. Interpret remotely sensed data.
4. Evaluate the quality of remote sensing products.

5. Produce information about the built and natural environments using remote sensing data and methods.

GEOG 578. Fundamentals of GIS**4 Credits (3+3P)**

This course introduces you to concepts and methods of geographic information systems (GIS) and teaches you how to use a GIS to manage, integrate, analyze, and visualize geospatial data and information. Taught with GEOG 481.

Learning Outcomes

1. Explain fundamental concepts, data, methods, applications, and software used in GIS.
2. Apply diverse GIS methods for analyzing and modeling spatial data.
3. Interpret the results of spatial data analysis and modeling efforts.
4. Evaluate the quality of spatial data analysis and modeling efforts.
5. Communicate GIS analysis and modeling investigations.

GEOG 581. GIS Design**3 Credits (3)**

This course introduces you to the diverse considerations that are necessary to develop a Geographic Information System (GIS) in a governmental or other institutional setting. Taught with GEOG 441.

Learning Outcomes

1. Discuss concepts of GIS development and use.
2. Explain GIS design and implementation processes.
3. Apply principals of GIS design and implementation to meet local needs.

GEOG 582. Advanced Remote Sensing**4 Credits (3+3P)**

Graduate level introduction to advanced topics in digital image processing, analysis, interpretation, and visualization. Topics include geometric and radiometric correction, image enhancement, image classification, change detection, and accuracy assessment. Lectures focus on the discussion of advanced remote sensing concepts, techniques, and applications; labs are applications-oriented. May be repeated up to 4 credits.

Learning Outcomes

1. Explain advanced remote sensing concepts and methods.
2. Acquire remote sensing images.
3. Process remote sensing images to obtain spatio-temporal information about the environment.
4. Evaluate remote sensing products.
5. Communicate the data, methods, and findings of remote sensing investigations.

GEOG 583. Field Explorations in Geography**3 Credits (6P)**

A graduate level field-based class where students complete exercises in physical, cultural, and environmental geography in the Southwest. May be offered as a two-week intensive class where students are away from Las Cruces and camping; or may be offered with weekend field trips depending on the instructor. A lab fee for transportation and other expenses is required. May be repeated up to 3 credits.

GEOG 584. Critical Methodologies**3 Credits (3)**

This course explores critical, qualitative, and creative methods within human geography and related fields. We will examine epistemology, methodology, ethics, and critical reflexivity in research, as well as particular methods such as interviews, oral histories, questionnaires,

participant observation, focus groups, archival research, visual methodologies, textual and discourse analysis, and arts-based approaches.

Learning Outcomes

1. Discuss the relationship between epistemology, methodology, and methods.
2. Develop and articulate a nuanced understanding of multiple critical, qualitative, and/or creative methods within human geography and related fields.
3. Demonstrate knowledge of research ethics and the role of NMSU's Institutional Review Board (IRB) in human subjects research, including the completion of the CITI Human Subjects training.

GEOG 585. Spatial Analysis and Modeling

3 Credits (3)

Introduction to aspatial and spatial analysis and modeling techniques for geographic investigations. Includes several hands-on assignments and an independent research project.

Learning Outcomes

1. Explain aspatial and spatial tools for geospatial analysis and modeling.
2. Apply diverse aspatial and spatial tools for geographic problem solving.
3. Develop an original spatial analysis and/or modeling investigation.
4. Implement an original spatial analysis and/or modeling investigation.
5. Communicate in written and oral formats an original spatial analysis and/or modeling investigation.

GEOG 588. GIS and Water Resources

3 Credits (3)

This is a graduate level class that explores a range of GIS tools, routines, and data structures and then applies them to a range of research questions and management issues in the area of Water Resources. The class has both a lecture and laboratory component, and students will have opportunities to explore a range of GIS tools in formal lab exercises and a project in the student's area of interest. Taught with GEOG 488.

GEOG 595. Directed Readings

1-3 Credits

Advanced individual study through selected readings. May be repeated for a maximum of 6 credits.

GEOG 596. Residency

1-12 Credits (1-12)

A contractual learning experience in the public or private sector under the supervision of a field supervisor and two faculty members. May be repeated up to 12 credits. Consent of Instructor required. Restricted to: Geography majors.

GEOG 598. Selected Topics

1-3 Credits

Readings, discussions, lectures or laboratory studies of selected geographic themes. May be repeated for unlimited credit.

GEOG 599. Master's Thesis

1-12 Credits (1-12)

Supervised individual study of a student's thesis topic. May be repeated for an unlimited number of credits. Thesis/Dissertation Grading.

GEOG 601. Introduction to Geographic Theory & Application

3 Credits (3)

This course is intended to introduce Ph.D. and Masters level students to the history, theory, methods, and contemporary literature of Geography as a discipline. It also serves to prepare incoming students to engage

in an integrative, theoretically informed and applied research project.

Crosslisted with: GEOG 501.

Learning Outcomes

1. Students will be able to demonstrate a clear understanding of multiple themes and topics in Geography.
2. Students will be able to demonstrate a clear understanding of multiple methods suitable for geographic research
3. Students will be able to identify and summarize recent scholarship relevant to the student's own research interests.
4. Students will be able to communicate clearly and effectively in an oral format.
5. Students will be able to communicate clearly and effectively in a written format.
6. Students will be able to identify a committee chairperson who will guide her or his graduate work.
7. Students will be able to design an integrative program of studies for the remainder of her or his graduate work.

GEOG 602. Integrative Research Design

3 Credits (3)

Introduction to research design in geography, with emphasis on integration of qualitative and quantitative methods. Includes virtual and in-person meetings with students from both UNM and NMSU. Taught with GEOG 502.

Prerequisite: GEOG 601.

Learning Outcomes

1. Design a significant and feasible research project.
2. Communicate effectively in written and oral formats.
3. Identify and engage key stakeholders to the successful execution of the proposed research project.

GEOG 603. Professional Geographic Practice

3 Credits (3)

This core course focuses on a variety of professional development topics that prepare students for teaching and applied community engagement projects. All students in this course will receive training in professional communication, professional ethics, and grant proposal writing. Depending on their individual professional goals, the course will allow students to undertake practical training in a variety of areas that range from academic teaching to applied policy work to scientific communication. All students in the joint doctoral program are expected to engage in applied projects as part of their research design, and this course will lay the foundation for these pursuits. Unlike GEOG 601 and GEOG 602, the final core course will be taught independently on each campus, to maximize the potential for faculty-student interaction on specific location-based project planning. This course will be offered every fall semester.

Prerequisite: GEOG 602.

Learning Outcomes

1. Identify professional geography as it relates to project management.
2. Explore professional communication in various settings in a variety of workplace settings.

GEOG 700. Doctoral Dissertation

1-18 Credits (1-18)

This highly individualized independent study course is for students who have completed their comprehensive exams and are currently working on their doctoral dissertation. May be repeated up to 18 credits. Thesis/Dissertation Grading.

Learning Outcomes

1. Expand their knowledge in a specific area of interest in the discipline of geography.
2. Develop their skills in analyzing, synthesizing, and interpreting geographic data and information.
3. Develop their skills in technical and/or professional writing.
4. Develop their skills in the management and completion of a professional research project.

GEOL-GEOLOGY**GEOL 1110G. Physical Geology****4 Credits (3+3P)**

Physical Geology is an introduction to our dynamic Earth introducing students to the materials that make up Earth (rocks and minerals) and the processes that create and modify the features of our planet. The course will help students learn how mountains are formed, how volcanoes erupt, where earthquakes occur, and how water, wind, and ice can shape landscapes. Students will also develop a basic understanding of the ways humans have altered the planet including our impact on natural resources and global climate change.

Learning Outcomes

1. Recall, describe or explain geologic vocabulary.
2. Identify or explain aspects of the geologic time scale and compare the uses and limitations of relative and absolute dating.
3. Recognize or explain the evidence used to support the theory of plate tectonics. Describe or identify how plate tectonics is related to the structure and features of the Earth.
4. Describe the formation of, and describe, compare, and classify minerals.
5. Identify or describe the three main rock types, how each forms in the context of the rock cycle and what each indicates about its environment of formation.
6. Recognize or explain the fundamentals of surface and groundwater hydrology and discuss the impact of human activities on water quality and quantity.
7. Describe or discuss the processes that are responsible for specific geologic hazards (e.g., earthquakes, volcanic eruptions, mass movement, flooding, etc.).
8. Recognize or describe the geologic processes involved in the formation and concentration of geologic resources.

GEOL 1150. Introduction to Rocks and Minerals**3 Credits (2+3P)**

This course is an introduction to the characteristics and the formation of the three main types of rocks, the rock-forming minerals, and important ore minerals. An outline of Plate Tectonics will give students the basis to understand how many of these rocks and minerals form. In laboratory exercises, students will gain practice in describing and identifying hand-specimens of the main types of rocks and minerals.

Prerequisite(s)/Corequisite(s): GEOL 1110G.

Learning Outcomes

1. The student identify the main rock-forming minerals from each mineral group as demonstrated by scoring a total of 70% or more on the relevant laboratory exercise component. Studying minerals, the student will: Identify the main minerals in hand specimens; Describe the environments in which these minerals form; Identify the rock types in which these minerals are found.
2. The student will understand the structure, composition, and genesis of rocks by identifying the principal igneous, sedimentary, and

metamorphic rocks, as demonstrated by scoring a total of 70% or more on the relevant laboratory exercise components.

3. Studying rocks, the student will: Define the principal igneous processes and features, identify the most common igneous rocks and their constituting minerals in hand specimens, and discuss their origin and interpretation; Describe the principles of sedimentary processes and features, identify the most common sedimentary rocks in hand specimens, and discuss their origin and interpretation; Describe the principles of metamorphic processes and features, identify the most common metamorphic rocks and constituting minerals in hand specimens, and discuss their origin and interpretation.

GEOL 2996. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes.

Community Colleges only. May be repeated for a maximum of 12 credits.

Learning Outcomes

1. Varies

GEOL 305V. Fossils and the Evolution of Life**3 Credits (3)**

Examination of the fossil record within the context of geologic time.

Special emphasis on critical evaluation of possible terrestrial and extra-terrestrial causes for the evolution of plants and animals and for periods of mass extinction.

GEOL 310. Mineralogy**3 Credits (2+3P)**

Crystallography and the physical and chemical aspects of minerals.

Prerequisite(s): GEOL 1110G and CHEM 1215G.

GEOL 312. Mineralogy and Optics**3 Credits (2+3P)**

Principles of crystallography, optical mineralogy, and mineral chemistry as applied to the identification and characterization of rock-forming minerals. May be repeated up to 3 credits.

Prerequisite(s): GEOL 1110G and GEOL 1150.

Learning Outcomes

1. Students will understand how polarized light interacts with isotropic, uniaxial, and biaxial crystals.
2. Students will be able to recognize optical phenomena resulting from the interaction of polarized light with minerals.
3. Students will become proficient in the recognition of the major rock-forming minerals in thin section.
4. Students will recognize crystal faces according to the Miller Indices.
5. Students will be able to calculate the structural formula of any mineral.

GEOL 320. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

GEOL 335V. Earthquakes, Volcanoes, Hurricanes, and Floods: The Role of Natural Hazards in Civ Past and Present**3 Credits (3)**

This class will provide an introduction to geologic hazards and natural disasters, their effects on society and the attempts at preparation and mitigation for these events. Hazards to be covered include earthquakes, volcanic eruptions, floods, landslides, hurricanes, tsunamis and others.

GEOL 353. Geomorphology**3 Credits (2+3P)**

Examination of the principal theories and concepts of landform creation; exploration of the roles of structure, processes, climate, and time in the formation of various types of landforms. Cross-listed with GEOG 553 and GEOG 353.

Learning Outcomes

1. Outline the basic history of geomorphic theory and research methods.
2. Describe the trends and probable causes of Cenozoic climate change and its links to basic landform processes.
3. Describe the main landform processes including weathering, soil formation, hillslope evolution and associated natural hazards, glacial processes, arid land processes, glacial/interglacial climates and processes.
4. Integrate field observations into basic landscape evolution reconstructions.
5. Design and implement a fluvial system experiment and analyze the data.

GEOL 360. General Geochemistry

3 Credits (3)

The chemistry of the earth and its parts, with emphasis on geochemical systems and cycles, distribution of the elements, and mineral equilibria. Crosslisted with: CHEM 360

Prerequisite(s): CHEM 1215G or CHEM 1120G.

GEOL 399. Igneous and Metamorphic Petrology

3 Credits (2+3P)

Mineralogical composition, classification, and genesis of igneous and metamorphic rocks. May be repeated up to 3 credits.

Prerequisite: GEOL 312 for geology majors, GEOL 1150 for majors other than geology.

Learning Outcomes

1. Students will learn to identify minerals and rocks in hand sample and using the petrographic microscope. Students will be expected to score above 70% on a set of eight laboratory exercises and a laboratory final exam.
2. Students will learn to understand the environments, sources, and processes involved in generating igneous rocks and metamorphic rocks in a range of geologic/tectonic environments.
3. Students will learn to write within the field of geology using Geological Society of America format. A 6-10 page paper will be required and will be graded using the Ramos writing rubric. Revisions will also be required.
4. Students will learn to present in standard GSA format (12 minute oral presentations using Powerpoint). Presentation will be graded using a rubric that evaluates presentation materials, presentation effectiveness, and presenter skills/behaviors related to their presentations.

GEOL 401. Geology Colloquium

1 Credit (1)

Presentations by visiting speakers and students. May be repeated up to 6 credits.

GEOL 420. Stratigraphy and Sedimentology

3 Credits (2+3P)

Identification and interpretation of sedimentary rocks with emphasis on classification, deposition, and stratal geometry. May be repeated up to 3 credits.

Prerequisite: GEOL 1150.

Learning Outcomes

1. Recognize patterns associated with physical and chemical weathering and erosion.
2. Identify and classify siliciclastic and chemical sedimentary rock and sediment.
3. Compare and contrast sedimentologic processes recorded in depositional, erosional, deformational, and biogenic sedimentary structures (i.e., facies).
4. Identify specific sedimentary facies associated with specific depositional environments.
5. Delineate between nonmarine, marginal marine, and deep marine environments.
6. Correlate stratigraphic successions and environments along strike and place in a tectonic and basin-scale context.

GEOL 424. Soil Chemistry

3 Credits (3)

Same as SOIL 424, CHEM 424.

GEOL 441. Tutorial Geology

2 Credits (1+3P)

Participation in teaching lower-division laboratories and conducting tutorial sessions. May be repeated for a total of 4 credits.

Prerequisite: junior or above standing and nomination by faculty.

GEOL 442. Zuhl Collection Internship

1-3 Credits (3-9P)

Applied experience with the NMSU Zuhl Collection, under supervision of the Zuhl Collection Director. Possible activities include developing displays, giving tours, developing outreach materials, etc. May be repeated up to 6 credits. Consent of Instructor required.

GEOL 444. GIS for Geology

3 Credits (3)

Tools-based introduction to using GIS software for solving problems in geology. Emphasis on effectively portraying and analyzing geologic maps. One required field trip. Crosslisted with: GEOG 544.

Prerequisite(s): GEOL 470.

GEOL 449. The Geological Profession

1 Credit (1)

Outcomes assessment exit exams. For graduating seniors only. May be repeated up to 1 credits.

Prerequisite(s): Graduating seniors only.

GEOL 452. Geohydrology

4 Credits (3+2P)

Origin, occurrence, and movement of fluids in porous media assessment of aquifer characteristics. Development and conservation of ground water resources, design of well fields. May be repeated up to 4 credits. Crosslisted with: ENVS 452 and C E 452.

GEOL 455. Undergraduate Research

1-3 Credits

Geological research and field projects for the advanced student. May be repeated for a total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

GEOL 465. Isotope Geochemistry

3 Credits (3)

Geochemistry of stable and radiogenic isotopes and its application to a wide range of problems in the earth and planetary sciences.

Prerequisite(s): CHEM 1225G, GEOL 360, GEOL 399.

GEOL 470. Structural Geology**3 Credits (2+3P)**

Deformation of rocks of the earth. May be repeated up to 3 credits.

Prerequisite: GEOL 1150.

Learning Outcomes

1. Describe and analyze features in rocks produced by deformation, such as folds and faults.
2. Describe regional phases of structural geology and their relationship to plate tectonic processes.
3. Describe how understanding of deformational features informs plate tectonic models.
4. Describe how practical knowledge of structural geology is related to all fields of geology.

GEOL 471. Volcanology**3 Credits (3)**

Identification and interpretation of volcanic deposits (including air fall, ash flow tuffs, surges, lava flows), with focus on how the characteristics of these deposits can reveal eruption styles and eruption dynamics.

Other topics covered include: magma migration and storage, volcanic hazards, volcano monitoring and volcanoes and climate. Crosslisted with: GEOL 571.

Prerequisite(s): GEOL 399.

GEOL 477. Special Problems**1-3 Credits**

Selected advanced topics of current interest or importance. May be repeated for a total of 6 credits.

Prerequisite: consent of instructor.

GEOL 478. Petroleum Systems and Stratigraphy**3 Credits (2+3P)**

Sedimentation, stratigraphy, depositional environments, and tectonics in relation to the occurrences and exploration of hydrocarbons. Course includes two off-campus field trips. May be repeated up to 3 credits.

Prerequisite(s): GEOL 420.

GEOL 480. Seminar**1-3 Credits**

Supervised study of a subject not covered by regular courses. For organized group meetings treating selected advanced topics. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

GEOL 482. Zuhl Collection Internship**1-3 Credits (1-3)**

Applied experience working with the Zuhl Collection of rocks, minerals, fossils, and petrified wood, supervised by the Director of the Zuhl Collection. Activities include tours, display development, research on aspects of the collection, and other work in the museum. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: GEOL majors.

GEOL 490. Field Geology**3 Credits (9P)**

Mapping, instrumentation, and interpretation of geology in the field.

Prerequisites: either GEOL 420 and GEOL 470.

GEOL 491. Tectonic Evolution of North America**3 Credits (3)**

Current ideas regarding the plate-tectonic evolution of North America from Archean through Holocene time, emphasizing the use of regional stratigraphy and structural geology to interpret mountain building, magmatism, and basin development.

Prerequisites: GEOL 1110G, GEOL 399, GEOL 420 and GEOL 470.

GEOL 495. Geology Field Camp**4 Credits (12P)**

Three week intensive summer course. Geologic mapping in a site-based setting, emphasizing spatial relations, cross-section construction, and preparation of geologic reports. Prerequisite: GEOL 490

GEOL 499. Senior Thesis**1-3 Credits**

Writing a formal paper describing original geologic research conducted under supervision of a faculty advisor. Restricted to majors.

Prerequisite: consent of instructor.

GEOL 501. Geology Colloquium**1 Credit (1)**

Presentations by visiting speakers and graduate students.

GEOL 520. Selected Topics**1-3 Credits (1-3)**

Selected topics in geology. Students must be in graduate standing to enroll. Consent of instructor required. May be repeated up to 99 credits.

Learning Outcomes

1. Varies

GEOL 534. Tectonics of Sedimentary Basins**3 Credits (3)**

Origin of sedimentary basins with emphasis on subsidence mechanisms, geometry of basin fill, depositional systems and tectonic setting. Course includes two off-campus field trips. Restricted to: GEOL majors May be repeated up to 3 credits. Prerequisite: .

Learning Outcomes

1. To be able to recognize sedimentary basin types in geologic and geomorphic environments.
2. To understand these aspects of sedimentary basins: plate tectonic setting/context, basement to basins (continental vs. oceanic/transitional lithosphere), structure and structural vergence, sedimentologic and stratigraphic signatures in the rock record, depositional systems, and basin-scale provenance.

GEOL 537. Topics in Volcanology**3 Credits (3)**

A seminar-style class exploring volcanic processes. Course topics vary by semester and include: magmatism and volcanism at different tectonic settings (subduction zones, intraplate) and plumbing systems and eruptions of volcanoes (calderas, monogenetic volcanoes).

GEOL 544. GIS for Geology**3 Credits (3)**

Tools-based introduction to using GIS software for solving problems in geology. Emphasis on effectively portraying and analyzing geologic maps. One required field trip. Taught with: GEOL 444. May be repeated up to 3 credits.

Learning Outcomes

1. A tools-based introduction to Geographic Information Systems software, specifically the ArcGIS package developed by ESRI.
2. Hands-on use of GIS software to make maps and analyze datasets that are commonly used by geoscientists.
3. Compiling and analyzing geologic mapping datasets collected from the field and from published literature.
4. Development of an awareness of how to find publicly accessible datasets and solutions to problems beyond the sample exercises presented in class.
5. Application of GIS to solve a problem.

GEOL 558. Neotectonics**3 Credits (3)**

Recognition, measurement, and dating of deformation related to earthquakes in the Quaternary geologic record.

GEOL 562. Analytical Geochemistry**3 Credits (3)**

Techniques used to determine the major element, trace element and isotopic composition of rocks and minerals and the determination of mineral structure.

GEOL 565. Isotope Geochemistry**3 Credits (3)**

Trace element partitioning and isotope systematics applied to problems in petrology and ore genesis.

GEOL 571. Volcanology**3 Credits (3)**

Identification and interpretation of volcanic deposits (including air fall, ash flow tuffs, surges, lava flows), with focus on how the characteristics of these deposits can reveal eruption styles and eruptions dynamics. Other topics covered include: magma migration and storage, volcanic hazards, volcano monitoring and volcanoes and climate. Crosslisted with: GEOL 471.

GEOL 578. Petroleum Systems and Stratigraphy**3 Credits (2+3P)**

Sedimentation, stratigraphy, depositional environments and tectonics in relation to the occurrences and exploration of hydrocarbons. Course includes two off-campus field trips.

GEOL 582. Plate Tectonics**3 Credits (3)**

Plate tectonics as a fundamental model for geological activity on a dynamic earth. Focuses on plate tectonic theory development and mechanisms, plus modern analogs of ancient processes.

GEOL 585. Geochronology**3 Credits (3)**

The principles, analytical methods, and interpretation of the most common geochronologic methods.

GEOL 598. Special Research Programs**1-3 Credits**

Investigations into contemporary geological problems. May be repeated for unlimited credit.

Prerequisites: graduate standing and consent of instructor.

GEOL 599. Master's Thesis**15 Credits**

Thesis research. May be repeated up to 88 credits.

GNDR-Gender and Sexuality Studies

GNDR 2110G. Introduction to Women, Gender, and Sexuality Studies**3 Credits (3)**

This course introduces students to key concepts, debates, and analytical tools informing Women's, Gender, and Sexuality Studies. As an interdisciplinary field of study, Women's, Gender, and Sexuality Studies employs academic perspectives from a range of disciplines and theoretical approaches. It also incorporates lived experience and social location into its object of analysis. Though content will vary according to the expertise and focus of the instructor, this course will develop tools through readings and assignments that critically analyze how gender and sexuality are shaped by different networks of power and social relations and demonstrate how the intersections of race, class, disability, national status, and other categories identity and difference are central

to their understanding and deployment. In addition to feminist thought, areas of focus might include gender and sexuality in relation to social, cultural, political, creative, economic, or scientific discourses. This class is recommended for those with a general interest in the topic area as well as for those seeking a foundational course for further study. May be repeated up to 3 credits.

Learning Outcomes

1. Understand foundational concepts, theories, and approaches to gender and sexuality in conjunction with contemporary social justice movements such as feminism.
2. Describe the range of social and political forces that shape and are shaped by gender, sexuality, race/ethnicity, and other intersecting categories of identity.
3. Demonstrate the ability to conduct intersectional analysis.
4. Develop and improve skills in reading, critical thinking, academic writing, and public speaking.

GNDR 2120G. Representing Women Across Cultures**3 Credits (3)**

Historical and critical examination of women's contributions to the humanities, with emphasis on the issues of representation that have contributed to exclusion and marginalization of women and their achievements.

Learning Outcomes

1. To think critically about contemporary discourses on gender, race, sexuality, and class.
2. To understand how forms of identity intersect with one another
3. To explore the ways power and privilege operate in contemporary society
4. To understand some of the ways social inequalities develop, function, and change
5. To further students' interest in developing their own ideas and research in issues of women and gender, sexuality, race, class, and nation

GNDR 350. Special Topics**3 Credits (3)**

The topic of course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 300-level from any specific department. May be repeated up to 99 credits.

Learning Outcomes

1. Varies

GNDR 352. Women's & Mass Media**3 Credits (3)**

Portrayal and participation of women in mass media from colonial to contemporary times. Taught with JOUR 380.

GNDR 357. Gender and Society**3 Credits (3)**

Overview of issues related to gender, including how gender is constructed and reproduced in our society. Gender is examined from social psychological and institutional perspectives.

Learning Outcomes

1. To develop a working knowledge of sociological concepts and theoretical approaches common in gender studies, as well as the research methodologies employed to understand gender as an organizing principle in 21st century societies.
2. To develop a solid understanding of how dominant ideologies affect the structures and meanings of gender and gender inequality in the

United States and on how gender shapes one's own life chances and choices.

3. To develop a decolonial "sociological imagination" and the analytical tools to understand how gender intersects with other systems of inequality (such as nation, race, ethnicity, sexuality, physical abilities, economic class, and citizenship status).
4. To develop a working knowledge of past and present collective social movements to eradicate gender inequality and gender oppression in all our homes, communities, institutions, and world.

GNDR 359. Psychology of Gender

3 Credits (3)

Examines theories and research on the psychological functioning of women and men in North American society, including influential theories of gender in psychology and current controversies in the psychological literature. Topics include those unique to women and unique to men in development across the lifespan, work, physical and mental health, sexuality, victimization, gender stereotypes, gender comparisons in abilities and personality, and biological, social, and cultural influences on behavior. Crosslisted with: PSYC 359.

Prerequisite: PSYC 1110G.

GNDR 360. Masculinities Studies

3 Credits (3)

Explores how contemporary American culture constructs manhood and masculinity. Interrogates ideas and enactments of masculinity, especially as they intersect with race/ethnicity, class, and sexuality. The class asks how sexuality, gender construction, and sex roles inform our understanding of masculinity, as well as how masculinity relates to social power.

GNDR 371. Introduction to LGBTQ Studies

3 Credits (3)

Multidisciplinary introduction to Lesbian, Gay, Bisexual, Transgender, and Queer Studies. Students will learn about LGBTQ identities, social movements, civil rights, and media representation.

Learning Outcomes

1. To broaden students' knowledge, cultural competencies, and research skills regarding LGBTQ+ Studies.
2. To develop a critical understanding of LGBTQ+ peoples and communities in relation to issues of power and inequality.
3. To expand understanding and learning approaches involving the study of cultural texts and arts forms created by or about LGBTQ+ experiences.
4. To develop the necessary analytical tools for further and more specialized study in the field of LGBTQ+ Studies.

GNDR 380V. Women Writers

3 Credits (3)

Introduction to multicultural women's traditions through intensive study of works by women writers. Taught with ENGL 380V. May be repeated up to 3 credits.

GNDR 381V. Women's Health Issues

3 Credits (3)

A focus on the unique issues and problems that confront women today and how they affect the health of women. Crosslisted with: PHLS 3120V. May be repeated up to 3 credits.

GNDR 401. Women & Immigration

3 Credits (3)

Explores historical and contemporary immigration processes in/to the U.S. that are shaped by gendered dynamics, societal structures, and the socio-economic conditions that impact immigrant women. Examines

how immigrant women use their agency and resistance to overcome exploitative circumstances, and the restraints of immigration laws and policies that impact individual, communal and societal change.

GNDR 402. Transnational Feminisms

3 Credits (3)

Explores dimensions of gender, race, class, and sexuality in conjunction with nationalisms, anti-capitalist struggles, religious fundamentalism, militarism, globalization, eco-critique, and the politics of resistance and social movements.

GNDR 403. Gender & Horror

3 Credits (3)

Explores cultural anxieties and crises through the genre of horror as they relate to issues of gender, sexuality, feminism, and race. Traces ways horror films represent and reconfigure notions of sexuality and gender and ways they reinforce and/or challenge social norms.

GNDR 405. Alternative Genders and Sexualities

3 Credits (3)

Examination of queer, transgender, non-binary, and intersex gender identities and queer/non-heterosexual sexualities through literature, film, and critical theory

GNDR 406. Women and Human Rights

3 Credits (3)

Analysis of human rights violations and injustices as they relate to the lives of girls and women. Examines international political, legal, economic and socio-cultural implications of violence that target women and girls. Focusing on different countries, discusses social, political, economic, and human rights.

Learning Outcomes

1. Students will evaluate socio-culturally sanctioned practices that often lead to widespread victimization of girls/ women/ womxn
2. Students will better understand the application of Human Rights discourse and Human Rights remedies to women's, womxn's, and girls' rights

GNDR 407. Gender and Graphic Narrative

3 Credits (3)

Examines graphic novels that disrupt stereotypical ideas about genre, gender, race, class sexuality, as well as common notions about comics. Considers texts that address underrepresented experiences.

GNDR 408. Feminist Food Studies

3 Credits (3)

Examines contemporary food writing as a way to study identity, social structures, and notions of acceptability. Explores how constructions of food shape bodies, desires, and notions of belonging.

Learning Outcomes

1. Apply critical thinking and critical writing competencies about race ethnicity, gender sexuality, and class, as well as food and culture.
2. Analyze representations of food and culinary practices in literature, film, and other cultural production as a reflection of larger social forces.
3. Develop a scholarly vocabulary for discussing themes of race and ethnicity, gender and sexuality, class, citizenship and belonging, dislocation and exile, labor and consumption.

GNDR 411. Gender and Migration

3 Credits (3)

Explores multiple experiences of forced migration and displacement. Examines violence, structural dislocation, neoliberalism, globalization, economic collapse and civil war. Discusses local, regional and global

responses to creating meaningful change in communities most affected by migration.

GNDR 412. Gender and Film Studies

3 Credits (3)

Examines how movies have created, reflected, and shaped ideas about gender, sexuality, race, and other dimensions of identity. This class analyzes these representations, how they create meaning, how they function within the filmic medium, and how some filmmakers create alternative visions.

Learning Outcomes

1. To develop skills to critically analyze films.
2. To gain a grounding in the analysis of social identity categories, with an emphasis on race and gender.
3. To analyze how race and gender are represented in popular culture and why media representation matters.
4. To learn critical tools to think through contemporary discourses on gender, race, and sexuality as well as categories of difference and identity.

GNDR 433V. Sex, Gender and Culture

3 Credits (3)

This seminar course introduces students to the anthropological study of gender. We take an integrated approach to the subject, considering the ways that that different kinds of anthropological research, including archaeology, biological anthropology, ethnography, etc., expand our understanding of the various ways gender is defined across space and time, how it is lived, and what it means to us and others. Students will review the historical context and development of this subject within the field, and will explore such topics as sex versus gender, embodiment and gendered performance, gender hierarchies, the politics of reproduction, and globalization. May be repeated up to 3 credits.

Learning Outcomes

1. Identify and evaluate different anthropological approaches to the study of gender
2. Develop and employ analytical and critical thinking skills
3. Demonstrate proficiency in oral and written communication
4. Integrate and synthesize knowledge of gender-related topics in a research paper

GNDR 450. Special Topics

3 Credits (3)

The topic of course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 400-level from any specific department. May be repeated up to 99 credits.

Learning Outcomes

1. Varies

GNDR 451. Practicum in Gender and Sexuality Studies

3 Credits (3)

Supervised field work in community setting relating to women. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

GNDR 454. Women Crossing Borders

3 Credits (3)

Experiences of women who cross class, race, cultural, national, or sexual borders including theories regarding women's Interactions across borders. Emphasis will vary with professor and discipline.

GNDR 455. Feminist Research Methodologies

3 Credits (3)

Study of feminist modes of research inquiry, feminist ethics in research, and critiques of traditional disciplinary approaches to research.

Learning Outcomes

1. Students will recognize how theories and research methods influence the subjects and outcomes of studies.
2. Students will understand feminist practices associated with evolving epistemologies, research strategies, and calls for social change.
3. Students will develop and practice skills in designing, conducting, and analyzing narratives in ways that utilize feminist theory and research methods.

GNDR 461. Independent Study in Gender and Sexuality Studies

3 Credits (3)

Individual study of selected topic and writing of research paper. May be repeated up to 6 credits.

Learning Outcomes

1. Varies.

GNDR 465. Sex, Gender and the Body

3 Credits (3)

Examines forces at work in defining and differentiating gender, race, sexuality. How ideas about what is 'natural' and 'normal' for men and women shifted over time. Considers different discourses shaping embodied experiences and categories of identity.

GNDR 471. Seminar in Feminist and Queer Theories

3 Credits (3)

Seminar in contemporary feminist and queer theorizing that explores knowledge production, key debates, and transformation. Course examines interconnectedness of feminist and queer theories as well as critical concepts for social change and worldmaking.

Learning Outcomes

1. Demonstrate through discussion, research, and writing knowledge of shifts, differences, and debates in feminist and queer theoretical discourses.
2. Analyze a range of contemporary feminist and queer critical theories in discussions, essay assignments, and exams.
3. Formulate theories and forge connections between feminist and queer discourses through written and other assignments

GNDR 474. Gender in East Asian History

3 Credits (3)

Examines the position of women and the social roles of both sexes in traditional China and Japan, and traces the changes taking place in those societies in the course of modernization in the last century and a half. Scholarly literature and works of Chinese and Japanese literature in translation and cinema used. Taught with HIST 474.

GNDR 482. Gender and Popular Culture

3 Credits (3)

Intensive study of the representations of gender in popular culture. Examines the historical, aesthetic, and cultural contexts of these representation and the various critical and theoretical lenses we use to understand them. Repeatable under different subtitles. May be repeated up to 6 credits.

GNDR 501. Advanced Women & Immigration

3 Credits (3)

Advanced exploration of historical and contemporary immigration processes in/to the U.S. that are shaped by gendered dynamics, societal structures, and the socio-economic conditions that impact immigrant women. Examines how immigrant women use their agency and resistance to overcome exploitative circumstances, and the restraints

of immigration laws and policies that impact individual, communal and societal change.

GNDR 502. Advanced Transnational Feminisms

3 Credits (3)

Advanced analysis of dimensions of gender, race, class, and sexuality in conjunction with nationalisms, anti-capitalist struggles, religious fundamentalism, militarism, globalization, eco-critique, and the politics of resistance and social movements.

GNDR 505. Advanced Alternative Genders and Sexualities

3 Credits (3)

Intensive exploration of queer, transgender, non-binary, and intersex gender identities and queer/non-heterosexual sexualities through literature, film, and critical theory.

GNDR 506. Advanced Women and Human Rights

3 Credits (3)

Advanced analysis of human rights violations and injustices as they relate to the lives of girls and women. Intensive examination of international political, legal, economic and socio-cultural implications of violence that target women and girls. Focusing on different countries, explores social, political, economic, and human rights.

Learning Outcomes

1. Students will evaluate socio-culturally sanctioned practices that often lead to widespread victimization of girls/ women/womxn
2. Students will better understand the application of Human Rights discourse and Human Rights remedies to women's, womxn's, and girls' rights

GNDR 507. Advanced Gender and Graphic Narrative

3 Credits (3)

Advanced examination of graphic novels that disrupt stereotypical ideas about genre, gender, race, class sexuality, as well as common notions about comics. Considers texts that address underrepresented experiences.

GNDR 508. Advanced Feminist Food Studies

3 Credits (3)

Advanced examination of contemporary food writing as a way to study identity, social structures, and notions of acceptability. Intensive exploration of how constructions of food shape bodies, desires, and notions of belonging.

Learning Outcomes

1. Apply critical thinking and critical writing competencies about race ethnicity, gender sexuality, and class, as well as food and culture.
2. Analyze representations of food and culinary practices in literature, film, and other cultural production as a reflection of larger social forces.
3. Develop a scholarly vocabulary for discussing themes of race and ethnicity, gender and sexuality, class, citizenship and belonging, dislocation and exile, labor and consumption.

GNDR 511. Advanced Gender and Migration

3 Credits (3)

Advanced exploration of multiple experiences of forced migration and displacement. Intensive examination of violence, structural dislocation, neoliberalism, globalization, economic collapse and civil war. Discusses local, regional and global responses to creating meaningful change in communities most affected by migration.

GNDR 512. Advanced Gender and Film Studies

3 Credits (3)

Advanced study of how movies have created, reflected, and shaped ideas about gender, sexuality, race, and other dimensions of identity. This

class analyzes these representations, how they create meaning, how they function within the filmic medium, and how some filmmakers create alternative visions.

Learning Outcomes

1. To develop skills to critically analyze films
2. To gain a grounding in the analysis of social identity categories, with an emphasis on race and gender
3. To analyze how race and gender are represented in popular culture and why media representation matters
4. To learn critical tools to think through contemporary discourses on gender, race, and sexuality as well as categories of difference and identity

GNDR 533. Advanced Issues in Sex, Gender, and Culture

3 Credits (3)

Survey of the history of anthropological ideas about gender and women, and a comparison of gender roles, relations, and ideologies across a range of cultures. Same as ANTH 533.

Learning Outcomes

1. Explain to others how you understand the concepts of sex, women, gender, and culture.
2. Critically analyze the uses of these concepts across a range of different contexts including media, politics, cultural performance, and everyday interactions.
3. Apply theoretical concepts introduced in this class to a current anthropological research problem/topic.

GNDR 550. Special Topics

3 Credits (3)

The topic of course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 500-level from any specific department. May be repeated up to 99 credits.

Learning Outcomes

1. Varies

GNDR 554. Advanced Issues in Women Crossing Borders

3 Credits (3)

Experiences of women who cross class, race, cultural, national, or sexual borders including theories regarding women's interactions across borders. Consent of Instructor required.

GNDR 555. Advanced Feminist Research Methodologies

3 Credits (3)

Study of feminist modes of research inquiry, feminist ethics in research, and critiques of traditional disciplinary approaches to research.

Learning Outcomes

1. Students will recognize how theories and research methods influence the subjects and outcomes of studies.
2. Students will understand feminist practices associated with evolving epistemologies, research strategies, and calls for social change.
3. Students will develop and practice skills in designing, conducting, and analyzing narratives in ways that utilize feminist theory and research methods.

GNDR 561. Independent Graduate Research in Gender & Sexuality Studies

3 Credits (3)

Individual study of selected topics and writing of a research paper. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

GNDR 565. Advanced Sex, Gender & the Body**3 Credits (3)**

Advanced examination of forces at work in defining and differentiating gender, race, sexuality. How ideas about what is 'natural' and 'normal' for men and women shifted over time. Considers different discourses shaping embodied experiences and categories of identity.

GNDR 571. Advanced Seminar in Feminist and Queer Theories**3 Credits (3)**

Seminar in contemporary feminist and queer theorizing that explores knowledge production, key debates, and transformation. Course examines interconnectedness of feminist and queer theories as well as critical concepts for social change and worldmaking.

Learning Outcomes

1. Students will be able to demonstrate through discussion, research, and writing knowledge of shifts, differences, and debates in feminist and queer theoretical discourses.
2. Students will be able to analyze a range of contemporary feminist and queer critical theory in discussions, essay assignments, and exams.
3. Students will be able to formulate theories and forge connections between feminist and queer discourses through written and other assignments.

GNDR 582. Gender and Popular Culture**3 Credits (3)**

Intensive study of the representations of gender in popular culture. Examines the historical, aesthetic, and cultural contexts of these representation and the various critical and theoretical lenses we use to understand them. Repeatable under different subtitles. May be repeated up to 6 credits.

GPHY-GEOPHYSICS

GPHY 450. Selected Topics**1-3 Credits**

Readings, discussions, lectures or laboratory studies of selected areas of geophysics. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

GPHY 520. Selected Topics**1-3 Credits**

Formal treatment of graduate topics not covered in regular courses. May be repeated for unlimited credit.

Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

GPHY 560. Applied Inverse Theory**3 Credits (3)**

Inversion of data with an emphasis on geophysical problems. Curve fitting, tomography, earthquake location, over determined and under determined problems, linear and nonlinear problems. Computing experience desirable. Consent of Instructor required.

GPHY 598. Special Research Problems**1-3 Credits**

Individual investigations, either analytical or experimental. May be repeated for unlimited credit.

GPHY 599. Master's Thesis**1-15 Credits (1-15)**

Thesis.

GPHY 620. Advanced Topics in Geophysics**3 Credits (3)**

Advanced formal treatment of a topic or topics not covered in regular courses. May be repeated for unlimited credit.

Prerequisite: consent of instructor.

GPHY 700. Doctoral Dissertation**1-15 Credits (1-15)**

Dissertation.

GREX-GRAD CROSS UNIV EXCH

GREX 600. Graduate Cross University Exchange**1-9 Credits**

GRMN-GERMAN

GRMN 1110. German I**4 Credits (4)**

Intended for students with no previous exposure to German, this course develops basic listening, speaking, reading, and writing skills aiming toward the ACTFL novice-mid level. This is an introductory course designed to teach the student to communicate in German in everyday situations and to develop an understanding of German cultures through the identification of cultural products and practices, of cultural perspectives, and the ability to function at a survival level in an authentic cultural content. This course will also develop the student's sense of personal and social responsibility through the identification of social issues.

Learning Outcomes

1. Students can communicate on very familiar topics using a variety of words and phrases that they have practiced and memorized.
2. Students can write lists and memorized phrases on familiar topics.
3. Students can recognize some familiar words and phrases when they hear them spoken.
4. Students can recognize some letters or characters.
5. Students can understand some learned or memorized words and phrases when they read.
6. Students can identify beliefs, behaviors and cultural artifacts of the German-speaking world.
7. In English, students will engage with social issues confronting the German-speaking world to develop their sense of personal and social responsibility

GRMN 1120. German II**4 Credits (4)**

A continuation of German 1, students will develop a broader foundation in skills gained during the first semester, including understanding, speaking, reading and writing German aiming toward the ACTFL novice-high level. This course is designed to increase student fluency in German as applied to everyday situations. Students will also learn to recognize and understand various German products, practices, and perspectives, identifying common cultural patterns, describing basic cultural viewpoints, and further developing their sense of personal and social responsibility through the investigation of cultural issues.

Prerequisite(s): C or better in GRMN 1110.

Learning Outcomes

1. Students can communicate and exchange information about familiar topics using phrases and simple sentences, sometimes supported by memorized language.
2. Students can usually handle short social interactions in everyday situations by asking and answering simple questions.

3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.
8. Students can describe and make comparisons between decisions about beliefs, behaviors and cultural artifacts of the German-speaking world.
9. Students will engage with social issues confronting the German-speaking world to continue to develop their sense of personal and social responsibility.

GRMN 2110. German III

3 Credits (3)

In this third semester course, students will continue to develop a broader foundation in skills gained during the first two semesters, including understanding, speaking, reading and writing German aiming toward the ACTFL intermediate-low level. This course is designed to teach the student to communicate in a more sustained way in areas of personal interest and in everyday situations. Students will engage in and analyze various German products, practices, and perspectives, as well as continue to develop their sense of personal and social responsibility through comparison and contrast of cultural perspectives.

Prerequisite(s): C or better in GRMN 1120.

Learning Outcomes

1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write briefly about most familiar topics and present information using a series of simple sentences.
4. Students can understand the main idea in short, simple messages and presentations on familiar topics.
5. Students can understand the main idea of simple conversations that they overhear.
6. Students can understand the main idea of short and simple texts when the topic is familiar.
7. Students can analyze beliefs, behaviors and cultural artifacts of the German-speaking world, and discuss the nature and value of German products, practices, and perspectives.
8. Students will engage with social issues confronting the German-speaking world to continue to develop their sense of personal and social responsibility.

GRMN 2120. German IV

3 Credits (3)

In this fourth semester course, students will continue to broaden and refine skills gained during previous semesters, including understanding, speaking, reading and writing German aiming at the ACTFL intermediate-mid level. This course is designed to teach the student to communicate in a more sustained way in situations that go beyond the everyday. Students will evaluate various German products, practices, and create ways to demonstrate their sense of personal and social responsibility through participation in cultural interaction.

Prerequisite(s): C or better in GRMN 2110.

Learning Outcomes

1. Students can participate in conversations on familiar topics using sentences and series of sentences.
2. Students can engage in short social interactions in everyday situations by asking and answering a variety of questions. Students can usually say what they want to say about themselves and their everyday life.
3. Students can write on a wide variety of familiar topics using connected sentences.
4. Students can understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
5. Students can understand the main idea of conversations that they overhear.
6. Students can understand the main idea of texts related to everyday life and personal interests or studies.
7. Students can analyze beliefs, behaviors and cultural artifacts of the German-speaking world, and recognize and discuss the representations and controversies of German products, practices, and perspectives.
8. Students will engage with social issues confronting the German-speaking world to create ways to demonstrate their sense of personal and social responsibility.

GRMN 305. Topics in German Culture

3 Credits (3)

Group study of selected topics focusing on German culture and civilization. This course is linked to FLiP courses (Faculty-Led international Programs) when applicable. Topics identified by subtitle in the Schedule of Classes. GRMN 2120 or equivalent is recommended. May be repeated for up to 6 credits with different topics.

Learning Outcomes

1. (Language) Students will show more confidence in their German speaking, listening and writing abilities.
2. (Culture): Students will demonstrate knowledge of the culture of German institutions, of Berlin (through reflection and discussion sessions) after visits to historical, architectural and cultural sites as well as direct interaction with the locals.
3. (Culture): Students will demonstrate competence at navigating a culture different from their own.
4. (Culture): Students will demonstrate (through reflection and discussion sessions) a greater appreciation for the diversity of German identity.

GRMN 313. Intermediate Composition and Grammar

3 Credits (3)

A review of the rules of German grammar. Development of written German skills. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.

Learning Outcomes

1. Students will show their improvement in writing skills in German through the application of accurate grammar rules practiced in the course.
2. Students will show their improvement in vocabulary usage in German by using more varied and appropriate vocabulary in their writing.
3. Students will show their improvement in writing organization.

GRMN 326V. Transnational German Film

3 Credits (3)

The film industry has kept abreast of globality, glocality, cultural, and linguistic diversity. In this course we will cover examples of German film from its impressionist beginnings to the current globally influenced, and technologically advancing style and will look at palpable transnational aspects, including Turkish-German cinema and refugees on- and off-screen. We will focus on how the turn towards a transnational understanding of film provides a space for a more globally connected and inclusive cinema and world

Learning Outcomes

1. Students analyze how ideas are represented, interpreted, or valued in various expressions of human culture.
2. Students examine relevant primary source materials as understood by the humanities area under study and interpret the material in writing assignments (or alternatives that require equally coherent and sustained analysis).
3. Students examine the messages embedded in images and relate them to their own culture(s).
4. Students will be conversant in film techniques, film genres, film history, politics, and culture of the time in which the film was made.
5. Students will practice and express aesthetic judgement in the form of analysis and assessment of film as an art form, both through discussion and through writing.
6. Students will be expected to identify and interpret key themes and topics related to Transnational 'German' Cinema.

GRMN 340. Introduction to Translation

3 Credits (3)

General aspects of Translation from German to English and English to German. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate understanding of the concept of translation by reading translation theory.
2. Demonstrate an enhanced knowledge of German as related to translation practices.
3. Demonstrate the ability to use specialized vocabulary and concepts in various professional areas.
4. Demonstrate knowledge of the translator's place as a professional.
5. Develop and enhance their linguistic competence and cultural awareness.

GRMN 341. German Folklore and Culture

3 Credits (3)

Customs, traditions, mythology, folk literature and art. Special focus on Grimms' fairy tales. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate improvement in reading skills in German by one ACTFL level by augmenting vocabulary, grammatical accuracy, and reading comprehension skills.
2. Describe the 5 basic motifs in folktales (FT) and where they supposedly come from.
3. List and define the 9 types of FT (Teverson) according to their functions.
4. Discuss the impact of the enlightenment in the structure of FT, Evaluate the influence of the industrial revolution and the development of a bourgeois society in FT.
5. Critique the position of the present-day, pop-cult media in its recently created versions of FT.

GRMN 350. Introduction to German Literature

3 Credits (3)

Basic literary genres and major figures in German language literature from its beginnings to the 19th century. GRMN 2120 or equivalent is recommended. To be followed by GRMN 471 - Studies in German Literature. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes

1. Demonstrate an improvement on reading skills in German by one ACTFL level by augmenting active vocabulary, grammatical accuracy and reading comprehension skills.
2. Describe the authors, styles and basic discourses of 3 periods of German-language literature (old and middle high German from early the medieval literature, the protestant reformation; High German and literature academies: the fifteenth to seventeenth Centuries; and the Eighteenth Century).

GRMN 399. Intermediate Independent Study in German

1-3 Credits (1-3)

Tutorial in reading, writing and oral expression for intermediate-level students of German. Topics identified in the Schedule of Classes. GRMN 2120 or equivalent is recommended. May be repeated for up to 6 credits with different topics. May be repeated up to 6 credits. Consent of Instructor required.

Learning Outcomes

1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.

GRMN 410. Practicum in Conversational German

1-3 Credits

Intensive oral communication practice for students with a strong German language foundation. May be repeated up to 6 credits.

Prerequisite(s): GRMN 325 or consent of instructor.

Learning Outcomes

1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.

GRMN 413. Advanced Composition and Grammar

3 Credits (3)

Exercises in written German with emphasis on stylistic features.

Prerequisite: GRMN 313 or consent of instructor.

GRMN 451. Special Topics in German

1-3 Credits

Selected topics to be identified by subtitle in the Schedule of Classes. May be repeated for up to 6 credits with different topic. May be repeated up to 12 credits.

Learning Outcomes

1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.

GRMN 453. Independent Studies in German

1-3 Credits (1-3)

Individualized, self-paced research projects for advanced-level students of German. Topics identified by subtitle in the Schedule of Classes. GRMN 2120 or equivalent is recommended. May be repeated up to 12 credits.

Learning Outcomes

1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.

HIST-HISTORY

HIST 1105G. Making History

3 Credits (3)

General introduction to history: how historians carry out research and develop interpretations about the past.

Learning Outcomes

1. Understand and articulate the differences and similarities between history and memory;
2. Analyze and critically interpret primary sources and understand how others might interpret and use the same material in different ways;
3. Recognize and appreciate the diversity of historical experiences and the uses of historical memory in various societies;
4. Understand how historical experiences that include political, geographical, social, cultural, religious and intellectual experiences have been expressed across historical periods;
5. Understand how historical experiences and memories have shaped contemporary societies;
6. Identify and understand the degree to which history has been used and misused in the past;
7. Demonstrate improvement in their ability to read critically, think logically, and express themselves clearly in writing.

HIST 1110G. United States History I

3 Credits (3)

The primary objective of this course is to serve as an introduction to the history of the United States from the pre-colonial period to the immediate aftermath of the Civil War. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of the United States within the context of world societies.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the United States from the pre-colonial period to the immediate aftermath of the Civil War. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply 8
6. Students will APPLY historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze 9

HIST 1120G. United States History II

3 Credits (3)

The primary objective of this course is to serve as an introduction to the history of the United States from reconstruction to the present.

The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of the United States within the context of world societies.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the United States from the reconstruction to the present. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze 10 11

HIST 1130G. World History I

3 Credits (3)

The primary objective of this course is to serve as an introduction to global history from ancient times to the 16th century. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of world societies. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for global history from ancient times to the 16th century. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply

6. Students will apply historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.” Bloom Taxonomy’s Cognitive Process: Apply, Analyze

HIST 1140G. World History II

3 Credits (3)

The primary objective of this course is to serve as an introduction to global history from the 16th century to the present. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of world societies. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of global history from the 16th century to the present. Bloom Taxonomy’s Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy’s Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy’s Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy’s Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy’s Cognitive Process: Create, Apply
6. Students will Apply historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.” Bloom Taxonomy’s Cognitive Process: Apply, Analyze

HIST 1150G. Western Civilization I

3 Credits (3)

This course is a chronological treatment of the history of the western world from ancient times to the early modern era. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of western civilization within the context of world societies. Selective attention will be given to “non-western” civilizations which impact and influence the development of “western” civilization.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the western world from ancient times to the early modern era. Bloom Taxonomy’s Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy’s Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy’s Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective,

and relevance. Bloom Taxonomy’s Cognitive Process: Remember, Understand, Evaluate

5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy’s Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.” Bloom Taxonomy’s Cognitive Process: Apply, Analyze 14

HIST 1160G. Western Civilization II

3 Credits (3)

This course is a chronological treatment of the history of the western world from the early modern era to the present. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of western civilization within the context of world societies. Selective attention will be given to “non-western” civilizations which impact and influence the development of “western” civilization.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the western world from the early modern era to the present. Bloom Taxonomy’s Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy’s Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy’s Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy’s Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy’s Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.” Bloom Taxonomy’s Cognitive Process: Apply, Analyze

HIST 1180. MODERN LATIN AMERICA

3 Credits (3)

The primary objective of this course is to serve as a survey of the history of Latin America from independence to the present. This course will explore the contributions of Indigenous peoples, Africans, and Europeans to the creation of Latin America’s diverse societies. The elements of this course are designed to inform students on the major events and trends that are essential to the understanding of the history of Latin America within the context of world societies.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of Latin America from independence to the present. Bloom Taxonomy’s Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their

historical context. Bloom Taxonomy's Cognitive Process: analyze, remember, evaluate, create

3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: understand, evaluate, apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: remember, understand, evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: create. apply
6. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: apply, analyze

HIST 2110. Survey of New Mexico History

3 Credits (3)

The primary objective of this course is to serve as an introduction to the history of New Mexico from the pre-Columbian times to the present day. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of New Mexico within the context of the Americas.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of New Mexico from pre-Columbian times to the present day. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze 16

HIST 2245G. Islamic Civilizations to 1800

3 Credits (3)

History of Islamic civilizations to 1800.

Learning Outcomes

1. By the conclusion of the course, the student will be able to demonstrate a knowledge of the history of cultural encounters, exchanges, and conflicts between the Islamic world and the West from the seventh to the sixteenth century;
2. Be able to evaluate the major themes of cultural contact, conflict, and interchange between the Islamic world and the West;
3. Critically read and evaluate historical evidence with the goal of forming an argument about historical evidence

4. Communicate a historical argument logically, clearly, and effectively in writing.

HIST 2246G. Islamic Civilizations since 1800

3 Credits (3)

History of Islamic civilizations since 1800.

Learning Outcomes

1. By the conclusion of the course, the student will be able to demonstrate a knowledge of the history of cultural encounters, exchanges, and conflicts between the Islamic world and the West from the sixteenth century;
2. Be able to evaluate the major themes of cultural contact, conflict, and interchange between the Islamic world and the West;
3. Critically read and evaluate historical evidence with the goal of forming an argument about historical evidence
4. Communicate a historical argument logically, clearly, and effectively in writing.

HIST 2250G. East Asia to 1600

3 Credits (3)

History of China, Korea, Vietnam, and Japan from earliest times through the sixteenth century. Emphasis on cultural and political developments and their social and economic contexts, and the interaction between East Asian societies.

Learning Outcomes

1. Students will learn the analytic skills of interpreting historical changes and continuity.
2. They will assess and use historical documents, and learn how to evaluate varying historical interpretations.
3. Students will understand the chronological and geographic context of important historical events, and will understand the social, technological, economic, cultural and political components of the society under study in this course.
4. Students will understand how people shape their culture and its beliefs, and the way in which prevailing cultures and beliefs shape them.
5. They will understand the historical origins of present-day societies, to learn about their own historical roots.
6. They will learn about the development of structures of power, the production of and distribution of goods, and the relationship between science and technology and human values and behavior.

HIST 2251G. East Asia since 1600

3 Credits (3)

History of China, Korea, Vietnam, and Japan from the sixteenth through the twentieth centuries. Emphasis on internal development of each country, as well as the social and political impact of Western Imperialism, and the emergence of each country's unique version of modern society.

Learning Outcomes

1. Students will learn the analytical skills of interpreting historical changes and continuity.
2. They will assess and use historical documents, and learn how to evaluate varying historical interpretations.
3. Students will understand the chronological and geographic context of important historical events, and will understand the social, technological, economic, cultural and political components of the society under study in this course.
4. Students will understand how people shape their culture and its beliefs, and the way in which prevailing cultures and beliefs shape them.

5. They will understand the historical origins of present-day societies, to learn about their own historical roots.
6. They will learn about the development of structures of power, the production of and distribution of goods, and the relationship between science and technology and human values and behavior.

HIST 2996. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. Community Colleges only. May be repeated for a maximum of 12 credits.

Learning Outcomes

1. Varies

HIST 300. Special Topics**1-9 Credits (1-9)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits.

HIST 302V. Science in Modern Society**3 Credits (3)**

The social impact of scientific activity and thought from Newton to the present. The growth of modern scientific institutions; the political and social context of modern science. ENGL 1110G recommended.

HIST 308V. The History of Food**3 Credits (3)**

From the earliest uses of fire for cooking up through our modern age of fast food and organic gardening, human culinary traditions have long shaped and been shaped by the forces of history. This course offers a general overview of the history of food production and consumption in the West from prehistoric times through the 21st century, with a special focus on the various ways in which social and political history have impacted dining, taste, and cooking. Among a great variety of topics, we will focus on the origins of cooked food; ancient Hebrew dietary laws; the "spice revolution" and the great influence of Arabic cuisine on the kitchens of medieval Europe; emerging ideas about etiquette and table manners including the use of the fork; the advent of print and the first printed cookbooks; the Columbian Exchange and the arrival of foods from the New World; the rise of French cuisine; food and immigration; the global dominance of fast food; and sustainable food production and consumption in the modern era. We will pay a special emphasis throughout the course to the myriad ways in which food production and consumption in history have always been gendered, as well as influenced by ideas about social class.

Learning Outcomes

1. Master a general master narrative about the history of food in the Western World, including a variety of European countries;
2. Analyze the relationship between food and culture in a variety of countries and traditions;
3. Critically read and learn to evaluate secondary historical literature, grasping the strengths and weaknesses of historical monographs; and
4. Communicate a historical argument logically and effectively in a 20-page original research paper.

HIST 311V. Colonial Latin America**3 Credits (3)**

Social, political, and economic development from Columbus to the Wars of Independence. Research paper required.

HIST 312V. Modern Latin America**3 Credits (3)**

Post-revolutionary developments in the nineteenth and twentieth centuries; the role of Latin America in world affairs and the Inter-American system. Research paper required.

HIST 313. Making the American West**3 Credits (3)**

Development of the American West from 1803 to 1900 with emphasis on conquest, federal and corporate roles in western development, environmental change, and the Mythic West. Includes meetings outside regular class time to view feature-length films.

HIST 320. American History Through Film**3 Credits (3)**

This course uses feature films as texts to examine the depiction of major themes and events in American history and society. It considers both the accuracy of these depictions, and the way in which the historical viewpoint of feature films is influenced by factors including directorial point of view and popular memory. It also examines the influence of feature films on popular understandings of the American past. May be repeated up to 3 credits.

Learning Outcomes

1. Students will critically analyze and evaluate the accuracy and truthfulness of cinematic representations of episodes in U.S. history, and convey these analyses and evaluations orally and in writing.
2. Students will evaluate contemporary claims made concerning the value of films for historical understanding, and convey these analyses and evaluations orally and in writing.
3. Students will assess the ways in which films serve as historical documents that illuminate the cultural, social, and political history of the eras in which they were produced, and convey these analyses and evaluations orally and in writing.

HIST 321V. History of Korea**3 Credits (3)**

Social, political, and cultural history of Korea from earliest times through twentieth century. Emphasis on the interaction between Korean traditions and influences from China and the West. May be repeated up to 3 credits.

Learning Outcomes

1. Students will learn the analytical skills of interpreting historical changes and continuity.
2. They will assess and use historical documents, and learn how to evaluate varying historical interpretations.
3. Students will also understand the chronological and geographic context of important historical events, and will understand the social, technological, economic, cultural and political components of the society under study in this course.
4. Students will examine how people shape their culture and beliefs, and the way in which prevailing cultures and beliefs shape them.
5. They will understand the historical origins of present-day societies, to learn about their own historical roots.
6. They will learn about the development of structures of power, the production of and distribution of goods, and the relationships between science and technology and human values and behavior.

HIST 323. Cultural History of Later Imperial China**3 Credits (3)**

Covers art and literature of China from the Tang Dynasty (618-907) through the eighteenth century. Developments in cultural theory and practice are traced in the context of the social and economic changes fostering an understanding of Chinese cultural history and its legacy in East Asia today.

HIST 329. History of Egypt**3 Credits (3)**

History of Egypt from ancient times to the present.

HIST 330V. Introduction to Religious Studies**3 Credits (3)**

Provides an overview of old and new methods and theories for the study of religion. Exposure to the ways groups of people in diverse cultural systems construct and change their religious traditions to serve practical and meaningful ends. May be repeated up to 3 credits.

HIST 331. Rebels, Guerrillas, and Terrorists in Modern Latin America**3 Credits (3)**

Explores history of rebels in Latin America. Examines guerilla struggles attaining national dimension. Focus on modern events, including Peru's Shining Path, Colombia's FARC, and Mexico's Zapatistas. Same as POLS 468.

HIST 333. Renaissance Europe**3 Credits (3)**

This course explores the cultural, social, and political developments of early modern Europe between 1350-1650. This period witnessed a dramatic transformation between the medieval and modern worlds: a transition marked by new historical and artistic visions, the invention of the printing press, the discovery of the New World, the permanent fracturing of Christianity during the Protestant Reformation, the scientific revolution, and the rise of capitalism as a world system. We will consider these and other transformations in this time period both as they were understood by elite society as well as the impact of these innovations upon the daily lives of everyday people and women in particular.

Learning Outcomes

1. Identify the key historical facts, values, and ideas that shaped the history of Europe between 1400–1650;
2. Analyze the causes and effects of the Renaissance, the Age of Encounters, the Reformation, and the Scientific Revolution;
3. Identify the major artistic, literary, and technological contributions of individuals during this time period;
4. Describe how cultural exchanges reveal the global context of events in early modern Europe; and
5. Create well-supported historical arguments based on primary and secondary source evidence.

HIST 338. World War I**3 Credits (3)**

Cultural, social, and intellectual background and impact of World War I. Military and diplomatic events of the war. Consequences of the war.

HIST 339. World War II**3 Credits (3)**

Social, cultural and political aspects of World War II, in addition to traditional military events. Emphasis on U.S. involvement.

HIST 343. Recent American Military History**3 Credits (3)**

Emphasis on American wars since the Civil War, and on factors contributing to the development of modern military systems.

HIST 347. Civil War Era 1840-1877**3 Credits (3)**

Mexican-American War, development of secession, American Civil War, Reconstruction.

HIST 361. African American History to 1877**3 Credits (3)**

African background, slave trade, slavery; Civil War and Reconstruction; free blacks in a white society to about 1900. May be repeated up to 3 credits.

Learning Outcomes

1. Students will evaluate and employ primary and secondary sources in order to understand varying historical interpretations and craft their own interpretations of historical evidence in discussions and essays.
2. Students will analyze and compare political, economic, social and intellectual institutions, structures and processes over the period from the great African Empires (circa 900CE) to the end of the period of Reconstruction (1877), with particular focus on the experiences of African Americans.
3. Students will strengthen their argumentative skills through online class discussions and written assignments.
4. Students will demonstrate an understanding of academic honesty and the ability to cite, paraphrase, and quote sources.
5. Students will demonstrate an ability to think about the interaction between present and past issues presented in the class.

HIST 362. African American History, 1865-present**3 Credits (3)**

Black Americans in the United States in the twentieth century; segregation; black leaders, organizations, methods and goals; white reaction; the struggle for equality. May be repeated up to 3 credits.

Learning Outcomes

1. Students will evaluate and employ primary and secondary sources in order to understand varying historical interpretations and craft their own interpretations of historical evidence in discussions and essays.
2. Students will analyze and compare political, economic, social and intellectual institutions, structures and processes over the period of the Civil Rights Movement through readings, interaction with primary source documents, essays, and discussions.
3. Students will strengthen their argumentative skills through online class discussions and written assignments.
4. Students will demonstrate an understanding of academic honesty and the ability to cite, paraphrase, and quote sources.
5. Students will demonstrate an ability to think about the interaction between present and past issues presented in the class.

HIST 366V. British Imperialism**3 Credits (3)**

Survey of the activities of the British empire from the 16th century through the 20th century, with emphasis on Ireland, North America and India. Assesses the impact of imperial activities on British domestic politics, culture and social history, and the process and impact of decolonization.

HIST 368. Teaching History**3 Credits (3)**

Philosophical and practical issues of teaching history are explored. Designed to help prospective teachers at all levels clarify their views about studying history. A variety of pedagogical strategies for teaching history are explored.

HIST 371. Greek Civilization: From Helen of Troy to Alexander the Great
3 Credits (3)

This course provides a survey of Greek history from the Trojan War through the conquests of Alexander the Great. Topics include the formation of the Greek city-states with a focus on Sparta and Athens and the wars between them, the invention of democracy in Athens, the birth of the discipline of history, the development of philosophy, the trial and death of Socrates, and the spread of Greek culture to the borders of India

because of the conquests of Alexander the Great. We will explore most aspects of Greek society, using Greek authors and artists to introduce much of the material. Attention is paid to the everyday life of ancient Greeks not just power politics. May be repeated up to 3 credits.

Learning Outcomes

1. Students will define, explain, and analyze the major political, social and cultural transformations of Greek history through a variety of primary sources, including works of literature and art.
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context.
3. Students will critically read and evaluate historical evidence with the goal of forming an historical argument.
4. Students will communicate a historical argument logically, clearly, and effectively in writing.

HIST 372. Roman Civilization

3 Credits (3)

In this course we will explore the growth of Rome from a village in the Italian peninsula to a global empire stretching from Spain to Syria and Britain to the sands of the Sahara. We will focus on the development of political, social, and cultural institutions in the construction of the Roman Republic and the enormous military conquests of that period. We then examine the transformation of the Republic into an empire, governed by an emperor. Finally, we analyze the rise of Christianity in the Roman world and the Roman empire's decline in the 5th century C.E. Attention is paid to the everyday life of ancient Romans not just power politics. May be repeated up to 3 credits.

Learning Outcomes

1. Students will define, explain, and analyze the major political, social and cultural transformations of Roman history through a variety of primary sources.
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context.
3. Students will critically read and evaluate historical evidence with the goal of forming an historical argument.
4. Students will communicate a historical argument logically, clearly, and effectively in writing.

HIST 373. Islam and the West: Cultural Contacts, Conflicts, and Exchanges

3 Credits (3)

This course examines interactions, encounters, and cross-fertilization between the Islamic world and the West from the 7th– 21st century. Topics include the relationship of Islam to Judaism and Christianity, the rise of an Islamic empire and the development of Islamic civilization, the Crusades, the impact of Islamic culture on Europe and the Italian Renaissance. It also explores the shifting relationships between Muslims, Christians, and Jews throughout this period.

Learning Outcomes

1. Student will be able to demonstrate a knowledge of the history of cultural encounters, exchanges, and conflicts between the Islamic world and the West from the seventh to the early twenty-first century.
2. Students will be able to evaluate the major themes of cultural contact, conflict, and interchange between the Islamic world and the West.
3. Students will critically read and evaluate historical evidence with the goal of forming an argument about historical evidence.

4. Students will communicate a historical argument logically, clearly, and effectively in writing.

HIST 379V. The History of Italy from the Etruscans to the Mafia **3 Credits (3)**

Italy is beloved by many, for its food, language, and art; however, we often understand it only superficially, and often fail to grasp the darker elements of its history. This class will consider the history of the Italian peninsula from the time of its earliest inhabitants, the Etruscans, up through the twenty-first century. We will consider topics such as the Roman world and its legacy, the rise of Christianity, the growth of medieval towns and their economies, Renaissance, the Risorgimento or the formation of the modern nation of Italy, Italian fascism, the wars of the twentieth century, Italian film, the history of Italian food including pizza and pasta, Italian communism, and the growth of organized crime and the mafia. Special attention will be paid throughout to the relationship between Northern and Southern Italy, as well as the special city of Venice and its relationship to the rest of the peninsula.

Learning Outcomes

1. Master a general master narrative about the history of Italy from its earliest inhabitants through the twenty-first century
2. Identify a variety of developments in the history of Italian culture, including art, literature, food, and film;
3. Critically read and evaluate primary and secondary historical sources and
4. Communicate a historical argument logically and effectively in a 15-page original research paper.

HIST 382V. Modern Russia

3 Credits (3)

Domestic policies and foreign relations from mid-nineteenth century to the present with emphasis on the Soviet period.

HIST 383. Germany

3 Credits (3)

Political, social, and cultural developments from the eighteenth century to the present, with emphasis on the Nazi era. Same as POLS 473.

HIST 386. New Mexico History

3 Credits (3)

Economic, political and social development of New Mexico from exploration to modern times.

HIST 387. Spain in the New World: Conquest, Conflict, and Cultural Exchange

3 Credits (3)

The history of Spain, with a focus on Spain's interaction with the New World. May be repeated up to 3 credits.

Learning Outcomes

1. The student will be able to demonstrate a knowledge of the history of Spanish contacts, conquests, and influences in the New World from the late fifteenth century until the early twenty first century;
2. Be able to evaluate the major themes of cultural contact, conflict, and interchange between the Spain and the New World; Critically read and evaluate historical evidence in order to construct past events;
3. Communicate a historical argument logically, clearly, and effectively in writing.

HIST 390V. The Holocaust

3 Credits (3)

The attack upon European Jews by Adolf Hitler and the National Socialist Party in Germany and occupied Europe from his accession to chancellor in 1933 until the end of the Third Reich in 1945.

HIST 397. Introduction to Public History**3 Credits (3)**

Surveys how historians do history in museums, archives, government agencies, and in communities. Hands-on experience provides students a better understanding of history and how historians work outside of the classroom. Seminar project required.

HIST 398. Historians and History**3 Credits (3)**

General historiography and philosophy of history; historical methodology, research, and writing; bibliographical aids and their uses. May be repeated up to 3 credits. Restricted to: HIST majors.

HIST 400. Special Topics**1-9 Credits (1-9)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits.

HIST 402. Special Topics in European History**3 Credits (3)**

Special topics in European history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 403. Special Topics in Middle Eastern History**3 Credits (3)**

Special topics in Middle Eastern history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 404. Special Topics in Asian History**3 Credits (3)**

Special topics in Asian history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 406. Special Topics in United States History**3 Credits (3)**

Special topics in United States history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 413. Native American History**3 Credits (3)**

Seminar explores the history of Native Americans, including tribal conflicts, interactions with Europeans and Euro-Americans, land loss, degradation of natural resources, federal Indian policy, pan-Indian movements, cultural resistance and revitalization, and modern tribal economies.

HIST 414. The Constitution and U.S. History**3 Credits (3)**

This seminar examines the history and political context of the ideas that coalesced in the U.S. Constitution, from 1603 to the writing of the Constitution and into the Early Republic.

Learning Outcomes

1. Students will evaluate and employ primary and secondary sources in order to understand varying historical interpretations and craft their own interpretations of historical evidence in discussions and essays.
2. Students will analyze the relationship between historical events in the Atlantic world and the development of key political concepts including divine right monarchy, constitutional monarchy, individual representation, the social contract theory, checks and balances, and the theoretical and practical processes of constitution-writing and ratification.
3. Students will strengthen their critical thinking argumentative skills through class discussions.
4. Students will demonstrate public speaking and class leadership skills by preparing and leading class discussions.

5. Students will demonstrate an understanding of academic honesty and the ability to cite, paraphrase, and quote sources.
6. Students will demonstrate an ability to think about the interaction between present and past issues presented in the class.
7. Students will undertake a major project of historical synthesis at the end of the semester.

HIST 431. History of Race and Ethnicity**3 Credits (3)**

Seminar explores the historical social construction of race and ethnicity, and their relationship to other systems of social difference such as class and gender. Course will examine popular and academic theories of race and ethnicity as well as historical concrete effects of racial and ethnic differences in society.

HIST 433. United States Labor History Since 1877**3 Credits (3)**

Seminar discussions explore United States labor and working-class history since 1877, including such topics as industrial labor, debt peonage, and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state. May be repeated up to 3 credits.

HIST 434. Urban History**3 Credits (3)**

Seminar discusses cities as complex catalysts for cultural, political, and scientific development, both within cities themselves and more broadly for their nations and regions. Course deals with such topics as the relationship between social organization and physical space; city development, morphology and dynamics; and the cultural and intellectual history of cities.

HIST 435. History of War and Revolution**3 Credits (3)**

Seminar covers historical dynamics of violent social, political, and economic transitions. May focus upon a particular war or upheaval, such as World War II or the French Revolution, or may examine more generic characteristics of conflict and radical change across many historical examples. Extensive readings in scholarly literature. Research projects relating to specific course contents.

HIST 438. Antiquity and Modernity**3 Credits (3)**

Seminar explores links between earlier and more recent historical periods. Examples may include the Renaissance rediscovery of ancient Rome or the early modern Chinese reassessment of its classical Confucian heritage. Readings include ancient sources and the modern reception of such works, and the scholarly assessment of these processes. Individual research projects required in areas of student interests.

HIST 443. The Cold War in Latin America**3 Credits (3)**

Seminar discusses Latin American political history during the Cold War. Course focuses on how Latin Americans (individuals, parties, militaries, states) acted in an increasingly politicized arena defined by growing United States concerns over Cuban and Soviet influence in the area.

HIST 449. Readings**1-3 Credits**

Individual study of selected readings and problems. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

HIST 471. China through the Ming Dynasty**3 Credits (3)**

History of China from origins to Ming dynasty, (1368-1644). Cultural and political development with emphasis on social and economic contexts and long term trends.

HIST 472. China in the Modern World

3 Credits (3)

History of China from seventeenth through twentieth centuries. Rise and fall of the Manchu Qing dynasty, internal dynamics of social and political change in nineteenth and twentieth centuries, impact of Western Imperialism, and development of the Peoples Republic since 1949.

Learning Outcomes

1. Students will learn the basic narrative of modern Chinese history.
2. Students will learn to understand and evaluate historical arguments and interpretations.
3. Students will learn to work with primary sources and to analyze and interpret their contents.
4. Students will complete a research paper combining primary and secondary sources and making a sustained historical argument.

HIST 473. History of Japan

3 Credits (3)

History of Japan through twentieth century. Political and cultural developments and their social and economic contexts. Chinese influence on early Japan, rise of Samurai and Shogunate, impact of Western Imperialism, and emergence of modern Japan.

HIST 474. Gender in East Asian History

3 Credits (3)

Examines the position of women and the social roles of both sexes in traditional China and Japan, and traces the changes taking place in those societies in the course of modernization in the last century and a half. Scholarly literature and works of Chinese and Japanese literature in translation and cinema used. Same as GNDR 474.

HIST 475. History of the Global Political Economy

3 Credits (3)

Traces development of global systems of economic interaction and the rise of European military and political dominance in the 18th and 19th centuries. Emphasis on East and South Asian roles in early modern history, and on challenges to European dominance in the 20th and 21st centuries.

HIST 478. History of Transportation: Planes, Trains and Automobiles

3 Credits (3)

The course examines the impact of changes in transportation technology on society from the 19th century to the present, with a focus on the Americas, both the United States and Latin America. Revolutionary changes such as the railroad, the steamship, and later the automobile and the airplane changed the way that people lived, worked and interacted with others.

Learning Outcomes

1. Analyze primary sources by placing them into historical context.
2. Improve writing skills using Chicago style of writing.
3. Explain the nature of technological change in history and its impact in society.
4. Relate historical events to current-day debates about transportation.
5. Practice team-work through Team Based Learning method.

HIST 479. Oral History

3 Credits (3)

Oral history through readings, discussions, and interviews. Semester project required that includes an interview and transcript.

HIST 483. Historic Preservation

3 Credits (3)

Study of community development, the historic preservation movement, and the built environment. Field project.

HIST 486. Interpreting Historic Places for the Public

3 Credits (3)

Explores historic site interpretation, the scholarship and philosophy of historic interpretation, and the nature of heritage interpretation for historic places.

HIST 489. Projects in History

3 Credits (3)

Individual projects in history. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

HIST 500. Special Topics

1-9 Credits (1-9)

Specific subjects to be announced in the Schedule of Classes. Graduate research paper required. May be repeated for a maximum of 12 credits.

HIST 504. Civil War Era, 1840-1877

3 Credits (3)

Mexican-American War, development of secession, American Civil War, Reconstruction. Graduate research paper required.

HIST 511. Making the American West

3 Credits (3)

Development of the American West from 1803 to 1900, with emphasis on conquest, federal and corporate roles in western development, environmental change, and the mythic West. Includes extra class meetings to view feature-length films. Graduate research paper required.

HIST 514. The Constitution and U.S. History

3 Credits (3)

This seminar examines the history and political context of the ideas that coalesced in the U.S. Constitution, from 1603 to the writing of the Constitution and into the Early Republic.

Learning Outcomes

1. Students will evaluate and employ primary and secondary sources in order to understand varying historical interpretations and craft their own interpretations of historical evidence in discussions and essays.
2. Students will analyze the relationship between historical events in the Atlantic world and the development of key political concepts including divine right monarchy, constitutional monarchy, individual representation, the social contract theory, checks and balances, and the theoretical and practical processes of constitution-writing and ratification.
3. Students will strengthen their critical thinking argumentative skills through class discussions.
4. Students will demonstrate public speaking and class leadership skills by preparing and leading class discussions.
5. Students will demonstrate an understanding of academic honesty and the ability to cite, paraphrase, and quote sources.
6. Students will demonstrate an ability to think about the interaction between present and past issues presented in the class.
7. Students will undertake a 10-12 page research paper in which they will integrate and extend learned material.

HIST 523. The History of Food

3 Credits (3)

Considers the history of the production and consumption of food in the West from the Neolithic Age to the present with an emphasis on the

historical relationships between food, gender, social class, social identity and nationalism.

HIST 527. Labor History

3 Credits (3)

Seminar discussions explore labor and working-class history, including such topics as pre-industrial labor, slavery, debt peonage, indentured servitude, and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 535. War and Revolution

3 Credits (3)

Seminar covers historical dynamics of violent social, political and economic transitions. May focus upon a particular war or upheaval, such as World War II or the French Revolution, or may examine more generic characteristics of conflict and radical change across many historical examples. Extensive readings in scholarly literature. Research projects relating to specific course contents.

HIST 538. Special Topics in European History

3 Credits (3)

Advanced special topics in European history to be announced in the schedule of classes. May be repeated for a maximum of 12 credits.

HIST 540. Special Topics in Middle Eastern History

3 Credits (3)

Advanced special topics in Middle Eastern history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 543. Special Topics in Asian History

3 Credits (3)

Advanced special topics in Asian history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 545. Special Topics in United States History

3 Credits (3)

Advanced special topics in United States history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 549. Graduate Readings

1-3 Credits

Individual study of selected readings and problems. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

HIST 568. Urban History

3 Credits (3)

Seminar discusses cities as complex catalysts for cultural, political, and scientific development, both within cities themselves and more broadly for their nations and regions. Course deals with such topics as the relationship between social organization and physical space; city development, morphology and dynamics; and the cultural and intellectual history of cities.

HIST 570. The Cold War in Latin America

3 Credits (3)

Seminar discusses Latin American political history during the Cold War. Course focuses on how Latin Americans (individuals, parties, militaries, states) acted in an increasingly politicized arena defined by growing United States concerns over Cuban and Soviet influence in the area.

HIST 571. China through the Ming Dynasty

3 Credits (3)

History of China from origins to Ming Dynasty, 1368-1644. Cultural and political development with emphasis on social and economic contexts and long term trends. Research paper required.

HIST 572. China in the Modern World

3 Credits (3)

Covers the history of China from 17th through 20th centuries. Rise and fall of the Manchu Qing dynasty, internal dynamics of social and political change in the 19th and 20th centuries, impact of Western imperialism, and development of the Peoples Republic since 1949. Research paper required. May be repeated up to 3 credits.

Learning Outcomes

1. Students will learn the basic narrative of modern Chinese history.
2. Students will learn to understand and evaluate historical arguments and interpretations
3. Students will learn to work with primary sources and to analyze and interpret their contents.
4. Students will complete a research paper combining primary and secondary sources and making a sustained historical argument.

HIST 573. History of Japan

3 Credits (3)

Covers the history of Japan through the 20th century. Political and cultural developments and their social and economic contexts. Chinese influence on early Japan, rise of Samurai and Shogunate, impact of Western imperialism, and the emergence of modern Japan. Research paper required.

HIST 575. History of the Global Political Economy

3 Credits (3)

Traces development of global systems of economic interaction and the rise of European dominance in the 18th and 19th centuries. Emphasis on East and South Asian roles in early modern history, and on challenges to European dominance in the 20th and 21st centuries.

HIST 579. Oral History

3 Credits (3)

Oral history through readings, discussion, and interviews. Course project required that includes an interview and transcription.

HIST 580. Graduate Research Projects

1-6 Credits (1-6)

Intensive investigation of a selected area of history, including the completion of a research paper or a public history project. Consent of instructor required.

HIST 583. Advanced Historic Preservation

3 Credits (3)

Covers the community development, the historic preservation movement, and the built environment. Field project and additional graduate work.

HIST 585. Public History Internship

3 Credits (3)

Individual project in an area of public history, including a final written report. Research project required. May be repeated for a maximum of 9 credits.

Prerequisite: consent of instructor.

HIST 586. Interpreting Historic Places for the Public

3 Credits (3)

Advanced study of historic site interpretation, the scholarship and philosophy of historic interpretation, and the nature of heritage interpretation for historic places.

HIST 590. Reading Seminar: Borders, Boundaries and Frontiers

3 Credits (3)

Explores questions and issues concerning different kinds of borders, boundaries and frontiers. Introduces relevant theoretical literature and

considers specific places and times through case studies, including U.S.-Mexico border. Restricted to students in HIST program.

HIST 591. Reading Seminar: Modernity and its Discontents
3 Credits (3)

Examines the problem of modernization and the meaning of becoming and being modern, including positive and negative effects on individuals, cultures, environments and societies.

HIST 592. Reading Seminar: Nature and Society
3 Credits (3)

Considers how humans and nature have reshaped each other, how people have perceived nature, how different cultures have understood their relationships to nature, and how social groups and nations have struggled over natural resources. Takes a comparative, transnational approach.

HIST 593. Reading Seminar: History, Myth and Memory
3 Credits (3)

Course analyzes the complex and often contested process of writing national histories, creating national heroes, and forging collective memories. Students assess written texts, memorials, parades and celebrations.

HIST 594. Public History Seminar
3 Credits (3)

Introduction to the discipline of public history, including its methodology and literature. Fieldwork is required.

HIST 596. Research Seminar
3 Credits (3)

Research seminar teaches students the process of conducting original historical research with primary source documents. Students will then use these research skills to produce a polished chapter or article-length manuscript. Restricted to HIST majors.

HIST 597. Public History Article
1-9 Credits (1-9)

Researching and writing an article suitable for publication about a student's public history internship or other topic of interest within the field of public history.

HIST 598. Craft of History: Historical Theories, Methods, and Criticism (f)
3 Credits (3)

Introduction to historical theories, methodologies, criticism, and skills essential to graduate study in history. Required for all history graduate students; restricted to history majors.

HIST 599. Master's Thesis
1-15 Credits (1-15)

Thesis.

HIT-HEALTH INFO TECHNOLOGY

HIT 110. Electronic Health Records
3 Credits (3)

Current electronic health record principles, methods and procedures, and computerized medical record concepts and software applications will be introduced. Restricted to: Community Colleges only.

HIT 120. Health Information Introduction to Pharmacology
3 Credits (3)

Introduction to the principles of pharmacology, including drug terminology; drug origins, forms, and actions; routes of administration; as well as the use of generic name drugs, trade name drugs and categories of drugs to treat multiple and specific body systems. Crosslisted with: NURS 120. Restricted to Community Colleges campuses only.

Learning Outcomes

1. List and define the major pharmacological drugs and common generics used in healthcare.
2. Distinguish between local, systemic, therapeutic, allergic, and side effects of the drugs.
3. Describe the pharmacological action of common drugs and drug categories used to treat each body system, including usage, dosage, adverse effects, contraindications, indications, and key client education information.
4. Identify basic laws and ethics associated with pharmacological preparation and distribution.
5. Describe the principle mechanisms of actions, usage, dosage, adverse effects, contraindications, indications, and key client education information for drug classifications affecting multiple body systems. List several routes of drug administration and describe their advantages and disadvantages.

HIT 130. Health Information Technology Anatomy & Physiology
3 Credits (3)

An introductory course in the basics of human structure and function. Body systems are examined as to how they relate to proper code selection and as part of the functioning of the body as a whole. Restricted to Community Colleges campuses only.

HIT 140. Health Information Introduction to Pathophysiology
3 Credits (3)

Introduction to the nature of disease and its effect on body systems. Disease processes affecting the human body via an integrated approach to specific disease entities will be presented including a review of normal functions of the appropriate body systems. Diseases will be studied in relation to their etiology, pathology, physical signs and symptoms, diagnostic procedures, complications, treatment modalities and prognosis.

HIT 150. Introduction to Medical Terminology
3 Credits (3)

The study and understanding of medical terminology as it relates to diseases, their causes and effects, and the terminology used in various medical specialties. Emphasis will be placed on learning the basic elements of medical words, appropriate spelling and use of medical terms, and use of medical abbreviations. Crosslisted with: OATS 150. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Identify and define medical word roots, prefixes, and suffixes and abbreviations.
2. Examine and correctly spell medical terms using the basic elements of medical words.
3. Recall and properly pronounce common medical terms and the terminology related to the body's major organ systems.
4. Identify the primary medical terms used in various medical specialties.

HIT 158. Advanced Medical Terminology
3 Credits (3)

Builds upon the concepts covered in HIT 150 or AHS 120 providing greater understanding of how to properly use and apply medical terminology used in the various health fields. Medical terminology associated with the body system's anatomy and physiology, pathology, diagnostic and therapeutic procedures, pharmacology, and abbreviations will be emphasized. Restricted to Community Colleges campuses only.

Prerequisite(s): HIT 150 or AHS 120.

HIT 221. Internship I**3 Credits (3)**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. C- or better is required for this course. Consent of Instructor required. Restricted to: BOT,HIT majors. Restricted to Community Colleges campuses

HIT 228. Medical Insurance Billing**3 Credits (3)**

Comprehensive overview of the insurance specialist's roll and responsibilities. Concepts and applications that will assist the student in understanding the steps necessary for successfully completing the insurance claim filing and reimbursement processes for various insurance carriers, both private and government, will be emphasized. May be repeated up to 3 credits.

Prerequisite: HIT/NURS 150; BOT 208.

HIT 240. Health Information Quality Management**3 Credits (3)**

Introduction to basic concepts of quality improvement and performance improvement as they apply to health record systems and the health care industry. Quality assessment and improvement standards and requirements of licensing, accrediting fiscal and other regulatory agencies will be presented.

HIT 248. Medical Coding I**3 Credits (2+2P)**

Comprehensive overview of the fundamentals, coding conventions, and principles of selecting the most appropriate ICD-10-CM/PCS diagnostic and procedure codes. The most recent version of ICD-10-CM/PCS and an in depth study of current Official Coding Guidelines for coding and reporting will be emphasized. Restricted to Community Colleges campuses only.

Prerequisite: OATS 228.

Learning Outcomes

1. Demonstrate the ability to interpret inpatient/outpatient record documentation to identify diagnosis and services/procedures including assessing and managing patient records, and reimbursement and legal issues.
2. Identify and demonstrate and understanding of the information pertinent to accurate insurance coding and reimbursement issues by appropriately applying regulatory agency guidelines.
3. Analyze patient records in order to define diagnoses to properly determine and assign diagnostic codes.

HIT 255. Special Topics**3 Credits (3)**

Specific topics to be announced in the Schedule of Classes. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

HIT 258. Medical Coding II**3 Credits (2+2P)**

Continuation of Medical Coding I. Comprehensive overview of the coding and reporting guidelines, fundamentals, coding conventions, and principles of selecting the most appropriate CPT and HCPCS procedural codes for all medical specialties. The most recent version of CPT and a continued study of the ICD-10-CM/PCS coding conventions and principles will be emphasized. Designed as a medical coding capstone course. Restricted to Community Colleges campuses only.

Prerequisite: HIT 248.

Learning Outcomes

1. Demonstrate the ability to interpret inpatient/outpatient record documentation to identify diagnoses and services/procedures including assessing and managing patient records, and reimbursement and legal issues.
2. Define the skills and abilities needed to successfully function as an allied health care professional in various health care settings.
3. Identify and demonstrate an understanding of the information pertinent to accurate insurance coding and reimbursement issues by appropriately applying regulatory agency guidelines.
4. Demonstrate the ability to evaluate documentation to support diagnoses, procedures, tests, and treatment modalities.
5. Demonstrate the ability to monitor the quality of facility coding and abstracting.
6. Identify issues of fraud and abuse by reviewing inpatient and outpatient cases.
7. Demonstrate computer literacy and the ability to use the information processing and fiscal management programs utilized in various medical office environments.
8. Describe and identify why and how professionalism, using good judgment/decision-making skills, and developing the communications skills for good interpersonal relationships are necessary to achieve success as a medical insurance specialist.

HIT 268. Health Information Systems**3 Credits (3)**

Overview of health data management, work planning, and organization principles; an introduction to health care information systems; and review of the fundamentals of information systems for managerial, clinical support, and information systems.

HMSV-HUMAN SERVICES

HMSV 2110. Case Management**3 Credits (3)**

This course introduces students to the concept of case management, how it is used in human services, and skills necessary to function effectively as case managers. The emphasis is on the client assessment process, service planning and delivery, and client advocacy. Topics introduced include observation, data collection, documentation, and reporting of client behaviors, identification and referral to appropriate services, monitoring, planning, and evaluation. This course provides student with basic knowledge and beginning case management skills. May be repeated up to 3 credits.

Prerequisite: PSYC 1110G and SOWK 2110G.

Learning Outcomes

1. Define the purpose of case management and explain the role of the case manager
2. Explain the process of case management and what it entails
3. Explain the ethical, professional and legal responsibilities of case managers
4. Describe several settings within which case management takes place
5. Apply principles of client record management, and protect client rights to privacy and confidentiality
6. Use data to determine the appropriate referral service to professional, agencies, community programs or other resource, and clearly and specifically explain the referral service's role in treatment and contact information
7. Apply standards of clinical evaluation, including establishing rapport, data gathering and screening, analysis of substance

abuse implications, treatment possibilities, initial actions, and documentation of findings and treatment recommendations

- Incorporate individual and cultural relevance in concert with established situation-specific policies and procedures for crisis management.

HNRS-HONORS

HNRS 1115. Honors First Year Seminar

3 Credits (3)

This course is designed to introduce new first semester students to the life of the mind, the life of the University, and the principles that guide the NMSU University Honors Program. Combining critical thinking and experiential exploration, students will develop a personalized plan for success, both in and out of the classroom, consistent with the values of the Conroy Honors College and the mission of the University.

Learning Outcomes

- Demonstrate critical thought about the nature of knowledge, learning, and student development in the contemporary University.
- Explain how key concepts and principles serve as the foundation for the Honors College mission and values.
- Create a plan for their experiences at NMSU, in and out of the classroom, that will maximize their academic achievement and personal success beyond graduation.

HNRS 1135G. Introduction to Biological Anthropology

3 Credits (3)

This course provides a basic introduction to the broad field of biological anthropology. The research interests of biological anthropologists include the history and development of modern evolutionary biology, molecular and population genetics, modern primates, the primate and human fossil record, and modern human biological diversity. This is an Honors version of ANTH 1135G. It is taught with ANTH 1135G with differentiated assignments.

Corequisite: HNRS 1135L.

Learning Outcomes

- Summarize the basic principles of evolution and recognize how they apply to the human species.
- Recognize the biological and behavioral continuity of humans with all life, and especially other modern primate species.
- Identify ways in which the human species is biologically and behaviorally unique.
- Summarize fossil evidence for human evolution.
- Distinguish the major Paleolithic industries and outline the behavioral and cognitive changes indicated by the fossil and archeological evidence.
- Critically evaluate popular accounts of human variation and human evolution.
- Interpret modern human dilemmas (e.g., overpopulation, co-evolution of disease, and genetic engineering) from an evolutionary perspective.
- Discuss in class and analyze in writing scholarly arguments concerning course concepts.

HNRS 1135L. Introduction to Biological Anthropology Lab

1 Credit (1P)

This laboratory course expand on the topics covered in lecture course and uses scientific methods and principles to examine evidence for the process of evolution, the nature of heredity, human evolutionary history and family tree relationships, primate ecology and behavior, and modern

human diversity. Hands-on experience with fossil and skeletal material will be an important part of the learning process. This is an Honors version of ANTH 1135L.

Corequisite: HNRS 1135G.

Learning Outcomes

- Demonstrate an understanding of the scientific method.
- Employ principles of Mendelian genetics to determine genotype and phenotype probabilities, and calculate gene, genotype, and phenotype frequencies using the Hardy-Weinberg Equilibrium formula.
- Demonstrate an understanding of cell structure and functions.
- Use common lab and anthropometric equipment such as a compound microscope and calipers.
- Discuss primate evolution, and compare and contrast members of the Primate order in terms of structure, behavior, and phylogeny.
- Classify hominid species based upon selected traits such as anatomical changes associated with bipedalism, changes in the size and structure of the brain, and the development of culture.
- Locate and describe the major bones of the human skeleton, and identify characteristics of human skeletons or skulls such as gender, age, and ancestry.
- Discuss current research in genome analysis of various hominid populations.

HNRS 2110G. The Present in the Past: Contemporary Issues and their Historical Roots

3 Credits (3)

This course will take today's concerns, trends, and customs and contextualize them in the past, explaining their historical origins and development. As an example, we will examine the history of celebrity and how celebrities -- from Lord Byron to the Kardashians' made an impact on their contemporaries and the broader society of their time. This reading- and writing-intensive course will help students develop skills related to critical thinking, logical argumentation, and written and oral communication.

Learning Outcomes

- Analyze and critically interpret primary sources and understand how others might interpret and use the same material in different ways;
- Recognize and articulate the diversity of human experience across a range of historical periods and/or cultural perspectives.
- Understand how historical experiences and memories have shaped contemporary societies;
- Identify and understand the degree to which history has been used and misused in the past;
- Draw on historical and/or cultural perspectives to evaluate any or all of the following: contemporary problems/issues, contemporary modes of expression, and contemporary thought.
- Demonstrate improvement in their ability to read critically, think logically, and express themselves clearly in writing.

HNRS 2111. Successful Fellowship Writing

1 Credit (1)

Provides scholars with hands-on skills to complete proposals for scholarships and fellowships, such as the Truman, Rhodes, Marshall, Goldwater, Udall, and others. Other skills include how to write resumes, develop general research skills, and find grant and foundation sources. For freshmen and sophomores. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Review of Prestigious International and National scholarships
2. Best practices in preparing competitive proposals and applications
3. Effective strategies for writing compelling Executive summaries, Resumes, and Personal Statements

HNRS 2114G. Music in Time and Space**3 Credits (3)**

Introduction to all forms of Music. Through our auditory senses and intellectual faculties music is an ideal means for intelligent and humanistic examination of peoples and cultures, and for the enhancement of life. Types of music covered include classical, jazz, rock and roll, and world music. Music videos, live in-class performances, evening concerts, and lectures will be used as a basis for discussions and research. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Analyze and critically interpret significant primary texts and/or works of art (this includes fine art, literature, music, theatre, and film).
2. Compare art forms, modes of thought and expression, and processes across a range of historical periods and/or structures (such as political, geographic, social, cultural, religious, intellectual).
3. Recognize and articulate the diversity of human experience across a range of historical periods and/or cultural perspectives.
4. Draw on historical and/or cultural perspectives to evaluate all of the following: contemporary problems/issues, contemporary modes of expression, and contemporary thought

HNRS 2115G. Encounters with Art**3 Credits (3)**

A multicultural examination of the principles and philosophies of the visual arts and the ideas expressed through them. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Articulate the relationship of art to the human experience
2. Apply the vocabulary of art to critical writings and discussions
3. Interpret art works within cultural, social, personal and historical contexts

HNRS 2116G. Earth, Time and Life**4 Credits (3+3P)**

Covers how the earth's materials form, processes involved in changing the earth's configuration, and extent of people's dependence upon the earth's resources. Includes mineral and energy resources, development of landscapes, environmental problems, evolution of the earth and life forms. May be taken in place of GEOL 1110. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Gain a general understanding of geology and the geological processes that have been occurring throughout Earth's history.
2. Learn about some of the common minerals and rocks that are the building blocks to geology and the rock cycle.
3. Investigate the processes associated with each rock type (e.g., volcanoes, faults, depositional processes, etc.) and as well as potential geologic hazards (e.g., volcanic eruptions, earthquakes, flooding, etc.).

4. Recognize and identify common minerals and rocks and understand the basic processes and conditions responsible for their formation and occurrence.
5. Comprehensively understand how the internal and external parts of the Earth have functioned throughout geologic time.

HNRS 2117G. The World of the Renaissance: Discovering the Modern**3 Credits (3)**

An introduction to the literature and thought of Renaissance Europe. Humanism and the Reformation will be approached through the intensive study of major writers such as Petrarch, Machiavelli, Luther, Erasmus, Montaigne, and Shakespeare. Restricted to Las Cruces campus only. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Analyze and critically interpret significant primary texts and/or works of fine art, literature, philosophy, and theatre from the early modern period;
2. Locate art forms, modes of thought and expression, and processes from the early modern period in historical and/or cultural context and compare them to those of other time periods;
3. Demonstrate an understanding of how early modern historical and/or cultural perspectives and key technological developments contributed to the development of contemporary thought and modes of expression;
4. Recognize and articulate the diversity of human experience across historical periods and/or cultural perspectives;
5. Demonstrate skill in working with relevant secondary resources and research tools to develop a class

HNRS 2120G. Foundations of Western Culture**3 Credits (3)**

Critical reading of seminal texts relating to the foundations of culture and values in Western civilization, from ancient Greece to about 1700. Focus on the development of concepts of nature, human nature, and the state. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Students will enhance abilities to quickly read, comprehend, and evaluate lengthy, complex texts to extract their fundamental arguments.
2. Students will improve critical thinking by grappling with ethical issues about the rights of individuals versus societies.
3. Students will use historical analysis to contextualize current social, political, geographic, and economic issues and how the foundations continue to affect contemporary society.

HNRS 2130G. Shakespeare on Film**3 Credits (3)**

How do Shakespeare's plays continue to speak to us through the medium of film? Written in a time of rapid social change, Shakespeare's plays invited audiences to think critically about the relationship between the self and others and to question conventions. Performances of Shakespeare have long been used to call out social injustice, from western anti-Semitism prior to World War II (The Merchant of Venice), to civil rights-era white supremacy in the US and apartheid in South African (Othello), and authoritarianism in the Arab Spring (Richard III). This course

focuses on post-1980 Hollywood film versions of Shakespeare's plays and a few prior landmark adaptations around the world, examining how they use Shakespeare as a medium for debate and even a catalyst for social change.

Learning Outcomes

1. Demonstrate critical thinking by identifying issues and problems in the film adaptation of Shakespeare; 2 .Engage in intercultural reasoning and develop intercultural competence and historical consciousness in analyzing film adaptations from the US, Europe, and Asia;
2. Engage with questions of personal and social responsibility as explored in Shakespeare's plays and modern film adaptations;
3. Conduct effective research on a relevant topic, evaluating the validity and authority of secondary sources, synthesizing ideas, and drawing reasonable conclusions; 5 .Present independent research in collaboration with other student researchers and reflect on this teamwork experience

HNRS 2140G. Plato and the Discovery of Philosophy

3 Credits (3)

Examines arguments and theories found in the Platonic dialogues with a view to determining the nature and value of philosophy both from Plato's point of view and absolutely. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Students will evaluate a number of Plato's dialogues to understand his doctrines and arguments.
2. Students will use their understanding to further evaluate why his philosophies have remained influential in modern, Western society and beyond.
3. Students will develop well-formulated, compelling arguments from philosophical texts.

HNRS 2141G. Bamboo and Silk: The Fabric of Chinese Literature

3 Credits (3)

Introductory survey of traditional and modern Chinese prose and poetry in translation with emphasis on genre, theme, and social/historical context. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Students will acquire extensive knowledge of one of the world's oldest and richest literary traditions.
2. Not incidentally, students will also gain knowledge of China's history and philosophical traditions.
3. As this class is based on reading, writing, and discussion, students will hone their interpretive and expressive skills.

HNRS 2145G. Celtic Literature

3 Credits (3)

This course provides an overview of the most important early literary works of the so-called Celtic nations, principally Ireland and Wales, from a literary and historical approach. This literature stems from the period 600-1200 and ends with the development of the Romances under influence from the French

Learning Outcomes

1. Students will learn the concept of the international folk tale,
2. Students will learn about the history of the Celts

3. Students will learn about the concept of Celtic nations' formed during the 19th Century.
4. Students will enhance critical thinking skills.
5. Students will enhance written and oral communication.

HNRS 2160G. New Testament as Literature

3 Credits (3)

Literature of the New Testament examined from a literary perspective. Emphasis on translation history of the New Testament, generic features of gospel, epistle and apocalypse, precedent literary models, problems of authorship, classification of New Testament texts. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Students will hone critical thinking skills by analyzing arguments and controversies surrounding the roots of Christianity.
2. Students will discern and discuss the viability of both literary and historical sources with debated authorship, dating, and interdependency.
3. Students will practice interpersonal navigation and maintaining an academic environment of respect as they discuss a number of topics that can be considered controversial or subjective.

HNRS 2161G. Window of Humanity

3 Credits (3)

Anthropology is the most humanistic of the sciences, and the most scientific of the humanities. This course will use anthropological perspectives to examine the human experience from our earliest origins, through the experiences of contemporary societies. We will gain insights into the influence of both culture and biology on shaping our shared human universals, and on the many ways in which human groups are diverse. Restricted to Las Cruces campus only. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Explain the concepts that define Anthropology (along with its subfields) as a specific research discipline.
2. Possess a growing vocabulary for anthropology, cultural study, ethnographic research and writing that will empower them as they continue with their degrees and professional careers.
3. Recognize how Anthropological concepts, terms, and methods are valuable for present-day concerns and how these tools can be used to engage life and the world at large.

HNRS 2165G. Introduction to Humanities in the 21st Century

3 Credits (3)

An exploration of the global humanities according to its various manifestations: environmental, public, digital, and applied.

Learning Outcomes

1. Articulate what the humanities are and what role they have played in education throughout the ages
2. Critically analyze and communicate orally and in writing various humanities concepts and global interconnections among peoples and cultures.
3. Describe, through the study of the global humanities, how cultural contexts and human practices influence individuals and societies.

4. Apply the knowledge and skills gained through the study of the global humanities to explore their majors, their career goals, and the responsibilities of individuals in their communities.
5. Demonstrate information literacy and technological skills in researching and presenting themes related to the global humanities.
6. Reflect on the effects of the global humanities on individuals.

HNRS 2170G. The Human Mind

3 Credits (3)

The primary course objective is to develop an appreciation of the variety and complexity of problems that are solved by the human mind. The course explores how problems are solved by a combined computational analysis (computational theory of mind), and evolutionary (evolution by natural selection) perspective. The mind is what the brain does (i.e. information processing) and the brain is a computational device that is a product of evolution by natural selection. Note that this is not a neuroscience course, we will be focusing on the mind (what the brain does) rather than on the brain. Restricted to Las Cruces campus only.

Learning Outcomes

1. Enhance written and oral communication
2. Stimulate critical thinking and learn to weigh scientific evidence
3. Challenge students to make ethical decisions and promote personal and social responsibility

HNRS 2171G. The Worlds of Arthur

3 Credits (3)

Arthurian texts and traditions from medieval chronicles to contemporary literature. Emphasis on both the continuities of the Arthurian tradition and the diversity of genres, media, and cultures that have given expression to the legend. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Students will examine how texts and narratives, even with fictional implications, still held psychological, social, cultural, and religious sway within developed societies throughout history.
2. Students will synthesize information from an array of both primary and secondary sources to measure the cultural significance King Arthur holds in contemporary societies.
3. Students will extrapolate how a society's values at any point in history will affect the transference of mythos, just as a myth transmits the values of that society.

HNRS 2172G. Archaeology: Search for the Past

3 Credits (3)

A critical evaluation of various approaches to understanding prehistory and history. The methods and theories of legitimate archaeology are contrasted with fantastic claims that invoke extraterrestrials, global catastrophes, transoceanic voyages, and extra-sensory perception. May be repeated up to 3 credits. Restricted to Las Cruces campus only. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Identify, describe, and explain how human lifeways changed in diverse communities in different parts of the globe.
2. Select and use relevant archaeological evidence to articulate how people's beliefs and values were influenced by politics, geography, economics, culture, biology, history, and social institutions in the past.

3. Analyze the significance of archaeological artifacts in context and explain their relevance to understanding relations among individuals, their society, and the environment.
4. Evaluate how practices in research, conservation, and tourism to archaeological sites promote ethical stewardship of non-renewable archaeological resources.
5. Design a study tour to archaeological sites that will address a key question or argument in prehistory and promote historic/archaeological preservation.

HNRS 2175G. Introduction to Communication Honors

3 Credits (3)

Study and practice of interpersonal, small group, and presentational skills essential to effective social, business, and professional interaction. May be repeated up to 3 credits.

Prerequisite: An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.5 or higher.

Learning Outcomes

1. Analyze and evaluate oral and written communication in terms of situation, audience, purpose, aesthetics, and diverse points of view.
2. Express a primary purpose in a compelling statement and order supporting points logically and convincingly.
3. Use effective rhetorical strategies to persuade, inform and engage.
4. Employ writing and/or speaking processes such as planning, collaborating, organizing, composing, revising editing to create presentations using correct diction, syntax, grammar and mechanics.
5. Integrate research correctly and ethically from credible sources to support the primary purpose of a communication.
6. Engage in reasoned civil discourse while recognizing the distinctions among opinions, facts, and inferences.

HNRS 2178G. Theatre: Beginnings to Broadway

3 Credits (3)

Intercultural and historical overview of live theatre production and performance, including history, literature and professionals. Students attend and report on stage productions. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Distinguish and differentiate the characteristics of theatre from other art forms.
2. Describe the major components of a theatrical event.
3. Describe the functions of various theatre personnel.
4. Define specific terms relating to the study of theatre.
5. List and describe the parts of a play.
6. Define the different parts of plot.
7. Critique plays
8. Describe the characteristics of theatre in the different periods of history.
9. Develop an appreciation for theatre as an art form and a reflection of society

HNRS 2180G. Citizen and State Great Political Issues

3 Credits (3)

The fundamental questions of politics: why and how political societies are organized, what values they express, and how well they satisfy

those normative goals and the differing conceptions of citizenship, representation, and freedom. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Students will investigate the fluid state of American politics by discerning the decisions and policies of a selection of presidents.
2. Students will investigate the complex operations behind a representative democracy.
3. Students will examine how the sociopolitical environment surrounding a president influences his policies, and how a president's policies affect the broader society.
4. Students will assess and measure how politics can be affected by active and engaged citizens

HNRS 2190G. Claiming a Multiracial Past

3 Credits (3)

Survey of history of the United States in the nineteenth and twentieth centuries, with an emphasis on multicultural social and cultural history. Focus on understanding American history from the point of view of dispossessed, impoverished, and disenfranchised Americans who have fought to claim both their rights as Americans and American past. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Students will contextualize the current state of American "being" by focusing on the multicultural-social and cultural history of the U.S. in the nineteenth and twentieth centuries.
2. Students will hone public speaking and presentation skills through classroom discussions and activities.
3. Students will practice interpersonal navigation and maintaining an academic environment of respect as they discuss a number of topics that can be considered controversial or subjective.

HNRS 2996. Special Topics

1-3 Credits (1-3)

Special course offerings, with unique titles listed in Schedule of Classes. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

HNRS 303V. Personal Financial Planning and Investing in a Global Economy Honors

3 Credits (3)

Provides a framework for successful personal financial planning within an individual's career and income. Covers personal money management, federal and state taxation, the mathematics of finance and credit, housing, inflation, insurance, savings, and investments. Majors and minors may not use this course to satisfy their finance requirements. May be repeated up to 3 credits.

Prerequisite: 3.5 GPA.

Learning Outcomes

1. Same as the existing learning goals for BFIN 303V with the addition of an Experiential Learning Experience. Students will apply what they learn in BFIN 303V to the development of a community financial wellness program at NMSU and/or in the community

HNRS 304V. Dilemmas of War and Peace

3 Credits (3)

A multi-disciplinary introduction to war, peace, and world order studies. The origins of war and the foundations of peace are explored in the context of a rapidly changing world order.

HNRS 305V. Is Fake News Real: Journalism, Community, and Mass Communications

3 Credits (3)

Overview of how technology, money, politics, and human desire have changed journalism since 1963. Explores role of journalism in news dissemination, influencing opinion, and political behavior. Course includes guest lectures from regional journalists and media experts.

HNRS 306V. Science, Ethics and Society

3 Credits (3)

Investigation of the ethical issues related to scientific investigation and the ethical implications of scientific discoveries for society. Emphasis on discussion of case studies about specific ethical issues in science, and readings by both scientists and non-scientists.

HNRS 308V. Into the Final Frontier

3 Credits (3)

Exploration of space; a brief review of the history of space flight, the Apollo program, joint U.S.-Soviet space missions, and unstaffed exploration of the planets. Emphasis on knowledge gained through these efforts. Includes new space initiatives. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to compare and contrast previous history with current global events.
2. Students will be able to use perspectives from history to draw conclusions about the geopolitical, economic, ethnic, and cultural outcomes of current geopolitical policies and events (especially as they relate to expanding the space frontier), and to draw their conclusions.
3. Students will understand how critical it is to the human condition that humanity is always breaching a PHYSICAL frontier.

HNRS 309. Honors Global Citizenship

3 Credits (3)

University students live in an age of globalization with daily impacts on every aspect of their lives. Combining explorations of the dimensions of global citizenship with an international abroad experience, this seminar is designed to help students become more internationally informed, interculturally competent, and globally minded as they learn about the experiences of citizens in other parts of the world and reflect about their own place in the world in new ways. May be repeated up to 6 credits.

Learning Outcomes

1. Identify dimensions of globalization and how they impact citizens from the local to the global.
2. Describe and reflect appreciation for unique cultural-historical contexts and how these shape personal judgments and world views.
3. Explain how national identities have significance for global citizenship – including students' identities as Americans abroad.
4. Demonstrate intercultural competence through both travel and engagement with others while abroad.
5. Synthesize lessons from content and experiences to develop a personal statement about global citizenship as a concept and as a personal identity with plans for future action.

HNRS 310. Academic Service Learning Honors

3 Credits (3)

Academic service learning is a high impact form of pedagogy that integrates community-based service or outreach with classroom instruction to enhance both student learning and promote values of

constructive civic engagement. This project-based class is designed to help make linkages between the academic world and the community by providing students with a supervised experience implementing service activities to meet an identified community need. From explorations of root causes of problems and the development of objectives to the challenges of implementation and assessment, students will be encouraged to think more critically about social problems and the complexity of identifying lasting solutions.

Learning Outcomes

1. Describe the process required to assess real world community problems
2. Clarify short- and long-term goals and objectives for any project
3. Construct and implement a project that will be beneficial for a specified target audience
4. Assess the process of implementation
5. Reflect on their service to enhance their personal development as active citizens

HNRS 313. Research and Writing

3 Credits (3)

Workshop format designed to prepare students for research and writing associated with production of an honors thesis or a major research assignment. Does not count for general education or honors certification credit.

HNRS 314. Successful Fellowship Writing

1 Credit (1)

Provides scholars with hands-on skills to complete proposals for scholarships and fellowships, such as the Truman, Rhodes, Marshall, Goldwater, Udall, and others. Other skills include how to write resumes, develop general research skills, and find grant and foundation sources.

HNRS 317V. Cultural Lessons on Nazism

3 Credits (3)

Examination of the values and cultural manifestations of fascism in the period 1918-45 with multidisciplinary emphasis on European forms of fascism, particularly German Nazism. Course features a survey of literary, dramatic, poetic, cinematic, and artistic treatments of human behavior leading up to fascism, living under fascist rule, and coming to grips with the consequences of war and genocide.

HNRS 318V. The World of Cinema

3 Credits (3)

Appreciation of the art of motion pictures as world-wide medium specific to national cultures. Refinement of cinematic literacy and critical viewing skills. Historical and thematic overview emphasizes collaborative nature of medium in various genres from 1895 to present. Selected films from different periods and different countries. Substantial library research projects.

HNRS 321V. Agriculture in an Interconnected World

3 Credits (3)

Study of the impact of agriculture on cultural and social systems, with special emphasis on twentieth century urban development.

HNRS 324V. Science and the Arts: Theatre and Story

3 Credits (3)

This course examines present day relations between the sciences and the representation and communication of science, especially in connection with theatre, narrative fiction, and autobiography.

HNRS 326V. Art and Mythology

3 Credits (3)

Mythological figures, past and present, in the visual arts. Through iconographical studies (attributes and symbols), trace the development

of visual traditions that evolved from the literary sources of classical Mediterranean mythology.

HNRS 335V. Legal Issues in Modern Society

3 Credits (3)

Case study approach to contemporary legal problems involving environment, consumer protection, international law, corporate responsibility.

HNRS 336V. Testimonios from the Borderlands

3 Credits (3)

This course is about the testimonios (testimonios) and autobiographical writings about and by Latinas in the United States. Life stories are told through many forms: "testimonios," memoirs, autobiographies and autobiographical fiction, oral histories and short stories, poetry and poetic prose pieces, essays, and audio-stories. The course focuses on testimonios as method, epistemology, and pedagogy. Among the questions we will examine will be those concerning knowledge production, sexual politics, the mind-body-spirit connection, voice, representation, and truth. May be repeated up to 3 credits.

Learning Outcomes

1. The course focuses on testimonios as method, epistemology, and pedagogy. Among the questions we will examine will be those concerning knowledge production, sexual politics, the mind-body-spirit connection, voice, representation, and truth.

HNRS 341V. The Old Testament as Literature

3 Credits (3)

Old Testament surveys a portion of the thirty-nine canonical books of the Old Testament from a literary approach, centered on the so-called historical-critical method that developed in the 19th C under such figures as Julius Wellhausen. Higher criticism of the texts, their sources, authorship, dating and interdependency has led to deepened insights as well as scholarly conflict. In addition, we will examine several apocryphal books that have continuing importance in our understanding of Old Testament. We will read the Old Testament along with an introduction and some supplementary materials.

HNRS 347V. World Dance

3 Credits (3)

Examination of dance forms from a cross-cultural perspective, focusing on the role of dance in different cultures around the globe. Same as DANC 3510V with differential assignments for Honors students. May be repeated up to 3 credits.

HNRS 348V. Comparative Mythology: Myth, Ritual, and the Life Cycle

3 Credits (3)

Exploration of the central myths of several religious traditions and investigation of how each, through ritual, has given meaning to key moments in the journey of the individual through life.

HNRS 353V. Justice without Prejudice

3 Credits (3)

Exploration of central questions about race, ethnicity, and justice. Students will learn to argue persuasively from different perspectives, both orally and in writing. May be repeated up to 3 credits.

Learning Outcomes

1. Through this course, we will explore the diversity and commonality of Latina/x experiences. We will each write our own scripts, narrate them, scan and apply images to the narration and add music and special effects.

HNRS 370V. Design: The Creative Act

3 Credits (3)

Explores the nature of design and what it means to design in various diverse media. Included are creative efforts in writing, art, music, and technology. Commonalities and differences are considered.

HNRS 374V. The European City: History and Culture
3 Credits (3)

Historical overview of development, growth, and culture of European cities.

HNRS 378V. Technology and Policy
3 Credits (3)

Study of the processes through which society sets goals for science and technology, of the allocation of resources needed to achieve these goals, and of the obligations and conflicts that develop as the goals are realized. International comparisons of public policies.

HNRS 381V. Economic Development of Latin America
3 Credits (3)

Economic analysis of problems related to development in Latin America, including the agrarian problem, debt and austerity programs, industrialization, inflation and unemployment, the drug trade, U.S.-Latin American relations, development strategies. Also individual countries' problems.

Prerequisite(s): 3.2 cumulative GPA.

HNRS 387V. Comparative Perspectives on Women
3 Credits (3)

The history, antecedents, and consequences of sex and gender systems around the world from the perspective of sociology, anthropology, and psychology. May be repeated up to 3 credits.

HNRS 388V. Leadership and Society
3 Credits (3)

Exploration of the multifaceted nature of leadership in modern society through readings and seminar discussion. May be repeated up to 3 credits.

Learning Outcomes

1. Students will gain understanding of ethical principals of leadership.
2. Students will be able to apply ethical principals of leadership.
3. Students will be able to identify differing ways of enacting leadership across different cultures.

HNRS 390V. Worlds of Buddhism
3 Credits (3)

This course is an introduction to Buddhism and its contribution to the formation of (East) Asian cultures. It provides students with Buddhist and (East) Asian "case studies" - i.e., examples of the ways in which Buddhism has influenced, and has been influenced by, the region's various cultural and social milieus over time. The course is designed to offer opportunities to critically reflect on Buddhism as a transformative philosophical, cultural and individual system. May be repeated up to 3 credits.

HNRS 394V. Southwestern and Border Literature
3 Credits (3)

Introduction to the culturally diverse literature of the American Southwest and borderlands region. Class analyzes evolution of the Southwest concept and considers degree to which the existence of a borderlands culture is manifest in literature.

Prerequisite: honors eligibility.

HNRS 400. Honors Capstone
3 Credits (3)

Independent-study research and writing project to be carried out under the supervision of a faculty member. Consent of instructor required. May be repeated up to 3 credits.

Learning Outcomes

1. Students will apply concepts from their discipline in the development and implementation of a capstone research or creative activity project.

HNRS 410. Honors Internship
3-6 Credits

Assignments in departments to be supervised by faculty in the area. A cumulative 3.5 GPA is required. May be repeated up to 12 credits. Consent of Instructor required.

HNRS 411V. Great Theorems in Mathematics
3 Credits (3)

Same as MATH 411V.

Prerequisite: Grade of C- or higher in MATH 1531, or grade of B or higher in any upper-division math course, or consent of instructor.

Learning Outcomes

1. At the end of this course, students will be able to: Describe the history of the development of some key mathematical concepts.
2. Describe the connections between mathematical ideas in different historical periods and places.
3. Recognize the role of abstraction and logic in the progress of mathematics.
4. Describe the contribution of mathematics to culture and science in different historical eras.
5. Determine if a mathematical conjecture is correct and provide rigorous written mathematical justification.
6. Provide sound, complete and clear mathematical arguments involving simple calculations, geometric constructions, and/or written mathematical proofs.
7. Communicate mathematical ideas, both written and orally.

HNRS 412. Medical College Admission Test Preparation
3 Credits (3)

This course prepares students to optimize their performance on the Medical College Admission Test that is required for admission to medical schools throughout North America. This course should be taken only after completing requisite courses in biology, chemistry and biochemistry, physics, health sciences, and appropriate social science electives.

Prerequisite(s): Completion of basic courses in STEM, health sciences and behavioral sciences.

HNRS 413. Medical Shadowing
1-3 Credits (1-3)

For students who are shadowing medical professionals this course will provide academic credit for completion of this experience. May be repeated up to 6 credits.

Prerequisite(s): Completion of 57 credits, of any subject.

HNRS 415. Internship: Non-Capstone Practicum
1-6 Credits (1-6)

In this class students will be working to gain professional experiences by extensively immersing yourself in a professional setting. Students will be required to 1) complete all pre and post paperwork and requirements, 2) complete their placement hours, and 3) complete a weekly reflection prompt. May be repeated up to 6 credits.

Learning Outcomes

1. Demonstrating understanding of professional customs and practices.
2. Organizing and maintaining information.
3. Applying knowledge to the task.
4. Serving clients and stakeholders.
5. Negotiating and arriving at a decision.

6. Working with diversity/diverse populations.
7. Identifying, understanding, and working with professional standards.
8. Improving problem-solving and critical thinking skills.
9. Monitoring and correcting performance. 1
10. Exercising leadership. 1
11. Behaving professionally and ethically. 1
12. Listening effectively. 1
13. Dressing appropriately. 1
14. Addressing colleagues and superiors appropriately. 1
15. Allocating time effectively. 1
16. Adapting effectively to changing conditions. 1
17. Participating as a member of a team. 1
18. Developing appropriate workplace attitudes. 1
19. Understanding and managing personal behavior and attitudes. 2
20. Developing individual responsibility.

HNRS 420. Independent Studies

1-3 Credits

Directed, individual studies and projects.

Prerequisites: consent of instructor and honors eligibility.

HNRS 421. Special Topics

1-3 Credits (1-3)

Special course offerings, with specific titles listed in Schedule of Classes.

May be taken for unlimited credits. May be repeated up to 99 credits.

Learning Outcomes

1. Each course will have unique learning goals.

HNRS 422. Directed Research

3 Credits (3)

Individual research projects supervised by faculty advisers. Consent of instructor required.

HNRS 450V. The Sundt Honors Seminar

3 Credits (3)

The Sundt Honors Seminar is a unique, experience-based, interdisciplinary seminar developed and taught by the holder of the Sundt Honors Professorship for the year. The subject of the course will vary according to the discipline of the Sundt Professor. The course may include a travel experience related to the seminar topic, hosting of outside specialists, or other unique activity. Open to students by application. Students selected for the course are named Sundt Scholars.

Prerequisite(s): ENGL 1110G or equivalent.

HNRS 521. Special Topics

3 Credits (3)

Graduate level to be cross-listed with HNRS 421 Special Topics at the undergraduate level.

HORT-HORTICULTURE

HORT 1115G. Introductory Plant Science

4 Credits (3+2P)

Introduction to the physical, biological, and chemical principles underlying plant growth and development in managed ecosystems. In the laboratory portion of the class, students perform experiments demonstrating the principles covered in lecture. The course uses economic plants and agriculturally relevant ecosystems to demonstrate basic principles. Appropriate for nonscience majors. Same as AGRO 1110G.

Learning Outcomes

1. Describe the role plants play in everyday lives
2. Introduce career opportunities in plant and soil sciences, and related fields
3. Define plants through the concepts of plant structure and anatomy
4. Introduce the wide variety of plants cultivated throughout the world
5. Describe how plants work (growth, reproduction, physiology, and soil)
6. Describe how plants are manipulated to feed, clothe and entertain the world

HORT 2110. Ornamental Plants I

4 Credits (2+3P)

Covers identification, botanical characteristics, culture, and landscape uses of woody plants. Emphasis on deciduous trees, native shrubs, and evergreens.

Learning Outcomes

1. Given 35 ornamental plants selected from the course's plant list, 100% of students will be expected to correctly identify the genus, species, and common names of the plants with 70% accuracy.
2. Given plants selected from the course's plant list, 100% students will be expected to identify to landscape use of those plants with 85% accuracy.

HORT 2120. Ornamental Plants II

4 Credits (2+3P)

Identification, botanical characteristics, culture, and landscape uses of woody plants. Emphasis on flowering trees, cacti, and members of the pea and rose families.

Learning Outcomes

1. Given 35 ornamental plants selected from the course's plant list, 100% of students will be expected to correctly identify the genus, species, and common names of the plants with 70% accuracy.
2. Given plants selected from the course's plant list, 100% students will be expected to identify to landscape use of those plants with 85% accuracy.

HORT 2130. Floral Quality Evaluation and Design

2 Credits (1+2P)

Critical hands-on evaluation of the quality of cut and potted floral and tropical foliage crops, their specific merits and faults, and fundamentals of floral design.

Learning Outcomes

1. Identify common floriculture crops, or know resourcing to help identify the crop.
2. Evaluate quality (merit and fault) of common floriculture crops, based on industry standards and merit. Pi Alpha Xi and American Floral Endowment standards will be used for the purpose of this class.
3. Have a basic understanding of the floriculture industry, and identify career pathways within the industry.
4. Know, understand, creatively interpret, and execute basic principles of design in regards to floral design.
5. Use interpersonal communication, problem solving, basic math, and marketing during cash and carry "lab" time (flower sales) in developing job ready skills in floristry.
6. Layer principles of design, marketing, sales, and time management to create floral art in real-world scenarios.

HORT 2160. Plant Propagation

3 Credits (2+2P)

Practical methods of propagating horticultural plants by seed, cuttings, layering, grafting, division and tissue culture. Examination of relevant physiological processes involved with successful plant propagation techniques. Same as AGRO 2160.

Learning Outcomes

1. Practical methods of propagating plants by seed, cuttings, layering, grafting, division, and tissue culture through experiential, "hands-on" laboratories.
2. Relevant physiological principles involved in propagating horticultural plants through lecture discussions and readings.

HORT 2990. Floriculture Field Practicum

1 Credit (1)

Participation as team member in the National Intercollegiate Floral Quality Evaluation and Design Competition. Intensive week-long travel for competition, networking with industry, academia, and floriculture tours. May be repeated for a maximum of 3 credits.

Prerequisite(s): HORT 2130 or consent of instructor.

Learning Outcomes

1. Varies

HORT 2996. Special Topics

1-4 Credits

Specific subjects and credits as announced. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits.

Consent of Instructor required.

Learning Outcomes

1. Varies

HORT 300. Special Topics

1-4 Credits

Specific subjects as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

HORT 302V. Forestry and Society

3 Credits (3)

Global study of the development and use of forest resources for production of wood, fuel, fiber, and food products. Climatic, edaphic, cultural, and economic influences on forests of the world evaluated. Same as RGSC 302V.

HORT 304. Hydroponics

4 Credits (4)

This course will introduce students to the basics of the different soil-less growing systems: hydroponics, aeroponics and aquaponics. Topics will include growing systems and environments, crop management, business aspects of hydroponic growing, integrated pest management, commercial and restaurant systems, and plant nutrition. Labs will reinforce lecture topics and give students practical experience growing different types of crops in different types of systems.

Prerequisite: AGRO 1110G or HORT 1115G.

Learning Outcomes

1. Discuss the benefits and constraints of different hydroponic systems.
2. Evaluate different crops for each type of system.
3. Identify the components and calculate costs of different systems.
4. Demonstrate how to build and maintain each type of system.
5. Discuss how soilless growing relates to sustainability and local food production.

HORT 305. Principles of Genetics

3 Credits (3)

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. May be repeated up to 3 credits.

Prerequisite: (BIOL 2610G and BIOL 2110G, or BIOL 2110G and BCHE 140, and either CHEM 1215G or CHEM 1216).

Learning Outcomes

1. To provide an introduction to the basic concepts, methods, and terminology of genetics. Introduction to genomics and bioinformatics.
2. To develop a working understanding of genetics and heredity
3. To understand in some depth, the mechanism of DNA replication, transcription and protein synthesis. To understand the regulation of gene expression.
4. To examine the impact of genetics on both basic and applied aspects of the biological sciences, as well as its effects on our everyday lives.

HORT 307. Landscape Design

4 Credits (3+3P)

Design elements, the design process, and contemporary planting design used in the design of residential and small commercial landscapes. Basic drafting, drawing, and landscape plan presentation techniques.

Prerequisite: HORT 2110 or HORT 2120 or consent of instructor.

Learning Outcomes

1. Access a residential site for landscape design.
2. Create a landscape plan that addresses and solves a client's needs and wishes.
3. Incorporate ideas into the landscape plan that reflects the region.
4. Incorporate sustainable ideas into a landscape plan.
5. Analyze a landscape plan for aesthetics and functionality.
6. Verbally and visually present a landscape plan in a professional manner.

HORT 310. Medicinal Herbs

3 Credits (3)

Introduction to ethnobotany, including plant cultivation, extraction methods, and analysis of active chemistries.

HORT 318V. Urban Water Issues and Society

3 Credits (3)

Global study of water science, development, law, and use for agriculture, manufacturing, landscaping, home use, and other urban uses. This course allows students to become familiar with important issues concerning the interaction between water use and humans. Topics include the water cycle, water chemistry, human-water relations, plant-water relations, water users, water-dependent population placement and growth, water regulation, and the future of water.

Learning Outcomes

1. Define and describe Earth's water sources and the water cycle.
2. Describe the chemical processes associated with water and analyze the composition of several water sources.
3. Summarize the interactions of water with the human body.
4. Explain the use of water in agricultural and other plants on both a regional scale and cellular level.
5. Identify, explain, and compare all water users and categorize their demand and availability for water.
6. Analyze the interconnection of the human societies and water while discussing locations of civilizations and communities.
7. Analyze, from a historical perspective, the interrelationships of all water users and all water decision makers. Describe the history of US and world water regulation and analyze its success rate.

8. Predict and recommend how water will be used and distributed in the future.

HORT 365. Principles of Crop Production

4 Credits (3+3P)

Basic principles of crop production including environmental and physiological factors limiting production, plant nutrition and soil science, soil-water management, cropping systems and management, pest management, and economic factors influencing crop production.

Crosslisted with: AGRO 365

Prerequisite(s): AGRO 1110G/HORT 1115G, CHEM 1215G or equivalent and MATH 1215 or equivalent.

HORT 377. Introduction to Turfgrass Management

4 Credits (3+3P)

Establishment and maintenance of turfgrass with emphasis on seeding methods, soil and water management, mowing, disease insects and turfgrass varieties. Crosslisted with: AGRO 377

HORT 378. Turfgrass Science

4 Credits (3+3P)

Introduction to the scientific fundamentals for turfgrass management cultural practices, pest management, rootzone construction and ecology.

Prerequisite(s): HORT 377 or consent of instructor.

HORT 391. Internship

1-6 Credits

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of instructor required. Graded: S/U. Crosslisted with: AGRO 391 and SOIL 391

HORT 447. Seminar

1 Credit (1)

Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, ENVS 447 and SOIL 447.

HORT 449. Special Problems

1-3 Credits

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

HORT 450. Special Topics

1-4 Credits

Specific subjects as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

HORT 462. Plant Breeding

3 Credits (3)

Principles and practices involved with the genetic improvement of plants. May be repeated up to 3 credits.

Prerequisite(s): ANSC/AGRO/BIOL/HORT/GENE 305 or GENE 315 and GENE 320.

HORT 471. Plant Mineral Nutrition

3 Credits (3)

Basic and applied aspects of plant requirements for soil-derived minerals and the processes whereby minerals are acquired, absorbed, translocated, and utilized throughout the plant. Same as AGRO/EPWS 471. May be repeated up to 3 credits.

Prerequisite/Corequisite: EPWS/BIOL 314, or concurrent enrollment, or consent of instructor.

HORT 479. Advanced Turfgrass Science

3 Credits (3)

Extensive reviews of turfgrass sciences including ecology, physiology, entomology, pathology, weed science, and soil science.

Prerequisite: HORT 378 or consent of instructor.

HORT 483. Advanced Sustainable Crop Production

4 Credits (3+3P)

Characteristics and objectives of sustainable agricultural systems with application to the production, utilization, and improvement of agronomic and vegetable crops.

Prerequisite: AGRO 365 or HORT 365.

Learning Outcomes

1. Identify and analyze issues in agriculture and their possible causes.
2. Identify principles of sustainable agriculture and contrast with conventional agriculture.
3. Evaluate application of principles of sustainable agriculture.
4. Define clearly what sustainable agriculture is and its importance for conserving natural resources.
5. Evaluate role of different crop management practices such as GMO's or organic agriculture and make unbiased inferences based on scientific evidence.
6. Gain experience in sustainable crop production through experiential learning.
7. Observe, analyze, and critique real-world examples of sustainable agriculture and conventional agriculture models.
8. Collaborate with peers and engage in team-based learning.
9. Present and write well on topics in sustainable crops. 1
10. Learn about advances in agricultural technology and its role in sustainable crop production.

HORT 488. Greenhouse Management

4 Credits (3+3P)

Principles and practices involved in greenhouse structures and construction, site considerations, heating and cooling systems, greenhouse crop production techniques, sustainability practices. May be repeated up to 4 credits.

Prerequisite(s): HORT/AGRO 365 or consent of instructor.

HORT 492. Diagnosing Plant Disorders

3 Credits (2+3P)

Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as EPWS 492 and AGRO 492.

Prerequisites: EPWS 303 and EPWS 310.

HORT 500. Special Topics

1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

HORT 505. Research Orientation

4 Credits (3+2P)

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: AGRO 505, SOIL 505 and ENVS 505.

HORT 525. Scientific Writing How to be a Productive and Effective Writer

1-3 Credits (1-3)

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review Crosslisted with: AGRO 525, AGRO 625, EPWS 525, SOIL 625 and SOIL 525.

HORT 590. Graduate Seminar**1 Credit (1)**

Current research discussions presented by masters level graduate students. Not more than one credit toward the degree. Same as AGRO/ SOIL 590. Crosslisted with: AGRO 590 and SOIL 590.

HORT 595. Internship**1-6 Credits**

Supervised professional on-the-job learning experience. Limited to Master of Horticulture or Plant & Environmental Science candidates. Not more than 6 credits toward the degree.

HORT 596. Maters Proposal**1 Credit (1)**

Current research proposal written by maters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, ENVS 596, GENE 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.

Prerequisite(s): Master level graduate students.

HORT 598. Special Research Programs**1-6 Credits**

Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

Prerequisite: consent of instructor.

HORT 599. Master's Thesis**15 Credits**

Thesis.

HOST-HOSPITALITY AND TOURISM

HOST 155. Special Topics**1-3 Credits (1-3)**

Specific subjects to be announced in the Schedule of Classes. Restricted to: Community Colleges only.

HOST 201. Introduction to Hospitality Industry**3 Credits (3)**

Overview of hospitality industry; organization and operation of lodging, food and beverage, and travel and tourism segments; focus on career opportunities and future trends of hospitality industry. Restricted to: Community College campuses only.

HOST 202. Front Office Operations**3 Credits (3)**

Hotel/motel front office procedures detailing flow of business, beginning with reservations and extending to the night audit process. Restricted to: Community College campuses only.

HOST 203. Hospitality Operations Cost Control**3 Credits (3)**

Management of Food & Beverage facilities using cost control techniques. Functional training in menu analysis and development with all phases of product flow through a Food & Beverage organization explored. Restricted to: Community Colleges only.

HOST 204. Promotion of Hospitality Services**3 Credits (3)**

Organization of hotel marketing functions; developing a marketing plan to sell the varied services of the hotel/motel property. Restricted to: Community College campuses only.

HOST 205. Housekeeping, Maintenance, and Security**3 Credits (3)**

Function of housekeeping departments, including personnel, sanitation, maintenance, and materials. A survey of security procedures to include

guest protection and internal security of hotel/motel assets. Restricted to: Community College campuses only.

HOST 206. Travel and Tourism Operations**3 Credits (3)**

Transportation, wholesale and retail operations, attractions, the traveler, tourism development, and operational characteristics of tourism business. Restricted to: Community College campuses only.

HOST 208. Hospitality Supervision**3 Credits (3)**

Strategies for directing, leading, managing change and resolving conflict. Prepares students to meet expectations of management, guests, employees, and governmental agencies. Restricted to: Community College campuses only.

HOST 210. Catering and Banquet Operations**3 Credits (3)**

Teaches the basics of catering and banquet operations, including computer coordination, planning, set up, service, and completion. Restricted to Community Colleges campuses only.

HOST 214. Purchasing and Kitchen Management**3 Credits (3)**

Technical purchasing concepts, product selection, and specifications. Safety and sanitation as they relate to food service establishments. Prepares student for work with HACCP programs. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): HOST 203.

HOST 216. Event, Conference and Convention Operations**3 Credits (3)**

The ability to successfully plan, organize, arrange, and execute special events is critical to the success of many hospitality organizations. This course gives the student a grounding in the skills necessary to achieve success in this area. A variety of events are discussed and the similarities and differences with conferences and conventions are explored. Students are taught to organize and plan events of varying type and durations. Sales, logistics, and organizing skills are emphasized. Restricted to: Community College campuses only.

HOST 219. Safety, Security and Sanitation in Hospitality Operations**3 Credits (3)**

It is the responsibility of the manager to provide appropriate security, sanitation, and safety precautions in hospitality operations. Preparation for internal and external disasters is an important task for the Hospitality Manager. This course uses the National Restaurant Association ServSafe- training material. Restricted to: Community College campuses only.

HOST 221. Internship I**1-3 Credits (1-3)**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEHS,HOST majors.Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

HOST 222. Cooperative Experience II**3 Credits (3)**

Continuation of HOST 221. Restricted to majors. Graded: S/U. Restricted to: Community College campuses only. Restricted to HOST majors.

Prerequisite(s): HOST 221.

HOST 239. Introduction to Hotel Management**3 Credits (3)**

This course covers basic management functions in hotels, resorts, Boutique Hotels, Bed & Breakfast establishments, and other lodging operations. All aspects of the operation are covered including guest management, operations, and sales and marketing. Restricted to: Branch campuses only.

HOST 255. Special Topics**3 Credits (3)**

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 9 credits. Restricted to Community Colleges campuses only.

HOST 298. Independent Study**1-3 Credits (1-3)**

Individual studies directed by consenting faculty with prior approval of department chair. May be repeated for a maximum of 3 credits. Restricted to: Community College campuses only.

Prerequisite(s): Minimum 3.0 GPA and sophomore standing.

HRTM-HOTEL/RESTRNT/TOURISM MGT

HRTM 1120G. Introduction to Tourism**3 Credits (3)**

Survey of travel and tourism development and operating characteristics.

Learning Outcomes

1. Define tourism and related terms.
2. Identify and explain the role of the elements of the destination mix.
3. Identify the potential socio-cultural, economic and environmental impacts of tourism.
4. Identify and describe the role of key governmental and nongovernmental organizations in tourism.
5. Describe basic tourism planning and development principles.
6. Discuss the unique challenges of tourism marketing and standard marketing methods.
7. Describe the components of the tourism distribution system.
8. Demonstrate a basic understanding of traveler behavior including motivations and barriers to travel.
9. Identify major factors that influence traveler flows. 1
10. Describe the role of major modes of transportation in the tourism system. 1
11. Identify and describe the three pillars of sustainable tourism development. 1
12. Explain personal and social responsibility as it relates to sustainable tourism development. 1
13. Demonstrate effective communication and critical thinking skills.

HRTM 1130. Introduction to Hospitality Management**3 Credits (3)**

Overview of the major segments of the hospitality industry, with a focus on basic management principles.

Learning Outcomes

1. Understand the concept of management contracts and franchising.
2. Recognize and understand needed leadership qualities to achieve organizational objectives.
3. Understand the hospitality industry within the global environment.
4. Identify company and industry trends.

5. Understand the functions of all departments in a hospitality organization (restaurant, hotel, club, etc.).
6. Apply the concepts of convention management, meeting and event planning, and casino management.
7. Understand the concepts of quick and institutional/contract foodservice management.
8. Understand the principles of bar management and compare and contrast wines, beers and distilled spirits.
9. Manage the process of service delivery. 1
10. Identify and solve managerial problems 1
11. Manage a diverse workforce and develop positive employee relations to reduce turnover.

HRTM 1310. Safety, Sanitation and Health in the Hospitality Industry**1 Credit (1)**

Addresses public health, HACCP, and food safety responsibilities in the hospitality industry. Sanitation certification test allows students to receive national ServSafe Food Protection Manager Certification.

Learning Outcomes

1. Identify the hazards to safe food and the foods at risk in a foodservice operation.
2. Identify and discuss the Hazard Analysis Critical Control Point (HACCP) system and be able to design a HACCP flowchart.
3. Demonstrate knowledge of how to protect food during purchasing, receiving, storing, preparing, holding, and serving.
4. Discuss the procedures for ensuring sanitary equipment, facilities, and food-handling practices.
5. Explain how to set-up cleaning, safety, pest control, crisis management, and training programs.
6. Also meets KRDNs for the Accreditation Council for Education in Nutrition and Dietetics (ACEND).

HRTM 1320. Food Production and Service Fundamentals**3 Credits (1+4P)**

Basic overview of food service systems including menu management, purchasing and production. The course includes basic principles of food fabrication and production. Topics include knife skills, culinary terminology, product identification, quality standards, nutritional cooking theory and application of food preparation techniques. The course includes laboratory aspects and demonstration of basic food production techniques, service styles, practices and procedures in food service operations including culinary math. This course provides students with an understanding of food service sanitation and culinary nutrition. Completion of a national certification examination is required. Students who have not completed HRTM 1310 before enrolling in the course must have proof of valid ServSafe Food Protection Manager certificate. May be repeated up to 3 credits.

Prerequisite: HRTM 1130 or FSTE 2110G.

Prerequisite/Corequisite: HRTM 1310.

Learning Outcomes

1. Demonstrate use of standard recipes and how to reduce and increase their yields
2. Demonstrate basic culinary knife cuts, basic fabrication and mise en place
3. Demonstrate basic cookery techniques of dry, moist and a combination of heat
4. Demonstrate the proper plating and garnishing of foods
5. Describe proper personal behaviors required for the safe handling of food

6. Identify and properly operate kitchen equipment.
7. Pass the ServSafe Exam
8. Describe the three forms of food contaminants and preventative measures.
9. Demonstrate how to properly "set" a table for service 1
10. Demonstrate how to provide dining room service with proper etiquette 1
11. Demonstrate safe work habits, identify safety hazards, and employ preventative safety measures. 1
12. Maintain positive relations with fellow students and faculty through teamwork. 1
13. Exhibit appropriate work habits and attitudes; demonstrate a willingness to compromise. 1
14. Demonstrate a positive attitude, conversation skills, personal hygiene and work attire.

HRTM 2130. Hotel Operations I**3 Credits (3)**

Analysis of hotel operations to include: guest services, reservations, reception, guest/city ledger and the night audit. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Prerequisite(s): HRTM 1130.

Learning Outcomes

1. Outline the history, magnitude and culture of the hotel industry
2. Define and identify hotel ownership and operational structures
3. Outline the organization and structure of a hotel and resort.
4. Describe and calculate the components and processes of room reservation forecasting, pricing and revenue management.
5. Outline and explain the flow of the guest from pre-arrival through arrival, room occupancy and departure.
6. Demonstrate the procedures and processes for Guest Accounting, the City Ledger, Guest Credit and the Night Audit.
7. Discuss problem solving and guest service associated with the front office and other departments of the hotel and resort.
8. Forecast impacts of technology to the guest services and hotel operations
9. Describe the day to day activities and responsibilities of a Hotel Front Office Manager or a Hotel Assistant General Manager (AGM).

HRTM 2996. Special Topics**1-4 Credits**

Specific subjects and credits to be assigned on a semester basis for both lecture and laboratory assignments. May be repeated for a maximum of 4 credits.

Prerequisite: consent of instructor.

Learning Outcomes

1. Varies

HRTM 3210. Hotel, Restaurant, and Tourism Marketing**3 Credits (3)**

The development of effective marketing programs for hospitality service organizations. May be repeated up to 3 credits.

Prerequisite: HRTM 1130.

Learning Outcomes

1. Understand the unique challenges involved in marketing and managing services.
2. Describe the hospitality marketing concepts.
3. Define the characteristics of hospitality marketing.
4. Understand management strategies for service businesses.

5. Discuss the role of marketing in strategic planning.
6. Describe the marketing environment.
7. Discuss market segmentation, targeting, and positioning.
8. Identify and define pricing considerations and approaches.
9. List distribution channels for the hospitality industry. 1
10. Discuss advertising, direct marketing, and sales promotion. 1
11. Discuss the public relations process.

HRTM 3220. Hospitality and Travel Law**3 Credits (3)**

Specialized applications of the law to the hospitality and tourism industry. May be repeated up to 3 credits.

Prerequisite: HRTM 1130.

Learning Outcomes

1. Understand the unique challenges involved in marketing and managing services.
2. Describe the hospitality marketing concepts.
3. Define the characteristics of hospitality marketing.
4. Understand management strategies for service businesses.
5. Discuss the role of marketing in strategic planning.
6. Describe the marketing environment.
7. Discuss market segmentation, targeting, and positioning.
8. Identify and define pricing considerations and approaches.
9. List distribution channels for the hospitality industry. 1
10. Discuss advertising, direct marketing, and sales promotion. 1
11. Discuss the public relations process.

HRTM 3230. Hospitality Leadership Management**3 Credits (3)**

Examines modern leadership theory in the context of the hospitality industry. Connects contemporary leadership topics to their historical antecedents through focused reading, discussion and film. May be repeated up to 3 credits.

Prerequisite: HRTM 1130 and HRTM 1120G.

Learning Outcomes

1. Gain an understanding of the fundamental nature of leadership.
2. Understand leadership's role in continuous improvement, successful change, and management of quality.
3. Understand the stages of team development and the characteristics of effective work teams.

HRTM 3310. Quantity Food Production and Service**4 Credits (1+6P)**

Covers quantity food production and service including cooking concepts, sanitation and safety, teamwork, dining room service, and management responsibilities. Students will apply this knowledge developing product for sale in a student run restaurant. Proof of current ServSafe Food Protection Manager or NM Food Handler certification required. May be repeated up to 4 credits.

Prerequisite(s): HRTM 1320.

Learning Outcomes

1. Follow, extend, and reduce a recipe.
2. Plan and produce quantity foods utilizing appropriate culinary techniques.
3. Demonstrate food service skills for table service and take-out operations while ensuring excellent guest service.
4. Determine and evaluate profit or loss of food production activities included in the laboratory component of the class.

- Operate a foodservice establishment using proper food safety practices.
- Demonstrate management, leadership, and teamwork in operating a foodservice establishment.
- Plan and implement appropriate marketing techniques for a foodservice operation establishment.
- Evaluate guest perceptions of food and service.
- Meets KRDNs for the Accreditation Council for Education in Nutrition and Dietetics (ACEND).

HRTM 3410. Hospitality Management Accounting **3 Credits (3)**

Specialized accounting for hotel revenue and expenses; accounting for inventory, property, and equipment; hospitality payroll accounting; hotel departmental financial statements; income statement, balance sheet, and statement of cash flows; the analysis of financial statements; interim and annual reports; budgeting expenses; forecasting sales; budgetary reporting and analysis; and financial decision making.

Prerequisite: ACCT 2110.

Learning Outcomes

- Present the terminology and principles required to develop modern Hospitality Management financial statements.
- Present the primary principles of managerial accounting and applications to modern Hospitality Management cost and profit analysis.
- Demonstrate the concepts of financial analysis required to evaluate capital investments, analyze business performance, and to develop tools for financial planning and analysis.
- Develop the analytical concepts required to understand and evaluate money flows over time and apply these concepts to the use of capital and credit.

HRTM 363. Quantity Food Production and Service **4 Credits (1+6P)**

Covers quantity food production and service including cooking concepts, sanitation and safety, teamwork, dining room service, and management responsibilities. Students will apply this knowledge developing product for sale in a student run restaurant. Proof of current ServSafe Food Protection Manager or NM Food Handler certification required. May be repeated up to 4 credits.

Prerequisite(s): HRTM 2120.

HRTM 3910. Professional Development **1 Credit (1)**

Covers essential elements of career management including preparation for a successful internship. Restricted to majors.

Learning Outcomes

- Find an internship experience that will be worthwhile.
- Write an effective resume in the appropriate style.
- Recognize the importance of appropriate and effective communications with potential employers using a variety of methods including written letters of introduction, reference, follow-up and thank you, phone, fax, email, and internet.
- Understand the general interview process and learn how to positively enhance the interactive interview experience.
- Identify real or potential workplace challenges and develop strategies to make the internship a positive experience while gathering information that will be valuable for their careers.
- Use this information to develop a case study and micro-theme writings in HRTM 491

HRTM 4110. Meetings, Conventions and Special Events **3 Credits (3)**

Examination of the role of the meeting/event planner, including setting objectives, site selection, negotiations, design, budgeting, marketing, registration, on-site logistics, and evaluation.

Learning Outcomes

- Identify and differentiate between different types of meetings, conventions, and events.
- Analyze the scope and complexity of meetings, conventions, and special events.
- Develop realistic goals, strategic plans, action plans, production schedules, budgets, and facilities designs for meetings and special events.
- Apply group dynamics, management, and leadership skills to accomplish organizational tasks.
- Implement an effective communication network among different parties involved in meetings and special events.
- Organize and facilitate contacts with hospitality industry leaders, vendors, and media personnel.
- Evaluate the outcomes of meetings and events.
- Develop an operations manual for meetings and special events.

HRTM 4115. Entertainment Business and Venue Management **3 Credits (3)**

This course will review and examine the principles and practices associated with managing a public assembly venue and the nature of the venue and entertainment business. This is a comprehensive course designed to cover all aspects of incorporated event practices such as marketing, production, contracts, ticketing, and security.

Learning Outcomes

- Analyze the origin and history of public assembly venues and the role they play within the community.
- Analyze different ownership and management structures and how governance relationships impact operational management.
- Analyze the business and financial operations of a public assembly venue.
- Describe the booking process, the entities involved, and the importance of relationships.
- Analyze and create marketing and sales strategies for both a public assembly venue and an event that is booked in the venue.
- Identify and analyze the ticket system options available to venue managers, as well as their importance in access management, financial accountability, and data collection.
- Analyze the role and importance of ancillary revenue sources, as well as the need for creativity and entrepreneurship.
- Describe the operational systems and processes required to maintain a venue and produce events.
- Analyze the event planning process and how it is used to produce an event experience for guests and clients. 1
- Analyze management's role in developing and maintaining a safe and secure public assembly venue.

HRTM 4120. An Overview of Italian Tourism focused on Food, Wine, Art and Culture **3 Credits (3)**

The course content provides a global perspective and understanding of Italian food, wine, art and culture and their integration into tourism. The content is designed to provide students an appreciation of Italian cultural

values and an overview of food, wine and art in the tourism regions of Italy.

Learning Outcomes

1. Describe and explain the basic history of the tourism regions of Italy.
2. Recognize and describe the Italian food and wine industry and its impact on tourism.
3. Detail how the Italian's integrate sustainability into tourism.
4. Recognize the impact of culture and art on tourism.
5. Explain strategies for responsible travel abroad in Italy and the European Union focused on personal and group safety.
6. Analyze and evaluate multicultural differences between Italian and American societies focused on effective personal communication practices.
7. Produce a 20 slide narrated online presentation with pictures that focused on at least two course learning objectives

HRTM 4130. Hotel Operations II

3 Credits (3)

The duties and administration of a hotel front office, including housekeeping. Additional focus on the procedures of reservations and night audit. Students also gain exposure to property management systems.

Prerequisite: HRTM 2130.

Learning Outcomes

1. Describe day-to-day responsibilities for a hotel General Manager.
2. Explain departmental competencies for a hotel (Human Resources, Accounting, Revenue Management, Sales and Marketing, Front Office, Housekeeping, Food and Beverage, and Property Operation and Maintenance).
3. Compare and contrast management roles and responsibilities between limited service and full service hotels.
4. Describe hotel organizational, ownership, and franchising structures and their effect on hotel operations.
5. Explain the role of service throughout hotel operation departments.

HRTM 4135. Hospitality Facilities Management

3 Credits (3)

Exploration of the engineering and maintenance requirements specific to the hospitality industry. Emphasis on environmental issues, renovation and management of the physical plant.

Prerequisite: HRTM 2130, HRTM 4998.

Learning Outcomes

1. Manage property assets using planning and budgeting strategies and the appropriate type of maintenance.
2. Explain how technology is used to make maintenance and operations more efficient and effective.
3. Devise strategies to sustainably manage operational areas and systems in a hospitality business.
4. Manage important components of, and procedures in, water, HVAC, electrical, lighting, safety and security, and waste management systems.
5. Interpret construction drawings and schematics in a basic manner.
6. Describe various kitchen hood systems and individual pieces of kitchen equipment from a mechanical, maintenance and operational perspective.
7. Design risk management strategies for a hospitality business.
8. Describe the importance of building design and engineering to guest experiences, safety, government compliance, and brand identity.

9. Describe real-world facility management activities for hotels and restaurants as described by industry professionals active within their career.

HRTM 414. Wine Appreciation

3 Credits (3)

An experiential examination of wine through lectures, guest speakers and focused tasting of wine and food. Topics include viticulture, wine making varietals, terroir, wine service, tasting and evaluation techniques, and food pairings. Student must be at least 21 years old. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

HRTM 4140. Hotel Revenue and Sales Management

3 Credits (3)

Examines methods used for profitably managing capacity, including dynamic pricing and allocation of the rooms inventory across market segments to maximize revenues. Focuses on the integration of revenue management principles with information technology, management, marketing and sales concerns at the property and market level.

Prerequisite: HRTM 2130.

Learning Outcomes

1. Describe and discuss the role and function of revenue management in a hotel organization.
2. Evaluate pricing techniques and effects on demand.
3. Determine market segmentation for a hotel.
4. Demonstrate inventory management strategies.
5. Discuss legal and ethical aspects of revenue management.
6. Perform various analysis for a hotel as a function of revenue management.
7. Evaluate distribution channels for hotels.
8. Evaluate and recommend revenue management techniques.

HRTM 4145. Resort Management

3 Credits (3)

This course introduces students to the operation and management of full service resort properties, including the management of resort recreational amenities.

Prerequisite: HRTM 2130 or consent of instructor.

Learning Outcomes

1. Explain differences in operations and management between resorts and hotels.
2. Identify and explain concepts and terminology for various resort amenities and activities.
3. Evaluate resort amenities and activities for various market segments.
4. Identify and discuss trends in the resort industry.
5. Describe best practices in resort management.
6. Evaluate resort amenities, activities, markets and products.

HRTM 4230. Hotel, Restaurant and Tourism Industry Purchasing, Selection, and Procurement

3 Credits (3)

Purchasing methods for the hotel, restaurant and tourism industries based on standards of quality, grade, care, and storage for food and nonfood supplies. Purchasing, installation, operation, and care of large foodservice equipment.

Learning Outcomes

1. Differentiate purchasing functions in different types of hotel, restaurant and tourism operations and determine how internal and external forces impact purchasing decisions.

2. Outline and describe the duties and responsibilities of hotel, restaurant and tourism purchasing managers.
3. Develop product recommendations for hotel, restaurant and tourism food and equipment through the use of various product evaluation methods.
4. Identify examples of unethical purchasing practices throughout history, research present a code of purchasing ethics for a hotel, restaurant or tourism company.
5. Analyze hotel, restaurant and tourism industry supplier selection criteria and recommend a supplier based on those criteria.
6. Apply mathematical models to calculate recipe costs as well as order quantities and times. Determine how to reduce AP prices.
7. Outline and describe each step of the flow of inventory and determine which controls are needed for security of inventory.
8. Explain product grades and explain grading procedures and procurement criteria for meats, poultry, eggs, dairy, produce, marine products, groceries, and nonfood items.

HRTM 4235. Club Management and Marketing

3 Credits (3)

Provides an understanding of the general operational and administrative procedures practiced in private clubs from a marketing perspective with a special emphasis on managing and marketing club food and beverage operations and service. It will provide the professional golf management and hospitality students with the unique sensitivities required in managing and operating in the increasingly lucrative club management market.

Learning Outcomes

1. Describe the different types of private clubs and their specific operations.
2. Describe the different types of membership categories offered by private clubs.
3. Describe the responsibilities of the board of directors of private clubs.
4. Identify the typical organizational structure in private clubs.
5. Distinguish the functions and responsibilities of a club's board of directors from those of the club's general manager and staff.
6. Identify tips for long-term success to become an effective leader and communicator.
7. Explain the importance of a club strategic plan and strategic implementation.
8. Explain the role of marketing in a private club setting.
9. Summarize the importance of training and lifelong learning to the success of private clubs. 1
10. Describe the different types of food and beverage operations found in private clubs. 1
11. Identify the different financial statements used by clubs. 1
12. Describe the functions and ethical interdependencies among the major departments within a club. 1
13. Describe a manager's operational inspection and critique of one of the major departments within a club from an overall department manager's leadership perspective. 1
14. Explain the importance of facility management in clubs, particularly as it relates to members, employees and costs. 1
15. Summarize the duties and responsibilities of golf professionals, greens and grounds departments, and other golf staff members. 1
16. Describe a club fitness operation, and common programs of a club fitness center.

HRTM 4240V. Sustainability in the Hospitality Industry

3 Credits (3)

This course provides a summary and definition of the concept and roots of sustainability and climate change as well as their impact and effect on the hospitality industry while providing the rationale for sustainable development for the industry. A review of environmentally sound management strategies for all operational management areas ranging from eco-design, energy, waste and water management, food security, sourcing of agricultural products leads to a detailed strategy for planning and evaluating the sustainability of a hospitality operation in terms of corporate responsibility and social entrepreneurship. The content is focused on a global perspective of sustainability in the industry.

Learning Outcomes

1. Recognize, interpret and summarize the global challenges facing the hospitality industry caused by climate change driving the need for sustainability in the industry.
2. Explain implementation strategies for responsible environmentally sound hospitality management practices for hotel, food and beverage and tourism businesses.
3. Evaluate sustainable development practices and the importance of personal and corporate social development.
4. Analyze, evaluate and communicate the sustainability practices of a hospitality operation.

HRTM 4310. Beverage Management

3 Credits (3)

Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation.

Prerequisite: HRTM 3310.

Learning Outcomes

1. Understand basic principles that lead to success in the beverage business.
2. Understand the importance of sustainability in beverage businesses.
3. Identify concepts and principles applied in global and sustainable hospitality organizations..
4. Describe and demonstrate the fundamental principles of ethical leadership.
5. Create favorable guest experiences by applying professional service management techniques.
6. Organize, analyze and interpret information to formulate rational solutions and clear logical decisions.
7. Demonstrate effective written, visual and interpersonal communication skills.
8. Apply relevant technologies to enhance organizational performance in a competitive environment.

HRTM 4320. Restaurant Operations Management

4 Credits (1+6P)

Provides a detailed understanding of the processes of restaurant operations management. Students are expected to increase kitchen and service technical skills, develop and cook from recipes, develop a personal leadership style, understand food and wine pairing, and supervise front and back of the house operations. Provides the opportunity to perform a detailed analysis of a food and beverage operation. Proof of valid ServSafe Food Protection Manager or NM Food Handler certification and current NM Alcohol Server certification required.

Prerequisite: HRTM 3310.

Learning Outcomes

1. Demonstrate the skill of planning, designing, pricing and evaluating menus.
2. Demonstrate servant leadership skills during fine dining meals.
3. Demonstrate cost control through budget, income and expense reports.
4. Demonstrate how to construct, portion and cost standard recipes.
5. Demonstrate how to inventory, purchase, receive and store foods for production.
6. Demonstrate back of house production, service, and management.
7. Demonstrate how to manage alcoholic beverages with emphasis on wines.
8. Demonstrate front of house service and management.
9. Demonstrate how labor costs effect menu, food production, and desired service. 1
10. Demonstrate application of revenue control in the food service facility. 1
11. Demonstrate ability to implement change within the restaurant setting.

HRTM 4330. Wine Appreciation**3 Credits (3)**

An experiential examination of wine through lectures, guest speakers and focused tasting of wine and food. Topics include viticulture, wine making varietals, terroir, wine service, tasting and evaluation techniques, and food pairings. Student must be at least 21 years old. Consent of instructor required.

Learning Outcomes

1. Discuss the historical and cultural significance of wine.
2. Compare and contrast the production processes for wines.
3. Describe and analyze the characteristics of popular wine varietals.
4. Describe how viticultural practices and geography/climate factors relate to the quality and variation in wines.
5. Perform evaluation and appraisal of wines based on quality, value, and intended use.
6. Apply knowledge of terminology related to labeling laws, practices, and geography of the major wine-growing regions of the world to the effective selection of both domestic and imported wines.
7. Pair wine with foods.
8. Examine the distribution and service systems for wine, including current issues affecting them.

HRTM 4410. Hospitality Cost Control**3 Credits (3)**

Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers.) Provides tools needed to communicate effectively about global financial issues affecting the hospitality business.

Prerequisite: HRTM 3310.

Learning Outcomes

1. Describe all aspects of the cost control planning process including financial data entry techniques and hospitality accounting practices.
2. Construct, calculate and interpret common hospitality industry financial reports.
3. Compare and contrast the roles of various stakeholders (owners, managers, employees and customers).

4. Facilitate and communicate effectively with stakeholders local, national and global financial issues affecting the hospitality industry.

HRTM 4910. HRTM Internship Seminar**1 Credit (1)**

A case based approach to analyzing internship experiences. Students will write case studies about specific business issues they encountered during HRTM 4998 and analyze them. Restricted to HRTM majors. May be repeated up to 1 credit.

Prerequisite: HRTM 4998.

Learning Outcomes

1. Explain the strengths and weaknesses of departments and work units from the hospitality operation in which they interned.
2. Compare and contrast management styles, leadership skill, and effectiveness of supervisors and managers.
3. Offer solutions to problems and challenges encountered in the workplace.
4. Write a comprehensive case study about their internship experiences.

HRTM 4991. Special Problems**1-4 Credits (1-4)**

Individual research in a selected subject area of hospitality management. Consent of instructor required. Maximum of 4 credits per semester and a total of 6 credits toward a degree. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

HRTM 4996. Special Topics**1-4 Credits (1-4)**

Specific subjects to be announced in the Schedule of Classes. Consent of instructor required. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits.

Learning Outcomes

1. Varies.

HRTM 4998. Hospitality Internship**1 Credit (1)**

Hospitality and tourism professional work experience for HRTM majors only. Consent of instructor required. May be repeated up to 1 credit.

Prerequisite: HRTM 3910.

Learning Outcomes

1. Integrate knowledge and theory learned in the classroom with practical application and skills development in a professional setting.
2. Gain valuable applied experience.
3. Demonstrate an attitude that is appropriate for a prospective manager in the hospitality industry.
4. Identify personal strengths and weaknesses using a self-evaluation tool.
5. Make connections to establish useful contacts for future employment.

HRTM 4999. Senior Capstone Experience**3 Credits (3)**

Synthesizes all previous work. Students apply multi-disciplinary principles to the analysis of hospitality business cases and tourism problems.

Prerequisite: HRTM 4998.

Learning Outcomes

1. Apply the ethical lens framework to business decisions.
2. Evaluate the importance of the effects of the Covid-19 pandemic, diversity, equity, and inclusion, the guest service experience, including

service failure, and recovery, innovation, technology, corporate social responsibility, business models, and other trends to the hospitality and tourism industry.

3. Use research and the case study method to analyze hospitality business issues and trends.
4. Present case and research findings in a professional manner
5. Write professional reports.

HRTM 501. The Hospitality Industry and Sustainable Competitive Strategy

3 Credits (3)

An examination of the hospitality industry, and its contemporary strategic management principles and practices. Key components, industry organization, and competitive environment of the hospitality industry are analyzed. Strategic decision making principles are examined to create sustainable competitive advantages for hospitality and service industry leaders and organizations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Analyze key components, industry organization, and competitive environment of the hospitality industry.
2. Examine strategic decision making principles to create sustainable competitive advantages for hospitality and service industry leaders and organizations

HRTM 505. Hospitality Research Methods & Analysis

3 Credits (3)

Application of appropriate statistical procedures and research methodologies within the hospitality industry. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Analyze hospitality operational data.
2. Develop the framework for researching hospitality operations and organizations.
3. Implement appropriate statistical procedures and research methodologies to hospitality operations.
4. Examine problems in hospitality, formulate and clarify research topics to address these problems.

HRTM 506. Contemporary Global Issues in Hospitality

3 Credits (3)

Contemporary issues confronting the global hospitality industry. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Discuss contemporary issues confronting the global hospitality industry.
2. Project how contemporary global issues will impact hospitality organizations.
3. Evaluate new developments in hotel and restaurant management

HRTM 510. Hospitality Cost Control

3 Credits (3)

Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers). Provides tools needed to communicate effectively about global financial issues affecting the hospitality

business. Same as HRTM 410 with additional work for graduate credit. Consent of Instructor required.

HRTM 512. Beverage Management

3 Credits (3)

Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation. Same as HRTM 412 with additional work for graduate credit. Consent of Instructor required.

HRTM 5120. Hospitality Services Management

3 Credits (3)

This course explores and applies the design and management of service quality in global hospitality organizations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Investigate the design and management of service quality in global hospitality organizations to create authentic and memorable hospitality experiences.
2. Design and manage service delivery systems to create a culture of service excellence
3. Define and discuss the relationship between service and financial performance in hospitality organizations

HRTM 5130. Hotel Operations II

3 Credits (3)

The duties and administration of a hotel front office, including housekeeping. Additional focus on the procedures of reservations and night audit. Students also gain exposure to property management systems. Same as HRTM 4130 with additional work for graduate credit. Consent of Instructor required.

Learning Outcomes

1. Describe day-to-day responsibilities for a hotel General Manager.
2. Explain departmental competencies for a hotel (Human Resources, Accounting, Revenue Management, Sales and Marketing, Front Office, Housekeeping, Food and Beverage, and Property Operation and Maintenance).
3. Compare and contrast management roles and responsibilities between limited service and full service hotels.
4. Describe hotel organizational, ownership, and franchising structures and their effect on hotel operations.
5. Explain the role of service throughout hotel operation departments.

HRTM 5140. Hotel Revenue and Sales Management

3 Credits (3)

Examines methods used for profitably managing capacity, including dynamic pricing and allocation of the rooms inventory across market segments to maximize revenues. Focuses on the integration of revenue management principles with information technology, management, marketing and sales concerns at the property and market level. Same as HRTM 4140 with additional work for graduate credit. Consent of Instructor required.

Learning Outcomes

1. Describe and discuss the role and function of revenue management in a hotel organization.
2. Evaluate pricing techniques and effects on demand.
3. Determine market segmentation for a hotel.
4. Demonstrate inventory management strategies.
5. Discuss legal and ethical aspects of revenue management.
6. Perform various analysis for a hotel as a function of revenue management.

- Evaluate distribution channels for hotels.
- Evaluate and recommend revenue management techniques.

HRTM 5145. Resort Management

3 Credits (3)

This course introduces students to the operation and management of full service resort properties, including the management of resort recreational amenities. Consent of instructor required. Must be in Graduate Student standing to enroll. Same as HRTM 4145 with additional work for graduate credit.

Learning Outcomes

- Explain differences in operations and management between resorts and hotels.
- Identify and explain concepts and terminology for various resort amenities and activities.
- Evaluate resort amenities and activities for various market segments.
- Identify and discuss trends in the resort industry.
- Describe best practices in resort management.
- Evaluate resort amenities, activities, markets and products.

HRTM 515. Applied Management Project

3 Credits (3)

Students will develop a project scope based on problems presented within the hospitality industry. Projects incorporate concepts and skills developed in previous coursework. Students will take this course in their last semester of the Master of Hospitality Degree. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

- Develop a project scope based on problems presented within the hospitality industry.
- Use collaborative problem solving to execute the project.
- Define and identify a business research problem and explain its importance to study.
- Identify sources and strategies for locating related literature.
- Plan research regarding the business problem.
- Write the professional paper.
- Present the professional paper.

HRTM 516. Hotel, Restaurant and Tourism Industry Purchasing, Selection and Procurement

3 Credits (3)

Purchasing methods for the hotel, restaurant and tourism industries based on standards of quality, grade, care, and storage for food and nonfood supplies. Purchasing, installation, operation, and care of large foodservice equipment.

Learning Outcomes

- Differentiate purchasing functions in different types of hotel, restaurant and tourism operations and determine how internal and external forces impact purchasing decisions.
- Outline and describe the duties and responsibilities of hotel, restaurant and tourism purchasing managers.
- Develop product recommendations for hotel, restaurant and tourism food and equipment through the use of various product evaluation methods.
- Identify examples of unethical purchasing practices throughout history, research present a code of purchasing ethics for a hotel, restaurant or tourism company.
- Analyze hotel, restaurant and tourism industry supplier selection criteria and recommend a supplier based on those criteria.

- Apply mathematical models to calculate recipe costs as well as order quantities and times. Determine how to reduce AP prices.
- Outline and describe each step of the flow of inventory and determine which controls are needed for security of inventory.
- Explain product grades and explain grading procedures and procurement criteria for meats, poultry, eggs, dairy, produce, marine products, groceries, and nonfood items.

HRTM 5210. The Hospitality Industry and Sustainable Competitive Strategy

3 Credits (3)

An examination of the hospitality industry, and its contemporary strategic management principles and practices. Key components, industry organization, and competitive environment of the hospitality industry are analyzed. Strategic decision making principles are examined to create sustainable competitive advantages for hospitality and service industry leaders and organizations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

- Analyze key components, industry organization, and competitive environment of the hospitality industry.
- Examine strategic decision making principles to create sustainable competitive advantages for hospitality and service industry leaders and organizations.

HRTM 5220. Contemporary Global Issues in Hospitality

3 Credits (3)

Contemporary issues confronting the global hospitality industry. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

- Discuss contemporary issues confronting the global hospitality industry.
- Project how contemporary global issues will impact hospitality organizations.
- Evaluate new developments in hotel and restaurant management.

HRTM 5230. Hotel, Restaurant and Tourism Industry Purchasing, Selection and Procurement

3 Credits (3)

Purchasing methods for the hotel, restaurant and tourism industries based on standards of quality, grade, care, and storage for food and nonfood supplies. Purchasing, installation, operation, and care of large foodservice equipment. Same as HRTM 4230 with additional work for graduate credit.

Learning Outcomes

- Differentiate purchasing functions in different types of hotel, restaurant and tourism operations and determine how internal and external forces impact purchasing decisions.
- Outline and describe the duties and responsibilities of hotel, restaurant and tourism purchasing managers.
- Develop product recommendations for hotel, restaurant and tourism food and equipment through the use of various product evaluation methods.
- Identify examples of unethical purchasing practices throughout history, research present a code of purchasing ethics for a hotel, restaurant or tourism company.
- Analyze hotel, restaurant and tourism industry supplier selection criteria and recommend a supplier based on those criteria.

6. Apply mathematical models to calculate recipe costs as well as order quantities and times. Determine how to reduce AP prices.
7. Outline and describe each step of the flow of inventory and determine which controls are needed for security of inventory.
8. Explain product grades and explain grading procedures and procurement criteria for meats, poultry, eggs, dairy, produce, marine products, groceries, and nonfood items.

HRTM 5240. Sustainability in the Hospitality Industry

3 Credits (3)

This course provides a summary and definition of the concept and roots of sustainability and climate change as well as their impact and effect on the hospitality industry while providing the rationale for sustainable development for the industry. A review of environmentally sound management strategies for all operational management areas ranging from eco-design, energy, waste and water management, food security, sourcing of agricultural products leads to a detailed strategy for planning and evaluating the sustainability of a hospitality operation in terms of corporate responsibility and social entrepreneurship. The content is focused on a global perspective of sustainability in the industry. Same as HRTM 4240V with additional work for graduate credit.

Learning Outcomes

1. Recognize, interpret and summarize the global challenges facing the hospitality industry caused by climate change driving the need for sustainability in the industry.
2. Explain implementation strategies for responsible environmentally sound hospitality management practices for hotel, food and beverage and tourism businesses.
3. Evaluate sustainable development practices and the importance of personal and corporate social development.
4. Analyze, evaluate and communicate the sustainability practices of a hospitality operation.

HRTM 5310. Beverage Management

3 Credits (3)

Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation. Same as HRTM 4310 with additional work for graduate credit. Consent of Instructor required.

Learning Outcomes

1. Understand basic principles that lead to success in the beverage business.
2. Understand the importance of sustainability in beverage businesses.
3. Identify concepts and principles applied in global and sustainable hospitality organizations.
4. Describe and demonstrate the fundamental principles of ethical leadership.
5. Create favorable guest experiences by applying professional service management techniques.
6. Organize, analyze and interpret information to formulate rational solutions and clear logical decisions.
7. Demonstrate effective written, visual and interpersonal communication skills.
8. Apply relevant technologies to enhance organizational performance in a competitive environment.

HRTM 536. Sustainability in the Hospitality Industry

3 Credits (3)

This course provides a summary and definition of the concept and roots of sustainability and climate change as well as their impact and effect

on the hospitality industry while providing the rationale for sustainable development for the industry. A review of environmentally sound management strategies for all operational management areas ranging from eco-design, energy, waste and water management, food security, sourcing of agricultural products leads to a detailed strategy for planning and evaluating the sustainability of a hospitality operation in terms of corporate responsibility and social entrepreneurship. The content is focused on a global perspective of sustainability in the industry.

Learning Outcomes

1. Recognize, interpret and summarize the global challenges facing the hospitality industry caused by climate change driving the need for sustainability in the industry.
2. Explain implementation strategies for responsible environmentally sound hospitality management practices for hotel, food and beverage and tourism businesses.
3. Evaluate sustainable development practices and the importance of personal and corporate social development.
4. Analyze, evaluate and communicate the sustainability practices of a hospitality operation.

HRTM 5410. Hospitality Cost Control

3 Credits (3)

Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers). Provides tools needed to communicate effectively about global financial issues affecting the hospitality business. Same as HRTM 4410 with additional work for graduate credit. Consent of Instructor required.

Learning Outcomes

1. Describe all aspects of the cost control planning process including financial data entry techniques and hospitality accounting practices.
2. Construct, calculate and interpret common hospitality industry financial reports.
3. Compare and contrast the roles of various stakeholders (owners, managers, employees and customers).
4. Facilitate and communicate effectively with stakeholders local, national and global financial issues affecting the hospitality industry.

HRTM 5420. Hospitality Research Methods & Analysis

3 Credits (3)

Application of appropriate statistical procedures and research methodologies within the hospitality industry. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Analyze hospitality operational data.
2. Develop the framework for researching hospitality operations and organizations.
3. Implement appropriate statistical procedures and research methodologies to hospitality operations.
4. Examine problems in hospitality, formulate and clarify research topics to address these problems.

HRTM 550. The World of Hospitality Higher Education

3 Credits (3)

Survey of the history, organization, and administration of hospitality higher education programs. Explores differences between types of degree programs – associate, bachelor, graduate and sources of funding – public, private, proprietary. Investigates the role of the faculty member in non-instructional activities, such as working with administrative

and support departments, accreditation, service, community outreach, fundraising, and industry relations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Discuss the history of higher education and hospitality management programs.
2. Analyze how general higher education principles, laws, and finance apply to hospitality management programs.
3. Compare the characteristics, administration, and operations of programs based on type of degrees offered.
4. Compare the characteristics, administration, and operations of programs based on sources of funding.
5. Analyze the role of the faculty in hospitality education in collaborating with various educational departments and support services.
6. Analyze the role of the faculty in hospitality education in collaborating with external stakeholders.

HRTM 5510. The World of Hospitality Higher Education

3 Credits (3)

Survey of the history, organization, and administration of hospitality higher education programs. Explores differences between types of degree programs – associate, bachelor, graduate and sources of funding – public, private, proprietary. Investigates the role of the faculty member in non-instructional activities, such as working with administrative and support departments, accreditation, service, community outreach, fundraising, and industry relations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Discuss the history of higher education and hospitality management programs.
2. Analyze how general higher education principles, laws, and finance apply to hospitality management programs.
3. Compare the characteristics, administration, and operations of programs based on type of degrees offered.
4. Compare the characteristics, administration, and operations of programs based on sources of funding.
5. Analyze the role of the faculty in hospitality education in collaborating with various educational departments and support services.
6. Analyze the role of the faculty in hospitality education in collaborating with external stakeholders.

HRTM 598. Special Research Programs

1-4 Credits

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

Prerequisite: consent of instructor.

HRTM 5991. Special Research Programs

1-4 Credits (1-4)

Individual investigations, either analytical or experimental. Consent of instructor required. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

Learning Outcomes

1. Explain and deliver a summary and definition for planning research in hospitality and tourism.
2. Demonstrate effective academic reading skills, articulate your research goal, define parameters and organization for your literature search, appropriately document and cite sources from your search.

3. Develop a topic statement and the framework for researching specific hospitality operations and organizations.
4. Design and implement appropriate statistical procedures and research methodologies to hospitality operations.
5. Evaluate problems in hospitality, formulate and clarify research topics to address these problems.

HRTM 5992. Applied Management Project

3 Credits (3)

Students will develop a project scope based on problems presented within the hospitality industry. Projects incorporate concepts and skills developed in previous coursework. Students will take this course in their last semester of the Master of Hospitality Degree. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Develop a project scope based on problems presented within the hospitality industry.
2. Use collaborative problem solving to execute the project.
3. Define and identify a business research problem and explain its importance to study.
4. Identify sources and strategies for locating related literature.
5. Plan research regarding the business problem.
6. Write the professional paper.
7. Present the professional paper.

HRTM 5996. Special Topics

1-4 Credits (1-4)

Specific subjects and credits to be announced in the Schedule of Classes. Consent of instructor required. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits.

Learning Outcomes

1. Varies

HRTM 5998. Graduate Hospitality Internship

3 Credits (3)

Hospitality and tourism industry professional, structured and supervised work experience for HRTM graduate students only.

Learning Outcomes

1. Develop and apply interviewing and negotiating skills during the process of seeking and being hired into an internship.
2. Recall and explain the strengths and weaknesses of departments and work units from the hospitality operation in which they interned.
3. Describe and explain interactions with the hospitality operation's guests and the development of a positive service oriented attitude as well as be able to describe the service management delivery system.
4. Compare and contrast the management styles, leadership skills, and effectiveness of supervisors and managers. analyze which type of style or skill fits best with their style.
5. Analyze which styles and leadership skills best fit their personal management abilities.
6. Identify new and different experiences encountered during the internship, distinguish the positive and negative aspects of the experience, and appraise these experiences as to their value to their future hospitality management career.
7. Apply coursework related knowledge to demonstrate coursework related knowledge to the internship position.
8. Synthesize the total internship learning experience by completing a comprehensive management report.

HRTM 5999. Master's Thesis**1-6 Credits (1-6)**

Thesis. Consent of instructor required. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

HVAC-HEATING/AC/REFRIGERATION

HVAC 100. EPA Clean Air Act: Section 608**1 Credit (1)**

Refrigerant certification preparation to include basics of refrigerant bearing equipment, ozone depletion and the new legislation, technician categories covered and the certification examination.

HVAC 101. Fundamentals of Refrigeration**4 Credits (3+2P)**

Refrigeration cycle and the various mechanical components. Use of special tools, equipment, and safety precautions.

HVAC 102. Fundamentals of Electricity**4 Credits (3+2P)**

Introduction to electricity theory, Ohm's Law, circuits, AC/DC, and practical applications.

HVAC 103. Electrical and Mechanical Controls I**4 Credits (3+2P)**

Applications of basic electrical and mechanical controls. Reading and drawing diagrams of simple refrigerating equipment. Safe use of testing equipment.

Prerequisites: HVAC 101 and HVAC 102, or consent of instructor.

HVAC 110. Professional Development and Leadership**1 Credit (1)**

As members and/or officers of various student professional organizations, students gain experience in leadership, team building, and community service. Students competing in Skills USA are required to register for the course. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: HVAC majors. Graded: S/U Grading (S/U, Audit). Restricted to: Community Colleges only.

HVAC 113. Job Shadowing**1 Credit (1)**

Course will expose students to actual HVAC/R field work and provide them knowledge of the expectations of field work as they shadow an HVAC/R technician. Consent of instructor required. Restricted to: Community colleges only.

HVAC 205. Commercial Refrigeration Systems**4 Credits (3+2P)**

Service and maintenance of commercial refrigeration equipment to include evacuation and charging procedures, electrical diagrams, and compressors and accessories.

Prerequisites: HVAC 103 or consent of instructor.

HVAC 207. Residential Air Conditioning Systems**4 Credits (3+2P)**

Applications and types of equipment used in comfort cooling. Preventive maintenance, service, and repairs common to evaporative coolers and refrigerated air conditioning systems. Air properties and psychometrics.

Prerequisite: HVAC 103 or consent of instructor.

HVAC 209. Residential Heating Systems**4 Credits (3+2P)**

Gas and electric systems used in comfort heating. Maintenance procedures, safety, troubleshooting, and servicing malfunctions in equipment.

Prerequisite: HVAC 103 or consent of instructor.

HVAC 210. Commercial Air Conditioning and Heating Systems**4 Credits (3+3P)**

Covers troubleshooting mechanical and electrical problems associated with HVAC equipment in commercial buildings. Includes gas, electric, and heat pump systems. Restricted to Community Colleges campuses only.

Prerequisite(s): HVAC 103 or consent of instructor.

HVAC 211. Heat Pump Systems**4 Credits (3+2P)**

Reverse cycle refrigeration systems utilized in comfort heating and cooling. Troubleshooting mechanical electrical problems associated with heat pumps. HVAC 103 or consent of instructor.

HVAC 213. Practicum**3 Credits (3)**

Working in the field with journeymen service technicians. Develop and apply job skills. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HVAC majors. Restricted to Community Colleges campuses only.

Prerequisite(s): HVAC 113 and Consent of instructor.

HVAC 220. Introduction to Sheet Metal Fabrication**4 Credits (3+2P)**

Introduction to sheet metal fabrication to include hands-on practical laboratory applications, cutting and forming procedures, identifying types and gauges. Design and layout techniques.

Prerequisite: OETS 118 or equivalent math or consent of instructor.

HVAC 225. New Mexico Mechanical Codes: HVAC**1-4 Credits**

Principles and regulations developed for HVAC, sheet metal, and plumbing occupations to include terminology, ventilation air supply, exhaust systems, duct systems, combustion air, chimneys and vents, boilers/water heaters, refrigeration, panel and hydronic panel heating, fuel gas piping, storage systems, solar systems, and workmanship standards. May be repeated for a maximum of 12 credits.

HVAC 255. Special Topics**1-6 Credits**

Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

HVAC 290. Special Problems**1-4 Credits**

Individual studies related to heating, air conditioning, and refrigeration.

Prerequisites: HVAC 101, HVAC 102, and consent of instructor.

I B-INTERNATIONAL BUSINESS

I B 317. International Marketing**3 Credits (3)**

Focuses on decisions relating to entering markets, market segmentation, marketing strategies, and tactics in the international arena. Same as MKTG 317.

Learning Outcomes

1. Develop understanding about what is involved in making international marketing decisions, including product, price, promotion, and place decisions to create a marketing mix.
2. Acquire an overview on the contemporary issues in global marketing and the unique challenges faced by marketing managers in the dynamic global environment.

3. Develop insights into how differences in global economic, cultural, social, political, and legal environments can affect marketing decisions.
4. Develop strategic thinking in the context of complex problems and challenges faced by the contemporary global executives and managers.
5. Develop ability to integrate the important global societal dimensions of diversity, environmental concerns, ethics, and technological change into their thinking.
6. Develop knowledge and skills to analyze cross-cultural variables and their impact on international marketing.
7. Discover sources of information for researching and evaluating international markets.
8. Communicate effectively about marketing issues in group discussions, oral presentations and written reports.
9. Work effectively as a team member in analyzing marketing issues.
10. Develop leadership skills necessary to deal with the uncertainty and changes faced by today's global marketers.

I B 351. International Business

3 Credits (3)

The various aspects of international business, and identification and analysis of problems encountered by multinational companies.

Prerequisite: junior standing or consent of instructor.

I B 398. International Business and Economic Environments

3 Credits (3)

Description and analysis of various world regions, e.g., Pacific Rim, Eastern Europe, South Asia. Region will vary from semester to semester.

I B 449. Open Economy Macroeconomics

3 Credits (3)

This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: ECON 449.

Prerequisite(s): BFIN 341 OR ECON 311.

I B 450. International Economics

3 Credits (3)

Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: ECON 450G

Prerequisite(s): ECON 2110G or ECON 2110H and ECON 2120G or ECON 2120H.

I B 475. International Finance

3 Credits (3)

International aspects of financial transactions, decision-making, banking and financial markets. Crosslisted with: BFIN 475 and BFIN 575.

Prerequisite(s): BFIN 341.

I B 489. Senior Seminar in International Business

3 Credits (3)

Capstone class for I B majors. Integration of previous classwork via the examination of case studies and completion of a major project.

Prerequisite: I B core.

I E-INDUSTRIAL ENGINEERING

I E 151. Computational Methods in Industrial Engineering

3 Credits (3)

History, social implications, and application of computers and an introduction to computer programming, word processing, and database management systems. Satisfies General Education computer science requirement.

Prerequisite: MATH 1220G.

I E 200. Special Problems-Sophomore

1-3 Credits

Directed individual projects. May be repeated for a total of 3 credits.

Prerequisite: consent of faculty member.

I E 217. Manufacturing Processes

3 Credits (2+3P)

Introduction to manufacturing and processing, including: casting, forming, and machining. Emphasis on creating products with the appropriate techniques. Crosslisted with: E T 217.

Prerequisite(s): A grade of C- or better in either E T 110 or ENGR 110 and C- or better in MATH 1220G.

Learning Outcomes

1. Identify the different manufacturing processes and their applications.
2. Use, set up, and calibrate measuring tools.
3. Apply geometric tolerances to engineering drawings.
4. Demonstrate basic knowledge of materials and material properties.
5. Demonstrate basic knowledge of GM codes and their application.
6. Proficiently use CAM packages such as SolidWorks CAM.
7. Identify different tooling, their use, and manufacturing application.

I E 300. Special Problems-Junior

1-3 Credits

Directed individual projects. May be repeated for a total of 3 credits.

Prerequisite: consent of faculty member.

I E 311. Engineering Data Analysis

3 Credits (3)

Methodology and techniques associated with identifying and analyzing industrial data.

Prerequisite: C- or better in MATH 1521G or MATH 1521H or ENGR 190.

Learning Outcomes

1. Ability to correctly interpret statistical reports
2. Ability to correctly identify and solve problems involving continuous and discrete probability and random variables.
3. Ability to correctly analyze random samples using methods that include: point estimates, confidence intervals, tests of hypothesis, analysis of variance (ANOVA), and linear regression.

I E 316. Methods Engineering

3 Credits (2+3P)

Methods analysis and design. Work measurement techniques. Job evaluation and wage incentive methods. May be repeated up to 3 credits.

Prerequisite(s): I E 217, ENGR 110.

Corequisite: I E 311.

Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety,

and welfare, as well as global, cultural, social, environmental, and economic factors.

3. An ability to communicate effectively with a range of audiences.
4. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
5. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

I E 351. Applied Problem Solving in Industrial Engineering

3 Credits (3)

Application of computational techniques to engineering problems including the use of commercial programs in statistics and applied mathematics. Restricted to majors.

Corequisite(s): I E 311.

I E 365. Quality Control

3 Credits (3)

Statistical analysis of quality in manufacturing. Acceptance sampling and control charts.

Prerequisite: I E 311 or equivalent.

I E 375. Manufacturing Processes II

3 Credits (3)

Review of basic manufacturing processes. Advanced topics in casting, forming, machining and joining; major process parameters; economics of processes.

Prerequisite: I E 217 or E T 217.

I E 400. Undergraduate Research

1-3 Credits

May be repeated for a maximum of 6 credits.

Prerequisite: consent of faculty member.

I E 411. Occupational Safety

3 Credits (3)

Practical methods to improve safety in the workplace. Topics include OSHA and other regulations, hazard recognition, assessment and control, industry standards, risk assessment and safety management. Material is applicable to a variety of workplace settings. This course is intended for College of Engineering students who have completed their lower-division requirements in mathematics, engineering, technology, and basic science. Same as I E 561 with differential assignments. **Prerequisite:** Junior standing

I E 412. Design for Manufacturing and Assembly

3 Credits (3)

Engineering methodology focusing on reducing time-to-market and total production costs by prioritizing both the ease of manufacture for the product's parts and the simplified assembly of those parts into the final product.

Prerequisite: (ENGR 217 or I E 217) and I E 316.

Learning Outcomes

1. The ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. The ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
3. The ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

4. The ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

I E 413. Engineering Operations Research I

3 Credits (3)

Deterministic operations research modeling including linear and integer programming.

Prerequisite: MATH 1521G or MATH 1521H or ENGR 190.

Corequisite: MATH 480 or MATH 2415.

Learning Outcomes

1. Ability to model optimization problems that can be solved by linear optimization.
2. Ability to solve linear optimization problems
3. Ability to interpret solutions of linear optimization problems in the context of the larger problem.

I E 423. Engineering Operations Research II

3 Credits (3)

Probabilistic operations research modeling, including queuing systems and their optimization; Markov chains. May be repeated up to 3 credits.

Prerequisite(s): I E 311.

Corequisite(s): MATH 392.

I E 424. Manufacturing Systems

3 Credits (3)

Organization and functions of manufacturing planning and control systems including forecasting, MRP, capacity planning, JIT systems, scheduling, and inventory control.

Prerequisite: I E 311.

I E 425. Supply Chain Modeling and Analysis

3 Credits (3)

This course introduces supply chain and logistics concepts integrating theory and its application. The course emphasis is on understanding the role of supply chains for competitive advantage, when and how these concepts are applied to improve the distribution of goods and services, as well as in using mathematical programming and optimization methods for their adequate implementation.

Prerequisite: MATH 1521G or MATH 1521H or ENGR 190.

Corequisite: MATH 2415.

Learning Outcomes

1. Define and understand different structures and the importance of the supply chain.
2. Identify the main drivers of supply chain performance and measure them using precise metrics.
3. Integrate production operations management topics in the context of the supply chain.
4. Develop the ability to formulate quantitative decision models for supply chain and logistics management.
5. Study inventory planning decisions, Economic Order Quantity (EOQ), and its variants.

I E 451. Engineering Economy

3 Credits (3)

Discounted cash flows, economics of project, contract and specifications as related to engineering design.

I E 456. Large Scale Systems Engineering

3 Credits (3)

Systems engineering approaches to large-scale complex technological and societal problems. Concepts of interaction and structural graphs, matrices, delta, and Gantt charts. The hall matrix approach, structural

concepts, reachability matrices, and cross impact-analysis, modeling and decision making. May be repeated up to 3 credits.

Learning Outcomes

1. Ability to describe the systems engineering standards and best practices
2. Ability to characterize the limitations of the way that current systems engineering is practiced in terms of dealing with lifecycle uncertainty.

I E 459. Systems Thinking and Decision Making

3 Credits (3)

A general introduction to systems engineering. Topics include General Systems Theory, Systems Thinking and emerging concepts, Systems Dynamics approaches for modelling and analyzing non-linear feedback mechanisms in complex systems, and Complexity science and complex adaptive systems. May be repeated up to 3 credits.

Learning Outcomes

1. Ability to understand the complexities of engineering systems, and the implications of change on system behavior
2. Ability to understand the nature of complex systems in respect to people, processes, the environment and development organization
3. Ability to understand Systems Thinking's role and value within organizations
4. Ability to recognize the advantages, as well as the flaws of our present predominant way of thinking (Cartesian), while looking at the changes that would enable us to deal with complex issues in daily practice (Systems Thinking)
5. Ability to recognize the value and limitations of modeling and simulation as well as how to construct and interpret various models to support decision making.

I E 460. Evaluation of Engineering Data

3 Credits (3)

Analysis of engineering systems possessing variability, employing regression, analysis of variance, distribution theory, and experimental design methods.

Prerequisite: I E 311 or equivalent.

I E 466. Reliability

3 Credits (3)

Application of statistical theory to engineering reliability estimation, reliability improvement, and the analysis of reliability test data.

Prerequisite: I E 311 or equivalent.

I E 467. Discrete-Event Simulation Modeling

3 Credits (3)

Basic modeling concepts, organizations of simulations, input data analysis, random variate generation, simulation design and analysis, model validation, output analysis, and management of simulations. Differentiated graduate assignments. May be repeated up to 3 credits.

Prerequisite(s): I E 311 or equivalent.

I E 468. Advanced Discrete-Event Simulation Applications

3 Credits (3)

Semester long project involving development and application of advanced simulation skills. May be repeated up to 3 credits.

Prerequisite: I E 467.

Learning Outcomes

1. Ability to understand the techniques of computer simulation modeling in the context of hierarchy of knowledge about a system and develop the capability to apply the same to study systems through available computer simulation software

I E 478. Facilities Planning and Design

3 Credits (3)

Plant location methods, total process analysis, process integration, materials handling analysis, and traditional and computerized plant layout methodologies.

Prerequisite(s): I E 316.

Prerequisite(s)/Corequisite(s): I E 424.

I E 490. Selected Topics

1-3 Credits

May be repeated for a maximum of 9 credits.

Prerequisite: consent of the head of the department.

I E 505. Directed Readings

1-3 Credits

May be repeated for a maximum total of 6 credits.

Prerequisite: consent of the head of the department.

I E 511. Survey of Industrial Engineering

3 Credits (3)

A project-based course covering methods of engineering, plant layout, production and inventory control, economic analysis, etc. May be repeated up to 3 credits.

Learning Outcomes

1. Ability to apply the various techniques of Industrial Engineering to solve real-life problems

I E 515. Stochastic Processes Modeling

3 Credits (3)

Introduction to the use of stochastic processes in the modeling of physical and natural systems. Use of generating functions, conditional probability and expectation, Poisson processes, random walk models, Markov chains, branching processes, Markov processes, and queuing processes in an applied setting.

Prerequisites: I E 311 or equivalent; and MATH 392 or equivalent.

I E 522. Queuing Systems

3 Credits (3)

Elements and classification of queuing systems, single server models, multi-server models, cost analysis and applications.

Learning Outcomes

1. Ability to model, analyze, and apply solutions to problems involving queuing systems
2. Ability to read and understand literature in the queuing system analysis field.

I E 523. Advanced Engineering Economy

3 Credits (3)

Theoretical basis for engineering economy methods, problems of cost estimation, replacement, nonmonetary factors, and feasibility studies. Same as C E 523.

I E 524. Advanced Production and Inventory Control

3 Credits (3)

Organization and functions of manufacturing planning and control systems including forecasting, MRP, capacity planning, JIT systems, scheduling and inventory control. Same as I E 424 with differentiated assignments.

I E 525. Systems Synthesis and Design

3 Credits (3)

Examination of the production management complex in terms of its components and the synthesis of these components into an effective operating unit. Development of input-output models representing the basis structure of all production activities.

I E 530. Environmental Management Seminar**1 Credit (1)**

Survey of practical and new developments in hazardous and radioactive waste management provided through a series of guest lectures and reports of ongoing research. Same as C E 530, E E 530, CHME 530.

I E 533. Linear Programming**3 Credits (3)**

Linear programming problem formulation, simplex algorithm, theory of linear programming, duality, revised simplex algorithm, and sensitivity analysis.

I E 534. Nonlinear Programming**3 Credits (3)**

Theoretical and computational methods to solve optimization problems in engineering, statistics, economics, and operations research. Topics include convexity, optimality conditions, Newton's method, Lagrange multipliers, search algorithms for unconstrained and constrained problems, as well as barrier and penalty methods.

Learning Outcomes

1. Ability to model situations which may be solved by nonlinear optimization and to interpret the results in the context of the larger problem
2. Ability to employ several computer tools to correctly solve nonlinear optimization problems.
3. Ability to read and understand literature in the field of nonlinear optimization
4. Ability to select appropriate methods and algorithms from a core representative set of methods and tools to solve nonlinear optimization problems

I E 535. Discrete Optimization**3 Credits (3)**

Combinatorial Optimization problems using both integer programming and graph theoretic approaches. Emphasis on modeling and computational algorithms.

I E 537. Large Scale Systems Engineering**3 Credits (3)**

Systems engineering approaches to large-scale complex technological and societal problems. Concepts of interaction and structural graphs, matrices, delta, and Gantt charts. The hall matrix approach, structural concepts, reachability matrices, and cross impact-analysis, modeling and decision making.

I E 545. Characterizing Time-Dependent Engineering Data**3 Credits (3)**

Theory and techniques employed in the characterization of stochastic processes commonly found in engineering applications. Distribution models include exponential, gamma, Weibull, and extreme value. Design and analysis of experiments involving complete and censored data and elevated stress. Analytical techniques include parametric, nonparametric, and graphical approaches with emphasis on modern computer tools. Exact and approximate maximum-likelihood techniques are stressed.

Learning Outcomes

1. Ability to characterize a process, based on data that is time-dependent or sequential in nature.

I E 561. Advanced Safety Engineering**3 Credits (3)**

Regulation as well as qualitative, and quantitative methods to achieve and maintain safety in the workplace. Includes liability, worker's compensation, OSHA, hazard control, safety assessment, cost justification, and system analysis.

Prerequisite: graduate status in engineering.

I E 563. Topics in Engineering Administration**3 Credits (3)**

Study of qualitative and quantitative aspects. Consideration given to philosophical, psychological, political and social implications of engineering administrative decisions.

I E 567. Design and Implementation of Discrete-Event Simulation**3 Credits (3)**

Basic modeling concepts, organizations of simulations, input data analysis, random variate generation, simulation design and analysis, model validation, output analysis, and management of simulations. Taught with I E 467 with differentiated assignments for graduate students.

I E 571. Advanced Quality Control**3 Credits (3)**

Advanced topics in quality control and design of experiments for improvement of quality.

Prerequisite: I E 311 or equivalent.

I E 575. Advanced Manufacturing Processes**3 Credits (3)**

Covers major process parameters in casting, forming, machining, and joining. Process economics and selection of processes design and interactions.

Prerequisite: graduate standing.

I E 590. Selected Topics**1-3 Credits**

May be repeated for a maximum of 9 credits.

Prerequisite: consent of the head of the department.

I E 598. Special Research Programs**1-3 Credits**

Individual analytical or experimental investigations. May be repeated for a maximum total of 6 credits.

Prerequisite: consent of instructor.

I E 599. Master's Thesis**1-15 Credits**

Thesis.

I E 610. Topics in Operations Research**3 Credits (3)**

Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 620. Topics in Computer Modeling**3 Credits (3)**

Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 630. Topics in Engineering Management**3 Credits (3)**

Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 690. Selected Topics**1-15 Credits**

May be repeated.

Prerequisite: consent of department head.

I E 700. Doctoral Dissertation**15 Credits**

Dissertation.

ICT-INFO & COMMUNICATION TECH

ICT 141. IT Essentials I: A+ Certification Training Focused on the Hardware Exam

3 Credits (3)

Installing, configuring, troubleshooting, and maintaining personal computer hardware components and will assist in preparation for the CompTIA A+ Hardware certification.

Learning Outcomes

1. Configure and support PC, mobile, and IoT device hardware.
2. Perform basic computer diagnostic and maintenance operations.
3. Implement basic data backup and recovery methods.
4. Apply basic hardware maintenance best practices.
5. Demonstrate baseline security practices for hardware.

ICT 145. Network Essentials: N+ Certification Training

3 Credits (3)

Focuses on the installation and administration of network communication systems and will assist in preparation for the CompTIA N+ Network certification.

Learning Outcomes

1. Explain basic networking concepts including network services, physical connections, topologies, and architecture.
2. Explain security concepts and network attacks in order to harden networks against threats.
3. Explain routing technologies and networking devices; deploy Ethernet solutions and configure wireless technologies.
4. Troubleshoot common cable, connectivity, and software issues related to networking.
5. Monitor and optimize networks to ensure business continuity.

ICT 152. Java Programming

3 Credits (3)

Programming in the Java language.

Learning Outcomes

1. Set up a rich programming environment.
2. Analyze existing code.
3. Create/modify/debug/test programs.
4. Employ software documentation and programming best practices.

ICT 161. IT Essentials II: A+ Certification Training focused on the Software exam

3 Credits (3)

Installing, configuring, troubleshooting, and maintaining personal computer operating systems and will assist in preparation for the CompTIA A+ Software certification.

Prerequisite: A grade of C- or better in ICT 141.

Learning Outcomes

1. Configure device operating systems, including Windows, Mac, Linux, Chrome OS, Android, and iOS.
2. Administer client-based and cloud-based software.
3. Troubleshoot and problem-solve core service and support challenges.
4. Apply best practices for documentation, change management, and scripting.
5. Support basic IT infrastructure and networking.

ICT 220. Discrete Math and Its Relationship to Information Technology

3 Credits (3)

Focuses on developing software coding skills using a programming language and its application to discrete mathematics, the use discrete structures in computer science. Topics included are logic, sets, relations, functions, methods of proof, recursion, combinatorics, graph theory, and algorithms

Prerequisite: A grade of C- or better in MATH 1220G or higher.

Corequisite: ICT 152.

Learning Outcomes

1. Explain the relationship between discrete math sets and coded arrays, finite and infinite, subsets, intersection, unions, and other set operations.
2. Explain binary Trees and know how to use demonstrate them using code.
3. Demonstrate the use of code applied to group and subgroup theory.
4. Demonstrate the use of code to create functions and algorithms.
5. Identify and explain logical operations and their application in coding.
6. Demonstrate the use of Probability Theory in code to predict random outcomes.

ICT 267. Information Security+ Certification Preparation

3 Credits (3)

The course covers the Sec+ exam objectives and detailed preparation for certification in information security.

Prerequisite: A grade of C- or better in both, ICT 141 and ICT 145.

Learning Outcomes

1. The student will select appropriate mitigation and deterrent techniques to address network attacks and vulnerabilities.
2. The student will examine how access control, identity management, and cryptography can secure a network and manage risk.
3. The student will identify privacy and policy issues.
4. The student will apply activities that an Information Systems Security specialist would normally carry out in the performance of his/her duties.

ICT 280. Introduction to Web Development

3 Credits (3)

Introduction to front-end web development including webpage design, structure, layout, positioning, responsiveness, and foundational layers of how the web works.

Learning Outcomes

1. Explain the Document Object Model of HTML5 web pages.
2. Organize web page contents with Lists, figures, and organizational elements.
3. Develop web page layout templates.
4. Implement style application inline, via style blocks, and using external resources.
5. Develop and apply javascript event-driven programming to web pages.
6. Explain the difference between client and server-side scripting and data processing.

ICT 300. Special Topics

3 Credits (3)

Directed study or project. Students must be in Junior standing and have the consent of department head to enroll. May be repeated up to 3 credits.

Learning Outcomes

1. Various.

ICT 320. Introduction to Internet Protocols**3 Credits (3)**

Present an overview of Internet Protocols Applications. Students must be in Junior or Senior standing only.

Learning Outcomes

1. Students will apply an understanding of basic Networking.
2. Students will employ effective use of Packet analysis software to troubleshoot network issues.
3. Explain the RFC process for developing network protocols.
4. Explain network protocol security implications.

ICT 339. Introduction to Digital Forensics and Incident Response**3 Credits (3)**

Introduction to the skills required to perform digital forensics and incident response on Windows operating systems. Topics include: live response, evidence acquisition, Windows operating system artifacts, documentation and reporting.

Prerequisite: A grade of C- or better in ICT 161.

Learning Outcomes

1. To understand Digital Forensics terms and definitions and why digital forensics is needed.
2. To study what is required and how to perform digital forensics.
3. To become familiar and aware of the hindrances/obstacles that affects effective digital/computer forensic operations.
4. To learn about the tools and procedures for how deleted data is recovered during digital forensic operations.
5. To use forensic tools and procedures to perform digital forensic operations on Windows operating systems, Emails, Mobile devices, and Communication networks (Computer, wireless, cellular networks).
6. To learn about incident response and procedures.

ICT 350V. Introduction to Personal Computer Security and Privacy**3 Credits (3)**

Introduction to Information Security and Privacy – Have you ever wondered what happens to all of your browsing history or data you fill out on websites go? Who has this data? What do they do with this data? How do you stop sharing your private information? This class will answer those questions and provide steps to make your online presence more secure.

Learning Outcomes

1. Classify security issues
2. Classify Privacy protections
3. Evaluate threats and countermeasures based on personal security breaches.
4. Formulate a real-time privacy response
5. Assess international privacy protections through a multicultural focus.

ICT 352. Software Technology I**3 Credits (3)**

This course focuses on reading, writing, debugging, testing, and documenting computer programs. May be repeated up to 3 credits.

Learning Outcomes

1. Set up a rich programming environment
2. Analyze existing code
3. Create/modify/debug/test programs
4. Employ software documentation and programming best practices

ICT 355. Linux System Administration**3 Credits (3)**

Operating systems applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup, and Maintenance of Linux Servers.

Learning Outcomes

1. Create a virtual environment on a host system using VirtualBox.
2. Develop single and multiple Linux Operating Systems within The VirtualBox Virtual Environment.
3. Select applications on production Linux Operating systems.
4. Support the operation of the Linux Operating system using System Administration Techniques.

ICT 360. Operating Systems for ICT**3 Credits (3)**

Fundamentals of operating systems with Windows and Linux including installation and configuration using the GUI as well as the command line, text editors, file systems, scripting and operating system management.

Learning Outcomes

1. Create a virtual environment on a host system using VirtualBox.
2. Create multiple Operating Systems in a Virtual Environment.
3. Manage error codes in Virtual Machines.
4. Support the operation of the CentOS GUI and Windows Operating Systems.

ICT 362. Software Technology II**3 Credits (3)**

Topics include problem analysis, object-oriented programming (OOP), structured logic, and development concepts. May be repeated up to 3 credits.

Prerequisite: A grade of C- or better in ICT 152 or ICT 352 or E T 262 or OECS 195 or C S 152 or C S 172.

Learning Outcomes

1. Set up and use a rich programming environment for programming with Python.
2. Analyze existing code.
3. Employ effective use of basic programming and basic troubleshooting.
4. Employ effective use of Object-Oriented Programming (OOP) and troubleshooting.
5. Apply testing and documentation best practices.

ICT 364. Windows Enterprise Administration**3 Credits (3)**

Installation, configuration, and maintenance of Windows Enterprise services which includes Active Directory, distributed file systems, SQL Server, Web Server, Authentication Procedures, and enterprise elasticity. Topics covered include: Server Maintenance and Troubleshooting Methodologies.

Prerequisite: A grade of C- or better in ICT 152.

Learning Outcomes

1. Set up and use a Windows Enterprise environment with Active Directory.
2. Use best practices to design an organizational Structure and define AD DS Objects.
3. Deploy an AD DS embedded DHCP server with IPvfour and IPvsix.
4. Analyze existing cmd shell and PowerShell code for process automation.
5. Deploy security and user settings using Group Policy.

6. Apply version updates and establish an intra-domain trust relationship.
7. Employ effective use of the WDS service to deploy template images.

ICT 372. Software Engineering and Design**3 Credits (3)**

Topics include the software development lifecycle, problem analysis, and implementing software testing routines to improve the quality, integrity, and security of code.

Prerequisite: A grade of C- or better in ICT 362.

Learning Outcomes

1. Identify, explain, and apply the phases of the SDLC.
2. Identify different Agile methodologies and practices for software project management.
3. Use different development tools and apply best practices.
4. Apply best practices in the creation of business objects, data storage and access, testing, and debugging.
5. Configuring, handling, testing, and deploying services.

ICT 377. Computer Networking I**3 Credits (3)**

Computer network design and applications for LAN, TCP/IP networks, routing and switching technologies, VLANs, and the OSI layers from physical to transport.

Prerequisite/Corequisite: A grade of C- or better MATH 1220G or higher.

Learning Outcomes

1. Define and distinguish the role of a network administrator (from other roles in the IT world).
2. Identify the OSI model, its layers, and the relationship to the TCP/IP model.
3. Identify different cable media and networking devices and their use.
4. Design, configure and troubleshoot basic networks.
5. Identify MAC, IPvfour, and IPvsix addressing.
6. Apply different techniques for IP allocation and subnet design (IPvfour).
7. Use the Cisco IOS software for basic switch and router configurations.
8. Configure and troubleshoot basic setup for static and dynamic routing protocols.

ICT 380. Web Design and Multimedia**3 Credits (3)**

Introduction to front-end web development including webpage design, structure, layout, positioning, responsiveness, and foundational layers of how the web works. Video, audio, and other digital presentation tools are covered.

Learning Outcomes

1. Create multiple front-end development micro-components.
2. Create single and multi-page websites.
3. Use flexbox, grid, and media queries and different design patterns.
4. Employ effective use of web development and basic troubleshooting.
5. Build small web site projects.

ICT 400. Special Topics**1-3 Credits (1-3)**

Directed study or project. Students must be in Senior standing and have the consent of department head to enroll. May be repeated up to 6 credits.

Learning Outcomes

1. Various.

ICT 435. Senior Project**3 Credits (3)**

Capstone course. Practical application of student's cumulative knowledge to an assigned design project. Design principles, teamwork, and project management skills are stressed. Demonstration of written and oral communication skills via project documentation and presentation of results. Must be graduating senior. Consent of Instructor required. Restricted to ICT Majors.

Prerequisite: A grade of C- or better in the following: ICT 364 and ICT 377 and (ICT 462 or ICT 355).

Learning Outcomes

1. Demonstrate ability to manage a complex technical project.
2. Demonstrate the ability to create an engineering project timeline.
3. Demonstrate the ability to self-motivate and organize project.
4. Demonstrate the ability to work in teams and execute project.
5. Goal setting, skills assessment and portfolio development included.

ICT 439. Advanced Digital Forensics and Incident Response**3 Credits (3)**

Advanced topics in digital forensics and incident response. Topics include network analysis and advanced cybersecurity concepts.

Prerequisite: A grade of C- or better in both, (E T 339 or ICT 339) and (E T 377 or ICT 377).

Learning Outcomes

1. Demonstrate the use of forensic tools and procedures to perform digital forensic operations on Windows operating systems, Emails, Mobile devices, and Communication networks (Computer, wireless, cellular networks).
2. Demonstrate proper incident response procedures and proper chain of custody when handling digital evidence.
3. Students will become familiar with tools and processes to analyze and detect memory resident processes that include malware, rootkits, and user recoverable data.
4. Students will also have exposure to methods and processes used by hackers to penetrate and compromise targets.

ICT 450. Ethical Hacking**3 Credits (3)**

Ethical Hacking and Penetration testing techniques. Students must be in senior standing to enroll.

Prerequisite: A grade of C- or better in ICT 350V.

Learning Outcomes

1. Analyze networking concepts as they relate to hacking vulnerabilities.
2. Define contract requirements necessary to avoid legal liability during Ethical Hacking.
3. Employ tools and techniques to scan and do reconnaissance on potential targets.
4. Demonstrate use of vulnerability testing tools to identify vulnerabilities and exploits.
5. Identify the role of sniffers and session Hijacking in Ethical Hacking.
6. Demonstrate the use of Social Engineering tools and techniques used in Ethical Hacking.

ICT 457. Introduction to Information Security Technology**3 Credits (3)**

This course provides an overview of security challenges and strategies of countermeasure in the information systems environment. Topics include

definition of terms, concepts, elements, and goals incorporating industry standards and practices with a focus on availability, vulnerability, integrity and confidentiality aspects of information systems.

Learning Outcomes

1. Demonstrate an understanding of the information security concepts.
2. Demonstrate an understanding of the diversity of potential attacks against an organization.
3. Demonstrate an understanding of cryptographic techniques.
4. Demonstrate an understanding of authentication methods.
5. Demonstrate an understanding of access control systems.
6. Demonstrate an understanding of various network security controls.
7. Demonstrate an understanding of the legal, ethical, and professional issues in information security.

ICT 458. Web Development and Database Applications

3 Credits (3)

Design, plan, and build interactive and dynamic web applications. Topics include relational databases, object-oriented programming, and the application of backend frameworks.

Prerequisite/Corequisite: A grade of C- or better in ICT 362.

Learning Outcomes

1. Build knowledge of Web Servers.
2. Plan, design, and create code for backend web development.
3. Design, create, and access databases that support web applications.
4. Implement adequate security and authentication for the deployment of Web applications.

ICT 460. Advanced Software Development Concepts

3 Credits (3)

This course focuses on advanced software development concepts to help embed security into code, protecting software applications.

Prerequisite: A grade of C- or better in ICT 362.

Learning Outcomes

1. Application of best practices against software vulnerabilities.
2. Identification of code defects, bugs, and logic flaws.
3. Assessment and testing of code.
4. Utilization of secure code alternatives.
5. Code refactoring to improve design and structure and prevent vulnerabilities.

ICT 462. Linux System Administration

3 Credits (3)

Operating system applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup and Maintenance of Linux Servers.

Learning Outcomes

1. Create a virtual environment on a host system using VirtualBox.
2. Develop single and multiple Linux Operating Systems within The VirtualBox Virtual Environment.
3. Select applications on production Linux Operating systems.
4. Support the operation of the Linux Operating system using System Administration Techniques.

ICT 463. Enterprise Network Administration

3 Credits (3)

Advanced methods and tools used to deploy, manage, and administer networked devices. May be repeated up to 3 credits.

Prerequisite: A grade of C- or better in ICT 377.

Learning Outcomes

1. Demonstrate the ability to use Software Versioning systems using Windows and Linux.
2. Apply best practices with versioning repositories when creating software.
3. Deploy single and clustered microservice containers to support a web application.
4. Use script-based code to deploy and configure a full stack web server.
5. Use infrastructure management software to deploy defined roles in multiple environments.

ICT 467. Communication Network Security

3 Credits (3)

The course provides a technical perspective on maintaining the security of communication network systems. It covers a wide range of technical issues, including wired, wireless and Internet communication fundamentals, communication network security mechanisms and configuration, standards and protocols, vulnerabilities, attacks and countermeasures.

Prerequisite: A grade of C- or better in both, ICT 320 and ICT 377.

Learning Outcomes

1. Demonstrate an understanding of key and basic communication network security concepts, terminologies, standards, issues, and policies.
2. Apply the principles of network security techniques such as Cryptography, Cryptanalysis, Biometrics, Watermarking, and Stenography.
3. Implement security techniques with commonly available network security software.
4. Examine the fundamentals of Wired and Wireless communication network systems including Cellular, Bluetooth, Wi-Fi, Internet, Cloud Networking, and the Internet of Things.
5. Explain the TCP/IP security protocols that pertain to communication network systems.
6. Explain the security attacks, threats, risks, mechanisms, and tools associated with and used for securing network devices especially mobile devices.
7. Demonstrate an understanding of the operation and countermeasures against Malwares in network systems and the implementation of intrusion detection and prevention, and firewall technologies.

ICT 477. Computer Networking II

3 Credits (3)

Advanced concepts in computer network design and applications including managing the campus network infrastructure (LANs and virtual LANs), network services (DNS and DHCP), network security as well as network monitoring.

Prerequisite: A grade of C- or better in either ICT 377 or E T 377 or CTEC 285.

Learning Outcomes

1. VLSM, Summarization, and the TCP/IP model.
2. Understanding of IPv6 basics
3. Configuration of routing protocols using IPv6
4. Configuration of advanced router configurations
5. Configuration of route redistribution, DHCP, DNS, NAT and PAT
6. Configure network security and Access Control Lists (ACLs)
7. Perform basic analysis of network data traffic

8. Create, test and troubleshoot software simulations (Cisco Packet Tracer)

ICT 487. Data Security

3 Credits (3)

This course explores the principles of information assurance, with emphasis on current threats and vulnerabilities to develop an information security plan to mitigate risk. Information security and assurance issues are explored, and a multidisciplinary approach is discussed that examines security policies, models, and mechanisms for confidentiality, integrity, and availability. Technical controls are emphasized.

Prerequisite: A grade of C- or better in both, ICT 320 and ICT 360.

Learning Outcomes

1. Demonstrate a basic understanding of security risk management.
2. Demonstrate basic cryptographic functionality, including symmetric ciphers, public-key encryption, digital signatures, hash functions, and related concepts.
3. Examine how basic cryptographic building blocks are combined to meet high-level security goals in protocols like SSL and IPsec.
4. Justify the use of particular technologies, settings, and parameters to meet specified security goals.
5. Evaluate the security of systems that use cryptography and secure communication techniques.
6. Explain how privacy issues can impact system design.

INMT - INDUSTRIAL MAINTENANCE

INMT 133. Process Technology and Systems

4 Credits (4)

Provides instruction in the use of common process equipment. Students will use appropriate terminology and identify process equipment components such as piping and tubing, valves, pumps, compressors, turbines, motors, engines, heat exchangers, heaters, furnaces, boilers, filters dryers and other miscellaneous vessels. Included are the basic functions, scientific principles and symbols. Students will identify components on typical Process Flow Diagrams and Process and Instrument Diagrams. Restricted to Carlsbad campus only.

INMT 134. Maintenance Principles

4 Credits (4)

The course is an introduction to the maintenance of equipment utilizing mechanical, electrical and instrumentation concepts. Topics include: hand tools, bearing fundamentals, equipment lubrication, material handling, electrical safety, battery systems, diagrams, electrical production and distribution, transformers, breakers, switches, AC and DC motors, motor controllers and operations, and introduction to automation and instrumentation control. Restricted to Carlsbad campus only.

INMT 165. Equipment Processes

4 Credits (4)

This course introduces power transmission equipment and machinery components, including belt/chain driven equipment, speed reducers, variable speed drives, couplings, clutches, and conveying equipment. Students will learn the operation, maintenance, and troubleshooting for these types of equipment. The course also includes Overhead Crane Certification and Safety. Restricted to Carlsbad campus only.

INMT 205. Programmable Logic Controllers and Applications

4 Credits (4)

Students learn about programmable logic controllers; architecture; programming, interfacing, and applications. Hands-on experience on modern commercial PLC units is the main component. Restricted to Carlsbad campus only.

Prerequisite(s): BCIS 1110.

INMT 223. Electrical Repairs

4 Credits (4)

This course outlines for students the types of problems that occur in electrical machinery and systems. The course covers trouble-shooting and diagnosis, preventative maintenance, and how to make necessary repairs. Restricted to Carlsbad campus only.

INMT 235. Mechanical Drives I

4 Credits (4)

This course teaches the fundamentals of mechanical transmission systems used in industrial, agricultural, and mobile applications. Students will learn industrial relevant skills including how to: operate, install and analyze performance, and design basic transmission systems using chains, feed-belts, spur gears, bearings, and couplings. Vibration analysis will be used to determine when to perform maintenance of power transmission components. The course also covers power transmission safety, and introduction to belt and chain drives (applications, installations, and tensioning), and introduction to gear drives, coupling, and bearing, basic troubleshooting, blueprint and print reading, learning the basics of electrical drives and PDM and PM. Restricted to Carlsbad campus only.

INMT 237. Hydraulics I

2 Credits (2)

This course teaches fundamentals of hydraulic systems used in industry mobile application. Students learn the basic theory of application of hydraulic and electricity as it applies to hydraulics. Covered in the course are basic systems, principles of flow, pressure, viscosity, filtration, and colling. Also covered are basic components such as motor, pumps, cylinders, piping and control and relief valves. Troubleshooting strategies are discussed, along with blueprint and print reading, and PDM and PM. Industry, relevant skills including how to operate, install, analyze performance, and design basic hydraulic systems, reviewing intermediate hydraulic components and system applications. Restricted to Carlsbad campus only.

INMT 261. Pump Operations I

4 Credits (4)

This course teaches how to select, operate, install, maintain and repair the many types of pumps used by industry. Students learn the theory and practical application of all types of processed pumps and pipe systems. It covers types, components, and systems operation. It also covers troubleshooting for flow loss and cavitation. Students learn how to select, operate, install, maintain and repair the many types of pumps used by industry. Other topics covered include: Net Positive Suction Head, pump flow/head measurement, pressure head conversion, pressure flow characteristics, cavitation, series/parallel pump operation, mechanical seal/stuffing box maintenance, multi stage operation and construction, positive displacement pumps, turbine, diaphragm, peristaltic, piston, gear, and magnetic pump systems. Restricted to Carlsbad campus only.

INMT 262. Piping Systems

2 Credits (2)

This course teaches students how to install, maintain and troubleshoot fluid systems such as how to select, size, identify, install a variety of types of piping, fittings, and valves. Measurement techniques from basic to precision measurement, gauging, including the fundamentals of demonsioning and tolerancing will taught. Restricted to Carlsbad campus only.

INMT 263. Mechanical Drives II

4 Credits (4)

This course teaches the bearings and gears used in heavy duty mechanical transmission systems. This course will emphasize linear

access drives, clutches, and brakes. In addition, this course teaches how to set up, operate and apply laser shaft alignment to a variety of industrial applications. This course is a study of the basic concepts and procedures for the maintenance and operations of pumps, turbines, seals, bearings, and compressors. The course will provide the student with the knowledge and skills necessary to perform proper maintenance, repair, replacement and selection of pumps, turbines, seals, bearings and compressors. Also covered are advanced gearbox, coupling and bearings, precision alignment (shaft, flange, and sheave), as well as basic vibration analysis and thermography as troubleshooting and RCA aids. Restricted to Carlsbad campus only.

INMT 264. Rigging

2 Credits (2)

This course teaches how to safely move loads of different shapes and sizes using a variety of different methods. Students will lift loads and demonstrate how to move it. Students will use hoists, slings, ropes and fittings to learn how to safely lift a wide variety of loads. Included are weight estimation, lifting rules, load ratings (sling, wire, ropes and hoists). Restricted to Carlsbad campus only.

INMT 265. Hydraulics II

2 Credits (2)

This course teaches advanced hydraulics systems. The student will learn operation of advanced hydraulic systems applications, equipment installation, performance analysis of motors and pumps, accumulators, control, relief and check valve, equipment maintenance, and system design. The course covers accumulators, sequence valves, pilot circuits and unloader valves. Students learn more troubleshooting, hydraulic drives and other applications. Restricted to Carlsbad campus only.

INMT 267. Pump Operations II

2 Credits (2)

This course teaches the student the disassembly, inspection and reassembly of centrifugal and positive displacement pumps. This course allows the student to identify and replace worn or broken components of pumps, and learn predictive and preventive maintenance principles. Lockout of the pump will be performed in addition to measurements and alignment. Restricted to Carlsbad campus only.

INST-INSTRUMENT & CONT TECH

INST 133. Process Technology and Systems

4 Credits (4)

Provides instruction in the use of common process equipment. Students will use appropriate terminology and identify process equipment components such as piping and tubing, valves, pumps, compressors, turbines, motors, engines, heat exchangers, heaters, furnaces, boilers, filters dryers and other miscellaneous vessels. Included are the basic functions, scientific principles and symbols. Students will identify components on typical Process Flow Diagrams and Process and Instrument Diagrams. Restricted to: Instrumentation and Control Technology majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Explain the different pieces of equipment used in moving fluids through a process plant such as piping, valves, pumps, compressors, motors, engines, turbines, and power transmission devices. Explain the purpose of each component. Understand the applications for the different types of equipment in each classification and their operating principles.
2. Explain the different types of heat exchangers and cooling towers used in the Process Industry as well as their components. Describe their operating principles and the operator's role in their operation.

3. Explain the different types of boilers and furnaces as well as their components. Describe their operating principles and the operator's role in their operation.
4. Explain the function of filters and dryers along with their principles of operation and the operator's role in their operation.
5. Explain the different types of vessels used in the process industry and well as their components and auxiliary systems. Define what happens internally in the different vessels.
6. Demonstrate reading Process Flow Diagrams and Piping and Instrumentation Diagrams.
7. Apply terms used when describing the various pieces of equipment

INST 165. Equipment Processes

4 Credits (4)

This course introduces Thermal Energy and Mechanical alignment in equipment and machinery components. Students will learn the operation, maintenance, and troubleshooting of these types of equipment. Consent of Instructor required. Restricted to: Instrumentation and Control majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Explain how Thermal Process System works.
2. Identify parts of Thermal System and Steam machines.
3. Identify troubleshooting of thermal machine.
4. Explain the steps of how to operate the Thermal Systems

INST 205. Programmable Logic Controllers and Applications

4 Credits (4)

This learning system is set up in a self-directed format where students can proceed forward at their own pace. The directions are provided in a series of Learning Activity Packets (LAPs), which include text and lab activity directions. LAPs book will be handed out at the start of every class day and must be returned before the class day begins. This learning system can be used as a stand-alone teaching learning system within any class to give hands-on experience in electrical systems. Computer Literacy and internet literacy is required to enroll in this course. Restricted to: Instrumentation and Control Technology majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Explain the basics of PLCs.
2. Describe how PLCs are used in industrial environments.
3. Demonstrate ability to program a PLC unit to solve a problem

INST 251. Instrumentation and Measurement

5 Credits (5)

The overall aim of this course is to present the students with the basic principles and techniques required for the design and analysis of measurement systems. The course introduces the theory of measurement as well as the sensors and instruments typically used for measuring various physical quantities. Restricted to: Instrumentation and Control Technology majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Understand measurement principles and apply them within measurement systems
2. Select and specify suitable instrumentation for measurement of physical quantities
3. Analyze and interpret experimental data
4. Perform analog and digital signal processing
5. Identify various sensor technologies and their use in measurement systems

INTR-INTERDISCIPLINARY STUDIES

INTR 300. Foundations of Interdisciplinary Studies 3 Credits (3)

Introduction to Bachelor of Individualized Studies (BIS) and Bachelor of Applied Studies (BAS) degree programs. Explores roles of interdisciplinary studies in contemporary world and how emerging and perennial problems and issues can be comprehended utilizing multiple theoretical and analytic methods. Students design or update their course of study for earning the BIS or BAS degree. Consent of Instructor required. Restricted to Las Cruces campus only.

INTR 301. Interdisciplinary Research: Theory & Practice 3 Credits (3)

Focuses on knowledge gained through interdisciplinary research. Students develop comprehensive understanding of steps of systematic inquiry into interdisciplinary research questions. Includes active learning through design and implementation of an interdisciplinary research project. For BIS and BAS majors only. Consent of Instructor required.

JAPN-JAPANESE

JAPN 1110. Japanese I 4 Credits (4)

This course focuses on the basics of the Japanese language with a balanced approach to the development of four skills: listening, speaking, reading and writing. The course is designed to teach students to communicate with Japanese socially and to utilize culturally appropriate manners to engage in Japanese daily life. While conversational skills are emphasized, the student will also be introduced to the various Japanese scripts.

Learning Outcomes

1. Become introduced to the sound system of the Japanese language.
2. Gain a basic understanding of Japanese scripts.
3. Learn and utilize vocabulary needed for basic conversation.
4. Converse and write on topics related to immediate personal needs, greetings, introductions, personal data, daily routines and school.
5. Comprehend both artificial and authentic written and aural texts of short length on familiar topics.
6. Comprehend and use essential grammar concepts.
7. Identify patterns of cultural behavior or customs in Japan, including gestures, greetings, and body language.
8. Gain the ability to converse using Japanese idiomatic expressions.

JAPN 1120. Japanese II 4 Credits (4)

This course focuses on building upon the basics of the Japanese language with a balanced approach to the development of four skills: listening, speaking, reading and writing. The course is designed to teach students to communicate with Japanese socially and to utilize culturally appropriate manners to engage in Japanese daily life. Along with further developing conversational skills, the student will also continue to learn about and utilize various Japanese scripts.

Prerequisite: grade of C or better in JPNS 1110 or consent of instructor.

Learning Outcomes

1. Understand and utilize in more depth the sound system of the Japanese language.
2. Gain a greater understanding of Japanese scripts.
3. Utilize expanded vocabulary in conversation.

4. Converse and write on topics related to personal, social, geographical, and political life.
5. Comprehend both artificial and authentic written and aural texts of longer, but still brief length, such as personal letters, messages, journals, and narrative accounts.
6. Comprehend and use essential and more complex grammatical concepts.
7. Continue to develop a sense of culturally appropriate conduct.
8. Build upon the ability to converse using Japanese idiomatic expressions.

JAPN 2110. Japanese III 3 Credits (3)

This course is designed for students who have completed 12 credit hours or the equivalent of Japanese study. This course continues to expand vocabulary, grammar and 209 Kanji to deal with daily activities. Its objective is to teach students to communicate in a meaningful way using all four language skills: speaking, listening comprehension, reading and writing. Students will be able to manage not-complicated daily situation. Students will attain ACTFL intermediate-low level in four skills.

Prerequisite: grade of C or better in JPNS 1120 or consent of instructor.

Learning Outcomes

1. Participate in conversations on familiar topics, such as applying part-time job, gift giving/receiving, planning a trip, lost and found, using sentences and short series of sentences.
2. Handle short social interactions in everyday situations by asking and answering a variety of questions.
3. Usually say what they want to say about themselves and their everyday life.
4. Write on a variety of familiar topics in Japanese characters using connected sentences.
5. Understand the main idea in messages and presentations in Japanese on a variety of topics related to everyday life and personal interests and studies.
6. Sometimes understand the main idea of conversations that they overhear.
7. Understand the main idea of texts in Japanese characters related to everyday life and personal interests or studies.
8. Describe and make comparisons between cultures about beliefs, behaviors and cultural artifacts in Japan.

JAPN 2120. Japanese IV 3 Credits (3)

This course is designed for students who have completed 15 credit hours or the equivalent of Japanese study. This course continues to expand vocabulary, grammar and 271 Kanji to deal with not-complicated daily situation with ease. Also students acquire a competence for Japanese pragmatic usage. This course follows ACTFL language guidelines, integrating the five C's: communication, cultures, connections, comparisons and communities, to offer the student a well-rounded classroom experience. Students will attain ACTFL intermediate-mid level in four skills.

Prerequisite: grade of C or better in JPNS 2110 or consent of instructor.

Learning Outcomes

1. Participate with ease and confidence in conversations on familiar topics, such as relationships, part-time job, shopping with a variety of request, meeting socially superiors.
2. Usually describe people, places, and things, and talk about events and experiences in various time frames.

3. Handle social interactions in everyday situations, sometimes even when there is an unexpected complication.
4. Write about topics related to school, work, and community in a generally organized way in Japanese characters.
5. Write some simple paragraphs in Japanese characters about events and experiences in various time frames.
6. Easily understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
7. Usually understand a few details of what they overhear in conversations, even when something unexpected is expressed.
8. Sometimes follow what they hear about events and experiences in various time frames.
9. Understand the main idea of texts in Japanese characters with topics related to everyday life, personal interests, and studies, as well as sometimes follow stories and descriptions about events and experiences in various time frames. 1
10. Describe and make comparisons between cultures about beliefs, behaviors and cultural artifact in Japan. 1
11. Start using languages in a culturally appropriate way based on the understanding of cultural similarities and differences, including the use of "honorific" and "humble" expression.

JAPN 320. Oral Practicum in Japanese

1-3 Credits

Service training for facilitators leading informal conversation groups in Japanese. May be repeated up to 4 credits.

Prerequisite: fluency in Japanese and consent of instructor.

JAPN 453. Independent Studies in Japanese

1-3 Credits (1-3)

Individualized, self-paced projects for advanced students. May be repeated up to 6 credits.

JOUR-JOURNALISM

JOUR 105G. Media and Society

3 Credits (3)

Functions and organization of the mass media system in the United States; power of the mass media to affect knowledge, opinions, and social values; and the impact of new technologies.

JOUR 110. Media Writing I

3 Credits (2+2P)

Introduction to media writing basics including news writing for print and web, feature writing, sports writing and writing for public relations. Course emphasizes fundamental news values, journalism ethics and Associated Press style. Restricted to all Campuses. May be repeated up to 3 credits.

Learning Outcomes

1. Know and put into practice news writing basics including the five W's, inverted pyramid, basic news leads, quotations, interviews, attributions and cutlines.
2. Know how to cover scheduled and breaking news events, and put knowledge into practice.
3. Know how to write for different media, including print, web and broadcast, and put knowledge into practice.
4. Know fundamentals of writing news stories, features, editorials, obituaries, and press releases, and put knowledge of each into practice.
5. Develop and practice basic copy editing skills.

JOUR 201. Introduction to Multimedia Journalism

3 Credits (2+2P)

Introduction to journalistic storytelling using text, photos, audio, video and infographics. Students produce their own multimedia stories in intensive, hands-on environment using digital cameras and audio recorders, mobile phones, external microphones and digital editing software applications including Adobe Premiere Pro, Audition and Photoshop. May be repeated up to 3 credits.

Learning Outcomes

1. Learn how to recognize and accurately define multimedia journalism.
2. Improve visual literacy by viewing and analyzing a variety of work produced by professional multimedia journalists.
3. Know the basic requirements and parts of a story, and know how to map and structure a story.
4. Know and put into practice news writing basics including the five W's.
5. Know what makes a good image, and put into practice composing and framing photographs and videos.
6. Understand and put into practice still photography, video and audio capture and editing fundamentals using a variety of tools.
7. Know how to combine different media to create a logical and effective story.

JOUR 210. Copyediting

3 Credits (2+2P)

Introduction to various aspects of copyediting with an emphasis on accuracy and style. Includes hands-on, directed practice in editing for Associated Press style, punctuation and grammar. Includes headline and outline writing. May be repeated up to 3 credits.

Prerequisite: JOUR 110.

Learning Outcomes

1. Know and put into practice news writing basics including the five W's, inverted pyramid, basic news leads, quotations, interviews and attributions.
2. Know fundamentals of writing news stories, sports stories, features and editorials, and put knowledge of each into practice.
3. Know how to write for different media, including print, web and social media, and put knowledge into practice.
4. Develop and practice basic copy editing skills.
5. Understand fundamentals of media law and ethics, and know basic press rights.
6. Understand basic math principles used by reporters.
7. Practice and understand the importance of meeting deadlines.
8. Develop a habit of consuming news and monitoring daily headlines.

JOUR 300. Introduction to Advertising

3 Credits (3)

Role of IMC (integrated marketing communications) in marketing of goods, services, and organizations. Creative process, strategic planning media, message design, consumer behavior, and social issues of IMC.

JOUR 302. Television Videography & Editing

3 Credits (3)

Classroom instruction on basic studio and single camera video productions. The focus is placed on introductory practical aspects of news and videography, reporting and storytelling. Lab experience in camera basics, studio functions and digital video editing. Includes practical experience through crew assignments on the live student-produced newscast, News22, which airs on KRWG-TV, a PBS affiliate station. May be repeated up to 3 credits.

Learning Outcomes

1. The students will be able to have a broader introductory understanding of video production for broadcasting media
2. The students will be able to edit video and digital production
3. The students will be able to create media reporting for News and Sports

JOUR 305. Visual Communication in Media**3 Credits (3)**

How one sees, perceives, interprets, creates and applies visual language. Explores the history, techniques, application and practice of the various visual media. May be repeated up to 3 credits.

Learning Outcomes

1. Give students an understanding of the historical, critical, theoretical and practical aspects of visual culture in digital media era.
2. Sharpen students' visual acuity
3. Enhance students' understanding of point of view
4. Help students to broaden their perspective of visual communication from the storytelling perspective in social and digital media
5. Enlarge students appreciation of visual culture

JOUR 306. Sports Writing and Reporting**3 Credits (3)**

Fundamental principles of sports writing and reporting with an emphasis on accuracy and style. Includes a mix of classroom instruction and hands-on, directed practice in game coverage sports feature writing, sports commentary and sports statistics. Students have the opportunity to produce sports content for Kokopelli online news outlet. May be repeated up to 6 credits.

Prerequisite: JOUR 210 or consent of instructor.

Learning Outcomes

1. Know how to recognize and accurately define sports journalism and different sports story types
2. Improve sports journalism literacy by reading, viewing and analyzing a variety of work produced by professional sports writers and reporters
3. Know the basic parts of a sports story, and know how to structure and package various types of sports stories
4. Know and put into practice sports writing basics including the five W's, leads, interviews, quotations and attributions
5. Know how to write sports stories for different media, including print, web and social media, and put knowledge into practice
6. Know basic sports terminology, and know how to compile, compute and interpret a wide variety of sports statistics

JOUR 310. Media Writing II**3 Credits (3)**

Field reporting and writing for web and print publication. Includes a mix of classroom instruction and hands-on, directed practice in local news and sports reporting, feature writing, opinion writing and social media content creation. Students produce written and visual content for Kokopelli online news outlet. Course emphasizes accuracy, news values and ethics in fast-paced, deadline-oriented environment. May be repeated up to 3 credits. May be repeated up to 3 credits.

Prerequisite: JOUR 210.

Learning Outcomes

1. Write an inverted pyramid on deadline.
2. Use AP style in all written assignments.
3. Incorporate news writing conventions in all stories.
4. Identify the differences between hard news stories and features.

5. Conduct interviews using best journalistic practices and professionalism.
6. Demonstrate news judgment in pitching, reporting, and writing stories.
7. Build a personal website and use digital media to report, publish and promote stories.
8. Understand basic libel law and journalistic ethics.

JOUR 312. Advertising/Copywriting**3 Credits (3)**

Creative process, strategic thinking, and principles of advertising in execution of copy, storyboards, and layouts for clients.

Prerequisite(s): JOUR 110 or consent.

JOUR 314. Broadcast Reporting**3 Credits (3)**

Students learn the techniques of reporting and writing news stories for broadcast, including how to incorporate video and natural sound so all elements work together for good storytelling. May be repeated up to 3 credits.

Prerequisite: JOUR 302.

Learning Outcomes

1. Students will learn the basics of television reporting.
2. Students will learn and practice the skills of broadcast news reporting, especially, broadcast writing, reporting, interviewing, videography and audio recording, editing, and how to tell stories with video and audio.

JOUR 315. News 22**1-3 Credits (1-3)**

Students will report news stories for live, student-produced television newscast that airs on KRWG-TV, public television for Southern New Mexico. May be repeated up to 3 credits.

Prerequisite: JOUR 314 or JOUR 330.

Learning Outcomes

1. Students will learn to report professional news stories for News twenty-two
2. Students will learn the fundamentals of live broadcast news production.

JOUR 319. Intro Photography**3 Credits (3)**

Introduction to photography emphasizing composition, camera techniques, post-production skills in Photoshop, Lightroom, and InDesign and storytelling skills. History of photography overview. This class is the starting point for students interested in a photojournalism emphasis. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to use "visual language" for use across multiple platforms including print, video and web.
2. Students will acquire post-production skills used in various industries.
3. Students will be able to produce powerful and effective communication through image-making.

JOUR 320. Photojournalism**3 Credits (3)**

Communication photography on multiple platforms for sports, news, advertising/public relations and other editorial and commercial needs. Photography lighting techniques, photo-editing software, and website skills will be expanded and further developed. May be repeated up to 3 credits.

Prerequisite: JOUR 319 or Consent of instructor.

Learning Outcomes

1. Students will be able to use specialty techniques, especially sports photography and studio/portraiture/product photography.
2. Students will expand skills needed in editorial, advertising and other communication industries.

JOUR 321. Media Graphic Design

3 Credits (3)

Introduction to graphic design fundamentals for print and web publication including page layout, typography, color theory and photo editing. Students produce their own print and web-based design pieces using Adobe InDesign and Photoshop. May be repeated up to 3 credits.

Learning Outcomes

1. Know and put into practice fundamental design principles including proximity, alignment, repetition and contrast.
2. Know fundamentals of color theory and typography, and apply this knowledge to a variety of media design projects.
3. Know fundamental rules of photography composition and cropping.
4. Know fundamental rules and principles of printed newspaper and magazine design and put knowledge into practice.
5. Know fundamental rules and principles of printed newsletter and brochure design and put knowledge into practice.

JOUR 330. TV News Shooting & Editing

3 Credits (2+4P)

Advanced technical and aesthetic skills and journalism basics needed for videography and editing on-location news stories. Single camera videography and nonlinear/digital editing. May be repeated up to 3 credits.

Prerequisite: JOUR 314 or permission of instructor.

Learning Outcomes

1. Learn or continue exploring and mastering the concept of video sequencing in the field, gathering great natural sound, opening and closing shots and improve your overall storytelling process in the field and during the edit process.
2. Learn or continue exploring the fundamentals of non-linear digital editing, using Adobe Premier.
3. Expand knowledge of field sound recording.
4. Learn and distinguish the difference between uncontrolled action and controlled action.

JOUR 350V. Media History

3 Credits (3)

Historical overview of media including newspapers, magazines, radio, television, photography, entertainment media, advertising, public relations, and digital media. The history of American media development is directly intertwined with American history. Newspapers, magazines, television, and radio have not just reported on news and events; by virtue of what facts and sources editors and reporters have chosen to use, journalists have framed how the public should think about events. Editorials also provided further framing guidance on issues to readers and viewers. Students will study media history from social, intellectual, and cultural history perspectives. Students will examine the historical relationship of the media to American social, political, economic, and cultural patterns and developments. And, conversely, students will examine how these same forces impacted and changed all forms of media through a multi-cultural approach. May be repeated up to 3 credits.

Learning Outcomes

1. Survey the development of various forms of media and the changes in the media as they relate to the larger social, economic, and political sphere
2. Learn the methods and processes of historical research and engage in historical research.
3. Learn that the development of all fields of communication are interrelated
4. Discover how American media have attempted to influence how Americans perceive the world around them (including perceptions of other nations) via their coverage and portrayal of global events.
5. Learn that America's historical events played out through the media. As such, students will gain a deeper understanding of how media personnel helped "frame" the discussion and debate about news and information from the 1600s to present day
6. Discover that the ethical and professional foundations of media industries have adjusted and changed over time due to external and internal forces, including the rise of the professionalism movement across the nation in the late nineteenth century, the internal response to public demands for licensing of news media following World War I, and modern pressures caused by digitization of the industry and the parallel fragmentation of audiences
7. Learn how to determine how various groups outside the mainstream contributed to overall press development. This includes an examination of how women and ethnic minorities influenced how and why the press became a force for social, cultural, political, and economic change in society.
8. Discover and appreciate that history is NOT just the study of names, dates, and places, but of people
9. Discover that the history of media is not the province of any one individual, corporation, or entity. Instead, a variety of factors: social, economic, political, legal, ethical, and cultural, helped shape the media's development

JOUR 360. Media Literacy

3 Credits (3)

This course is designed to help students develop an informed, critical, and practical understanding of media including analysis of online and social media and to help students develop their media literacy and analytical skills.

Learning Outcomes

1. Write clearly, precisely, and in a well-organized manner.
2. Demonstrate critical thinking, reading, and viewing skills.
3. Research, develop, evaluate, and present arguments grounded in research-based knowledge.
4. Apply analytical, precise, and elaborated terms and concepts for talking and writing about media and the ways in which they communicate meaning.
5. Demonstrate how images are constructed via specific formal and technical elements and how those images construct meaning about national and global communities.
6. Interpret media texts (film, television, etc.) to expand experience and understanding of the self and society.

JOUR 374. Introduction to Public Relations

3 Credits (3)

This course is designed to familiarize students with the basic concepts, principles, practices, and professions of public relations (PR). It is the foundation course for other PR courses in Journalism and a supplemental course for students majoring in other fields.

Learning Outcomes

1. The role and functions of public relations in contemporary society.
2. The contingency views of public relations practice in the worlds of managing competition and conflict.
3. The historical evolution of public relations, career opportunities in the field, and professional/ethical/legal responsibilities.
4. The basic process of public relations—research, planning, communication, evaluation—and the use of communications strategies and tactics to achieve organizational goals and objectives.
5. The persuasion of public opinion and audience analyses and how to reach diverse audiences.
6. Practical guidelines for utilizing written, spoken, and visual techniques to reach selected audiences.
7. An understanding of how public relations is a global phenomenon.
8. How the Internet and social media are changing the way public relations professionals build and sustain relationships between an organization and its constituents.
9. An understanding of public relations activities in business, sports, tourism, entertainment, nonprofit, education, and government organizations.

JOUR 377V. Mass Media Ethics**3 Credits (3)**

Philosophical and moral examination of problems relating to mass media. Use of case study method to analyze media situations; development of framework for media professionalism.

JOUR 380. Women and the Media**3 Credits (3)**

Portrayal and participation of women in mass media from colonial to contemporary times. Same as GNDR 450. May be repeated up to 3 credits.

JOUR 384. Public Relations Storytelling**3 Credits (3)**

This course will help students understand the concept of using storytelling as a tool for public relations, branding, and social change. Students will learn how to use storytelling on traditional and social media platforms. Upon completion of this course, students should have attained knowledge of essential elements of storytelling, audience-led narratives, transmedia storytelling, etc.

Learning Outcomes

1. Students will attain knowledge and understanding of the essential elements of branding through storytelling.
2. Students will attain knowledge and understanding of the assessment of brand stories and customer-led narratives.
3. Students will attain knowledge and understanding of integrating brand storytelling into the marketing mix.
4. Students will attain knowledge and understanding of data-driven storytelling.
5. Students will attain knowledge and understanding of personal branding of leaders and brand storytelling success.
6. Students will attain knowledge and understanding of research skills for brand storytelling.
7. Students will attain knowledge and understanding of the future of brand storytelling.

JOUR 407. Media Internship**1-3 Credits (1-3)**

Supervised work with a media organization. 1-3 credits. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: JOUR majors.

Prerequisite(s): Consent of internship coordinator.

JOUR 408. Media Practicum**1-3 Credits**

Advanced supervised work with a media organization. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of internship coordinator.

JOUR 412. Documentary Photojournalism**3 Credits (3)**

Production of documentary photography for web, print, broadcasting and exhibition emphasizing deep visual storytelling. Multimedia, social media distribution and website techniques including WordPress website design and maintenance. Discussion of notable photographers. Multiple Field Trips to produce material for the Small Village New Mexico term project (SVNM). Students produce an individual Term Project book and multimedia show. May be repeated up to 3 credits.

Prerequisite: JOUR 319.

Learning Outcomes

1. Students will learn "slow photojournalism," and be able to produce visual stories done with deep immersion in whatever community or subject they work in.
2. Students will be able to use photography for communication, giving deeper meaning to subjects than transitory "news" type photography allows.

JOUR 414. Broadcast Reporting Portfolio**3 Credits (3)**

This course is designed to help students who are preparing for a career in broadcasting. Students will refine reporting, shooting and editing skills and build a professional website containing a reporter reel, resume and proof of other skills needed for success in broadcasting. The class also features guest speakers throughout the semester who work in the broadcast and digital world of media. May be repeated up to 3 credits.

Prerequisite: JOUR 314.

Learning Outcomes

1. To practice, hone, and improve scriptwriting skills, especially news writing.
2. To practice and improve audio announcing skills and on-camera announcing skills.
3. To practice and improve overall videography and digital editing skills.
4. To learn more and prepare for related careers.

JOUR 425. Media Planning and Buying**3 Credits (3)**

Covers the principles of media planning for an IMC campaign and procedures for purchasing ad time or space.

Prerequisite(s): JOUR 300 or consent of instructor.

JOUR 427. Media Writing III**3 Credits (3)**

Advanced field reporting and writing for web and print publication. Includes hands-on, directed practice in local news and sports reporting, feature writing, opinion writing, social media content creation and web publishing. Students produce written and visual content for Kokopelli online news outlet, and prepare final portfolio. Course emphasizes accuracy news values and ethics in fast-paced, deadline-oriented environment. May be repeated up to 3 credits.

Prerequisite: JOUR 310.

Learning Outcomes

1. Sharpen and expand advanced reporting, interviewing, writing, and editing skills for print and online publication.
2. Sharpen multimedia reporting and storytelling skills including photography skills.
3. Improve and expand professional portfolio through online publication of original work.
4. Demonstrate effective use of social media platforms.
5. Demonstrate understanding of fundamentals of journalism ethics.
6. Learn to work effectively under deadline pressure.
7. Produce a final portfolio or "string book" of published work.

JOUR 457. Social Media Management and Analytics**3 Credits (3)**

This course is designed to help students to understand how marketing has (and has not) changed due to the rise of social media and changes in various underlying contextual factors, such as dramatically increased speed of information dissemination across consumers and brands. The overarching goal is to obtain a clear perspective on what's really going on in digital/social/mobile marketing so that you can begin to appreciate its true value to consumers, to managers, and to other corporate stakeholders. It will equip students with the relevant knowledge, perspectives, and practical skills required to develop marketing strategies that leverage the opportunities inherent in social media and consumer-to-consumer social interactions for achieving business and marketing goals.

Prerequisite: JOUR 374.

Learning Outcomes

1. Understand what social media is and how this new type of media and communications technology influences how business and marketing is done
2. Develop skill in using the predominant social media tools currently available for business/marketing communication
3. Understand how to use various social media channels to publish and disseminate relevant branded content in order to engage consumers and to increase social impact, influence, and value
4. Develop a strategic plan for identifying opportunities for using social media in a company

JOUR 460V. Sports & Entertainment P.R.**3 Credits (3)**

This course aims to provide a basic understanding of sports and entertainment PR and its industry trends, theories, techniques, case studies, global trends, and future directions. Upon completion of this course, students will be able to use the theories and techniques to plan, implement, and evaluate sports and entertainment PR campaigns and activities. May be repeated up to 3 credits.

Learning Outcomes

1. Describe the nature of public relations practice in sports
2. Practice the primary research methods employed in sports public relations.
3. Recognize the major steps involved in planning a public relations campaign and the key considerations at each step in the process.
4. Identify the various types of paid/earned/shared/owned media commonly utilized in the profession
5. Comprehend the different tactics used to generate publicity.
6. Become proficient in writing news releases.
7. Distinguish among the various response strategies sports managers may employ in a crisis.

8. Describe unique aspects of social responsibility in the sports and entertainment industry
9. Identify legal issues in sports PR, anticipate emerging ethical issues, evaluate ethical dilemmas present in sports PR, and recognize the need for ethical decision-making in sports PR. 1
10. Describe current global trends and multicultural issues, which have impacted the global sports and entertainment industry.

JOUR 463. Public Relations for Social Impact**3 Credits (3)**

This course aims to provide a basic understanding of the role of PR in influencing public behavior and creating positive social impact. This course offers different approaches to solving a range of social problems in the areas of health, safety, environmental protection, and community involvement.

Learning Outcomes

1. Apply social marketing theories for developing, implementing, and evaluating social marketing campaigns
2. Utilize nudge techniques to improve decisions about health, wealth, and happiness in both personal and societal levels
3. Prepare a prosocial campaign plan using social media and public relations strategies
4. Identify examples of successful social marketing campaigns

JOUR 470. Environmental, Social, & Governance Public Relations**3 Credits (3)**

This course will explore how organizations create values by investigating the concept of environmental, social, and governance (ESG) and social responsibility campaigns in the light of public relations. Students will learn about philanthropy, sustainability, reputation building, and ESG for the media and entertainment industry.

Learning Outcomes

1. Understand the basic concepts and elements of Strategic Corporate Social Responsibility (Strategic CSR).
2. Understand company's value-creating activities through strategic CSR.
3. Understand company's CSR strategy under the context of economical and social exchanges
4. Understand the process of creating comprehensive strategic CSR communications plan

JOUR 476. Advertising & Public Relations Campaigns**3 Credits (3)**

In this capstone course, students will utilize the principles and techniques of advertising and public relations to research and develop a comprehensive campaign plan. Students will develop a portfolio to demonstrate their skills to prospective employers. Restricted to Journalism and Media Studies Majors. May be repeated up to 3 credits.

Prerequisite: JOUR 374.

Learning Outcomes

1. Students will independently work on two projects to practice how to promote themselves and develop a professional point of view.
2. Students will create a portfolio at the end of the course that can be used to help demonstrate their skills to prospective employers.
3. Students' projects will demonstrate that they understand how to utilize the principles and techniques of advertising and PR to research and develop a comprehensive campaign plan.

JOUR 489. Media Research**3 Credits (3)**

Examination of the role of empirical research in solving mass communication problems. Survey techniques, field studies, content analysis, data analysis. May be repeated up to 3 credits.

JOUR 490. IMC Campaign

3 Credits (3)

Capstone course utilizing all previous instruction to create and develop plans for a long-term national or local IMC (Integrated Marketing Communications) campaign. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): JOUR 300 and 312 or consent of instructor.

Learning Outcomes

1. Students will learn how to create IMC campaign for client or for brands, and will be able to apply this for the real world when they apply for job.

JOUR 493. Media Law

3 Credits (3)

Examination of legal issues relating to mass media in the United States. Invasion of privacy, libel, sedition, copyright, and advertising regulation. Same as COMM 493, POLS 493. May be repeated up to 3 credits.

JOUR 494. Special Topics

3 Credits (3)

Specific subjects to be announced in the Schedule of Classes.

JOUR 495. Media Theory

3 Credits (3)

Theoretical approaches to media communications. Examination of media effects, audiences, and media socialization. May be repeated up to 3 credits.

JOUR 499. Independent Study in Media

1-3 Credits

Individual study directed by consenting instructor with prior approval of department head. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): 2.5 GPA and consent of instructor.

JOUR 501. Global Strategic Communications: Cultural Perspective

3 Credits (3)

This course is set up to combine both theory and practice, regarding global communications, especially from cultural perspectives. Also, this course is designed for students to understand persuasive strategic communications in different nations. Markets are no longer bound with their physical locations because of the communication technologies. To successfully address the strategic communications in global market, marketers and advertisers need to fully understand "local" challenges coming "deep" from cultural, economic, regulatory and competitive differences. Based on theoretical and practical understanding of the dynamic interplay between global and local forces, students will acquire theoretical as well as practical understandings of how to accomplish the goals of strategic communications in global markets. Thus, the core objective of this class is to develop an ability to analyze and map out persuasive communication strategies that are effective in global markets.

Learning Outcomes

1. Know how to analyze cultural norms and recognize strategic communications practices that are congruent to such cultural norms.
2. Identify similarities and differences in different consumer segments according to dimensions of culture.
3. Develop a deeper understanding of cultural dimensions.
4. Implement effective market research applications in different regions of the world.
5. Conceptualize and operationalize theoretical frameworks.

L SC-LIBRARY SCIENCE

L SC 110. Reference and Information Resources I

3 Credits (3)

Overview of reference services. Introduction to, and evaluation of, basic types of information resources (both print and electronic) and their application in libraries.

L SC 111. Introduction to Information Literacy in an Electronic Environment

3 Credits (3)

Introduction to the basics of the research process; the organization, location and evaluation of information using print, non-print and electronic resources. Restricted to: Community Colleges only.

L SC 130. Introduction to Technical Services in Libraries

3 Credits (3)

Introduction to technical services in libraries, including acquisitions, bindery, cataloging, gifts, and serials. Restricted to Dona Ana campus only.

L SC 200. Collection Management and Development in Libraries

3 Credits (3)

Principles of identifying, selecting, acquiring, managing, and evaluating resources for libraries. Restricted to Dona Ana campus only.

L SC 210. Technology Planning in Libraries

3 Credits (3)

Overview of computer applications in libraries. Topics may include automated systems and electronic resources, introduction to evaluation of technology, and writing a technology plan. Restricted to Dona Ana campus only.

L SC 221. Experiential Learning I

1-3 Credits

Student is employed (paid or non-paid) in an approved work site and evaluated by their supervisor. Each credit requires a specified number of hours of on-the job work experience. Consent of Instructor required. Graded: S/U Grading (S/U, Audit). Restricted to Dona Ana campus only. **Prerequisite(s):** Consent of instructor.

L SC 240. Internet Resources and Research Strategies

3 Credits (3)

Introduction to retrieving and evaluating information found on the Internet and in selected Internet-accessible databases. Restricted to: Dona Ana campus only.

L SC 255. Special Topics

1-3 Credits

Special topics to be announced in Schedule of Classes. May be repeated for a maximum of 12 credits. Restricted to: Dona Ana campus only.

L SC 298. Independent Study

1-3 Credits

Individual studies directed by consenting faculty with prior approval of department chair. May be repeated for a maximum of 12 credits. Restricted to: Dona Ana campus only.

LANG-LANGUAGE

LANG 111. Beginning Language I

4 Credits (4)

Developing language skills through study abroad for languages not offered at NMSU main campus. Specific languages to be identified with course subtitles. Main campus only.

Prerequisite: Language placement exam or consent of the instructor.

LANG 451. Special Topics**1-3 Credits**

Selected topics relating to cultures or literatures of a specific country. Credit can be applied only towards fulfilling second language requirement. Credit is not accepted towards any graduate level major or minor. May be repeated for a maximum of 12 credits. Consent of instructor required.

LANG 453. Independent Studies**1-3 Credits**

Individualized, self-paced projects for advanced students. May be repeated under different subtitles for a maximum of 6 credits.

Prerequisite: consent of instructor.

LAWE-LAW ENFORCEMENT

LAWE 180. Public Safety First Line Supervisor**3-6 Credits (3-6)**

This course is designed to enhance public safety personnel's human resource management and reduce organizational liability. Consent of Instructor required. Restricted to Community Colleges campuses

Learning Outcomes

1. Describe and explain police administration.
2. Explain and discuss the various leadership and management theories.
3. Define and discuss the various types of leadership skills and management styles.
4. Express and discuss the role of the police administrator and police administration.
5. Explain the leadership required of police administrators for an effective Law Enforcement administration.
6. Describe and interpret the "quality approach to managing community relations"
7. Explain and discuss the necessities of introducing organizational change.
8. Explain and discuss the planning, programming and budgetary process including: variables that affect the decision-making process.
9. Analyze and discuss the role of effective communications in a police organization including negotiations and conflict resolution. 1
10. Explain and analyze the role of human resources in the organization including: their role in the recruitment and selection process; training; performance evaluations; promotions; and assessment centers. K) Discuss the role of police unions and explain their significance in labor relations.

LAWE 201. Introduction to Juvenile Delinquency**3 Credits (3)**

An introductory overview of the juvenile justice system of due process, custody, detention and release. Note: course does not meet upper division requirements towards completion of Bachelor of Science in Criminal Justice. Restricted to: Community Colleges Only.

LAWE 202. Police Patrol Procedures**3 Credits (3)**

A critical review of police procedures and the influences on police behavior; policy development, including the police role; discretion; police community interaction and arrest, search and seizure. Restricted to: Community Colleges only.

LAWE 203. Introduction to Police Supervision**3 Credits (3)**

An introductory overview of police supervision and concerns as it applies to law enforcement. (Note: Course does not meet upper division requirements toward completion of Bachelor of Science in Criminal Justice.) Restricted to: Community Colleges only.

LAWE 204. Introduction to Homeland Security**3 Credits (3)**

A historical perspective of international and domestic terrorist threats and the need to develop cohesive response policies and practices in the interest of National Security. [Course does not meet requirements towards completion of Bachelor of Science in Criminal Justice.]

Restricted to: Community Colleges only.

Prerequisite(s): CJUS 1110G.

LAWE 206. Traffic Enforcement and Crash Investigations**3 Credits (3)**

History and development of traffic laws and regulations, including basic elements of traffic violations, detection, apprehension, impaired drivers and guidelines and procedures for effective crash investigations and reporting. Restricted to: Community Colleges only.

LAWE 207. Legal Aspects of Law Enforcement**3 Credits (3)**

An evaluation of police authority including responsibilities, civil liability, liability implications, legal obligations, legal restraints, laws of arrest, and search and seizure. Restricted to: Community Colleges only.

LAWE 221. Law Enforcement Internship**3 Credits (3)**

Application of knowledge, skills and abilities, in an agency as an intern and integrated member of a law enforcement affiliated agency.

Prerequisite: consent of instructor.

LAWE 233. Practical Approach to Terrorism**3 Credits (3)**

Gives responders an overall safety approach in recognizing and responding to incidents involving terrorism. Presents an overview in types of harm, explosive weapons, chemical weapons, biological weapons and radiological weapons. Restricted to: Community Colleges only.

LAWE 255. Special Topics**1-3 Credits (1-3)**

Introductory special topics of lower division level work that provides a variety of timely subjects and content material. Specific subjects to be announced in the Schedule of Classes. A passing grade of C- or better is required. May be repeated up to 6 credits. Consent of Instructor required. Restricted to Community Colleges campuses

Learning Outcomes

1. Obtaining foundational skills in the administration of justice by differentiating the role of police and corrections in contemporary America.
2. Competence in the legal elements of constitutional, criminal, and substantive law, rules of evidence, search and seizure, and the role of the courts in the adjudication of the law in America.
3. Ability to identify, analyze, and synthesize knowledge from discipline-specific courses in criminalistics, legal aspects, homeland security, terrorism, and patrol operations to effectively conduct a practical field investigation and traffic crash investigation.
4. Ability to develop a criminal justice ethical perspective consistent with 21st century America to, effectively and ethically, perform a criminal justice role in law enforcement or corrections.
5. Basic crime scene management, crime scene note-taking techniques, collection of evidence, and case presentations.

- An application of knowledge, skills, and abilities, as an intern or integrated member of a criminal justice affiliated agency.

LAWE 298. Independent Study**3 Credits (3)**

Individual studies directed by the consenting faculty with prior approval of the department chair. A passing grade of C- or better is required. May be repeated up to 6 credits. Consent of Instructor required. Restricted to Community Colleges campuses

Prerequisite(s): Sophomore standing with a 3.0 or better GPA.

Learning Outcomes

- Obtaining foundational skills in the administration of justice by differentiating the role of police and corrections in contemporary America.
- Competence in the legal elements of constitutional, criminal, and substantive law, rules of evidence, search and seizure, and the role of the courts in the adjudication of the law in America.
- Ability to identify, analyze, and synthesize knowledge from discipline-specific courses in criminalistics, legal aspects, homeland security, terrorism, and patrol operations to effectively conduct a practical field investigation and traffic crash investigation.
- Ability to develop a criminal justice ethical perspective consistent with 21 st century America to, effectively and ethically, perform a criminal justice role in law enforcement or corrections.
- Basic crime scene management, crime scene note-taking techniques, collection of evidence, and case presentations.
- An application of knowledge, skills, and abilities, as an intern or integrated member of a criminal justice affiliated agency.
- Effective communication, orally and in writing, using appropriate references and technologies.
- Analytical and critical thinking skills when solving complex issues in criminology and the criminal justice system.
- Competence using and applying appropriate criminological theories on crime causation. 1
- Competence in understanding and describing how gender, race, ethnicity, age, social class, and sexuality contribute to differing experiences in the criminal justice system. 1
- Competence in understanding how the inter-dependence of the major components of the criminal justice system (i.e., police, courts, correctional agencies) affect victims, offenders, justice professionals, and society. 1
- Competence in understanding and applying the fundamental elements of both criminal and constitutional law. 1
- Competence in the legal foundation of criminal justice and the importance of due process.

LIBR-LIBRARY SCIENCE

LIBR 1110. Introduction to Research**1 Credit (1)**

The goal of this course is to provide students with techniques and tools to become better researchers. This course introduces students to the research process, and the organization, location, and evaluation of information.

Learning Outcomes

- Develop a research plan based on an information need.
- Find information efficiently and effectively using a variety of search tools.

- Evaluate the reliability of an information resource.
- Practice ethical behavior in using information.

LIBR 311V. Information Literacy**3 Credits (3)**

Lecture, hands-on assignments, and written research projects to give students the technological skills and critical thinking abilities needed to use the printed and electronic information resources found on the Information Highway. Includes how to locate, critically evaluate, and apply information for academic, professional, and personal purposes.

Prerequisite: ENGL 1110G or equivalent; and consent of instructor.

LING-LINGUISTICS

LING 2110G. Introduction to the Study of Language and Linguistics**3 Credits (3)**

This course presents an introduction to the study of language through the basic aspects of linguistic analysis: the sound system (phonetics and phonology), the structure of words and sentences (morphology and syntax), and the ways in which language is used to convey meaning (semantics and pragmatics). In addition, the course will investigate how language is acquired and stored in the brain, and how differences in speech styles and dialects reflect different social and cultural backgrounds of individual speakers.

Learning Outcomes

- Understand the basic concepts and terminology associated with phonetics, phonology, morphology, syntax, semantics, and pragmatics.
- Comprehend how language evolves over history and over an individual's lifespan.
- Describe some common, but mistaken, beliefs about language and to distinguish between descriptive and prescriptive approaches to language.
- Describe the social, psychological, geographic and historical influences that lead to language dominance or language endangerment.
- Be aware of the relations among various languages in the world, between dialects and slang, and between human and non-human languages.
- Apply methods of linguistic analysis as introduced in the course.
- Critically engage with the works of linguistic researchers.
- Stimulate curiosity about language and what it reveals about the human mind.

LING 302V. Language and Society**3 Credits (3)**

Study of how social identity including such factors as ethnicity, age, sex, education, power and socio-economic class is expressed in language systems and how misunderstandings arise between groups. Research skills are emphasized.

LING 303. Exploring Language Systems**3 Credits (3)**

Forms of linguistic semantic, syntactic and phonological organization.

Prerequisite(s): LING 2110G.

LING 405. Topics in Linguistics**3 Credits (3)**

Selected linguistics topics subtitled in the Schedule of Classes. May be repeated for a maximum of 6 credits under different subtitles.

Prerequisite: consent of instructor.

LING 425. Language and the Mind: Introduction to Psycholinguistics
3 Credits (3)

This course is an introduction to psycholinguistics; the study of how humans learn, represent, comprehend and produce language. Throughout this course, we address a variety of questions on the psychology of language most of which are still being answered. These include: What does it mean to know a language? What are the cognitive processes involved in language use? How do we produce and recognize speech? How can we improve texts and make them easier to read? How can we control speech in special situations to avoid errors?

Prerequisite(s): LING 2110G or consent of instructor.

LING 451. Independent Studies in Linguistics
1-3 Credits

Individual or group study of selected topics to be identified by subtitle. May be repeated for a maximum of 6 credits.

Prerequisites: LING 2110G and prior arrangement with faculty supervisor.

LING 455. Research in Linguistics
3 Credits (3)

This course will provide a capstone experience for students who have progressed through the program in linguistics and provide the foundation for further study at the post-graduate level in a linguistics-related field. Students will apply their foundation of knowledge and skills in linguistics through the realization of an individualized, inquiry-based project.

Consent of instructor may enroll student only in case of elective credit shortfall with concurrent enrollment.

Prerequisite(s): LING 2110G, LING 301, LING 302V, LING 303, plus 9 credit hours of related electives.

LING 500. Introduction to Linguistics
3 Credits (3)

Survey of the main branches of linguistics: phonology, morphology, syntax, semantics, language acquisition, sociolinguistics, historical linguistics and some of the theoretical issues in the field.

LING 502. Graduate Study in Sociolinguistics
3 Credits (3)

Study of how social identity including factors such as ethnicity, age, gender education and socio-economic class is expressed in language systems.

Prerequisites: LING 2110G or LING 500 recommended.

LING 503. Exploring Language Systems- Grad
3 Credits (3)

Students will be responsible for all requirements of LING 303 and will undertake independent, directed research.

Prerequisite(s): LING 2110G or LING 500.

LING 505. Selected Topics
3 Credits (3)

Studies, varying from year to year, in linguistics.

M E-MECHANICAL ENGINEERING

M E 210. Electronics and System Engineering
3 Credits (2+3P)

Introduction to microcontrollers, measurement systems, motion actuators, sensors, electric circuits, and electronic devices and interfacing. Students required to work individually and in teams to design and test simple electromechanical systems. Restricted to Las Cruces campus only. May be repeated up to 3 credits.

Prerequisite: C- or better grade in MATH 1521G or MATH 1521H or ENGR 190.

Learning Outcomes

1. Ability to apply knowledge of mathematics, science, and engineering;
2. Ability to design and conduct experiments, as well as to analyze and interpret data;
3. Ability to design a system, component or process to meet desired needs within realistic constraints;
4. Ability to identify, formulate, and solve engineering problems;
5. Ability to use the techniques, skills and modern tools necessary for engineering practice.

M E 228. Engineering Analysis I
3 Credits (3)

Introduction to engineering analysis with emphasis on engineering applications. Topics include ordinary differential equations, linear algebra, and vector calculus with focus on analytical methods. May be repeated up to 3 credits.

Prerequisite: C- or better grades in MATH 2530G.

Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

M E 234. Mechanics-Dynamics
3 Credits (3)

Kinematics and dynamic behavior of solid bodies utilizing vector methods. May be repeated up to 3 credits.

Prerequisite: A grade of C- or better grade in the following: C E 233 and PHYS 1310G and MATH 1521G or MATH 1521H.

Learning Outcomes

1. Student will be able to apply concepts of kinematics and accelerated motion.

M E 240. Thermodynamics
3 Credits (3)

First and second laws of thermodynamics, irreversibility and availability, applications to pure substances and ideal gases. May be repeated up to 3 credits.

Prerequisite: C- or better grades in PHYS 1310G.

Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

M E 261. Numerical Methods
3 Credits (2+3P)

Introduction to programming syntax, logic, and structure. Numerical techniques for root finding, solution of linear and nonlinear systems of equations, integration, differentiation, and solution of ordinary differential equations will be covered. Multi function computer algorithms will be developed to solve engineering problems. May be repeated up to 3 credits.

Prerequisite: C- or better grades in MATH 1521G or MATH 1521H or ENGR 190.

Learning Outcomes

1. Ability to apply knowledge of mathematics, science, and engineering.
2. Ability to identify, formulate, and solve engineering problems.
3. Ability to use the techniques, skills and modern tools necessary for engineering practice.

M E 326. Mechanical Design
3 Credits (3)

Kinematics and dynamics of machinery, analytical and computer-aided design of kinematics, mechanism synthesis involving linkages, cam and gear design, and motion analysis and balancing of forces. Project-based learning of multi-mechanism system design, analysis, fabrication, and evaluation. May be repeated up to 3 credits.

Prerequisite: C- or better in ENGR 234 and C E 301.

Learning Outcomes

1. An ability to perform motion analysis of mechanisms involving various mechanical components such as linkages, cams, and gears.
2. An ability to analyze and balance dynamic forces in machines.
3. Knowledge of how to design mechanism synthesis that can function as required in machines.
4. Understanding of ethics and professional responsibilities in engineering design.

M E 328. Engineering Analysis II

3 Credits (3)

Advanced engineering analysis with emphasis on engineering applications. Topics include systems of ordinary differential equations, Fourier analysis, partial differential equations, and functions of complex variable with focus on analytical methods. May be repeated up to 3 credits.

Prerequisite: C- or better grades in M E 228.

Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

M E 331. Intermediate Strength of Materials

3 Credits (3)

Covers stress and strain, theories of failure, curved flexural members, flat plates, pressure vessels, buckling, and composites. May be repeated up to 3 credits.

Prerequisite(s): C E 301 and M E 328.

M E 332. Vibrations

3 Credits (3)

Vibration of single and n-degree of freedom systems considering free, forced, and damped motion. Lagrange's equations. Dynamic stability. Controls. Matrix iteration. May be repeated up to 3 credits.

Prerequisite: M E 328, ENGR 234, and M E 261.

Learning Outcomes

1. An ability to analyze free and forced vibrations of a single degree-of-freedom (DOF) to multi-DOF systems; and an ability to perform modal analysis for engineering structures to understand mechanical vibrations in terms of normal modes.

M E 333. Intermediate Dynamics

3 Credits (3)

Three dimensional kinematics and kinetics, orbital motion, Lagrange's equations, dynamic stability, and controls. May be repeated up to 3 credits.

Prerequisite: M E 328 and ENGR 234.

Learning Outcomes

1. An ability to derive and solve equations of motion for a dynamical system by means of analytical mechanics approach.

M E 338. Fluid Mechanics

3 Credits (3)

Properties of fluids. Fluid statics and fluid dynamics. Applications of the conservation equations continuity, energy, and momentum to fluid systems. May be repeated up to 3 credits.

Prerequisite: C- or better grade in ENGR 234 and in (M E 228 or MATH 392).

Learning Outcomes

1. Ability to apply knowledge of mathematics, science, and engineering;
2. Ability to design and conduct experiments, as well as to analyze and interpret data;
3. Ability to design a system, component or process to meet desired needs within realistic constraints;
4. Ability to identify, formulate, and solve engineering problems.

M E 340. Applied Thermodynamics

3 Credits (3)

Thermodynamic cycles, Maxwell relations, Gibbs and Helmholtz functions, mixtures, psychometrics, chemical reactions, chemical equilibrium. May be repeated up to 3 credits.

Prerequisite: C- or better grades in M E 240.

Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

M E 341. Heat Transfer

3 Credits (3)

Fundamentals of conduction, convection, and radiation. Design of heat transfer systems. May be repeated up to 3 credits.

Prerequisite: C- or better grades in M E 240 and in (M E 338 or A E 339).

Learning Outcomes

1. Students have the ability to apply knowledge of mathematics, science, and engineering;
2. Students have the ability to identify, formulate, and solve engineering problems.

M E 345. Experimental Methods I

3 Credits (2+3P)

Emphasis on experimental techniques, basic instrumentation, data acquisition and analysis, and written presentation of results. Includes experiments in dynamics and deformable body mechanics. May be repeated up to 3 credits.

Prerequisite: C- or better grades in (M E 228 or MATH 392), in (M E 210 or PHYS 2140), and in ENGR 234.

Prerequisite/Corequisite: C E 301.

Learning Outcomes

1. Ability to design and conduct experiments, as well as to analyze and interpret data;
2. Ability to communicate effectively;
3. Ability to use the techniques, skills and modern tools necessary for engineering practice.

M E 349. MAE Career Seminar

1 Credit (1)

Seminar course covering topics relevant to mechanical and aerospace engineering juniors (job placement, interviewing techniques, resume preparation, etc.). May be repeated up to 3 credits. Restricted to: M E and A E majors.

Prerequisite: Sophomore Standing.

Learning Outcomes

1. Students will learn how to prepare for their future career by learning job placement, resume preparation, interview skills, and others.

M E 400. Undergraduate Research

1-3 Credits

Performed with the direction of a department faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of faculty member.

M E 401. Heating and Air-Conditioning Systems

3 Credits (3)

HVAC system design including heating and cooling load calculations, psychometrics, piping, duct layout, and system control. May be repeated up to 3 credits.

Prerequisite: A grade of C- or better in E T 306.

Prerequisite/Corequisite: E T 396.

Learning Outcomes

1. Master the use of thermodynamics software, EES for this course, and design software, HVAC Calc for this course.
2. Understand the principles of indoor/outdoor psychometrics.
3. Calculate the heating/cooling loads.
4. Design/size an HVAC system for a given building through a class project.

M E 405. Special Topics

3 Credits (3)

Topics of modern interest to be offered by the departmental staff. May be repeated up to 12 credits.

Prerequisite(s): Senior standing.

M E 425. Design of Machine Elements

3 Credits (3)

Design and analysis of machinery for load-bearing and power transmission by considering material failure modes such as yielding, fracture, and fatigue. Design and selection of machine elements including threaded fasteners, springs, rolling-element bearings, cams, gears and friction drives. May be repeated up to 3 credits.

Prerequisite: C- or better grades in M E 326.

Learning Outcomes

1. An ability to incorporate analysis and design methods for designing and prototyping machine elements.
2. An ability to recognize the design process, to breakdown this complex process into a series of simple tasks, and to carry out those tasks to achieve the desired design.
3. Knowledges of how to apply the industrial specifications and requirements regarding the design of machine elements.
4. Implementation of these knowledge and experiences to real-world engineering projects with finite element method.

M E 445. Experimental Methods II

3 Credits (2+3P)

Emphasis on experimental techniques, instrumentation and data acquisition in fluid mechanics, heat transfer, and thermodynamics. Laboratory results will be presented in written and verbal formats. May be repeated up to 3 credits.

Prerequisite: C- or better grades in (M E 338 or A E 339), M E 340, M E 341, and M E 345.

Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to communicate effectively with a range of audiences
3. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

4. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

M E 452. Control System Design

3 Credits (3)

Introduction to the control of dynamical systems, with a focus on mechanical and aerospace systems, including basic systems theory, controllability / observability, feedback and stabilization, PID controls, root-locus plot, and Bode diagram. May be repeated up to 3 credits.

Prerequisite: M E 261, M E 328 and ENGR 234.

Learning Outcomes

1. Construct a block diagram to find a transfer function for a dynamical system;
2. Analyze control systems by utilizing various linear control theories such as root-locus design method, bode / Nyquist plots, and lead / lag compensation techniques;
3. Design and simulate automatic control systems for mechanical and aerospace engineering applications.

M E 456. Experimental Modal Analysis

3 Credits (3)

Emphasis on hands-on techniques for structural vibration tests for practical applications. Interpretation of experimental results by means of advanced signal processing tools, basic system identification methodology, and reduced-order modeling procedures. May be repeated up to 3 credits.

Prerequisite: M E 328 and M E 261.

Learning Outcomes

1. An ability to experimentally perform modal analysis for multi-degree-of-freedom systems, which can be extended to continuous systems and actual engineering structures.

M E 457. Engineering Failure Analysis

3 Credits (3)

Introduction to failure theories and causes. Topics include general procedures for failure analysis, ductile and brittle modes of failure, elements of fracture mechanics, fractography, and failures in various engineering applications due to fatigue, wear, corrosion, design or processing defects. May be repeated up to 3 credits.

Learning Outcomes

1. Students will learn how to systematically conduct failure analysis, identify cause(s) of failure, suggest remedial steps to prevent failures and/or improve performance for a variety of engineering applications involving metals, polymers, ceramics and composites.

M E 458. Properties and Mechanical Behavior of Materials

3 Credits (3)

Understanding the microstructure of engineering materials and their influence on mechanical behavior. Topics include Material Structure and Physical Properties, Thermodynamics and Kinetics of Materials, Mechanical Properties, Strengthening Mechanisms, Time and Temperature Dependent Behavior, Degradation, Fatigue, and Fracture.

Learning Outcomes

1. Students will learn how to correlate mechanical behavior of materials with their microstructure, processing history and composition.
2. As practicing engineers, they will be able to recognize impact of operating conditions, predict life span, and design materials to improve reliability and efficiency.

3. They will be able to select appropriate materials for a given application from class of materials such as metals, polymers, ceramics and composites.

M E 460. Applied Finite Elements**3 Credits (3)**

Introduction to the practical aspects of structural finite element modeling. Course focuses on providing a working knowledge of how to effectively incorporate finite element techniques into the design process. May be repeated up to 3 credits. Crosslisted with: M E 518.

Prerequisite(s): M E 425.

M E 481. Alternative and Renewable Energy**3 Credits (3)**

Current and future energy needs of the United States and the world will be considered primarily from the standpoint of renewable energy sources such as solar, wind, ocean, and biomass. Technical, economic, and environmental aspects of each technology will be addressed. May be repeated up to 3 credits.

Prerequisite: M E 341.

Learning Outcomes

1. Understanding of current and future energy needs of the United States and the whole world from the standpoint of renewable energy sources such as solar, wind, ocean, and biomass.

M E 486. Introduction to Robotics**3 Credits (3)**

This course provides students with an introduction to the theories and methods for analysis, design, and control of robotic manipulators. This course is devoted to understanding the spatial descriptions and transformations, kinematics, and dynamics of these mechanisms and how to practically implement these concepts into actual robotic manipulators. May be repeated up to 3 credits.

Prerequisite: M E 328 and ENGR 234.

Learning Outcomes

1. Model and analyze the kinematics and dynamics of robotic manipulators;
2. Program and control these robotic platforms;
3. Apply the theoretical methods into industrial robots;
4. Implement the knowledge and experiences in real-world engineering projects.

M E 487. Mechatronics**3 Credits (2+3P)**

Introduction to the analysis and design of computer-controlled electromechanical systems, including data acquisition and conversion, force and motion sensors, actuators, mechanisms, feedback control, and robotic devices. Students required to work in teams to construct and test simple robotic systems. May be repeated up to 3 credits.

Prerequisite(s): M E 210 and M E 345.

M E 502. Elasticity I**3 Credits (3)**

Introduction to the theory of elastic media with emphasis on understanding the fundamental principles and solution methods used in the analysis of elastic solids and structures. Cartesian tensors are introduced for formulations of general deformations and states of stress. May be repeated up to 3 credits.

Learning Outcomes

1. An ability to understand the fundamental principles and solution methods used in the analysis of elastic solids and structures.

2. Use of cartesian tensors for formulations of general deformations and states of stress.

M E 503. Thermodynamics**3 Credits (3)**

A comprehensive study of the first and second laws of thermodynamics, nonequilibrium processes, equations of state, and statistical thermodynamics.

M E 504. Continuum Mechanics**3 Credits (3)**

Introduction to the fundamentals of the mechanics for continuous media. This covers the concepts and general principles common to all branches of mechanics to facilitate further study in various fields such as elasticity, plasticity, fluid, and continuum damage mechanics. Computational aspects of the theory are also discussed. May be repeated up to 3 credits.

Learning Outcomes

1. An ability to understand the fundamentals of the continuum mechanics, which covers the concepts and general principles common to all branches of mechanics to facilitate further study in various fields such as elasticity, plasticity, fluid, and continuum damage mechanics.

M E 509. Individualized Study**3 Credits (3)**

Individualized study covering specialized topics in mechanical and aerospace engineering. Consent of instructor required.

M E 510. Special Topics**1-6 Credits**

Topics in mechanical engineering. May be repeated for a maximum of 6 credits.

Prerequisite: consent of the department head.

M E 511. Dynamics**3 Credits (3)**

An advanced study of the dynamical behavior of systems of particles and rigid bodies, with emphasis on the theoretical background of dynamics.

M E 512. Vibrations**3 Credits (3)**

Free and forced vibrations for discrete and continuous systems with single or multiple degrees of freedom. Introduction to nonlinear and random vibration and solution techniques for such systems.

M E 517. Nonlinear Dynamics and Chaos**3 Credits (3)**

Singular points, periodic solutions, stability, and local bifurcations for ODEs and maps; phase space methods, invariant manifolds, and Poincare maps; nonsmooth, periodic, time-delay, and Hamiltonian systems; perturbation, averaging, and harmonic balance methods; center manifold reduction and normal forms; strange attractors, Liapunov exponents, attractor dimension; dissipative and Hamiltonian chaos

M E 518. Finite Element Analysis**3 Credits (3)**

Introduction to finite element method. Topics include mathematical modeling, variational formulation, shape functions, truss, beam, solid, and shell elements. Includes static, dynamic, and nonlinear analysis. May be repeated up to 3 credits. Crosslisted with: M E 460.

M E 527. Linear Systems Theory**3 Credits (3)**

Introduction to control of linear multi-input-multi-output (MIMO) systems. Topics include representation of system dynamics using the state-space model, linearization, internal and input-to-output stability, controllability,

observability, optimal control, linear quadratic regulator, and observer. May be repeated up to 3 credits.

Learning Outcomes

1. Students are able to design linear multi-input-multi-output (MIMO) control systems.

M E 530. Intermediate Fluid Mechanics

3 Credits (3)

Application of exact and empirical solutions to fundamental flow problems, including viscous and inviscid behavior. These applications establish a theoretical basis for the origin and physical role of common terms in the governing equations.

M E 533. Numerical Methods for Fluid Mechanics and Heat Transfer

3 Credits (3)

Numerical methods for solving differential equations (initial and boundary value problems, eigenvalue problems) with focus on fluid mechanics and heat transfer problems. Concepts such as stability, accuracy, consistency, and systematic errors (phase/amplitude error). Implement and test algorithms for the solution of ordinary and partial differential equations. May be repeated up to 3 credits.

Prerequisite: M E 341.

Learning Outcomes

1. An ability to apply computational approaches to fluid dynamic and heat transfer problems and to understand limitations with respect to stability, accuracy, and error.

M E 536. Hydrodynamic Stability and Turbulence

3 Credits (3)

Introduction to fundamentals of hydrodynamic stability, classical linear stability analysis of parallel shear flows and rotating flows, nonlinear stability, basic concepts in turbulence theory. May be repeated up to 3 credits.

Prerequisite: ME 530.

Learning Outcomes

1. An ability to understand fundamentals of hydrodynamic stability, classical linear stability analysis of parallel shear flows and rotating flows, nonlinear stability, basic concepts in turbulence theory.

M E 540. Intermediate Heat Transfer

3 Credits (3)

Fundamentals of conduction, convection, and radiation heat transfer. Emphasis on the application of combined heat transfer to the solution of problems not accessible at the undergraduate level.

M E 557. Engineering Failure Analysis

3 Credits (3)

Introduction to failure theories and causes. Topics include general procedures for failure analysis, ductile and brittle modes of failure, elements of fracture mechanics, fractography, and failures in various engineering applications due to fatigue, wear, corrosion, design or processing defects. May be repeated up to 3 credits.

M E 558. Properties and Mechanical Behavior of Materials

3 Credits (3)

Understanding the microstructure of engineering materials and their influence on mechanical behavior. Topics include Material Structure and Physical Properties, Thermodynamics and Kinetics of Materials, Mechanical Properties, Strengthening Mechanisms, Time and Temperature Dependent Behavior, Degradation, Fatigue, and Fracture. May be repeated up to 3 credits.

Prerequisite: CHME 361.

M E 570. Engineering Analysis I

3 Credits (3)

Introduction to engineering analysis with emphasis on engineering applications. Topics include linear algebra, linear ordinary differential equations, and linear partial differential equations with focus on analytical methods.

M E 586. Introduction to Robotics

3 Credits (3)

This course provides students with an introduction to the theories and methods for analysis, design, and control of robotic manipulators. This course is devoted to understanding the spatial descriptions and transformations, kinematics, and dynamics of these mechanisms and how to practically implement these concepts into actual robotic manipulators. May be repeated up to 3 credits.

Prerequisite: M E 328 and ENGR 234 or consent of instructor.

Learning Outcomes

1. Students will be able to model and analyze the kinematics and dynamics of robotic manipulators.
2. Students will be able to program and control these robotic platforms.
3. Students will be able to apply the theoretical methods into industrial robots.
4. Students will be able to implement these knowledge and experiences to real-world engineering projects.

M E 587. Mechatronics

3 Credits (2+3P)

Introduction to the analysis and design of computer-controlled electromechanical systems, including data acquisition and conversion, force and motion sensors, actuators, mechanisms, feedback control, and robotic devices. Students required to work in teams to construct and test simple robotic systems. Crosslisted with: M E 487.

M E 598. Special Research Programs

1-3 Credits

Individual investigations, either analytical or experimental. May be repeated for a maximum of 6 credits.

M E 599. Master's Thesis

15 Credits

Thesis.

M E 600. Doctoral Research

1-15 Credits

This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

M E 698. Special Research Programs

1-3 Credits

May be repeated for a maximum of 6 credits.

M E 700. Doctoral Dissertation

15 Credits

Dissertation.

M SC-MILITARY SCIENCE

M SC 110. Introduction to Military Science

2 Credits (2+1P)

Introduction to the Army, the Profession of Arms, and critical thinking. Students will examine the Army Profession and what it means to be a professional in the U.S. Army. The overall focus is on developing basic knowledge and comprehension of the Army Leadership Requirements Model while gaining a complete understanding of the Reserve Officers' Training Corps (ROTC) program, its purpose in the Army, and its advantages for the student. Cadets also learn how resiliency and fitness supports their development as an Army leader. Includes a weekly lab

facilitated by MSL III Cadets and supervised by Cadre. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

M SC 111. Introduction to Leadership
2 Credits (2+1P)

Introduction to the personal challenges and competencies that are critical for effective leadership. Students learn how the personal development of life skills such as critical thinking, time management, goal setting, and communication contribute to effective leadership. Students learn the basics of the communications process and the importance for leaders to develop the essential skills to effectively communicate in the Army. Students will begin learning the basics of squad level tactics that will be reinforced during a weekly lab facilitated by MSL III Cadets and supervised by Cadre. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

M SC 210. Self/Team Development
3 Credits (3+1P)

A focus on leadership and decision making. The course adds depth to the student's understanding of the Adaptability Army Learning Area. Outcomes are demonstrated through Critical and Creative Thinking and the ability to apply Troop Leading Procedures (TLP) to apply Innovative Solutions to Problems. The Army Profession is also stressed through leadership forums and a leadership self-assessment. Students are then required to apply their knowledge outside the classroom in a hands-on performance-oriented environment during a weekly lab facilitated by MSL III Cadets and supervised by Cadre and three physical fitness sessions per week. Restricted to Las Cruces campus only.

M SC 211. Leadership in Action and Team Building
3 Credits (3+1P)

A focus on Army doctrine and team development. The course begins the journey to understand and demonstrate competencies as they relate to Army doctrine. Army Values, Teamwork, and Warrior Ethos and their relationship to the Law of Land Warfare and philosophy of military service are also stressed. The ability to lead and follow is also covered through Team Building exercises at squad level. Students are then required to apply their knowledge outside the classroom in a hands-on performance-oriented environment during a weekly lab facilitated by MSL III Cadets and supervised by cadre and three physical fitness sessions per week. Restricted to Las Cruces campus only.

M SC 225. Directed Studies
1-3 Credits

Individual directed studies under supervision of the Professor of Military Science. May be repeated up to 12 credits. Restricted to Las Cruces campus only.

Prerequisite(s): GPA 2.5 or better.

M SC 310. Leading Small Organizations I
3 Credits (3)

Part of the Senior ROTC Advanced Course, this course provides a Focus on training management and the warfighting functions. It is an academically challenging course where Cadets study, practice, and apply the fundamentals of Training Management and how the Army operates through the Warfighting functions. At the conclusion of this course, Cadets will be capable of planning, preparing, and executing training for a squad conducting small unit tactics. Includes one lab meeting per week using peer facilitation overseen by MSL IVs, supervised by ROTC Cadre and three physical fitness sessions per week. Students must meet Basic Course of Military Science requirements to enroll in this course.

Corequisite(s): M SC 310 L.

M SC 310 L. Leading Small Organizations I Lab
1 Credit (1P)

Planning, coordination, execution and evaluation of training and activities with basic course students and ROTC program. Students develop and refine leadership skills in positions of responsibility. Open only to students taking M SC 310.

Corequisite(s): M SC 310.

M SC 320. Leading Small Organizations II
3 Credits (3)

Part of the Senior ROTC Advanced Course, this course provides a focus on applied leadership in small unit operations. It is an academically challenging course where Cadets study, practice, and apply the fundamentals of direct level leadership and small unit tactics at the platoon level. At the conclusion of this course, Cadets will be capable of planning, coordinating, navigating, motivating and leading a platoon in the execution of a mission Includes one lab meeting per week using peer facilitation overseen by MSL IVs, supervised by ROTC Cadre and three physical fitness sessions per week. Successful completion of this course is a requirement to Cadet Summer Training Advance Camp during the summer, at Fort Knox, KY. Prerequisite(s): M SC 310

Corequisite(s): M SC 320 L.

M SC 320 L. Leading Small Organizations II Lab
1 Credit (1P)

Practice and refinement of leadership skills. Different roles assigned for students at different levels in the program. Planning, coordination, execution and evaluation of training and activities with basic course students and ROTC program. Open to students taking M SC 320.

Corequisite(s): M SC 320.

M SC 325. Advanced Directed Studies
1-3 Credits

Directed individual study of advanced subjects under the guidance of the Professor of Military Science. May be repeated up to 12 credits.

Prerequisite(s): GPA 2.5 or better.

M SC 350. Cadet Summer Training Advanced Course
3 Credits (3)

Advanced Camp. Advanced Camp is a 31-day training event which takes place at Fort Knox, KY. It is designed to assess a Cadet's ability to demonstrate proficiency in basic officer leadership tasks. Cadets are evaluated on their ability to lead at the Squad and Platoon levels, both in garrison and tactical environments. Cadets are mentally and physically tested during a 12-day consequence driven field training exercise that replicates a combat training center rotation. Successful completion of the Advanced Camp is a requirement for commissioning. Consent of Instructor required.

Prerequisite(s): M SC 310, M SC 310 L, M SC 320, and M SC 320 L.

M SC 401. Leadership Challenges and Goal Setting
3 Credits (3)

Part of the Senior ROTC Advanced Course, this course provides a focus on development of the Army Officer. It is an academically challenging course where Cadets develop knowledge, skills, and abilities to plan, resource, and assess training at the small unit level. Cadets also learn about Army programs that support counseling subordinates and evaluating performance, values and ethics, career planning, and legal responsibilities. At the conclusion of this course, Cadets will be familiar with how to plan, prepare, execute, and continuously assess the conduct of training at the company or field grade officer level. Includes a lab per week overseeing MSL III lesson facilitation and supervised by ROTC Cadre and three physical fitness sessions per week. May be repeated up to 3 credits. Prerequisite(s): M SC 320

Corequisite(s): M SC 401 L.

M SC 401 L. Leadership Challenges and Goal Setting Lab
1 Credit (1P)

Different roles assigned for students at different levels in the program. Practice and refinement of leadership skills. Planning coordination, execution and evaluation of training and activities with basic course students and ROTC program. Open only to students taking M SC 401. May be repeated up to 1 credits.

Corequisite(s): M SC 401.

M SC 402. Transition to Lieutenant

3 Credits (3)

The final course within the Senior ROTC Advanced Course, this course is an academically challenging course where Cadets further develop knowledge, skills, and abilities required of junior officers pertaining to the Army in Unified Land Operations and Company Grade Officer roles and responsibilities. This course includes reading assignments, homework assignments, small group assignments, briefings, case studies, practical exercises, a mid-term exam, and an Oral Practicum as the final exam. The Oral Practicum explores the Cadet's knowledge of how they will be prepared for the 20 Army Warfighting Challenges (AWFC) covered throughout the ROTC Advanced Course. Successful completion of this course will assist in preparing Cadets for their BOLC B course following graduation and commissioning. It is a mandatory requirement for commissioning. Includes a lab per week overseeing MSL III lesson facilitation and supervised by ROTC Cadre and three physical fitness sessions per week. May be repeated up to 3 credits. Prerequisite(s): M SC 401

Corequisite(s): M SC 402 L.

M SC 402 L. Transition to Lieutenant Lab

1 Credit (1)

Different roles assigned for students at different levels in the program. Practice and refinement of leadership skills. Planning, coordination, execution, and evaluation of training and activities with basic course students and ROTC program. Open only to students taking M SC 402. May be repeated up to 1 credits.

Corequisite(s): M SC 402.

M SC 425. Practicum

1-4 Credits

Independent projects conducted under the direction of the Professor of Military Science, and concerned with analysis of selected leadership or management problems. Course not eligible for S/U grade. May be repeated up to 16 credits.

M SC 465 L. Military Decision Making - Graduate Level Lab

1 Credit (1)

Students will work as part of a planning team in the application of the Military Decision Making Process to planning, coordination, and publish a comprehensive training plan and guidance which outlines all training and activities of the NMSU Army ROTC program for the semester following the semester of the course (i.e. the fall course develops the spring plan). Students develop and refine leadership skills in positions of responsibility. Open only to students taking M SC 465. May be repeated up to 1 credits. Consent of Instructor required. Consent of Professor of Military Science (PMS) is required and the PMS will interview all prospective students prior to enrolling into this course.

Corequisite(s): M SC 465.

MAT-AUTOMATION & MANUFACTURING

MAT 101. General Industry Safety

1 Credit (1)

Overview of general industry safety for entry-level individuals. Students will have the opportunity to earn a 10-hour general industry OSHA card. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Discuss the general history of OSHA.
2. Discuss the general history of the U.S. safety movement.
3. Utilize the OSHA web site as a basic safety resource.
4. Recognize industry-related hazards.
5. Identify industry-related hazards.
6. Avoid industry-related hazards.
7. Follow proper basic first aid procedures in an emergency.
8. Avoid exposure to blood-borne pathogens in an emergency situation.
9. Interpret hazard communication. 1
10. Recognize proper lifting techniques. 1
11. Recognize personal protective equipment.

MAT 102. Print Reading for Industry

3 Credits (2+2P)

Reading, interpretation, and revisions of industrial technical drawings common to manufacturing, Aerospace, machine parts, electrical, hydraulic, and pneumatic drawings. Interpretation of engineering drawings and related shop calculations.

Learning Outcomes

1. Recognize fundamentals of shape descriptions.
2. Recognize fundamentals of size description and annotations.
3. Recognize industrial drawing types.
4. Recognize Industrial drawing types.
5. Understand basic geometric dimensioning and tolerances practices that applied to working drawings.
6. Identify standard threads and fasteners callouts and specifications.

MAT 105. Introduction to Manufacturing

3 Credits (2+2P)

Introduction to manufacturing evolution from basic assembly process to modern automated processes. Covers history, employability, soft skills, quality measurements, teamwork concept, production requirements, and considerations in plan layout and design. Minimum math proficiency of CCDM 114 required or math placement into MATH 1215 or higher.

Restricted to: Community Colleges only.

Learning Outcomes

1. Classify Hazardous Materials.
2. Perform an Electrical Lockout/Tagout.
3. Locate and Interpret a Safety Data Sheet.
4. Interpret a Hazardous Material Identification Label.

MAT 106. Applied 3D Manufacturing Practices

3 Credits (2+2P)

Introduction to part production and manufacturing utilizing 3D printing processes. Introduction to creating 3D solid models utilizing CAD software and the creation of 3d printed parts utilizing filament or resin style 3D printers. Students will learn how to make selected parts starting from drawings/prints to completed projects. Basic elements of quality control will be introduced.

Learning Outcomes

1. Produce 3D solid models in CAD Software.
2. Read 2D and 3D technical drawings.
3. Manage Electronic files.
4. Utilize slicing software to prepare 3D solid models for 3d printing.

5. Apply industry standard design practices to produce desired 3D printed parts.
6. Produce 3D printed parts.
7. Apply elements of quality control in the 3D printing process.

MAT 110. Machine Operation and Safety**3 Credits (2+2P)**

Introduction to the operation and safety aspects of various types of machinery and equipment, including both mechanical and electrical machines, Rigid Tubing, and Flexible Lines. Maintenance and safety operation of industrial equipment will also be covered. Restricted to: Community Colleges only. Crosslisted with: AERT 115

MAT 130. Applied Industrial Electricity I**4 Credits (3+2P)**

Electrical safety, AC and DC circuits, use and care of common measuring instrumentation, schematic and wiring diagrams, electromagnetism, National Electric Code branch circuits. Restricted to: Community Colleges only.

Prerequisite(s): MATH 1215 or ELT 120 or OETS 118.

MAT 135. Applied Industrial Electricity II**4 Credits (3+2P)**

Relationship between motor power, speed, and torque, basic application of relay circuits, motor control circuits, inductance and capacitance factors, transformers, solid state devices circuits and applications. Restricted to: Community Colleges only.

Prerequisite(s): MAT 130.

MAT 221. Cooperative Experience I**1-6 Credits**

Supervised cooperative work program. Student is employed in an approved occupation and rated by employer and instructor. Student meets in a weekly class. Graded S/U.

Prerequisite: consent of instructor.

MAT 234. Industrial Electricity Maintenance**3 Credits (2+2P)**

Introduction into electrical systems, theory and uses for the different types of motors used in the industry and related industrial safety practices. DC, AC stepper and servo motors, motor speed and torque, motor performance, and efficiency, motor control fundamentals using variable frequency drives, vector controls, servo and stepper drives. Restricted to: Community Colleges only.

MAT 265. Special Topics**1-6 Credits**

Course subtitled in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

MATH-MATHEMATICS

A student may not receive credit for a lower-division mathematics course if it serves as a prerequisite to a lower-division math course that the student had previously passed with a grade of C- or better.

Students without adequate placement to enroll in MATH 1134, MATH 1215 or MATH 1130G can gain admission to the course by earning a C- or better in CCDM 114 N at an NMSU Community College campus, or in ARSC 1120.

Students wishing to enroll in MATH 1220G, MATH 1430G, MATH 1511G, MATH 1521G, or MATH 1350G must satisfy one of the following:

1. have passed the stated prerequisite course or an equivalent transfer course with a C- or better
2. have placed into the course with an adequate ACT Math score or through the Mathematics Placement Examination (MPE), the results of which will be made available to the student's advisor. The MPE is given daily in Walden Hall when school is in session and during new student orientation programs.

MATH 1130G. Survey of Mathematics**3 Credits (3)**

This course will develop students' ability to work with and interpret numerical data, to apply logical and symbolic analysis to a variety of problems, and/or to model phenomena with mathematical or logical reasoning. Topics include financial mathematics used in everyday life situations, statistics, and optional topics from a wide array of authentic contexts. May be repeated up to 3 credits.

Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in CCDM 113 N or CCDM 114 N.

Learning Outcomes

1. Construct and analyze graphs and/or data sets: Gather and organize information; Understand the purpose and use of various graphical representations such as tables, line graphs, tilings, networks, bar graphs, etc.; Interpret results through graphs, lists, tables, sequences, etc.; Draw conclusions from data or various graphical representations.
2. Use and solve various kinds of equations: Understand the purpose of and use appropriate formulas within a mathematical application; Solve equations within a mathematical application; Check answers to problems and determine the reasonableness of results.
3. Understand and write mathematical explanations using appropriate definitions and symbols: Translate mathematical information into symbolic form; Define mathematical concepts in the student's own words; Use basic mathematical skills to solve problems.
4. Demonstrate problem solving skills within the context of mathematical applications; Show an understanding of a mathematical application both orally and in writing; Choose an effective strategy to solve a problem; Gather and organize relevant information for a given application.

MATH 1134. Fundamentals of Elementary Mathematics I**3 Credits (3)**

Numbers and the four operations of arithmetic. Understanding and comparing multiple representations of numbers and operations, in particular how these representations build from whole numbers to integers to fractions and decimals. Applying properties of numbers and operations in contextual situations. Reasoning, communicating, and problem solving with numbers and operations. Applications to ratio, and connections with algebra. Taught primarily through student activities and investigations. Restricted to: EDUC,EPAR,E ED,ECED majors. May be repeated up to 3 credits.

Prerequisite: C- or better in ENGL 1110G; adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215.

Learning Outcomes

1. As future elementary teachers you will be teaching mathematics to children.
2. In order to teach a subject well you need not only to know the material that you will teach, but you need to know more than what you will teach, and know it well, in order to be able to answer questions, understand student reasoning, give alternate explanations

when your students do not understand something, and be able to adjust to changes in the mathematical curriculum.

3. Furthermore, even if you hope to teach a given grade, you should be prepared to teach a variety of grades since what a person ends up teaching is often not what they planned to do.
4. We will explore ideas of arithmetic in a way to help you improve your mathematical ability, gain confidence in your ability, introduce to you different ideas and models, and to see a variety of mathematical activities that are appropriate for people of all ages.
5. Everything we study will be done with the aim of developing your ability to relate to the mathematics of elementary school and to help children develop mathematical understanding

MATH 1215. Intermediate Algebra

3 Credits (3)

A study of linear and quadratic functions, and an introduction to polynomial, absolute value, rational, radical, exponential, and logarithmic functions. A development of strategies for solving single-variable equations and contextual problems. May be repeated up to 3 credits.

Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in CCDM 113 N or CCDM 114 N.

Learning Outcomes

1. Students will build on their knowledge of linear and quadratic functions and will begin to build an understanding of absolute value, polynomial, rational, power, radical, exponential and logarithmic functions in the following contexts: Demonstrate appropriate use of basic function language and notation; Convert between equivalent forms of algebraic expressions; Solve single-variable equations of the types listed above; Interpret and communicate algebraic solutions graphically and numerically; Demonstrate contextual problem-solving skills that include setting up and solving problems, and interpreting solutions in context; Apply appropriate problem solving methods from among algebraic, graphical, and numerical.

MATH 1217. General Supplemental Instruction I

1 Credit (2P)

Collaborative workshop for students enrolled in Intermediate Algebra.

Corequisite: MATH 1215.

Learning Outcomes

1. Intermediate Algebra Workshop provides time for students to work on problems from Intermediate Algebra under the guidance of their instructor.

MATH 1220G. College Algebra

3 Credits (3)

The study of equations, functions and graphs, reviewing linear and quadratic functions, and concentrating on polynomial, rational, exponential and logarithmic functions. Emphasizes algebraic problem solving skills and graphical representation of functions. May be repeated up to 3 credits.

Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215.

Learning Outcomes

1. Use function notation; perform function arithmetic, including composition; find inverse functions.
2. Identify functions and their transformations given in algebraic, graphical, numerical, and verbal representations, and explain the connections between these representations.

3. Graph and interpret key feature of functions, e.g., intercepts, leading term, end behavior, asymptotes.
4. Solve equations algebraically to answer questions about graphs, and use graphs to estimate solutions to equations.
5. Solve contextual problems by identifying the appropriate type of function given the context and creating a formula based on the information given.
6. Communicate mathematical information using proper notation and verbal explanations.

MATH 1221. General Supplemental Instruction II

1 Credit (1+2P)

Collaborative workshop for students enrolled in College Algebra.

Corequisite: MATH 1220G.

Learning Outcomes

1. College Algebra Workshop provides time for students to work on problems from College Algebra under the guidance of their instructor.

MATH 1250G. Trigonometry & Pre-Calculus

4 Credits (3+2P)

Trigonometry & Pre-Calculus includes the study of functions in general with emphasis on the elementary functions: algebraic, exponential, logarithmic, trigonometric and inverse trigonometric functions. Topics include rates of change, limits, systems of equations, conic sections, sequences and series, trigonometric equations and identities, complex number, vectors, and applications. May be repeated up to 4 credits.

Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1220G.

Learning Outcomes

1. (Trigonometry) Students will be able to define and evaluate the trigonometric functions as functions of angle in both degree and radian measure using the definitions in terms of x , y , and r ; as the ratio of sides of a right triangle; using the unit circle; using reference angles, commonly used (0 o, 30 o, 45 o, 60 o, 90o) angles and using a calculator.
2. (Trigonometry) Students will be able to solve right triangles. They will be able to draw a sketch in an applied problem when necessary.
3. (Trigonometry) Students will be able to solve non-right triangles using the law of sines and the law of cosines.
4. (Trigonometry) Students will be able to prove trigonometric identities and apply addition and subtraction, doubleangle, half-angle and power reduction formulas.
5. (Trigonometry) Students will be able to graph the six trigonometric functions, their transformations and their inverses.
6. (Trigonometry) Students will be able to use algebraic methods, including the use of identities and inverses, to solve trigonometric equations and demonstrate connections to graphical and numerical representations of the solutions.
7. (Trigonometry) Students will be able to add and subtract vectors in two dimensions. They will be able to use the dot product to project one vector onto another and to determine the angle between two vectors. They will be able to solve a variety of word problems using vectors.
8. (Trigonometry) Students will be able to work with polar coordinates; this includes graphing in polar coordinates and transforming an equation with polar coordinates into one with rectangular coordinates, and vice versa.
9. (Trigonometry) Students will be to work with the trigonometric form of complex numbers, including using De Moivre's formula. 1

10. (Pre-Calculus) Functions: Reinforce recognizing a function from its graph and from its algebraic expression; Reinforce identification of a one-to-one function graphically and from its algebraic expression; Reinforce identification of inverse functions graphically and algebraically; Reinforce combining functions arithmetically and compositionally; Be able to calculate the average rate of change of a function using the difference quotient and depict it graphically; Be able to find a limiting value of a function and be able to identify and use the notation that describes this. 1
11. (Pre-Calculus) Graphing: Reinforce using key characteristics of functions to graph them; Be able to graph conic sections from their key characteristics such as foci, eccentricity and asymptotes; Be able to identify all functions mentioned from their graphs, describing their key aspects. 1
12. (Pre-Calculus) Solving: Exponential/Logarithmic equations using the rules of exponents and logarithms; Systems of linear equations by elimination; Non-linear systems algebraically and graphically. 1
13. (Pre-Calculus) Applications: Modeling with functions with an emphasis on exponential and logarithmic functions, growth and decay. 1
14. (Pre-Calculus) Sequences and series: Understand the concept and notation of a sequence; Understand the concept and notation of a series; Be able to find limits of basic sequences; Be able to find sums of basic series.

MATH 1350G. Introduction to Statistics **3 Credits (3)**

This course discusses the fundamentals of descriptive and inferential statistics. Students will gain introductions to topics such as descriptive statistics, probability and basic probability models used in statistics, sampling and statistical inference, and techniques for the visual presentation of numerical data. These concepts will be illustrated by examples from a variety of fields.

Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215 or higher.

Learning Outcomes

1. Explain the general concepts of statistics: Explain and evaluate statistics used in the real world (from a news article, research project, etc.); Use statistical vocabulary appropriately; Distinguish between descriptive and inferential statistics; Distinguish between qualitative and quantitative data; Distinguish between populations and samples, and parameters and statistics; Give examples of independent and dependent variables.
2. Presentation and description of data: Present data graphically using histograms, frequency curves and other statistical graphs; Interpret graphs of data, including histograms and shapes of distributions.
3. Summarize data using measures of central tendency and variation: Calculate and interpret the mean, median, and mode to describe data; Calculate and interpret range, variance, and standard deviation to describe data.
4. Present the concepts of probability: Interpret basic probabilities; Calculate probabilities using compound probability rules and the binomial distribution; Calculate probabilities using the standard normal distribution and relate them to areas under the curve; Determine if the binomial distribution can be approximated with the normal distribution; Describe the relationship between the sampling distribution and the population distribution; Use the central limit theorem to approximate the probability distribution and calculate probabilities.
5. Compute point and interval estimates: Determine the confidence interval for a parameter; Interpret the confidence level and margin of error; Determine whether a statistical technique is appropriate under stated conditions.
6. Perform hypothesis tests: Determine whether a statistical test is appropriate under stated conditions; Identify null and alternative hypothesis; Perform and interpret statistical tests (e.g. z-test, t-test, one-tailed and two-tailed, one-sample, two-sample) and determine whether data is statistically significant; State the conclusion of a hypothesis test; Interpret a p-value as compared to a significance level; Explain why a test can lead us to reject a null hypothesis, not accept one; Distinguish between Type I and Type II errors.
7. Analyze data using regression and correlation: Explain the difference between correlation and causation; Construct and interpret scatter plots; Calculate and interpret the linear correlation coefficient; Determine and use the equation of a least-squares regression line between two variables to make predictions; Interpret the meaning of the coefficient of determination.
8. Optional topics: Inter-quartile range, box-plots, stem-and-leaf plots; Combinations and permutations; The Poisson distribution; Statistical power; Chi-square; Analysis of variance.

MATH 1430G. Applications of Calculus I **3 Credits (2+2P)**

An algebraic and graphical study of derivatives and integrals, with an emphasis on applications to business, social science, economics and the sciences. May be repeated up to 3 credits.

Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1220G or higher.

Learning Outcomes

1. Find limits algebraically and graphically, and use limits to analyze continuity.
2. Find the derivative of a function by applying appropriate techniques (limit of the difference quotient, general derivative rules, product rule, quotient rule, chain rule, and higher order derivatives).
3. Perform implicit differentiation. Use implicit differentiation to solve related rate application problems.
4. Use the derivative to describe the rate of change and slope of a curve in general and at particular points. Compare and contrast average rates of change to instantaneous rates of change.
5. Find the maxima, minima, points of inflections, and determine concavity of a function by applying the first and second derivatives. Use these results to sketch graphs of functions and to solve optimization problems in context.
6. Find the antiderivative and indefinite integral functions to include integration by substitution. Apply the Fundamental Theorem of Calculus in computing definite integrals of functions.
7. Approximate the area under the curve using Riemann sums.
8. Use the integral to determine the area under a curve and to find the accumulated value of a function in context.
9. Solve contextual problems by identifying the appropriate type of function given the context, creating a formula based on the information given, applying knowledge of algebra and calculus, and interpreting the results in context. 1
10. Communicate mathematical information using proper notation and verbal explanations.

MATH 1435. Applications of Calculus I **3 Credits (3)**

Intuitive differential calculus with applications to engineering.

Prerequisite(s): C- or better in MATH 1250G.

Learning Outcomes

1. Find limits algebraically and graphically, and use limits to analyze continuity.
2. Find the derivative of a function by applying appropriate techniques (limit of the difference quotient, general derivative rules, product rule, quotient rule, chain rule, and higher order derivatives).
3. Learn derivative rules for polynomial, exponential, logarithmic, trigonometric and inverse trigonometric functions.
4. Perform implicit differentiation. Use implicit differentiation to solve related rate application problems.
5. Find the maxima, minima, points of inflections, and determine concavity of a function by applying the first and second derivatives. Use these results to sketch graphs of functions and to solve optimization problems in context.
6. Find partial derivatives and find maxima, minima in three dimensions.
7. Find the linear approximation of a function.
8. Find Maclaurin and Taylor series.
9. Find limits via L'Hospital's rule. 1
10. Communicate mathematical information using proper notation and verbal explanations.

MATH 1440. Applications of Calculus II

3 Credits (3)

Topics in this second course of Applications of Calculus include functions of several variables, techniques of integration, an introduction to basic differential equations, and other applications.

Prerequisites: C or better in MATH 1435 or in MATH 1521G, or in MATH 1521H.

Learning Outcomes

1. Find definite and indefinite integrals using integration by parts, integral tables, and numerical integration.
2. Analyze multivariable functions using partial derivatives and double integrals, and apply these techniques to applications such as optimization, least squares, and volumes.
3. Solve differential equations graphically, numerically, and algebraically using separation of variables, and apply differential equations in context.
4. Apply differentiation and integration to other areas, for example to Taylor polynomials and Taylor series, probability, trigonometric functions, etc.

MATH 1511G. Calculus and Analytic Geometry I

4 Credits (4)

Limits and continuity, theory and computation of derivatives, applications of derivatives, extreme values, critical points, derivative tests, L'Hopital's Rule. May be repeated up to 4 credits.

Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1250G.

Learning Outcomes

1. The goals are to present the concepts of calculus, stressing techniques, applications, and problem solving, and emphasizing numerical aspects such as approximations and order of magnitude.
2. Overall, the goals are to illustrate the power of calculus as a tool for modeling situations arising in physics, science, engineering and other fields.

3. In fulfillment of these goals, this and later courses will stress topics such as polynomial approximation, setting up integrals, as well as the use of appropriate technology.

MATH 1521G. Calculus and Analytic Geometry II

4 Credits (4)

Riemann sums, the definite integral, antiderivatives, fundamental theorems, techniques of integration, applications of integrals, improper integrals, Taylor polynomials, sequences and series, power series and Taylor series. May be repeated up to 4 credits.

Prerequisite: C- or better in MATH 1511G.

Learning Outcomes

1. Recognize the interplay between Riemann sums and definite integrals
2. Use the Fundamental Theorem of Calculus to compute definite and indefinite integrals
3. Demonstrate an understand of the relationship between the derivative and the definite integral
4. Evaluate integrals numerically using standard rules (midpoint, trapezoid, Simpson's)
5. Evaluate integrals analytically using standard methods (substitution, integration by parts, trigonometric substitution and identities, inverse functions and partial fractions
6. Use integration to solve problems in geometry, physics, science, engineering and other fields
7. Use appropriate methods such as L'Hopital's Rule to evaluate improper integrals
8. Approximate functions using Taylor polynomials
9. Apply standard tests to determine convergence or divergence of sequences and series 1
10. Find a power series representation for a function and determine where it converges 1
11. Identify and evaluate first order differential equations

MATH 1511H. Calculus and Analytic Geometry I Honors

4 Credits (4)

Limits and continuity, theory and computation of derivatives, applications of derivatives, extreme values, critical points, derivative tests, L'Hopital's Rule. This is an Honors version of MATH 1511G. It is taught with MATH 1511G with differentiated assignments.

Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1250G or higher.

Learning Outcomes

1. The goals are to present the concepts of calculus, stressing techniques, applications, and problem solving, and emphasizing numerical aspects such as approximations and order of magnitude.
2. Overall, the goals are to illustrate the power of calculus as a tool for modeling situations arising in physics, science, engineering and other fields.
3. In fulfillment of these goals, this and later courses will stress topics such as polynomial approximation, setting up integrals, as well as the use of appropriate technology.
4. Gain a deeper understanding of the mathematics behind Limits and Derivatives and be able to use mathematical ideas (such as the Intermediate Value Theorem, the Mean Value Theorem, and the Extreme Value Theorem) in applied contexts.

MATH 1521H. Calculus and Analytic Geometry II Honors

4 Credits (4)

A more advanced treatment of the material of MATH 1521G with additional topics. Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes

1. Recognize the interplay between Riemann sums and definite integrals.
2. Use the Fundamental Theorem of Calculus to compute definite and indefinite integrals.
3. Demonstrate an understand of the relationship between the derivative and the definite integral.
4. Evaluate integrals numerically using standard rules (midpoint, trapezoid, Simpson's).
5. Evaluate integrals analytically using standard methods (substitution, integration by parts, trigonometric substitution and identities, inverse functions and partial fractions.
6. Use integration to solve problems in geometry, physics, science, engineering and other fields.
7. Use appropriate methods such as L'Hopital's Rule to evaluate improper integrals.
8. Approximate functions using Taylor polynomials.
9. Apply standard tests to determine convergence or divergence of sequences and series. 1
10. Find a power series representation for a function and determine where it converges. 1
11. Identify and evaluate first order differential equations.

MATH 1531. Introduction to Higher Mathematics

3 Credits (3)

Logic; sets, relations, and functions; introduction to mathematical proofs.

Prerequisite(s): C- or better in MATH 1521G or MATH 1521H.

Learning Outcomes

1. The primary objective of this course is to serve as a bridge between the calculus courses you have taken, where the focus is on computations and solving problems, to more abstract mathematics courses.
2. In particular, we will discuss logical reasoning, definitions, proofs, and certain basic building blocks such as sets, functions, and relations.
3. By the end of the course, you should be able to understand and construct well-written proofs of basic mathematical arguments involving simple properties of the real numbers, integers, sets, functions, and relations using universal and existential quantifiers, absolute values and inequalities, modular arithmetic, and proof by induction.

MATH 1531H. Introduction to Higher Mathematics Honors

3 Credits (3)

Logic; sets, relations, and functions; introduction to mathematical proofs.

A more advanced treatment of the material of MATH 1531 with additional topics and/or assignments. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite: C- or better in MATH 1521G or MATH 1521H.

Learning Outcomes

1. The primary objective of this course is to serve as a bridge between the calculus courses you have taken, where the focus is on computations and solving problems, to more abstract mathematics courses.
2. In particular, we will discuss logical reasoning, definitions, proofs, and certain basic building blocks such as sets, functions, and relations.
3. By the end of the course, you should be able to understand and construct well-written proofs of basic mathematical arguments

involving simple properties of the real numbers, integers, sets, functions, and relations using universal and existential quantifiers, absolute values and inequalities, modular arithmetic, and proof by induction.

4. Since this is an honors course, you should be able to understand higher-level properties of the mathematical objects and ideas arising in the class. You should also be able to write, edit, revise, and ultimately construct well-written proofs and mathematical arguments.

MATH 1996. Topics in Mathematics

1-3 Credits

Topics to be announced in the Schedule of Classes. Maximum of 3 credits per semester. Total credit not to exceed 6 credits. Community Colleges only.

Prerequisite: consent of instructor.

Learning Outcomes

1. Varies

MATH 2134G. Fundamentals of Elementary Math II

3 Credits (3)

Geometry and measurement. Multiple approaches to solving problems and understanding concepts in geometry. Analyzing and constructing two- and three-dimensional shapes. Measurable attributes, including angle, length, area, and volume. Understanding and applying units and unit conversions. Transformations, congruence, and symmetry. Scale factor and similarity. Coordinate geometry and connections with algebra. Reasoning and communicating about geometric concepts. Taught primarily through student activities and investigations. May be repeated up to 3 credits.

Prerequisite: C- or better in MATH 1134.

Learning Outcomes

1. The primary objectives are mathematical: to understand some of the basic concepts of geometry, and measurement with an appropriate level of rigor; to appreciate the historical, cultural and educational contributions and potential applications in real life situations; and to gain problem solving skills using these concepts.
2. The secondary goal is to appreciate the importance of this material in the elementary school curriculum.

MATH 2350G. Statistical Methods

3 Credits (3)

Exploratory data analysis. Introduction to probability, random variables and probability distributions. Concepts of Central Limit Theorem and Sampling Distributions such as sample mean and sample proportion. Estimation and hypothesis testing single population parameter for means and proportions and difference of two population parameters for means and proportions. Analysis categorical data for goodness of fit. Fitting simple linear regression model and inference for regression parameters. Analysis of variance for several population means. Techniques in data analysis using statistical packages. May be repeated up to 3 credits.

Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215 or higher.

Learning Outcomes

1. Summarize Data through graphs and Descriptive statistics: Define qualitative and quantitative data; Provide examples of a population, a sample, independent and dependent variables, parameters and statistics; Construct and interpret histograms, stem plots, bar charts, and boxplot; Summarize distributions with numerical measures such as mean, median, standard deviation, percentiles, interquartile range.

2. Present the concepts of probability: Explain related to probability axioms (e.g. mutually exclusive events and independent events); Apply applications of probability rules; Apply Conditional probability and Bayes Rule.
3. Distinguish between discrete and continuous random variables: Calculate probabilities using Binomial and Poisson distributions; Calculate probabilities using the standard normal distribution by finding the area underneath the curve.
4. Explain the Central Limit Theorem: Introduce the concept of a sampling distribution; Discuss the distribution of the sample mean and sample proportion under repeated sampling; Generate and interpret a sampling distribution using repeated sampling; Determine if the Binomial and Poisson distribution can be approximated with the normal distribution.
5. Estimate a population parameter: Determine confidence interval for population mean, proportion, difference of means, and difference of proportions; Interpret the confidence interval and margin of error; Explain the dependence of margin of error on sample size and confidence level.
6. Perform hypothesis tests for population parameters (population mean, proportion, difference of means, and difference of proportions); Describe the logic and framework of the inference of hypothesis testing; Make a decision using a p-value and draw an appropriate conclusion; Distinguish between Type I and Type II errors; Explain power of the test.
7. Perform Hypothesis Tests for Categorical data: Determine and analyze Chi-square test for Independence; Determine and analyze Chi-square test for Goodness of fit.
8. Analyze data using regression and correlation: Construct scatterplots and analyze the scatter plots; Calculate the linear correlation coefficient and determine whether a linear relationship exists between two variables; Fit the least-squares regression line between two variables; Predict the response variable from the regression line; Apply statistical inference to regression parameters.
9. Perform analysis of variance: State hypotheses for the test of several population means; Construct the AVOVA Table; Explain the significance of multiple comparisons. 1
10. Demonstrate the appropriate use of technology (e.g., Excel, an appropriate graphing calculator or other software (Minitab, SAS)

MATH 2415. Introduction to Linear Algebra

3 Credits (3)

Systems of equations, matrices, vector spaces and linear transformations. Applications to computer science.

Prerequisite(s): Grade of C- or better in MATH 1521G or MATH 1521H.

Learning Outcomes

1. Use row reduction and echelon forms of a matrix to solve linear systems of equations.
2. Use matrix operations, inverse matrices, and matrix factorizations to solve matrix equations.
3. Study the properties of vector spaces and subspaces (e.g., the null and column spaces of a matrix); linear transformations, isomorphisms and kernels; linear independence, bases, and dimension.
4. Apply appropriate matrix manipulations to perform a change of basis.
5. Understand determinants and their properties.
6. Find eigenvalues and eigenvectors and use them to diagonalize matrices.

7. Understand inner product spaces and apply them to real-world problems.

MATH 2530G. Calculus III

3 Credits (3)

Continuation of Calculus II including multivariate and vector calculus, level curves and surfaces, partial derivatives, gradient, directional derivatives, tangent planes, optimization, multiple integrals in Cartesian, cylindrical and spherical coordinate systems. May be repeated up to 3 credits.

Prerequisite: Grade of C- or better in MATH 1521G or MATH 1521H.

Learning Outcomes

1. Use vector notation correctly.
2. Perform vector operations, including dot product, cross product, differentiation and integration, and demonstrate their geometric interpretations.
3. Perform operations on vector valued functions and functions of a parameter.
4. Identify and graph the equations of cylinders and quadratic surfaces in 3-dimensional space.
5. Determine the domain of continuity of a vector valued function and of a function of multiple variables.
6. Compute partial derivatives, generally and at a point, and sketch their graphical representation on a surface in space.
7. Recognize when the chain rule is needed when differentiating functions of multiple variables, parametric equations and vector valued functions, and be able to use the chain rule in these situations.
8. Compute curvature of a parameterized vector representation of a curve in 2- and 3-dimensional space and be able to explain its meaning.
9. Compute the unit tangent and unit normal vectors to a curve and be able to sketch them with the curve. 1
10. Computationally move among position vector, velocity vector, speed, and acceleration vectors; recognize and demonstrate their use as applied to motion in space. 1
11. Determine the equation of the tangent plane to a surface at a point. 1
12. Use the tangent plane to a surface to approximate values on the surface and estimate error in approximation using differentials 1
13. Compute directional derivatives and represent them graphically relative to the inherent surface. 1
14. Compute the gradient vector; represent it graphically relative to the inherent surface and use it to maximize or minimize rate of change of the function. 1
15. Locate local and global maxima and minima of a function. 1
16. Use Lagrange multipliers to maximize output with one or two constraints. 1
17. Compute arc length and be able to explain its derivation as a limit. 1
18. Calculate double and triple integrals independently and with their geometric representations as surfaces, areas and volumes. 1
19. Calculate iterated integrals in polar, cylindrical and spherical coordinate systems.

MATH 2992. Directed Study

1-3 Credits

May be repeated for a maximum of 6 credits. Graded S/U.

Prerequisite: consent of the instructor.

Learning Outcomes

1. Varies

MATH 3110. Introduction to Modern Algebra**3 Credits (3)**

Elements of abstract algebra, including groups, rings and fields. May be repeated up to 3 credits.

Prerequisite: C or better in MATH 1531 and MATH 2415.

MATH 3120. Introduction to Analysis**3 Credits (3)**

Development of the real numbers, a rigorous treatment of sequences, limits, continuity, differentiation, and integration. May be repeated up to 3 credits.

Prerequisite: C- or better in MATH 1531.

Learning Outcomes

1. Understand the Axiom of Completeness and be able to work with suprema and infima.
2. Know the basic definitions of sequences and be able to understand and construct rigorous epsilon-N proofs.
3. Understand the properties of convergent sequences and be able to construct related proofs.
4. Know the basic definitions of limits and be able to understand and construct epsilon-delta proofs.
5. Be familiar with the basic properties and topology of the reals.

MATH 3130. Introduction to Geometry**3 Credits (3)**

Building on ideas from high school geometry, an introduction to the axiomatic method, transformation groups, and non-Euclidean geometry.

Prerequisite: C- or better in MATH 1531 and MATH 2415.

Learning Outcomes

1. Demonstrate the ability to make conjectures in geometry, refine conjectures, and prove or refute conjectures.
2. Understand how transformations of the plane can be used to define and apply the concepts of congruence and similarity in Euclidean geometry.
3. Solve problems in geometry using different approaches (axioms, coordinates, transformations), and explain how the different approaches are related.
4. Compare the definitions and theorems of Euclidean geometry with the corresponding definitions and theorems in non-Euclidean geometry.

MATH 3140. Introduction to Numerical Methods**3 Credits (3)**

Basic numerical methods for interpolation, approximation, locating zeros of functions and integration; numerical linear algebra. Computer-oriented methods will be emphasized. Student must also have some programming experience in order to enroll.

Prerequisite: C- or better in one of MATH 2415, M E 228, or E E 200.

Learning Outcomes

1. Understand the limitations, advantages, and disadvantages of common numerical methods and how they are used to obtain approximate solutions.
2. Apply numerical methods to obtain approximate solutions to mathematical problems.
3. Analyze and evaluate the accuracy of common numerical methods.
4. Write efficient, well-documented code to implement numerical methods.

MATH 3160. Introduction to Ordinary Differential Equations**3 Credits (3)**

Introduction to differential equations and dynamical systems with emphasis on modeling and applications. Basic analytic, qualitative and numerical methods. Equilibria and bifurcations. Linear systems with matrix methods, real and complex solutions. May be repeated up to 3 credits.

Prerequisite: C or better in MATH 1521G or MATH 1521H or B or better in MATH 1440.

MATH 3997. Directed Readings**1-3 Credits**

A selection of readings and reports in the mathematical sciences, the breadth and depth of which is deemed to fit the needs of the student. May be repeated up to 3 credits.

Prerequisite: consent of instructor.

MATH 4110V. Great Theorems in Mathematics**3 Credits (3)**

This course examines some significant mathematical achievements from antiquity to the modern era. Evolution of notions and methods in geometry, number theory, algebra, and calculus will be supplemented by cultural and biographical history, placing mathematics in a broad human context.

Prerequisite: Grade of C- or higher in MATH 1531, or grade of B or higher in any upper-division math or stat course, or consent of instructor.

Learning Outcomes

1. At the end of this course, students will be able to: Describe the history of the development of some key mathematical concepts.
2. Describe the connections between mathematical ideas in different historical periods and places.
3. Recognize the role of abstraction and logic in the progress of mathematics.
4. Describe the contribution of mathematics to culture and science in different historical eras.
5. Determine if a mathematical conjecture is correct and provide rigorous written mathematical justification.
6. Provide sound, complete and clear mathematical arguments involving simple calculations, geometric constructions, and/or written mathematical proofs.
7. Communicate mathematical ideas, both written and orally.

MATH 4210. Complex Variables**3 Credits (3)**

A first course in complex function theory, with emphasis on applications. May be repeated up to 3 credits.

Prerequisite: C- or better in MATH 3150 or C- or better in both MATH 3160 and MATH 2530G.

MATH 4220. Fourier Series and Boundary Value Problems**3 Credits (3)**

Fourier series and methods of solution of the boundary value problems of applied mathematics. May be repeated up to 3 credits.

Prerequisite: C- or better in MATH 3160.

MATH 4230. Applied Linear Algebra**3 Credits (3)**

An application-driven course, whose topics may include the four fundamental subspaces, inner products, orthogonality, diagonalization, and complex matrices. Applications may include factorization, least squares, data compression, singular value decomposition, and discrete Fourier transform.

Prerequisite: C- or better in one of MATH 2415, E E 200, or M E 228.

Learning Outcomes

1. Understand higher-level linear algebra concepts for which matrix linear algebra is the basic tool.
2. Understand how to apply higher-level linear algebra concepts to problems that arise in real-world applications.

MATH 4310. Introduction to Topology**3 Credits (3)**

Topological spaces: general spaces and specific examples such as metric spaces, Hausdorff spaces and/or normed vector spaces; separation axioms; continuity, compactness, connectedness; related theorems. Crosslisted with: MATH 5310.

Prerequisite: MATH 3120.

MATH 4320. Logic and Set Theory**3 Credits (3)**

Same as MATH 4320 with additional assignments for graduate students.

MATH 4330. Elementary Number Theory**3 Credits (3)**

Covers primes, congruences and related topics.

Prerequisite: Grade of C or better in MATH 3110 or consent of instructor.

MATH 4340. Abstract Algebra I: Groups and Rings**3 Credits (3)**

Group theory, including cyclic groups, homomorphisms, cosets, quotient groups and Lagrange's theorem. Introduction to rings: ring homomorphisms, ideals, quotient rings, polynomial rings, and principal ideal domains. Taught with MATH 5340.

Prerequisite(s): MATH 3110 or consent of instructor.

MATH 4350. Advanced Linear Algebra**3 Credits (3)**

Rigorous treatment of vector spaces and linear transformations including canonical forms, spectral theory, inner product spaces and related topics.

Prerequisite: grade of C or better in MATH 3110.

MATH 4360. Introduction to Real Analysis I**3 Credits (3)**

Rigorous discussion of the real numbers for topics introduced in calculus: limits and continuity, followed by differentiation, integration, and series of functions.

Prerequisite: Grade of C- or better in MATH 3120 or consent of instructor.

Learning Outcomes

1. Understand two-sided limits, one-sided limits, limits at infinity, continuity and uniform continuity for functions on the real line.
2. Understand derivatives, differentiability theorems, the Mean Value Theorem, Taylor's Theorem, L'Hospital's Rule and the Inverse Function Theorem for functions on the real line.
3. Understand integration on the real line: the Riemann integral, Riemann sums, the Fundamental Theorem of Calculus and improper Riemann integrals.
4. Understand sequences and infinite series of functions, including uniform convergence, limit supremum, limit infimum, power series and analytic functions.

MATH 4365. Introduction to Real Analysis II**3 Credits (3)**

Extension of the ideas of Math 4360 to higher dimensions and more general contexts (metric spaces, differentiability on higher dimensional Euclidean space, integration on higher dimensional Euclidean space).

Prerequisite: C- or better in MATH 4360 or consent of instructor.

Learning Outcomes

1. Understand the algebraic structure, including planes and linear transformations, of Euclidean spaces.
2. Understand the fundamental notions of metric spaces: limits of functions, interior/closure/boundary of sets, compact sets, connected sets, continuous functions and the Stone-Weierstrass Theorem.
3. Understand derivatives, differentials, tangent planes, the Chain Rule, the Mean Value Theorem, Taylor's Formula and the Inverse Function Theorem for functions on n-dimensional Euclidean space.
4. Understand integration on n-dimensional Euclidean space: Jordan regions, Riemann integration on Jordan Regions, iterated integrals and change of variables.

MATH 4991. Undergraduate Research**1-3 Credits**

May be repeated for a maximum of 6 credits. Graded S/U.

MATH 4996. Special Topics**1-3 Credits (1-3)**

Specific subjects to be announced in the Schedule of Classes. May be used to fulfill a course requirement for the mathematics major.

MATH 4997. Directed Reading**1-6 Credits**

May be repeated for a maximum of 6 credits. Graded S/U.

MATH 5110. Fundamentals of Elementary Mathematics I**3 Credits (3+1P)**

Topics from real numbers, geometry, measurement, and algorithms, incorporating calculator technology. Intended for K-8 teachers. As part of course students mentor MATH 1134 undergraduates. Does not fulfill degree requirements for M.S. in mathematics.

MATH 5120. History and Theories of Mathematics Education**3 Credits (3)**

A study of the history of the mathematics taught in American schools, including an examination of authentic original textbooks and the changes in their content and the approach to the subject over time, together with writings of people who have influenced the development and changes of mathematics education. Theories of learning mathematics, and current issues in mathematics education.

Prerequisite(s): Restricted to graduate students.

MATH 5130. Algebra with Connections**3 Credits (3)**

Connections between Algebra and other K-12 curriculum strands, especially Geometry and Probability / Data Analysis. Apply algebraic modeling and reasoning to a variety of mathematical problem solving situations. Does not fulfill requirements for degrees in mathematics.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 5140. From Number to Algebra**3 Credits (3)**

The progression from Number to Algebra in the K-12 curriculum as a concrete-to-abstract progression. Key concepts considered across the grade levels include the different uses of variables, equivalence in different contexts, patterns, and ratios. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 5150. Data Analysis with Applications**3 Credits (3)**

Statistical concepts and terminology in professional uses of data by teachers, such as standardized test score reports and educational research; visual displays of data; measures of variation and central

tendency; consideration of how K-12 topics in Data Analysis are developed from one grade level to the next. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 5160. From Measurement to Geometry

3 Credits (3)

The progression from Measurement to Geometry in the K-12 curriculum as a concrete-to abstract progression. Important concepts such as angle, length, and area progress from concrete, measurable situations to more abstract problems which require reasoning and proof. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 5170. Using Number Throughout the Curriculum

3 Credits (3)

Understand number concepts more deeply by seeing many examples of those concepts applied in other content strands. Develop mathematical knowledge and understanding to build a repertoire of ways for students to practice and review basic number skills and concepts as part of later, more advanced courses. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 5180. Geometry with Connections

3 Credits (3)

Connections between Geometry and other K-12 curriculum strands, especially Algebra and Probability / Data Analysis. Address key attributes of geometric concepts by considering their connections within and across grade levels. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 5210. Complex Variables

3 Credits (3)

Same as MATH 4210 with additional work for graduate students.

MATH 5220. Fourier Series and Boundary Value Problems

3 Credits (3)

Same as MATH 4220 with additional work for graduate students.

MATH 5310. Introduction to Topology

3 Credits (3)

Topological spaces: general spaces and specific examples such as metric spaces, Hausdorff spaces and/or normed vector spaces; separation axioms; continuity, compactness, connectedness; related theorems. Crosslisted with: MATH 4310.

MATH 5320. Logic and Set Theory

3 Credits (3)

Same as MATH 4320 with additional assignments for graduate students.

MATH 5330. Elementary Number Theory

3 Credits (3)

Same as MATH 4320 with additional assignments for graduate students.

MATH 5340. Abstract Algebra I: Groups and Rings

3 Credits (3)

Same as MATH 4340 with additional work for graduate students. Taught with MATH 4340.

Prerequisite: MATH 5350 or consent of instructor.

MATH 5350. Advanced Linear Algebra

3 Credits (3)

Same as MATH 4350 with additional work for graduate students.

MATH 5360. Introduction to Real Analysis I

3 Credits (3)

Same as MATH 4360 with additional work for graduate students.

Learning Outcomes

1. Understand two-sided limits, one-sided limits, limits at infinity, continuity and uniform continuity for functions on the real line.
2. Understand derivatives, differentiability theorems, the Mean Value Theorem, Taylor's Theorem, L'hospital's Rule and the Inverse Function Theorem for functions on the real line.
3. Understand integration on the real line: the Riemann integral, Riemann sums, the Fundamental Theorem of Calculus and improper Riemann integrals.
4. Understand sequences and infinite series of functions, including uniform convergence, limit supremum, limit infimum, power series and analytic functions.

MATH 5365. Introduction to Real Analysis II

3 Credits (3)

Same as MATH 4365 with additional work for graduate students.

Learning Outcomes

1. Understand the algebraic structure, including planes and linear transformations, of Euclidean spaces.
2. Understand the fundamental notions of metric spaces: limits of functions, interior/closure/boundary of sets, compact sets, connected sets, continuous functions and the Stone-Weierstrass Theorem.
3. Understand derivatives, differentials, tangent planes, the Chain Rule, the Mean Value Theorem, Taylor's Formula and the Inverse Function Theorem for functions on n-dimensional Euclidean space.
4. Understand integration on n-dimensional Euclidean space: Jordan regions, Riemann integration on Jordan Regions, iterated integrals and change of variables.

MATH 5410. Complex Analysis

3 Credits (3)

MATH 5420. Topology I

3 Credits (3)

Connectedness and compactness of topological spaces, introduction to the quotient topology, elementary homotopy theory, the fundamental group, the Seifert-van Kampen theorem.

Prerequisite(s): MATH 5350 and MATH 5365, or consent of instructor.

MATH 5428. Topics in Topology

3 Credits

Topics in modern topology. The material covered will reflect current research topics in the field and may vary each time the course is offered. To be taken up to 3 times. May be repeated up to 9 credits.

Learning Outcomes

1. Gain knowledge of advanced methods in the area of topology.
2. Develop potential to explore literature in the area of topology.
3. Develop potential to conduct supervised research in the area of topology.

MATH 5430. Mathematical Structures in Logic

3 Credits (3)

Lattices, distributive lattices, Boolean algebras, Heyting algebras. Lindenbaum-Tarski algebras of classical and intuitionistic logics. Representation theorems. Modal logics and their algebraic counterparts. Kripke semantics. Goedel translation.

Prerequisite: MATH 5320.

MATH 5435. Universal Algebra and Model Theory

3 Credits (3)

Universal algebra, homomorphisms, subalgebras, products, congruences. Varieties and class operators. Free algebras and Birkhoff's theorem.

Ultraproducts and Los's theorem. Congruence distributive varieties and Jonsson's theorem. Universal classes and quasi-varieties.

Prerequisite: MATH 5320.

MATH 5438. Topics in Foundations

3 Credits

Topics in modern foundations. The material covered will reflect current research topics in the field and may vary each time the course is offered.

To be taken up to 3 times. May be repeated up to 9 credits.

Learning Outcomes

1. Gain knowledge of advanced methods in the area of foundations.
2. Develop potential to explore literature in the area of foundations.
3. Develop potential to conduct supervised research in the area of foundations.

MATH 5440. Partial Differential Equations I

3 Credits (3)

The basic equations of mathematical physics. Laplace, Heat and Wave Equations. The method of characteristics, introduction to conservation laws, special solutions.

Prerequisite(s): MATH 5220 and MATH 5365 or consent of instructor.

MATH 5445. Partial Differential Equations II

3 Credits (3)

Sobolev spaces theory: basic definitions and properties, embedding theorems, weak solutions of boundary value problems and variational methods for partial differential equations.

Prerequisite(s): MATH 5460 or consent of instructor.

MATH 5450. Abstract Algebra II: Fields, Rings and Modules

3 Credits (3)

Topics covered include field extensions; algebraic closure; polynomials rings; irreducibility criteria; Noetherian rings; algebraic sets; Nullstellensatz; modules; applications to linear algebra.

Prerequisite(s): MATH 5340 or consent of instructor.

MATH 5453. Module Theory and Homological Algebra

3 Credits (3)

Introductory concepts of homological algebra, including projective, injective and flat modules; projective and injective resolutions; exactness of functors; homology of chain complexes; derived functors.

Prerequisite(s): MATH 5450 or consent of instructor.

MATH 5455. Introduction to Commutative Algebra and Algebraic Geometry

3 Credits (3)

Introduction to the basic notions and techniques of modern algebraic geometry, including the necessary commutative algebra foundation. Topics likely to include algebraic and projective varieties, Nullstellensatz, morphisms, rational and regular functions, local properties. Other topics may include Noether normalization, dimension theory, singularities, sheaves, schemes, Grobner bases.

Prerequisite(s): MATH 5450 or consent of instructor.

MATH 5458. Topics in Algebra

3 Credits

Topics in modern algebra. The material covered will reflect current research topics in the field and may vary each time the course is offered.

To be taken up to 3 times. May be repeated up to 9 credits.

Learning Outcomes

1. Gain knowledge of advanced methods in the area of algebra.
2. Develop potential to explore literature in the area of algebra.
3. Develop potential to conduct supervised research in the area of algebra.

MATH 5460. Measure and Integration

3 Credits (3)

Measure spaces, measurable functions, extension and decomposition theorems for measures, integration on measure spaces, absolute continuity, iterated integrals.

Prerequisite: MATH 5365 or consent of instructor.

MATH 5463. Real Analysis

3 Credits (3)

Differentiation, L_p spaces, Banach spaces, measure and topology, other selected topics.

Prerequisite: MATH 5460.

MATH 5465. Introduction to Functional Analysis

3 Credits (3)

Banach spaces. The three basic principles: uniform boundedness principle, closed graph/open mapping theorems, Hahn-Banach theorem.

Prerequisite(s): MATH 5463, or consent of instructor.

MATH 5468. Topics in Analysis

3 Credits

Topics in modern analysis. The material covered will reflect current research topics in the field and may vary each time the course is offered. To be taken up to 3 times. May be repeated up to 9 credits.

Learning Outcomes

1. Gain knowledge of advanced methods in the area of analysis.
2. Develop potential to explore literature in the area of analysis.
3. Develop potential to conduct supervised research in the area of analysis.

MATH 5996. Special Topics

1-3 Credits

Specific subjects to be announced in the Schedule of Classes. May be for unlimited credit with approval of the department.

MATH 5997. Directed Reading

1-6 Credits

May be repeated for a maximum of 6 credits. Consent of instructor required. Graded: S/U.

MATH 5999. Master's Thesis

1-15 Credits

Thesis.

MATH 6991. Doctoral Research

1-15 Credits

Research.

MATH 6996. Special Topics

1-15 Credits

Selected topics.

MATH 7000. Doctoral Dissertation

1-15 Credits

Dissertation.

MGMT-MANAGEMENT

MGMT 2110. Principles of Management

3 Credits (3)

An introduction to the basic theory of management including the functions of planning, organizing, staffing, leading, and controlling; while considering management's ethical and social responsibilities.

Learning Outcomes

1. Explain the major functions of management including planning, organizing, communications, controlling, motivating, leading, and staffing.

2. Recognize major developments in the history of management thought.
3. Describe the basic managerial processes including decision-making and other key skills necessary for managers to perform their roles.
4. Identify an organization's stakeholders and the importance of social and ethical responsibility of managers.
5. Explain the formulation and implementation of strategic planning, including the relationship between goals, plans, vision statements, and mission statements.
6. Describe the strategies managers use to help organizations adapt to changing internal and external environments.
7. Explain organizational change, forces for change, sources of resistance to change, and the techniques managers can use to implement and facilitate change.

MGMT 309. Human Behavior in Organizations**3 Credits (3)**

Interpersonal and organizational behavior, motivation, communication, team building, leadership, diversity management, legal and ethical issues, and politics in organizations. Credit may not be earned for both MGMT 309 and MGMT 315V.

MGMT 310V. Entrepreneurial Mindset**3 Credits (3)**

This course provides the opportunity to learn to think like an entrepreneur in the broader context of social entrepreneurship, intrapreneurship, creative problem solving, opportunity recognition, and innovation.

MGMT 332. Human Resources Management**3 Credits (3)**

Survey course in human resources management. Includes recruitment, selection, equal employment opportunity, performance appraisal, training, compensation, safety, and union-management relations.

MGMT 333. Training and Development**3 Credits (3)**

Training and development of human resources, including training needs assessment, training approaches and techniques, and evaluation of training effectiveness.

MGMT 335V. Business and Government**3 Credits (3)**

Crosslisted with: ECON 335G

MGMT 344. Production and Operations Management**3 Credits (3)**

Management of physical and human resources; management information systems in operations; applications in various organizations.

Prerequisite: MATH 1350G or A ST 311; and BCIS 338 or BCIS 350.

MGMT 345V. Quality and Competitiveness: An International Perspective**3 Credits (3)**

Quality management and competitiveness are studied in manufacturing, services, and the public sector with an international perspective.

Topics include: global history of quality, foreign competition and its impact on quality and productivity, quality management and continuous improvement, international operations management, quality assessment, and a review of the emergence of quality and competitiveness in government, education and health care. May be repeated up to 3 credits.

Learning Outcomes

1. Developing critical thinking skills through challenging material and assignments.
2. Foster intelligent inquiry through assignments, participative lectures, team projects.

3. Develop an integration and synthesis of knowledge through applications to case studies and individual assignments.
4. Promote a breadth of knowledge on international developments in quality and competitiveness with a holistic view of quality and its impact on businesses, organizations, nations and individuals.

MGMT 347. Management Functions and Processes**3 Credits (3)**

Planning, organizing, directing, and controlling operating units in an organization. Applications to a variety of types of organizations.

MGMT 351. Supply Chain Management**3 Credits (3)**

Acquisition and control and delivery of materials, parts, equipment, and services for end use in the organization. Applications to service and manufacturing industries, nonprofit, and governmental institutions.

MGMT 361. Small Business Management**3 Credits (3)**

Principles and practice of managing a small enterprise with emphasis on growth and performance.

MGMT 388V. Leadership and Ethics**3 Credits (3)**

Exploration of the multifaceted nature of leadership and principal-based ethics in modern society through readings and seminar discussion. May be repeated up to 3 credits.

MGMT 391. Management Internship and Cooperative Education I**1-3 Credits**

Application of management skills to the work environment. Open only to students majoring or minoring in management. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not by the work experience. May be repeated for a maximum of 3 credits. Restricted to majors and minors.

Prerequisites: MGMT 309 and consent of instructor.

MGMT 448. Small Business Consulting**3 Credits (3)**

Study analysis and presentation of recommendations for solving significant problems confronting small businesses.

Prerequisite(s): Senior standing or consent of instructor.

MGMT 449. Strategic Management**3 Credits (3)**

Integrative approach to envisioning the future and shaping strategies for business success.

Prerequisite(s): BCIS 338 or BCIS 350; BLAW 316; BFIN 341; MGMT 309; MKTG 303; and one of the following: MGMT 344 or MGMT 470 or BCIS 485.

MGMT 451. Selection, Placement, and Performance Evaluation**3 Credits (3)**

Staffing processes for organizations and the evaluation of employee performance. Use of selection methods and measurement of work behavior.

MGMT 458. Comparative International Management**3 Credits (3)**

Cultural influences on management are examined in a global business environment with a particular emphasis on human behavior in multinational organizations and the management of human resources. Same as I B 458.

MGMT 460. Compensation Management**3 Credits (3)**

An overview of wage and salary administration, including job evaluation, wage and salary surveys, program administration, legal aspects of pay systems, and benefits administration.

Prerequisite(s): MGMT 332 or consent of instructor.

MGMT 461. Seminar in Entrepreneurship

3 Credits (3)

For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Crosslisted with: MKTG 461.

Prerequisite(s): Senior standing or consent of instructor.

MGMT 465. Contemporary Issues in Human Resources Management

3 Credits (3)

Integrative course in human resources management, emphasizing the application of advanced concepts to complex personnel cases.

Prerequisite: MGMT 332.

MGMT 470. Project Management in Organizations

3 Credits (3)

Roles, responsibilities, and techniques of project managers in managing projects effectively. Preparation for professional certification.

MGMT 490. Selected Topics

1-18 Credits (1-18)

Seminars in selected current topics in the various areas of management and administration. Prerequisites vary according to the seminar being offered.

MGMT 491. Management Internship and Cooperative Education II

1-3 Credits

Covers the application of management skills to the work environment. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not be the work experience. May be repeated for a maximum of 3 credits. Restricted to majors and minors.

Prerequisite: MGMT 309 and consent of instructor.

MGMT 498. Independent Study

1-3 Credits

Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.

Prerequisites: junior or above standing and consent of instructor.

MGMT 502. Operations Management

3 Credits (3)

Systems and specialized models applied to the management of production facilities and service operations, including physical and human resources.

Prerequisite(s): Graduate students only.

MGMT 503. Organizational Behavior and Management Processes

3 Credits (3)

Covers the theory and practice related to the successful management of human resources in organizations operating within a dynamic global environment. Course goals include developing alternative frameworks for analyzing issues related to human behavior, management science, and organizational structure and theory.

Prerequisite: graduate students only.

MGMT 512. Quantitative Analysis for Business Decisions

3 Credits (3)

Identification, collection, and analysis of an organization's data both internal and external, and use of the resultant information in managerial decision making.

Prerequisite: graduate students only.

MGMT 548. Small Business Consulting

3 Credits (3)

Study, analysis, and presentation of recommendations for solving significant problems confronting small businesses. Same as MGMT 448 with differentiated assignments for graduate students.

Prerequisite(s): Graduate standing.

MGMT 590. Strategic Management

3 Credits (3)

Covers the integration of functional, human, technological, and environmental aspects of business within the framework of management policy and strategy formulation. Formulate, implement, evaluate and control the various functions of the organization from a systems perspective. Understand the external environment and its impact on the organization. Restricted to majors.

Prerequisite: M.B.A. student in his or her final semester.

MGMT 591. Seminar in Entrepreneurship

3 Credits (3)

For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Same as MGT 461 with differentiated assignments for graduate students. Crosslisted with: MKTG 591.

Prerequisite(s): Graduate standing.

MGMT 598. Special Research Programs

1-3 Credits

Individual investigations either analytical or experimental. A maximum of 6 credits may be earned.

Prerequisite: consent of instructor.

MGMT 600. Doctoral Research

1-15 Credits (1-15)

This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination. Restricted to management majors. May be repeated up to 88 credits.

MGMT 601. Research in Management

1 Credit (1)

Ph.D. course provides opportunities for significant interaction between Management faculty and Management Ph.D. students. The course also provides opportunities for development of professional scholarly standards, ethics, and critiques, as well as insight into current research areas and topics supported by the Management Department and other relevant disciplinary areas. May be repeated for a maximum of 6 credits. Restricted to Ph.D. students. Graded S/U.

MGMT 645. Seminar in Human Resources Management

3 Credits (3)

Seminar will address current issues in human resources management. Focus on research related to the selection, development, and effective use of human resources. Restricted to doctoral students. May be repeated up to 3 credits.

MGMT 650. Seminar in Organizational Behavior

3 Credits (3)

Seminar will include specific organizational behavior topics; motivation, leadership, group and inter-group relations, and attitude theory. Focus on current research and theory. Restricted to doctoral students. May be repeated up to 3 credits.

Learning Outcomes

1. Varies

MGMT 655. Seminar in Organizational Systems and Theory

3 Credits (3)

Analysis of organizations from a macro perspective. Topics include organizational theory, organizational design, organizational environment,

and sociotechnical systems. Restricted to doctoral students. May be repeated up to 3 credits.

MGMT 660. Research Design and Methodology

3 Credits (3)

Topics will include philosophy of science, theory building, and research methods applicable to the study of organizational behavior. Restricted to doctoral students. May be repeated up to 3 credits.

Learning Outcomes

1. Varies

MGMT 661. Qualitative Research Methods

3 Credits (3)

In-depth coverage of selected topics in research methodology, including theory and logic of scientific investigation, grounded theory, action research, and ethnomethodology. Restricted to doctoral students. May be repeated up to 3 credits.

MGMT 670. Seminar in Operations Management

3 Credits (3)

Seminar examines the major problem areas, research findings, and research methodologies of operations management. Focus on the critical evaluation of current theory and methodology. Restricted to Doctoral students. May be repeated up to 3 credits.

MGMT 675. Seminar in Strategic Management

3 Credits (3)

Survey of current and classical readings in strategy. Introduces the doctoral level student to strategic issues, strategic topics for research, and publication venues. Restricted to doctoral students. May be repeated up to 3 credits.

MGMT 685. Story Consulting to Organizations

3 Credits (3)

Apply various qualitative story and narrative research methods (plot analysis, script analysis, life history, and restoring) to action research consulting project. Students will conduct story assessment and (propose or enact)intervention with a local consenting organization. Restricted to doctoral students.

MGMT 690. Special Topics

3 Credits (3)

Seminars in selected current topics in the various areas of management. May be repeated for unlimited credit. Restricted to doctoral students.

Prerequisite(s): Vary according to seminar being offered.

MGMT 698. Special Topics

1-3 Credits

Prerequisite: consent of instructor.

MGMT 700. Doctoral Dissertation

1-15 Credits (1-15)

May be repeated up to 88 credits.

Prerequisite: advancement to candidacy.

MKTG-MARKETING

MKTG 1210. Advertising

3 Credits (3)

A survey of currently available advertising media. A psychological approach to consumer persuasion; applied techniques in media selection, layout mechanics, production methods, and campaign structures.

Prerequisite: MKTG 2110.

Learning Outcomes

1. Define advertising and the relevant application of psychology in delivering the message.

2. Explain the importance of various advertising media in the marketing mix.
3. Identify and explain the social, ethical and legal issues advertisers must consider.
4. Describe the significance of the marketing function in business.
5. Explain the importance of advertising and other marketing communication tools.
6. Demonstrate application of the planning process as it applies to marketing and advertising.
7. Describe the factors that are weighted when considering the use of radio and television in the creative advertising mix.
8. Describe the relationship between market segment, consumer behavior and selection of advertising campaign types.
9. List the alternative means of reaching a target market and the technical challenges of each.

MKTG 1220. Small Business Marketing

3 Credits (3)

An overview of public relations principles, practices and purposes as applied to small business. Topics include basics of news release writing, media awareness, development and maintenance of a positive public image, branding, ethical marketing, and the relationships of public relations with advertising and marketing. Methods and practices used in small business are explored.

Prerequisite: MKTG 2110.

Learning Outcomes

1. Explain the importance of creating and sustaining a positive public awareness and image.
2. Identify public relations practices as they relate to the management and marketing processes.
3. Define branding and discuss its importance for small business.
4. Describe the value of business event management and promotion for small business.
5. Discuss how media relations, public relations, advertising and marketing efforts are interrelated and the importance of each.

MKTG 180. Level 1, PGA's PGM Education Program (Part 1)

3 Credits (3)

Level 1 Part 1 of the PGA PGM Education Program. Introduction to the Policies and Procedures of the PGA Golf Mgt. Program and the PGA of America. Students will complete the PGA Qualifying Level, Facility Management 1A (Tournament Ops A, Rules of Golf B, and Career Enhancement B), and the corresponding Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

MKTG 181. Level 1, PGA's PGM Education Program (Part 2)

3 Credits (3)

Level 1 Part 2 of the PGA PGM Education Program. This class will focus on Teaching and Coaching 1, the corresponding PGA Work Experience Activities, and PGA Teaching Seminars. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

Learning Outcomes

1. Know how students learn and process golf knowledge and skills, and identify the implications for teaching
2. Know how to define and distinguish between learning and performance
3. Understand how juniors learn golf knowledge and skills, and identify implications for teaching

4. Conduct a physical evaluation of a junior golfer and create developmentally appropriate exercise and training programs
5. Establish student/teacher relationships that promote greater student learning and enjoyment
6. Develop a communication style that fits the student and increases instructional effectiveness
7. Analyze student's instructional needs and set clear, purposeful learning and practice goals
8. Know the format for an effective golf lesson
9. Deliver effective explanations and demonstrations during a golf lesson 1
10. Engage in self-assessment of teaching skills and competencies 1
11. Recognize the appropriate clubhead path and clubface position information to improve a golfer's performance 1
12. Conduct appropriate assessments to determine the short game skill level of the golfer 1
13. Gain understanding of the short game elements to help lower scores and improve the player 1
14. Define club performance terms and specifications, including lie angle and clubface angle or position, and describe their effect on ball flight and player performance: Define what information is required to properly assess a player's golf equipment 1
15. Define club performance terms and specifications, including lie angle and clubface angle or position, and describe their effect on ball flight and player performance: Observe a player's swinging motion, ball flight, and equipment to evaluate the effectiveness of their equipment

MKTG 2110. Principles of Marketing

3 Credits (3)

Survey of modern marketing concepts and practices focusing on the marketing mix: product, pricing, promotion, and distribution strategies. Topics include: the marketing environment, consumer behavior, marketing research, target marketing, and the ethical and social responsibilities of marketers. May be repeated up to 6 credits.

Prerequisite: BUSA 1110.

Learning Outcomes

1. Describe the professional, ethical, and social responsibilities of marketers.
2. Explain the role of the product in the marketing mix, including the product life cycle, the relevance of product innovation, and product classifications.
3. Illustrate the role of promotion in the marketing mix, including the communication process and the promotional mix.
4. Explain the role of price in the marketing mix, including pricing objectives, pricing policies, and pricing methods.
5. Describe the operation of channels of distribution and supply chains, including functions of intermediaries and degrees of coverage.
6. Define the concepts of target markets and market segmentation with respect to elements of the marketing mix.
7. Explain the importance of market research and information systems in supporting marketing decision making.
8. Describe the dynamic environment(s) in which marketing decisions must be made.

MKTG 2220. Digital Marketing

3 Credits (3)

This course focuses on planning to create and market a website. Internal marketing topics such as registering with search engines, increasing traffic, segmenting and targeting markets, establishing an online

presence, developing a marketing plan and reshaping business for the Web market are covered.

Prerequisite: MKTG 2110.

Learning Outcomes

1. Describe how search engines work. (Use knowledge to make recommendations to a website on how it can improve its organic search rankings - perform search engine optimization).
2. Describe the various methods of online display advertising.
3. Determine the appropriate key performance indicators (KPIs) for any type of website.
4. Describe and implement best practices in marketing to a database of current and potential customers via email.
5. Utilize knowledge of social media tactics to design an effective social media campaign.
6. Implement online reputation management tactics to improve the online reputation of a brand.
7. Develop and present a digital marketing plan for a small, local business.

MKTG 280. Level 1, PGA's PGM Education Program (Part 3)

3 Credits (3)

Level 1 Part 3 of the PGA PGM Education Program. This class will focus on Facility Management 1B (Business Planning A, Customer Relations A, Golf Car A, Merchandising A, Turfgrass A), Level 1 Checkpoint Exams, and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

MKTG 281. Level 2, PGA's PGM Education Program (Part 1)

3 Credits (3)

Level 2 Part 1 of the PGA PGM Education Program. This class will focus on Teaching and Coaching 2, Teaching and Coaching Seminars, and the corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

Learning Outcomes

1. Explain how students learn golf knowledge and skills, and identify the implications for teaching
2. Explain how students process information when learning golf skills
3. Identify and explain the principles of effective practice
4. Explain how juniors learn golf knowledge and skills, and identify the implications for teaching
5. Structure an effective golf lesson
6. Analyze student's instructional needs and set clear, purposeful learning and practice goals
7. Deliver effective explanations and demonstrations during a golf lesson
8. Engage in self-assessment of teaching skills and competencies
9. Recognize and apply the appropriate clubhead path and clubface position information to improve a golfer's performance 1
10. Conduct appropriate assessments to determine the skill level of the golfer 1
11. Demonstrate basic knowledge of anatomy and physiology, and conduct a physical observation to identify movement capabilities and limitations that may affect a golfer's performance 1
12. Define club performance terms and specifications, and describe their effect on ball flight and player performance

MKTG 303. Principles of Marketing

3 Credits (3)

Process, functions, and principles in the current marketing system.

Learning Outcomes

1. Understand primary and changing perspectives on marketing and strategic management.
2. Understand the fundamental principles and theories of marketing.
3. Develop the capacity to obtain and process relevant information and analytical skills.
4. Evaluate the impact of interactive media on marketing management.
5. Apply relevant marketing concepts and analytical tools, identify viable alternatives, make informed choices, and recommend marketing implementation plans.
6. Develop skills in organizing more effective strategic marketing and in implementing the market planning process.
7. Develop, evaluate, and implement marketing management strategies in complex environments through recent, popular case study analyses.
8. Formulate marketing management strategies on critical issues, problems, and business opportunities.
9. Broaden perspectives of ethics and social responsibility, keep abreast of global developments, and adapt to changing environments.

MKTG 305. Marketing and Food Agricultural Products
3 Credits (3)

This course provides a review of marketing principles and techniques used throughout the food and fiber supply chain. The course introduces a broad variety of marketing topics including marketing strategy, consumer behavior, market segmentation, market research, competitive analysis, and the marketing mix. The course serves as a foundation for advanced courses in agricultural marketing. May be repeated up to 3 credits.

Prerequisite: ECON 1110G or ECON 2120G.

Learning Outcomes

1. Articulate how agricultural commodities move through the food and fiber supply chain.
2. Understand the importance of strategic marketing and how organizations within the food and fiber supply chain identify consumers and their preferences
3. Understand key marketing concepts used by agribusiness marketers, including SWOT analysis, the marketing mix, advertising and public relations
4. Know the basic outline and components of a marketing plan

MKTG 310. Marketing Research
3 Credits (3)

Design, collection analysis, and presentation of research data.

Prerequisite: MATH 1350G or A ST 311 and C- or better in MKTG 303, or consent of instructor.

Learning Outcomes

1. Translate a marketing problem into a feasible research question.
2. Recognize marketing research as a process that involves a sequence of activities, each compatible with the preceding activities.
3. Compare and contrast alternative research designs.
4. Identify the sources of marketing information and the various means for gathering such information.
5. Recognize the biases and limitations of marketing data and basic data analysis.
6. Interpret univariate and basic bivariate data analysis techniques (i.e., should be able to decide when a technique is appropriate and recognize the managerial implications of analytical results).

7. Design and execute a basic survey research project.
8. Assess ethical issues associated with various research approaches.

MKTG 311V. Consumer Behavior**3 Credits (3)**

The different aspects of consumer behavior and the variables affecting consumer decisions. Analysis of current concepts and models.

Learning Outcomes

1. Know the consumer behavior concepts by integrating and adapting theories developed in disciplines such as psychology, sociology, anthropology, and economics.
2. Use specific tools to tackle and analyze customer issues.
3. Develop the ability to apply consumer behavior concepts from the perspective of marketing managers and public policy makers.
4. Increase the awareness of and enhance the ability to make ethical decisions in consumer-related issues.

MKTG 312. Personal Selling**3 Credits (3)**

Implementation of the promotion process through interpersonal communications between salesperson and prospects. Serving customers by sales representatives.

Learning Outcomes

1. Demonstrate how personal selling can strategically enhance interpersonal communication skills, career management, personal productivity.
2. Identify key issues and trends such as opportunities or threats, for evolving emerging sales approaches platforms.

MKTG 313. Retail Management**3 Credits (3)**

Investigates retail business operations and focuses on the strategic profit model, store location, layout, display, merchandising, operations, and personnel.

Learning Outcomes

1. Analyze the role of retailing in society and basic retailing principles, ideas, and concepts as they relate to an understanding of our market-driven system
2. Compare and contrast segmentation and target market selection relative to a specific population product/service for different markets and retailing opportunities
3. Apply the concepts of the marketing mix to the formulation and evaluation of retailing strategies relative to particular target markets, environments (economic, technological and competitive), and desired positions in market places (both local and global)
4. Areas to be addressed include communication strategy, branding, packaging, pricing, product/service design, methods of delivery and the product life cycle
5. Relate the concepts of marketing and retailing research, consumer behavior and strategy and their interrelationships
6. Compare and contrast analysis techniques and judgment that are useful to managers in acting with integrity to make decisions and taking action

MKTG 314. Advertising Strategy**3 Credits (3)**

Utilization of advertising as a business administration function; communication with consumers as a means of attaining marketing goals.

Learning Outcomes

1. Analyze advertising from a consumer perspective
2. Compare advertising strategy theories and concepts
3. Evaluate advertising critically and creatively

MKTG 317. International Marketing**3 Credits (3)**

Focuses on decisions relating to entering markets, market segmentation, marketing strategies, and tactics in the international arena. Same as I B 317.

Learning Outcomes

1. Develop understanding about what is involved in making international marketing decisions, including product, price, promotion, and place decisions to create a marketing mix.
2. Acquire an overview on the contemporary issues in global marketing and the unique challenges faced by marketing managers in the dynamic global environment.
3. Develop insights into how differences in global economic, cultural, social, political, and legal environments can affect marketing decisions.
4. Develop strategic thinking in the context of complex problems and challenges faced by the contemporary global executives and managers.
5. Develop ability to integrate the important global societal dimensions of diversity, environmental concerns, ethics, and technological change into their thinking.
6. Develop knowledge and skills to analyze cross-cultural variables and their impact on international marketing.
7. Discover sources of information for researching and evaluating international markets.
8. Communicate effectively about marketing issues in group discussions, oral presentations and written reports.
9. Work effectively as a team member in analyzing marketing issues.
10. Develop leadership skills necessary to deal with the uncertainty and changes faced by today's global marketers.

MKTG 324. Product/Service Development**3 Credits (3)**

Covers product innovation, development, commercialization and resource recovery, price determination and administration strategies, and complementing planning processes.

Learning Outcomes

1. Understand the product/service development process.
2. Identify market opportunities for new products.
3. Use structured methods to evaluate and test product concepts.
4. Apply tools learned in class to develop new products/services.
5. Plan the launch of a product and evaluate its impact on the market.
6. Efficiently work with and communicate ideas to team members.

MKTG 354. Sports Marketing**3 Credits (3)**

The application of marketing concepts to the sports industry. Topics include fans/customers, products, and promotions across a range of sports.

Learning Outcomes

1. Discuss the domain of sports marketing
2. Apply basic marketing tools (e.g., research, segmentation) to sports marketing contexts

3. Recognize, evaluate, and accommodate the perspectives of participants and spectators as sports consumers
4. Identify appropriate marketing mix options for sports products
5. Appraise recent sports marketing trends
6. Plan a career in sports marketing

MKTG 357. Internet and Social Media Marketing**3 Credits (3)**

Focuses on the consumer psychology and marketing strategies at work in advertising and selling brands via the Internet and social media networks.

Learning Outcomes

1. Apply the concepts of the marketing mix to the formulation/evaluation of marketing strategies relative to Social Media policies that combine business objectives with appropriate use of Social Media channels and content.
2. Compare and contrast the history of Social Media and recognize the various platforms of Social Media.
3. Select/defend segmentation and target market selection relative to a specific population product/service that engages target audiences with a marketing message.
4. Analyze business objectives and connect to appropriate Social Media tactics.
5. Evaluate Social Media marketing content to shape the way we connect to and build relationships with users, consumers and businesses.
6. Relate the concepts of marketing research to establish metrics for measuring Social Media marketing success.

MKTG 380. Level 2, PGA's PGM Education Program (Part 2)**3 Credits (3)**

Level 2 Part 2 of the PGA PGM Education Program. This class will focus on Facility Management 2 and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management majors.

Learning Outcomes

1. Define the business at the facility level in terms of vision, core values, facility characteristics and mission.
2. Utilize the four Interaction Strategies in a variety of routine and challenging customer situations.
3. Identify core business areas that support a customer-focused environment
4. Know the characteristics of a merchandising operation that align with a facility's business plan
5. Understand how to define, assess, and develop tournament business at a facility.

MKTG 381. Level 3, PGA's PGM Education Program (Part 1)**3 Credits (3)**

Level 3 Part 1 of the PGA's PGM Education Program. This class will focus on Teaching and Coaching 3, Teaching and Coaching Seminars, and the corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management

Learning Outcomes

1. Explain how various types of feedback function to influence learning
2. Define the major variables that influence learning and explain how they operate with implications for practice, learning, and teaching

3. Provide effective instructional feedback after students' practice and performance
4. Explain how the form, precision, timing, frequency, and regulation of augmented feedback influence learning with implications for teaching and practice conditions
5. Explain how the key practice factors influence learning with implication for designing practice conditions
6. Establish relationships that promote greater student learning and enjoyment
7. Plan long-term developmental programs for beginning and intermediate players
8. Communicate effectively with students
9. Develop a communication style that increases instructional effectiveness 1
10. Effectively determine and design an appropriate practice routine to the benefit of the golfer 1
11. Effectively determine and assign the appropriate drill or drill with an aid to improve the swing shape of the golfer 1
12. Use relevant technology to promote student learning 1
13. Effectively demonstrate and apply the appropriate specialty shot information to the benefit of the golfer 1
14. Demonstrate basic knowledge of current swing methodologies of noted instructors 1
15. Physical development of junior golfers 1
16. Assess the physical capabilities of adult golfer, describe implications for performance, and provide potential physical adjustments 1
17. Describe how to use bench skills, tools, and technologies for measuring and altering club performance 1
18. Perform analyses and make appropriate alterations to change ball flight, players performance, and teacher effectiveness

MKTG 400. Marketing Internship/Field Experience

3 Credits (3)

Internship of field experience in application of marketing principles. The student must accept an internship before being allowed to enroll in the course. Consent of instructor required. Restricted to MKTG majors.

MKTG 440. Sales, Negotiations, and Customer Relationship Management

3 Credits (3)

This course focuses on addressing the issues, processes and strategies related to professional selling and sales management. This is a comprehensive course in the art of selling, focusing on relationship building, negotiating, and sales management. Various techniques will be explored, including prospecting, lead management, product introduction, negotiation, closing strategies, and relationship management.

Learning Outcomes

1. Understand concepts and frameworks that help you analyze each negotiation situation.
2. Develop a strategic plan and preparation documents in advance of each negotiation.
3. Master a toolkit of useful negotiation skills, strategies and tactics.
4. Improve your ability to predict and understand the other party's behavior during negotiations
5. Gain valuable experience and confidence in your own negotiating skills.
6. Improve future outcomes whenever you enter into a negotiation or are engaged in a dispute.

MKTG 449. Promotion Management

3 Credits (3)

Covers concepts and problems in the use of advertising, internet marketing, social media marketing, personal selling, publicity, and other forms of promotion; planning, coordination, control, and evaluation of effectiveness.

Learning Outcomes

1. Analyze the role of advertising and promotion in society and basic marketing principles, ideas, and concepts as they relate to an understanding of our market-driven system
2. Compare and contrast segmentation and target market selection relative to a specific population product/service for different markets and promotional opportunities
3. Apply the concepts of the marketing mix to the formulation and evaluation of promotional strategies relative to particular target markets, environments (economic, technological and competitive), and desired positions in market places (both local and global)
4. Areas to be addressed include communication strategy, branding, pricing, product/service design, and e-commerce
5. Relate the concepts of marketing and advertising research, consumer behavior and strategy and their interrelationships
6. Compare and contrast analysis techniques and judgment that are useful to managers in acting with integrity to make decisions and taking action in the promotional environment

MKTG 451. Food and Agribusiness Market Assessment

3 Credits (3)

This course is an application course in which self-managed teams develop and present marketing plans for agribusiness firms. Emphasis on integrating the marketing mix, particularly promotional elements. May be repeated up to 3 credits. Crosslisted with: AEEC 4510.

Prerequisite(s): AEEC 3210 or MKTG 305 or consent of instructor.

Learning Outcomes

1. Identify, organize and conduct market research specific to the project.
2. Develop an understanding of primary and secondary research collection and analysis.
3. Exhibit enhanced relationship management, communication skills, and team building.
4. Develop written communication with final deliverable for implementation into the business world.

MKTG 453. Sales Management

3 Credits (3)

The nature of the sales management function in industry. Focuses on intra and interdepartmental sales management activities.

Prerequisite: MKTG 312.

Learning Outcomes

1. Examined the linkage between personal selling, as a basket of activities, and the management of those marketing personnel who do selling (i.e., salespeople).
2. Examined the role of the sales force in the achievement of a firm's marketing objectives.
3. Undertaken numerous case-based analyses of typical sales management issues, including the hiring, firing, training, motivation, compensation, deployment, and evaluation of the firm's sales personnel.
4. Developed decision-making skills and analytic capabilities in the development and management of both sales programs and salespeople.

MKTG 461. Seminar in Entrepreneurship**3 Credits (3)**

For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Crosslisted with: MGMT 461.

Prerequisite(s): Senior standing or consent of instructor.

MKTG 462. Advanced Sales**3 Credits (3)**

Advanced instruction and skill development in interpersonal communication skills to broaden understanding of the professional sales role (especially in team selling situation), career management, personal productivity, negotiation, and coordination with other functional areas.

Prerequisite: MKTG 312.

Learning Outcomes

1. Students will learn "how" to sell (i.e., the behaviors and planning associated with selling today).
2. Analyze the concept of what/how is perhaps equally important but not nearly as obvious, how and why buyers "buy".
3. The course focus will be particularly on so-called "business-to-business" (B2B) sales jobs, as that is where many of the most interesting – and lucrative – sales positions reside.

MKTG 480. Level 3, PGA's PGM Education Program (Part 2)**3 Credits (3)**

Level 3 Part 2 of the PGA's PGM Education Program. This class will focus on Facility Management 3, the Business Simulation Seminars, and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management Majors

Learning Outcomes

1. Assess the current state of the business by conducting a SWOT Analysis
2. Describe the golf industry job market and the knowledge and skills required to succeed
3. Identify areas where food services and golf operations should coordinate efforts
4. Determine golf car needs in order to acquire a fleet that supports the facility's mission, customers, and physical characteristics
5. Describe the organizational structure, key departments, reporting relationships, and job descriptions of a facility
6. Utilize industry-proven pricing strategies to meet business objectives
7. Describe the Performance System for supervising and delegating
8. Describe practices that improve the golf course and protect the environment

MKTG 481. PGA Golf Management Final Experience**1 Credit (1)**

The following are requirements for successful completion of this senior level PGA Golf Management capstone course: 16 months of internship, completion of the Qualifying Level, Level 1, Level 2, and Level 3 of the PGA's PGM Education Program and successful completion of the PGA's Playing Ability Test. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management majors.

Learning Outcomes

1. Describe the golf industry job market and the knowledge and skills required to succeed
2. Access PGA employment resources and participate in professional growth and development

MKTG 489. Strategy and Policy**3 Credits (3)**

Techniques and analysis of marketing strategy and policy planning and formulation. Restricted registration to senior standing or by consent of instructor.

Prerequisite: C- or better in MKTG 310.

Learning Outcomes

1. Relate marketing strategy to the environmental constraints and opportunities with which managers must deal.
2. Compare marketing strategy theories and concepts.
3. Evaluate appropriate strategic marketing decisions in various situations.

MKTG 490. Selected Topics**1-18 Credits (1-18)**

Covers materials and subjects not offered in regular Marketing courses. Students can take 18 credit hours of MKTG 490 if each class is a different subtitle. A maximum of 18 credit hours can be earned through MKTG 490.

MKTG 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.

Prerequisites: junior or above standing and consent of instructor.

MKTG 503. Marketing Management**3 Credits (3)**

Analysis of marketing problems and the integration of organizational resources as well as behavioral and quantitative techniques into the development and implementation of solutions.

Learning Outcomes

1. Identify the fundamental principles and theories of marketing
2. Outline primary and changing perspectives on marketing and strategic management
3. Apply relevant marketing concepts and analytical tools
4. Develop capacity to obtain and process relevant information with enhanced analytical skills
5. Identify viable alternative to make informed choices and recommend marketing implementation plans
6. Evaluate the impact of interactive media on marketing management
7. Develop skills in organizing more effective strategic marketing and implementing the market planning process
8. Practice implementing marketing management strategies in complex environments through case study analyses
9. Formulate marketing management strategies on critical issues, problems, and business opportunities 1
10. Synthesize perspectives of ethics and social responsibility in adapting to changing environments

MKTG 591. Seminar in Entrepreneurship**3 Credits (3)**

For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Same as MKTG 461 with differentiated assignments for graduate students. Crosslisted with: MGMT 591.

Prerequisite(s): Graduate standing.

MKTG 601. Marketing Management**3 Credits (3)**

Covers the conceptual foundations of contemporary marketing management research, concepts, and literature. Fundamental to the

understanding of contemporary marketing and the breadth of the field of marketing study.

Learning Outcomes

1. Identify the contemporary principles and theories of marketing strategy research
2. Outline primary guidelines and trendy directions of marketing strategic research
3. Improve theoretical foundation for research development in marketing strategy
4. Develop capacity of analytical and quantitative skills required for empirics
5. Apply relevant marketing theories, concepts and analytical methodology in research development
6. Formulate research ideas pertinent to marketing strategies on critical issues, problems, and phenomena
7. Practice complex research design, theoretical development and empirical operationalization
8. Synthesize perspectives of ethics and social responsibility in scholarly research

MKTG 620. Contemporary Marketing Readings

3 Credits (3)

Theoretical and methodological issues involved in translating a theory into a research study. Prepares Ph.D. students to undertake dissertation research. Consent of instructor required. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to apply theory that they have learned to the process of doing research.

MKTG 625. Consumer Behavior

3 Credits (3)

Extensive reading of seminal and contemporary articles on consumer behavior and developing original research to explore cross-disciplinary issues relevant to the study of marketing. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to develop theories and frameworks.
2. Students will be able to discuss the latest research topics related to consumer behavior.
3. Students will be able to generate research ideas (interesting questions about consumer behavior and research hypotheses).
4. Students will be able to design experiments to test their research ideas and hypotheses.

MKTG 640. Measurement and Structural Equation Modeling

3 Credits (3)

Explores theories of measurement that underlie all quantitative analysis, including the use of structural equation models. Contrasts classical test theory with item response theory and generalizability theory. Covers PRELIS and LISREL, and critiquing structural equation models by other researchers. May be repeated up to 3 credits.

Prerequisite(s): A ST 505.

MKTG 670. Marketing Theory

3 Credits (3)

The evolution, development, construction, and evaluation of the major theoretical perspectives of marketing. Fundamental to the understanding of contemporary marketing and preparation for investigations into the nature and role of theory in marketing. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to identify the contemporary principles and theories of marketing strategy research.
2. Students will be able to outline primary guidelines and trendy directions of marketing strategic research.
3. Students will be able to improve theoretical foundation for research development in marketing strategy.
4. Students will be able to develop capacity of analytical and quantitative skills required for empirics.
5. Students will be able to apply relevant marketing theories, concepts and analytical methodology in research development.
6. Students will be able to formulate research ideas pertinent to marketing strategies on critical issues, problems, and phenomena.
7. Students will be able to implement complex research design, theoretical development, and empirical operationalization.
8. Students will be able to synthesize perspectives of ethics and social responsibility in scholarly research.

MKTG 690. Special Topics in Marketing

3 Credits (3)

A seminar on special topics in marketing. The topic of the course will vary according to the needs of the students in the program and the instructor. Ph.D. students may repeat this course up to three times for a maximum total of 9 credits.

MKTG 698. Selected Topics

1-9 Credits (1-9)

Materials and subjects not offered in regular marketing courses. May be repeated for a maximum of 18 credits under different subtitles.

MKTG 700. Doctoral Dissertation

1-15 Credits (1-15)

May be repeated up to 88 credits.

Prerequisite: advancement to candidacy.

MOLB-MOLECULAR BIOLOGY

MOLB 448. Special Research Problems

1-3 Credits

Individual investigation, theoretical or experimental, under the supervision of a molecular biology faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

MOLB 520. Molecular Cell Biology

3 Credits (3)

Same as BIOL 520.

MOLB 542. Biochemistry I

3 Credits (3)

Same as BCHE 542. B or better required.

MOLB 545. Molecular and Biochemical Genetics

3 Credits (3)

Same as BCHE 545 and BIOL 545.

MOLB 546. Biochemistry II

3 Credits (3)

Same as BCHE 546.

MOLB 550. Topics in Molecular Biology

1-3 Credits

Selected topics of current interest in field of molecular biology for master's level students. May be repeated up to 12 credits.

Learning Outcomes

1. Learning goals are dependent upon topic and instructor.

MOLB 590. Discussions in Molecular Biology**1 Credit (1)**

Oral presentations of ongoing research and/or research proposal for the masters thesis. Must be repeated twice for masters and a minimum of three times for doctoral students. May be repeated up to 4 credits.

Learning Outcomes

1. To expose students to the fundamentals of speaking, including organization, and listening.
2. To understand and gain practice oral presentations.
3. Encourage critical thinking and discussion of scientific material during presentations.

MOLB 597. Laboratory Rotations/Research Discussions**1-3 Credits**

All entering students are required to take at least one credit, during their first semester, in which they will circulate through at least three different labs working on assigned problems and discussing research programs. May be repeated for a maximum of 4 credits. Graded S/U.

MOLB 598. Special Research Programs**1-3 Credits**

Individual investigation, experimental or theoretical, under the supervision of a molecular biology faculty member. Course may be repeated up to a total of 6 credits with committee approval.

MOLB 599. Master's Thesis**1-15 Credits (1-15)**

Experimental and scholarly research leading to the preparation of a master's thesis.

MOLB 600. Molecular Biology Research**1-15 Credits**

Laboratory research efforts prior to successful completion of doctoral comprehensive exam.

MOLB 650. Advanced Topics in Molecular Biology**1-3 Credits**

Discussions and lectures on topics of current interest in molecular biology for doctoral students.

MOLB 698. Advanced Research Projects**1-9 Credits**

Individualized special research assignments for doctoral-level students. Up to 9 credits, with approval of committee. Graded S/U.

MOLB 700. Doctoral Dissertation Research**1-15 Credits**

Research for doctoral students after completing comprehensive exams.

MUSC-MUSIC

MUSC 1110G. Music Appreciation: Jazz**3 Credits (3)**

This course explores the ideas of music in society and its cultural relevance and is designed to increase the students' appreciation of music as well as to enhance their listening skills. Students are introduced to various periods, styles, and composers of music and become acquainted with knowledge and appreciation of Jazz from various cultures and times.

Learning Outcomes

1. Develop a vocabulary of musical terms, and be able to describe music using those terms

2. Demonstrate knowledge of composers, their music and their relationship to historical periods
3. Recognize how music played and plays a political, social, and cultural function
4. Identify well-known pieces and the historical and social context in which they were composed
5. Demonstrate basic understanding of music notation and musical communication

MUSC 1130G. Music Appreciation: Western Music**3 Credits (3)**

This course explores the ideas of music in society and its cultural relevance and is designed to increase the students' appreciation of music as well as to enhance their listening skills. Students are introduced to various periods, styles, and composers of music and become acquainted with knowledge and appreciation of Western music from various cultures and times.

Learning Outcomes

1. Develop a vocabulary of musical terms, and be able to describe music using those terms
2. Demonstrate knowledge of composers, their music and their relationship to historical periods
3. Recognize how music played and plays a political, social, and cultural function
4. Identify well-known pieces and the historical and social context in which they were composed
5. Demonstrate basic understanding of music notation and musical communication

MUSC 1210. Fundamentals of Music for Non-majors**3 Credits (3)**

A beginning course in the fundamentals of music, this course includes notation, scales, key signatures and intervals. Aural comprehension is introduced through singing intervals, scales and triads and dictating simple rhythmic and melodic patterns and students explore the basic components of music. Traditional Grading with RR.

Learning Outcomes

1. Demonstrate and apply standard notation of pitch, rhythm, scales, intervals, key signatures, triads, and simple melodic and harmonic composition
2. Develop and improve basic aural skills
3. Read musical notation
4. Improve and expand understanding of fundamental musical techniques and concepts

MUSC 1310. Recital Attendance**0.5 Credits (.5+1P)**

This course is for music students to attend and participate in a good number of convocation, concert, and recital performances, creating a wider appreciation for the performing arts. May be repeated up to 4 credits. Restricted to: Music and Music Education majors. S/U Grading with RR. Restricted to Las Cruces campus only.

Learning Outcomes

1. Encourage student observation of serious music
2. Provide opportunities for public performances
3. To create a greater sense of community within the student body

MUSC 1410. Introduction to Music Education**2 Credits (2)**

This course is an overview of teaching in the music classroom through readings and observations. Students will be introduced to the skills needed to become a reflective educator, develop observation techniques, and demonstrate knowledge of the current state of the profession.

Restricted to Las Cruces campus only.

Learning Outcomes

1. Make observations and analyze the current state of musical education in public schools
2. Describe characteristics of good teaching in music
3. Articulate a personal philosophy of music education
4. Reflect on personal strengths and weaknesses as a teacher of music

MUSC 1440. Class Voice I

1 Credit (1)

Group instruction in voice and vocal pedagogy for instrumental Music Education majors, offering basic principles of healthy vocal production with particular attention to diction, development of vocal range, and the ability to impart that knowledge to elementary, junior and/or high school age students. Restricted to: Music Education majors. Traditional Grading with RR. Restricted to Las Cruces campus only.

Learning Outcomes

1. Provide the basic understanding of healthy vocal production. Including, but is not limited to, the following topics: Expanding vocal range; Learning how to practice and learn songs effectively and efficiently; Provide basic understanding of vocal pedagogy; Introduction to diction
2. Aims to equip students with the ability to impart that knowledge to elementary, junior and/or high school age students.

MUSC 1450. Ear Training I

1 Credit (1)

To develop the ability to accurately hear, identify, sing and notate musical elements including rhythm, melody, intervals and harmony Traditional Grading with RR. Restricted to Las Cruces campus only. May be repeated up to 1 credit.

Learning Outcomes

1. Counting rhythms at sight using the Eastman Counting System.
2. Singing melodies at sight using solfege syllables.
3. Writing out rhythmic patterns.
4. Writing out melodic patterns.
5. Identifying and singing intervals.
6. Identifying and singing chord / triad qualities.

MUSC 1451. Ear Training II

1 Credit (1)

To develop the ability to accurately hear, identify, sing and notate musical elements including rhythm, melody, intervals and harmony Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C- or better in MUSC 1450.

Learning Outcomes

1. Counting rhythms at sight using the Eastman Counting System
2. Singing melodies at sight using solfege syllables
3. Writing out rhythmic patterns
4. Writing out melodic patterns
5. Identifying and singing intervals
6. Identifying and singing chord / triad qualities

MUSC 1460. Music Theory I

3 Credits (3)

Introduction to vocabulary and syntax of 4-voice 18th c. chorale music through study and harmonic analysis. May be repeated up to 3 credits.

Learning Outcomes

1. To learn the vocabulary and syntax of 4-voice 18th c. chorale music through study and harmonic analysis.

MUSC 1461. Music Theory II

3 Credits (3)

Expansion of vocabulary and syntax of 4-voice 18th c. chorale music through study, harmonic analysis, and part writing.

Prerequisite(s): Grade of C or better in MUSC 1460.

Learning Outcomes

1. To expand and apply the vocabulary and syntax of 4-voice, 18th c. chorale music through study, harmonic analysis, and part writing.

MUSC 1470. Functional Piano I

2 Credits (2)

Scales, chords, memorization. Harmonization of simple melodies with the ability to play simple melodies and rhythms. May be taken for unlimited credit. Restricted to music majors. No S/U option.

Learning Outcomes

1. 5 finger hand position in all keys
2. I-IV-I-V7-I cadences in all keys
3. One octave scales with hands together in C, G, D and F (major and minor)
4. Root position cross-over triads, solid and broken (major and minor)
5. Simple sight reading, harmonizing and transposition
6. Prepared pieces from the textbook
7. Simple improvisation
8. Play 2 simple vocal exercises
9. Identify intervals, key signatures and chords 1
10. Correct posture and hand position 1
11. Musical issues such as phrasing, slurs and dynamics 1
12. Good practice habits and techniques

MUSC 1471. Functional Piano II

2 Credits (2)

Scales, chords, memorization. Harmonization of simple melodies with the ability to play simple melodies and rhythms. May be taken for unlimited credit. Restricted to music majors. No S/U option.

Prerequisite: MUSC 1470 or consent of instructor.

Learning Outcomes

1. Two octave scales with hands separate in C, G, D, A, E, B and F (major and minor)
2. I-IV-I-V7-I cadences in above mentioned keys in root position and 1st inversion
3. Simple sight reading, harmonization and transposition
4. Prepared pieces from the book
5. Simple improvisation
6. Identify intervals, key signatures and chords
7. Correct posture and hand position
8. Musical issues such as phrasing, slurs and dynamics
9. Good practice habits and techniques

MUSC 1472. Functional Piano III

2 Credits (2)

For music majors preparing for the Piano Proficiency Examination. May be taken for unlimited credit. Restricted to music majors. No S/U option.

Prerequisite: MUSC 1471 or consent of instructor.

Learning Outcomes

1. Keys learned in previous semesters, adding F# and C# (D flat)
2. Secondary dominant chords added to cadence patterns
3. Two-octave, , root position arpeggios, major and minor
4. Intro to chord charts, harmonization
5. More difficult sight-reading and transpositions
6. More difficult prepared pieces
7. Accompany a piece for any instrument on the Mid-Term Recital (required)

MUSC 1992. Applied Music**1-2 Credits (1-2)**

Private or group instruction for non-music majors, secondary instruments, and music majors preparing for 2000-level applied music. May be taken for unlimited credit. May be repeated up to 99 credits.

Learning Outcomes

1. Development of Musical Abilities.
2. Development of Technical Abilities.

MUSC 2110. Chamber Ensemble**1 Credit (1)**

This course is an exploration of chamber ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of chamber ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 16 credits. Restricted to Las Cruces campus only.

Prerequisite(s): by audition only.

Learning Outcomes

1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage

MUSC 2120. Major Ensemble**1 Credit (1)**

This course is an exploration of major ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of major ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 24 credits.

Prerequisite: by audition only.

Learning Outcomes

1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage

MUSC 2130. Jazz Ensemble**1 Credit (1)**

This course is an exploration of jazz ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of jazz ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 10 credits. Restricted to Las Cruces campus only.

Prerequisite(s): By audition only.

Learning Outcomes

1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage
6. Develop and improve improvisation skills

MUSC 2132. Percussion Ensemble**1 Credit (1)**

Study and performance of contemporary percussion ensemble literature. May be repeated up to 5 credits. Restricted to Las Cruces campus only.

Prerequisite(s): by audition only.

Learning Outcomes

1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage

MUSC 2151. An Introduction to World Music, Jazz and Music Research**3 Credits (3)**

Introduces world music and jazz within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works. A major component will be the development of effective research and scholarly writing skills for the music major or minor. May be repeated up to 3 credits. Restricted to: Music majors and minors. Restricted to Las Cruces campus only.

Learning Outcomes

1. This course will cover fundamental concepts and styles associated with world music (ethnomusicology), jazz and popular music, an overview of the Western European tradition, and an intense focus on research and writing about music.
2. Emphasis will be placed on writing skills as they apply to the college experience in general and the world of music education and performance in particular.
3. Students will become acquainted with the diverse ways cultures create and are affected by their respective musical arts.
4. Focus will be on style evolution, forms, genres, composers, literature, and, where appropriate, performers

MUSC 2210. Diction I**2 Credits (2)**

This course is designed to prepare students for singing in multiple languages using concepts of the International Phonetic Alphabet. Students will work to master the basics of phonetic singing to improve their overall musical abilities. Restricted to Las Cruces campus only.

Learning Outcomes

1. Correctly and consistently form vowel and consonant sounds when speaking and singing in multiple languages
2. Correctly and consistently transcribe texts in multiple languages using the International Phonetic Alphabet
3. Understand and explain the International Phonetic Alphabet's usage and symbols
4. Develop and apply the concept of lyric diction to singing
5. Gain fluency, accuracy, and confidence in pronunciation of sung text

MUSC 2220. Diction II**2 Credits (2)**

This course serves as a continuing study in the concepts of the International Phonetic Alphabet. Students will continue to improve and practice their diction to develop their singing and musical abilities in order to begin the mastery of lyric diction. Restricted to music majors. Restricted to Las Cruces campus only.

Prerequisite(s): MUSC 2210 or consent of instructor.

Learning Outcomes

1. Correctly and consistently form vowel and consonant sounds when speaking and singing in multiple languages
2. Correctly and consistently transcribe texts in multiple languages using the International Phonetic Alphabet
3. Understand and explain the International Phonetic Alphabet's usage and symbols
4. Develop and apply the concept of lyric diction to singing.
5. Gain fluency, accuracy, and confidence in pronunciation of sung text.
6. Demonstrate ability to notate song texts according to IPA standards

MUSC 2240. Music History and Literature: Antiquity through Baroque**3 Credits (3)**

Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from antiquity through the end of the Baroque era. An additional emphasis will be given to effective research and scholarly writing skills. May be repeated up to 3 credits.

Prerequisite(s): A grade of C- or better in MUSC 1450 and 1460.

Learning Outcomes

1. The purpose of the course is to survey the beginning history of music from the earliest ancient times through the Baroque period, ca.

MUSC 2310. Sound and Music Technology**1 Credit (1)**

This course serves as an overview of current technologies and principles for the recording and production of sound, and the use of computer-based technologies for the production of music. Restricted to: MUSC, M ED majors. Traditional Grading with RR. Restricted to Las Cruces campus only.

Prerequisite(s): MUSC 1460.

Learning Outcomes

1. Demonstrate fundamental knowledge of techniques and practices of music recording and production
2. Demonstrate ability to properly use computer-based technologies to produce and record music
3. Demonstrate ability to create music recordings
4. Work with a variety of recording, production, and sound reinforcement tools
5. Apply basic and mixed editing techniques
6. Use audio editing and file management techniques
7. Demonstrate knowledge of music technology vocabulary
8. Explain and understand the development of various music technologies

MUSC 2451. Ear Training III**1 Credit (1)**

Continuation of MUSC 1451, advanced sight singing, dictation. Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C- or better in MUSC 1451.

Learning Outcomes

1. Count rhythms at sight using the Eastman Counting System
2. Sing melodies at sight and prepared using Solfege syllables
3. Write out rhythmic patterns
4. Write out melodic patterns
5. Identify and singing intervals
6. Identify and sing chord / triad qualities
7. Write out harmonic dictation

MUSC 2452. Ear Training IV**1 Credit (1)**

Continuation of MUS 2451, advanced sight singing, dictation. Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C or better in MUSC 2451 and MUSC 2460.

Learning Outcomes

1. Count rhythms at sight using the Eastman Counting System
2. Sing scales and sequences as assigned for the level
3. Sing melodies at sight using solfege syllables
4. Write out rhythmic patterns in both simple and compound meters
5. Write out melodic patterns in both major and minor tonalities
6. Identify, label and sing intervals
7. Identify, label and sing chords and extended harmonic qualities, i.e. V7 and inversions
8. Write out harmonic progressions in both two and four part forms including secondary dominants and modulations.
9. Accurately detect melodic and rhythmic errors in dictation examples.

MUSC 2460. Music Theory III**3 Credits (3)**

Analysis of Baroque and Classical Music. Vocabulary and syntax of 18th and 19th c. Western art music through study, chordal/formal analysis, and composition. Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C or better in MUSC 1461.

Learning Outcomes

1. To learn and apply the vocabulary and syntax of 18th and 19th c. Western art music through study, chordal/formal analysis, and composition.
2. Topics covered include: Two-Voice Eighteenth Century Counterpoint; Fugue; Borrowed Chords; Neapolitan 6th Chords; Augmented 6th Chords; Sonata Form; Rondo Form.

MUSC 2461. Music Theory IV**3 Credits (3)**

Analysis of Romantic, Post-Romantic, Impressionist, and Twelve-Tone Music. Vocabulary and syntax of late 19th and early 20th c. Western art music through study, micro/macro analysis, and composition. Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C or better in MUSC 2460.

Learning Outcomes

1. To learn and apply the vocabulary and syntax of late 19th and early 20th c. music through study, micro/macro analysis, and composition.

MUSC 2470. Functional Piano IV**2 Credits (2)**

For music majors preparing for Piano Proficiency Examination. May be taken for unlimited credit. Restricted to music majors. No S/U option. May be repeated up to 99 credits.

Prerequisite: MUSC 1472 or consent of instructor.

Learning Outcomes

1. Keys learned in previous semesters, adding A flat, E flat, and B flat
2. Secondary dominant chords added to cadence patterns, all inversions
3. Arpeggios, all inversions
4. More difficult sight-reading and transpositions
5. More difficult prepared pieces
6. Four part pieces (hymns)
7. Accompany a piece for any instrument on the Mid-Term Recital (required) Score reading and transposition

MUSC 2510. Applied Music I**1-4 Credits**

Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required.

Restricted to: Music and Music Education majors. Traditional Grading with RR. Restricted to Las Cruces campus only.

Prerequisite(s): Audition.

Learning Outcomes

1. Varies

MUSC 2740. Pride Marching Band**1 Credit (1)**

The Pride Marching Band performs at all NMSU home football games and select away games. The marching band is open to all students at NMSU and supports both instrumental and visual units. May be repeated up to 8 credits.

Learning Outcomes

1. To cultivate within the student a value system that encourages community service.
2. To provide the performer with experiences that will enable them to communicate thoughts/ideas/emotions in a unique and personal manner using his/her instrument, body, and physical motion.
3. To instill in students a commitment to life-long learning.
4. To promote personal growth through the rehearsal and performance of music, choreography, and drill of high quality.
5. To encourage students to continuously participate in and support artistic performances following graduation.

MUSC 2993. Opera Workshop**1 Credit (1)**

Study, translation, analysis, rehearsal and performance of opera. May be repeated up to 10 credits. Restricted to Las Cruces campus only.

Prerequisite(s): by audition only.

Learning Outcomes

1. Varies

MUSC 2996. Special Topics I**1-3 Credits**

Emphasis on special areas of music; designed for highly motivated students. May be taken for unlimited credit.

Learning Outcomes

1. Varies

MUSC 301. Marching Band Techniques**2 Credits (2)**

This course will help students develop the techniques needed to administer and teach all aspects of a contemporary high school marching band. This includes drill conception and design, instruction, organization, and administration. Stylistic varieties of marching fundamentals, show conception, fundamentals of charting and teaching drill, computer-

aided drill design, traditional show design, contemporary show design, rehearsal techniques, and organizational concepts. Restricted to: Music, Music Education majors. Traditional Grading with RR.

MUSC 302. Music History and Literature: Classic through Romantic 3 Credits (3)

Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from the beginnings of the Classic era through the end of the Romantic era. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: Music Majors and Minors majors.

Prerequisite(s): A grade of C- or better in MUSC 2240.

MUSC 303. Music History and Literature: 20th Century Through the Present 3 Credits (3)

Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from the beginning of the 20th Century through the Present. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: MUS minors and majors.

Prerequisite(s): A grade of C- or better in MUSC 302.

MUSC 315. Brass Techniques I**1 Credit (1)**

Methods and techniques of teaching high brass instruments, for music education majors. Main campus only.

MUSC 316. Brass Techniques II**1 Credit (1)**

Methods and techniques of teaching low brass instruments, for music education majors. Main campus only.

MUSC 317. Woodwind Techniques I**1 Credit (1)**

Methods and techniques of teaching high woodwind instruments, for music education majors. Main campus only.

MUSC 318. Woodwind Techniques II**1 Credit (1)**

Methods and techniques of teaching saxophone and double reed instruments, for music education majors. Main campus only.

MUSC 319. String Techniques I**1 Credit (1)**

Methods and techniques of teaching low string instruments, for music education majors. Main campus only.

MUSC 321. Instrumental Techniques for Vocal Music Education Majors 2 Credits (2)

Methods of teaching brass, woodwind, percussion, stringed and fretted instruments for vocal music education majors. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 322. Guitar Methods**1 Credit (1)**

Methods and techniques of teaching guitar, for Music Education majors. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 323. Percussion Technique I**1 Credit (1)**

Methods and techniques of teaching fundamental percussion instruments (snare drum, timpani, keyboards and essential accessories). May be repeated up to 1 credits. Restricted to: MUS, M ED majors.

MUSC 324. Percussion Technique II**1 Credit (1)**

Methods and techniques of teaching marching percussion, drum set, and a continuation of techniques discussed in MUS 323. May be repeated up to 1 credits. Restricted to: MUS,M ED majors. Traditional Grading with RR.
Prerequisite(s): A grade of C- or better in MUS 323.

MUSC 325. Beginning Conducting

1 Credit (1)

A study of the fundamentals of conducting and rehearsal strategies with an emphasis on beginning technique applicable to all ensembles. Reading of musical scores with application via laboratory ensemble experience is included. Restricted to: Music and Music Education majors. May be repeated up to 1 credit.

Prerequisite: A grade of C or better in MUSC 2451 and MUSC 2460.

Learning Outcomes

1. Develop the musicianship of the student.
2. Development of basic conducting techniques.
3. Develop a knowledge of appropriate terminology, tempi, and transpositions.
4. Establishment of a gestural (nonverbal) vocabulary.
5. Cultivation of self-awareness and effective interaction through nonverbal communication.

MUSC 326. Instrumental Conducting

3 Credits (3)

Will continue from MUSC 325 in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques as it relates to the instrumental ensemble. The class will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. May be repeated up to 3 credits. Restricted to: MUS,M ED majors. Traditional Grading with RR.

Prerequisite(s): A grade of C- or better in MUSC 325.

MUSC 327. Choral Conducting

3 Credits (3)

Continuation of conducting study with emphasis on choral rehearsal techniques, ensemble management, and literature. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Prerequisite(s): A grade of C or better in MUSC 325.

MUSC 330. Applied Music II

1-4 Credits

Continuation from MUS 230. Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Prerequisite(s): A grade of C or better in MUSC 2992 plus a juried audition.

MUSC 340. Junior Recital

1 Credit (1)

Public solo performance under the supervision of the appropriate applied instructor. 30 minutes of musical performance is required. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Corequisite(s): MUSC 330.

MUSC 341. BA Capstone

1-2 Credits (1-2)

The objective of the Capstone course for the BA degree in Music is to demonstrate the accumulation, understanding and knowledge of the student's course of study. This will take the form of an analytical paper,

recital, research paper, composition or other equally encompassing project approved by the Instructor of Record. This may involve coursework from the student's minor area of study and be a multi-disciplinary collaborative effort. Restricted to: Music majors.

Prerequisite(s): A B- or better in MUSC 2460 and MUSC 302.

MUSC 346. Elementary Music Methods

2 Credits (2)

Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in an elementary school. Emphasis on methodology of Kodaly and Orff, teaching in a multicultural setting, and developing reflective practitioners. This course requires field experience in the public schools. May be repeated up to 2 credits.

Prerequisite: A grade of C or better in MUSC 1410.

Learning Outcomes

1. Students will identify and apply ideas from various music education pedagogical approaches including Orff and Kodaly.
2. The ability to develop lesson plans for primary school teaching.

MUSC 349. Secondary Music Methods

2 Credits (2)

Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in the middle school and high school. Emphasis on teaching in a multicultural setting and developing reflective practitioners. Restricted to: Music Education majors.

Prerequisite(s): A grade of C or better in MUSC 346.

MUSC 350. Chamber Music

1 Credit (1)

Small performing ensembles that may include strings, woodwinds, brass, pianos, percussion, and voices. May be repeated up to 16 credits.

Prerequisite(s): by audition only.

MUSC 351. Opera Workshop

1 Credit (1)

Study, translation analysis, rehearsal and performance of opera. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUSC 360. Special Topics II

1-3 Credits

Emphasis on special areas of music; designed for highly motivated students. May be taken for unlimited credit.

MUSC 361. Concert Choir II

1 Credit (1)

Composed of both music and nonmusic majors. Emphasis on vocal techniques, sight-singing, and basics of choral musicianship. Students must assume leadership role. May be repeated up to 88 credits.

Prerequisite(s): by audition only.

MUSC 362. Philharmonic Orchestra II

1 Credit (1)

The University Philharmonic Orchestra is open to all students and performs a wide variety of standard orchestral literature. The orchestra performs each semester and the objectives include refining technique, stylistic characteristics, intonation, balance, bowings, color, rhythmic integrity and dynamics. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUSC 363. Jazz Ensembles II

1 Credit (1)

Performance ensemble that explore repertoire written for big band, including (but not limited to) dance band, swing, and contemporary compositions. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUSC 365. Composition I**2 Credits (2)**

Significant forms for various media. Emphasis on structural aspects of original composition. May be repeated up to 2 credits.

Prerequisite: A grade of B or better in MUSC 1460.

Learning Outcomes

1. Demonstrate the ability to analyze a variety of musical compositions
2. Demonstrate the ability to develop musical compositions from basic melodic, harmonic, rhythmic, and formal structures
3. Create new musical compositions from variety of perspectives for smaller chamber ensembles

MUSC 368. University Singers II**1 Credit (1)**

Select concert and touring choir of undergraduate and graduate students performing a cappella and accompanied choral literature. May be repeated up to 10 credits. Consent of Instructor required.

Prerequisite(s): by audition only.

MUSC 370. Wind Symphony II**1 Credit (1)**

This elite ensemble of 50 highly qualified graduate and undergraduate students performs a varied repertoire of the highest quality literature for winds. Members will also perform concerts of chamber winds literature each semester. This ensemble is dedicated to professional level performance while fostering the musical growth of its members. Conducted by the Director of Bands, this group serves as the flagship for the entire university bands program. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUSC 372. Marching Band II**1 Credit (1)**

Composed of both majors and nonmajors. Opportunity to perform all varieties of music in a contemporary style marching unit. May be repeated up to 5 credits. Consent of Instructor required. Traditional Grading with RR.

MUSC 374. Percussion Ensembles II**1 Credit (1)**

Study and performance of contemporary percussion ensemble literature. Students must assume a leadership role. May be repeated up to 5 credits.

Prerequisite(s): by audition only.

MUSC 380. Symphonic Band II**1 Credit (1)**

This is a select large ensemble, chosen by audition. It provides a challenging musical environment for skilled performers by programming repertoire that ranges from works for chamber winds, to standards of the wind band literature, to cutting edge literature. Conducted by the Associate Director of Bands, this ensemble is comprised of music majors and non-music majors alike and provides the less experienced student an opportunity to hone and refine performance skills. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUSC 386. Applied Music Pedagogy and Literature I**2 Credits (2)**

Methods, materials, problems, literature, and techniques in teaching individual lessons. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 390. Survey of Wind Literature**2 Credits (2)**

An examination of beginning to advanced literature for wind bands with an emphasis on the needs of middle and high school ensembles. It

will include a means to determine the quality of a piece as well as the standardized level of difficulty (grading). Restricted to: Music and Music Education majors.

Prerequisite(s): A grade of C- or better in MUSC 2452 and MUSC 2461.

MUSC 391. Survey of Orchestral Literature**2 Credits (2)**

An examination of beginning to advanced literature for both string orchestra and symphony orchestra with an emphasis on the needs of middle and high school ensembles. A means to determine the quality of a piece as well as the standardized level of difficulty (grading) will be included. May be repeated up to 2 credits.

Prerequisite: A grade of C- or better in MUSC 2452 and MUSC 2461.

Learning Outcomes

1. Identify significant composers and compositions that are appropriate for all grade levels and applicable to teaching music through a performance-based environment in an orchestral setting
2. Determine the quality of a work based on aesthetic ideals
3. Determine appropriate programming strategies and repertoire selection dependent upon level of difficulty and/or varying ability levels.

MUSC 392. Survey of Choral Literature**2 Credits (2)**

An examination of beginning to advanced literature for choir with an emphasis on the needs of middle and high school ensembles. A means to determine the quality of a piece as well as the standardized level of difficulty (grading) will be included. Restricted to: Music and Music Education majors.

Prerequisite(s): A grade of C- or better in MUSC 2452 and MUSC 2461.

MUSC 393. Instructional Strategies I for Instrumentalists**2 Credits (2)**

An examination of beginning to advanced literature for instrumentalists with an emphasis on the needs of middle and high school ensembles. The course includes a means to determine the quality of a piece as well as the standardized level of difficulty (grading). It also allows for full ensemble instrumentation to experience both playing the repertoire and peer teaching to better rehearsal skills.

Prerequisite: A grade of C- or better in MUSC 1410.

Learning Outcomes

1. The ability to assess the graded needs of middle and high school ensembles.
2. The development of rehearsal skills.

MUSC 394. Instructional Strategies II for Instrumentalists**2 Credits (2)**

The course focuses on rehearsal techniques for middle and high school ensembles. It includes a means to determine the quality of a piece of music as well as the standardized level of difficulty (grading). Students must also passing the TEP exam in order to enroll in this course.

Prerequisite: A grade of C- or better in MUSC 1410.

Learning Outcomes

1. The development of rehearsal techniques for middle and high school ensembles

MUSC 395. Instructional Strategies I for Vocalists**2 Credits (2)**

An examination of beginning to advanced literature for vocalists with an emphasis on the needs of middle and high school ensembles. The course includes a means to determine the quality of a piece as well as the standardized level of difficulty (grading). It also allows for full ensemble instrumentation to experience both playing the repertoire and

peer teaching to better rehearsal skills. Students must also pass the TEP exam to enroll in this course.

Prerequisite: A grade of C- or better in MUSC 1410.

Learning Outcomes

1. The ability to assess the graded needs of middle and high school ensembles.
2. The development of rehearsal skills.

MUSC 396. Instructional Strategies II for Vocalists

2 Credits (2)

The course focuses on rehearsal techniques for middle and high school ensembles. It includes a means to determine the quality of a piece of music as well as the standardized level of difficulty (grading). Students will also need to pass the TEP exam in order to enroll in the course.

Prerequisite: A grade of C- or better in MUSC 1410.

Learning Outcomes

1. The development of rehearsal techniques for middle and high school ensembles.

MUSC 397. Administrative Music Methods

1 Credit (1)

Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in the middle school and high school. Emphasis on administration. Students must also pass the TEP exam to enroll in this course.

Prerequisite: A grade of C- or better in MUSC 1410.

Learning Outcomes

1. Gain insight and experience with administrative strategies and procedures in secondary classroom
2. Work on interview skills as well as resume and cover letter composition
3. Collect a set of usable tools that a student can carry with them into their first job.
4. Gain familiarity with laws and regulations regarding programs and money spent

MUSC 413. Form and Analysis

3 Credits (3)

Forms in tonal music and basic analytic techniques including music from diverse cultures and media.

Prerequisite(s): A grade of C- or better in MUSC 2452 and MUSC 2461.

MUSC 415. Orchestration

3 Credits (3)

Scoring for full orchestra and various instrumental combinations with consideration of instrument timbres, strengths, weaknesses and ranges. May be repeated up to 3 credits. Restricted to: Music and Music Education majors.

Prerequisite: A grade of C- or better in MUSC 2452, MUSC 2461 and MUSC 2310.

Learning Outcomes

1. Write effectively and idiomatically for voice, orchestra, and Band.

MUSC 417. Studio Accompanying

2 Credits (2)

Practical application of collaborative piano skills in a studio setting for Piano Performance majors. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 421. Music of the Baroque Era

3 Credits (3)

An overview of the music of the Baroque era with an emphasis on history and literature. May be repeated up to 3 credits.

Prerequisite: MUSC 303.

Learning Outcomes

1. Discuss the historical and social context from which Baroque music developed.
2. Summarize the career of several well-known Baroque composers.
3. Outline the musical traits common and unique to different regions in the Baroque period and name the most important Baroque genres.
4. Describe the musical style of several well-known and lesser-known Baroque composers, citing examples from specific works.
5. Examine thirty-three Baroque musical works.
6. Write a term paper based on an analysis of a Baroque musical work.
7. Interpret and perform Baroque works with an understanding of historically-informed performance.
8. Describe Baroque string, wind, brass, keyboard, and percussion instruments: their appearance, construction, and manner of playing.

MUSC 422. Music of the Classic Era

3 Credits (3)

An overview of the music of the Classic era with an emphasis on history and literature.

Prerequisite(s): MUSC 303.

MUSC 424. Music of the Twentieth Century

3 Credits (3)

An overview of the music of the Twentieth Century with an emphasis on history and literature. Consent of Instructor required.

Prerequisite(s): MUSC 303.

MUSC 429. Opera: History and Literature

3 Credits (3)

An overview of the operatic art form from the Florentine Camerata and Baroque opera through current 21st-century works, with an emphasis on historical context, composers, and significant works. Restricted to: Music, Music Education majors.

Prerequisite(s): MUSC 303 or consent of instructor.

Learning Outcomes

1. The student will be able to effectively identify and discuss operatic developments and traditions in historical context as well as demonstrate a knowledge of operatic composers and significant operatic works.

MUSC 430. Applied Music III

1-4 Credits

Continuation from MUS 330. Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Prerequisite(s): A grade of C or better in MUSC 330 plus a juried audition.

MUSC 440. Senior Recital

1-2 Credits (1-2)

Public solo performance under the supervision of the appropriate applied instructor. 60 minutes of musical performance is required for enrollment of 2 hours credit. 30 minutes of musical performance is required for enrollment of 1 hour credit. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Corequisite(s): MUSC 430.

MUSC 441. Supervised Studio Teaching

2 Credits (2)

Teaching of private lessons under supervision. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 450. Research Methods

3 Credits (3)

Introduction to methodology of music research. Emphasis on important scholarly resources and academic writing. Restricted to majors. Main campus only. No S/U option.

Prerequisite: consent of instructor.

MUSC 470. Special Topics III

1-3 Credits

Designed for highly motivated students. Independent study and individual guidance. May be taken for unlimited credit.

MUSC 471. Graduate Theory Review

3 Credits (3)

Comprehensive and accelerated study of modes, diatonic harmony, and classical form of the common practice period. Restricted to: Music majors. Traditional Grading with RR.

MUSC 475. Intermediate Conducting

3 Credits (3)

Serves as a bridge from undergraduate conducting study to the graduate level. Advanced undergraduate students may enroll to learn how the graduate program in conducting functions. The course also serves as the introductory experience for newly admitted graduate conducting majors. After successful completion of this course, students will be able to: Study musical scores from a conducting perspective; Demonstrate effective predetermined gestures and movements; Lead an ensemble; Research and give presentations related to composers and their music; Demonstrate advanced knowledge of conducting practices.

Prerequisite(s): A grade of C- or better in MUSC 326 or MUSC 327.

MUSC 477. Graduate Music History Review

3 Credits (3)

Comprehensive and accelerated study of music history from antiquity to the present. Restricted to: Music majors. Traditional Grading with RR.

MUSC 486. Applied Music Pedagogy and Literature II

2 Credits (2)

Methods, materials, problems, literature, and techniques in teaching individual lessons. Consent of Instructor required. Restricted to: Music majors. Traditional Grading with RR.

MUSC 498. Independent Study

1-3 Credits

For students with a strong musical background wishing to explore content beyond the traditional curriculum. Restricted to majors. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

MUSC 511. Survey of Traditional Harmony

3 Credits (3)

Tonal harmony in common practice and theory of the late 17th, 18th, and early 19th centuries. Restricted to: Music majors. Traditional Grading with RR.

Prerequisite(s): A grade of B or better in MUSC 471.

MUSC 513. Twentieth Century Art Music

3 Credits (3)

Analytical techniques, structural design and compositional materials from Debussy to the Minimalist school in historical context. Restricted to: Music majors.

Prerequisite(s): A grade of B or better in MUSC 471.

MUSC 518. Seminar in Music Theory

3 Credits (3)

Varying topics in Music Theory, providing a more specific and in-depth study of the particular topic. May be repeated up to 6 credits. Restricted to: Music majors. Traditional Grading with RR.

Prerequisite(s): A grade of B or better in MUSC 471.

MUSC 519. Seminar in Music History

3 Credits (3)

Varying topics in Music History, providing a more specific and in-depth study of the particular topic. May be repeated up to 6 credits. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 477.

MUSC 521. Music of the Baroque Era: History and Literature

3 Credits (3)

An overview of the music of the Baroque Era with an emphasis on history and literature. May be repeated up to 3 credits.

Prerequisite: A grade of B or better in MUSC 477.

Learning Outcomes

1. Discuss the historical and social context from which Baroque music developed.
2. Summarize the career of several well-known Baroque composers.
3. Outline the musical traits common and unique to different regions in the Baroque period and name the most important Baroque genres.
4. Describe the musical style of several well-known and lesser-known Baroque composers, citing examples from specific works.
5. Examine thirty-three Baroque musical works.
6. Write a term paper based on an analysis of a Baroque musical work.
7. Interpret and perform Baroque works with an understanding of historically-informed performance.
8. Describe Baroque string, wind, brass, keyboard, and percussion instruments: their appearance, construction, and manner of playing.

MUSC 522. Music of the Classical Era: History and Literature

3 Credits (3)

An overview of the music of the Classical era with an emphasis on history and literature. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 477.

MUSC 523. Music of the Romantic Era: History and Literature

3 Credits (3)

An overview of Romantic era music, with an emphasis on history and literature. Restricted to MUS Majors. May be repeated up to 3 credits.

Prerequisite: A grade of B or better in MUSC 477.

Learning Outcomes

1. Develop an in depth knowledge of composers of the Romantic era
2. Develop the ability to Recognize Major compositions of the Romantic Era
3. Develop the ability to analyze works from the Romantic Era.

MUSC 529. Opera History and Literature

3 Credits (3)

An overview of the operatic art form from the Florentine Camerata and Baroque opera through current 21st-century works, with an emphasis on historical context, composers, and significant works. Restricted to: M ED, MUS majors.

Prerequisite(s): A grade of B or better in MUSC 477.

Learning Outcomes

1. The student will be able to effectively identify and discuss operatic developments and traditions in historical context as well as

demonstrate a knowledge of operatic composers and significant operatic works.

MUSC 530. Seminar in Music Education

3 Credits (3)

Varying topics in Music Education, providing a more specific and in-depth study of the particular topic. Restricted to: MUS majors.

MUSC 531. Music Education in the Diverse Classroom

3 Credits (3)

This course is designed to provide an introduction to diverse and at-risk student groups in educational settings in the music classroom. It will help the course participants explore strategies and gain skills to enhance the musical growth of marginalized groups of students. There is an emphasis on identification, behavioral patterns, building interpersonal relationships, and will include a critical review of selected current research studies in music education. Armed with this knowledge, course participants will be better prepared to understand at-risk students and how best to implement strategies in the classroom. May be repeated up to 3 credits. Restricted to: MUS majors.

Learning Outcomes

1. Students will access and utilize the basic research journals and other sources of research reports and summaries, including those identified using computer technology in the field of music education.
2. Students will describe the structure of most qualitative research studies and their aide in identifying student traits.
3. Students will understand and use most of the language, terms and vocabulary found in qualitative research reports in discussing and identifying behavioral patterns of at-risk students.
4. Students will appraise qualitative research in a systematic way; analyze and review what the research produced in order to isolate the strategies available to incorporate in classroom teaching scenarios.
5. Students will independently retrieve, critique and summarize research related to at-risk students in music education.

MUSC 535. Current Issues in Music Education

3 Credits (3)

This course examines the rich and challenging complexities of music teaching and learning from a variety of perspectives. Educational theory to pedagogical inquiry of current educational practice will be examined, calling students to critically reflect on such professional activities as lesson planning, curriculum design, repertoire choice, program assessment, advocacy in the arts, and student evaluation. Restricted to: MUS (Music Ed track only) majors.

MUSC 540. Graduate Recital/Analytical Paper

4 Credits (4)

This course is for students completing a Master of Music with a Performance emphasis. A public recital will be given and an accompanying research paper will be submitted. Restricted to: MUS majors.

MUSC 574. Advanced Choral Conducting I

3 Credits (3)

This course will continue the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 575. Advanced Choral Conducting II

3 Credits (3)

This is the final course in preparation for the student's graduate conducting concert. It will continue the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 574.

MUSC 576. Advanced Instrumental Conducting I

3 Credits (3)

The role of the conductor is to lead, react to, alter, and reinforce the performance of the ensemble. This course will continue in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 577. Advanced Instrumental Conducting II

3 Credits (3)

The role of the conductor is to lead, react to, alter, and reinforce the performance of the ensemble. This course will continue in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 576.

MUSC 578. Advanced Choral Literature

2-3 Credits (2-3)

An examination of significant choral works from 1200 to the present, including composers, genres, and historical context May be repeated up to 3 credits. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 579. Advanced Instrumental Literature

2-3 Credits (2-3)

An examination of significant instrumental works from the Baroque period to the present, including composers, genres, and historical context May be repeated up to 3 credits. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 580. Ensemble Performance

1 Credit (1)

Performance in university ensembles. May be repeated up to 99 credits.

Prerequisite(s): by audition only.

MUSC 582. Applied Music

2-4 Credits (2-4)

For music majors, individual instruction, including improvisation skills and techniques. Students may enroll for 2 or 4 credits. Students must audition in order to enroll. Consent of instructor required. May be repeated up to 24 credits.

Learning Outcomes

1. Develop of Musical Performance Attributes.
2. Development of technical Skills.
3. Development of Aural Skills.
4. Development of Musical Analytical Skills.
5. Development of Improvisatory Skills.

MUSC 586. Applied Music Pedagogy and Literature III**2 Credits (2)**

Methods, materials, problems, literature, and techniques in teaching individual lessons. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 486.

MUSC 598. Special Research Programs**1-4 Credits**

May be taken for unlimited credit.

MUSC 599. Master's Thesis**15 Credits**

Thesis.

NA - NURSING ASSISTANT

NA 101. Nursing Assistant Theory and Lab**5 Credits (4+2P)**

Nurse aide skills with emphasis on a bio-psychosocial-cultural approach to resident/patient/client care. Students will learn the nursing assistant roles, responsibilities, and scope of practice while learning, developing, and practicing clinical skills in the nursing laboratory. With successful completion of NA 101 and NA 201, the student meets the New Mexico Department of Health training requirements and is eligible to take the Nurse Aide Training & Competency Evaluation Program (NATCEP) nursing assistant certification exam. Students must have current Basic Life Support for Health Care Providers. Requires a C (80%) or better to pass. Restricted to Community Colleges campuses only.

Corequisite: NA 201.

Learning Outcomes

1. Apply theoretical knowledge associated with nursing assisting in providing basic healthcare services.
2. Perform essential clinical skills within the nursing assistant scope of practice in long-term, acute care, and ambulatory care settings.
3. Recognize factors that affect procedures and results, and take appropriate actions within predetermined limits when indicated, including resident/patient compromise or complications.
4. Demonstrate professional conduct and interpersonal communication skills with patients, other health care professionals, and with the public.
5. Recognize the responsibilities of other health care personnel and interact with them with respect for their healthcare roles and resident/patient care.
6. Apply basic scientific principles and evidenced-based practice in learning new techniques and procedures.
7. Relate vital signs, point-of-care testing, and physical psychological findings to common disease processes.
8. Evaluate occupational exposures, environmental safety hazards, high risk situations, and emergency responses related to health care professions.
9. Demonstrate soft skills related to assisting with patient assessment, mobility, safety, nutrition, and care of the environment. 1
10. Demonstrate professionalism when interacting with patient populations across the lifespan; including patient education and emergent situations. 1
11. Explain legal and ethical considerations, including HIPAA and scope of practice related to healthcare settings.

NA 102. Sterile Processing Technician**3 Credits (2+1P)**

This course will prepare the student to work as a Sterile Processing Technician, performing critical functions that support both the hospital and Operating Room. The student will learn about infection control, instrument reprocessing, decontamination, disinfection, and sterilization. All critical aspects of sterile processing will be covered to include applicable standards and regulations. This field is constantly evolving and those desiring to work in this profession must ensure that they stay abreast of the science behind the discipline. Restricted to Community Colleges campuses.

Prerequisite: CCDE 110 N.

Learning Outcomes

1. Summarized the legal responsibilities, ethical standards, and safety practices related to Sterile Processing.
2. Control and eliminate the spread of microorganisms.
3. Articulate standards and regulations as well as recommendations by professional organizations.
4. Properly clean, decontaminate, disinfect, and sterilize basic surgical instrumentation.
5. Prepare and assemble surgical trays and kits to include packaging and quality assurance indicators.
6. Utilize various sterilization modalities.

NA 104. Nursing Assistant Fundamentals**3 Credits (3)**

This course prepares students for employment as a Nursing Assistant in a Long Term Care Facility. Theory and basic nursing care skills will be taught with an emphasis being placed on the psychosocial-cultural approach to client care. Students will learn communication skills, basic anatomy and physiology, growth and development, infection control, body mechanics, basic nutrition, client/resident elimination needs, the client/resident unit, vital signs, range of motion exercises, bed making, rehabilitation and restorative care, client admission and discharge, common health problems, dealing with death and dying, and basic medical terminology. NA 104 and NA 104L (laboratory) must be successfully completed with a C- or better in order to continue to NA 105 Nursing Assistant Clinical. NA 105 must also be successfully completed with a C- or better to be eligible to take the state certification competency examination. Attendance is required to meet the federal requirements for training hours and content prior to direct contact with a patient/resident and the state competency examination. Students must test out of all CCDE and CDR courses and eligible to take ENGL 1110G to enroll in this course. Restricted to Community Colleges campuses only.

Corequisite(s): NA 104 L.

NA 104 L. Nursing Assistant Fundamentals Lab**1 Credit (3P)**

This course prepares students for employment as a Nursing Assistant in a Long Term Care Facility. Students will learn and demonstrate personal care skills including bathing, grooming, dressing, toileting, assisting with eating and hydration, skin care, transfers and positioning. Students will also learn and demonstrate the use of assistive devices, and how to maintain resident safety, dignity and privacy. NA 104 & NA 104L must be successfully completed with a C- or greater in order to continue to NA 105 Clinical. NA 105 must be successfully completed with a C- or greater to be eligible to take the state certification competency examination.

Prerequisite(s)/Corequisite(s): NA 104. Prerequisite(s): English COMPASS score of 35 or greater or CCDE 110N, and reading COMPASS score of 55 or greater or CDR 105N. Restricted to Community Colleges campuses only.

NA 105. Nursing Assistant Clinicals**4 Credits (3+3P)**

Extension of basic fundamentals of personal care, including theory, skills and clinical experience leading to the certified Nursing Assistant Examination at the conclusion of the semester. Continuation of NA 104. Requires a C or better to pass. Restricted to: Community Colleges only. **Prerequisite(s):** C or better in NA 104 or consent of instructor.

**NA 109. Phlebotomist Basic
4 Credits (3+3P)**

This course provides the latest information, techniques, skills, and equipment for blood and specimen collection based on the standards of the Clinical and Laboratory Standards Institute, Needlestick Prevention Act, Joint Commission 2008 National Patient Safety Goals, OSHA and CDC. An advanced skills lab is included in the course to provide a "hands-on" practice experience and a 30 hour practicum in a supervised work environment collecting blood and specimens on actual patients for laboratory tests. Attendance is mandatory. Prepares students for employment as a phlebotomist in health care settings. Requires a "C" or better to pass. Upon successful completion of the course, student has the opportunity to test for National Healthcareer Certification. Consent of Instructor required. Restricted to Community Colleges campuses only.

Prerequisite/Corequisite: BIOL 1130 or BIOL 2225.

Learning Outcomes

1. Students will demonstrate use of available resources and equipment pertinent to the role of a phlebotomist.
2. Students will employ concepts of medical asepsis and infection control.

**NA 110. Electrocardiogram Technician Basic
4 Credits (3+2P)**

Prepares students for employment as an Electrocardiogram Technician. Includes basic theory of the cardiovascular system, cardiac rhythm interpretation, 12 lead ECG lead placement, and ECG equipment trouble shooting. The course includes an advanced skills laboratory for "hands-on" practice and 16 hours of supervised clinical in the work environment assisting with ECG testing. Attendance is mandatory. Course requires a grade of "C" or better to pass. Upon successful completion of course, student has the opportunity to test for National Healthcareer Certification. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Perform ECG's, including patient preparation, electrode placement, recording ECG's, mounting upload of ECG to patient's chart.
2. Calculate a patient's heart rate and identify the heart rhythm from an ECG tracing.
3. Identify artifacts; waveform elements of the cardiac cycle, including variances related to ischemia, injury or infarction; as well as, major classifications of arrhythmias.
4. Prepare and monitor patient's for Holter monitoring and telemetry.
5. Prepare, conduct and monitor patients during stress testing.
6. Recognize factors that affect procedures and results, and take appropriate actions within predetermined limits when indicated, including patient compromise or complications.
7. Demonstrate professional conduct and interpersonal communication skills with patients, other health care professionals, and with the public.
8. Recognize the responsibilities of other health care personnel and interact with them with respect for their jobs and patient care.
9. Apply basic scientific principles in learning new techniques and procedures. 1
10. Relate electrocardiogram findings to common disease processes.

**NA 111. Alzheimer/Dementia Care Focus
3 Credits (3)**

Students will learn respectful care of Alzheimer/Dementia persons while ensuring their dignity, maximizing safe independence focusing on strengths and abilities.

Prerequisite(s)/Corequisite(s): NA 104 or NA 101. Restricted to: Community Colleges only.

**NA 114. Patient Care Fundamentals
4 Credits (3+1P)**

This course provides an introduction to patient care services, functions and responsibilities for allied healthcare providers. Ethical and legal considerations; introduction to disease processes; interdisciplinary communication; and patient safety concepts are discussed. Students will be instructed on patient intake procedures, infection control principles, safe body mechanics and patient transfer techniques.

Prerequisite: ENGL1110G.

Learning Outcomes

1. Upon successful completion of this course, students will be able to demonstrate knowledge of the healthcare delivery system and health occupations.
2. Upon successful completion of this course, students will be able to apply basic health care concepts and skills for a variety of settings and a diverse patient population.
3. Upon successful completion of this course, students will demonstrate the ability to communicate with an interdisciplinary team.

**NA 115. Phlebotomist Technician
6 Credits (3+6P)**

Basic theory and skills of phlebotomy following OSHA and Center for Disease Control guidelines. Prepares students for the requirements of testing for the ASCP certification exam and employment in a healthcare organization as a phlebotomist in licensed settings. Laboratory hours include infection control skills & practice, patient assessment & teaching, and practice in venipuncture. Clinical time includes clinical laboratory processes and operations, patient assessment, venipuncture, and exposure to clinical policies and procedures. Upon successful completion students are workforce ready. Requires C or better to pass. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Collect and process biological specimens for analysis.
2. Recognize factors that affect procedures and results, and take appropriate actions within predetermined limits when corrections are indicated.
3. Monitor quality control within predetermined limits.
4. Perform preventative and corrective maintenance of equipment and instruments or refer to appropriate source for repairs.
5. Demonstrate professional conduct and interpersonal communication skills with patients, laboratory personnel, other health care professionals, and with the public.
6. Recognize the responsibilities of other laboratory and health care personnel and interact with them with respect for their jobs and patient care.
7. Apply basic scientific principles in learning new techniques and procedures.

**NA 201. Nursing Assistant Theory and Clinical
1 Credit (2P)**

Nurse aide skills with emphasis on a bio-psychosocial-cultural approach to resident/client/patient care. Students will practice the nursing

assistant roles, responsibilities, and recognize the scope of practice while learning, developing, and practicing clinical skills in the clinical setting. With successful completion of NA 101 and NA 201, the student meets the New Mexico Department of Health training requirements and is eligible to take the Nurse Aide Training & Competency Evaluation Program (NATCEP) nursing assistant certification exam. Students must have current Basic Life Support for Health Care Providers. Requires a C (80%) or better to pass. Restricted to Community College Campuses only.
Corequisite: NA 101.

Learning Outcomes

1. Apply theoretical knowledge associated with nursing assisting in providing basic healthcare services.
2. Perform essential clinical skills within the nursing assistant scope of practice in long-term, acute care, and ambulatory care settings.
3. Recognize factors that affect procedures and results, and take appropriate actions within predetermined limits when indicated, including resident/patient compromise or complications.
4. Demonstrate professional conduct and interpersonal communication skills with patients, other health care professionals, and with the public.
5. Recognize the responsibilities of other health care personnel and interact with them with respect for their healthcare roles and resident/patient care.
6. Apply basic scientific principles and evidenced-based practice in learning new techniques and procedures.
7. Relate vital signs, point-of-care testing, and physical psychological findings to common disease processes.
8. Evaluate occupational exposures, environmental safety hazards, high risk situations, and emergency responses related to health care professions.
9. Demonstrate soft skills related to assisting with patient assessment, mobility, safety, nutrition, and care of the environment. 1
10. Demonstrate professionalism when interacting with patient populations across the lifespan; including patient education and emergent situations. 1
11. Explain legal and ethical considerations, including HIPAA and scope of practice related to healthcare settings.

NA 204. Patient Care Technician

4 Credits (3+3P)

This course will prepare Certified Nursing Assistants (CNAs) to work in the acute care setting through an expansion of their existing basic skill set. Students will acquire expanded acute care skills, critical thinking skills, and knowledge in caring for patients of all ages. Currently CNA certified. Restricted to Community Colleges campuses only.

Prerequisite(s): (NA 104, NA 105, NA 109, NA 110, AHS 120, and (BIOL 1130 or (BIOL 2210 & BIOL 2225))).

Corequisite(s): NA 205.

NA 205. Patient Care Technicians Practicum

4 Credits (1+9P)

This course will prepare Certified Nursing Assistants (CNAs) to work in the acute care setting through an expansion of their existing basic skill set. Students will acquire expanded acute care skills, critical thinking skills, and knowledge in caring for patients of all ages. Students will go to acute care settings to practice newly acquired skills. Must have a "C" or better to pass. Restricted to Community Colleges campuses only.

Prerequisite(s): (NA 104, NA 105, NA 109, NA 110, AHS 120, & (BIOL 1130 or (BIOL 2210 & BIOL 2225))) Currently CNA Certified.

Corequisite(s): NA 204.

NA 212. Medical Assistant Capstone Course

6 Credits (6)

This course provides the student with entry-level theory and limited "hands-on" training in basic and routine clinical office tasks. The course will equip the Medical Assistant (MA) student with the competencies required to perform in a medical office under the direct supervision of a physician. The graduate will be able to assist the physician with physical exams, ECGs, phlebotomy, and minor surgical procedures. CNA Certification within the last 5 years.

Prerequisite(s): NA 105, NA 110, NA 109, AHS 120, BIOL 1130, BOT 208, HIT 228, HIT 248.

NA 214. Medical Assistant Practicum

6 Credits (1+6P)

This course is the practicum for NA 212 Medical Assistant Fundamentals Capstone Course. Students will prepare for a career as a medical assistant in medical offices and clinics. During practicum students will observe and participate in 180 hours in a supervised work environment using knowledge and skills learned in NA 212. This course includes weekly post-practicum conferences with the instructor. The student will be evaluated by both the employer and the instructor. Requires a "C" or better to pass. Upon successful completion the student may be eligible to test for National Certification. Students who have been CNA Certified within the last 5 years can use this to enroll into this course. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): NA 212. Prerequisite(s): NA 105, NA 110, NA 109, AHS 120, BIOL 1130, BOT 208, HIT 228, HIT 248. Restricted to Las Cruces campus only.

NATV-NATIVE AMERICAN STUDIES

NATV 1150G. Introduction to Native American Studies

3 Credits

This course surveys the significance of Native American Studies through an inter-disciplinary approach to two areas of academic concentration: Indigenous Learning Communities, and Leadership and Building Native Nations.

Learning Outcomes

1. Students will develop a general understanding of the various concentration areas in Native American Studies throughout the United States.
2. Students will identify the contributions of various academic disciplines to Native American Studies.
3. Students will understand the intricacies and intersections of Indigenous scholarship in Native American Studies.
4. Students will articulate the importance of Native American Studies as a stand-alone discipline in academia.
5. Students will be able to connect community issues in both Native and Non-Native America to concepts taught in Native American Studies.

NATV 2120. Native American Experience

3 Credits (3)

Introductory survey of Native American History, culture and contemporary issues. Students read literature by and about Native Americans covering a variety of topics including tribal sovereignty, federal policy, activism, economic development, education and community life.

Learning Outcomes

1. Apply cultural and historical context to text about Native Americans (by Natives and non-Natives).
2. Analyze texts about Native Americans in relation to tribal sovereignty, federal policy, activism, economic development, education and community life.

- Evaluate texts by and about Native Americans from an NAS perspective.

NATV 3120. An Indigenous Peoples History of the United States
3 Credits (3)

This course is a history of United States as experienced by the Indigenous people. It delineates the Indigenous experience as reflected in Native American scholarship and research. The Indigenized and decolonized Native perspective provides an educative authenticity of Indigenous knowledge comprehensible to all, particularly the non-Indian.

Learning Outcomes

- The student can identify and describe significant historic periods as experienced by the Indigenous inhabitants in United States.
- The student is able to identify and differentiate aspects of the Native American historic experience in relationship to the standard linear chronicle timeline as reflected in U.S. history.
- The student is able to compose a brief summary review of the Native American historic periods as evidenced in scholarship and research.

NATV 4110. Native American Women
3 Credits (3)

Students investigate the status, experience, and contributions of Native American women from pre-contact to contemporary times. Identifying the contribution of Native American women to societies, communities, and Nations as keepers of knowledge, teachings, and traditions. Crosslisted with: ANTH 553.

Learning Outcomes

- Explore and examine the roles of American Indian women within a tribal society and analyze the impact of colonization and decolonization upon their place / roles over time.
- Evaluate historical and contemporary issues of importance to American Indian women and their communities.
- Assess a topic, book or issue of importance to Native women through a research paper, case study, or exam demonstrating in-depth knowledge and understanding.
- Demonstrate in-depth knowledge and understanding of Native American women histories and contemporary issues.
- Formulate a paper on Native woman/tribal women from historical or contemporary sources and share with class (undergraduates).
- Demonstrate in-depth knowledge and understanding of Native American women through an exam/final (undergraduates).

NATV 4120V. Native American Visual Culture
3 Credits (3)

This course examines the various theoretical and methodological challenges inherent to the study of indigenous art, including the issues of identity, sovereignty, gender, cultural critique, and the role of the artist.

Learning Outcomes

- Identify NA / Indigenous, film/video writers and directors.
- Locate NA / Indigenous nations with their geo-physical location.
- Consider issues of identity concerning Indigenous population.
- Apply "colonizing" / "decolonizing" methodologies.
- To practice writing short analytical journal entries.
- To learn effective group discussion techniques

NATV 4130. Indigenous Ways of Knowing
3 Credits (3)

This course examines Indigenous knowledge and ways of knowing to gain an appreciation of an epistemology and ontology that may be outside the boundaries of Eurocentric theory, concepts, and

principles. The course explores and analyzes the nature and ways that Native Americans' develop knowledge as well as the concepts and composition of metaphysics and cosmology. Students analyze knowledge development through mythology and storytelling by emphasizing the nature of difference rather than comparative analysis.

Learning Outcomes

- By the end of the semester, through dialogue and interaction, reading, writing, exercises, out of classroom experiences, audio/visual aids and computer technologies, the student is able to describe and explain characters and ways that Native Americans' develop knowledge (epistemology); as measured by reports, critiques, reflective summaries, learning logs, analysis techniques and assessments.
- By the end of the semester, through dialogue and interaction, reading, writing, exercises, out of classroom experiences, audio/visual aids and computer technologies, the student is able to describe and explain concepts and composition of the metaphysics and cosmology (ontology) of Native American knowledge; as measured by reports, critiques, reflective summaries, learning logs, analysis techniques, and assessments.

NATV 4210. Native American Education
3 Credits (3)

This is a survey course that explores the education of Natives from multiple perspectives; the perspectives of Native theories and practices, the colonizers'-imposed education theories and practices, U.S. federal educational policies and practices, tribal systems of education, and responses from those experiencing the education. Starting with traditional education, the course will examine colonial education, federal and tribal efforts, contemporary models of Indian education including issues and challenges, and the educational sovereignty of tribes.

Learning Outcomes

- Describe (verbally and written) traditional methods of education used by Native Americans.
- Discuss and interpret (verbally and written) the theories and practices of educating Natives in different eras.
- Compare (verbally and written) the different systems of education for Native Americans.
- Articulate (verbally and written) contemporary Native American educational issues and challenges.
- Be able to articulate (verbally and written) support for educational sovereignty of tribes.
- Research, analyze and orally present a written paper about an American Indian boarding school and its legacy.

NATV 4220. Federal Indian Policy
3 Credits (3)

This course provides a basic historic overview of federal Indian policy. As preexisting sovereign nations, the U. S. Constitution acknowledges only states, foreign nations, and Indian tribes as sovereign governments. The purpose is to provide a fundamental understanding of the unique position Indian tribes occupy in this country. It examines impacts and effects on culture and contemporary livelihood.

Learning Outcomes

- The student can recall and identify fundamental laws, policies, and court actions affecting Indian tribes.
- The student can describe and explain the effects of federal Indian policy on activities and interactions between Native American and the overall society.

3. The student can analyze and interpret the impacts and effects of federal Indian policy on culture and contemporary lives of Native Americans

NATV 4310. Indigenizing Methodologies in Native American Studies
3 Credits (3)

This course utilizes decolonizing (indigenizing) methodologies and praxis to gain insight into the complex effects of oppression and colonization. The course uses critical and indigenous concepts to identify and analyze hegemonic, ethnocentric, historic and contemporary human rights and social justice issues of indigenous people. Emphasis includes research theory and methodology, such as community participatory action research, that is collaborative, inclusive, and pragmatic to ethics, intellectual property, and cultural boundaries of indigenous people.

Crosslisted with: ANTH 541.

Learning Outcomes

1. The student is able to describe and explain some of the complex effects of oppression and colonization on indigenous peoples.
2. The student is able to identify historic and contemporary issues that have influenced and affected the study and research of indigenous peoples.
3. The student is able to convey particular research theory and methodology that is collaborative, inclusive, and pragmatic to ethics and cultural boundaries of indigenous people.

NATV 5110. Advanced Indigenizing Methodologies in Native American Studies

3 Credits (3)

This course utilizes indigenizing methodologies and praxis to gain insight into the complex effects of oppression and colonization. Critical and indigenous concepts are used to identify and analyze hegemonic, ethnocentric, historic and contemporary human rights and social justice issues of indigenous people. Research theory and methodology such as community participatory action research that is collaborative, inclusive, and pragmatic to ethics, intellectual property, and cultural boundaries of indigenous people is emphasized.

Learning Outcomes

1. Explain how producing research is connected to producing knowledge.
2. Identify and describe the impact of colonialism and imperialism on disrupting ways of knowing.
3. Recognize political and cultural implications of the world seen as a colonial, constructed narrative.
4. Describe how a social reality can have set political and ideological conditions.
5. Distinguish how indigenous methodologies relate to decolonizing methods.
6. Describe how decolonizing methods are a different approach to research.
7. Identify decolonizing methods that have been used in research.
8. Critically engage with research lenses stemming from a decolonizing standpoint.

NATV 5120. Advanced Indigenous Peoples History of the United States
3 Credits (3)

This course is a history of United States as experienced by the Indigenous people. It delineates the Indigenous experience as reflected in Native American scholarship and research. The Indigenized and decolonized Native perspective provides an educative authenticity of Indigenous knowledge comprehensible to all, particularly the non-Indian.

Learning Outcomes

1. The student can identify and describe significant historic periods as experienced by the Indigenous inhabitants in United States
2. The student is able to identify and differentiate aspects of the Native American historic experience in relationship to the standard linear chronicle timeline as reflected in U.S. history.
3. The student is able to compose a brief summary review of the Native American historic periods as evidenced in scholarship and research.

NATV 5210. Advanced Native American Education
3 Credits (3)

This is a survey course that explores the education of Natives from multiple perspectives; the perspectives of Native theories and practices, the colonizers'-imposed education theories and practices, U.S. federal educational policies and practices, tribal systems of education, and responses from those experiencing the education. Starting with traditional education, the course will examine colonial education, federal and tribal efforts, contemporary models of Indian education including issues and challenges, and the educational sovereignty of tribes.

Learning Outcomes

1. Describe (verbally and written) traditional methods of education used by Native Americans.
2. Discuss and interpret (verbally and written) the theories and practices of educating Natives in different eras.
3. Compare (verbally and written) the different systems of education for Native Americans.
4. Articulate (verbally and written) contemporary Native American educational issues and challenges.
5. Be able to articulate (verbally and written) support for educational sovereignty of tribes.
6. Research, analyze and orally present a written paper about an American Indian boarding school and its legacy.

NATV 5220. Advanced Native American Visual Cultures
3 Credits (3)

This course examines the various theoretical and methodological challenges inherent to the study of indigenous art, including the issues of identity, sovereignty, gender, cultural critique, and the role of the artist.

Learning Outcomes

1. Identify NA/Indigenous, film/video writers and directors.
2. Locate NA/Indigenous nations with their geo-physical locations.
3. Consider issues of identity concerning Indigenous populations.
4. Apply "colonizing"/ "decolonizing" methodologies.
5. To Practice writing short analytical journal entries.
6. To learn effective group discussion techniques.

NATV 5520. Advanced Native American Women
3 Credits (3)

Students investigate the status, experience, and contributions of Native American women from pre-contact to contemporary times. Identifying the contribution of Native American women to societies, communities, and Nations as keepers of knowledge, teachings, and traditions.

Learning Outcomes

1. Explore and examine the roles of American Indian women within a tribal society and analyze the impact of colonization and decolonization upon their place / roles over time.
2. Evaluate historical and contemporary issues of importance to American Indian women and their communities.

3. Assess a topic, book or issue of importance to Native women through a research paper, case study, or exam demonstrating in-depth knowledge and understanding.
4. Demonstrate in-depth knowledge and understanding of Native American women histories and contemporary issues.
5. Formulate a paper on Native woman/tribal women from historical or contemporary sources and share with class (undergraduates).
6. Demonstrate in-depth knowledge and understanding of Native American women through an exam/final (undergraduates).

NAV-NAVAJO

NAV 101. Introduction to Navajo Studies

3 Credits (3)

Covers geography, demography, institutions of modern Navajo society with historical overview. Restricted to: Community Colleges only.

NAV 111. Elementary Navajo I

4 Credits (4)

Navajo for beginners with emphasis on speaking skills.

Prerequisite: not open to Navajo-speaking students except by consent of instructor.

NGEC-NATURAL GAS ENGINE COMP

NGEC 133. Natural Gas Engine Repair Technology

5 Credits (5)

This course will cover the engine fundamentals, cylinder head and valve trains, engine block, engine servicing, lubrication and cooling Systems. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. A basic knowledge about engine operation.
2. Practice shop safety, ability to identify potential hazards, tool identification, proper rigging and crane operation.
3. Ability to identify specific components of a natural gas engine and their function.
4. Locate and identify various components on and off an engine.
5. Safely start large stationary industrial natural gas engines.
6. List the steps of preventive maintenance on natural gas engines.
7. Completely disassemble a natural gas engine, clean and organize parts, and measure critical clearances using appropriate precision measuring tools.
8. Replace or repair any defects that are found on assigned engine, compile a list of parts needed to make repairs, assemble engine correctly, and start and run the engine.

NGEC 175. Natural Gas Compression Technology I

4 Credits (4)

This course delivers an introduction to the theory, application, rotary, and centrifugal natural gas compressor including operating principles, maintenance, and repair of the reciprocating, identification of the component parts and their functions, methods of balancing, and lubrication systems, and design characteristics. This course will also include calculations of gas flow, compressor sizing, rod loads, compressor analysis charts and horsepower ratings. In addition, this course will cover safety, precision measurement, use of the manuals, use of tools, and proper adjustments will be included with overhaul exercises. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Identify and analyze the re-usability of basic compressor parts.
2. Accurately diagnose failure of key core components of basic compressors.
3. Identify basic preventive maintenance tasks on natural gas compressors.
4. Identify the key concept of troubleshooting of natural gas compressors by applying failure analysis techniques to arrive at the root cause of the failure.
5. Demonstrate safety procedures in the workshop and follow appropriate steps to work with the compressor.

NGEC 246. Fuel and Emissions Technology

5 Credits (5)

This course delivers operational and application studies of fuel components and emissions control system. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Identify specific components of a natural gas engine and their function.
2. List the steps of preventive maintenance on natural gas engines.
3. Know the fuel components and operation
4. Locate and identify various components on and off an engine.
5. Safely start stationary industrial natural gas engines.

NGEC 295. Special Topics

2 Credits (2)

Topics are to be announced in the Schedule of Classes. The topic and project are to be discussed and implemented between faculty member and student. Student gives presentation to class at the end of the term of study. All-Natural Gas Compression Technology classes in the NGEC Program must be completed or in progress before enrolling in this course. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. The student should provide an overall meaning during the individual time in the NGEC Program for this final project.

NMNC-NEW MEXICO NURSING EDUCATION CONSORTIUM

NMNC 3110. Introduction to Nursing Concepts

3 Credits (3)

This course introduces the nursing student to the concepts of nursing practice and conceptual learning. Same as NMNC course number: NMNC 1110. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.

Corequisite: NMNC 3120, NMNC 3135.

Learning Outcomes

1. Integrate knowledge from nursing pre- and co-requisites into a conceptual learning model.
2. Apply conceptual learning to select nursing concepts.
3. Define personal values, beliefs, and attitudes about health and wellness.
4. Describe importance of identifying patient safety issues.
5. Describe roles and values of nursing and members of the health care team.
6. Describe standards and regulations that apply to nursing practice.

NMNC 3120. Evidence-Based Practice**3 Credits (3)**

The focus of this course is the principles of evidence-based nursing practice. It includes the identification of clinical practice problems, the evaluation of available evidence, and the integration of evidence with clinical expertise and patient preferences in application to practice.

Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.

Corequisite: NMNC 3110, NMNC 3135.

Learning Outcomes

1. Examine integrating evidence-based practice with diverse patients' values.
2. Identify clinical practice problems and issues.
3. Explain the research process.
4. Describe how evidence is generated through the research process.
5. Appraise evidence and standards of care that support best clinical outcomes and patient safety.
6. Utilize informatics to access evidence-based practice guidelines.

NMNC 3135. Principles of Nursing Practice**4 Credits (4)**

This course introduces the nursing student to the application of concepts through clinical skills in seminar, laboratory, and/or clinical settings.

Principles of communication, assessments, safety, and interventions including accurate calculation, measurement, and administration of medications will be included. Same as NMNC course number: NMNC 1135. Restricted to: BSN, BSNP, and BSNR Majors. May be repeated up to 4 credits.

Corequisite: NMNC 3110, NMNC 3120.

Learning Outcomes

1. Describe the different types and characteristics of communication in professional nursing practice.
2. Utilize the concepts presented in Level One nursing courses in the application to the care of the patient.
3. Demonstrate the principles of safety during the implementation of nursing skills.
4. Demonstrate the learned skills in patient based scenarios.
5. Utilize the nursing process to provide safe and effective care.

NMNC 3210. Health and Illness Concepts I**3 Credits (3)**

This course will focus on health and illness concepts across the lifespan. Concepts covered are related to homeostasis/regulation, sexuality/reproductive, protection/movement, and emotional processes. Same as NMNC course number: NMNC 1210. May be repeated up to 3 credits.

Prerequisite: NMNC 3110, NMNC 3120, NMNC 3135.

Corequisite: NMNC 3220, NMNC 3230, NMNC 3235.

Learning Outcomes

1. Describe the scope, risk factors, physiologic processes, attributes, and clinical management of selected concepts and exemplars across the lifespan.
2. Discuss evidence-based practices and health care standards of care related to the concepts/exemplars of the course.
3. Explain the collaboration necessary related to the concepts/exemplars of the course.
4. Utilize informatics and resources related to the concepts/exemplars of the course.
5. Integrate considerations of normal physiology and healthy adaptations into nursing practice of patients across the lifespan.

NMNC 3220. Health Care Participant**3 Credits (3)**

This course introduces the nursing student to the attributes of the health care participant as an individual, a family, or a community. Same as NMNC course number: NMNC 1220. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.

Prerequisite: NMNC 3110, NMNC 3120, NMNC 3135.

Corequisite: NMNC 3210, NMNC 3230, NMNC 3235.

Learning Outcomes

1. Identify values, beliefs and attitudes toward health and illness of the health care recipient.
2. Articulate the role of nursing in relation to the health of vulnerable populations and elimination of health disparities.
3. Describe the protective and predictive factors which influence the health of families, groups, communities, and populations.
4. Describe the use of evidence-based practices to guide health teaching, health counseling, screening, outreach, disease and outbreak investigation, referral, and follow-up throughout the lifespan.
5. Describe the use of information and communication technologies in preventive care.
6. Examine the health care and emergence preparedness needs of the local community and in the state of New Mexico.
7. Identify clinical prevention and population-focused interventions with attention to effectiveness, efficiency, cost-effectiveness, and equity.

NMNC 3230. Nursing Pharmacology**3 Credits (3)**

This course introduces the nursing student to pharmacologic nursing practice from a conceptual approach. Same as NMNC course number: NMNC 1230. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.

Prerequisite: NMNC 3110, NMNC 3120, NMNC 3135.

Corequisite: NMNC 3210, NMNC 3220, NMNC 3235.

Learning Outcomes

1. Identify the nurse's professional role related to pharmacotherapeutics in diverse populations across the lifespan.
2. Identify safety issues and minimize risk potential associated with pharmacotherapeutics and complementary and alternative medicine.
3. Utilize evidence-based information integrating pharmacologic and pathophysiologic concepts to guide medication therapeutics.
4. Describe health care system protocols related to pharmacotherapeutics.
5. Identify methods of communication with the health care team related to pharmacotherapeutics.
6. Utilize informatics systems related pharmacotherapeutics.
7. Describe common classes of drugs that are used in health care, including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics.

NMNC 3235. Assessment and Health Promotion**4 Credits (4)**

This course introduces the nursing student to the assessment of and the health promotion for the health care participant as an individual, a family, or a community. This course uses seminar, laboratory and/or clinical settings. Same as NMNC course number: NMNC 1235. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.

Prerequisite: NMNC 3110, NMNC 3120, NMNC 3135.

Corequisite: NMNC 3210, NMNC 3220, NMNC 3230.

Learning Outcomes

1. Assess physical health including a focus on the health/illness beliefs, values, attitudes, developmental level, functional ability, culture, and spirituality of the participant.
2. Assess family health including a focus on family health history, environmental exposures, and family genetic history to identify current and future health problems.
3. Collaborate with a community to assess their health needs
4. Utilize community assessment data and evidence-based practice as basis for identifying community health needs.
5. Document health assessments in electronic health record or written formats.
6. Share community assessment data with other health care professionals to identify needed interventions.
7. Explain the role of the nurse in relation to advocacy for the health care recipient.
8. Analyze education materials for health literacy concerns.

**NMNC 4310. Health & Illness Concepts II
3 Credits (3)**

This course covers health and illness concepts across the lifespan with the focus on chronic conditions. Concepts covered are related to oxygenation and hemostasis, homeostasis and regulation, protection and movement, and cognition and behavior processes. Same as NMNC course number: NMNC 2310. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.

Prerequisite: NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, NMNC 3235.

Corequisite: NMNC 4320, NMNC 4335.

Learning Outcomes

1. Relate the scope, risk factors, physiologic processes, attributes, and clinical management of selected concepts and exemplars across the lifespan.
2. Investigate evidenced-based practice, standards of nursing care, and factors to improve safety related to selected concepts and exemplars.
3. Examine how members of the health care team collaborate in the delivery of care related to selected concepts and exemplars.
4. Discuss available technology for the delivery of nursing care related to selected concepts and exemplars.
5. Apply selected health and illness concepts to the nursing care of patients across the lifespan.

**NMNC 4320. Professional Nursing Concepts I
3 Credits (3)**

This course covers foundational concepts for professional development, including selected professional attributes and care competencies. Same as NMNC course number: NMNC 2320. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.

Prerequisite: NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, NMNC 3235.

Corequisite: NMNC 4310, NMNC 4335.

Learning Outcomes

1. Examine the ethical values, virtues, principles, and policies that guide the moral delivery of health care.
2. Relate the nurse's interpretation of patient needs, concerns, and health problems with nursing decisions.
3. Discuss the factors which motivate individuals, groups, and organization to deliver quality nursing care.

4. Determine how interactions of health care team members provide quality patient care.

**NMNC 4335. Care of Patients with Chronic Cndtns
4 Credits (8P)**

The focus of this course is to provide safe, evidence-based nursing care for patients with chronic conditions, across the lifespan in a variety of settings. This course builds upon curricular concepts. This course is a combination of lab and clinical. Same as NMNC course number: NMNC 2335. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.

Prerequisite: NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, NMNC 3235.

Corequisite: NMNC 4310, NMNC 4320.

Learning Outcomes

1. Demonstrate ethical practice in the delivery of nursing care to patients with chronic conditions.
2. Apply understanding of the principles of safe nursing care for patients with chronic conditions.
3. Demonstrate knowledge of appropriate evidence-based protocols when providing nursing care to patients with chronic conditions.
4. Apply understanding of appropriate health care policy, finance, and regulatory environments in the care of patients with chronic conditions.
5. Communicate effectively with patients with chronic conditions and health care team members.
6. Demonstrate an understanding of the technology used in the care of patients with chronic conditions.
7. Utilize the nursing process to deliver nursing care to patients with chronic conditions.

**NMNC 4410. Health & Illness Concepts III
4 Credits (4)**

This course will cover health and illness concepts, with the focus on acute conditions across the lifespan. Concepts covered are related to homeostasis/ regulation, oxygenation/ hemostasis, protection/ movement, and emotional processes. Same as NMNC course number: NMNC 2410. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.

Prerequisite: NMNC 4310, NMNC 4320, NMNC 4335.

Corequisite: NMNC 4435, NMNC 4445.

Learning Outcomes

1. Anticipate health care participant's risk for potentially harmful situations related to the concepts/exemplars of the course.
2. Integrate evidence-based practices and health care standards of care related to the concepts/exemplars of the course.
3. Differentiate the multiple roles of the health care team related to the concepts/exemplars of the course.
4. Integrate use of appropriate technology related to the concepts/exemplars of the course.
5. Interrelate risk factors, concepts, physiologic processes, patient attributes, and clinical management of the exemplars covered in this course.

**NMNC 4435. Clinical Intensive I
4 Credits (4)**

This is the first of two Level Four clinical courses in which the student will apply the curricular concepts in the management of care participants with acute conditions across the lifespan. Same as NMNC course

number: NMNC 2435. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.

Prerequisite: NMNC 4310, NMNC 4320, NMNC 4335.

Corequisite: NMNC 4410, NMNC 4445.

Learning Outcomes

1. Integrate nursing practice concepts into their professional nursing practice.
2. Integrate diverse patient values into plan of care for patients with acute illness.
3. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice.
4. Integrate an evidence-based approach in the delivery and evaluation of nursing care to acutely ill patients across the lifespan.
5. Evaluate the use of policies and procedures within the acute care settings.
6. Effectively collaborate with the health care team in the delivery of patient care.
7. Integrate use of appropriate technology for the delivery of nursing care to acutely ill patients.

NMNC 4445. Clinical Intensive II

4 Credits (4)

This is the second of two Level Four clinical courses in which the student will apply the curricular concepts in the management of care participants with acute conditions across the lifespan. Same as NMNEC course number: NMNC 404. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.

Prerequisite: NMNC 4310, NMNC 4320, NMNC 4335.

Corequisite: NMNC 4410, NMNC 4435.

Learning Outcomes

1. Integrate nursing practice concepts into their professional nursing practice.
2. Integrate diverse patient values into pan of care for patients with acute illness.
3. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice.
4. Integrate an evidence-based approach in the delivery and evaluation of nursing care to acutely ill patients across the lifespan.
5. Evaluate the use of policies and procedures within the acute care setting.
6. Effectively collaborate with the health care team in the delivery of patient care.
7. Integrate use of appropriate technology for the delivery of nursing care to acutely ill patients.

NMNC 4510. Concept Synthesis

3 Credits (3)

This course focuses on the synthesis of curricular concepts in the care of complex patients. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.

Prerequisite: NMNC 4410, NMNC 4435, NMNC 4445.

Corequisite: NMNC 4520, NMNC 4535, NMNC 4545.

Learning Outcomes

1. Synthesize curricular concepts into patient-centered nursing practice that is appropriate for diverse individuals, families, and communities.
2. Synthesize the evidence base into nursing care of patients across the lifespan.
3. Evaluate leadership principles that integrate the application of health care policies and standards.

4. Evaluate effectiveness of interprofessional collaboration in the delivery of health care for quality patient outcomes.
5. Evaluate technologies for the management of information and in the delivery of patient care.

NMNC 4520. Professional Nursing Concepts II

3 Credits (3)

This course covers policy concepts for professional nursing. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.

Prerequisite: NMNC 4410, NMNC 4435, NMNC 4445.

Corequisite: NMNC 4510, NMNC 4535, NMNC 4545.

Learning Outcomes

1. Integrate principles of quality improvement and safety into nursing practice within health care organizations and systems.
2. Demonstrate leadership behaviors through the application of policies that apply to health care delivery.
3. Synthesize care delivery concepts to improve quality patient outcomes and professional nursing practice.
4. Analyze impact of health care delivery systems on patient care outcomes.
5. Compare and contrast health care policies and evidence-based practice.

NMNC 4535. Clinical Intensive III

4 Credits (4)

The focus of this clinical course is application of the curricular concepts in the management of care participants with complex conditions across the lifespan. Same as NMNEC course no.: NMNEC503. Restricted to: BSN,BSNP,BSNR,NURS majors. May be repeated up to 4 credits.

Prerequisite: NMNC 4410, NMNC 4435, NMNC 4445.

Corequisite: NMNC 4510, NMNC 4520, NMNC 4545.

Learning Outcomes

1. Engage in professional nursing practice that is patient-centered and appropriate for diverse individuals, families, and communities.
2. Integrate principles of quality improvement and safety into nursing practice within health care organizations and systems.
3. Deliver nursing care that is evidence-based across the lifespan.
4. Demonstrates leadership behaviors through the application of policies that apply to health care delivery.
5. Engage in effective interprofessional collaboration in the delivery of health care for quality patient outcomes.
6. Utilize technologies for the management of information and in the delivery of patient care.

NMNC 4545. BSN Capstone

4 Credits (4)

The synthesis, integration, and application of concepts to professional nursing practice will be applied in the final clinical course to ensure readiness to enter practice. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.

Prerequisite: Successful completion of all previous nursing courses.

Corequisite: NMNC 4510, NMNC 4520, NMNC 4535.

Learning Outcomes

1. Synthesize and integrate nursing practice concepts into their professional nursing practice.
2. Engage in professional nursing practice that is patient-centered and appropriate for diverse individual, families, and communities.
3. Integrate principles of quality improvement and safety into nursing practice within health care organizations and systems.
4. Deliver nursing care that is evidence-based.

5. Demonstrate leadership behaviors through the application of policies that apply to health care delivery.
6. Engage in effective interprofessional collaboration in the delivery of health care for quality patient outcomes.
7. Utilize technologies for the management of information and in the delivery of patient care.

NURS-NURSING

NURS 1110. Pre-Nursing Freshman Seminar

1 Credit (1)

This Freshman seminar provides an introduction to the university and its resources, an orientation to the pre-nursing curriculum, and overview of concepts for professional nursing practice. Emphasis is placed on exploring the nurse's role as an integral member of the healthcare team across multiple contexts and settings, and developing a professional identity. Consent of Instructor required.

Learning Outcomes

1. Develop strategies for transitioning to university life and a pathway to the nursing program, through evaluating knowledge, skill, and experience strengths and deficits.
2. Understand the role nurses and other interprofessional partners play in addressing issues regarding the patient experience across multiple healthcare settings.
3. Identify and examine cultural, professional and personal beliefs and values of nurses as they relate to patient care and working in multidisciplinary teams.
4. Begin to explore nursing careers in a variety of healthcare settings, across the nation.

NURS 120. Health Information Introduction to Pharmacology

3 Credits (3)

Introduction to the principles of pharmacology, including drug terminology; drug origins, forms, and actions; routes of administration; as well as the use of generic name drugs, trade name drugs and categories of drugs to treat multiple and specific body systems. Crosslisted with: HIT 120. Restricted to Community Colleges campuses only.

Learning Outcomes

1. List and define the major pharmacological drugs and common generics used in healthcare.
2. Distinguish between local, systemic, therapeutic, allergic, and side effects of the drugs.
3. Describe the pharmacological action of common drugs and drug categories used to treat each body system, including usage, dosage, adverse effects, contraindications, indications, and key client education information.
4. Identify basic laws and ethics associated with pharmacological preparation and distribution.
5. Describe the principle mechanisms of actions, usage, dosage, adverse effects, contraindications, indications, and key client education information for drug classifications affecting multiple body systems. List several routes of drug administration and describe their advantages and disadvantages.

NURS 127. Medication & Dosage Calculation

2 Credits (2)

General principles of medication administration including computation of medication dosage, preparation, safe administration, and documentation of multiple forms of drugs. Includes instruction on various systems of measurement. Applies critical thinking in the administration of oral,

topical, enteral, and parenteral medications. Restricted to: Nursing and Medical Assisting Majors. May be repeated up to 2 credits.

Learning Outcomes

1. The student will demonstrate accurate dosage calculation; discuss the principles of medication administration, identify the classification of drugs used for various disorders of the systems, administration safety and identify the elements of accurate documentation of medication administration.

NURS 130. Foundations of Pharmacology

5 Credits (5)

This course provides the nursing student with an introduction to the foundations of pharmacology including: science of drug action, principles of medication administration, accurate calculation of drug doses, medication therapy across the lifespan, application of medications to treat health alterations, normal and adverse responses by the client to medication therapy, medication safety, medication regulation, national patient safety goals, and appropriate nursing interventions to achieve the desired goals of medication therapy. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Learning Outcomes

1. Recognize personally held values and demonstrate assessment of the values held by diverse patients, as well as their preferences and expressed needs related to pharmacological therapy as measured by: a. Recognize the influence of values, preferences, and expressed needs on the administration of pharmacotherapeutics to populations across the lifespan; b. Explain the nurse's professional role related to pharmacotherapeutics in diverse populations across the lifespan
2. Communicate with other members of the healthcare team to establish a plan to meet the needs of individuals, including commonly related to adverse or side effects of pharmacological therapy throughout the lifespan as measured by: a. Identify methods for communication with the health care team related to pharmacotherapeutics; b. Explain how members of the health care team collaborate in the delivery of pharmacotherapeutics
3. Compare an individualized patient care plan utilizing an evidence-based approach for patient(s) across the lifespan to outcomes related to the administration of pharmacological therapy as measured by as measured by: a. Apply evidence-based information to the administration of pharmacotherapeutics
4. Demonstrate adherence to policies, procedures, and standards of care for the administration of pharmacological therapy in healthcare delivery systems as measured by: a. Give examples of policies, procedures, and standards of care related to selected medication administration topics
5. Apply strategies to reduce the risk of harm to self or others while providing professional nursing care as measured by: a. Give examples of policies, procedures, and standards of care related to selected medication administration topics; b. Give examples of common classes of drugs that are used in health care and their related pharmacokinetics, pharmacodynamics, and pharmacotherapeutics
6. Utilize varied communication technologies, electronic healthcare databases, and electronic health records to plan nursing care for the administration of pharmacological therapy across the lifespan as measured by: a. Discuss available technology for delivery of nursing care related to pharmacotherapeutics

NURS 134. Foundation of Nursing Skills and Assessment

3 Credits (1+6P)

This course provides nursing students with introductory nursing knowledge related to performance of nursing skills and assessment including: techniques of fundamental nursing care, basic and intermediate nursing skills, and foundational physical assessment techniques associated with care across the lifespan. Students must be admitted into the Nursing Program to enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Learning Outcomes

1. Describe personally held values, attitudes, and beliefs related to health and wellness as measured by: a. Describe modifications to nursing care based on client cultural and religious influences; b. Demonstrate physical assessment skills for clients across the lifespan utilizing appropriate equipment and techniques.
2. Describe scopes of practice, roles and values of health care team members as measured by: Identify independent and collaborative nursing interventions.
3. Describe an evidence-based practice approach to provision of patient care and professional nursing practice across the lifespan as measured by: a. Demonstrate safe performance of basic nursing procedures; b. Identify quality sources of information to verify skills and interventions are based on evidence.
4. Identify policies, procedures, and standards of care related to the provision of professional nursing care as measured by: Identify need/situation where reporting of incident/event/irregular occurrence/variance is appropriate.
5. Describe strategies that reduce the risk of harm to self and others as measured by: a. Identify methods utilized to provide safe and effective care; b. Identify and document changes in patient status.
6. Identify essential information that must be available in a common database to support patient care across the lifespan as measured by: a. Select standard technology utilized to provide basic care to clients across the lifespan; b. Identify approved abbreviations and standard terminology for documenting care.

NURS 136. Foundations of Nursing Practice

6 Credits (4+6P)

This course will introduce the nursing student to foundational theoretical concepts of professional nursing practice, the nursing process, and foundational nursing skills. It includes developmental concepts related to clients across the lifespan. Clinical experiences in the simulation lab, long-term care, the community, and rehabilitation settings will provide the student with the opportunity to apply learned skills to provide total care to meet needs of one adult client and to develop care planning skills related to actual problems. Students must be concurrently enrolled in both the lecture and lab sections of the course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Learning Outcomes

1. Describe personally held values, attitudes, and beliefs related to health and wellness as measured by: a. Identify personal values, beliefs, and attitudes about health and wellness; b. Define health protection, health promotion, and disease prevention; c. Describe the basic principles of the teaching/learning process.
2. Describe scopes of practice, roles and values of health care team members as measured by: a. Describe roles/responsibilities, scope of practice and values of health care team members; b. Identify principles of delegation to other members of the healthcare team.
3. Describe an evidence-based practice approach to provision of patient care and professional nursing practice across the lifespan as measured by: a. Describe EBP to include components of research

evidence, clinical expertise, and patient/family values; b. Describe standards and regulations that apply to nursing and ethical practice.

4. Identify policies, procedures, and standards of care related to the provision of professional nursing care as measured by: Identify sources of information regarding national standards or policies regarding patient care across the lifespan.
5. Describe strategies that reduce the risk of harm to self and others as measured by: a. Define patient safety and quality of care; b. Describe methods to identify, report variances, and reduce risk of harm in provision of professional nursing care.
6. Identify essential information that must be available in a common database to support patient care across the lifespan as measured by: a. Identify quality sources of information and communication techniques designed to mitigate error and protect confidentiality of protected health information across the lifespan.

NURS 137. Care of Geriatric Patient

3 Credits (3)

This course will introduce the nursing student to foundational concepts of age-appropriate/specific care of the older adult who represents the largest population of individuals placing demands on the healthcare system. It includes basic and complex concepts and issues related to care of the older client across the care continuum, provision of cost-effective care in a resource sparse environment. Students must be admitted into the nursing program to enroll in this course. Restricted to: NURS majors. Restricted to Community Colleges campuses only. May be repeated up to 3 credits.

Learning Outcomes

1. Recognize personally held values and demonstrate assessment of the values held by older adults related to chronic illness and age-related changes, as well as their preferences and expressed needs as measured by: a. Give examples of cultural, religious, socioeconomic, environmental, and internal influences on the health and illness of an older adult; b. Select health protection, health promotion, and disease prevention strategies related to care of older adults; c. Relate own beliefs and attitudes related to aging that might impact ability to provide care to the older adult.
2. Communicate with other members of the healthcare team to establish a plan to meet the needs of older adults with commonly occurring chronic illness or age-related changes as measured by: a. Locate care delivery settings and sources for referral and coordination of healthcare needs for older adults.
3. Compare an individualized patient care plan utilizing an evidence-based approach for older adults to outcomes related to the administration of pharmacological therapy as measured by: a. Describe sources of information regarding evidenced-based protocols for care of older adults; b. Use principles of ethical practice in delivery of care to the older adult.
4. Demonstrate adherence to policies, procedures, and standards of care related to the provision of professional nursing care of older adults with chronic diseases as measured by: a. Give examples of healthcare policies and national standards of care related to the provision of care to older adults.
5. Apply strategies to reduce the risk of harm to self or others while providing professional nursing care pertinent to the provision of care to older adults: a. Recognize potential and actual safety issues that are pertinent to the provision of care to older adults; b. Apply nursing interventions that reduce risk of harm to older adults.
6. Utilize varied communication technologies, electronic healthcare databases, and electronic health records to plan nursing care to

support care of older adults as measured by: a. Discuss issues with use of technology related to the care of older adults; b. Discuss essential information that needs to be in a common database relevant to care of the older adult.

NURS 140. Pathophysiology for Allied Health Professionals
3 Credits (3)

Introduction to the nature of disease and its effect on body systems. Deals with the disease processes affecting the human body via an integrated approach to specific disease entities. Includes a review of normal functions of the appropriate body systems. Diseases are studied in relationship to their etiology, pathology, physical signs and symptoms, diagnostic procedures, complication, treatment modalities, and prognosis. Restricted to Allied Health and Health Information Technology majors. Restricted to: Community Colleges only.

NURS 144. Pharmacology, Essentials of Medication Safety
2 Credits (2)

This course introduces the nursing student to pharmacological nursing practice across the lifespan. The student identifies the nurse's professional role related to pharmacotherapeutics in diverse populations. Safety issues and minimization of risk potential associated with pharmacotherapeutics, complementary, and alternative medicines are discussed. Health care system protocols, communication methods, and informatics related to pharmacotherapeutics are included in the course content. Common drug classes and the pharmacotherapeutics, pharmacodynamics, and pharmacotherapeutics associated with each class are included in this course. Restricted to NURS Majors.

Prerequisite: NURS 127.

Learning Outcomes

1. Discuss drug classifications including the uses, actions, pharmacodynamics, indications, pharmacokinetics, contraindications, adverse effects, and nursing implications.
2. Provide patient with education regarding a newly prescribed medication.

NURS 146. Common Health Deviations
6 Credits (4+6P)

Common health deviations and the manner by which they alter various body functions are explored. The role of the licensed practical nurse in assisting clients with common health deviations is presented. Ethical and legal implications and the role of the practical nurse are also considered. The licensed practical nursing student will utilize the application of knowledge to client care situation both in the subacute and acute care settings. The nursing process is presented as guide for coordinating client care. Grade of C or better. Restricted to: NURSING majors. May be repeated up to 6 credits.

Prerequisite: (NURS 127 or NURS 153), NURS 156, NURS 154, NURS 157, and NURS 210 OR consent of program director.

Learning Outcomes

1. Utilize critical thinking and systematic problem-solving process as a framework for providing care for adult patients in structured health care setting with complex health care needs.
2. Utilize critical thinking and problem solving skills in prioritizing the management and coordination of all aspects of care.

NURS 147. Adult Health I
6 Credits (4+6P)

This course focuses on application of the nursing process and theoretical concepts of care for adults with commonly occurring health problems. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to continue development

of: prioritization skills, proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, care planning skills related to patient actual, psychosocial, and potential problems in the delivery of total nursing care to meet needs of one adult client. Students must be concurrently enrolled in both the lecture and lab sections of the course. Students must be admitted into the Nursing Program to enroll in this course.

Learning Outcomes

1. Recognize personally held values and demonstrate assessment of the values held by diverse patients, as well as their preferences and expressed needs related to health and wellness as measured by: a. Give examples of how personal values, values of patients, families, and medical personnel impacts the involvement of patients in their care related to selected course topics for adult clients with chronic and acute illness; b. Select health protection, health promotion, and disease prevention strategies related to selected course topics for adult clients; c. Relate the scope, risk factors, physiologic processes, attributes, and clinical management of chronic disease to selected course topics for adult clients.
2. Communicate with other members of the healthcare team to establish a plan to meet the needs of individuals, including commonly occurring chronic and acute health care problems throughout the lifespan as measured by: a. Locate significant information to report to other disciplines; b. Select resources for continuity of patient care related to selected topics; c. Apply the principles of delegation to selected course topics.
3. Compare an individualized patient care plan utilizing an evidence-based approach for patient(s) across the lifespan to outcomes for the patient(s) as measured by: a. Implement individualized patient care utilizing an evidence-based approach related to selected course topics; b. Use principles of ethical practice in the delivery of nursing care for patients with chronic or acute illness.
4. Demonstrate adherence to policies, procedures, and standards of care for the provision of care in healthcare delivery systems as measured by: a. Give examples of policies, procedures, and standards of care related to selected course topics.
5. Apply strategies to reduce the risk of harm to self or others while providing professional nursing care as measured by: a. Identify variations in physiologic integrity related to selected course topics; b. Apply nursing interventions to reduce risk of harm related to selected course topics.
6. Utilize varied communication technologies, electronic healthcare databases, and electronic health records to plan nursing care for patients with chronic illnesses across the lifespan as measured by: a. Discuss available technology for delivery of nursing care related to selected topics.

NURS 149. Mental Health Nursing
4 Credits (3+1P)

This course will allow the nursing student to develop skills necessary to provide nursing care for clients with mental health problems in various health care settings including: common mental health disorders, psychosocial dysfunction, psychosocial safety/substance abuse issues, violence, suicide, restraints, developmental age related pathophysiology, psychopharmacology, cultural/religious considerations, grief/loss, promotion of mental health, and therapeutic communication. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to develop ability to develop: proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, care planning skills related to patient actual, psychosocial, and potential problems

in the delivery of total nursing care to meet needs of one client across the life span with acute/chronic mental health needs. Students must be concurrently enrolled in both the lecture and lab sections of this course. Students must be admitted into the Nursing Program in order to enroll in the course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Learning Outcomes

1. Recognize personally held values and demonstrate assessment of the values held by diverse patients, as well as their preferences and expressed needs related to health and wellness as measured by: a. Give examples of how personal values, values of patients, families, and medical personnel impacts the involvement of patients in their health care related to selected mental illness topics across the lifespan; b. Select health protection, health promotion, and disease prevention strategies related to selected course topics; c. Relate the scope, risk factors, physiologic processes, attributes, and clinical management related to selected mental illness topics across the lifespan.
2. Communicate with other members of the healthcare team to establish a plan to meet the needs of individuals, including commonly occurring chronic and acute health care problems throughout the lifespan as measured by: a. Locate significant information to report to other disciplines; b. Select resources that provide continuity of care related to selected course topics; c. Apply the principles of delegation to selected course topics.
3. Compare an individualized patient care plan utilizing an evidence-based approach for patient(s) across the lifespan to outcomes for the patient(s) as measured by: a. Implement individualized patient care utilizing an evidence-based approach for patients with chronic or acute mental illness; b. Describe the principles of ethical practice in the delivery of nursing care for patients with chronic or acute mental illness.
4. Demonstrate adherence to policies, procedures, and standards of care for the provision of care in healthcare delivery systems as measured by: a. Give examples of policies, procedures, and standards of care related to selected course topics.
5. Apply strategies to reduce the risk of harm to self or others while providing professional nursing care as measured by: a. Identify variations in psychosocial integrity related to selected course topics; b. Apply nursing interventions to reduce risk of harm related to selected course topics.
6. Utilize varied communication technologies, electronic healthcare databases, and electronic health records to plan nursing care for patients with chronic illnesses across the lifespan as measured by: a. Discuss available technology for delivery of nursing care related to selected mental health topics.

NURS 150. Medical Terminology

3 Credits (3)

Understanding of the basic elements of medical words. Use of medical abbreviations. Same as OEHO 120 and BOT 150. May be repeated up to 3 credits. Crosslisted with: BOT 150, AHS 120 and HIT 150.

NURS 153. Medication and Dosage Calculation

1 Credit (1)

Techniques of dosage calculation for medication and fluid administration. RR applicable. Students must meet NMSU basic skills requirement in mathematics to enroll in this course.

Corequisite(s): NURS 156 and NURS 154.

NURS 154. Physical Assessment

2 Credits (2)

Beginning techniques of physical assessment by systems will be presented using the nursing process as a guide for providing safe client centered care throughout the life span. Grade of C or better is required. Restricted to Nursing Majors. Restricted to Dona Ana Campus. May be repeated up to 2 credits.

Prerequisite: BIOL 1130 or BIOL 2210.

Corequisite: NURS 127, NURS 156.

Learning Outcomes

1. The student will demonstrate a systematic (head to toe) physical assessment to gather objective data
2. The student will explain the characteristics of growth and development of individuals throughout the lifespan
3. The student will obtain a thorough health history to gather subjective data

NURS 155. Special Topics

1-4 Credits

Specific subjects to be announced in the Schedule of Classes.

NURS 156. Basic Nursing Theory and Practice

6 Credits (4+6P)

Introduction to the nursing profession and the beginning skills of nursing practice as it relates to normalcy. The nursing process is presented as a means of guiding the student in providing safe client centered care. Ethical and legal aspects of nursing practice are also included. Basic clinical nursing skills will be presented and practiced in the nursing lab. The student will perform these skills with clients in an actual health care setting. Consent of Program Director requires. Restricted to: NURSING majors. Restricted to Dona Ana campus. May be repeated up to 6 credits.

Corequisite: NURS 154.

Learning Outcomes

1. Use evidence-based practice, critical thinking, and scientific rationales to plan safe care for adults who are experiencing alterations in health.
2. Utilize knowledge and concepts from the arts, sciences, and humanities to plan nursing care to enhance individual patient's health outcomes and quality of life.
3. Respect patients' unique responses to health and illness based on socio-cultural and physical environments.
4. Explore basic concepts of a community continuum of care, including the professional roles of interdisciplinary teams, community resource agencies, and family support systems.

NURS 157. Maternal/Child Health Deviations

8 Credits (6+6P)

This course introduces the student to the concepts and principles of nursing care of the family from conception to adolescence. Utilizing the assessment, analyzing, planning, and implementation phases of the nursing process (the Care map), the student focuses on the supportive-educative nursing system to assist members of the family in meeting self-care requisites and how they are affected by the health deviations common to each developmental level beginning with conception and ending with adolescence. Knowledge gained in theoretical instruction is then applied to the patient care situation. After an introduction to the necessary clinical skills in the campus laboratory setting, students will participate in clinical experiences with the focus on the family from conception to adolescence. The assessment, analysis, planning, and implementation phases of the nursing process are emphasized as a tool to assist patients in meeting universal and developmental self-care requisites. Utilizing the nursing process, the student provides safe, client-centered care to diverse clients and families. Theoretical instruction is applied to client care situations. Students collaborate with clients,

families, and the interdisciplinary team in meeting health care needs. Experiences may occur in the physician's office, local health department, day care centers, schools, or the hospital. Grade of C or better required. Restricted to: NURSING majors. Restricted to Carlsbad campus only.

Prerequisite: NURS 156, NURS 153, and NURS 154.

Corequisite: NURS 210.

Learning Outcomes

1. Determine how values of clients, families and medical personnel impact the involvement of clients in their health care related to maternal/child and pediatric clients.
2. Implement individualized client care utilizing an evidenced based approach related to maternal/child and pediatric clients.
3. Choose health protection, health promotion, and disease prevention strategies in the care of maternal/child and pediatric clients.
4. Apply the scope, risk factors, physiologic processes, and clinical management strategies to maternal/child and pediatric clients.
5. Choose resources for continuity of client care related to maternal/child and pediatric clients.
6. Give examples of significant information to report to other disciplines.
7. Apply the principles of delegation in the provision of client care with maternal/child and pediatric clients.
8. Utilize evidenced based information to implement a plan of care and employ nursing interventions for maternal/child and pediatric clients.
9. Use the principles of ethical practice in the delivery of nursing care for maternal/child and pediatric clients. 1
10. Apply policies, procedures and standards of care related to maternal/child and pediatrics in the provision of client care. 1
11. Apply nursing interventions to reduce risk of harm to self and others related to maternal/child and pediatric clients. 1
12. Choose available technology for delivery of nursing care related to maternal/child and pediatric clients.

NURS 201. Special Topics

3 Credits (3)

Specific topics NCLEX course will help prepare students for the predictability exam and NCLEXRN. This course assists students in being emotionally, didactically and technically prepared to take both examinations. Students will review how to prepare to take this examination through a series of sample tests, quizzes and group discussions. A variety of core content subject matter will be covered to allow the student to be prepared to take the comprehensive examinations. At the conclusion of this course, the student will take a comprehensive predictability exam. Students must be admitted into the Nursing Program to enroll in this course.

Learning Outcomes

1. Utilize diverse patients' values, preferences, and expressed needs to drive development of the plan of care for acute and chronically ill patients through application to NCLEX style questions as measured by: a. Integrate the scope, risk factors, physiologic processes, and attributes of health, wellness, chronic, and acute disease into the clinical management of patients across the lifespan; b. Evaluate how values of patients, families, and medical personnel impacts the health, wellness, and illness of patients across the lifespan.
2. Evaluate ability to function within own scope of practice as a member of the healthcare team to deliver care to individuals and families across the lifespan with complex health alterations through application to NCLEX style questions as measured by: a. Evaluate ability to apply the principles of delegation and prioritize care in patient-based scenarios across the lifespan; b. Evaluate ability to

select appropriate resources for continuity of patient care across the lifespan.

3. Demonstrate the use of evidence-based approaches for the delivery and evaluation of care to patients across the lifespan through application to NCLEX style questions as measured by: a. Evaluate ability to apply evidence-based approaches to the provision of patient care across the lifespan.
4. Formulate a plan of care for the provision of care in healthcare delivery systems using policies, procedures and standards of care through application to NCLEX style questions as measured by a. Evaluate ability to formulate a plan of care for provision of care in patient-based scenarios utilizing policies, procedures, and standards of care.
5. Interpret effective use of strategies to reduce risk of harm to self or others while providing professional nursing care including evidence-based practice, national patient safety goals, and core measures through application to NCLEX style questions as measured by: a. Evaluate ability to effectively utilize strategies to reduce risk of harm to self or others while providing professional nursing care including evidence-based practice, national patient safety goals, and core measures.
6. Utilize information management tools to monitor outcomes of care processes and deliver nursing care to patients with chronic or acute illness across the lifespan through application to NCLEX style questions as measured by: a. Evaluate ability to utilize information management tools to monitor outcomes of care processes and deliver nursing care to patients with chronic or acute illness across the lifespan.

NURS 209. Independent Study

1-4 Credits

Individual studies to meet identified student needs. May be repeated for a maximum of 10 credits. Restricted to: Community Colleges only.

Prerequisite: admission to the nursing program.

NURS 210. Pharmacological Requisites of the Childbearing Family

1 Credit (1)

Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care will be discussed focusing on medications commonly utilized with the childbearing family. Medication classes to be discussed include labor and delivery, analgesic, vitamins, respiratory, gynecological, endocrine, and anti-microbial/anti-infective drugs. Grade of C or better required.

Prerequisite(s): NURS 153, NURS 154 and NURS 156.

Corequisite(s): NURS 157.

Learning Outcomes

1. Effective communication skills in reading, writing, listening, and speaking.
2. Basic critical thinking skills including problem identification, evidence acquisition, evidence evaluation, and reasoning/conclusion.
3. An understanding of personal and social responsibility.
4. An ability to apply the fundamental concepts of quantitative reasoning in mathematics and science.
5. Appropriate information and digital literacy, and skills for personal and professional use.

NURS 211. Pharmacological Requisites of Simple Health Deviations

1 Credit (1)

Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship

to nursing care are addressed focusing on medications related to the psychiatric, gastrointestinal, musculoskeletal, gynecological, hematological, and anti-neoplastic client. Grade of C or better required. Restricted to: Carlsbad campus only.

Prerequisite(s): BIOL 2210 and BIOL 2225 and NURS 153, NURS 154, NURS 156, NURS 157 and NURS 210.

Corequisite(s): NURS 246 and NURS 258.

NURS 212. Pharmacological Requisites of Complex Health Deviations 1 Credit (1)

Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care is examined focusing on medications related to complex health deviations. Drug classes to be discussed include cardiovascular, renal, endocrine, and neurological. Grade of C or better required.

Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 246, NURS 258, NURS 210 and NURS 211.

Corequisite(s): NURS 256 and NURS 260.

Learning Outcomes

1. Apply principles of teaching/learning in educating clients on the use, adverse effects and interactions of pharmacotherapeutic agents used to treat complex health deviations.
2. Collaborate with members of the health care team in the delivery of pharmacotherapeutics to clients with complex health deviations.
3. Give examples of commonly prescribed drugs used to treat clients with complex health deviations and related pharmacokinetics and pharmacodynamics.
4. Discuss the relationship between the use of pharmacotherapeutics and the treatment of disease in clients with complex health deviations.
5. Identify safety issues and minimize risk potential associated with pharmacotherapeutics.

NURS 224. Maternal Child Nursing 6 Credits (5+1P)

This course provides the intermediate nursing student with an in-depth review of care of the childbearing woman, family structures and roles, and nursing care of the child from birth through adolescence. Emphasis includes the care of pre-partum, intra-partum and postpartum clients, the neonate and health deviations in pediatric clients. Clinical experiences in the simulation lab, the community, and acute care settings will provide the student with the opportunity to apply learned skills to provide total care to meet needs of up to two adult, neonatal, or pediatric clients and to apply care planning skills related to actual, psychosocial and potential problems. Students must be concurrently enrolled in both the lecture and lab sections of the course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Learning Outcomes

1. Utilize diverse patients' values, preferences, and expressed needs to drive development of the plan of care for the child bearing woman (19-65 years) and pediatric client (newborn-18) as measured by: a. Determine how values of patients, families, and medical personnel impacts the involvement of patients in their health care related to selected course topics for maternal/child clients; b. Choose health protection, health promotion, and disease prevention strategies related to selected course topics for maternal/child clients; c. Apply the scope, risk factors, physiologic processes, attributes, and clinical management related to selected maternal/child and pediatrics topics.
2. Evaluate ability to function within own scope of practice as a member of the healthcare team to deliver care to individuals and families across the lifespan with complex health alterations as it relates to

the child bearing woman (19-65 years) and pediatrics as measured by: a. Choose resources for continuity of patient care related to selected topics; b. Apply the principles of delegation to selected course topics; c. Give examples of significant information to report to other disciplines.

3. Demonstrate the use of evidence-based approaches for the delivery and evaluation of care to patients across the lifespan as it relates to the child bearing woman (19-65 years) and pediatric client (newborn-18) as measured by: a. Implement individualized patient care utilizing an evidence-based approach related to selected course topics; b. Use the principles of ethical practice in the delivery of nursing care for maternal/child patients.
4. Formulate a plan of care for the provision of care in healthcare delivery systems using policies, procedures and standards of care as it relates to the child bearing woman (19-65 years) and pediatric client (newborn-18) as measured by: a. Apply policies, procedures, and standards of care related to selected course topics for maternal/child clients.
5. Interpret effective use of strategies to reduce risk of harm to self or others while providing professional nursing care including evidence-based practice, national patient safety goals, and core measures as it relates to the child bearing woman (19-65 years) and pediatric client (newborn-18) as measured by: a. Interpret variations in psychosocial integrity related to selected course topics for maternal/child clients; b. Apply nursing interventions reduce risk of harm to self and others related to selected course topics.
6. Utilize information management tools to monitor outcomes of care processes and deliver nursing care to patients with chronic or acute illness across the lifespan as it relates to the child bearing woman (19-65 years) and pediatric client (newborn-18) as measured by: a. Choose available technology for delivery of nursing care related to selected maternal/child clients.

NURS 226. Adult Health II 6 Credits (4+6P)

This course focuses on application of nursing process and theoretical concepts of care for adults with complex health alterations. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to apply: prioritization skills, maintain proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, and care planning skills related to patient actual, psychosocial, and potential problems in the delivery of nursing care to meet needs of three adult clients. Students must be concurrently enrolled in both the lecture and lab sections of the course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Learning Outcomes

1. Utilize diverse patients' values, preferences, and expressed needs to drive development of the plan of care for the adult client with acute illness as measured by: a. Determine how personal values, values of patients, families, and medical personnel impacts the involvement of patients in their care related to selected course topics for adult clients with acute illness; b. Choose health protection, health promotion, and disease prevention strategies related to selected course topics for adult clients; c. Apply the scope, risk factors, physiologic processes, attributes, and clinical management of acute disease to selected course topics for adult clients.
2. Evaluate ability to function within own scope of practice as a member of the healthcare team to adult clients with acute illness as measured by: a. Choose resources for continuity of patient care related to

selected topics; b. Apply the principles of delegation to selected course topics; c. Give examples of significant information to report to other disciplines.

3. Demonstrate the use of evidence-based approaches for the delivery and evaluation of care to patients across the lifespan as it relates to adult clients with acute illness as measured by: a. Implement individualized patient care utilizing an evidence-based approach related to selected course topics; b. Use principles of ethical practice in the delivery of nursing care for adult patients with acute illness.
4. Formulate a plan of care for the provision of care in healthcare delivery systems using policies, procedures and standards of care as it relates to adult clients with acute illness as measured by: a. Apply policies, procedures, and standards of care related to selected course topics.
5. Interpret effective use of strategies to reduce risk of harm to self or others while providing professional nursing care including evidence-based practice, national patient safety goals, and core measures as it relates to adult clients with acute illness as measured by: a. Interpret variations in physiologic integrity related to selected course topics; b. Apply nursing interventions to reduce risk of harm to self and others related to selected course topics.
6. Utilize information management tools to monitor outcomes of care processes and deliver nursing care to adult clients with acute illness as measured by: a. Discuss available technology for delivery of nursing care related to selected topics.

NURS 235. Nursing Leadership and Management 1 Credit (1)

This course introduces the intermediate nursing student to professional practice principles of nursing leadership and management including: health policy and politics, fiscal management & budgeting, conflict management, decision making, interdisciplinary practice, working with teams, roles in disaster planning and management, application of standards of care to risk management, organization of care delivery, health care systems, processes, and practice environments. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to Community Colleges campuses only. May be repeated up to 1 credit.

Learning Outcomes

1. Utilize diverse patients' values, preferences, and expressed needs to drive development of the plan of care for acute and chronically ill patients as measured by: a. Discuss how personal values impacts the delivery of care to clients across the lifespan.
2. Evaluate ability to function within own scope of practice as a member of the healthcare team to deliver care to individuals and families across the lifespan with complex health alterations as measured by: a. Employ the principles of delegation to the assignment of nursing team duties and patient room assignments; b. Analyze effective communication with health care team members; c. Apply effective communication strategies in common nursing activities; d. Discuss methods to resolve conflict.
3. Demonstrate the use of evidence-based approaches for the delivery and evaluation of care to patients across the lifespan as measured by: a. Analyze personal values that influence approaches to ethical issues and decision-making; b. Describe ways in which nursing research can be used to guide nursing practice.
4. Formulate a plan of care for the provision of care in healthcare delivery systems using policies, procedures and standards of care as measured by: a. Discuss the use of key indicators to measure

performance; b. Recognize tools and processes for continuous quality improvement.

5. Interpret effective use of strategies to reduce risk of harm to self or others while providing professional nursing care including evidence-based practice, national patient safety goals, and core measures as measured by: a. Discuss ways to improve care while reducing costs; b. Incorporate an understanding of legal risks into the practice of professional nursing and recognize how to minimize risk.
6. Utilize information management tools to monitor outcomes of care processes and deliver nursing care to patients with chronic or acute illness across the lifespan as measured by: a. Discuss the necessity of using recognized taxonomies and standardized nursing languages in nursing documentation.

NURS 236. Nursing Preceptorship - Adult Health III 6 Credits (3+9P)

This course is the final course involving care of the patient with acute or chronic illness. It focuses on care of patients with complex or multi-system problems allowing the graduating nursing student to discuss and apply all the skills learned in previous nursing courses. After successfully passing the HESI exam, students have clinical practice with preceptor in various health care settings. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to: organize care of a group of clients, maintain proficiency in performance of nursing skills, collaborate with clients, families, peers and health care team members, and support care planning skills related to patient actual, psychosocial, and potential problems in the delivery of nursing care to meet needs of the preceptors group of clients. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program and have successfully completed all level 1, 2 and 3 nursing courses may enroll in this course. Clinical may include inpatient or outpatient care, days, evenings, nights, or weekend experiences. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Learning Outcomes

1. Integrate the values, preferences, attitudes, and expressed needs of the acutely ill patient into the plan of care related to the care of the adult client with complex health deviations as measured by: a. Analyze how personal values, values of patients, families, and medical personnel impacts the involvement of patients in their care related to selected course topics for adult clients with complex care issues; b. Evaluate health protection, health promotion, and disease prevention strategies related to selected course topics for adult clients; c. Integrate the scope, risk factors, physiologic processes, and attributes of complex acute diseases into the clinical management of these disease related to selected course topics for adult clients.
2. Integrate the contributions of other members of the healthcare team into the delivery of nursing care for individuals across the lifespan with complex or multi-system health alterations related to the care of the adult client with complex health deviations as measured by: a. Use resources for continuity of patient care related to selected topics; b. Report significant information to other disciplines.
3. Discriminate between valid and invalid reasons for modifying evidence-based clinical practice based on clinical expertise or patient/family preferences in the creation of a plan of care for delivery and evaluation of care for patients across the lifespan related to the care of the adult client with complex health deviations as measured by: a. Implement individualized patient care utilizing an evidence-based approach related to selected course topics for multiple clients;

- b. Practice ethically in the delivery of nursing care for adult patients with complex care issues.
4. Evaluate the use of policies, procedures and standards of care in healthcare delivery systems and adapt the care as appropriate related to the care of the adult client with complex health deviations as measured by: a. Formulate a plan of care for the provision of care to complex patients in healthcare delivery systems using policies, procedures, and standards of care related to selected course topics.
5. Interpret and analyze effective use of strategies to reduce risk of harm to self or others while providing professional nursing care, creating a structure for implementation of evidence-based practice, national patient safety goals, and core measures in the care of the adult client with complex health deviations as measured by: a. Interpret variations in physiologic integrity related to selected course topics; b. Integrate nursing interventions to reduce risk of harm related to selected course topics including evidence-based practice, national patient safety goals, and core measures.
6. Integrate use of appropriate technology and information management tools to support safe delivery of care to the adult client with complex health deviations as measured by: a. Choose available technology for delivery of nursing care related to selected topics.
5. Explain the roles and functions of the members of the health care team including ancillary personnel as they relate to the care of patients with complex health deviations.
6. Explain the rationale for the performance of the following technical skills: a. EKG monitoring; b. Rhythm strip interpretation; c. Hemodynamic monitoring and interpretation; d. Tracheal suctioning
7. Recognize the nurse's role in establishing a therapeutic relationship with patients experiencing complex health deviations.

**NURS 258. Psychosocial Requisites: A Deficit Approach
3 Credits (2+3P)**

Nursing theory and practice as it relates to the care of the client experiencing psychosocial health deviations. The role of the nurse is discussed along with the ethical and legal aspects of care for the client with psychosocial disorders. Building upon the communication skills of listening and responding, the student develops the therapeutic skills of interpersonal relationships. Grade of C or better is required. May be repeated up to 3 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 210, and NURS 246.

Corequisite(s): NURS 211, NURS 246.

**NURS 260. Management of Patients with Health Deviations
2 Credits (2)**

A capstone course to the nursing program in which principles in management and delegation to less prepared personnel is explored. A review of leadership roles, legal issues, quality initiatives, informatics and scope of practice is included. Preparation for the NCLEX is an integral portion of the course. Grade of C or better is required. May be repeated up to 2 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 210, NURS 211, NURS 246, and NURS 258.

Corequisite(s): NURS 212, NURS 256.

Learning Outcomes

1. Discuss nursing practice concepts relevant to the practice of professional nursing.
2. Evaluate principles of quality improvement and safety into nursing practice within healthcare organizations and systems.
3. Apply leadership concepts through the application of policies that apply to healthcare delivery.
4. Promote a culture of safety through anticipating and eliminating potentially harmful situations.
5. Collaborate in systems analysis when clinical errors or near misses occur to reduce harm, minimize blame, and encourage transparency.
6. Integrate evidence in determining best clinical practice.
7. Demonstrate basic knowledge of healthcare policy, finance, and regulatory environments, including local, state, national, and global healthcare trends.
8. Use an ethical framework to evaluate the impact of policies of healthcare, especially for vulnerable populations.

**NURS 3110. Human Pathophysiology Foundation for Nursing
4 Credits (4)**

Human pathophysiology concepts of adaptation and alteration in function and structure across the life span and their implications for nursing practice. Restricted to: BSNR, BSN, BSNP or consent of instructor majors. May be repeated up to 4 credits.

Prerequisite: Grade of C- or better in both (BIOL 353 & BIOL 2221/BIOL 354), or (BIOL 2210 & BIOL 2225), or (SPMD 2210 & SPMD 3210).

NURS 246. Health Deviations I

7 Credits (4+9P)

Introduction to medical/surgical clients, whose health care needs are routine and predictable. Focus is on simple health deviations, including concepts relative to health promotion and maintenance. The nursing process is utilized to provide evidenced based, safe client centered care. Students are expected to apply clinical judgment, communicate and collaborate with clients and the interdisciplinary team in providing care for a group of two to three clients. Grade of C or better required. May be repeated up to 7 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS 153, NURS 156, NURS 154, NURS 157 and NURS 210.

Corequisite(s): NURS 211, NURS 258.

NURS 256. Health Deviations II

8 Credits (6+12P)

Concepts and principles applied to clients with complex health deviations. Building upon knowledge gained in NURS 246, focus will be on acutely ill clients. The nursing process continues to serve as a guide to provide safe, client centered care. The student collaborates with the interdisciplinary team in all aspects of client care. Student experiences the role of the staff nurse under the guidance and direction of the nursing instructor. Grade of C or better required. May be repeated up to 8 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 210, NURS 211, NURS 246, and NURS 258.

Corequisite(s): NURS 212, NURS 260.

Learning Outcomes

1. Apply each step of the nursing process as a method of organizing the nursing care for patients with complex health deviations.
2. Discuss the patient's health care needs that occur as a result of complex health deviations.
3. Explain methods the nurse can employ in allowing the patient to assume the right and responsibility for his own care.
4. Incorporate the concepts and principles derived from the biological, developmental, social, nutritional and computer sciences and nursing knowledge that relate to the nursing care of patients with complex health deviations.

Corequisite: NMNC 3110, NMNC 3135.

Learning Outcomes

1. Identify the functional and structural (pathophysiology) alterations that occur in the human body.
2. Relate the impact of functional and structural alterations on human health.
3. Recognize the relationships of pathophysiology to the practice of professional nursing.
4. Discuss the basic concepts of patterns of genetic inheritance of disease with related nursing implications and ethical considerations.
5. Use medical terminology appropriately.
6. Relate the impact of socio-cultural, legal-ethical factors, and scientific advances on pathophysiology.

NURS 3115. Care of the Veteran Population

3 Credits (3)

This course prepares healthcare and other professionals to care for the Veteran population. Specific topics and health issues explored include military and veteran culture, women in the military, post-traumatic stress disorder, traumatic brain injury, military sexual trauma, and chemical exposures. An overview of the Veterans Health Administration, the largest healthcare system in the USA, will be provided. May be repeated up to 3 credits.

Learning Outcomes

1. Examine Veterans' demographics and the impact of political, social, cultural, and environmental factors.
2. Analyze the mission of the Veterans Health Administration with a focus on healthcare system and services.
3. Evaluate health concerns, issues, and health seeking behaviors within the diverse Veteran population.
4. Appraise available evidence on delivering culturally sensitive care that addresses the needs of the Veteran patient and their family.

NURS 3996. Special Topics

1-9 Credits (1-9)

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 21 credits.

Learning Outcomes

1. Varies

NURS 4110. Strategies for Student Success

3 Credits (3)

This course is designed to assist and support students as they identify learning needs and develop a plan for successfully mastering nursing knowledge. Course activities and assignments will be designed to address student's self-identified learning goals to enhance their opportunity for success. Restricted to NURS, BSN, BSNP, BSNR majors. May be repeated up to 3 credits.

NURS 4997. Independent Study

1-3 Credits (1-3)

Individual studies with prior approval of department head. May be repeated up to 3 credits.

Learning Outcomes

1. Varies

NURS 5110. Evidence-Based Practice for Healthcare Leaders

3 Credits (3)

This course is designed to prepare nurse administrators and other healthcare leaders with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. May be repeated up to 3 credits.

Learning Outcomes

1. Utilize information sources, such as bibliographic databases and electronic resources and experts, to locate existing knowledge relevant to healthcare and nursing practice.
2. Critically appraise selected research designs, methods of data collection (quantitative and qualitative), and data analytic methods in relation to selected clinical practice and healthcare systems problems.
3. Discuss the relevance of theory and conceptual frameworks to health care research and practice.
4. Evaluate the use of evidence-based practice models to investigate clinical practice and healthcare systems problems.
5. Discuss the ethical, cultural, and professional concerns with human subjects in nursing research and considerations for evidence-based practice.
6. Propose a clinical practice change utilizing evidence-based practice guidelines.

NURS 5115. Quality Improvement for Healthcare Leaders

3 Credits (3)

This course is designed to prepare nurse administrators and other healthcare leaders with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. Restricted to: exclude Online MSN in Nursing Administration majors.

Learning Outcomes

1. Explain the value of improvement science in healthcare and its impact on healthcare quality.
2. Articulate the role of administrators in leading and facilitating change in healthcare systems through quality improvement processes.
3. Compare and contrast conceptual models and frameworks that guide quality improvement work in healthcare systems.
4. Articulate the principles for selecting a systems-level problem for continuous quality improvement action.
5. Demonstrate the use of quality improvement methods, tools and clinical data to address a systems-level problem in the clinical setting.
6. Understand the role of health policy and national standards in guiding quality improvement initiatives.

NURS 5120. Nursing Informatics

3 Credits (3)

This course provides the foundational knowledge necessary to integrate systems and information technologies. Topics include informatics, knowledge management, healthcare information systems/telehealth including the electronic health record. Focuses on using available technology to enhance safety and monitor the health status and outcomes of populations. Restricted to: NURS, NUSC, NURP majors. May be repeated up to 3 credits.

NURS 5125. Health Policy for Advanced Nursing Practice

3 Credits (3)

Course provides a conceptual approach to understanding health policy including the social, legal, political and ethical factors that influence policy development. Strategies for influencing policy direction and change are examined. Restricted to: NURS, NUSC, NURP majors. May be repeated up to 3 credits.

NURS 5130. Promoting Health Behavior

3 Credits (3)

Emphasis is on the role of the advanced practice nurse in facilitating health behavior change. The impact of health status on health behavior,

ethical issues relate to health promotion, and the processes for promoting healthy behaviors are explored. Theoretical models of behavior change and primary, secondary, and tertiary prevention concepts serve as a basis for developing nursing interventions that promote behavior change. May be repeated up to 3 credits.

NURS 5210. Advanced Leadership in Healthcare

3-5 Credits (3+1-2P)

Analysis of leadership theories as they pertain to the nurse executive and the advanced practice nurse in complex health care organizations. Emphasis will be placed on organizational change and conflict management in working with interdisciplinary health care teams. Clinical component included for DNP students only. Restricted to: NURS,NUSC,NURP majors. May be repeated up to 5 credits.

NURS 5220. Management of Human and Fiscal Resources in Nursing

4 Credits (3+3P)

This graduate level course examines and applies contemporary concepts of human and fiscal resource management for the nurse administrator.

Focus is placed on achieving quality outcomes through effective management of human assets and organizational resources in health care settings. The course includes a clinical component. May be repeated up to 4 credits.

NURS 5230. Seminar in Nursing Administration- Roles

3 Credits (3)

Role preparation for the nurse administrator as manager, leader, collaborator and change agent. Synthesis of concepts from management and nursing as a basis for role effectiveness in nursing administration. May be repeated up to 3 credits.

Corequisite: NURS 5240.

NURS 5240. Advanced Field Work in Nursing

1-3 Credits (1P)

A practicum in Nursing Administration. Application of concepts from management and nursing to the clinical, educational, or community setting. Restricted to: MSN, DNP, PHD majors. May be repeated up to 12 credits.

Prerequisite: NURS 5210.

Corequisite: NURS 5230.

NURS 5996. Special Topics

1-3 Credits (1-3)

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 12 credits.

NURS 5997. Independent Study

1-10 Credits (1-10)

Individual studies and directed research with prior approval of department head. May be repeated up to 20 credits.

NURS 6110. Introduction to Population Health

1 Credit (1)

This required course for the Doctor of Nursing Practice program prepares the student to implement specialty population-based disease prevention and health promotion activities to achieve national and international goals of improving worldwide health status. The course focuses on a spectrum of issues affecting health, which include emerging infectious diseases, emergency preparedness, disparities in health and healthcare services, and the impact of behavior and lifestyle choices on health.

Learning Outcomes

1. Analyze data to identify potential and emerging health hazards in individuals and communities.
2. Evaluate care delivery models to address disease prevention and population health.

3. Identify gaps in the care of individuals, aggregates, or populations.

4. Identify gaps in the care of individuals, aggregates, or populations.

NURS 6120. Quality Improvement in Healthcare

3 Credits (3)

This course prepares advanced practice nurses to be leaders of inter-professional teams engaged in the process of continuous quality improvement in healthcare settings. Healthcare quality improvement principles and practice will focus on improving patient care and outcomes, lowering costs, reducing health disparities, and increasing access to healthcare. May be repeated up to 3 credits.

Learning Outcomes

1. Explain the value of improvement science in healthcare and its impact on healthcare quality.
2. Articulate the role of the doctorally-prepared nurse in leading and facilitating change in healthcare systems through quality improvement processes.
3. Compare and contrast conceptual models and frameworks that guide quality improvement work in healthcare systems.
4. Articulate the principles for selecting a systems-level problem for continuous quality improvement action.
5. Demonstrate the use of quality improvement methods, tools and clinical data to address a systems-level problem in the clinical setting.
6. Analyze the role of health policy and national standards in guiding quality improvement initiatives.

NURS 6125. Evidence-Based Practice in Healthcare

3 Credits (3)

This course is designed to prepare nurse practitioners and other advanced practice nurses with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. Restricted to: Family Nurse Practitioner; Psych/Mental Health Nursing; Nursing Practice; Family Nurse Practitioner Certificate; and Psych/Mental Health Nursing Certificate majors.

Prerequisite: NURS 6120.

Learning Outcomes

1. Utilize information sources, such as bibliographic databases and electronic resources and experts, to locate existing knowledge relevant to healthcare and nursing practice.
2. Critically appraise selected research designs, methods of data collection (quantitative and qualitative), and data analytic methods in relation to selected clinical practice and healthcare systems problems.
3. Discuss the relevance of theory and conceptual frameworks to health care research and practice.
4. Evaluate the use of evidence-based practice models to investigate clinical practice and healthcare systems problems.
5. Discuss the ethical, cultural, and professional concerns with human subjects in nursing research and considerations for evidence-based practice.
6. Propose a clinical practice change utilizing evidence-based practice guidelines.

NURS 6130. Epidemiology for Advanced Nursing Practice

2 Credits (2)

Emphasis is on the practical application of the principles of epidemiology in the measurement and evaluation of population health. Epidemiological literature will be critiqued and synthesized to evaluate population-based

public health nursing problems. Issues related to disease surveillance, causation, genetic patterns, screening and social trends in population health will be examined. Use of existing data bases and technology programs are covered. Restricted to: NURP, NURS, NUSC majors. May be repeated up to 2 credits.

NURS 6135. Interdisciplinary Leadership and Role Development for Practice Excellence

3 Credits (3)

This required course prepares students for organizational and systems leadership and knowledge and skills critical to role development in independent and inter and intra-disciplinary practice. Content includes communication, conflict resolution, collaboration and negotiation, leadership, and team functioning to maximize success in the establishment of safe, effective patient-centered care in complex environments.

Learning Outcomes

1. Evaluate interdisciplinary care delivery models from a systems perspective using evidence-based findings.
2. Incorporate principles of specialty practice management, quality improvement, and interdisciplinary teamwork in order to meet the health needs of the specialty population served.
3. Analyze effective strategies for the management of ethical dilemmas, incorporation of sensitivity to diverse cultures, and elimination of health disparities incorporating appropriate communication techniques.
4. Differentiate among the multiple roles in advanced nursing practice with a focus on working effectively in inter-professional teams.
5. Evaluate leadership styles in a team environment in the analysis of complex practice and organizational issues.
6. Incorporate consultative and leadership skills with inter and intra-disciplinary teams to facilitate change using effective communication strategies.

NURS 6150. Advanced Anatomy

3 Credits (3)

This course presents an extensive exploration of human anatomy from a topographical and regional perspective. The knowledge gained in this course serves as a foundation for advanced clinical assessment for anesthesia practice, clinical decision-making, and patient management.

Learning Outcomes

1. Describe the regional organization and topography of anatomical structures within key clinical regions of the human body with a focus on neurovascular anatomy and internal organs.
2. Describe the structure and function of the central nervous system and the distribution of all of the major peripheral nerves in the body.
3. Identify the relationship between palpable anatomical landmarks and the deep anatomy of the head, neck, thorax, abdomen, pelvis and limbs.
4. Identify major anatomical structures in the human body using radiographs, ultrasound, CT, MRI images.

NURS 6155. Advanced Physiology

3 Credits (3)

This course presents an extensive exploration of anatomy and physiology of the human body's organs and systems. Topics are covered from a molecular, cellular, tissue, organ, and system perspective. Individual differences in physiology as related to culture, gender, race, age, and genetics will also be covered. The knowledge gained in this course serves as a foundation for advanced clinical assessment, pharmacology, clinical decision-making, and patient management.

Learning Outcomes

1. Identify structures and normal physiologic functions of the human body organs and systems.
2. Demonstrate knowledge of the concept of homeostasis.
3. Summarize the complexities of normal human physiologic multi-system interactions
4. Recognize physiologic differences related to culture, gender, race, age, and genetics
5. Discuss how principles of normal physiology impact advanced practice nursing care of individuals.

NURS 6210. Professional Roles for Advanced Practice Clinical Nursing
3 Credits (3)

This course will focus on providing an in depth understanding of the legal, historical, political, social, and ethical aspects of advanced practice nursing. Traditional and emerging roles for advanced practice nursing are examined. Students must be Admitted to the DNP program. Restricted to DNP majors. May be repeated up to 3 credits.

Prerequisite: NURS 6430 OR NURS 6520.

NURS 6215. Professional Aspects of Nurse Anesthesiology Practice
3 Credits (3)

This course examines professional role development of the nurse anesthetist with an emphasis on the history and evolution of nurse anesthesiology practice, as well as scope, standards, legal aspects, ethics, quality, and regulations. Professional advocacy topics and the business of anesthesiology practice will be appraised. This course also addresses the risks of the role related to wellness and substance use disorder. Cultural competence modules for healthcare workers will be completed during this course.

Learning Outcomes

1. Discuss the history and evolution of nurse anesthesiology practice.
2. Analyze the professional components of nurse anesthesiology practice, emphasizing scope, standards, legal aspects, ethics, and regulation.
3. Differentiate between state, national, and international anesthesia organization roles and functions.
4. Identify quality assessment tools in anesthesiology practice.
5. Compare various business models of anesthesia, reimbursement methods, payment policies, reimbursement, and nurse anesthesiology practice patterns.
6. Examine the impact of wellness and substance use disorder on anesthesia providers.
7. Demonstrate cultural awareness and sensitivity of patient background characteristics including, but not limited to race, ethnicity, socioeconomic status, age, gender and sexuality.
8. Examine professional advocacy and other selected current issues affecting nurse anesthesiology practice.

NURS 6220. Advanced Pathophysiology for Clinical Nursing
3 Credits (3)

In-depth study of the physiological and pathological bases of altered health states of patients across the life span. Case studies facilitate application of complex concepts to clinical nursing practice. Restricted to: NURS, NUSC, NURP majors. May be repeated up to 3 credits.

NURS 6224. Diagnostic Reasoning and Advanced Health Assessment
3 Credits (3)

This course is designed to assist students to refine history taking, psychosocial assessment and physical assessment skills. Content focuses on assessment of individuals throughout the lifespan. Emphasis

is placed on detailed health history taking, differentiation, interpretation and documentation of normal and abnormal findings. Diagnostic reasoning skills are emphasized as students develop processes to formulate differential diagnoses for acute and chronic physical and mental illnesses in the primary care setting across the lifespan.

Prerequisite: NURS 6235.

Learning Outcomes

1. Analyze and use the most effective communication methods to obtain a health history and to develop a therapeutic relationship.
2. Differentiate variations in normal and abnormal health and physical data.
3. Explore processes of diagnostic reasoning and potential cognitive biases.
4. Using data from the health and physical assessment, formulate differential diagnoses for given physical and mental illnesses across the lifespan.
5. Demonstrate advanced clinical judgment by using data from the health and physical assessment to design and implement clinically safe and patient-focused interventions.

NURS 6226. Advanced Health Assessment Practicum

1 Credit (1P)

Assessment skills for advanced clinical practice. Emphasis on assessment of patients across the life span. May be repeated up to 3 credits.

Corequisite: NURS 6225.

Learning Outcomes

1. Conduct a comprehensive and systematic assessment of health and illness in complex situations.
2. Collect and interpret health data related to the health history, chief complaint, and history of the present illness.
3. Use effective communication methods to obtain a health history and to develop a therapeutic relationship
4. Assess variations in normal and abnormal health and physical data.
5. Document advanced clinical judgment by using data from the health and physical assessment to determine a health status.

NURS 6230. Advanced Clinical Pharmacology

3 Credits (3)

Principles of clinical pharmacology for advanced clinical practice. Focus on pharmacology as it relates to human physiology and pathophysiology across the lifespan. Restricted to: NURS, NUSC, NURP majors. May be repeated up to 3 credits.

NURS 6235. Advanced Pathophysiology for Nurse Anesthesiology Practice

4 Credits (4)

This course focuses on pathophysiology of diseases relevant to nurse anesthesiology practice. Evidence-based practice resulting from relevant research will be incorporated in discussions related to anesthesia management of patients with health status alterations. Students will utilize this information to build a foundation for anesthesia clinical reasoning and principles of nurse anesthesiology practice.

Learning Outcomes

1. Analyze the relationship between normal physiology and pathologic consequences produced by selected disease states.
2. Demonstrate understanding of selected biochemical, genetic, and cellular mechanisms that lead to common health alterations that occur in individuals across the lifespan.
3. Identify various pathologic alterations relevant to anesthesia practice.

4. Integrate the clinical application of pathophysiology into the practice of nurse anesthesiology.
5. Discuss the relationship between pathophysiology of various systems and anesthesia planning and management.

NURS 6240. Advanced Health Assessment for Nurse Anesthesiology Practice

4 Credits (3+1P)

This course focuses on development of knowledge and skills necessary to conduct comprehensive and focused health assessments for patients across the lifespan with special attention given to nurse anesthesiology practice. Principles of conducting detailed health histories, physical examinations, and diagnostic study interpretations will be featured. Students will obtain and document detailed culturally sensitive health histories and physical examinations. They will use critical thinking to identify and/or interpret pertinent diagnostic studies related to alterations in health patterns. Emphasis is placed on differentiation between normal and abnormal health history, physical assessment, and diagnostic findings.

Learning Outcomes

1. Demonstrate a systematic approach to the collection and documentation of data for health history and physical assessment while maintaining confidentiality and respecting privacy.
2. Collect and interpret health data related to the health history, history of the present illness, laboratory and other diagnostic findings.
3. Document relevant findings for both comprehensive and focused health histories and physical assessments.
4. Identify potential anesthesia risks based on patient health history, physical exam findings, and current literature.
5. Conduct and document a comprehensive preanesthesia evaluation to include health and surgical history, physical examination, and interpretation of diagnostic data using effective communication while maintaining confidentiality and respecting privacy.

NURS 6245. Advanced Pharmacology for Nurse Anesthesiology Practice

3 Credits (3)

This course builds upon the advanced clinical pharmacology course and is designed to provide an evidence-based in-depth foundation of pharmacology and its application to anesthesiology practice across the lifespan. The primary focus will be on topics such as pharmacodynamics, pharmacokinetics, pharmacotherapeutics, pharmacy, and toxicology of currently used anesthetic agents

Learning Outcomes

1. Identify general pharmacokinetic, pharmacodynamic, pharmacogenetic, and pharmacotherapeutic principles related to anesthetic agents and adjunct drugs
2. Discuss the uptake and distribution of primary anesthetic agents and adjunct drugs.
3. Summarize indications/contraindications for selected anesthetic agents and adjunct drugs.
4. Calculate accurate doses of selected anesthetic agents and adjunct drugs.
5. Review potential adverse effects and drug interactions of selected anesthetic agents and adjunct drugs.
6. Describe evidence-based anesthetic considerations of anesthetic agents and adjunct drugs used for various procedures and various patients across the lifespan with diverse comorbidities and demographics.

NURS 6250. Healthcare Policy and Ethics**3 Credits (3)**

This course examines complex challenges faced in the US healthcare system for nurses in advanced practice roles within an ethical framework. Ethical, social, and political issues that affect the provision of health care, communities, and society are critically analyzed with an emphasis on interprofessional roles in health care. Concepts that support advocating for social justice, reducing healthcare disparities, improving quality, promoting ethical aspects of care, and cost containment are overarching themes in the course discussions and assignments. Students use self-reflection, case studies and presentations to apply ethical principles, develop healthcare policy recommendations to improve care access, and reduce disparities in professional practice and population health.

Learning Outcomes

1. Analyze the historical evolution of health care systems and their influence on the development of institutional, local, state, federal and international health policy.
2. Critique socioeconomic, legal, ethical, and political issues relevant to policymaking and provision of equitable, safe, and quality health care at the local, state, and national levels.
3. Assess health policies, infrastructure, financing, and complex systems in the US in contrast to other nations.
4. Critically analyze bioethical issues in clinical practice settings as they impact policy, disparities, advocacy, ethics, improved patient outcomes and reduced costs.
5. Synthesize the principle of human rights and ethics in conduct of health care research and policy design.
6. Interpret the value and importance of advanced practice nursing role(s) to policy makers, health care professionals, and consumers.

NURS 6255. Innovations and Health Care Organizations**3 Credits (3)**

Examines complexity and innovation within health care systems, health care delivery, and population health. Areas of focus are systems, organizations, health disparities, and ethical decision making. Emphasis is on improvement in services and outcomes. Restricted to: NURS, NUSC, NURP majors. May be repeated up to 3 credits.

NURS 6260. Population Health and the Environment**3 Credits (3)**

This course will examine and evaluate prevention strategies, healthcare quality measures, diversity principles, and patient safety considerations related to population health. There is a focus on how environmental health can be integrated into nursing education, practice, research, and policy/advocacy efforts. Students will explore community, environmental, cultural, and socioeconomic dimensions of care as evidenced by completion of a community assessment.

Prerequisite: NURS 6110.

Learning Outcomes

1. Analyze theoretical frameworks/conceptual models for relevance to population health.
2. Analyze the impact of a population health focus on the health of individuals, families and communities.
3. Differentiate the impact of biologic factors, the natural environment, built environment and altered environment on health.
4. Describe the impact of discrimination, sexism, and racism on equity and inclusion in healthcare and on health.
5. Analyze the relationship between human health, animal health and ecosystem health.
6. Apply the principles of patient and community engagement for population health improvement

7. Discriminate between population growth, health and development as factors in global health.
8. Examine institutional, local/state/federal, and global policies that address the relationship between population health and the environment.

NURS 6265. Strategic and Financial Planning for Population Health Programs**3 Credits (3)**

This course explores the role of nurses in advanced nursing practice within a rapidly changing healthcare system. Theories of leadership, quality, risk outcomes, and financial structures for healthcare organizations are discussed providing a framework for change within advanced nursing practice specialties. Accounting, finance, and marketing principles are presented enabling students to complete a financial plan for an evidence based practice change.

Prerequisite: NURS 6270.

Learning Outcomes

1. Use the principles of population focused program planning, development, implementation, and evaluation to develop an evidence-based population focused strategy to address a health priority issue.
2. Analyze the potential influence of cultural, ethical, and public health policy issues when working with diverse populations.
3. Analyze aspects of organizational culture and planned change that may influence success of planned interventions.
4. Evaluate feasibility issues related to implementing planned interventions such as cost, time, and available resources.
5. Integrate principles of program evaluation to determine impact and sustainability of evidence-based interventions.
6. Analyze the impact of financial models on costs, quality and health outcomes.

NURS 6270. Clinical Data Management and Analysis**2 Credits (2)**

This required course provides students with the knowledge base to understand, collect, manage, and measure clinical data. Students will explore data collection and management processes, levels of measurement, basic statistics, and measurement for improvement in order to effectively use clinical data. Data entry exercises employed through analytical tools and statistical software packages will allow the students practice and apply the basic data management and analysis skills needed for the evaluation of clinical data and evidence-based practice.

Learning Outcomes

1. Apply principles of sound data collection and management.
2. Create a database to collect and aggregate data.
3. Apply levels of measurement.
4. Perform basic statistics including descriptive, parametric, and non-parametric statistics.
5. Perform basic analysis of aggregate population level data.
6. Use common tools (excel) and statistical software packages (SPSS) for data collection, entry, management, and analysis.

NURS 6305. Introduction to the DNP Project**1 Credit (1)**

This required course is designed to assist the student in exploring a clinical problem and selecting an area of interest within a practice specialization, and in demonstrating professional competencies related to an area of interest to begin foundational development of the DNP scholarly project. The student will document previously acquired abilities

and competencies while developing an understanding of the DNP project process. Students will work towards selection of a setting (hospital, long-term, primary care or community health agency) where concepts, theories, and principles of leadership, administration, and management can be applied.

Learning Outcomes

1. Examine the role of the DNP in the development and implementation of evidence based change of practice projects.
2. Identify a DNP Project practice site and clinical advisor.
3. Develop a portfolio demonstrating expertise in the specialty area of interest and understanding of a clinical problem.

NURS 6307. DNP Project Practicum

1-3 Credits (1-3P)

This leadership practicum courses provide for the development of a population health leader as demonstrated through the DNP project. The student will conduct an assessment of a population, community and/or organization where evidence-based leadership activities may be employed. Once a problem or issue is identified in the practice setting, the student will develop an evidence-based project designed to positively impact population-specific and/or patient care outcomes. After approval of the DNP project proposal, the student will implement an evidence-based project designed to positively impact population health and/or patient/client care outcomes. The culmination of the DNP project is evaluation and dissemination of the evidence-based changes. May be repeated up to 9 credits.

Learning Outcomes

1. Demonstrate competence in the role of population health leader who delivers advanced practice nursing, including educators, clinicians, administrators, and translators of research.
2. Execute the DNP Project that meets the needs of diverse populations
3. Collaborate with DNP committee and the organization to establish an intra- and inter-professional continuous quality improvement process for achievement of the desired outcomes
4. Exhibit consistent professional behavior, performance, accountability, and responsibility within a population health leadership role

NURS 6310. DNP Project I

1 Credit (1)

This is the first in a three-course series that culminates in the implementation, evaluation and dissemination of scholarly work that demonstrates the student's synthesis of the Essentials of Doctoral Education for Advanced Practice Nursing (i.e., the DNP Essentials). The project must use evidence to improve clinical practice, healthcare delivery and/or patient outcomes. Upon completion of this course, students will identify a problem in healthcare, explore the existing evidence and develop a preliminary proposal for a project that demonstrates synthesis of DNP coursework and lays the groundwork for future scholarship.

Prerequisite: NURS 6120 and NURS 6125.

Learning Outcomes

1. Systematically review the existing evidence pertaining to selected clinical problem, generating a written review of the existing evidence.
2. Identify a theoretical framework or model that will guide the development of a solution or intervention and/or the execution of the DNP project.
3. Identify a theoretical framework or model that will guide the development of a solution or intervention and/or the execution of the DNP project.
4. Defend the DNP project proposal in front of the student's project committee and submit to IRB

NURS 6320. DNP Project II

1 Credit (1)

This is the second in a three-course series that culminates in the implementation, evaluation and dissemination of scholarly work that demonstrates the student's synthesis of the Essentials of Doctoral Education for Advanced Practice Nursing (i.e., the DNP Essentials). The project must use evidence to improve clinical practice, healthcare delivery and/or patient outcomes. Upon completion of this course, students will have designed and defended a plan for implementation and evaluation of the proposed project, submitted an IRB application, and initiated the project upon obtaining IRB approval.

Prerequisite: NURS 6310.

Learning Outcomes

1. Execute the approved DNP project implementation and evaluation plan.
2. Develop a plan for local, regional and/or national dissemination of the DNP project outcomes as scholarly work.
3. Identify the DNP Essentials that are represented in the project and describe how the project addressed the requirement.

NURS 6330. DNP Project III

1 Credit (1)

This is the third in a three-course series that culminates in the implementation, evaluation and dissemination of scholarly work that demonstrates the student's synthesis of the Essentials of Doctoral Education for Advanced Practice Nursing (i.e., the DNP Essentials). The project must use evidence to improve clinical practice, healthcare delivery and/or patient outcomes. Upon completion of this semester, students will demonstrate the ability execute the proposed project plan. If additional time is needed to complete the proposed DNP project, the student must register for NURS 6340 in subsequent semesters until the project outcomes are successfully defended in front of the project committee.

Prerequisite: NURS 6320.

Learning Outcomes

1. Defend the DNP project outcomes in front of the student's project committee and a public audience.
2. Generate a comprehensive written paper (i.e., professional manuscript, white paper, or technical report) that outlines the DNP project problem statement, objectives, review of evidence, implementation, and outcomes.

NURS 6340. Clinical Scholarly Project

1-4 Credits (1-4)

Building on the practice expertise of the DNP student, this series of credits is to provide the student with the opportunity to design an innovative clinical practice improvement project/program addressing an actual health care concern. Through mentored activities, the DNP student will identify, develop, implement, evaluate, and disseminate an independent analytic. Graded: S/U Grading (S/U, Audit). Students must be Admitted to the DNP program. Restricted to: NURP majors. May be repeated up to 4 credits.

NURS 6352. Integrated Care for Diverse Populations

2 Credits (2)

This course examines integrated health care as an approach to health care delivery characterized by a high degree of collaboration and communication among health professionals. Students expand their knowledge of interprofessional competencies and learn the concepts of the development of comprehensive treatment plans to address the biological, psychological and social needs of the patient in diverse patients across care settings. The focus is on delivering behavioral or

biomedical health interventions relevant to everyday clinical practice across disciplines and practice settings. There is a strong emphasis on feasible brief interventions in a fast-paced clinical context and on adapting interventions to each patient's unique biopsychosocial, socioeconomic, and cultural context.

Prerequisite: NURS 6410 or NURS 6510.

Learning Outcomes

1. Analyze the relationship between behavioral and biomedical health and cultural contexts, including an understanding of the common health/illness presentations;
2. Compare and contrast models of integrated health.
3. Develop a treatment plan for a given patient addressing the investigation and management of the patient's illness, and the personal and social issues to which the illness may give rise;
4. Identify strategies for communicating clearly and sensitively with patients and their families and with other health professionals;
5. Analyze inter-professional team members roles in collaboration and cooperation with other team members as an integral component of team function;

NURS 6405. Psychopharmacology for Advanced Practice

3 Credits (3)

Principles of clinical psychopharmacology with emphasis on clinical application of major drug classifications including decision making, prescribing, drug monitoring and patient education. May be repeated up to 3 credits.

NURS 6410. PMHNP Across the Lifespan I

3 Credits (3)

This is the first in a series of three didactic for the psychiatric mental health nurse practitioner (PMHNP) student. This course introduces the PMHNP student to the scope and standards of practice; legal and ethical issues; comprehensive psychiatric assessment and evaluation; developmental theories; and the theory and practice of psychotherapy. Emphasis is placed on individuals across the lifespan from diverse populations. May be repeated up to 6 credits.

Prerequisite: NURS 6220, NURS 6230.

Corequisite: NURS 6411.

Learning Outcomes

1. Synthesize the current scientific evidence along with theoretical models for personality development into therapeutic interventions within a healthy environment.
2. Promote and evaluate the role of the Advanced Practice Nurse in the management of evidence-based interventions with individuals experiencing psychosocial and neurobiological disorders.
3. Apply theoretical concepts and psychotherapeutic modalities to develop age appropriate therapeutic alliances with mental health individuals during developmental transitions and life-style adjustments across the lifespan, including focus on vulnerable populations at risk for mental health problems, based on current evidence and clinical practice guidelines.
4. Evaluate strategies to promote the negotiation of mutually acceptable and collaborative treatment plans.
5. Apply evidence-based findings to develop and improve practice.

NURS 6411. PMHNP Across the Lifespan I Practicum

3,4 Credits (3,4P)

This is the first in a series of three clinical practicum courses for the psychiatric mental health nurse practitioner (PMHNP) student. This course provides the family psychiatric nurse practitioner student opportunities to work with a preceptor to gain advanced practice skills in

individual therapies, comprehensive psychiatric evaluation, personality development concepts, dual diagnoses and psychotherapy principles; including management of health promotion, health maintenance and disease prevention activities. Students will work in practice settings that see patients across the lifespan to include: children, adolescents, women, men and older adults. Multiple clinical settings may be required; however, students must spend a minimum of 64 clock hours in each clinical setting and should have no more than two clinical settings per semester. 1 P = 64 clock hours of practicum. May be repeated up to 6 credits.

Prerequisite: NURS 6220, NURS 6230.

Corequisite: NURS 6410.

Learning Outcomes

1. Utilize communication skills and ethical strategies to develop and terminate therapeutic relationships.
2. Promote and evaluate the role of the Advanced Practice Nurse in the management of evidence-based interventions with individuals experiencing psychosocial and neurobiological disorders.
3. Demonstrate knowledge of psychotherapeutic theories and concepts by independently conducting psychotherapy with individuals with mental illness or at risk for mental health problems, under the supervision of a preceptor.
4. Apply theoretical concepts and psychotherapeutic modalities to develop age appropriate therapeutic alliances with mental health individuals during developmental transitions and life-style adjustments across the lifespan, including focus on vulnerable populations at risk for mental health problems.
5. Use current evidence and clinical practice guidelines in the assessment and management of patients across the lifespan.

NURS 6420. PMHNP Across the Lifespan II

3 Credits (3)

This is the second in a series of three didactic courses for the psychiatric mental health nurse practitioner (PMHNP) student. This course provides further theoretical foundations, knowledge and evidence-based practice experiences in differential diagnosis for mental health conditions; family and group therapy; and integrated management of mental health conditions. Emphasis is placed on working with families from diverse populations. May be repeated up to 6 credits.

Prerequisite: NURS 6410.

Corequisite: NURS 6421.

Learning Outcomes

1. Evaluate core professional values and ethical/legal standards in the implementation of the nurse practitioner role, identifying and maintaining professional boundaries to preserve the integrity of the therapeutic process.
2. Integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders.
3. Identify age appropriate theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and families during developmental transitions and life-style adjustments across the lifespan.

NURS 6421. PMHNP Across the Lifespan II Practicum

3-4 Credits (3-4P)

This is the second in a series of three clinical practicum courses for the psychiatric mental health nurse practitioner (PMHNP) student. The student gains knowledge and evidence-based practice experiences in

differential diagnosis for mental health conditions; family and group therapy; and integrated management of mental health conditions. The course involves working with a preceptor to develop and implement comprehensive treatment plans that include psychotherapy and psychopharmacology in inpatient and/or outpatient settings. May be repeated up to 8 credits.

Prerequisite: NURS 6411.

Corequisite: NURS 6420.

Learning Outcomes

1. Demonstrate self-awareness of core professional values and ethical/legal standards in the implementation of the nurse practitioner role.
2. Integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders.
3. Demonstrate interdisciplinary communication and care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders.
4. Recognize cultural diversity, spiritual preferences, values, and beliefs to create a climate of patient-centered care demonstrating confidentiality, privacy, comfort, emotional support, mutual trust, and respect.
5. Apply theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and families during developmental transitions and life-style adjustments across the lifespan based on current evidence and clinical practice guidelines.
6. Demonstrate increasing independence in the application of supportive, psychodynamic principles, cognitive-behavioral and other evidence-based psychotherapy/-ies to both brief and long-term individual encounters, family therapy and group therapy.

NURS 6430. PMHNP Across the Lifespan III

1 Credit (1)

This third course in the series of PMHNP didactic courses provides further knowledge and skills for the psychiatric nurse practitioner student to refine competencies in neuropsychology, assessment, diagnosis and treatment. Emphasis will be placed on individuals, families and groups across the lifespan in a multicultural environment. May be repeated up to 5 credits.

Prerequisite: NURS 6420.

Corequisite: NURS 6431.

Learning Outcomes

1. Synthesize current scientific evidence, differential and diagnostic reasoning along with theoretical models for group dynamics into therapeutic interventions.
2. Apply theoretical concepts, evidence-based psychotherapeutic modalities, and knowledge of psychopharmacology to develop comprehensive treatment plans for psychiatric patients across the lifespan.
3. Evaluate the role of the advanced practice nurse in the management of evidence-based interventions with groups and individuals experiencing psychosocial and neurobiological disorders.

NURS 6431. PMHNP Across the Lifespan III Practicum

3,4 Credits (3,4P)

This third course in the series of PMHNP clinical courses provides further knowledge and skills for the psychiatric nurse practitioner student to refine competencies in neuropsychology, assessment, diagnosis and treatment of patients with mental health illness. Emphasis will be placed

on psychotherapeutic and psychopharmacologic treatment of individuals, families and groups across the lifespan in a multicultural environment.

May be repeated up to 6 credits.

Prerequisite: NURS 6421.

Corequisite: NURS 6430.

Learning Outcomes

1. Demonstrate self-awareness of core professional values and ethical/legal standards in the implementation of the nurse practitioner role, identifying and maintaining professional boundaries to preserve the integrity of the therapeutic process.
2. Independently integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders.
3. Demonstrate interdisciplinary communication and care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders.
4. Apply theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and/or families during developmental transitions and life-style adjustments across the lifespan based on current evidence and clinical practice guidelines.
5. Demonstrate theoretical concepts, evidence-based psychotherapeutic modalities, and knowledge of psychopharmacology to independently develop, implement and document comprehensive treatment plans.

NURS 6432. PMHNP Across the Lifespan Residency

2 Credits (2P)

The nurse practitioner student will be expected to fully immerse in the role of the Psychiatric Mental Health Nurse Practitioner (PMHNP) with increasing levels of autonomy, under the supervision of qualified preceptors. Students will demonstrate efficacy in practice, management, and treatment of broad types of mental health issues that present in children, adolescents, adults and/or geriatric individuals and families in a variety of settings. The student will demonstrate the ability to utilize psychopharmacological and psychotherapeutic (individual, family and group) interventions in specialty or subspecialty clinical settings, particularly those that are of clinical relevance to the student's area of intended practice. In this course, the student will demonstrate proficiency in the PMHNP role in integrated healthcare settings. Students must complete psychiatric mental health clinical rotation hours treating patients across the lifespan while offering opportunities for board certification exam preparation. Restricted to Nursing majors. May be repeated up to 4 credits.

Prerequisite: NURS 6421.

Corequisite: NURS 6431.

Learning Outcomes

1. Fully integrate the mental health nurse practitioner role in the implementation of practice in diverse practice settings.
2. Provide high quality, safe, cost-effective, patient centered care recognizing cultural diversity and the patient or designee as a full partner in decision-making.
3. Appropriately diagnose, manage, and develop treatment plans for patients experiencing mental health care problems, to maximize the patient's health potential using psychosocial, psychopharmacologic and psychotherapeutic interventions.
4. Demonstrate the highest level of accountability for ethical professional practice.

5. Evaluate patient outcomes and responses, and modify the patient plan of care accordingly.
6. Participate in opportunities for board certification exam preparation

NURS 6450. Advanced Concepts in the Treatment of Substance Use Disorders

1 Credit (1)

This course examines scope of practice, epidemiology, cultural issues, and common co-occurring psychiatric, medical and legal problems related to substance use disorders, including opioid use disorder. Students will review theories and research as the basis for psychometric screening and evidence-based interventions, including medication-assisted treatment for substance use disorders. Emphasis is placed on individuals across the lifespan from diverse populations. Consent of Instructor required.

Learning Outcomes

1. Demonstrate the significance of professionalism and self-awareness by maintaining professional, ethical and legal standards, preserving the integrity of the therapeutic process, demonstrating commitment to the health and well-being of individuals and society ethical practice, and upholding high personal standards of behavior.
2. Recognize addictive disorders as developmental biopsychosocial disorders using a model of interconnection encompassing neurobiology, genetic, medical and mental health co-morbidities, familial, social, environmental, cultural, spiritual influences as contributors of substance use disorders.
3. Apply an evidence-based approach to detecting substance use disorders by recognizing medical, psychological, social, and functional indicators of subclinical addiction disorders through use of validated standardized substance use disorder screening instruments, and accurately interpret screening results indicative of hazardous and harmful substance use. Integrate positive substance use screening results with therapeutic and counseling strategies appropriate to the patient's readiness to change, by assessing the patient's background, ethnicity, and belief system to accommodate and respect the values and attitudes of various cultures.
4. Recognize the indications, contraindications, duration and utilization of evidence-based medication-assisted treatment and pharmacotherapy for substance use disorders including medications for acute withdrawal and relapse prevention.
5. Diagnose substance use disorders and existing co-occurring mental health and/or medical disorders, and match appropriate level or care, secure consultation and referrals for specialty treatment of addiction and other medical and psychiatric conditions.

NURS 6506. Health Needs of Women and Children

3 Credits (3)

The course will examine patient and family perspectives as well as health care system variables and societal issues affecting the organization and delivery of primary care for women, adolescent, and pediatric populations. Emphasis includes a focus on ways in which poverty, politics, racial and ethnic disparities affect the health of families, women, children, and adolescents. Content addresses comprehensive diagnosis and management of common health problems, including appropriate diagnostic procedures, laboratory tests, and follow-up care for patients with both acute and chronic conditions. There is a strong focus on health promotion, disease prevention, the care of underserved populations, and culturally competent care.

Prerequisite: NURS 6220, NURS 6225, NURS 6230.

Learning Outcomes

1. Analyze the etiology, pathophysiology, presentation, and prognosis of women and children's conditions as they present in clinical settings.
2. Assess the public health impact of clinical problems for both women and children in the community, including the epidemiology of common risk factors and early intervention strategies.
3. Synthesize scientific and evidence-based knowledge along with theory to promote health, prevent illness and treat common acute and chronic conditions of women and children.
4. Apply the principles of health care ethics to the care of women and children with an understanding of legal implications within the sociopolitical environment.
5. Formulate a plan to investigate and manage the health state of women and children taking into account the values and preferences of the patient and addressing the personal and social issues to which the health status may give rise.

NURS 6510. FNP Across the Lifespan I

3 Credits (3)

This is the first in a series of three didactic courses for the family nurse practitioner (FNP) student. This course introduces the FNP student to the scope and standards of practice; legal and ethical issues; differential diagnosis; as well as the identification and management of specific symptoms and conditions. Emphasis is placed on individuals across the lifespan from diverse populations. May be repeated up to 6 credits.

Prerequisite: NURS 6220, NURS 6230.

Corequisite: NURS 6511.

Learning Outcomes

1. Apply evidence-based knowledge and theory related to the prevention, diagnosis and management of selected common acute health problems in clients across the lifespan.
2. Plan collaborative case to assist clients and their families from diverse backgrounds to maximize functional health status
3. Formulate patient centered therapeutic plans based on holistic health assessment, risk reduction and safety for the treatment and prevention of select, uncomplicated and common, acute illnesses.
4. Evaluate the current use of professional values, leadership, and ethical/legal/policy standards in the implementation of the advanced practice role.

NURS 6511. FNP Across the Lifespan Practicum I

3-4 Credits (3-4P)

This is the first in a series of three clinical courses for the family nurse practitioner (FNP) student. Working with a preceptor students will use advance skills in patient history taking, performing physical assessments, and interpreting laboratory and other test results. Development of a plan of care with health promotion components is also expected. Students will work in practice settings that see patients across the lifespan to include: children, adolescents, women, men and older adults. Multiple clinical settings may be required; however, students must spend a minimum of 64 clock hours in each clinical setting and should have no more than two clinical settings per semester. 1 P = 64 clock hours of practicum. May be repeated up to 8 credits.

Prerequisite: NURS 6220, NURS 6230.

Corequisite: NURS 6510.

Learning Outcomes

1. Integrate, implement and evaluate evidence-based therapeutic interventions in complex acute care practice situations.
2. Develop and sustain therapeutic relationships with patients across the life span (child, adolescents, young adult, adult, older adult,

seniors) and other professional to optimize patient-centered outcomes.

3. Demonstrate advanced clinical judgment based on current standards of practice.
4. Use clinical judgment, systems thinking, and accountability to provide evidenced based care to patients across the lifespan.
5. Synthesize knowledge of acute and chronic illness, pharmacological interventions, legal and ethical principles and the social determinants of health in the development, implementation and documentation of appropriate comprehensive treatment plans, including referrals to other specialties and services.

NURS 6520. FNP Across the Lifespan II

3 Credits (3)

This is the second in a series of three didactic courses for the family nurse practitioner (FNP) student. This course provides further theoretical foundations, knowledge and evidence-based practice experiences in the differential diagnosis and management of acute and chronic diseases. Emphasis is placed on individuals across the lifespan from diverse populations. Building on knowledge and skills from the previous course, students will be expected to manage patients with an increasing complexity of health issues and multiple co-morbidities. May be repeated up to 6 credits. NURS 6511.

Prerequisite: NURS 6510.

Corequisite: NURS 6521.

Learning Outcomes

1. Integrate knowledge of pathophysiologic and psychosocial changes associated with common chronic health problems into immersion in practice decision-making.
2. Demonstrate an advanced knowledge base of normal changes and common patterns across the life span, including the physiologic, psychological, social, and spiritual domains.
3. Demonstrate an advanced knowledge base of common pathologies across the life span, and the diagnosis and treatment of common chronic health problems, including referral and follow-up.
4. Evaluate the relationships between access, cost, quality, and safety and their influence on health care.

NURS 6521. FNP Across the Lifespan II Practicum

3,5 Credits (3,5P)

This is the second in a series of three clinical courses for the family nurse practitioner (FNP) student. This course builds on knowledge and skills from the previous course, students will be expected to manage patients with an increasing complexity of health issues and multiple co-morbidities. This course involves working with a preceptor to refine skills in assessment and differential diagnosis as well as the development and implementation of comprehensive treatment plans, that include referrals to other specialties and services. Students are expected to work within Integrated Health Care settings for a minimum of 64 hours of practicum. May be repeated up to 10 credits.

Prerequisite: NURS 6510, NURS 6511.

Corequisite: NURS 6520.

Learning Outcomes

1. Apply conceptual frameworks to and compare strategies for risk analysis and reduction, screening, disease and injury prevention, and health promotion across the life span.
2. Integrate relevant research findings in management of selected health care conditions across the life span.
3. Use the principles of case management process to coordinate effective therapeutic interventions, referrals, and collaboration with

other health care providers for clients/patients with chronic illness across the life span.

4. Demonstrate cultural competence related to the individual's ethnicity, culture and lifestyle when considering prevention strategies or developing the health promotion and disease management plan for chronic conditions across the life span.
5. Analyze client and patient outcomes to identify the effectiveness of treatment, the need for change, and the health status of client/patient across the life span in an integrated care setting.
6. Apply inter-professional competencies in addressing integrated health needs of patients across the lifespan.

NURS 6530. FNP Across the Lifespan III

1 Credit (1)

This is the final didactic course for the family nurse practitioner (FNP) student. The course continues the development of knowledge and skills for the nurse practitioner student for the assessment and management of selected common acute and chronic health conditions across the lifespan. Emphasis will be placed on primary health care of individuals and their families in a multicultural environment. This course includes preparation for the FNP board certification exam. May be repeated up to 5 credits.

Prerequisite: NURS 6520, NURS 6521.

Corequisite: NURS 6531.

Learning Outcomes

1. Integrate knowledge of pathophysiologic and psychosocial changes associated with common chronic health problems into clinical decision-making.
2. Demonstrate an advanced knowledge base of normal changes and common patterns across the life span, including the physiologic, psychological, social, and spiritual domains.
3. Demonstrate an advanced knowledge base of common pathologies across the life span, and the diagnosis and treatment of common chronic health problems, including referral and follow-up.
4. Translate knowledge of acute and chronic illness to the development, implementation and documentation of appropriate comprehensive treatment plans, including referrals to other specialties and services.
5. Use self-reflection to evaluate progress in professional development as an integral member of the interprofessional team.
6. Integrate ethical principles in decision-making and demonstrate core professional values in the implementation of the nurse practitioner role.

NURS 6531. FNP Across the Lifespan III Practicum

3-4 Credits (3-4P)

This is the final clinical course for the family nurse practitioner (FNP) student. In this course, the student works with a preceptor to develop mastery of skills required to assess, diagnose and manage acute and chronic conditions in primary care settings. Advancement of knowledge and skills attained through previous practicum experiences, as well as this final course, produces a capable, qualified provider, who will transition into a safe, novice, primary care nurse practitioner. May be repeated up to 8 credits.

Prerequisite: NURS 6521.

Corequisite: NURS 6530.

Learning Outcomes

1. Apply theoretical concepts of patient-centered care with emphasis on health promotion, disease prevention, guidance/counseling, disease management, and palliative care during developmental transitions and life-style adjustments.

2. Incorporate primary/secondary prevention guidance into comprehensive treatment plans for patients across the lifespan.
3. Integrate history, physical examination laboratory and other test data with knowledge of pathophysiology of acute and chronic diseases/conditions to develop appropriate differential diagnoses.
4. Identify pharmacological interventions in the treatment and management of illness for diverse populations.
5. Integrate evidence-based clinical guidelines into the diagnosis and management of illness in patients across the lifespan.
6. Translate knowledge of acute and chronic illness to the development, implementation and documentation of appropriate comprehensive treatment plans, including referrals to other specialties and services.

NURS 6610. Nurse Anesthesiology Principles I

4 Credits (3+1P)

This is the first of four sequential nurse anesthesiology principles courses and introduces the student to advanced nursing practice in anesthesia with integration of theoretical perspectives from anatomy, physiology, physics, chemistry, and related mathematics. This course focuses on the development of foundational knowledge to deliver safe, effective anesthesia care across the lifespan. Emphasis is on perioperative preparation, management, and evaluation of the patient, anesthetizing area, and equipment.

Learning Outcomes

1. Review fundamentals of safe evidence-based anesthesia practice related to anesthesia techniques, airway management techniques, perioperative patient/anesthetizing area preparation, anesthesia planning, safety measures, appropriate use of equipment and monitoring devices, and anesthesia complications
2. Demonstrate a comprehensive equipment check and proper utilization and/or interpretation of anesthesia delivery systems, airway equipment, monitoring devices, communication techniques, documentation, and patient positioning.
3. Assess patient fluid status and calculate, initiate, and manage fluid/blood component therapy.
4. Examine chemistry, physics, biochemistry, and imaging principles and their relationship to anesthesia.
5. Differentiate between acute and chronic pain management based on the neuroscience of pain.
6. Integrate anesthesia research and best practices related to basic anesthesia care, anesthesia equipment, technology, and pain management into anesthesia planning and delivery.

NURS 6620. Nurse Anesthesiology Principles II

4 Credits (3+1P)

This is the second of four sequential nurse anesthesiology principles courses and builds upon knowledge gained from previous courses. This course emphasizes evidence-based anesthesia techniques, complications, and considerations for a variety of patients undergoing a variety of procedures such as intraabdominal, extrathoracic, neck, extracranial, orthopedic, perineal, pelvic, laser, non-operating room, and ambulatory. This course also focuses on providing students with a foundation to incorporate safe, evidence-based regional anesthesia techniques, including ultrasound-guided principles, into their clinical practice. Enhanced recovery after anesthesia and hypotensive techniques will be examined.

Learning Outcomes

1. Discuss the integration of anesthesia principles, pathophysiology, physiology, and pharmacology for the planning of safe evidence-

based anesthesia care for diverse patients undergoing a variety of surgical procedures.

2. Describe the indications and benefits of neuraxial and peripheral nerve blockade for diverse populations, as well as management of associated complications.
3. Identify via ultrasound key anatomy relevant to peripheral nerve blockade and demonstrate proper approach to performing common neuraxial and peripheral nerve blockade techniques.
4. Discuss anesthesia techniques, considerations, and complications (and their management) related to a variety of common procedures.
5. Explain patient selection, preparation, and monitoring needs of patients undergoing common procedures, enhanced recovery after surgery, hypotensive, and/or regional techniques.
6. Integrate anesthesia research and best practice guidelines into anesthesia planning and delivery for patients undergoing common procedures and/or regional anesthesia techniques.

NURS 6630. Nurse Anesthesiology Principles III

4 Credits (3+1P)

This is the third of four sequential nurse anesthesiology principles courses and builds upon knowledge gained from previous courses. This course emphasizes evidence-based anesthesia techniques, complications, and considerations for special populations across the lifespan including neonatal, pediatric, obstetric, geriatric, and obese patients.

Learning Outcomes

1. Discuss the integration of anesthesia principles, pathophysiology, physiology, and pharmacology for the planning of safe evidence-based anesthesia care for special populations across the lifespan undergoing a variety of surgical procedures.
2. Examine common anesthesia techniques utilized for special populations across the lifespan undergoing a variety of procedures.
3. Identify modifications required for anesthesia planning and management of special populations across the lifespan related to their physiology, comorbidities, and congenital anomalies as applicable.
4. Discuss management of anesthesia complications related to special populations across the lifespan.
5. Integrate anesthesia research and best practice guidelines into anesthesia planning and delivery for special populations across the lifespan.

NURS 6640. Nurse Anesthesiology Principles IV

4 Credits (3+1P)

This is the final of four sequential nurse anesthesiology principles courses and builds upon knowledge gained from previous courses. This course emphasizes evidence-based anesthesia techniques, complications, and considerations for more complex procedures including thoracic, vascular, neuroskeletal, diagnostic/therapeutic, trauma, burns, organ procurement/transplantation, and other pertinent procedures.

Learning Outcomes

1. Discuss the integration of anesthesia principles, pathophysiology, physiology, and pharmacology for the planning of safe evidence-based anesthesia care for diverse patients undergoing a variety of complex procedures.
2. Identify common comorbid conditions of patients undergoing complex procedures.

3. Examine anesthesia techniques, considerations, and complications (and their management) of diverse patients undergoing a variety of complex procedures.
4. Integrate anesthesia research and best practice guidelines into anesthesia planning and delivery for diverse patients undergoing a variety of complex procedures.

NURS 6650. Nurse Anesthesiology Principles V

4 Credits (4)

This is the final of five sequential nurse anesthesiology principles courses and builds upon knowledge gained from previous courses. This course emphasizes evidence-based anesthesia techniques, complications, and considerations for administering regional anesthesia including spinal, epidural and nerve block procedures and management protocols.

Learning Outcomes

1. Discuss the integration of anesthesia principles, pathophysiology, physiology, and pharmacology for the planning of safe evidence-based anesthesia care for diverse patients undergoing regional anesthesia.
2. Examine regional anesthesia techniques, considerations, and complications (and their management) of diverse patients undergoing a variety of complex procedures.
3. Integrate anesthesia research and best practice guidelines into anesthesia planning and delivery for diverse patients undergoing procedures for regional anesthesia.

NURS 6700. Introduction to the Clinical Residency

1 Credit (1P)

This introductory clinical course provides students with the opportunity to begin developing the advanced nursing practice role in anesthesiology. Students begin integrating basic principles of perioperative anesthesia care, patient assessment, anesthesia set-up, postoperative patient assessment and management, and clinical documentation. Principles of operation, calibration, and interpretation of data from monitors and other equipment will be applied fundamental to the anesthetic management of the patient across the lifespan.

Learning Outcomes

1. Integrate knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care.
2. Formulate a comprehensive history and physical assessment and begin to formulate an evidence-based anesthesia plan of care based on the patient's underlying health status, culturally relevant information, and the surgical or medical procedure.
3. Demonstrate basic anesthesia skills/techniques and incorporate new skills with guidance.
4. Demonstrate safe use of anesthesia monitors and equipment operation, calibration, and interpretation of data.
5. Demonstrate selection of drugs according to surgical patients across the lifespan.
6. Develop and use effective communication and documentation skills with diverse patients, families, other healthcare workers, and ancillary personnel to facilitate safe patient care.
7. Demonstrate patient positioning requirements for a given surgical procedure and implement appropriate safeguards to protect patients from physiologic compromise or injury.
8. Demonstrate integrity, ethics, honesty, and accountability in professional interactions in accordance with the AANA professional practice standards and code of ethics.

NURS 6710. Nurse Anesthesiology Clinical Residency I

3 Credits (3P)

This is the first of six clinical residency courses and provides students with the opportunity to begin developing the advanced nursing practice role in anesthesiology. Students are expected to integrate didactic knowledge learned in previous courses and co-requisite courses into perianesthesia care of the patient. Students begin to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider.

Learning Outcomes

1. Integrate knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care.
2. Conduct a comprehensive history and physical assessment and formulate an evidence-based anesthesia plan of care based on the patient's underlying health status, culturally relevant information, and the surgical or medical procedure.
3. Administer safe evidence-based, culturally competent perianesthesia care to a variety of patients undergoing surgical and medical procedures with guidance.

NURS 6720. Nurse Anesthesiology Clinical Residency II

3 Credits (3P)

This is the second of six clinical residency courses and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in Clinical Residency I and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. Students progressively assume more responsibility for patients as they gain skills and knowledge.

Learning Outcomes

1. Integrate knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care
2. Conduct a comprehensive history and physical assessment and formulate an evidence-based anesthesia plan of care based on the patient's underlying health status, culturally relevant information, and the surgical or medical procedure.
3. Administer safe evidence-based, culturally competent perianesthesia care to a variety of patients undergoing surgical and medical procedures with minimal guidance.

NURS 6730. Nurse Anesthesiology Clinical Residency III

2 Credits (2P)

This is the third of six clinical residency courses and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in previous clinical residency courses and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. As students complete clinical experiences in various specialties, they will provide anesthesia services to patients with more complex alterations in health patterns requiring more expertise in anesthesia management.

Learning Outcomes

1. Integrate knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care.
2. Conduct a comprehensive history and physical assessment and formulate an evidence-based anesthesia plan of care based on the patient's underlying health status, culturally relevant information, and the surgical or medical procedure.
3. Administer safe evidence-based, culturally competent perianesthesia care to a variety of patients undergoing surgical and medical procedures with minimal guidance.

**NURS 6740. Nurse Anesthesiology Clinical Residency IV
3 Credits (3P)**

This is the fourth of six clinical residency courses and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in previous clinical residency courses and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. As students complete clinical experiences in various specialties, they will provide anesthesia services autonomously to patients with more complex alterations in health patterns requiring more expertise in anesthesia management.

Learning Outcomes

1. Integrate knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care.
2. Conduct a comprehensive history and physical assessment and formulate an evidence-based anesthesia plan of care based on the patient's underlying health status, culturally relevant information, and the surgical or medical procedure.
3. Autonomously administer safe evidence-based, culturally competent perianesthesia care to a variety of patients undergoing surgical and medical procedures.
4. Autonomously demonstrate basic anesthesia skills/techniques and incorporate new skills.
5. Autonomously identify perianesthesia patient physiologic alterations and/or equipment alterations and initiate appropriate management utilizing evidence-based problem solving and decision making.
6. Autonomously provide anesthesia services in a rural community.
7. Use effective communication and documentation skills with diverse patients, families, other healthcare workers, and ancillary personnel to facilitate safe patient care.
8. Demonstrate integrity, ethics, honesty, and accountability in professional interactions.

**NURS 6750. Nurse Anesthesiology Clinical Residency V
3 Credits (3P)**

This is the fifth of six clinical residency courses and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in previous clinical residency courses and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. Students are expected to provide anesthesia services independently to patients with more complex

alterations in health patterns requiring more expertise in anesthesia management

Learning Outcomes

1. Integrate knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care.
2. Conduct a comprehensive history and physical assessment and formulate an evidence-based anesthesia plan of care based on the patient's underlying health status, culturally relevant information, and the surgical or medical procedure.
3. Independently administer safe evidence-based, culturally competent perianesthesia care to a variety of patients undergoing surgical and medical procedures.
4. Independently demonstrate basic anesthesia skills/techniques and incorporate new skills.
5. Independently identify perianesthesia patient physiologic alterations and/or equipment alterations and initiate appropriate management utilizing evidence-based problem solving and decision making.
6. Independently provide anesthesia services in a rural community.
7. Use effective communication and documentation skills with diverse patients, families, other healthcare workers, and ancillary personnel to facilitate safe patient care.
8. Demonstrate integrity, ethics, honesty, and accountability in professional interactions.

**NURS 6760. Nurse Anesthesiology Clinical Residency VI
2 Credits (2P)**

This is the final clinical residency course and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in previous clinical residency courses and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. Students are expected to provide anesthesia services independently to patients with more complex alterations in health patterns requiring more expertise in anesthesia management.

Learning Outcomes

1. Integrate knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care.
2. Conduct a comprehensive history and physical assessment and formulate an evidence-based anesthesia plan of care based on the patient's underlying health status, culturally relevant information, and the surgical or medical procedure.
3. Independently administer safe evidence-based, culturally competent perianesthesia care to a variety of patients undergoing surgical and medical procedures.
4. Independently demonstrate basic anesthesia skills/techniques and incorporate new skills.
5. Independently identify perianesthesia patient physiologic alterations and/or equipment alterations and initiate appropriate management utilizing evidence-based problem solving and decision making.
6. Independently provide anesthesia services in a rural community.
7. Use effective communication and documentation skills with diverse patients, families, other healthcare workers, and ancillary personnel to facilitate safe patient care.
8. Demonstrate integrity, ethics, honesty, and accountability in professional interactions.

NURS 6770. Rural Health Anesthesiology Seminar**3 Credits (3)**

This course focuses on unique issues and challenges surrounding the provision of nurse anesthesiology services in rural communities. Topics covered include working with scarce resources, needs of individuals/populations living in rural communities, regulatory issues, health policy, reimbursement practices, cultural issues, technology, and local/state/federal aspects that impact rural nurse anesthesiology practice.

Learning Outcomes

1. Define unique needs of individuals and/or populations living in rural communities.
2. Identify challenges of working with scarce resources.
3. Discuss regulatory, policy, reimbursement, and cultural issues unique to rural nurse anesthesiology practice.
4. Illustrate local, state, and/or federal issues that impact rural nurse anesthesiology practice.

NURS 6771. Anesthesiology Integration/Clinical Correlation I**4 Credits (4)**

This course is the first of a two-course sequence and is designed to further develop critical thinking skills and foster continued integration of theoretical knowledge into clinical practice. Clinically relevant evidence-based research and anesthesia topics will be presented by students and faculty. This course also includes student participation in discussion of clinical experiences and case presentations. Students will critically analyze, synthesize, and evaluate the knowledge gained in all previous nurse anesthesiology courses in preparation for the comprehensive exam, national certification examination, and clinical practice

Learning Outcomes

1. Demonstrate the ability to critically review pertinent literature and its application to clinical practice.
2. Deliver case-based presentations that incorporate current evidence-based best practices and culturally relevant information.
3. Synthesize knowledge gained from previous nurse anesthesiology coursework.
4. Analyze performance on the comprehensive exam.
5. Create an action plan to pass the National Certification Exam

NURS 6772. Anesthesiology Integration/Clinical Correlation II**2 Credits (2)**

This course is the second of a two-course sequence and continues to further develop critical thinking skills and foster continued integration of theoretical knowledge into clinical practice. Clinically relevant evidence-based research and anesthesia topics will be presented by students and faculty. This course also includes student participation in discussion of clinical experiences and case presentations. Students will continue to critically analyze, synthesize, and evaluate the knowledge gained in all previous nurse anesthesiology courses in preparation for the national certification examination and clinical practice.

Learning Outcomes

1. Demonstrate the ability to critically review pertinent literature and its application to clinical practice.
2. Deliver case-based presentations that incorporate current evidence-based best practices and culturally relevant information.
3. Demonstrate consistent professional growth and development through discussion, presentation, interaction, and individual and/or group participation.
4. Complete the student self-evaluation of graduate standards form.

5. Implement the previously created action plan to pass the NBCRNA NCE and revise it as needed.

NURS 6990. Advanced Practice Nursing Immersion**1-4 Credits (1-4)**

Practicum experience for advanced practice students. Focus will be on a practice issue chosen by the student for further development as an evidence-based doctoral project. Clinical practice hours as needed to meet DNP requirements. Up to 24 credits may be completed by student. Restricted to: NURP majors. May be repeated up to 24 credits.

Prerequisite: NURS 6220, NURS 6530 or enrollment in post-masters track.

NURS 6993. Doctoral Nursing APRN Seminar**1 Credit (1P)**

Seminar to build APRN clinical skills, consisting of a 32-40 hour on-site immersion with skills labs and Objective Structured Clinical Evaluation using standardized patients that are used as formative and summative evaluation. May be repeated up to 6 credits.

Prerequisite: NURS 6220, NURS 6224.

Learning Outcomes

1. Apply clinical decision making skills to diagnose and treat given patient cases in area of specialty.
2. Integrate screening and diagnostic tools into diagnosis and treatment of given patient cases in area of specialty.
3. Use advanced health assessment skills to differentiate between normal, variations of normal and abnormal findings.
4. Develop skills in the interpretation of commonly used diagnostic tests in management of patient conditions in area of specialty.
5. Perform procedures commonly used in the treatment of patients in area of specialty.

NURS 6997. Independent Study**1-6 Credits (1-6)**

Individual studies and directed research with prior approval of department head. May be repeated up to 12 credits.

NURS 7000. Doctoral Dissertation**1-9 Credits (1-9)**

Dissertation may be repeated to maximum of 30 credits. Minimum requirements are 21 credit hours. Comprehensive examine is included within these 21 credits. May be repeated up to 30 credits.

Learning Outcomes

1. Varies

**NURS 999. Practical Nursing Requirements Completed
99 Credits**

A phantom course created to indicate a student has met Practical Nursing requirements. Used to indicate this in academic history to replace an administrative message not converted from SOLAR to VISTAS. 01/97 May be repeated up to 99 credits.

Learning Outcomes

1. N/A

NUTR-NUTRITION

NUTR 2110. Human Nutrition**3 Credits (3)**

This course provides an overview of nutrients, including requirements, digestion, absorption, transport, function in the body and food sources. Dietary guidelines intended to promote long-term health are stressed.

Learning Outcomes

1. Evaluate sources of nutrition information for reliability
2. Identify elements of a nutritious diet
3. Describe the digestion, transport, and absorption of nutrients
4. Describe the importance of nutrition in weight control and health
5. Identify nutritional needs as they relate to the life cycle and performance
6. Describe behavior modification techniques that promote good health
7. Evaluate popular nutrition trends for scientific accuracy and effectiveness
8. Develop skills in the planning and assessing of healthy meal plans
9. Describe the role of food choices in the development of chronic disease 1
10. Describe the role of food in the promotion of a healthful lifestyle

NUTR 2120. Seminar I - Becoming a Nutrition Professional**1 Credit (1)**

This course will introduce students to the field experience, careers, and professions in nutrition. This course is required for students pursuing a Didactic Program in Dietetics verification statement. May be repeated up to 1 credits. Consent of Instructor required. Restricted to: HNDS majors.

Learning Outcomes

1. Describe career options within the fields of Nutrition Dietetics.
2. Outline the HNDS field experience process.
3. Explain the educational pathways in HNDS.
4. List requirements for admission into the HNDS Dietetics pathway.
5. Begin an HNDS student portfolio.
6. Discuss the importance of personal responsibility accountability

NUTR 3110. Nutrition Throughout the Lifecycle**3 Credits (3)**

Relationship of the stages of the human life cycle to changes in nutrient need. Consent of Instructor required.

Prerequisite(s): NUTR 2110.

Learning Outcomes

1. Understand the value of collaborative work in nutrition care of individuals.
2. Compare and contrast the physiological, behavioral, and psychosocial factors associated with each life stage that affect nutritional status.
3. For each life cycle stage, create a nutritionally adequate menu that meets key nutrient needs.
4. Culturally appropriate evidence-based interventions to address common nutrition-related conditions experienced in each lifecycle stage.
5. Utilize the Nutrition Care Process to complete a nutrition assessment.

NUTR 3710. Food Systems & Policy in Dietetics**3 Credits (3)**

This course introduces students to food and nutrition policy issues, institutions, and stakeholders and their impacts on public health, sustainability, and the practice of dietetics in the US. The course will examine policy development and the roles of federal agencies, private firms, non-governmental organizations, and the media in food and nutrition policy. It will also examine international perspectives on food and nutrition policies and programs used to support global nutrition, health promotion, and wellness.

Prerequisite(s): Junior standing, NUTR 3110, NUTR 3120.

Learning Outcomes

1. Discuss the economic, political, social, and cultural factors that influence US food and nutrition policies and impact national food systems and population health.
2. Identify the psychological, social, cultural, and environmental factors that influence food choices, eating behaviors, and nutrition-related practices.
3. Describe the processes and major players involved in US food and nutrition policy development, implementation, monitoring/evaluation, and regulation.
4. Recognize the influence of food and nutrition policy on the practice of dietetics.

NUTR 3750. Applied Nutrition Research**3 Credits (3)**

This course will introduce students to various types of nutrition research and equip them to locate and critique nutrition and dietetics research articles. Research analysis skills will then be applied to a review of the current literature on a nutrition topic and applied to dietetics practice.

May be repeated up to 3 credits.

Prerequisite: MATH 1350G (OR A ST 311); NUTR 3110.

Learning Outcomes

1. Recall the various research methods, study designs, and statistical analyses used in nutrition research.
2. Compare and contrast research methods and analyses in nutrition research.
3. Analyze nutrition research for appropriateness of the methods and analyses.
4. Evaluate nutrition research to form sound, ethical conclusions and practice recommendations.

NUTR 3996. Special Topics**1-4 Credits (1-4)**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): Junior or Senior standing, consent of instructor.

Learning Outcomes

1. Develop foundational knowledge in a specialized area of dietetics practice.

NUTR 4110. Advanced Nutrition**3 Credits (3)**

Application of biochemistry and physiology to nutrition. May be repeated up to 3 credits. Prerequisite(s): BIOL 2221, (OR A ST 311); NUTR 3110

Learning Outcomes

1. Describe the processes of digestion and absorption within the human body.
2. Compare and contrast the structure and function of key nutrients.
3. Describe the metabolism of key nutrients under various conditions.
4. Apply concepts of energy and nutrient metabolism to common medical conditions and other relevant situations such as exercising or fasting.

NUTR 4205. Nutrition Communication and Education**3 Credits (3)**

In this course, HNDS students learn about the foundation, design, and delivery of nutrition communication and nutrition education. Students will learn ways to develop audience-focused communication and learning assessment. This course will cover the communication methods used in all facets of the nutrition and dietetics field including oral presentations,

writing, video, food photography, and food demonstrations. Students will utilize a large variety of channels to communicate and educate different target audiences.

Prerequisite: NUTR 3110.

Learning Outcomes

1. Identify a minimum of four reliable sources of nutrition information.
2. Interpret and clearly communicate evidence-based nutrition information.
3. Evaluate the application of behavior change theories and models to nutrition communications.
4. Adapt nutrition communication and education to target specific cultural and age groups.
5. Develop a nutrition education lesson plan with SMART learning objectives, learning activities, and learning assessments.

NUTR 4207. Nutrition Services

3 Credits (3)

In this course, HNDS Dietetic students will learn about the promotion and payment of nutrition services along with aspects related to reimbursement and partnering with allied professionals. The HNDS Dietetics students will also engage in clinical and community nutrition field experiences. This course will provide HNDS Dietetic students with the opportunity to assess their knowledge of professional competencies within the field of dietetics. Restricted to students with senior standing within the Dietetics Option of the HNDS major.

Learning Outcomes

1. Compare best practice guidelines to actual practice in the provision of nutrition services within community settings.
2. Explain at least two processes in delivering quality food and nutrition services.
3. Identify private and public healthcare funding sources.
4. Explain Medicare, Medicaid, and private payer coverage for medical nutrition therapy.
5. Discuss referrals, primary care partnership and promoting nutrition services.
6. Describe best practices, resources and guidelines related to the reimbursement for nutrition services.
7. Compare best practice guidelines to actual practice in the provision of nutrition services within clinical nutrition settings.
8. Evaluate the content of the Commission on Dietetic Registration RDN credentialing exam.

NUTR 4210. Community Nutrition

3 Credits (3)

Overview of the practice of community nutrition. Includes program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Same as NUTR 5210.

Prerequisite: NUTR 3110, NUTR 3710.

Learning Outcomes

1. Summarize the components of current national and local community nutrition programs.
2. Explain how national or state level policy influences a community nutrition issue.
3. Write a needs assessment for a community nutrition issue using reliable sources of community nutrition information and data and relevant research.

4. Develop goals and objectives of a nutrition program that address a community nutrition issue.
5. Develop a culturally appropriate nutrition education lesson plan that addresses a specific nutrition program objective.

NUTR 4220. Food Service Organization and Management

3 Credits (3)

Personnel, financial and general management in institutional and commercial food service operations.

Prerequisite: HRTM 2120.

Learning Outcomes

1. Evaluate food products and menu plans through the application of food service management theories and principles.
2. Describe the process of and ethical considerations surrounding purchasing, receiving, storing and controlling inventory of a given food item.
3. Evaluate food system, food safety practices, and scenarios.
4. Evaluate a nutrition and foodservice budget and interpret financial data.

NUTR 4230. Medical Nutrition Therapy I

3 Credits (3)

Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics.

Learning Outcomes

1. Examine the role of medical nutritional therapy in disease processes.
2. Apply nutritional assessment techniques utilizing the Nutrition Care Process.
3. Compose nutrition care plans and utilize various styles of medical charting.
4. Describe the interdisciplinary nature of working with a health care team in the delivery of medical nutritional therapy.

NUTR 4230L. Medical Nutrition Therapy I Lab

1 Credit (1P)

Supplements NUTR 4230. Students will perform nutrition assessments, nutrition focused physical exams, apply medical nutrition therapy-based interventions and practice patient discharge education for specific disease states. Elements of pathology and biochemistry of nutrition-related conditions are integrated into course topics. Restricted to: HNDS majors.

Corequisite(s): HNDS 4230.

Learning Outcomes

NUTR 4233. Nutrition Counseling and Education

3 Credits (3)

This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education.

Prerequisite: NUTR 3110; FCSC 348.

Learning Outcomes

1. Evaluate nutrition counseling strategies tools in promoting behavior change and self-management.
2. Apply behavior change theories and models to nutrition counseling sessions.
3. Develop nutrition care plans for nutrition counseling clients.
4. Analyze professionalism and ethics within nutrition counseling and education.

5. Develop and present a nutrition education lesson based on current nutrition research.

NUTR 4235. Entering the Field of Dietetics

1 Credit (1)

Students will develop professional materials that will be used in their future careers including a personal statement, resume, and interview dialogues. Students will become familiar with career options in the field of dietetics and learn to navigate the processes of becoming a registered dietitian or dietetic technician, registered. Restricted to: HNDS majors. Students must be a Senior to enroll.

Prerequisite/Corequisite: NUTR 4210.

Learning Outcomes

1. Students will develop professional materials that will be used in their future careers including a personal statement, resume, and interview dialogues. Students will become familiar with career options in the field of dietetics and learn to navigate the processes of becoming a registered dietitian or dietetic technician, registered

NUTR 4240. Medical Nutrition Therapy II

3 Credits (3)

Continuation of NUTR 4230.

Prerequisite: NUTR 4230.

Corequisite: NUTR 4240L.

Learning Outcomes

1. Select appropriate medical nutrition therapy interventions for various disease processes.
2. Master nutrition assessment of patients/clients utilizing the Nutrition Care Process Model.
3. Interpret medical terminology in patient chart notes and medical history records.
4. Evaluate laws regulations concerning dietetics.

NUTR 4240L. Medical Nutrition Therapy II Laboratory

1 Credit (1P)

Supplements NUTR 4240. Students will apply medical nutrition therapy to specific disease states with special emphasis on writing nutrition support orders and learning to utilize nutrition support equipment. Students will learn and apply advanced nutritional therapies and patient management strategies. Restricted to: HNDS majors.

Corequisite(s): HNDS 4240.

Learning Outcomes

1. Calculate nutrition support recommendations and document orders in the patient's medical chart.
2. Demonstrate safe use of nutritional support equipment.
3. Master use of the Nutrition Care Process in case-based and simulated patient scenarios to conduct nutrition assessments and implement evidence-based interventions.
4. Critically evaluate lab values and client anthropometric data.
5. Select therapeutic diets for the treatment of medical conditions and their symptoms.

NUTR 4565. Field Experience Community Nutrition

1-8 Credits (1-8)

Experience working with nutritional problems of individual families of all socioeconomic and age levels and with agencies concerned with community nutrition. Practical experience with supervision by resident faculty as well as supervisor at the work site. Performance at work site graded in accordance with university standards. May be repeated up to 8 credits. Consent of Instructor required.

Prerequisite(s): Senior standing, NUTR 4210, consent of instructor.

Learning Outcomes

1. Apply dietetics knowledge to practice in various community settings.
2. Develop a field experience portfolio highlighting the development of community nutrition knowledge and skills.
3. Compare and contrast the responsibilities of Registered Dietitians in various community practice organizations.

NUTR 4991. Special Problems

1-4 Credits (1-4)

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 8 credits. May be repeated up to 8 credits. Consent of Instructor required.

Prerequisite(s): Junior or Senior standing.

Learning Outcomes

1. Develop specialized knowledge and competencies in a selected nutrition and dietetics subject area.

NUTR 5110. Graduate Studies in Advanced Nutrition

3 Credits (3)

Covers biochemistry and physiology applied to nutrition. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4110. Crosslisted with: NUTR 4110.

Prerequisite(s)/Corequisite(s): NUTR 3110. Student must be classified as a Graduate student to enroll in this course, BIOL 2221, BCHE 341, and NUTR 2110, or consent of instructor.

Learning Outcomes

1. Describe the processes of digestion and absorption within the human body.
2. Compare and contrast the structure and function of key nutrients.
3. Describe the metabolism of key nutrients under various conditions.
4. Apply concepts of energy and nutrient metabolism to common medical conditions and other relevant situations such as exercise or fasting.

NUTR 5150. Orientation to Dietetic Internship

3 Credits (3)

Dietetic interns prepare for supervised practice rotations. Topics include professionalism, Code of Ethics, and dietetic internship portfolios. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. Assembly of dietetic intern portfolio that will be kept throughout dietetic internship.
2. Readiness to begin supervised practice rotations.
3. Understanding of steps and processes to successfully complete requirements of dietetic internship and Masters of Science in Family Consumer Sciences.
4. Upon completion of the course, students will be able to understand the importance of evidence-based information, research ethics, the Code of Ethics of the Profession of Dietetics, and the basic structure of an IRB proposal.

NUTR 5210. Graduate Study in Community Nutrition

3 Credits (3)

Overview on the practice of community nutrition to include program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Students enrolled in the 5000-level class will be required to complete additional

assignments beyond what is required for NUTR 4110. May be repeated up to 3 credits. Crosslisted with: NUTR 4210.

Prerequisite(s): Graduate student, NUTR 3110, NUTR 3710, NUTR 3750, or consent of the instructor.

Learning Outcomes

1. Summarize the components of current national and local community nutrition programs.
2. Explain how national or state-level policy influences a community nutrition issue.
3. Write a needs assessment for a community nutrition issue using reliable sources of community nutrition information and data, and relevant research.
4. Develop goals and objectives of a nutrition program that address a community nutrition issue.
5. Develop a culturally appropriate nutrition education lesson plan that addresses a specific nutrition program objective.

NUTR 5220. Graduate Studies in Food Service Organization and Management

3 Credits (3)

Personnel, financial and general management in institutional and commercial food service operations. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4220. May be repeated up to 3 credits.

Prerequisite(s): Graduate Students; HRTM 2120, NUTR 3120, or consent of instructor.

Learning Outcomes

1. Evaluate food products and menu plans through the application of food service management theories and principles.
2. Describe the process of and ethical considerations surrounding purchasing, receiving, storing, and controlling inventory of a given food item.
3. Evaluate food system, food safety practices, and management practices of a specific food service establishment.
4. Apply management theories and principles to quality assurance and human resource case scenarios.
5. Evaluate a nutrition and food service budget and interpret financial data.

NUTR 5230. Graduate Studies in Medical Nutrition I

3 Credits (3)

Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics. Additional assignments beyond NUTR 4230 required. May be repeated up to 3 credits. Crosslisted with: NUTR 4230.

Prerequisite(s): Graduate student, NUTR 3110, NUTR 4110, BIOL 2225 or BIOL 2221, or consent of instructor.

Learning Outcomes

1. Examine the role of medical nutritional therapy in disease processes.
2. Apply nutritional assessment techniques utilizing the Nutrition Care Process.
3. Compose nutrition care plans and utilize various styles of medical charting.
4. Describe the interdisciplinary nature of working with a health care team in the delivery of medical nutritional therapy.

NUTR 5233. Graduate Studies in Nutrition Counseling & Education

3 Credits (3)

This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but

have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education. Additional assignments beyond NUTR 4233 required. May be repeated up to 3 credits. Crosslisted with: HNDS 4233.

Prerequisite(s)/Corequisite(s): NUTR 5230. Students must be classified as a Graduate student to enroll in this course, NUTR 2110, NUTR 3110, FCSC 348.

Learning Outcomes

1. Evaluate nutrition counseling strategies and tools in promoting behavior change and self-management.
2. Apply behavior change theories and models to nutrition counseling sessions.
3. Develop nutrition care plans for nutrition counseling clients.
4. Analyze professionalism and ethics within nutrition counseling and education.
5. Develop and present a nutrition education lesson based on current nutrition research.

NUTR 5240. Graduate Studies in Medical Nutrition Therapy II

3 Credits (3)

Continuation of HNDS 546. May be repeated up to 3 credits. Crosslisted with: NUTR 4240.

Prerequisite(s): Graduate student, NUTR 5230 and NUTR 4230L or consent of instructor.

Learning Outcomes

1. Select appropriate medical nutrition therapy interventions for various disease processes.
2. Master nutrition assessment of patients/clients utilizing the Nutrition Care Process model.
3. Interpret medical terminology in patient chart notes and medical history records.
4. Evaluate laws regulations concerning dietetics.

NUTR 5610. Dietetic Intern Seminar

1 Credit (1)

Portfolio development for dietetic interns during supervised practice rotations. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN
2. Apply evidence-based guidelines, systematic reviews and scientific literature.
3. CRDN
- 3: Justify programs, products, services and care using appropriate evidence or data.
5. CRDN
- 4: Evaluate emerging research for application in nutrition and dietetics practice.
7. CRDN
- 6: Incorporate critical-thinking skills in overall practice.
9. CRDN
10. 1: Practice in compliance with current federal regulations and state statutes and rules, as applicable and in accordance with accreditation standards and the Scope of Nutrition and Dietetics Practice and Code of Ethics for the Profession of Nutrition and Dietetics.
11. CRDN

12. 2: Demonstrate professional writing skills in preparing professional communications.

NUTR 5620. Dietetic Internship: Supervised Practice in Community Nutrition

1-8 Credits (2-6P)

Provides dietetic interns with a minimum of 500 clock hours of supervised practice in community nutrition to include an emphasis in Cooperative Extension Service. Dietetic interns work under the the guidance of faculty and community nutrition professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN
2. 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
3. CRDN
4. 2 Apply evidence-based guidelines, systematic reviews and scientific literature.
5. CRDN
6. 4 Evaluate emerging research for application in nutrition and dietetics practice.
7. CRDN
8. 5 Conduct projects using appropriate research methods, ethical procedures and data analysis.
9. CRDN
10. 14 Demonstrate advocacy on local, state or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
11. CRDN
12. 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
13. CRDN
14. 5 Develop nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience.
15. CES
16. Consult with organizations regarding food access for target populations.
17. CES
18. Evaluate the operation of Cooperative Extension Service nutrition programs in the areas of policies and procedures. 1
19. CES
20. Develop and deliver nutrition presentations to client/consumer audiences on various topics related to client/consumer needs. 1
21. CES
22. Ensure cultural relevancy and appropriateness of nutrition education. 1
23. CES
24. Assess educational needs and provide nutrition counseling based on individual needs, knowledge, medical needs, and socioeconomic status.

NUTR 5630. Community Nutrition for Dietetic Interns

3 Credits (3)

Advanced topics in community nutrition to include conducting community nutrition needs assessments, program planning and grant

writing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN
2. 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
3. CRDN
4. 2 Apply evidence-based guidelines, systematic reviews and scientific literature.
5. CRDN
6. 4 Evaluate emerging research for application in nutrition and dietetics practice.
7. CRDN
8. 5 Conduct projects using appropriate research methods, ethical procedures and data analysis.
9. CRDN
10. 14 Demonstrate advocacy on local, state or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
11. CRDN
12. 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
13. CRDN
14. 5 Develop nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience.
15. CES
16. Consult with organizations regarding food access for target populations.
17. CES
18. Ensure cultural relevancy and appropriateness of nutrition education.

NUTR 5640. DI SUP PRACT FS MGT

1-5 Credits (2-10P)

Provides dietetic interns with a minimum of 300 clock hours of supervised practice in foodservice management. Dietetic interns work under the guidance of faculty and foodservice management professionals. Students must complete a total of 4 credit hours of NUTR 5640. May be repeated up to 5 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

NUTR 5650. Foodservice Management for Dietetic Interns

3 Credits (3)

Advanced topics in foodservice systems management to include business planning and marketing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN
2. 2: Demonstrate professional writing skills in preparing professional communications.
3. CRDN
4. 15: Practice and/or role play mentoring and precepting others.
5. CRDN
6. 4: Design, implement and evaluate presentations to target audiences.
7. CRDN

8. 3: Demonstrate active participation, teamwork and contributions in group setting.
9. CRDN
10. 7: Apply leadership skills to achieve desired outcomes.
11. CRDN
12. 8: Demonstrate negotiation skills.
13. CRDN
14. 4: Apply current informatics technology to develop, store, retrieve and disseminate information and data.
15. CRDN
16. 6: Analyze quality, financial and productivity data for use in planning.
17. CRDN
18. 7: Conduct feasibility studies for products, programs, or services with consideration of costs and benefits.1
19. CRDN
20. 8: Develop a plan to provide or develop a product, program, or service that includes a budget, staffing needs, equipment and supplies.

NUTR 5660. Dietetic Internship: Supervised Practice in Clinical Dietetics 1-8 Credits (2-16P)

Provides dietetic interns with a minimum of 500 clock hours of supervised practice in clinical dietetics. Dietetic interns work under the guidance of faculty and dietetics professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN
2. 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
3. CRDN
4. 4 Function as a member of interprofessional teams.
5. CRDN
6. 11 Show cultural competence/sensitivity in interactions with clients, colleagues and staff.
7. CRDN
8. 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
9. CRDN
10. 2 Conduct nutrition focused physical exams.
11. CRDN
12. 3 Demonstrate effective communication skills for clinical and customer services in a variety of formats

NUTR 5670. Nutrition Care Process for Dietetic Interns

3 Credits (3)

Advanced topics in nutrition care process and model to include medical nutrition therapy and evidence-based research and outcomes assessment in clinical dietetics. Consent of Instructor required.

Prerequisite(s): Acceptance into Dietetic Internship. Restricted to: HNDS majors.

Learning Outcomes

1. CRDN
2. 2: Apply evidence-based guidelines, systematic reviews and scientific literature.
3. CRDN

4. 3: Justify programs, products, services and care using appropriate evidence or data.
5. CRDN
6. 4: Evaluate emerging research for application in nutrition and diet.
7. CRDN
8. 4 Evaluate emerging research for application in dietetics practice.
9. CRDN
10. 2 Demonstrate professional writing skills in preparing professional communication. Perform the nutrition care process and use standardized nutrition language for individuals, groups, and populations of differing ages and health status, in a variety of settings.
11. CRND
12. 2 Conduct nutrition focused physical exams.

NUTR 5680. Review Course for National RD Exam

3 Credits (3)

Completion of dietetic internship portfolio and preparation for the national registration examination for dietitians. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: exclude HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. Demonstrate readiness to take the National Registration Examination for Dietitians.
2. Completion of all requirements of the NMSU Dietetic Internship.
3. Completion of all requirements to receive a Master of Science in Family Consumer Sciences from New Mexico State University

NUTR 5991. Special Research Programs

1-4 Credits (1-4)

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree. May be repeated up to 6 credits.

Prerequisite(s): Graduate Student.

Learning Outcomes

1. Develop analytical or experimental research skills in the areas of human nutrition and dietetics.

NUTR 5996. Special Topics

1-4 Credits (1-4)

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): Graduate student.

Learning Outcomes

1. Evaluate issues surrounding advanced nutrition and dietetics topics.

OATS-OFFICE ADMINISTRATION TECHNOLOGY SYSTEMS

OATS 101. Keyboarding Basics

3 Credits (2+2P)

Covers the skills necessary to touch type on the computer keyboard using correct techniques. This includes the development of speed, accuracy, and formatting of basic business documents.

Learning Outcomes

1. Demonstrate proper "touch" keyboarding techniques on the alphabetic computer keyboard.

2. Apply keyboarding and basic formatting functions using straight-copy material to create properly formatted professional documents.
3. Show the ability to keyboard by meeting course minimum speed and accuracy.
4. Identify and apply the use of proofreader's symbols to proofread and edit straight-copy business documents.
5. Demonstrate proficiency in use of lesson software utilized throughout course.

OATS 102. Keyboarding: Document Formatting**3 Credits (2+2P)**

Designed to improve keyboarding speed and accuracy; introduce formats of letters, tables and reports. A speed and accuracy competency requirement must be met.

Prerequisite: OATS 101 or consent of instructor.

Learning Outcomes

1. Demonstrate accuracy and increase individual typing speed by meeting course typing speed requirements.
2. Demonstrate the ability to use software features to create simple, error-free quality business documents.
3. Increase skills in proofreading, editing skills (including punctuation and grammar, and use of reference manuals and materials).

OATS 105. Business English**3 Credits (3)**

Training and application of the fundamentals of basic grammar, capitalization, punctuation, basic writing, sentence structure, and editing skills.

Learning Outcomes

1. Identify each of the parts of speech in written exercises, quizzes, and examinations.
2. Apply the basic rules for each of the parts of speech to written exercises.

OATS 106. Business Mathematics**3 Credits (2+2P)**

Mathematical applications for business.

Prerequisite: CCDM 103 N or adequate score on math placement exam.

Learning Outcomes

1. Apply fundamental concepts to personal and business math operations.
2. Maintain a checkbook.
3. Solve percent and percentage applications.
4. Calculate discounts, markups, and markdowns.
5. Calculate wages, salaries, deductions, and net pay.
6. Compare various borrowing options and identify the most cost effective option.
7. Interpret consumer loans and credit card accounts.
8. Compare various home ownership options.
9. Calculate taxes and identify insurance options.

OATS 110. Records Management**3 Credits (3)**

Principles, methods and procedures for the selection, operation and control of manual and automated records systems.

OATS 120. Accounting Procedures I**3 Credits (2+2P)**

Business accounting principles and procedures. Use of special journals, cash control, and merchandising concepts. Reports for sole proprietorships.

OATS 121. Accounting Procedures II**3 Credits (2+2P)**

Continuation of OATS 120, emphasizing accounting principles and procedures for notes and interest, depreciation, partnerships and corporations, cash flow and financial statement analysis. Restricted to Community Colleges campuses only.

Prerequisite: OATS 120 or ACCT 2110.

Learning Outcomes

1. Analyze business transactions, their effects on the financial statements and the interrelationships of the financial statements involving the following: a. Cash transactions b. Receivables and Net Realizable Value c. Operational Assets and Depreciation d. Inventory e. Current Liabilities f. Long-term Liabilities
2. Define, identify, and demonstrate the impact of adjusting entries on financial statements.
3. Explain and demonstrate the differences between cash and accrual basis accounting.
4. Define and identify generally accepted accounting principles.
5. Analyze owner equity transactions and their effect on the financial statements.
6. Identify the cash flow statement and explain the purpose of the cash flow statement.
7. Perform ratio analysis to evaluate financial statements.

OATS 140. Payroll Accounting**3 Credits (2+2P)**

Payroll procedures including payroll tax forms and deposits. Restricted to Community Colleges campuses only.

Prerequisite: ACCT 2110 or OATS 120.

Learning Outcomes

1. Payroll Laws and Regulations.
2. New Employee Records.
3. Time and Work Records.
4. Determining Gross Earnings.
5. Determining Payroll Deductions.
6. The Payroll Register.
7. Employee Earnings Record.
8. Paying Employees.
9. Federal Payroll Taxes and Tax Returns. 1
10. State Payroll Taxes and Tax Reports. 1
11. Accounting for Payroll. 1
12. Explain the accounting treatment of all taxes and other withholdings.

OATS 150. Introduction to Medical Terminology**3 Credits (3)**

The study and understanding of medical terminology as it relates to diseases, their causes and effects, and the terminology used in various medical specialties. Emphasis will be placed on learning the basic elements of medical words, appropriate spelling and use of medical terms, and use of medical abbreviations. Crosslisted with: HIT 150. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Identify and define medical word roots, prefixes, and suffixes and abbreviations.

2. Examine and correctly spell medical terms using the basic elements of medical words.
3. Recall and properly pronounce common medical terms and the terminology related to the body's major organ systems.
4. Identify the primary medical terms used in various medical specialties.

OATS 170. Office Communications in Spanish I

3 Credits (3)

Develop oral and written communications skills of native or near-native speakers of Spanish. The student will learn basic letter writing skills, customer service techniques, and telephone etiquette in Spanish.

Spanish speaking ability is required to enroll in this course.

Learning Outcomes

1. Identify principal parts of a business letter in Spanish.
2. Understand use appropriate grammatical structures.
3. Identify and use appropriate letter styles and phrases.
4. Identify/recognize customer needs in the Spanish business-office environment in order to serve the business client.
5. Role-play telephone conversations in Spanish.
6. Demonstrate cross-culture elements of telephone etiquette.
7. Demonstrate knowledge of specific vocabulary needed to interact with customer on the telephone.

OATS 171. Office Communications in Spanish II

3 Credits (3)

Develop oral and written communications skills of native or near-native speakers of Spanish. Emphasis placed on learning the office assistant's role within the office environment. Compose complex business correspondence and learn to make international travel arrangements. Students should have Spanish speaking ability. Restricted to Community Colleges campuses.

Prerequisite: OATS 170.

Learning Outcomes

1. Augment written and communication skills in Spanish for the business world and office setting.
2. Broad the concepts of the office workplace and the office assistant's role.
3. Translate documents from English to Spanish.
4. Familiarize with specialized business terminology.
5. Learn techniques for effectively organizing work.
6. Produce professional-looking office documents in Spanish.
7. Present effective PowerPoint presentations in Spanish and English.
8. Know guidelines for handling office calls, scheduling appointments, making travel arrangements, arranging meetings and conferences.
9. Recognize the importance of ethical behavior for the office professional. 1
10. Utilize techniques for managing stress and time management.

OATS 191. Taking Minutes & Proofreading

3 Credits (3)

Preparation and practice producing minutes suited for different meeting types and purposes. Provides strategies to prepare for meetings, to record proceedings, and to transcribe minutes while incorporating proofreading skills practice. Topics include legal requirements, meeting types, minute formats, and duties/expectations of the minute taker and the meeting chair.

Learning Outcomes

1. Understand the reasons for and legality of keeping Minutes.
2. Understand the various meeting types Minute formats.
3. Listen actively for accurate note-taking.
4. Prepare effectively for meetings.
5. Record the proceedings of different meeting types.
6. Transcribe and draft Minutes in the correct format.
7. Proofread and edit accurately.
8. Produce final Minutes in Standard Edited American English.

OATS 202. Keyboarding Document Production

3 Credits (2+2P)

Further development of keyboarding speed and accuracy. Production of complex letters, memos, tables, reports and business forms. A speed and accuracy competency requirement must be met. Restricted to Community Colleges campuses

OATS 203. Office Equipment and Procedures I

3 Credits (2+2P)

Office organization, telephone techniques, equipment and supplies, handling meetings, human relations, mail procedures, and travel.

Learning Outcomes

1. Develop an understanding of the concepts of the office workplace and the role of the office professional.
2. Utilize office software from Microsoft Office and Google.
3. Test for industry certification in Microsoft Outlook.
4. Apply knowledge, skills, and techniques to office tasks and situation.
5. Identify professional behaviors associated with an administrative professional.

OATS 205. Accounting Software I

3 Credits (2+2P)

Introduction to accounting software. Restricted to Community Colleges campuses only.

Prerequisite: Working knowledge of computers and accounting or consent of instructor.

Learning Outcomes

1. Set up Vendors/Customers on QuickBooks.
2. Make Period Ending Adjusting Entries on QuickBooks.
3. Manage Inventory using QuickBooks.
4. Set up a Company using QuickBooks.
5. Set up and Process Payroll using QuickBooks.
6. Monitor Banking Transactions using QuickBooks.
7. Monitor Jobs and Time Tracking using QuickBooks.

OATS 207. Machine Transcription

3 Credits (2+2P)

Creating office documents using transcribing equipment and word processing software. Emphasis on proofreading, editing and grammar. Restricted to Community Colleges campuses.

Prerequisite: OATS 105.

Learning Outcomes

1. Utilize transcription tools and word processing software to create business documents.
2. Apply proofreading marks to edit and compose revised letters, memos, and short business documents from transcribed material.
3. Develop active listening skills.
4. Build terminology for appropriate business language in various fields of employment.

5. Apply proper formatting, grammar, and punctuation skills to business-related documents.

OATS 208. Medical Office Procedures**3 Credits (2+2P)**

Current computerized and traditional administrative medical office procedures will be introduced. Practical knowledge on managing required record keeping in a medical office environment will be emphasized. Students must have computer keyboarding ability. Restricted to Community Colleges campuses.

Prerequisite: HIT 150 or AHS 120.

Learning Outcomes

1. Demonstrate knowledge and apply the following medical office administrative procedures: (a) scheduling appointments; (b) communicating by telephone; (c) processing mail; (d) basic records management; (e) basic billing and collection procedures; (f) reception techniques; (g) originating or composing a variety of medical communications; (h) keeping financial records; (i) processing insurance claims; (j) emergency preparedness procedures.
2. Apply medical practice management and the systematizing of procedures, including utilization of computers.
3. Utilize medical terminology through assigned reading, reporting and practical applications.
4. Apply knowledge and application of principles of interpersonal communications.
5. Demonstrate proficiency in integrating the theoretical with the practical application through job skills.

OATS 209. Business and Technical Communications**3 Credits (3)**

Effective written communication skills and techniques for career success in the work place. Composition of letters, memos, short reports, forms, and proposals, and technical descriptions and directions.

Prerequisites: ENGL 1110G and computer keyboarding ability or consent of instructor.

OATS 211. Information Processing I**3 Credits (2+2P)**

Defining and applying fundamental information processing concepts and techniques using the current version of leading software. May be repeated up to 6 credits. Restricted to Community Colleges campuses

OATS 213. Word Processing I**3 Credits (2+2P)**

Operation and function of a word processor. Specific equipment to be announced in the Schedule of Classes.

Prerequisite: OATS 101 or keyboarding proficiency.

OATS 215. Spreadsheet Applications**1-3 Credits**

Use of spreadsheets to include graphics and business applications. Same as OECS 215. May be repeated under different subtitles listed in the Schedule of Classes.

OATS 217. Powerpoint Presentation**3 Credits (3)**

Comprehensive, hands-on approach to learning and applying basic and advanced features of PowerPoint. These include text enhancements, objects, fills, colors, animation, charts, sound, video, and hyperlinks. Students demonstrate appropriate audience and communication tools to deliver presentations.

Prerequisites: OATS 211 or ability to demonstrate keyboarding and Windows proficiency.

OATS 220. Internship in Business Office Technology**2 Credits (2)**

Experience in a supervised office position. Student must work at least eight hours per week. May be repeated for a maximum of 4 credits.

Prerequisites: sophomore standing and consent of instructor.

OATS 221. Internship I**1-3 Credits**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. C- or better in the course is required. Consent of Instructor required. Restricted to: BOT,HIT. majors. Restricted to Community Colleges campuses

OATS 222. Internship II**1-3 Credits**

Continuation of OATS 221. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: OATS & HIT majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

Prerequisite(s): OATS 221 and consent of instructor.

OATS 223. Medical Transcription I**3 Credits (2+2P)**

Concepts in medical transcription are introduced on how to produce a variety of reports required in a medical office or facility utilizing accurate medical terminology, spelling, grammar, and document formatting. Restricted to Community Colleges campuses only.

Prerequisite: HIT 150 or AHS 120 and HIT 158 and OATS 209.

Learning Outcomes

1. Identify and define the knowledge, skills, abilities, and responsibilities required of a medical transcriptionist.
2. Understand the content, purpose, and format of inpatient and outpatient medical reports.
3. Define the medical terms and abbreviations presented, either by memory or by using a dictionary/reference book.
4. Transcribe medical reports using correct capitalization, punctuation, abbreviation, symbol, and metric measurement rules.
5. Complete the transcription of case studies (consisting of several reports) for each of the human systems.

OATS 228. Medical Insurance Billing**3 Credits (2+2P)**

Comprehensive overview of the insurance concepts and applications required for successfully and accurately completing and submitting insurance claims and reimbursement processes for various insurance carriers, both private and government, will be emphasized. Restricted to Community Colleges campuses.

Prerequisite: HIT 150 or AHS 120.

Learning Outcomes

1. Comprehend the ramifications of a breach of confidentiality regarding patient information.
2. Follow requirements of different insurance carriers—i.e., HMO's Independent Provider Organizations, Medicare, Medicaid, Workmen's Compensation—in processing patient claims.
3. Process insurance claim form an initial patient visit through receipt of payment from insurance carrier.
4. Match ICD-10 code to appropriate diagnosis.
5. Analyze patient records to construct the insurance claim form and apply the requirements of different insurance carriers to that claim.

6. Classify and explain the various reimbursement systems and how they impact billing.
7. Identify issues of fraud and abuse and follow ethical principles by reviewing inpatient and outpatient cases.

OATS 233. Advanced Medical Transcription

3 Credits (2+2P)

Builds upon the concepts introduced in Medical Transcription I. Providing greater understanding of how to produce advanced reports of physician dictation with increasing speed and accuracy. This course furthers the student's medical transcription techniques, technologies, and editing skills needed to prepare to work in the medical transcription profession. Restricted to Community Colleges campuses only.

Prerequisite: OATS 223 and HIT 130.

Learning Outcomes

1. Recognize the terminology for diseases, conditions, and treatment protocols related to the specialties of dermatology, ophthalmology, otorhinolaryngology, pulmonology, cardiology, gastroenterology, obstetrics and gynecology, urology and nephrology, neurology, psychology, hematology and oncology, and immunology.
2. Describe the purpose and types of information contained in the most common kinds of reports transcribed.
3. Transcribe accurate and correctly formatted office notes, chart notes, consultation letters, history and physical reports, operative reports, discharge summaries, radiology reports, pathology reports, operative reports, labor and delivery reports, emergency department reports, neuropsychological evaluations, and autopsy reports.
4. Develop proofreading and editing skills and apply them to transcription work, including speech recognized text, based on industry standards.
5. Examine the job environment of medical transcription and demonstrate an ability to work effectively and efficiently with the tools of medical transcription, including productivity tools.
6. Define and use appropriate parameters for editing, correcting, and amending the electronic patient medical record using industry-accepted standards and references.
7. Understand the importance of patient record confidentiality and apply industry guidelines to keep medical documentation secure.

OATS 239. Personal Development

3 Credits (3)

Development of a marketable, employable office systems person, to include interview, voice, manners, and apparel.

OATS 241. Auditing and Business Issues

3 Credits (3)

Introduction to basic auditing concepts, the purpose for the auditing process, and requirements of persons assisting with the audit process. The course will also deal with issues of business law including contracts, sales, torts, strict liability, and business ethics. Restricted to Community Colleges campuses only.

Prerequisite: OATS 120 or ACCT 2110.

Learning Outcomes

1. Describe the history of law and the beginnings of the American legal system.
2. Define terminology and elements involved in court practice and procedures.
3. Define criminal law.
4. Describe some of the types of tort crimes and define terminology related to them.
5. Define affirmative action and the Civil Rights Act of 1964

6. Describe the uses for contracts.
7. Explain legal capacity in reference to contracts.
8. Describe the processes involved in forming a contract.
9. Explain a third-party beneficiary contract. 1
10. Discuss some of the remedies available for a breach of contract. 1
11. Define and state the difference between and expressed and implied warranty. 1
12. Define products liability and different types. 1
13. Discuss some of the elements of consumer law. 1
14. Define bankruptcy, debtor, creditor, and debt. 1
15. Define insurance and the different types of insurance available. 1
16. Discuss the various types of tenancies. 1
17. Discuss the importance of having a will. 1
18. Discuss partnerships, limited partnerships, LLC's and corporations and the advantages and disadvantages of each. 1
19. Describe some of the different types of audits and their specific purposes. 2
20. Describe some of the methods used by businesses to assure a good audit trail. 2
21. Describe actions required in preparation for an audit. 2
22. Develop an understanding of risky transactions and internal controls that may lessen the risk of fraud and errors. 2
23. Understand that there are limitations to internal controls. 2
24. Define an internal audit function. 2
25. Prepare financial statements after year end adjusting entries.

OATS 244. Tax Preparation

3 Credits (3)

Introduces basic federal and state tax codes for preparing individual income tax returns. Emphasis on use of tax software.

Prerequisite: keyboarding proficiency.

OATS 255. Special Topics

1-4 Credits

Specific subjects to be announced in the Schedule of Classes.

OATS 270. Office Administration Technology Capstone

3 Credits (2+2P)

Refines professional skills learned in the OAT program and ties all OAT coursework together. Restricted to Community Colleges campuses.

Prerequisite: OATS 102 or OATS 129; and OATS 120; and OAT S 209 or ENGL 2210G; and OATS 211 or OECS 211.

Learning Outcomes

1. Construct professional, error-free business documents that demonstrate appropriate formats and ideas in clear, concise, and correct written and spoken language.
2. Utilize effective administration skills to enhance the productive operation of the workplace.
3. Demonstrate professional behaviors and workplace ethics for the professional office environment.
4. Demonstrate proficiency in the use of productivity software in business applications

OATS 298. Independent Study

1-3 Credits (1-3)

Individual studies directed by consenting faculty with prior approval of department head. sophomore standing with 3.0 GPA. May be repeated up to 3 credits.

Learning Outcomes

1. Varies

OEBM-BIOMEDICAL TECHNOLOGY**OEBM 140. Applied Human Biology for Biomedical Technology
3 Credits (3)**

Essential human biology, anatomy, physiology and medical terminology for biomedical equipment technicians. Focus on the vocabulary necessary for effective communication in the hospital environment as part of the health care team. Restricted to: Community Colleges only.

**OEBM 141. Medical Electronics and Safety in Healthcare
3 Credits (3)**

Introduction to the biomedical equipment technology field. Operation of common biomedical equipment to include pressure and temperature systems, infusion devices, patient monitors, and other physiologic and patient systems. Hospital safety and health regulations explained. Restricted to Community Colleges campuses only.

Prerequisite(s): OEBM 140.

**OEBM 200. Biomedical Internship
1-4 Credits (3-12P)**

Practice working in industry as a biomedical electronics technologist. Students work on a variety of medical equipment and job tasks. An employer evaluation, student report, and a minimum of 100 work hours are required. May be repeated up to 8 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

Prerequisite(s): OEBM 140 and OEBM 141.

**OEBM 211. CBET Exam Preparation
1 Credit (1)**

An overview of the Certified Biomedical Equipment Technician exam. Topics include anatomy and physiology, electronics principles, safety issues, equipment operation, and equipment troubleshooting.

Prerequisite(s)/Corequisite(s): OEBM 241 AND OEBM 240. Restricted to Community Colleges campuses only.

**OEBM 240. Medical Imaging Systems
3 Credits (3)**

The fundamentals of diagnostic radiography equipment will be explored. Principles of an x-ray system will be explained including the x-ray generation, image formation and film processing. Focus will be on both safety and quality. Restricted to Community Colleges campuses only.

Prerequisite(s): OEBM 140.

**OEBM 241. Advanced Medical Electronics
3 Credits (3+1P)**

Advanced study in biomedical equipment to include cardiovascular, pulmonary, telemetry and other critical life support systems. Restricted to Community Colleges campuses only.

Prerequisite(s): OEBM 141.

OECs-COMPUTER TECHNOLOGY**OECs 101. Computer Basics
1 Credit (1)**

Hands-on instruction to introduce computer use and commonly used software. Graded S/U.

**OECs 105. Introduction to Information Technology
3 Credits (3)**

Examination of information systems and their impact on commerce, education, and personal activities. Utilization of productivity tools for communication, data analysis, information management and decision-making.

Learning Outcomes

1. Describe the social impact of information literacy and systems in relation to commerce, education, and personal activities.
2. Explain how to use the information resources legally, safely, and responsibly in relation to ethical, security, and privacy issues.
3. Evaluate bias, accuracy and relevance of information and its sources.
4. Use productivity tools for communications, data analysis, information management and decision-making.
5. Describe and use current information systems and technologies.

**OECs 110. Introduction to Power Point
1-3 Credits (1-3)**

An introduction to Power Point software to develop business presentations. Includes concepts of basic presentation methods and graphic design principles. Students will create and deliver presentations using text, charts, digitized images, and sound. Restricted to Community Colleges campuses only.

**OECs 125. Operating Systems
1-3 Credits**

Installation, configuration and optimization of current operating systems. Restricted to: Community Colleges only.

**OECs 128. Operating Systems Linux/Unix
3 Credits (3)**

Installation, configuration, and use of Linux/Unix operating system software and utilities including hardware management, file management, use of command line, and scripting. Restricted to: Community Colleges only.

**OECs 145. Mobile Application Development
1-3 Credits (1-3)**

Introduction to elements of mobile application coding including concepts, design strategies, tools needed to create, test and deploy applications for mobile devices. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

**OECs 155. Special Topics - Introductory Computer Technology
0.5-4 Credits (.5-4)**

Topics to be announced in the Schedule of Classes. May be repeated up to 8 credits.

**OECs 185. PC Maintenance and Repair I
1-3 Credits**

Introduction to most common types of PC configurations, installations, and failures. This course will explore troubleshooting skills for maintaining and repairing common hardware and software related problems. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

**OECs 192. C++ Programming I
3 Credits (3)**

Development of skills in programming using the C++ programming language. Restricted to: Community Colleges only.

**OECs 195. Java Programming I
1-3 Credits**

Developing of skills in programming using the Java programming language. Restricted to: Community Colleges only.

**OECs 200. Accounting on Microcomputers
3 Credits (3)**

Fundamental accounting principles using popular microcomputer software to include G/L, A/R, A/P, purchase order, billing, inventory, and forecasting modules.

Prerequisite: ACCT 2110 or OATS 121.

OECS 204. Linux Operating System**1-3 Credits**

Install and configure the Linux operating system on X86 systems. Covers issues involved in maintaining operating system, networking, creating and managing users, and installing and updating software. General procedures for working with operating system includes maintaining disk space, preserving system security, and other related topics. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

OECS 207. Windows**0.5-3 Credits**

Covers local installation, configuration of core local services, managing users, and the general local management and maintenance of Windows workstations. May be repeated up to 6 credits.

Prerequisite(s)/Corequisite(s): OECS 185. Restricted to Community Colleges campuses only.

OECS 208. Internet Applications**1-3 Credits**

Survey of the Internet to include e-mail, file transfer, current search techniques, the World Wide Web and basic Web page development. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

OECS 209. Computer Graphic Arts**1-3 Credits**

Basic graphics composition using computer programs to include editing and manipulating graphic images, clip-art, and printing of pictures. May be repeated for a maximum of 6 credits under different subtitles listed in the Schedule of Classes.

Prerequisite: OECS 105, BCIS 1110, or OECS 101.

OECS 211. Word Processing Applications**1-3 Credits**

Basic word processing to include composing, editing, formatting, and printing of documents. May be repeated under different subtitles listed in the Schedule of Classes for a maximum of 6 credits.

Prerequisites: BCIS 1110 or OECS 105.

OECS 215. Spreadsheet Applications**1-3 Credits**

Use of spreadsheets to include graphics and business applications. May be repeated for a maximum of 6 credits.

Prerequisites: BCIS 1110 or OECS 105.

OECS 220. Database Application and Design**1-3 Credits**

Creating, sorting, and searching of single and multifile databases to include report generation and programming database commands. May be repeated for a maximum of 6 credits under different subtitles listed in the Schedule of Classes. Restricted to: Community Colleges only.

Prerequisite(s): BCIS 1110 OR E T 120 OR E T 122 OR OECS 105.

OECS 221. Internship I**1-3 Credits**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OECS majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

Prerequisite(s): Consent of instructor.

OECS 222. Internship II**1-3 Credits**

Continuation of OECS 221. Each credit requires specified number of hours of on-the-job work experience. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OECS majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

Prerequisite(s): OECS 221 and consent of instructor.

OECS 223. Web Design for Business**3 Credits (3)**

Design and create a website using HTML, CSS, web development tools and industry-recognized software while applying best practices in site management and business web presence.

Learning Outcomes

1. Students will identify and apply best practices for web design in a business setting.
2. Students will create a basic web page utilizing WC3 principles.
3. Students will explain the importance and impact of web presence in today's business environment.
4. Students will determine and utilize web page features and techniques for a specific business.
5. Students will create a web design management plan for business.
6. Students will discuss web page tools for performance and web traffic analytics.
7. Students will identify web design components for a motble society.

OECS 230. Data Communications and Networks I**1-3 Credits**

Definition of data communication; survey of hardware applications and teleprocessor software; examination and design of networks. May be repeated for a maximum of 6 credits.

Prerequisite: OECS 185.

OECS 231. Data Communications and Networks II**1-3 Credits**

Installation and application of popular microcomputer network software. May be repeated for a maximum of 6 credits.

Prerequisite: OECS 230.

OECS 234. Linux Server**3-4 Credits (3-4)**

This course addresses the implementation and support needs of IT professionals that are planning to deploy and support Linux Server(s). It provides in-depth, hands-on training for planning, implementation, management and support of Linux networking services. May be repeated up to 8 credits.

Prerequisite(s)/Corequisite(s): OECS 204. Restricted to: OECS majors. Restricted to Community Colleges campuses only.

OECS 235. Structured Query Language (SQL)**1-3 Credits**

Installation, configuration, administration, and troubleshooting of SQL client/server database management system. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): OECS 220. Restricted to Community Colleges campuses only.

OECS 237. Windows Server**3-4 Credits (3-4)**

This course addresses the implementation and support needs of IT professionals that are planning to deploy and support Microsoft Windows Server Active Directory Domain Services in medium to large businesses. It provides in-depth, hands-on training for Information Technology (IT) professionals responsible for the planning, implementation, management, and support of Windows Active Directory services. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): OECS 207. Restricted to Community Colleges campuses only.

**OECS 253. Applied Data Analysis and Management
3 Credits (3)**

Applied use of advanced spreadsheet tools for data analysis and database tools for data and information management. Connect emerging topics in business to tools used in analyzing data and making raw data useful for business decision making.

Prerequisite: BCIS 1110.

Learning Outcomes

1. Manage, integrate, and analyze data with data tools.
2. Generate and summarize data.
3. Use tools for business projections, comparisons, trends, and informed decisions.
4. Create advanced queries and enhance table design.
5. Use form tools and create custom forms.
6. Use automation tools for efficiency.
7. Secure and maintain data.
8. Plan, research, create, and revise spreadsheets and databases for a specific business application.
9. Discuss emerging topics in business related to data analysis and management.

**OECS 255. Special Topics
1-4 Credits**

Topics to be announced in the Schedule of Classes.

**OECS 261. Introduction to Networks
3-4 Credits (3-4)**

Introduction to networking principles including the practical and conceptual skills for understanding basic networking, planning and designing networks, implementing IP addressing schemes, examining the OSI and TCP/IP layers, and performing basic configurations for routers and switches. Aligns to the first course of the Cisco Networking Academy CCNA curriculum. Restricted to Community Colleges campuses only.

**OECS 262. Essentials of Routing and Switching
3-4 Credits (3-4)**

Examination of the architecture, components, and operations of routers and switches in a small network. Student will learn how to configure, verify and troubleshoot: routers and switches, static routing, default routing, VLANs, and ACLs. Aligns to the second course of the Cisco Networking Academy CCNA curriculum. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): OECS 261. Restricted to Community Colleges campuses only.

**OECS 263. Network Fundamentals
3-4 Credits (3-4)**

Fundamentals of networking architecture, components, and operations including practical and conceptual skills using routers and switches. Student will learn how to configure, verify and troubleshoot static routing, default routing, VLANs, and ACLs. This course aligns to the third course of the Cisco Networking Academy CCNA curriculum. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): OECS 262. Restricted to Community Colleges campuses only.

**OECS 264. Network Routing Protocols
3-4 Credits (3-4)**

Fundamentals of routing protocols for troubleshooting advanced network operations. Covers common networking issues such as RIP, OSPF, and EIGRP for IPv4 and IPv6 networks. This course aligns to the fourth course

of the Cisco Networking Academy CCNA curriculum. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): OECS 263. Restricted to Community Colleges campuses only.

**OECS 269. Network Security
3-4 Credits (3-4)**

Fundamentals of design and implementation of network security solutions that will reduce the risk of system vulnerability. May be repeated up to 8 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): OECS 204 or OECS 207 or OECS 261 or consent of instructor.

**OECS 275. PC Maintenance and Repair II
1-3 Credits**

Continuation of OECS 185. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): OECS 185.

**OECS 280. Desktop Publishing I
3 Credits (3)**

Design and production of publication materials to fill the needs of business communities, using a microcomputer. May be repeated for a maximum of 6 credits. Same as OATS 280.

Prerequisites: either BCIS 1110, OECS 105.

**OECS 290. Computer Technology Capstone
1-3 Credits**

Refines skills learned in the OECS program. Culminates in a review and practice of advanced software applications. May be repeated up to 3 credits. Restricted to: OECS & OECT majors. Restricted to Community Colleges campuses only.

Prerequisite(s): (OECS 125, OECS 128, OECS 207, OR OECS 203) AND (OECS 185 OR E T 283).

**OECS 299. Independent Study
1-3 Credits**

Specific subjects to be determined based on need. Restricted to: Community Colleges only.

OEEM- PARAMEDIC

**OEEM 101. CPR for the Health Care Professional
1 Credit (1)**

Students learn identification and response to airway and circulation emergencies, including use of a SAED and accessing the EMS system. This course is taught using the American Heart Association guidelines for course completion. Required: grade of C or better.

**OEEM 103. Heartsaver First Aid/CPR
1 Credit (1)**

Students learn how to identify and respond to airway, circulation and basic first aid emergencies, to include using a SAED and accessing the EMS system. This course is intended for students who are not Allied Health Majors and utilizes the American Heart Association guidelines for course completion. Restricted to: Community Colleges only.

**OEEM 115. First Responder Prehospital Professional
3 Credits (2+3P)**

Provides training in prehospital medical and traumatic emergencies. Consent of instructor required. Requires a C or better to pass. Restricted to majors.

Corequisite(s): OEEM 101.

**OEEM 120. Emergency Medical Technician Basic
6 Credits (6)**

EMT-Basic skills to include care of soft tissue and muscular/skeletal injuries, circulatory, nervous, general medical and respiratory emergencies. Requires a "C" or better to pass. May be repeated up to 6 credits. Consent of Instructor required.

Corequisite(s): OEEM 101, OEEM 120L, OEEM 121.

Prerequisite(s)/Corequisite(s): OEEM 153. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

**OEEM 120 L. Emergency Medical Technician Basic Lab
2 Credits (6P)**

EMT-Basic skills development with emphasis on assessment, skills competency and team-work in patient care in the prehospital setting. May be repeated up to 2 credits.

Corequisite(s): OEEM 101, OEEM 120, OEEM 121.

Prerequisite(s)/Corequisite(s): OEEM 153. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

**OEEM 121. Emergency Medical Technician Basic Field/Clinical
1 Credit (3P)**

Covers the patient care experience provided through assigned shifts in the hospital and/or ambulance setting. Requires a "C" or better to pass. May be repeated up to 1 credits. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): OEEM 101, OEEM 120, OEEM 120L, OEEM 153. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

**OEEM 150. Emergency Medical Technician Intermediate
5 Credits (5)**

Theory of the roles, responsibilities and scope of practice of the EMT-Intermediate. Assessment and management of respiratory, cardiac, trauma, environmental, behavior, reproduction, and childhood emergencies. May be repeated up to 5 credits. Consent of Instructor required. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

Prerequisite(s): Current EMT-basic license, pretest and consent of instructor.

**OEEM 150 L. Emergency Medical Technician Intermediate Lab
2 Credits (6P)**

EMT-Intermediate skills development with an emphasis on assessment, skills competency, and team work in patient care in the prehospital setting. Requires a C or better to pass.

Prerequisite(s)/Corequisite(s): OEEM 150, OEEM 151. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

**OEEM 151. Emergency Medical Technician Intermediate Field/Clinical
2 Credits (6P)**

Patient care experience provided through assigned shifts in the hospital and/or ambulance setting.

Prerequisite(s)/Corequisite(s): OEEM 150, OEEM 150 L. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

**OEEM 153. Introduction to Anatomy and Physiology for the EMS Provider
3 Credits (3)**

To properly assess and manage a patient, a prehospital provider must have a solid foundation in human anatomy and physiology. This course provides a systematic approach to building this foundation. Grade of "C" or better is required to pass the course. Consent of Instructor required. Restricted to Community Colleges campuses only.

**OEEM 155. Special Topics
1-6 Credits**

Specific topics to be listed in Schedule of Classes. May be repeated for a maximum of 10 credits.

**OEEM 201. Human Systems, Pathophysiology and Development
3 Credits (3)**

A course which provides a survey of human anatomy and physiology, pathological processes, and life span development. Emphasis is placed on interrelationships among organ systems and deviation from homeostasis. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only. May be repeated up to 3 credits.

Prerequisite: OEEM 120, OEEM 120 L.

Learning Outcomes

1. Explain the general terminology, anatomy, and physiology of the human body.
2. Apply principles of normal anatomy and physiology of the human body to the pathophysiologic processes of common health problems.
3. Associate pathophysiology to patient assessment and treatment.
4. Describe key physiologic and psychosocial changes that occur in different age groups.

**OEEM 202. Airway and Respiratory Emergencies
2 Credits (2)**

A course which focuses on the anatomy, physiology, and pathophysiology of the respiratory system. Integrates the knowledge to develop and implement a comprehensive treatment plan, with the goal of assuring a patent airway, adequate mechanical ventilation and respiration for patients of all ages. Requires a "C" or better to pass. Restricted to: OEEM majors. Restricted to Community Colleges campuses only. May be repeated up to 2 credits.

Prerequisite: OEEM 201, OEEM 206, OEEM 207.

Corequisite: OEEM 202 L.

Learning Outcomes

1. Demonstrates an understanding of the mechanics, neurological control and diseases impacting respiration and ventilation.
2. Demonstrates an understanding of various methods, tools and techniques to assure a patent airway, ventilation and respiration.
3. Integrate assessment findings with emergency pharmacology and relevant tools to create and implement treatment plans for patients with medical or trauma related respiratory complaints.

**OEEM 202 L. Airway and Respiratory Emergencies
1 Credit (3P)**

A course which focuses on the anatomy, physiology, and pathophysiology of the respiratory system. Integrates the knowledge to develop and implement a comprehensive treatment plan, with the goal of assuring a patent airway, adequate mechanical ventilation and respiration for patients of all ages. Requires a "C" or better to pass. Restricted to: OEEM majors. Restricted to Community Colleges campuses only. May be repeated up to 2 credits.

Prerequisite: OEEM 201, OEEM 206, OEEM 207.

Corequisite: OEEM 202.

Learning Outcomes

1. Appropriately utilizes various methods, tools and techniques to assure a patent airway, ventilation and respiration.
2. Integrates assessment findings with emergency pharmacology and relevant tools to implement treatment plans for patients with medical or trauma related respiratory complaints.
3. Act as an entry-level Paramedic team leader in an airway management, ventilation or respiratory simulation.

**OEEM 203. Paramedic Trauma Care
2 Credits (2)**

A course which covers the mechanism of injury, pathophysiology, diagnosis, assessment, treatment and care of the trauma and environmental emergency patient. Consent of instructor. Restricted to majors. Requires a C or better to pass. Restricted to: OEEM majors.

Restricted to Community Colleges campuses only. May be repeated up to 2 credits.

Prerequisite: OEEM 201, OEEM 206, OEEM 207.

Corequisite: OEEM 203 L.

Learning Outcomes

1. Understands epidemiology, trauma scoring and destination decisions.
2. Formulates comprehensive and focused assessment strategies for minor, moderate and critically ill patients with bleeding; chest, abdominal, genitourinary, orthopedic, soft tissue, head, face, neck, spine, nervous system trauma.
3. Construct assessment and treatment plans for vulnerable trauma patient populations including the cognitively impaired, pregnant, pediatrics and geriatrics.
4. Understands the pathophysiology, assessment, management and treatment of environmental emergencies.
5. Understands the pathophysiology, assessment, management and treatment of the multisystem trauma patient.

OEEM 203 L. Paramedic Trauma Care Lab

1 Credit (3P)

A practical course which covers the mechanism of injury, pathophysiology, diagnosis, assessment, treatment and care of the trauma and environmental patient. Consent of instructor. Restricted to majors. Requires a C or better to pass. Restricted to: OEEM majors. Restricted to Community Colleges campuses only. May be repeated up to 1 credit.

Prerequisite: OEEM 201, OEEM 206, OEEM 207.

Corequisite: OEEM 203.

Learning Outcomes

1. Applies an understanding of epidemiology, trauma scoring and destination decisions.
2. Implements comprehensive and focused assessment strategies for minor, moderate and critically ill patients with bleeding; chest, abdominal, genitourinary, orthopedic, soft tissue, head, face, neck, spine, nervous system trauma.
3. Constructs and applies assessment and treatment plans for vulnerable trauma patient populations including the cognitively impaired, pregnant, pediatrics and geriatrics.
4. Applies an understanding of the pathophysiology, assessment, management and treatment of environmental emergencies.
5. Applies an understanding of the pathophysiology, assessment, management and treatment of the multisystem trauma patient.

OEEM 206. Introduction Paramedic Practice

3 Credits (3)

A course which introduces students to the advanced practice of prehospital medicine, research, medical legal issues, the wellbeing of the provider. Reviews foundational EMS knowledge and the NM Paramedic Scope of Practice. Emphasizes paramedic operations within the healthcare system. Requires a C or better to pass. Restricted to majors. Consent of instructor required. Restricted to: Community Colleges only. Restricted to OEEM majors. May be repeated up to 3 credits.

Prerequisite: OEEM 120, OEEM 120 L, OEEM 121.

Learning Outcomes

1. Discuss paramedic roles and responsibilities within an EMS system.
2. Analyze and interpret research and describe how to integrate findings into evidence
3. Integrates health and safety principles to maintain provider, crew and situational awareness, safety, and wellbeing.

4. Uses appropriate written or electronic tools to effectively document the essential elements of patient care and transport.
5. Explains the components of the EMS communications systems and the importance of Quality Assurance/Quality Improvement.
6. Applies the appropriate techniques of therapeutic communication with patients, families and other healthcare team members.
7. Identifies relevant laws and ethical issues which impact decisions made in healthcare settings.

OEEM 207. Emergency Pharmacology

2 Credits (2)

A course which integrates comprehensive knowledge of pharmacology to formulate a treatment plan intended to mitigate emergencies and improve the overall health of the patient. Discusses physiologic actions, pharmacodynamics, pharmacokinetics, therapeutic effects, medication administration, dosages and interactions. Restricted to majors. Requires a C or better to pass. Restricted to: Community Colleges only. Restricted to OEEM majors. May be repeated up to 2 credits.

Prerequisite: OEEM 120 OEEM 120 L, OEEM 121.

Corequisite: OEEM 207 L.

Learning Outcomes

1. Explains relevant terms, processes and definitions relating to pharmacology.
2. Describes safety, storage and security, legislation, naming, classification and scheduling of medications.
3. Demonstrates appropriate decision making regarding medication administration to mitigate emergencies and improve overall health of the patient.
4. Demonstrates an understanding of the dosages, routes, indications, contraindications, mechanism of actions, side effects of medications in the National and NM Paramedic Scope of Practice.
5. Demonstrates application of ethical, legal, communication and documentation aspects of emergency pharmacology.

OEEM 207 L. Emergency Pharmacology Lab

1 Credit (3P)

A course which integrates comprehensive knowledge of pharmacology to formulate a treatment plan intended to mitigate emergencies and improve the overall health of the patient. Students will practice medication administration, calculate medication dosages, vascular access, fluid administration and other related skills. Requires a C or better to pass. Instructor permission required. Restricted to: Community Colleges only. Restricted to OEEM majors. May be repeated up to 1 credit.

Prerequisite: OEEM 120, OEEM 120 L, OEEM 121.

Corequisite: OEEM 207.

Learning Outcomes

1. Demonstrates an ability to safely administer medications in the national and NM Paramedic Scope of Practice.
2. Calculates the correct volume, flow rate and amount of medication to be administered in a given situation.
3. Demonstrates an ability to administer medications as appropriate based on patient presentations.

OEEM 210. Cardiac Rhythm Interpretation

3 Credits (2+3P)

Cardiac conduction system: electrophysiology, electrocardiogram, monitor, atrial, sinus, ventricular and junctional dysrhythmias, multiple lead EKG and 12 lead EKG interpretation. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEEM, OEMS majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 201, OEEM 206, OEEM 207.

OEEM 212. EMT-Paramedic Cardiovascular Emergencies

3 Credits (2+3P)

Review anatomy, physiology, and pathophysiology of cardiovascular system. Assessment and management of cardiovascular emergencies in the prehospital setting. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 210.

OEEM 213. EMT-Paramedic: Medical Emergencies I

3 Credits (2+3P)

Study of the disease process; assessment and management of neurological, endocrine, gastrointestinal, renal emergencies and infectious disease. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEEM, OEMS majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 212.

OEEM 214. EMT--Paramedic: Medical Environmental Emergencies II

3 Credits (2+3P)

Study of disease process, assessment, and management of poisoning, drug and alcohol abuse, environmental, behavioral and geriatric emergencies. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 213.

OEEM 216. EMT-Paramedic: Reproductive and Childhood Emergencies
3 Credits (2+3P)

Covers anatomy, physiology, disease processes, assessment and management of male and female reproductive system emergencies, childhood emergencies and growth and development. Restricted to majors. Requires a C or better to pass. Restricted to: Community Colleges only.

Prerequisite(s): OEEM 214 and consent of instructor.

OEEM 218. Pediatric Advance Life Support for the Healthcare

Professional

1 Credit (1)

Identify and respond to life threatening pediatric emergencies. Taught using the American Heart Association guidelines for course completion. Graded S/U.

Prerequisite: OEEM 101.

OEEM 219. Advance Cardiac Life Support for the Healthcare Provider

1 Credit (1)

Identify and respond to life threatening cardiac emergencies. Taught using the American Heart Association guidelines for course completion. Graded S/U.

Prerequisite: OEEM 101.

OEEM 230. EMT-Paramedic Clinical Experience I

3 Credits (9P)

Assigned clinical experiences in patient assessment and specific management techniques. Successful completion includes minimum required hours and completion of course objectives. Restricted to majors. Requires a C or better to pass.

Prerequisite: consent of instructor.

OEEM 231. EMT-Paramedic Clinical Experience II

3 Credits (9P)

Assigned clinical experiences in patient assessment and specific management techniques. Successful completion includes minimum required hours and completion of course objectives. Requires a "C" or

better to pass. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): OEEM 230. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.

OEEM 240. EMT-Paramedic Field Experience I

3 Credits (9P)

Advanced prehospital skills and knowledge. Successful completion of at least the minimum required hours and course objectives. Restricted to majors. Requires a C or better to pass.

Prerequisite: consent of instructor.

OEEM 241. EMT-Paramedic Field Experience II

3 Credits (9P)

Continued focus on advanced prehospital skills and knowledge, with increasing responsibility for patient care. Successful completion includes meeting at least the minimum required hours and course objectives.

Prerequisite(s)/Corequisite(s): OEEM 240. Requires a C- or better to pass.

OEEM 242. EMT-Paramedic Field Internship

3 Credits (9P)

Emphasis on total patient care responsibility and team leadership skills. Successful completion includes meeting the minimum hours required and course objectives. Pre/ Consent of Instructor required. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 231, OEEM 241.

OEEM 243. EMT-Paramedic Preparation for Practice

2 Credits (2)

Comprehensive final program testing to prepare for licensing examination. Requires a "C" or better to pass. May be repeated up to 2 credits. Consent of Instructor required. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 242.

OEET- ELECTRICAL TRADES

OEET 110. Basic Electricity and Electronics

4 Credits (3+3P)

An introduction to electricity theory and practice, including electron theory, Ohm's law, construction of electrical circuits, direct and alternating currents, magnetism, transformers, and practical applications. Same as HVAC 102, ELT 105, OEPB 102.

OEET 120. Basic Motor Controls

5 Credits (2+6P)

Developing schematics and wiring simple manual and electromechanical control devices.

Prerequisite: OEET 110 or consent of instructor.

OEET 205. National Electric Code

3 Credits (3)

Interpretation and application of the National Electric Code.

Prerequisite: OEET 110.

OEET 251. Electrical Apprenticeship V

6 Credits (6)

Commercial/industrial applications for electricians. Blueprint interpretation, commercial construction types and processes, wiring methods, wiring materials, and motor controls.

Prerequisites: OEET 154 and consent of instructor.

OEET 252. Electrical Apprenticeship VI

6 Credits (6)

In-depth commercial applications to include commercial/industrial service calculations, mobile home parks, multi-family dwellings, and commercial fire/security systems.

Prerequisites: OEET 251 and consent of instructor.

OEET 253. Electrical Apprenticeship VII

6 Credits (6)

Control devices in commercial/industrial applications; emphasis on logic in-line diagrams, time delay starters, reversing starters, and manual/magnetic solenoids.

Prerequisites: OEET 252 and consent of instructor.

OEET 254. Electrical Apprenticeship VIII

6 Credits (6)

Miscellaneous topics for the journeyman electrician to include power distribution/transmission, solid state controls and relays, photoelectric and proximity controls and programmable controllers.

Prerequisites: OEET 253 and consent of instructor.

OEET 295. Special Topics

1-6 Credits

Topics to be announced in the Schedule of Classes.

OEGR-DIGITAL GRAPHIC TECH

OEGR 221. Cooperative Experience I

1-3 Credits

Student employed in approved work site; supervised and rated by employer and instructor. Each credit requires specified number of hours of on-the-job work experience. Restricted to majors. Graded S/U.

Prerequisite: consent of instructor.

OEGS-GEOGRAPHIC INFO SYS

OEGS 291. Special Topics in Geographic Information Systems

1-3 Credits (1-3)

Topics to be announced in the Schedule of Classes. May be repeated up to 12 credits. Restricted to Community Colleges campuses only.

OETS-TECHNICAL STUDIES

OETS 100. Industrial/Construction Safety

2 Credits (2)

Covers safety issues such as PPE, BBP, ladder safety, RTK, HazCom, MSDS and information about safety organizations such as OSHA, NIOSH, NFPA, National Safety Council. Community Colleges only. Restricted to Dona Ana and Carlsbad campuses.

OETS 102. Career Readiness Certification Preparation

1 Credit (1)

This course is designed to prepare students to successfully obtain Career Readiness Certifications in all areas and at the appropriate levels for their program of study. Graded: S/U Grading (S/U, Audit). May be repeated up to 3 credits. S/U Grading (S/U, Audit).

OETS 103. Technical Career Skills

4 Credits (4)

This course will be project-based and will encompass writing, presentation, math, reading, and critical thinking skills applied in a technical environment. Restricted to: Community Colleges only.

OETS 104. Basic Mathematics for Technicians

4 Credits (4)

Fundamental mathematical concepts and computations including measurement, ratio and proportions, and pre-algebra as it relates to technical programs.

Prerequisite: appropriate placement test score.

OETS 117. Writing for Technicians

3 Credits (3)

Instruction in the skills for developing clear, written descriptions of processes and procedures used by technicians in various fields. Emphasis on correct grammar, logical organization, and receiving audience. Focuses on clarity, structure, and concise writing methods. Does not substitute for ENGL 111G. Restricted to: Community Colleges only.

OETS 118. Mathematics for Technicians

3 Credits (2+2P)

Analysis and problem solving of technical problems using measuring instruments and techniques of arithmetic, algebra, geometry, and trigonometry. Restricted to Community Colleges campuses only.

Prerequisite: Grade of "C-" or better in OETS 104 or CCDM 103 N, or appropriate placement test score.

Learning Outcomes

1. Use mathematics and problem solving techniques to analyze and find answers to money and financial problems.
2. Use estimations to solve problems and check answers to make sure they are reasonable.
3. Analyze and solve problems using the tools and techniques of algebra.
4. Use geometry to find circumference, perimeters, areas and volumes of various plane and solid materials and spaces.
5. Use trigonometry to solve problems involving triangular shapes.
6. Use systems of equations and quadratic equations to solve technical problems.

OETS 120. Business Fundamentals

3 Credits (3)

Instruction in the skills for basic business concepts used by technicians in various fields. Emphasis placed on basic business concepts; business ownership including marketing, management, accounting, and customer services; interpersonal communication; and basic computer concepts including word processing, spreadsheets, and presentation software. Restricted to Community Colleges campuses only.

OETS 255. Special Topics Technical Studies

1-6 Credits

Topics to be announced in the Schedule of Classes. Restricted to: Community Colleges only.

Prerequisite(s): Consent of instructor.

PHED-PHYSICAL EDUCATION

PHED 1110. Dance:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1230. Individual Sport:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1290. Team Sport:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1310. Swim I:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1320. Aqua Fit:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1330. Lifeguarding

2 Credits (2)

Skills training for a nonsurf lifeguard. Course will include Standard First Aid and CPR certification. May be repeated up to 2 credits.

Learning Outcomes

1. To help the student become aware of the common hazards associated with various types of aquatic facilities and to develop the knowledge and skills to eliminate or minimize such hazards.
2. To help the student develop the skills necessary to recognize a person in distress or in a drowning situation and to effectively rescue that person.
3. To help the student understand their responsibility to their employer, fellow employees and especially to the patrons of their facility.
4. To provide explanations, demonstrations, practice and review of the rescue skills essential for lifeguarding.
5. To instill in the students an understanding and appreciation for the responsibilities, swimming skills and additional duties of lifeguarding.
6. To develop more advance swimming skills to assist in a water rescue.

PHED 1410. Yoga:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1430. Pilates:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1510. Training:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1620. Fitness:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1630. Career Fitness:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 10 credits.

Learning Outcomes

1. Varies

PHED 1670. Aerobics:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1830. Running:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 4 credits.

Learning Outcomes

1. Varies

PHED 1910. Outdoor Experience

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 2996. Special Topics

1-3 Credits (1-3)

Specific subjects to be announced in the Schedule of Classes. Each offering will carry appropriate subtitle. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHIL-PHILOSOPHY

PHIL 1115G. Introduction to Philosophy

3 Credits (3)

In this course, students will be introduced to some of the key questions of philosophy through the study of classical and contemporary thinkers. Some of the questions students might consider are: Do we have free will? What is knowledge? What is the mind? What are our moral obligations to others? Students will engage with and learn to critically assess various philosophical approaches to such questions.

Learning Outcomes

1. Comprehend and differentiate between various philosophical approaches to questions within fields such as metaphysics, epistemology, ethics, and aesthetics.
2. Critically evaluate various philosophical arguments and positions.

PHIL 1120G. Logic, Reasoning, & Critical Thinking

3 Credits (3)

The purpose of this course is to teach students how to analyze, critique, and construct arguments. The course includes an introductory survey of important logical concepts and tools needed for argument analysis. These concepts and tools will be use to examine select philosophical and scholarly texts.

Learning Outcomes

1. Comprehend components of arguments.
2. Acquire a general understanding of the essential logical concepts needed for argument analysis, such as validity, soundness, deduction, and induction.
3. Critically assess arguments with an aim toward identifying what constitutes effective and reasonable argument strategies.
4. Learn to identify common logical fallacies.
5. Apply knowledge of argumentation principles to philosophical and scholarly texts

PHIL 1140G. Philosophy and World Religions**3 Credits (3)**

A philosophical enquiry into the religious life; an introduction to philosophical questions about religions focused on consideration of some of the traditional approaches to God and what it means to be religious. May be repeated up to 3 credits.

Learning Outcomes

1. Identify and describe philosophical theories regarding religion.
2. Develop and enhance your critical thinking skills, particularly in the evaluation of arguments about the truth or applicability of particular religious or secular viewpoints.
3. Analyze the teachings of world religions by describing their similarities and differences.
4. Explain the philosophical beliefs, practices, and ethical standards of the major world religions as well as emerging religious movements.
5. Explain how each religion evolved historically, philosophically, and spiritually as well as the contemporary ideas and practices each religion.

PHIL 1145G. Philosophy, Law, and Ethics**3 Credits (3)**

An introduction to practical problems in moral, social, political, and legal philosophy. Topics to be discussed may include ecology, animal rights, pornography, hate speech on campus, same-sex marriage, justice, abortion, terrorism, treatment of illegal immigrants, and New Mexican Aboriginal Peoples' land claims.

Learning Outcomes

1. The aim of this course is to familiarize students with some of the ethical and philosophical issues that arise in connection with laws/legality in general and criminal and constitutional law in the U.S. in particular.
2. It examines issues in moral philosophy, political philosophy, and philosophy of law.
3. A question to which we repeatedly return is whether the law does and/or ought to have some necessary relation to the demands of justice and morality. Among the topics we'll cover are: What is a law? Natural law vs. positive law and legal positivism vs. natural law theory; Utilitarian, divine command, Kantian, and natural law theories of moral rightness/wrongness; The distinction between the normative and the non-normative; Is there a moral duty to obey the law? Plato's *Crito* and R.P. Wolff's "philosophical anarchism."; J.S. Mill and classical liberalism; Mill's "harm principle" ("the state should restrict the liberty of competent adults via the criminal law only to prevent them from wrongfully harming other persons"); Legal paternalism. Should the state make it harder for citizens to smoke tobacco and/or marijuana, for their own good?; Should voluntary euthanasia be legal? Is there a constitutional "right to die"?; How should judges determine the meaning of vaguely worded constitutional requirements (e.g. "free exercise of religion," no "unreasonable search and seizure," no

"cruel and unusual punishment," etc.)? Originalist vs. nonoriginalist approaches; The First Amendment, free speech, and freedom of religion; The death penalty and "cruel and unusual punishment"; The insanity defense in criminal law; Does the 14th Amendment's requirement of "equal protection" under the law compel states to recognize same sex marriage?; The Fourth Amendment and its prohibition of "unreasonable search and seizure."

PHIL 2110G. Introduction to Ethics**3 Credits (3)**

This course introduces students to the philosophical study of morality and will explore questions concerning our human obligations to others and related issues. Students may be asked to relate various approaches to ethics to present-day ethical debates and their own lives.

Learning Outcomes

1. Differential between various ethical theories, which may include virtue ethics, deontology, and consequentialism.
2. Critically evaluate various ethical theories and positions.

PHIL 2230G. Philosophical Thought**3 Credits (3)**

In this course, students will grapple with some of the key questions of philosophy through the study of classical and contemporary thinkers. Students will become familiar with the perennial problems in subfields of philosophy such as metaphysics, epistemology, ethics, and aesthetics. They will learn to approach these problems both critically and sympathetically.

Learning Outcomes

1. Comprehend and differentiate between various philosophical approaches to questions within fields such as metaphysics, epistemology, ethics, and aesthetics.
2. Critically evaluate various philosophical arguments and positions.
3. Identify the differences that characterize the major subfields of philosophy.

PHIL 305. Philosophy and Literature**3 Credits (3)**

Examination of philosophical ideas as presented in selected literary works and literary criticism.

PHIL 306. Philosophy Through Film**3 Credits (3)**

An exploration of a range of philosophical issues through the use of film. Topics include personal identity and memory, faith and the problem of evil, free will and moral responsibility, and the meaning of life. Films may include *The Prestige*, *Memento*, *The Third Man*, *A Clockwork Orange*, *Fight Club*, and *Synecdoche, New York*.

PHIL 312. Formal Logic**3 Credits (3)**

Introduction to symbolic logic and its application in the analysis of arguments in scientific and ordinary discourse.

PHIL 315. Philosophy of Language**3 Credits (3)**

A critical examination of philosophical inquiries into the syntactic, semantic, and pragmatic dimensions of language.

PHIL 316. Philosophy of Mathematics**3 Credits (3)**

Survey of traditional philosophical problems and views concerning the nature of mathematics including such questions as: What is the nature of mathematical knowledge? What is mathematical truth? What is a

number? What is proof? What is the relationship between logic and mathematics?

PHIL 320. Social and Political Philosophy**3 Credits (3)**

This course critically examines such fundamental concepts as liberty, equality and human rights.

PHIL 322. Environmental Ethics**3 Credits (3)**

Explores the ethical and topical issues raised by mining and grazing, air and water pollution, factory farming, global warming, and treatment of animals. It also studies some recent ecological movements such as ecofeminism, social ecology, and deep ecology.

PHIL 328. Applied Ethics**3 Credits (3)**

Examines the implications of utilitarianism, Kantian ethics, natural law theory, and other moral theories for controversial moral issues such as the death penalty, euthanasia, abortion, genetic engineering, gay marriage, affirmative action, and pornography.

PHIL 331. Philosophy of Religion**3 Credits (3)**

The nature, fundamental concepts, and problems of religion. Emphasis on the significance of religion for creative and practical value.

PHIL 332. Ethics and Global Poverty**3 Credits (3)**

Philosophical scrutiny of and moral reflection on various aspects of global poverty and foreign aid. For example: Is poverty fundamentally a lack of income, or can it be understood as a failure to meet basic needs, or as a lack of valuable freedom? Do human rights exist? What, if any, are the moral obligations of rich countries to poor countries? Can foreign aid be immoral? How should the answers to these questions influence public policy? Restricted to: Main campus only.

PHIL 341. Ancient Philosophy**3 Credits (3)**

Introduction to the philosophies of the pre-Socratics, Socrates, Plato, Aristotle, with brief discussion of the Epicureans and Stoics.

PHIL 344. Modern Philosophy**3 Credits (3)**

Foundations of contemporary thought: introduction to the philosophies of Descartes, Bacon, Spinoza, Leibniz, Locke, Berkeley, Hume, Kant, and Hegel.

PHIL 346. Philosophy of Mind**3 Credits (3)**

Examination of some of the most influential accounts of the mind, focusing on such issues as the relation between the mind and the body, mental causation and consciousness.

PHIL 350. Epistemology**3 Credits (3)**

Introduction to epistemology. The philosophical critique of alleged ways of knowing. An examination of the nature of truth.

PHIL 351. Philosophy of Science**3 Credits (3)**

Philosophical examination of the methodology of science. The logical, metaphysical, epistemological, and ethical critique of science and its impact on human affairs.

PHIL 361. Special Topics**3 Credits (3)**

Specific subjects announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

PHIL 363. Independent Studies**1-3 Credits**

For students with some background in philosophy. Independent work in a specific area. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHIL 373. Ethical Theory**3 Credits (3)**

The critical examination of the justification of ethical theories with particular attention to the language of moral discourse.

PHIL 376. Philosophy of Law**3 Credits (3)**

Ethical, logical, and epistemological implications of law, together with an analysis of the rhetoric of legal practice.

PHIL 380. Metaphysics**3 Credits (3)**

Introduction to metaphysics: a treatment of such issues as the meaning of existence, the mind-body problem, the problem of universals, and free will versus determinism.

PHIL 385. Human Nature and the Good Life**3 Credits (3)**

An examination of some of the most historically and philosophically influential conceptions of human nature and corresponding accounts of the good life.

PHIL 397. Existentialism**3 Credits (3)**

The origins of existentialist thought in philosophy and literature, including the thought of Nietzsche, Kierkegaard, Dostoyevsky, Camus, and Sartre. The course covers topics in ethics and political philosophy, metaphysics, philosophical psychology, philosophy of religion, and other sub-disciplines of philosophy.

PHIL 435. Internship in Philosophy and Law**3 Credits (3)**

Supervised hands-on experience for Justice, Political Philosophy, and Law majors to gain professional expertise of the law working with lawyers or judges in law offices, court rooms, and other professional legal settings. Student must be in junior and above standing to enroll. May be repeated up to 6 credits.

Prerequisite: Completion of 12 Philosophy credits; 2.5 GPA.

Learning Outcomes

1. Demonstrate practical knowledge, analytical ability and critical thinking of professional legal work by becoming familiar with such legal tasks as: preparing pleadings; preparing discovery, responding to discovery; controlling and organizing documents, information; preparing trial notebooks; preparing motions; contacting and responding to clients, witnesses, courts.

PHIL 448. Writing Philosophy**3 Credits (3)**

A workshop on writing philosophy papers. Includes how to read and understand philosophical writing, organize a paper effectively, present a clear and forceful argument, and avoid common mistakes.

Prerequisite(s): completed 18 hours of philosophy credit.

PHIL 463. Independent Studies**1-3 Credits**

For students with a strong background in philosophy. Independent work in a specific area. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHIL 532. Advance Studies in Ethics and Global Poverty**3 Credits (3)**

Advanced philosophical scrutiny of and moral reflection on various aspects of global poverty and foreign aid. For example: Is poverty fundamentally a lack of income, or can it be understood as a failure to meet basic needs, or as a lack of valuable freedom? Do human rights exist? What, if any, are the moral obligations of rich countries to poor countries? Can foreign aid be immoral? How should the answers to these questions influence public policy? Restricted to: Main campus only.

PHLS-PUBLIC HEALTH SCIENCES

PHLS 1110G. Personal Health & Wellness**3 Credits (3)**

A holistic and multi-disciplinary approach towards promoting positive lifestyles. Special emphasis is placed on major problems that have greatest significance to personal and community health. Topics to include nutrition, stress management, fitness, aging, sexuality, drug education, and others. May be repeated up to 3 credits.

Learning Outcomes

1. Students will identify, describe and explain human health behaviors and how they are influenced by social structures, institutions, and processes within the contexts of complex and diverse communities. Students should: Develop an understanding of self and the world by examining content and processes used by social and behavioral sciences to discover, describe, explain, and predict human behaviors and social systems.
2. Students will articulate how beliefs, assumptions, and values are influenced by factors such as politics, geography, economics, culture, biology, history, and social institutions. Students should: Enhance knowledge of social and cultural institutions and the values of their society and other societies and cultures in the world.
3. Students will describe ongoing reciprocal interactions among self, society, and the environment. Students should: Understand the interdependent nature of the individual, family/social group, and society in shaping human behavior and determining quality of life.
4. Students will apply the knowledge base of the social and behavioral sciences to identify, describe, explain, and critically evaluate relevant issues, ethical dilemmas, and arguments. Students should: Articulate their role in a global context and develop an awareness and appreciation for diverse value systems in order to understand how to be good citizens who can critically examine and work toward quality of life within a framework of understanding and justice.

PHLS 1110H. Personal Health and Wellness Honors**3 Credits (3)**

A holistic and multi-disciplinary approach towards promoting positive lifestyles. Special emphasis is placed on major problems that have greatest significance to personal and community health. Topics to include nutrition, stress management, fitness, aging, sexuality, drug education, and others. In addition students will complete an experiential learning component or project. May be repeated up to 3 credits.

Learning Outcomes

1. Students will identify, describe and explain human health behaviors and how they are influenced by social structures, institutions, and processes within the contexts of complex and diverse communities. Students should: Develop an understanding of self and the world by examining content and processes used by social and behavioral sciences to discover, describe, explain, and predict human behaviors and social systems.

2. Students will articulate how beliefs, assumptions, and values are influenced by factors such as politics, geography, economics, culture, biology, history, and social institutions. Students should: Enhance knowledge of social and cultural institutions and the values of their society and other societies and cultures in the world.
3. Students will describe ongoing reciprocal interactions among self, society, and the environment. Students should: Understand the interdependent nature of the individual, family/social group, and society in shaping human behavior and determining quality of life.
4. Students will apply the knowledge base of the social and behavioral sciences to identify, describe, explain, and critically evaluate relevant issues, ethical dilemmas, and arguments. Students should: Articulate their role in a global context and develop an awareness and appreciation for diverse value systems in order to understand how to be good citizens who can critically examine and work toward quality of life within a framework of understanding and justice.

PHLS 2110. Foundations of Health Education**3 Credits (3)**

Role and responsibility of the health educator with emphasis on small group dynamics, oral and written communication skills, building community coalitions and introduction to grant writing. Taught with PHLS 3210. Cannot receive credit for both PHLS 2110 and PHLS 3210. May be repeated up to 3 credits.

Prerequisite: PHLS 1110G or consent of instructor.

Learning Outcomes

1. Define health, three levels of prevention, health education and health promotion, and describe the major determinants of health.
2. Describe the 7 major areas of responsibility, major competencies and sub-competencies of a professional health educator and the CHES's possible roles in various community health settings.
3. Describe and examine the historical context and development of the profession of health education.
4. Identify and critique major processes and practices of health education programming.
5. Describe the steps involved in conducting needs assessments, program and intervention planning, implementation, and program evaluation.
6. Identify, examine and describe elected health behavior change theories and models and explore possible applications in health education practice.
7. Describe and discuss the process of community mobilization and building of a community coalition.
8. Identify health issues and describe effective methods/strategies in health education advocacy.
9. Describe and discuss the future trends and issues in the professional preparation and practice of professional health educators. 1
10. Demonstrate effective and appropriate oral and written communication skills for health education professionals.

PHLS 2120. Essentials of Public Health**3 Credits (3)**

The course will focus on principles and major areas of public health, including ecological and total personal concept of health care system, epidemiological approaches to disease prevention and control. Consent of Instructor required. May be repeated up to 3 credits.

Learning Outcomes

1. Understand the sources of public health data, and how to interpret that information.
2. Access existing health related data.

3. Analyze health related data.
4. Identify populations for health education programs.
5. Incorporate data analysis and principles of community organization.
6. Interpret results from evaluation and research.
7. Infer implications from findings for future health-related activities.
8. Have a basic understanding of health topics faced by various populations.

PHLS 3110V. Human Sexuality

3 Credits (3)

Examination of human sexuality from a variety of perspectives: cultural, sociological, physiological and psychological. Issues examined from viewpoints such as gender, individual, family, and professional roles. May be repeated up to 3 credits.

PHLS 3120V. Women's Health Issues

3 Credits (3)

A focus on the unique issues and problems that confront women today and how they affect the health of women. Crosslisted with: GNDR 381V. May be repeated up to 3 credits.

PHLS 3130V. Global Environmental Health Issues

3 Credits (3)

Introduction to global environmental health challenges in the 21st century with an emphasis on environmental problems as they affect public health and personal well-being. May be repeated up to 3 credits.

PHLS 3210. Foundations of Community Health Education

3 Credits (3)

Role and responsibility of the health educator, with emphasis on small-group dynamics, oral and written communication skills, building community coalitions, and an introduction to grant writing. Equivalent to PHLS 2110 for prerequisite purposed. May be repeated up to 3 credits.

PHLS 3220. Foundations of Public Health

3 Credits (3)

The course will focus on principles and major areas of public health, including ecological concepts of healthcare systems and epidemiological approaches to disease promotion and control. Equivalent to PHLS 2120 for prerequisites. May be repeated up to 3 credits.

PHLS 4130. Environmental Health

3 Credits (3)

Introduction to environmental health designed to address public health issues. May be repeated up to 3 credits. Restricted to: PH,PHL majors.

Prerequisite: PHLS 3220 or PHLS 2120.

PHLS 4210. Methods of Community Health Education

3 Credits (3)

Responsibilities of health educators, analysis of social forces affecting health needs, application of wide range of health education methods and instructional media, and program implementation skills. Restricted to: Public Health majors. May be repeated up to 3 credits.

Prerequisite: PHLS 3220 or PHLS 2120.

PHLS 4310. Biometrics and Health Research

3 Credits (3)

Critical analysis of community health research and related methodologies. Restricted to: Public Health majors. May be repeated up to 3 credits.

Prerequisite: (MATH 1350G) or MATH 2350G or A ST 311.

PHLS 4320. Epidemiology

3 Credits (3)

Epidemiologic approaches to disease prevention and control. Factors influencing health status. Restricted to: PHL majors. May be repeated up to 3 credits.

Prerequisite: PHLS 3220 or PHLS 2120.

PHLS 4410. Administration of Health Programs

3 Credits (3)

Covers administrative responsibilities, organizational theory, strategic planning, and systems theory as applied to the administration of a variety of health programs. Restricted to: PHL majors. May be repeated up to 3 credits.

Prerequisite: PHLS 3220, PHLS 2120, or consent of instructor.

PHLS 4420. Health Program Planning

3 Credits (3)

Planning and development of community health education interventions for behavior change at the individual, family, social network levels of practice. Emphasis on applying program-planning models and designs into a grant-writing project. Restricted to: Public Health majors. May be repeated up to 3 credits.

Prerequisite: PHLS 3210 or PHLS 2120 and PHLS 4430.

PHLS 4430. Theoretically-Based Interventions

3 Credits (3)

Identifying and developing interventions to problematic health-related behaviors. Restricted to: Public Health majors. May be repeated up to 3 credits.

Prerequisite: PHLS 3220 or PHLS 2120.

PHLS 4440. Health Program Evaluation and Research

3 Credits (3)

Covers the application of research and evaluation models for decision-making program and policy development of community health education interventions. Focus on the individual, family, and social network levels of practice. May be repeated up to 3 credits.

Prerequisite: PHLS 4420.

PHLS 4510. Public Health Seminar in Community Health Education

1 Credit (1)

Critical analysis of issues in CHE and health care. Readings focus on social, economic, cultural, and political issues as they affect the profession and practice. Emphasis on future, local, national, and international health trends. Restricted to: Public Health majors. May be repeated up to 1 credit.

Prerequisite: PHLS 4320, PHLS 4420, and PHLS 4430 or consent of instructor.

PHLS 4515. Problems in Health Education

3 Credits (3)

Provides opportunity for synthesis of program planning, implementation, and evaluation methodologies in the preparation and delivery of health education topics. Some field trips will be required. Restricted to: PHL majors. May be repeated up to 3 credits.

Prerequisite: Either PHLS 3220, PHLS 2120, PHLS 4440, PHLS 4430, or consent of instructor.

PHLS 4610. Health Disparities: Determinants and Interventions

3 Credits (3)

Investigates: descriptions of health disparities and measurement issues; physical environmental factors, behavioral and emotional variables; impact of aging of the populations, increased racial and ethnic diversity, and technological developments; intervention strategies and evaluation results. May be repeated up to 3 credits.

PHLS 4620V. Cross-Cultural Aspects of Health

3 Credits (3)

An examination of health practices from a variety of cultural perspectives: communication, observation, research, and assimilation. Issues to be addressed will be examined from a number of viewpoints, such as individual, family, community, and professional roles. May be repeated up to 3 credits.

PHLS 4630. International Health Problems
3 Credits (3)

Comparison of domestic health programs and problems with those in other parts of the world; emphasis on political parameters and delivery processes. Additional attention is focused on the health issues of the U.S.-Mexico border. Taught with PHLS 5630. May be repeated up to 3 credits.

Learning Outcomes

1. Identify many of the current authoritative sources of information about global health, as a potential aid for future educational, training, and research endeavors.
2. Cite examples of specific issues and case studies in global health.
3. Identify key features of global health.
4. Explain the complexities of global health issues.
5. Explain intervention strategies being used to attack problems in global health.

PHLS 4640. Rural Health Issues
3 Credits (3)

Comprehensive overview of rural health services with Southwestern United States and New Mexico focus. Taught with PHLS 5640. May be repeated up to 3 credits.

PHLS 4650. Coping with Loss and Grief: A Cross-Cultural Perspective
3 Credits (3)

A cross-cultural perspective to death, loss and grief. Hospice philosophy of caring for the dying will be included. Taught with PHLS 5650. May be repeated up to 3 credits.

PHLS 4660. U.S.-Mexico Border Health Issues
3 Credits (3)

Interdisciplinary analysis of the impact of living conditions and health issues of communities along the U.S.-Mexico border and of the strategies and initiatives to address these issues. Problem-based learning, case analysis, lecture, guest speakers, computer based instruction, and field trips. Taught with PHLS 5660 May be repeated up to 3 credits.

PHLS 4670. American Indian Health
3 Credits (3)

Critical health issues facing American Indians in the contemporary world. May be repeated up to 3 credits.

PHLS 4680. Hispanic Health Issues
3 Credits (3)

The course will familiarize public health students with social determinants of health contributing to Hispanic health disparities and the impact that health and immigration policies have on Hispanics' access to insurance and healthcare utilization, with a spotlight on different Hispanic subgroups. Recommendations for policy and research are also discussed.

Learning Outcomes

1. Explain the historical, ancestral, and national origins contributing to the diversity of the U.S. Hispanic population.
2. Assess obstacles researchers have encountered in explaining the Hispanic Epidemiological Paradox and the ethics surrounding them.
3. Compare and contrast health care coverage and access to health care in Hispanics relative to other racial/ethnic groups.

4. Describe factors contributing to health disparities in chronic and infectious diseases among Hispanics.
5. Explain how U.S. health policies negatively impact Hispanics.

PHLS 4710. Introduction to Gerontology
3 Credits (3)

Social, psychological, and physiological aspects of aging, with an interdisciplinary emphasis on health promotion. Demographic characteristics of the aging population. Taught with PHLS 5710. May be repeated up to 3 credits.

PHLS 4720. Health Promotion for the Older Adult
3 Credits (3)

Common health concerns and lifestyle issues relevant to older adults. Facts about the content area, health behaviors, and practices to promote health and prevent disease; program development strategies applicable to a variety of settings. Taught with PHLS 5720. May be repeated up to 3 credits.

PHLS 4730. Adulthood and Aging
3 Credits (3)

Normal transitions in later life; those occurring from 40 years of age to the end of life are discussed. Changes in interpersonal relationships and adaptations commonly made by individuals and meeting those alterations are presented through research findings, case studies, and autobiographies. Taught with PHLS 5730. May be repeated up to 3 credits.

PHLS 4740. Aging and Public Policy
3 Credits (3)

Exploration of public policies relating to elders, historical development, current status and trends in public policy for this age group. Impact of political behavior of elders on policy making and implementing processes. May be repeated up to 3 credits.

PHLS 4810. Infectious and Noninfectious Disease Prevention
3 Credits (3)

History, etiology, and prevention of diseases affecting humans. Taught with PHLS 5810.

Prerequisite: PHLS 3220, PHLS 2120, PHLS 4320, or consent of instructor.

Learning Outcomes

1. Describe historical context of disease and health.
2. Identify the role of public health, past and present, in the control of communicable and chronic disease.
3. Identify and evaluate the characteristics of major chronic and communicable diseases.
4. Define, classify, and describe the etiology, incidence, and prevalence of major diseases.
5. Describe risk factors related to gender, race, ethnicity, and lifestyle for major diseases.
6. Identify the major diagnostic and treatment protocols for common diseases of humans.
7. Assess psychosocial influences upon diseases including diet, physical activity, rest, and related lifestyle variables.
8. Determine the impact of major diseases on the quality of life for the patient family.

PHLS 4820. Health Informatics
3 Credits (3)

The application of technology to engage communities and individuals in behavioral and environmental change processes. The course will focus on the use of technology to describe the magnitude of health problems

and their sources; analyze risk factors; identify community strengths from which strategies may be defined and tools created to intervene, prevent problems, and promote health and well-being; and continuously evaluate, refine, and implement what works. Taught with PHLS 5820. Restricted to: Restricted to Public Health majors. May be repeated up to 3 credits.

Prerequisite: PHLS 3220 or PHLS 2120 or consent of instructor.

PHLS 4996. Special Topics

3 Credits (3)

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 12 credits.

Learning Outcomes

1. Varies

PHLS 4997. Independent Study

1-6 Credits (1-6)

Individual studies with prior approval of department head. May be repeated up to 12 credits.

Learning Outcomes

1. Varies

PHLS 4998. Community Health Education Field Experience

1-6 Credits (1-6)

Senior-standing community health education majors will integrate and apply various concepts related to actual community health education practice. Experience aims to prepare students to integrate the competencies and responsibilities of community health education. Approximately 55 hours at field agency required per credit hour.

Restricted to: Public Health majors. May be repeated up to 6 credits.

Prerequisite: PHLS 4210 or concurrent enrollment.

Learning Outcomes

1. Varies

PHLS 5110. Community and Psychosocial Aspects of Public Health

3 Credits (3)

Social, behavioral, and educational aspects of disease prevention and health promotion programs. Restricted to MPH majors. May be repeated up to 3 credits.

PHLS 5120. Biostatistical Applications in Public Health

3 Credits (3)

Quantitative methods for public health students including tabular, graphical, and numerical descriptive methods, random sampling, principles of statistical inference, confidence intervals, statistical tests of hypothesis through analysis of variance and regression. Restricted to MPH majors. May be repeated up to 3 credits.

PHLS 5130. Epidemiological Approaches to Disease Control and Prevention

3 Credits (3)

Basic epidemiological principles applicable to infectious and noninfectious disease. Descriptive techniques and analytic designs, and application of statistical and epidemiological investigation methods included. Restricted to MPH majors. May be repeated up to 3 credits.

PHLS 5140. Health Services System: Administration and Organization

3 Credits (3)

This course focuses on using a systems approach to identify and analyze factors and interrelationships that influence the operation of health services organizations. Specific attention is to administrative structures and operations, finance and quality among public health departments, hospitals, multi-institutional systems, integrated health systems and strategic alliances. May be repeated up to 3 credits.

Learning Outcomes

1. Identify the main components of the organization for health care delivery and health care system in the U.S.
2. Compare health care systems in the U.S. and other developed countries.
3. Discuss resources and the principles of resources management in health care delivery.
4. Apply essential management functions (planning, organizing, staffing, leading, and controlling) to health services organizations.
5. Apply leadership and motivation concepts to the management of health services organizations.
6. Apply the principles and models of decision-making, communication, and managing change to address organizational challenges.
7. Demonstrate the knowledge and skills inherent in interprofessional work
8. Discuss how systems thinking works for healthcare delivery systems.

PHLS 5150. Environmental Public Health Issues

3 Credits (3)

Environmental health issues from a public health perspective. Restricted to MPH majors. May be repeated up to 3 credits.

PHLS 5160. Public Health Policy Analysis

3 Credits (3)

This graduate-level course presents the key aspects of the policymaking process in the United States. The course introduces students to the steps necessary to formulate, implement, and modify healthcare policies. Economic, cultural, institutional, and social factors influencing policymaking will be explored. The evolution of federal health policy, including major healthcare reform efforts, will be presented. Students will be provided with the necessary tools to comprehend and explain policymaking. The class will primarily focus on federal-level health policymaking, but several examples of state-level policies will be discussed. May be repeated up to 3 credits.

Learning Outcomes

1. Define and describe key health policy concepts: health, health determinants, public policy, and health policy.
2. Appreciate the significance of the Patient Protection and Affordable Care Act (ACA) and other major healthcare reform efforts and laws.
3. Describe the Longest Conceptual Model of the Public Policymaking Process and its key components of policy formulation, implementation, and modification.
4. Articulate the roles played by legislators, interest groups, researchers, and citizens in shaping and influencing health policy.
5. Summarize the roles of the three levels of government in making health policy.
6. Identify major health policy issues currently facing U.S. healthcare.

PHLS 5210. Foundations & Techniques of Public Health Education

3 Credits (3)

Social, behavioral, and educational aspects of disease prevention and health promotion. Includes history and theoretical basis of health education. May be repeated up to 3 credits.

Learning Outcomes

1. Explain, demonstrate, and apply health communication, education, and promotion knowledge and skill competencies
2. Discuss the means by which structural biases, social inequities, and other social determinants of health undermine health and create challenges to achieving health equity at interpersonal, organizational, community, societal, cultural, and legal and policy levels

3. Explain and demonstrate ways in which health communication, education, and promotion techniques can be utilized to increase health equity and reduce health disparities
4. Utilize health behavior change theories to develop health communication, education and promotion materials, processes, and goals
5. Identify best practices and evidence-based strategies and programs for use in health communication, education, and promotion

PHLS 5220. Techniques of Health Communication/Education
3 Credits (3)

Application of a wide range of communication and education theories/methods, including program planning and evaluation, in public health programming. Restricted to: MPH majors. May be repeated up to 3 credits.

Prerequisite: PHLS 5110.

PHLS 5230. Community Organization in Public Health
3 Credits (3)

Strategies for identifying and involving community leaders, community needs assessment, small area analysis and planning, and community-level development strategies. Restricted to: MPH majors. May be repeated up to 3 credits.

Prerequisite: PHLS 5110.

PHLS 5240. Health Program Planning
3 Credits (3)

Covers process of successful public health education program planning and grant writing. Restricted to: MPH majors. May be repeated up to 3 credits.

Prerequisite: PHLS 5110.

PHLS 5250. Evaluative Approaches in Public Health
3 Credits (3)

Survey and analyses of health testing and evaluation procedures, uses and limitations of knowledge and attitude tests, behavioral inventories, check lists, questionnaires, interviews, and other techniques. Restricted to: MPH majors. May be repeated up to 3 credits.

Prerequisite: PHLS 5120.

PHLS 5260. Research and Resources in Community Health
3 Credits (3)

Exploration of available public health research studies, data, results and implications. Restricted to MPH majors. May be repeated up to 3 credits.

Prerequisite: PHLS 5120.

PHLS 5310. Principles of Health Program Management
3 Credits (3)

This course prepares the student to assume a supervisory role in the management of health and human services programs. The course will cover essential management functions such as leadership, organizational assessment, planning, decision-making, organizational structure, budgeting, marketing, and human resource management. May be repeated up to 3 credits.

PHLS 5320. Health Services Organization and Delivery
3 Credits (3)

This course includes the framework of the United States healthcare system; organization and administration of health services; alternate ways of organizing and financing health systems; the roles of the government and free market on health care services; and the barriers to health services delivery. May be repeated up to 3 credits.

PHLS 5330. Public Health Finance and Budget Management
3 Credits (3)

Introduces health care accounting and finance to non-financial students. Students are exposed to the financial structure of health care organizations and the environment within which they operate. Instruction also introduces the use of accounting and financial information in investor-owned and not-for-profit organizations in the health care industry. Topics include understanding the creation and interpretation of financial statements, financial accounting and reporting requirements, financial analysis, budgeting, and resource allocation. May be repeated up to 3 credits.

PHLS 5340. Public Health Law and Ethics
3 Credits (3)

This course examines major legal and ethical concepts and their impact on public health policy and practice. The course examines governmental authority, at various jurisdictional levels, to improve public health. This course will focus on public health law in the United States. Restricted to: MPH majors. May be repeated up to 3 credits.

Learning Outcomes

1. Varies

PHLS 5610. Health Disparities: Determinants and Interventions
3 Credits (3)

Investigates: descriptions of health disparities and measurement issues; physical environmental factors, behavioral and emotional variables; impact of aging of the populations, increased racial and ethnic diversity, and technological developments; intervention strategies and evaluation results. Taught with: PHLS 4610. May be repeated up to 3 credits.

PHLS 5620. Cross-Cultural Aspects of Health
3 Credits (3)

An examination of health practices from a variety of cultural perspectives; communication, observation, research, and assimilation. Issues to be addressed will be examined from a number of viewpoints, such as individual, family, community, and professional roles. May be repeated up to 3 credits.

PHLS 5630. International Health Problems
3 Credits (3)

Comparison of domestic health programs and problems with those in other parts of the world; emphasis on political parameters and delivery processes. Additional attention is focused on the health issues of the U.S.-Mexico border. Taught with: PHLS 4630. May be repeated up to 3 credits.

Learning Outcomes

1. Identify many of the current authoritative sources of information about global health, as a potential aid for future educational, training, and research endeavors.
2. Cite examples of specific issues and case studies in global health.
3. Identify key features of global health.
4. Explain the complexities of global health issues.
5. Explain intervention strategies being used to attack problems in global health.

PHLS 5635. International Health Practicum
1-3 Credits (1-3)

Intensive examination of health practices and beliefs from a cultural perspective. Focus on health structure, index of diseases, morbidity, mortality and epidemiological approaches to planning. Required travel (personal travel, lodging, and related expenses are extra). May be repeated up to 3 credits.

PHLS 5640. Rural Health Issues
3 Credits (3)

Comprehensive overview of rural health services with southwestern United States and New Mexico focus. Taught with: PHLS 4640. May be repeated up to 3 credits.

Learning Outcomes

1. Varies

PHLS 5650. Coping with Loss and Grief: A Cross-Cultural Perspective 3 Credits (3)

A cross-cultural perspective to death, loss and grief. Hospice philosophy of caring for the dying will be included. Taught with: PHLS 4650.

PHLS 5660. U.S.-Mexico Border Health Issues 3 Credits (3)

Interdisciplinary analysis of the impact of living conditions and health issues of communities along the U.S.-Mexico border and of the strategies and initiatives to address these issues. Problem-based learning, case analysis, lecture, guest speakers, computer based instruction, and field trips. Taught with: PHLS 4660. May be repeated up to 3 credits.

PHLS 5670. American Indian Health 3 Credits (3)

Critical health issues facing American Indians in the contemporary world. May be repeated up to 3 credits.

PHLS 5710. Introduction to Gerontology 3 Credits (3)

Social, psychological, and physiological aspects of aging with an interdisciplinary emphasis on health promotion. Demographic characteristics of the aging population. May be repeated up to 3 credits.

PHLS 5720. Health Promotion for the Older Adult 3 Credits (3)

Common health concerns and lifestyle issues relevant to older adults. Facts about the content area, health behaviors, and practices to promote health and prevent disease; program development strategies applicable to a variety of settings. May be repeated up to 3 credits.

PHLS 5730. Adulthood and Aging 3 Credits (3)

Normal transitions in later life; those occurring from 40 years of age to the end of life are discussed. Changes in interpersonal relationships and adaptations commonly made by individuals and meeting those alterations are presented through research findings, case studies, and autobiographies. May be repeated up to 3 credits.

PHLS 5810. Infectious and Noninfectious Disease Prevention 3 Credits (3)

History, etiology, and prevention of diseases affecting humans. Taught with PHLS 4810.

Prerequisite: PHLS 3220, PHLS 2120, PHLS 4320, or Consent of Instructor.

Learning Outcomes

1. Describe historical context of disease and health.
2. Identify the role of public health, past and present, in the control of communicable and chronic disease.
3. Identify and evaluate the characteristics of major chronic and communicable diseases.
4. Define, classify, and describe the etiology, incidence, and prevalence of major diseases.
5. Describe risk factors related to gender, race, ethnicity, and lifestyle for major diseases.
6. Identify the major diagnostic and treatment protocols for common diseases of humans.
7. Assess psychosocial influences upon diseases including diet, physical activity, rest, and related lifestyle variables.

8. Determine the impact of major diseases on the quality of life for the patient family.

PHLS 5820. Health Informatics 3 Credits (3)

The application of technology to engage communities and individuals in behavioral and environmental change processes. The course will focus on the use of technology to describe the magnitude of health problems and their sources; analyze risk factors; identify community strengths from which strategies may be defined and tools created to intervene, prevent problems, and promote health and well-being; and continuously evaluate, refine, and implement what works. May be repeated up to 3 credits.

PHLS 5830. Public Health Preparedness and Response 3 Credits (3)

This course is designed to teach students about the role of public health in emergency preparedness and response. It focuses on the nature of public emergencies as well as the role various sectors have in responding to them. One purpose of this online course is to introduce students to the basics of disaster preparedness and responding to disasters, and to build a base for further development in responder training. The course provides training and resources for a basic understanding of the Incident Command System (ICS) and National Incident Management System (NIMS). May be repeated up to 3 credits.

PHLS 5996. Special Topics 3 Credits (3)

Specific subjects to be announced in the Schedule of Classes. Restricted to: MPH majors. May be repeated up to 12 credits.

Learning Outcomes

1. Varies

PHLS 5997. Independent Study 1-6 Credits (1-6)

Individual studies with prior approval of department head. Consent of Instructor required. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHLS 5998. Field Experience 1-4 Credits (1-4)

Student will work in a public health setting under the supervision of an experienced public health professional and will use acquired knowledge and skills to conduct a project which addresses a specific public health problem or program need. Projects are agreed upon by the student and faculty. Consent of department head required. Restricted to MPH majors. May be repeated up to 4 credits.

Learning Outcomes

1. Varies

PHLS 5999. Master's Thesis 1-6 Credits (1-6)

Minimum of 4 credits required but may be repeated for a maximum of 6 credits. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHYS-PHYSICS

PHYS 1111. Introductory Computational Physics 3 Credits (2+2P)

Introduction to computational techniques for the solution of physics-related problems.

Prerequisite(s): a C- or better in MATH 1220G or MATH 1250G or MATH 1511G.

PHYS 1112. Introductory Physics for the Health Sciences
3 Credits (3)

Algebra-level introduction to topics required for the Health Sciences including basic mechanics (including sound, mechanical waves and fluids), heat and thermodynamics, electricity and magnetism, optics and electromagnetic waves, atomic and nuclear physics and applications to medical imaging. Restricted to Community Colleges campuses only.

Prerequisite(s): MATH 1215 or Equivalent.

Learning Outcomes

1. The objective of the course is to familiarize the student with the concepts and methods used in the underlying physics associated with various Health Science disciplines.
2. The course will demonstrate how the basic principles of mechanics, thermodynamics, electricity, magnetism, electromagnetic waves and optics can be applied to solve particular problems in Health Sciences applications. Introduces the student to selected topics in modern physics including quantum physics, atomic and nuclear physics.

PHYS 1115G. Survey of Physics with Lab

4 Credits (3+3P)

Overview of the concepts and basic phenomena of physics. This course provides a largely descriptive and qualitative treatment with a minimum use of elementary mathematics to solve problems. No previous knowledge of physics is assumed. Includes laboratory.

Learning Outcomes

1. Apply concepts of classical mechanics (such as velocity, acceleration, force, inertia, momentum, torque, work, energy) to simple static and dynamic systems.
2. Apply concepts of thermodynamics (such as heat, temperature, internal energy, entropy) to simple processes.
3. Apply concepts of electricity and magnetism (such as fields, potential, charge conservation, static and dynamic induction) to simple circuits, motors, and other simple contrivances.
4. Apply simple geometric and wave optics in simple situations.
5. Test ideas using modern laboratory equipment.
6. Estimate experimental uncertainties.
7. Use computers to analyze and report laboratory results.
8. Draw appropriate conclusions from quantitative scientific observations.
9. Accurately and clearly communicate the results of scientific experiments.

PHYS 1125G. Physics of Music

4 Credits (3+2P)

Introduction for non-science majors to basic concepts, laws, and skills in physics, in the context of a study of sound, acoustics, and music.

Learning Outcomes

1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply basic classical mechanics to static and dynamic fluids, including Archimedes' principle and Bernoulli's principle.
3. Apply the general properties of waves to simple models of musical instruments.
4. Demonstrate knowledge of basic operating principles of wind, string, and percussion instruments.

5. Demonstrate knowledge of how objectively measurable properties of sound waves correspond to the perceptions of pitch, loudness, and timbre.
6. Demonstrate understanding of the description of vibrations and waves in terms of Fourier's Theorem and normal modes.
7. Demonstrate understanding of vocalization in terms of physical principles such as resonance and fluid dynamics.
8. Demonstrate understanding of how the ear works.

PHYS 1230G. Algebra-Based Physics I

3 Credits (3)

An algebra-based treatment of Newtonian mechanics. Topics include kinematics and dynamics in one and two dimensions, conservation of energy and momentum, rotational motion, equilibrium, and fluids.

Learning Outcomes

1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of particles in one and two dimensions.
3. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of a rigid body in two dimensions.
4. Apply Newton's theory of gravitation to circular orbits and demonstrate understanding of how Kepler's laws of planetary motion provide the empirical foundation for Newton's theory.
5. Apply the mathematics of vectors to the principles of Newtonian mechanics.
6. Apply principles of Newtonian mechanics to the case of static and dynamic incompressible fluids, including Archimedes' and Bernoulli's principles.

PHYS 1230L. Algebra-Based Physics I Lab

1 Credit (1)

A series of laboratory experiments associated with the material presented in PHYS 1230G.

Prerequisite(s)/Corequisite(s): PHYS 1230G.

Learning Outcomes

1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
3. Estimate experimental uncertainties using statistical methods.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.

PHYS 1240G. Algebra-Based Physics II

3 Credits (3)

The second half of a two semester algebra-based introduction to Physics. This course covers electricity, magnetism and optics.

Prerequisite(s): a C- or better in PHYS 1230G or PHYS 2230G.

Learning Outcomes

1. Be able to state Coulomb's Law and Gauss's laws and apply them.
2. Apply the concepts of electric charge, electric field and electric potential to solve problems.
3. Analyze simple DC and AC circuits.
4. Apply the Lorentz force to solve problems.
5. Apply Faraday's law of induction (and Lenz's law) to solve problems.

- Apply ray optics to practical lens systems such as microscopes and corrective lenses.
- Apply the wave nature of light to the phenomena of reflection, refraction, and diffraction.

PHYS 1240L. Algebra-Based Physics II Lab

1 Credit (1)

A series of laboratory experiments associated with the material presented in PHYS 1240

Prerequisite(s)/Corequisite(s): PHYS 1240G.

Learning Outcomes

- Explain the scientific method.
- Test ideas using modern laboratory equipment.
- Estimate experimental uncertainties using statistical methods.
- Use computers to analyze and report laboratory results.
- Draw appropriate conclusions from quantitative scientific observations.
- Accurately and clearly communicate the results of scientific experiments.

PHYS 1310G. Calculus -Based Physics I

3 Credits (3)

A calculus level treatment of classical mechanics and waves, which is concerned with the physical motion concepts, forces, energy concepts, momentum, rotational motion, angular momentum, gravity, and static equilibrium.

Prerequisite: a C- or better in ENGR 190 or MATH 1511G or higher.

Learning Outcomes

- Describe the relationships among position, velocity, and acceleration as functions of time.
- Use the equations of kinematics to describe motion under constant acceleration.
- Analyze linear motion using Newton's laws, force, and linear momentum.
- Analyze rotational motion using torque and angular momentum.
- Analyze motion using work and energy.

PHYS 1310L. Calculus -Based Physics I Lab

1 Credit (3P)

A series of laboratory experiments associated with the material presented in Calculus-based Physics I. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-based Physics I.

Prerequisite(s)/Corequisite(s): PHYS 1310G.

Learning Outcomes

- Develop a reasonable hypothesis.
- Work effectively as part of a team.
- Take measurements and record measured quantities to the appropriate precision.
- Estimate error sources in experimental techniques.
- Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
- Determine whether results and conclusions are reasonable.
- Present experimental results in written form in appropriate style and depth.
- Experience the relationship between theory and experiment.

PHYS 1311. Problems in Calculus-Based Physics I

0.5-1 Credits (.5-1)

This is a supplemental course for Calculus-based Physics I. May be repeated up to 1 credits.

Corequisite(s): PHYS 1310G.

PHYS 1320G. Calculus -Based Physics II

3 Credits (3)

A calculus level treatment of classical electricity and magnetism. It is strongly recommended that this course is taken at the same time as Calculus-based Physics II laboratory.

Prerequisite: a C- or better in (PHYS 2110 or PHYS 1310G) and (ENGR 190 or MATH 1521G or higher).

Learning Outcomes

- Apply the concepts of electric charge, electric field and electric potential to solve problems.
- Sketch the electric field in the vicinity of point, line, sheet, and spherical distributions of static electric charge.
- Sketch the magnetic field in the vicinity of line, ring, sheet, and solenoid distributions of steady current.
- Describe the relationship between electric field and electric potential.
- Calculate the Lorentz force on a moving charge for simple geometries of the fields and use it to analyze the motion of charged particles.
- Apply the integral forms of Maxwell's equations.
- Calculate the energy of electromagnetic fields.
- Analyze DC circuits.

PHYS 1320L. Calculus -Based Physics II Lab

1 Credit (3P)

A series of Laboratory experiments associated with the material presented in Calculus-Based Physics II. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-Based Physics II.

Prerequisite(s)/Corequisite(s): PHYS 1320G. Prerequisite(s): A C- or better in PHYS 2110L or PHYS 1310L.

Learning Outcomes

- Develop a reasonable hypothesis.
- Work effectively as part of a team.
- Take measurements and record measured quantities to the appropriate precision.
- Estimate error sources in experimental techniques.
- Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
- Determine whether results and conclusions are reasonable.
- Present experimental results in written form in appropriate style and depth.
- Experience the relationship between theory and experiment

PHYS 1321. Problems in Calculus-Based Physics II

0.5-1 Credits (.5-1)

This is a supplemental course for Calculus-based Physics II.

Corequisite(s): PHYS 1320G.

PHYS 2110. Mechanics

3 Credits (3)

Newtonian mechanics.

Prerequisite(s)/Corequisite(s): MATH 1511G or higher.

PHYS 2110L. Experimental Mechanics

1 Credit (3P)

Laboratory experiments associated with the material presented in PHYS 2110. Science majors.

Prerequisite(s)/Corequisite(s): PHYS 2110.

PHYS 2111. Supplemental Instruction to PHYS 2110**1 Credit (1)**

This Optional workshop as a supplement to PHYS 2110. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credit.

Corequisite: PHYS 2110.

Learning Outcomes

1. Analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. Use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. In the contexts of concepts and physical laws discussed in PHYS 2110, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. Self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. Develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2120. Heat, Light, and Sound**3 Credits (3)**

Calculus-level treatment of thermodynamics, geometrical and physical optics, and sound. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.

PHYS 2120L. Heat, Light, and Sound Laboratory**1 Credit (3P)**

Laboratory experiments associated with the material presented in PHYS 2120. Science majors.

Prerequisite: a C- or better in PHYS 2110L or PHYS 1310L.

Prerequisite/Corequisite: PHYS 2120.

Learning Outcomes

1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Understand the relationship between theory and experiment.

PHYS 2121. Supplemental Instruction to PHYS 2120**1 Credit (1)**

This optional workshop supplements PHYS 2120 "Heat, Light, and Sound". Students actively apply concepts and methods introduced in PHYS 2120 to problem solving and quantitative analysis. May be repeated up to 1 credit.

Corequisite: PHYS 2120.

Learning Outcomes

1. Analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.

2. Use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. In the contexts of concepts and physical laws discussed in PHYS 2121, apply quantitative analysis to solve problems involving wave propagation and interference, geometric optics, heat transfer and thermodynamics.
4. Self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. Develop learning strategies and use metacognition to promote thinking in the discipline

PHYS 2140. Electricity and Magnetism**3 Credits (3)**

Charges and matter, the electric field, Gauss law, the electric potential, the magnetic field, Ampere's law, Faraday's law, electric circuits, alternating currents, Maxwell's equations, and electromagnetic waves. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 1521G. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.

PHYS 2140L. Electricity & Magnetism Laboratory**1 Credit (3P)**

Laboratory experiments associated with the material presented in PHYS 2140.

Prerequisite: a C- or better in PHYS 2110 or PHYS 1310G.

Prerequisite/Corequisite: PHYS 2140.

Learning Outcomes

1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Understand the relationship between theory and experiment.

PHYS 2141. Supplemental Instruction to PHYS 2140**1 Credit (1)**

Optional workshop as a supplement to PHYS 2140. The tutorial sessions focus on reasoning and hands-on problem solving.

Corequisite: PHYS 2140.

Learning Outcomes

1. Analyze real-world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomenon or function.
2. Use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. In the contexts of concepts and physical laws discussed in PHYS 2140, apply quantitative analysis to solve problems, including the use of symmetry to study electric and magnetic fields. Practice concepts of calculus applied to charge and current distributions.
4. Self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.

5. Develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2230G. General Physics for Life Science I

3 Credits (3)

This algebra-based introduction to general physics covers mechanics, waves, sound, and heat. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT.

Prerequisite: A C- or better in MATH 1220G or higher.

Learning Outcomes

1. Modeling: analyze real-world phenomena by deciding what information is relevant and constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain phenomena or function; use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text; critique assumptions and determine how to test the validity of a model and use the comparison of experimental data and prediction to refine the model.
2. Conceptual understanding: describe the motion of any object in terms of displacement, velocity, and acceleration; analyze external forces acting on an object and determine if a system is in equilibrium or relate the net force to changes in motion; predict or analyze motion using conservation laws for energy and momentum; analyze forces and torques for a rigid object in static equilibrium; for a static fluid determine pressure and the buoyant force; apply idealized models of fluid flow to the circulatory system; describe the properties of pressure waves known as sound, apply the model of standing waves to musical instruments and discuss how sound is used to sense the environment; predict qualitative changes in the internal energy of a thermodynamic system when energy has been transferred due to work or heat and justify those predictions using conservation of energy (First law of thermodynamics). Identify which heat transfer processes occur in a described situation.
3. Quantitative reasoning: use a physics problem-solving strategy (Identify relevant concepts; Introduce and study simplified models; Use symmetry arguments; Establish the relation between known and unknown quantities; Calculate a quantitative result using appropriate mathematical methods; Self-check reasonableness of assumptions and solutions); use scientific notation accurately and convert units if necessary.
4. Communicating scientific information: interpret or generate graphs or other visual representations and be able to switch between various representations including text, mathematical description, or diagrams.

PHYS 2230L. Laboratory to General Physics for Life Science I

1 Credit (1)

Laboratory experiments in topics associated with material presented in PHYS 2230G.

Prerequisite(s)/Corequisite(s): PHYS 2230G. Restricted to Las Cruces campus only.

PHYS 2231. Supplemental Instruction to General Physics for Life Sciences I

1 Credit (1)

This optional workshop supplements Physics for Life Sciences I. The tutorial sessions focus on reasoning and hands-on problem solving.

Corequisite: PHYS 2230G.

Learning Outcomes

1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2230, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2240G. General Physics for Life Science II

3 Credits (3)

This algebra-based course covers electricity, magnetism, light, atomic physics, and radioactivity. Special emphasis is given to applications in the life sciences This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT.

Prerequisite: a C- or better in PHYS 1230G or PHYS 2230G, and MATH 1220G or higher.

Learning Outcomes

1. Modeling: analyze real world phenomena by constructing simplified idealized models (an abstract description) that allow making predictions or explaining a phenomena or function; use multiple representations to build and communicate the model, including sketches, mathematical expressions, diagrams or graphs; decide what information is relevant and critique assumptions and models of others; determine how to test the validity of a model and use comparison of experimental data and prediction to refine the model.
2. Conceptual understanding: electric or magnetic fields can be used to describe interactions of objects that contain charges with their surroundings; changes that occur as a result of interactions are constrained by conservation laws (such as conservation of energy, conservation of charge or conservation of nucleon number); many macroscopic properties of materials can be described using microscopic models or related to their geometry; electromagnetic radiation can be modeled as a wave or as fundamental particles (photons); the direction of propagation of a wave may change when it encounters a boundary surface between two media of different properties (reflection or refraction); the spontaneous radioactive decay of nuclei is described by probability.
3. Quantitative reasoning: apply quantitative analysis and appropriate mathematical reasoning to describe or explain phenomena; use scientific notation accurately and convert units if necessary.
4. Communicating scientific information: interpret or generate graphs or other visual representations (e.g. field lines, equipotential lines) and be able to switch between various representations including text, mathematical description, or diagrams.

PHYS 2240L. Laboratory to General Physics for Life Science II

1 Credit (1)

Laboratory experiments in topics associated with material presented in PHYS 2240.

Prerequisite(s)/Corequisite(s): PHYS 2240G. Restricted to Las Cruces campus only.

PHYS 2241. Supplemental Instruction to General Physics for Life Sciences II**1 Credit (1)**

This optional workshop is a supplement to Physics for Life Science II. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.

Corequisite(s): PHYS 2240G.

Learning Outcomes

1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2240, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2996. Special Topics**1-3 Credits**

Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Learning Outcomes

1. Varies

PHYS 2997. Independent Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

Learning Outcomes

1. Varies

PHYS 303V. Energy and Society in the New Millennium**3 Credits (3)**

Traditional and alternative sources of energy. Contemporary areas of concern such as the state of depletion of fossil fuels; nuclear energy, solar energy, and other energy sources; environmental effects; nuclear weapons; and health effects of radiation. Discussion of physical principles and impact on society. Focus on scientific questions involved in making decisions in these areas. No physics background required.

PHYS 304. Forensic Physics**4 Credits (3+3P)**

Theories, laboratory, and field techniques in the area of forensic physics.

PHYS 305V. The Search for Water in the Solar System**3 Credits (3)**

Examines the formation, abundance and ubiquity of water in our Solar System stemming from comets, Martian and Lunar poles, Earth's interior and into the outer reaches of the Solar System. Topics will include nuclear synthesis, Solar System formation, remote sensing, as well as past, present and future NASA missions for water.

PHYS 315. Modern Physics**3 Credits (3)**

An introduction to relativity and quantum mechanics, with applications to atoms molecules, solids, nuclei, and elementary particles.

Prerequisite: a C- or better in MATH 2530G and PHYS 2140 or PHYS 1320G.

Learning Outcomes

1. Communication: an ability to communicate effectively with a range of audiences.
2. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
3. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 316. Supplemental Instructions to PHYS 315**1 Credit (1)**

This optional workshop supplements PHYS 315 "Modern Physics". Students actively apply concepts and methods introduced in PHYS 315 to problem solving and quantitative analysis.

Corequisite(s): PHYS 315.

PHYS 325. Intermediate Experimental Physics**3 Credits (1+6P)**

An exploration of a variety of experimental techniques in physics with an emphasis on the proper determination of statistical and systematic uncertainties. Students will work in teams and prepare professional written and oral reports of their work. This course cannot be used to replace M E 345 for students majoring in engineering.

Prerequisite(s)/Corequisite(s): PHYS 315. Prerequisite(s): a C- or better in PHYS 2140L or PHYS 1320L.

Learning Outcomes

1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 350. Special Topics**1-3 Credits**

Lectures, demonstrations, and discussions on such topics as lasers and holography, energy sources, clouds, and biophysics. May be repeated for a maximum of 12 credits under different subtitles.

PHYS 380. Individual Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 395. Intermediate Mathematical Methods of Physics**3 Credits (3)**

Introduction to the mathematics used in intermediate-level physics courses. Topics include vector calculus, curvilinear coordinates, matrices, linear algebra, function spaces, partial differential equations, and special functions. This course cannot be used to replace M E 228 or M E 328 for students majoring in engineering. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): a C- or better in MATH 2530G.

Learning Outcomes

1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 400. Undergraduate Research

1-3 Credits

May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 420. Capstone Project I

3 Credits (3P)

Application of engineering physics principles to a significant design project. Includes teamwork, written and oral communication and realistic technical, economic and public safety requirements.

PHYS 421. Capstone Project II

3 Credits (3P)

Continuation of PHYS 420.

PHYS 450. Selected Topics

1-3 Credits

Readings, lectures or laboratory studies in selected areas of physics. May be repeated for a maximum of 12 credits.

PHYS 451. Intermediate Mechanics I

3 Credits (3)

Newtonian mechanics, including an introduction to the Lagrangian formulation. Topics include central force motion, rigid body motion, noninertial reference frames, oscillating systems, and classical scattering.

Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 2530G.

Learning Outcomes

1. Set up equations of motion for classical mechanical systems and solve them.
2. Identify conserved quantities and understand the circumstances under which they arise (symmetries); in particular, know how to use conservation of energy, momentum, angular momentum to solve problems.
3. Fluently use three-dimensional calculus as a language to do the above; be able to use spherical and cylindrical coordinates.
4. Understand the paradigmatic examples of the harmonic oscillator, central force (in particular, gravitational) motion and rigid body motion, which serve as starting points for investigating more complicated realistic problems.

PHYS 454. Intermediate Modern Physics I

3 Credits (3)

Introduction to quantum mechanics, focusing on the role of angular momentum and symmetries, with application to many atomic and subatomic systems. Specific topics include intrinsic spin, matrix representation of wave functions and observables, time evolution, and motion in one dimension.

Prerequisite: a C- or better in PHYS 315.

Prerequisite/Corequisite: MATH 392 and PHYS 395.

Learning Outcomes

1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 455. Intermediate Modern Physics II

3 Credits (3)

Continuation of subject matter of PHYS 454. Specific topics include rotation and translation in three dimensions, solution of central potential problems, perturbation theory, physics of identical particles, scattering theory, and the interaction between photons and atoms.

Prerequisite: a C- or better in PHYS 454, MATH 392, and PHYS 395.

Learning Outcomes

1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 461. Intermediate Electricity and Magnetism I

3 Credits (3)

The first part of a two-course sequence in classical electrodynamics. Covered topics include static electric and magnetic fields, Laplace's and Poisson's equations, electromagnetic work and energy, Lorentz force, Gauss's, Biot-Savart, and Ampere's laws, Maxwell's equations, as well as electric and magnetic fields in matter.

Prerequisite: a C- or better in PHYS 2140 or PHYS 1320G or equivalent and a C- or better in MATH 2530G.

Prerequisite/Corequisite: MATH 392 and PHYS 395.

Learning Outcomes

1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 462. Intermediate Electricity and Magnetism II

3 Credits (3)

Continuation of subject matter of PHYS 461. Covered topics include Maxwell's equations and their applications, electromagnetic waves, reflection, refraction, dispersion, radiating systems, interference and diffraction, as well as Lorentz transformations and relativistic electrodynamics.

Prerequisite: a C- or better in PHYS 461, MATH 392, and PHYS 395.

Learning Outcomes

1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 468. Intermediate X-ray Diffraction

3 Credits (3)

Introduction to x-ray diffraction and reflectivity spectra. Topics include X-ray sources and detectors, atomic spectra, characteristic x-rays, thermionic emission, synchrotron radiation, instrument components, and beam conditioners. Prerequisite(s): a C- or better in PHYS 315 and PHYS 325

Learning Outcomes

1. Knowledge of structural properties of materials
2. Experimental x-ray characterization techniques
3. Presentation and writing skills in the discipline
4. Ethics, teamwork, and career opportunities

PHYS 471. Modern Experimental Optics**3 Credits (1+6P)**

Cumulative experience course in experimental optics.

Prerequisite: a C- or better in PHYS 315 and PHYS 325.

Learning Outcomes

1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 475. Advanced Laboratory Practices for Materials**3 Credits (1+6P)**

Cumulative experience course in advanced laboratory practices involving experiments in atomic, molecular, and condensed matter physics.

Prerequisite: a C- or better in PHYS 315 and PHYS 325.

Learning Outcomes

1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 476. Computational Physics**3 Credits (3)**

Scientific visualization, numerical differentiation and interpolation, numerical integration, root finding, linear algebra, eigensystems, ODE's, Boundary value problems, PDE's, Monte-Carlo calculations, data

description and analysis, Fast Fourier Transforms, and applications to advanced physics problems. Recommended is the knowledge of a programming language.

Prerequisite(s): a C- or better in PHYS 1111 or equivalent and MATH 392.

Learning Outcomes

1. learn how to use computers for solving problems in the physical sciences,
2. obtain skills to implement numerical simulation and modeling strategies,
3. learn how to monitor and analyze data graphically, during and after computation,
4. obtain workflow organization skills needed for the solution of complicated systems.

PHYS 480. Thermodynamics**3 Credits (3)**

Thermodynamics and statistical mechanics. Basic concepts of temperature, heat, entropy, equilibrium, reversible and irreversible processes. Applications to solids, liquids, and gases.

Prerequisite: a C- or better in PHYS 2120, PHYS 315, and MATH 2530G.

Learning Outcomes

1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 485. Independent Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 488. Introduction to Condensed Matter Physics**3 Credits (3)**

Crystal structure, X-ray diffraction, energy band theory, phonons, cohesive energy, conductivities, specific heats, p-n junctions, defects, surfaces, and magnetic, optical, and low-temperature properties.

Prerequisite: a C- or better in PHYS 315.

Learning Outcomes

1. Learn the fundamental concepts of solid-state physics: classification of solids, crystal structure, band structure of solids, lattice vibrations, optical and magnetic properties of solids.
2. Develop an ability to formulate and solve complex problems in solid state physics by applying the fundamental principles of physics and mathematics.
3. Develop and ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 489. Introduction to Modern Materials**3 Credits (3)**

Structure and mechanical, thermal, electric, and magnetic properties of materials. Modern experimental techniques for the study of material properties.

Prerequisite: a C- or better in PHYS 315.

Learning Outcomes

1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques.
2. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics.

3. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 493. Experimental Nuclear Physics

3 Credits (1+6P)

Cumulative experience course in nuclear physics such as measurement of radioactivity, absorption of radiation, nuclear spectrometry.

Prerequisite: a C- or better in PHYS 315 and PHYS 325.

Learning Outcomes

1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communications: an ability to communicate effectively with a range of audiences.
3. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 495. Mathematical Methods of Physics I

3 Credits (3)

Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.

Prerequisite(s): a C- or better in MATH 392 and PHYS 395.

Learning Outcomes

1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics.
2. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra.
3. Evaluate integrals of analytic functions using the calculus of residues.
4. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.

PHYS 500. Special Topics Seminar

1-2 Credits

Treatment of topics not covered by regular courses. Graded S/U. May be repeated.

PHYS 511. Mathematical Methods of Physics I

3 Credits (3)

Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.

Learning Outcomes

1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics.

2. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra.
3. Evaluate integrals of analytic functions using the calculus of residues.
4. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.

PHYS 520. Selected Topics

1-3 Credits

This is a lecture/laboratory course designed to present the basic concepts, the techniques and the tools to synthesize and characterize nanometer scale materials, and the latest achievements in current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics and energy. It is intended for a multidisciplinary audience with a variety of backgrounds. This course should be suitable for graduate students as well as advanced undergraduates. Topics covered will include: nanoscience and nanotechnology, nanofabrication, self-assembly, colloidal chemistry, sol-gel, carbon nanotubes, graphene, thin film, lithography, physical vapor deposition, chemical vapor deposition, quantum dots, lithium batteries, X-ray diffraction, scanning electron microscopy, transmission electron microscopy, nanoelectronics, nanophotonics and nanomagnetism, etc. Students must also have completed (EH&S Safety training to include the courses: (1) Employee & Hazard Communication Safety (HazCom); (2) Hazardous Waste Management; and (3) Laboratory Standard) trainings to enroll. Crosslisted with: CHME 467. May be repeated up to 3 credits.

Prerequisite: (CHEM 1226 or CHEM 1215G), (PHYS 1230G or PHYS 1310G).

PHYS 521. Individual Study

1-3 Credits

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

PHYS 528. Fundamentals of Photonics

4 Credits (3+3P)

Ray, wave and guided optics, lasers and thermal sources, radiometry, photon detection and signal-to-noise ratio. Elements of photonic crystals, polarization, acousto-optics, electro-optics, and optical nanostructures. Recommended foundation (PHYS 1320G or PHYS2120) and (E E 473 or PHYS 473), Taught with E E 478. Crosslisted with E E 528.

Learning Outcomes

1. Describe the fundamental properties of light.
2. Formulate the concepts of ray, wave, and photon optics mathematically.
3. Represent and incorporate basic elements of an optical system.
4. Perform an analysis of a simple photonic/optical system mathematically by hand and with computer tools such as MATLAB.
5. Discuss ethical, societal, and professional issues related to photonics and optics.

PHYS 551. Classical Mechanics

3 Credits (3)

Lagrangian and Hamiltonian formulation of dynamics. Advanced treatments of most topics listed under PHYS 451, plus canonical transformations and Hamilton-Jacobi theory. PHYS 451 strongly recommended.

PHYS 554. Quantum Mechanics I**3 Credits (3)**

Wave function, indeterminacy, classical limit. Schrodinger equation. Atomic and nuclear systems. Angular momentum, intrinsic spin, identical particles. Scattering theory. Mathematical formalism, symmetry and conserved quantities. Perturbation theory. Dirac theory, introduction to quantized fields. PHYS 451 and PHYS 454 strongly recommended.

PHYS 555. Quantum Mechanics II**3 Credits (3)**

Continuation of topics in PHYS 554.

Prerequisites: PHYS 554 or consent of instructor.

PHYS 561. Electromagnetic Theory I**3 Credits (3)**

Detailed advanced treatments of most topics listed under PHYS 461, PHYS 462, plus multipole radiation, collisions of charged particles and bremsstrahlung, scattering, and radiation reaction. PHYS 461 and PHYS 462 strongly recommended.

PHYS 562. Electromagnetic Theory II**3 Credits (3)**

Continuation of topics in PHYS 561.

Prerequisites: PHYS 561 or consent of instructor.

PHYS 568. Elements of X-ray Diffraction**3 Credits (3)**

Same as PHYS 468, but additional work required. Crosslisted with: CHME 588.

PHYS 571. Advanced Experimental Optics**3 Credits (1+6P)**

Taught with PHYS 471 with additional work required at the graduate level.

Learning Outcomes

1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 575. Advanced Physics Laboratory**3 Credits (1+6P)**

Selected experiments in atomic, molecular, nuclear and condensed-matter physics.

Learning Outcomes

1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.

3. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 576. Advanced Computational Physics I**3 Credits (3)**

Advanced treatment of topics listed under PHYS 476 plus additional work. Applications of numerical methods to advanced physics problems. Recommended is the knowledge of a programming language.

Learning Outcomes

1. learn to numerically solve problems that require higher mathematical and theoretical analysis,
2. experience how graduate research will be advanced and accelerated by the use of scientific computing skills.

PHYS 584. Statistical Mechanics**3 Credits (3)**

Thermodynamics review. Probability, entropy, equilibrium. Canonical and grand canonical ensembles. Classical and quantum statistics. Degenerate and classical gases. Application to the equilibrium properties of solids, liquids, and gases. Kinetic theory and transport processes.

PHYS 589. Modern Materials**3 Credits (3)**

Same as PHYS 489 with differentiated assignments for graduate students. PHYS 554 recommended.

Learning Outcomes

1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques.
2. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics.
3. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 591. Advanced High-Energy Physics I**3 Credits (3)**

Taught with PHYS 491 with additional work required at the graduate level.

Prerequisite(s): PHYS 555 or consent of instructor.

PHYS 593. Advanced Experimental Nuclear Physics**3 Credits (1+6P)**

Advanced experimental investigation of topics such as measurement of radioactivity, absorption of radiation, and nuclear spectrometry.

Learning Outcomes

1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.

3. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 597. Space Plasma Physics**3 Credits (3)**

Same as PHYS 497 but with added requirements.

PHYS 599. Master's Thesis**1-15 Credits (1-15)**

Thesis.

PHYS 600. Research**1-15 Credits**

Doctoral research. May be repeated.

PHYS 620. Advanced Topics in Physics**1-3 Credits**

Advanced formal treatment of topics not covered in regular courses. May be repeated for a maximum of 9 credits.

Prerequisite: consent of instructor.

PHYS 650. General Relativity I**3 Credits (3)**

Basic foundations and principles of general relativity, derivation of the Einstein field equations and their consequences, the linearized theory, the Bel-Petrov classification of the curvature tensor, derivation of the Schwarzschild solution and the four basic tests of general relativity.

Prerequisite(s): PHYS 511 or PHYS 561 or consent of instructor.

PHYS 680. Independent Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: graduate standing or consent of instructor.

PHYS 688. Advanced Condensed Matter Physics**3 Credits (3)**

Continuation of the advanced condensed matter physics presented in PHYS 588. Topics include electronic structure methods, optical, magnetic, and transport properties of solids, semiconductors, crystalline defects, nanostructures, and noncrystalline solids. PHYS 588 strongly recommended.

Learning Outcomes

1. Learn the fundamental concepts of advanced condensed state physics: band theory of solids, electronic structure methods, optical and magnetic properties of solids, bulk semiconductors, and properties of nano-structured materials.
2. Develop an ability to formulate and solve complex problems in advanced condensed matter physics.
3. Develop an ability to study independently and acquire new knowledge using appropriate learning strategies.

PHYS 689. Advanced Modern Materials**3 Credits (3)**

Advanced topics in the physics of modern materials, such as crystalline, amorphous, polymeric, nanocrystalline, layered, and composite materials and their surfaces and interfaces. PHYS 555, PHYS 588, and PHYS 589 recommended.

Learning Outcomes

1. Learn the fundamental concepts of the physics of modern materials, such as crystalline, amorphous, polymeric, nanostructured, layered, and composite materials.
2. Develop an ability to formulate and solve complex problems in the area of advanced physics of modern materials.
3. Develop an ability to study independently and acquire new knowledge using appropriate learning strategies.

PHYS 691. Quantum Field Theory I**3 Credits (3)**

Path integrals, gauge invariance, relativistic quantum mechanics, canonical quantization, relativistic quantum field theory, introduction to QED.

Prerequisites: PHYS 555 and PHYS 562, or consent of instructor.

PHYS 692. Quantum Field Theory II**3 Credits (3)**

QED, running coupling constant, QCD, electroweak theory, asymptotic freedom, deep inelastic scattering, basic QCD phenomenology, path integrals in quantum field theory, lattice QCD.

Prerequisite: PHYS 691 or consent of instructor.

PHYS 700. Doctoral Dissertation**1-15 Credits (1-15)**

Dissertation.

PL-S-PARALEGAL SERVICES

PL S 160. Legal System for the Paralegal**3 Credits (3)**

Introduction to the court system, administrative agencies, functions of law offices, and professional conduct and legal ethics. Restricted to: Community Colleges only.

Prerequisite(s): ACT standard score in English of 16 or higher or a Compass score 76 or higher; for those scoring 13-15 in English on ACT or 35-75 on Compass, successful complete of CCDE 105N or CCDE 110N; for those scoring 12 or below on the ACT standard score in English or 34 or below on the Compass, successful completion of CCDE 105N & CCDE 110N.

PL S 162. The Virtual Law Office**3 Credits (3)**

The Virtual Law Office class is a 'hands-on', project oriented course designated to provide the student with the basic law office skills needed to function successfully in a law office setting. The student will gain a practical, working knowledge of the procedures necessary to work in a law office. The skills learned in the class will directly translate to real life situations. Restricted to: Community Colleges only.

Prerequisite(s): PL S 160.

PL S 190. Criminal Law for the Paralegal**3 Credits (3)**

Introduction to federal and state criminal law; criminal proceedings, prosecution and defense, sentencing and appeal.

Prerequisite: PL S 160.

PL S 200. Legal Ethics for the Paralegal**3 Credits (3)**

Introduction to ethical dilemmas faced in the workforce and the rules of ethics developed by the American Bar Association, various national

paralegal organizations, and the Supreme Court of New Mexico.
Restricted to: Community Colleges only.

Prerequisite(s): PL S 160.

PL S 203. Immigration Law

3 Credits (3)

Survey of the basics of immigration law including the rights and obligations of citizenship and the naturalization process.

Prerequisite: PL S 160.

PL S 221. Internship I

2-4 Credits

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships can be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. Restricted to Community Colleges campuses only.

Prerequisite(s): PL S 274.

PL S 222. Internship II

1-3 Credits

Continuation of PL S 221. Each credit requires specified number of hours of on-the-job work experience. Restricted to Community Colleges campuses only.

Prerequisite(s): PL S 221.

PL S 231. The Law of Commerce for the Paralegal

3 Credits (3)

Law of contracts, negotiable instruments, bank transfers, secured transactions, debtor-creditor relations, agency, and business types and their formation. Students will study the relevant statutes as well as draft documents associated with these types of legal practice. Restricted to: Community Colleges only.

Prerequisite(s): PL S 160.

PL S 274. Legal Research and Writing for the Paralegal I

3 Credits (3)

Legal memoranda, briefs, and pleadings will be prepared and written based on the student's original research. Research materials and techniques will be identified and studied; introduction of computer usage in legal research.

Prerequisite: PL S 160 and ENGL 1110G.

PL S 275. Tort and Insurance for the Paralegal

3 Credits (3)

Primary legal principles of tort and insurance law and means of establishing insurance plans, types of torts and insurance, as well as use of specific forms and procedures relating to these areas.

Prerequisite: PL S 160.

PL S 276. Wills, Trusts, and Probate for the Paralegal

3 Credits (3)

Cases and statutes dealing with wills, trusts, and probate. Emphasis on preparation and drafting of documents and the application of the law and documents to the client's problems.

Prerequisite: PL S 160.

PL S 277. Family Law for the Paralegal

3 Credits (3)

Methods of conducting client interviews and drafting of pleadings and research relative to families. Laws relating to marriage, divorce, custody, support, adoption, name change, guardianship, and paternity.

Prerequisite: PL S 160.

PL S 278. Litigation for the Paralegal

3 Credits (3)

The law of procedure and evidence will be considered through rules and cases. Case situations will be used to identify and solve problems.

Prerequisite: PL S 160.

PL S 279. Legal Research and Writing for the Paralegal II

3 Credits (3)

Continuation of PL S 274. Advanced training in legal research problems with a focus on analysis, writing, and preparation of sophisticated legal memoranda and documents.

Prerequisite: PL S 274.

PL S 298. Independent Study

1-3 Credits (1-3)

Individual studies directed by consenting faculty with prior approval by department head. Restricted to Community Colleges campuses only.

Prerequisite(s): PL S 160.

PLEN-PLANT,ENVRMTL SCIENCES

PLEN 6110. Arid Land Water Resources

3 Credits (2+2P)

The course will cover various issues of relevance to water resources and water supply management within the Southwest US and other semiarid and arid regions. Discussions may include development and sustainability, climate change and drought, socioeconomic and cultural, and transboundary issues. Students will develop literature reviews, draft proposals, and conduct presentations. May be repeated up to 3 credits.

PLEN 6120. Instrumentation in Agronomy

3 Credits (3)

Use of instruments used in research in all areas of agronomy including gas chromatography, high performance liquid chromatography, neutron soil moisture probe, and other instruments. May be repeated up to 3 credits.

PLEN 6210. Scientific Writing- How to be a Productive and Effective Writer

1-3 Credits (1-3)

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review.

PLEN 6320. Advanced Soil Physics

3 Credits (3)

Advanced treatment of soil physics, modeling, includes working on an existing/new research project, modeling existing or new data, step by step guide on the use of some 1-D and 2-D models. Specific areas of specialization will be field scale variability of soil properties, water flow, solute transport, and plant water relations. May be repeated up to 3 credits.

PLEN 6410. Moisture Heat Contaminant Transport Modeling

3 Credits (3)

Provides clear coverage of the basic principles of heat, moisture and contaminant transport through porous media, and a step-by-step guidance and hands on application on the use of some spreadsheet based and physically based one-and two-dimensional transport models. A similar course does not exist in the college for students that can encourage them to pursue modeling as a means of solving vadose zone and groundwater contamination and remediation problems. Consent of instructor required. May be repeated up to 3 credits.

PLEN 6415. Breeding for Plant Disease Resistance

3 Credits (3)

A practically-oriented course of lectures and discussion on concepts and principles of breeding for disease and pest resistance. Labs familiarize

students with preparation, quantification, and application of inoculum to hosts. May be repeated up to 3 credits.

PLEN 6420. Advanced Crop Breeding

4 Credits (3+3P)

Applications of breeding principles to crop improvement. Emphasis on breeding methodologies using modern techniques, including biotechnology. May be repeated up to 4 credits.

PLEN 6425. Biometrical Genetics and Plant Breeding

3 Credits (3)

A statistical approach to gene action and population parameters as applied to plant improvement. May be repeated up to 3 credits.

PLEN 6610. Introduction to Environmental and Ecological Modeling

4 Credits (4)

The course introduces approaches to modeling environmental and ecological processes. Provides students with valuable tools for mathematical and simulation modeling of environmental systems.

Learning Outcomes

1. Familiarity with diverse modeling approaches used in ecology and environmental sciences.
2. The skills and confidence to use simulation approaches for problem-solving.
3. Familiarity in using 'R' as a tool for data analysis and simulation modeling.
4. An improved understanding and appreciation of complex environmental and ecological issues.

PLEN 6810. University Teaching Experience

1-3 Credits (1-3)

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. May be repeated up to 3 credits.

PLEN 6910. Doctoral Seminar

1 Credit (1)

Current research discussions presented by doctoral level graduate students. Not more than 2 credits toward the degree. May be repeated up to 2 credits.

PLEN 6920. Doctoral Proposal

1 Credit (1)

Current research proposal written by doctoral level graduate students. Not more than 1 credits toward the degree. May be repeated up to 1 credit.

PLEN 6991. Doctoral Research

1-15 Credits (1-15)

Research. May be repeated up to 88 credits.

Learning Outcomes

1. Varies

PLEN 6996. Advanced Topics

1-6 Credits (1-6)

Topics of current interest, designated by title and credit. Maximum of 6 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits.

PLEN 7000. Doctoral Dissertation

1-15 Credits (1-15)

Dissertation. May be repeated up to 88 credits.

Learning Outcomes

1. Varies

POLS-POLITICAL SCIENCE

POLS 1110G. Introduction to Political Science

3 Credits (3)

This course covers fundamental concepts in political science, such as political theories, ideologies, and government systems.

Learning Outcomes

1. Construct reasoned civic discourse to advocate a stance or examine alternate positions.
2. Identify fundamental concepts and theories in political science.
3. Analyze data and information in order to gain a deeper understanding of the material.
4. Articulate how the public influence and are influenced by politics.
5. Identify and compare government systems from democracy to authoritarian, as well as models of analysis of contemporary international relations.

POLS 1111. Introductory Government Seminar

1 Credit (1)

Introduction to the government major. Designed to assist students in planning college experience and preparing for upper division course work and research. May be repeated up to 1 credit.

Learning Outcomes

1. This course is designed for the beginning government major.
2. Its goal is to improve your educational experience at the university and within the Department of Government. In this class we hope to develop some basic skills necessary for successful completion of a degree in Government.
3. These include the skills of critical reading, critical writing, oral presentation and research methods.
4. Additionally, we will use this seminar to introduce you to Government faculty, to plan your government degree and to acquaint you with the services and opportunities the department and the university has to offer.
5. Finally, we hope to begin the discussion of where you will go next, when you complete your degree in Government.

POLS 1120G. American National Government

3 Credits (3)

This course explains the role of American national government, its formation and principles of the Constitution; relation of state to the national government; political parties and their relationship to interest groups. This course also explains the structure of the legislative, executive, and judicial branches.

Learning Outcomes

1. Explain the historical and political foundations of the government of the United States;
2. Explain the precursors to, and the development and adoption of the United States Constitution;
3. Explain the United States federal system, the basics of federalism, and the changing relationship of state and federal power;
4. Describe the power, structure and operation of the main institutions of government, namely the legislative, executive, judicial, and the federal bureaucracy;
5. Explain the development and role of political parties and interest groups;

6. Identify the constitutional basis of civil rights and civil liberties and their changing interpretation; and
7. Describe the role of demographics, public opinion and the media in American politics.

POLS 1130G. Issues in American Politics**3 Credits (3)**

This course is designed to introduce the students to the contemporary study of American political issues. The course analysis of government policies, examining various approaches to the economy, democracy and the structure and the function of American political institutions.

Learning Outcomes

1. Explain the basic themes and concepts of political science and their application to contemporary issues.
2. Explain the major forces, interests, and institutions of American democratic politics.
3. Describe and define how beliefs, assumptions, and values are influenced by factors such as politics, geography, economics, culture, biology, history, and social institutions.

POLS 2120G. International Relations**3 Credits (3)**

This course covers the analysis of significant factors in world politics, including nationalism, national interest, political economy, ideology, international conflict and collaboration, balance of power, deterrence, international law, and international organization.

Learning Outcomes

1. Explain the interrelationships between countries and people in the world,
2. Demonstrate an awareness of current events in the world.
3. Describe several theories of International Relations
4. Explain and identify theories of power and decision making among states in the world.
5. Describe and evaluate issues that relate to International Politics, and how individuals are affected by them.
6. Describe the role of Intergovernmental Organizations in International Politics.
7. Identify the role war plays in International Politics.
8. Explain how economics is intertwined with International Politics.
9. Demonstrate an understanding of role of international terrorism and its impacts on global diplomacy. 1
10. Articulate how beliefs, assumptions, and values are influenced by factors such as politics, geography, economics, culture, history, government, and social institutions.

POLS 2996. Special Topics**3 Credits (3)**

Specific topics to be announced in Schedule of Classes. Community Colleges only. May be repeated for a maximum of 12 credits.

Learning Outcomes

1. Varies

POLS 300. Political Research Skills**3 Credits (3)**

Introduction to methods of political analysis and fundamentals of research design, including basic methods for the collection and analysis of political data.

POLS 308. Prepping for Law School Admissions Test**1 Credit (1)**

This workshop helps students understand the law school application process and prepare to take the Law School Admissions Test (LSAT). May be repeated up to 2 credits.

Learning Outcomes

1. To prepare students to do well in the Law School Admissions Test (LSAT).
2. To help students understand the law school application process.

POLS 313. Model United Nations**3 Credits (3)**

Issues related to the United Nations and international law/organizations through simulations, discussions and research projects.

Prerequisites: GPA of 2.5 or better and consent of instructor.

POLS 314. Advanced Model UN**3 Credits (3)**

Advanced topics, research and preparation for Model United Nations activities. Consent of instructor required. Restricted to: Main campus only.

Prerequisite(s): POLS 313, minimum GPA 2.5.

POLS 315. Politics and Film**3 Credits (3)**

Exploration of political themes, images, and representation in film and other media. May be repeated for a maximum of 6 credits under different subtitles.

POLS 320. Making Public Policy**3 Credits (3)**

The course examines how U.S. public policy is made, including the examination of the major institutional and non-institutional players, politics, issues and power critical to the policy process. Interactive discussion sessions bridge theory to policy-making and political action in substantive policy issues. Restricted to: Main campus only. May be repeated up to 3 credits.

Learning Outcomes

1. Develop knowledge of how public policy is made in the United States at various levels of government (federal, state and local) and in relation to demands from interest groups and other stakeholders
2. Develop knowledge of specific public policy areas (such as environmental policy, energy policy, etc.
3. Develop excellence in research skills as well as written and oral communication of topics in the area of domestic policy

POLS 321. Topics in Public Policy**3 Credits (3)**

Course examines issues in public policy. May be repeated up to 6 credits.

Learning Outcomes

1. Develop knowledge and analytical skills with regard to particular topics within the subfield of public policy

POLS 324. Environmental Policy & Administration**3 Credits (3)**

This course introduces students to the history, development and formation of the central dimensions of environmental policy, politics and administration in the United States. Students also explore key substantive environmental policy issues (energy policy, natural resource and waste management policies, national parks and wildlife protection, and air and water pollution), and the global dimensions of climate change, environmental justice and sustainability. May be repeated up to 3 credits.

Learning Outcomes

1. Develop knowledge of historical and contemporary aspects of environmental policy, politics and administration in the United States

2. Develop ability to critically analyze environmental policy debates
3. Develop ability to effectively communicate analysis of environmental policy and administration in oral and written forms

POLS 325. Education Policy and Politics

3 Credits (3)

Overview of current pressing policy issues and political debates on education in the U.S., including school choice, vouchers, accountability, and affirmative action. Multiple topics and perspectives covered, with political economy as the main approach. May be repeated up to 3 credits.

Learning Outcomes

1. Understand the historical development and changing federal role in education policy, including major federal education laws and reforms.
2. Examine critical issues and trends in federal education policy, as well as the various actors and perspectives involved in education debates and decision-making.
3. Explore policy process theories and apply them to the analysis of federal education events.
4. Study in depth a federal education policy issue by examining its progress through the various stages of the policy process.

POLS 326. Public Policy & Indigenous Communities

3 Credits (3)

Study of historical and contemporary public policy and law that deals with the special legal status of Native American tribes and tribal members.

Learning Outcomes

1. Become familiar with the body of public policy and the area of law that deals with the special legal status of Native American tribes and tribal members
2. Examine the history, the public policy and the law that has impacted the ability of these indigenous communities to exercise their inherent sovereignty
3. Investigate the history, legislation, policies and landmark cases that have shaped this important area of government in the United States

POLS 330. Introduction to Public Administration

3 Credits (3)

Public administration involves the full range of government agencies, non-profit organizations, and private contractors involved in the implementation of public policy at the federal, state, and local level. This course introduces students to the formal study of public administration and will explore major challenges in public service, the management of public and non-profit organizations, administrative ethics and law, leadership theory, and financial and personnel management. Restricted to: Main campus only. May be repeated up to 3 credits.

Learning Outcomes

1. Gain a strong foundation in the the major issues, theories and challenges of public administration
2. Develop skills to critically analyze key problems in public administration
3. Develop ability to effectively communicate the main issues, theories and challenges of public administration in both oral and written form

POLS 331. Special Topics in Public Administration

3 Credits (3)

Special topics in public administration. May be repeated for a maximum of 6 credits under different subtitles.

POLS 335. Management of Nonprofit Organizations

3 Credits (3)

This course provides an introduction to the nonprofit sector, its nature, scope, and functions, and an overview of a range of nonprofit management concerns and practices. Students will confront the critical issues facing the sector. Activities are designed to expand the management skills of students by offering analytical tools and knowledge, and providing opportunities to test the application of these skills. May be repeated up to 3 credits.

Learning Outcomes

1. Gain a strong foundation in the study of nonprofit organizations and management issues
2. Expand students' management skills
3. Gain experience in application of management skills

POLS 343. Congress and the Legislative Process

3 Credits (3)

This class reviews the history, structure, membership, operation, power and culture of the American Congress. Restricted to: Main campus only.

Learning Outcomes

1. Develop knowledge of the functions and goals of the US Congress, specifically how federal legislation is drafted, debated and passed.
2. Develop skills in debating legislative bills through in-class simulations
3. Develop excellence in research and written and oral communication of significant topics in the study of the US Congress and legislative processes

POLS 345. The Supreme Court

3 Credits (3)

This class studies the history and operation of the Supreme Court, as well as landmark cases that have shaped American government and the Court.

POLS 348. Political Parties and Interest Groups

3 Credits (3)

Organization, principles, and functions of political parties and interest groups in the U.S.

POLS 350. Special Topics in American Government

3 Credits (3)

Special topics in American government. May be repeated for a maximum of 6 credits under different subtitles.

POLS 353. Women and Politics

3 Credits (3)

An examination of women's participation in U.S. electoral politics as voters, candidates, and officeholders; political activism in issue-based movements and strategies for affecting public policy; leadership as administrators and managers in public service agencies. Also explores the influence of feminism in changing women's roles socially, legally, and politically.

POLS 354. Native American Politics

3 Credits (3)

This course explores the rights of Native Americans and the politics, policy, and administration of tribal governments with a focus on the history and current relationship between Native Nations and the US political system. Students will learn about Native peoples' cultural responses, forms of resistance, and adaptations to colonization.

Restricted to: Main campus only.

Learning Outcomes

1. Develop a strong understanding of historical and contemporary issues in Native American policy in the United States
2. Develop skills to critically analyze debates over Native American policy

3. Develop skills to effectively communicate analysis of Native American policy in oral and written forms

POLS 360. International Relations Theory

3 Credits (3)

Introduction to major theories and concepts for understanding fundamental problems and issues in international relations. May be repeated up to 3 credits.

Learning Outcomes

1. Identify and critically evaluate the major concepts (theory) and practices (reality) of International Relations
2. Identify, define, and critically think about themes and key issues unique to International Relations and evaluate their pros and cons
3. Develop knowledge, analytical ability and critical thinking about global efforts and challenges to International Relations

POLS 361. Special Topics in International Relations

3 Credits (3)

Course examines contemporary issues in international relations. May be repeated under different subtitles.

POLS 362. International Political Economy

3 Credits (3)

Political factors in international economic relations; theories of political economy.

POLS 364. National Security

3 Credits (3)

Analysis of theories, concepts, historical development and current issues of significance for US national security

Learning Outcomes

1. Analyze international issues from a National Security policy perspective and examine major theoretical approaches (or "paradigms") of National Security
2. Critically examine the historical evolution and the most prominent and contemporary challenges of National Security
3. Acquire abilities to synthesize and articulate important debates in the National Security literature and connect them to current national, regional, and global crises.

POLS 365. Introduction to Security Studies

3 Credits (3)

Introduction to the field of security studies, with focus on theories and issues in the study of security in international politics, including emerging 21st century security challenges related to cyberspace, A.I., information warfare and virtual deterrence.

Learning Outcomes

1. Analyze international issues from a security studies perspective and examine major theoretical approaches (or "paradigms") of security studies
2. Critically examine the historical evolution and the most prominent and contemporary challenges of security studies
3. Synthesize and articulate important debates in the security studies literature and connect them to current national, regional, and global challenges and crises.

POLS 366. American Foreign Policy

3 Credits (3)

Formulation, content and rationale of current foreign policies of the U.S. May be repeated up to 3 credits.

Learning Outcomes

1. Develop knowledge of the historical development and current practice of US foreign policy
2. Develop the skills necessary to conduct independent research and written and oral communication of significant topics in US foreign policy

POLS 367. Terrorism

3 Credits (3)

An introductory course using an interdisciplinary framework to explore definitions, historical roots, contemporary manifestations and future trends in political terrorism.

POLS 368. Human Security

3 Credits (3)

Introduction to human security, its focus on security of the individual as opposed to the security of the state since the end of the Cold War and the emergence of global challenges such as environmental crises, public health, and cybersecurity of the virtual self.

Learning Outcomes

1. Identify and critically evaluate the major concepts and practices in human security
2. Define, identify and critically think about key issue areas in human security
3. Develop a coherent body of research in regard to a human security topic of your interest; engage with complex knowledge about human security and apply your analysis to a specific phenomenon.
4. Investigate current, global efforts and challenges in regard to human security.

POLS 370. Comparative Politics

3 Credits (3)

Comparative study of similarities and differences to be found in political systems across the world, with emphasis on the structure and performance of modern states, accountability of government institutions, parties and elections, social movements, and public policies. May be repeated up to 3 credits.

Learning Outcomes

1. Develop knowledge of main issues and concepts in the study of comparative politics.
2. Increase analytical ability to explain similarities and differences between political systems
3. Promote critical thinking regarding the human and environmental consequences of government policies in addressing common public policy problems.

POLS 371. Latin American Politics

3 Credits (3)

Comparative study of government systems and political change in Latin American countries, with focus on challenges of social inequality, democratization, regional integration, relations with the United States, and the rights of women, LGBTQ* community, Indigenous and Afro-descendent peoples. May be repeated up to 3 credits.

Learning Outcomes

1. Develop knowledge of how historical legacies, domestic politics, and global relations shape contemporary politics in Latin America
2. Increase analytical ability to explain similarities and variation in contemporary politics in Latin America
3. Develop critical thinking regarding how to explain the persistence and political implications of socioeconomic inequalities and discrimination in Latin America

4. Develop oral and written communication skills in expressing knowledge, concepts, and comparative analysis

POLS 372. Special Topics in Comparative Politics

3 Credits (3)

Course examines contemporary issues in comparative politics. May be repeated under different subtitles. Restricted to: Main campus only.

POLS 373. Resistance Movements in World Politics

3 Credits (3)

Comparative study of contemporary resistance movements and social protests around the world with a focus on their origins, demands, ideologies, strategies and impacts. May be repeated up to 3 credits.

Learning Outcomes

1. Develop knowledge of concepts of power and resistance movements and their applicability in many parts of the world.
2. Increase analytical ability to explain variation in the motives, strategies and impacts of resistance movements.
3. Promote critical thinking regarding how we choose to address inequalities, injustices and dissent.
4. Develop oral and written communication skills of key concepts and original research.

POLS 378. U.S.-Mexico Border Politics

3 Credits (3)

Analysis of contemporary challenges facing the U.S.-Mexican border, including immigration, binational cooperation, drug trafficking, corruption, human rights violations and security. May be repeated up to 3 credits.

Learning Outcomes

1. Develop knowledge of the main issues and controversies in US-Mexico border politics.
2. Increase analytical ability to explain the implementation and results of border policies for local communities and the environment.
3. Promote critical thinking regarding the merits of alternative policies and future possibilities.

POLS 379. Mexican Politics

3 Credits (3)

Study of the politics and government of contemporary Mexico with focus on challenges of democratization, human rights, public policies, Mexico-US relations, and internal security. May be repeated up to 3 credits.

Learning Outcomes

1. Develop knowledge of main issues and concepts in the study of Mexican politics.
2. Develop ability to conduct online research on current issues in Mexican politics.
3. Promote critical thinking regarding the causes and consequences of criminal violence in Mexican politics and how it may be best addressed.

POLS 380V. Contemporary World Political Ideologies

3 Credits (3)

Introduction to the prevailing political ideologies in the modern world and the ways in which modern nations operating under one or more of these ideologies attempt to answer fundamental questions about the allocation and distribution of rights, liberties, and other things of value. In addition, the course work and discussions attempt to address recent political, social, and economic events in various areas of the world.

POLS 382. Classical Political Thought

3 Credits (3)

Analysis of main currents in political thought from ancient Greece and Rome to the high Middle Ages.

POLS 383. Modern Political Thought

3 Credits (3)

Historical and theoretical examination of political ideas and ideologies from Machiavelli to Nietzsche. Topics include liberalism, conservatism, romanticism, communism, and Nihilism.

POLS 385. American Political Thought

3 Credits (3)

Introduction to major American thinkers and historical currents from colonial time to the present. May be repeated up to 3 credits.

Learning Outcomes

1. To understand the nature of the specifically American form of constitutionalism, as compared to its alternatives;
2. To understand the idea of progress in American history, including its colonial origins and its contemporary manifestation under the terms of progressivist ideology;
3. To understand the meaning and origin of American conservatism, and its place in contemporary political life;
4. To understand the dynamics of shifting political and institutional power relationships (including issues of centralization and decentralization) in relation to the above; and
5. To understand the general relationship between cultural phenomena and questions of political order.

POLS 387. Religion and Politics

3 Credits (3)

Survey of major points of interaction between politics and religion in the U.S., using theoretical, historical, and institutional analysis.

POLS 390. Special Topics in Public Law

3 Credits (3)

Course examines various issues in public law. May be repeated under different subtitles.

POLS 391. Constitutional Law

3 Credits (3)

The class explores the reasoning and political context of the Supreme Court cases that define the distribution and limits of governmental powers and duties under the U.S. Constitution, including separation of powers and federalism. Restricted to: Main campus only.

POLS 392. Civil Liberties

3 Credits (3)

The course examines the reasoning and political context of major Supreme Court cases defining constitutional rights of free speech, religious liberty, free press and criminal procedural rights.

POLS 394. Judicial Process

3 Credits (3)

Class examines the structure, function and purpose of the American judicial system. Restricted to: Main campus only.

POLS 395. Law and Society

3 Credits (3)

Class critically explores the development, role and impact of law on society, covering different philosophies and theories of law, different world legal systems, and different issue areas of law and society. Restricted to: Main campus only. May be repeated up to 3 credits.

Learning Outcomes

1. To understand the development, role and impact of law on society
2. To gain knowledge of different philosophies and theories of law

3. To gain knowledge of different legal systems around the world and key issues in law and society
4. To gain skills in critical analysis of debates in law and society
5. To gain skills in effective communication of analysis of law and society in oral and written forms

POLS 396. International Law**3 Credits (3)**

Nature, growth, and scope of law of nations, rights and obligations of states in peace and war, current issues.

POLS 399. New Mexico Law**3 Credits (3)**

Examination of the history, development and implementation of law in New Mexico with an emphasis on legal issues unique to New Mexico. Crosslisted with: CJUS 399. May be repeated up to 3 credits.

Learning Outcomes

1. To understand the unique legal issues of New Mexico through critical examination of the history, development and implementation of law in the state.
2. To develop skills to critically analyze debates over legal issues in New Mexico.
3. To develop skills to effectively communicate analysis of legal issues in New Mexico in oral and written forms.

POLS 405. Directed Readings**1-3 Credits**

Individualized readings. Course subtitled. May be repeated for a maximum of 6 credits. Graded S/U. Consent of instructor required.

POLS 406. Independent Study**1-3 Credits**

Individualized research. Course subtitled. May be repeated for a maximum of 6 credits. Consent of instructor required.

POLS 407. Workshop**1-6 Credits (1-6)**

Focus on skills related to careers in government and political science. Specific topics announced in the Schedule of Classes; Only three credits apply toward government major or minor requirements. May be repeated up to 6 credits.

Learning Outcomes

1. Develop skills related to careers in government and public service

POLS 410. Internship**1-12 Credits**

Hands-on experience working with public agencies, political campaigns, elected officials & non-profits. May be repeated for a maximum of 12 credits; only 3 credits apply toward government major or minor requirements. Consent of instructor required. Graded: S/U.

Prerequisite(s): Completion of 12 government credits, 2.5 GPA, junior and above standing.

POLS 411. Service Learning Experience**3 Credits (3)**

Experiential learning through a community service project. May be subtitled to reflect service activity. May be repeated for a total of 6 credits; only 3 credits apply toward government major or minor requirements.

Prerequisites: completion of 12 government credits, junior or above standing, and consent of instructor.

POLS 412. Practicum in Student Government**3 Credits (3)**

Research of issues in student government. Consent of instructor required. Graded: S/U.

Prerequisite(s): Student government participation, completion of 12 POLS credits, junior or senior standing.

POLS 415. Senior Seminar**2 Credits (2)**

Review and integration of political skills acquired in the Government Department. Students will focus on critical essay writing and oral presentation of a synthesis of knowledge gained from prior departmental coursework. May be repeated up to 2 credits.

Learning Outcomes

1. To integrate knowledge from various classes during the students' coursework as a Government major.
2. To effectively communicate in oral and written forms a synthesis of main issues, theories, scholars and actors in the various sub-fields of the government major.

POLS 469. Globalization**3 Credits (3)**

Analysis of the globalization process. Covers theories of globalization, the global economy, political globalization, global culture, transnational social movements, transnational migration and world labor market, global cities, and local-global linkages. Same as SOCI 4460. May be repeated up to 3 credits.

POLS 493. Mass Communications Law**3 Credits (3)**

Examination of legal issues relating to mass media in the United States. Invasion of privacy, libel, sedition, copyright, and advertising regulation. Same as JOUR 493 and COMM 493.

POLS 502. Research Methods in Government**3 Credits (3)**

Contemporary methods of political analysis, including mathematical and statistical techniques and computer applications. MPA students must complete this class with a B- or better. MA students must complete either POLS 502 or POLS 503 with a B- or better.

POLS 503. Qualitative Research Methods**3 Credits (3)**

An overview of qualitative research methods such as fieldwork, ethnography, content analysis, case studies, focus groups and grounded theory. Introduces students to epistemology (the study of knowledge) and to basic components of research design. Explores activist scholarship, ethical dilemmas in research, and software tools for computer assisted analysis. Especially useful for students preparing theses, dissertation, or other research projects. MA students must complete either POLS 503 or POLS 502 with a B- or better.

POLS 505. Directed Readings**1-3 Credits**

Selected topics in government. May be repeated for a total of 6 credits. Graded S/U.

Prerequisite: consent of instructor.

POLS 510. Internship**1-6 Credits**

Assignment with a public agency and research report. Only 3 credits apply toward degree requirements. Graded S/U.

Prerequisite: approval of graduate advisor.

POLS 517. Selected Topics in Government**3 Credits (3)**

Selected issues which may cross sub-fields of the discipline. May be repeated for a total of 6 credits.

POLS 519. Proseminar in Public Administration**3 Credits (3)**

Review of classic and contemporary theory and practice in public administration. Application of written and oral skills to the presentation and defense of essays on various aspects of public administration. To be completed with a B- or better.

Prerequisite(s): 30 credits of M.P.A.

POLS 522. Public Sector Economics I**3 Credits (3)**

Introduction to the economic rationale for government intervention in the economy and the effects of that intervention on economic agents and the economy in general. Emphasis on the expenditure side of government policies. Same as AEEC 522.

POLS 524. Introduction to the Nonprofit Sector**3 Credits (3)**

Advanced study of the nature and operation of the nonprofit sector and how it interacts with public policy. The course provides an overview of the nonprofit sector, its scope, structure, history, values, distinct contributions to society, place in the government service delivery systems, and selected public policy issues that affect it.

Learning Outcomes

1. Demonstrate an understanding of the unique nature of the nonprofit sector, and distinguish it from the public (government) and private (business, for-profit) sectors in form and delivery systems.
2. Provide a description of the historical, theoretical, and legal perspectives on nonprofit organizations, as well as current trends and challenges facing the sector.
3. Evaluate the scope of the nonprofit activity in the U.S. and demonstrate an understanding of the major nonprofit subsectors, such as health care, arts, social service, and religious organizations.
4. Determine how nonprofit organizations and business firms can constructively learn from one another.
5. Explain and justify the role and function of nonprofit organizations and the myriad ways in which nonprofit organizations serve our communities and enhance our society.

POLS 525. Seminar in the Nonprofit and Philanthropic Sector**3 Credits (3)**

Advanced study of the role of philanthropy and nonprofit organizations in society. Addresses the theoretical and academic foundations of research literature in the field from a variety of disciplines.

Learning Outcomes

1. A better understanding of the various issues and topics of the Nonprofit/Philanthropic sector studied by scholars in the field.
2. An ability to discuss major findings and theories in the field of Nonprofit and Philanthropic Studies.
3. The knowledge to discuss and critique research designs and methods that have been utilized in Nonprofit/Philanthropic Studies.
4. An ability to frame new research questions (and/or, extend knowledge) related to nonprofit organizations and philanthropy.

POLS 526. Performance Management of Public and Nonprofit Organizations**3 Credits (3)**

Advanced study of the theory and practice of performance measurement and management, how to select key performance indicators, implement a performance management system and use performance measures.

Examines importance of leadership roles and accountability in managing public and nonprofit organizations.

Learning Outcomes

1. To understand the inextricable connection between performance measurement and strategic planning in developing effective organizations.
2. To develop the skills to implement performance management systems in organizations, regardless of level of authority within these organizations.
3. To gain skills to adeptly navigate organizational challenges that impede implementation of performance management systems.

POLS 527. Issues in Public Management**3 Credits (3)**

Selected issues in public management. May be repeated under different subtitles for a total of 6 credits.

POLS 530. Seminar in Public Policy**3 Credits (3)**

Survey of the political, administrative, and technical aspects of policy making in government. MA students taking POLS 530 as part of their core requirements must complete the class with a B- or better.

POLS 536. Public Policy and Indigenous Communities**3 Credits (3)**

Indigenous communities are found throughout North, Central and South America. This course addresses the history, development and governance of these communities. Different sections of the course may choose to focus on different indigenous communities. All courses will consider the principles of governance internal to indigenous communities as well as the governing relationships between indigenous communities and modern states.

POLS 537. Issues in Public Policy**3 Credits (3)**

Selected issues in public policy. May be repeated under a different subtitle for a total of 6 credits.

POLS 540. Seminar in Public Administration**3 Credits (3)**

Survey course on the theory and practice of program, personnel, and financial management in government and the private, nonprofit sector. MA students taking POLS 540 as part of their core requirements must complete the class with a B- or better.

POLS 541. Public Budgeting**3 Credits (3)**

Budgetary processes; budget classification, analysis, and evaluation. MPA students must complete this class with a B- or better.

POLS 542. Public Sector Human Resources Management**3 Credits (3)**

Exploration of public personnel systems and practices, including job analysis, compensation, performance evaluation, recruitment, and labor-management relations. MPA students must complete this class with a B- or better.

POLS 543. Skills Workshop**1-6 Credits (1-6)**

Focus on management of task skills in selected areas of public administration. Specific topics will appear in the Schedule of Classes. May be repeated up to 6 credits.

Learning Outcomes

1. Develop specific skills related to the practice of public administration

POLS 544. Public Policy Analysis**3 Credits (3)**

Environment of policy analysis; various descriptive and quantitative designs for analyzing and evaluating public policy. Problems of policy analysis. MPA students must complete this class with a B- or better.

Prerequisite(s): POLS 502 or consent of instructor.

POLS 547. Government Organizations

3 Credits (3)

Historical overview and present applications of organization theory in public management. MPA students must complete this class with a B- or better.

POLS 548. Public Sector Leadership

3 Credits (3)

Theories and styles of leadership.

POLS 549. Ethics in Government

3 Credits (3)

Examination of standards, perspectives, and issues for ethical decision-making in public agencies. MPA students must complete this class with a B- or better.

POLS 550. Seminar in American Politics

3 Credits (3)

Overview of American political institutions. Includes study of American constitutional theory; legislative, executive, and judicial functions and processes; political parties and interest groups; and public policy formulation. MA students taking POLS 550 as part of their core requirements must complete the class with a B- or better.

POLS 560. Seminar in International Relations Theory

3 Credits (3)

A critical overview of leading approaches and controversies in international relations theory. The purpose of the course is to introduce students to contending theoretical perspectives and conceptual frameworks that help make sense of contemporary world politics. MA students taking POLS 560 as part of their core requirements must complete the class with a B- or better.

POLS 563. Issues in International Relations

3 Credits (3)

Selected issues in international relations. May be repeated under a different subtitle for a total of 6 credits.

POLS 564. Advanced National Security Policy

3 Credits (3)

Major topical, theoretical, and regional issues in national security policy.

POLS 565. Advanced Issues in Security Studies

3 Credits (3)

Advanced study of theories, concepts and key issues in the area of security studies, including historical security problems and emerging 21st century challenges related to cyberspace, A.I., information warfare and virtual deterrence.

Learning Outcomes

1. Analyze international issues from a security studies perspective and examine major theoretical approaches (or "paradigms") of security studies.
2. Critically examine the historical evolution and the most prominent and contemporary challenges of security studies.
3. Synthesize and articulate important debates in the security studies literature and connect them to current national, regional, and global challenges and crises.

POLS 567. Advanced Issues in Terrorism

3 Credits (3)

Advanced study of theories of the causes of terrorism, responses to varieties of terrorism, and major issues in the study of terrorism, historically and today

Learning Outcomes

1. Examine core ideas in studies of terrorism (theoretically and factually)
2. Introduce and develop an understanding about the causes of terrorism and possible solutions
3. Acquire abilities to gain knowledge, think critically, analytically, and synthetically of countries and violence, and varieties of terrorism over time and throughout the world.

POLS 568. Advanced Issues in Human Security

3 Credits (3)

Advanced study of major theories, concepts and issues in the study of human security, such as environmental crises, public health, and cybersecurity of the virtual self.

Learning Outcomes

1. Identify and critically evaluate the major concepts and practices in human security;
2. Define, identify and critically think about key issue areas in human security.
3. Develop a coherent body of research in regard to a human security topic of your interest; engage with complex knowledge about human security and apply your analysis to a specific phenomenon.
4. Investigate current, global efforts and challenges in regard to human security.

POLS 569. Advanced Issues in Globalization

3 Credits (3)

Analysis of the globalization process. Covers theories of globalization; global economy; political globalization; global culture; transnational social movements; transnational migration and world labor market; global cities; local-global linkages. Same as SOCI 5460. May be repeated up to 3 credits.

POLS 570. Seminar in Comparative Politics

3 Credits (3)

Examination of methods used for comparing various types of political entities. Investigation of criteria needed to examine a concept across cultures or national boundaries. MA students taking POLS 570 as part of their core requirements must complete the class with a B- or better.

POLS 574. Contemporary Comparative Studies

3 Credits (3)

Major topical, theoretical, and regional issues in international politics. May be repeated once.

POLS 578. Seminar in the U.S.-Mexican Border

3 Credits (3)

An analysis of the political environment along the United States-Mexico border and a survey of the literature available for a number of contemporary issues.

POLS 579. Seminar in Mexican Politics

3 Credits (3)

Advanced research on politics and government of Mexico.

POLS 580. Seminar in Political Theory

3 Credits (3)

Examination of major issues in political theory, including democracy, sovereignty, classical and modern traditions of thought. May be repeated with different subject matter. MA students taking POLS 580 as part of their core requirements must complete the class with a B- or better.

POLS 587. Seminar in Religion and Politics**3 Credits (3)**

Historical, theoretical and comparative analyses of the interaction between politics and religion.

POLS 593. Issues in Public Law**3 Credits (3)**

Selected issues in public law. May be repeated under a different subtitle for a total of 6 credits.

POLS 596. International Law**3 Credits (3)**

Nature, growth and scope of law of nations; rights and obligations of states in peace and war; current issues.

POLS 598. Special Research Programs**1-3 Credits**

Individual investigations either theoretical, analytical or experimental. Three credits may be taken per semester for a total of 6 credits for thesis students, and 9 credits for non-thesis students. Consent of instructor required.

POLS 599. Master's Thesis**1-15 Credits**

Thesis.

PORT-PORTUGUESE

PORT 1110. Portuguese I**3 Credits (3)**

Designed for students with no previous exposure to Portuguese, this course develops basic listening, speaking, reading, and writing skills. This is an introductory course aimed at teaching the student to communicate in Portuguese in everyday situations.

Learning Outcomes

1. Students can communicate and exchange information about familiar topics using phrases and simple sentences, sometimes supported by memorized language.
2. Students can handle most short social interactions in everyday situations by asking and answering simple questions.
3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.
8. Students can make connections between beliefs, behaviors and cultural artifacts of the Portuguese-speaking world, and make informed cross-cultural comparisons.

PORT 1120. Portuguese II**3 Credits (3)**

A continuation of Portuguese I, students will develop a broader foundation in skills gained during the first semester, including understanding, speaking, reading and writing Portuguese. Students will also gain more in-depth knowledge of Portuguese-speaking cultures.

Prerequisite: C or better in PORT 1110 or consent of instructor.

Learning Outcomes

1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write about familiar topics and present information using a series of simple sentences.
4. Students can understand the main idea in short, simple messages and presentations on familiar topics.
5. Students can understand the main idea of simple conversations that they overhear.
6. Students can understand the main idea of short and simple texts when the topic is familiar.
7. Students can begin to narrate and describe simple events in the past.
8. Students can make broader connections between beliefs, behaviors and cultural artifacts of the Portuguese-speaking world, and make informed cross-cultural comparisons.

PORT 364V. Brazilian Culture Through Popular Music**3 Credits**

This course will present students with an overview of Brazilian popular music, from the late nineteenth century to the present day, concentrating on the 60s, 70s, 80s of the 20th Century. It aims to discuss topics about cultural aspects and current issues in Brazil. It is designed to give students some introductory experience in Portuguese language and emphasizes skill development and refinement in the area of critical reading and writing.

Learning Outcomes

1. Be able to identify and distinguish the Brazilian musical styles including in the course.
2. Informatively discuss the main historical events in Brazil from the XVI to the XXI Century.
3. Be able to link the different musical styles to specific periods and events in Brazilian history.
4. Evaluate Brazil's the triple heritage (Indigenous, European, and African) and how it reflects on the notion of being Brazilian.
5. Demonstrate insight of how globalization has influenced Brazilian music, as well as of the transnational aspects of Brazilian music.
6. Be able to use the previous knowledge to discuss current notions of Brazilian identity, as well as recent developments in Brazilian music and society.
7. Be able to informatively relate Brazilian culture to their own.

PORT 453. Independent Luso-Brazilian Studies**1-3 Credits (1-3)**

Individualized, self-paced projects for advanced students in Luso-Brazilian studies. May be repeated up to 12 credits. Consent of Instructor required.

PORT 513. Graduate Portuguese for Romance Language Students I**3 Credits (3)**

Portuguese for beginners at the graduate level. May be completed on campus or via Study Abroad. Credit can be applied towards fulfilling the second language requirement. Credit is not accepted towards any graduate level major or minor.

PORT 514. Graduate Portuguese for Romance Language Students II**3 Credits (3)**

Portuguese for beginners at the graduate level. May be completed on campus or via Study Abroad. Credit can be applied towards fulfilling

the second language requirement. Credit is not accepted towards any graduate level major or minor.

Prerequisite(s): Language placement exam or C or better in PORT 513, or consent of instructor.

PSYC-PSYCHOLOGY

PSYC 1110G. Introduction to Psychology

3 Credits (3)

This course will introduce students to the concepts, theories, significant findings, methodologies, and terminology that apply to the field of psychology.

Learning Outcomes

1. Explain how the scientific method and psychological research methodologies are used to study the mind and behavior.
2. Recall key terms, concepts, and theories in the areas of neuroscience, learning, memory, cognition, intelligence, motivation and emotion, development, personality, health, disorders and therapies, and social psychology.
3. Explain how information provided in this course can be applied to life in the real world.
4. Identify the major theoretical schools of thought that exist in psychology as they relate to the self, the culture, and the society.

PSYC 2110. Social Psychology

3 Credits (3)

This course is an introduction to the scientific study of human social influence and interaction, and explores how an individual's actions, emotions, attitudes and thought processes are influenced by society and other individuals. May be repeated up to 3 credits.

Prerequisite: PSYC 1110G, MATH 1215, and ENGL 1110G.

Learning Outcomes

1. Identify concepts, theories, scientific methods, and research findings relevant to social psychology.
2. Explain how situational, social, and individual factors influence behavior.
3. Apply social psychological concepts to real-life events, current social issues and problems, and one's own life.

PSYC 2120. Developmental Psychology

3 Credits (3)

Study of human physical and psychological change and stability from a lifespan development perspective. May be repeated up to 3 credits.

Prerequisite: PSYC 1110G, MATH 1215, and ENGL 1110G.

Learning Outcomes

1. Explain theories, methods and research findings of lifespan developmental psychology.
2. Describe the interaction between physical, cognitive, and psychosocial development across the lifespan.
3. Compare and contrast major developmental theories and discuss what each brings to or adds to the study of lifespan developmental psychology.
4. Identify factors that influence psychological development across the lifespan.
5. Apply basic principles of developmental psychology to one's own life experiences.
6. Analyze historical and cultural factors that influence development across the lifespan.

PSYC 2210. Abnormal Psychology

3 Credits (3)

This course provides students with an introduction to the field of abnormal psychology. Subject areas include history, methods, theories, etiologies, classification and treatment of disorders. May be repeated up to 3 credits.

Prerequisite: PSYC 1110G, MATH 1215 and ENGL 1110G.

Learning Outcomes

1. Recognize terms used within the field of abnormal psychology.
2. Compare various methods for defining abnormal behavior.
3. Evaluate the development of classification systems that define "normal" and "abnormal" from historical, social, and cultural contexts.
4. Critically evaluate the symptoms and etiologies of mental health disorders in the current psychological diagnostic system.
5. Describe treatment modalities for mental health disorders.
6. Identify biological and psychological processes in mental health disorders.

PSYC 2220. Cognitive Psychology

3 Credits (3)

The course provides an overview of human cognitive processes such as attention, perception, memory, language, categorization, decision-making, reasoning, and problem solving. Includes methods, theories, and applications. May be repeated up to 3 credits.

Prerequisite: PSYC 1110G, MATH 1215, and ENGL 1110G.

Learning Outcomes

1. Describe research findings in the major areas of human cognition.
2. Differentiate the research methods used to study the various topics in cognitive psychology.
3. Apply theories of cognition to the results of laboratory research.
4. Apply the research on cognitive psychology to topics in the real world.

PSYC 2221. Applied Psychology

3 Credits (3)

Explanation of the psychological principles of everyday living. Emphasizes motivation, learning of intelligent behavior, and applications of psychology to social issues. Community Colleges only.

Learning Outcomes

1. The objective of this course is to orient students to the personality characteristics, interpersonal competencies, ethical decision-making skills, and other professional traits associated with pursuing a career in a helping profession.
2. Identify the requirements for becoming a helping professional, characteristics of a skilled helper, and cultural factors that impact helping professionals
3. Explain your personal strengths and weaknesses as a potential helper.
4. Demonstrate appropriate helping strategies based upon the special characteristics of clients.
5. Compare the capabilities that individual, family, group, community, and online interventions offer you as a future helper.
6. Identify the ethical and legal issues that impact helping professionals
7. Analyze the potential impact of your future ethical and professional standards as a helping professional
8. Explain how your role as a helping professional is impacted by your professional affiliation and ethical principles

- Analyze how worsening personal problems and increasing stress can impact the kinds and quality of our responses to life and the people around us.

PSYC 2230. Psychology of Adjustment

3 Credits (3)

This course focuses on the individual's adjustment to society, and the application of psychological principles to the understanding of adjustment.

Learning Outcomes

- Explain the internal and external factors associated with the psychology of adjustment.
- Evaluate contributions from psychology to adjustment concepts and processes.
- Describe the different explanations of how individuals adjust to their environments.
- Describe how self-identities develop and how they affect relations with others.
- Identify resources available for assistance with adjustment-related concerns.

PSYC 2250. Brain and Behavior

3 Credits (3)

A general survey of the biological foundations of behavior and mental processes. Students will gain an understanding of anatomy, physiology, and chemistry of the nervous system and their relationships to human behavior. May be repeated up to 3 credits.

Prerequisite: PSYC 1110G, MATH 1215 and ENGL 1110G.

Learning Outcomes

- Identify and describe basic neuroanatomical structures and functions.
- Identify and describe chemical processes of the nervous system.
- Apply course concepts to psychological processes, such as learning, memory, sensation, perception, drive states, sleep, and language.
- Apply course concepts to psychological disorders, such as schizophrenia and mood and anxiety disorders.
- Describe the techniques used to study the relationship between brain and behavior.

PSYC 2311. A Study of Substance Abuse through Learning

3 Credits (3)

Physiological and psychological impact of drug use on human behavior. Emphasizes practical applications of intervention and prevention in the community. Community Colleges only.

Learning Outcomes

- Through readings and discussions, students will be able to describe the role that gender, ethnicity, and age have in alcohol and drug use.
- Through readings and discussions, students will be able to learn past and current perspectives of addiction.
- Through readings, discussions and student presentations, students will be able to distinguish between different types of abuse-able drugs and be able to classify them.
- Through readings, discussions, lectures and guest speaker's students will be able to describe the role of addiction and criminal behavior.
- Through readings and discussions, students will be able to discuss the Models and Theories of Drug Dependence and Addiction.
- Through readings, discussions and evaluation of case studies students will be able to discuss the definitions of Substance Abuse, Dependence Addiction.

- Through readings and discussions, students will be able to acquaint themselves with the effects of Addictive Behavior on Family Systems.
- Through readings discussions, students will be able to Discuss Disorders Co-Occurring with Substance Abuse
- Through readings and community service learning outing, students will be able to discuss how important the concepts of Prevention, Intervention and Treatment in drug addiction.1
- Through readings and community service learning outing students will be able to discuss Alcohol/Drug Recovery Treatment Relapse Prevention 1
- Through completion of Service Learning and field assignment students will be able to discuss the role of AA/NA in Recovery Treatment. 1
- Through attendance of a Drug Court Hearing students will be knowledgeable of the role of Drug Courts in prevention and treatment of drug addiction.

PSYC 311. Advanced Research Seminar

4 Credits (2+4P)

Psychological research in conjunction with designing, conducting, writing, and presenting an independent research project. May also include various computer applications. Will discuss issues regarding application to graduate programs. Course should be taken no later than the first semester of senior year.

Prerequisite: PSYC 310.

PSYC 3110. Experimental Methods

4 Credits (2+4P)

The basic skills of literature search, experimental design, research methodology, and research reporting are emphasized; includes laboratory. May be repeated up to 4 credits.

Prerequisite: PSYC 1110G, and either MATH 1350G, MATH 2350G, or A ST 311.

PSYC 3120. Psychological Measurement

3 Credits (3)

The objective of this class is for you to develop broad conceptual knowledge, as well as specific concrete skills, when developing, analyzing and interpreting psychological measures and the data that come from them. We will learn through in-depth discussion and hands-on applications: e.g., exploring the purpose and meaning of measurement, taking a wide range of actual measures, analyzing measurement data in a variety of different ways. Overall, you will learn from this class whether a measure/test is measuring what we think it should, on the basis of reliability, validity, and fairness.

Prerequisite: PSYC 1110G, PSYC 2110, PSYC 2220.

Learning Outcomes

- Learn how to develop, analyze, and interpret psychological measures.
- Learn how to determine whether a measure/test is measuring what we think it should, on the basis of reliability, validity, and fairness.

PSYC 315. Emotion

3 Credits (3)

An overview of the past century of research on human emotion from William James to Antonio Damasio. Explores a cognitive science perspective on emotion that includes questions about developmental, physiological, and evolutionary aspects of emotion and an exploration of the proximate and ultimate functions of emotion. Topics range from understanding the feeling component of emotion to understanding the role of facial displays of emotion.

Prerequisite(s): PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311G, and PSYC 310 or consent of instructor.

PSYC 320. Learning**3 Credits (3)**

Covers: habituation, Pavlovian conditioning, Thorndikian learning, stimulus generalization, transfer of training, and the learning and forgetting of related and unrelated material. May be repeated up to 3 credits.

Prerequisite: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310.

Learning Outcomes

1. Recognize and distinguish between various learning situations, especially classical/Pavlovian and Instrumental learning and their many facets and applications.
2. Identify some of the key conditions necessary for learning to take place, and that may prevent learning from taking place – rather more nuanced than most intro psych books suggest.
3. Identify and evaluate different basic situations to suggest how learning might be structured to cause changes in behavior in both humans and other animals.

PSYC 321. Psychology of Personality**3 Credits (3)**

Introduces personality theories and supporting research. Psychoanalytic, physiological, and behavioral theories as they apply to personality are examined. Focuses on normal personality functioning.

Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310.

PSYC 324. Sexual Behavior**3 Credits (3)**

Examines viewpoints of the evolution, control and function of human sexual behavior. Includes human sexuality, reproduction, male-female conflicts and the social implications of sex. Prerequisites: PSYC 1110G, MATH 1215, and ENGL 1110G

PSYC 325. Health Psychology**3 Credits (3)**

Life stress, surgical stress, coronary-prone behavior, biofeedback, pain control, psychosocial approaches to geriatrics and cancer, behavioral treatments for addictions, obesity, and interpersonal issues in health care.

Prerequisite: PSYC 1110G.

PSYC 330. Psychology and the Law**3 Credits (3)**

Discretionary practices in the judicial system including pretrial procedures, jury selection, jury decision making, eyewitness testimony, insanity, expert witnesses, and probation judgments.

Prerequisite: PSYC 1110G.

PSYC 359. Psychology of Gender**3 Credits (3)**

Examines theories and research on the psychological functioning of women and men in North American society, including influential theories of gender in psychology and current controversies in the psychological literature. Topics include those unique to women and unique to men in development across the lifespan, work, physical and mental health, sexuality, victimization, gender stereotypes, gender comparisons in abilities and personality, and biological, social, and cultural influences on behavior. Crosslisted with: GNDR 359.

Prerequisite: PSYC 1110G.

PSYC 370. Special Topics**1-3 Credits**

May be taken under different subtitles announced in the Schedule of Classes for unlimited credit. May be repeated for a maximum of 12 credits.

Prerequisite: PSYC 1110G.

PSYC 376. Evolutionary Psychology**3 Credits (3)**

This course introduces the student to the science of Evolutionary Psychology. In this class we will explore how evolutionary psychologists think about a variety of topics ranging from our capacity for (and appreciation of) art, emotions, and beauty to an exploration of the "design" of our minds in regards to mating, status striving, social behavior and cultural production.

Prerequisite(s): PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311G, and PSYC 310 or consent of instructor.

PSYC 380. Perception**3 Credits (3)**

Primary emphasis on vision. Topics include measurement of sensations, development of visual-motor coordination, reading, speech perception, picture perception, illusions, 3-dimensional space, and causes and consequences of visual abnormalities. May be repeated up to 3 credits.

Prerequisite: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310.

Learning Outcomes

1. To provide a comprehensive knowledge of topics within sensation and perception, including topics in vision, hearing, smell, taste, and touch.

PSYC 383. Memory**3 Credits (3)**

Examines facets of human memory from the information processing viewpoint, including encoding, storage, and retrieval and memory-aiding techniques.

Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310 or consent of instructor.

PSYC 400. Research**1-3 Credits**

Individual research projects supervised by a department faculty member. May be repeated for a maximum of 6 credits.

Prerequisites: PSYC 310 and consent of instructor.

PSYC 401. Directed Readings**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisites: PSYC 1110G and consent of instructor.

PSYC 402. Field Experience**1-3 Credits**

Working with preschool, juvenile delinquent, handicapped, aged, convict, or mentally ill. Approximately five hours scheduled work per week per credit. May be repeated to 6 credits.

Prerequisites: 6 psychology credits and consent of instructor.

PSYC 430. Human-Computer Psychology**3 Credits (3)**

Theories, methodologies, and data from psychology applicable to interface design, with an emphasis on construction and application of conceptual psychological models.

Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310 or consent of instructor.

PSYC 441. History & Systems of Psychology**3 Credits (3)**

History of the scientific study of the mind and behavior. Covers the historical origins of philosophical and scientific approaches to Psychology and the development of influential schools of thought in psychology from the Classical Period through the Modern Era.

Prerequisite: PSYC 1110G and PSYC 310.

Learning Outcomes

1. Apply knowledge of important historical events/figures in scientific psychology by demonstrating an ability to explain how past ideas/thinkers/events have shaped current theory and methodology in scientific psychology.
2. Explain key ideas and concepts in contemporary scientific psychology by demonstrating an ability to draw connections between our current understanding and earlier approaches to the study of the mind.
3. Generate sophisticated arguments/opinions regarding contemporary questions in scientific psychology by demonstrating an ability to frame questions that draw upon a sophisticated understanding of the history of scientific psychology, while also being able to distinguish between well-informed and naive answers to those questions.

PSYC 442. Thinking

3 Credits (3)

Research and theory pertaining to human thinking and problem solving. Effective problem-solving methods and common obstacles to problem solving are analyzed.

Prerequisites: PSYC 1110G and PSYC 310.

PSYC 450. Senior Thesis

3 Credits (3)

A laboratory or field research project conducted under faculty supervision. Requires written research proposal, conduct of research, data analysis, and final written report. May be repeated for a maximum of 6 credits.

Prerequisites: PSYC 310, 6 additional psychology credits, consent of supervising faculty member, and junior or above standing.

PSYC 470. Special Topics

1-3 Credits

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

PSYC 4999. Senior Capstone Seminar in Psychology

1 Credit (1)

In an architectural context, a capstone is the top-most stone that completes a building. In an academic context, a capstone is the final class that completes a student's curriculum. Capstone classes provide students with an opportunity "to demonstrate comprehensive learning in their major through some type of product or performance" (Palomba & Banta, 1999, p. 124). In other words, a capstone is a class in which senior psychology majors are required to pull together what they have learned in their previous classes and use this integrating experience to demonstrate they are capable of doing what they should be able to do when they graduate from the program (e.g., think critically and develop a realistic plan to pursue a career in psychology or a psychology-related field). This process serves a dual purpose. First, it allows psychology majors with a final opportunity to practice and demonstrate the skills they will need to succeed after graduation on the job or in graduate school. Second, it provides the Psychology Department with a final opportunity to assess whether or not it has been successful in its mission to produce competent psychology majors.

Prerequisite: PSYC 1110G, PSYC 3110.

Learning Outcomes

1. Demonstrate critical thinking skills by reading and discussing current topics in Psychology.
2. Demonstrate content knowledge in Psychology by reading and discussing current topics in Psychology.
3. Demonstrate critical thinking skills by performing standardized assessments administered by the Department of Psychology.
4. Demonstrate content knowledge by performing standardized assessments administered by the Department of Psychology.

PSYC 507. Quantitative Methods in Psychology I

3 Credits (3)

Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on distributions, probability and basic inferential statistics in Psychological research. Includes basics of Analysis of Variance (ANOVA) and Multiple Regression in Psychological research. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to recognize appropriate usage of, and be able to implement, basic statistical techniques: Central tendency, variability, z-scores, t-tests, ANOVA, correlation, two predictor regression.

PSYC 508. Quantitative Methods in Psychology II

3 Credits (3)

Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on advanced ANOVA and Multiple Regression in Psychological research. May be repeated up to 3 credits.

Prerequisite(s): PSYC 507 or equivalent.

Learning Outcomes

1. Students will become familiar with situations and applications of advanced ANOVA techniques and Multiple Regression and Correlation.

PSYC 510. Computer Methodology

3 Credits (3)

Use of computers in psychological research with emphasis on developing experimental control programs.

PSYC 520. Learning

3 Credits (3)

Classical areas of learning, including instrumental and classical conditioning paradigms, habituation, reinforcement variables, stimulus generalization and transfer, and memory.

PSYC 522. Sensation and Perception

3 Credits (3)

Stimulus and decision variables in judging auditory and visual events. Topics include: detection of signals; signal intensity versus perceived strength; size, shape, and movement perception; reading and listening.

PSYC 523. Methods in Cognitive Psychology

3 Credits (3)

Experimental and correlational methodologies appropriate for investigating cognitive psychological theories and problems.

Prerequisite(s): PSYC 524 or consent of instructor.

PSYC 524. Cognitive Psychology

3 Credits (3)

Examines theoretical and empirical work on human cognition. Topics include: information processing theories, pattern recognition, memory, attention, language, problem solving, decision making, and reasoning.

PSYC 527. Social Psychology**3 Credits (3)**

Current and traditional theories, research findings, and research methodologies of social psychology.

PSYC 529. Methods in Social Psychology**3 Credits (3)**

Experimental, quasi-experimental, and correlational methodologies appropriate for investigating social psychological theories and problems.

Prerequisite(s): Graduate student in psychology or consent of instructor.

PSYC 540. History and Systems of Psychology**3 Credits (3)**

History of scientific method emphasizing outstanding methodological problems of contemporary science, especially psychology. Covers recent history of psychology and development of schools of psychology.

PSYC 547. Engineering Psychology**3 Credits (3)**

Covers concepts, methods, and findings of human performance. Treats the human as a subsystem that receives, stores and processes information, makes decisions, and acts within a human-machine environment system.

PSYC 550. Teaching of Psychology**3 Credits (3)**

This class serves both new and experienced teachers. It will help new teachers design and conduct a successful course and help experienced teachers improve their teaching.

PSYC 570. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes.

PSYC 590. Research Seminar in Psychology**1 Credit (1)**

Presentations on research by students, faculty, and guest speakers. May be repeated for credit.

PSYC 598. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental. May be repeated for credit.

PSYC 599. Master's Thesis**1-15 Credits**

Thesis.

PSYC 600. Doctoral Research**1-15 Credits**

This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

PSYC 698. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental. May be repeated for credit.

PSYC 700. Doctoral Dissertation**1-15 Credits**

Dissertation.

RADT-RADIOLOGIC TECHNOLOGY

RADT 100. Introduction to Radiologic Technology and Patient Care**3 Credits (3)**

Overview of the profession, including ethics, terminology, and basic radiation protection. Addresses basic and specialized procedures and

topics related to the care of the patient. Restricted to: Community Colleges only. Restricted to Majors.

Learning Outcomes

1. Students will demonstrate the ability to produce diagnostic radiographic images safely.
2. Students will demonstrate effective communication skills.
3. Students will accurately document/record data in accordance with clinical site policies and procedures.
4. Students will demonstrate the ability to use independent judgment.
5. Students will conduct themselves professionally to function effectively as healthcare team members.

RADT 101. Radiographic Positioning I**2 Credits (2)**

Covers radiographic procedure and positioning concepts, techniques, terminology, and mechanics related to the thorax, abdomen, extremities, spine and pelvis. Includes positioning lab and clinical observation.

Learning Outcomes

1. Students will demonstrate the ability to produce diagnostic radiographic images safely.
2. Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions.
3. Students will demonstrate effective communication skills. (CO-three, CO-four alignment)
4. Students will accurately document/record data in accordance with clinical site policies and procedures.
5. Students will demonstrate the ability to use independent judgement.
6. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.

RADT 101 L. Radiographic Positioning I Applied Clinical Skills**1 Credit (3P)**

Applied clinical skills lab in radiographic procedures and positioning concepts, techniques, terminology, and mechanics related to the thorax, abdomen, extremities, spine and pelvis.

Corequisite: RADT 101.

Learning Outcomes

1. Students will demonstrate the ability to safely produce diagnostic radiographic images.
2. Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions.
3. Students will demonstrate effective communication skills.
4. Students will accurately document/record data in accordance with clinical site policies and procedures.
5. Students will demonstrate the ability to use independent judgement.
6. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.

RADT 102. Radiographic Positioning II**2 Credits (2)**

Continuation of RADT 101. Includes skull, gastrointestinal, urinary, reproductive, biliary systems, and more advanced skeletal positions. Includes positioning lab and clinical observation. Restricted to: Dona Ana campus only. Restricted to Majors.

Prerequisite: RADT 101.

Learning Outcomes

1. Students will demonstrate the ability to produce diagnostic radiographic images safely.

2. Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions.
3. Students will demonstrate effective communication skills.
4. Students will accurately document/record data in accordance with clinical site policies and procedures.
5. Students will demonstrate the ability to use independent judgment.
6. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.
7. Students will conduct themselves professionally to function effectively as healthcare team members.

RADT 102 L. Radiographic Positioning II Applied Clinical Skills
1 Credit (3P)

Continuation of RADT 101. Applied Clinical Skills lab: Includes skull, gastrointestinal, urinary, reproductive, biliary systems, and more advanced skeletal positions.

Corequisite: RADT 102.

Learning Outcomes

1. Students will demonstrate the ability to produce diagnostic radiographic images safely.
2. Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions.
3. Students will demonstrate effective communication skills.
4. Students will accurately document/record data in accordance with clinical site policies and procedures.
5. Students will demonstrate the ability to use independent judgment.
6. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.
7. Students will conduct themselves professionally to function effectively as healthcare team members.

RADT 103. Introduction to Radiographic Imaging
2 Credits (2)

Provides the student with an in-depth knowledge of radiographic exposure technique and the factors affecting radiographic image quality. Restricted to majors.

Learning Outcomes

1. Students will demonstrate the ability to produce diagnostic radiographic images safely.
2. Students will demonstrate effective communication skills.
3. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.

RADT 103 L. Intro to Radiographic Imaging Applied Clinic Skills
1 Credit (3P)

Applied clinical skills lab to provide the student with an in-depth knowledge of radiographic exposure technique and the factors affecting radiographic image quality. Restricted to majors.

Corequisite: RADT 103.

Learning Outcomes

1. Students will demonstrate the ability to produce diagnostic radiographic images safely.
2. Students will demonstrate effective communication skills.
3. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.

RADT 104. Special Radiologic Modalities
2-3 Credits (2-3)

Discussion of various special procedures used in medical imaging such as, angiography, ultrasound, computerized tomography, magnetic

resonance imaging, digital imaging, nuclear medicine, radiation therapy, etc.

Prerequisite: RADT 103.

Learning Outcomes

1. Students will be able to appropriately position patients and to identify radiographic anatomy and pathological conditions.
2. Students will demonstrate appropriate and effective communication skills.
3. Students will conduct themselves in an ethical and professional manner and function effectively as a member of the healthcare team in accordance with the American Registry of Radiologic Technologists (ARRT) Standards and the American Society of Radiologic Technologist (ASRT) Code of Ethics.

RADT 105. Radiographic Physics and Equipment
3 Credits (3)

Fundamentals of radiographic physics and imaging theory. Includes the atom, electromagnetism, x-ray production and interaction, electric x-ray circuitry, digital fluoroscopic units and digital x-ray equipment, and quality assurance/control. With brief overview of mammography, computed tomography (CT), and MRI imaging.

Prerequisite/Corequisite: RADT 103.

Learning Outcomes

1. Students will demonstrate the ability to produce diagnostic radiographic images safely.
2. Students will demonstrate the ability to use independent judgment.
3. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.

RADT 110. Radiographic Pathology
3 Credits (3)

Overview of pathology demonstrated by radiographic procedures. Restricted to RADT majors.

Prerequisite: RADT 154.

Learning Outcomes

1. Students will be able to position patients and identify radiographic anatomy and pathological conditions appropriately.
2. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.
3. Students will demonstrate the ability to use independent judgment.

RADT 111. Radiographic Positioning I Practicum
1 Credit (4P)

Practicum in radiographic procedures and positioning concepts, techniques, terminology, and mechanics related to the thorax, abdomen, extremities, spine and pelvis.

Corequisite: RADT 101.

Learning Outcomes

1. Students will demonstrate the ability to safely produce diagnostic radiographic images.
2. Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions.
3. Students will demonstrate effective communication skills.
4. Students will accurately document/record data in accordance with clinical site policies and procedures.
5. Students will demonstrate the ability to use independent judgement.
6. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.

RADT 112. Radiographic Positioning II Practicum**1 Credit (4P)**

Continuation of RADT 101. Practicum: Includes skull, gastrointestinal, urinary, reproductive, biliary systems, and more advanced skeletal positions.

Corequisite: RADT 102.

Learning Outcomes

1. Students will demonstrate the ability to produce diagnostic radiographic images safely.
2. Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions.
3. Students will demonstrate effective communication skills.
4. Students will accurately document/record data in accordance with clinical site policies and procedures.
5. Students will demonstrate the ability to use independent judgment.
6. Students will conduct themselves professionally to function effectively as healthcare team members.
7. Students will conduct themselves in a professional manner to function effectively as a member of the healthcare team.

RADT 154. Radiographic Anatomy and Physiology**3 Credits (3)**

Basic A&P for radiographic application. Includes a systems approach to body structures and organs as they relate to anatomical projections, radiographic identification, and various imaging modalities.

Prerequisite: AHS 153 or AHS 140 or BIOL 2210 or BIOL 1130, or consent of instructor.

Learning Outcomes

1. Students will be able to position patients and identify radiographic anatomy and pathological conditions appropriately.
2. Students will demonstrate the ability to use independent judgment.
3. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.

RADT 156. Independent Study**1-6 Credits (1-6)**

Individual studies/research on topics related to the radiological sciences. May be repeated for a maximum of 6 credits. Restricted to: Community Colleges only.

RADT 190. CT Equipment and Methodology**3 Credits (3)**

Skill development in the operation of computed tomographic equipment, focusing on routine protocols, image quality, and quality assurance and radiation protection. Restricted to CTOM (Certificate) and/or RADT Majors. Restricted to Community College Campuses only.

Learning Outcomes

1. Demonstrate acquisition of comprehensive technical knowledge by obtaining a seventy-five percent or greater on all quizzes and exam assessments (this is in alignment with the scoring expectations for the national registry exam).
2. Manipulate and choose the appropriate scan parameters and technical factors on CT equipment while applying the technical science supporting the decision.
3. Demonstrate appropriate use of post-processing options and provide diagnostic quality images.
4. Abide by radiation safety and dosimetry standards for patient care by demonstrating ALARA standards.
5. Select CT scan manipulations for optimal demonstration of anatomic region, according to protocol (i.e. delayed imaging, multiplanar

reconstructions, filters, etc.) and with safe use of iodinated contrast mediums.

6. Recognize and reduce factors that may inhibit diagnostic image quality.

RADT 191. Computed Tomography (CT) Imaging and Equipment**4 Credits (4)**

This course serves as an introduction to computed tomography (CT) for current radiologic technology students. Course will include information on clinical equipment and application of x-rays in CT, CT image formation, evaluation, and archiving, patient radiation safety and dose, and patient interactions and management for imaging. Restricted to CTOM (Certificate) and/or RADT Majors. Restricted to Dona Ana Campus only.

Learning Outcomes

1. Demonstrate acquisition of comprehensive technical knowledge by obtaining a seventy-five percent or greater on all quizzes and exam assessments (this is in alignment with the scoring expectations for the national registry exam).
2. Identify critical components of CT system equipment and what their purposes are in creating a CT image.
3. Identify CT parameters which allow for safely administering radiation dose; particularly to pediatric patients.
4. List and define the steps required to acquire a CT image, including the theory behind x-ray interaction/absorption/attenuation, detector capabilities, appropriate reconstruction options, and computer equipment.
5. Identify image display functions and radiology informatic options.
6. Identify the major technical components of image display in CT and common artifacts, including how to reduce artifacts.

RADT 200. Radiation Biology and Protection**2 Credits (2)**

Biological effects of ionizing radiation on cells and tissues. Includes radiation measurements, policies and protection measures for self, patients, and others.

Prerequisite: RADT 103.

Learning Outcomes

1. Students will demonstrate the ability to produce diagnostic radiographic images safely.
2. Students will demonstrate the ability to use independent judgment.
3. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.

RADT 201. Clinical Practicum I**4 Credits (32P)**

Supervised practice in a radiology department under direct supervision of a registered technician. Includes film critiques.

Prerequisite: RADT 105.

Learning Outcomes

1. Students will demonstrate the ability to produce diagnostic radiographic images safely.
2. Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions.
3. Students will demonstrate effective communication skills.
4. Students will accurately document/record data in accordance with clinical site policies and procedures.
5. Students will demonstrate the ability to use independent judgement.
6. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.

- Students will conduct themselves professionally to function effectively as healthcare team members.
- Students will identify various opportunities for professional growth within medical imaging sciences.

RADT 202. Clinical Practicum II

6-11 Credits (32P)

Continuation of RADT 201. Student will work under indirect supervision of registered personnel.

Prerequisite: RADT 201.

Learning Outcomes

- Students will demonstrate the ability to safely produce diagnostic radiographic images.
- Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions.
- Students will demonstrate effective communication skills.
- Students will accurately document/record data in accordance with clinical site policies and procedures.
- Students will demonstrate the ability to use independent judgement.
- Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.
- Students will conduct themselves in a professional manner to function effectively as a member of the healthcare team.
- Students will identify various opportunities for professional growth within medical imaging sciences.

RADT 203. Clinical Practicum III

3 Credits (3P)

Continuation of RADT 202: Student will work under indirect supervision of registered personnel.

Prerequisite: RADT 202.

Learning Outcomes

- Students will demonstrate the ability to safely produce diagnostic radiographic images.
- Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions.
- Students will demonstrate effective communication skills.
- Students will accurately document/record data in accordance with clinical site policies and procedures.
- Students will demonstrate the ability to use independent judgement.
- Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.
- Students will conduct themselves in a professional manner to function effectively as a member of the healthcare team.
- Students will identify various opportunities for professional growth within medical imaging sciences.

RADT 204. Special Modalities Practicum IV

3 Credits (32P)

Continuation of 203 to include special rotations in advanced imaging modalities.

Corequisite: RADT 104.

Learning Outcomes

- Students will demonstrate the ability to safely produce diagnostic radiographic images.
- Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions.
- Students will demonstrate effective communication skills.

- Students will accurately document/record data in accordance with clinical site policies and procedures.
- Students will demonstrate the ability to use independent judgement.
- Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.
- Students will conduct themselves in a professional manner to function effectively as a member of the healthcare team.
- Students will demonstrate the ability to use independent judge.
- Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed. 1
- Students will conduct themselves in a professional manner to function effectively as a member of the healthcare team.

RADT 205. Radiographic Image Critique

1-2 Credits (1-2)

Review of radiographs produced in clinical settings to evaluate anatomy and technical issues. Restricted to RADT majors.

Prerequisite: RADT 201.

Learning Outcomes

- Students will demonstrate the ability to safely produce diagnostic radiographic images.
- Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions.
- Students will demonstrate effective communication skills.
- Students will accurately document/record data in accordance with clinical site policies and procedures
- Students will demonstrate the ability to use independent judgement.
- Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.
- Students will conduct themselves in a professional manner to function effectively as a member of the healthcare team.

RADT 206. Applied Radiographic Procedures

3 Credits (3)

Capstone course : Advanced course which integrates the principles and techniques of radiologic technology. Restricted to RADT Majors.

Prerequisite: RADT 202.

Learning Outcomes

- Students will demonstrate the ability to produce diagnostic radiographic images safely.
- Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions.
- Students will demonstrate effective communication skills.
- Students will accurately document/record data in accordance with clinical site policies and procedures.
- Students will demonstrate the ability to use independent judgement.
- Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.
- Students will conduct themselves in a professional manner to function effectively as a member of the healthcare team.

RADT 207. Cross Sectional Anatomy for Medical Imaging

3 Credits (3)

Anatomic relationships that are present under various sectional orientations as depicted by computed tomography or magnetic resonance imaging. Restricted to CTOM (Certificate) and/or RADT Majors. Restricted to Community College Campuses only.

Learning Outcomes

1. Recognize course format and expectations by achieving at least a ninety-percent each on the Syllabus Quiz, Netiquette and Introductory Discussions.
2. Identify and label the anatomy associated with the topical outline in diagnostic CT images.
3. Critique CT images for the presence or absence of anatomy and pathology in deciding whether the image is appropriately positioned and diagnostic for radiologist assessment.
4. Locate anatomical systems and possible pathology based on background knowledge of typical anatomical locations and identify normal course of system function for appropriate positioning, patient instructions, and CT imaging.
5. Apply knowledge in testing environment mimicking that which is expected for the ARRT Registry.

RADT 208. Practicum I (Computed Tomography)**2 Credits (8P)**

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinic professional. Restricted to Restricted to CTOM (Certificate) and/or RADT Majors. Restricted to Community College Campuses only.

Learning Outcomes

1. Navigate this Canvas course and demonstrate understanding of clinic and course expectations by attending live Orientation and completing the Syllabus Quiz with at least a ninety percent. (CO-one)
2. Communicate effectively with patients to successfully perform CT procedures. (CO-two): Examples of communication include: gathering patient history and any known allergies, screening for pre-existing conditions such as diabetes, gaining an understanding the location of the patient's pain (if applicable) and what may be the cause of it (i.e. trauma, strain, family history, etc.), and ensuring the patient's exam is warranted and is not a duplicate).
3. Properly prepare patients for the type of exam they are scheduled for. (CO-three)
4. Demonstrate competence in intravenous procedures. (CO-four). Competence includes: checking blood for kidney function and understanding normal vs. out-of-range lab values, safely and cleanly starting an IV, choosing the correct type and amount of contrast media, choosing the correct method of injection (either by hand or at a controlled pace via a bolus injector), monitoring the patient during and after the IV injection, and responding to any reactions.
5. Recognize iodinated contrast composition, risks, and proper use (including bolus timing) according to type of CT procedure. (CO-five)
6. Follow radiation safety and dosimetry standards for patient care. (CO-six)
7. Select appropriate CT protocols for respective patient exams. (CO-seven)
8. Exhibit competence in CT physics and instrumentation through safe CT scanner operation. (CO-eight)
9. Perform complete, diagnostic quality CT imaging procedures. (CO-nine)

RADT 209. Practicum II (Computed Tomography)**2 Credits (8P)**

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinic professional. (Capstone Course).

Restricted to Restricted to CTOM (Certificate) and/or RADT Majors.

Restricted to Community College Campuses only.

Learning Outcomes

1. To qualify as a complete, diagnostic quality CT imaging procedure the candidate must demonstrate appropriate: Evaluation of requisition and/or medical record; Preparation of examination room; Identification of patient; Patient assessment and education concerning the procedure; Documentation of patient history including allergies; Patient position; Protocol selection; Parameter selection; Image display, filming and archiving; Documentation of procedure, treatment and patient data in appropriate record; Patient discharge with post-procedure instructions; Standard precautions /radiation protection; Preparation and/or administration of contrast media; Initiate scan and evaluate the resulting images for: Image quality (e.g., motion, artifacts, noise); Optimal demonstration of anatomic region (e.g. delayed imaging, reconstruction spacing, algorithm, slice thickness); Exam completeness

RADT 210. Practicum III (Computed Tomography)**2 Credits (8P)**

Continuation of RADT 209: Advanced health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinic professional. Upon completion, students will be able to assume most of the duties of an experienced imaging professional in Computed Tomography.

Prerequisite: RADT 209.

Learning Outcomes

1. To qualify as a complete, diagnostic quality CT imaging procedure the candidate must demonstrate appropriate: Evaluation of requisition and/or medical record; Preparation of examination room; Identification of patient; Patient assessment and education concerning the procedure; Documentation of patient history including allergies; Patient position; Protocol selection; Parameter selection; Image display, filming and archiving; Documentation of procedure, treatment and patient data in appropriate record; Patient discharge with post-procedure instructions; Standard precautions /radiation protection; Preparation and/or administration of contrast media; Initiate scan and evaluate the resulting images for: Image quality (e.g., motion, artifacts, noise); Optimal demonstration of anatomic region (e.g. delayed imaging, reconstruction spacing, algorithm, slice thickness); Exam completeness

READ-READING

READ 3110. Instruction for Special Reading Needs**3 Credits (3)**

Emphasizes appropriate techniques for teaching reading to learners with special needs. Restricted to: TEP, EED, ECED, SED, and SPED majors. May be repeated up to 3 credits.

Learning Outcomes

1. Students will demonstrate basic knowledge of the five domains of reading;
2. Students will demonstrate knowledge of characteristics of reading disabilities (including dyslexia) and the cognitive and linguistic difficulties that may underlie these disabilities;
3. Students will recognize the cultural, environmental and social factors that can impact reading success;
4. Students will explore instructional practices in phonological awareness, phonics, spelling, vocabulary and comprehension that are consistent with current scientific research findings;

- Students will use or analyze informal and/or criterion-based assessments for determining students' skills in phonological awareness, word identification, and reading fluency and for determining appropriate instructional goals for students;
- Students will be able to develop a Professional Learning Community by researching and sharing the effectiveness of various strategies/methods/commercial programs for different domains of reading.

READ 3996. Special Topics

1-3 Credits (1-3)

Each course will be identified by a qualifying subtitle. A maximum of 3 credits in any one semester and a grand total of 6 credits. May be repeated up to 6 credits.

Learning Outcomes

- Engage in the study of a specific literacy topic.

READ 4310. Elementary School Literacy I

3 Credits (2+2P)

Reading development, curriculum, and instruction in the elementary grades. Required of all elementary education majors. Restricted to: TEP-EED majors. May be repeated up to 3 credits.

Learning Outcomes

- Articulate an understanding of developmental theories and processes and their implication for appropriate methods of teaching reading;
- Demonstrate knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework;
- Provide and use anti-bias literacy materials and experiences, including primary language materials;
- Plan appropriate whole group, small group and individual activities that include culturally and linguistically responsive instruction and appropriate accommodations for working with children with special needs;
- Understand and articulate the concept of emergent literacy and the processes toward becoming an authentic reader and writer;
- Understand the role of family and community in literacy development and respect and promote the use of the child's home language for learning;
- Engage in reflection on current theoretical perspectives on the reading process and the role of print literacy in schools and our society;
- Demonstrate knowledge of and use effectively, a wide range of literacy assessment strategies and instruments to determine a child's strengths and areas of need.

READ 4320. Elementary School Literacy II

3 Credits (2+2P)

Reading development in curriculum and instruction with assessment and evaluation in the elementary grades (K 8). Restricted to: TEP-EED majors. May be repeated up to 3 credits.

Prerequisite: READ 4310.

Learning Outcomes

- Engage in reflection on current theoretical perspectives on the reading process, such as understanding linguistics, psycholinguistics, sociolinguistics and their relationships in the reading process, and the role of literacy in schools and our society;
- Apply knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework to include culturally and linguistically responsive instruction and

appropriate accommodations for working with children with special needs;

- Evaluate instructional materials in terms of their approach to reading, consider their possible use with children, and adapt the materials so that they reflect an appreciation for child-centeredness and cultural diversity in learning;
- Use miscue analysis and other literacy assessment tools to understand, describe, and evaluate students' reading strategies and formulate an instructional plan tied to assessment;
- Utilize children's literature, including multicultural, multilingual children's literature to plan, implement and reflect on innovative strategies for literacy scaffolding;
- Define oneself as a literate person and revalue readers and writers, and users of language.

READ 4330. Content Area Literacy

3 Credits (2+2P)

Surveys integrated reading/writing/discursive practices in middle/secondary content areas. Taught with READ 5330. Restricted to: TEP-SED majors. May be repeated up to 3 credits.

Learning Outcomes

- Analyze literacy processes, as they pertain to adolescent learners.
- Discuss current trends and issues in content area literacy instruction with a specific focus on practices that promote achievement and equity.
- Evaluate instructional practices that help students use reading, writing, speaking, listening, viewing and visually representing to learn the content areas.
- Illustrate ethical reasoning and decision making in your approach to content area literacy education.
- Integrate research, reflection, and best practices that positively impact students in a diverse society.

READ 5210. Language and Literacy Acquisition

3 Credits (3)

Framework and strategies of language and literacy acquisition with attention to bilingual learners and the interrelationship among reading, writing, and oral language. May be repeated up to 3 credits.

READ 5220. Sociopsycholinguistics of Reading

3 Credits (3)

Examines current research on reading process, learning to read, and teaching children to read and evaluates current programs and materials. May be repeated up to 3 credits.

READ 5310. Elementary School Literacy I

3 Credits (2+2P)

Reading development, curriculum, and instruction in the elementary grades. Same as READ 4310 with differentiated assignments for graduate students. May be repeated up to 3 credits.

Corequisite: ECED 5810, EDUC 5310, and EDUC 5320.

Learning Outcomes

- Articulate an understanding of developmental theories and processes and their implication for appropriate methods of teaching reading;
- Demonstrate knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework;
- Provide and use anti-bias literacy materials and experiences, including primary language materials;
- Plan appropriate whole group, small group and individual activities that include culturally and linguistically responsive instruction and

appropriate accommodations for working with children with special needs;

5. Understand and articulate the concept of emergent literacy and the processes toward becoming an authentic reader and writer;
6. Understand the role of family and community in literacy development and respect and promote the use of the child's home language for learning;
7. Engage in reflection on current theoretical perspectives on the reading process and the role of print literacy in schools and our society;
8. Demonstrate knowledge of and use effectively, a wide range of literacy assessment strategies and instruments to determine a child's strengths and areas of need.

READ 5320. Elementary School Literacy II

3 Credits (2+2P)

Reading development in curriculum and instruction with assessment and evaluation in the elementary grades (K-8). Same as READ 4320 with differentiated assignments for graduate students. May be repeated up to 3 credits.

Prerequisite: READ 5310.

Corequisite: EDUC 5330.

Learning Outcomes

1. Engage in reflection on current theoretical perspectives on the reading process, such as understanding linguistics, psycholinguistics, sociolinguistics and their relationships in the reading process, and the role of literacy in schools and our society;
2. Apply knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework to include culturally and linguistically responsive instruction and appropriate accommodations for working with children with special needs;
3. Evaluate instructional materials in terms of their approach to reading, consider their possible use with children, and adapt the materials so that they reflect an appreciation for child-centeredness and cultural diversity in learning;
4. Use miscue analysis and other literacy assessment tools to understand, describe, and evaluate students' reading strategies and formulate an instructional plan tied to assessment;
5. Utilize children's literature, including multicultural, multilingual children's literature to plan, implement and reflect on innovative strategies for literacy scaffolding;
6. Define oneself as a literate person and revalue readers and writers, and users of language.

READ 5330. Content Area Literacy

3 Credits (3)

Surveys integrated reading/writing/discursive practices in middle/secondary content areas. "Master' plus Secondary Licensure students Only" and "TEP admission required" May be repeated up to 3 credits.

Prerequisite: SPED 5105, EDUC 5120, EDUC 5110.

Learning Outcomes

1. Define the purpose of schooling begin to articulate the implications for the teacher, youth, teaching, and learning.
2. Explore the historical dimensions of reading instruction in secondary education.
3. Explore the quality and character of life in schools along with the implications for all stakeholders.
4. Explore the roles of reading, writing, listening, and speaking in the content areas.

5. Discuss general pedagogical considerations that extend across all subject matter.
6. Promote the concept that learning in all areas is more authentic and meaningful when knowledge of diverse youth and their communities, content, and pedagogy are valued.
7. Practice strategies that integrate literacy, content, and knowledge of youth.
8. Explore literature in the content area.
9. Develop lesson plans that combine reading, writing, listening, and speaking in the content area that support diversity, integrate technology, and promote effective communication 1
10. Examine the needs of struggling readers. 1
11. Examine the Common Core Standards. 1
12. Engage in research and writing that supports the development of your professional identity as an educator and graduate-level student.

READ 5340. Literacy Assessment and Evaluation

3 Credits (3)

Theoretical and practical aspects of using formal and informal assessment and evaluation procedures in literacy curriculum and instruction. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to understand and implement various strategies for assessing and evaluating the literacy practices and knowledge of students.

READ 5350. Adult and Family Literacy

3 Credits (3)

Principles, practices, and instructional materials for adult and family literacy. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to understand and implement various strategies for engaging students and their families through literacy practices in a variety of classroom and home settings.

READ 5360. Digital Literacies

3 Credits (3)

Digital Literacies study focuses on the multiple relationships between how we express ourselves to one another and the multiple technological systems and networks that provide context, meaning, and shape to those expressions in both social and academic spaces. This course is designed to examine new literacies theory as it applies to teaching applications and current research on digital literacies within K-12 education. As 21st Century practitioner scholars, we are concerned with both the social aspects of literacy practices, understanding that school-based operations are inseparable from the sociocultural contexts in which they are enacted. Must be an NMSU graduate student to participate in this course.

Prerequisite: READ 5340 with a B- or better.

Learning Outcomes

1. Critically assess K-12 implementation of digital literacies across content area curriculum and instruction.
2. Examine seminal and current research on digital literacies' theory, pedagogy, and practice.
3. Determine the level of cultural relevance in schools and pedagogies for 21st Century students.
4. Interpret how social categories relevant to digital literacy contribute to construction of identity.

5. Develop a critical digital pedagogy that addresses the literacy practices of all learners.

READ 5410. Theory and Pedagogy of Literature for Children and Adolescents

3 Credits (3)

This course provides an in-depth exploration of pedagogy and theory related to literature for adolescents. Students must be in Graduate Standing. May be repeated up to 3 credits.

Learning Outcomes

1. Analyze literacy processes, as they pertain to adolescent learners.
2. Discuss current trends and issues in content area literacy instruction with a specific focus on practices that promote achievement and equity.
3. Evaluate instructional practices that help students use reading, writing, speaking, listening, viewing and visually representing to learn the content areas.
4. Illustrate ethical reasoning and decision making in your approach to content area literacy education.
5. Integrate research, reflection, and best practices that positively impact students in a diverse society.

READ 5420. Theory and Pedagogy of Writing

3 Credits (3)

This course is designed to examine critical writing theory and pedagogy for K-12 teaching and learning, including inclusive and multicultural approaches, with an emphasis in constructive, collaborative practices, and the integration of digital tools across several genres of writing. Through sequential, thematic units, coursework will emphasize: 1) the study of formative theories along with the development of instructional practices to promote achievement and equity in writing education; 2) the application of these skills through pedagogy and curriculum building, and 3) the construction of broad understandings of craft within the context of the current policies and standards which impact education both regionally and nationally.

Learning Outcomes

1. Critically assess writing curriculum and instruction in K-12 learning environments.
2. Develop a critical writing pedagogy that addresses the literacy practices of all learners.
3. Measure the alignment of writing structures in schools with students' cultural literacies.
4. Interpret how social categories relevant to education contribute to construction of identity.
5. Formulate engaging strategies that develop writers who are competent in multiple genres.

READ 5990. Practicum in Literacy Education

1-6 Credits (1-6)

Supervised laboratory experience with children with reading difficulties. The student implements a program of specific procedures to aid the disabled reader. May be repeated up to 6 credits.

Prerequisite: READ 5340.

Learning Outcomes

1. Students will be able to understand and implement various strategies for assessing and evaluating the literacy practices and knowledge of students.

READ 5992. Special Studies in Literacy

1-6 Credits (1-6)

Each study will be designated by a qualifying subtitle. Taught with READ 6992. May be repeated up to 99 credits.

Learning Outcomes

1. Engage in a specific literacy topic.

READ 5996. Selected Topics in Literacy

1-6 Credits (1-6)

Offered under different subtitles in the Schedule of Classes. Taught with READ 6996 with differentiated subjects for doctoral students. May be repeated up to 6 credits.

Learning Outcomes

1. Engage in the study of a specific literacy topic.

READ 6110. Critical Issues in Literacy Education

3 Credits (3)

Critical issues from historical to current perspectives. May be repeated up to 3 credits.

Learning Outcomes

1. Understand the multiple critical issues central to literacy education from both a historical and contemporary perspective.

READ 6120. Multiple Critical Literacies

3 Credits (3)

An exploration of the multiple literacies that operate on the individual, classroom, community, cultural and societal levels. Same as BLED 6120. May be repeated up to 3 credits.

READ 6130. Multiculturalism, Literature, and Inquiry

3 Credits (3)

Advanced exploration and examination of critical multicultural language education vis-a-vis children's adolescent, young adult, and adult literature, with an eye toward problematizing assumptions about literacy, articulating issues of social justice and enacting transactive, transformative pedagogy. May be repeated up to 3 credits.

Learning Outcomes

1. Understand the theories and approaches necessary for conducting inquiry reading and writing.

READ 6210. Ethnography of Reading and Writing

3 Credits (3)

Covers the dynamics of data interpretation and critical analysis in the study of literacy. May be repeated up to 3 credits.

Learning Outcomes

1. Understand the theories and approaches necessary for conducting ethnographic studies in reading and writing.

READ 6320. Praxis and Reflexivity

3 Credits (3)

The cyclical research processes of continuous self and systemic (re)evaluation vis-a-vis classroom, community, and society with an eye toward reflection, growth, change, and larger forms of social agency. Restricted to doctoral-level students of any major. Same as BLED 6220, EDUC 6220. May be repeated up to 3 credits.

READ 6991. Doctoral Research in Literacy

1-15 Credits (1-15)

Research on topic of interest. May be repeated up to 88 credits.

Learning Outcomes

1. Engage in the study of a specific literacy topic at the doctoral level.

READ 6992. Special Studies in Literacy

1-6 Credits (1-6)

Offered under different subtitles in the Schedule of Classes. Taught with READ 5992 with differentiated assignments for doctoral students. May be repeated up to 6 credits.

Learning Outcomes

1. Engage in the study of a specific literacy topic at the doctoral level.

READ 6996. Selected Topics in Literacy

1-6 Credits (1-6)

Offered under various subtitles that indicate the subject matter. Same as READ 5996. May be repeated up to 99 credits.

Learning Outcomes

1. Engage in the study of a specific literacy topic at the doctoral level.

READ 6997. Independent Study Topics in Reading

1-6 Credits (1-6)

A problem and seminar course for those pursuing an advanced degree. Each course will have an appropriate subtitle. May be repeated up to 99 credits.

Learning Outcomes

1. Engage in the study of a specific literacy topic at the doctoral level.

READ 6999. Research Project

1-15 Credits (1-15)

Offered primarily for those pursuing the research requirement for the Ed.S. degree. Each research project will be designated by a qualifying subtitle. May be repeated up to 88 credits.

Learning Outcomes

1. Engage in the study of a specific literacy topic at the doctoral level.

RESP - RESPIRATORY THERAPY

RESP 110. Respiratory Therapy I

3 Credits (3)

Introduction to basic respiratory care techniques. Includes history, professional organizations, medical gas administration, oxygen therapy, cardiopulmonary AP, patient assessments, and medical terminology. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 110 L. Respiratory Therapy I Lab

2 Credits (2)

Laboratory practice of basic respiratory care procedures. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 115. Respiratory Therapy Pharmacology

3 Credits (3)

Concepts of physics as they apply to the physiology of the lungs. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 120. Respiratory Therapy II

4 Credits (4)

Advanced respiratory care techniques. Emphasis on airway management, aerosol treatment, chest physiotherapy, pharmacology, posture pressure breathing, and pulmonary rehabilitation. Requires a C or better to remain in program. May be repeated up to 4 credits. Students must be admitted into program to enroll in this course. Restricted to Community Colleges campuses only.

Prerequisite(s): RESP 110.

Corequisite(s): RESP 120 L.

RESP 120 L. Respiratory Therapy II Lab

2 Credits (6P)

Continuation of lab practices and procedures learned in RESP 120, Respiratory Care II, using equipment and simulations. Requires a C or better to remain in program. Students must be admitted to the program to enroll in this course. Corequisite(s):RESP 120. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 110, RESP 110L and RESP 112.

RESP 124. Respiratory Therapy II Clinical

3 Credits (9P)

Supervised practice and application in a hospital setting. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 110, RESP 110L and RESP 112.

Corequisite(s): RESP 120 and RESP 120L.

RESP 155. Respiratory Therapy Special Topics

1-4 Credits

Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 10 credits. Consent of instructor required. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): Admission to program.

RESP 210. Respiratory Therapy III

2 Credits (2)

Introduction to adult, mechanical, neonatal ventilator theory and concepts of critical care medicine. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 115, RESP 120, RESP 120L, and RESP 124.

Corequisite(s): RESP 210L.

RESP 210 L. Respiratory Therapy III Lab

2 Credits (2)

Advanced practice procedures using mechanical ventilation devices. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 115, RESP 120, RESP 120 L, and RESP 124.

Corequisite(s): RESP 210.

RESP 224. Respiratory Therapy IV Clinical

3 Credits (9P)

Continuation of RESP 124. Emphasis on mechanical ventilators. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): Admission to program, and RESP 115, RESP 120, RESP 120 L, and RESP 124.

RESP 230. Respiratory Therapy V

3 Credits (3)

Continuation of RESP 215. Emphasis on special modalities. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 230 L. Respiratory Therapy V Lab

2 Credits (2)

Advanced practice and procedures of respiratory care. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 233. Respiratory Therapy Cardiopulmonary

2 Credits (2)

Concepts of physics as they apply to the physiology of the lung. Emphasis on laws pertaining to gas flow, humidity, and the mechanics of the breathing process. Requires a C or better to remain in program.

Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 234. Respiratory Therapy V Clinical

3 Credits (3)

Continuation of RESP 214. Emphasis on special modalities. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 240. Respiratory Therapy VI

3 Credits (3)

Advanced theory of hemodynamics, neonate, pediatric, and new specialties that apply to respiratory care. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 230, RESP 230L, RESP 233 and RESP 234.

Corequisite(s): RESP 240L.

RESP 240 L. Respiratory Therapy VI Lab

2 Credits (6P)

Advanced laboratory practice and procedures. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 230, RESP 230L, RESP 233 and RESP 234.

Corequisite(s): RESP 240.

RESP 242. Pediatric Advanced Life Support (PALS)

1 Credit (1)

Etiology, diagnosis, clinical manifestations, and management of cardiopulmonary disorders related to respiratory care. Restricted to majors.

Corequisite(s): RESP 230.

RESP 243. Respiratory Therapy Neonatal Resuscitation

1 Credit (1)

Advanced practice of the neonatal resuscitation and certification. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 230, RESP 230L, RESP 233, and RESP 234.

Corequisite(s): RESP 240 and RESP 244.

RESP 244. Respiratory Therapy VI Clinical

3 Credits (9P)

Clinical experience on special modalities. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 230, RESP 230L, RESP 233 and RESP 234.

Corequisite(s): RESP 240.

RESP 255. Respiratory Therapy Special Topics

1-4 Credits

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 4 credits. Consent of instructor required. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): Admission to program.

RGSC-RANGE SCIENCE

RGSC 1110. The Range Science Profession

1 Credit (1)

Introduction to scientific disciplines and career opportunities in rangeland science and management.

Learning Outcomes

1. To introduce students to the Range Science program and to a variety of career opportunities in Range Science.
2. To develop an individualized course curriculum that prepares the student to achieve their career goals.
3. To examine opportunities to gain practical work experience through internships and cooperative employment.

RGSC 2110. Introduction to Rangeland Management

3 Credits (3)

This course covers the principles of managing and understanding pasture and rangelands. Plant physiology and ecology, plant communities and rangeland sustainability and how they relate to livestock production and wildlife management will be discussed. Restricted to: Main campus only.

Learning Outcomes

1. Understand rangeland management operations.
2. Identify rangeland plants.
3. Gain a perspective of watershed management.
4. Discuss the management of rangeland resources.
5. Understand the process of rangeland evaluation through a broad understanding of monitoring and production of these rangelands.
6. Gain a perspective of the correlation of rangelands and the economic principles guiding resource management.
7. Understand the process of rangeland condition.
8. Understand the concepts of stocking rates and usage of rangelands.
9. Gain a broad perspective of different classes of land ownership; Tribal, federal, private and state. 1
10. Recognize vegetative communities, ecological sites, plant physiology and application to rangeland management considerations.

RGSC 2996. Special Topics

1-4 Credits

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Learning Outcomes

1. Varies

RGSC 302V. Forestry and Society

3 Credits (3)

Global study of the development and use of forest resources for production of wood, fuel, fiber, and food products. Climatic, edaphic, cultural, and economic influences on forests of the world evaluated. Same as HORT 302V.

RGSC 316. Rangeland Plants

3 Credits (2+3P)

Identification, classification, cultural uses, and economic importance of native and introduced rangeland plants.

RGSC 317. Rangeland Communities

3 Credits (3)

Rangeland associations and communities, their plant species composition, and ecological factors affecting management of communities.

RGSC 318. Watershed Management

3 Credits (2+2P)

Management of rangeland and forest watersheds with emphasis on hydrologic cycle and land use effects on runoff and water quality.

RGSC 325. Rangeland Restoration Ecology

3 Credits (3)

Principles and practices of vegetation management and ecological restoration. Course emphasizes problems associated with rangeland degradation, and implementation of rangeland restoration and improvements.

Prerequisite(s): Sophomore standing or consent of instructor.

RGSC 350. Special Topics

1-4 Credits

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

RGSC 357. Grass Taxonomy and Identification

3 Credits (1+4P)

Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Students must be Junior standing to enroll in this course.

RGSC 390. Internship

1-3 Credits

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Graded S/U.

Prerequisite: consent of instructor.

RGSC 402. Seminar

1 Credit (1)

A seminar course designed to inform students of the career opportunities, develop their interviewing and other interpersonal skills may also include reading, discussions, written reports, and seminar presentations of current relevant literature.

Prerequisite(s): Senior standing.

RGSC 402 H. Range Science Seminar

1 Credit (1)

Taught with RGSC 402 with additional work.

Prerequisite(s): Meets Honors eligibility and/or Crimson Scholar status and senior standing.

RGSC 440. Rangeland Resource Ecology

3 Credits (3)

Plant adaptations to arid environments. Life histories of arid land plants. Biotic interactions among rangeland organisms. Arid land plant communities: their physiognomy, diversity, productivity, and response to disturbance. Arid land ecosystem dynamics.

Prerequisite(s): Senior standing.

RGSC 440 L. Rangeland Resource Ecology Lab

1 Credit (2P)

Living and nonliving factors of the range environment, the life forms and role of range plants and animals on succession and interactions in range ecosystems. Corerequisite(s): RGSC 440.

RGSC 448. Problems

1-4 Credits (1-4)

Individual investigation in a specific area of range science. Maximum of 4 credits per semester and a grand total of 6 credits. Consent of Instructor required.

RGSC 452. Vegetation Measurements for Rangeland Assessment

4 Credits (2+4P)

Sampling principles, sampling design, and measurement methods used to quantify vegetation attributes and to assess the structure and function of rangeland ecosystems. Laboratory emphasizes practical field techniques, quantitative analysis, and interpretation of results.

Prerequisite(s): RGSC 294 and A ST 311.

RGSC 458. Livestock Behavior, Welfare and Handling

3 Credits (2+3P)

Principles of animal behavior and evaluation of management practices on animal welfare in confined and rangeland livestock operations. Low stress livestock handling techniques. Design of livestock handling facilities. Crosslisted with: ANSC 458

Prerequisite(s): RGSC 2110 or ANSC 1120.

RGSC 460. Rangeland and Natural Resource Planning and Management
4 Credits (3+3P)

Planning and problem solving in rangeland and natural resource management. Public land planning and policy. Application of land management principles to resolve rangeland, riparian and habitat issues.

Prerequisite(s): Senior or graduate student standing.

RGSC 485. Land Cover Analysis for Natural Resources

3 Credits (3)

This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis.

RGSC 509. Approaches to Rangeland Research

3 Credits (3)

Experimental design and statistical analysis of experimental results.

Prerequisite(s): A ST 505 or consent of instructor.

RGSC 513. Advanced Rangeland Ecology

3 Credits (3)

Overview of the current state of knowledge in selected areas of rangeland ecology, with emphasis on currently developing ideas and issues relevant to rangeland management.

Prerequisite(s): RGSC 440 or equivalent.

RGSC 515. Graduate Seminar

1 Credit (1)

Current topics. Graded S/U.

RGSC 516. Arid Land Management

3 Credits (3)

Survey of seminal and current literature dealing with management of arid and semiarid lands including soil-plant-animal interactions, plant community ecology, arid land assessment methods, and arid land hydrology.

RGSC 518. Watershed Methods and Management

3 Credits (3)

Management of rangeland and forest watersheds with emphasis on the hydrologic cycle and land use effects on runoff and water quality. Hydrologic monitoring methods problem sets required for graduate credit.

RGSC 520. Arid Land Plant Herbivore Interactions

3 Credits (3)

Survey of seminal and current literature dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.

RGSC 525. Advanced Rangeland Restoration Ecology**3 Credits (3)**

Theory and application of restoration ecology and the principles and practices of ecological restoration. Course emphasizes problems associated with rangeland degradation and highlights current restoration management actions. May be repeated up to 3 credits.

RGSC 550. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

RGSC 551. Earth Data Retrieval**3 Credits (3)**

This course covers topics related to identifying sources, preprocessing, utilizing earth data that can be used to monitor some hydrological and water related variables, vegetation growth and related biophysical properties. The course focuses on developing students' skills on how to handle and analyze high-level large amounts of research data in different formats (i.e. .hdf). The course highlights the use of remote sensing and land surface models-based (NLDAS) earth observation datasets (e.g. NDVI, LST, Ta, and ET). The course uses some open-source tools including Python, API as well as MATLAB. Crosslisted with: WSAM 551.

RGSC 557. Advanced Grass Taxonomy and Identification**3 Credits (1+4P)**

Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Additional writing and grass identification assignments are required for graduate credit.

RGSC 575. Climate Studies, Water and Society**3 Credits (3)**

The course provides a brief description of the Earth's climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water availability) vulnerability of human systems (e.g. agriculture) to climate change, and mitigation and adaptation strategies. Crosslisted with: WSAM 575.

RGSC 585. Land Cover Analysis for Natural Resources**3 Credits (3)**

This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis. Crosslisted with: WSAM 585.

RGSC 589. Landscape Hydrology Modeling**3 Credits (3)**

The course "Landscape Hydrology Modeling" offers topics related to the physical hydrological processes that occur at different spatial and temporal scales in terms of understanding, quantitative evaluation, modeling, and visualization. It addresses precipitation, runoff, infiltration, and evaporation, as well as understanding impact of land use change on these processes. The course highlights and provide training on the use of hydrological modeling tools including WMS software, HydroVIS and ArcGIS software to help students understand, model, manipulate, and visualize hydrological data processes. The course offers hands-

on learning experience on the use of these tools. Consent of Instructor required. Crosslisted with: WSAM 589.

RGSC 598. Special Research Program**1-4 Credits**

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

RGSC 599. Master's Thesis**15 Credits**

Thesis. Consent of Instructor required. Thesis/Dissertation Grading.

RGSC 600. Doctoral Research**1-15 Credits**

Research. Consent of Instructor required. Thesis/Dissertation Grading.

RGSC 616. Advanced Arid Land Management**3 Credits (3)**

In depth discussion of seminal and current literature dealing with management of arid and semiarid lands including land tenure systems, soil-plant-animal interactions (emphasis on livestock grazing), plant community ecology and assessment methods, and arid land hydrology.

RGSC 620. Advanced Arid Land Plant-Herbivore Interactions**3 Credits (3)**

In depth discussion of seminal work dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.

RGSC 698. Special Research Programs**1-4 Credits (1-4)**

Advanced individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

RGSC 700. Doctoral Dissertation**15 Credits**

Dissertation. Consent of Instructor required. Thesis/Dissertation Grading.

RXPP-PRESCRIP PRIV PRAC PSYCH

RXPP 6110. Introduction to Psychopharmacology for Psychologists I**3 Credits (3)**

This course is an introduction to physiology and an overview of gross and microanatomy, with a focus on gross, micro, and chemical anatomy of the nervous system. By the end of the course, psychologists will have an up-to-date understanding of human psychology, anatomy, and neuroanatomy. Doctorate of Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

RXPP 6120. Introduction to Psychopharmacology for Psychologists II**3 Credits (3)**

Principles of organic chemistry and human biochemistry necessary for the understanding of psychopharmacology are discussed and related to the major transmitter systems and dynamics of transmission. By the end of the course, students will have an up-to-date understanding of biochemistry on which to base further didactic study in psychopharmacology. Doctorate of Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

RXPP 6210. Clinical Psychopharmacology I**3 Credits (3)**

This course begins with an introduction to the scope of pharmacology; pharmacoepidemiology, ethical, and legal issues (informed consent, State and Federal regulation of drugs and prescribing, sources of drug information and computer aids) and continues with the principles of pharmacokinetics and pharmacodynamics as they relate to the use of psychotropic medications. It concludes with an introduction to the treatment of anxiety disorders from a biopsychosocial model of care with special emphasis on psychopharmacology for anxiety disorders. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

RXPP 6220. Clinical Psychopharmacology II**3 Credits (3)**

This course is a thorough investigation of the diagnosis and treatment of affective disorders from a biopsychosocial model of care. Particular emphasis is given to psychopharmacological treatment of depressive disorders and bipolar disorders. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

RXPP 6230. Clinical Psychopharmacology III**3 Credits (3)**

This course is an intensive study of the treatment of psychosis from a biopsychosocial model of care. Special consideration is given to: first, second, and third generation antipsychotic drugs and their pharmacology and clinical uses; neurological and metabolic disorders associated with antipsychotic use; and appropriate use of antipsychotics in children and the elderly. Special attention is then given to child and adolescent psychopharmacology, including drugs used in pregnancy and lactation, teratogenicity, embryotoxicity, developmental disorders, conduct disorders, ADHD, and special considerations in use of approved drugs in children. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to the Clinical Psychopharmacology program. May be repeated up to 3 credits.

Learning Outcomes

1. Delineate the biochemical mechanisms underlying the pharmacological efficacy of the three generations of antipsychotic drugs.
2. Differentiate the effects and side effects of first, second and third generation of antipsychotic drugs.
3. Describe the effects of various antipsychotic drugs on the positive and negative symptoms of schizophrenia; including the neurological projections within the Central Nervous System.
4. Describe the biochemical and physiological basis of adverse reactions with antipsychotic treatments.
5. Select anti-psychotics using evidence based criteria and manage the medical issues that arise from their use.
6. Identify the various signs of side effects to antipsychotic drugs and use the appropriate techniques for assessing their severity including the administration of appropriate rating scales assessing those side effects (e.g. AIMS, BMI)
7. Examine the cost-benefit ratio of psychotropic use for adult, child, adolescent and elderly patients with psychotic disorders.
8. Become familiar with current treatment algorithms for the management of psychotic disorders and their limitations.

9. Learn which anti-psychotics that have FDA approval, as well as those that are used off-label in the treatment of children, adolescents and the elderly.

RXPP 6310. Pathophysiology for Psychologists I**3 Credits (3)**

This course is an introduction to human clinical physical assessment, history taking, charting, and laboratory testing and neuroimaging. An important emphasis is in functional neuroanatomy and diagnosis and assessment of neurological disorders; role of different components of human nervous system in health and disease; stroke, seizures, and movement disorders (chorea, athetosis, dystonias, dyskinesias, Parkinsonism, akathisia, iatrogenic neurological disorders). Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

RXPP 6320. Pathophysiology for Psychologists II**1-6 Credits (1-6)**

Physical assessment and pathophysiology of the cardiovascular system is studied in depth: structure and function of the heart and major blood vessels; innervation of the heart and vessels; electrocardiogram; components of blood; lymphatics; and physical assessment of cardiac function. The physical assessment and pathophysiology of eyes, ears, nose, and the immune system are studied in depth; anatomy and physiology of special senses; assessment of cranial nerves and sensory function; immune function and psychoimmunology. The physical examination and pathophysiology of the chest and pulmonary system and its relationship to the cardiac system is also studied. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits.

RXPP 6330. Pathophysiology for Psychologists III**3 Credits (3)**

This course continues with an in-depth study of the chest and pulmonary system: pulmonary function and assessment; respiratory exchange and respiratory involvement in acid: base regulation, disorders of respiratory function. The physical assessment of pathophysiology of the gastrointestinal system is discussed in depth: digestion, absorption and excretion of drugs and nutrients from the GI system; disorders of GI function; hepatic function; innervation of GI tract; endocrine and exocrine functions of GI system; physical assessment of GI function. The functions and pathophysiology of the male and female reproductive system, endocrine system, and renal system are discussed as they relate to psychopharmacology. Doctorate of Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

RXPP 6410. Psychopharmacological Treatment in Special Populations I**3 Credits (3)**

The psychopharmacology of several special populations are discussed in detail in this course. Geriatric psychopharmacology includes: geriatric physiology; cardiac, renal, hepatic changes with aging; pharmacokinetics/dynamics in the elderly; cognition enhancers in Alzheimer's and other dementias. Special treatment of personality disorders, eating disorders, the importance of racial, ethnic, and gender differences and culturally sensitive practice is presented with applications. Pain management psychopharmacology is over-viewed, including: pharmacology of opioid and non-opioid analgesics; pain syndromes; acute and chronic pain; headache; pharmacological and non-

pharmacological approaches to pain management; pharmacology and actions of abused substances: acute effects, withdrawal, biochemistry of tolerance and dependence, brain central reward pathways. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes

1. Use a GFR calculator to assess the renal function of an elderly patient.
2. Select the most appropriate antidepressant medication for an elderly patient considering the patient's current level of renal function.
3. Analyze a patient's medication list and calculate the Beers score for the patients' medication list.
4. Use knowledge gained from analysis of the patient's Beers score to select an appropriate medication for the following conditions: insomnia; psychosis; depression anxiety.
5. List three psychotropic medications that do not require a dose adjustment based on the patient's GFR.
6. Analyze an elderly patient's current medication list using the STOPP/START guidelines.
7. Select the most appropriate medication for a patient experiencing delirium consistent with the STOPP/START guidelines.
8. Calculate an elderly patient's vulnerability score using the VES – thirteen.
9. List three psychotropic medications that are hepatotoxic and should not be used in patients with cirrhosis. 1
10. List the 10 most common medical illnesses in the elderly. 1
11. Calculate the Child-Turcotte-Pugh Score of hepatic function for a patient. 1
12. Review the current availability of empirically validated Decision Support Tools (DST's) for the treatment of Late Life Depression (LLD) and decide whether the use of DST is supported by the evidence. 1
13. Defend a risk/benefit analysis for the use of the following medication classes in the elderly: SGA's; AZD Rx's; hypnotics; mood stabilizers. 1
14. Explain the relationship between outcome and sponsorship in studies of the comparative efficacy of psychotropic medications and psychotherapy in older adults. 1
15. List expected dosage adjustments for benzodiazepines, SSRI's, anticonvulsants, and hypnotics in older adults. 1
16. Select the appropriate medication for each of 5 patients in cases presented during the class.

RXPP 6420. Psychopharmacological Treatment in Special Populations II 3 Credits (3)

The pathophysiology and treatment of substance use disorders from a biopsychosocial model is presented. Issues of medical comorbidity are studied: psychopharmacological treatment in the medically compromised patient, including case studies and review of comprehensive treatment models; mental disorders due to a general medical condition and/or adverse drug reactions; and referral practices to specialists. Diagnostic rating scales and psychiatric instruments of use to the prescribing psychologist are presented. The course ends with an integration of psychotherapy and pharmacotherapy, including ethical issues such as the right to refuse treatment, treatment compliance/adherence, risk management, and the role of the medical psychologist in the modern, integrated healthcare system. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited

circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

RXPP 6510. Supervised Experience in Psychopharmacology I 1-3 Credits (1-3)

In this applied course, students employ their knowledge of psychopharmacology in treatment setting. Students will participate in the treatment of 50 patients for a minimum of 200 hours under the supervision of a physician. Number of credits taken to be determined in consultation with RXPP Training Director. Maximum of 3 credit hours required by degree program. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes

1. Students will complete eighty hours of practicum in a health care setting while supervised by a licensed physician.
2. Students will demonstrate expertise in providing basic vitals, physical assessment, and laboratory interpretation skills they have been taught in class.
3. Students will demonstrate expertise in performing diagnostics (e.g. imaging studies), differential diagnoses, clinical medicine, and instrumentation.

RXPP 6520. Supervised Experience in Psychopharmacology II 1-3 Credits (1-3)

Continuation and completion of supervised experience in RXPP 6510. Students will participate in the treatment of 50 additional patients for a minimum of 200 hours under the supervision of a physician. The RXPP 6510/6520 sequence must be completed no sooner than three months and no later than three years from initiation. Number of credit hours taken to be determined in consultation with RXPP Training Director. Maximum of 3 credit hours required by degree program. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be monitoring the psycho-biosocial treatment of 100 patients, for a minimum of 400 hours.
2. Students will demonstrate expertise in combining psychotropic medication along with psychotherapy.
3. Students will demonstrate knowledge and expertise is practicing enhanced patient education; and making psychotropic medication recommendations, management, and/or consulting with, as needed, allied health professionals.

RXPP 6996. Selected Topics

1-6 Credits (1-6)

Offered under various subtitles which indicate the subject matter covered. A maximum of 6 credits in any one semester and a total of 18 credits overall. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 18 credits.

SIGN-SIGN LANGUAGE

SIGN 1110. American Sign Language I

3 Credits (3)

American Sign Language I is an introductory level language course in the language of the American Deaf Culture. Content includes ASL

vocabulary and conversational skills; linguistic features of ASL; and skills in narrative/storytelling. In-class activities, comprehension and expressive examinations, narrative and storytelling assignments in addition to semester projects are venues for students to demonstrate their learning. In addition, Deaf Culture and Deaf Community issues are addressed. May be repeated up to 3 credits.

Learning Outcomes

1. Engage in basic conversations using ASL, such as introducing oneself, exchanging personnel information, and talking about one's surroundings.
2. Demonstrate the use of grammatical structures, including spatial referencing, use of classifiers, role shifting, ASL syntax, and non-manual signals (NMS).
3. Demonstrate clear sign production using an understanding of sign parameters: handshapes, movement, location, palm orientation, and NMS in targeted lexicon.
4. Demonstrate the use of basic ASL vocabulary and expressions necessary for conversations about real-life situations.
5. Evaluate and provide feedback concerning peers' and one's own uses of ASL.
6. Develop culturally-appropriate behaviors and conversation strategies within a variety of contexts for interacting with people who are Deaf.
7. Demonstrate effective use of comprehension and expressive ASL skills through narrative and/or storytelling activities.
8. Describe issues of the American Deaf community and Culture.

SIGN 1120. American Sign Language II

3 Credits (3)

American Sign Language II is a continuation course that builds on concepts and skills developed in American Sign Language I. Students gain further exposure to ASL structure and grammar, and Deaf Culture and the Deaf community. Emphasis is on increasing students' ability to comprehend other signers and express themselves with more elaboration when conversing or presenting in ASL. May be repeated up to 3 credits.

Prerequisite: SIGN 1110 or consent of instructor.

Learning Outcomes

1. Further develop basic conversational skills in ASL, taking on more complicated topics.
2. Apply knowledge of ASL grammar, including classifiers, spatial referencing and agreement, role shifting, and non-manual markers.
3. Develop ASL vocabulary, fingerspelling, number, narrative and storytelling skills.
4. Evaluate and provide feedback concerning peers' and one's own uses of ASL.
5. Demonstrate effective use of comprehension and expressive ASL skills through conversation, discussion, narrative and/or storytelling activities.
6. Demonstrate knowledge and appreciation of the American Deaf community and ASL.
7. Through first-hand experience in the American Deaf community and ASL, relate and reflect on perspectives of the community.

SIGN 2110. American Sign Language III

3 Credits (3)

This is an intermediate level course in American Sign Language (ASL). Expected areas of intermediate skill and knowledge development include: language comprehension and production, conversational use, narratives, ASL language features and further knowledge of and interaction with Deaf culture and the Deaf community. May be repeated up to 3 credits.

Prerequisite: SIGN 1120.

Learning Outcomes

1. Demonstrate intermediate ASL vocabulary, conversation and narrative/storytelling skills.
2. Demonstrate fundamental ASL features including visual/spatial orientation, constructed dialogue and action, spatial referencing, classifiers, non-manual behaviors and syntax/word order.
3. Demonstrate appropriate use of cultural behaviors and conversational strategies.
4. Translate written and spoken English to ASL and vice versa.
5. Self-evaluate and provide feedback to peers concerning ASL usage.
6. Examine the culture of the American Deaf community through engaging in community activities and its language.

SMET-SCIENCE/MATH/ENG/TECH

SMET 101. Introduction to Science, Mathematics, Engineering, and Technology

1 Credit (1)

An introductory course for science, mathematics, engineering, or technology students, emphasizing introduction to their disciplines. Development of critical thinking and academic success skills for technical disciplines, as well as degree planning for the major.

Learning Outcomes

1. Apply the scientific method of constructing and testing hypotheses.
2. Design and conduct an experiment using Radio Jove.
3. Apply astrobiological knowledge to solve human problems.
4. Develop competence in appropriate scientific laboratory techniques.

SMET 102. Introduction to Engineering Design.

1 Credit (1)

Fundamental concepts of engineering design developed through analysis of case studies and hands-on design projects.

Learning Outcomes

1. Identify assumptions within a given context and be able to predict outcomes through data analysis.
2. Obtain, interpret and analyze numerical information through the use of appropriate tables, diagrams, and algorithms.
3. Develop competency in conveying astrobiological knowledge through laboratory reports and/or written assignments following proper APA documentation style.
4. Design antenna configurations to increase the frequency of the radio Jove.

SMET 201. Research for Visiting Community College Students

1 Credit (1)

Research experience for visiting community college students. Consent of instructor required. Restricted to: Main campus only.

SMET 301. Undergraduate Research Assistantship

0.5 Credits (.5)

Undergraduate research experience in science, technology, engineering, and mathematics. Consent of instructor required. Graded: S/U.

SOCI-SOCIOLOGY

SOCI 1110G. Introduction to Sociology

3 Credits (3)

This course will introduce students to the basic concepts and theories of sociology, as well as to the methods utilized in sociological research. The course will address how sociological concepts and theories can be utilized to analyze and interpret our social world, and how profoundly

our society and the groups to which students belong influence them. Students will be given the opportunity to challenge their “taken-for-granted” or “common sense” understandings about society, social institutions, and social issues. Special attention will also be paid to the intimate connections between their personal lives and the larger structural features of social life. In addition, the implications of social inequalities, such as race/ethnicity, gender, and social class will be central to the course’s examination of social life in the United States.

Learning Outcomes

1. Define sociological perspectives and the contributions that sociological knowledge can bring to the social sciences.
2. Understand the sociological imagination and explain the relationships between social structures, social forces and individuals.
3. Demonstrate the ability to apply the perspectives of symbolic interactionist theory, conflict theory, and structural-functionalist theory to qualitative and/or quantitative data.
4. Understand and explain intersectionality and the connections between race, class, gender, disability, sexual identity and other forms of structural inequality.

SOCI 2230. Sociology of Sexuality

3 Credits (3)

This course explores all aspects of human sexuality from a sociological perspective. Topics include, but are not limited to, sex work, intimate relationships, sexual response, political movements, power, and the social construction of sexuality. The course also considers how various social statuses such as ethnicity, gender, and social class intersect with sexuality.

Learning Outcomes

1. Identify the central research questions, theories, and methodologies used in the study of human sexuality.
2. Identify and describe biological, cultural, social, and psychological sexual behaviors and response across the lifespan.
3. Identify and describe trends and changes that influence sexual attitudes and values in the U.S. and globally.
4. Describe how sexuality is influenced by contextual factors, such as race/ethnicity, gender, socioeconomic status, disability, and nationality.

SOCI 2240. Sociology of Intimate Relationships and Family

3 Credits (3)

This course provides an overview of contemporary intimate relationships and families from sociological perspectives. We will examine intimate relationships and families as social constructions whose meanings have changed over time and from place to place. This course will aid students in developing a greater understanding of intimate relationships and families as institutions in contemporary U.S. society. Intersections of race, class, gender, sexual orientation, nationality, and other factors within these institutions will be addressed. Community Colleges only. May be repeated up to 3 credits.

Learning Outcomes

1. Explain the sociological approaches to researching intimate relationships and families.
2. Describe important sociological research findings concerning intimate relationships and families.
3. Explain how intimate and familial relationships are affected by multiple intersecting inequalities and ongoing events in other social institutions.

SOCI 2261. Issues in Death and Dying

3 Credits (3)

Major personal and social issues related to the process of dying in our culture. Community Colleges only.

Learning Outcomes

1. be able to understand the diversity of the death experience and the various options available in coping with death and bereavement as shown by the student’s participation in class discussions and field trips.
2. better understand death and dying as social phenomena as shown by the student’s reaction papers.
3. have taken an in-depth look at her or his own death with a researched paper. Comprehension will be shown by the student’s grade on the paper.

SOCI 2310G. Contemporary Social Problems

3 Credits (3)

This course studies the nature, scope, and effects of social problems and their solutions. The course will concentrate on sociological perspectives, theories, and key concepts when investigating problems, such as inequality, poverty, racism, alienation, family life, sexuality, gender, urbanization, work, aging, crime, war and terrorism, environmental degradation, and mass media. This course is designed to build students’ sociological understanding of how sociological approaches attempt to clarify various issues confronting contemporary life, as well as how sociologists view solutions to these problems.

Learning Outcomes

1. Identify and explain major social problems in the United States, and how social problems become constructed as problems.
2. Describe and analyze policy related solutions associated with social problems from various perspectives.
3. Critically examine social problems through the use of sociological theories, methods, and empirical techniques.
4. Identify connections, both national and global, between social problems and social inequalities (e.g., social class, race/ethnicity, and gender/sexuality).

SOCI 3110V. Sociology of Religion

3 Credits (3)

Provides an overview of old and new methods and theories for the study of religion. Exposure to the ways groups of people in diverse cultural systems construct and change their religious traditions to serve practical and meaningful ends. May be repeated up to 3 credits.

SOCI 3120V. Introduction to Population Studies

3 Credits (3)

Determinants and consequences of changes in fertility, mortality and migration patterns. Introduction to techniques of demographic analysis. Focus on U.S. and world population issues and their relation to social, cultural, and economic systems. May be repeated up to 3 credits.

SOCI 3150. Social Research: Methods

3 Credits (3)

An introduction to research design and data collection strategies commonly employed in the social sciences. Topics include experiments, survey research and various other quantitative and qualitative methods. May be repeated up to 3 credits.

Prerequisite: SOCI 1110G.

SOCI 3160. Sociological Research: Analysis

3 Credits (3)

Elementary data analysis class emphasizing descriptive and inferential statistical techniques commonly employed in the social sciences. Topics range from one variable analysis through regression and correlation analysis of two variables. May be repeated up to 3 credits.

Prerequisite: SOCI 1110G.

Learning Outcomes

1. Critically evaluate understand social statistics from various common sources such as TV, newspapers, research reports, and scholarly articles. –Assessed via discussion, assignments and exams.

SOCI 3165. Sociological Theory

3 Credits (3)

Analysis of the main historical themes underlying contemporary sociological theory. May be repeated up to 3 credits.

Prerequisite: SOCI 1110G.

SOCI 3240. Sociology of the Family

3 Credits (3)

Family patterns, dynamics, and processes in North American and other contemporary families. Emphasis on diversity. May be repeated up to 3 credits.

Learning Outcomes

1. Family patterns, dynamics, and processes in North American and other contemporary families. Emphasis on diversity.

SOCI 3245V. Comparative Family Systems

3 Credits (3)

A comparative analysis of family forms and characteristics in various societies. An examination of the diversity of family practices among ethnic and class groups in the United States. May be repeated up to 3 credits.

SOCI 3250. Sociology of Childhood

3 Credits (3)

This course examines theories, methods, and empirical research in several areas of the sociology of childhood. Major themes are: (1) how social structure constrains children's lives, (2) how children negotiate, share, and create culture, and (3) how children's experiences vary within and across societies. May be repeated up to 3 credits.

SOCI 3255. Youth and Society

3 Credits (3)

Comparative historical analysis of social, economic and cultural forces affecting young people. Emphasis on organizational and institutional effects on the well being of children and young adults. May be repeated up to 3 credits.

SOCI 3270. Gender and Society

3 Credits (3)

Overview of issues related to gender, including how gender is constructed and reproduced in our society. Gender is examined from social psychological and institutional perspectives. May be repeated up to 3 credits.

SOCI 3310V. Social Issues in the Rural Americas

3 Credits (3)

Discussion of the major social issues facing the rural United States and borderland areas. Topics include the social history, governmental policies, water rights, land issues and labor. May be repeated up to 3 credits.

SOCI 3315. Urban Society in a Global World: Problems, Prospects, and Promises

3 Credits (3)

Identification and analysis of the causes and consequences of social issues in urban environments including poverty, crime, terrorism, urban social policy, suburban flight, disinvestment, and deindustrialization. Special emphasis on global forces affecting global urban environments around the world. May be repeated up to 3 credits.

SOCI 3330. Environmental Sociology

3 Credits (3)

This course provides a sociological examination of the interconnections of human social organization and the biophysical environment. The goal is to make sense of these complex interconnections between society and the environment—including examination of potential causes and solutions to environmental problems in real world settings. May be repeated up to 3 credits.

SOCI 3340V. Social Change

3 Credits (3)

Explanations of autonomous and directed social change as occurring at the individual, organizational, societal, and international levels. Case studies from around the world. May be repeated up to 3 credits.

SOCI 3410. Race and Ethnic Relations

3 Credits (3)

Dynamics of racial prejudice and patterns of racial and ethnic interaction in the United States. May be repeated up to 3 credits.

SOCI 3415. Social Inequality

3 Credits (3)

Analysis of the social distinctions arising from sex, age, occupation, and ethnicity. Emphasis on indicators of social class and patterns of social mobility. May be repeated up to 3 credits.

SOCI 3510. Crime and Society

3 Credits (3)

Analysis of crime at the interpersonal, organizational, and social structure levels in society. Exploration of contemporary images of crime in mass media. Examination of connections between race, class, gender, and crime in U.S. society. May be repeated up to 3 credits.

SOCI 3520. Juvenile Delinquency

3 Credits (3)

Nature, extent, and causes of juvenile delinquency; juvenile justice; modern methods of treatment; programs of prevention. May be repeated up to 3 credits.

SOCI 3610V. Sociology of Pop Culture

3 Credits (3)

This course will provide students with a sociological look at creation, distribution, and effects of popular culture that have shaped, preserved, and conveyed distorted images of social class, race, gender and history to unwary consumers. May be repeated up to 3 credits.

SOCI 3620V. Sports and Society: A Global Perspective

3 Credits (3)

A critical examination of sports in a global context, emphasizing the social and cultural factors that shape the world of sports and the consequences of sports for societies. Course examines issues of social inequality, violence, media and corporate influence, religion and sports, and the student-athlete experience. May be repeated up to 3 credits.

SOCI 3630. Culture and Social Life

3 Credits (3)

What exactly does culture look like, and how precisely does it shape—and is shaped by—social behavior? These are the core questions in the sociology of culture and will be the focus of this course. The course begins with an overview of the various ways that culture has been defined in sociological theory and research. The course will then focus on various topics within the contemporary sociology of culture, including, but not limited to, culture and cognition, the production of culture, culture and politics, and culture and inequality.

Learning Outcomes

1. Finish the course with an understanding of the different ways that culture is defined in sociological research.
2. Understand the various ways that culture affects social behavior and how social behavior shapes and changes culture.

3. Finish the course with a sociological imagination that is expanded to include cultural theory.
4. Finish the course with the ability to formulate research projects that involve cultural theories.

SOCI 3640. Sociology of Digital Media

3 Credits (3)

This course explores how the social, political-economic, and cultural landscape is changing in relation to digital media and information technologies.

Learning Outcomes

1. Develop analytical tools for understanding the complex information society.
2. Examine how the cultural, political, and social environments are changing with the emergence of new media and digital technologies.
3. Place the relationship between society and new media in context – what is interesting about these “new” technologies?
4. Successfully develop, conduct, and present a final project.
5. Understand a central and contemporary issue within the study of social media from a sociological perspective.

SOCI 3645. Music in Society

3 Credits (3)

This course reviews historical, contemporary, and emerging forms of music. We will analyze the fascinating interplay between music and society, delving into how music reflects and shapes cultural attitudes and beliefs. Our focus views music as a primary source of meaning in our lives, exploring individual experiences and collective behavior and analyzing the central role of music in social life and society.

Learning Outcomes

1. Discuss music and its social and individual impact using sociological terms, concepts, and theories.
2. Apply a sociological perspective (using sociological theories and methods) to ask/answer questions about music and music-related topics.
3. Analyze the tremendous influence music has on our understanding and expressions of race, class, gender, sexual orientation, socioeconomic status, and contemporary culture.
4. Examine diversity and culture as they intersect with music in both historical and contemporary contexts.
5. Illustrate the role of music in collective identity and social movements.
6. Identify themselves as competent social actors exploring ways they can make positive contributions to society and be catalysts for change.

SOCI 3650. Film in Society

3 Credits (3)

Using historical, cultural, and social perspectives, this course analyzes the comprehensive scope of classic and contemporary films. It uses examples from a variety of films to discuss how meaning is socially constructed and presented and its overall function in society. We explore the topics of identity, race, social class, gender, sexuality, education, courtship and marriage, religion, and many other elements of society.

Learning Outcomes

1. Express a working knowledge of sociological inquiry and sociological terms, concepts, and the major theoretical approaches that sociologists use to understand the complexities of film in society.

2. Explain how the human experience, personal values, and ideas are shaped and expressed by films at both individual and structural levels.
3. Illustrate expressions of intersectionality and the presentation expressed in contemporary film.
4. Apply a broad, sociological perspective to understand the complex issues involved in the social construction and perpetuation of contemporary social problems.
5. Evaluate the power of classical and contemporary film and their influence on human experience, personal identity, social values and ethics, and American culture.
6. Identify ourselves as competent social actors exploring ways we can make positive contributions to society and be catalysts for change.
7. Develop and express interpretation and analysis of sociological principles through formal and informal writing.

SOCI 4150. Networked and Connected

3 Credits (3)

Introduction to social network analysis in sociology. First half of the course focuses on understanding the structure of social networks. Second half of the course involves examining real-world social networks ranging from romantic relationships to political parties.

Learning Outcomes

1. Finish the course with the ability to interpret, question, and discuss network science theories and methods.
2. Understand which type of network method is appropriate for different kinds of research questions.
3. Finish the course with basic programming and network analysis skills in the R statistical computing environment.

SOCI 4155. Textual Analysis of Digital and Social Media

3 Credits (3)

Introduction to some of the methods that social scientists use to analyze digital and social media. Focus is on developing the fundamentals for designing and conducting text analysis projects.

Learning Outcomes

1. Finish the course with the ability to interpret, question, and discuss text analysis methods accurately.
2. Understand which type of text analysis method is appropriate for different kinds of research questions.
3. Finish the course with basic programming and data analysis skills in the R statistical computing environment.

SOCI 4160. Visualizing Social Life

3 Credits (3)

Introduction to how to communicate sociological findings using graphics. Emphasis is on finding meaningful trends in real-world social science data and creating graphics that best communicate those associations or trends.

Learning Outcomes

1. Finish the course with the ability to create, interrogate, and interpret data visualization.
2. Understand which type of graphic is appropriate for different kinds of social science data.
3. Finish the course with basic programming and data visualization skills in the R statistical computing environment, especially with the ggplot2 package.

SOCI 4240V. Comparative Global Family Systems

3 Credits (3)

The study of families around the world. The comparison will include how capitalism and power differentials have affected the course of family history, gender relations, and family life today. May be repeated up to 3 credits.

SOCI 4310. Community Development

3 Credits (3)

This is a holistic view of community development with an emphasis upon how economic development efforts can become more inclusive and sustainable. Topics include examining what 'community' means, community development versus economic development, and alternative economic activities. May be repeated up to 3 credits.

Prerequisite: SOCI 1110G.

SOCI 4315. Public Sociology

3 Credits (3)

This course examines both the theory and practice of public sociology. The course begins by examining the theoretical aspects, challenges, and critiques informing public sociology. After setting these foundations the remainder of the course examines different ways of applying public sociology, whether in the K-12 classroom, through community engagement activities such as nonprofit work, or other endeavors that seek to make the world a better place.

Learning Outcomes

1. Understand the theoretical foundations and debates within public sociology
- 2) Understand various ways public sociology can be practiced outside academia

SOCI 4320. Social Movements and Activism

3 Credits (3)

An overview and exploration of the key concepts of collective behavior and social movements as they apply to both historical and contemporary trends and movements. We examine also social movement tactics and their effectiveness in shaping policy and social norms. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate understanding of social movement theory and how it applies to particular cases.
2. Identify and analyze how social movements emerge and the conditions that their success depends on.
3. Analyze the role that movements play in transitions to and consolidations of democracy.
4. Critically examine how: a) State repression incites or threatens the development of movements, and b) which strategies movements use for communicating with the larger society.
5. Demonstrate knowledge of a specific social movement and its relations to broader questions of social, economic, political, and cultural transformations.

SOCI 4325. Digital Media and Activism

3 Credits (3)

This course introduces the study of social movements and activism and their relationship with digital and social media.

Learning Outcomes

1. Understand the most relevant theories of social movements and how these have been affected by the new digital media ecology.
2. Critically examine how the qualities and attributes of digital media contribute to the operation, growth, and success of contemporary activism around the world.
3. Place the relationship between social movements and new media in context.

4. Understand a central and contemporary social movement and its use of social media to further its goals.

SOCI 4335V. Advanced Environmental Sociology

3 Credits (3)

Advanced examination of societal responses to environmental problems including social adjustments to natural and technological hazards, sociocultural aspects of technological risk and impact assessment, and emergence of environmental social movements. May be repeated up to 3 credits.

SOCI 4337. Human Society and the Environment

3 Credits (3)

This course explores the relationship between human societies and the natural environment, with an emphasis on both sustainable human and environmental relationships. May be repeated up to 3 credits.

Prerequisite: SOCI 1110G.

SOCI 4410. Diversity in Alternative Families

3 Credits (3)

Cross-cultural examination of diversity among and within families: analysis of family diversity includes consideration of the theoretical frameworks, ideological commitments, personal experiences, and methodological approaches to examine family life. May be repeated up to 3 credits.

SOCI 4420. Sociology of Latinos/as in the United States

3 Credits (3)

In-depth examination and comparative analysis of political and economic issues affecting Latino/a culture and behavior. Includes the Chicano/a and larger Latino/a movements, the border, immigration, language policies, education, religion, labor, and Latina women's issues. Recommended preparatory courses: SOCI 1110G, SOCI 3410, or HIST 367. May be repeated up to 3 credits.

SOCI 4430. International Migration

3 Credits (3)

This course examines international migration as a social process, focusing on the American experience. Students will examine historical and comparative literature on immigration that puts contemporary questions about policy and immigrant assimilation into a broader sociological perspective. May be repeated up to 3 credits.

Prerequisite: SOCI 1110G.

SOCI 4450. Power and Politics in America

3 Credits (3)

This course provides an introduction to the study of Political Sociology with a focus on the United States. Political Sociology studies the social bases of politics and political systems and facilitates the understanding of the processes and consequences of power distributions in the United States. May be repeated up to 3 credits.

Prerequisite: SOCI 1110G.

SOCI 4455. Inequality and Public Policy

3 Credits (3)

This course explores the reciprocal relationship between inequality and public policy, with a particular focus on poverty and anti-poverty policy in the contemporary United States.

Learning Outcomes

1. Understand and compare different ways in which poverty has been historically measured and understood
2. Understand and apply various types of social inequality
3. Critically read and evaluate empirical research measuring, and policy proposals addressing, poverty and inequality

4. Write your own policy evaluation including empirically grounded policy recommendations
5. More effectively participate in policy debates regarding inequality and poverty

SOCI 4460. Globalization**3 Credits (3)**

Analysis of the globalization process. Covers theories of globalization, the global economy, political globalization, global culture, transnational social movements, transnational migration and world labor market, global cities, and local-global linkages. Same as POLS 469. May be repeated up to 3 credits.

SOCI 4510. Social Deviance**3 Credits (3)**

Theoretical approaches to the study of social deviance with emphasis on critical theories. Exploration of forms of deviance in society. Examination of social construction of deviance within mass media and systems of social control. May be repeated up to 3 credits.

SOCI 4555. Sociology of Education**3 Credits (3)**

Socio-political and economic factors that shape the structure and operation of educational institutions in modern complex societies. Socio-historical development of the school as a microcosm of society, with examples from American and other school systems. May be repeated up to 3 credits.

SOCI 4992. Directed Readings**1-3 Credits (1-3)**

Individual readings or research for either majors or nonmajors. Consent of Instructor required. May be repeated up to 6 credits.

SOCI 4996. Special Topics**3 Credits (3)**

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 12 credits.

Learning Outcomes

1. Varies

SOCI 4998. Internship**1-6 Credits (1-6)**

Supervised participation in an appropriate community setting. Taught with SOCI 5998. May be repeated up to 9 credits.

SOCI 4999. Sociology Senior Seminar**3 Credits (3)**

The main goal of this course is to provide Sociology students the opportunity to integrate the knowledge acquired from the classroom with personal real-world experiences in order to explore how a sociological perspective can be applied to one's everyday life and work. Students must be in senior standing to enroll in this course. May be repeated up to 3 credits.

Prerequisite: SOCI 1110G.

Learning Outcomes

1. Refine and demonstrate students' sociological imaginations.
2. Engage in critical self-reflection by practicing sociological mindfulness on a regular basis.
3. Have the opportunity to apply sociological concepts to a real-world setting.
4. Have the opportunity to critically apply and evaluate the utility of select social theories to a real-world setting.
5. Refine critical writing and thinking skills through class discussions.

SOCI 5110. Perspectives on Sociology**3 Credits (3)**

Overview of Sociology and development of students' sociological imaginations. Understanding the place of sociology in career development and the application of Sociology and sociological concepts to the real world. May be repeated up to 3 credits.

Learning Outcomes

1. Refine students' sociological imaginations.
2. Engage in critical self-reflection by practicing sociological mindfulness on a regular basis.
3. Have the opportunity to apply sociological concepts to the real world.
4. Explore how students can utilize sociology in achieving their career goals.
5. Refine students' critical writing and thinking skills through class discussions.

SOCI 5150. Seminar in Social Networks**3 Credits (3)**

Advanced introduction to social network methods. First half of the course focuses on understanding the structure of social networks. Second half of the course involves examining real-world social networks ranging from romantic relationships to political parties. Includes hands-on experience with the R statistical computing environment

Learning Outcomes

1. Finish the course with the ability to interpret, question, and discuss network science theories and methods.
2. Understand which type of network method is appropriate for different kinds of research questions.
3. Finish the course with basic programming and network analysis skills in the R statistical computing environment.

SOCI 5153. Seminar in Sociological Research**3 Credits (3)**

Exploration of research methods, issues, and practical application. Restricted to: Sociology Majors May be repeated up to 3 credits.

SOCI 5155. Seminar in Text Analysis for the Social Sciences**3 Credits (3)**

Advanced exploration into some of the methods that social scientists use to analyze digital and social media. Focus is on developing the fundamentals for designing and conducting text analysis projects. Includes hands-on experience with the R statistical computing environment.

Learning Outcomes

1. Finish the course with the ability to interpret, question, and discuss text analysis methods accurately.
2. Understand which type of text analysis method is appropriate for different kinds of research questions.
3. Finish the course with basic programming and data analysis skills in the R statistical computing environment.

SOCI 5157. Seminar in Qualitative Research Methods**3 Credits (3)**

This course provides an in-depth examination of qualitative research methods, including the logic, time, and purpose of using such methods. Students must be in Graduate standing.

SOCI 5158. Seminar in Visual Ethnographic Methodology**3 Credits (3)**

This course focuses on the potential and the qualities of visual data collection in research and will start with a review of the diversity of research strategies and ethics that incorporate visual data. We will

discuss different ways of using visual methods in research alongside epistemological theory of understanding what it means to look at the world. We will use our own experiences of looking and feeling to consider what visual methods can contribute to effective ethnographic research. Students must be graduate students to enroll.

Learning Outcomes

1. Learn the basic fundamentals of visual qualitative inquiry.
2. Learn the concept of ethics and reflexivity in qualitative research.
3. Learn how to design visual qualitative research.
4. Understand the different methods used in visual qualitative research.
5. Select and use appropriate visual qualitative methods to answer research questions.

SOCI 5160. Seminar in Data Visualization

3 Credits (3)

Advanced exploration into how to communicate sociological findings using graphics. Emphasis is on finding meaningful trends in real-world social science data and creating graphics that best communicate those associations or trends. Includes hands-on experience with the R statistical computing environment, especially the ggplot2 package.

Learning Outcomes

1. Finish the course with the ability to create, interrogate, and interpret data visualization.
2. Understand which type of graphic is appropriate for different kinds of social science data.
3. Finish the course with basic programming and data visualization skills in the R statistical computing environment, especially with the ggplot2 package.

SOCI 5163. Issues in Advanced Quantitative Analysis

3 Credits (3)

Advanced methods of sociological analysis are examined in detail. Restricted to: Sociology majors. May be repeated up to 3 credits.

SOCI 5165. Foundations of Social Theory

3 Credits (3)

Analysis of classical social thought within the discipline. Restricted to: Sociology majors. May be repeated up to 3 credits.

Learning Outcomes

1. Know and have an understanding of the history of social thought in Sociology.
2. Know and have an understanding of the fundamental underlying assumptions of many social theories.
3. Be able to effectively write showing an understanding of the theorists/theories as they apply to social phenomena.
4. Be able to openly discuss with confidence the various tenets of social theory.

SOCI 5166. Seminar in Contemporary Theory

3 Credits (3)

This course equips students with the ability to critically analyze contemporary social theory (post World War II) with a particular focus on how these texts apply theoretical frameworks to pressing issues of our time.

Learning Outcomes

1. Understand the main conceptual and theoretical frameworks that have influenced social research post World War II.
2. Improve critical thinking through cross-cultural and cross-disciplinary analyses of social forces.
3. Identify one's own work and interests within/and in relation to these perspectives.

4. Comprehend and evaluate sociology as a discipline that has been shaped by diverse sets of social phenomena.

SOCI 5170. Seminar in Individual and Society

3 Credits (3)

Examines reciprocal relationship between individual and society. Topics include socialization, social influence and persuasion, group structure and performance, altruism, aggression, interpersonal attraction, group cohesion and conformity, and intergroup conflict. May be repeated up to 3 credits.

Learning Outcomes

1. Know and understand the theoretical antecedents for Social Psychology.
2. Know and understand the fundamental underlying assumptions of Social Psychology approaches in Sociology.
3. Know and understand the history and development of Social Psychological Theories.
4. Be able to effectively write a literature review addressing specific topics utilizing Social Psychology as an underlying framework.
5. Understand the relationship between the individual and society, particularly addressing the relationship between structure and agency.

SOCI 5175. Seminar in Symbolic Interaction

3 Credits (3)

This seminar will provide you a backdrop on Symbolic Interactionism, focusing on the direct and indirect antecedents of the theory, as well as current research and theoretical development up to the present. May be repeated up to 3 credits.

Learning Outcomes

1. Know and understand the theoretical antecedents for Symbolic Interaction.
2. Know and understand the fundamental underlying assumptions of Symbolic Interaction.
3. Know and understand the history and development of Symbolic Interaction.
4. Be able to effectively write a literature review addressing specific topics utilizing Symbolic Interaction as an underlying framework.
5. Be able to openly discuss the various tenets of Symbolic Interaction with confidence.

SOCI 5270. Seminar in Sex and Gender

3 Credits (3)

Comprehensive examination of current gender identity and gender stratification issues. May be repeated up to 3 credits.

Learning Outcomes

1. Gain an understanding of gender from a sociological perspective.
2. Critically examine how gender shapes and is shaped by personal interaction and meaning and how it is embedded in the structure of our social institutions.
3. Understand the relationship between gender, the body, media and violence.
4. Gain competence in discussing the biological and psychological explanations of gender differences as well as in discussing cultural and gender socialization and identity formation.
5. Examine how gender is relevant within the institutions of family, work, and education with particular focus on how gender is linked to inequality.

SOCI 5310. Seminar in Community Development**3 Credits (3)**

This is in an advanced seminar addressing a holistic view of community development with an emphasis upon how economic development efforts can become more inclusive and sustainable. Students must be in a graduate student to enroll. May be repeated up to 3 credits.

Learning Outcomes

1. Define community development.
2. Apply the different theoretical approaches to community development to an issue.
3. Identify the major challenges confronting various communities today.
4. Understand emerging and radical community development initiatives in both theory and practice.

SOCI 5315. Seminar in Public Sociology**3 Credits (3)**

This course examines both the theory and practice of public sociology. The course begins by examining the theoretical aspects, challenges, and critiques informing public sociology. After setting these foundations the remainder of the course examines different ways of applying public sociology, whether in the K-12 classroom, through community engagement activities such as nonprofit work, or other endeavors that seek to make the world a better place.

Learning Outcomes

1. Understand the theoretical foundations and debates within public sociology
2. Understand various ways public sociology can be practiced outside academia

SOCI 5320. Seminar in Social Movements and Activism**3 Credits (3)**

An advanced exploration of the key concepts of collective behavior and social movements as they apply to both historical and contemporary trends and movements. We examine also social movement tactics and their effectiveness in shaping policy and social norms. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate comprehensive understanding of social movement theory and how it applies to particular cases.
2. Identify and analyze how social movements emerge and the conditions that their success depends on.
3. Analyze the role that movements play in transitions to and consolidations of democracy.
4. Critically examine how: a) State repression incites or threatens the development of movements, and b) which strategies movements use for communicating with the larger society.
5. Exhibit scholarly professionalization by successfully developing, conducting and presenting a research project.
6. Demonstrate in-depth knowledge of a specific social movement and its relations to broader questions of social, economic, political, and cultural transformations.

SOCI 5325. Seminar in Digital Media and Activism**3 Credits (3)**

This seminar will investigate the interaction between digital media, social movements, and social change.

Learning Outcomes

1. Demonstrate comprehensive understanding of the most relevant theories of social movements and how these have been affected by the new digital media ecology.

2. Critically examine how the specific qualities and attributes of digital media contribute to the operation, growth, and success of contemporary social movements and activism around the world.
3. Place the relationship between social movements and new media in context – what is interesting about these “new” technologies?
4. Exhibit scholarly professionalization by successfully developing, conducting and presenting a research project.
5. Demonstrate in-depth knowledge of a central and contemporary social movement and its use of social media to further its goals.

SOCI 5335. Seminar Environmental Sociology**3 Credits (3)**

Advanced examination of societal responses to environmental problems including social adjustments to natural and technological hazards, sociocultural aspects of technological risk and impact assessment, and emergence of environmental social movements. May be repeated up to 3 credits.

SOCI 5337. Seminar in Human Society and the Environment**3 Credits (3)**

This is an advanced seminar exploring the relationship between human societies and the natural environment, with an emphasis on both sustainable human and environmental relationships. May be repeated up to 3 credits.

Prerequisite: Graduate Student Status.

SOCI 5410. Seminar in Race and Ethnic Relations**3 Credits (3)**

In-depth analysis of the dynamics of prejudice/discrimination and patterns of intergroup interaction in the U.S. May be repeated up to 3 credits.

Learning Outcomes

1. Identify a diverse set of critical sociological approaches to studying race, ethnicity, and racism within the United States.
2. Understand the social construction of race, racialized modernity, and the unequal distribution of racialized power and privilege in local, regional, national, and transnational contexts.
3. Examine the racialized structures of US society and give special consideration to how processes, discourses, and structures of white supremacy and racialization intersect with other systems of inequality, particularly gender, class, sexuality, nation, and settler colonialism.

SOCI 5415. Seminar in Social Stratification**3 Credits (3)**

Advanced examination of theories of stratification and current methods of stratification research. Focus on differences by ethnicity, race, class and gender. May be repeated up to 3 credits.

Learning Outcomes

1. Gain an appreciation of the role of stratification as a powerful determinant of the opportunities that individuals experience in modern societies.
2. Critically consider the functions and repercussions of stratification for the individual and society.

SOCI 5420. Seminar in Sociology of Latinos/as in the United States**3 Credits (3)**

In-depth examination and comparative analysis of political and economic issues affecting Latino/a culture and behavior. Topics include the Chicano/a and larger Latina/o movements, the border, immigration, language policies, education, religion, labor and Latina women's issues. May be repeated up to 3 credits.

Learning Outcomes

1. Examine the challenges currently facing the Latino population in the U.S. with special attention to three Latino subgroups: Puerto Ricans, Mexican-Americans, and Cubans.
2. Identify that latina/o experiences and identities are far from homogenous.
3. Understand how then has a sense of "Latino community" been created if this is the case? What is a Latina/o? And, how are individual identities among the many Latina/o identities shaped by difference?
4. Know the major Latino peoples, their immigration, migration and settlement patterns, identity formation, socioeconomic and labor conditions, politics, gender relations, and bilingualism.

SOCI 5430. Seminar in International Migration**3 Credits (3)**

This course examines international migration as a social process, focusing on the American experience. Students will examine historical and comparative literature on immigration that puts contemporary questions about policy and immigrant assimilation into a broader sociological perspective. Students must be Graduate students to enroll. May be repeated up to 3 credits.

Learning Outcomes

1. Acquire in-depth knowledge, and develop a broad understanding of the historical and theoretical development, of the sociological sub-field of immigration.
2. Develop an ability to examine the processes involved in international migration, and the socioeconomic trajectories of different immigrant groups in the United States, analytically, critically, and comparatively.
3. Develop an understanding of how various social constructs (such as national origin, nativity, generation, length of time spent in the United States, citizenship, legal status, class, race, ethnicity, gender, and religion) influence immigrants' social positions and organize their daily lives.

SOCI 5440. Seminar in Sociological Perspectives on the U.S.-Mexico Border**3 Credits (3)**

Theoretical perspectives and current research on U.S.-Mexico border region, including migration, identity, health, gender, and environment. May be repeated up to 3 credits.

Learning Outcomes

1. Use history, sociology, geography, anthropology, and other disciplines as a framework for understanding the border and analyzing border lives and structural dynamics.
2. Understand border identities, including nationality, ethnicity, and class, and apply them to analyzing border lives.
3. Understand border orientations (nationalist/binationalist; unicultural/bicultural) and apply them to analyzing border lives.
4. Recognize and analyze multiple, often conflicting, perspectives on border issues.
5. Apply the "multiple perspective" approach to U.S.-Mexico migration and know objective facts, humanistic understandings, and policy options for that issue.
6. Use the tools of "culture" and "social structure" to understand border working people, especially those facing poverty, low wages, low or no benefits, and discrimination in public.
7. Use comparisons to other borders to understand two important topics: (a) Border symbols and politics; (b) Border consumption, commerce, smuggling, and other cross-border transactions.

SOCI 5450. Seminar in Power and Politics in the United States**3 Credits (3)**

This is an advanced seminar addressing the study of Political Sociology with a focus on the United States. Political Sociology studies the social bases of politics and political systems. It facilitates an understanding of the processes and consequences of power distributions in the United States. Students must be Graduate students to enroll. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate comprehensive understanding of the most relevant theories of political sociology and how these apply to current political issues of the United States.
2. Critically examine the role that civil society plays in shaping contemporary political processes in the United States.
3. Critically examine the role that civil society plays in shaping contemporary political processes in the United States.
4. Exhibit scholarly professionalization by successfully developing, conducting and presenting a research project.
5. Demonstrate in-depth knowledge of a central and contemporary political issue and its relations to broader questions of social, economic and cultural transformations in America.

SOCI 5455. Seminar in Inequality and Public Policy**3 Credits (3)**

This course explores the reciprocal relationship between inequality and public policy, with a particular focus on poverty and anti-poverty policy in the contemporary United States.

Learning Outcomes

1. Understand and compare different ways in which poverty has been historically measured and understood.
2. Understand and apply various types of social inequality.
3. Critically read and evaluate empirical research measuring, and policy proposals addressing, poverty and inequality.
4. Write your own policy evaluation including empirically grounded policy recommendations.
5. More effectively participate in policy debates regarding inequality and poverty.

SOCI 5460. Advanced Issues in Globalization**3 Credits (3)**

Analysis of the globalization process. Covers theories of globalization; global economy; political globalization; global culture; transnational social movements; transnational migration and world labor market; global cities; local-global linkages. Same as POLS 569. May be repeated up to 3 credits.

SOCI 5510. Issues in Social Deviance**3 Credits (3)**

Selected forms of deviant behavior, social issues, and social problems. May be repeated up to 3 credits.

SOCI 5515. Sociology of Organizations**3 Credits (3)**

Sociological models of formal organizations relevant to business, education, government, healthcare, military, and religion. Focus on internal organizational structure and dynamics plus the reciprocal relationship between organizations and their operating environment. May be repeated up to 3 credits.

SOCI 5555. Advanced Sociology of Education**3 Credits (3)**

Socio-political and economic factors that shape the structure and operation of educational institutions in modern complex societies. Socio-

historical development of the school as a microcosm of society, with examples from American and other school systems. May be repeated up to 3 credits.

SOCI 5610. Seminar in Popular Culture

3 Credits (3)

This course delves into Popular Culture and how Sociologists define and evaluate Popular Culture in the world today. Students will learn about diverse forms of Popular Culture, their meanings, and how social theory is applied to how Popular Culture is commodified and consumed. Students must be a graduate student to enroll.

Learning Outcomes

1. Explain and show an advanced understanding of the relationship of popular to culture.
2. Have an in-depth knowledge of Critical Theory as it applies to the culture industry.
3. Understand the relationship of the individual and social issues to both popular culture and technologically driven cultural changes.
4. Apply critical thinking about the popular culture experienced in your day-to-day existence and its meaning to everyday life.
5. Read empirical and theoretical writings, summarize and expand upon their core ideas.
6. Be able to discuss as well as compare and contrast various issues associated with popular culture.

SOCI 5630. Seminar in Culture and Social Life

3 Credits (3)

What exactly does culture look like, and how precisely does it shape—and is shaped by—social behavior? These are the core questions in the sociology of culture and will be the focus of this course. The course begins with an overview of the various ways that culture has been defined in sociological theory and research. The course will then focus on various topics within the contemporary sociology of culture, including, but not limited to, culture and cognition, the production of culture, culture and politics, and culture and inequality.

Learning Outcomes

1. Finish the course with an understanding of the different ways that culture is defined in sociological research.
2. Understand the various ways that culture affects social behavior and how social behavior shapes and changes culture.
3. Finish the course with a sociological imagination that is expanded to included cultural theory.
4. Finish the course with the ability to formulate research projects that involve cultural theories.

SOCI 5640. Seminar in Sociology of Digital Media

3 Credits (3)

This course explores how the social, political-economic, and cultural landscape is changing in relation to digital media and information technologies. Seminar participants work together to explore frameworks, methods, and tools for understanding networked society in the digital media ecology.

Learning Outcomes

1. Develop analytical tools for understanding the complex information society.
2. Examine how the cultural, political, and social environments are changing with the emergence of new media and digital technologies.
3. Place the relationship between society and new media in context – what is interesting about these “new” technologies?
4. Exhibit scholarly professionalization by successfully developing, conducting and presenting a final project.

5. Demonstrate in-depth knowledge of a central and contemporary issue within the study of social media from a sociological perspective.

SOCI 5991. Special Research Problems

1-3 Credits (1-3)

Individual analytic or experimental investigations. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

SOCI 5996. Graduate Special Topics

3 Credits (3)

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 99 credits.

Learning Outcomes

1. Varies

SOCI 5998. Internship

1-6 Credits (1-6)

Supervised participation in appropriate occupational setting. Taught with SOCI 4998 with additional work required at the graduate level. May be repeated up to 12 credits.

Learning Outcomes

1. Various

SOCI 5999. Master's Thesis

1-6 Credits (1-6)

Thesis. Consent of instructor required. Restricted to Sociology majors. May be repeated up to 88 credits.

Learning Outcomes

1. Various

SOIL-SOIL

SOIL 2110. Introduction to Soil Science

3 Credits (3)

An overview of fundamental concepts in soil science and soils as a natural resource. Students will be introduced to the physical, chemical, and biological properties as it relates to soil management in environmental science, conservation, and agronomy. May be repeated up to 3 credits.

Prerequisite: (CHEM 1120G and MATH 1215 or higher) or CHEM 1215G.

Learning Outcomes

1. Understand and use the technical terminology associated with the use and management of soils.
2. Understand the classification of soils and the processes leading to their formation.
3. Identify key physical, chemical, and biological properties of soils.
4. Explain the impact of land use and management decisions as it relates to soil degradation and environmental problems.

SOIL 2110L. Introduction to Soil Science Laboratory

1 Credit (1)

Morphological, chemical, physical and biological properties of soil in the laboratory and field.

Corequisite(s): SOIL 2110.

Learning Outcomes

1. Learn techniques for sampling and characterizing soils in the region.
2. Understand how soils are formed and the processes that occur within the soil profile.

- Gain fundamental knowledge on soil physical, chemical, and biological properties and how each can influence the overall function of a particular soil.
- Develop critical thinking and analytical skills within laboratory and field settings.
- Encourage collaboration, inclusiveness and critical thinking.

SOIL 2996. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

Learning Outcomes

- Varies

SOIL 300. Special Topics**1-4 Credits**

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

SOIL 312. Soil Management and Fertility**3 Credits (3)**

Management, conservation, and fertility of soils; physical conditions affecting growth, nutrition, and plant production.

Prerequisite(s): SOIL 2110.

Corequisite(s): SOIL 312L.

SOIL 312 L. Soil Management and Fertility Lab**1 Credit (1)**

Hands-on experience. Includes field trips, videos, calculations, visiting lecturers and other lab activities as possible.

Prerequisite(s): SOIL 2110.

Corequisite(s): SOIL 312.

SOIL 370. Environmental Soil Science**3 Credits (3)**

Continuation of SOIL 2110 that emphasizes soil properties and processes that directly relate to environmental pollution problems. Same as ENVS 370.

Prerequisite: SOIL 2110.

SOIL 391. Internship**1-6 Credits (1-6)**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/U, Audit).

SOIL 424. Soil Chemistry**3 Credits (3)**

Basic elements of soil chemistry including clay mineralogy, cation and anion exchange and the chemistry of problem (acid, saline and flooded) soils. Credit not given for both SOIL 424 and SOIL 479.

Prerequisite(s): SOIL 2110L or CHEM 1215G and CHEM 1225G.

SOIL 447. Seminar**1 Credit (1)**

Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, HORT 447 and ENVS 447.

SOIL 449. Special Problems**1-3 Credits**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

SOIL 450. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits towards a degree. May be repeated up to 9 credits. Consent of Instructor required.

SOIL 456. Irrigation and Drainage**3 Credits (3)**

Principles and practices required for irrigation to exist as a permanent economy. Equipment and methods for measurement and control of water.

SOIL 472. Soil Morphology and Classification**4 Credits (2+2P)**

Same as SOIL 472. Crosslisted with: SOIL 472.

SOIL 476. Soil Microbiology**3 Credits (3)**

Nature and physiology of soil microorganisms, how they affect plant growth and recycle nutrients. Land farming, bioremediation and other environmental problems as influenced by soil microorganisms. SOIL 2110 and BIOL 311 recommended. Same as BIOL 476.

SOIL 476 L. Soil Microbiology Laboratory**1 Credit (3P)**

Enumeration of soil microorganisms, their activities, and transformations they mediate. May be repeated up to 1 credit.

Corequisite: SOIL 476.

Learning Outcomes

- Collect, store, and characterize soil samples using appropriate and sterile techniques of soil microbiology.
- Observe, describe, and recognize major groups of microbial organisms
- Develop skills in basic microscopy, isolation and culturing of soil microbes
- Acquire basic DNA-based molecular skills in soil microbiology.
- Compare and evaluate soil samples from different microhabitats regarding their soil microbiota.
- Apply the scientific method including the following steps: developing a research question, constructing a testable hypothesis, design a research study to test the hypothesis, perform the experiment and collect data, analyze the results, evaluate the results and support/reject the hypothesis, and report the results.

SOIL 477. Environmental Soil Physics**3 Credits (3)**

A description of the physical characteristics of porous media including soil. Examination of processes describing the transport of water, chemicals, heat and gases through porous media with application to environmental quality, waste management, and crop production.

SOIL 477 L. Environmental Soil Physics Laboratory**1 Credit (1)**

Concurrent enrollment with SOIL 477 recommended. Hands on experience with techniques for characterizing soil physical properties such as particle size distribution, bulk density, water retention, hydraulic conductivity and solute transport. Demonstrations of field and laboratory techniques for measuring moisture content, soil water potential, gas/air flow and thermal conductivity.

Prerequisite(s): SOIL 2110.

SOIL 479. Environmental Soil Chemistry**3 Credits (3)**

Basic elements of soil chemistry including discussion of clay mineralogy, cation and anion exchange and the chemistry of problem (acid, saline and flooded) soils. Credit not given for both SOIL 424 and SOIL 479.

Prerequisite(s): SOIL 2110L or CHEM 1215G and CHEM 1225G.

SOIL 500. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

SOIL 505. Research Orientation**4 Credits (3+2P)**

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: HORT 505, AGRO 505 and ENVS 505.

SOIL 525. Scientific Writing- How to be a Productive and Effective Writer**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review Crosslisted with: AGRO 525, AGRO 625, HORT 525, HORT 625, SOIL 625 and EPWS 525.

SOIL 590. Graduate Seminar**1 Credit (1)**

Current research discussions presented by master level graduate students. Not more than one credit toward the degree. Same as AGRO/HORT 590. Crosslisted with: AGRO 590 and HORT 590.

SOIL 596. Masters Proposal**1 Credit (1)**

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, ENVS 596, GENE 596 and HORT 596. Students must be a Master level graduate student to enroll in this course. Restricted to: Masters HORT; Masters PLEN majors.

SOIL 597. University Teaching Experience**1-3 Credits (1-3)**

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures.

SOIL 598. Special Research Programs**1-6 Credits**

Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

SOIL 625. Scientific Writing- How to be a Productive and Effective Writer**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive.

SOWK-SOCIAL WORK

SOWK 2110G. Introduction to Human Services & Social Work**3 Credits (3)**

This course is for students who are interested in social welfare issues and/or are considering entering a social service profession. The course presents an overview of social problems, issues and trends, and the network of social agencies developed to address these concerns. The course examines the influence of personal and professional values and

ethics on the helping relationship. The concept of social welfare will be discussed from a social work perspective (with an emphasis on social justice), and students will gain a basic understanding of social work in U.S. society, social work career opportunities, and contemporary issues facing social workers. Approaches relevant to work with individuals, families, groups and communities are presented, with special emphasis on Hispanic and Indigenous populations of New Mexico and the Southwest. May be repeated up to 3 credits.

Learning Outcomes

1. Explain the interactions of social institutions, cultural factors, dimensions of identity, and environment with the human development and behavior of individuals.
2. Demonstrate knowledge of the social work profession's focus on addressing contemporary social issues in the United States.
3. Describe the mission and services provided by social service agencies at the regional, national, and global levels.
4. Demonstrate a basic understanding of the social work profession, its history, career opportunities, and contemporary issues facing social workers in the United States today.
5. Recognize how students' knowledge, skills, and attitudes impact their competence as helping professionals.

SOWK 3110. Sociocultural Concepts**3 Credits (3)**

Theoretical and sociohistorical perspectives on racism, sexism, ageism, heterosexism, classism, ableism, and other forms of discrimination and oppression. Cultural diversity, strengths, and Southwest and border issues are examined. May be repeated up to 3 credits.

Learning Outcomes

1. Examine the role culture, gender, sexual orientation, and socio-economic class play in the way people think, feel, and behave.
2. Examine how diverse populations have been oppressed and exploited by dominant groups throughout U.S. history.
3. Analyze the effects of stereotypes, fallacies, and misconceptions about groups that experience oppression such as the LGBTQIA2S + community, the Elderly, People with Disabilities, BIPOC and people from low socio economic backgrounds and other socially marginalized groups.
4. Recognize theoretical models that describe various forms of discrimination, oppression, privilege and power.
5. Be familiar with relevant knowledge regarding the Southwest, border issues, Native American and Latinx/Chicanx/Hispanic content.
6. Recognize and implement anti racist, anti oppressive, and practice decolonization/indigenization and cultural humility in social work practice and social justice.

SOWK 3120. Human Behavior and the Social Environment I**3 Credits (3)**

Major theories of human behavior and the life span from conception to adolescence. May be repeated up to 3 credits.

Learning Outcomes

1. Apply knowledge of and be able to critique the major theories of human behavior and development processes in the social environment.
2. Introduce knowledge and understanding of the influence of environmental systems (groups and communities) and the complex interplay of biological, psychological, social, spiritual, and cultural dimensions for human development and functioning across the life span.

3. Explore and discuss knowledge and appreciation for human diversity (race/ethnicity, culture, gender, physical/mental disabilities, rural/urban differences, sexual orientation and socioeconomic status) and their impact on human development and functioning.
4. Identify and analyze factors and/events that affect ethnic minorities, women, and other vulnerable and/or oppressed populations.
5. Become familiar with current research of human behavior and the social environment as well as principal based ethics and social work values involved.
6. Examine and explore awareness of the ethical dilemmas, controversies and values inherent in work with diverse populations and various social systems and the implications for practice with emphasis on the Southwest.
7. Explore biases and stereotypes that can affect the understanding of human behavior and change in the social environment

SOWK 3130. Human Behavior and the Social Environment II
3 Credits (3)

Continuation of S WK 3120. Major theories of human behavior and the life span from young adulthood through old age. Restricted to: S WK majors. May be repeated up to 3 credits.

Prerequisite: SOWK 3120.

SOWK 3140V. Introduction to Social Policy: History
3 Credits (3)

Historical overview of the economic, political, and cultural impact on social welfare policy, institutions, and professions with international content. May be repeated up to 3 credits.

Learning Outcomes

1. Students will use reflection and self-regulation to manage personal values as they engage in discussion and written reflection around underlying values in social welfare.
2. Students will apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the macro level through written reflection.
3. Students will apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies through self-reflective discussions.
4. Students will apply their understanding of social, economic, and environmental justice to analyze social policy and advocate for just policies.
5. Through policy analysis and review of policy research, students will identify social policy at the local, state, and federal level that impacts well-being, service delivery, and access to social services; assess how social welfare and economic policies impact the delivery of and access to social services, and apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

SOWK 3150. Social Work Research
3 Credits (3)

This undergraduate course is designed to prepare students to be effective consumers of research and to evaluate their own practice. Students will learn to read, critically evaluate and use the research of others to select interventions that are based on evidence of effectiveness. Students will demonstrate the knowledge, values and skills to be critical consumers of research for effective and ethical practice as well as possess the basic skills necessary to evaluate their own social work professional practice. Restricted to Social Work majors. May be repeated up to 3 credits.

Prerequisite: MATH 1350G or STAT 2350G.

SOWK 3210. Social Work Practice Skills
3 Credits (3)

Introduction to generalist social work practice. Interpersonal skills, values, and ethics required in the helping relationship. Taught in a small-group format. Restricted to: S WK majors. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate and apply knowledge and skills of entry-level generalist social work practice which focus on the interaction between client-systems and the social environment.
2. Demonstrate and apply the integration of social work values and ethics with one's own personal values and apply ethical decision making in practice.
3. Demonstrate and apply worker-client relationship building and maintenance skills which can be applied across client-systems and populations.
4. Demonstrate and apply knowledge and skills of entry-level generalist social work practice with populations that are targeted and most vulnerable
5. Demonstrate and apply knowledge and skills of entry-level generalist social work practice with populations-at-risk including skills for engagement, assessment, intervention, and evaluation.
6. Demonstrate and apply both critical thinking and evidence-based practice skills in entry-level generalist social work practice.
7. Identify and apply methods of evaluating effectiveness in practice skills, assessment, and intervention across client systems.

SOWK 3220. Social Work Practice with Individuals
3 Credits (3)

Generalist social work practice theory and skills in engagement, information gathering, assessments, planning, interventions, evaluation, and termination with individual client systems. Restricted to: S WK majors. May be repeated up to 3 credits.

Prerequisite: SOWK 3210.

SOWK 3230. Social Work Practice with Families
3 Credits (3)

Generalist social work practice theory and skills in engagement, information gathering, assessments, planning, interventions, evaluation, and termination with multicultural family systems. May be repeated up to 3 credits.

Prerequisite: SOWK 3210.

Learning Outcomes

1. Students will apply ethical principles in social work and frameworks for ethical decision making to case scenarios involving families.
2. Students will assess their family of origin and its potential impact on their own work with families.
3. Students will model stages of the helping process with diverse families using cultural humility and a transcultural perspective.
4. Students will explain how family identity intersects with social factors to impact family functioning.
5. Students will plan and execute role plays modeling engagement with diverse families that reflect transcultural awareness and cultural humility.
6. Students will integrate discussion of their own experiences in their planning for family engagement.
7. Students will plan and execute role plays modeling assessment with diverse families that reflect transcultural awareness and cultural humility.

8. Students will conduct a family biopsychosocial assessment and treatment plan. Students will conduct a family biopsychosocial assessment and treatment plan. Students will plan and execute role plays modeling practice evaluation.

SOWK 4110. Social Welfare Policy: Legislation

3 Credits (3)

Policy practice related to the formation of current social welfare policies that promote social and economic justice. Emphasis is on the development and influences of social policy, policy analysis, and the policy change process. Restricted to: S WK majors. May be repeated up to 3 credits.

Learning Outcomes

1. Describe the social policy development and influence process.
2. Apply a framework for the analysis of current and proposed social policy.
3. Identify and discuss current legislation which addresses social and economic justice.
4. Articulate gaps and/or problems in existing social welfare policies and in social welfare programs.
5. Identify strategies which are appropriate to baccalaureate level practice that may influence policymakers on behalf of people in need.

SOWK 4210. Generalist Social Work Practice with Organizations and Communities

3 Credits (3)

This course focuses on generalist social work values, knowledge and skills regarding practice with larger systems. Course content will include theories of community and organizational assessment and intervention. Strategies for advocacy and change, leadership for community and organizational change. May be repeated up to 3 credits.

Learning Outcomes

1. Analyze various macro theories and apply two or more to a particular issue within a local community or organization.
2. Describe the historical context/foundation of macro practice in social work and identify its application in the community.
3. Identify ethical principles related to macro practice.
4. Describe the use of macro level practice in empowering diverse and oppressed populations
5. Describe an evidence-based practice framework for social work intervention with communities and organizations.

SOWK 4220. Generalist Social Work Practice with Groups

3 Credits (3)

Generalist social work practice skills with group client systems focusing on the planned change process and the empowerment of oppressed populations. Restricted to: S WK majors. May be repeated up to 3 credits.

SOWK 4230. Family and Child Welfare Practice

3 Credits (3)

Current issues and interventions in child protection, foster care, family preservation and support, family reunification, adoption and permanency planning. May be repeated up to 3 credits.

SOWK 4240. Professionalism in the Field of Social Work

3 Credits (3)

Students will use the field experience as the backdrop for assessing their own progress toward entry level generalist social work practice; to integrate coursework and field experience to develop their professional foundation. Restricted to: S WK majors. May be repeated up to 3 credits.

Corequisite: SOWK 4321.

SOWK 4310. Practicum I

3 Credits (3)

Supervised professional practice in a community social service agency, providing experiential learning and instruction. 240 clock hours required. Restricted to: S WK majors.

Corequisite: SOWK 4311.

SOWK 4311. Practicum Seminar I

3 Credits (3)

The practicum seminar course will provide students the opportunities to integrate coursework and field practice experience learning to develop social work competencies. Restricted to: S WK majors.

Corequisite: SOWK 4310.

SOWK 4320. Practicum II

3 Credits (3)

This course is a continuation of a supervised professional practice in a community social service agency, providing experiential learning and instruction. 240 clock hours required. Restricted to: S WK majors.

Corequisite: SOWK 4321.

SOWK 4321. Practicum Seminar II

3 Credits (3)

The practicum seminar course will provide students the opportunities to integrate coursework and field practice experience learning to demonstrate social work competencies. Restricted to: S WK majors. May be repeated up to 3 credits.

Corequisite: SOWK 4320.

SOWK 4510. Family and Child Welfare Policy

3 Credits (3)

This course is designed to provide students with an understanding of the history and evolution of child welfare policies, initiatives and factors that influence advocacy and practices within the child welfare system. Child welfare policies and services specific to the state of New Mexico are infused throughout the course. May be repeated up to 3 credits.

SOWK 4996. Special Topics

3 Credits (3)

Specific subjects to be announced in the Schedule of Classes. May be used as a mandatory practice elective. Junior or above standing, majors or consent of instructor. Restricted to: S WK majors. May be repeated up to 3 credits.

Learning Outcomes

1. Varies

SOWK 4997. Independent Study

1-6 Credits (1-6)

Individual studies directed by consenting faculty with the prior approval of the department head. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

SOWK 5110. Sociocultural Concepts and Populations of the Southwest

3 Credits (3)

Theoretical and sociohistorical perspectives on racism, sexism, ageism, heterosexism, classism, ableism, and other forms of discrimination and oppression. Cultural diversity, strengths, and Southwest and border issues are emphasized. May be repeated up to 3 credits.

Learning Outcomes

1. Explain and compare various theoretical and historical perspectives on discrimination, oppression and economic deprivation, as well as theories of human need and social justice as they relate to marginalized populations in the U.S., especially within the U.S. Southwest.

- Describe the forms and mechanisms of oppression and discrimination, including the extent to which a culture's structures and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power.
- Analyze the impact of discrimination, oppression and disenfranchisement as well as privilege, power, and acclaim on the human experience and formation of identity.
- Evaluate dimensions of diversity as the intersectionality of multiple factors including but not limited to age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status.
- Propose strategies designed to eliminate oppressive structural barriers to ensure that social goods, rights, and responsibilities are distributed equitably and that civil, political, environmental, economic, social, and cultural human rights are protected.

SOWK 5120. Social Work Research I

3 Credits (3)

Introduction to analytical skills used in social work research: problem formulation, research designs, measurement, instrumentation, data collection and analysis, use of human participants in research, and application of research knowledge and professional ethics to social work practice. Restricted to: MSW majors. May be repeated up to 3 credits.

Learning Outcomes

- Students will demonstrate the application of research methodologies for conducting both qualitative and quantitative empirical studies.
- Students will select relevant peer-reviewed journal articles representative of the generalist social work practice model that contribute to their understanding of social work as an evidenced-based practice.
- Students will analyze the roles that the Belmont Report, Health and Human Services Office for Human Research Protections, and Institutional Review Boards have in the ethical treatment and protection of human subject participants in conducting research.
- Students will integrate the professional standards of CSWE Competency 4 into the implications section of the article critiques and research proposal assignment.
- Students will connect their field practicum experiences to identify the role of generalizable results from empirical research applying to their area of practice client population.
- Students will propose an empirical research study that details the steps necessary to apply for Institutional Review Board approval.

SOWK 5130. Human Behavior and the Social Environment I

3 Credits (3)

The major theories of human behavior and the life span from conception to adolescence. Focuses both on the areas of concern and risk for client systems and on the opportunities and strengths in the social environment. Restricted to MSW majors. May be repeated up to 3 credits.

Learning Outcomes

- Describe key theories of human behavior in the social environment.
- Compare stage theories to recognize typical human development
- Apply theoretical perspectives to explain a range of various human behaviors.
- Identify key biological, psychological, and spiritual characteristics of a client (and) subsequently apply appropriate intervention strategies.

- Identify ways one's physical environment may promote and/or deter optimal health/well-being.

SOWK 5135. Human Behavior in the Social Environment

3 Credits (3)

The major theories of human behavior and the life span from conception through adolescence, adulthood, and old age. Focuses both on the areas of concern and risk for client systems and on the opportunities and strengths in the social environment. May be repeated up to 3 credits.

Learning Outcomes

- Describe the biological and psychological elements and impacts of adverse childhood experiences and trauma.
- Identify typical physical, cognitive, and socio-emotional development of infants, children, adolescents, adults, and older adults, as well as atypical developmental issues for each age/stage.
- Recognize the sociocultural context of childbearing, child rearing, adolescence, partnership, and aging.
- Apply knowledge of human development to guide social work assessment and intervention.

SOWK 5140. Human Behavior & the Social Environment II

3 Credits (3)

The major theories of human behavior from young adulthood to old age. This course will focus on both areas of concern and risk for client systems and on the opportunities and strengths in the social environment. Restricted to: MSW majors.

Prerequisite: SOWK 5130.

Learning Outcomes

- Describe the biological and psychological elements and impacts of adverse childhood experiences and trauma.
- Identify typical physical, cognitive, and socioemotional development of infants, children, adolescents, adults and older adults (as well as atypical developmental issues for each age/stage).
- Recognize the sociocultural context of childbearing, child rearing, adolescence, partnership, and aging.
- Apply knowledge of human development to guide social work assessment and intervention.

SOWK 5150. Social Problems and Social Welfare Policy

3 Credits (3)

An overview of social and economic problems in the United States and the historical and current social welfare policies aimed at alleviating these problems. Emphasis on developing an awareness and ability to change policies that impact vulnerable populations. May be repeated up to 3 credits.

Learning Outcomes

- Summarize the history of the social work profession in social welfare policy and the major roles that social workers perform in policy practice.
- Analyze the values, institutional, political and economic forces that drive social problems and social welfare policy in the U.S.
- Analyze past, current and future social policies developed to respond to social problems from a lens that considers the historical, social, cultural, economic, organizational, environmental, and global influences on social problems, and the impact on diverse populations of the Southwest.
- Evaluate how social work values, ethics, and research, impact the development, evaluation, and implementation of social policy.

SOWK 5155. Social Policy Issues, Analysis and Change

3 Credits (3)

An overview of social and economic problems in the United States and the historical and current social welfare policies aimed at alleviating these problems. Emphasis on developing an awareness and ability to create, analyze, and change policies that impact vulnerable populations. May be repeated up to 3 credits.

Learning Outcomes

1. Comprehend the values, institutional, political, and economic forces that drive social problems and social welfare policy in the U.S.
2. Analyze past, current, and future social policies developed to respond to social problems from a lens that considers the historical, social, cultural, economic, organizational, environmental, and global influences on social problems and the impact on diverse populations of the Southwest.
3. Evaluate how social work values, ethics, and research impact social policy development, evaluation, and implementation.
4. Apply a multilevel policy advocacy framework to advocate for policies that promote human rights, social and economic justice and addresses culturally influenced barriers to services presented by practitioners, organizations, and larger systems for populations of the Southwest.

SOWK 5160. Generalist Social Work Practice I

3 Credits (3)

This is the first course of a two-course sequence. An introduction to the generalist crosscultural, social work practice perspective with individuals and families, focusing on social work as a profession, social work knowledge base, professional development, relationship building and assessment with individuals and families within a framework of social work values and ethics. Restricted to: MSW majors. May be repeated up to 3 credits.

Learning Outcomes

1. Students will apply the NASW Code of Ethics and frameworks for ethical reasoning to ethical dilemmas encountered in social work practice
2. Students will analyze the strengths and limitations of social work at the micro, mezzo, and macro levels.
3. Students will demonstrate client engagement through the process of motivational interviewing
4. Students will apply skills for effective client assessment through interviews and written biopsychosocial-spiritual assessments
5. Students will create effective, measurable client-centered goals and objectives
6. Students will engage in interprofessional collaboration around a current topic
7. Students will apply knowledge of theory and their own positionality to assessment information to formulate a case

SOWK 5165. Generalist Social Work Practice

3 Credits (3)

An introduction to generalist social work practice skills, focusing on the theoretical foundations of social work as a profession and implementing the planned change process with individual, family, group, community, and organizational client systems within a social work values and ethics framework. May be repeated up to 3 credits.

Prerequisite/Corequisite: SOWK 5141 and SOWK 5110.

Learning Outcomes

1. Students will apply the NASW Code of Ethics and frameworks for ethical reasoning to ethical dilemmas encountered in social work practice.

2. Students will demonstrate the application of assessment tools and approaches to various client systems.
3. Students will create effective, measurable client-centered goals and objectives.
4. Students will select relevant, evidence-based interventions to meet client goals.
5. Students will describe approaches to evaluating practice across a range of client systems.
6. Students will engage in interprofessional collaboration around a current topic.
7. Students will analyze strategies for integrating micro, mezzo, and macro approaches to meet client needs.

SOWK 5170. Generalist Social Work Practice II

3 Credits (3)

This is the second course of a two-course sequence. A continuation of the generalist crosscultural, social work practice perspective with individuals and families, focusing on goal setting, contracting, implementation, and outcome assessment. The course also applies the generalist practice perspective and methods to larger systems: groups, organizations, and communities and includes relationship building, assessment, goal setting, contracting, implementation and outcome assessment within a framework of social work values and ethics. Restricted to: MSW majors. May be repeated up to 3 credits.

Prerequisite: SOWK 5160.

Learning Outcomes

1. Students will analyze strategies for integrating micro, mezzo, and macro approaches to meet client needs
2. Students will select relevant, evidence-based interventions to meet client goals
3. Students will monitor progress and evaluate treatment outcomes using effective measurement tools and strategies
4. Students will demonstrate foundational skills for engagement and intervention with groups and/or families
5. Students will describe the rationale and basic skills for intervention with communities and organizations.
6. Students will propose a project that applies the planned change process at the community level
7. Students will integrate their learning across all nine social work competencies and apply this learning to a given case.

SOWK 5180. Generalist Practicum Experience I

3 Credits (3)

Supervised professional practice in a community social service agency, providing experiential instruction and learning. 225 clock hours required. Seminar required. Restricted to: MSW majors.

SOWK 5181. Generalist Practicum Seminar I

3 Credits (3)

This practicum seminar assists students in integrating knowledge, skills, values, and ethical principles gained in practice and theory courses into social work practice settings. This seminar also aids students in integrating social work practice processes in service planning and delivery. Students explore skills of collaboration and consultation by presenting practicum case examples. May be repeated up to 3 credits.

Corequisite: SOWK 5180.

Prerequisite/Corequisite: SOWK 5110 and SOWK 5161.

Learning Outcomes

1. Increase awareness of personal strengths and challenges as a developing social work practitioner.

2. Employ knowledge, skills, values, and ethical principles from practice and theory courses in social work practice.
3. Demonstrate application of research findings to social work practice.
4. Collaborate and consult effectively with peers and practicum liaison.
5. Generalize the Council on Social Work Education's core competencies to social work practice.

SOWK 5190. Generalist Practicum Experience II

3 Credits (3)

Supervised professional practice in a community social service agency. 225 clock hours required. Seminar required. Restricted to: MSW majors.

Prerequisite: SOWK 5180.

SOWK 5191. Generalist Practicum Seminar II

3 Credits (3)

This practicum seminar builds on learning from Generalist Practicum Seminar I and assists students in integrating knowledge, skills, values, and ethical principles gained in practice and theory courses into social work practice settings. This seminar also aids students in integrating social work practice processes in service planning and delivery. Students explore skills of collaboration and consultation by presenting practicum case examples. May be repeated up to 3 credits.

Prerequisite: SOWK 5180 and SOWK 5181 and SOWK 5161.

Corequisite: SOWK 5190.

Prerequisite/Corequisite: SOWK 5320.

Learning Outcomes

1. Increase awareness of personal strengths and challenges as a developing social work practitioner.
2. Employ knowledge, skills, values, and ethical principles from practice and theory courses in social work practice.
3. Demonstrate application of research findings to social work practice.
4. Collaborate and consult effectively with others.
5. Generalize the Council on Social Work Education's core competencies to social work practice.

SOWK 5210. Core Components for Trauma Informed Practice

3 Credits (3)

This course facilitates students' acquisition of the knowledge, skills, and attitudes necessary to effectively use 12 common trauma-informed practice elements in interventions for and the treatment of traumatized children and their families. The course conceptualizes a trajectory of intervention that considers the impact of trauma, intervention objectives, and the practice elements needed to facilitate the intervention objectives.

This course is taught using an inquiry-based learning (IBL) pedagogy to enhance students' engagement and learning using full-length cases to exemplify a range of different clients a clinician might encounter.

Learning Outcomes

1. Demonstrate cultural humility by applying critical reflection, self-awareness, and self-regulation to manage the influence of bias, power, privilege, and values in working with clients and constituencies, acknowledging them as experts regarding their own lived experiences.
2. Apply knowledge of human behavior and person-in-environment, as well as interprofessional conceptual frameworks to engage with clients and constituencies.
3. Demonstrate respect for client self-determination during the assessment process by collaborating with clients and constituencies in developing mutually agreed-on goals.
4. Engage with clients and constituencies to critically choose and implement culturally responsive, evidenced-informed interventions

to achieve mutually agreed-on plans and increase the capacities of clients and constituencies.

SOWK 5220. Social Work Research II

3 Credits (3)

Focused on advanced generalist practice research in multicultural settings. Advanced skills to evaluate practice with individuals, families, groups, organizations, and communities in multicultural settings. Needs assessment as well as program and practice evaluation are emphasized.

Restricted to: MSW majors.

Prerequisite: SOWK 5120.

Learning Outcomes

1. Demonstrate an understanding of qualitative and quantitative analysis methods used in advanced generalist social work practice.
2. Apply qualitative and quantitative analytical methods to evaluate the effectiveness of advanced generalist social work practice, for a. advanced generalist program evaluation, b. advanced generalist needs assessment, and c. evaluation of one's own practice.
3. Develop competencies in critical analysis of empirical literature related to advanced generalist social work practice.
4. Demonstrate sensitivity to ethical, value, and cultural issues in the application of social work research methods.

SOWK 5230. Applied Social Work Research

3 Credits (3)

Introduction to skills for research-informed practice and practice-informed research, including problem formulation, research designs, measurement, instrumentation, data collection and analysis, use of human participants in research, and application of research knowledge and professional ethics to social work practice. Focus on the critical analysis, interpretation, and application of existing research and use of data to inform practice and advance the field across a range of client systems. May be repeated up to 3 credits.

Learning Outcomes

1. Formulate a clear, concise, and specific social work research problem statement that describes the social issue of focus.
2. Understand key components of qualitative, quantitative, and mixed methods research designs.
3. Apply research knowledge and social work professional ethics to social work practice.
4. Critically analyze, interpret, and apply existing research to inform social work practice.

SOWK 5240. Leadership in Public Health Social Work

3 Credits (3)

This course explores the integrated application of Public Health Social Work (PHSW) models and theories of practice, addressing community and organizational assessment and intervention, interpretation of contexts of power and influence, capacity for conflict and alliances, and strategies for advocacy to promote community and organizational transformation. This course will emphasize assessing and sustaining culturally-sustaining, critical trauma theory-informed rural, tribal, and border area systems response to critical PHSW issues. This course is also designed to prepare students graduating in May 2022 for their MSW Final Program Examination and MPH Competency Exams.

Learning Outcomes

1. Apply Public Health Social Work competencies to social work and public health practice settings.
2. Demonstrate culturally humble, trauma informed public health social work knowledge, skills and values in social work and public health practice settings.

3. Examine culturally- and identity-relevant public health social work practice considerations when serving in border area, tribal and rural communities.
4. Design and implement community and organizational assessment through an integrated public health social work framework.

SOWK 5250. Policy Analysis and Change

3 Credits (3)

This course will emphasize policy practice focusing on policy analysis and creating and implementing policy change. Restricted to MSW majors. May be repeated up to 3 credits.

Prerequisite: SOWK 5150.

Learning Outcomes

1. Analyze the role of policy advocacy in addressing social problems in accordance with the NASW Code of Ethics.
2. Use a multilevel policy advocacy framework to advocate for policies which promote human rights, social and economic justice, and addresses culturally influenced barriers to services presented by practitioners, organizations, and larger systems for populations of the Southwest.
3. Identify interconnections between micro policy advocacy interventions, mezzo policy advocacy interventions, and macro policy advocacy interventions.
4. Develop a plan for engagement in micro, mezzo and macro policy advocacy for local, state and federal policies that address social problems impacting diverse populations and constituencies of the Southwest.
5. Apply policy advocacy skills across complex social problems across social sectors that includes collaboration with colleagues and clients.

SOWK 5260. Social Work Skills Application

1 Credit (1)

This skills-based course prepares MSW students for management in government and nonprofit organizational contexts, including how to prepare and analyze organizational budgets, develop grant proposals and reports and develop a leadership platform.

Learning Outcomes

1. Understand key components of budget planning, development and analysis for social service agencies and organizations.
2. Develop knowledge and skills for writing grant proposals for federal, state and foundation funding requests.
3. Explore social work leadership styles and develop a personalized leadership platform.

SOWK 5280. Advanced Generalist Practicum Experience I

3 Credits (3)

Supervised professional practice in a community social service agency providing experiential learning in advanced generalist practice. 250 clock hours required. Seminar required. Restricted to: MSW majors.

Prerequisite: SOWK 5190.

SOWK 5281. Advanced Generalist Practicum Seminar I

2 Credits

This practicum seminar builds upon students' knowledge, skills, values, and cognitive and affective processes attained in their generalist year to apply, analyze and evaluate advanced generalist social work service planning and delivery with diverse populations. Students develop professional social work practice knowledge in micro, mezzo, macro, and multidisciplinary settings.

Prerequisite: SOWK 5190 and SOWK 5191.

Corequisite: SOWK 5280.

Prerequisite/Corequisite: SOWK 5310 and SOWK 5330.

Learning Outcomes

1. Incorporate the Council on Social Work Education's core competencies with social work practice skills and behaviors.
2. Analyze and evaluate the efficacy of social work interventions.
3. Perform critical reflectivity and skills of cultural humility to serve diverse populations competently.
4. Integrate complex critical thinking with various theories and interventions to address complex and diverse practice contexts.

SOWK 5290. Advanced Generalist Practicum Experience II

3 Credits (3)

Supervised professional practice in a community social service agency providing experiential learning in advanced generalist practice. 250 clock hours required. Seminar required. Restricted to: MSW majors.

Prerequisite: SOWK 5280.

SOWK 5291. Advanced Generalist Practicum Seminar II

2 Credits

This practicum seminar builds on learning from Advanced Practicum Seminar I and students' knowledge, skills, values, cognitive and affective processes attained in their generalist year to apply, analyze and evaluate advanced generalist social work service planning and delivery with diverse populations. Students develop knowledge of professional social work practice in micro, mezzo, macro, and multidisciplinary settings.

Prerequisite: SOWK 5280 and SOWK 5281.

Corequisite: SOWK 5290.

Prerequisite/Corequisite: SOWK 5340 and SOWK 5350.

Learning Outcomes

1. Incorporate the Council on Social Work Education's core competencies with social work practice skills and behaviors.
2. Analyze and evaluate the efficacy of social work interventions.
3. Perform critical reflectivity and skills of cultural humility to serve diverse populations competently.
4. Integrate complex critical thinking with various theories and interventions to address complex and diverse practice contexts.

SOWK 5310. Social Work Mental Health Practice

3 Credits (3)

This course is designed to add to the practice sequence for Masters Level students in Social Work. It addresses social work assessment of major mental health issues across the life span with an emphasis on resiliency and coping skills. Culturally responsive practices are applied to the major issues of mental health. Basic psychopharmacology, neurobiology and the ways in which Social Workers interact with clients to aid education and effective treatment of medical interventions will be a prominent part of this course. Evidence-based practices useful for work in various disorders will be incorporated.

Learning Outcomes

1. Critically analyze the concepts of mental health and psychopathology.
2. Assess social, political, and economic conditions which interfere with mental health, focusing on populations at risk for discrimination and oppression.
3. Conduct assessments of mental and emotional functioning using approved models and tools.
4. Apply DSM five criteria across a range of ages and cultures.
5. Differentiate culturally based behaviors from psychopathology.
6. Promote strengths-based approaches to avoid labeling.
7. Recognize connections between psychopharmacological interventions, symptom reduction, and side effects.

- Identify evidence-based practices for work with clients exhibiting a range of mental disorders.

SOWK 5320. Practice with Individuals

3 Credits (3)

This class builds on Foundation Year Practice courses by integrating theory and practice, and advancing skills in selecting, applying and evaluating practice interventions in a culturally sensitive manner with individuals. May be repeated up to 3 credits.

Prerequisite: SOWK 5170.

Learning Outcomes

- Students will integrate key social work theories for direct practice into work with individuals.
- Students will select, apply and evaluate culturally-relevant interventions for practice with individuals.
- Students will describe and demonstrate the application of key approaches for direct practice with individuals.
- Students will apply skills for clinical case formulation.

SOWK 5330. Practice with Groups

3 Credits (3)

This course will address the knowledge, values and skills needed to work effectively with diverse populations in group settings. The course will build on Foundation Year courses by integrating theory and practice, and advancing skills in selecting, applying and evaluating practice interventions in a culturally sensitive manner with social work groups. May be repeated up to 3 credits.

Prerequisite: SOWK 5170.

Learning Outcomes

- Demonstrate the ability to conduct a group.
- Apply a theoretically informed knowledge base of group development as it is executed across systems.
- Demonstrate knowledge of the variety of roles that group leaders and participants need to address in accomplishing the successful mission of the group.
- Establish a process that encourages clients to embrace the mutual aid function of groups, embracing an attention to multiple helping relationships.
- Advocate for a democratic process within all groups, encouraging a mutual emphasis on empowerment.
- Apply skills for social work assessment to group assessments.

SOWK 5340. Practice with Families

3 Credits (3)

This class builds on Foundation Year Practice courses by integrating theory and practice, and advancing skills in selecting, applying, and evaluating practice interventions in a culturally sensitive manner with families. Restricted to: MSW majors. May be repeated up to 3 credits.

Prerequisite: SOWK 5170.

Learning Outcomes

- Describe a range of approaches to and issues in social work practice with families.
- Apply social work assessment and planning skills to work with family systems.
- Critically analyze the role of personal experiences in our perceptions of and work with families.
- Describe key features of core approaches to family therapy and critique their application in models.
- Demonstrate the application of at least one core approach to family therapy.

- Apply considerations for ethical decision making to work with families.

SOWK 5350. Practice with Organizations and Communities

3 Credits (3)

This class builds on Foundation Year Practice courses by integrating theory and practice, and advancing skills in selecting, applying, and evaluating practice interventions in a culturally sensitive manner with organizations and communities. . Restricted to: MSW majors. May be repeated up to 3 credits.

Prerequisite: SOWK 5170.

Learning Outcomes

- Identify key theories, history, and ideological influences for macro social work practice.
- Describe and apply methodology of Root Cause Analysis for a selected community/social issue of concern.
- Use a range of approaches to assess a community/social issue of concern.
- Create a community Power Map for the purposes of advocacy and social change.
- Conduct an Organizational Capacity Assessment.
- Present a strategic plan for implementing a data-informed initiative.
- Describe formal methods/techniques for program assessment.

SOWK 5510. Family and Child Welfare Policy

3 Credits (3)

This course will enhance students' ability to offer child welfare services that respect cultural differences, reflect current policy knowledge concerning child maltreatment, build on the advocacy and protective capacities of individuals, families and communities and encourage permanency for children and preservation of families. Required basic knowledge of child welfare and assessment skills. Outside majors require instructor permission. May be repeated up to 3 credits.

SOWK 5994. Final Exit Project

1 Credit (1)

Final Exit Project. This 1-credit course is the School of Social Work's competency examination. The final exit project is non-thesis summative examination of students' ability to apply the Council on Social Work Education's core competencies to a case study. Students may only enroll in this course during the final semester of their MSW Program. May be repeated up to 2 credits.

Prerequisite: 45 Credit Hours.

Learning Outcomes

- Apply Council on Social Work Education's core competencies to a case study.

SOWK 5996. Special Topics

1-3 Credits (1-3)

Specific subjects to be announced in the Schedule of Classes. Open to graduate students in related disciplines and to community professionals in related disciplines and to community professionals in related fields. May be repeated up to 99 credits.

Learning Outcomes

- Varies

SOWK 5997. Independent Study

1-3 Credits (1-3)

Individual study to augment depth of knowledge in area related to course of study. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

SOWK 5999. Graduate Thesis**1-6 Credits (1-6)**

Required for thesis option. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

SPAN-SPANISH

SPAN 1110. Spanish I**4 Credits (4)**

Designed for students with little exposure to Spanish, this course develops basic listening, speaking, reading, and writing skills and basic intercultural competence in interpretive, interpersonal and presentational modes of communication at the Novice Level of proficiency based on ACTFL guidelines. During this course, students perform better and stronger in the Novice Mid level while some abilities emerge in the Novice High range. This is an introductory course aimed at helping the student to communicate in Spanish in everyday familiar situations via recognition and production of practiced or memorized words, phrases, and simple sentences.

Prerequisite(s): language placement and/or assessment by departmental examination.

Learning Outcomes

1. Students can communicate on very familiar topics using a variety of words and phrases that they have practiced and memorized.
2. Students can present information about myself and some other very familiar topics using a variety of words, phrases, and memorized expressions.
3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and some-times understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.

SPAN 1120. Spanish II**4 Credits (4)**

Designed for students with some degree of exposure to Spanish in high school and/or at home, this course continues to develop basic listening, speaking, reading, and writing skills and basic intercultural competence in interpretive, interpersonal and presentational modes of communication based at the Novice High Level of proficiency based on ACTFL guidelines, although a few abilities may emerge in the Intermediate Low Level. Students in this course communicate in Spanish in familiar topics using a variety of words, phrases, simple sentences and questions that have been highly practiced and memorized.

Prerequisite: language placement and/or assessment by departmental examination or a C- or better in SPAN 1110.

Learning Outcomes

1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.

3. Students can present basic information on familiar topics using language they have practiced using phrases and simple sentences.
4. Students can write briefly about most familiar topics and present information using a series of simple sentences.
5. Students can understand the main idea in short, simple messages and presentations on familiar topics.
6. Students can understand the main idea of simple conversations that they overhear.
7. Students can understand the main idea of short and simple texts when the topic is familiar.

SPAN 1210. Elementary Spanish for Heritage Learners I**3 Credits (3)**

This is a beginning-level Spanish course designed for students who have a cultural connection to the Spanish language. Some students have had very little exposure to the language and enter the class to develop beginning-level skills. Other students may have grown up hearing the heritage language in the community and may understand some Spanish and speak at a basic level as a result. The objective is to draw upon the connection to the heritage language as a source of motivation and engagement for our learning communities. At the same time, we build upon the language base that students may already have as a result of their heritage learner experience in order to develop new proficiencies in Spanish and reactivate the Spanish that students have learned previously. By the end of this course, students will be able to describe their home, campus surroundings and common activities including cultural traditions. At the same time, students gain cultural competency and develop a critical understanding of their linguistic and cultural background. Students who have previously earned a C or better in SPAN 1110 or SPAN 1120 may not receive credit for this course.

Learning Outcomes

1. Interpersonal Communication: Students can engage in exchanges in culturally appropriate ways using understandable pronunciation on familiar topics using contextualized words, phrases, common idiomatic expressions, and simple sentences.
2. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target language that describes a past/present/future (fictional) event to the reader.
3. Interpretive listening: Students can understand familiar questions and statements from simple sentences in conversations.
4. Interpretive reading: Students can identify the topic and some isolated facts from simple sentences in informational and fictional texts.
5. Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with subsequent courses.

SPAN 1220. Spanish for Heritage Learners II**3 Credits (3)**

Spanish as a Heritage Language II is a second semester class designed for students who have developed some basic Spanish proficiency from previous classes and/or from community experiences. This course provides students with the opportunity to develop their proficiency in the four language skills (speaking, listening, reading, and writing). Class activities are designed to strengthen oral communication skills (speaking and listening) through a variety of group activities. By the end of the course students will be able to understand and produce narrations of past events in oral and written Spanish. In order to foster a desire to revitalize and maintain the Spanish language in the US context we attempt to raise students' critical awareness of what it means to be part of a specific speech community.

Learning Outcomes

1. Interpersonal Communication: Students can engage in basic but authentic conversations through providing and obtaining information, expressing likes and dislikes, describing their daily lives, and narrating simple events in the past.
2. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target language, and that describes a past (fictional) event to the reader.
3. Interpretive listening: can identify the main idea in short conversations.
4. Interpretive reading: Students can identify the topic and related information from simple sentences in short informational and fictional texts.
5. Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with previous and subsequent courses.

SPAN 2110. Spanish III**3 Credits (3)**

This course is based on the integration of learning outcomes across Interpersonal, Interpretive, and Presentational Modes of Communication at the Intermediate Low Level of proficiency based on ACTFL guidelines. Students accomplish real-world communicative tasks in culturally appropriate ways as they gain familiarity with the target culture(s). This is an intermediate course aimed at helping the student to communicate in Spanish on familiar topics about self, others and everyday life at the same time that they recognize and handle short social interactions in interactions in everyday situations by asking and answering a variety of questions.

Prerequisite: language placement and assessment by departmental examination or C or better in SPAN 1120.

Learning Outcomes

1. Students can participate in conversations on familiar topics using sentences and series of sentences.
2. Students can handle short social interactions in everyday situations by asking and answering a variety of questions.
3. Students can usually say what they want to say about themselves and their everyday life.
4. Students can make presentations on a wide variety of familiar topics using connected sentences
5. Students can write on a wide variety of familiar topics using connected sentences.
6. Students can understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
7. Students can understand the main idea in conversations that they overhear.
8. Students can understand the main idea of texts related to everyday life and personal interests or studies.

SPAN 2120. Spanish IV**3 Credits (3)**

This course is based on the integration of learning outcomes across Interpersonal, Interpretive, and Presentational Modes of Communication at the Intermediate Low Level of proficiency based on ACTFL guidelines. Students accomplish real-world communicative tasks in culturally appropriate ways as they gain familiarity with the target culture(s). This is an intermediate course aimed at helping the student to communicate in Spanish on familiar topics about self, others and everyday life at the

same time that they recognize and handle short social interactions in interactions in everyday situations by asking and answering a variety of questions.

Prerequisite: language placement and assessment by departmental examination or C or better in SPAN 2110.

Learning Outcomes

1. Students can participate with ease and confidence in conversations on familiar topics.
2. Students can usually talk about events and experiences in various time frames.
3. Students can usually describe people, places, and things.
4. Students can handle social interactions in everyday situations, sometimes even when there is an unexpected complication.
5. Students can make presentations in a generally organized way on school, work, and community topics, and on topics they have researched.
6. Students can make presentations on some events and experiences in various time frames.
7. Students can write on topics related to school, work, and community in a generally organized way.
8. Students can write some simple paragraphs about events and experiences in various time frames.
9. Students can easily understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies. 1
10. Students can usually understand a few details of what they overhear in conversations, even when something unexpected is expressed. 1
11. Students can sometimes follow what they hear about events and experiences in various time frames. 1
12. Students can easily understand the main idea of texts related to everyday life, personal interests, and studies. 1
13. Students can sometimes follow stories and descriptions about events and experiences in various time frames.

SPAN 2210. Spanish for Heritage Learners III**3 Credits (3)**

Intermediate Spanish for Heritage Speakers I is a third semester course designed for students who have been raised in a Spanish-speaking environment and speak, or understand, some Spanish as a result of hearing it in the home, and in the community by family, friends, and neighbors. Students in this course will continue to develop their ability to narrate events in the past and will be able to describe hypothetical situations. Students will also develop their ability to express wishes, desires, and necessities. This course will help the student build confidence in their Spanish abilities and expand the language use in the areas of writing, reading, oral production and listening comprehension. In order to foster a desire to revitalize and maintain the Spanish language we attempt to raise students' critical awareness of wider issues facing Spanish speakers in the US context. May be repeated up to 3 credits.

Learning Outcomes

1. Interpersonal Communication: Students can exchange information on a wide variety of familiar topics in which the students use appropriate vocabulary to describe their daily lives and narrate events in the past with some degree of ease and confidence.
2. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target language, and that effectively conveys a series of past (fictional) events to the reader that may include recent and distant past.

- Interpretive listening: Students can identify the main idea and key information in short straightforward conversations.
- Interpretive reading: Students can understand the main idea and key information in short straightforward informational and fictional texts.
- Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with previous and subsequent courses.

SPAN 305. Topics in Hispanic Civilization
3 Credits (3)

Group study of selected topics focusing on Hispanic culture and civilization. Topics announced in the Schedule of Classes. May be repeated for a maximum of 6 credits.

Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.

SPAN 306. Special Topics
3 Credits (3)

Group study of Spanish for specialized purposes (e.g. court interpreting, professional language for bilingual teachers, technical writing for the business community). Course subtitled in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.

SPAN 316. Grammar for Non-Native Speakers of Spanish
3 Credits (3)

For students who did not grow up speaking Spanish. A review of the rules of Spanish grammar. Students cannot receive credit for both SPAN 316 and SPAN 318.

Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.

Learning Outcomes

- Students will be better equipped academically to continue into upper-division Spanish courses.
- Students will be better equipped to communicate in Spanish by becoming more adept at using a variety of grammatical structures.
- Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity.
- Students will gain critical thinking skills as they develop their bilingual abilities.
- Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 317. Composition for Non-Native Speakers of Spanish
3 Credits (3)

For students who did not grow up speaking Spanish. Development of professional and academic writing skills in Spanish. Students cannot receive credit for both SPAN 317 and SPAN 319.

Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.

Learning Outcomes

- Students will be better equipped academically to continue into upper-division Spanish courses.
- Students will be better equipped to communicate in written Spanish by employing a more clear and structured writing style.
- Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity.
- Students will gain critical thinking skills as they develop their bilingual abilities.
- Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 318. Grammar for Heritage/Native Speakers of Spanish
3 Credits (3)

For students who speak or have been exposed to Spanish at home or in the community. A review of grammatical concepts and analysis of both spoken and written Spanish. Students cannot receive credit for both SPAN 316 and SPAN 318.

Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.

Learning Outcomes

- Students will be better equipped academically to continue into upper-division Spanish courses.
- Students will be better equipped to communicate in written and spoken Spanish by using a variety of grammatical structures.
- Students will sharpen their Spanish communication skills, which will assist them in securing employment as bilingual speakers.
- Students will develop a stronger appreciation for the Spanish communication skills and cultural awareness which will assist them in contributing to their communities in meaningful ways.
- Students will gain critical thinking skills as they sharpen their bilingual abilities.

SPAN 319. Composition for Heritage/Native Speakers of Spanish
3 Credits (3)

For students who speak or have been exposed to Spanish at home or in the community. Development of writing strategies, styles and techniques in the Spanish language. Students cannot receive credit for both SPAN 317 and SPAN 319.

Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.

Learning Outcomes

- Students will be better equipped academically to continue into upper-division Spanish courses.
- Students will be better equipped to communicate in written Spanish by employing a more clear and structured writing style.
- Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity.
- Students will gain critical thinking skills as they develop their bilingual abilities.
- Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 325. Advanced Conversation
3 Credits (3)

Intensive oral practice. Not open to heritage/native speakers of Spanish.

Prerequisite(s): SPAN 2120 or consent of instructor.

SPAN 327. Spanish in the Community
3 Credits (3)

Emphasis on use of Spanish outside the classroom in the local communities. Activities include but are not limited to oral histories, language mentoring in schools, assisting with cultural activities and language research.

Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.

Learning Outcomes

- Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
- Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
- Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.

- Students will learn how to apply bilingual and bicultural skills to serve the community.

SPAN 330. Variations in Spanish

3 Credits (3)

The study of social variation within the Spanish language, examining both social and linguistic factors that affect language change.

Prerequisite: SPAN 316 or SPAN 318 or consent of instructor.

Learning Outcomes

- Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
- Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
- Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
- Students will develop comprehension of the terms and concepts related to linguistic variations.
- Students will learn about variations in the Spanish language and how to apply these ideas to a greater linguistics body of knowledge.

SPAN 340. Introduction to Spanish Linguistics

3 Credits (3)

General aspects of Spanish linguistics: traditional, descriptive, historical and dialectal.

Prerequisite: SPAN 316 or SPAN 318 or consent of instructor.

Learning Outcomes

- Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
- Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
- Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
- Students will develop comprehension of the terms and concepts related to Spanish linguistics.
- Students will learn about a wide range of linguistics topics and how to apply these ideas to a greater linguistics body of knowledge.

SPAN 350. Introduction to Chicano Studies

3 Credits (3)

Covers Mexican-American life including language, history, education, politics and literature.

Learning Outcomes

- Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
- Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
- Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
- Students will develop comprehension of the basic terms and concepts of Chicano Studies.
- Students will learn about various Chicano cultural and historical themes and how they affect the Chicano community today.

SPAN 361. US-Mexico Border Culture & Literature

3 Credits (3)

Study of major authors and/or cultural trends in the U.S.-Mexico border. Selected subject to be identified by subtitle in the Schedule of Classes.

May be repeated up to 6 credits.

Learning Outcomes

- Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
- Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
- Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
- Students will develop comprehension of the basic terms and concepts of border literature and culture.
- Students will learn about the value of US-Mexico border culture and literature and how they help form unique border communities.

SPAN 364V. Culture and Civilization of Mexico

3 Credits (3)

Familiarization with culture, civilization and regions of Mexico. History, geography, art, literature, folklore, customs, economics and politics of each region. Impact of Mexican culture and civilization on the Southwest United States. Taught in English. Does not satisfy Arts and Sciences second language requirement.

SPAN 365V. Culture and Civilization of Spanish America

3 Credits (3)

Familiarization with culture, civilization and regions of Spanish America. Study of history, geography, art, literature, folklore, customs, economics and politics of each region. Impact of Spanish American culture and civilization on the Southwest United States. Taught in English. Does not satisfy College of Arts and Sciences second language requirement.

SPAN 380. Introduction to Hispanic Literature

3 Credits (3)

Works in Spanish, all genres and periods. How to read literature in all forms.

Learning Outcomes

- Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
- Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
- Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
- Students will develop comprehension of the basic terms and concepts of Hispanic literature..
- Students will read foundational Hispanic texts of various genres and periods and learn how they create and inform Hispanic histories, identities, and nations.

SPAN 385. Introduction to Chicano/US-Mexican Literature

3 Credits (3)

Introduction to the study of major works by Chicano/US-Mexican authors.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

- Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.

2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of Chicano literature.
5. Students will read foundational Chicano texts of various genres and learn how they create and sustain a national Chicano consciousness.

SPAN 388. Contemporary Hispanic Literature

3 Credits (3)

Study of Peninsular and Spanish-American literature from the 20th century to the present.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of Hispanic literature.
5. Students will read foundational Hispanic texts of various genres from the 20th and 21st centuries and learn how they create and inform Hispanic histories, identities, and nations.

SPAN 393. Introduction to Translation and Interpretation

3 Credits (3)

General aspects of translation and interpretation from English to Spanish and Spanish to English. Selected subject to be identified by subtitle in the Schedule of Classes.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms, concepts, and strategies related to translation and interpretation.
5. Students will learn how to translate written texts and/or interpret live communication between the Spanish and English languages. However, other languages may be included at instructor's discretion.

SPAN 399. Independent Studies in Literature, Language, or Culture

1-3 Credits

Individualized, self-paced projects for advanced students. Students must present formal proposal of study.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.

3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will learn how to connect the value between literature, language, and culture and how to apply this knowledge to serve their community.

SPAN 411. Creative Writing

3 Credits (3)

Creative writing in Spanish.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of creative writing and the publication process.
5. Students will read and learn about the process and types of creative writing and publication, how to create original texts, and how to edit and publish creating works.

SPAN 412. Spanish-American Poetry

3 Credits (3)

Study of major works by Spanish-American poets.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of the poetry genre.
5. Students will read foundational Hispanic poetry from different periods and learn how poets and poetry create and inform Hispanic histories, identities, and nations.

SPAN 414. Coyolxauhqui: La literatura chicana femenil

3 Credits (3)

This course is designed to introduce students to Chicano Studies through the exploration of literature and cultural representations. Students will examine the history of Chican@s and discuss contemporary issues affecting their life, work, and expressions. The study of cultural representations such as Coyolxauhqui, La Malinche, La Virgen de Guadalupe, La Llorona, La Maqui-Loca, and La Chican@ Queer through a feminist perspective will allow a closer look at the work done by Chicana writers, poets, and artists who share a locus of enunciation. Most importantly, this course helps situating the individual experiences in relationship and connection to other Chican@s in the world.

Learning Outcomes

1. Become familiar with the main theoretical and pedagogical aspects of Chican@ Studies through a feminist perspective.

2. Reflect on the diversity of Chican@ scholars.
3. Observe the uniqueness in Chican@ Studies as compared to other fields.
4. Critically examine current research areas involving the interdisciplinary field.
5. Explore innovative theoretical research in history, politics and cultural topics.

SPAN 418. Spanish-American Short Story

3 Credits (3)

Study of major short stories by Spanish-American authors.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of the short story genre.
5. Students will read foundational Hispanic short stories from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 419. Spanish American Drama

3 Credits (3)

Study of major works by Spanish-American dramatists.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of the drama genre.
5. Students will read foundational Hispanic short stories from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 420. The Art of Storytelling

3 Credits (3)

The study of the genesis of storytelling and its structure, learning how and why to apply oral storytelling in our personal and professional lives, and practicing the art of storytelling in front of an audience.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.

3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of oral storytelling and the significance of this skill in creating personal and national narratives.
5. Students will learn how to write and present original oral stories, myths, and other forms of oral storytelling for a public audience.

SPAN 421. New Mexico Culture and Literature

3 Credits (3)

The study of the development and flourishing of New Mexican culture and literature.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will learn about key cultural, literary, and historical elements of New Mexico.
5. Students will learn how to apply knowledge about New Mexico to serve their communities.

SPAN 422. Cultural Production of Hispanic Revolutions and Wars

3 Credits (3)

The study of Hispanic literature, art, and film dealing with revolutionary movements and wars.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of revolutions and wars as they relate to literary production and other modes of cultural expression.
5. Students will learn about various revolutions and wars throughout Spain and Latin America and how they have helped form our regional and national identities, especially through a cultural production lens.

SPAN 423. Colonial Legacy: Representations in Chican@ Literature & Culture

3 Credits (3)

The course offers an overview of the research surrounding the legacy of colonial practices. Presents key concepts in colonial studies (colonialism, colonies, colonization, enclosures, exploitation, settlements), along with the ideologies of colonialism, to build the theoretical framework that will help analyze our colonial legacy through the exploration of Chican@ literature and cultural representations of writers, poets, and artists. Students will reflect on their own colonial/postcolonial ideologies

and practices. The course helps situate the individual experiences in relationship and connection to others in the world.

Learning Outcomes

1. Become familiar with the main theoretical and pedagogical aspects of colonial studies.
2. Reflect, observe and explore the colonial practices and approaches.
3. Critically examine current research areas involving the interdisciplinary field.
4. Explore innovative theoretical research in history, politics, literature and culture.

SPAN 424. Post-Modern Hispanic Literature

3 Credits (3)

The study of Post-Modern experimental literary genres, from Post-boom to the present.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of post-modernism, especially in relation to Hispanic literary production.
5. Students will read a variety of post-modern Hispanic texts from various genres and learn how they help develop regional and national identities.

SPAN 426. Spanish-American Novel

3 Credits (3)

Study of major works by Spanish-American novelists.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of the novel genre.
5. Students will read foundational Hispanic novels from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 427. Chicano Literature

3 Credits (3)

Study of Chicano/US-Mexican authors.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.

2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop advanced comprehension of the terms and concepts of Chicano literature.
5. Students will read foundational Chicano texts of various genres, but with a focus on narratives, and learn how they create and sustain a national Chicano consciousness.

SPAN 439. Topics in Applied Spanish Linguistics

3 Credits (3)

Group study of selected topics to be identified by subtitle in the Schedule of Classes. May be repeated once under different subtitle for a maximum of 6 credits.

Prerequisite: SPAN 340.

SPAN 442. Formation of Hispanic National Identities

3 Credits (3)

Study of seminal texts on the formation of Hispanic national identities and counternarratives against homogenous notions of nationhood.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions.
2. Strengthen academic research and writing skills through high-level research and writing projects.
3. Understand how Hispanic identities were formed through various narrative practices and how that informs media representations of Hispanic people and culture.
4. Analyze how Hispanic identities were formed and with what motivations.
5. Assess national narratives and counter-narratives to understand their political-social worlds better.

SPAN 444. Body Studies

3 Credits (3)

Interdisciplinary study of the body in Hispanic societies and others and its associated political meaning.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions.
2. Strengthen academic research and writing skills through high-level research and writing projects.
3. Understand how the Hispanic body became a cultural and political object and how it is changing by the means of new media.
4. Analyze how the understanding of the Hispanic body has changed throughout history and how local politics affect it.
5. Learn how the body has served as the locus of culture and the principle of social interaction and politics.

SPAN 446. Speculative Fiction

3 Credits (3)

Study of Hispanic speculative fiction and its related utopian/dystopian societies.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions.

2. Strengthen academic research and writing skills through high-level research and writing projects.
3. Understand how social anxieties produced a Hispanic literary corpus to deal with the past, the present, and the future.
4. Analyze and compare how genre fiction challenges or supports hegemonic national discourses.
5. Learn how speculative fiction serves as an expression of social desires.

SPAN 447. Hispanic Film**3 Credits (3)**

Study of major films from Spain and Spanish-America. Restricted to: Main campus only.

SPAN 448. U.S.-Hispanic Film**3 Credits (3)**

Study of major films about and/or by Hispanics of the U.S. Restricted to: Main campus only.

SPAN 449. Special Problems**1-3 Credits**

Directed reading for graduate students in their specific fields to satisfy language requirement for master's or doctoral programs. May be repeated for a maximum of 6 credits.

SPAN 451. Hispanic Cultures**3 Credits (3)**

Issues in Hispanic cultures of the U.S., Spanish-America and Spain. Also focuses on U.S.-Mexico border culture. Selected topics to be identified by subtitle in the Schedule of Classes.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will learn about various modes of Hispanic cultural production and how they create regional and national Hispanic identities.

SPAN 461. Introduction to Spanish Phonetics**3 Credits (3)**

An introduction to Spanish phonetics including basic dialectal variation and comparison with English.

Prerequisite: SPAN 340.

SPAN 474. Pragmatics**3 Credits (3)**

The study of theory and pragmatic notions such as implicatures, presuppositions, deixis, speech acts, and politeness.

Prerequisite(s): SPAN 340.

SPAN 476. Semantics**3 Credits (3)**

The investigation of language from a semantic-pragmatic perspective and the use of formal logic to communicate meaning.

Prerequisite(s): SPAN 340.

SPAN 483. Literature and Law**3 Credits (3)**

The advanced study of Latin American and Latino literature and its historical and cultural connections to the development of laws and the influence of both on modern society.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of legal themes as found in literature.
5. Students will read foundational Hispanic texts of various genres and learn how they create a narrative that embodies or implies legal issues that affect the Hispanic community.

SPAN 485. Literature and Mental Health**3 Credits (3)**

The advanced study of Latin American and Latino literature and how storytelling, through various literary genres, can inform our understanding of mental health issues and propose possible solutions to improve our quality of mental health.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of mental health themes as found in literature.
5. Students will read foundational Hispanic texts of various genres and learn how they create a narrative that embodies or implies mental health issues that affect the Hispanic community.

SPAN 490. Special Topics**3 Credits (3)**

Selected topic to be identified by subtitle in the Schedule of Classes.

Prerequisite: SPAN 316 or SPAN 318 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will learn about various topics of Hispanic literature or linguistics that can be applied to advanced research projects.

SPAN 491. History of the Spanish Language**3 Credits (3)**

The development of Spanish from its origins.

Prerequisite(s): SPAN 340.

SPAN 492. Structure of Spanish

3 Credits (3)

Topics in Spanish linguistics including phonology, morphology, syntax and semantics.

Prerequisite: SPAN 316 or SPAN 318 or SPAN 340.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the terms and concepts related to the structure of Spanish.
5. Students will learn about the formation of the structure of Spanish and how to apply these ideas to a greater linguistics body of knowledge.

SPAN 493. Espanol de los Estados Unidos

3 Credits (3)

Linguistic issues and studies of U.S. Spanish-speaking communities.

Taught with SPAN 593. May be repeated up to 3 credits.

Prerequisite(s): SPAN 340.

SPAN 500. Methods of Research and Literary Criticism

3 Credits (3)

Advanced methods of research and literary criticism.

SPAN 502. Sentipensar Pedagogy: Anzaldúa and Other Theorists

3 Credits (3)

The course offers an overview of the theory, research and practice concerning Sentipensar pedagogy. Through the exploration of literature and cultural representations, students will interpret the works of theorist that promote the connections between the body, mind, and heart in their academic research and curriculum. The course will also discuss contemporary issues affecting our life, work, and expressions. The study of Gloria Anzaldúa's Coahuila state, linguistic terrorism, Napanla and Consciencia Mestiza, are only some of the approaches to academia that will be discussed in this course. We will also have a closer look at the work done by writers, poets, and artists who share a locus of enunciation. Most importantly, this course helps situating the individual experiences in relationship and connection to others in the world. This course focuses on strategies and techniques in curriculum development appropriate for teaching students at different levels. The materials and resources for the class are mostly written in English because the field research is done in this language. However, all work turned in for this class (discussions, quizzes, homework, presentations, etc.) must be written and developed in Spanish.

Learning Outcomes

1. Become familiar with the main theoretical and pedagogical aspects of Sentipensar pedagogy.
2. Reflect and explore on the diversity in the approaches and methodologies in Sentipensar pedagogy.
3. Observe the uniqueness in the field as compared to others.
4. Critically examine current research areas involving the interdisciplinary field.
5. Explore innovative theoretical research in history, politics and culture.

SPAN 503. Critical Language Awareness in Teaching SHL

3 Credits (3)

This course is designed to introduce students to the theory, research, and practice of Critical Language Awareness. Students will read about the theoretical framework established when teaching heritage language learners. The study of Critical Language Awareness will allow educators to take a closer look at their own sociocultural concerns and influences in their education. Most importantly, this course will help us understand how our individual experiences connect in relationship to other heritage and native language users in the world. The materials and resources for the class are mostly written in English because the field research is done in this language. However, all work turned in for this class (discussions, quizzes, homework, presentations, etc.) must be written and developed in Spanish.

Learning Outcomes

1. Become familiar with the main theoretical and pedagogical aspects of Critical Language Awareness.
2. Reflect on the diversity in the writings of scholars in the field.
3. Observe the uniqueness of Critical Language Awareness in heritage language pedagogy.
4. Critically examine current research areas involving the interdisciplinary field.
5. Explore innovative theoretical research in history, politics, and cultural topics.

SPAN 504. Culturally Sensitive Teaching in SHL: Teaching Spanish as a Heritage Language in the United States

3 Credits (3)

This course focuses on presenting the theories, strategies and techniques in curriculum development appropriate for teaching Spanish for Native Speakers (SNS/EHN) and Heritage Language Speakers (HLS/EHH) in a culturally and linguistically sensitive environment. Students will conduct classroom observations and prepare presentations on aspects of CLR and SHL instruction in addition to preparing a research project to illustrate all their preparation towards creating a more sensitive and responsive curriculum.

Learning Outcomes

1. Become familiar with the main theoretical and pedagogical aspects of culturally and linguistically responsive teaching of SHL.
2. Reflect on the linguistic diversity of SHL speakers.
3. Observe the uniqueness in the use of SHL as compared to the Spanish in other parts of the world.
4. Critically examine current research areas involving U.S. Spanish, family and community settings, policies, programs and curriculum.
5. Explore innovative techniques, materials and activities in culturally and linguistically responsive SHL instruction.
6. Design new evaluation practices in all four skills.

SPAN 507. Technology Enhanced Language Learning

3 Credits (3)

Strategies for enhancing language learning with emerging technologies. Course is taught in Spanish.

SPAN 508. Teaching Literature with Technology

3 Credits (3)

Strategies and techniques for enhancing the teaching of all literature genres using emerging technologies. Course is taught in Spanish. Co/
Prerequisite(s): SPAN 507, and/or consent of instructor.

SPAN 509. Teaching Culture with Technology

3 Credits (3)

Strategies and techniques for enhancing the teaching of culture using emerging technologies. Course is taught in Spanish. Co/

Prerequisite(s): SPAN 507, and/or consent of instructor.

SPAN 510. Assessing the National Standards

3 Credits (3)

Analysis of the National Standards for Foreign Language Learning (the 5 Cs) in the 21st Century. Course will also cover the Integrated Performance Assessment as applied to the national standards. Other assessments will be reviewed to evaluate effectiveness in all levels of Spanish language classrooms.

SPAN 512. Contemporary Spanish-American Poetry

3 Credits (3)

Readings and interpretation of Spanish-American poetry from the 20th century to the present.

SPAN 514. Coyolxauhqui: La literatura chicana femenil

3 Credits (3)

This course is designed to introduce students to Chicano Studies through the exploration of literature and cultural representations. Students will examine the history of Chican@s and discuss contemporary issues affecting their life, work, and expressions. The study of cultural representations such as Coyolxauhqui, La Malinche, La Virgen de Guadalupe, La Llorona, La Maqui-Loca, and La Chican@ Queer through a feminist perspective will allow a closer look at the work done by Chicana writers, poets, and artists who share a locus of enunciation. Most importantly, this course helps situating the individual experiences in relationship and connection to other Chican@s in the world.

Learning Outcomes

1. Become familiar with the main theoretical and pedagogical aspects of Chican@ Studies through a feminist perspective.
2. Reflect on the diversity of Chican@ scholars.
3. Observe the uniqueness in Chican@ Studies as compared to other fields.
4. Critically examine current research areas involving the interdisciplinary field.
5. Explore innovative theoretical research in history, politics and cultural topics.

SPAN 520. Adv. The Art of Storytelling

3 Credits (3)

The study of the genesis of storytelling and its structure, learning how and why to apply oral storytelling in our personal and professional lives, and practicing the art of storytelling in front of an audience.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the terms and concepts of storytelling and the significance of this skill in creating personal and national narratives.
5. Students will learn how to write and present original oral stories, myths, and other forms of oral storytelling for a public audience.

SPAN 521. Advanced Culture and Literature of New Mexico

3 Credits (3)

The advanced study of the development and flourishing of New Mexican culture and literature.

SPAN 522. Adv. Cultural Production of Hispanic Revolutions and Wars

3 Credits (3)

The study of Hispanic literature, art, and film dealing with revolutionary movements and wars.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of revolutions and wars as they relate to literary production and other modes of cultural expression.
5. Students will learn about various revolutions and wars throughout Spain and Latin America and how they have helped form regional and national identities, especially through a cultural production lens

SPAN 523. Colonial Legacy: Representations in Chican@ Literature & Culture

3 Credits (3)

The course offers an overview of the research surrounding the legacy of colonial practices. Presents key concepts in colonial studies (colonialism, colonies, colonization, enclosures, exploitation, settlements), along with the ideologies of colonialism, to build the theoretical framework that will help analyze our colonial legacy through the exploration of Chican@ literature and cultural representations of writers, poets, and artists. Students will reflect on their own colonial/postcolonial ideologies and practices. The course helps situate the individual experiences in relationship and connection to others in the world.

Learning Outcomes

1. Become familiar with the main theoretical and pedagogical aspects of colonial studies.
2. Reflect, observe and explore the colonial practices and approaches.
3. Critically examine current research areas involving the interdisciplinary field.
4. Explore innovative theoretical research in history, politics, literature and culture.

SPAN 528. Advanced U.S. Latino Culture and Literature

3 Credits (3)

The advanced study of major works by Latino writers in the U.S.

SPAN 540. Introduccion a la Linguistica

3 Credits (3)

Introduces students to the foundational topics of linguistic study with particular reference given to the Spanish language: properties of language and communication, morphology, syntax, phonetics, phonology, language variation and change.

Prerequisite(s): Eligibility to take graduate level courses.

SPAN 542. Adv. Formation of Hispanic National Identities

3 Credits (3)

Study of seminal texts on the formation of Hispanic national identities and counternarratives against homogenous notions of nationhood.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions.

2. Strengthen academic research and writing skills through high-level research and writing projects.
3. Understand how Hispanic identities were formed through various narrative practices and how that informs media representations of Hispanic people and culture.
4. Analyze how Hispanic identities were formed and with what motivations.
5. Assess national narratives and counter-narratives to understand their political-social worlds better.

SPAN 544. Adv. Body Studies

3 Credits (3)

Interdisciplinary study of the body in Hispanic societies and others and its associated political meaning.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions.
2. Strengthen academic research and writing skills through high-level research and writing projects.
3. Understand how the Hispanic body became a cultural and political object and how it is changing by the means of new media.
4. Analyze how the understanding of the Hispanic body has changed throughout history and how local politics affect it.
5. Learn how the body has served as the locus of culture and the principle of social interaction and politics.

SPAN 545. Advanced Dialectos del Español

3 Credits (3)

Advanced research of Spanish dialects including their formal characteristics, historical formation and regional variation.

SPAN 546. Adv. Speculative Fiction

3 Credits (3)

Study of Hispanic speculative fiction and its related utopian/dystopian societies.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions.
2. Strengthen academic research and writing skills through high-level research and writing projects.
3. Understand how social anxieties produced a Hispanic literary corpus to deal with the past, the present, and the future.
4. Analyze and compare how genre fiction challenges or supports hegemonic national discourses.
5. Learn how speculative fiction serves as an expression of social desires.

SPAN 547. Advanced Hispanic Film

3 Credits (3)

Advanced study of major films from Spain and Spanish-America. Restricted to: Main campus only.

SPAN 548. Advanced U.S.-Hispanic Film

3 Credits (3)

Advanced study of major films about and/or by Hispanics of the U.S. Restricted to: Main campus only.

SPAN 550. Advanced Chicana and Chicano Studies

3 Credits (3)

Multidisciplinary examination of issues that have historically affected/influenced the Chicana/o community regionally, in the borderlands, and beyond borders.

Learning Outcomes

1. Students will become better equipped to teach this material at the high school or community college levels.
2. Students will become better equipped to attend a PhD program in a related field.
3. Students will gain access to a more diverse curriculum which broaden their educational and cultural perspectives.
4. Students will be able to develop their scholarship on a more creative level.
5. Students will strengthen their academic writing, which will help in their graduate studies and/or post-graduate careers.

SPAN 551. Advanced Hispanic Cultures

3 Credits (3)

Advanced study on Hispanic cultures of the U.S., Spanish-America and/or Spain. Selected topic to be identified by subtitle. Taught with SPAN 451. May be repeated up to 6 credits.

SPAN 558. Bilinguismo

3 Credits (3)

Examines the topics of bilingualism from a psycholinguistic perspective including the development of the bilingual brain, lexical acquisition, retrieval and storage, and experimental techniques in measuring language competence.

Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 561. Advanced Spanish Phonetics

3 Credits (3)

Advanced study of Spanish phonetics, including basic dialectal variation and comparisons with English.

SPAN 562. Advanced Spanish Phonology

3 Credits (3)

An advanced formal examination of the sound system of Spanish including formal characterizations, dialectal variation and laboratory data. May be repeated up to 3 credits.

Prerequisite(s): SPAN 561 or consent of instructor.

SPAN 563. Advanced Study in Mexican Literature

3 Credits (3)

Mexican literature from the Pre-Columbian period to the present.

SPAN 564. Advanced Post-Modern Hispanic Literature

3 Credits (3)

The advanced study of Post-Modern experimental literary genres, from Post-boom to the present.

SPAN 566. Contemporary Spanish-American Novel

3 Credits (3)

The Spanish-American novel from the 20th century to the present.

SPAN 567. Advanced Study in Chicano Literature

3 Credits (3)

Study of all genres of Chicano literature.

SPAN 570. Advanced Study in Technical Translation

3 Credits (3)

Translation of a variety of non-literary texts from English to Spanish and from Spanish to English. Course is taught in Spanish.

SPAN 573. Advanced Study in Creative Writing

3 Credits (3)

Advanced creative writing in Spanish.

SPAN 574. Advanced Pragmatics

3 Credits (3)

The study of theory and pragmatic notions such as implicatures, presuppositions, deixis, speech acts, and politeness.

Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 576. Advanced Semantics

3 Credits (3)

The investigation of language from a semantic-pragmatic perspective and the use of formal logic to communicate meaning.

Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 580. Research Methodology in Spanish Linguistics

3 Credits (3)

Study and practical application of techniques in linguistic research.

SPAN 583. Advanced Study in Spanish-American Women Writers

3 Credits (3)

All genres of Spanish-American literature written by women. Research paper required.

SPAN 584. Spanish Morphosyntax

3 Credits (3)

Examination of the morphological and syntactic structure of the Spanish language as well as their interaction. Practical applications are also explored.

SPAN 586. Contemporary Spanish-American Essay

3 Credits (3)

Main currents in the Spanish-American thought from the 20th century to the present.

SPAN 587. Contemporary Spanish-American Short Story

3 Credits (3)

The Spanish-American short story from the 20th century to the present.

SPAN 588. Contemporary Spanish-American Drama

3 Credits (3)

The Spanish-American drama from the 20th century to the present.

SPAN 589. Spanish Sociolinguistics

3 Credits (3)

Relationship between language and society in the Spanish-speaking world.

SPAN 590. Advanced Special Topics

3 Credits (3)

Specific subject to be announced in the Schedule of Classes. May be repeated up to 6 credits.

SPAN 591. Advanced Study in History of the Spanish Language

3 Credits (3)

The development of Spanish from its origins.

SPAN 592. Advanced Structure of Spanish

3 Credits (3)

Advanced study of Spanish linguistics topics such as phonology, morphology, syntax and semantics.

SPAN 594. Theory and Methodology of Spanish Pedagogy

3 Credits (3)

Advanced studies in current theories and methodologies of Spanish language pedagogy. Taught as a practicum.

SPAN 595. Advanced Topics in Applied Spanish Linguistics

3 Credits (3)

Selected topics to be identified by subtitle in the Schedule of Classes. May be repeated for a total of 9 credits under a different subtitle.

SPAN 597. Advanced Strategies for Teaching Spanish for Heritage/Native Speakers

3 Credits (3)

Advanced overview of the main theories, research, pedagogical approaches, assessment and practice concerning the teaching of Spanish to heritage learners and native speakers.

SPAN 598. Independent Reading, Research, and/or Creative Writing 1-3 Credits

Individual study of selected readings and problems; or individual research, either analytical or experimental, or creative writing. May be repeated for unlimited credits.

SPAN 599. Master's Thesis

15 Credits

Thesis.

SPED-SPECIAL EDUCATION

SPED 2996. Topics

3 Credits (3)

Offered under various subtitles that indicate the subject matter to be covered. May be repeated up to 9 credits.

Learning Outcomes

1. Varies

SPED 3105. Introduction to Special Education in a Diverse Society

3 Credits (3)

Characteristics, identification, and educational needs of exceptional learners. Attention is given to the various types of programs serving exceptional learners. Designed for all professional personnel who work with exceptional learners. May be repeated up to 3 credits.

Learning Outcomes

1. Discuss historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
2. Discuss historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
3. Explain the major components of an IEP and its processes, as well as the roles of learners, families and professionals on the team.
4. Discuss the different service delivery models and discuss the principles, practices, and pragmatics of inclusion co-teaching.
5. Analyze the disability categories under (IDEA, 2004), (characteristics, etiology, and diagnostic criteria).
6. Examine educational considerations for exceptional learners (educational approaches [Universal design and differentiated instruction], assistive technology, accommodations/modifications, and related supports and services).
7. Employ culturally responsive evidence-based practices to create family/school/community partnerships to promote academic achievement and prepare students for their post-school transitions.
8. Evaluate and synthesize research literature on a selected topic from current special education research.

SPED 3110. Bilingual/Multicultural Special Education

3 Credits (3)

Introduction to issues related to the provision of services to culturally and linguistically diverse students with exceptionalities.

Learning Outcomes

1. Students will identify implicit and explicit biases.
2. Students will discuss the cultural characteristics of families from culturally and linguistically diverse backgrounds and the barriers of parent engagement in their child's education.

- Students will identify how privilege, power, and inequities exist in the school system and how it impacts the academic achievement of students from culturally linguistically diverse (CLD) backgrounds.
- Students will identify culturally relevant strategies to employ in the classroom to meet the individual learner needs of students from culturally and linguistically diverse backgrounds.
- Students will develop a lesson plan that embeds culturally responsive pedagogy that addresses the individual needs of students from culturally and linguistically diverse backgrounds.

SPED 3120. Elementary Curriculum, Methods, and Materials for Special Education in a Diverse Society

3 Credits (3)

Curriculum theory and development for special education programs. Various teaching methods utilized with elementary exceptional learners and techniques involved in identifying, adapting, and developing materials will be addressed. May be repeated up to 3 credits.

Learning Outcomes

- Evaluate historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
- Describe the RTI process and its role in determining eligibility for special education services.
- Discuss learner diversity (ability, exceptionality, developmental level, learning style, language, gender, ethnicity, etc.) and employ individualized evidence-based culturally responsive instructional practices that build on learners' strengths and interests.
- Create safe, inclusive, culturally responsive learning environments to engage learners with exceptionalities in meaningful learning activities and social interactions that develop communication, emotional well-being, positive social interactions, and self-determination.
- Apply classroom management techniques that support learners and focus, on routines, procedures, rules, and positive behavior supports to address behavior.
- Apply culturally responsive instructional practices to individualize learning for learners with exceptionalities; taking into consideration individual abilities, interests, learning environments, and cultural and linguistic factors in the planning, selection, development, and adaptation of learning experiences for learners with exceptionalities.
- Design differentiated lesson plans that employ the tenets of universal design.

SPED 4110. Low Incidence Disabilities in a Diverse Society

3 Credits (3)

Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations. May be repeated up to 3 credits.

Learning Outcomes

- Analyze Low Incidence Disabilities (characteristics, etiology, and diagnostic criteria) (IDEIA, 2004).
- Identify the types of related supports and services—assistive technology, environmental and Instructional accommodations/modifications, and related services—available to students with low incidence disabilities to maximize participation in inclusive settings.
- Apply culturally responsive instructional practices to individualize learning for learners with low incidence disabilities, taking into consideration individual abilities, interests, learning environments, and cultural and linguistic factors in the planning, selection, development, and adaptation of learning experiences of learners with low incidence disabilities in inclusive environment.

- Employ culturally responsive strategies for creating effective family, school, community partnerships.
- Discuss culturally responsive strategies that promote collaboration between families, schools, and community agencies/organizations during the student's transition planning process.
- Identify current educational issues impacting students with low incidence disabilities.

SPED 4120. High Incidence Disabilities in a Diverse Society

3 Credits (3)

Examines those areas of disability that most frequently occur in the special education population, including intellectual disabilities, learning disabilities, communication disorders, and behavioral and emotional disorders. May be repeated up to 3 credits.

Learning Outcomes

- Describe and compare the major approaches to identifying, placement, assessing, planning for instruction, and classifying high incidence disabilities.
- Identify and discuss school-based, sociological, cultural, and economic differences as they relate to etiology and identification of mild disabilities.
- Describe and critically evaluate classroom instructional practices that can improve the educational success of students with high incidence disabilities.
- Describe and critically evaluate classroom management practices that can improve the educational success of students with high incidence disabilities.
- Describe how the educational experiences of persons with mild disabilities is shaped by their cognitive, perceptual, language, academic, and social / emotional characteristics.

SPED 4130. Reading for Elementary Exceptional Learners in a Diverse Society, K-6

3 Credits (3)

Emphasizes reading diagnosis and materials for students with special developmental and learning problems. Taught with SPED 5130. May be repeated up to 3 credits.

Learning Outcomes

- Evaluate the sources of reading difficulty
- Evaluate the characteristics exhibited by children with reading difficulties and reading disabilities.
- Demonstrate how to use non-biased, culturally responsive assessments and progress monitoring data to monitor and evaluate reading performance to drive instruction.
- Discuss the stages in literacy development and the factors that influence development of student literacy in reading, writing, speaking, viewing, and listening, including phonological, orthographic, semantic, and syntactic processing.
- Implement research-based reading strategies and instruction to promote the development of print awareness, phonological and phonemic awareness, fluency, vocabulary, spelling, comprehension, reading, and writing for learners with reading difficulties.
- Evaluate research-based strategies, methods, and commercial programs for different domains of reading.
- Create a lesson plan and teach an elementary level reading lesson.

SPED 4140. Reading for Elementary Exceptional Learners in a Diverse Society, 7-12

3 Credits (3)

Extends information covered in SPED 5130, which covers grades K 6. Strategies and materials are addressed. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate a knowledge of the major component of the reading process.
2. Increase their repertoire of reading instruction procedures which may be used with students of differing reading abilities and from diverse backgrounds at the middle and secondary levels.
3. Increase their knowledge of theory and related discipline-specific learning strategies designed to assist middle and secondary students in reading and learning through research based practices.
4. Participate in discussion of current literacy issues.
5. Explore the presentation of new teaching and learning strategies as they are related to content area literacy.

SPED 4150. Secondary Curriculum, Methods, and Materials for Special Education in a Diverse Society

3 Credits (3)

Curriculum theory and development for elementary special education programs. Various teaching methods utilized with secondary exceptional learners and techniques for identifying, adapting, and developing materials will be addressed. Taught with SPED 5150. May be repeated up to 3 credits.

Learning Outcomes

1. Discuss learner diversity (ability, exceptionality, developmental level, learning style, language, gender, ethnicity, etc.)
2. Apply effective methods for planning and implementing culturally responsive secondary differentiated content area instruction for exceptional learners in inclusive settings.
3. Identify demands of learning environments of secondary exceptional learners.
4. Identify basic classroom management theories and strategies for individuals with diverse learning needs in secondary environments.
5. Employ culturally responsive evidence-based practices to create family/school/community partnerships to promote academic achievement and prepare students for their post-school transitions.

SPED 4210. Introduction to Assessment of Diverse Exceptional Learners

3 Credits (3)

Theory and use of norm and criterion-referenced instruments and learning theories in the classroom; planning of prescriptive instructional programs. May be repeated up to 3 credits.

Learning Outcomes

1. Compare and contrast the different types of assessment and their purposes.
2. Identify legislation and litigation, which has impacted assessment.
3. Explain the applications and uses of assessments results.
4. Identify widely used (common) measures of psycho-educational assessment and their appropriate application.
5. Identify a variety of techniques for obtaining information regarding students' academic functioning and learning techniques.
6. Identify techniques for assessing students' socio-emotional functioning.
7. Outline the process for identifying exceptional learners and subsequent educational planning utilizing learning theories.
8. Analyze and identify assessment strategies for specific populations (Culturally and Linguistically Diverse, Preschool, Elementary School, etc.)

9. Integrate information gathered through comprehensive assessment procedures into a whole picture of the student's areas of strength, weakness and needs.

SPED 4220. Classroom Management for Diverse Learners

3 Credits (3)

Behavior-change strategies for exceptional learners. May be repeated up to 3 credits.

Learning Outcomes

1. Plan the organization of a classroom illustrating optimum use of instructional resources (computers, books, writing materials, reference material, manipulatives, creative constructive materials, etc.) that facilitates efficiency and effectiveness of access, use, maintenance, and storage of such resources.
2. Manage student progress data electronically for visual representation of performance for individual students and whole class averages.
3. Design the organization of the physical aspects of a classroom (furniture, areas, etc) for ease of transition, use, safety and traffic flow based on effective designs presented in the literature.
4. Establish classroom procedures and expectation (rules) to promote a positive, effective and efficient learning environment.
5. Construct the organization of a classroom schedule/time management plan that includes various content areas, instructional strategies, grouping strategies, levels of energy use, etc. Within large blocks of time or for an entire day school day.
6. Demonstrate knowledge and skill of affective domain-based theoretical models for (1) setting and managing the emotional tone of a classroom, (2) managing the psycho-social atmosphere of the classroom and individual students, and (3) managing motivation of students to succeed in learning academic content, social skills, self-responsibility skills, and inter-relationship skills with other class members.
7. Analyze a given classroom situation for legal, ethical and professional issues and concerns, by applying legal, ethical, and professional reactions to the situation and provide resolutions to align the classroom legally, ethically, and professionally. This will include all legal bases (state and federal) involving all students, including students with disabilities, ESL and at-risk students.
8. Observe, analyze and document student behavior to match an appropriate intervention strategy to change behavior in a desired direction. This will also include the successful implementation of behavior management strategies for entire classes, small groups, and individual students along with development and maintenance of electronic data collection graphing and analysis.

SPED 4310. Introduction to Autism

3 Credits (3)

This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and family issues. Taught with SPED 5310 and SPED 6310. May be repeated up to 3 credits.

Learning Outcomes

1. Analyze Autism Spectrum Disorders ASD (characteristics, etiology, co-morbid conditions, differential diagnosis).
2. Describe the criteria used to screen and diagnose ASD.
3. Examine evidence-based practices used to effectively support students with ASD in accessing general education and grade level standards (classroom structure, differentiated instruction, peer mediated supports, structured teaching, and emotional supports).

4. Describe strategies related to promoting a successful transition from school to adult life for individuals with ASD.
5. Examine the strategies for effective collaboration and communication with families of children with ASD and key stakeholders for the purpose of information sharing and collaborative planning with families.
6. Identify and investigate current educational issues impacting students with ASD.
6. Design an intervention plan to address the Social Skills needs of a child with ASD.
7. Incorporate family preferences and values into the educational process of students with ASD.
8. Employ data collection procedures to evaluate the effectiveness of evidence-based practices for students with ASD.

SPED 4320. Behavior and Autism

3 Credits (3)

This course will cover the first of the triad of impairments. Students will gain an understanding of the behaviors of children with autism. Students will examine several behavior management philosophies and research based interventions and how they can be applied in the educational setting. Attention will also be given to play skills. The family perspective and participation in the proactive behavior management process will be incorporated throughout the course. Taught with SPED 532 with differentiated assignments. May be repeated up to 3 credits.

Prerequisite/Corequisite: SPED 4310 or SPED 5310 or SPED 6310.

Learning Outcomes

1. Explain the definition of Autism Spectrum Disorder (ASD) and associated characteristics of students with ASD as measured by required readings, discussions, and article reviews.
2. Explain behavior impairments and characteristics associated with students with ASD as measured by required readings, discussions, and article reviews
3. Explain Applied Behavior Analysis strategies as measured by completion of required paper(s) summarizing peer-reviewed journal article related to diversity, behavior management interventions, and/or behavior analysis.
4. Explain information related to individuals with ASD and behavior challenges as measured by participation in online chat with instructor or group power point presentation.
5. Discuss evidence-based treatment approaches that are useful in improving behavior management skills of students with ASD as measured by participation in required readings and discussions

SPED 4330. Social Skills and Autism

3 Credits (3)

This course will cover the second of the triad of impairments. As a blend of researched based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for children functioning at a variety of levels along the autism spectrum. Taught with SPED 5330 and SPED 6330 with differentiated assignments. May be repeated up to 3 credits.

Prerequisite/Corequisite: SPED 4310 or SPED 5310 or SPED 6310.

Learning Outcomes

1. Analyze Autism Spectrum Disorders ASD (definition, characteristics, etiology).
2. Evaluate Social Skills characteristics and difficulties often associated with ASD.
3. Appraise current tools and strategies used to assess Social Skills problems in children with ASD.
4. Use assessment results to identify the Social Skills needs of children with ASD
5. Analyze the types of evidence-based practices used to address the Social Skills needs of children with ASD.

SPED 4340. Communication and Autism

3 Credits (3)

This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 5340 and SPED 640 with differentiated assignments. May be repeated up to 3 credits.

Prerequisite: SPED 4310 or SPED 5310 or SPED 6310.

Learning Outcomes

1. Analyze Autism Spectrum Disorders ASD (definition, characteristics, etiology).
2. Evaluate communication characteristics and difficulties often associated with ASD.
3. Appraise current tools and strategies used to assess communication problems in children with ASD.
4. Analyze the types of interventions used to address the communication needs of children with ASD.
5. Design an intervention plan to address the communication needs of a child with ASD.
6. Employ data collection procedures to evaluate the effectiveness of research-based interventions for students with ASD.
7. Incorporate family preferences and values into the educational process of students with ASD.

SPED 4810. Early Childhood SPED Student Teaching

9 Credits (9P)

Synthesis of knowledge and skills appropriate to teaching in PreK - 3rd grade educational settings. Restricted to: TEP-ECED majors. Grading (S/U, Audit). Students must be Admitted into student teaching May be repeated up to 9 credits.

Learning Outcomes

1. Varies

SPED 4811. Practicum in Education, Equity and Cultural Diversity

3 Credits (3)

This is a supervised experience in providing special education services to local preK-12 students. In the context of the public school classroom, teacher candidates are guided to apply content knowledge from the seminar meetings and from prior coursework. Restricted to: SPED majors.

Prerequisite: SPED 3105 and SPED 3120 or consent of instructor.

Learning Outcomes

1. Candidates demonstrate an understanding of the critical concepts and principles in their discipline and of the pedagogical content knowledge necessary to engage students' learning of concepts and principles in the discipline;
2. Candidates create and implement learning experiences that motivate K-8 students, establish a positive learning environment, and support

K-8 students' understanding of the central concepts and principles in the content discipline;

3. Candidates design, adapt, and select a variety of valid and reliable assessments and employ analytical skills necessary to inform ongoing planning and instruction, as well as to understand, and help students understand their own, progress and growth;
4. Candidates engage students in reasoning and collaborative problem solving related authentic local, state, national, and global issues, incorporating new technologies and instructional tools appropriate to such tasks. Candidates use research and evidence to continually evaluate and improve their practice, particularly the effects of their choices and actions on others, and they adapt their teaching to meet the needs of each learner;
5. Candidates design and implement appropriate and challenging learning experiences, based on an understanding of how children learn and develop. They ensure inclusive learning environments that encourage and help all K-8 students reach their full potential across a range of learner goals;
6. Candidates work with K-8 students and families to create classroom cultures that support individual and collaborative learning and encourage positive social interaction, engagement in learning, and independence;
7. Candidates build strong relationships with students, families, colleagues, other professionals, and community members, so that all are communicating effectively and collaborating for student growth, development, and well-being;
8. Candidates reflect on their personal biases and access resources that deepen their own understanding of cultural, ethnic, gender, sexual orientation, language, and learning differences to build stronger relationships and to adapt practice to meet the needs of each learner.

SPED 4820. Student Teaching SPED

9 Credits (9)

Supervised teaching in a special education classroom and participation in a required seminar. Students must be admitted to student teaching program in order to enroll. Restricted to: SPED majors.

Prerequisite: SPED 4811.

Learning Outcomes

1. The teacher candidate understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
2. The teacher candidate uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
3. The teacher candidate works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

SPED 4830. Special Education/Elementary Student Teaching Seminar

3 Credits (3)

Discussion of elementary Special Education school issues related to student teaching.

Prerequisite: SPED 4811.

Corequisite: SPED 4820.

Learning Outcomes

1. The teacher candidate understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social,

emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

2. The teacher candidate uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
3. The teacher candidate works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.
4. The teacher candidate understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make these aspects of the discipline accessible and meaningful for learners to assure mastery of the content.
5. The teacher candidate understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.
6. The teacher candidate understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.
7. The teacher candidate plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.
8. The teacher candidate understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.
9. The teacher candidate engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner. 1
10. The teacher candidate seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

SPED 4840. Special Education/ Secondary Student Teaching Seminar

3 Credits (3)

Discussion of secondary school issues related to student teaching.

Prerequisite: SPED 4821.

Corequisite: SPED 4820.

Learning Outcomes

1. The teacher candidate understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
2. The teacher candidate uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
3. The teacher candidate works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

4. The teacher candidate understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make these aspects of the discipline accessible and meaningful for learners to assure mastery of the content.
5. The teacher candidate understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.
6. The teacher candidate understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.
7. The teacher candidate plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.
8. The teacher candidate understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.
9. The teacher candidate engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.
10. The teacher candidate seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

SPED 4992. Directed Study courses in Special Education

1-3 Credits (1-3)

Each course shall be identified by a qualifying subtitle. A maximum of 3 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits.

Learning Outcomes

1. Varies

SPED 4996. Topics

3 Credits (3)

Offered under various subtitles which indicate the subject matter to be covered. May be repeated up to 9 credits.

Learning Outcomes

1. Varies

SPED 5105. Introduction to Special Education in a Diverse Society

3 Credits (3)

This course introduces the field of special education to regular educators. May be repeated up to 3 credits.

Learning Outcomes

1. Discuss historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
2. Discuss historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
3. Explain the major components of an IEP and its processes, as well as the roles of learners, families and professionals on the team.

4. Discuss the different service delivery models and discuss the principles, practices, and pragmatics of inclusion co-teaching.
5. Analyze the disability categories under (IDEA, 2004), (characteristics, etiology, and diagnostic criteria).
6. Examine educational considerations for exceptional learners (educational approaches [Universal design and differentiated instruction], assistive technology, accommodations/modifications, and related supports and services).
7. Employ culturally responsive evidence-based practices to create family/school/community partnerships to promote academic achievement and prepare students for their post-school transitions.
8. Evaluate and synthesize research literature on a selected topic from current special education research.

SPED 5110. Low Incidence Disabilities in a Diverse Society

3 Credits (3)

Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations. Taught with SPED 6110 with differentiated assignments. May be repeated up to 3 credits.

Learning Outcomes

1. Analyze Low Incidence Disabilities (characteristics, etiology, and diagnostic criteria) (IDEIA, 2004).
2. Identify the types of related supports and services—assistive technology, environmental and Instructional accommodations/modifications, and related services—available to students with low incidence disabilities to maximize participation in inclusive settings.
3. Apply culturally responsive instructional practices to individualize learning for learners with low incidence disabilities, taking into consideration individual abilities, interests, learning environments, and cultural and linguistic factors in the planning, selection, development, and adaptation of learning experiences of learners with low incidence disabilities in inclusive environment.
4. Employ culturally responsive strategies for creating effective family, school, community partnerships.
5. Discuss culturally responsive strategies that promote collaboration between families, schools, and community agencies/organizations during the student's transition planning process.
6. Identify current educational issues impacting students with low incidence disabilities.

SPED 5120. High Incidence Disabilities in a Diverse Society

3 Credits (3)

Examines those areas of disability that most frequently occur in the special education population, including intellectual disabilities, learning disabilities, communication disorders, and behavioral and emotional disorders. May be repeated up to 3 credits.

Learning Outcomes

1. Describe and compare the major approaches to identifying, placement, assessing, planning for instruction, and classifying high incidence disabilities.
2. Identify and discuss school-based, sociological, cultural, and economic differences as they relate to etiology and identification of mild disabilities.
3. Describe and critically evaluate classroom instructional practices that can improve the educational success of students with high incidence disabilities.
4. Describe and critically evaluate classroom management practices that can improve the educational success of students with high incidence disabilities.

- Describe how the educational experiences of persons with mild disabilities is shaped by their cognitive, perceptual, language, academic, and social / emotional characteristics.

SPED 5130. Reading for Elementary Exceptional Learners in a Diverse Society, K-6

3 Credits (3)

Emphasizes reading diagnosis and materials for students with special developmental and learning problems. Taught with SPED 4130. May be repeated up to 3 credits.

Learning Outcomes

- Evaluate the sources of reading difficulty
- Evaluate the characteristics exhibited by children with reading difficulties and reading disabilities.
- Demonstrate how to use non-biased, culturally responsive assessments and progress monitoring data to monitor and evaluate reading performance to drive instruction.
- Discuss the stages in literacy development and the factors that influence development of student literacy in reading, writing, speaking, viewing, and listening, including phonological, orthographic, semantic, and syntactic processing.
- Implement research-based reading strategies and instruction to promote the development of print awareness, phonological and phonemic awareness, fluency, vocabulary, spelling, comprehension, reading, and writing for learners with reading difficulties.
- Evaluate research-based strategies, methods, and commercial programs for different domains of reading.
- Create a lesson plan and teach an elementary level reading lesson.

SPED 5140. Reading for Secondary Exceptional Learners in a Diverse Society, 7-12

3 Credits (3)

Extends information covered in SPED 5130, which covers grades K 6. Strategies and materials are addressed. Taught with SPED 4140. May be repeated up to 3 credits.

Learning Outcomes

- Demonstrate a knowledge of the major component of the reading process.
- Increase their repertoire of reading instruction procedures which may be used with students of differing reading abilities and from diverse backgrounds at the middle and secondary levels.
- Increase their knowledge of theory and related discipline-specific learning strategies designed to assist middle and secondary students in reading and learning through research based practices.
- Participate in discussion of current literacy issues.
- Explore the presentation of new teaching and learning strategies as they are related to content area literacy.

SPED 5150. Curriculum, Methods, and Materials for Secondary Special Education

3 Credits (3)

Curriculum theory and development for elementary special education programs. Various teaching methods utilized with secondary exceptional learners and techniques for identifying, adapting, and developing materials will be addressed. May be repeated up to 3 credits.

SPED 5160. Technology and Exceptionality in a Diverse Society

3 Credits (3)

This class will address the unique educational needs of learners with exceptionalities, and will provide information and practice in addressing

those needs through the use of technology-based interventions. May be repeated up to 3 credits.

Learning Outcomes

- Demonstrate familiarity in variety of assistive technology devices and services that are available for students with diverse range of disabilities
- Demonstrate an understanding of functional approaches to the assessment of assistive technology needs.
- Describe and implement inter disciplinary approaches to the assessment, selection and the use of technology to meet the educational and transitional demands of individuals with diverse range of disabilities.
- Identify and describe the function of the range of assistive technology devices and services in diverse settings.
- Demonstrate an understanding of the legal obligations of different entities in providing training and services that are relevant to assistive technologies.

SPED 5210. Introduction to Assessment of Diverse Exceptional Learners

3 Credits (3)

Required for students seeking licensure at graduate level. Theory and use of norm-and criterion-referenced instruments and learning theories in the classroom; planning of prescriptive instructional programs with differentiated assignments for graduate students. Restricted to: SPED majors.

SPED 5220. Classroom Management for Diverse Learners

3 Credits (3)

Behavior-change strategies for exceptional learners. Taught with SPED 4220 with differentiated assignments for graduate students. May be repeated up to 3 credits.

SPED 5230. Advanced Curriculum for Diverse Exceptional Learners

3 Credits (3)

Strategies for developing curricula appropriate to handicapped and gifted learners. May be repeated up to 3 credits.

Learning Outcomes

- Evaluate historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
- Describe the RTI process and its role in determining eligibility for special education services.
- Discuss learner diversity (ability, exceptionality, developmental level, learning style, language, gender, ethnicity, etc.) and employ individualized evidence-based culturally responsive instructional practices that build on learners' strengths and interests.
- Create safe, inclusive, culturally responsive learning environments to engage learners with exceptionalities in meaningful learning activities and social interactions that develop communication, emotional well-being, positive social interactions, and self-determination.
- Apply classroom management techniques that support learners and focus, on routines, procedures, rules, and positive behavior supports to address behavior.
- Apply culturally responsive instructional practices to individualize learning for learners with exceptionalities; taking into consideration individual abilities, interests, learning environments, and cultural and linguistic factors in the planning, selection, development, and adaptation of learning experiences for learners with exceptionalities.
- Design differentiated lesson plans that employ the tenets of universal design.

SPED 5310. Introduction to Autism**3 Credits (3)**

This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and family issues. Taught with SPED 4310 and SPED 6310. Differentiated Assignments. May be repeated up to 3 credits.

Learning Outcomes

1. Analyze Autism Spectrum Disorders ASD (characteristics, etiology, co-morbid conditions, differential diagnosis).
2. Describe the criteria used to screen and diagnose ASD.
3. Examine evidence-based practices used to effectively support students with ASD in accessing general education and grade level standards (classroom structure, differentiated instruction, peer mediated supports, structured teaching, and emotional supports).
4. Describe strategies related to promoting a successful transition from school to adult life for individuals with ASD.
5. Examine the strategies for effective collaboration and communication with families of children with ASD and key stakeholders for the purpose of information sharing and collaborative planning with families.
6. Identify and investigate current educational issues impacting students with ASD.

SPED 5320. Behavior and Autism**3 Credits (3)**

This course will cover the first of the triad of impairments. Students will gain an understanding of the behaviors of children with autism. Students will examine several behavior management philosophies and research based interventions and how they can be applied in the educational setting. Attention will also be given to play skills. The family perspective and participation in the proactive behavior management process will be incorporated throughout the course. Taught with SPED 4320 and SPED 6320 with differentiated assignments. May be repeated up to 3 credits.

Prerequisite: SPED 4310 or SPED 5310 or SPED 6310.

Learning Outcomes

1. Explain the definition of Autism Spectrum Disorder (ASD) and associated characteristics of students with ASD as measured by required readings, discussions, and article reviews.
2. Explain behavior impairments and characteristics associated with students with ASD as measured by required readings, discussions, and article reviews
3. Explain Applied Behavior Analysis strategies as measured by completion of required paper(s) summarizing peer-reviewed journal article related to diversity, behavior management interventions, and/or behavior analysis.
4. Explain information related to individuals with ASD and behavior challenges as measured by participation in online chat with instructor or group power point presentation.
5. Discuss evidence-based treatment approaches that are useful in improving behavior management skills of students with ASD as measured by participation in required readings and discussions

SPED 5330. Social Skills and Autism**3 Credits (3)**

This course will cover the second of the triad of impairments. As a blend of researched based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for

children functioning at a variety of levels along the autism spectrum.

Taught with SPED 4330 and SPED 6330 with differentiated assignments.

May be repeated up to 3 credits.

Prerequisite: SPED 4310 or SPED 5310 or SPED 6310.

Learning Outcomes

1. Understand and explore the foundations of TESOL instruction.
2. Analyze the sociocultural theory of teaching English as a second/foreign language.
3. Demonstrate an understanding of culturally responsive pedagogy in language teaching and academic achievement.
4. Evaluate principles of best practices instruction and applications of TESOL methods.
5. Explore assessment issues and concepts related to English Language Learners.
6. Examine the impact of policies, national laws, school and community partnerships, and personal professional development on TESOL instruction.
7. Develop, select, and implement second language teaching methods.

SPED 5340. Communication and Autism**3 Credits (3)**

This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 4340 and SPED 6340 with differentiated assignments. May be repeated up to 3 credits.

Prerequisite: SPED 4310 or SPED 5310 or SPED 6310.

Learning Outcomes

1. Analyze Autism Spectrum Disorders ASD (definition, characteristics, etiology).
2. Evaluate communication characteristics and difficulties often associated with ASD.
3. Appraise current tools and strategies used to assess communication problems in children with ASD.
4. Analyze the types of interventions used to address the communication needs of children with ASD.
5. Design an intervention plan to address the communication needs of a child with ASD.
6. Employ data collection procedures to evaluate the effectiveness of research-based interventions for students with ASD.
7. Incorporate family preferences and values into the educational process of students with ASD.

SPED 5405. Foundations of Visual Impairment**3 Credits (3)**

This course provides an overview of the history and theory of teaching students with visual impairments, including those with additional disabilities. The impact of educational, legislative, and societal trends on the psychosocial adjustment, quality of life, and post-school outcomes of individuals with visual impairments is explored. May be repeated up to 3 credits.

Learning Outcomes

1. Differentiate between the impact that visual impairment (both congenital and adventitious) has on a child's/youth's cognitive,

language, communication, motor, social-emotional, and autonomous development.

- Predict the impact that familial, societal, cultural, and professional attitudes have on the self-esteem/self-identity of a child/youth who has a visual impairment and propose culturally responsive strategies to combat low self-esteem/lack of self-acceptance.
- Identify appropriate educational adaptations, including universal design for learning principles, for teaching students with visual impairments based on predominant sensory channel(s).
- Describe the prevalence and incidence of visual impairment, educational and legal classifications, service delivery options and regulations, and the roles of educational staff.
- Analyze how historical foundations shape current issues and trends in the education of students who are visually impaired.
- Locate sources of specialized materials, service networks, consumer/parent organizations, and professional associations and publications.

SPED 5410. Functional Implications of Low Vision

3 Credits (3)

This course examines the structure and function of the visual system in relation to associated diseases and syndromes with an emphasis on measuring functional vision and determining appropriate educational adaptations. Consent of Instructor required. May be repeated up to 3 credits.

Prerequisite: SPED 5405.

Learning Outcomes

- Use basic terminology to describe the structure and functions of the visual system and describe how the visual system typically develops.
- Identify the etiology and characteristics of the most common eye conditions and their impact on the development and education of individuals who have these conditions.
- Describe effects of medications on the visual system and on visual performance. Select, adapt, and use appropriate instruments for assessing functional vision. Follow legal, ethical, and technical procedures while conducting vision screenings or functional vision evaluations in order to determine educational services (including eligibility) and supports.
- Interpret the results of vision screenings, eye reports, and functional vision evaluations in ways that help students, families and other members of the educational team understand the impact the visual impairment has on learning, experience, and social-emotional well-being.
- Select individualized strategies for the enhancement of visual/sensory efficiency (including the use of environmental modifications, print material adaptations, optical aids, and non-optical aids) based on performance/assessment data

SPED 5420. Strategies for Teaching Students with Visual and Multiple Impairments

3 Credits (3)

This course defines the roles and responsibilities of the teacher of students with visual impairments as part of the transdisciplinary team that serves students with visual impairments and additional disabilities. Emphasis is on assessment, curricula (both academic and functional), communication, behavior management, assistive technologies, inclusion, transition, and independent living. Consent of Instructor required. May be repeated up to 3 credits.

Prerequisite: SPED 5410.

Learning Outcomes

- Describe the impact that a concomitant visual impairment and additional disability has on a child's/youth's cognitive, language, communication, motor, social-emotional, autonomous, and sensory development.
- Recommend appropriate educational and environmental adaptations, including access technologies, for students with concomitant disabilities (including a visual impairment) related to the core curriculum (especially literacy) that are based on their unique needs, which transcend the effects of each individual disability.
- Recommend appropriate educational and environmental adaptations, including access technologies, for students with concomitant disabilities (including a visual impairment) related to the expanded core curriculum that are based on their unique needs, which transcend the effects of each individual disability.
- Choose specialized assessment tools appropriate for learners with visual impairments and additional disabilities.
- Summarize special considerations related to eligibility determination, educational placement, and service delivery models for students with visual impairments and additional disabilities.
- Describe special considerations related to effective collaboration with educators, related service providers, educational assistants, community agencies, and families of students with visual impairments and additional disabilities

SPED 5430. Braille I: Literacy for Students with Visual Impairments

3 Credits (3)

This course facilitates an in depth study of the Uncontracted and Contracted Literary Braille codes as well as methods of teaching pre-braille, braille reading, and braille writing skills to tactual learners. Consent of Instructor required. May be repeated up to 3 credits.

Prerequisite: SPED 5450.

Learning Outcomes

- Transcribe print content into Unified English Braille following appropriate formatting rules.
- Read, interline, and proof materials transcribed in Unified English Braille.
- Read, interline, and proof materials produced in English Braille American Edition.
- Transcribe, print content into a foreign language using the appropriate braille code.
- Read, interline, and proof materials produced in foreign language braille.
- Transcribe a simple score in music braille.
- Read and interline a simple score in music braille.
- Produce braille materials using various tools, including a Perkins Brailler, slate and stylus, and six-key keyboard entry.
- Delineate the ways that congenital and adventitious visual impairments impact literacy and the unique instructional strategies used with each of these groups. 1
- Identify pre-braille activities that develop essential tactual, motor, and reading readiness skills. 1
- Compare language arts and braille curricula/assessments for different types of tactual learners. 1
- Identify sources for obtaining braille resources, services and supports

SPED 5440. Braille II: Numeracy for Students with Visual Impairments

3 Credits (3)

This course facilitates an indepth study of the Nemeth Braille Code for Mathematics and Science Notation as well as instructional strategies for using the abacus and developing numeracy. Specialized braille codes for computers, music, and foreign languages will be introduced. Consent of Instructor required. May be repeated up to 3 credits.

Prerequisite: SPED 5430.

Learning Outcomes

1. Transcribe mathematical and scientific notation into Nemeth Braille following appropriate rules.
2. Read, and proof materials transcribed in Nemeth Braille
3. Transcribe, print content into a foreign language using the appropriate braille code.
4. Read, interline, and proof materials produced in foreign language braille.
5. Transcribe a simple score in music braille.
6. Read and interline a simple score in music braille.
7. Produce braille materials, including tactile graphics, using various tools, including a Perkins Brailier, six-key keyboard entry, braille translation software, and tactile graphics.
8. Create different task analysis on computational steps for solving problems with the Cranmer abacus using both the counting and indirect methods for beginning abacus users and aligning them to numeracy standards.
9. Delineate the ways that visual impairment impacts literacy and numeracy and describe adapted instructional and assessment materials and resources that make math meaningfully accessible. 1
10. Delineate the ways that visual impairment impacts scientific understandings and describe adapted instructional and assessment materials and resources that make science and social studies meaningfully accessible. 1
11. Delineate the ways that visual impairment impacts understanding of health and sexuality and describe adapted instructional and assessment materials and resources that make health and sex education meaningfully accessible

SPED 5450. Strategies for Teaching Students with Visual Impairments 3 Credits (3)

This course covers individualized educational programming in both the core and expanded core curriculums for children and youth with visual impairments with an emphasis on assessment, curricular adaptations, IFSP/IEP/ITP planning, and evidence-based practices. Restricted to: SPED majors. Consent of Instructor required. May be repeated up to 3 credits.

Prerequisite: SPED 5410.

Learning Outcomes

1. The learner will analyze core curriculum standards and benchmarks in order to determine necessary instruction in the expanded core curriculum so that learners with visual impairments can meaningfully participate in the common core curriculum.
2. The learner will describe professional roles and ethical responsibilities of the teacher of students with visual impairments in relation to effective collaboration with all members of the educational team (particularly families, para educators, and general educators).
3. The learner will select, adapt, and use appropriate assessments for determining effective and efficient primary and secondary learning modalities, literacy media, and access technologies needed for reading and writing.
4. The learner will follow legal, ethical, and technical procedures while conducting learning media assessments and access technology

evaluations, reporting findings, and making recommendations regarding necessary educational services and supports.

5. The learner will demonstrate the procurement and use of different access technologies needed to make educational materials and learning activities accessible to learners with visual impairments

SPED 5460. Introduction to Orientation and Mobility

3 Credits (3)

This course provides an overview of the history and theory of formalized orientation and mobility instruction as it relates to the ability to live independently. The impact of visual impairment and concomitant impairments on the development of spatial concepts and motor skills in relation to independent locomotion is emphasized. Topics covered include mobility aids; navigation, familiarization, and protective techniques; structured pre-cane assessment and instruction; the development and use of tactual maps; and the relationship of orientation and mobility to other areas of the expanded core curriculum. Consent of Instructor required. Restricted to: SPED, EDUC majors. Consent of Instructor required. May be repeated up to 3 credits.

Prerequisite: SPED 5420.

Learning Outcomes

1. Describe components of orientation and mobility, the role of the certified orientation and mobility specialist, and the role of the teacher of students with visual impairments/developmental vision specialist in teaching travel skills to students who are blind and visually impaired, including those with additional disabilities.
2. Describe significant historical events and legal provisions related to the formalized profession of orientation and mobility and how this affects the provision of orientation and mobility services.
3. Identify the pros, cons, and prerequisite skills related to different modes of mobility and use of different mobility aids and transportation systems.
4. Describe the impact of impaired vision on cognitive, motor, language, social, and self-help skills and effective interventions that promotes the development of independent locomotion and personal autonomy.
5. Execute (and teach the execution of) basic orientation and mobility techniques under conditions that simulate various degrees of visual and additional impairments using all available sensory information (with and without optical aids) in a variety of environments.
6. Task analyze and adapt activities of daily living to allow individuals with visual impairments to lead productive and healthy lifestyles.
7. Identify sources of adapted products and specialized assessments related to the Expanded Core Curriculum that facilitate participation in home, work, and community activities for employment, self-care, and leisure

SPED 5470. Beginning Orientation and Mobility

3 Credits (3)

This course provides an overview of the profession of orientation and mobility and how sensory, motor, and psychosocial function affects movement and spatial orientation. Consent of Instructor required. Restricted to: SPED majors. May be repeated up to 3 credits.

Prerequisite: SPED 5460.

Learning Outcomes

1. Describe how perception and movement develops and is used to enhance safe and independent travel
2. Describe how a traveler is able to acquire, maintain and improve orientation

3. Describe the most common functional mobility problems for students with low vision and what a COMS should consider when providing OM instruction to students with low vision.
4. Describe how development impacts movement and describe issues that impact gait and posture. Describe ways to support and improve sensorimotor development.
5. Describe the psychosocial factors that impact behavior as one learns how to travel and describe ways to teach travelers to deal with
6. Describe the fundamentals of hearing including principles of sound, audition, localization and traffic sounds. Describe ways to develop and improve orientation using hearing
7. Describe the origins of the OM profession and its progression into the present, how OM services are provided around the world and the fundamentals of research in the profession.
8. Evaluate and synthesize literature (publications, research literature) on a selected topic of their choice

SPED 5480. Intermediate Orientation and Mobility

3 Credits (3)

This course focuses on strategies and methods for conducting assessments and appropriately sequencing skill acquisition for learners across the lifespan who may or may not have additional disabilities. Adaptive technology and other aids that assist with travel in a variety of environmental conditions using different mobility systems will also be covered. Consent of Instructor required. Restricted to: SPED majors. May be repeated up to 3 credits.

Prerequisite: SPED 5470.

Learning Outcomes

1. Determine how to modify orientation and mobility instruction, depending on the age of the students, in the following ways: A) describe ways to teach OM to very young children; B) describe ways to teach OM to school age children; C) describe ways to teach OM to adults; and D) describe ways to teach OM to older adults.
2. Demonstrate an understanding of mobility systems and adaptations used by blind and visually impaired travelers in the following ways: A) describe how adaptive technology is used in travel; B) describe how dog guides are used in travel; C) describe orientation aids that can be used for students with vision loss; D) describe issues around environmental accessibility for student with vision loss; and E) describe how to teach OM in adverse weather conditions
3. Demonstrate understanding of how to teach OM to students who have different disabilities in the following ways: A) describe ways to teach OM to learners with vision and hearing loss; B) describe ways to teach OM to learners with vision, physical and health impairments; C) describe ways to teach OM to learners with cognitive impairments and vision loss; D) describe ways to teach OM to learners with cortical visual impairments; and E) describe how to teach travel skills to learners with nonvisual disabilities
4. Conduct an OM assessment and teach OM in the following ways: A) describe the components of a comprehensive OM assessment; B) describe creative ways to provide OM instruction; C) describe theories and best practices for teaching orientation and mobility; and D) describe ways to teach concepts creatively

SPED 5490. Advanced Orientation and Mobility

3 Credits (3)

This course focuses on the development and monitoring of cane skills needed for safe and efficient travel in indoor, residential, and business districts, including the use of public transportation systems. Development, administration, and supervision of orientation and mobility

services is also covered. Consent of Instructor required. Restricted to: SPED majors. May be repeated up to 3 credits.

Prerequisite: SPED 5480.

Learning Outcomes

1. Use orientation and mobility techniques to travel independently, safely and efficiently in a variety of environments including indoor, residential, small business and business areas while blindfolded or under low vision simulator.
2. Provide appropriate and safe orientation and mobility instruction to fellow students, who are blindfolded or wearing low vision simulators, while traveling in indoor, residential, small business and business areas
3. Describe modifications to traditional OM techniques for diverse learners of various ages with different degrees of visual functioning and with a variety of additional disabilities
4. Use public transportation while blindfolded or under low vision simulator and provide instruction to fellow students who are blindfolded or wearing low vision simulators in the use of public transportation
5. Critically analyze one's teaching and monitoring through self-observation and reflective practices

SPED 5810. Student Teaching SPED

6 Credits (6)

Culminating course required for graduate level students seeking initial licensure. Students must have completed a Bachelor's degree and be admitted to student teaching program to enroll. Restricted to: SPED majors.

Prerequisite: SPED 5811.

Learning Outcomes

1. The teacher candidate understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
2. The teacher candidate uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
3. The teacher candidate works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

SPED 5811. Field Experience in Education, Equity & Cultural Diversity

3 Credits (3)

This is a supervised experience in providing special education services to local preK-12 students. In the context of the public school classroom, teacher candidates are guided to apply content knowledge from the seminar meetings and from prior coursework. This experience is designed for both the practicing general education classroom teacher pursuing special education licensure and for graduate teacher candidates pursuing initial special education licensure. Restricted to: SPED majors.

Prerequisite: SPED 3105 and SPED 3120, or SPED 5105 and SPED 5230, or consent of instructor.

Learning Outcomes

1. Learners will demonstrate critical thinking skills and critical reflection and use current special education research to make and evaluate instructional decisions across the full range of learning tasks (including identifying appropriate learning objectives, selecting methods and materials, assessing student progress in relation to

learning objectives, making classroom management decisions, and evaluating the results of decisions and implementation of lessons).

2. Learners will create access to grade level general education curriculum for a broad range of students with diverse learning needs. This will be accomplished by using grade level standards and extended standards (as appropriate), following the requirements expressed in IEP's, and designing and implementing appropriate instruction that addresses students' needs, learning styles, motivation, and cultural and linguistic differences. Universal design, differentiation, accommodation, and modification will be used to address diverse learning needs.
3. Learners will further develop, refine, and demonstrate the dispositions necessary to enter student teaching, with the ultimate goal of entering and advancing the teaching profession. This includes
 - a) building rapport, positive communication, and a cooperative work environment with students, families, teachers, supervisors, instructors, educational/instructional assistants, service providers, and others in the school community
 - b) demonstrating respectful and responsive attitudes toward individuals with exceptionalities from diverse backgrounds, as well as their families and service providers
 - c) demonstrating responsible task performance
 - d) adhering to the CEC code of ethics and university/site policies and procedures.
4. Learners will select and use appropriate technology to support student learning.
5. Learners will apply knowledge of the historical background and current laws and procedures within the field of special education to contextualize, explain, and evaluate special education services.

SPED 5820. Masters Degree Seminar

3 Credits (3)

Capstone review of current issues in special education. Each student will participate in a practice comprehensive oral exam. May be repeated up to 3 credits.

Learning Outcomes

1. Varies

SPED 5830. Special Education/Elementary Student Teaching Seminar

3 Credits (3)

Discussion of elementary Special Education school issues related to student teaching.

Prerequisite: SPED 5811.

Corequisite: SPED 5810.

Learning Outcomes

1. The teacher candidate understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
2. The teacher candidate uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
3. The teacher candidate works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

SPED 5840. Special Education/Secondary Student Teaching Seminar

3 Credits (3)

Discussion of secondary Special Education school issues related to student teaching.

Prerequisite: SPED 5811.

Corequisite: SPED 5810.

Learning Outcomes

1. The teacher candidate understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
2. The teacher candidate uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
3. The teacher candidate works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

SPED 5850. Current Research in Special Education

3 Credits (3)

Current investigations and research techniques. May be repeated up to 3 credits.

Learning Outcomes

1. Evaluate current research in special Education.
2. Read and evaluate original research articles published in peer reviewed academic journals.
3. Describe the elements of research.
4. Analyze the designs, methods, and applications of quantitative research in special education
5. Analyze the designs, methods, and applications of qualitative research in special education
6. Examine ethical issues and guidelines for conducting special education research.
7. Evaluate the elements of a research proposal.

SPED 5860. Current Issues in Special Education for Teaching in Culturally Responsive Society

3 Credits (3)

Theoretical and empirical bases for special education practices. Skill development in critical thinking, reading, and writing in relation to contemporary problems. Taught with SPED 6860. May be repeated up to 3 credits.

Learning Outcomes

1. Students will learn several concepts, issues, and theories in contemporary special education in order to be a more intelligent consumer of information about special education.
2. Students will analyze, evaluate, and make decisions concerning complex contemporary issues in special education.
3. Students will demonstrate communications skills, both written and oral, in order to enhance their effectiveness in expressing their view on the issues related to special education.
4. Students will examine issues related to the human experience as it relates to diversity and a culturally and linguistically diverse world.
5. Students will debate the pros and cons of current special education issues

SPED 5870. Early Childhood SPED Student Teaching

6 Credits (6)

A student teaching experience designed for students studying early childhood special education. Restricted to TEP-ECED majors. Students must be admitted to student teaching to enroll. May be repeated up to 9 credits.

Learning Outcomes

1. Our mission is to serve the people of New Mexico through education, research, extension education, and public service with specific emphasis on innovative practices, overcoming barriers to learning, international activities, technology, and literacy for the diverse populations of New Mexico, surrounding states and border communities.

SPED 5990. Practicum in Reading Disabilities**3 Credits (3)**

Supervised experience in assessing a student with reading disability, developing and intervention plan, and implementing and monitoring the interventions across time. May be repeated up to 3 credits.

Learning Outcomes

1. Varies

SPED 5991. Special Research Problems**1-3 Credits (1-3)**

Individual investigation either analytical or experimental. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

SPED 5996. Topics in Special Education**1-3 Credits (1-3)**

Offered under various subtitles which indicate the subject matter to be covered. Maximum of 6 credits, 3 credits per semester. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

SPED 5999. Master's Thesis**1-15 Credits (1-15)**

Thesis. May be repeated up to 88 credits.

Learning Outcomes

1. Varies

SPED 6110. Low Incidence Disabilities**3 Credits (3)**

Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations. Taught with SPED 5110 with differentiated assignments. May be repeated up to 3 credits.

Learning Outcomes

1. Analyze Low Incidence Disabilities (characteristics, etiology, and diagnostic criteria) (IDEIA, 2004).
2. Identify the types of related supports and services—assistive technology, environmental and Instructional accommodations/modifications, and related services—available to students with low incidence disabilities to maximize participation in inclusive settings.
3. Apply culturally responsive instructional practices to individualize learning for learners with low incidence disabilities, taking into consideration individual abilities, interests, learning environments, and cultural and linguistic factors in the planning, selection, development, and adaptation of learning experiences of learners with low incidence disabilities in inclusive environment.
4. Employ culturally responsive strategies for creating effective family, school, community partnerships.
5. Discuss culturally responsive strategies that promote collaboration between families, schools, and community agencies/organizations during the student's transition planning process.

6. Identify current educational issues impacting students with low incidence disabilities.

SPED 6120. High Incidence Disabilities in a Diverse Society**3 Credits (3)**

Examines those areas of disability that most frequently occur in the special education population, including mental retardation, learning disabilities, communication disorders, and behavioral and emotional disorders. Taught with SPED 5120. Master's Degree. Restricted to SPED and C D majors. May be repeated up to 3 credits.

Learning Outcomes

1. Describe and compare the major approaches to identifying, placement, assessing, planning for instruction, and classifying high incidence disabilities.
2. Identify and discuss school-based, sociological, cultural, and economic differences as they relate to etiology and identification of mild disabilities.
3. Describe and critically evaluate classroom instructional practices that can improve the educational success of students with high incidence disabilities.
4. Describe and critically evaluate classroom management practices that can improve the educational success of students with high incidence disabilities.
5. Describe how the educational experiences of persons with mild disabilities is shaped by their cognitive, perceptual, language, academic, and social / emotional characteristics.

SPED 6160. Technology and Exceptionality in a Diverse Society**3 Credits (3)**

This class will address the unique educational needs of learners with exceptionalities, and will provide information and practice in addressing those needs through the use of technology-based interventions. Taught with SPED 5160.

Learning Outcomes

1. Carry out effective practicum practices for using technology with diverse learners.

SPED 6170. School Intervention and Organization in a Diverse Society**3 Credits (3)**

Introduces public school organization and laws and the psychosociological perspective of education. Curriculum and theory, teaching methods and materials will be presented and operationalized through a psycho-educational point of view. May be repeated up to 3 credits.

Learning Outcomes

1. Understand and implement effective interventions in a variety of classroom and organizational settings.

SPED 6310. Introduction to Autism**3 Credits (3)**

This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and family issues. Differentiated Assignments. Taught with SPED 5310 and SPED 4310. May be repeated up to 3 credits.

Learning Outcomes

1. Analyze Autism Spectrum Disorders ASD (characteristics, etiology, co-morbid conditions, differential diagnosis).
2. Describe the criteria used to screen and diagnose ASD.
3. Examine evidence-based practices used to effectively support students with ASD in accessing general education and grade level

standards (classroom structure, differentiated instruction, peer mediated supports, structured teaching, and emotional supports).

- Describe strategies related to promoting a successful transition from school to adult life for individuals with ASD.
- Examine the strategies for effective collaboration and communication with families of children with ASD and key stakeholders for the purpose of information sharing and collaborative planning with families.
- Identify and investigate current educational issues impacting students with ASD.

SPED 6330. Social Skills and Autism 3 Credits (3)

This course will cover the second of the triad of impairments. As a blend of researched based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for children functioning at a variety of levels along the autism spectrum. Taught with SPED 4330 and SPED 5330 with differentiated assignments. May be repeated up to 3 credits.

Prerequisite/Corequisite: SPED 4310 or SPED 5310 or SPED 6310.

Learning Outcomes

- Analyze Autism Spectrum Disorders ASD (definition, characteristics, etiology).
- Evaluate Social Skills characteristics and difficulties often associated with ASD.
- Appraise current tools and strategies used to assess Social Skills problems in children with ASD.
- Use assessment results to identify the Social Skills needs of children with ASD
- Analyze the types of evidence-based practices used to address the Social Skills needs of children with ASD.
- Design an intervention plan to address the Social Skills needs of a child with ASD.
- Incorporate family preferences and values into the educational process of students with ASD.
- Employ data collection procedures to evaluate the effectiveness of evidence-based practices for students with ASD.

SPED 6340. Communication and Autism 3 Credits (3)

This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 4340 and SPED 5340 and differentiated assignments. May be repeated up to 3 credits.

Prerequisite: SPED 4310 or SPED 5310 or SPED 6310.

Learning Outcomes

- Analyze Autism Spectrum Disorders ASD (definition, characteristics, etiology).
- Evaluate communication characteristics and difficulties often associated with ASD.
- Appraise current tools and strategies used to assess communication problems in children with ASD.

- Analyze the types of interventions used to address the communication needs of children with ASD.
- Design an intervention plan to address the communication needs of a child with ASD.
- Employ data collection procedures to evaluate the effectiveness of research-based interventions for students with ASD.
- Incorporate family preferences and values into the educational process of students with ASD.

SPED 6810. Doctoral Seminar

1-4 Credits (1-4)

The seminar will engage doctoral students in scholarly dialogue and production. It will assist in preparing them for future careers in leadership roles. May be repeated up to 4 credits.

Learning Outcomes

- Varies

SPED 6830. Current Research in Special Education

3 Credits (3)

Required for students seeking the Ed.D./Ph.D. M.A. degree. Restricted to majors. May be repeated up to 3 credits.

Learning Outcomes

- Evaluate current research in special Education.
- Read and evaluate original research articles published in peer reviewed academic journals.
- Describe the elements of research.
- Analyze the designs, methods, and applications of quantitative research in special education
- Analyze the designs, methods, and applications of qualitative research in special education
- Examine ethical issues and guidelines for conducting special education research.
- Evaluate the elements of a research proposal.

SPED 6840. Current Issues in Special Education for Teaching in a Culturally Responsive Society

3 Credits (3)

Required for students seeking the Ed.D./Ph.D. May be repeated up to 3 credits.

SPED 6991. Doctoral Research

1-15 Credits (1-15)

Research. May be repeated up to 88 credits.

Learning Outcomes

- Varies

SPED 6996. Selected Topics in Special Education

1-6 Credits (1-6)

Offered under various subtitles which indicate the subject matter to be covered. Maximum of 6 credits, 3 credits per semester. May be repeated up to 6 credits.

Learning Outcomes

- Varies

SPED 6997. Independent Study Topics in Special Education

1-6 Credits (1-6)

A problem and seminar course for those pursuing an advanced graduate degree. Each course to bear an appropriate subtitle. May be repeated up to 99 credits.

Learning Outcomes

- Varies

SPED 6998. Internship in Special Education**1-6 Credits (1-6)**

Each course bears a qualifying subtitle. Maximum of 6 credits per semester. May be repeated up to 99 credits.

SPED 7000. Dissertation**1-9 Credits (1-9)**

Credit may be earned by students who have successfully completed their doctoral comprehensive exams and presented their dissertation proposals to their committees. At least 18 credits are required during the course of dissertation study. May be repeated up to 24 credits.

Learning Outcomes

1. Varies

SPHS-SPEECH & HEARING SCIENCE

SPHS 2110. Introduction to Communication Disorders**3 Credits (3)**

This introductory course provides an overview of common speech, language, and hearing disorders in children and adults including etiologies, characteristics, prevention, identification, assessment and intervention. The course provides an overview of the field of speech-language pathology and audiology. May be repeated up to 3 credits.

Learning Outcomes

1. Describe normal human communication anatomy and processes as they relate to speech and language production.
2. Describe the nature of speech, language, and hearing disorders and differences.
3. Describe the principles of prevention, assessment and intervention of communication disorders.
4. List requirements for licensure, certification, and other relevant professional credentials.
5. Exhibit basic knowledge of contemporary professional issues in speech-language pathology.
6. List possible psychosocial implications of various communication disorders.
7. Identify cultural, educational, legal, and ethical issues related to communication disorders.
8. Describe the scope of practice of speech-language pathologists and audiologists.

SPHS 4510. Phonetics**3 Credits (3)**

The science of phonetics, including work with the International Phonetic Alphabet. May be repeated up to 3 credits.

Prerequisite: C- or better in SPHS 2110; Cumulative GPA of 3.2 or better.

Learning Outcomes

1. Students will learn and be able to describe the linguistic and articulatory characteristics of speech sounds.
2. Students will be able to identify, recall and extrapolate information about the biological bases of speech sound production.

SPHS 4520. Audiology**3 Credits (3)**

Anatomy and physiology of the auditory system, bases of auditory disorders, and basic audiometric procedures. Restricted to: C DS,C D majors. May be repeated up to 3 credits.

Prerequisite: B or better in SPHS 2110, and a minimum of 3.2 GPA.

Learning Outcomes

1. Describe the properties of sound.
2. Define the terms used to describe hearing and hearing loss.

3. Describe the anatomy and physiology of the auditory system at an introductory level.
4. Identify basic audiometric procedures.
5. Interpret basic audiometric test findings.
6. Recognize common auditory (and related) disorders.
7. Discuss basic approaches to managing auditory (and related) disorders.

SPHS 4610. Language Acquisition**3 Credits (3)**

This course introduces students to the study of the development of language, speech, and communication. Includes language sampling. May be repeated up to 3 credits.

Prerequisite: C- or better in SPHS 2110; Cumulative GPA of 3.2 or higher.

Learning Outcomes

1. Describe the development of phonology, semantics, morphology, syntax, and pragmatics.
2. Describe biological, cognitive, social aspects of language acquisition.
3. Describe the current methods for studying language acquisition and critically evaluate their contributions to our understanding of how children learn language.
4. Describe and critically evaluate current theories of language acquisition in relation to the available data and to each other.
5. Apply basic observational methods to draw conclusions about a child's level of language knowledge.

SPHS 4620. Speech and Hearing Science**3 Credits (3)**

Basic concepts and theories in acoustics, speech production and speech perception. Includes laboratory experience with instrumental measurement and analysis of speech systems. May be repeated up to 3 credits.

Prerequisite: C- or better in SPHS 2110, SPHS 4510, SPHS 4520; and minimum 3.2 GPA.

Learning Outcomes

1. Students will learn basic acoustic physics and be able to describe simple harmonic motion, complex waveforms, and resonances.
2. Students will learn about the acoustic consequences of the three articulatory parameters tongue height, tongue advancement, and lip rounding during vowel production in order to be able to understand the acoustics of vowels and diphthong acoustics.
3. Students will learn the acoustic properties of English consonants including stops, fricatives, affricates, liquids, glides, and nasals.
4. Students will learn about speech perception, including categorical perception, theories of speech perception as well as some basic psychoacoustic properties such as the decibel scale.

SPHS 4710. Speech Disorders Across the Lifespan**3 Credits (3)**

Bases, symptoms, etiologies, and clinical management of issues related to disorders of articulation, phonology, voice and resonance, and fluency. Restricted to: CD majors. May be repeated up to 3 credits.

Prerequisite: SPHS 2110, SPHS 4510, SPHS 4520, SPHS 4620, and SPHS 4610; and minimum 3.2 GPA.

Learning Outcomes

1. Describe diverse etiologies of speech disorders and compare/contrast assessment procedures (ASHA Standard III-B)
2. Define and compare/contrast the classification for a variety of speech disorders. (ASHA Standard III-C)

3. Differentiate between a speech disorder vs a difference that can be attributed to culturally and linguistically different groups. (ASHA Standard III-D)
4. Describe evidence-based treatment; evaluate treatment-efficacy evidence for a variety of speech disorders. (ASHA Standard III-D)

SPHS 4715. Language Disorders Across the Life Span

3 Credits (3)

Bases, symptoms, etiologies, and treatment of language disorders. Includes review of normal language acquisition. May be repeated up to 9 credits.

Prerequisite: SPHS 2110, SPHS 4510, SPHS 4520, SPHS 4610, SPHS 4620, 3.2 cumulative GPA.

Learning Outcomes

1. Describe diverse etiologies of language disorders and compare/contrast assessment procedures (ASHA Standard III-B).
2. Define and compare/contrast the classification for a variety of language disorders. (ASHA Standard III-C).
3. Differentiate between a disorder vs a difference that can be attributed to culturally and linguistically different groups. (ASHA Standard III-D).
4. Describe evidence-based treatment; evaluate treatment-efficacy evidence for a variety of language disorders. (ASHA Standard III-D).

SPHS 4720. Anatomy and Physiology of Speech Mechanisms

3 Credits (3)

Structure and function of systems underlying human speech sound production and processing, including respiratory, phonatory, and articulatory components. May be repeated up to 3 credits.

Prerequisite: C- or better in SPHS 2110, SPHS 4510, SPHS 4520, SPHS 4620, and SPHS 4610; and minimum 3.2 GPA.

Learning Outcomes

1. Students will learn and be able to identify respiratory anatomy important for speech production.
2. Students will be able to identify, recall and extrapolate information about respiratory physiology.
3. Students will learn and be able to identify laryngeal anatomy important for speech production.
4. Students will be able to identify, recall and name important physiological mechanisms for controlling vocal function.
5. Students will learn and be able to identify supraglottal anatomy important for speech production.
6. Students will be able to identify, recall and name physiologic events about resonance and articulation.

SPHS 4810. Clinical Methods and Procedures

3 Credits (3)

Guidelines and procedures associated with the clinical and supervisory processes. Provide opportunities to complete the supervised clinical observation requirement for participation in clinical practicum. Restricted to: C DS,C D majors. May be repeated up to 3 credits.

Prerequisite: B or better in SPHS 2110, SPHS 4510, SPHS 4520, SPHS 4620, SPHS 4610; and minimum 3.2 GPA.

Learning Outcomes

1. Demonstrate basic use of professional terminology in the area of Speech-Language Pathology
2. Demonstrate knowledge of principles and techniques of the observation of nonverbal and verbal behavior of clients and clinicians using oral and written reporting, as well as in-class discussions.

3. Complete twenty-five clock hours of supervised clinical observation of speech, language, and hearing services.

SPHS 4820. Neural Bases of Communication Disorders

3 Credits (3)

Study of the neuroanatomy and neurophysiology of communication and communication disorders. Includes review of the central nervous system and peripheral nervous system relationship to speech motor control, language, and hearing. Restricted to: C DS,C D majors. May be repeated up to 3 credits.

Prerequisite: B or better in SPHS 2110, SPHS 4610, SPHS 4510, SPHS 4520, SPHS 4620, SPHS 4710, SPHS 4720, 3.0 GPA or better.

Learning Outcomes

1. Demonstrate knowledge of the gross anatomy and physiology of the central, peripheral, autonomic nervous systems.
2. Understand the clinical manifestations associated with injury/disease to a given regions/systems within the nervous system.

SPHS 4830. Aural Rehabilitation

3 Credits (3)

Overview of hearing aids and amplification devices including cochlear implants. Review of the bases and psychosocial aspects of hearing loss. Clinical management of hearing loss consistent with ASHA's scope of practice for SLPs. Restricted to: C DS,C D majors. May be repeated up to 3 credits.

Prerequisite: B or better in SPHS 2110, SPHS 4510, SPHS 4520, SPHS 4620, SPHS 4610, SPHS 4710, SPHS 4720; and 3.2 GPA or higher.

Learning Outcomes

1. Define and use the appropriate terminology when discussing hard of hearing and deafness.
2. Describe and explain the effects of hearing impairment on speech-language acquisition and auditory/speech perception.
3. Describe the effects of hearing impairment on various aspects of life (e.g., cognitive, educational, occupational, and psycho-social aspects in all age ranges).
4. Identify the communication needs and develop a basic understanding of common intervention options including communication strategies, auditory training, speech reading, hearing aids, assistive devices, and cochlear implantation.
5. Be acquainted with the relevant public laws.

SPHS 5110. Research Methods

3 Credits (3)

Introduction to basic qualitative, quantitative, and single subject research methodology in speech-language pathology and audiology. Restricted to CD,CDS majors. May be repeated up to 3 credits.

Prerequisite: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

Learning Outcomes

1. Demonstrate knowledge of the concepts of research ethics and integrity including protection of human subjects.
2. Demonstrate comprehension of concepts of evidence-based practice.
3. Locate, use, and critically evaluate library and online sources that support the investigation of research questions pertinent to speech-language and hearing science.
4. Interpret basic single variable and two-variable statistical procedures appropriate for single and group designs.
5. Read, abstract, and critically evaluate pertinent research.

SPHS 5120. Assessment of Communication Disorders

3 Credits (3)

Diagnostic theories and management of communication disorders using standardized and descriptive methodology. Includes the practice of interviewing, testing, and oral and written reporting. Restricted to: C DS,C D majors. May be repeated up to 3 credits.

Prerequisite: A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

Learning Outcomes

1. Demonstrate knowledge of testing statistics and basic concepts in psychometric assessment.
2. Formulate, implement and summarize one complete successful and efficient assessments: including pre-planning meeting, interview design and implementation, administration of instruments, analysis and integration of results and report writing.
3. Review, summarize and critique one assessment tool for design, use, interpretation and cultural/linguistic inclusivity to classmates.
4. Given case study information, students will be able to: choose an appropriate instrument from assessment tools reviewed; develop an assessment plan for a client; write a report and develop treatment goals.

SPHS 5130. Pediatric Language and Disorders

3 Credits (3)

Normal communication development of neonates, infants, toddlers, and preschoolers; etiologies, and treatment of cognitive, linguistic and social elements of communication problems in family systems. Restricted to: C DS,C D majors. May be repeated up to 3 credits.

Prerequisite: Minimum grade of B and an overall GPA of 3.0 or higher.

Learning Outcomes

1. Demonstrate a working knowledge of the major theories of language acquisition and theoretical perspectives of disorders.
2. Demonstrate an understanding of the aspects related to dialect and second language acquisition of English.
3. Demonstrate knowledge of the core principles of language assessment for the pediatric population (zero-five year old).
4. Summarize and interpret content material relating to pediatric language development/disorders.

SPHS 5140. Speech Sound Disorders

3 Credits (3)

Advanced study of the symptoms, etiologies, assessment, and clinical management of speech sound disorders including those due to cleft palate and disorders of resonance. May be repeated up to 3 credits.

Prerequisite: A minimum grade of B in all graduate courses and a minimum overall GPA of 3.0 is required.

Learning Outcomes

1. Course Goals – Fulfillment of the following Standards of the American Speech-Language-Hearing Association (ASHA): IV-B, IV-C, IB-D, and IV-F. Students will be able to explain the classification of speech sounds based on different phonological theories, and they will be able to phonetically transcribe standard and non-standard speech. Summative Assessment: Test I (IV-B, IV-C)
2. Students will be able to describe the impact of anatomical, motor, sensory, cognitive-linguistic, and social factors in speech development, and developmental profiles associated with developmental and syndromic conditions. Summative Assessment: Test 2 (IV-C)
3. Students will be able to identify appropriate assessment tools and practice their use for the diagnosis of speech sound disorders. Formative Assessment: Project 1 (IV-D)
4. Students will learn to research different treatment approaches for the successful remediation of speech sound disorders and to

integrate research into evidence-based clinical practice. Formative Assessment: Research Article Presentation Treatment Presentation (IV-F)

5. Students will familiarize themselves with current research in the area of speech sound disorders as well as foundational original research papers in the field. Formative Assessment: Research Article Presentation (IV-F)

SPHS 5210. School Age Language and Disorders

3 Credits (3)

Normal communication-learning development of elementary, secondary, and postsecondary students; etiologies, diagnosis, and treatment of interpersonal communication and language-based academic disorders. Restricted to: C DS,C D majors. May be repeated up to 3 credits.

Prerequisite: A minimum grade of B in all graduate courses and an overall GPA of 3.0 or higher.

Learning Outcomes

1. Demonstrate a working knowledge of legislation governing service provision in the schools (IDEIA, NCLB) and implementation practices (IEP, five-hundred-four plan, RtI).
2. Demonstrate knowledge of normal language development of school-age children.
3. Demonstrate understanding of language disorders relevant to school-age children.
4. Demonstrate knowledge of evidence-based intervention methodologies for the treatment of language disorders in the school-aged population.

SPHS 5220. Adult Neurogenic Language Disorders

3 Credits (3)

Etiologies, diagnosis, assessment, and treatment of adult neurogenic language disorders, especially aphasia due to stroke and traumatic brain injuries. Restricted to: C DS,C D majors. May be repeated up to 6 credits.

Prerequisite: A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

Learning Outcomes

1. Characterize aphasia and its sub-types based on lesion data and behavioral profiles.
2. Specify standardized and non-standardized measures to evaluate clients with aphasia.
3. Describe principles and techniques to maximize linguistic recovery in individuals with aphasia.
4. Describe the etiology and patterns of recovery associated with aphasia and right-hemisphere disorder.
5. Describe cognitive processes and systems, including language, attention, memory, and executive function, and their relationship to adult neurogenic language disorders.
6. Apply theoretical perspectives of language, cognition, and neurological function as they relate to adult neurogenic language disorders.

SPHS 5230. Fluency Disorders

2-3 Credits (2-3)

Speech fluency development and the disorders of stuttering, cluttering, and neurogenic dysfluency. Restricted to: C DS,C D majors.

Prerequisite: Graduate GPA of 3.0 or higher.

Learning Outcomes

1. Define/describe terminology and nomenclature associated with the study of human fluency disorders.

- Identify constitutional and environmental conditions that contribute to fluency disorders.
- Propose methods of assessing and treating the affective, behavioral and cognitive aspects of fluency disorders across the lifespan, including the use of augmentative devices for fluency.
- Be able to explain the role of counseling in treating fluency disorders and how that role changes with the age of the client.
- Be able to explain the role of counseling in treating fluency disorders and how that role changes with the age of the client.

SPHS 5310. Introduction to Augmentative and Alternative Communication

3 Credits (3)

Assessment and intervention for children and adults with developmental disabilities; Alternative communication strategies and systems for individuals with severe speech and/or language impairments. Restricted to: C DS,C D majors. May be repeated up to 3 credits.

Prerequisite: Graduate standing; overall GPA of 3.0.

Learning Outcomes

- Understand and consider physical and psycho-social, linguistic, and cognitive characteristics of AAC users.
- Describe assessment methods to determine the best fit of AAC systems to meet the needs of AAC users.
- Understand how to provide training in the use of various AAC systems for AAC users, their families, and caregivers and educators.

SPHS 5320. Cognitive Communication Disorders

3 Credits (2,3)

Topics include attention, memory, executive function, and underlying neuropathologies, with emphasis on assessment, diagnosis, prognosis, treatment and recovery processes in cognitive communication disorders related to dementia and traumatic brain injury. Restricted to: C DS,C D majors. May be repeated up to 6 credits.

Prerequisite: 3.0 Graduate GPA.

Learning Outcomes

- Describe dementing diseases and how they affect cognitive-communicative functioning.
- Specify standardized and non-standardized measures to evaluate clients with dementia.
- Describe principles and techniques to maximize communicative functioning of individuals with dementia.
- Describe the epidemiology and etiology of traumatic brain injury.
- Specify the relationships between the mechanisms of traumatic brain injury and the nature and severity of cognitive-communicative impairments.
- Specify appropriate diagnostic and treatment methods for individuals with different severity levels of traumatic brain injury.
- Describe cognitive processes and systems, including attention, memory, and executive function, and their relationship to cognitive communication disorders.

SPHS 5330. Dysphagia

3 Credits (3)

Study of the anatomy and physiology of swallowing and upper aerodigestive systems. Review of the bases and etiologies of child and adult swallowing disorders, including diagnosis, assessment, and treatment. Restricted to: C DS,C D majors. May be repeated up to 3 credits.

Prerequisite: A course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

Learning Outcomes

- Define the anatomy and physiology of normal swallowing and causes of abnormal swallow in the pediatric to geriatric age ranges.
- Define dysphagia team components.
- Describe protocol for clinical and instrumental dysphagia evaluation.
- Describe dysphagia diagnosis and treatment.

SPHS 5335. Swallowing and its Disorders in the Pediatric Population

2 Credits

This class is an introduction to swallowing disorders, normal and abnormal swallow function for the pediatric population. The primary focus of instruction will include normal and impaired swallow function, evaluation and treatment. Your instruction will include lecture, videos, small group discussion, and occasional labs. Of note, this is an introductory course to build a strong foundation of pediatric dysphagia. Your internships, fellowships and professional careers will help build upon this foundation. May be repeated up to 2 credits.

Prerequisite/Corequisite: SPHS 5330.

Learning Outcomes

- Students will be able to define the anatomy and physiology of normal swallowing and causes of abnormal swallow in the pediatric population.
- Students will be able to define dysphagia team components and describe protocol for clinical dysphagia evaluation in infants and children.
- Students will demonstrate knowledge of dysphagia diagnosis and treatment as well as demonstrate ability to document diagnostic findings for the pediatric population.
- Students will be able to explain indications and methods of non-oral nutrition and ethical considerations when working with pediatric clients from different cultural backgrounds.

SPHS 5340. Motor Speech Disorders

3 Credits (3)

Advanced studies of dysfunction of the nervous system that affect speech. Includes evaluation, diagnosis, and treatment of speech apraxias and dysarthrias. Restricted to: C DS,C D majors. May be repeated up to 3 credits.

Prerequisite: A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

Learning Outcomes

- Recognize evaluate motor speech disorders - differentiating between flaccid, spastic, unilateral upper motor neuron, ataxic, hypokinetic, hyperkinetic, mixed dysarthria, as well as apraxia.
- Identify the etiology of the various motor speech disorders.
- Demonstrate knowledge of methods to assess the various subsystems (resonance, articulation, phonation, and respiration) and determine relative contribution of each system to the motor speech disorder.
- Demonstrate knowledge of various interventions for clients with various motor speech disorders.

SPHS 5350. Voice Disorders/Head and Neck Anomalies

3 Credits (3)

Advanced studies of anatomy and physiology of the vocal tract with emphasis on diagnosis, assessment, and treatment of voice disorders, laryngectomy, cleft palate, and other oral-facial anomalies. Restricted to: C DS,C D majors. May be repeated up to 3 credits.

Prerequisite: A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

Learning Outcomes

1. Recognize and describe relevant anatomy and physiology of normal voice production, including laryngeal and respiratory anatomy and physiology
2. Identify and discuss structural, neurologically-based, and functional voice disorders.
3. Demonstrate knowledge of approaches to assess voice disorders, including objective and subjective measures.
4. Explain and demonstrate selected intervention techniques for voice disorders.

**SPHS 5360. Communication Disorders in Neurodiverse Populations
3 Credits (3)**

This course is primarily aimed at providing meaningful foundations for the application of evidence-based intervention designs that enhance the development of communication skills for individuals with Autism Spectrum Disorders across the lifespan. May be repeated up to 6 credits.

Learning Outcomes

1. Identify and implement evidence-based interventions for individuals with ASD across a range of ages and abilities
2. Evaluate several evidence-based interventions and determine the best fit based on a client scenario
3. Discuss key features of evidence-based interventions for individuals with ASD
4. Implement evidenced communication interventions with individuals with ASD

**SPHS 5410. Professional Issues and Multicultural Practices in Communication Disorders
3 Credits (3)**

This course includes a range of topics pertinent to students entering professional practice as speech-language pathologists including current legal, cultural, ethical, and clinical service provision issues. Restricted to: C DS,C D majors. May be repeated up to 3 credits.

Prerequisite: Minimum of 3.0 GPA.

Learning Outcomes

1. Describe current issues in professionalism, ethics, and liability in the profession of Speech-Language Pathology.
2. Understand setting-specific employment issues, including working with culturally and linguistically diverse populations.
3. Understand the procedures necessary for obtaining licensure and certification by state and national agencies, as well as maintenance requirements for licensure and certification in Speech-Language Pathology.

**SPHS 5510. Advanced Spanish Morpho-Syntax for Education Professionals
3 Credits (3)**

This class has been designed for Heritage Speakers of Spanish who work in educational settings. It will cover the essential linguistic theory and fundamental structures of the Spanish language. This includes, but is not limited to, verb morphology, morphosyntactic and syntactic structures. The main goal of this course is to determine what usages fall within the norms of an individual's speech community, or if there are elements that fall outside those norms. Students have to be fluent in Spanish as course will be conducted in Spanish.

**SPHS 5520. Best Practices in Bilingual/Multicultural Assessment for Practitioners
3 Credits (3)**

The purpose of this course is to provide future speech-language pathologists, educational diagnosticians and special educators with a foundation for evaluating the linguistic, cognitive and academic skills of students from any cultural linguistic background. The course covers a review of the literature on best practices for working with interpreters during assessments. Practitioners will be expected to gather qualitative information about cultural/linguistic and educational histories of school-age children and integrate those results with the results of standardized tests. Restricted to: C DS,C D majors. May be repeated up to 3 credits.

SPHS 5988. Clinical Education**1 Credit (1)**

This course is specifically designed to target the knowledge base necessary to initiate clinical practicum in the CD Program. The learning objectives are based upon the Council of Academic Accreditation in Audiology and Speech-language Pathology (CAA) standards and knowledge areas. These learning outcomes are developed to assist students in clinical practicum and are specific to the services provided to clients of the NMSU Edgar R. Garrett Speech and Hearing Center. Restricted to: C DS,C D majors. May be repeated up to 2 credits.

Corequisite: SPHS 5990.

Learning Outcomes

1. Demonstrate an understanding of successful strategies to work with families and clients from various clinical settings/cultural backgrounds.
2. Demonstrate an understanding of ethical and confidential service delivery.
3. Identify characteristics of properly written clinical reports.
4. Demonstrate skill in oral and written or other forms of communication sufficient for entry into professional practice.
5. Demonstrate knowledge of entry level and advanced certifications, licensure, and other relevant professional credentials.

**SPHS 5989. Externship in Communication Disorders
3-9 Credits (3-9)**

This course is designed to provide opportunities for the developing clinician to provide treatment to and evaluations for clients in a full term externship experience under the supervision of a licensed SLP. Restricted to: C DS majors. May be repeated up to 9 credits.

Learning Outcomes

1. Various

**SPHS 5990. Practicum in Speech-Language Pathology
1-4 Credits (1-4)**

Supervised clinical practice in a variety of speech, language, and hearing disorders. Practicum includes diagnostic, treatment, and management work through direct patient/client contact. Attendance at weekly clinical staff meetings is required. Restricted to: C DS,C D majors. May be repeated up to 15 credits.

Prerequisite: Good standing in the graduate school; a course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

Learning Outcomes

1. Various

**SPHS 5996. Special Topics
1-9 Credits (1-9)**

Individual and/or group study of special topics identified by subtitle. Restricted to: C DS majors. May be repeated up to 9 credits.

Prerequisite: Prior arrangement with faculty; a course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

Learning Outcomes

1. Varies

SPHS 5999. Master's Thesis**1-15 Credits (1-15)**

Thesis. May be repeated up to 88 credits.

Learning Outcomes

1. Various

SPMD-SPORTS MEDICINE

SPMD 1110. Introduction to Athletic Training**3 Credits (3)**

Introduction to the principles of athletic training. May be repeated up to 3 credits.

Learning Outcomes

1. Understand the historical development of athletic training and sports medicine.
2. Understand the knowledge and experiences needed to become a Certified Athletic Trainer.
3. Understand the specific responsibilities and duties of an athletic trainer.
4. Understand the diverse jobs settings within the profession of athletic training.
5. Understand the relationship between the athletic trainer and the sports medicine team.
6. Understand some of the general and specific injuries and medical conditions that occur in athletics; their causes, signs and symptoms, treatments, rehabilitation, and prevention.
7. Understand some of the contemporary issues and problems facing the athletic training profession.

SPMD 1120. Medical Terminology**3 Credits (3)**

Study of the structure of medical language with emphasis on sports medicine-related terminology. To include analysis and interpretation of medical documentation. Restricted to: Las Cruces campus only.

Learning Outcomes

1. Master the fundamentals of word analysis, including the separation of terms into word roots or combining forms, common prefixes, and suffixes.
2. Differentiate types of medical terms and the relationships among terms.
3. Develop a proficiency in the use of physiological and anatomical terms as reflected in medical documents.
4. Master the terms, words, phrases, and symbols that describe the human body in its various states of health and disease, including essential anatomical terms.

SPMD 1190. Clinical Practicum I**2 Credits (2)**

Introduction to the clinical aspects of the athletic training education program. Must maintain at least 3.0 GPA. May be repeated up to 4 credits.

Learning Outcomes

1. The Athletic Training Program application procedures.
2. The ability to perform selected taping and wrapping techniques.
3. Knowledge of HIPAA guidelines, pre-participation physical examinations, environmental illnesses, the history of Athletic Training and its governing bodies, Evidence Based Practice and its

implications in the field of athletic training, evaluation procedures for the injured athlete, NMSU AT program and its affiliated clinical sites.

4. Proper documentation for the athletic training environment including SOAP notes.

SPMD 1195. Clinical Practicum II**3 Credits (3)**

Athletic training related content and psycho-motor skills are introduced, enhanced, and assessed in the classroom and clinical rotations.

Emphasis is on competencies and proficiencies previously instructed in didactic courses while providing increased depth of understanding and clinical practice. Must maintain a 3.0 GPA. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate knowledge and skill in emergency situation prevention, recognition, and management.
2. Demonstrate proficiency in basic skills of musculoskeletal injury recognition and management.
3. Demonstrate competency in basic pre-participation exam skills, including but not limited to taking vital signs.
4. Demonstrate competency in wound care and first aid.

SPMD 1310. Introduction to Kinesiology**3 Credits (3)**

An introduction to the field of Kinesiology which will explore areas such as exercise physiology, sport and exercise psychology, motor behavior, biomechanics, strength and conditioning, exercise prescription, as well as professional and graduate programs, and allied health and applied careers opportunities.

Learning Outcomes**SPMD 1350. Social Foundations of Physical Activity****3 Credits (3)**

Historical and cultural foundations and vocational, scientific, and educational data on careers in health education, physical education, and recreation.

Learning Outcomes

1. Improve students' knowledge of foundations of physical education. (Research) (Standard 4 j, k, l, m, o, p)
2. Improve students' abilities to analyze current physical activity issues based on historical, philosophical, sociological, and psychological perspectives. (Research) (Standard 4 l, m, e, g)
3. Improve students' knowledge of and ability to critically analyze how gender, race, social class, sexual orientation, and ability issues affect physical education and performance programs. (Research, Diversity) (Standard 4j, k, l, m, o; Standard 2 d, g, j, f, k)
4. Improve students' knowledge of forces influencing the development of physical education programs. In particular, attitudes, values, and beliefs about gender, race, social class, sexual orientation, and ability, etc. (Diversity, Practitioners, Reflection, Pedagogy) (Standard 1 a, b, h, l; Standard 4 j, k, l, m, o; Standard 2 a, d, g, j, f, k)
5. Improve students' knowledge of strategies for becoming an advocate in the school and/or community to promote a variety of physical activity opportunities. (Practitioners) (Standard 2 m, n; Standard 3 n, o, p, q, r; Standard 10 d, j, p)
6. Improve students' knowledge of current educational issues and trends. In particular, socio-cultural issues that affect educational, fitness, and sports settings. (Diversity, Research) (Standard 4 j, k, l, m, o, p Standard 9 a, c, e, f, m, n)
7. Improve students' knowledge of how students' learning is influenced by individual experiences, talents, and prior learning, including

- language and family/community values and conditions. (Diversity, Research) (Standard 1 b, h, l; Standard 2 d, g, j, k, m, n, o; Standard 3 l)
8. Improve students' knowledge of the impact of international changes on the content of physical education, fitness, and sports programs. (Research) (Standard 4 j, k, l, m, o, p)
 9. Improve students' ability to critically analyze how gender, race, sexuality and social class issues affect how we view the body, and how these views can affect students' health and participation in physical education, fitness, and sports programs. (Diversity, Reflection) (Standard 2 d, g, j, f, k, m, o) 1
 10. Improve students' ability to become critically aware of how their feelings, beliefs, and values in relation to gender, race, social class, sexual orientation, and ability issues will affect their abilities to work as professionals in the fields of physical education, sport, or fitness. (Diversity, Reflection) (Standard 2d, g, j, f, k, m, o Standard 9 e, d, g, l, m) 1
 11. Improve students' knowledge of and ability to critically analyze cultural stereotypes of diverse populations of people. (Diversity) (Standard 2 d, g, j, f, k, m, o) 1
 12. Improve students' knowledge of how cultural stereotypes influence the development of physical education, fitness and sport programs. (Research, Diversity) (Standard 2 d, g, j, f, k, m, o; Standard 4 j, k, m, o, p, q Standard 8 p) 1
 13. Improve students' knowledge of how groups influence individuals, and how individuals influence groups in a democratic society. (Diversity) (Standard 2 d, g, j, f, k, m, o; Standard 4 m, p;) 1
 14. Improve students' abilities to communicate in ways that demonstrate sensitivity to all learners. (Diversity, Effectiveness) (Standard 1 d, h, l; Standard 2 d, g, j, f, k, m, o) 1
 15. Students will demonstrate through writing the ability to apply the issues discussed in class to their specific fields in ways that benefit society. (Evaluation) (Standard 9 e, g, l, m) 1
 16. Students will improve their ability to take the content from readings and present it in thought provoking ways to their classmates. (Research, Evaluation, Reflection) (Standard 9 e, g, l, m; Standard 10 a, d, h, n) 1
 17. Writing proficiency is required for a passing grade in this course. (Standard 4 l) 1
 18. Improve students' abilities to use computers and other technologies to communicate, network, and/or foster inquiry. (Standard 10 g) 1
 19. Consult professional literature, colleagues, and other resources to develop as a professional.(Standard 10 e, f, h, l, n, r)

SPMD 2130. Emergency Response in Sports Medicine **2 Credits (2)**

Designed to provide knowledge and experience in emergency care procedures, blood borne pathogens, and first aid. Students will receive certification in CPR/AED for the Professional Rescuer and in First Aid, upon successful completion of course. May be repeated up to 4 credits.

Prerequisite: Consent of Instructor.

Learning Outcomes

1. Identify the individuals involved in the Emergency Response Team
2. Construct the components of an effective emergency Action Plan
3. Assess the scene and patient during an emergency situation
4. Demonstrate proper universal precautions and wound care
5. Demonstrate effective Cardiopulmonary Resuscitation, AED use
6. Demonstrate effective Rescue Breathing Airway Management techniques

7. Demonstrate effective splinting techniques
8. Demonstrate understanding of the techniques utilized in cervical stabilization
9. Identify components of acute care for general medical and orthopedic emergencies.

SPMD 2210. Anatomy and Physiology I

3 Credits (3)

Detailed study of the structure and function of the human musculoskeletal, cardiovascular, respiratory, and peripheral nervous systems. Designed specifically for students interested in allied health professions.

Learning Outcomes

1. The student will learn and identify bones, connective tissue, joints and muscular structures of the human body.
2. The student will study joints and associated structures of the body.
3. The student will learn about skeletal muscle, origins, insertions, and actions.
4. The student will learn about the fundamentals of the nervous system and associated structures.
5. The student will learn about smooth and cardiac muscle and their association actions.
6. The student will learn the structures associated with the cardiovascular system (heart and blood vessels).
7. The student will learn the location of all visceral organs.
8. Evaluation of knowledge is determined through practical identification of anatomical structures via written opened ended exams.

SPMD 2210L. Anatomy and Physiology Laboratory

1 Credit (1P)

Students will engage in activities designed to enhance appreciation of the anatomical structures related to the content areas for SPMD 2210. Restricted to Las Cruces campus only.

Learning Outcomes

1. The student will learn and identify bones, connective tissue, joints and muscular structures of the human body.
2. The student will study joints and associated structures of the body.
3. The student will learn about skeletal muscle, origins, insertions, and actions.
4. The student will learn about the fundamentals of the nervous system and associated structures.
5. The student will learn about smooth and cardiac muscle and their association actions.
6. The student will learn the structures associated with the cardiovascular system (heart and blood vessels).
7. The student will learn the location of all visceral organs.
8. Evaluation of knowledge is determined through practical identification of anatomical structures via written opened ended exams.

SPMD 2250. Fitness for Health and Sport

3 Credits (3)

A study of the fitness needs for health enhancement and sport participation.

Learning Outcomes

1. Recognize the importance of incorporating positive fitness/wellness habits within one's lifestyle in terms of enhancing longevity, disease prevention, and overall quality of life.

2. Examine various physiological benefits and adaptations to such factors as muscular strength, muscular endurance, cardiovascular fitness, flexibility, and body composition when certain stimuli are applied to each. Assessment of these characteristics will be witnessed primarily in practical experiences within the course's laboratory settings.
3. Identify current trends and/or health patterns within society in regards to scientific findings, declination in health habits, and increases in health ailments.
4. Compare various nutritional concepts, specifically proper dietary habits and their impact on weight management aspects.
5. Describe the role physical activity and sport specific training play on competitive athletic performance.

SPMD 2310. Career Preparation

1 Credit (1)

From concept to implementation: Career exploration, setting up degree plans, finding graduate programs, developing professional resumes, writing letters of application, seeking letters of recommendation, and interview preparation.

Learning Outcomes

1. Career opportunities within human movement and allied health fields
2. Chose both a primary and secondary career of their interest
3. Search for appropriate graduate schools to match their career choices
4. Create a plan by aligning their undergraduate curriculum with their career choices
5. Explore additional education (dual majors, minors, and certifications specific to their chosen field)
6. Study and create a professional resume
7. Create a curriculum vita as a historical reference for future job prospects
8. Write a professional letter of application for jobs and school applications
9. Learn how to seek "outstanding" letters of recommendation 1
10. Study appropriate interview protocol 1
11. Practice interviews (one on one, panel and group)

SPMD 3010. Orthopedic Examination, Evaluation and Diagnosis of Lower Extremity Injuries

4 Credits (3+1P)

Examines normal human anatomy, mechanisms of athletic injury, and deviation from normal anatomy following athletic injury to the lower extremity. Must maintain at least 3.0 GPA. Consent of Instructor required.

Learning Outcomes

1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the lower extremity
2. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient.
3. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries.
4. Determine and apply therapeutic interventions designed to maximize the patient's participation and health-related quality of life.
5. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries.

SPMD 3050. Therapeutic Modalities

4 Credits (4)

The physiological effects, indications, contraindication, dosage, and maintenance of therapeutic modalities related to the treatment of athletic or activity-related injuries. May be repeated up to 4 credits.

Prerequisite: SPMD 2210 or BIOL 2210; 2.75 GPA.

Learning Outcomes

1. Demonstrate proper assessment techniques to identify appropriate therapeutic modalities for the treatment of injury and illnesses.
2. Design treatment plans based upon sound clinical assessment and appropriate selection of modalities that address the physiological and psychological needs of the patient.
3. Demonstrate competence with the application of a wide variety of modalities including patient preparation, modality application and modification based upon clinical findings using principles of evidence based practice.
4. Perform appropriate documentation of treatments to include patient history, evaluation, treatment goals, expectations and treatment outcomes.
5. Demonstrate competence with the collection and analysis of baseline and post-treatment data to evaluate and interpret treatment outcomes based upon principles of evidence-based practice.

SPMD 3090. Clinical Practicum III

3 Credits (3)

Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Practice sessions are conducted to assist the student in achieving clinical proficiency skills.
2. Depending on the difficulty level, selected clinical proficiencies will be evaluated in this clinical.
3. For those proficiencies indicated, students will need to show proficiency either in this clinical or in a later clinical class.

SPMD 3093. Clinical Practicum IV

3 Credits (3)

Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Identify and locate muscles, tendons, ligaments and bony structures.
2. Demonstrate basic evaluation skills, including but not limited to: taking a history, observation, differential diagnoses, palpation, ROM, neurological/circulation, MMT, special tests, clinical impression, plan.
3. Demonstrate taping, bracing skills, appropriate emergency care skills, select and properly fit athletic equipment, appropriate removal of athletic equipment in the event of an emergency, the ability to develop and answer a clinically relevant question.

SPMD 3110. Racquet Sports

2 Credits (2)

Knowledge and skills related to the racquet sports of tennis, badminton, and pickleball with emphasis on developmental strategies and skill performance that influences pedagogical content knowledge. Administrative issues will be addressed.

**SPMD 3120. Theory and Technique of Lifelong Outdoor Leisure Activities
2 Credits (2)**

Knowledge and skills related to lifelong outdoor leisure activities, including the examination of environmental science and awareness, kinesiology, and fundamental motor skills.

**SPMD 3130. Theory and Technique of Sports and Games
2 Credits (2)**

Knowledge and skills related to team sports and games, with emphasis on developmental strategies and skill performance that influence pedagogical content knowledge. Administrative issues will also be addressed.

**SPMD 3140. Designing Student Centered Afterschool Physical Activity Clubs
3 Credits (3)**

Knowledge, skills and field based practical application for creating student centered and student designed after school physical activity clubs.

**SPMD 3150. Theory and Technique of Dance and Rhythms
2 Credits (2)**

Knowledge and skills related to dance and rhythms, with emphasis on the analysis of dance elements and its role in physical education.

**SPMD 3160. Elementary School Physical Education
3 Credits (2+2P)**

Methods for teaching physical education at the elementary level. Primary focus on creating a learning environment for the acquisition and enhancement of developmentally appropriate locomotor, manipulative, and nonmanipulative skills. Field experience included. Consent of Instructor required.

Prerequisite: GPA of 2.5.

Learning Outcomes

1. All course objectives are linked to the InTASC Teaching Standards
2. Improve your knowledge of K-5 physical education content, disciplinary concepts, and tools of inquiry related to the development of a physically educated person (Standard 4 j, k, l, n, o; Standard 5 i, Standard 6 j; Standard 7 g, k, l; Standard 8 l; Standard 9 o).
3. Improve your knowledge of and ability to plan instruction based on curriculum goals/objectives and students' experiences. (Standard 1 a, b, d, e, h, i; Standard 2 a, b, c, g, e; Standard 4 j, m, n, o; Standard 5 j, k; Standard 9 a, c, h, l)
4. Improve your ability to design and teach developmentally appropriate K-5 physical education curriculum for diverse learners. (Standard 1 a, b, d, e, h, j; Standard 2 a, b, c, d, f, g, h, j, k, l, m; Standard 4 b, c, d, e, f; Standard 5 b, d, h, r; Standard 7 a, b, c, d, e, g, h, j, k, l, n, q)
5. Improve your knowledge of, and ability to, teach a variety of manipulative, nonmanipulative and locomotor skills and concepts. (Standard 7 a, b, c, d, e, g, h, j, k, l, n, q; Standard 8 l)
6. Improve your ability to teach using a variety of strategies such as cooperative learning, problem-based learning, direct instruction, etc. that facilitate learning (Standard 8 a, b, d, e, f, h, l, j, k, l, m, n, s)

**SPMD 3210. Anatomy and Physiology II
3 Credits (3)**

Detailed study of the structure and function of the human endocrine, immune, digestive, reproductive, integumentary, central nervous and renal systems. Designed specifically for students interested in allied health professions.

Prerequisite: SPMD 2210 or consent of instructor.

Learning Outcomes

1. Students will demonstrate knowledge through testing, practical skills and demonstration an understanding in visceral anatomy and physiological functioning.

**SPMD 3210L. Anatomy and Physiology II Lab
1 Credit (1)**

The students will develop skills in palpating various bony landmarks as well as origins and insertions of major soft tissues. In addition, problem based learning scenarios will be used to complement the SPMD 3210 lecture material and thereby further students understanding of certain physiologic systems including neural, digestive, reproductive, endocrine, and integumentary.

Prerequisite: SPMD 2210; SPMD 2210L; or approved transfer equivalent.

Learning Outcomes

1. To demonstrate through practical application and demonstration a comprehensive understanding of visceral operations and diseases.

**SPMD 3250. Introduction to Exercise Science: Exercise Physiology and Biomechanics
3 Credits (3)**

This course serves to provide a broad introduction to both the physiology of exercise and the mechanics of human movement. The conceptual framework of the course will allow for the development of a broad knowledge base regarding these concepts and the latter portions of the course will focus on real world application of the concepts.

Learning Outcomes

1. Students will learn a basic introduction to both exercise physiology and biomechanics and be able to demonstrate their knowledge of the introductory topics by providing real world examples.

**SPMD 3310. Lifetime Activities
2 Credits (2)**

Knowledge and skills related to the lifetime activities of swimming, weight training, and other fitness promoting activities with emphasis on learning progressions.

Prerequisite: GPA 2.5.

Learning Outcomes

1. All course objectives are linked to the InTASC Teaching Standards
2. Improve your ability to design and teach developmentally appropriate fitness lesson plans for diverse learners (e.g. aerobics, yoga, strength training). (Standard 7 a, b, c, l, j Standard 8 a, b, d)
3. Improve your ability to modify instructions, lesson plans and tasks based on students' strengths and needs. (Standard 1 b, Standard 3 e, Standard 7 b, c, i, j, l, Standard 8 a, b, d)
4. Improve your knowledge of, and ability to teach a variety fitness content (Standard 7 a, g, h, k, l, n)
5. Improve your ability to plan effective lesson plans to insure equity and sensitivity to students with diverse characteristics. This includes structuring a safe, educational environment that facilitates learning for all students. (Standard 3, e, Standard 7 q, i)
6. Improve your ability to use self-assessment and peer-assessment to reflect on your teaching and plan for adaptations/adjustments (Standard 8 b, d, Standard 9 g).
7. Improve your ability to evaluate and modify instructional resources and curriculum to better meet the needs of their students. (Standard 4 f, Standard 7 g, Standard 8 a)

**SPMD 3350. Inferential Statistics in Sport and Exercise Science
3 Credits (3)**

Statistical concepts and methods basic to experiential research to include normal distribution, z-tests, t-tests, analysis of variance and regression analysis. An understanding of sport and exercise science theory is required for students enrolling in this course

Learning Outcomes

1. Upon successful completion of this course the student will be able to competently assess exercise data using a variety of techniques that include measures of central tendency, variability, distributional assessments, correlation, regression, and mean testing (t-test and ANOVA).

SPMD 3410. Exercise Physiology

3 Credits (3)

Basic physiological principles as they apply to exercise and fitness programs. Laboratory experiences included. Requires 2.75 GPA.

Prerequisite: SPMD 2210 or BIOL 2210; GPA 2.75.

Learning Outcomes

1. To gain knowledge of the structure and function of the body systems (muscle, cardiorespiratory, etc.).
2. To gain knowledge related to the body system in reference to acute bout of exercise (responses), as well as following chronic exposure to exercise (adaptions).
3. To understand laboratory procedures used to study the body system.
4. To be able to integrate knowledge related to the function of each system and apply this information to humans undergoing exercise training.

SPMD 3450. Biomechanics

3 Credits (3)

The application of anatomical, mechanical and electrical concepts to better understand the fundamental nature of human movement.

Prerequisite: SPMD 2210 or BIOL 2210, and GPA of 2.75.

Learning Outcomes

1. Learn the basic anatomical, kinematic, and kinetic concepts
2. Learn how the human body generates mobility
3. Learn the kinematic concepts, laws, and principle that govern the human body motion
4. Learn the kinetic concepts laws, and principle that govern the human body motion
5. Learn the forces acting on the body in a fluid and how the human body motion is affected
6. Learn how to utilize the principles and concepts to solve problems

SPMD 3450L. Biomechanics Laboratory

1 Credit (1)

This course serves to provide an introduction to human movement and its analysis. The conceptual framework of the course will allow for the application of anatomical, mechanical, and electrical concepts in order to better understand the fundamental nature of movement.

Prerequisite: SPMD 2210 or BIOL 2210, GPA 2.75.

Corequisite: SPMD 3450.

Learning Outcomes

1. Use physical laws of motion to quantitatively analyze human performance.
2. Use physical descriptors of movement to qualitatively analyze human performance.
3. Apply principles of kinetics kinematics to solve problems of human motion.
4. Gain exposure to the various data collection and analysis tools in biomechanics.

5. Apply critical thinking skills to problem solving and writing assignments.
6. Use teamwork to complete an experimental motion analysis projects.

SPMD 3550. Psychology of Sport

3 Credits (3)

Development of coaching techniques to enhance sport performance based on understanding and use of psychological principles.

Prerequisite: GPA 2.75.

Learning Outcomes

1. Identify psychological characteristics associated with peak performance
2. Describe and explain factors practitioners should consider when diagnosing, designing, and implementing a mental training intervention.
3. Recognize and define the psychological constructs of –for example but not limited to–concentration, confidence, motivation, stress/ anxiety, and arousal
4. Understand how personality attributes and the environment affect human performance and injury rehabilitation

SPMD 3610. Health and Exercise Psychology

3 Credits (3)

The course examines the reciprocal relationship among physical activity, exercise behavior, and psychological determinants associated with adopting and maintaining an exercise program. Topics include theories of behavioral change, exercise psychology interventions, the benefits/ pitfalls of exercise, and psychological factors influencing patient rehabilitation.

Prerequisite: GPA 2.75.

SPMD 3650. Motor Development

3 Credits (3)

Covers development of motor skills from infancy through maturity. Focus on the principles of motor development, early motor behavior, stage theory, and assessment. Field experiences will augment lecture and readings.

Prerequisite: GPA 2.5.

SPMD 3710. Motor Learning

3 Credits (3)

An examination of the theoretical foundations and related literature that underline the learning, performing, and retention of motor skills with implications for effective teaching and coaching.

Prerequisite: GPA 2.5.

Learning Outcomes

1. Assess functional differences between motor skill types
2. Compare motor control theories and how they control human movement.
3. Critically evaluate current research in motor learning
4. Assess practice schedules and provide recommendations on how practice might be improved in both therapy and sport settings.
5. Compare the pros and cons for retention and transfer testing.
6. Examine the influence of attention on skill performance and debate the role of attention on motor skill preparation

SPMD 4010. Orthopedic Examination, Evaluation and Diagnosis of Upper Extremity Injuries

4 Credits (3+1P)

Examines normal human anatomy, mechanisms of athletic injury, and deviation from normal anatomy following athletic injury to the upper extremity. Must maintain a 3.0 GPA. Consent of Instructor required.

Learning Outcomes

1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the upper extremity
2. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient.
3. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries.
4. Determine a therapeutic intervention designed to maximize the patient's participation and health-related quality of life.
5. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patients' overall health and quality of life.

SPMD 4015. Therapeutic Exercise**3 Credits (3)**

The physiological effects, indications, contraindications, dosage, and maintenance of therapeutic modalities related to the treatment of athletic or activity-related injuries. Must maintain a 3.0 GPA. May be repeated up to 3 credits.

Learning Outcomes

1. Apply appropriate clinical reasoning to the selection of therapeutic exercises based upon evidence-based practice guidelines, relevant physical findings, indications, contradictions and precautions.
2. Demonstrate appropriate application of therapeutic exercises and techniques including selection, application, patient instruction, and documentation.
3. Design an individualized therapeutic exercise program incorporating appropriate modifications for tissue repair timelines, physiological and psychological factors, and any additional clinical findings.
4. Demonstrate effective assessment skills to determine safe levels of physical activity for patients.

SPMD 4020. Orthopedic Examination, Evaluation and Diagnosis of Core, Spine and Head Injuries**3 Credits (3)**

Advanced clinical assessment techniques and applications. Must maintain at least a 3.0 GPA. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Students will incorporate advanced clinical reasoning skills and apply clinical prediction rules as appropriate.
2. Interpret and apply physical examination findings for appropriate treatment or referral.
3. Apply clinical knowledge for diagnosing injuries and illness of the core, spine, head, and face.
4. Implement prevention guidelines associated with sudden death and catastrophic injury in athletics.

SPMD 4025. Pharmacology in Athletic Training**2 Credits (2)**

An introduction to general medical conditions and pharmacological applications in the athletic training setting. Emphasis on the laws governing the development and distribution, indications, contraindications, precautions, and interactions of prescription and over-the-counter medications. Must maintain a 3.0 GPA. May be repeated up to 2 credits.

Learning Outcomes

1. Describe the principles of pharmacology as they relate to the field of sports medicine.

2. Demonstrate the uses and abuses of drugs in sports.
3. Formulate a philosophical and ethical base of thinking in reference to the field of athletic training as it relates to pharmacology.
4. Describe federal, state and local laws, regulations and procedures for proper storage, disposal, transportation, dispensing and documentation for prescription and nonprescription medications.

SPMD 4030. Organization and Administration in Athletic Training**3 Credits (3)**

An introduction to management, leadership, financial strategies, professional development and legal issues related to the athletic training setting. Must maintain 3.0 GPA. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate mastery of health care management concepts
2. Demonstrate comprehension of legal and ethical issue in Athletic Training and healthcare management.
3. Construct policies and procedures relevant to running an athletic training clinic or organization.
4. Demonstrate basic concepts of management including distribution of financial resources, inventory and athletic training facility design/evaluation.
5. Summarize appropriate human resources policies relevant to athletic training staffing.

SPMD 4090. Clinical Practicum V**3 Credits (3)**

Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Utilize critical thinking skills and apply relevant clinical evidence in the evaluation, treatment and rehabilitation of athletic injuries of the upper extremity.
2. Perform a comprehensive evaluation of the upper extremity to include the shoulder, elbow, forearm, wrist and hand; and then design a specific plan of treatment, and rehabilitation program for injuries and conditions of the upper extremity.
3. Demonstrate an understanding of the referral process as warranted in situations dealing with athletic injuries.
4. Demonstrate an understanding of professional communication as it relates to rehabilitation, plan of care documentation and the referral process.
5. Demonstrate an understanding of the time commitment needed to perform as an ATC by completing the clinical hours required for this course.

SPMD 4093. Clinical Practicum VI**3 Credits (3)**

Athletic training psycho-motor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Students might complete a general medical rotation with this course. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Recognition of general medical conditions including emergent physical and psychological conditions for intervention, referral or return to play criteria as appropriate.

2. Demonstrate proper clinical examination techniques for the assessment of general medical conditions including signs and symptoms of catastrophic and emergent conditions.
3. Develop and implement prevention strategies for at-risk individuals and large groups.
4. Demonstrate professional communication skills as related to athletic training including both written and verbal communication.
5. Define and utilize evidence-based practice in the clinical decision making process.

SPMD 4095. Clinical Practicum VII

3 Credits (3)

Athletic training psycho-motor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Students may complete a general medical rotation as part of this course. Must maintain 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Be prepared to sit for the Board of Certification (BOC) examination.
2. Confidently understand the BOC exam format, and method of delivery.
3. Meet the requirements to maintain certification, including evidence based practice requirements and continuing education units and their reporting cycles.
4. Demonstrate competence in the following educational content areas for the practice of Athletic Training: evidence-based practice, prevention and health promotion, clinical examination and diagnosis, acute care of injury and illness, therapeutic interventions, psychosocial strategies and referral, healthcare administration, professional development and responsibility.

SPMD 4098. Advanced Athletic Training I

1-3 Credits (1-3)

Advanced clinical experiences and education in athletic training. Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainer's Association Education Council. May be repeated up to 9 credits.

Learning Outcomes

1. Describe an advanced clinical setting.
2. Demonstrate advanced clinical reasoning skills.
3. Demonstrate advanced clinical competence in one or more of the domains as described by the National Athletic Trainers Association Education Council.

SPMD 4210. Advanced Exercise Physiology

3 Credits (3)

Detailed study of the integrated response of neuromuscular, cardiovascular, and respiratory systems to acute and chronic exercise, nutrition, and environmental conditions with a strong emphasis on laboratory experiences.

Prerequisite: SPMD 3410 and GPA of 2.75 or consent of instructor.

Learning Outcomes

1. Fundamental concepts about nutrition and its application to human performance
2. Advanced understanding of nutrition and its association with human bioenergetics
3. Human bioenergetics and its responsibility for performance enhancement and outcomes
4. Energy transfer and expenditure under various physical and environmental conditions

5. Pulmonary and cardiovascular responses to exercise
6. Cardiovascular and cellular adaptations to altitude

SPMD 4250. Principles of Strength and Conditioning

3 Credits (3)

Application of research, theory, and methods of high-intensity, resistive overload training. Performance-specific topics include management, nutrition. Requires SPMD 2210 and SPMD 3410; GPA of 2.75.

Prerequisite: SPMD 3410; SPMD 2210 or BIOL 2210; GPA 2.75.

Learning Outcomes

1. Examine both applied and theoretical practices implemented towards various strength and conditioning concepts based on National Strength and Conditioning Association (NSCA) guidelines.
2. Discuss various acute and chronic adaptations to the above said applied and theoretical practices to include, but not limited to, musculoskeletal adaptation, muscular power output, speed and agility characteristics, plyometric training, body composition characteristics, and cardiovascular characteristics, among many others.
3. Recognize strength and conditioning adaptations regarding special populations, such as youth, female, and elderly populations.

SPMD 4250L. Principles of Strength and Conditioning Laboratory

1 Credit (2P)

An applied examination of the theory, principles, rules and regulations associated with various strength and conditioning exercises to include but not limited to Olympic lifting, powerlifting, bodybuilding, plyometrics, speed, agility and speed-endurance development. Lab required for Kinesiology majors.

Prerequisite: SPMD 2210 and SPMD 3410; GPA 2.75.

Corequisite: SPMD 4250.

Learning Outcomes

1. Examine applied practices towards various human performance concepts based on National Strength and Conditioning Association (NSCA) guidelines.
2. Assess various physiological adaptations to the above applied practices, including muscular hypertrophy, muscular power output, speed and agility drills, plyometric training, body composition assessment, and non-traditional training modes, among numerous others.
3. Demonstrate proficiency towards proper administration of performance assessments and exercises to participants of various skill levels as well as possess the capability of instruction and demonstration of said assessments and exercises

SPMD 4350. Exercise Testing and Prescription

3 Credits (3)

This combined lecture and lab class introduces students to the scientific basis for and principles of exercise testing and prescription. The focus is on basic approaches to exercise testing and prescription for healthy adults, while application to some special populations with chronic disease will be discussed.

Prerequisite: SPMD 2210 or BIOL 2210; SPMD 3410; GPA 2.75.

Learning Outcomes

1. Examine the appropriate administration of exercise tests for the assessment of health-related and performance-related fitness.
2. Apply principles pertaining to appropriate exercise prescription for the general population of healthy adults.
3. Analyze the psychological determinants of appropriate exercise programming.

4. Demonstrate the ability of proper diagnosis and interpretation towards a standard 12-lead ECG reading, including heart rates, heart rhythms, and common arrhythmias.
5. Assist every course participant in the preparation processes to sit for any of ACSM's credential-based exams.

SPMD 4410. Exercise for Special Populations**3 Credits (3)**

Fundamentals of kinesiology adapted for adults with various diseases and disabilities. Focus will be on the application of exercise assessment and prescription for selected conditions.

Prerequisite: SPMD 3410 or consent of instructor; GPA of 2.75.

Learning Outcomes

1. Pathophysiology of various cardiovascular, pulmonary, metabolic, skeletal muscle, orthopedic, and mental diseases.
2. Diagnostic testing of various diseases.
3. Medical management of various diseases.
4. Exercise testing and prescription for a variety of chronic disease states

SPMD 4450. Pathophysiology and Human Function(s)**3 Credits (3)**

Students will discuss basic concepts of pathophysiology such as inflammation & repair, infectious diseases, neoplasms, and diseases of specific physiological systems. In addition, students will discuss a variety of case studies, and in so doing will be able to relate pathophysiologic conditions to symptoms, activity restrictions and disability.

Prerequisite: SPMD 2210 or BIOL 2210; SPMD 2210L or BIOL 2210L; SPMD 3410; GPA 2.75.

Learning Outcomes

1. Students will develop knowledge about basic neurophysiological function of the central and peripheral nervous system
2. Individuals will develop knowledge about motor control theory and assessment of human movement.
3. Students will demonstrate their knowledge about the control processes of both gross and fine motor skills.
4. Students will apply knowledge of sensory physiology to the relationship with human performance.
5. Individuals will develop and improve their ability to communicate complex theories and physiological processes through both oral and written work.

SPMD 4510. Neurophysiology and Human Function**3 Credits (3)**

Students will discuss neurological control of human movement. Topics will include central and peripheral nervous system functions, with particular emphasis given to somatosensory afferent and motor efferent control. In addition, students will develop an understanding of the techniques employed to assess neurologic function in various patient populations.

Prerequisite: SPMD 2210 or BIOL 2210; SPMD 2210L or BIOL 2210L; SPMD 3410; and GPA of 2.75.

Learning Outcomes

1. Students will develop knowledge about basic neurophysiological function of the central and peripheral nervous system.
2. Students will be able to assess human movement using current motor control theory.
3. Students will develop knowledge about the control processes of both gross and fine motor skills.

4. Students will apply their knowledge of sensory physiology to the relationship to human performance.

SPMD 4520. Adapted Physical Education**3 Credits (3)**

Selection and scope of corrective activities in posture and body mechanics, and the adaptation of movement activities for the exceptional student.

Learning Outcomes

1. Students will learn to implement principles of inclusion into the practice of physical education.

SPMD 4530. Methods of Teaching Secondary Physical Education**6 Credits (6)**

Theoretical and practical applications of curriculum, pedagogy and assessment for teaching secondary physical education. Provides the students opportunities to develop curriculum, teach, and assess student learning through a supervised practicum in both middle and high school physical education settings. Consent of Instructor required.

Prerequisite: SPMD 3160.

Learning Outcomes

1. Improve your knowledge of 6-12 physical education content, disciplinary concepts, and tools of inquiry related to the development of a physically educated person
2. Improve your knowledge of and ability to plan instruction based on curriculum goals/objectives and students' experiences
3. Improve your ability to design and teach developmentally appropriate 6-12 physical education curriculum for diverse learners

SPMD 4540. Psychology of Coaching in Sport**3 Credits (3)**

This course is designed to focus on major topics and theories dealing with the social-psychological factors affecting the performance of athletes and teams, with practical suggestions for enhancing the effectiveness of teachers and coaches. The course will also focus on team and group dynamics that influence physical performance.

Prerequisite: SPMD 3550 or SPMD 3610.

Learning Outcomes

1. Examine current literature and popular media to understand coaching behaviors and the influence on human performance in sport and non-sport activities.
2. Compare the teaching from a psychological perspective to current understandings in motor learning.
3. Evaluate the effects of group roles on performance and team dynamics.
4. Apply practice manipulations to coaching that may alter team performance.

SPMD 4550. Exploring Extreme Human Performance**3 Credits (3)**

A reading, writing and documentary based course studying human's quest and the related sacrifices associated with participating in extreme performance activities such as the Olympics, wakeboarding, snowboarding, military special forces, ultra-run events, marathons, etc. Consent of Instructor required.

Prerequisite: Consent of instructor and GPA 2.75.

SPMD 4610. Research Seminar**3 Credits (3P)**

Capstone course for Kinesiology/Pre-Health minors. Consent of Instructor required.

Prerequisite: GPA 2.75.

Learning Outcomes

1. The Student Learning Outcomes are dependent on instructor and specific direction of course with individual group of students, similar to an independent study/research/practicum experience

**SPMD 4620. Nutrition and Metabolism of Sport
3 Credits (3)**

This course addresses the aspects of nutrition that are related to exercise performance. Emphasis will be placed on the bioenergetics systems, the components of nutrition, nutritional and body composition assessments, ergogenic aids, and diet modifications for physically active individuals and athletes.

Prerequisite: SPMD 2210, SPMD 3410.

Learning Outcomes

1. Describe the metabolism of macronutrients and micronutrients.
2. Clarify the effects of high and low-carbohydrate diets on exercise performance.
3. Explain the potential athletic benefits of manipulating fat content in our diet.
4. Discuss increasing protein intake to promote exercise adaptations.
5. Explain specific physiological functions of micronutrients.
6. Specify fluid intake recommendations before, during, and after exercise.
7. Calculate macronutrient recommendations for endurance athletes, strength/power athletes, and team sport athletes.
8. Provide nutritional recommendations for special populations of athletes.
9. Recommend nutrition strategies related to weight management goals . 1
10. Discuss the benefits and challenges of unique body composition assessments. 1
11. Provide macronutrient recommendations within a periodized training program. 1
12. Compare and contrast the ergogenic benefits of popular dietary supplements.

**SPMD 4805. Emergency Response
2 Credits (2)**

Comprehensive approach to the identification of risk factors, preparation of emergency action plans, and recognition and care of emergency medical conditions including those that may lead to sudden death. This is a hybrid course combining online instructional components and clinical skills experience including clinical safety (blood-borne pathogens, ECC, first-aid, etc), and on-field emergency management. Consent of Instructor required.

Learning Outcomes

1. Identify the individuals involved in the Emergency Response Team
2. Construct the components of an effective Emergency Action Plan.
3. Assess the scene and patient during an emergency situation.
4. Demonstrate proper universal precautions and wound care.
5. Demonstrate effective Cardiopulmonary Resuscitation, AED use.
6. Demonstrate effective Rescue Breathing Airway Management techniques.
7. Demonstrate effective splinting techniques.
8. Demonstrate understanding of the techniques utilized in cervical stabilization
9. Identify components of acute care for general medical and orthopedic emergencies

SPMD 4997. Problems**1-3 Credits (1-3)**

Independent study in either Kinesiology and/or Athletic Training May be repeated up to 9 credits.

Learning Outcomes

1. Varies

SPMD 4998. Internship**6 Credits (6P)**

A part-time internship in an approved wellness, fitness, athletic, recreation, research lab or other program as agreed upon by the internship supervisor. The student will gain experience in all phases of management and operation. This is a 6-hour internship which can be repeated for an additional 6-credit hours at the same or a different location allowing the student to gain one or multiple field experiences. Field instructor supervision will oversee the students performance. This internship may require relocation to a site outside of the Las Cruces area.

Learning Outcomes

1. Students will apply their academic program didactic knowledge, skills and abilities at a professional site gaining hands-on learning experiences under the supervision of a practicing professional
2. Students will learn in a working environment such that the internship becomes the capstone of their undergraduate education allowing them practical experience in a career field of their choice.

SPMD 5005. Foundations of Athletic Training**3 Credits (3)**

This course provides an introduction to clinical decision making and covers standard techniques and procedures for the evaluation and diagnosis of musculoskeletal injuries and common illnesses, injury prevention concepts, documentation and management. Consent of Instructor required.

Learning Outcomes

1. Demonstration of clinical decision making skills
2. Articulation of standard techniques and procedures for evaluation and diagnosis
3. Produce standardized documentation of clinical findings.

SPMD 5010. Clinical & Functional Anatomy in Athletic Training**2 Credits (2)**

This course allows students to develop applied knowledge and hands-on skills for future athletic training practitioners. Emphasizes skills for identifying musculoskeletal structures visually and via palpation, and then assessing their function. Use of anatomical and live human models to develop and demonstrate skills. Acceptance into the MSAT program.

Learning Outcomes

1. Demonstrate knowledge of human musculoskeletal structures and function.
2. Identification of boney landmarks for assessment of musculoskeletal conditions.
3. Demonstrate appropriate palpation of muscles, bones and joints for musculoskeletal assessment.
4. Demonstrate knowledge of actions, origins, insertions and innervations of the major muscle groups of the human body.
5. Demonstrate appropriate techniques for assessment of functional movements.

SPMD 5015. Graduate Athletic Training Seminar II**1-3 Credits (1-3)**

Advanced seminar topics in athletic training. Students will explore more specialized topics within the field of athletic training under the

direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program. Students should be prepared to further explore topics previously covered in SPMD 5310 (Graduate Athletic Training Seminar I) Students may engage in teaching and research opportunities in unique areas. Students may explore athletic training topics within the classroom or independently through designated resources. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate increased knowledge within the designated topic areas identified for the semester.
2. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5020. Graduate Athletic Training Research I

1-3 Credits (1-3)

Advanced research topics in athletic training. Students will explore research and evidence based practices within the field of athletic training. Students will work under the direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program faculty member. Students should be prepared to further explore research topics within a specific discipline with the intent of disseminating and sharing information with the athletic training community. topics previously covered in SPMD 5310 (Graduate Athletic Training Seminar I) Students may engage in teaching and research opportunities in unique areas May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate increased knowledge within the designated topic areas identified for the semester.
2. Demonstrate increased skill in assessing and conducting research for the athletic training community

SPMD 5025. Graduate Athletic Training I

1-3 Credits (1-3)

Advanced clinical experiences and education in athletic training. Students will examine topics in athletic training in conjunction with faculty members within the Commission on the Accreditation of Athletic Training Education (CAATE) Athletic Training Program at New Mexico State University . Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainers' Association Education Council. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate increased knowledge within the designated topic areas identified for the semester.
2. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5030. Graduate Athletic Training II

3 Credits (3)

Advanced clinical experiences and education in athletic training. Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainers' Association Education Council. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate increased knowledge within the designated topic areas identified for the semester.
2. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5050. Clinical Education I

3 Credits (3)

Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice. Consent of Instructor required.

Learning Outcomes

1. Demonstrate basic evaluation, taping, bracing and emergency care skills.
2. Select and properly fit protective equipment for a variety of injury and sport scenarios.
3. Demonstrate proper equipment removal for emergency care of the injured athlete.
4. Perform a pre-participation examination including physical evaluation, documentation and referral if needed.

SPMD 5120. Lower Extremity Injury Evaluation + Lab

4 Credits (4)

This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the lower extremity. Consent of Instructor required.

Learning Outcomes

1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the lower extremity
2. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient.
3. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries.
4. Determine and apply therapeutic interventions designed to maximize the patient's participation and health-related quality of life.
5. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries.

SPMD 5150. Clinical Education II

3 Credits (3)

Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.

Prerequisite: SPMD 5050.

Learning Outcomes

1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training.
2. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor.

SPMD 5180. Therapeutic Interventions I

4 Credits (3+1P)

Stud of physical rehabilitation theory and techniques used as therapeutic intervention for orthopedic injuries and conditions.

Learning Outcomes

1. Demonstrate appropriate application techniques for therapeutic modalities to include thermal, electrical, ultrasound and mechanical therapeutic modalities.
2. Demonstrate proper clinical assessment techniques to establish treatment and rehabilitation plans for a variety of orthopedic injuries and conditions including proper documentation procedures.

3. Demonstrate knowledge of the physiological and pathological processes of trauma, wound healing and tissue repair and their role/implications within the therapeutic intervention process.

SPMD 5205. Evidence Based Practice

2 Credits (2)

This course investigates the concepts of evidence based practice as it relates to musculoskeletal assessment, diagnosis and therapeutic interventions with a primary focus on clinician- and patient-oriented outcome measures and appropriate referral decisions. Students will explore primary literature focused on clinical questions related to a comprehensive approach to injury evaluation.

Learning Outcomes

1. Define evidence-based practice as it relates to athletic training clinical practice.
2. Explain the role of evidence in the clinical decision-making process.
3. Describe and differentiate the types of quantitative and qualitative research, research components, and levels of research evidence.
4. Describe a systematic approach (eg, five step approach) to create and answer a clinical question through review and application of existing research.
5. Develop a relevant clinical question using a pre-defined question format (eg, PICO= Patients, Intervention, Comparison, Outcomes; PIO = Patients, Intervention, Outcomes).

SPMD 5220. Upper Extremity Injury Evaluation + Lab

4 Credits (3+1P)

This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the upper extremity. Consent of Instructor required.

Learning Outcomes

1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the upper extremity
2. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient.
3. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries.
4. Determine a therapeutic intervention designed to maximize the patient's participation and health-related quality of life.
5. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patient's overall health and quality of life.

SPMD 5250. Immersive Clinical Experience

3 Credits (3P)

Integration of clinical competencies during an immersive, supervised, field based experience in athletic training to link theory into practice. May be repeated up to 6 credits.

Prerequisite: SPMD 5150.

Learning Outcomes

1. Students will be proficient in the day to day operations of an athletic training room.
2. This immersive experience will prepare students for future employment as a full-time athletic trainers.
3. Students will demonstrate skills in all aspects of athletic training including patient-centered care, clinical examination, diagnosis and intervention, prevention, health promotion and wellness and healthcare administration.

SPMD 5280. Therapeutic Interventions II

4 Credits (3+1P)

A detailed study of the physiological effects, indications, contraindication, dosage, and maintenance of modern therapeutic devices related to the treatment and rehabilitation of orthopedic injuries and conditions.

Prerequisite: SPMD 5180.

Learning Outcomes

1. Demonstrate proper clinical assessment techniques to establish treatment and rehabilitation plans for a variety of orthopedic injuries and conditions including proper documentation procedures.
2. Demonstrate knowledge of the physiological and pathological processes of trauma, wound healing and tissue repair and their role/implications within the therapeutic intervention process.
3. Design treatment plans based upon sound clinical assessment and appropriate selection of modalities that address the physiological and psychological needs of the patient.
4. Demonstrate competence with the collection and analysis of baseline and post-treatment data to evaluate and interpret treatment outcomes based upon principles of evidence-based practice.
5. Demonstrate competence with the application of a wide variety of modalities including patient preparation, modality application and modification based upon clinical findings using principles of evidence based practice.

SPMD 5310. Inferential Statistics in Sports and Exercise Science

3 Credits (3)

This course serves to provide an introduction to statistical analyses. The conceptual framework of the course will allow for the application of a variety of statistical concepts in order to better understand the nature of data associated with scientific literature publications. Consent of Instructor

Learning Outcomes

1. Upon successful completion of this course the student will be able to competently assess exercise data using a variety of techniques that include measures of central tendency, variability, distributional assessments, correlation, regression, and mean testing (t-test and ANOVA).

SPMD 5350. Principles of Strength and Conditioning

3 Credits (3)

Application of research, theory, and methods of high-intensity, resistance training. Performance-specific topics include management, nutrition, exercise prescription, periodization, lifting techniques, testing, and evaluation. Course will emphasize standards set forth by the National Strength and Conditioning Association preparing students interested in sitting for the NSCA certification examinations. Consent of Instructor

Learning Outcomes

1. Understanding of general physiology and its responses to acute and chronic exercise
2. Understanding of cardiovascular effects of exercise, training and sport
3. Understanding of strength training affects on special populations such as youth, women and the elderly
4. Understanding of musculoskeletal changes from exercise, training and sport
5. Practicality and application of power and strength training
6. Comprehension of training programs and how they pertain to different training aspects

7. Demonstrate principles of plyometrics and training
8. Understand and demonstrate principles of periodization

SPMD 5370. Research Methods in Kinesiology

3 Credits (3)

This course will provide students with graduate-level understanding of research methods. Specifically, the course is designed to prepare students to critically read, understand, and evaluate research; retrieve scholarly articles; and develop research-related skills for further graduate education and professional work. Students will be trained to become scientific thinkers rather than anecdotal thinkers.

Learning Outcomes

1. Be able to accurately identify a research problem.
2. Conduct a literature search and summarize literature to develop a research problem.
3. Develop a hypothesis and research statement appropriate to their specific research interests.
4. Determine an appropriate study design/method to test the hypothesis.
5. Demonstrate understanding of measurement concepts such as validity, reliability, scales of measurement, field tests, and laboratory tests.
6. Interpret statistical analyses, tables, and summaries presented in research.
7. Understand research ethics.
8. Use written and verbal forms for reporting research.

SPMD 5410. Biomechanics

3 Credits (3)

The application biomechanical analysis of human movement as it relates to human performance through the use of anatomical, mechanical and electrical concepts. Consent of Instructor

Learning Outcomes

1. The student will be able to competently assess physical anatomy, analyze linear and angular forces, examine gait, understand the relationships between kinetics and kinematics, understand how muscle and bone architecture impact human movement, and be familiar with the utilization of various data collection methods used in evaluating and improving human movement.

SPMD 5450. Exercise for Special Populations

3 Credits (3)

Fundamentals of kinesiology adapted for adults with various diseases and disabilities. Focus will be on the application of exercise assessment and prescription for selected conditions. Consent of Instructor

Learning Outcomes

1. To develop an understanding of the pathophysiology of various cardiovascular, pulmonary, metabolic, skeletal muscle, orthopedic, and mental diseases.
2. To provide a medical perspective in the treatment and management of individuals with these conditions in which exercise therapy may be beneficial.
3. To provide a sound understanding of exercise testing and prescription for a variety of chronic disease states.
4. To be able to assess, interpret, and evaluate case studies of diseased individuals and to develop comprehensive rehabilitation programs based on this information.

5. To develop the ability to articulate / present information of various diseases / conditions in a professional manner both formally and in a one on one setting.

SPMD 5510. Psychology of Sport

3 Credits (3)

Development of coaching techniques to enhance sport performance based on understanding and use of psychological principles. Consent of Instructor

Learning Outcomes

1. Identify psychological characteristics associated with peak performance
2. Describe and explain factors practitioners should consider when diagnosing, designing, and implementing a mental training intervention.
3. Recognize and define the psychological constructs of –for example but not limited to–concentration, confidence, motivation, stress/ anxiety, and arousal.
4. Understand how personality attributes and the environment affect human performance and injury rehabilitation.

SPMD 5550. Skill Acquisition and Performance

3 Credits (3)

Behavioral and physiological examination factors that influence the acquisition and performance of motor skills. Consent of Instructor

Learning Outcomes

1. Describe and explain the principles and processes underlying skilled performance
2. Know the factors to consider when diagnosing, designing, and assessing learning experiences
3. Understand the elements of an effective instructional plan for skill acquisition

SPMD 5575. Advanced Motor Development

3 Credits (3)

Advanced coverage of motor development topics including: Theoretical perspectives of motor development; the sequential, age-related, continuous process of physical growth and maturation; changes in movement behavior from infancy to older adulthood; external influences on development of motor skills; research approaches in motor development. Consent of Instructor

Learning Outcomes

1. Describe the historical progression of motor development within the broader field of kinesiology
2. Explain the various theories and foundational concepts of motor development
3. Understand and apply the processes (social, cognitive, perceptual) involved in motor skill development throughout the lifespan (infancy, childhood, adolescence, adulthood)
4. Identify procedures and methodologies used to assess various aspects of motor development
5. Interpret the supporting literature and research related to the fundamental principles of motor development
6. Apply and transfer the knowledge gained to develop a research proposal to enhance understanding of a motor development topic of interest

SPMD 6005. Athletic Training Research I

2 Credits (2)

Instruction and development of research skills through the study of published reports and readings in athletic training and related fields.

Consent of Instructor required.

Learning Outcomes

1. Describe a systematic approach (eg, five step approach) to create and answer a clinical question through review and application of existing research.
2. Develop skill in utilizing multiple scales for critical appraisal of literature and research studies.
3. Develop a relevant clinical question utilizing a predefined question format and conduct a literature review on the subject.
4. Describe multiple forms of research, research and literature resources and the differences between narrative reviews, systematic reviews and meta analyses.
5. Describe and apply concepts of diagnostic accuracy and clinical prediction rules as they pertain to patient centered care and evidence based practice.

SPMD 6010. Organization and Administration in Athletic Training

2 Credits (2)

Organization and administration of athletic training services including management, leadership, financial, human resources, facility, information technology and risk management.

Learning Outcomes

1. Students will employ values consistent with the NATA code of ethics for all health care administration actions.
2. Demonstrate knowledge of legal, ethical and risk management concepts in athletic training and health care administration.
3. Demonstrate mastery of a variety of health care management concepts.
4. Demonstrate comprehension of fiscal management strategies, resource management and facility design as it relates to athletic training.

SPMD 6020. Evaluation of the Head, Neck, Spine and Torso

3 Credits (3)

This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the head, neck and spine.

Prerequisite: SPMD 5220.

Learning Outcomes

1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the head, neck, spine and torso.
2. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient.
3. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries and illnesses.
4. Determine a therapeutic intervention designed to maximize the patient's participation and health-related quality of life.
5. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patients' overall health and quality of life.

SPMD 6050. Clinical Education III

3 Credits (3)

Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.

Prerequisite: SPMD 5150.

Learning Outcomes

1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training.
2. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor.

SPMD 6110. Professional Preparation

3 Credits (3)

Knowledge and skills for successful pursuit of athletic training credentials, employment and continuing professional competency; emphasis on current topics and issues contributing to the professional preparation of athletic training. Student must be enrolled in their final semester of the MSAT program to enroll in this course.

Learning Outcomes

1. Students will create a profile with the Board of Certification (BOC) in preparation for their BOC Examination
2. Students will analyze their individual strengths and weaknesses through practice examinations in order to prepare for a successful challenge of the BOC Examination
3. Students will demonstrate knowledge of basic human resources policies and procedures and the hiring process for athletic trainers.
4. Students will self-assess professional competence and create professional development plans according to personal and professional goals and requirements

SPMD 6150. Clinical Education IV

3 Credits (3)

Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.

Prerequisite: SPMD 6050.

Learning Outcomes

1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training.
2. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor.
3. Students will demonstrate professional behaviors congruent with the ethical standards of the profession of athletic training.
4. Students will develop, implement, and revise policies that pertain to prevention, preparedness, and response to medical emergencies and other critical incidents.

SPMD 6280. General Medical Conditions & Therapeutic Medications

4 Credits (3+1P)

Pathophysiology, assessment, and appropriate intervention and referral for general medical conditions and disabilities; common diagnostic tests and imaging assessment tools; commonly used therapeutic medications.

Prerequisite: SPMD 5280.

Learning Outcomes

1. Recognition of general medical conditions including emergent physical and psychological conditions for intervention, referral or return to play criteria as appropriate.

2. Demonstrate proper clinical examination techniques for the assessment of general medical conditions including signs and symptoms of catastrophic and emergent conditions.
3. Demonstrate knowledge of common therapeutic medications and the general medical conditions they treat within the fields of athletic training and sports medicine.
4. Demonstrate knowledge of the principles of pharmacology, including pharmacokinetics and pharmacodynamics, as they relate to the fields of athletic training and sports medicine.
5. Demonstrate knowledge of federal, state and local laws, regulations and procedures for proper storage, disposal, transportation, dispensing and documentation dealing with prescription and non-prescription medications.

SPMD 6310. The Social Construction of the Body

3 Credits (3)

This course will explore how people's health and physical activity experiences and choices are often shaped by cultural narratives and expectations of the male and female body. Designed for graduate students in allied health and physical activity professions

SPMD 6350. Advanced Exercise Physiology

3 Credits (3)

Detailed study of the integrated response of neuromuscular, cardiovascular and respiratory systems to acute and chronic exercise, nutrition and environmental conditions with a strong emphasis on laboratory experience. Consent of Instructor

Learning Outcomes

1. Fundamental concepts about nutrition and its application to human performance
2. Advanced understanding of nutrition and its association with human bioenergetics
3. Human bioenergetics and its responsibility for performance enhancement and outcomes
4. Energy transfer and expenditure under various physical and environmental conditions
5. Pulmonary and cardiovascular responses to exercise
6. Cardiovascular and cellular adaptations to altitude

SPMD 6410. Cardiovascular Physiology

3 Credits (3)

This graduate level course provides an in-depth study of cardiovascular structure and function. The course assumes that students have a strong background in human physiology. Topics include, but are not limited to: cellular structure of the heart and vascular system; cardiac function, including electrophysiology of the heart; vascular function; neurohumoral control of the heart and circulation, organ blood flow, exchange function of the microcirculation; the impact of common cardiovascular diseases on cardiovascular structure and function, and cardiovascular adaptations to chronic exercise. Consent of Instructor

Learning Outcomes

1. The student will demonstrate a comprehensive knowledge cardiovascular structure and function
2. The student will be able to relate common cardiovascular pathophysiology to cardiovascular functional impairments and physical functional limitations.
3. The student will be able to discuss chronic exercise training adaptations on the cardiovascular system and their value as a treatment strategy for cardiovascular diseases.

SPMD 6450. Skeletal Muscle: Structure and Function

3 Credits (3)

Basic muscle morphology and physiology with molecular and cellular adaptations in skeletal muscle as consequences to varying exercise regimens. Consent of Instructor

Learning Outcomes

1. To gain knowledge of the structure and function of skeletal muscle
2. To gain knowledge related to the skeletal muscle in reference to cellular and molecular responses and adaptations to exercise
3. To understand laboratory procedures used to study muscle metabolism
4. To develop ability to scientifically critique published papers and present them in a professional manner

SPMD 6510. Designing Resistance Training Program

3 Credits (3)

Detailed study of the physiological concepts associated with designing resistance-training programs for children, women, seniors, athletic performance and rehabilitation. Consent of Instructor

Learning Outcomes

1. Fundamental components associated with resistance training and exercise prescription
2. Compare and contrast isometric, dynamic, variable, isokinetic, eccentric, concentric resistance training
3. Design programs guided by a needs analysis
4. Demonstrate appropriate techniques and implement systems for training
5. Study physiological adaptations of resistance training for women, children, seniors, athletics and rehabilitation
6. Understand anatomical and physiological changes associated with detraining
7. Integrate components and concepts of resistance training for program design (periodization)
8. Explore alternative training programs

SPMD 6710. Project

1-12 Credits (1-12)

Selected projects for doctoral students. May be repeated up to 12 credits.

Learning Outcomes

1. Students will develop research skills through the work on projects with faculty members.

SPMD 6750. Kinesiology Research

1-3 Credits (1-3)

Research to be conducted under the direction of a Kinesiology faculty member. May be repeated up to 15 credits.

SPMD 6996. Special Topics

1-3 Credits (1-3)

Offered under various subtitles that indicate the subject matter. May be repeated up to 9 credits.

Learning Outcomes

1. Varies

SPMD 6999. Capstone Project I

3 Credits (3)

Students will prepare an individualized capstone project

Prerequisite: SPMD 5205.

Learning Outcomes

1. Varies

SPMD 7000. Doctoral Dissertation**1-18 Credits (1-18)**

Doctoral Dissertation hours to be conducted under the direction of a Kinesiology Faculty. May be repeated up to 18 credits.

Learning Outcomes

1. Varies

STAT-STATISTICS

STAT 3110. Statistics for Engineers and Scientists**3 Credits (3)**

Modern probability and statistics with applications to the engineering sciences.

Prerequisite(s): C- or better in MATH 1521G or MATH 1521H.

STAT 4210. Probability: Theory and Applications**3 Credits (3)**

Basic probability distributions including binomial, normal; random variables, expectation; laws of large numbers; central limit theorem.

Prerequisite(s): C- or better in MATH 2530G and C- or better in at least one-3000 level MATH or STAT course.

Learning Outcomes

1. Be able to compute discrete probabilities using combinatorial methods.
2. Understand and use conditional probability, independence and Bayes' Formula to compute probabilities.
3. Demonstrate understanding and use of discrete and continuous random variables including Bernoulli, Binomial, Poisson, Geometric, Normal, Exponential and Gamma.
4. Understand joint and conditional probability distributions and use them to compute probabilities.
5. Learn about basic limit theorems such as the Central Limit Theorem and the Laws of Large Numbers.

STAT 4220. Statistics: Theory and Applications**3 Credits (3)**

Point and interval estimation; sufficiency; hypothesis testing; regression; analysis of variance; chi-square tests. May be repeated up to 3 credits.

Prerequisite: C- or better in STAT 4210.

STAT 5210. Probability: Theory and Applications**3 Credits (3)**

Same as STAT 4210 with additional work for graduate students.

STAT 5220. Statistics: Theory and Applications**3 Credits (3)**

Same as STAT 4220 with additional work for graduate students. May be repeated up to 3 credits.

STAT 5230. Elementary Stochastic Processes**3 Credits (3)**

Markov chains, Poisson processes, Brownian motion, branching processes, and queuing processes, with applications to the physical, biological, and social sciences. May be repeated up to 3 credits.

Prerequisite: STAT 5210 or consent of instructor.

STAT 5310. Foundations of Probability**3 Credits (3)**

Probability spaces, expectation and conditional expectation, limit theorems and laws of large numbers. May be repeated up to 3 credits.

Prerequisite: MATH 5460.

STAT 5320. Advanced Topics in Stochastic Processes**3 Credits (3)**

Markov processes, martingales, Brownian motion, the Ito calculus, stochastic differential equations.

Prerequisite: STAT 5310.

Learning Outcomes

1. Understand the notion of a stochastic process.
2. Learn the basic properties of special stochastic processes: Markov processes and martingales.
3. Study and assimilate the fine properties of a particular instance of the stochastic process known as Brownian motion that is both a Markov process and a martingale.
4. Understand the application of Brownian motion known the Ito calculus and become fluent in its use.
5. Apply the Ito calculus to study stochastic differential equations.

STAT 5335. Linear Models**3 Credits (3)**

Core topics include distribution of quadratic forms, theory of regression, analysis of variance and covariance in linear models. Advanced topics chosen from random and mixed linear models, generalized linear, growth curve, and nonlinear models, quartile and copula regression. May be repeated up to 6 credits.

Prerequisite(s): STAT 5330.

STAT 5340. Advanced Theory of Statistics I**3 Credits (3)**

Testing hypotheses, probability and sufficiency, uniformly most powerful tests, unbiasedness, invariance, and minimax principle.

Prerequisite: STAT 5220 or consent of instructor.

STAT 5330. Continuous Multivariate Analysis**3 Credits (3)**

Theory and applications of the multivariate normal distribution. May be repeated up to 3 credits.

Prerequisite: STAT 5220, or consent of instructor.

STAT 5345. Advanced Theory of Statistics II**3 Credits (3)**

Estimation of parameters; unbiased estimators; equivariance; Bayes properties; large sample theory and optimality. May be repeated up to 3 credits.

Prerequisite: STAT 5340 or consent of instructor.

STAT 5348. Topics in Probability and Statistics**3 Credits**

Topics in modern probability and statistics. The material covered will reflect current research topics in the field and may vary each time the course is offered. To be taken up to 3 times. May be repeated up to 9 credits.

Learning Outcomes

1. Gain knowledge of advanced methods in the areas of probability and statistics.
2. Develop potential to explore literature in the areas of of probability and statistics.
3. Develop potential to conduct supervised research in the areas of of probability and statistics.

SUR-SURVEYING

SUR 143. Civil Drafting Fundamentals**3 Credits (2+2P)**

Introduction to drafting in the field of Civil Engineering. Drawings, projects, and terminologies related to topographic, contour drawings,

plan and profiles, and street/highway layout. Restricted to Community Colleges only. Taught with ET 143 and DRFT 143.

Prerequisite: DRFT 109.

Learning Outcomes

1. Use appropriate drafting/technical terminology.
2. Identify of the different types of Civil Engineering work drawing plan sets.
3. Understanding and the use of the terminologies used in the industry.
4. Use AutoCAD Civil 3D.
5. Enter appropriate data into AutoCAD software in order to retrieve necessary outcomes.
6. Plot/Print different types of civil engineering working plans.
7. Read, interpret and understand engineering drawings.
8. Define and understand the different types of engineering drawings.

SUR 222. Introduction to Geomatics

3 Credits (2+3P)

Theory and practice of geomatics as applied to plane surveying in the areas of linear measurements, angle measurements, area determination, differential and trigonometric leveling, and topographic mapping.

Prerequisite: A grade of C- or better in MATH 1250G or higher.

Learning Outcomes

1. Perform basic distance and angular measurements.
2. Evaluate the quality of collected measurements.
3. Utilize a measuring tape.
4. Determine a plumb line.
5. Set up a level line.
6. Set up a tripod and total station.
7. Utilize a plumb rod.
8. Understand the role of surveying in civil engineering and construction-related fields.
9. Understand new technologies is surveying.

SUR 285. Precise Digital Mapping

3 Credits (3)

Photogrammetric Mapping Principles, digital sensor including optical cameras, terrestrial, surveying control, IMU & GPS integration, stereo photography, analytical triangulation, orthorectification, precision and accuracy of measurement systems, sUAS (Small Unmanned Aerial Vehicles) applications to geospatial data collection and practical applications project fight/pre planning, sensor platform, FAA regulations and restrictions, introduction to laser scanning systems. Restricted to Las Cruces campus only.

Learning Outcomes

1. Understand the basic principles of photogrammetry.
2. Perform photo measurements and computation.
3. Be able to design aerial surveying projects.
4. Define the basic principles of analytical photogrammetry.
5. Explain the different steps in aerial triangulation.

SUR 292. Legal Principles and Boundary Law I

3 Credits (3)

Fundamentals of real property law; principles of land description; survey evidence and procedure in boundary determination, order of importance of conflicting elements; liability, ethical and professional principles in boundary surveying; NM professional practice act; NM Minimum Standards, contemporary issues in boundary determination.

Prerequisite: C- or better in SUR 222.

Learning Outcomes

1. Demonstrate an understanding of surveying boundary laws.
2. Describe procedures for locating real property boundaries.
3. Read, interpret, and write legal descriptions of real property.
4. Perform legal research of case and statutory law.
5. Communicate research findings through written and oral presentations.

SUR 312. Public Land Survey System Boundaries

3 Credits (3)

Fundamentals of the U.S. Public Land Survey System; rules for the survey of the public lands, field surveys; the rectangular system, corners, monuments, evidence; dependent and independent resurveys, corner restoration; plats and field notes, patents.

Prerequisite: A grade of C- or better in SUR 222.

Learning Outcomes

1. Understand how the USPLSS was developed and used.
2. Develop the ability to locate and identify USPLSS survey monuments.
3. Recognize the need for restoring lost corners and apply proportionate methods.
4. Perform computations for simple PLSS section subdivisions.
5. Demonstrate an ability to read, write and interpret USPLSS legal descriptions.

SUR 315. Precise Digital Mapping

3 Credits (3)

Photogrammetric Mapping Principles, digital sensors including optical cameras, terrestrial, surveying control, IMU & GPS integration, stereo photography, analytical triangulation, orthorectification, precision and accuracy of measurement systems, sUAS (Small Unmanned Aerial Vehicles) applications to geospatial data collection and practical applications project fight/pre-planning, sensor platform, FAA regulations and restrictions, introduction to laser scanning systems.

Learning Outcomes

1. Understand the basic principles of photogrammetry.
2. Perform photo measurements and computation.
3. Be able to design aerial surveying projects.
4. Define the basic principles of analytical photogrammetry.
5. Explain the different steps in aerial triangulation.
6. Understand the basics of LiDAR surveys.

SUR 328. Construction Surveying & Automation Technologies

3 Credits (2+3P)

Construction Surveying Principles: conventional and machine controlled. Layout alignments, grades, various infrastructure, buildings. Understand error identification, common quality control checks and blunder identification. Alignments and station/off set, types of construction layout of infrastructure: roads, bridges, utilities (including subsurface), buildings, industrial; reading and interpreting construction plans, data management, horizontal, vertical and spiral curves, slope staking, machine control basics, applications and data managements. Use of electronic files and liability issues. Layout alignments, grades, various infrastructure, buildings. Ability to understand data integration in automated machine control, work flow processes.

Prerequisite: A grade of C- or better in both, (SUR 222 or DRFT 222) and (MATH 1435 or MATH 1511G).

Learning Outcomes

1. Acquire the ability to answer test questions on professional surveying exams.

2. Develop the ability to appropriately collect, analyze, interpret and apply surveying and surveying-related data.
3. Develop the ability to recognize, analyze, and solve surveying and surveying-related problems.
4. Develop the ability to work on teams.

SUR 351. Spatial Data Adjustment I

3 Credits (3)

Theory of random error in observations/measurements. Use of statistics in spatial data analysis, statistical testing, advanced data structures. Emphasis on computer based problem solving and programming to solve spatial data problems.

Prerequisite: A grade of C- or better in the following: (SUR 222 or DRFT 222) and (MATH 1435 or MATH 1511G) and (A ST 311G or MATH 1350G).

Learning Outcomes

1. Acquire the ability to answer questions on professional surveying exams.
2. Acquire a sound and fundamental understanding of the mathematical principles underlying surveying measurements and computations.
3. Develop the ability to appropriately analyze, interpret, and apply survey and survey-related data.
4. Develop the ability to recognize, analyze, and solve survey and survey-related problems.

SUR 361. Geodesy/Geodetic Control Surveying

3 Credits (3)

Horizontal and vertical control network design and consideration. Understand ellipsoid, geoid, horizontal and vertical datum, coordinates, precise leveling, astronomic, establishment of state plane zones, understanding reporting. Transform data between geodetic Latitude/Longitude, state plane, ground data, perform geodetic computations, ability to design GPS networks utilizing CORS stations, network adjustments. Perform a control survey, process data, adjust network, and prepare control report with Meta-data.

Prerequisite: A grade of C- or better in the following: (SUR 222 or DRFT 222) and (MATH 1435 or MATH 1511G).

Learning Outcomes

1. Define the different coordinate systems and geometric models used to represent the shape of the Earth.
2. Be able to perform surveying computations on the sphere and ellipsoid.
3. Distinguish between the different map projections systems.
4. Explain the effects of gravity in survey measurements, especially in precise leveling.
5. Outline how earth motions affect surveying measurements and the different time systems.
6. Explicitly indicate which of the student outcomes listed in Criterion III or any other outcomes are addressed by the course.

SUR 401. Ethics and Professionalism in Surveying and Mapping

3 Credits (3)

Ethics as applied to the surveying profession. Includes case studies and problems. May be repeated up to 3 credits.

Learning Outcomes

1. An ability to communicate effectively with a range of audiences.
2. An ability to understand ethical and professional responsibilities and the impact of technical and/or scientific solutions in global, economic, environmental, and societal contexts.

SUR 412. Advanced Topics in Boundary Surveying

3 Credits (2+3P)

Advanced land boundary topics including water boundaries, mineral claims, Spanish and Mexican land grants, state and national boundaries. May be repeated up to 3 credits.

Prerequisite: A grade of C- or better in SUR 312.

Learning Outcomes

1. Identify land boundary topics

SUR 450. Senior Project

3 Credits (3)

Research project prepared by student. Includes class presentation. Students will learn how to research after the end of their formal education. Students must be in Senior Standing to enroll.

Learning Outcomes

1. An ability to identify, formulate, and solve broadly defined technical or scientific problems by applying knowledge of mathematics and science and/or technical topics to areas relevant to the discipline.
2. An ability to formulate or design a system, process, procedure or program to meet desired needs.
3. An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions.
4. An ability to communicate effectively with a range of audiences.

SUR 451. Spatial Data Adjustment II

3 Credits (3)

Rigorous analysis of the theory of observations as applied to spatial data, application of least squares adjustments, ability to perform statistical analysis to determine accuracy of final product, constrained/free geospatial data integration, error ellipses, and pre-analysis of spatial data acquisition procedures.

Prerequisite: A grade of C- or better in SUR 351.

Learning Outcomes

1. Understand the theory of least squares as applied to survey measurements
2. Understand the relevance of weighting survey observations
3. Be able to adjust vertical, horizontal and 3D networks by least squares
4. Be able to transform coordinates between similar coordinate systems
5. Be able to analyze survey errors and detect survey blunders

SUR 452. Surveying Practicum

3 Credits (3)

Surveying practice under the direction of a licensed, professional land surveyor requiring an approved number of hours. Planned work between the student and the surveyor should be designed to be part of a project that integrates spatial data. An individualized syllabus should be developed collaboratively with the industrial partner and approved by the geomatics faculty. The final deliverable must be certified by the licensed professional land surveyor. A written report by the student is required. Credit is given to past work experience in cases where students can demonstrate that requirements for the practicum are met and should be approved by geomatics faculty.

Learning Outcomes

1. Demonstrate a level of technical competency, based upon completing the requirements of a geomatics technology curriculum.
2. Students are expected to successfully and professionally complete a "real" project. Additionally, student work is employed to assess most of the program's outcomes for program assess.

SUR 461. GNSS Positioning**3 Credits (2+3P)**

Logistics of GNSS data collection, the GPS signal, codes and biases, error sources, differences between relative and autonomous GNSS positioning, code phase carrier phase, DGPS static and RTK surveys. Geodetic and GPS standards and specifications GNSS data processing, network adjustments, and evaluation of spatial data accuracy practical applications of GNSS May be repeated up to 3 credits.

Prerequisite: A grade of C- or better in SUR 361.

Learning Outcomes

1. Outline the relationship of geodesy to satellite positioning systems.
2. Describe the procedure of GNSS surveys.
3. Differentiate between different GNSS surveying techniques.
4. Identify GPS standards and specifications.

SUR 464. Legal Principles and Boundary Law II**3 Credits (3)**

Advanced boundary determination, evaluation of written and field evidence. Advanced application of PLSS subdivision, special surveys (water, mineral, and reservations), NM Standards, and laws. Preparation of boundary survey plats and reports. ALTA/NSPS Surveys and Standards.

Prerequisite: A grade of C- or better in both, SUR 292 and SUR 312.

Learning Outcomes

1. Application of the rules of evidence as concerning to boundary surveys.
2. Demonstrate understanding between original, resurveys, and retracements.
3. Acquire the ability to perform advanced section subdivisions.
4. Understand the issues of professional liability and ethical practice.

SUR 485. Emerging Techniques in Geospatial Technologies**3 Credits (3)**

Hydrographic, Altimetry, Space borne Imaging Systems, Mobile Mapping Systems, Mining and Agriculture Surveying Principles, Ranging technologies and applications such as LiDAR, SAR, and Bathymetry. Principles of terrestrial & airborne laser scanning, point cloud data management & extraction, scan registration and processing, and advanced ranging data acquisition systems. Consent of Instructor required.

Prerequisite(s): Senior standing.

Learning Outcomes

1. Outline the different techniques in mapping seabed.
2. Describe the procedure of LIDAR mapping.
3. Outline the remote sensing technologies used in mapping.
4. Recognize the UAV mapping technologies.
5. Produce surveying products from new technologies in geomatics.

SURG-SURGICAL TECHNOLOGY

SURG 120. Surgical Technology Clinical I**2-4 Credits (6P)**

This is a health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. This course is designed to prepare the student to enter the surgical environment. This course provides an introduction to the operating room, observation of surgical procedures, direct participation in the preoperative (pre-op, intra-op, post-op) preparation of individual cases and professional roles and responsibilities of individual members of the surgical team. Direct supervision is provided by the clinical professional.

May be repeated up to 4 credits. Students must be admitted into Surgical Technology Program to enroll in this course.

Prerequisite(s): BIOL 2310, BIOL 2210, BIOL 2225, NURS 150.

Corequisite(s): SURG 140, SURG 145.

SURG 140. Introduction to Surgical Technology**4 Credits (4)**

This is an orientation to surgical technology theory, surgical pharmacology and anesthesia, technology sciences and patient care concepts and is designed to prepare the student to enter the surgical environment with entry-level knowledge necessary to understand patient responses to disease, illness, hospitalization, surgical procedures, commonly used pharmacological and anesthetic agents, and legal, moral, and ethical issues that could be encountered in the surgical environment. Restricted to Community Colleges campuses only.

Prerequisite(s): Admission to Surgical Technology Program; BIOL 2310, BIOL 2225, & NURS 150.

SURG 145. Fundamentals of Perioperative Concepts & Techniques**4-5 Credits (3+3P)**

This is an in-depth coverage of perioperative concepts such as aseptic/sterile principles and practice, infectious processes, wound healing and creation and maintenance of the sterile field. This course is designed to prepare the student to enter the surgical environment with entry-level knowledge of aseptic technique principles and practices, the creation and maintenance of the sterile field including equipment, supplies and instrumentation, and basic case preparation and procedures. An introduction to diseases and disease processes that may be displayed by the surgical patient and the patient's bodily responses to disease are also included. May be repeated up to 5 credits.

Prerequisite(s): Admission to Surgical Technology Program, BIOL 2310, BIOL 2210, BIOL 2225, & NURS 150.

SURG 150. Surgical Procedures I**4-5 Credits (3-5+3P)**

This course is an introduction to surgical procedures and its related pathologies. Emphasis on surgical procedures related to general, obstetrics/gynecology, genitourinary, otorhinolaryngology and orthopedic surgical specialties incorporating instruments, equipment. It is designed to prepare the student to function actively in the surgical environment with entry-level knowledge of surgical procedures. This course expands the basic foundation principles and combines the study of common surgical procedures to include anatomy, physiology and pathophysiology. Specific patient care concepts, medications, instrumentation, equipment, supplies and complication related to selected surgical procedures will be discussed. Admission to Surgical Technology Program necessary to enroll in the course.

Prerequisite(s): SURG 140, SURG 145, and SURG 120.

SURG 155. Pharmacology for the Surgical Technology**2 Credits (2)**

This is an orientation to surgical pharmacology and anesthesia and is designed to prepare the student to enter the surgical environment with knowledge necessary to categorize the classification of drugs, calculate drug dosages and identify the therapeutic use, routes of administration, indications, contraindications and adverse effects of pharmacologic agents used in the perioperative setting. This course is the foundation for the acquisition of program specific competencies as identified by the AST Core Curriculum. Restricted to Carlsbad campus only.

SURG 160. Surgical Procedures II**6 Credits (6)**

This an introduction to surgical procedures and related pathologies. Emphasis on surgical procedures related to thoracic, peripheral vascular, plastic/reconstructive, ophthalmology, cardiac and neurological surgical

specialties incorporating instruments. The course is designed to prepare the student to continue to function actively in the surgical environment with entry-level knowledge of more complex surgical procedures. This course expands the basic foundation principles and combines the study of complex surgical procedures to include anatomy, physiology, and pathophysiology. Specific patient care concepts, medications, instrumentation, equipment, supplies, and complications related to specific surgical procedures will be discussed. Realities of clinical practice and concepts of death and dying will also be discussed. Admission to Surgical Technology Program necessary to enroll in the course.

Prerequisite(s): SURG 150, SURG 260.

SURG 230. Professional Readiness

2 Credits (2)

This course transitions the student into professional readiness for employment, professional readiness for attaining certification and professional readiness for maintaining certification status. Admission to Surgical Technology Program necessary to enroll in the course.

Prerequisite(s): SURG 140, SURG 145, SURG 120, SURG 150, SURG 260.

Corequisite(s): SURG 160, SURG 265.

SURG 260. Surgical Technology Clinical II

4 Credits (12P)

This is a health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. This course is designed to provide the student the opportunity to function actively in the role as a surgical technologist and health care team member in a clinical setting under the direct supervision of faculty and health care staff. Applications of basic principles and practices combined with a supervised clinical experience participating in common surgical procedures is the focus. Admission to Surgical Technology Program necessary to enroll in the course. Restricted to Community Colleges campuses only.

Prerequisite(s): SURG 120, SURG 140, & SURG 145.

SURG 265. Surgical Technology Clinical III

4 Credits (9P)

This is a health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. This course is designed to provide the student the opportunity to function actively in the role of a surgical technologist and health care team member in a clinical setting under the direct supervision of faculty and health care staff. Refinement and application of basic principles and practices combined with entry-level employment competency expectations is the focus. Preparation for the National Certification Examination for Surgical Technologists is also included. Admission to Surgical Technology Program necessary to enroll in the course.

Prerequisite(s): SURG 260.

TBGD-TRANSBORDER & GLOBAL HUMAN DYNAMICS

TBGD 5110. Introduction to Transborder and Global Human Dynamics

3 Credits (3)

Overview of current theories, concepts and issues concerning transborder and global human dynamics. Introduction to key debates and areas of inquiry.

Learning Outcomes

1. Develop knowledge of current interdisciplinary scholarship and debates regarding theories, concepts and issues in the study of transborder and global human dynamics

2. Develop skills in critical analysis of key debates and in the oral and written presentation.

TBGD 6991. Research Design in Transborder and Global Human Dynamics

1-6 Credits (1-6)

Development of individual research projects through critical reflection on debates concerning culturally appropriate methodologies, collaborative work with community partners, and the responsible conduct of research with regard to transborder and global human dynamics.

Learning Outcomes

1. Develop individual research project through identification of main research questions, methods of data collection and analysis, significance to the broader field of transborder and global human dynamics and goals for application of findings in society.
2. Develop skills in the Responsible Conduct of Research and completion of proposals for IRB approval.
3. Develop appreciation for conducting research in collaboration with community partners to address societal needs.

TBGD 6998. Fieldwork and Community Engagement in Transborder and Global Human Dynamics

1-6 Credits (1-6)

Implementation of research projects through field work, individually or in direct collaboration with community partners.

Learning Outcomes

1. Completion of projects designed to collect data individually and /or in collaboration with community partners using a Community-Based Participatory Research (SCBPR) framework.
2. Dissemination of findings to the scholarly community as well as community partners and the general public.

TBGD 7000. Dissertation

1-18 Credits (1-18)

Completion of major research project on a significant aspect of transborder and global human dynamics. Dissemination of findings in academic and community forums. Students must have approval of from their doctoral committee to enroll.

Learning Outcomes

1. Completion of a significant and in-depth research project in the area of transborder and global human dynamics.
2. Presentation of findings in academic conferences.
3. Preparation of publishable work from the dissertation research.
4. Dissemination of findings in alternative formats for community partners and the general public.

TCEN-ENVIRONMENTAL/ENERGY TECH

TCEN 101. Energy for the Next Generation

3 Credits (2+2P)

This course will survey a broad range of sources of energy, types of energy, energy storage, and the forms of energy. Students will be exposed to theory in the classroom, laboratory exercises, and field trips to provide them with a solid foundation for all subsequent energy related environmental courses. Crosslisted with: OETS 101.

Prerequisite(s)/Corequisite(s): OETS 118 or MATH 1215. Restricted to: Community Colleges only.

TCEN 105. Building Analyst I

3 Credits (2+2P)

This course is designed to provide the foundational knowledge and expertise necessary for the energy auditor and home performance contractor. Crosslisted with: OETS 105. Restricted to: Community Colleges only.

TCEN 106. Building Analyst II
3 Credits (2+2P)

Designed to prepare the student for the BPI Building Analyst Certification. This course will walk the student through the hands-on process of conducting visual building inspections, diagnostic testing, identifying improvement opportunities, documenting a home's performance and preparing a scope of work. Crosslisted with: OETS106.

Prerequisite(s)/Corequisite(s): TCEN 105 or OETS 105. Restricted to: Community Colleges only.

TCEN 110. Photovoltaic Application
4 Credits (3+2P)

This course will provide an introduction to Photovoltaic (PV) installation. The course will provide instruction on site selection, prep, installation, and maintenance for photovoltaic applications. Students that complete the course and have the opportunity to take the entry level exam with the North American Board of Certified Energy Practitioners (NABCEP) en route to becoming Certified Installers. Restricted to: Community Colleges only. May be repeated up to 4 credits.

Prerequisite/Corequisite: TCEN 101.

Learning Outcomes

1. Write a detailed analysis using a 6-step problem solving approach to an equipment or process problem
2. Categorize and document system malfunctions, which will be discussed during the pass-down period in a production environment
3. Organize relevant training material to be discussed during teamwork training sessions
4. Identify safety hazards associated with electro-mechanical industrial production systems
5. Use a systematic approach to troubleshoot, identify, and perform corrective maintenance procedures in a system
6. Identify the subsystems of an industrial system and their function
7. Demonstrate the startup, operation, and power down programming sequences for an automated system
8. Apply automated troubleshooting programs to locate / identify fault in a production system
9. Evaluate real time statistical process control data (SPC) to determine (+ -) control limit corrections in a production environment 1
10. Identify personal areas in which student may be able to strengthen student's professional skills 1
11. Assess personal "development" paths, which will ensure a constant advancement through evolving technology careers 1
12. Demonstrate required skills for changing or creating and evaluating real time statistical process control (SPC) data associated with an industrial production process/program

TCEN 111. Basic Electrical Principles I, DC Circuits
4 Credits (3+2P)

Course begins with the basics of electricity and DC circuits. Includes categorization of material properties within conductors, semiconductors, and insulators. Gradual progression tackles more complex topics like DC circuit analysis of series and parallel circuits, including Kirchhoff's laws, Thevenin's & Norton's theorems, and superposition. Finally DC combination circuits, magnetism and electromagnetism, generators and motors are covered. Emphasis on safety throughout. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): OETS 104 or MATH 1215. Restricted to Community Colleges campuses only.

TCEN 112. PV Power Generation Design Fundamentals
3 Credits (2+2P)

A study of photo voltaic design basics, photo voltaic (PV) Cells, modules, and system components; electrical circuits; grid-tied/grid-interactive PV system design and sizing for use on homes; solar electric products and applications; and understanding energy conversion from sunlight to electricity, and working with solar conversion equipment. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): TCEN 111 and (OETS 104 or MATH 1215). Restricted to Community Colleges campuses only.

TCEN 113. OSHA 10 Hour Construction Hazard Identifications
1 Credit

Intended for entry-level participants to provide instruction on a variety of construction safety and health standards. Topics include Introduction to OSHA, Electrical, Ladder, Excavation, Scaffold, and Forklift Hazards, Fall Protection, Materials Handling, Personnel Protective Equipment and Confined Space Entry Hazards. Meets OSHA 10-Hour Requirements.

TCEN 115. Wind Power Generation Design Fundamentals
3 Credits (2+2P)

Course covers wind turbine module descriptions and functions and wind system installation, operation, and troubleshooting. Additional topics include wind energy harvesting and the conversion process from the generator system to electricity. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): TCEN 111 and (OETS 104 or MATH 1215). Restricted to Community Colleges campuses only.

TCEN 121. Basic Electrical Principles II, AC Circuits
4 Credits (3+2P)

Course begins with an overview of the primary components of AC circuits, such as resistors, inductors, rectifiers, transformers and capacitors, and then gradually introduces new, more complicated topics like applying AC principles in power generation and generators, motors, parallel and combination circuits, troubleshooting and evaluation of circuit conditions. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): TCEN 111 and (OETS 104 or MATH 1215). Restricted to Community Colleges campuses only.

TCEN 156. Building Envelope
3 Credits (2+2P)

Designed to prepare the student for the BPI Building Envelope Certification. This course will provide the principles behind building performance testing and the purpose of completing a comprehensive energy audit. Through lecture and subsequent field training, the student will learn how to use building diagnostics to develop a prescriptive plan for enhancing comfort, health & safety, building durability, and energy savings. The student will learn how to outline the follow-up process required after completion of the retrofit. Crosslisted with: OETS156.

Restricted to: Community Colleges only.

Prerequisite(s): TCEN 106 or OETS 106.

TCEN 205. NEC for Alternative Energy
4 Credits (2+4P)

This hands-on course will cover the National Electrical Code specifics concerning photovoltaic installation. Also code compliant wiring of basic electrical systems will be covered. Existing installations will be visited and studied. Restricted to Community College campuses only. May be repeated up to 4 credits.

Prerequisite: TCEN 101 and ELT 105.

Learning Outcomes

1. Identify all code sections relevant to the different types of Alternative energy systems.
2. Locate problems in alternative energy sources and provide solutions to correct them.
3. Student will have a basic understanding of different types of renewable energy and how to apply the NEC to each type of renewable energy source.
4. Explain what types of renewable energies work best for different geographical locations.
5. Students will also gain hands on experience working with solar photovoltaics, wind turbines and solar thermal panels.
6. Effectively present technical information through written communication
7. Accurately perform course specific calculations
8. Work effectively as a team
9. Locate data and information utilizing the NEC and other various sources 1
10. Interpret information and instructions 1
11. Identify appropriate governing bodies and associated regulations 1
12. Assess cost comparisons for different types of energy applications 1
13. Accurately perform energy production analysis

TCEN 220. Cooperative Experience**1-3 Credits (1-3)**

Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): MAT 235. Prerequisite(s): TCEN 180. Restricted to: TCEN majors. Graded: S/U Grading (S/U, Audit). Restricted to: Community Colleges only.

TCEN 221. Roofing Materials and Methods**3 Credits (2+2P)**

Covers application techniques and estimation of asphalt and wood roofing products and accesories including gutters and flashing. Presents roof penetration, roof loading issues, and energy system installation requirements for mounting photo voltaic or solar thermal systems.

Prerequisite(s): TCEN 112.

TCEN 222. Photo Voltaic Grid Tie Installation**4 Credits (3+2P)**

This is a more advanced course culminating in a PV system-to-grid connection. This course includes gathering site specific data, design, wire type and sizing specific to project, installation of all solar modules and balance of system (BOS) components, and grounding and bonding of system components, all in accordance with the latest NEC. Upon project design approval a system will be commissioned for the grid. Decommissioning will commence after measurements and troubleshooting as directed by the instructor. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): TCEN 121 and TCEN 223. Prerequisite(s): TCEN 111 and TCEN 112. Restricted to Community Colleges campuses only.

TCEN 223. National Electric Code Principles in Relation to Photo Voltaic
2 Credits (2+1P)

Focuses on all sections of the National Electrical Code and local code requirements applicable to photo voltaic electrical installation. A partial list of areas covered is chapters one through four and section 690, "Solar Photovoltaic Systems" of the National Electrical Code.

Prerequisite: TCEN 112.

Prerequisite/Corequisite: TCEN 222.

Learning Outcomes

1. Identify the requirements for safe and practical solar PV installations.
2. Accurately reference, read, and interpret NEC code as it relates to PV installations (Code 690).
3. Present a compelling case of when the PV electricity market will reach "grid~ parity."

TCEN 224. Field Experience**1-3 Credits (1-3)**

Student will collaborate with instructor in proposing, defining, implementing, and analyzing outcomes of a project in the Environmental and Energy fields of study. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: TCEN majors. Restricted to: Community Colleges only.

TCEN 246. Building Weatherization & Auditor Fundamentals**3 Credits (3)**

Course provides information on how to locate air leaks and identify heat losses or gains through specific testing. Students will learn how to inspect and evaluate building envelopes, mechanical systems, and ventilation systems to determine the safety and energy consumption for each system. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): TCEN 113 and OETS 104.

Corequisite(s): TCEN 221.

TCEN 251. Advanced Photo Voltaic On/Off Grid Installation**3 Credits (2+2P)**

Photo Voltaic advanced topics to include panel racking and installation, battery storage, charge controllers, mechanical integration of arrays on buildings, and key elements involved in choosing a mounting system. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): TCEN 222. Restricted to Community Colleges campuses only.

TCEN 252. NABCEP Entry-Level Exam Review**2 Credits (2)**

Course presents knowledge, key terms, and concepts of photovoltaic systems and solar hot water systems as related to the NABCEP Entry-level exam. This exam is for those wanting to enter the workforce in either solar thermal or solar PV. Scheduling and taking the exam is the responsibility of the student. Consent of Instructor required. Restricted to Community Colleges campuses

Prerequisite(s): TCEN 222.

Learning Outcomes

1. Analyze photovoltaic markets and application trends
2. Complete practice questions for the NABCEP PV Associate Exam
3. Develop a practice of safe work environment as it relates to the installation and maintenance of photovoltaic systems according to OSHA standards
4. Apply electrical concepts to the operation and maintenance of photovoltaic systems and related equipment
5. Apply solar energy fundamentals, i.e. photovoltaic module essentials, system components, system sizing principles, system electrical design, system mechanical design, performance analysis, maintenance, and troubleshooting
6. Pass the NABCEP PV Associate exam with at least 70 percentile.

TCEN 254. Renewable Energy Internship**2 Credits (2)**

Student will receive industry-related renewable energy experiences at an approved industry location. Typical areas of hands-on practices will be installing solar PV, solar hot-water systems, or wind energy systems. May be repeated up to 6 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

Prerequisite(s): TCEN 112 and 113 and 222.

THEA-THEATER

THEA 1110G. Introduction to Theatre

3 Credits (3)

This course provides an introduction to the study of theatre. Students will examine various components that comprise theatre, such as acting, directing, playwriting, dramaturgy, scenic and costume design, stagecraft, spectatorship, history, theory, and criticism.

Learning Outcomes

1. Define and discuss basic theater terms and concepts.
2. Discuss the fundamental elements of theatre, and the ways in which theatre differs from other art forms.
3. Analyze and critique the elements of a live theatrical production.
4. Identify and describe the roles of various theatre artists including actors, directors, playwrights, dramaturges, and designers.

THEA 1210G. Acting for Non-Majors

3 Credits (3)

This class gives non-majors experience in the depth and craft of the actor's art. Students will learn various terms, techniques, and practices of acting and will demonstrate their understanding in class. Through exercises and improvisations, partnered scenes, and group work, students will be better able to appreciate the work of others as they learn techniques of performing. May be repeated up to 3 credits.

Learning Outcomes

1. Develop fundamental physical, vocal, analytical, and imaginative skills for acting for the stage.
2. Apply fundamental techniques of voice and movement for the stage.
3. Apply principles of play text analysis to understand story, character, and meaning.
4. Gain a better understanding of an actor's approach to goals, tactics, and obstacles.
5. Engage in character creation and development while preparing and performing monologues and scenes.
6. Learn a common vocabulary to help discuss the process of acting.
7. Employ collaborative methods of work with a partner and in groups.
8. Observe and evaluate acting skills of other actors.
9. Increase verbal and physical communication skills which are applicable in any field. 1
10. Develop personal and social responsibility via group work, research and self-reflection. 1
11. Increase confidence and self-esteem via continuous presentations with supportive feedback.

THEA 1221. Beginning Acting

3 Credits (3)

Basic understanding of self-expression through a variety of physical exercises, improvisation, and character study, culminating in scene or monologue work. Restricted to: THTR majors.

Learning Outcomes

1. Apply a common vocabulary that serves as a foundation in acting for the theatre major and minor

2. Communicate effectively in front of an audience, applying learned concepts while exercising freedom and control of voice, body, and imagination
3. Analyze the written character and live performance
4. Provide objective feedback to your classmate's work as well as your own, that supports a greater understanding of our craft while building trust within the collaborative ensemble

THEA 1222. Stage Movement

3 Credits (3)

Physical techniques for the actor to develop kinesthetic awareness and skills in characterization, archetypes, and stage combat. Restricted to: THTR majors.

Learning Outcomes

1. To provide fundamental training in a variety of movement techniques which can be applied to both theatrical performance and physical communication in everyday life.
2. Observation and critical skills will be advanced through class participation and outside assignments
3. Class exercises are aimed at guiding participants to uncover their own creative expression, while working with efficient, healthy body alignment

THEA 1223. The Art of Theatre

3 Credits (3)

This course introduces the variety and scope of theatre professions, the value and goals of the theatre major and an analysis of the art form from script to stage. Restricted to: Required for THTR majors majors.

Learning Outcomes

1. An overview of the history of theatre in the Western world
2. A general understanding of the artistic roles and functions within the theatre industry (including within NMSU Theatre as a model)
3. A strong preparation for independent in-depth script analysis and theatre critique

THEA 1310. Introduction to Costuming

3 Credits (3)

This course introduces students to basic skills generally used in creating costumes for theatre. During the semester students will be introduced to the costume shop, equipment, supplies, and processes. They will learn the process of sewing a garment and running a stage production.

Prerequisite(s)/Corequisite(s): THEA 1310L. Restricted to: THTR majors.

Learning Outcomes

1. Demonstrate basic hand and machine sewing skills.
2. Use basic costume craft tools and techniques.
3. Analyze fabric selection for the stage.
4. Draft and use patterns.
5. Take body measurements for patterning and construct a costume from those measurements.
6. Combine interpersonal communication skills with costume construction skills.
7. Analyze a script for costume design purposes.
8. Build a garment.

THEA 1310L. Costume Craft Lab

1 Credit (1)

Class members will assist in construction for productions in a studio environment.

Prerequisite(s)/Corequisite(s): THEA 1310.

Learning Outcomes

1. This laboratory class compliments THEA 1310: Costume Crafts.
2. It gives the student an opportunity to put into practice the skills learned in THEA 1310 as well as be introduced to and participate in the day-to-day operations of the Costume Shop.

THEA 1415. Running Crew I**2 Credits (1+2P)**

Students learn about backstage and front of house production positions and work on a technical aspect of a product in a rehearsal and performance environment.

Learning Outcomes

1. Students will learn one, or more, of the basic technical elements of theatrical crew work.

THEA 2310. Stagecraft**3 Credits (3)**

Student will explore basic skills for scenic designers and techniques of set construction for the stage, including building scenery, rigging, painting and properties.

Prerequisite(s)/Corequisite(s): THEA 2310L.

Learning Outcomes

1. Demonstrate a range of technical skills, which will qualify them to assist in the basic technical production of a play.
2. Demonstrate and apply how to safely and competently use hand tools, power tools, electrical, and electronic stage equipment.
3. Analyze the technical aspects of a play in performance.
4. Read and construct scenery from ground plans, elevations, and drawings.
5. Analyze a script from the perspective of a designer, artistic, and/ or technical director.

THEA 2310L. Stagecraft Laboratory**1 Credit (1)**

Class members will assist with construction for productions in a studio environment.

Prerequisite(s)/Corequisite(s): THEA 2310.

Learning Outcomes

1. History of scenic design and the development of present day stage design.
2. How to create and interpret basic scenic ground plans, elevations, and detail drawings.
3. To construct basic scenic structures to include flats and platforms.
4. Various techniques of scenic painting and decorating.
5. The installations of theatre lighting instruments and sound equipment.

THEA 2340. Introduction to Design**3 Credits (3)**

Introduction into our visual world via the language of designers, focusing on collaboration, creative thinking and presentation skills. The varied design professions in theatre and the performing arts will be explored.

Restricted to: Required of all THTR Majors.

Learning Outcomes

1. Apply design vocabulary and descriptions when speaking about design.
2. Identify design tools and make choices about where to use them.
3. Apply the foundation information in understanding how design tools work.
4. Apply correct terminology in assessing design and script analysis.

5. Read and understand some of the design documents commonly used in the industry.

THEA 2415. Running Crew II**1 Credit (1)**

Students learn about backstage and front of house production positions and work on a technical aspect of a product in a rehearsal and performance environment.

Learning Outcomes

1. To provide students with "hands on" experience participating in being a member of a running crew on a theatrical production.
2. Students will learn one, or more, of the basic technical elements of theatrical crew work.

THEA 2421. Vocal Production for the Actor**3 Credits (3)**

Exploration and development of the actor's vocal instrument, including relaxation, projection, diction and articulation.

Learning Outcomes

1. Apply concepts of alignment, relaxation, breath support, resonance, projection, and articulation for your personal and professional benefit.
2. Refine vocal 'problem solving' which will carry into your personal and professional life.
3. Apply vocal concepts to a variety of text in order to understand and appreciate your voice and its capabilities, both intellectually and sensorially.
4. Apply the vocal/speech tools consciously and behavior-ally, as an aid in the search for musicality of the voice in conjunction with truth and believability.

THEA 2993. Theatre Workshop I**0.5 Credits (.5)**

Required for all freshman and sophomore theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. This lab course is designed to create community via group meetings with your peers while providing a platform for our guest artists to present information regarding our profession.
2. As time allows, group discussions and sharing will further the sense of community and collaboration with your peers.
3. This forum also provides an opportunity to discuss and provide feedback for each production in the ASTC season.

THEA 2996. Theatre Topics**1-3 Credits (1-3)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

Learning Outcomes

1. Varies

THEA 300. Theatre Workshop II**0.5 Credits (.5)**

Required for all junior and senior theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

THEA 303. Theatre History I**3 Credits (3)**

History of theatre and drama from ancient Greece to the English Renaissance.

THEA 304. Theatre History II

3 Credits (3)

History of theatre and drama from the Restoration to the 20th century. May be repeated up to 3 credits.

THEA 305. Advanced Vocal Production

3 Credits (.3)

Advanced exploration and development of the actor's vocal instrument. May be repeated up to 3 credits.

Prerequisite(s): THEA 2421.

THEA 306. Script Analysis

3 Credits (3)

This class is designed to give you tools and specific processes to help you read and break down a text, so that you can make it come alive for audiences in the varied genres of theatre, film and animation.

Learning Outcomes

1. Determine the dramatic structure of a script
2. Write an analysis of a script for production
3. Verbally communicate an analysis of a script for production
4. Analyze a script from a specific perspective such as actor, director, designer, animator, etc.

THEA 307V. Society in Style: Fashion, History and Culture

3 Credits (3)

History of clothing for theatrical purposes, origins and evolution of period clothing in relation to social, political, and aesthetic factors of different periods.

THEA 308. Creative Writing: Playwriting

3 Credits (3)

Technique of one-act playwriting, and analysis of dramatic structure. Crosslisted with: ENGL 308

Prerequisite(s): ENGL 1110G.

THEA 310. Styles in Acting

3 Credits (3)

Analysis of differing styles of acting through scene work representing various time periods and genres. Consent of Instructor required. May be repeated up to 3 credits.

Prerequisite: THEA 1221 or THEA 1210 with a C- or better.

THEA 311. Acting for Film and Television

3 Credits (3)

Specific techniques of acting for the camera are explored via hands-on experiential learning and an introduction to the business of the TV/Film industry

Prerequisite(s): THEA 1221 or THEA 1210 or permission of instructor.

THEA 313. Improvisation

3 Credits (3)

Long and/or short form improvisation techniques in addition to a variety of exercises exploring terminology, character work and the elements of comedy.

Prerequisite(s): THEA 1210 or THEA 1221.

THEA 315. Theatre in New York City

3 Credits (3)

Students are introduced to the professional world of theatre via productions, speakers, and tours during this travel course. May be repeated up to 6 credits.

Learning Outcomes

1. To gain insight into professional theatre by viewing and reviewing Broadway productions in NYC.
2. To receive information about the business of theatre via guests who are theatre professionals.
3. To become familiar with job opportunities backstage via guided tours of professional theatre spaces in New York.

THEA 317. Musical Theatre

3 Credits (3)

Acting class focused on developing and refining skills necessary for performing in musicals. May be repeated up to 9 credits.

Prerequisite(s): THEA 1221 or THEA 1210 with a C- or better.

THEA 323. American Drama

3 Credits (3)

Masterworks of American drama from the 20th century to the present. Crosslisted with: ENGL 323.

THEA 324. Singing for Musical Theatre

3 Credits (3)

Students will gain an understanding of stronger vocal health, aural skills, and rehearsal practice strategies as they work on musical theatre singing techniques and performances including solos, duets and small groups, and a final public showcase.

Learning Outcomes

1. The ability to practice strong vocal habits in order to independently maintain vocal health.
2. Identify and utilize proper vocal warm-up techniques.
3. Display an improved level of music reading and aural awareness.
4. Analyze and break down a piece of theatrical music into components for focused learning.
5. Perform pieces of music theatre both individually and in a group with increased ease

THEA 330. Special Topics: Variable

3 Credits (3)

Specific subjects to be announced in the Schedule of Classes.

Learning Outcomes

1. To gain knowledge and/or skill in a specialty area of theatre

THEA 334. Introduction to Stage Makeup

3 Credits (3)

Basic principles of stage makeup: straight, character, and specialty. Includes study of various products, methods of application, and the effects of lighting on makeup.

THEA 337. Independent Study

1-3 Credits (1-3)

Students propose and design their own course not covered through regular course offerings under the guidance of faculty. Consent of Instructor required. May be repeated up to 6 credits.

THEA 341. Scene Painting

3 Credits (3)

Use of historical painting techniques in a project-driven classroom. Projects include 2-D and 3-D work, color mixing and theory, painting scenery, and the use of paint for effects.

Prerequisite(s): THEA 2310.

THEA 343. Costume Patterning

3 Credits (3)

Basic techniques in the production of flat patterns for modern and period silhouettes including some draping techniques. Consent of Instructor required. May be repeated up to 3 credits.

Learning Outcomes

1. Advanced training in costume design; the ability to create an original pattern in order to be able to make a costume item that is original

THEA 345. Costume Practicum

1 Credit (1)

A practical course intended to provide students additional experience and greater responsibility within the workings of the Costume Shop. May be repeated up to 1 credits.

Prerequisite(s): THEA 1310.

THEA 346. Scenic Practicum

1 Credit (1)

A practical course intended to provide students additional experience and greater responsibility within the workings of the Scene Shop. May be repeated up to 2 credits. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): THEA 2310.

THEA 347. Lighting Practicum

1 Credit (1)

A practical course intended to provide students hands-on experience executing theatrical lighting.

THEA 348. Running Crew III

1 Credit (1)

Students will work on a technical aspect of a production in a rehearsal and performance environment.

Prerequisite(s): THEA 1415.

THEA 349. Running Crew IV

1 Credit

Students will work on a technical aspect of a production in a rehearsal and performance environment.

Prerequisite(s): THEA 1415.

THEA 352. Costume Design

3 Credits (3)

Basic principles of costume design, including script analysis, principles of design, drawing and painting.

THEA 353. Scene Design

3 Credits (3)

Design for the performing arts. Basic design skills and projects to exercise those skills, history of design in the theatre and the designer's role in the production process. Final project includes a finished scene design.

Prerequisite: THEA 2310 or consent of instructor.

THEA 354. Sound Design

3 Credits (3)

Hands-on training in theatrical sound design and implementation.

THEA 355. Lighting Design

3 Credits (3)

Basic aspects of theatre lighting, including electricity, color theory, history, and types of lighting instruments.

THEA 356. Theatre Production

1-3 Credits

Participation in the production of theatrical performances by stage managing, acting, designing, dramaturgy, or directing. May be repeated for a maximum of 6 credits. Graded S/U.

THEA 357. Computer Scenographics

3 Credits (3)

Project-oriented course teaching basic computer modeling skills.

Projects focus on the creation of communication tools designers use in the theatrical process. Students will develop portfolios of completed projects. Consent of instructor required.

Prerequisite(s): THEA 352, THEA 353, or THEA 355.

THEA 366. Summer Theatre

1-3 Credits

Experience in professional or academic summer theatre. May be repeated for a maximum of 3 credits. Graded: S/U. Restricted to THTR majors.

Prerequisite(s): Consent of department head.

THEA 384. Stage Management

3 Credits (3)

Study of stage management techniques and their application to play production. A working knowledge of union rules, and the procedure to facilitate these through proper communication skills.

THEA 395. Directing I

3 Credits (3)

Study and application of basic stage directing techniques.

Prerequisite(s): THEA 1210 or THEA 1221.

THEA 408. Shakespeare I

3 Credits (3)

Study in Shakespeare's early poems and plays. Repeatable for up to six credits under different subtitles.

Learning Outcomes

1. Analyze Shakespeare's poetry using the methods of close reading
2. Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays;
3. Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material;
4. Work effectively in small groups to interpret a scene through performance

THEA 409. Shakespeare II

3 Credits (3)

Study in Shakespeare's later plays. ENGL 408 is not a prerequisite.

Repeatable for up to six credits under different subtitles. Crosslisted with ENGL 409.

Learning Outcomes

1. Analyze Shakespeare's poetry using the methods of close reading;
2. Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays;
3. Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material;
4. Work effectively in small groups to interpret a scene through performance.

THEA 410. Advanced Acting: Contemporary Methods

3 Credits (3)

Acting techniques will be explored focusing on current trends in the profession, from Stanislavski, to Hagen to Meisner. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: THTR majors.

Prerequisite(s): THEA 1210 or THEA 1221.

THEA 414. Collaborative Theatre-Making

3 Credits (3)

This course introduces students to the techniques, skills and practice of the collaborative creation of new theatrical material.

Prerequisite(s): THEA 1221.

THEA 417. Musical Theatre II**3 Credits (3)**

A continuation of THEA 317, allowing for more advanced musical theatre techniques.

Prerequisite(s): THEA 317.

THEA 430. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

THEA 435. Directed Reading**1-3 Credits**

Directed individualized studies. May be repeated for a maximum of 3 credits.

THEA 439. Senior Seminar**3 Credits (3)**

Course preparing students for professions in and related to the theatre. Restricted to: THTR majors.

THEA 450. The Michael Chekhov Acting Intensive**3 Credits (3)**

An intensive overview of the performance techniques attributed to Michael Chekhov, applied to theatrical scenes and presentations. May be repeated up to 6 credits. Consent of Instructor required.

THEA 535. Directed Study**1-3 Credits (1-3)**

For the highly motivated student. Independent projects and individual guidance. Graduate standing and consent of instructor required. May be repeated up to 6 credits.

TOX-TOXICOLOGY

TOX 361. Basic Toxicology**3 Credits (3)**

Introduction to the principles of toxicology, discussion of toxic agents, environmental problems, testing procedures, and regulations. Prior course work in biology and chemistry recommended. Crosslisted with: ENVS 361. May be repeated up to 3 credits.

Prerequisite: CHEM 1120G or CHEM 1225G and BIOL 2610G or BIOL 2110G.

Learning Outcomes

1. Learn how toxins are absorbed, distributed, metabolized, and excreted from living systems.
2. Demonstrate how metabolism can appreciably alter the toxicity of compounds as well as dictate the resultant toxicity with an emphasis on target organ(s).
3. Explain the specific mechanism(s) of actions of toxins targeting the liver, lung, kidney, and nervous systems.
4. Delineate how certain toxins induce cancer and/or promote the development of cancer.
5. Understand how and why certain plants and animals are poisonous and venomous, specifically linking discreet chemicals or complex mixtures to the resultant toxic manifestation.

TOX 461. Toxicology I**3 Credits (3)**

Introduction to principles of toxicology. Crosslisted with: TOX 361.

Prerequisite(s): (CHEM 1226 or CHEM 1225G) and (BIOL 2610G or BIOL 2110G).

TOX 598. Special Research Programs**1-3 Credits**

Individual investigations, either analytical or experimental. Graded S/U.

UNIV-UNIVERSITY STUDIES

UNIV 300. Preparing for the Graduate Record Examination**1 Credit (1)**

Preparation for taking the Graduate Record Examination including review, test taking strategies and practice for the verbal, quantitative and analytical sections. Graded S/U.

UNIV 350. Peer Education**3 Credits (3)**

Overview of college student development theory and its application to college student learning and peer education. Supervised experience as a peer educator with training in structured group facilitation.

Prerequisite: consent of instructor.

UNIV 361. NMSU Gospel Choir**1 Credit (1)**

Students will gain performance experience and exposure to urban contemporary gospel music. Open to all majors. May be taken for unlimited credit.

UNIV 395. Independent Study**1-3 Credits**

Individualized projects related to the field of learning assistance. May be repeated for a maximum of 3 credits.

UNIV 450. Faculty Led International Travel**1-3 Credits (1-3)**

This is an intensive Faculty Led International Program and earns an additional credit(s) for participation the FLiP. May be repeated up to 3 credits.

Learning Outcomes

1. Varies

UNIV 495. Independant Study**1-3 Credits (1-3)**

Individualized projects related to the field of learning assistance. Taught with UNIV 395.

WATR-WATER UTILITIES

WATR 120. Introduction to Water Systems**3 Credits (3)**

Introduction to and theory of groundwater sources, production, treatment, and distribution.

WATR 130. Wastewater Collection and Basic Treatment Systems**3 Credits (3)**

Introduction to wastewater characteristics, collection, and basic treatment operations.

WATR 140. Applied Water and Wastewater Math I**3 Credits (3)**

Introduction to basic water and wastewater mathematics, flows through distribution networks and collection systems, and fundamentals of flow measurement.

Prerequisite: CCDM 114 N or equivalent.

WATR 160. Systems Maintenance**4 Credits (2+4P)**

Basic tools, equipment, maintenance schedules, chlorinator troubleshooting, and chlorine safety. Hands-on training with valves, pumps, meters and chlorination equipment.

WATR 175. Programmable Logic Controllers**2 Credits (2)**

This course will introduce students to electrical safety, theory, and the function, operations, programming and troubleshooting of the PLC controlling common electrical components utilized in control circuits associated with the water and wastewater industry. Restricted to: Community Colleges only.

WATR 180. Water Chemistry**3 Credits (3)**

Basic chemistry with applications to water and wastewater analysis.

Prerequisite: CDDM 114 N or consent of instructor.

WATR 182. Water Chemistry Analysis**1 Credit (3P)**

Beginning water and wastewater laboratory analysis including gravimetric, volumetric, and quality control techniques.

Prerequisite: CDDM 114 N or equivalent or consent of instructor.

WATR 190. Water and Wastewater Microbiology**3 Credits (3)**

Overview of microorganisms associated with water and wastewater. Growth and reproduction, energy production, and methods of counting.

Prerequisite: WATR 130, WATR 180, or consent of instructor.

WATR 192. Water and Wastewater Microbiological Analysis**1 Credit (3P)**

Introduction to water and wastewater treatment operational tests such as BODs, solids testing, activated sludge control tests, use of microscope, and bacteriological techniques.

Prerequisites: WATR 130 and WATR 182, or consent of instructor.

WATR 200. Internship**3-5 Credits**

On-the-job training/work experience with municipalities or industries, working in water or wastewater treatment plants, high purity water plants, industrial waste plants, distribution systems, or wastewater collection systems. May be repeated up to 5 credits. Consent of Instructor required.

Restricted to: Water Technology majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

WATR 220. Water Treatment Systems**3 Credits (3)**

Theory of water systems operation including surface water treatment, fluoridation, sodium zeolite softening, corrosion control, iron removal, various filtration methods, and overview of SDWA.

Prerequisites: WATR 180 and WATR 182 or consent of instructor.

WATR 222. Water Systems Operation**1 Credit (3P)**

Operations of various water treatment systems including surface water treatment, sodium zeolite softeners, and various filtration methods.

Prerequisite: WATR 220 or consent of instructor.

WATR 230. Advanced Wastewater Treatment**4 Credits (4)**

Calculations and operations involved in wastewater and water reclamation plants.

Prerequisites: WATR 140, WATR 190, and WATR 192, or consent of instructor.

WATR 232. Wastewater Systems Operations**1 Credit (3P)**

Operation of pretreatment, primary, and biological treatment units.

Prerequisite: WATR 230 or consent of instructor.

WATR 240. Advanced Water and Wastewater Math II**3 Credits (2+2P)**

Advanced water and wastewater mathematics. Flow measurement. Systems head and pump curves.

Prerequisites: WATR 140.

WATR 250. Municipal Systems Management**4 Credits (4)**

Management of water utility systems including laws, finance, records, and safety.

Prerequisites: WATR 120, WATR 130.

WATR 270. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

WATR 275. Certification Review**3 Credits (3)**

Review of water and wastewater plant operations and laws in preparation for state certification exams. Restricted to Community Colleges campuses only.

Prerequisite: WATR 120, WATR 130, WATR 140, WATR 160.

Learning Outcomes

1. Identify appropriate process changes for different wastewater processes.
2. Identify appropriate process changes for different water processes.
3. Identify corrective actions for equipment failure.
4. Identify analytical data required to complete process control calculations.
5. Accurately complete water process control calculations.
6. Accurately complete wastewater process control calculations.
7. Evaluate operational problems.
8. Identify the sampling points for data collection.

WATR 285. High Purity Water Treatment Systems**3 Credits (3)**

Principles of high purity water production including microfiltration, ultrafiltration, reverse osmosis, and deionization.

Prerequisite: WATR 220.

WATR 287. Advanced Water Chemistry Analysis**3 Credits (6P)**

Sampling techniques, analysis, and evaluation of potable water contaminants using gravimetric, volumetric, spectrophotometric, and other instrumentation methods.

Prerequisite/Corequisite: WATR 285. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Evaluate invalid labs analysis to determine corrective actions.
2. Identify information/data required to complete calculations.
3. Accurately perform calculations.
4. Demonstrate correct/accurate laboratory technique.
5. Demonstrate correct/accurate laboratory technique.
6. Perform operational/laboratory duties safely.

WATR 290. Advanced Wastewater Microbiology and Chemistry**3 Credits (3)**

Covers NPDES permits and DMR calculations and reporting; 503 sludge regs, including pathogen and vector attraction reduction and pollutants; wetlands, composting, and wastewater treatment ponds microbiology; activated sludge bulking and foaming microbiology and treatment; and use of selector to remove nutrients and prevent the growth of filamentous bacteria.

Prerequisite: WATR 190, WATR 192.

WATR 292. Advanced Wastewater Analysis

3 Credits (6P)

Covers sampling techniques, analysis, and evaluation of wastewater contaminants using gravimetric, volumetric, spectrophotometric, and other instrumentation methods.

Prerequisite: WATR 190 and WATR 192.

WELD-WELDING TECHNOLOGY

WELD 100. Structural Welding I

6 Credits (3+6P)

Development of basic skills in SMAW, OFC, and OFW in accordance with the AWS entry-level welder program.

WELD 102. Welding Fundamentals

3 Credits (2+2P)

Survey of welding and cutting processes for nonmajors. Classroom instruction and laboratory work with OFC/OFW, SMAW, GMAW, FCAW, and plasma arc cutting.

WELD 105. Introduction to Welding

3 Credits (3)

Welding practices, procedures, and terminology. Welding safety, equipment types, electrode types in usage, joint design and testing procedures.

WELD 110. Blueprint Reading (Welding)

3 Credits (3)

Interpretation of prints related to welding. Emphasis on AWS standard symbols for welding, brazing, and nondestructive examination.

WELD 115. Structural Welding II

6 Credits (3+6P)

Continuation of WELD 100. Emphasis on AWS entry and advanced level welder skills with SMAW, including all-position welding with mild and stainless steel electrodes. Plasma arc and air-carbon arc cutting, metallurgy, heat treatment, and weld defects.

Prerequisite: WELD 100.

WELD 120. Basic Metallurgy

3 Credits (3)

Properties of ferrous and nonferrous materials. Service conditions and heat treatment of metals related to welding trade.

Prerequisites: WELD 100 or consent of instructor.

WELD 125. Introduction to Pipe Welding

3 Credits (2+2P)

Pipe fit-up and welding techniques for pipe fitting and pipe weld joint using SMAW, GMAW, GTAW, and FCAW, 2G welding of pipe. Restricted to: Community Colleges only.

Prerequisite(s): WELD 100, WELD 130, and WELD 140, or consent of instructor.

WELD 126. Industrial Pipe Welding

3 Credits (3)

Enhancement of WELD 125. Development of more advanced pipe welding skills.

Prerequisite(s): WELD 110, WELD 130 and WELD 140.

Corequisite(s): WELD 125.

WELD 130. Introduction to GMAW MIG)

3 Credits (2+2P)

Development of basic skills with gas metal arc welding (MIG) in accordance with AWS entry-level welder objectives. Wire electrodes, shielding/purge gases, and modes of metal transfer.

WELD 140. Introduction to GTAW TIG)

3 Credits (2+2P)

Development for basic skills with gas tungsten arc welding (TIG) in accordance with AWS entry/advanced welder objectives. Welding mild steel, tungsten electrode preparation, filler wire selection, and equipment set-up.

WELD 150. Pipe Welding II

3 Credits (2+2P)

Continuation of WELD 125; with fillet and groove welded joints in a horizontal fixed and 45-degree fixed positions (5-F, 5-G, 6-F, 6-G).

Prerequisite: WELD 125.

WELD 151. Industrial Pipe Welding II

3 Credits (3)

Enhancement of WELD 150. Development of more advanced pipe welding skills. Emphasis on industry driven test.

Prerequisite(s): WELD 125 and WELD 126.

Corequisite(s): WELD 150.

WELD 160. Introduction to SAW and FCAW

3 Credits (2+2P)

Submerged arc and flux-cored arc welding. Demonstrations and practice with machine travel submerged arc welding (SAW), flux-cored arc welding (FCAW-G, FCAW-S) on mild steel plate and pipe. Restricted to: Community Colleges only.

WELD 170. Welded Fabrication

3 Credits (1+4P)

Development of fabrication skills including basic layout, measuring, and utilization of various welding processes including out-of-position welding. Use of common shop tools.

Prerequisites: WELD 100, WELD 110, WELD 130, and OETS 104 or OETS 118.

WELD 180. GTAW II

3 Credits (2+2P)

Continuation of WELD 140. Development of more advanced GTAW skills. Emphasis on pipe welding with mild steel, stainless steel, and aluminum.

Prerequisite: WELD 140 or consent of instructor.

WELD 190. Welded Art

3 Credits (1+4P)

Students explore the possibilities of welded art in the form of sculpture, jewelry, furniture and as a framework to support other art media. Offered as an elective for students who wish to create art using welding. May be repeated up to 12 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): WELD 102.

WELD 211. Welder Qualification

6 Credits (3+6P)

Laboratory and classroom instruction on AWS and ASME Welder Performance Qualification Tests. All position plate and pipe techniques and tests for SMAW, GMAW, GTAW, FCAW, and SAW. Nondestructive and destructive examination methods. Basics of welding codes. Restricted to majors.

Prerequisites: OETS 104 or OETS 118; and WELD 100, WELD 110, WELD 120, WELD 130, WELD 140, WELD 160 and WELD 180 or consent of instructor.

WELD 221. Cooperative Experience I

1-6 Credits

Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor. Student will meet in a weekly class. Graded S/U. Restricted to majors.

Prerequisites: WELD 100 or WELD 101 and consent of instructor.

WELD 255. Special Problems in Welding Technology

1-6 Credits

Individual studies in areas of welding technology. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

WELD 295. Special Topics

1-4 Credits

Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

WSAM-WATER SCIENCE & MGT

WSAM 470. Environmental Impacts of Land Use and Contaminant Remediation

3 Credits (3)

The course will cover the integrated assessment of soil erosion, contaminant transport in soil and water, and contaminant remediation from site scale to watershed scales. Understanding of the controlling factors for each type land use impact will be gained through the use of risk assessment, case studies, and computer modeling. Case studies will illustrate the processes under various environmental applications. This course will also cover the application of solute transport principles and methods for the remediation of contaminated soil and groundwater. It will also discuss the contaminated site characterization, monitoring, and remediation design. Discussions of innovative methodologies will be supported with case studies. May be repeated up to 3 credits. Crosslisted with: ENVS 470.

WSAM 550. Special Topics

1-4 Credits (1-4)

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 9 credits.

Learning Outcomes

1. Readings, discussions, and/or field and laboratory investigation of selected problems.

WSAM 551. Earth Data Retrieval

3 Credits (3)

This course covers topics related to identifying sources, preprocessing, utilizing earth data that can be used to monitor some hydrological and water related variables, vegetation growth and related biophysical properties. The course focuses on developing students' skills on how to handle and analyze high-level large amounts of research data in different formats (i.e. .hdf). The course highlights the use of remote sensing and land surface models-based (NLDAS) earth observation datasets (e.g. NDVI, LST, Ta, and ET). The course uses some open-source tools including Python, API as well as MATLAB. Crosslisted with: RGSC 551.

WSAM 575. Climate Studies, Water and Society

3 Credits (3)

The course provides a brief description of the Earth's climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water availability) vulnerability of human systems (e.g. agriculture) to climate change, and mitigation and adaptation strategies. Crosslisted with: RGSC 575.

WSAM 585. Land Cover Analysis for Natural Resources

3 Credits (3)

This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course

provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis. Crosslisted with: RGSC 585.

WSAM 589. Landscape Hydrology Modeling

3 Credits (3)

Understand the landscape scale of hydrologic cycle and related hydrological processes. Quantitatively evaluate hydrological system components. Retrieve, visualize and model some of the physical processes using some of the available tools. Consent of Instructor required.

WSAM 590. System Dynamics

3 Credits (3)

This course takes a system dynamics approach to the study of economics and natural resources management. We will examine some of the example theories such as Solow-Swan model and endogenous growth theories as well as the tragedy of the commons, using system dynamics tools to uncover the feedback and explicitly examine its impact on the dynamic behavior of the system. Through these examples, we will learn how to develop, validate, and use system dynamics models for policy design and analysis.

Learning Outcomes

1. Identify common generic structures and behavioral modes in socioeconomic and ecological systems.
2. Define important feedback theories that explain the behavioral modes in socioeconomic and ecological systems.
3. Implement the system dynamics method to translate the feedback theories into dynamic simulation models.

WSAM 595. Hands-On Transboundary Aquifer and Community System Convergence Seminar

1 Credit (1)

An opportunity for graduate researchers to build partnerships with their colleagues in the IWR cohort and with our expert collaborators. Graduate researchers present their research methods, share lessons from their research activities, and report on experiences in the field and in the IWR program. An opportunity for academic, industry, and stakeholder project partners to share career development and research convergence insight with the cohort. May be repeated up to 18 credits.

Learning Outcomes

1. Students will learn about natural and social science convergence.
2. Convergence tool skill-building.
3. Students will learn how to lead the coordination of international, multidisciplinary research collaboration.

WSAM 598. Internship

1-9 Credits (1-9)

Out-of-classroom learning experiences to gain relevant education, experience, and expertise. Field-based learning providing transformative education and hands-on training. May be repeated up to 18 credits.

Learning Outcomes

1. Gain the experience necessary to engage confidently in community-centered hydrologic and social science approaches to water research.
2. Students will learn how to lead the coordination of international, cross-disciplinary research collaboration.

3. Gain experience applying academic and research knowledge in professional capacities.
4. Develop cross-sector communication skillsets.

WSAM 599. Masters Thesis

1-15 Credits (1-15)

Thesis. May be repeated up to 88 credits. Consent of Instructor required. Restricted to: Water and Science Management majors. Thesis/Dissertation Grading.

WSAM 600. Doctoral Research

1-15 Credits (1-15)

Assigned credit for research performed. May be repeated up to 15 credits. Consent of Instructor required.

Learning Outcomes

1. Identify appropriate research methodologies.
2. Reflect on their own research, identifying lessons learned, strengths, and ways to improve.
3. Communicate confidently and constructively with faculty advisors.

WSAM 605. Arid Land Water Resources

3 Credits (2+2P)

The course will cover various issues of relevance to water resources and water supply management within the Southwest US and other semiarid and arid regions. Discussions may include development and sustainability, climate change and drought, socioeconomic and cultural, and transboundary issues. May be repeated up to 3 credits. Crosslisted with: ENVS 605.

WSAM 610. Water and Sustainable Economic Development

3 Credits (3)

For graduate students in the Water Science and Management or other research degree programs, use the water economics literature as a model for student research leading to an M.S. thesis or Ph.D. dissertation.

WSAM 700. Doctoral Dissertation

1-15 Credits (1-15)

Dissertation for Water Sciences and Management Majors May be repeated up to 88 credits. Restricted to: Water Sciences and Management majors. Thesis/Dissertation Grading.

Water Science and Management (Agricultural Water Resources) - Master of Science	173
Water Science and Management (International Water Resilience) - Doctor of Philosophy	209
Water Science and Management (International Water Resilience) - Master of Science	174
Water Science and Management (Water Economics and Policy) - Doctor of Philosophy	210
Water Science and Management (Water Economics and Policy) - Master of Science	174
Water Science and Management (Water Informatics) - Doctor of Philosophy	210
Water Science and Management (Water Informatics) - Master of Science	175
Water Science and Management (Water Quality and Treatment) - Master of Science	175
Water Science and Management (Water Quality Treatments) - Doctor of Philosophy	211
Water Science and Management (Watershed and Aquatic/Riparian Wetlands) - Doctor of Philosophy	211
Water Science and Management (Watersheds and Aquatic/Riparian Wetlands) - Master of Science	176
WATR-WATER UTILITIES	1906
Weed Science - Undergraduate Minor	340
WELD-WELDING TECHNOLOGY	1908
Wildlife Science - Undergraduate Minor	387
William Conroy Honors College (Undergraduate)	1301
WSAM-WATER SCIENCE & MGT	1909
